A reading of this complaint does not show allegations of use and manipulation of Aetna. Furthermore, to allow plaintiffs leave to amend this complaint after the commencement of the second trial and over five years after the initiation of this action would not have served the interests of justice.

With respect to the exclusion of Aetna from the second trial, *Rule 59(a) of the Federal Rules of Civil Procedure* specifically authorizes the granting of a new trial **[*459]** as to "all or any of the parties and on all or part of the issues."

The jury in the first trial found that Aetna was not a member of the conspiracy. In denying plaintiffs' motion for a new trial with respect to Aetna, the Court found that the verdict was not against the weight of the evidence. The Court noted, among other considerations, that the record contained no evidence of any communication between Aetna and the First Wisconsin defendants during the relevant period, much less an agreement to restrain competition and that there was no evidence indicating that Aetna was even aware of First Wisconsin's interest in the development during much of the **[**16]** relevant period. The Court also found that there were substantial business justifications for Aetna's subsequent refusal to continue financing the project. See, *Juneau Square v. First Wis. National Bank of Milwaukee, supra at 1326*.

The Court's rulings on evidence and its instruction relating to Aetna were in keeping with the Court's prior decision. The Court allowed plaintiffs to introduce certain evidence pertaining to Aetna but refused to permit plaintiffs to relitigate Aetna's involvement in the alleged conspiracy.

The Court concludes that it did not err in instructing the jury regarding Aetna and in precluding proof and argument that Aetna was controlled or manipulated by the other defendants.

Plaintiffs challenge the Court's mortgage foreclosure law instructions, alleging that it was erroneous in its overall impact and failed to provide the jury with a fair and accurate standard for evaluating the conduct of the parties.

Plaintiffs specifically object to the particular aspects of the Court's instruction dealing with the operation of acceleration clauses and extensions of time to cure defaults. Plaintiffs also assert that the instruction ignored the equitable character of the **[**17]** procedure and the considerable latitude vested in the Court in foreclosure actions.

The Court instructed the jury in part as follows:

> The general purpose of a mortgage is to provide a security for payment of a debt or performance of an obligation. Thus, if a borrower is not able to pay the amounts due, the lender can look to the value of the property mortgaged to obtain payment. The law permits mortgages to be bought and sold and this right to transfer ownership of a mortgage is also important to its value. When a mortgage is in default, several things may occur. Holders of defaulted mortgages may grant the property owner additional time in which to discharge his obligations under the mortgage, but such extensions are entirely voluntary, are not required by law and may be made subject to any conditions the mortgage holder wishes to impose in order to protect its interest. If such an agreement is not made, the holder of the mortgage must invoke the aid of the Court to enforce the provision of it, of this mortgage agreement. The mortgagee is authorized by law to foreclose on that mortgage and requires the property owner to either one, pay the full amount of the debt immediately **[**18]** if the mortgage so provides or two, relinquish to the holder of the mortgage all rights in the mortgaged property.
> If the failure to pay real estate taxes constitutes a default under the terms of a mortgage, and the mortgagee is entitled to payment of the full amount of the mortgage upon default, payment of the real estate taxes would not bar the mortgagee from maintaining a foreclosure action. A foreclosure suit is a legal proceeding supervised by a court. Rules of equity or fairness are applied to such proceedings to insure fair treatment of both the creditor and the debtor. If the judge finds that the property owner has defaulted on the mortgage, he will enter judgment in favor of the mortgage holder. The law allows the party against whom the judgment was entered to redeem his property by paying the amount of the judgment within one year. If the property is not redeemed, the mortgage holder may then have the real estate sold at a sheriff's sale in order to recover the debt due it. (Tr. 10,587-88)

[*460] The statement that extensions of time to discharge an obligation under a mortgage are voluntary and "not required by law" is not erroneous. Such extensions are **[**19]** not required by law and may, as the Court stated, be made subject to any conditions the mortgage holder wishes to impose. The operation of acceleration clauses was also correctly presented to the jury.

Contrary to plaintiff's contentions, the Court did not ignore the equitable considerations in a foreclosure action. Rather, the Court stressed that "rules of equity or fairness are applied to such proceedings to insure fair treatment of both the creditor and debtor." (Tr. 10,588)

After carefully examining its instruction on mortgage foreclosure law, the Court concludes that the instructions, as a whole, accurately and unbiasedly set forth the applicable law. The instruction provided the jury with a fair and accurate standard for evaluating the conduct of the parties.

Plaintiffs argue that the Court erred by unduly emphasizing their burden of proof in giving the "equal hypothesis" instruction and by thereafter giving the "inference upon inference" instruction.

The following "equal hypothesis" instruction was stated to the jury:

> If from the evidence you cannot determine whether the allegations have been proved or not proved then your verdict should be for the defendants. (Tr. 10,560)

[20]** Plaintiff relies on *South East Coal Co. v. Consolidated Coal Co., 434 F.2d 767 (6th Cir. 1970)* to support its position that this instruction was redundant, confusing and should have been omitted. The district court in the South East Coal Co. case did not give the equal hypothesis instruction and the defendant appealed on this and other grounds. The court of appeals stated that the trial judge should have directed a verdict if he believed that the evidence on both sides was equal in weight. The court then explained:

> It appears that the "equal hypothesis rule" is simply a negative way of phrasing the rule of law that a plaintiff must sustain his burden of proof. Thus, if a plaintiff does not come forth with evidence, when considered in light of opposing evidence, from which a jury could infer the truth of an alleged proposition over its contraproposition, the plaintiff has not met his burden of proof. *Id. at 777*.

The Court finds the "equal hypothesis" instruction was not erroneous.

With respect to the "inference upon inference" instruction, the Court told the jurors:

> A "reasonable inference" is defined as a process of reasoning whereby from the facts otherwise admitted **[**21]** or established by the evidence in the light of your common knowledge and experience, a reasonable and logical conclusion may be drawn that a certain fact is true. A reasonable inference is, therefore, to be thoroughly distinguished from a mere guess or conjecture. The law does not permit speculation. Moreover, on the basis solely of one inference so drawn a further inference may not be drawn.
> In other words, you may not pile inference on inference, but may draw an inference only from facts or circumstances which you find to have been established by a preponderance of the evidence. (Tr. 10,561-62)

Taken in context, this instruction was not erroneous. It explained to the jury the distinction between reasonable inferences and mere speculation and correctly stated that inferences must be drawn from a factual basis. Plaintiffs' motion for a new trial on this ground must be denied.

ALLEGED ERRORS IN RULINGS ON EVIDENCE

Plaintiffs challenge various evidentiary rulings of the Court and assert that these alleged errors necessitate the granting of a new trial.

HN6[] *Rule 103(a) of the Federal Rules of Evidence* provides:

> **[*461]** Error may not be predicated upon a ruling which **[**22]** admits or excludes evidence unless a substantial right of the party is affected, and
> (1) In case the ruling is one admitting evidence, a timely objection or motion to strike appears of record, stating the specific ground of objection, if the specific ground was not apparent from the context; or
> (2) In case the ruling is one excluding evidence, the substance of the evidence was made known to the court by offer or was apparent from the context within which questions were asked.

Plaintiffs state that the Court erred in prohibiting plaintiff Jack Moertl, Jack Cisco, and Richard Krauss from testifying to the reasons given by sources of financing for declining to finance Juneau Square East. Plaintiffs argue that Moertl should have been allowed to testify to the reasons given to him by Mr. Tishmann for the loss of the Cooper-Horwitz financing and to the reasons given by Cisco for loss of the New York Life Insurance Co. (New York Life) financing. According to plaintiffs, Krauss should have been permitted to testify to the reasons given him by Faulkner of New York Life for the loss of the New York Life financing and similar testimony by Cisco should also have been allowed.

[23]** One of the primary reasons for the Court's decision to grant a new trial in this case in 1977 was that hearsay evidence prejudicial to the defendants had erroneously been admitted into evidence over defendants' strenuous objections. In particular, the Court cited the fact that Moertl was permitted to testify in the first trial about a conversation he had with Cisco about the loss of New York Life financing.

In this testimony, Moertl characterized a conversation he had with Cisco who was repeating a conversation he had with some unidentified person. This testimony clearly involved multiple levels of hearsay and was properly excluded by the Court in the second trial.

The testimony of Krauss and Cisco similarly involved conversations with persons who were repeating statements made to them by other sources. This is clearly hearsay and inadmissible. The fact, as plaintiffs assert, that each of the proposed witnesses were either spokesmen for the financial institutions involved or received the information from such spokesmen does not change the fact that they were repeating information received from another who received it from still another source.

This testimony sought to be introduced **[**24]** was clearly hearsay and would have been highly prejudicial to the defendants. The Court properly excluded this proposed testimony.

Contrary to plaintiffs' contentions, the Court did not require witnesses to change facts or testimony to accommodate any unrealistic sequence of events caused by the Court's excluding the above-described testimony. No error was committed in this regard.

Plaintiffs argue that Warren Stringer should have been allowed to give his opinion about the validity of Metropolitan Life Insurance Company's (Metropolitan) expressed reasons for refusing to finance Juneau Square East. Plaintiffs offered to prove through Stringer that, after several months of work on a financing package for Juneau Square, he received a letter setting forth "stereo-typed boiler plate" reasons for the turndown of the loan. Stringer stated that there was some other reason for the turndown, but he did not know what it was. However, he said the reason given "was not the genuine reason." (Tr. 2838-39)

Rules 701 and *702 of the Federal Rules of Evidence* set forth criteria for the lay opinion and expert opinion testimony. ***HN7***[] In order to offer opinion testimony by lay witnesses, *rule 701* provides **[**25]** that the witness' opinion must be (1) based on personal knowledge; and (2) must be helpful to the trier of fact. See Weinstein, Evidence P 701(02) p. 701-10 (1978).

[*462] Stringer's proposed testimony did not meet this criteria and, therefore, was properly excluded by the Court.

Plaintiffs challenge various evidentiary rulings relating to Marshall-Michigan, including the exclusion of various portions of the depositions of Donald E. Boerema, Charles Pinto, and William Clark.

The Court has examined the trial transcript and its prior rulings, excluding certain sections of these depositions from the trial. Many of the sections excluded contained hearsay, speculation or lacked adequate foundation. The Court finds that these portions of the deposition testimony of Boerema, Pinto and Clark were properly excluded from the trial.

Plaintiffs challenge the Court's ruling on the Marshall-Michigan letter to Juneau Square tenants. As previously determined, whether an action violates principles of tort law is not, in and of itself, proof of a violation of ***antitrust law***. The Court finds that it did not err in failing to instruct the jury that the letter sent by James Huber on behalf of **[**26]** Marshall-Michigan to Juneau Square was tortious.

Furthermore, the Court was not inconsistent in deciding that Judge Robert Landry's decision should be, excluded and in refusing to strike Huber's testimony regarding his rationale for sending the letter to the tenants. (Tr. 7856-61) Judge Landry's dicta regarding the procedure utilized by Marshall-Michigan was not relevant to this action and was prejudicial to the defendants. On the other hand, the Court reaffirms its position that Huber's thoughts and intentions at the time he drafted the tenant's letter is relevant with respect to his motivation. (See Tr. 7861)

The Court concludes that it did not err in its rulings regarding the Marshall-Michigan letter to tenants.

Plaintiffs assert that the Court's restrictions on plaintiffs' cross examination of John Sann was extremely prejudicial. Certain questions about documents were excluded by the Court because the witness had never seen the documents, and because questions about the documents were not raised during direct examination. (See *Rule 611(b) of the Federal Rules of Evidence.*)

After due consideration, the Court concludes that it did not err in setting certain limitations on the **[**27]** cross examination of Mr. Sann.

The Court also concludes that it was not in error to prevent plaintiff Moertl from testifying that the reason given to him by Aetna's attorney, James Urdan, for Aetna's entry of foreclosure judgment on January 4, 1972 was that Marshall-Michigan had entered its judgment the preceding day. Urdan could have been called as a witness by plaintiffs. In addition, the question of Aetna's decision to enter foreclosure judgment was not raised by plaintiffs when Urdan testified on behalf of the defendants. Finally, Aetna's rationale for entering its foreclosure judgment was not relevant to the issues in the second trial.

Plaintiffs contend that they should have been allowed to introduce evidence on the circumstances for the formation of Wil-Ten Associates. The Court considered plaintiffs' arguments at trial and declined to admit the evidence, stating that the evidence did not have sufficient probative value "that would justify the influence for which plaintiff would obviously be offering it." (Tr. 608)

The Court has reexamined its decision and finds that it did not err in excluding these prejudicial statements about the rational for the formation of Wil-Ten Associates.

[28]** The Court excluded plaintiffs' exhibits 491 and 533, which listed First Wisconsin's real estate holdings and Northwestern Mutual Life Insurance Company's (NML) real estate holdings in Milwaukee's central business district, respectively.

Plaintiffs argue that the size and power of these companies in the relevant market had an obvious bearing on the existence of a conspiracy and on the issue of the reasonableness of the restraint of trade. The **[*463]** Court is not persuaded by plaintiffs' position. The fact that First Wisconsin and NML are large corporations with extensive real estate holdings in the central business district does not, of itself, support plaintiffs' allegations of conspiracy.

After careful consideration of the evidence and arguments of the parties, the Court finds that these exhibits were properly excluded. Even though the exhibits were inadmissible, plaintiffs were not foreclosed from all inquiry about these property listings and the relationship between NML and First Wisconsin. Plaintiffs had an opportunity to examine Richard Holscher on the First Wisconsin's real estate holdings (Tr. 5378-71) and Donald Mundt on the NML listings (Tr. 3893-96). Other exhibits **[**29]** pertaining to NML were introduced into evidence. See Px 523-532 and 537-544.

The Court, therefore, concludes that it did not err in excluding the exhibits listing the real estate holdings of First Wisconsin and NML.

Plaintiffs challenge various Court rulings relating to the New York Life financing. Specifically, plaintiffs state the Court erred in (1) excluding certain testimony of Moertl, Krauss and Cisco; (2) in its ruling on deposition and prior trial testimony of New York Life witnesses; (3) in excluding certain questioning of Edward Rose; (4) in excluding from evidence portions of plaintiffs' exhibit 408 and the handwritten notations on plaintiffs' exhibits 383 and 419; and (5) its evidentiary rulings relating to First Wisconsin's credit report to New York Life.

The Court has previously concluded that it did not err in excluding the testimony of Moertl, Krauss and Cisco regarding the alleged reasons for New York Life's turndown of the Juneau Square loan.

With respect to the deposition and prior testimony of the New York Life witnesses, the Court finds it did not commit prejudicial error warranting a new trial in refusing to permit certain testimony. To advise the jury that **[**30]** much of the questioning of the New York Life witnesses during their depositions was conducted by David Beckwith of Foley & Lardner would have been unduly prejudicial, in addition to being irrelevant to the issues in this action. The Court had a similar problem with plaintiffs' exhibit 422, the Martindale-Hubbell listing showing that Foley & Lardner represented New York Life as of 1971.

The Court concludes its rulings on these questions were not erroneous so as to require the granting of a new trial.

Plaintiffs sought to impeach Rose's testimony to the effect that First Wisconsin's unfavorable credit report to New York Life was not a factor in the May 19, 1971 decision of New York Life to refuse financing and had not been discussed at this committee meeting. Handwritten notations on plaintiffs' exhibit 419, the committee brief of the meeting, indicate that the credit report had been discussed.

In his testimony, Rose stated he did not know who made the handwritten notations or when they were made (Tr. 8634-8639). In addition, the handwriting had not previously been identified. The Court therefore concluded that Rose could not be questioned on the contents of these notations.

Upon **[**31]** reconsideration, the Court finds that this ruling was not erroneous and plaintiffs are not entitled to a new trial on this ground.

The Court properly excluded the handwritten notations on plaintiffs' exhibits 383 and 419. The requirements of the business records exception to the hearsay rule, *Rule 803(6) of the Federal Rules of Evidence*, were not met in this instance. No testimony was presented about the identity of the writer of the notes nor did anyone testify that these notations were made in the course of New York Life's regularly conducted business and were a regular practice of the company.

With respect to plaintiffs' exhibit 408, the Lutz-Duncan memorandum, this memorandum was to be utilized to support plaintiffs' theory that the First Wisconsin defendants were attempting to interfere with the New York Life loan application.

[*464] In the first trial in this action, the Court granted a new trial in part because of the hearsay evidence of a highly prejudicial nature contained in this memorandum. The Court stated that several levels of hearsay were found in the memorandum and concluded that the "lack of trustworthiness and the prejudicial nature of this memorandum are **[**32]** self-evident." *Juneau Square Corp. v. First Wis. Nat'l. Bank, supra at 1324*.

After careful consideration of plaintiffs' arguments, the Court declines to change its earlier ruling. The Court finds that the memorandum contains prejudicial hearsay and was properly excluded by the Court.

According to plaintiffs, the basic accusation made in First Wisconsin's credit report to New York Life was that First Wisconsin was involved in the construction lending on Juneau Square and found that proceeds were not being used as indicated. Three witnesses were offered by defendants to justify this statement: Austin Lett, John Dickens and Alfred Little, author of the report. Only Little testified in person at the trial.

Dickens's prior trial testimony was read to the jury because he was unavailable as a witness pursuant to *Rule 804(a)(4) of the Federal Rules of Evidence* (Tr. 6412-16). Plaintiffs do not challenge the propriety of the Court's decision on this ground.

However, plaintiffs state that the Court should have required that the entire deposition testimony of Lett be read to the jury.

HN8[] *Rule 611(a) of the Federal Rules of Evidence* provides:

> The court shall exercise reasonable control over **[**33]** the mode and order of interrogating witnesses and presenting evidence so as to (1) make the interrogation and presentation effective for the ascertainment of the truth, (2) avoid needless consumption of time, and (3) protect witnesses from harassment or undue embarrassment.

The Court exercised its discretion and allowed the parties to decide their trial tactics and the best way to present their evidence. The Court did not err in refusing to order that the entire Lett deposition be read into evidence in sequence.

Plaintiffs assert that they were allowed inadequate time to cross-examine Little and that the Court improperly quashed their subpoena of Little. Little, who had been waiting to be called to testify for two days, was finally called to the stand on Friday, May 26, 1978 at 4:26 P.M. The Court split the remaining time between plaintiffs and defendants.

During their cross-examination, plaintiffs were able to ascertain the source of Little's belief that Juneau Square had used funds for purposes other than had been indicated to the bank. Plaintiffs also were able to elicit the admission that if this underlying report was incorrect, then his statement to New York Life was **[**34]** also incorrect.

Plaintiffs then subpoenaed Little at the close of his testimony and defendants moved to quash the subpoena.

In ruling on this motion, the Court noted that the time constraints were, in part, necessitated by the extensive cross-examination of a prior witness, and that the Court had indicated to plaintiffs that they should consider curtailing this cross-examination. Nevertheless, the cross-examination of Sann continued until 4:25 P.M. (Tr. 8179).

Prior to deciding the motion to quash, the Court questioned Little, a Florida resident, who indicated it would be "very inconvenient" for him to return the following week. The witness also professed an inability to add anything further to the statements he had already made. (Tr. 8174-8177). In light of all these factors and the Court's uncertainty as to the validity of the service of the subpoena, the Court granted the motion to quash the subpoena (Tr. 8179-80).

After careful consideration, the Court now finds that plaintiffs were not unduly prejudiced by the time limitations and that the Court did not err in quashing plaintiffs' subpoena.

[*465] ALLEGED ERRORS IN TRIAL MANAGEMENT

Plaintiffs contend that certain other **[**35]** decisions of the Court were highly prejudicial to the plaintiffs and necessitate the granting of a new trial in the interests of justice. Specifically, plaintiffs list the Court's time restrictions on the trial and closing arguments, the limitations placed on the cross-examination of certain witnesses and the alleged misconduct of defense counsel and defense witness Harold Shapiro.

A. Time Restrictions

The second trial in this case commenced on Monday, March 20, 1978, at 2:00 P.M. Court recessed for the day at 6:45 P.M., after a jury of six plus four alternates had been selected. The Court blocked out some twelve weeks of its trial calendar for this trial. Plaintiffs had thirty-four days of actual trial time and the defendants had twenty days of trial time. Plaintiffs were allotted five hours for closing argument, including rebuttal, while the defendants had four hours for their closing argument. The plaintiffs request for a minimum total of six hours for argument was denied by the Court. (Tr. 10,149)

Plaintiffs assert that these time constraints denied them the opportunity to present their claims completely and fairly. Plaintiffs point out that defendants were permitted extensive **[**36]** cross-examination of witnesses called by plaintiffs but identified with the defendants and that they were required to read irrelevant portions of depositions counterdesignated by the defendants. In addition, defendants were allegedly permitted extensive voir dire. In the opinion of plaintiffs, all of this combined to further shorten their already too limited trial time.

The Court was very aware of the complexity of the case and the great quantity of evidence to be presented. These factors were taken into consideration in blocking out some three months for the trial. Two days were set aside for closing arguments.

The Court also recognized its responsibility to parties to other litigation pending before the Court. Considering the crowded dockets of the courts, the Court has a responsibility to exercise reasonable control over the amount of trial time allotted to litigants. Affording parties unlimited amounts of trial time prejudices other litigants before the Court who must then wait extra months before their cases come to trial. These factors must also be considered and were considered by the Court.

During the entire three months of trial, the Court handled its regular schedule of **[**37]** status reports, pretrial and final pretrial conferences, arraignments, and sentencings. Hearings on temporary restraining orders and preliminary injunctions were also scheduled as the need arose. To allow plaintiffs additional time for closing arguments would have cut into the Court's time allotted to other pending cases or necessitated the extension of closing argument to a third day. Under the Court's time schedule, each side's argument could be presented in one trial day. The Court did not err in restricting time for closing arguments and in setting very reasonable time limitations for the trial.

Furthermore, the Court finds that it did not err in requiring plaintiffs to read deposition designations and the counterdesignations by the defendants or in permitting defendants to conduct voir dires on revisions of plaintiffs' damage exhibit. Such decisions are discretionary with the Court and, in these instances, were designed to further the orderly presentation of the evidence. These decisions were not prejudicial to plaintiffs so as to necessitate a new trial.

In summary, the Court is not persuaded by plaintiffs' arguments that the time constraints prevented plaintiffs from fairly **[**38]** and fully presenting their case. The Court set aside a substantial amount of time for this trial with minimum interruptions. The amount of time was not unreasonably short, and the five hours allotted to plaintiffs for closing arguments did not unfairly prejudice the plaintiffs.

Therefore, the Court finds that the time constraints placed on the parties were reasonable **[*466]** in light of all the facts and circumstances and did not deny plaintiffs a fair trial in this case.

B. Plaintiffs' Cross-Examination of Witnesses

Plaintiffs also assert that they were unduly prejudiced when the Court limited the cross-examination of James Huber and George F. Kasten. Plaintiffs sought to question Huber about a matter outside the scope of his direct examination and the Court properly excluded this line of questioning. *Rule 611 of the Federal Rules of Evidence.* (See Tr. 7663-7672)

Plaintiffs wanted to confront Kasten with the deposition testimony of Holscher which allegedly contradicted Kasten's testimony. The Court did permit plaintiff to introduce the Holscher deposition excerpt later in the day at the end of Kasten's testimony. Under the circumstances, the Court finds that plaintiffs were **[**39]** not unduly prejudiced so as to be entitled to a new trial on this issue.

C. Alleged Misconduct of Witness and Defense Counsel

Plaintiffs assert that the alleged misconduct of defense counsel, Peter Baugher, and of Harold Shapiro, a witness identified with the defendants, took place when candy was obtained from a juror while the Court, court staff, plaintiffs' counsel and the other defense counsel were engaged in conferences at the side bar.

According to plaintiff John Spoden, he personally observed Baugher obtaining candy or other snack food from a juror on two separate occasions during the trial. The first incident occurred when plaintiff Moertl was testifying and the second while Shapiro was testifying on April 12, 1978. Spoden also observed on April 12, 1978, that Shapiro made comments to the jury and obtained candy from a juror. (Spoden Affid. P 2.)

When the Court was informed of these activities, the Court indicated it would instruct the jury about the candy problem. The Court also admonished Shapiro not to take any additional candy from any juror. (Tr. 2478)

Plaintiffs' counsel at the time asked that Shapiro be "admonished or requested from here on in not to do any other **[**40]** activity of that type" and that the bailiff monitor the jury box area during sidebar conferences. (Tr. 2476) Plaintiffs did not move for a mistrial at the time.

Plaintiffs state in their reply brief that plaintiffs' counsel did not become aware until after the trial that one of the defense counsel had repeatedly obtained candy from a juror. Had they known about this, plaintiffs assert, they would have asked for a mistrial or public admonishment of defense counsel.

In his affidavit, however, plaintiff Spoden states he observed defense counsel taking candy from a juror on two occasions, the last on April 12, 1978. Thus, plaintiffs had notice of defense counsel's activities at the time the Court instructed the jury about this type of conduct.

The Court did not condone these occurrences but, instead, took steps to correct the problem. Moreover, the Court finds that these occurrences were not unduly prejudicial to plaintiffs and do not alone warrant the granting of a new trial.

D. Other Alleged Prejudicial Errors

Plaintiffs also cite in their brief several other errors allegedly committed by the Court during the presentation of evidence. With respect to the testimony of James Liek, **[**41]** the Court finds that his testimony was admissible and of probative value.

The Court also did not erroneously rule and comment upon plaintiffs' counsel's presentation or upon the reference to Arthur Anderson in the plaintiffs' damage presentation. Nor did the Court attempt to enhance the credibility of certain defense witnesses by asking friendly and rehabilitating questions. Rather, the Court's questions were designed to obtain clarification of issues or to elicit further explanation of a particular point.

Plaintiffs further assert that the exclusion of plaintiffs Spoden and Moertl **[*467]** and their wives from the courtroom during the cross-examination of defense witness Huber was unduly prejudicial and erroneously suggested to the jury that these plaintiffs had engaged in some misconduct.

The Court is not persuaded by this argument. Plaintiffs Moertl and Spoden were only excluded for the few hours of the cross-examination of Huber because they were to be called as rebuttal witnesses and might be testifying as to the same transaction as Huber. Moreover, these plaintiffs were only excluded after the Court granted plaintiffs' motion to exclude Sann from the courtroom during the **[**42]** balance of Huber's testimony. (Tr. 7647-7651) Therefore, plaintiffs' motion for a new trial on this ground is denied.

Contrary to plaintiffs' contentions, the Court did not take an unduly restrictive view of the business records exception to the hearsay rule and other rules of evidence to the detriment of plaintiffs. Rather, the Court properly applied the rules of evidence fairly and impartially during the course of the trial.

In their post trial motion, plaintiffs also allege other errors warranting a new trial, although these grounds were not specifically addressed in their brief. Plaintiffs allege that defendants' attorneys, in their opening statement and closing argument, made numerous erroneous assertions of law and fact not supported by the record, thereby substantially prejudicing plaintiffs. The Court has examined the record and finds that the defendants' opening statement and closing argument to the jury were not prejudicial to the rights of plaintiffs.

With respect to the other grounds for a new trial, the Court has considered plaintiffs' arguments and finds that no error prejudicing the rights of the plaintiffs was committed.

In conclusion, the Court finds, after careful **[**43]** examination, that the alleged errors in the trial of this action with respect to jury instructions, evidentiary rulings, and other trial management decisions, were basically fair to both sides and were not unduly prejudicial to plaintiffs so as to require the granting of a new trial in the interests of justice. Moreover, the Court is convinced that the cumulative effect of the trial time restrictions and the alleged errors of the Court are not of sufficient substance and magnitude to warrant ordering a new trial.

Ultimately, the Court has the duty to see that there is no miscarriage of justice. Only if the Court is convinced that there has been, should it set aside the jury's verdict.

In this case, the Court has exhaustively examined the testimony and evidence presented and has carefully considered the arguments of plaintiffs in support of their motion for a new trial. In the final analysis, the Court finds that no miscarriage of justice occurred and that the interests of justice are served by upholding the jury's verdict in this action. Accordingly, the Court hereby orders that plaintiffs' motion for a new trial must be and is hereby denied.

HN4[] **Price Fixing & Restraints of Trade, Horizontal Market Allocation**

When a non-patentee manufacturer agrees with one or more of its dealers or distributors to terminate a competing distributor, that agreement is subject to antitrust scrutiny.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN5[] **Price Fixing & Restraints of Trade, Vertical Restraints**

When a marketing decision, although ostensibly taken by a manufacturer, is in fact the result of pressure from another customer, such a decision must be scrutinized more closely than solely unilateral action might be. When a manufacturer acts on its own, in pursuing its own market strategy, it is seeking to compete with other manufacturers by imposing what may be defended as reasonable vertical restraints. However, if the action of a manufacturer or other supplier is taken at the direction of its customer, the restraint becomes primarily horizontal in nature in that one customer is seeking to suppress its competition by utilizing the power of a common supplier. Therefore, although the termination in such a situation is, itself, a vertical restraint, the desired impact is horizontal and on the dealer, not the manufacturer, level.

HN6[] **Practices Governed by Per Se Rule, Boycotts**

Where the purpose and effect of a non-patentee manufacturer's agreement with one or more of its dealers or distributors to terminate a competing distributor is to fix prices or to enforce a group boycott, the agreement is per se illegal. In other cases, rule of reason analysis may be appropriate.

HN8[] **Antitrust & Trade Law, Exemptions & Immunities**

Where a license restriction results primarily in benefits for the licensees rather than the patentee, the anticompetitive restriction cannot be justified as a subsidy for the patentee's inventive activity. In such cases, there is no sound reason to immunize the patentee's conduct from antitrust scrutiny.

HN10[] **Private Actions, Remedies**

Summary judgment in antitrust cases is not favored. It follows that the grant of summary judgment before an antitrust plaintiff has been given a full opportunity for discovery on his claim may be reversible error.

Opinion

[*83]** **[*1061]** OPINION OF THE COURT

Plaintiff Mannington Mills, Inc. (Mannington) appeals from a final judgment (1) dismissing, after a full trial to the court, its contractual and equitable claims to sales licenses under certain foreign patents held by defendant Congoleum Corporation (Congoleum), and (2) granting summary judgment on seven counts of its amended complaint sounding in antitrust. Only two counts of the antitrust claim are pressed on this appeal. We affirm the district court's dismissal of Mannington's license claims, and the grant of summary judgment on its claim that **[**2]** Congoleum arbitrarily and discriminatorily denied it access to unpatented know how in violation of § 2 of the Sherman Act. We think, however, that Mannington's allegation that Congoleum conspired with certain of its foreign licensees to terminate Mannington's foreign sales licenses states a claim on which relief may be granted under § 1 of the Sherman Act. Because Mannington has not yet had an adequate opportunity to conduct discovery on the factual issues relevant to that allegation, we reverse the grant of summary judgment on the conspiracy claim. [1]

I. FACTS

The facts are stated here as found by the district court. [2] Mannington is a New Jersey corporation which has for a number of years manufactured chemically embossed **[**3]** vinyl floor covering at a plant in Salem, New Jersey. Congoleum also manufactures chemically embossed vinyl tile. Prior to 1966, chemically embossed vinyl tile was manufactured and sold in the United States and foreign countries by Congoleum, Mannington, and other companies, including the Ruberoid Corporation (now GAF Corporation) and the Armstrong Cork Co. In that year two United States patents covering the manufacture and use of embossed vinyl products were issued to Congoleum, which immediately commenced infringement actions against Mannington, Armstrong and Ruberoid. Congoleum now holds similar patents in 26 foreign countries.

Some months after the filing of its infringement action Congoleum sent to Mannington a draft License Agreement and Litigation Settlement. Serious settlement negotiations began in the spring of 1968. In order to protect its competitive position as against any firms subsequently **[**4]** licensed under the Congoleum patents, Mannington sought from the outset to include in the proposed license agreement a most favored licensee clause. Congoleum's proposed second draft of the domestic License Agreement contained such a clause, which Mannington redrafted in the form which appeared in the executed agreement. The parties simultaneously negotiated a separate Letter Agreement concerning the terms of additional licenses from Congoleum to Mannington to sell the patented product in foreign countries. A preliminary draft of that agreement was submitted to Mannington in April, 1968, and in May, Congoleum informed Mannington of those countries in which it would be licensed to sell.

On May 21 and 22, 1968, Congoleum and Mannington respectively executed three agreements in settlement of the pending litigation: the License Agreement and Litigation Settlement (License Agreement), a Letter Agreement (Letter Agreement) regarding Mannington's license rights in foreign **[*1062]** countries, and an Agreement not to Appeal a certain decision of the New Jersey Superior Court. The last document is not at issue here.

[*84]** The grant clause of the License Agreement [3] **[**6]** gives the licensee under **[**5]** the patent rights the right to make, use, and sell the licensed products in the United States, its territories and possessions. The term "Patent Rights" is defined in Paragraph 1(a) of the Agreement as "rights under (i) the Letters Patent set forth in SCHEDULE "A', (ii) all extensions and reissues thereof." Schedule A lists only the two United States patents. The Agreement defines "Licensed Products" as any floor covering covered under the "Patent Rights." The License Agreement provides for a royalty of six and one-half percent of the net sales price of all Licensed Products made and used or made and sold under the Agreement, and is terminable only for cause or at the end of the life of the patents.

---

1 Prior appeals in other related cases growing out of the same dispute between Mannington and Congoleum were before this court in *Mannington Mills, Inc. v. Congoleum Corp., 595 F.2d 1287 (3d Cir. 1979)*, and *Mannington Mills, Inc. v. Congoleum Industries, Inc., 577 F.2d 727 (1978)* (mem.).

2 The opinion of the district court on the license claims is reported at 197 U.S.Pat.Q. 145 (D.N.J.1977).

3 The grant clause reads as follows:

LICENSOR hereby grants to LICENSEE under the PATENT RIGHTS, subject to the terms, conditions and limitations hereof, a non-exclusive right and license to

(i) make and use, and

(ii) make and sell

said LICENSED PRODUCTS in the United States, its territories and possessions.

Paragraph 16 of the Agreement contains the most favored licensee clause sought and drafted by Mannington. [4] Finally, the License Agreement specifies that it is to be construed and interpreted under New York law.

The Letter Agreement provides in relevant part that Mannington is licensed to sell United States manufactured "Licensed Products" as defined in the License Agreement in twenty listed foreign countries. [5] The foreign sales licenses are subject to revocation by either Congoleum or Mannington "at any time upon giving the other party at least six months' written notice." The Letter Agreement contains no provision comparable to the most favored licensee clause of the License Agreement.

[7]** In 1970, Congoleum and the GAF Corporation settled their pending infringement suit. Congoleum granted GAF make, use, and sell licenses, under the United States patents for the United States and its territories and possessions, and under its foreign patents for 26 foreign countries. The settlement was embodied in two documents: a License Agreement and Litigation Settlement (the GAF License) and a Manufacturing Agreement. The terms of the GAF domestic and foreign licenses were more favorable than those of the Mannington licenses in several respects. The GAF royalty rate was five percent, one and one-half percent lower than Mannington's. GAF was given the right to sell in six additional foreign countries in which Mannington was not licensed: Canada, Australia, New Zealand, Japan, Ireland, and Holland. Moreover, unlike the foreign licenses granted to Mannington, GAF's foreign licenses were terminable only for cause. Two other provisions of the GAF license are relevant to this action: paragraph 4, [6] the grant clause, **[*1063]** and paragraph 13(b), [7] a covenant not to sue the licensee or its customers. The Manufacturing Agreement gives GAF the right to manufacture the patented **[**8]** product in all the foreign countries of licensed sale after January 1, 1974.

[9]** On May 27, 1970, in compliance with the most favored licensee clause of the License Agreement, Congoleum's President, Harry **[***85]** F. Pearson, sent a letter to Mannington offering the more favorable terms of the GAF License relating to United States patents. Pearson offered, Inter alia, the five percent royalty rate, and paragraphs 4(a) and 4(c) of the GAF License. No mention was made of paragraphs 4(b) or 13(b) of the GAF agreement, of patent rights in the six foreign countries where Mannington had not been granted rights, or of the terms of the foreign Manufacturing Agreement. On July 1, 1970, Congoleum sent Mannington's counsel a copy of the GAF License. Mannington's representatives were not sent a copy of the Manufacturing Agreement and did not learn of its existence until a week before trial.

---

4 LICENSOR agrees that should it hereafter grant a license to a third party under the PATENT RIGHTS to make and use or sell the LICENSED PRODUCTS on more favorable terms or conditions than those extended to LICENSEE under this agreement, then LICENSEE shall be entitled to such more favorable terms and conditions as of the time they are or become effective as to such third party and for so long as they shall continue to be so effective.

5 Argentina, Austria, Belgium, Brazil, Chile, Colombia, France, West Germany, Greece, India, Israel, Mexico, Pakistan, Peru, Philippines, Spain, Sweden, Switzerland, Turkey, and Venezuela.

6 4. (a) LICENSOR hereby grants to LICENSEE under the PATENT RIGHTS, subject to the terms, conditions and limitations hereof, a non-exclusive right and license to make, use or sell LICENSED PRODUCTS throughout the United States of America, its territories and possessions.

(b) LICENSOR hereby grants to LICENSEE a non-exclusive license to sell, under all Foreign PATENT RIGHTS, LICENSED PRODUCT(S) manufactured by LICENSEE under paragraph 4(a) hereof.

(c) The rights and licenses granted under paragraphs 4(a) and (b) shall run with all subsequent resales of LICENSED PRODUCTS as such or as components of another assemblage, e.g., mobile homes.

7 LICENSOR and LICENSEE agree that LICENSEE'S floor coverings identified in Stipulated Facts 55 through 75 of Appendix A of the Final Pretrial Order in the CONGOLEUM INFRINGEMENT LITIGATION shall bear at this time the royalty rate stated in paragraph 5, and LICENSOR agrees that LICENSEE may continue to make, use and sell such floor coverings pursuant to the provisions of this Agreement and LICENSOR covenants not to sue LICENSEE with respect to the manufacture, use or sale of such floor coverings or LICENSEE'S customers with respect to the use or resale of such floor coverings, provided that a royalty is paid to LICENSOR under the terms of this agreement for such floor coverings.

On July 15, 1970, Mannington and Congoleum met to discuss the more favorable terms of the GAF License. Mannington was represented by its President, H. Arthur Williams, its patent counsel, Thomas Cifelli, and its general counsel, George Doub. Congoleum was represented by its President, Pearson, its patent counsel, Richard T. Laughlin, and its general counsel, Ralph M. Jerskey. Mannington **[**10]** wished to obtain expanded foreign license rights, particularly in Canada. Without such rights, Mannington feared that it would be unable to compete effectively with GAF and Armstrong, both of which were selling in Canada. At the meeting, Mannington expressed its desire for Canadian license rights and took the position that under P 16 of the License Agreement it was entitled to the more favorable foreign license rights granted to GAF. Congoleum rejected that argument on the ground that the most favored licensee clause applied only to license rights under the United States patents.

The sense of the July 15 meeting was expressed in a letter agreement of July 17, 1970 (hereinafter License Agreement Amendment). The License Agreement Amendment modified the License Agreement by incorporating, with two exceptions not here relevant, the terms which Congoleum had offered by its letter of May 27, 1970. Because Mannington and Congoleum could not agree as to the effect of the most favored licensee clause on foreign license rights, the License Agreement Amendment expressly stated that the parties' concurrence in the modification of the license as provided therein was not to be construed as **[**11]** a relinquishment by either party of its position on that clause. In a cover letter to the signed copies of the License Agreement Amendment, Williams stated his hope that the July 15th meeting had laid the groundwork for "possible future agreement" on the Canadian licensing issue, and said that he would like to hear from Pearson if Pearson had "any change in (his) thoughts regarding the Canadian situation."

Several times in the summer or early fall of 1970, Pearson and Williams met privately, and Williams again raised Mannington's claim that it was entitled to expanded foreign sales rights. Pearson indicated that he would not consider granting of additional rights to Mannington until the then pending litigation against Armstrong was settled.

On November 5, 1970, Williams placed a call to Pearson. Pearson was unavailable, and Williams spoke instead with Laughlin. **[*1064]** Williams told Laughlin that he had just lost one Canadian distributor, and that he was expecting a visit that day from another distributor whose business he wanted to keep. He asked if Congoleum would alter its refusal to grant Mannington license rights in Canada. Laughlin suggested that Mannington offer **[**12]** to pay a higher royalty rate on its Canadian sales. Williams then indicated that Mannington would have to go ahead and sell in Canada. Laughlin responded that it was okay with him, but obliquely implied that Congoleum would sue for infringement and would not give Mannington any priority with respect to such litigation. A contemporaneous memorandum by Williams describes his conversation with Laughlin as follows: "a licensing agreement will be reached between Congoleum Industries and the Armstrong Cork Company, and because of our poor position in Canada, Dick Laughlin has agreed to more-or-less close his eyes to any transactions we have in the meantime in Canada."

Subsequently, Williams reported the substance of the November 5 conversation to Cifelli, who called Laughlin to inquire if Congoleum had changed its position with respect to expanded foreign sales rights. Laughlin indicated it had not. In January 1971, Williams met with Pearson and renewed his request for expanded foreign sales rights. Pearson reiterated his position that he would not grant additional rights during the pendency of the Armstrong litigation, but stated that he believed that settlement was imminent.

In **[**13]** November or December 1970, Mannington recommenced sales in Canada. In its quarterly royalty report to Congoleum made in February 1971, Mannington disclosed royalties of $ 7,098 generated from sales for shipment to Canada at the premium rate of six and one-half percent, and it tendered payment in that amount. By **[***86]** letter of February 25, 1971, Pearson wrote to Williams to inform him that the one and one-half percent royalty premium paid on Canadian sales would be returned. Pearson stated:

> We have no present plan to grant any additional licenses for sale in Canada under our chemical embossing patents. In view of this, I am instructing our Treasurer to refund to Mannington Mills, Inc. the amount of Mannington's recent royalty payment in excess of five percent.
>
> As indicated to you previously, we have this matter under continuous consideration and if there is any change in the policy, we will be in touch with you.

Congoleum subsequently returned the royalty premium to Mannington. Thereafter, Mannington reduced the royalty paid on Canadian sales to five percent, but until July, 1972 it continued to report Canadian sales separately.

During 1971, in accord with the **[**14]** License Agreement, the accounting firm of Arthur Andersen & Co., acting as agent for Congoleum, reviewed Mannington's records. Arthur Andersen's report to Congoleum dated May 13, 1971, stated that: "We were informed by Mannington personnel that Mannington is presently negotiating to obtain the right to sell license products in certain foreign jurisdictions, however, the License Agreement has not been amended." This comment was cleared by Mannington. The worksheets of the Arthur Andersen accountant responsible for the review also contain a report of a discussion with Mannington's comptroller, as follows: "Amendment to agreement not clear on sales to foreign customers. Mannington wants right to sell foreign (;) Congol. has not said yes or no for this minor amt Mannington felt better to pay 61/2% (old rate). Per (Mannington's comptroller) Congoleum later returned check and agreed to accept 5%. . . ."

After the execution of the Letter Agreement in May 1968, and despite the fact that it was not formally licensed to do so, Mannington continued to sell the patented product through distributors in Australia and New Zealand. Congoleum learned of Mannington's Australian sales in 1969, **[**15]** and its New Zealand activities in 1970. Although Mannington had ceased to sell in Canada as part of the 1968 settlement negotiations, it recommenced sales there with Congoleum's **[*1065]** knowledge in November or December 1970. In addition, Mannington commenced sales in Japan in 1972. Congoleum learned of these activities in the same year. Congoleum took no action against Mannington's infringing foreign sales until July 1974.

By letter of July 25, 1974, Congoleum notified Mannington of its intent to terminate the Letter Agreement, effective January 31, 1975, and thereby to revoke all Mannington's foreign license rights. Further, Congoleum advised Mannington that it was aware that Mannington was selling in countries not covered by the Letter Agreement and that commencing September 1, 1974, it would take action to protect its patent rights in those countries. The district court found that Congoleum cancelled Mannington's foreign license rights because of the receipt of increasing numbers of complaints about Mannington's infringing conduct from its licensees, and because Congoleum feared that those licensees would commence to sell in areas where they were not licensed if Mannington **[**16]** were permitted to infringe with impunity. Congoleum now has infringement actions pending against Mannington in Canada, New Zealand, Australia, and Japan. [8]

The original patent infringement action by Congoleum against Armstrong Cork was decided in Congoleum's favor in February 1972. [9] Two related trials involved patent misuses and the use of a new chemical in the embossing process took place in 1973 and 1974. [10] **[**17]** Appeals of the trial on the infringement questions extended to early 1975. [11] In March 1976, on the eve of a trial on damages, a settlement was reached whereby Armstrong paid $ 35 million in damages and accepted an injunction. No license was ever issued to Armstrong.

II. PROCEEDINGS BELOW

Mannington brought this suit in October 1974, seeking declaratory and injunctive relief to compel the continuation of its foreign license agreement with Congoleum, as well as license rights in the six additional foreign countries in

Supp. 220 (E.D.Pa.1973)* (denying motion to reopen record to consider evidence of new embossing technique, and finding that Congoleum had not misused its patents).

11 *Congoleum Indus., Inc. v. Armstrong Cork Co., 510 F.2d 334* (3d Cir.), Cert. denied, ***421 U.S. 988, 95 S. Ct. 1991, 44 L. Ed. 2d 478 (1975)***.

which license rights had been granted to GAF. The plaintiffs relied alternatively upon: (1) the most favored licensee clause of the License Agreement; (2) an alleged oral license from Congoleum to Mannington; (3) a license "implied in fact" from the conduct of the parties; (4) a license by estoppel; and (5) §§ 2 and 7 of the Sherman Act.

The district court ordered the severance of the license and antitrust claims for purposes of discovery and trial. The parties had extensive discovery and a full trial to the court on the license claims. On November 11, 1977, the district court entered an order denying plaintiff's contractual and equitable claims to license rights in all respects, and granting an **[**18]** interlocutory declaratory judgment on the license claims in favor of Congoleum.

On January 30, 1978, Mannington filed an amended antitrust complaint, which renewed its request for injunctive relief and for the first time sought treble damages for violations of §§ 1 and 2 of the Sherman Act. Several separate violations were alleged. On January 13, 1978, Mannington commenced discovery on the antitrust issues by serving on Congoleum written interrogatories and requests for production of documents. These documents focused on the relationship between Congoleum and its foreign licensees. On February 17, 1978, Congoleum objected to most of the requests as irrelevant. A motion to compel discovery **[*1066]** was filed on March 9, and was granted on March 27, 1978. In April 1978, Congoleum turned over some 8,000 documents to Mannington. On April 24, at a pretrial hearing, the district court directed Mannington to proceed with discovery on the antitrust claim.

On May 11, 1978, Mannington filed notices to take depositions on the antitrust issues from ten present or former officers and employees of Congoleum, seven of whom had been deposed during the license phase of the case. Congoleum **[**19]** moved on May 12 for a protective order as to those seven, arguing that Mannington had had full discovery as to them during the license phase of the case. On May 15, Congoleum moved for summary judgment on Mannington's antitrust claims. Mannington and Congoleum agreed to postpone the hearing on the motion for a protective order until after the district court had ruled on the summary judgment motion.

On July 24, 1978, after a hearing, the district court, after oral argument, granted Congoleum's motion for summary judgment in its entirety, thus mooting Congoleum's pending motion for a protective order. Judgment was entered on all claims on August 29, 1978, and this appeal followed.

III.

A. The License Claims

On appeal, Mannington first contends that under the most favored licensee clause of the License Agreement it is entitled to the more favorable foreign sales rights contained in Congoleum's subsequent license to GAF. Specifically, Mannington claims that it has the right to sell in the six additional nations where GAF was licensed to sell and that its foreign licenses, like those granted to GAF, should be terminable only for cause.

The district court rejected this contention **[**20]** on two grounds. First, it held that the License Agreement and the Letter Agreement were not "integrated" documents, and that the License Agreement's most favored licensee clause therefore could not apply to the foreign sales rights granted in the Letter Agreement. Alternatively, it held that because the scope of the most favored licensee clause is limited to the terms of licenses which were granted under Congoleum's United States patents, the clause did not extend to GAF's foreign sales licenses, which were granted under Congoleum's foreign patents. Because it felt that the meaning of the agreement was clear, the court refused to consider extrinsic evidence of the parties' intent.

We think that the district court was in error in concluding that the License Agreement and Letter Agreement could not be read together as a single instrument. The two documents were negotiated and executed simultaneously as part of the settlement of a single litigation. The Letter Agreement makes explicit reference to the terms of the License Agreement. Moreover, the subject matter of the agreements, while not identical, is closely related. On several important issues, the Letter Agreement is unintelligible **[**21]** without reference to the License Agreement, which contains the royalty provisions applicable to both domestic and foreign licenses, as well as the definition of "Licensed Products" applicable to both agreements. These instruments therefore fall within the rule that ***HN1***[] where separate writings are made as part of a single transaction relating to the same **[***88]** subject matter, they may be read together as one agreement. [12] *Schlossman's, Inc. v. Radcliffe, 3 N.J. 430, 435, 70 A.2d 493, 495 (1950)*; *General Elec. Credit Corp. v. Castiglione, 142 N.J.Super. 90, 360 A.2d 418, 424 (LawDiv.1976)*. Moreover, given the strong indications of interdependence between the two documents, the absence of an express incorporation clause is not decisive. *American Express Co. v. Rona Travel Service, Inc., 77 N.J.Super. 566, 187 A.2d 206 (Ch.Div.1962)*.

[22]** **[*1067]** Even if the two agreements are read together, however, it is evident that the rights granted by Paragraph 16 of the License Agreement do not extend to the terms of the foreign licenses granted in GAF's License Agreement. Paragraph 16 entitles Mannington to most favored licensee treatment only with respect to licenses granted to a third party "under one or more of the PATENT RIGHTS." Those patent rights are expressly defined in the Agreement as rights under Congoleum's United States patents. The protections of the most favored licensee clause thus extend to the terms of the foreign sales licenses granted to GAF only if those licenses can in any meaningful sense be said to have been granted "under" Congoleum's United States patents. It is clear that they cannot. Congoleum's United States patents give it no legal power to limit foreign manufacture, use or sale of the patented products. See *Deepsouth Packing Co. v. Laitram, 406 U.S. 518, 524, 531, 92 S. Ct. 1700, 32 L. Ed. 2d 273 (1972)*. The power to grant restrictive foreign sales licenses to GAF must therefore flow from Congoleum's legal right as patentee to limit the manufacture, use, and sale of the patented product **[**23]** in the country of license. Thus the foreign sales licenses granted to GAF can only have been granted "under" Congoleum's foreign patents, and the most favored licensee clause does not extend to them.

In an effort to create an ambiguity, Mannington argues that, as a practical matter, GAF's right to sell arises at least in part under the United States patents, since it is under those patents that GAF's domestic manufacturing license was issued. Without a domestic license to manufacture, Mannington argues, GAF would have no product to sell in those foreign countries where it was licensed under the Letter Agreement. Therefore, it argues, GAF's foreign sales rights must arise under the United States patents. This contention is factually unfounded, since GAF is licensed to manufacture under Congoleum's foreign patents as well, and therefore need not depend on its United States manufacturing rights for access to the patented products. But even if Congoleum were able, as a practical matter, to prevent the foreign sale of the patented product by terminating GAF's domestic license agreement, that fact would not be decisive. For Paragraph 16 makes the relevant consideration not the source **[**24]** of the licensee's supply of the patented product, but the source of Congoleum's power to grant the license. In the case of GAF's foreign licenses, that power can only have arisen under the foreign patents.

Mannington next contends that under the most favored licensee clause it is entitled to the benefits of Paragraph 13(b) of the GAF License. That Paragraph provides, in pertinent part:

> LICENSOR agrees that licensee may continue to make, use and sell such floor coverings pursuant to the provision of this agreement, and LICENSOR covenants not to sue LICENSEE with respect to the manufacture, use or sale of such floor coverings or LICENSEE'S customers with respect to the use or resale of such floor coverings, provided that a royalty is paid to LICENSOR under the terms of this agreement for such floor coverings.

Mannington reads this covenant not to sue as conferring upon GAF, and upon GAF's customers, freedom to sell the patented product in any foreign country without fear of an infringement action whether or not GAF is licensed to sell in that country. Extension of this right to Mannington and its customers would, it argues, entitle it to continued foreign sales rights. **[**25]** As the district court pointed out, however, the covenant not to sue applies only to sales made "pursuant to the provision of the agreement." It must be construed as subject to, and no broader than, the express grant of domestic and foreign sales rights in Paragraphs 4(a) and 4(b) of the GAF License. Thus it cannot be read as establishing the principle that sales in violation of the license agreement are not subject to an infringement action, and Mannington may not claim the benefit of that principle under Paragraph 16, even with respect to its domestic licenses. Moreover, as we noted **[*1068]** above, insofar as the protections of Paragraph 13(b) extend to sales made pursuant to sales licensees granted "under" foreign patents, Paragraph **[***89]** 16 is in

---

[12] The License Agreement expressly provides that New York law governs the construction and interpretation of the agreement. The parties have stipulated, however, that New York and New Jersey law are identical on all issues relevant to this appeal.

any event inapplicable. GAF's covenant not to sue therefore cannot be read to authorize foreign sales by Mannington or its customers in countries where it is not licensed to sell.

Mannington also argues that Congoleum's conduct gave rise to an irrevocable license by estoppel to sell in all foreign countries license to GAF. Congoleum counters that the doctrine of license by estoppel is inapplicable to licenses granted under foreign patents, **[**26]** which should be governed by foreign law. The district court did not determine the applicability of foreign law to the estoppel claim because it concluded that even under domestic law Mannington was entitled to no relief. We agree.

HN2[] In order to establish a license by estoppel, Mannington was required to prove four elements:

(1) infringement;

(2) knowledge by the patent owner of the infringement;

(3) conduct of the patent owner which misleads the infringer into believing that the patent owner has abandoned his patent or acquiesced in the infringement; and

(4) reliance by the infringer on such conduct.

Minnesota Mining & Mfg. Co. v. Berwick Indus., Inc., 373 F. Supp. 851, 869 (M.D.Pa.1974), *Aff'd, 532 F.2d 330 (3d Cir. 1976)*. After trial, the district judge ruled that Mannington had failed to prove that it was at any time actually misled into believing that Congoleum had abandoned its patent or acquiesced in its infringement by Mannington. He therefore declined to determine whether the other three elements of an estoppel were present.

There is ample record evidence to support the conclusion that Mannington was at all times aware that Congoleum **[**27]** had not abandoned its patent. Between May 1970, and mid-1971, Mannington on numerous occasions sought expanded foreign license rights. Each time it was rebuffed by Congoleum. The text of the July 17, 1970, License Amendment Agreement, the cover letter to that agreement, Williams' internal memorandum of November 5, and the Arthur Andersen report and worksheets all indicate that Mannington was aware that Congoleum had not acceded to its request for increased foreign license rights, and that it did not intend to entertain Mannington's request for extended rights until after the conclusion of the Armstrong litigation.

On this appeal, Mannington concedes that the district court's findings are sufficient to support the conclusion that Mannington never believed that Congoleum had "abandoned" its patents. But it argues that those findings will not support its further holding that Mannington did not believe that Congoleum had "acquiesced" in Mannington's infringement. Mannington relies principally upon Congoleum's failure to bring an infringement action against it until July 1974, more than four years after Congoleum first learned of Mannington's infringing sales. But it is undisputed **[**28]** that until 1976 Congoleum was engaged in a series of infringement actions against Armstrong. ***HN3***[] The general rule is that a patentee has no duty to bring an action against an alleged infringer during the pendency of another infringement action on the same patent, and that when the infringer has notice of the pending action, he may not rely upon any resulting delay as a basis for a claim of estoppel. *Advanced Hydraulics, Inc. v. Otis Elevator Co., 525 F.2d 477, 482* (7th Cir.), Cert. denied, *423 U.S. 869, 96 S. Ct. 132, 46 L. Ed. 2d 99 (1975)*; CF. Minnesota Mining & Mfg. Co. v. Berwick Indus., Inc., 532 F.2d at 334 (laches). Mannington's conceded awareness of the Armstrong litigation was sufficient to put it on notice that Congoleum had not acquiesced in its infringing conduct.

B. The Antitrust Claims

Mannington advances two antitrust claims on appeal. The first is that, while Congoleum's foreign manufacturing licensees **[*1069]** regularly were invited to purchase know-how with their manufacturing license, Congoleum arbitrarily and unreasonably refused to sell to Mannington certain unpatented know-how relevant to the manufacture of the patented product. We seriously doubt that **[**29]** an arbitrary or discriminatory unilateral refusal to deal by a lawful monopolist is actionable under § 2 of the Sherman Act. See 3 P. Areeda & D. Turner, ***Antitrust Law*** P 736 (1978). We need not decide that issue here, however, for the summary judgment record demonstrates that Congoleum's refusal to license know-how to Mannington was not arbitrary. None of the foreign manufacturing licensees who received know-how had any prior manufacturing experience at the time that their know-how licenses were issued. In contrast, Mannington, like GAF, had been manufacturing the patented product for a number of years prior to its acceptance of a Congoleum license. There was thus a substantial and undisputed difference between **[***90]** Mannington and those foreign licensees who received know-how with their manufacturing licenses. Mannington's claim that Congoleum's denial of know-how was arbitrary or unreasonable therefore fails.

Mannington's conspiracy claim requires closer scrutiny. As stated in the complaint, that claim is that Congoleum conspired with one or more of its foreign licensees to cancel Mannington's foreign sales licenses. As spelled out in greater detail at hearings in the district **[**30]** court, [13] the claim was (1) certain of Congoleum's foreign licensees had complained about Mannington's excessive competition and had threatened to terminate their own licenses unless Mannington's foreign licenses were revoked, and (2) that in response to that threat, Congoleum had agreed to terminate Mannington's foreign licenses.

[31]** The district judge granted summary judgment, ruling that the plaintiff's complaint did not state a claim under § 1 of the Sherman Act and that the summary judgment record did not contain evidence sufficient to create a material issue of fact as to the existence of a conspiracy. [14]

The lower court's holding that a valid antitrust claim had not been stated was based exclusively upon Congoleum's status as a patentee. The **[**32]** court stated that "(a) patentee may grant one, many, or no licenses under its patent," and may, if it chooses, "grant . . . an exclusive license effectively an agreement not to license any competitors under the patent," without violating the Sherman Act. While noting the absence of any case directly on point, the district judge apparently reasoned that this policy of deference to a patentee's licensing decisions should extend to protect the termination of a licensee undertaken at the request of a competing licensee or licensees.

We recognize that promotion of the policies that underlie the federal patent laws may on occasion require that the application **[*1070]** of normal antitrust principles to patent license restrictions be moderated or withheld entirely. On the facts alleged in this case, however, we think that the antitrust exemption created by the district court extends more broadly than is necessary to that end. We conclude that the complaint stated a cause of action under the Sherman Act.

HN4[] We start with the settled proposition that when a non-patentee manufacturer agrees with one or more of its dealers or distributors to terminate a competing distributor, that agreement **[**33]** is subject to antitrust scrutiny. *United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; *Cernuto, Inc. v.*

---

[13] THE COURT: I have five licensees out each with six months or 90 days termination clauses exercisable at mutual option or my option. Four guys come to me and say that this guy Jones is killing us, you've got to get him out of the market or we are going to have to stop making widgets and go into growing peaches. And you are making more money off the four of us than off of him because he's cheaper, undersells some way.

I say to you, today I will shut him off and I turn the faucet.

You have any real problem with that?

(COUNSEL FOR CONGOLEUM): That may well be a violation.

THE COURT: Off the top of my head I don't have any problem with that. That's what Mr. Bain alleges you did with respect to the 22 foreign countries.

Am I right?

(COUNSEL FOR MANNINGTON): That's correct.

THE COURT: I'm glad I finally understand what the plaintiff is claiming.

[14] The district court's holding that Mannington's conspiracy claim failed as a matter of law would, if correct, provide an independent ground for affirming the judgment below. Thus the concurring opinion's suggestion that our discussion of the antitrust issue is advisory is incorrect. To the contrary, unless we were to decide the antitrust issue, our decision of the discovery issue would violate the settled principle that a federal court is not normally empowered to declare, for the government of future cases, principles or rules of law which cannot affect the result in the case before it.

United Cabinet Corp., 595 F.2d 164 (3d Cir. 1979). As we pointed out in Cernuto, dealer inspired terminations may pose serious anticompetitive risks not presented by a manufacturer's unilateral refusal to deal:

> **HN5**[] When a marketing decision, although ostensibly taken by a manufacturer, is in fact the result of pressure from another customer, such a decision must be scrutinized more closely than solely unilateral action might be. . . . When a manufacturer acts on its own, in pursuing its own market strategy, it is seeking to compete with other manufacturers by imposing what may be defended as reasonable vertical restraints. . . . However, if the action of a manufacturer or other supplier is taken at the direction of its customer, the restraint becomes primarily horizontal in nature in that one customer is seeking to suppress its competition by utilizing the power of a common supplier. Therefore, although the termination in such a situation is, itself, a vertical restraint, the desired impact is horizontal and on the dealer, not the manufacturer, **[**34]** level.

[*91]** 595 F.2d at 168. **HN6**[] Where the purpose and effect of such a termination is to fix prices, Cernuto, Inc. v. United Cabinet Corp., 595 F.2d at 168-69, or to enforce a group boycott, United States v. General Motors Corp., 384 U.S. 127 at 145, 86 S. Ct. 1321, 16 L. Ed. 2d 415, the agreement is Per se illegal. In other cases rule of reason analysis may be appropriate. Compare Cernuto, 595 F.2d at 168-69 With Oreck Corp. v. Whirlpool Corp., 579 F.2d 126 (2d Cir.) (En banc), Cert. denied, *439 U.S. 946, 99 S. Ct. 340, 58 L. Ed. 2d 338 (1978)*. See also Harold Friedman, Inc. v. Thorofare Markets, Inc., 587 F.2d 127, 142 (3d Cir. 1978).

The issue then is whether Congoleum's status as a patent monopolist immunizes this otherwise actionable conduct from antitrust attack. Resolution of that question requires us to weigh the potential injury to competition from conduct of the kind alleged by Mannington against the risk that the application of antitrust sanctions will frustrate the purposes of the patent system. Our analysis suggests that application of antitrust principles to this conduct would materially encourage competition without posing any serious threat to patent policy.

[35]** **HN7**[] The grant of a patent of invention confers upon the successful patentee "the right to exclude others from making, using, or selling the invention throughout the United States" for a term of seventeen years. 35 U.S.C. § 154. The purpose of that grant of a limited monopoly is to provide an incentive for private enterprise to devote resources to innovative research, to make the investments required to put new inventions into practice, and to make the benefits of the invention available to a wider public. See P. Areeda, Antitrust Analysis P 403 (2d ed. 1974); Turner, The Patent System and Competitive Policy, 44 N.Y.U.L.Rev. 450, 451-54 (1969).

Vertical restrictions imposed upon licensees by a patentee, like those imposed by a non-patentee upon its distributors, may often be useful, and perhaps even essential, to the patentee's effort to maximize the monopoly income to which the patent grant entitles him. See W. Bowman, Patent and **Antitrust Law**: A Legal and Economic Appraisal 54-57 (1973); Baxter, Legal Restrictions on Exploitation of the Patent Monopoly: An Economic Analysis, 76 Yale L.J. 267, 313 (1966). It might therefore be argued that to encourage inventive activity all anticompetitive **[**36]** license restrictions which **[*1071]** increase the patentee's net income should be immunized from antitrust scrutiny. But there is a consensus among those who have considered the question that, in view of the substantial uncertainties inherent in the process of developing and patenting a new invention, any incremental increase in patentee income that might result from permitting licensing schemes that would otherwise violate the antitrust laws would be unlikely to effect a patentee's initial decision to invest in innovative activity. P. Areeda, Supra, P 404(f) at 429; Turner, Supra, 44 N.Y.U.L.Rev. at 458-60, 463; Gibbons, Price Fixing in Patent Licenses and the **Antitrust Law**, 51 U.Va.L.Rev. 273, 276-77 (1965); Furth, Price-Restrictive Patent Licenses Under the Sherman Act, 71 Harv.L.Rev. 815, 829 & n.35 (1958).

Perhaps more persuasively, it has been argued that overly restrictive antitrust review of patentee licensing practices might lead a patentee to license less widely than he might otherwise do, or indeed, not to license at all. P. Areeda, Supra, P 411; L. Sullivan, Antitrust P 183 (1977); Turner, Supra, 44 N.Y.U.L.Rev. at 463-64; Gibbons, Domestic Territorial Restrictions **[**37]** in Patent Transactions and the Antitrust Laws, 34 Geo.Wash.L.Rev. 893, 894-95 (1965); Furth, Supra, 71 Harv.L.Rev. at 830. But cf. Baxter, Supra, 76 Yale L.J. at 352-53. Less widespread licensing could lead to decreased use of the patented product, less present competition for the patentee, and reduced competition in the patented product after the expiration of the patent. L. Sullivan, Supra ; Turner, Supra, 44 N.Y.U.L.Rev. at 464. Exclusive licenses, the type of restrictive arrangement relied upon by the district court, have been defended on this ground. See P. Areeda, *Supra, P 411 at 447 n.76*. It would appear that neither patent nor antitrust policy would in the long run be served by prohibiting restrictions necessary to promote wider use of the patented product.

But restrictive licensing practices may also have significant anticompetitive effects. Some licensing policies may serve as a mask for collusive conduct on the part of competing licensees. In such cases, important antitrust policies may be threatened. See *Ethyl Gasoline Corp. v. United States, 309 U.S. 436, 60 S. Ct. 618, 84 L. Ed. 852 (1940)*; *United States v. United States Gypsum Co., 333 U.S. 364, 68 S. Ct. 525, **[**38]** 92 L. Ed. 746 (1948)*; L. Sullivan, *Supra, P 184*; Turner, Supra, 44 N.Y.U.L.Rev. at 450; Furth, Supra, 71 Harv.L.Rev. at 830-33; Cf. Buxbaum, Restrictions Inherent in the Patent Monopoly; A Comparative Critique, 113 U.Pa.L.Rev. 633, 648-51 (1965). ***HN8***[] Where the license restriction results primarily in benefits for the **[***92]** licensees rather than the patentee, the anticompetitive restriction cannot be justified as a subsidy for the patentee's inventive activity. See Baxter, Supra, 76 Yale L.J. at 313-14. In such cases, there is no sound reason to immunize the patentee's conduct from antitrust scrutiny. "(T)he patent statute is not seriously encumbered by prohibiting the misuse of a patent as a cosmetic to cover a cartel." L. Sullivan, *Supra, P 184 at 534*.

Ethyl Gasoline Corp. v. United States, 309 U.S. 436, 60 S. Ct. 618, 84 L. Ed. 852 (1940), while not directly in point, illustrates the risks inherent in a patent licensing scheme run for the benefit of licensees. Ethyl held patents on a fluid gasoline additive containing tetraethyl lead. The company licensed gasoline refiners to manufacture and sell gasoline containing the patented product. At the next level of the distribution chain, **[**39]** Ethyl licensed jobbers to sell the patented product. Refiners were allowed to sell gasoline only to jobbers licensed by Ethyl. Ethyl conducted regular inquiries into the "business ethics" of licensed jobbers to determine "whether they (maintained) the marketing prices" prevalent in the industry, *309 U.S. 436 at 454, 60 S. Ct. 618, 84 L. Ed. 2d 852* and discharged those not meeting the required standard. Refiners licensed by Ethyl accounted for 88% Of all gasoline refined in the country; 11,000 of 12,000 gasoline jobbers in the nation were Ethyl licensees.

The Court found that "by the leverage of its licensing contracts resting on the fulcrum of its patents, (Ethyl) has built up a combination capable of use, and actually **[*1072]** used, as a means of controlling jobbers' prices and suppressing competition among them." This scheme was invalid under the settled rule barring attempts by the patentee to control the resale price of the patented product. *Bauer & Cie v. O'Donnell, 229 U.S. 1, 16-18, 33 S. Ct. 616, 57 L. Ed. 1041 (1913)*.

A second basis for the Court's decision, however, reflects an understanding of the relationship between the patent statute and antitrust policy similar **[**40]** to that outlined above. Justice Stone wrote:

> The extent to which appellant's dominion over the jobbers' business goes beyond its patent monopoly, is emphasized by the circumstances here present that the prices and market practices sought to be established are not those prescribed by appellant-patentee, but by the refiners. Appellant neither owns nor sells the patented fuel nor derives any profit through royalties or otherwise from its sale. It has chosen to exploit its patents by manufacturing the fluid covered by them and by selling that fluid to refiners for use in the manufacture of motor fuel. Such benefits as result from control over the marketing of the treated fuel by the jobbers accrue primarily to the refiners and indirectly to appellant, only in the enjoyment of its monopoly of the fluid secured under another patent. The licensing conditions are thus not used as a means of stimulating the commercial development and financial returns of the patented invention which is licensed, but for the commercial development of the business of the refiners and the exploitation of a second patent monopoly not embraced in the first.

309 U.S. at 458-59, 60 S. Ct. at 626. **[**41]** In short, the Court believed that a principal evil of the restrictive licensing scheme was that it provided little or no reward to the patent monopoly, while permitting non-patentee refiners to benefit from the existence of a retail price cartel. Cf. W. Bowman, Supra, at 186-89. See also *In re Yarn Processing Patent Validity Litigation, 541 F.2d 1127, 1136 (5th Cir. 1976)*, Cert. denied, *433 U.S. 910, 97 S. Ct. 2976, 53 L. Ed. 2d 1094 (1977)* (allocation by patentee of royalty benefits to licensee not protected by patent policy); *United States v. American Linen Supply Co., 141 F. Supp. 105, 113 (N.D.Ill.1956)*.

A second line of cases, more closely in point, illustrates the suspect status of patent license restrictions designed to reduce competition at the licensee level and operated for the benefit of competing licensees. In *United States v. Besser Mfg. Co., 96 F. Supp. 304 (E.D.Mich.1951)*, *Aff'd, 343 U.S. 444, 72 S. Ct. 838, 96 L. Ed. 1063 (1952)*, the patent holders on a concrete block making machine granted licenses to Stearns and Besser, the two dominant firms in the machine manufacturing industry. The licenses provided that no further licenses would be granted under the patents **[**42]** without the consent of both licensees. The court held as follows:

> We believe that the contract under question goes further than is necessary to protect the patent monopoly of Gelbman and Andrus. It may well be that an exclusive license to one party would be valid, but here the patentees have joined hands with the two largest competitors in the industry and by terms of their agreement have virtually made it impossible for others to obtain rights under those patents. The contract even gives Stearns and Besser the power to restrict competition present and future by requiring their joint consent before licensing others. **[***93]** It is this combination requiring collective action that primarily invalidates the agreement. We believe it clear that the parties intended this contract to be a means whereby control of the industry could be acquired and competition eliminated. For what other reason would Besser or Stearns want the consent of the other before approving a licensee suggested by the patentees? And where it is apparent, as it is here, that the contract is to eliminate competition, it must be held illegal.

96 F. Supp. at 311. Accord, *United States v. Krasnov, 143 F. Supp.* ***[**43]*** *184, 199-202 (E.D.Pa.1956)*, *Aff'd, 355 U.S. 5, 78 S. Ct. 34, 2* ***[*1073]*** *L. Ed. 2d 21 (1957)*; *United States v. Singer Mfg. Co., 205 F. Supp. 394, 430 (S.D.N.Y.1962)*, Rev'd on other grounds, *374 U.S. 174, 83 S. Ct. 1773, 10 L. Ed. 2d 823 (1963)* (dictum) ("The Court has clearly condemned a restriction requiring the consent of the non-exclusive licensee before the patentee may grant a license to another."); Frost, Restrictions on Fields of Use and Territories, 42 Antitrust L.J. 633, 636-37 (1973).

Applying these principles, we think that ***HN9***[] a patentee's termination of a licensee, in concert with competing licensees, is not entitled to an antitrust exemption. Where a patentee's license restrictions are imposed vertically upon the licensee, in pursuit of the patentee's own marketing strategy, that circumstance suggests that the patentee's licensing decision is in fact directed toward the legitimate exploitation of the patent monopoly. Cf. *Cernuto, 595 F.2d at 168*. By parity of reasoning, it also may be taken as indicating that the restrictions thus imposed are among those significant to the patentee's initial decision whether to license the manufacture or sale of the patented invention. **[**44]** Where the patentee's anticompetitive conduct is undertaken after a number of non-exclusive licenses have been granted and in concert with competing licensees, however, there is a greater risk that the restriction is designed not to reward the patent monopoly, but to increase the licensee's reward. Similarly, the risk that the patentee's power is being used to assist in the policing of a horizontal agreement among licensees is sharply increased. Id.; *United States v. Besser Mfg. Co., 96 F. Supp. at 311*. As Ethyl and Besser Manufacturing demonstrate, the patent system has no interest in permitting the patentee's monopoly to be used as a screen for the maintenance of a horizontal cartel at the licensee level. We think, in contrast, that the likelihood that antitrust regulation of such terminations will impair the monopolist's legitimate reward or lead him to license more restrictively is remote.

Because the threat to antitrust policies is substantial, and the likelihood of injury to patent policy remote, we conclude that the fact that Congoleum is a patentee does not justify a special antitrust exemption for the conduct alleged here. On this scant record, we express no view on whether **[**45]** this case should be judged by the rule of reason or by a Per se rule. That determination should await fuller development of the evidence on remand. Finally, we express no view on the possible interaction between foreign patent policy and the extraterritorial application of the American antitrust laws. See *Mannington Mills, Inc. v. Congoleum Corp., 595 F.2d 1287 (3d Cir. 1979)*.

The district judge also ruled that the record contained insufficient evidence of a conspiracy to survive a summary judgment motion. While Mannington contests that holding on appeal, we think that on the record before the court that ruling was correct, since the materials filed in opposition to the motion did not show a material issue of fact as to the existence of a conspiracy.

Mannington also argues, however, that the district judge acted prematurely by ruling on the summary judgment motion before Mannington had had fair opportunity to depose the officers and employees of Congoleum regarding the existence of an agreement between Congoleum and its licensees. We agree. ***HN10***[] Summary judgment in antitrust cases is not favored. *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 7* ***[**46]*** *L. Ed. 2d 458 (1962)*; *Cernuto, Inc. v. United Cabinet Corp., 595 F.2d at 165* & n.2. It follows that the grant of summary judgment before an antitrust plaintiff has been given a full opportunity for discovery on his claim may be reversible error. See *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 290-98, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)*.

Congoleum suggests that the failure to permit Mannington to depose its officers on the antitrust issue was, in effect, harmless error, since Mannington was collaterally estopped by the district court's findings in the license case from relitigating the issue of the reasons for the license termination. There, it will be recalled, the court found **[*1074]** that the termination had been undertaken unilaterally by Congoleum to prevent a revolt by its European licensees. The district court correctly rejected this argument, holding that since the reason for the license termination was not "fully litigated and necessary to the judgment" in the license action, his findings **[***94]** there did not collaterally estop Mannington from claiming that a conspiracy had occurred. *Haize v. Hanover Ins. Co, 536 F.2d 576, 579 (3d Cir. 1976)*; Restatement **[**47]** (Second) of Judgments § 68 and Comment c. (Tent.Draft No. 1, 1973). The district court then ruled, however, that "the discovery and trial cross examination during the license phase of this litigation was conducted with sufficient motivation to determine the circumstances of that cancellation that that record may be considered on summary judgment." In our view, that conclusion amounted to an acceptance of Congoleum's collateral estoppel argument in a different form. If the conspiracy issue was not litigated or necessary to the judgment in the earlier action, there was no incentive to conduct full discovery on that issue. Moreover, in view of the bifurcation of discovery on the antitrust and licensing claims, it would appear that Congoleum might successfully have resisted discovery on the antitrust issues during the first phase of the case. We therefore reject the trial court's view that the discovery afforded Mannington in the license phase of the case was adequate to permit resolution on summary judgment of Mannington's antitrust claims.

Congoleum also contends that Mannington waived its right to discovery on the antitrust claims by failing to pursue discovery when it had an **[**48]** opportunity to do so. But the events in the district court show no dilatory conduct on Mannington's part. Mannington first sought the documents relevant to its conspiracy claim (and necessary, as well, to effective deposition of the alleged conspirators) on January 13, 1978. Congoleum strenuously resisted the request for documents, and did not turn them over until mid-April 1978, after the court had ordered their production. After obtaining the permission of the judge to proceed with discovery on the conspiracy claim, Mannington noticed the depositions of the ten Congoleum officials on May 11. As to seven of these officers, that request was immediately opposed by a motion for a protective order. Simultaneously, Congoleum filed its motion for summary judgment.

As evidence of dilatory conduct, Congoleum points to Mannington's agreement to postpone the hearing on the issuance of the protective order until the July 24, 1978 hearing on the motion for summary judgment, and its failure to depose the three officers for whom protective orders were not sought during the period between May 15 and July 24. So far as appears, the postponement of the hearing on the motion for a protective **[**49]** order until July 24 avoided an extra hearing day and allowed simultaneous briefing of the relevant issues, thus working to the advantage of the court and the litigants. Until the court ruled on that motion, Mannington was barred from proceeding with any discovery against the seven officers and employees of the defendant who had been directly responsible for the defendant's licensing program during the period at issue, and whose testimony was therefore most important in determining the circumstances of the termination. Moreover, given the large number of claims pressed by Mannington, and the relationship between the scope of the claims asserted and the scope and expense of discovery, Mannington was surely justified in deciding to postpone further discovery of the three more peripheral figures as to whom no order was sought until the district judge had pared down the case by ruling on the motion for summary judgment. Under these circumstances, Mannington cannot be said to have waived its right to discovery on the antitrust claim.

Since Mannington's alleged conspiracy cause of action states a valid antitrust claim, and since it has been denied the opportunity for full discovery on **[**50]** that charge, the order granting summary judgment on that claim must be reversed.

[*1075] IV. CONCLUSION

The portion of the district court's order dismissing the contractual and equitable claims to foreign patent licenses and the claim alleging a discriminatory denial of know-how will be affirmed. That part of the order which granted summary judgment on plaintiff's alleged antitrust conspiracy is reversed and the cause will be remanded for further proceedings consistent with this opinion.

Concur by: ALDISERT

Concur

ALDISERT, Circuit Judge, concurring.

I join the majority opinion except the extensive discussion contained in Part III (B), Maj. Op. at 1069-1073, of whether Mannington stated a valid antitrust claim. The sole issue properly presented in that section is whether the court erred in granting summary judgment on the conspiracy issue. We hold that while the district court did not err in determining that the record before it contained insufficient evidence of a conspiracy to withstand an adverse summary judgment motion, it did err in ruling on the summary judgment motion before Mannington had fair opportunity to depose Congoleum officers and employees on the possible existence **[**51]** of an illegal agreement between **[***95]** Congoleum and its licensees. We reverse only to permit reasonable discovery to go forward.

Until faced with a genuine case or controversy established by a record, I would not meet the question whether an antitrust violation in this case can be made out, notwithstanding the impressive academic commentary relied upon by the majority. To acknowledge the possibility that upon remand appellant Might be able to find support for its antitrust claim is one thing. It is quite another thing, however, to discuss at great length, on the basis of an incomplete record, what the possible result in this case should be. Unlike the majority, Maj. Op. at 1069 n.14, I think our pronouncement here should be based on specific facts; until we have the facts, any comment which does more than acknowledge the possibility of antitrust violation upon proof of an illegal conspiracy between appellee and its licensees is simply advisory.

Moreover, although I note that summary judgment "should be used sparingly in Complex antitrust litigation," *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 491, 7 L. Ed. 2d 458 (1962)*; *Cernuto, Inc. v. United **[**52]** Cabinet Corp., 595 F.2d 164, 165 n.2 (3d Cir. 1979)* (emphasis added), this does not mean that district judges should hesitate to grant summary judgment in appropriate antitrust cases. The Supreme Court long ago rejected the argument suggesting "that Rule 56(e) should, in effect, be read out of antitrust cases and permit plaintiffs to get to a jury on the basis of the allegations in their complaints, coupled with the hope that something can be developed at trial in the way of evidence to support those allegations. . . ." *First National Bank v. Cities Service Co., 391 U.S. 253, 289-90, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)*. A plaintiff is never "entitled to a full-dress trial notwithstanding the absence of any significant probative evidence tending to support the complaint." *Id. at 290, 88 S. Ct. at 1593*.

Although there is a tendency to wrap antitrust litigation in the tinsel and glitter of esoterica, the governing legal precepts are not too sophisticated; complexities usually emerge only when an innovative plaintiff or government prosecutor contrives a factual pattern to fit a given precept. Thus, over a vigorous dissent by Judge Freedman, this court, in banc, upheld a grant of **[**53]** summary judgment in *Tripoli Co. v. Wella Corp., 425 F.2d 932* (3d Cir.), Cert. denied, *400 U.S. 831, 91 S. Ct. 62, 27 L. Ed. 2d 62 (1970)*. Speaking through Judge Gibbons, we noted that "(e)ven in an antitrust case a party must . . . come forward with affidavits setting forth specific facts showing that there is a genuine issue for trial." *Id. at 935*; *Harold Friedman, Inc. v. Kroger Co., 581 F.2d 1068, 1080 (3d Cir. 1978)*.

Opinion

MEMORANDUM OPINION AND ORDER

HAIGHT, District Judge:

The Court's Memorandum Opinion and order of July 24, 1979 directed that certain documents, concerning which discovery disputes had arisen, be submitted for examination in camera. Counsel have responded with commendable promptness.The Court's rulings follow.

(1) The letter of Edward Bennett Williams, Esq., dated July 11, 1978 to comissioner Rozelle. The NFL resists discovery of the full text of this letter on the basis of the attorney-client privilege. Having examined the letter, I conclude that the privilege does not apply, and the full text must be produced.

Mr. Williams, although an attorney, was not writing to Commissioner Rozelle in that capacity, but rather as owner of the Washington Redskins, an NFL team. Recognizing that distinction, the NFL argues that the Williams letter is nevertheless privileged, because it reveals the substance of an opinion as to the validity of the cross-ownership ban, rendered by Covington & Burling, who unquestionably were counsel for the NFL, retained to advise the NFL on the point of ***antitrust law*** which forms the subject matter of the present suit.

the claim of privilege **[*2]** must be rejected for two reasons. First, the Williams/Rozelle letter, an internal communication within the hierarchy of the NFL, constitutes a restatement of an attorney's legal advice, which reflects or reveals such advice. As such, the communication does not fall within the attorney-client privilege. *United States v. International Business Machines, 71 F.R.D. 376, 378 (S.D.N.Y. 1976)*.

Alternatively, the opinion rendered to the NFL by Covington & Burling, as revealed in the Williams letter, does not in turn reveal any confidential information communicated by the NFL to Messrs. Covington as counsel. All that appears from the Williams letter, in respect of the NFL's communications with Messrs. Covington, is that

Commissioner Rozelle told Messrs. Covington about the cross-ownership ban and asked for an opinion as to its validity. Opinions of counsel are privileged only to the extent that they are based upon, and consequently reveal, information furnished by the client in confidence. *Herbert v. Lando, 73 F.R.D. 387, 398-399 (S.D.N.Y. 1977)*, and cases there cited. No such revelation of confidential information arises out of the Covintton opinion, as revealed and discussed in **[*3]** the Williams letter; and the Williams letter accordingly falls outside the privilege.

To the extent that the NFL objects to production of the Williams letter on the basis of relevance, the objection is overruled.

(2) NFL television contracts. The NASL had sought to discover all NFL television contracts entered into since January 1, 1965. The Court directed inspection of the television contracts in camera in order to determine whether, as suggested by the NASL, the contracts might contain clauses which placed restrictions upon the ability of the television network to broadcast professional soccer games. Counsel for the NFL have produced documents pertinent to the NFL's contractual arrangements with the three leading television networks: NBC, CBS and ABC. The documents cover the years 1970 through 1981. No production appears to have been made in respect of years prior to 1970. As for the years 1970 through 1981, the documents appear to be complete, except for a letter agreement dated October 7, 1977 between the NFL and ABC, referred to and incorporated in ABC's letter to the NFL of October 15, 1977 but not produced.With one exception, the documents submitted to the Court for **[*4]** inspection omit the schedules setting forth the prices which the networks were to pay for the privilege of telecasting the games.

I have examined all the documents produced, and find no reference to soccer, or any other provisions which might lead to evidence admissible on the issues in this case. Accordingly the documents need not be produced. In order to preserve the plaintiffs' rights on appeal, the television contracts and related documents forwarded to the Court with Messrs. Sullivan & Cromwell's letter of Jurly, 30, 1979 will be marked "Court Exhibit 1" and lodged with the Clerk under seal.

As noted, the production of documents does not appear to be complete. However, I will accept an affidavit of counsel asserting (if that be the fact) that neither the October 7, 1977 letter between ABC and the NFL, nor the documents prior to 1970 contained any reference to soccer.

(30) The NASL Stategic Plan. According to Messrs. Weil, Gotshal's letter to the Court of July 31, 1979, and the other papers on the motion, much of this document has been produced to the NFL. The pages remaining in dispute are pp. 179-184, relating to palyer relations; and pp. 232-523, giving particulars **[*5]** as to the response of NASL clubs to a questionnarie distributed by the NASL Planning Committee.

Having examined those pages, I conclude that they bear sufficiently upon pertinent economic and marketing questions to require their production. The NASL ius accordingly directed to forward copies of these pages to counsel for the NFL forthwith.

The litigation will proceed in conformity with this opinion. It is so Ordered.

Opinion

[*484] MEMORANDUM OPINION AND ORDER

Plaintiff Amalgamated Clothing and Textile Workers Union ("ACTWU") brought this action in continuance and escalation of the prolonged struggle between defendant J. P. Stevens & Co., Inc. ("Stevens") and plaintiff and its predecessor unions. Until now the battlefields have been the National Labor Relations Board ("NLRB"), and circuit courts of appeal asked to enforce NLRB rulings against Stevens or punish Stevens for contempt. [1.] ACTWU now invokes the antitrust laws and the civil rights laws and prays, in aid of its efforts to organize Stevens' employees, for declaratory and injunctive relief, as well as treble, compensatory, and punitive damages. Stevens has moved to dismiss the complaint for lack **[**2]** of standing, lack of subject matter jurisdiction, and failure to state a claim upon which relief can be granted. The motion is granted and the complaint dismissed.

I.

ACTWU's complaint states six causes of action. The first two are pleaded under the Sherman Antitrust Act, *15 U.S.C. §§ 1-7*, and the Clayton Act, *15 U.S.C. § 12 Et seq.*, jurisdiction in this Court being founded upon *15 U.S.C. § 15* and *28 U.S.C. § 1337*. The third, fourth, fifth and sixth causes of action are said to arise under the civil rights laws, *42 U.S.C. § 1983* (third cause), *§ 1985* (fourth cause), *§ 1986* (fifth cause), and all of them collectively (sixth cause); jurisdiction is alleged under *28 U.S.C. § 1343*.

Reserving the civil rights causes of action for later discussion, we analyze under **[**3]** this heading the antitrust allegations.

[*485] For the first cause of action, PP 2-5 of the complaint describe ACTWU, its predecessor unions, and the union's present size and structure. Paragraph 2 alleges that ACTWU "is engaged in the trade or business of an international union"; the action is said to be brought on its own behalf and on behalf of its members.

Paragraphs 6-8 describe Stevens as a Delaware corporation maintaining its principal offices within this district, and engaged in the interstate commerce of manufacturing, processing and selling textile goods and products.

Paragraphs 9 and 10 describe the efforts of ACTWU and its predecessors, "for many years" and currently, to organize Stevens' non-supervisory employees and obtain collective bargaining agreements for them, as well as for employees of other textile companies.

Paragraphs 11 and 12 allege that Stevens, "other textile manufacturers and processors and others" have opposed and resisted these efforts, and that Stevens, in furtherance of such opposition and resistance, has engaged in unlawful combinations and conspiracies in restraint of trade.

[1.] For historical summaries, see *NLRB v. J. P. Stevens & Co., Inc., 563 F.2d 8, 13 (2d Cir. 1977)*, Cert. denied, ***434 U.S. 1064, 98 S. Ct. 1240, 55 L. Ed. 2d 765 (1978)***; *J. P. Stevens & Co., Inc. v. Jackson, 99 LRRM 2827, 2828 n.2* (N.D.Ga.1978).

Paragraph 13 describes, without naming, [2] those persons or entities **[**4]** with whom Stevens is alleged to have combined and conspired. They are said to consist of other textile manufacturers; national and local trade and industry associations; employer-supported groups of employees; non-textile employers and businesses in areas where Stevens operates plants; chambers of commerce and similar organizations in such areas; state and local development authorities in such areas; local and state governmental officials and agencies in such areas; and "other persons and entities which are presently unknown to plaintiff."

Paragraph 14 describes the acts, generally and without specifics, allegedly committed by Stevens and its co-conspirators. The allegations, stripped of certain verbiage, describe the following kinds of behavior:

(a) Fixing or limiting wages and working conditions by means of agreements between competing textile companies.

[5]**

(b) Discharging, harassing or discriminating against employees who support ACTWU's efforts.

(c) Committing violations "of the national labor laws" in order to obstruct ACTWU from its organizational and representational activities, and of preventing ACTWU members from their activities, such violations of the labor laws including improper interrogation, surveillance, harassment, and improper procedures in connection with elections to have ACTWU designated as the bargaining representative of the employees.

(d) Refusing to hire and "blacklisting" employees and others who support ACTWU.

(e) Causing or inducing other employers, both within and without the textile industry, to refuse to hire and to "blacklist" employees and persons who support ACTWU.

(f) Discharging or refusing to hire relatives, friends and family members of employees who support ACTWU.

(g) Causing or inducing other employers, both within and without the textile industry, to discharge or refuse to hire relatives, friends and family members of employees who support ACTWU.

(h) Causing or inducing banks, lending and credit organizations, landlords, employers' insurance **[**6]** carriers and their representatives, and business men to discriminate against or refuse to deal with ACTWU, or employees who support ACTWU, their relatives, friends and family members.

(i) Causing or inducing officials and agencies of local and state government to discriminate against such employees, their relatives, friends and family members, with respect to governmental **[*486]** relief and welfare benefits and programs.

(j) Working in concert with chambers of commerce, development authorities, trade and employer associations, and other organizations, to prevent the development of unionized industry in the areas where Stevens operates its textile plants.

(k) Causing or inducing the formation of the J. P. Stevens Employees Educational Committee, whose fundamental goal is to obstruct ACTWU's efforts.

(l) Obtaining financial and other support for the J. P. Stevens Employees Educational Committee from competing textile manufacturers and other anti-union employers and textile and industrial trade associations.

(m) Causing, inducing and encouraging the formation of other employer-supported groups of textile industry employees with goals similar **[**7]** to that of the J. P. Stevens Employees Educational Committee.

(n) Refusing to negotiate in good faith with ACTWU for collective bargaining agreements where ACTWU has been designated as bargaining representative.

(o) Closing or threatening to close textile plants where ACTWU has been designated as bargaining representative, or where it appears that ACTWU would be so designated if free elections were allowed to be held.

(p) Abusing the judicial and administrative process by prolonged, frivolous, and contemptuous resistance to requirements of law.

---

[2] The only exception is J. P. Stevens Employees Educational Committee, alleged to be "an employer supported organization of Stevens employees." P 13(c).

(q) Inciting and exploiting racial discord within textile plants and their communities, with the intent of intimidating and harassing black employees who support ACTWU's efforts, and inciting white employees to oppose those efforts.

(r) Exchanging information, discussing and agreeing upon tactics to be followed to oppose ACTWU's efforts.

(s) Developing a common scheme or plan pursuant to which these acts were committed, and are being committed.

(t) Committing other acts in furtherance of said combinations and conspiracies, presently unknown to ACTWU.

Paragraph 15 alleges that, **[**8]** by reason of these unlawful acts of Stevens and its co-conspirators, ACTWU and its members have been injured in their business and property. ACTWU alleges damages arising out of its unlawful prevention and restraint from its right to organize and represent employees in the textile industry. Various injuries are alleged on behalf of the ACTWU members, arising out of the wrongful acts previously alleged. Treble damages are requested on behalf of all such interests, pursuant to *15 U.S.C. § 15*.

The second cause of action realleges the allegations of PP 1 through 15, and further alleges that Stevens' unlawful acts, in violation of the antitrust laws, are continuing and will continue unless enjoined, in consequence of which ACTWU alleges that it is entitled to injunctive relief pursuant to *15 U.S.C. § 26* (Complaint, PP 17-20).

II.

The ACTWU and Stevens have, until now, battled each other up and down the halls of the NLRB. That is where Stevens says they should remain. ***HN1***[] The National Labor Relations Act of 1935, *29 U.S.C. § 151 Et seq.* ("NLRA"), and the Labor Management Relations Act of 1947, *29 U.S.C. § 141 Et seq.* ("LMRA"), established national policy favoring collective bargaining, **[**9]** forbade various employer practices and labor practices as unfair, and set up the NLRB as the enforcement agency. The NLRB has exclusive competence over any activity "arguably subject" to § 7 or § 8 of the *National Labor Relations Act, San Diego Building Trades Council v. Garmon, 359 U.S. 236, 245, 79 S. Ct. 773, 3 L. Ed. 2d 775 (1959)*, a concept restated in *Motor Coach Employees v. Lockridge, 403 U.S. 274, 292, 91 S. Ct. 1909, 29 L. Ed. 2d 473 (1971)* as pre-empting state and federal court jurisdiction "to remedy conduct that is arguably protected . . . **[*487]** or prohibited by . . . the Act." Stevens relies, in part, on this principle in moving for dismissal of the complaint.

ACTWU responds, correctly, that neither Garmon nor Lockridge involved antitrust claims, as the case at bar is said to do. The interaction of antitrust policy and labor policy, described by one commentator as "intrinsically incompatible," [3.] has generated considerable litigation. Many cases arise when a company raises the sword of ***antitrust law*** against a union, and the union parries with the shield of labor law. This has been the greatest area of involvement of the Supreme Court, whose leading decisions **[**10]** are *Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940)*; *United States v. Hutcheson, 312 U.S. 219, 61 S. Ct. 463, 85 L. Ed. 788 (1941)* (a criminal antitrust charge initiated by the government); *Allen Bradley Co. v. Electrical Workers Local 3, 325 U.S. 797, 65 S. Ct. 1533, 89 L. Ed. 1939 (1945)*; *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *Meat Cutters Local 189 v. Jewel Tea Co., 381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)*; *Ramsey v. United Mine Workers, 401 U.S. 302, 91 S. Ct. 658, 28 L. Ed. 2d 64 (1971)*; and *Connell Construction Co. v. Plumbers and Steamfitters Local 100, 421 U.S. 616, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*. In each of these cases, an employer, an affected company, or the government (as in Hutcheson) contended that union activity violated the antitrust laws. The decisions turned, in the main, upon the Court's perception of the "labor exemption" from the antitrust laws, deriving either from such statutory exemptions as appear in legislation [4.] or the

---

[3.] St. Antoine, Connell: ***Antitrust Law*** at the Expense of Labor Law, 62 Va.L.Rev. 603, 604 (1976).

[4.] Section 6 of the Clayton Act, *15 U.S.C. § 17*, states in effect that labor is not an article of commerce and that the antitrust laws should not forbid labor organizations. Section 20, *29 U.S.C. § 52*, limits the federal courts' injunctive powers and lists certain union activities which are not to be regarded as violative of United States law. Further declarations of the freedom of employees to organize, and limitations upon the federal courts' injunctive powers in labor disputes, appear in the Norris-LaGuardia Act, *29 U.S.C. §§ 101-110*, 113-115.

"nonstatutory exemption" conferred by Court decisions in recognition of "the strong labor policy favoring the association of employees **[**11]** to eliminate competition over wages and working conditions." Connell, Supra, 421 U.S. at 622, 95 S. Ct. at 1835. These "labor exemption" cases are lucidly reviewed in Sullivan, Handbook of the Law of Antitrust (1977), at pp. 723-731. Out of the welter of opinions generated by these cases, Professor Sullivan distills an overall approach:

> "In their totality **[**12]** these cases suggest both an analytical stance and an objective: to reconcile labor and antitrust policy where possible and, where not, to weigh claims of each and give way to the stronger." *Id. at 729*.

The task, he acknowledges, is a difficult one. The Second Circuit has said that the accommodation of the conflicting federal antitrust and labor law policies presents "a troublesome and unruly issue." *Commerce Tankers v. National Maritime Union of America, 553 F.2d 793, 801 (2d Cir. 1977)*, quoting Meltzer, Labor Unions, Collective Bargaining, and the Antitrust Laws, 32 U.Chi.L.Rev. 659 (1965). See also Comment, Labor vs. Antitrust: An Inherent Congressional Quandary, 44 Brooklyn L.Rev. 821 (1978).

While the cited cases appear prominently in the briefs of the parties in the case at bar, they deal, as has been noted, with antitrust charges being made against unions. We are here presented with a union's charge that a company is violating the antitrust laws. Not surprisingly, this situation has arisen far less frequently.

At the outset, I reject Stevens' contention that ACTWU lacks standing to make the claim. While board chairmen and company presidents of the early years of **[**13]** this century might have had difficulty in thinking of labor union organizers as fellow businessmen, it is now well settled that: ***HN2***[] "Unions are in the business of representing employees." *Tugboat, Inc. v. Mobile Towing* ***[*488]*** *Company, 534 F.2d 1172, 1176 (5th Cir. 1976)*. Hence, as that case holds, a union has standing to assert a claim that an antitrust conspiracy involving employers damages its ability to attract members. I am aware of no Supreme Court or Second Circuit decisions to the contrary, and hold on the authority of Tugboat, Inc. that ACTWU has sufficient standing to survive a motion to dismiss the complaint. [5.]

[14]** We come, then, to Stevens' primary attack on the sufficiency of the antitrust claim. ACTWU argues that the § 6 Clayton Act labor exemption redounds only to the benefit of labor, and cannot be availed of by an employer. I accept that principle, but it does not meet Stevens' primary argument, which is that the allegations in ACTWU's complaint, taken as true on this motion to dismiss, simply do not state a cause of action within the antitrust laws. That contention is sound.

In Apex Hosiery, Supra, members of a union took forcible possession of a plant, impeding shipments destined for interstate commerce. The employer sued the union for restraint of trade in violation of the Sherman Act. The Supreme Court affirmed dismissal of the complaint on the basis of lack of jurisdiction under the antitrust laws, stating *310 U.S. at 495-497, 60 S. Ct. at 993-994*:

> ". . . this Court has never applied the Sherman Act in any case, whether or not involving labor organizations or activities unless the Court was of opinion that there was some form of restraint upon commercial competition in the marketing of goods or services and finally this Court has refused to apply the Sherman Act in cases **[**15]** like the present in which local strikes conducted by illegal means in a production industry prevented interstate shipment of substantial amounts of the product but in which it was not shown that the restrictions on shipments had operated to restrain commercial competition in some substantial way."

[5.] If the case were to continue, other questions of standing might arise, such as that of the ACTWU to claim individual damages on behalf of its members. A possible solution, assuming the existence of a problem, would be the intervention of individual employees as plaintiffs, and the certification of the suit as a class action. Because the complaint must be dismissed on other grounds, this subject need not be further pursued.

These principles still obtain; and they serve to explain the survival of the union's antitrust complaint in Tugboat, Inc., Supra, upon which ACTWU places heavy reliance. Two towing companies, Tugboat, Inc. and Mobile Towing Co., were competitors in the tugboat services market in Mobile Bay. The plaintiff union, Seafarers International, and another union, the International Organization of Masters, Mates and Pilots, were contesting the right to represent the workers in the local tugboat industry. Seafarers invoked the antitrust laws against Tugboat, Inc. and its rival union. The Fifth Circuit reversed dismissal of the complaint; the Court of Appeals' analysis of the claim is central to the decision:

> "The essence of the claims in both of these actions is that Tugboat, Inc., conspired with members of Masters, Mates, and Pilots, a union whose local the owners of Tugboat, Inc., allegedly **[**16]** dominate, to restrain trade in the local towing industry by unfairly obtaining labor costs far cheaper than those available to Mobile Towing Co. . . . As alleged, the conspiracy between Tugboat and Masters, Mates, and Pilots allowed Tugboat to prevent Seafarers from organizing Tugboat's employees thus allowing Tugboat to avoid the higher wages and larger crews called for in Seafarer's agreement with Mobile Towing. By reducing costs, Tugboat would be able to run Mobile Towing out of business and monopolize the market. The question for this court is whether the unions or their members may argue that these practices violate the antitrust laws and entitled them to relief."

Clearly, therefore, the facts in Tugboat, Inc. presented a form of "restraint upon commercial competition in the marketing of goods or services" held in Apex Hosiery to **[*489]** be an essential element of an antitrust claim. [6.]

[17]** ***HN3***[] Where that element is missing, a union cannot invoke the Sherman Act in complaining of obstruction of its organizational and representational efforts. *United Brick & Clay Workers v. Junction City Clay Co., 158 F.2d 552 (6th Cir. 1946)*, which cites and follows Apex, is squarely in point. The plaintiff union was the national organization of workers in the brick and clay industry. The union charged several clay companies, an alleged strike-breaking concern, and other parties with conspiracy to impede and thwart its representational efforts. The Court of Appeals affirmed dismissal of the complaint, holding that the NLRB had exclusive jurisdiction of the union's claims. The antitrust claim did not alter that result:

> "The acts described in the petition do not come within the purview of the Sherman Antitrust Act, for they do not allege the imposition by appellees of any form of restraint upon commercial competition in the marketing of

---

[6.] The other cases relied upon by ACTWU are similarly distinguishable. *Carpenters District Council v. United Contractors Association of Ohio, Inc., 484 F.2d 119 (6th Cir. 1973)*, *Modified, 539 F.2d 1092 (6th Cir. 1976)*, and *International Association of Heat and Frost Insulators and Asbestos Workers v. United Contractors Association, Inc., 483 F.2d 384 (3rd Cir. 1972)*, *Modified, 494 F.2d 1353 (3rd Cir. 1974)*, represented, as characterized by the Court in East Central Ohio Building and Construction Trades Council v. Landmark, Inc., (N.D.Ohio, April 26, 1977), an effort by the defendants "to lessen competition by organizing and directing a "sham' union." East Central, slip op. at 5. Thus in the International Association case, the complaint alleged that "an object of the illegal combination and conspiracy is to prevent the Unions from representing for collective bargaining purposes employees of the members of the Association and thus to obtain A competitive advantage over employer parties to collective bargaining arrangements with the Unions . . ." *483 F.2d at 387* (emphasis added). In East Central, the defendants were charged with comparable monopolistic objectives, albeit by a different device. East Central distinguished *Prepmore Apparel, Inc. v. Amalgamated Clothing Workers of America, 431 F.2d 1004 (5th Cir. 1970)*, upon which Stevens relies in the case at bar, because the complaint in Prepmore alleged only a conspiracy to "injure the union and destroy its operations . . ." *431 F.2d at 1006*. The Court in East Central observed that in Prepmore, "there was apparently no allegation that the offending employer conspired to monopolize or otherwise restrain trade." Slip op. at 6. But the allegations in the complaint at bar mirror those of Prepmore, since their essential thrust is that Stevens, in conspiracy with others, seeks to frustrate the union. Relying upon Apex, Supra, and subsequent Supreme Court authority, the Fifth Circuit said in Prepmore :

"There is no indication, however remote, of a conspiracy or combination on the part of Prepmore and Blue Bell to restrain competition in the marketing of Prepmore's goods. In sum, the allegations of the first count of the counterclaim do not rise to the level of alleging a restraint of the type to which the Sherman Act is directed. *Apex Hosiery Co. v. Leader, supra.* It follows that the district court did not err in dismissing the count." *431 F.2d at 1007*.

See also *United Brick & Clay Workers v. Junction City Clay Co., 158 F.2d 552 (6th Cir. 1946)*, Infra.

> goods or service. *Apex Hosiery Co. v. Leader, 310 U.S. 469, 493-500, 60 S. Ct. 982, 84 L. Ed. 1311, 128 A.L.R. 1044*." *158 F.2d at 554*.

The Second Circuit applied Apex in *Kennedy v. Long Island Railroad Company, 319 F.2d 366* (2d Cir.), Cert. denied, **[**18]** *375 U.S. 830, 84 S. Ct. 75, 11 L. Ed. 2d 61 (1963)*, in which the plaintiff union challenged on Sherman Act grounds a "strike insurance" pact entered into by a number of railroads, which supplied a limited amount of funds to roads hit by a certain limited class of strikes. Affirming dismissal of the complaint, Chief Judge Kaufman said in part:

> "Even were we to assume that the strike insurance plan in some way was the "cause' of an interruption in interstate commerce, the Supreme Court has clearly stated that "the Sherman Act * * * does not condemn all combinations and conspiracies which interrupt interstate transportation,' *Apex Hosiery Co. v. Leader, 310 U.S. 469, 486, 60 S. Ct. 982, 84 **[*490]** L. Ed. 1311, 128 A.L.R. 1044 (1940)*, and that "the end sought was the prevention of restraints to free competition in business and commercial transactions which tended to restrict production, raise prices or otherwise control the market to the detriment of purchasers or consumers of goods and services,' *310 U.S. at 493, 495, 501, 512, 60 S. Ct. at 1002*. Surely it cannot be said that the instant form of railroad cooperation in combatting the risks of labor unrest effects an unnatural **[**19]** and anticompetitive regulation of the pricing, supply, or distribution of goods or services. Appellants urge, however, that the price of labor is artificially manipulated whenever a railroad is permitted to avail itself of the proceeds of strike insurance. The answer lies in the clear language of section 6 of the Clayton Act, *15 U.S.C. § 17*: "The labor of a human being is not a commodity or article of commerce.' As an outstanding scholar in the field of labor law has noted: "No one seriously suggests that antitrust policy should be concerned with the labor market per se.' Cox, "Labor and the Antitrust Laws A Preliminary Analysis,' 104 U. of Pa.L.Rev. 252, 254 (1955)." *319 F.2d at 373*.

That proposition of Professor Cox quoted by the Second Circuit in Kennedy that antitrust policy is not "concerned with the labor market per se" is echoed by the Supreme Court's latest decision in Connell, Supra, in which the union activity in question (striking in successful effort to force a number of general contractors to agree to subcontract work only to subcontractors which had current collective bargaining agreements with the union) was held the proper basis of a federal antitrust suit: **[**20]**

> ". . . because it has a potential for restraining competition in the business market in ways that would not follow naturally from elimination of competition over wage and working conditions." *421 U.S. at 635, 95 S. Ct. at 1841*.

These authorities are dispositive, and require dismissal of the antitrust claims. The claims alleged "arguably" fall within the labor laws; indeed, a number of them virtually parrot statutory definitions of unfair labor practices. The antitrust laws do not furnish a remedy, since ACTWU's allegations, taken separately or in concert, do no more than complain of efforts to impede its activities as a union, entirely unaccompanied or uncomplicated by any element of monopolistic effect upon competition in the marketplace for goods or services. As such, the allegations do not rise to the level of an antitrust violation; and in consequence there is no basis to depart from the rule of Garmon and Lockridge, Supra.

I fully appreciate the difficulties ACTWU has encountered in bringing Stevens, that "notorious recidivist," [7.] to book by appealing to the labor laws and the NLRB. The union's frustration and desire to strike out in other directions are equally **[**21]** understandable. Recognizing that Stevens' miserable record of noncompliance with NLRB and court orders "raises grave doubts about the ability of the courts to make the provisions of the federal labor law work in the face of persistent violations," *NLRB v. J. P. Stevens & Co., Inc., Supra, 563 F.2d at 25-26*, the problem may not legitimately be solved by reference to another body of law which is simply not applicable. To use a homely analogy: I may, as a tenant, be harassed and frustrated by the inadequacies and inattention of my landlord; and I may have found the law of landlord and tenant, and the special courts relating to them, inadequate fully to redress my

---

[7.] *NLRB v. J. P. Stevens & Co., Inc., Supra, 563 F.2d at 13*, quoting Bartosie and Lanoff, Escalating the Struggle Against Taft-Hartley Contemnors, 39 U.Chi.L.Rev. 255, 256 n.4 (1972).

grievances; but that does not justify my requesting the district attorney to prosecute the landlord under a penal law whose provisions do not apply to the facts of my situation.

[22]** So here, if the federal labor laws permit Stevens to flout them with impunity, the remedy must lie in a revision of those laws by the Congress.

[*491] The first and second causes of action, alleging violations of the antitrust laws, will be dismissed.

III.

Even if the NLRB were not lurking in the background, ACTWU's causes of action based upon the civil rights statutes are legally insufficient.

The third cause of action (PP 21-25) purports to state a claim under *42 U.S.C. § 1983*, the provisions of which are set out in the margin. [8] *Section 1983* applies only to persons who deprive citizens of their rights "under color of any statute, ordinance, regulation, custom, or usage, of any State or Territory . . ." Stevens itself, of course, does not operate under color of state law. While the complaint alleges that Stevens conspired with local and state officials, and other authorities acting under color of law, no specifics whatsoever are given, in respect of name, date, place, or nature of the activity complained of. The pleading is entirely deficient under the law of this Circuit. ***HN4***[] While a private person, not himself an officer of the state, may be proceeded against under **[**23]** *§ 1983* if "he is a willful participant in joint activity with the State or its agents," *United States v. Price, 383 U.S. 787, 794, 86 S. Ct. 1152, 1157, 16 L. Ed. 2d 267 (1966)*, the plaintiff must in order to state a cause of action specifically identify the public officials concerned, and, as to such officials, specifically allege their personal involvement in the acts complained of. *Powell v. Workmen's Compensation Board, 327 F.2d 131 (2d Cir. 1964)*; *Koch v. Yunich, 533 F.2d 80 (2d Cir. 1976)*; *Fine v. City of New York, 529 F.2d 70 (2d Cir. 1975)*; *Colon v. State of New York Division of Human Rights, 354 F. Supp. 343 (S.D.N.Y.1973)*, *Aff'd, 498 F.2d 1396 (2d Cir. 1974)*; *Black v. United States, 534 F.2d 524 (2d Cir. 1976)*; *Buck v. Board of Elections of City of New York, 536 F.2d 522 (2d Cir. 1976)*. Conclusory or vague complaints, limited to general allegations of deprivation, are insufficient "unless amplified by specific instances of misconduct." *Ostrer v. Aronwald, 567 F.2d 551, 553 (2d Cir. 1977)*.

[24]** Ordinarily I might grant ACTWU leave to amend its complaint. However, under Garmon and Lockridge, Supra, the NLRB has exclusive jurisdiction over the claims against Stevens. See n.10, Post. No leave to amend will be granted.

ACTWU's fourth and fifth causes of action are based upon *42 U.S.C. §§ 1985* and *1986*, respectively. Under the rule of *Griffin v. Breckenridge, 403 U.S. 88, 102, 91 S. Ct. 1790, 29 L. Ed. 2d 338 (1971)*, ***HN6***[] the action may be maintained under these sections only if plaintiff alleges "some racial, or perhaps otherwise class-based, invidiously discriminatory animus behind the conspirators' action." The only animus alleged in the case at bar is that of an employer and its alleged co-conspirators against a union and its members, because of the union activities. [9] **[**25]** In *Moshlak v. American Broadcasting **[*492]** Co. 423 F. Supp. 774, 778 (S.D.N.Y.1976)*, Judge Lasker of

---

8. ***HN5***[] The statute provides:

"Every person who, under color of any statute, ordinance, regulation, custom, or usage, of any State or Territory, subjects, or causes to be subjected, any citizen of the United States or other person within the jurisdiction thereof to the deprivation of any rights, privileges, or immunities secured by the Constitution and laws, shall be liable to the party injured in an action at law, suit in equity, or other proper proceeding for redress."

9. The fourth and fifth causes of action re-allege the allegations of PP 2-15 of the complaint. Paragraph 14(q) alleges, as certain of the acts complained of:

"Inciting and exploiting racial discord and tensions within textile plants and the communities where they are located with the intent, purpose and effect of (i) intimidating and harassing black employees who support ACTWU's organizational and representational activities and (ii) inciting white employees to oppose ACTWU's organizational and representational activities; . . ."

this Court gave short shrift to a labor union's contention that its members fell within those particular, discriminated-against classes contemplated by the Supreme Court in Griffin, and so do I. See also *Bova v. Pipefitters & Plumbers Local 60, 554 F.2d 226 (5th Cir. 1977)*. [10.]

The sixth and final cause of action reiterates the alleged unlawful acts of Stevens in violation of the civil rights acts, and prays for injunctive relief. The third, fourth and fifth causes of action, invoking the civil rights acts, having fallen for the reasons stated, [11.] the sixth cause of action falls with them.

CONCLUSION

The Clerk of the Court is directed to enter judgment in favor **[**26]** of the defendant, dismissing the complaint with prejudice and without costs.

It is So Ordered.

While there are references in this paragraph to the color of employees, the thrust of the claim is plainly that of unfair labor practices committed against employees of Both Races. Hence the invidiously discriminatory motivation against members of a Particular race required by Griffin v. Breckenridge is not pleaded.

[10.] Moshlak and Bova also hold that to the extent the employees have viable claims against their employers, they must be submitted to the NLRB. Bova at 228; *Moshlak at 778*. While these cases arose within the context of *§ 1985*, their rationale is equally applicable to claims under *§ 1983*. The civil rights acts may not be used to undermine the enforcement machinery devised by Congress for labor disputes.

[11.] By this I mean both the infirmities in the civil rights causes of action as pleaded, and the exclusive competence of the NLRB.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN3[] **Public Enforcement, State Civil Actions**

Historically, the New York Legislature did not intend that the medical profession be subject to the Donnelly Act, *N.Y. Gen. Bus. Law §§ 340*, *341*. The statutory language limited the act to any business or trade and the 1933 amendment that extended the act to include service was not intended to include service rendered by the professions. By virtue of the statutory language, legislative history and intent and the judicial interpretation of the act, the medical profession is exempt from the Donnelly Act.

Headnotes/Summary

Headnotes

[*1] Monopolies -- Exemption of Medical Profession from State Antitrust Laws**

The medical profession is exempt from the provisions of the Donnelly Act, the State ***antitrust law***, by virtue of the statutory language, legislative history and intent, and the judicial interpretation of the act. Accordingly, an indictment charging the individual physician defendants and the defendant association with a combination in restraint of the furnishing of services in violation of *sections 340* and *341 of the General Business Law* is dismissed; nevertheless, the resignation by certain physicians of their authorizations to treat nonemergency workers' compensation and no-fault patients based on allegedly inadequate compensation fee schedules and administrative abuses is reprehensible, notwithstanding what may be valid complaints, and, since this court is without remedy, the problem should be addressed by the Legislature.

Judges: Marie G. Santagata, J.

Opinion by: SANTAGATA

Opinion

[*542] [852] OPINION OF THE COURT**

This is a motion by the defendants for an order dismissing this indictment pursuant to *CPL 210.20*.

[*543] The defendants are charged with a combination in restraint of the furnishing of services, in violation of the Donnelly Act, *sections 340* and *341 of the General Business Law*. There are eight individual physician defendants and one association defendant, Surgical Specialties Association of New York, Inc. (hereinafter SSANY).

The indictment charges the defendants, *inter alia*, with "concertedly resigning their authorizations to treat non-emergency Workmen's Compensation patients, and concertedly refusing to treat non-emergency **[***3]** No-Fault patients."

Amicus curiae briefs in support of the motion have been submitted by the Medical Society of the State of New York, the Association of American Physicians and Surgeons, Inc., and the Private Medical Care Foundation, Inc.

FACTS

The facts are substantially undisputed.

Section 13-b of the Workers' Compensation Law requires that only physicians authorized by the compensation board treat workers who are injured during the course of their employment. Fees are governed by a minimum fee schedule adopted by the board. The No-Fault Insurance Law (Insurance Law, § 678) enacted by the Legislature in 1977 adopted the minimum fee schedule of the compensation board as the maximum fee schedule to be paid to physicians for the treatment of persons injured in automobile accidents.

In 1975 many physicians who were dissatisfied with the compensation board communicated their complaints to the chairman of the board and members of the Legislature. Individual physicians resigned from the compensation panels. Their complaints included the failure of the board to answer correspondence or authorize necessary treatment; the unreasonable delays or failure to approve payment of **[***4]** fees; the requirement of duplicitous paper work and coercion in forcing them to accept inadequate fees.

The defendant physicians and others organized SSANY in 1977 with the objective of urging the modification of the compensation fee schedule and the elimination of administrative abuses from the system. As the efforts to obtain legislative action failed, the physicians concertedly agreed to resign their authorizations to treat work-related or automobile accident injuries. Over 250 physicians in the Long Island area **[*544]** became unavailable to render nonemergency medical aid to workers and accident victims. This situation prevails to this date.

The Attorney-General of the State of New York, upon learning of the numerous complaints from residents who were refused medical services, commenced an investigation. This indictment is the result of that investigation.

ISSUE

The defendants have advanced several arguments in support of this motion to dismiss the indictment.

This court will consider the only one which is necessary to its decision. It is an issue of first impression, to wit: Is the medical profession exempt from the provisions of the Donnelly Act?

CONTENTIONS

[*5]** The defendants contend that as members of a learned profession they are exempt from the provisions of the Donnelly Act. They rely on the New York Court of Appeals decision of *Matter of Freeman (34 NY2d 1)*.

The Attorney-General responds that the references to the Donnelly Act in *Freeman (supra)* **[**853]** are dicta; that the Donnelly Act is the "Little Sherman Antitrust Act" *(State of New York v Mobil Oil Corp., 38 NY2d 460*); and, therefore, this court should be guided by the holding enunciated by the United States Supreme Court in *Goldfarb v Virginia State Bar (421 U.S. 773*).

SHERMAN ACT

The Sherman Act (the Federal ***antitrust law***) does not contain a specific exemption in favor of any profession. An analysis of the judicial application of the act reveals that the courts have not created an exemption in favor of any profession. Instead, Federal courts have evaluated each case on its merits, using as a test a rule of reason to determine whether the activity was anticompetitive and an unreasonable restriction on interstate commerce, thereby constituting a violation of the Sherman Act. *(National Soc. of Professional Engrs. v United States, 435 U.S. 679, 691*; **[***6]** Handler, Antitrust-1978, 78 Col L Rev 1363, 1363-1374.)

In *Goldfarb v Virginia State Bar (421 U.S. 773, 788*, *supra)* **[*545]** the Supreme Court stated there is a heavy presumption against implicit exemptions. *(United States v Philadelphia Nat. Bank, 374 U.S. 321, 350-351*.) It gave neither blanket inclusion nor blanket exclusion to the professions, holding that the conduct of mandatory price-fixing was anticompetitive and an unreasonable restraint in interstate commerce, and therefore violative of the act. The court based its decision on the activity and not upon whether it was business, trade or profession. Because of the activity alleged herein, a concerted refusal to deal in the nature of a boycott, there is no doubt that if the Sherman Act were controlling in this case, it would mandate the denial of this motion. *(American Med. Assn. v United States, 317 U.S. 519*; *United States v Oregon State Bar, 385 F Supp 507*.)

DONNELLY ACT

The Donnelly Act, New York's ***antitrust law*** which was enacted in 1899, is a codification of prior common law and statutory law. *(Matter of Davies, 168 NY 89*.) Presently it ***HN1***[] declares void and illegal against public policy "[every] **[***7]** contract, agreement, arrangement or combination, whereby * * * [competition] or the free exercise of any activity in the conduct of any business, trade or commerce or in the furnishing of any service in this state is or may be restrained". (*General Business Law, § 340*, *subd 1*.)

The act does not contain a specific exemption in favor of any profession. The only judicial application of the act to the professions is *Matter of Freeman (34 NY2d 1*, *supra)* which involved the question of whether a Surrogate, in fixing a fee, was unduly influenced by a minimum fee schedule of the local bar association. One of the parties asserted that a minimum fee schedule was regulated by the Donnelly Act. The Court of Appeals ruled on that issue without considering whether the conduct was proscribed under the act but rather relying upon the distinction between the profession and a business or trade. It stated unequivocally a profession is not a business and therefore exempt from the provisions of the Donnelly Act.

In rendering its decision, it was aware of the lower court holding in *Goldfarb (355 F Supp 491*). It specifically distinguished the Federal decision, stating that the question **[***8]** presented dealt solely with the relationship of the State ***antitrust law*** to the statutory scheme for regulating the practice of law.

The court concluded that neither by statutory language, **[*546]** legislative history nor legislative intent did the Donnelly Act apply to the legal profession. It held that the legal profession was exempt from the act.

HN2[] The considered reasoning of a court of final resort on a proposition raised by counsel and deliberately passed on by the court is not mere dicta but must be taken by the courts of inferior jurisdiction as binding. The holding of the majority in *Freeman (supra)* is not dicta. *(Matter of Freeman, 34 NY2d, at p 12*, concurring opn Wachtler, J.)

[854]** The issue before this court is not distinguishable. There is no valid distinction in the interpretation of the Donnelly Act between the legal and medical professions. All the indicia of professionalism noted by the Court of Appeals clearly apply equally to medicine as to law (Education Law, arts 130, 131; *Matter of Freeman, supra, p 7*).

HN3[] Historically, the Legislature did not intend that the medical profession be subject to the act. (Report of the Special Committee to **[***9]** Study the New York Antitrust Laws of the New York State Bar Association, Section on ***Antitrust Law***, 1957.) The statutory language limited the act to any business or trade and the 1933 amendment that extended the act to include service was not intended to include service rendered by the professions. (Bennett, Recent Amendments to the Donnelly Act, 5 NY State Bar Assn Bull, 384, 389; *Matter of Freeman, supra.)*

Consequently, by virtue of the statutory language, legislative history and intent and the judicial interpretation of the act, it is concluded that the medical profession is exempt from the Donnelly Act.

This court has reviewed the rulings in *Matter of Green* (NYLJ, Feb. 23, 1978, p 14, col 2) and *Matter of Hirschorn v Attorney-General of State of N. Y. (93 Misc 2d 275*). Neither ruling involved a criminal prosecution, but rather motions by potential witnesses to quash subpoenas issued by the Attorney-General in connection with investigations under *section 340 of the General Business Law*. These cases held quite properly that an investigation by the Attorney-General into possible antitrust activity was a proper inquiry. It did not consider whether the physicians were **[***10]** subject to the provisions of the Donnelly Act and any such reference was pure dicta and not competent to overrule *Matter of Freeman (supra)*.

CONCLUSION

In this court's view, the conduct of the physicians, the **[*547]** concerted refusal to deal, is in the nature of a boycott, and reprehensible notwithstanding what may be valid complaints. *(State of New York v Horsemen's Benevolent & Protective Assn., 55 AD2d 251*.)

The concerted refusal to treat the injured and the maimed prevents those innocent victims from receiving medical care from the only ones qualified by training and education to render such care. There are no "do it yourself kits" for those requiring orthopedic, plastic or neurological treatment. The social harm inflicted is immeasurable and outweighs any individual inequities. The public is made to suffer in what is essentially an economic battle -- a fight over money, which is inconsistent with the physician's oath to humanity.

It is also important to note that an administrative agency or board cannot be permitted to function without an adequate review of grievances lodged against it.

This court is without remedy. The Legislature is not so limited. The **[***11]** problem presented is far too serious to be ignored and should be addressed without delay.

Accordingly, the omnibus motion is granted to the extent that the indictment is dismissed on the grounds that the medical profession is exempt from the Donnelly Act. In all other respects it is denied as moot.

The passing-on theory of damages must be barred in those situations in which the defendant could not assert a passing-on defense against his direct purchasers.

HN7[] **Private Actions, Purchasers**

There is nothing special about monopsony or oligopsony price-fixing cases that justifies treating them differently from monopoly price-fixing cases for passing-on purposes.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN8[] **Amendment of Pleadings, Leave of Court**

Leave to amend pleadings should be granted liberally when previously unimportant factual issues gain significance as the result of rulings on a point of law handed down during the pendency of the litigation.

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN9[] **Relief From Judgments, Altering & Amending Judgments**

Fed. R. Civ. P. 15(a) requires that leave to amend be freely granted "when justice so requires."

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN10[] **Amendment of Pleadings, Leave of Court**

The United States Supreme Court has said that motions to amend may properly be denied when there has been undue delay in moving for leave to amend.

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN11[] **Relief From Judgments, Altering & Amending Judgments**

Denial of leave to amend is proper when the proposed amendment would be futile.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN12[] **Private Actions, Purchasers**

There is a general "cost-plus" exception to the bar against assertion of a passing-on defense, an exception defined by the policies underlying the bar.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN13[] Purchasers, Indirect Purchasers

Permitted is the assertion of passing-on in situations that are the functional equivalent of the cost-plus contract case. Although the exception was intended to have a "narrow scope", any situation in which the impact of the overcharge is essentially determined in advance without reference to the interactions of supply and demand would function in the same way.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > US Department of Justice Actions > Civil Actions > General Overview

HN14[] Private Actions, Purchasers

The Illinois Brick rule has no application to claims for injunctive relief.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN15[] Private Actions, Purchasers

The Illinois Brick rule does not bar suits for injunctive relief by indirect purchasers in price-fixing actions because the policy considerations underlying the pass-on rule are not implicated in claims for injunctive relief.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Judges: Before WISDOM, HILL, and FAY, Circuit Judges.

Opinion by: WISDOM

Opinion

[*1152] These consolidated appeals involve the applicability of *Illinois Brick Co. v. Illinois, 1977, **[**5]** 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707*, to sales by primary producers to middlemen at prices allegedly depressed by price-fixing at the retail level of distribution. The appeals also present other difficult questions concerning federal antitrust laws.

These appeals arise from thirteen private antitrust actions alleging that the concerted activities of the defendants violate the provisions of *§§ 1* and *2* of the Sherman Antitrust **[*1153]** Act, *15 U.S.C. §§ 1* and *2*. The complaints ask for treble damages and for injunctive relief under §§ 4 and 16 of the Clayton Act, *15 U.S.C. 15* and *26*. The plaintiffs are cattlemen, ranchers, and feeders. The defendants are twenty-five retail food chains, a wholesale grocer, the retail chains' national trade association, and a beef industry price reporting publication. [1.] The plaintiffs in the various suits charge that the retail chains combined, primarily by using the trade association and the price reporting publication, to fix at artificially low levels the prices at which beef is purchased from slaughterhouses and meat packers, and ultimately from the producers cattle ranchers and feeders. The resulting depression in wholesale prices **[**6]** to retailers, passed up the chain of distribution, reduced the prices which the plaintiffs received in selling their cattle to the packers and slaughterhouses.

The Judicial Panel on Multidistrict Litigation assigned the cases to the District Court for the Northern District of Texas, for coordinated or consolidated pretrial proceedings. *In re Beef **[**7]** Industry Antitrust Litigation, 419 F. Supp. 720* (Jud.Pan.Mult.Lit., 1976). In June 1977 the Supreme Court handed down its decision in Illinois Brick, holding that a purchaser could not maintain an antitrust damage action against a seller remote from him in the chain of distribution; rejecting, with narrow exceptions, the offensive use of "passing-on". [2.] Shortly thereafter the defendants moved for dismissal of the complaints on the ground that the plaintiffs' theory of damages (sellers suing remote purchasers) was a "pass-on" theory indistinguishable in all important respects from the theory of damages (purchasers suing remote sellers) at issue in Illinois Brick. The district court agreed with the defendants and dismissed the complaints with prejudice for failure to state claims upon which relief could be granted. The court did not file an opinion, but stated from the bench that the dismissal was based on Illinois Brick.

[8]** The main issue is whether the complaints should have been dismissed on the strength of Illinois Brick. The plaintiffs/appellants also urge that the district court erred in striking from the complaints allegations of retail price-fixing. The plaintiffs in Pony Creek Cattle Co., Inc., et al. v. The Great Atlantic & Pacific Tea Co., et al. appeal partial summary judgments granted against them on their allegation that the statute of limitations was tolled because the defendants fraudulently concealed the alleged conspiracy. We agree with the defendants-appellees that the claims for damages, as pleaded, are within the ambit of the rule of Illinois Brick. Nevertheless we reverse and remand in all thirteen cases because the complaints state claims for damages within the "cost-plus" exception to the Illinois Brick bar. We reverse the partial summary judgments entered on the issue of fraudulent concealment in Pony Creek. In the Agee and Varian cases, we reverse the district court's order striking the allegations of retail price-fixing. In addition, we hold that the complaints in all the cases state claims for injunctive relief under section 16 of the Clayton Act.

[*1154] I.

[9]** ***HN1***[] These actions were dismissed on the pleadings. The allegations of the complaints therefore are taken as true for purposes of these appeals.

The plaintiffs are all cattle ranchers or feeders or both. Cattle are bred and raised on farms, ranches, and commercial feedlots. The animals are fattened for slaughter by feeding them a concentrated ration for fast growth. Ranchers either fatten the cattle themselves or sell to or place the livestock with feeders for fattening. Most fat cattle, say the plaintiffs-appellants, are purchased by slaughterhouses and packers directly from the ranchers and

---

[1.] The lawsuits involved in this appeal are: Petersen et al. v. Safeway Stores, Inc., et al.; Pony Creek Cattle Co., et al. v. The Great Atlantic & Pacific Tea Co., et al.; Lowe, et al. v. Safeway Stores, Inc., et al.; Meat Price Investigators Ass'n et al. v. Safeway Stores, Inc., et al.; Shoshone Tribe of Duckwater, et al. (formerly styled Agee, et al.) v. Safeway Stores, Inc., et al.; Black, et al. v. Acme Markets, Inc., et al.; Chapparal Cattle Corp., et al. v. Safeway Stores, Inc., et al.; Becker, et al. v. Safeway Stores, Inc., et al.; Varian, et al. v. Safeway Stores, Inc., et al.; and Little Ranch Co., et al. v. The National Association of Food Chains, et al.

[2.] "Passing-on" usually means the process whereby a middleman in the chain of distribution who has been overcharged by a manufacturer or by a producer adjusts his prices upward in sales to a lower level in the chain to reflect the overcharge. This case presents the converse of that situation. Here the passing-on was the result of alleged depressed prices fixed by retailers and imposed upon the middlemen (slaughterhouses and packers). In turn, the middlemen passed-on the undercharge, the depression in prices, to the primary producers (cattle ranchers and feeders).

feedlots, although some are purchased by the slaughterers through auction markets. The cattle are then slaughtered and most of the beef is sold as either boxed or carcass beef to retail and wholesale grocers. The large retail food chains buy most of their beef directly from slaughterers and packers. The complaints do not allege a conspiracy between the slaughterers and packers and the defendants.

The plaintiffs allege that the wholesale or carcass price of beef, the price paid by the retail chains to packers and slaughterers, is established by the large retail chains acting in concert. For **[**10]** any given week, it is alleged, the wholesale price in a given area of the United States is set by the pricing decision of the A & P or Safeway Stores, Inc. or the Kroger Co. or one of the other defendants. In antitrust jargon, each wields monopsony power in its region or, with others, oligopsony power. [3.] One designated retail chain in a given area will buy its beef in the regional wholesale market early in the week. The pricing decisions of the leading purchasers in the various regions of the nation are reported in the National Provisioner Daily Market and News Service, ("National Provisioner") or "Yellow Sheet", and thus become known to the entire wholesale beef trade. The other retail chains, it is alleged, then follow the price established by the regional leader in purchasing their requirements of beef for the period. The chains, according to the complaints, can dictate the wholesale price to the packers because they wield monopsony or oligopsony power and because the packers have no long-term storage facilities and therefore cannot withhold their product. [4.] The chains' power is augmented by their considerable cold-storage capacity: they can blunt price rallies by abstaining **[**11]** from the wholesale market and working from their stockpiles.

The price depressions thus engineered are directly "passed on" to the ranchers and feeders, according to the complaints. The plaintiffs allege that the cattlemen, like the slaughterers and packers Vis-a-vis the chains, are in no position to negotiate prices because they cannot, at least in the short term, withhold their product. A fattened steer or heifer, the complaints allege, must be sold within three weeks of the time it reaches choice grade. **[**12]** If the animal is not sold in that time it becomes over-fattened and hence less valuable. The supply of fat cattle is therefore inelastic in the short term. The cattlemen contend that they must take the price the packers quote. The packers, according to the complaints, bid prices derived directly from the Yellow Sheet (or, west of the Rockies, the Safeway) carcass price. Working from estimates of the percentage of an animal that will be carcass beef salable to the retain chains, the packers pay cattle prices based on the Yellow Sheet prices. [5.] Thus, the allegedly artificially **[*1155]** low wholesale prices established by the retail chains' combination translate directly into artificially low prices for fat cattle.

[13]** The plaintiffs do not know when this alleged conspiracy began, but contend that it has been in operation since 1963 at the latest. The food chain defendants, according to the complaints, coordinate their efforts through meetings conducted by the National Association of Food Chains. The conspirators allegedly effect their price-fixing schemes by allocating to dominant chains geographical areas in which to exercise price leadership, and by controlling or manipulating the "Yellow Sheet". The elimination of price competition is further assured by alleged agreements concerning the conspirators' respective specifications for beef. The plaintiffs charge that the chains in any given region coordinate their specifications so that the chains do not compete with each other in purchasing beef of their respective specifications.

The complaints were filed in 1975. The cattlemen charge that the scheme violates *section 1* of the Sherman Act, because it is a scheme "in restraint of trade and commerce". They also contend that the scheme was "an attempt

---

[3.] We use the term "monopoly" to refer to price-fixing by sellers; "monopsony" and "oligopsony" to refer respectively, to price-fixing by a single purchaser or by a group of purchasers, that is, the retailers/defendants in this case.

[4.] Chainwide pricing decisions for a given region are made possible, according to the allegations of the complaints, by the chain's centralized buying practices. Purchases are made for an entire chain or for a large part of a chain, it is alleged, from a central location.

[5.] As explained in Paragraph 28 of the Amended and Substituted Complaint in the Meat Price Investigators Association ("MPIA ") suit:

Cattle buyers for beef slaughterers figure the percentage of dressed meat on the live animal and give the cattle feeder a price for the live animal based on the Yellow Sheet or its west coast counterpart, the "Safeway price."

to monopolize" and had the effect of monopolizing the wholesale beef market in violation of *section 2* of the Act. The complaints also allege that **[**14]** the retail chains fix the retail price of beef to consumers. They request injunctive relief, under section 16 of the Clayton Act, and treble damages going back to the beginning of the alleged conspiracy. The Clayton Act's four-year statute of limitations would ordinarily operate to limit recovery to damages accruing within four years of the filing of the complaints. [6.] The plaintiffs, however, urged that the defendants and their co-conspirators fraudulently concealed the conspiracy from the beginning, and that the statute of limitations therefore did not begin to run until the plaintiffs discovered, in July 1974, that the alleged conspirators had indeed met to discuss the pricing of beef. [7.]

[15]** In late 1975, before the instant actions were consolidated in the Northern District of Texas, that court entered partial summary judgments in the Pony Creek case, a suit originally filed in the Northern District of Texas, dismissing with prejudice the Pony Creek plaintiffs' claims for damages that accrued prior to June 5, 1971. In December of 1976, following the consolidation of the various actions in the Northern District of Texas, the defendants filed motions for partial summary judgment on the statute of limitations issue in the remaining suits. The district court denied those motions. The Pony Creek plaintiffs filed a motion to vacate the earlier partial summary judgments entered against them, but the district court has not acted on that motion.

In June 1977 the defendants in all the cases filed a joint motion for judgment on the pleadings based on the Supreme Court's opinion in Illinois Brick. They pointed out the absence of any allegations that the plaintiffs had sold cattle directly to the defendant retail chains. The suits, they contended, were therefore barred by the general rule of Illinois Brick that only those parties who have dealt directly with members of a price-fixing **[**16]** conspiracy can maintain an antitrust action for damages against the price-fixers. The plaintiffs asked the district court to stay its ruling on the defendants' motion pending further discovery. Six months later, in December, 1977, the district court entered its order dismissing twelve of the suits for failure to state claims and striking the allegations of retail price-fixing. The court dismissed the **[*1156]** remaining case the Little Ranch case in February 1977. All the cases were dismissed with prejudice.

II.

We address first the most important issue in these appeals: Did the district court err in dismissing the appellants' claims for damages?

A.

We meet at the outset questions about the applicability of Illinois Brick to these actions. The appellants' first line of attack on the district court's decision is the bold argument that Illinois Brick simply has no application to these actions. They also urge that, assuming Illinois Brick is relevant, the decision cannot bar damage claims against the National Provisioner and the grocery chain trade association because neither is a buyer or seller of beef. In the interests of clarity, our assessment of these contentions will **[**17]** begin with a discussion of the background and rationale of the Illinois Brick decision.

HN3[] The Illinois Brick rule barring damages actions against alleged price-fixers by indirect purchasers has its genesis in *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 1968, 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231*. Hanover Shoe involved an antitrust treble-damages suit under § 4 of the Clayton Act against a manufacturer of shoe machinery by one of its customers, a lessee of the machinery. The plaintiff claimed damages arising from

---

6. ***HN2***[] Section 4B of the Act, *15 U.S.C. § 15b*, states, in relevant part:

Any action to enforce any cause of action under *sections 15* or *15a* of this title shall be forever barred unless commenced within four years after the cause of action accrued.

7. That information was allegedly disclosed during discovery in ***Bray, et al. v. Safeway Stores, et al., N.D.Cal., 392 F. Supp. 851 (1975)***, a suit virtually identical to the instant actions brought by California cattlemen against many of the defendants in these cases.

the defendant's practice of leasing, rather than selling, the machinery, a practice that the plaintiff contended was a violation of *section 2* of the Sherman Act. The Supreme Court affirmed the trial court's refusal to permit the defendant to prove up the defense that any illegal overcharges imposed on the lessee shoe manufacturer had been passed on to that manufacturer's customers. The Court referred to a "general tendency in the law" not to trace damages "beyond the first step". *392 U.S. at 488 n.6, 88 S. Ct. 2224, n.6* (quoting *Southern Pacific Co. v. Darnell-Taenzer Lumber Co., 1918, 245 U.S. 531, 38 S. Ct. 186, 62 L. Ed. 451*). [8.] **[**19]** The Court rejected the **[**18]** defendant's argument that the general rule should admit of an exception when economic circumstances are such that the overcharge to the buyer both caused and enabled the buyer to pass on the full overcharge to his customers. The impact of the overcharge on the buyer's pricing decisions, said the Court, cannot be demonstrated with any precision in the ordinary case. *392 U.S. at 492-93*, [9.] *88 S. Ct. 2224*. Recognition of a general passing-on defense would, **[*1157]** in the Court's opinion, simply encourage defendants to attempt to establish its applicability, thus complicating and protracting many antitrust proceedings. *Id. at 493, 88 S. Ct. 2224*. The Court rejected the passing-on defense as a general matter and expressed its view that the defense should be permitted only in certain narrow circumstances when the concerns underlying its rejection in Hanover Shoe were not present. *Id. at 494, 88 S. Ct. 2224*.

Hanover Shoe barred defensive passing-on, **[**20]** ***HN4***[] the use of passing-on as a defense in an antitrust action. In Illinois Brick, the Court resolved a split of authority in the courts of appeals by ruling that, ***HN5***[] with few exceptions, indirect purchasers of an alleged price-fixer's product cannot maintain a treble damages action predicated on the offensive use of the theory that the price-fixer's overcharge to his customer was passed on to the plaintiffs. The plaintiffs were separated from the price-fixing offenders by two intervening transactions: the bricks moved from the manufacturers through subcontractors and general contractors to the consumers, carrying a four-cent-per-brick overcharge each time the brick changed hands. The court decided that if Hanover Shoe were to be followed, offensive as well as defensive use of passing-on must be barred. The Court noted that recognition of a "one-sided" limitation on a passing-on theory of damages would lead to a "serious risk of multiple liability". If offensive use of passing-on were permitted, a price-fixer could be held liable to an indirect purchaser for the amount of the overcharge passed-on to that purchaser by the price-fixer's direct customer yet, lacking a passing-on defense **[**21]** (under Hanover Shoe), would be liable to the direct purchaser, his customer, for the full amount of the overcharge. [10.] Further, the Court concluded that the rationale of Hanover Shoe had not depended on the

---

[8.] Before Illinois Brick, a strong case could have been made that the Hanover Shoe decision rested primarily on the Court's perception that the middleman, and not the remote purchaser, is the likeliest enforcer of the antitrust laws. Although it is probable that Hanover, like most middlemen, passed on much of the overcharge, recognition of a passing-on defense would have reduced the incentives for middlemen to sue. Professor Posner has observed: "The choice was thus between overcompensating Hanover and underdeterring United. The Court's preference for the former is consistent with the view that the primary purpose of antitrust damage actions is to deter violations of law." R. Posner, Antitrust Cases, Economic Notes and Other Materials 149 (1974). See *Illinois Brick, 431 U.S. at 752-53, 97 S. Ct. 2061, 52 L. Ed. 2d 707* (Brennan, J., dissenting).

In Illinois Brick, however, the Court observed that the Hanover Shoe decision rested primarily on the difficulty-of-proof problem, and not on the deterrence rationale. *Illinois Brick, 431 U.S. at 720 n.12, 97 S. Ct. 2061, 52 L. Ed. 2d 707 n.12*.

[9.] Normally the impact of a single change in the relevant conditions cannot be measured after the fact; indeed a businessman may be unable to state whether, had one fact been different (a single supply less expensive, general economic conditions more buoyant, or the labor market tighter, for example), he would have chosen a different price. Equally difficult to determine, in the real economic world rather than an economist's hypothetical model, is what effect a change in the company's price will have on its total sales. Finally, costs per unit for a different volume of total sales are hard to estimate. Even if it could be shown that the buyer raised his price in response to, and in the amount of, the overcharge and that his margin of profit and total sales had not thereafter declined, there would remain the nearly insuperable difficulty of demonstrating that the particular plaintiff could not or would not have raised his prices absent the overcharge or maintained the higher price had the overcharge been discontinued.

392 U.S. at 492-93, 88 S. Ct. at 2231.

[10.] A serious risk of overlapping liability would remain even under a rule permitting the offensive use of passing-on only in situations in which the defendant could use a passing-on defense, unless the scope of passing-on were narrowly restricted to defensive context in which passing-on was asserted in that case. The "uncertainties and difficulties in analyzing price and out-put decisions" in the real world, *431 U.S. at 731-32, 97 S. Ct. at 2068*, the "principal basis" for the Hanover Shoe holding, *Id. at 731, 97 S. Ct. 2061*, counseled rejection of offensive passing-on as well. Those same "evidentiary complexities and uncertainties" and undesirable delays would attend the effort of indirect purchasers to establish that illegal overcharges were passed on to them. *Id. at 732, 97 S. Ct. 2061*. The Court decided, therefore, that ***HN6***[] the passing-on theory of damages must be barred in those situations in which the defendant could not assert a passing-on defense against his direct purchasers. *Id. at 735-36, 97 S. Ct. 2061*.

[22]** Because Illinois Brick adopted a unified "mutuality" approach to passing-on problems we must reject the appellants' argument that Illinois Brick has no application to these suits insofar as they seek relief for violations of *Section 2* of the Sherman Act. Under Illinois Brick, the plaintiffs would be entitled to urge a pass-on theory of damages only if the defendant retail chains could use a passing-on defense to claims brought by the packers and slaughterers. Whether the plaintiffs can proceed on a passing-on theory of damages is, applying the mutuality principle, a question unaffected by their denomination of the claim. Absent exceptional circumstances, Illinois Brick and Hanover Shoe limit the use of passing-on theory in antitrust actions without regard to the parties' characterization of the offense.

[*1158] The appellants' most ambitious contention is that Illinois Brick is entirely inapposite to price-fixing suits brought by sellers against indirect purchasers. They point out that Illinois Brick involved purchasers who charged price-fixing by a remote seller and contend that Illinois Brick should be limited to that type of case because the harm suffered by sellers **[**23]** in cases such as this one is much greater than the harm suffered by indirect purchasers in the paradigmatic Illinois Brick -type case. Especially is this so, they urge, when, as here, the alleged price-fixing conspiracy stands like a tollgate athwart the powerful "middle position" in the beef marketing system. The cattlemen's argument, we take it, is that the serious harm flowing from monopsony or oligopsony price-fixing at a middle tier in an industry's structure outweighs the considerations, avoidance of overlapping liability and concern about complexities and uncertainties of proof, that underlay Illinois Brick concerns that the Court may have overemphasized. See The Supreme Court, 1976 Term, 91 Harv.L.Rev. 70, 221-31 (1977).

The first step in assessing this argument is to examine the claim that the harm engendered by monopsony or oligopsony pricing of the kind alleged is, as a categorical matter, greater than that engendered by monopoly pricing. We focus first on monopsony or oligopsony pricing in general, without regard to the position occupied by the price-fixing combination in the productive chain. On this point, the appellants' contentions center on the harm suffered by **[**24]** the competitors themselves the sellers. In the case of monopoly price-fixing, they say, the damaged buyer has a choice: he can refuse to buy the affected product and buy, instead, a substitute. In the monopsony or oligopsony price-fixing case, however, the seller faces a Hobson's choice: he can sell into the rigged market and take the depressed price, or he can refuse to sell at all. In their case, say the cattlemen, this means destroying fat cattle or, in the long run, cutting back production or going out of business.

We might acknowledge the difference as a general matter, but we have no reason to believe that the damage caused by the typical monopsony or oligopsony price-fixing scheme is significantly greater than that caused by the usual seller price-fixing scheme. Both types of price-fixing are attended by restrictions in industry output and the consequent reallocation of resources to less valuable uses. [11.] **[**26]** The appellants argue that the reallocation process in the monopsony price-fixing case is inherently more likely than in the monopoly price-fixing case to cause business failures. [12.] **[**27]** Assuming this to be true, Arguendo, we do not think that this distinction is

---

cases in which the incidence of overcharges could be established with certainty. That risk would arise from the risk of inconsistent factfindings in separate lawsuits by direct and indirect purchasers. Note, Scaling the Illinois Brick Wall: The Future of Indirect Purchasers in Antitrust Litigation, 63 Cornell L.Rev. 309, 319 n.43 (1978). The magnitude of that risk would vary directly with the speculativeness of the proof of the incidence of the overcharge. By narrowly limiting the use of passing-on to cases in which the overcharge can be traced with ease and certainty, see part II, B of this opinion below, the Supreme Court has all but eliminated this risk of duplicative liability.

11. See generally J. Hibdon, Price and Welfare Theory 244-53 (Monopoly pricing); 264-67 (Monopsony) (1969); K. George & J. Shorey, The Allocation of Resources 150-52 (1978).

sufficient **[**25]** to **[*1159]** warrant disparate treatment of monopoly and oligopsony for purposes of pass-on problems. If the Illinois Brick decision is grounded on a balancing of the deterrence and compensation policies of the treble-damages action against considerations of judicial economy and fairness to defendants a view of Illinois Brick that is crucial to the appellants' argument [13.] it seems to us that the Supreme Court chose to permit entire price-fixing schemes, in some circumstances, to go unremedied by private damage actions. If the Court felt that competing considerations outweigh the costs of leaving unremedied the totality of harm flowing from some monopoly price-fixing schemes, we find it difficult to believe that the incremental harm, in the form of possible business failures, that might flow from unremedied monopsony or oligopsony price-fixing schemes would tip the Court's balance in favor of enforcement in the purchaser price-fixing case. The increment is too insignificant in comparison with the total damage caused by price-fixing.

The appellants urge that the Supreme Court has recognized that conspiracies aimed at sellers are especially abhorrent. None **[**28]** of the cases they cite, however, establish anything more than the unsurprising proposition that producers damaged by anti-competitive schemes have a remedy under the antitrust laws. [14.] As support for their contention that conspiracies at the strategic middle position or "bottleneck" in an industry's structure are especially disfavored, they cite the Supreme Court's decisions in *American Tobacco Co. v. United States, 1946, 328 U.S. 781, 66 S. Ct. 1125, 90 L. Ed. 1575*, and *Standard Oil Co. of New Jersey v. United States, 1911, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619*. Those decisions, it is true, recognize the seriousness of monopsony or oligopsony at the dominant middle of an important industry's productive chain, but they do not single out that situation for special treatment under antitrust laws. We cannot carve from an important antitrust rule intended to be of general application exceptions based on the sheer magnitude or impact of the particular conspiracy alleged.

[12.] In the case of monopoly price-fixing, the price-fixing generally raises the price of all goods that incorporate the product subject to the price-fixing. If the conspirators sell directly to the consuming public, the only businesses adversely affected are those in industries that supply complementary goods. If the conspirators do not sell directly to the consuming public, then the product is but an input in the production of other goods or services. By raising the cost of that input, the price-fixing conspiracy might conceivably have the effect of driving marginal firms that use the input out of the market. The likelihood of this occurring depends upon the magnitude of the cost of the input relative to the purchasing firm's total costs of production and on the elasticity of demand for the firm's product. A fifteen percent rise in the cost of beef, for example, threatens the profitability of a steakhouse far more than that of a grocery store. The impact will be greatest in the rare case of a firm that simply buys and resells only the good affected by the price-fixing conspiracy.

Most firms that sell directly to the typical monopsony or oligopsony price-fixing conspiracy, however, are in a position analogous to that of the single-product distributor who purchases his product from price-fixing conspirators. The good affected by the price-fixing conspiracy is likely to be the seller's only product or to represent a significant percentage of the seller's output. In general, the impact on a firm's revenues of a purchaser price-fixing scheme aimed at the product it sells is greater than the impact on a firm's costs of a monopoly price-fixing scheme affecting an input into the firm's product.

[13.] If Illinois Brick did not involve such a balancing, even implicitly, then the appellants' argument that the greater harm flowing from purchaser, as compared with seller, price-fixing, justifies special treatment of passing-on problems in monopsony cases loses its premise. Formally, at least, Illinois Brick involved no such balancing as suggested in the text. The Illinois Brick holding is essentially the rule of mutuality. That rule was justified almost entirely by reference to the problem of overlapping liability, and the Court's focus on the risk of overlapping liability was a result of its assumption that direct purchasers, as well as indirect, would likely sue the price-fixers. On the surface of it, then, Illinois Brick does not acknowledge that its pass-on rule involves any significant sacrifice of antitrust enforcement: in those cases in which the rule bars indirect purchasers from suing, the direct purchasers, it is assumed, will likely come to the fore.

[14.] E. g., *Zenith Radio Corp. v. Hazeltine Research, Inc., 1969, 395 U.S. 100, 89 S. Ct. 1562, 23 L. Ed. 2d 129*; *Continental Ore v. Union Carbide & Carbon Co., 1962, 370 U.S. 690, 82 S. Ct. 1404, 8 L. Ed. 2d 777*; *Klor's, Inc. v. Broadway Hale Stores, Inc., 1959, 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741*; *Mandeville Island Farms v. American Crystal Co., 1948, 334 U.S. 219, 68 S. Ct. 996, 92 L. Ed. 1328*. The cases cited by the appellants, with the exception of Mandeville Island Farms, were cases involving monopolization or exclusionary practices, not price-fixing. None involved passing-on theories of damage.

[29]** We conclude that ***HN7***[] there is nothing special about monopsony or oligopsony price-fixing cases that justifies treating them differently from monopoly price-fixing cases for passing-on purposes. Illinois Brick therefore speaks to the instant cases.

A final issue as to the applicability of the Illinois Brick rule concerns the appellants' cases against the National Provisioner and the National Association of Food Chains. The appellants argue that the Hanover Shoe-Illinois Brick limitations on the use of passing-on theory apply only to suits brought against firms that are in the chain of production. They theorize that the "central rationale" of the Hanover Shoe And Illinois Brick decisions is that firms dealing directly with the alleged price-fixer are likelier than firms remote in the productive chain to sue and that severe limitations on the use of passing-on theory are necessary **[*1160]** lest direct-dealing firms be discouraged from bringing suit. Because the trade publication and the trade association do not buy or sell beef at all, the argument continues, there are no firms in the beef marketing system that deal directly with these defendants. The cattlemen, the appellants **[**30]** conclude, are as likely as anyone to bring suit against those defendants.

The argument rests on a faulty premise. The Illinois Brick decision rested on avoidance of overlapping liability and on concern about the complexities and uncertainties of proof that would attend general recognition of passing-on theories of damage. What is critical is not whether a defendant competes in the relevant industry but whether the plaintiff's action (or the defendant's defense) asserts a form of passing-on theory. The complaints in these cases do so. The National Provisioner and the National Association of Retail Chains do not buy or sell beef but the appellants' complaints charge that they conspired with firms that do buy beef to fix the purchase price of boxed and carcass beef. That the trade publication and trade association defendants do not market beef does not diminish the problems of overlapping liability and uncertainty of proof posed by the use of a passing-on theory of damages. The doctrine of Illinois Brick therefore applies to the complaints against these two defendants.

B.

Having determined that the Hanover Shoe-Illinois Brick Doctrine applies to the damages claims in their entirety **[**31]** we turn to the appellants' contentions that these actions fit recognized exceptions to the bar against use of passing-on theory.

1. The Co-Conspirator Exception.

Certain of the appellants contend that the complaints in these actions, liberally construed, allege a conspiracy between the retail chains, on the one hand, and the packers and slaughterers on the other. [15.] They argue for an exception from the Illinois Brick rule for cases involving a conspiracy between the remote price-fixers and the direct-dealing intermediary.

[32]** They argue, first, that cases involving conspiracy spanning two levels in the chain of distribution fit the exception recognized in Illinois Brick for cases in which the defendant owned or controlled its customer (the middleman). *Illinois Brick, 431 U.S. at 720 n.16, 97 S. Ct. 2061, 52 L. Ed. 2d 707 n.16*. [16.] If the retail chains

---

[15.] Indeed, many of the allegations strongly suggest that all the non-defendant co-conspirators adverted to in the complaints are food retailers. Paragraph 34 of the MPIA Amended and Substituted Complaint, for example, states in part:

b. Specifications have been established by the defendant retail food chains and other co-conspirators for the beef they buy. In most instances, the specifications for beef carcasses or parts thereof have varied . . . thus eliminating competition between and among the defendants and other co-conspirators.

c. The defendant food chains and other co-conspirators have allocated retail marketing areas . . . .

d. The defendant food chains and other co-conspirators have agreed not to compete with one another on a price basis in purchasing beef at wholesale . . . .

e. . . . Through uniform entry into the wholesale beef market or uniform withdrawal from the wholesale beef market, the defendant food chains and other co-conspirators have combined to monopolize to affect the demand for beef products and artificially depress the wholesale price of beef products to an unreasonably low level, which level is directly reflected by the Yellow Sheet price and the "Safeway price,' and which prices are directly passed on to the beef producer.

conspired with the packers and slaughterers, they urge, the retailer can be said to have "controlled" the middleman within the meaning of footnote 16 of Illinois Brick. Market forces would have been **[*1161]** superseded in such circumstances. There would then be no indirect dealing problem, it is argued, since those selling to the packers and slaughterers would have dealt directly with the price-fixing conspiracy.

[33]** Even if proof of a multilevel conspiracy would not bring the case within the "control" exception recognized in Illinois Brick, it is urged, we should recognize a distinct exception for vertical conspiracies. The appellants argue that the defendants remote from the plaintiffs in the chain of distribution do not run the risk of double liability if it is proved that the intermediary was an equal participant in the price-fixing conspiracy, for the co-conspirator intermediary could not recover in a suit against the remote seller or purchaser. This is so, they say, because "when parties of substantially equal economic strength mutually participate in the formation and execution of the scheme and bear equal responsibility for the consequent restraint of trade, each is barred from seeking treble damages from the other". *Columbia Nitrogen Corp. v. Royster Co., 4 Cir. 1971, 451 F.2d 3, 15*. See also *Premier Electrical Constr. Co. v. Miller-Davis Co., 7 Cir. 1970, 422 F.2d 1132*, Cert. denied, 1970, *400 U.S. 828, 91 S. Ct. 56, 27 L. Ed. 2d 58*.

As the appellees point out, however, the co-conspiracy theory now urged by the plaintiffs-appellants was not set forth in the complaints. The theory **[**34]** of the complaints, both before and after the Illinois Brick decision, was that the defendants conspired to fix the prices paid to packers and that the packers simply "passed on" the price depression to cattlemen. Certain allegations in the complaints refer to unnamed co-conspirators, and the appellants now contend that the packers and slaughterers are included among those unnamed co-conspirators. Various paragraphs in the complaints refer to the unnamed co-conspirators as nondefendant food retailers. Nothing in the complaints, however, suggests that packers or other intermediaries conspired with the defendants. In their joint reply brief the appellants cite paragraph 34 of the MPIA and Becker Amended Complaints as an example of a packer conspiracy allegation. [17.] That paragraph, however, states merely that most slaughterers and packers have standing agreements with the defendant chain stores to supply fixed quantities of beef each week, and that the Yellow Sheet or "Safeway" price paid the packers sets the price that the packers pay the plaintiffs for their cattle. This is merely an allegation of passing-on, not of conspiracy. No agreement to fix prices is alleged. If the act **[**35]** of passing-on sufficed to brand the intermediary as a co-conspirator the asserted exception would wholly swallow the Hanover Shoe-Illinois Brick, rule.

The appellants urge that the district court abused its discretion by failing to give them adequate opportunity to amend their complaints, after the Illinois Brick decision, to allege a vertical conspiracy, and by denying post-judgment requests for leave to amend. We do not agree.

[36]** ***HN8***[] Leave to amend pleadings should be granted liberally when previously unimportant factual issues gain significance as the result of rulings on a point of law handed down during the pendency of the litigation. E. g., *Commissioner of Internal Revenue v. Estate of Donnell, 5 Cir. 1969, 417 F.2d 106*. In none of these cases, however did the district court before the entry of its dismissal order deny the plaintiffs leave to amend their complaints in light of Illinois Brick. And all plaintiffs had a reasonable opportunity to amend before the district court ruled on the

---

[16.] "Another situation in which market losses have been superseded and the pass-on defense might be permitted is where the direct purchaser is owned or controlled by its customer. Cf. *Perkins v. Standard Oil Co., 395 U.S. 642, 648, 89 S. Ct. 1871, 1874, 23 L. Ed. 2d 599 (1969)*; *In re Western Liquid Asphalt Cases, 487 F.2d 191*, (at) 197, 199." But "reliance upon direct purchasers to bring suit is wholly unjustified when they are controlled by the prospective defendants". The Supreme Court, 1976, 91 Harv.L.Rev. 70, 230 (1977).

[17.] That paragraph states:

Most slaughterers and packers have standing agreements with various receivers, including the defendant chain stores and other co-conspirators, for certain quantities of beef each week. With knowledge of their weekly requirements and of the prices quoted in the Yellow Sheet or the "Safeway Price," the packers and slaughterers directly pass down the price established by the defendant retail food chains. The packers and slaughterers in aggregate do not suffer any diminution of sales, purchases, margins or profits as a result of this artificially low price.

defendants' dismissal motions. Those motions, based on Illinois Brick, were filed on July 17, 1977, eight days after the **[*1162]** Supreme Court's decision. The district court did not rule on the motions until October, 1977. In three of the suits, the MPIA, Becker, And Petersen suits, the complaints were amended, with leave of court, after the filing of the defendants' motions to dismiss. None of those complaints, however, adequately alleged conspiracy. The plaintiffs in the remaining suits stood on the allegations of their complaints, asserting that the "unnamed" co-conspirators mentioned therein were indeed packers **[**37]** and slaughterers. Following the court's communication of its decision to the parties, an attorney for one of the plaintiffs requested that the dismissal be "without prejudice", but none of the plaintiffs attempted to amend the complaints until the Black And Pony Creek plaintiffs, After the court's December 9 entry of its order dismissing the suits with prejudice, filed motions for leave to amend.

The district court did not abuse its discretion in denying the post-judgment motions for leave to amend. ***HN9***[] *Rule 15(a) of the Federal Rules of Civil Procedure* requires that leave to amend be freely granted "when justice so requires". The Supreme Court has said that ***HN10***[] motions to amend may properly be denied when there has been undue delay in moving for leave to amend. *Foman v. Davis, 1962, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222*. The plaintiffs have offered no credible explanation for their failure to move for leave to amend until nearly five months after the defendants moved for dismissal on the basis of Illinois Brick. [18.] Absent any apparent justification for this delay, we cannot hold that the district court abused its discretion. We emphasize, moreover, that these motions were **[**38]** made after the court's entry of the dismissal orders and after the movants had, in their legal memoranda in support of their opposition to the motion to dismiss, asserted that they stood, in regard to the co-conspiracy issue, on the allegations of their existing complaints. The plaintiffs tested the theory that their embellished allegations of passing-on were equivalent to allegations of packer complicity in the price-fixing conspiracy and lost. We have said before that

> (m)uch of the value of summary judgment procedure . . . would be dissipated if a party were free to rely on one theory in an attempt to defeat a motion for summary judgment and then, should the theory prove unsound, come back long thereafter and fight on the basis of some other theory.

Freeman v. Continental Gin Co., 5 Cir. 1967, 381 F.2d 459, 469-70.

The Supreme **[**39]** Court in Foman also declared that ***HN11***[] denial of leave to amend is proper when the proposed amendment would be futile. *Foman v. Davis, supra, 371 U.S. at 182, 83 S. Ct. 227*. The district court's denial of the post-judgment motions was supportable on this ground as well. Amendment of the complaints to allege a vertical conspiracy would not have brought these actions within the "control" exception in Illinois Brick. In footnote 16 of Illinois Brick the Court suggested the intended scope of the "control" exception by citing the Ninth Circuit's decision in *In re Western Liquid Asphalt Cases, 1973, 487 F.2d 191*, Cert. denied, *415 U.S. 919, 94 S. Ct. 1419, 39 L. Ed. 2d 474*. In that case there was evidence tending to show that the defendants controlled their direct customers "either through acquisition of stock, or indirectly through various financial arrangements, including credit". *Id. at 195*. It has been suggested that "courts should invoke the exception only to ensure that sellers do not insulate themselves from suit . . . by strong-arming direct purchasers into choosing not to sue". Note, Scaling the Illinois Brick Wall: The Future of Indirect Purchasers in Antitrust Litigation, 63 **[**40]** Cornell L.Rev. 309, 328-29 (1978). The plaintiffs in these suits have never suggested that the grocery chains "controlled" the packers or slaughterhouses, either through stock ownership or credit arrangements. Indeed, the plaintiffs proposed to amend their complaints to allege a vertical conspiracy, **[*1163]** not to allege arrangements by which the defendants controlled the packers and slaughterhouses.

Nor do we think that allegations of conspiracy would bring these cases within an exception for suits alleging vertical conspiracy. It is true that some courts have acknowledged such an exception. E. g., *Florida Power Corp. v. Granlund, M.D.Fla., 1978, 78 F.R.D. 441*; *Donson Stores, Inc. v. American Bakeries Co., S.D.N.Y., 1973, 58 F.R.D. 481*. Whatever the merits of the arguments for such an exception in general, we do not think that the reasoning of

---

[18.] The only explanation given is the Chapparal plaintiffs' lame assertion that it took a long time to divine the meaning and implications of the Illinois Brick Decision.

Illinois Brick permits recognizing the exception when, as here, the alleged co-conspirator middlemen are not named as parties defendant. Absent joinder of the packers and slaughterhouses, the rule forbidding one antitrust conspirator from maintaining an action against another for damages arising from the joint activity would not protect **[**41]** these defendants from the risk of overlapping liability. The retail chains could not, in a suit brought by the packers, use a judgment or finding of vertical conspiracy in the instant case to prevent the packers from successfully asserting in their own lawsuit that they did not in fact conspire with the chains and are therefore not barred by the co-conspirator doctrine from recovering damages from the retail chains. E. g., *Mosher Steel Corp. v. N. L. R. B., 5 Cir. 1978, 568 F.2d 436*. Because the packers are not parties to this suit, the possibility of inconsistent adjudications on the issue of the existence of a vertical conspiracy leaves the defendants subject to the risk of multiple liability that the Illinois Brick Court found unacceptable.

For these reasons we uphold the district court's refusal to permit post-judgment amendments to the complaints.

2. The "Cost-Plus" Exception.

The appellants urge that outright dismissal of their damage claims was error because the complaints stated good claims within the "cost-plus contract" exception in Illinois Brick.

The Supreme Court acknowledged in Hanover Shoe "that there might be situations for instance, when an overcharged buyer **[**42]** has a pre-existing "cost-plus' contract, thus making it easy to prove that he has not been damaged when the considerations requiring that the passing-on defense not be permitted in this case would not be present". *392 U.S. at 494, 88 S. Ct. at 2232*. The Court in Hanover Shoe seemed to suggest ***HN12***[] a general exception to the bar against assertion of a passing-on defense, an exception defined by the policies underlying the bar. Cases in which the middleman's customer is obligated under a pre-existing cost-plus contract to purchase a fixed quantity of goods are paradigmatic of this exception. The proof the contract itself and evidence of its performance is simple and unequivocal. [19.] Uncertainties of proof are thus avoided. The risk of overlapping liability is eliminated or reduced to the barest minimum inasmuch as the evidence is not susceptible of differing interpretations and is unlikely to be accepted in one lawsuit and rejected in another.

[43]** As we understand these cases, the Court meant the scope of the exception to be narrow, but it did not imply that only cases involving cost-plus contracts qualify. Commentators have observed that Hanover Shoe and Illinois Brick ***HN13***[] permit the assertion of passing-on in situations that are the functional equivalent of the cost-plus contract case. E. g., Note, Recovery by Indirect Purchasers and the Functions of Antitrust Treble Damages, 55 Texas L.Rev. 1445, 1454-57 (1978). "Although the Court **[*1164]** intended the exception to have a "narrow scope', any situation in which (the impact of) the overcharge is essentially determined in advance "without reference to the interactions of supply and demand' would function in the same way." Note, Scaling the Illinois Brick Wall: The Future of Indirect Purchasers in Antitrust Litigation, 63 Cornell L.Rev. 309, 331 n.93 (1978) (citations omitted). When the impact of an overcharge on a middleman's pricing decisions can be so determined, the uncertainties involved in resorting to general economic theorems are avoided and the clarity of the evidence virtually eliminates the possibility of overlapping liabilities as the result of inconsistent verdicts **[**44]** in separate lawsuits. Functional equivalence is not lost simply because the proponent of passing-on theory cannot demonstrate that the middleman suffered no loss in volume as the result of raising the price to his customers. [20.] In the cost-plus contract case itself,

---

[19.] In Hanover Shoe the Court emphasized the inadequacy of economic theory to the task of tracing the incidence of an overcharge. See note 7 Supra. In Illinois Brick the Court elaborated on the point. The Court noted that economic theory provides a formula for determining the incidence of an overcharge, but that the analysis rests on "an array of simplifying assumptions" and assumes knowledge of the elasticities of supply and demand in the relevant market. *431 U.S. at 741-42, 97 S. Ct. 2061*. The unacceptability of the assumptions and the near-impossibility of measuring the relevant elasticities renders such incidence analysis little more than a guessing game in practice, the Court seemed to suggest. The Court was concerned not so much with the complexity of such proof as with its speculative character.

[20.] In *Yoder Bros., Inc. v. California-Florida Plant Corp., 5 Cir. 1976, 537 F.2d 1347*, Cert. denied, *429 U.S. 1094, 97 S. Ct. 1108, 51 L. Ed. 2d 540*, a panel of this Court reversed a treble damages judgment that was erroneously reduced by recognition at trial the middleman is likely to have suffered a loss of volume and hence profits as a result of the overcharge. His higher selling price will likely have caused potential customers to forego his product. See Note, 63 Cornell L.Rev. 309, 329 n.87. The middleman's loss of volume and the indirect purchaser's absorption of the overcharge are wholly separable items of damage.

[45]** Applying these principles, we conclude that the district court erred in dismissing these actions. The dismissal, we emphasize, was on the pleadings. The question at the pleading stage is simply whether **[*1165]** the allegations of the complaints state a case within the "cost-plus" exception. The complaints sufficiently allege that the impact of the retail chains' price changes upon the pricing decisions of the packers is determined in advance without regard to the interactions of supply and demand. The plaintiffs allege that the packers set the price of live cattle by strictly applying certain formulae to the Yellow Sheet or Safeway wholesale beef price. Under these allegations a plaintiff would be entitled, once he proved what the competitive wholesale price would have been for a given grade of beef in a given region at a given time, and once he established that the packer to whom he sold strictly applied a formula to the Yellow Sheet price for the particular sale, to damages in the amount of the difference between the price he actually received on that sale of fat cattle and the price he would have received absent price-fixing (computed by applying the packer's formula to **[**46]** the constructed competitive wholesale price). The packer's habitual use of predetermined formulae [21.] would enable measurement of the effect on prices

---

of a passing-on defense. The Court ruled that the defense was not available because the evidence of the party asserting the defense did not demonstrate the applicability of the cost-plus exception suggested in Hanover Shoe. The Court found that the evidence did not show the effect of a price change on the direct purchaser's total sales or unit costs for a different sales volume. Under the rule of Yoder Bros., the passing-on defense is unavailable absent evidence that the direct purchaser did not suffer harm in the form of lost sales volume, even if it is proved that the direct purchaser passed on the entirety of the overcharge.

Application of the Illinois Brick mutuality principle would suggest that, because under Yoder Bros. these defendants could not assert a passing-on defense at all in a treble damages suit brought by the packers and slaughterers absent proof that the packers and slaughterers suffered no loss of volume as a result of the alleged price-fixing, the cattlemen should be barred from using passing-on theory offensively against the defendants unless they demonstrate that the packers and slaughterers suffered no loss of volume. If this is so, then the bar against use of passing-on is absolute, for it would be impossible, not simply "virtually" impossible to make such a showing. Indeed, Yoder Bros. has the effect of eliminating the passing-on defense altogether, except perhaps in the very narrow case of a pre-existing, fixed quantity cost-plus contract.

We do not believe, however, that the Yoder Bros. Court's treatment of the pass-on issue is viable after Illinois Brick. The Yoder Bros. Court's very literal reading of Hanover Shoe to require parties asserting a pass-on defense to prove that the intermediary suffered no harm whatsoever rested, we think, on its view that the private treble damage action is of "overriding importance . . . in the antitrust enforcement scheme." *Id. at 1375*. Indeed, Hanover Shoe was plausibly read, before Illinois Brick, as resting on the view that the strong policy in favor of antitrust enforcement justifies buying enforcement at the expense of overcompensating plaintiffs. See note 6 Supra. In Illinois Brick, however, the Court denigrated the importance of the antitrust enforcement rationale in the decision of Hanover Shoe and characterized the difficulty-of-proof problem as the key to Hanover Shoe. *431 U.S. at 732 n.12, 97 S. Ct. 2061 n.12*. Indeed, Illinois Brick itself demonstrated that the policy in favor of vigorous antitrust enforcement must sometimes give way in face of the risk of overpunishing antitrust violators. The Yoder Bros. panel would not have taken so niggardly a view of the passing-on defense had it had the benefit of the Illinois Brick Court's interpretation of the Hanover Shoe opinion, or had it known the implications that its decision might have for antitrust plaintiffs after Illinois Brick.

Post-Illinois Brick commentary, moreover, has generally assumed that the issue of the impact on the direct purchaser's sales volume of an overcharge should not be dispositive in a case involving the offensive use of passing-on theory. E. g., Note, Recovery by Indirect Purchasers and the Functions of Antitrust Treble Damages, 55 Texas L.Rev. 1445, 1455 n.69 (1977). See also, Note, Scaling the Illinois Brick Wall: The Future of Indirect Purchasers in Antitrust Litigation, 63 Cornell L.Rev. 309, 329 n.87 (1978).

[21.] Because these cases come up on appeal from dismissals on the pleadings, we are not concerned with the question whether packers and slaughterers in fact applied pricing formulae without deviation, or with the question whether the formulae employed were such that a change in wholesale prices in a given region had a predetermined effect on the price offered feeders in the region by the packers and the slaughterers. We must assume, for purposes of these appeals, that the plaintiffs could demonstrate that both questions are to be answered in the affirmative.

for fat cattle of changes in wholesale prices. [22] The plaintiffs have alleged the functional equivalent of cost-plus contracts.

[47]** We do not agree with the appellees that the packer pricing mechanism alleged is exactly analogous to the "fixed percentage markup" or cost-based pricing systems rejected by the Illinois Brick Court as exceptions to the passing-on rule. In Illinois Brick the Court refused to recognize an exception where middlemen "purport" to charge a fixed percentage markup. *431 U.S. at 743, 97 S. Ct. 2061*. Here it is alleged that the packers In fact engaged in formula pricing. The Court in Illinois Brick was skeptical of the plaintiffs' claims because there is evidence that firms purporting to apply fixed markups above costs in fact fit the markup to the elasticity of demand for the product or juggle cost allocations to achieve the same result. F. Scherer, Industrial Market Structure and Economic Performance 176 (1970). An intermediary, such as a contractor in Illinois Brick, who employs numerous inputs in assembling his final product might bear the larger brunt of an increase in the price of one of his inputs without leaving any evidence that he did so. It is alleged that the intermediaries in these cases determine their purchase price for fat cattle by rigid application of formulae to the **[**48]** wholesale price for carcass beef. Assuming the allegations of the complaints to be true, a packer's absorption of a loss resulting directly from a decrease in the wholesale price would be detectable from a change in his purchasing formulae or from his paying a price for fat cattle that is above the price he would have paid had he adhered to his customary formulae. It is alleged, moreover, that the packers have no reason to depart from their purchasing formulae in the short run because short term supply is, by the very nature of cattle production, highly inelastic.

[*1166] We recognize that it might be said that we are engaging in "the process of classifying various market situations according to the amount of pass-on likely to be involved and its susceptibility of proof in a judicial forum". See *Illinois Brick, 431 U.S. at 744-45, 97 S. Ct. at 2074*. But the Supreme Court itself engaged in such a process in suggesting exceptions to its bar against the use of passing-on theories. If allegations of structural inelasticity of short term supply and of rigid formula pricing by intermediaries do not bring a case within the cost-plus exception for purposes of a motion to dismiss **[**49]** on the pleadings, then the cost-plus exception is a narrow one indeed, and must include only cases involving literal cost-plus contracts. [23] In light of the purposes behind the passing-on bar preventing duplicative recoveries and avoiding the uncertainties involved in the use of incidence theory the situation alleged in these complaints is the functional equivalent of the cost-plus contract case.

The appellees are correct in asserting that the proposed proof of damages is far from simple. It will require detailed proof as to individual transactions. Attention must focus on the type and grade of cattle sold, and on whether (and which) pricing formulae were used by packers in making particular purchases. The proof must be detailed and particular. But this is a complexity born of quantity. The Kinds of proof that will be involved, **[**50]** however, are not new to courts, and certainly not to antitrust courts. The cases as pleaded escape Illinois Brick only insofar as they avoid the use of general economic theory in tracing the effect of the defendants' price decisions, and only insofar as they can be proved, in the damages phase, with certainty. If, as to a particular transaction, it cannot be clearly shown that the purchasing packer applied a specific price formula, or if other details of a transaction, such as the quantity or grade of cattle, are not available, then the plaintiff cannot recover damages as to that sale. [24]

---

[22] In Hanover Shoe the Court pointed out that in attempting to prove a pass-on a litigant would have to demonstrate that the intermediary would not have raised his price absent the overcharge. *392 U.S. at 493* and n.9, *88 S. Ct. 2224* and n.9. This is a causation issue. The Court's general rejection of the use of passing-on theory rested in part on its view that this issue of causation could not, except in rare cases, be resolved with adequate certainty. See note 17 Supra. If, however, an intermediary over a long period of time consistently determines his purchase price by applying a fixed formula to the price he will receive when he in turn sells, the objection based on the speculativeness of the causation evidence disappears. Our legal system routinely permits triers of fact, as indeed it must, to infer causation, or the lack of causation, from the observation of deviation Vel non from long-indulged habit or practice.

[23] That view was recently taken by the Third Circuit Court of Appeals in *Mid-West Paper Products Co. v. Continental Group, Inc., 596 F.2d 573 (1979)*, As amended April 5, 1979.

[24] The appellees have suggested that the plaintiffs will have to trace their cattle through the chain of production to establish that the cattle they sold to packers and slaughterhouses were in turn sold, in carcass form, to members of the alleged retail chain

[51]** We reverse the district court's dismissal orders. Because the pleadings state a case within the cost-plus exception. We emphasize that we are not ruling that these plaintiffs are entitled to go to trial. The Supreme Court intended that it be determined early in the litigation whether (or to what extent) a party should be entitled to present a pass-on theory at trial. The defendants will have the opportunity to raise that issue again by summary judgment motion. Given the strictures of Hanover Shoe and Illinois Brick, the district court may and **[*1167]** should demand from the plaintiffs in each case a pretrial demonstration that they have definite and particularized proof that they will need to establish damages. Nor does our ruling imply that the plaintiffs may attempt to trace damages beyond the tier comprised of those who sell directly to the packers or slaughterers. Under the allegations of the complaint only those plaintiffs who sold directly to the packers or slaughterers that engaged in strict formula buying are entitled to maintain damage claims. The complaints do not allege that feeders or brokers "passed on" price depressions to ranchers or that they engaged in **[**52]** strict formula buying based solely on Yellow Sheet prices.

III.

The appellants also appeal the dismissal of their claims for injunctive relief on the basis of Illinois Brick. It follows from our ruling that it was error to dismiss the damage claims on the pleadings that it was also error to dismiss the claims for injunctive relief on the pleadings. Our disposition of the injunctive relief issue, however, rests on the broader ground that ***HN14***[] the Illinois Brick rule has no application to claims for injunctive relief.

We agree with the reasoning of *Mid-West Paper Prods. Co. v. Continental Group, Inc., 3 Cir. 1979, 596 F.2d 573*, As amended April 5, 1979. The court in that case ruled that ***HN15***[] Illinois Brick does not bar suits for injunctive relief by indirect purchasers in price-fixing actions because the policy considerations underlying the pass-on rule are not implicated in claims for injunctive relief. An injunctive suit does not expose a defendant to monetary liability at all, much less to the risk of duplicative liability, and does not require the trier of fact to determine the incidence of the overcharge. ***HN16***[] To secure injunctive relief under section 16 of the Clayton Act, the plaintiffs **[**53]** need show only "threatened loss or damage by a violation of the antitrust laws". *15 U.S.C. § 26*. To show a threat of such injury, plaintiffs in a case such as this would not have to show the extent of their harm. It would suffice to show by a preponderance of the evidence that the alleged price-fixing had or will have some adverse impact on the prices they receive for their cattle, or that the conspiracy reduced the packers' demand for fat cattle.

The appellees argue that injunctive relief is barred to indirect sellers or purchasers whose damage claims are barred by Illinois Brick because Illinois Brick holds that such persons are not injured within the meaning of section 4 of the Clayton Act. Section 4 and section 16, they point out, are coextensive except that section 16, unlike section 4, does not require an injury to the plaintiff's "business or property". It therefore follows, it is urged, that indirect sellers or purchasers barred from section 4 treble damages by the Illinois Brick rule are not threatened with legally cognizable injury within the meaning of section 16.

---

conspiracy. If the prices allegedly established by the defendants were uniformly followed by the beef retailing industry, as the plaintiffs allege, however, tracing would be unnecessary. The plaintiffs' theory of damages is not in all respects a pass-on type of theory. Their theory, stated most broadly, is that the activities of the alleged price-fixing conspiracy depressed wholesale prices generally, and not simply the prices paid by members of the conspiracy, and that packers and slaughterers based their purchases of live cattle on the depressed wholesale price. It is immaterial whether or not a steer purchased from a plaintiff found its way into the hands of a conspirator retailer. It is enough if, as alleged, the conspirators' activities caused a general depression in wholesale prices and the intermediary purchasing from a plaintiff based his pricing decision on the depressed wholesale beef price.

We disagree with the recent ruling of a divided panel of the Third Circuit Court of Appeals that one who deals with a nonconspiring competitor of price-fixing firms lacks standing to sue those firms for treble damages. See *Mid-West Paper Products Co. v. Continental Group, Inc., supra* note 23, *596 F.2d 587*. That decision supports the appellants' contention, for if a person who deals directly with a nonconspiring competitor lacks standing, then an indirect purchaser from, or an indirect seller to, a nonconspiring competitor of the defendants A fortiori lacks standing. We agree with the dissent in Mid-West Paper Products that such a plaintiff satisfies the "target area" test for standing, See Part IV below, and that the injury suffered by such a plaintiff satisfies the tests for proximate causation. See *596 F.2d at 597*.

We disagree with the appellees' characterization of the Illinois Brick decision. Formally, it is true, **[**54]** both Hanover Shoe and Illinois Brick held that, with the exceptions previously discussed, the overcharged direct purchaser, and not the indirect purchaser who may ultimately bear part of the overcharge, suffers the full injury for purposes of section 4. Had those decisions even purported to rest on a divination of the original meaning of section 4 of the Act we would agree with the appellees that Illinois Brick has clear implications for injunctive actions under section 16 as well. But neither Hanover Shoe nor Illinois Brick involved statutory construction in the ordinary sense. They are judicial glosses on an old statute, predicated on contemporary policy considerations. The implications of those decisions therefore reach only as far as the policy considerations informing them.

IV.

In its December 1977 order dismissing the actions, the district court granted the defendants' motion to strike allegations of retail price-fixing from the complaints. Those allegations charged the retail chains with conspiring to set artificially high prices for beef sold to retail consumers. The plaintiffs in all the suits appeal that action.

[*1168] It was error to strike the allegations **[**55]** of retail price-fixing in the Agee and Varian complaints. [25.] These ***HN17***[] complaints allege that some of the plaintiffs have purchased beef as consumers at prices affected by the alleged conspiracy. Such an allegation is an adequate allegation of the injury to one's "property" within the meaning of section 4 of the *Clayton Act. Reiter v. Sonotone Corp., 442 U.S. 330, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*. That the allegations might have been added to the complaint in the effort to inject highly prejudicial matter into a lawsuit that is primarily based on wholesale price-fixing, as the appellees charge, is of no consequence, for ***HN18***[] *Rule 18(a) of the Federal Rules of Civil Procedure* grants the plaintiffs complete freedom to join in a single action all claims that they may have against any of the defendants. 6 C. Wright & A. Miller, Federal Practice and Procedure § 1582 (1971).

[56]** It was not error, however, to strike the retail price-fixing allegations from the remaining complaints. With the exception of the Agee and Varian complaints, none of the complaints alleged injury to the plaintiffs' business or property within the meaning of the Clayton Act. The appellants contend that they have adequately alleged injury to their businesses. They say that they intend to prove, under their allegations, that the alleged retail price-fixing conspiracy reduced consumer demand for beef, thereby derivatively reducing the retailers' and the packers' demand for the plaintiffs' fat cattle.

The appellants, however, lack standing to sue for such remote injury. ***HN19***[] Only those within the "target area" of an alleged antitrust conspiracy have standing to sue. E. g., *Jeffrey v. Southwestern Bell, 5 Cir. 1975, 518 F.2d 1129, 1131*. ***HN20***[] The question of standing is a preliminary one, to be answered from examination of the allegations of the complaint. *Yoder Bros., Inc. v. California-Florida Plant Corp., 5 Cir. 1976, 537 F.2d 1347*, Cert. denied, *429 U.S. 1094, 97 S. Ct. 1108, 51 L. Ed. 2d 540*. Looking to the complaints, we find allegation of retail purchases in only the Agee and Varian **[**57]** complaints. In the other complaints we find, at best, allegations under which the plaintiffs could show harm flowing derivatively from a reduction in consumer demand. ***HN21***[] The "target" of a retail price-fixing conspiracy, however, is the retail purchaser. E. g., *Kemp Pontiac-Cadillac, Inc. v. Hartford Automobile Dealers' Ass'n, 1974, D.Conn., 380 F. Supp. 1382, 1386*. To recognize the non-purchasing plaintiffs as "targets" of the alleged retail price-fixing conspiracy would be to grant antitrust standing to firms and persons at every level in the chain of beef production and distribution. "Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Hawaii v. Standard Oil Co., 1972, 405 U.S. 251, 263 n.14, 92 S. Ct. 885, 891-892, 31 L. Ed. 2d 184*. Only the Varian and Agee allegations satisfy the "target area" test for standing to sue.

Shifting ground, the appellants argue that evidence of the alleged retail price-fixing conspiracy is highly relevant to their claims of monopolization and monopsony or oligopsony price-fixing at the wholesale level. The defendants' retail-level activities, they urge, **[**58]** are evidence of the defendants' monopoly power and proclivity to collude.

[25.] The Agee suit has been restyled Shoshone Tribe of Duckwater, et al. v. Safeway Stores, Inc., et al. We follow the parties' practice of referring to the case as "Agee ".

Evidence of those activities is also essential, they contend, to painting for the jury a complete picture of the alleged conspiracy and of the industry in which it operates. They contend, in short, that they simply pleaded evidence.

This is not the place or time to debate the relevance of the retail price-fixing evidence. ***HN22***[] The district court had ample discretion, under *Rule 12(f) of the Federal Rules of Civil Procedure*, to order stricken from the complaint any redundant or immaterial matter. 5 C. Wright & A. Miller, Federal Practice and Procedure § 1382 at 807 (1969). Although unnecessary evidentiary details are usually not stricken from the complaint unless prejudicial or of no **[*1169]** consequence to the controversy, Id.; see also *Augustus v. Board of Public Instruction, 5 Cir. 1962, 306 F.2d 862*, evidence pleading, as distinguished from the pleading of ultimate facts, is not favored under the Federal Rules. See *Rule 8(a) Fed.R.Civ.P.*; 5 C. Wright & A. Miller, Supra, at 832-33. Many courts have properly stricken unnecessary evidentiary detail from pleadings. E. g., *Control Data Corp. v. International* ***[**59]*** *Business Machines Corp., 8 Cir. 1970, 421 F.2d 323*; *Commissioner of Internal Revenue v. Licavoli, 6 Cir. 1958, 252 F.2d 268*; *Mitchell v. Hart, 1966, S.D.N.Y., 41 F.R.D. 138, 143*. ***HN23***[] The district court's action will not be disturbed unless it was an abuse of discretion. E. g., *Commissioner of Internal Revenue v. Licavoli, supra, at 272*. We find here no abuse of discretion. Nor do we perceive how the plaintiffs have been harmed. The district court's order striking the pleadings does not control the issues of materiality and relevancy that govern admissibility of the evidence. E. g., *Control Data Corp. v. International Business Machines Corp., supra, at 326-27*. The plaintiffs need not plead these matters. *Schlick v. Penn-Dixie Cement Corp., 2 Cir. 1974, 507 F.2d 374*, Cert. denied, *421 U.S. 976, 95 S. Ct. 1976, 44 L. Ed. 2d 467*. "If the trial court considers these matters proper proof upon the trial, he may admit them even though not pleaded." *Alden-Rochelle, Inc. v. American Society of Composers, Authors and Publishers, 1942, S.D.N.Y., 3 F.R.D. 157, 159*.

V.

The plaintiffs in the Pony Creek action appeal the partial summary judgment entered against them on their claim that the defendants' **[**60]** fraudulent concealment of the alleged conspiracy tolled the four-year statute of limitations of section 4B of the Clayton Act. *15 U.S.C. § 15b*.

The Pony Creek action was filed on June 5, 1975. Unless the statute of limitations was somehow tolled, the Pony Creek plaintiffs cannot recover for damages sustained prior to June 5, 1971. They allege in their complaint that they had failed to discover their cause of action before the June 1971 commencement of the limitations period because the defendants had fraudulently concealed it from them. ***HN24***[] Fraudulent concealment tolls the Clayton Act's statute of limitations. *General Electric Co. v. City of San Antonio, 5 Cir. 1964, 334 F.2d 480*; *Rinzler v. Westinghouse Electric Corp., 5 Cir. 1964, 333 F.2d 719*. To avail himself of this tolling doctrine, an antitrust plaintiff must show that the defendants concealed the conduct complained of, and that he failed, despite the exercise of due diligence on his part, to discover the facts that form the basis of his claim. *Charlotte Telecasters, Inc. v. Jefferson-Pilot Corp., 4 Cir. 1976, 546 F.2d 570*; *Dayco Corp. v. Firestone Tire & Rubber Co., 6 Cir. 1975, 523 F.2d 389*.

The defendant Kroger Co. ("Kroger") **[**61]** moved for partial summary judgment on the fraudulent concealment claim. Kroger submitted with its motion evidentiary matter that, it contended, conclusively established that the plaintiffs had known, or would have known through the exercise of due diligence, of the existence of their claims before June 5, 1971. The evidence consisted of copies of numerous articles and reports published in the late 1960's in newspapers and cattle industry trade journals, together with an affidavit attesting to the authenticity of the copies. The articles and reports publicized the dissatisfaction of livestock producers with cattle prices, as well as the charges of many cattlemen that the retail chains were colluding to depress prices. Many of the articles reported the filing, in 1968, of *Bray, et al. v. Safeway Stores, et al., N.D.Cal., 392 F. Supp. 851 (1975)* a lawsuit brought by several California cattlemen against major retail chains and which involved allegations essentially identical to those of the Pony Creek complaint. The defendants' exhibits showed that the allegations of the Bray Complaint had received much publicity nationwide. The plaintiffs filed no counter-affidavits. They argued **[**62]** that the Bray lawsuit revealed no operative facts relating to their claim and that none were revealed until discovery in the Bray suit during 1973 disclosed that **[*1170]** some of the defendants had indeed discussed prices at trade association meetings.

Finding no genuine issue of material fact, and mindful of the suggestion in part 1.80 of the Manual for Complex Litigation that issues such as fraudulent concealment be determined as early as possible in complex litigation so as to define the scope of discovery, [26.] the district court granted the motion.

[63]** The Manual's salutary principle notwithstanding, ***HN25***[] the question of when the statute of limitations began to run on the plaintiffs' cause of action is a factual one, E. g., *Ciccarone v. United States, 3 Cir. 1973, 486 F.2d 253, 256*, and is therefore not determinable on a motion for summary judgment. The district court's task was simply to determine whether a genuine question was presented justifying trial, *F.R.Civ.P. 56(c)*, as the court fully recognized. The defendants, as ***HN26***[] the moving parties, had the burden of demonstrating the absence of any genuine material issue of fact, and the plaintiffs had no obligation to present evidence opposing the motion unless the defendants' affidavit and exhibits initially established the absence of a genuine issue. Advisory Committee Notes to the 1963 Amendments to *Rule 56*, 31 F.R.D. 647, 648; *Adickes v. Kress, 1970, 398 U.S. 144, 90 S. Ct. 1598, 26 L. Ed. 2d 142*. Kroger's evidentiary showing went entirely to the issues of the plaintiffs' actual or constructive knowledge of their cause of action. The question presented, then, is whether Kroger's showing established the absence of a genuine issue as to the plaintiffs' knowledge, actual or constructive, **[**64]** of their claim. [27.]

From the affidavit and exhibits it is abundantly clear that the plaintiffs knew or should have known in 1968 and 1969 of the allegations of the Bray complaint. The Bray case was widely publicized in numerous issues of numerous trade publications, including, as the district court noted, an issue of The American National Cattlemen's Association's weekly publication Beef Business Bulletin, which, according to the supporting affidavit, had at the relevant time a circulation of nearly 300,000. The Bray complaint itself was, of course, a matter of public record. It is of no **[**65]** moment that Kroger presented no direct evidence demonstrating that the plaintiffs were actually aware of the Bray case. Even assuming that the inferences of actual knowledge to be drawn from Kroger's presentation were insufficient for summary judgment purposes, the evidence was more than adequate to establish beyond doubt that reasonably diligent cattlemen in the plaintiffs' situation would have been aware, in the late 1960's, of the Bray allegations. ***HN27***[] Numerous federal courts have suggested that plaintiffs are chargeable with knowledge of the contents of public records. E. g., *Dayco Corp. v. Goodyear Tire & Rubber Co., 6 Cir. 1975, 523 F.2d 389, 394*; *Morgan v. Koch, 7 Cir. 1969, 419 F.2d 993, 998*; *Overfield v. Pennroad Corp., 8 Cir. 1944, 146 F.2d 889, 898*; *Pettibone v. Cook County, 8 Cir. 1941, 120 F.2d 850, 855*. ***HN28***[] In a case involving a claim that the statute of limitations has **[*1171]** been tolled, "the means of knowledge are the same thing as knowledge itself." Wood v. Carpenter, 1979, 101 U.S. (11 Otto) 135, 143, *25 L. Ed. 807*.

The plaintiffs' knowledge of the Bray complaint, however, is not As a matter of law tantamount to actual or constructive knowledge of their claim. ***HN29***[] Although **[**66]** the statute of limitations is not tolled simply because the plaintiffs lack much of the evidence supporting their potential claim, *Prather v. Neva Paperbacks, Inc., 5 Cir. 1971, 446 F.2d 338*, they cannot have notice of a potential claim unless they are aware of some evidence tending to support it. ***HN30***[] The filing by others of a similar lawsuit against the same defendants may in some

---

[26.] Part 1.80 states in relevant part:

In some complex cases it becomes apparent at the preliminary pretrial conference or shortly thereafter that the determination of a legal question will expedite the disposition of the cause. This is particularly the case where the nature and scope of discovery and further pretrial proceedings would be substantially affected by the determination of the preliminary legal question. For example, in the electrical equipment civil antitrust cases the question whether fraudulent concealment would toll the running of the statute of limitations was one of the most important questions. It was very desirable to secure a determination of this question as early as possible, for if the statute was not tolled by fraudulent concealment, the discovery would be comparatively narrow in scope of time and a summary judgment on some or all issues could be rendered in many cases.

Manual for Complex Litigation 80 (1977).

[27.] Kroger, of course, did not have to demonstrate the absence of triable fact issues as to the allegation that the defendants actively concealed the alleged conspiracy. If the defendants established that the plaintiffs knew or should have known of their cause of action before June 5, 1971, the running of statute of limitations would not have been tolled even had the defendants affirmatively concealed the alleged scheme.

circumstances suffice to give notice, but to rule that it does so As a matter of law is to compel a person situated like these plaintiffs to file suit, on the pain of forfeiting his rights, regardless of whether his attorney believes that there is "good ground to support it". *Rule 11, F.R.Civ.P.* The mere filing of a similar lawsuit, without more, does not necessarily give "good ground" because that suit might well be frivolous or baseless. [28.]

[67]** The leap from the plaintiffs' knowledge of the Bray complaint to actual or constructive knowledge of their cause of action therefore involves factual issues. The defendants had the burden, as the moving parties, to demonstrate conclusively that the plaintiffs, through the exercise of reasonable diligence, would have discovered adequate ground for filing suit. The summary judgment evidence consisted only of a demonstration that the plaintiffs should have been aware of the Bray complaint. There is no evidence in the record suggesting that the Bray litigation turned up any verification for the allegations before June 5, 1971, or that the plaintiffs had independent access before that time to any information, beyond the Bray complaint itself, that tended to verify their suspicions. At best, the materials on file might support an inference that the plaintiffs would have discovered adequate support before June 1971 had they been reasonably diligent. The inference, however, is not so compelling as to entitle the defendants to summary judgment. Because the defendants failed to demonstrate the absence of genuine issues of fact the partial summary judgment must be reversed.

We should **[**68]** emphasize that this ruling is dictated by the posture of the question and the nature of the defendants' summary judgment showing. ***HN31***[] The plaintiffs bear the ultimate burden of persuasion on the fraudulent concealment issue. The burden is a heavy one. Those who have learned of facts "calculated to excite inquiry" must inquire. *Clement A. Evans & Co. v. McAlpine, 5 Cir. 1970, 434 F.2d 100, 102*, Cert. denied, *402 U.S. 988, 91 S. Ct. 1660, 29 L. Ed. 2d 153*. The widely publicized Bray complaint certainly put these plaintiffs to a duty to investigate. They must demonstrate to the trier of fact that they investigated with reasonable diligence and discovered nothing that would have justified them in filing suit before June 5, 1971. Id.; see also *Dayco Corp. v. Goodyear Tire & Rubber Co., supra.* In opposing the motion for summary judgment, however, the plaintiffs were not required to make any showing unless the defendants demonstrated that no genuine issues of fact underlay the due diligence question. This the defendants failed to do.

The judgments below **[**69]** are REVERSED and the cases REMANDED for further proceedings consistent with this opinion.

End of Document

[28.] That the Bray plaintiffs eventually succeeded (in 1975) in their lawsuit is of no consequence, for the Bray action might have disclosed nothing about the alleged conspiracy before June 5, 1971.

HN1[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The rationale for per se illegality in antitrust suits is that there are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. Particular acts, of which price fixing is one, has been held so plainly anti-competitive as to be conclusively presumed illegal. The fixing of credit terms, on the other hand, is not manifestly anticompetitive.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN2[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Determination of the applicability of per se illegality turns on whether the practice appears to be one that would always or almost always tend to restrict competition and decrease output, or instead one designed to increase economic efficiency and render markets more rather than less competitive.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] Regulated Industries, Higher Education & Professional Associations

Under the rule of reason any concerted action violates the Sherman Act, *15 U.S.C.S. § 1*, if its purpose or effect would significantly impair competition. The rule of reason does not open the field of antitrust inquiry to any argument in favor of a challenged restraint that may fall within the realm of reason. It requires examination of the impact of credit fixing on competitive conditions, and such an agreement can benefit competition only if it improves the operation of the market.

HN4[] Summary Judgment, Opposing Materials

Under *Fed. R. Civ. P. 56(c)*, the burden is on the party moving for summary judgment to show the absence of any genuine issue of material fact, and, in determining whether the burden has been met, the court must draw all inferences of fact against the movant and in favor of the party opposing the motion. Once it appears from the movant's papers that the motion should be granted, the opposing party must controvert the showing. All evidence and inferences are to be viewed in a light most favorable to the party opposing the motion.

Opinion by: SNEED

Opinion

[*1098] Plaintiffs, a conditionally certified class of beer retailers doing business within the Fresno area, appeal from a ruling that defendants' alleged credit fixing agreement was not Per se illegal, but rather must be proven illegal under the rule of reason standard. Catalano, Inc. and C & C Food Marts, Inc. (hereinafter Catalano), two named plaintiffs, also appeal from a summary judgment of the district court adjudging that neither plaintiff had suffered **[**2]** injury in fact. Both appeals were consolidated. We affirm the district court's ruling that credit fixing, standing alone, was not an agreement to fix prices subject to a Per se rule of illegality. We reverse the district court's entry of summary judgment against Catalano and remand Catalano's claim for further proceedings.

I. FACTUAL BACKGROUND

Plaintiffs-appellants claim that defendants-appellees, various beer wholesalers, have engaged in a conspiracy to restrain trade violative of *section 1* of the Sherman Act. [1] The class of plaintiff retailers sought to establish, Inter alia, that the defendant wholesalers conspired to eliminate deferred payment terms, specifically short term trade credit formerly granted to them on beer purchases. [2]

Plaintiffs sought an order from the district court **[**3]** declaring the alleged credit fixing agreement, if proven, violative Per se of the antitrust laws. The district court refused to so rule. Plaintiffs then sought an interlocutory appeal from the district court's ruling on the Per se issue pursuant to *28 U.S.C. § 1292(b)*. The district court **[*1099]** properly certified the issue and we granted permission to appeal.

Contemporaneous with the request for the order declaring credit fixing a Per se violation, defendants sought a motion for summary judgment against plaintiffs Catalano asserting that they failed to establish injury in fact. The district court agreed, granted the motion for summary judgment, and Catalano appealed therefrom.

We granted a motion to consolidate the two appeals.

II. QUESTIONS PRESENTED

Two issues are presented by these appeals. First, did the district court err by ruling that a horizontal agreement among wholesalers to eliminate credit on retail sales would not constitute a Per se violation of the antitrust laws? Second, did the district court err by granting summary judgment against plaintiffs Catalano on the ground that they failed to demonstrate the existence of any injury in fact? We shall turn first **[**4]** to the Per se issue.

III. THE PER SE ISSUE

---

[*] Honorable M. Joseph Blumenfeld, Senior District Judge for the District of Connecticut, sitting by designation.

[1] *15 U.S.C. § 1*.

[2] The district court conditionally certified plaintiffs' class to include those retailers to whom the wholesalers extended credit prior to the alleged agreement to terminate the credit provisions.

To support their contention that an alleged horizontal agreement among beer distributors to eliminate formerly free short term trade credit should be considered as illegal Per se, plaintiffs argue that: (1) Price fixing is subject to a Per se evaluation under the Sherman Act. [3] (2) Under the pertinent standard price fixing may be accomplished directly or indirectly. [4] (3) An agreement to fix credit terms fixes prices indirectly. (4) As a result, credit fixing is a Per se violation of the antitrust laws.

We cannot agree that on this record an agreement to fix credit terms amounts to indirect price fixing within the meaning of the antitrust laws. *Northern Pacific Ry. v. United States, 356 U.S. 1, 5, 78* ***[**5]*** *S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)*, established ***HN1***[] the rationale for Per se illegality in antitrust suits: "(T)here are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." Particular acts, of which price fixing is one, have been held so plainly anti-competitive as to be conclusively presumed illegal. The fixing of credit terms, on the other hand, is not "manifestly anticompetitive." An agreement to fix credit, a "non-price" condition of sale, may actually enhance competition. Proper analysis reveals "that an agreement fixing non-price trade items may either help or hurt competition, depending upon industry structure." L. Sullivan, Handbook of the Law of Antitrust, § 99, at 277 (1977). [5] Thus, an agreement to eliminate credit could sharpen competition with respect to price by removing a barrier perceived by some sellers to market entry. Moreover, competition could be fostered by the increased visibility of price made possible by the agreement **[**6]** to eliminate credit. For example, an agreement to eliminate credit might foster competition by increasing the visibility of the price term, and hence, promote open price competition in an industry in which imperfect information shielded various sellers from vigorous competition.

[*1100] **[**7]** We readily acknowledge that an agreement to fix credit may be in violation of the antitrust laws when made pursuant to a conscious purpose to fix prices or as part of an overall scheme to restrain competition. See *Arizona v. Cook Paint & Varnish Co., 391 F. Supp. 962, 966 n.2 (D.Ariz.1975)*, aff'd, *541 F.2d 226 (9th Cir. 1976)*; *Wall Products Co. v. National Gypsum Co., 326 F. Supp. 295 (N.D.Cal.1971)*. Thus, were competition with respect to price primarily centered on credit terms, as where, for example, explicit prices are fixed by government, an agreement to fix credit terms would amount to price fixing. And, of course, an agreement to fix credit terms as part of an effort to fix prices would contravene the ***antitrust law***.

At this juncture of the proceeding it has not been established that the agreement was entered into with the purpose, or had the effect, of restraining price competition in the industry. Simply labeling concerted conduct as price fixing without proof of purpose to affect price will not justify application of a Per se rule. "The antitrust laws concern substance, not form, in the preservation of competition." L. Sullivan, Supra, § 74, at 198. As a result, we refuse **[**8]** to characterize the credit fixing agreement here before us as price fixing.

Our conclusion is reinforced when we consider the function of Per se rules in ***antitrust law*** enforcement. A particular practice which is established as Inherently anti-competitive eliminates the need for elaborate analysis and may be deemed illegal Per se. ***HN2***[] Determination of the applicability of Per se illegality turns on whether the practice "appears to be one that would always or almost always tend to restrict competition and decrease output . . .

---

[3] *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*.

[4] *Plymouth Dealers Assoc. v. United States, 279 F.2d 128 (9th Cir. 1960)*; *National Macaroni Mfrs. Assoc. v. Federal Trade Commission, 345 F.2d 421 (7th Cir. 1965)*.

[5] The effects of an agreement standardizing non-price terms will vary much as will an agreement standardizing product. By such standardization the variety of offerings open to buyers and competitive differentiation open to sellers will inevitably be reduced, as they are when the product is standardized. . . . But the standardization of non-price terms, like standardization of product, will have other effects. It will in a sense serve to channel all transactions into a single, better integrated market; buyers will more easily be able to compare their alternative opportunities as to the unstandardized terms, most notably price, and sellers will more likely be aware of competitive offerings.

L. Sullivan, Supra, § 99, at 277-78.

or instead one designed to "increase economic efficiency and render markets more rather than less competitive.' " *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 20, 99 S. Ct. 1551, 1562, 60 L. Ed. 2d 1 (1979)*; *United States v. United Gypsum Co., 438 U.S. 422, 441 n.16, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)*; See *Continental T. V., Inc. v. GTE Sylvania, 433 U.S. 36, 50 n.16, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*; *Northern Pacific Ry. v. United States, 356 U.S. 1, 4, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. We cannot say that credit term fixing "would always or almost always tend to restrict competition and decrease output." It is better, **[**9]** we believe, to rest an antitrust violation on demonstrable economic effects rather than "formalistic line drawing." *Continental T. V., Inc. v. GTE Sylvania, supra, 433 U.S. at 59, 97 S. Ct. 2549*. Thus, to determine the legality of credit fixing an evaluation of the competitive detriment or enhancement must be made in each situation.

Application of the rule of reason, however, does not necessitate invariably the conclusion that a horizontal agreement to eliminate trade credit is lawful. ***HN3***[] Under the rule of reason any concerted action violates the Sherman Act if its purpose or effect would significantly impair competition. The rule of reason, moreover, "does not open the field of antitrust inquiry to any argument in favor of a challenged restraint that may fall within the realm of reason." *National Society of Professional Engineers v. United States, 435 U.S. 679, 688, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. It requires examination of the impact of credit fixing on competitive conditions, and such an agreement can benefit competition only if it improves the operation of the market. L. Sullivan, Supra § 100 at 280.

Any argument that the special characteristics of the beer industry render **[**10]** monopolistic arrangements better for trade and commerce than competition is foreclosed. *National Society of Professional Engineers v. United States, supra, 435 U.S. at 689, 98 S. Ct. 1355*.

> The Sherman Act reflects a legislative judgment that ultimately competition will not only produce lower prices, but also better goods and services. "The heart of our national economic policy long has been faith in the value of competition." *Standard Oil Co. v. F.T.C., 340 U.S. 231, 248, 71 S. Ct. 240, 95 L. Ed. 239*. The assumption that competition is the best method of allocating resources in a **[*1101]** free market recognizes that all elements of a bargain quality, service, safety, and durability and not just the immediate cost, are favorably affected by the free opportunity to select among alternative offers. Even assuming occasional exceptions to the presumed consequences of competition, the statutory policy precludes inquiry into the question whether competition is good or bad.

Id. at 695, 98 S. Ct. at 1367. The underlying premise is that "unless the market is rigged, either by concerted agreement . . . or by excessive concentration and interdependent action, the market when left **[**11]** alone ought to adjust to consumer interests with responses at least as fine as those which the industry could concertedly agree upon." L. Sullivan, Supra, § 100, at 281.

Application of the rule of reason to the facts presented here may be unlikely to require an elaborate inquiry into the effects on the beer industry. A horizontal agreement among distributors eliminating deferred payment terms, while leaving all other terms subject to competitive forces, may well be unreasonable. Such an agreement tends to impair competition. The ease with which the rule of reason may be applied in this case does not, however, justify the invocation of a Per se rule. We must remain open to the possibility that situations will occur where such an agreement might work to increase competition. See id., § 100, at 281.

IV. SUMMARY JUDGMENT

Turning to the summary judgment against Catalano, we note that ***HN4***[] under *Fed.R.Civ.P. 56(c)* "(t)he burden is on the party moving for summary judgment to show the absence of any genuine issue of material fact, and, in determining whether the burden has been met, . . . (the court) must draw all inferences of fact against the movant and in favor of the party opposing the **[**12]** motion." *Calnetics Corp. v. Volkswagen of America, Inc., 532 F.2d 674, 683 (9th Cir. 1976)*, Cert. denied, *429 U.S. 940, 97 S. Ct. 355, 50 L. Ed. 2d 309 (1976)*. Once it appears from the movant's papers that the motion should be granted, the opposing party must controvert the showing. All evidence and inferences are to be viewed in a light most favorable to the party opposing the motion. *Mutual Fund Investors v. Putnam Management Co., 553 F.2d 620, 624 (9th Cir. 1977)*. In the antitrust context the general standards for the granting of summary judgment are applied even more stringently. See Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962).

The district court concluded that the cessation of credit on wholesale distribution caused no injury in fact to plaintiffs. Summary judgment against plaintiffs Catalano was based upon a determination that there was no genuine issue of material fact regarding the injury issue. This, in turn, rested upon the deposition of Joseph Catalano, principal owner of the two Catalano businesses. He stated that, except for the possibility of selling more beer, paying cash for beer had no effect on profit and loss. **[**13]** Also, he could not estimate how much more profit might have been made had beer been sold on credit.

Opposing the motion, plaintiffs also relied on Catalano's deposition. They contended that the fact that Catalano could have sold more beer but for the cutoff of credit presented a material issue. Additionally, they relied on a subsequent affidavit in which Catalano testified:

> Both of my companies have always kept more money in checking accounts than absolutely necessary . . . . When defendants cut off credit, some of this money had to be put into beer inventory. As a result, my companies were less liquid than they were before . . . . (T)hey deprived my companies of the opportunity to put that money in time deposits, where it would have drawn interest . . . .

Plaintiffs further controverted the motion with testimony of an expert witness in the field of finance. He stated that a termination **[*1102]** of trade credit has an averse effect on Any business. "(I)f the company finances the inventories . . . by drawing down its cash reserves, the firm's liquidity and its financial strength are reduced resulting in a decrease in the value of the enterprise." In sum, he was of the opinion **[**14]** that plaintiffs suffered financial injury as a result of the agreement to end credit.

The district court reasoned that because Catalano could not specify how much more beer might have been sold, or how much profit might have been made, he suffered no injury. The court also rejected the claim that an injury can be suffered when surplus cash is utilized to finance inventories even though such use is accompanied by no borrowing or investment of additional cash. The district court erred. It failed to distinguish between the existence of an injury in fact and the means by which the amount of damage can be measured.

Plaintiffs' inability to fix the amount of lost profits bears directly on the issue of amount of damages rather than the existence of an injury. Catalano's inability to estimate his damages does not mean that they were not suffered; nor does it bar an antitrust suit. Bogosian v. Gulf Oil Corp., 393 F. Supp. 1046, 1050 n.7 (E.D.Pa.1975).

The plaintiffs made a sufficient showing of a genuine issue of material fact. The existence of an injury is a material fact sufficiently made a genuine issue by Catalano's claim of lesser sales and the expert witness' testimony that injury **[**15]** did exist. [6] Plaintiffs made an adequate showing of some damage flowing from the agreement, "inquiry beyond this minimum point goes only to the amount and not the fact of damage." Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 1571 n.9, 23 L. Ed. 2d 129 (1969), Accord Knutson v. Daily Review, Inc., 548 F.2d 795, 811 (9th Cir. 1976).

[16]** Affirmed in Part, Reversed and Remanded in Part.

Dissent by: BLUMENFELD

Dissent

---

[6] Plaintiffs allege that the defendants have not reduced the price of beer to reflect the termination of free credit. As a result, the measure of damages for plaintiffs' injury, it is argued, should be equal to the cost of financing the beer inventories. Three different methods for determining the amount of damages were suggested by plaintiffs: (1) measure the opportunity cost of any new capital that plaintiffs invested in the business; (2) measure the opportunity cost of borrowing outside funds to finance the inventories; or, (3) measure the reduction in the value of plaintiffs' business occasioned by the financing of inventories out of cash on hand, thereby reducing the liquidity of the business. While not specifically sanctioning any of these methods, difficulty in measuring the amount of damages should not preclude plaintiffs from establishing that injury was suffered.

BLUMENFELD, District Judge (concurring and dissenting):

I am in agreement with the decision of the majority reversing the lower court's grant of summary judgment against the plaintiffs on the issue of damages; however, contrary to the majority, I would hold that the alleged horizontal agreement among wholesalers to eliminate credit on sales of beer to retailers constitutes a per se violation of the antitrust laws.

It is clear enough by the citation to *Northern Pac. Ry. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*, [1] **[*1103]** that the majority does not intend to change the established rule of law in antitrust cases that price fixing is a per se violation. See also *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 218, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*. Although recognizing that price fixing may be accomplished directly or indirectly, the majority finds that the alleged agreement to fix credit terms does not amount to either direct or indirect price fixing. I disagree.

[17]** The purchase of goods creates an obligation to pay for them. Credit is one component of the overall price paid for a product. The cost to a retailer of purchasing goods consists of (1) the amount he has to pay to obtain the goods, and (2) the date on which he has to make that payment. If there is a differential between a purchase for cash and one on time, that difference is not interest but part of the price. See *Hogg v. Ruffner, 66 U.S. (1 Black) 115, 118-19, 17 L. Ed. 38 (1861)*. Allowing a retailer interest-free short-term credit on beer purchases effectively reduces the price of beer, when compared to a requirement that the retailer pay the same amount immediately in cash; and, conversely, the elimination of free credit is the equivalent of a price increase. [2]

To declare in the instant case that credit is "a "non-price' condition of sale," **[**18]** as the majority asserts Supra, is too generalized to be entirely true, and disintegrates when exposed to the economic realities of the beer industry in California. Price competition in the beer industry in California is partially restricted by state law through a system of mandatory territorial restrictions and price posting. See *Cal.Bus. & Prof. Code §§ 25000 Et seq.* While containers vary in material, and contents vary in taste, calories, and sometimes color, beer of one brand is substantially the same as that of another. It is common for retailers to buy and carry in stock for resale different brands from several distributors concurrently. Given the limits to competition on price and on product desirability, competition between wholesalers in extending credit takes on greater importance as a method by which wholesalers can effectively lower the price of beer in order to compete for the business of retailers. The majority acknowledges that where "competition with respect to price primarily center(s) on credit terms, . . . an agreement to fix credit terms would amount to price fixing." This was a naked agreement among competitors to fix credit a restraint which serves no economic purpose **[**19]** other than to affect prices. It affects no other functional element in a sale of beer by a distributor to a retailer. I would therefore hold that the alleged agreement is illegal per se. Nearly 40 years ago the Supreme Court stated:

---

[1] "(T)here are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. This principle of Per se unreasonableness not only makes the type of restraints which are proscribed by the Sherman Act more certain to the benefit of everyone concerned, but it also avoids the necessity for an incredibly complicated and prolonged economic investigation into the entire history of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable an inquiry so often wholly fruitless when undertaken. Among the practices which the courts have heretofore deemed to be unlawful in and of themselves (is) price fixing, *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 210, 60 S. Ct. 811, 838, 84 L. Ed. 1129* . . . ."

356 U.S. at 5, 78 S. Ct. at 518.

[2] The defendants here do not argue that the purchase price of their beer decreased in proportion to the savings they realized from eliminating free short-term credit.

> "Any combination which tampers with price structures is engaged in an unlawful activity. Even though the members of the price-fixing group were in no position to control the market, to the extent that they raised, lowered, or stabilized prices they would be directly interfering with the free play of market forces. The Act places all such schemes beyond the pale and protects that vital part of our economy against any degree of interference. Congress has not left with us the determination of whether or not particular price-fixing schemes are wise or unwise, healthy or destructive.
> ". . .
>
> "Under the Sherman Act a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal Per se."

United States v. Socony-Vacuum Oil Co., supra, 310 U.S. at 221, 223, 60 S. Ct. at 843, 844.

The suggestion in the majority opinion **[**20]** that the per se rule cannot be applied without proof that the purpose of the agreement was to affect prices finds no support **[*1104]** in the cases. What the purpose of the defendants was, and what they thought about the wisdom of cutting off credit, is irrelevant. The Supreme Court has recently emphasized:

> "In construing and applying the Sherman Act's ban against contracts, conspiracies, and combinations in restraint of trade, the Court has held that certain agreements or practices are so "plainly anticompetitive,' *National Society of Professional Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 1365, 55 L. Ed. 2d 637 (1978)*; *Continental TV, Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 50, 97 S. Ct. 2549, 2558, 53 L. Ed. 2d 568 (1977)*, and so often "lack . . . any redeeming virtue,' *Northern Pac. R. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)*, that they are Conclusively presumed illegal without further examination under the rule of reason generally applied in Sherman Act cases."

Broadcast Music, Inc. v. CBS, Inc., 441 U.S. 1, 7, 8, 99 S. Ct. 1551, 1556, 60 L. Ed. 2d 1 (1979) (emphasis added). Even in the context of criminal **[**21]** liability under the Sherman Act, the Supreme Court has rejected the claim that a criminal conviction requires a finding of a purpose to produce anticompetitive effects. See *United States v. United States Gypsum Co., 438 U.S. 422, 444* & n.21, *98 S. Ct. 2864, 57 L. Ed. 2d 854*; *United States v. Continental Group, Inc., 603 F.2d 444* (3d Cir., 1979); Antitrust & Trade Reg.Rep. (BNA), No. 926, E-1, E-9. The agreement among the defendant competitors in the instant case fits comfortably within the classic mode of price fixing, and it is so plainly anticompetitive in its nature and necessary effect that no elaborate study is needed to establish its illegality. See *National Society of Professional Engineers v. United States, supra, 435 U.S. at 692, 98 S. Ct. 1355*. [3]

[22]** Paradoxically, our ruling that the plaintiffs' alleged damages would constitute antitrust injury flowing from the withdrawal of credit under the liberal rule for proving damages gives added weight to the foregoing analysis. We hold that plaintiffs have made "an adequate showing of some damage flowing from the agreement" to terminate credit. How to measure the damage is left unresolved; however, it is clear that the damage claim is derived from the increase in the cost of purchasing beer due to the elimination of free short-term credit. To say that the overall cost of purchasing beer increased as a result of the elimination of credit is functionally the same as saying that the effective price of beer rose for these plaintiffs. Since the alleged agreement to fix credit terms raised the effective

---

[3] Lest we be led to a false conclusion by the use of ambiguous concepts, it is necessary to point out that the statement of the majority that "an agreement to eliminate credit could sharpen competition with respect to price by removing a barrier perceived by some sellers to market entry," is curiously inappropriate in this case. I am quite unpersuaded by this strange assertion, nor do I subscribe to the suggestion that it would justify an agreement to fix prices. No person seeking entry to the beer distributors' market is a party to this case. Furthermore, how another distributor who would abide by the agreement could add to price competition is difficult to understand since the agreement would "cripple (his) freedom . . . and thereby restrain (his) ability to sell in accordance with (his) own judgment." *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 213, 71 S. Ct. 259, 260, 95 L. Ed. 219 (1951)*.

price of beer, the alleged agreement amounts to price fixing. As such, the per se rule of illegality should govern this case, and the district court's ruling to the contrary should be reversed.

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN1[] **Standards of Review, Substantial Evidence**

The substantial evidence rule applies to appeal court review of preliminary injunctions. Also the familiar rule requires, when evaluating the trial court's exercise of discretion in granting a preliminary injunction, that the facts be viewed in the light most favorable to the order.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN2[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A "tying" arrangement is defined as an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[] Injunctions, Preliminary & Temporary Injunctions

Cal. Code Civ. Proc. § 527 provides: An injunction may be granted at any time before judgment upon a verified complaint, or upon affidavits if the complaint in the one case, or the affidavits in the other, show satisfactorily that sufficient grounds exist therefor.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN4[] Injunctions, Preliminary & Temporary Injunctions

The granting or denial of a preliminary injunction does not amount to an adjudication of the ultimate rights in controversy. It merely determines that the court, balancing the respective equities of the parties, concludes that, pending a trial on the merits, the defendant should or that he should not be restrained from exercising the right claimed by him.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN5[] Injunctions, Preliminary & Temporary Injunctions

The general purpose of a preliminary injunction is the preservation of the status quo until a final determination of the merits of the action. Thus, the court examines all of the material before it in order to consider whether a greater injury will result to the defendant from granting the injunction than to the plaintiff from refusing it. In making that determination the court will consider the probability of the plaintiff's ultimately prevailing in the case and, it has been said, will deny a preliminary injunction unless there is a reasonable probability that plaintiff will be successful in the assertion of his rights. In the last analysis the trial court must determine which party is the more likely to be injured by the exercise of its discretion, and it must then be exercised in favor of that party.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN6[] Standards of Review, Abuse of Discretion

The granting or denial of a preliminary injunction, even though the evidence with respect to an absolute right therefor may be conflicting, rests in the sound discretion of the trial court and may not be disturbed on appeal except for an abuse of discretion.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN7[] Standards of Review, Abuse of Discretion

Discretion is abused in the legal sense whenever it may be fairly said that in its exercise the court in a given case exceeded the bounds of reason or contravened the uncontradicted evidence.

HN14[] Tying Arrangements, Clayton Act

Tying arrangements involving rights in real property are not removed from the prohibitions of the antitrust laws, for such tying arrangements are made unlawful by *section 1* of the Sherman Act, *15 U.S.C.S. § 1 et seq*, and *Cal. Bus. & Prof. Code §§ 16720* and *16726* of the Cartwright Act.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN15[] Tying Arrangements, Sherman Act Violations

A "tying arrangement" is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product or at least agrees that he will not purchase that product from any other supplier.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN16[] Tying Arrangements, Clayton Act

Tying agreements serve hardly any purpose beyond the suppression of competition. They deny competitors free access to the market for the tied product, not because the party imposing the tying requirements has a better product or a lower price but because of his power or leverage in another market. At the same time buyers are forced to forego their free choice between competing products. For these reasons tying agreements fare harshly under the laws forbidding restraints of trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Real Property Law > Mobilehomes & Mobilehome Parks > Purchase & Sale

Real Property Law > Mobilehomes & Mobilehome Parks > General Overview

HN17[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The reasonableness of a tying arrangement is a question of fact.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN18[] **Injunctions, Preliminary & Temporary Injunctions**

The designation given an injunction by the trial court does not determine whether the decree is prohibitive or mandatory. Instead, the appellate court must examine the terms and effect of the injunction in order to discover its character.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN19[] **Injunctions, Preliminary & Temporary Injunctions**

The purpose of mandatory relief is to compel the performance of a substantive act or a change in the relative positions of the parties. By contrast, the prohibitive order seeks to restrain a party from a course of conduct or to halt a particular condition. The character of prohibitory injunctive relief, however, is not changed to mandatory in nature merely because it incidentally requires performance of an affirmative act.

Under the provisions *Cal. Veh. Code § 11709(c)*, it is unlawful to display mobile home model homes within a mobile home park after that park has reached 70 percent occupancy.

Headnotes/Summary

Summary
CALIFORNIA OFFICIAL REPORTS SUMMARY

In an action by the People for civil penalties and injunctive relief against mobilehome dealers and the operator of a mobilehome park, the trial court granted a preliminary injunction which prohibited the conditioning of the lease or purchase of sites in mobilehome parks on the purchase or lease of a mobilehome from defendant dealers, prohibited defendants from misrepresenting the availability of mobilehome homesites, and required retail dealers to remove mobilehome models displayed in violation of Veh. Code, § 1709, subd. (c), which makes it unlawful to display mobilehome model homes within a mobilehome park after that park has reached 70 percent occupancy. (Superior Court of San Diego County, No. 414439, Ross G. Tharp, Judge.)

The Court of Appeal affirmed, holding no abuse of discretion in issuing a preliminary injunction was shown. With respect to the provisions prohibiting conditioning availability of homesites on purchase or lease of a mobilehome from defendants, the court held the evidence, viewed in the light most favorable to the order, warranted an inference that an illegal restraint of commerce was ongoing. Prohibiting defendants from misrepresenting availability of mobilehome sites was held merely to require defendants to conform their conduct to the standards of honest and fair dealing under the Unfair Practices Act (*Bus. & Prof. Code, § 17200*). In conclusion, the court rejected defendants' contention the injunction provision requiring retail dealers to remove illegally displayed mobilehome models was mandatory in character and therefore improperly granted. The requirement of the affirmative act of removal, the court held, was incidental to the injunction's prohibitive objective to restrain further violation of a valid statutory provision. (Opinion by Staniforth, J., with Brown (Gerald), P. J., and Cologne, J., concurring.)

CA(1)[] **(1)**

Injunctions § 21—Preliminary Injunctions—Appeal—Factual Matters.

--In evaluating a trial court's exercise of discretion in granting a preliminary injunction, the facts must be viewed in the light most favorable to the order.

CA(2)[] **(2)**

Injunctions § 15—Preliminary Injunctions—Effect and Purpose.

--The granting or denial of a preliminary injunction does not amount to an adjudication of the ultimate rights in controversy. It merely determines that the court, balancing the respective equities of the parties, concludes that, pending a trial on the merits, the defendant should or that he should not be restrained from exercising the right claimed by him. The general purpose of such an injunction is the preservation of the status quo until a final determination of the merits of the action.

CA(3)[] **(3)**

Injunctions § 18—Preliminary Injunctions—Hearing and Order.

--In determining whether to grant or deny a preliminary injunction, the court examines all of the material before it in order to consider whether a greater injury will result to the defendant from granting the injunction than to the plaintiff from refusing it. In making that determination the court will consider the probability of the plaintiff's ultimately prevailing in the case. In the last analysis, the trial court must determine which party is more likely to be injured by the exercise of its discretion and it must then be exercised in favor of that party.

CA(4)[] **(4)**

Injunctions § 15—Preliminary Injunctions—Discretion of Trial Court.

--The granting or denial of a preliminary injunction, even though the evidence with respect to an absolute right therefor may be conflicting, rests in the sound discretion of the trial court and may not be disturbed on appeal except for an abuse of discretion. Discretion is abused in the legal sense whenever it may be fairly said that in its exercise the court in a given case exceeded the bounds of reason or contravened the uncontradicted evidence.

CA(5)[] **(5)**

Injunctions § 21—Preliminary Injunctions—Appeal—Scope of Review.

--Appellate review of the issuance of a preliminary injunction requires a determination whether substantial evidence supports the discretion exercised by the trial court.

CA(6)[] **(6)**

Monopolies and Restraints of Trade § 6—Under Cartwright Act —Applicability of Federal Decisions.

--The California ***antitrust law***--the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*)--is patterned after the federal Sherman Act, and federal cases involving the Sherman Act are applicable with respect to the Cartwright Act.

CA(7)[] **(7)**

Monopolies and Restraints of Trade § 7—Under Cartwright Act—Prohibited Agreements and Combinations—"Tying" Arrangements.

--A "tying arrangement" (an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product or at least agrees that he will not purchase that product from any other supplier) involving rights in real property is made unlawful by provisions of the Cartwright Act (*Bus. & Prof. Code, §§ 16720*, *16726*).

CA(8)[] **(8)**

Mobile Homes, Trailers and Parks § 3—Regulation—Injunctive Relief—Illegal Trade Practices—"Tying" Arrangements.

--A provision of a preliminary injunction prohibiting the conditioning of the lease or purchase of sites in mobilehome parks on the purchase or lease of a mobilehome from defendant dealers was a reasonable exercise of the trial court's discretion. Though the legality or illegality of the arrangement was a matter for trial determination, the uncontradicted facts before the court showed agreements or business practices fitting the judicial definition of an illegal tying agreement. The evidence was ample to show economic hardship on consumers and competitors resulted from the device, and warranted an inference that an illegal restraint of commerce was ongoing. Moreover, the injunction did not prevent defendants from selling their mobilehomes or leasing or selling their property interests in the homesites and therefore posed only an insignificant inconvenience to their business.

CA(9)[] **(9)**

Mobile Homes, Trailers and Parks § 3—Regulations—Injunctive Relief—Misrepresentation of Homesite Availability.

--In an action by the People for civil penalties and injunctive relief against mobilehome dealers and the operator of a mobilehome park, the trial court properly exercised its statutory injunctive powers by a provision of a preliminary injunction prohibiting defendants from misrepresenting the availability of mobilehome homesites. The provision merely required that defendants conform their conduct to the standards of honest and fair dealing under the Unfair Practice Act (*Bus. & Prof. Code, § 17200*).

CA(10a)[] **(10a)** ***CA(10b)***[] **(10b)**

Mobile Homes, Trailers and Parks § 3—Regulation—Injunctive Relief—Unlawful Display of Models.

--In an action by the People for civil penalties and injunctive relief against mobilehome dealers and the operator of a mobilehome park, the trial court did not abuse its discretion by a provision of a preliminary injunction requiring retail dealers to remove mobilehome models displayed in violation of *Veh. Code, § 11709, subd. (c)*, which makes it unlawful to display mobilehome model homes within a mobilehome park after that park has reached 70 percent occupancy. Though removal as required by the order was an affirmative act, it was incidental to the injunction's prohibitive objective to restrain further violation of a valid statutory provision.

CA(11)[] **(11)**

Injunctions § 2—Mandatory and Prohibitory Injunctions Distinguished—Determination of Nature of Order.

--The designation given an injunction by the trial court does not determine whether the decree is prohibitive or mandatory. An appellate court must examine the terms and effect of the injunction in order to discover its character.

CA(12)[] **(12)**

Injunctions § 2—Mandatory and Prohibitory Injunctions Distinguished—Effect of Incidental Requirement of Affirmative Act.

--The purpose of mandatory injunctive relief is to compel the performance of a substantive act or a change in the relative positions of the parties while a prohibitive order seeks to restrain a party from a course of conduct or to halt a particular condition. The character of prohibitory injunctive relief, however, is not changed to mandatory in nature merely because it incidentally requires performance of an affirmative act.

Counsel: de Krassel, Tierney & Cohen and Timothy T. Tierney for Defendants and Appellants.

Edwin L. Miller, Jr., District Attorney, Peter C. Lehman, Charles R. Hayes, Robert C. Fellmeth and John R. Heisner, Deputy District Attorneys, for Plaintiff and Respondent.

Judges: Opinion by Staniforth, J., with Brown (Gerald), P. J., and Cologne, J., concurring.

Opinion by: STANIFORTH

Opinion

[*5] [750]** The People sought civil penalties and injunctive relief against defendants Mobile Magic Sales, Inc. (Mobile), Ralph Forgeon dba La Moree Mobilehome Estates (La Moree), and other mobilehome dealers in North San Diego County (North County), based upon charges of unfair competition and restraint of trade in violation of the

Cartwright Act (*Bus. & Prof. Code, §§ 16720*, *16727* and *16754.5*). At the order to show cause hearing, the trial court granted a preliminary injunction which prohibited: "a. Conditioning the rental or lease of sites within Mobilhome Parks in San Diego **[**751]** **[***2]** County on the purchase or lease of mobile homes from Mobile Magic Sales, Inc., or any consenting dealer and/or their agents, employees, and servants; b. Intentionally misrepresenting the availability of mobile home park space within Mobilhome Parks in San Diego County; c. Displaying, or allowing to be displayed, any mobile home by Mobile Magic Sales, Inc., or any consenting dealer and/or their agents, employees, and servants, as a model home within Mobilhome Parks in San Diego County except as permitted by the California Vehicle Code or the Department of Motor Vehicles. Removal of any so situated mobile homes by any such dealers shall be accomplished within 45 days of the issuance of this order."

Defendants appeal, contending the trial court "improperly" granted the preliminary injunction and citing inter alia *Sherman v. Mertz Enterprises, 42 Cal.App.3d 769 [117 Cal.Rptr. 188]*. For reasons set forth below, we conclude the order granting the preliminary injunction must be affirmed.

I

CA(1)[] **(1) (see fn. 1.)** The relevant facts, as established by the pleading, declarations made under penalty of perjury, as well as oral testimony adduced at the hearing on the motion for preliminary **[***3]** injunction, are as follows: [1]

[*6] Mobile is one of the largest retail dealers in new mobilehomes within San Diego County and the State of California. Within the North County area, Mobile is the largest of such dealers by volume [2] and competes with approximately 15 other retail dealerships.

[*4]** Beginning in 1976, certain other retail dealers entered into business "arrangements" with the owners of mobilehome parks (including defendant La Moree) located in the North County area. In this arrangement, retail dealers contracted to lease or rent available homesites from cooperating park owners. By this process, trailer homesites were preempted by the retail dealer -- now lessee -- and as a direct result, these homesites were not available to the individual consumer unless they purchased or leased a mobilehome from the retail dealer-lessee. The dealer-lessee also displayed their mobilehomes for sale on these homesites and used these models to conduct retail sales activity.

In 1976, North County mobilehome spaces declined from approximately 200 to 50 homesites. This reduction was attributable to two factors: (1) limited development of new homesites, and (2) restriction of remaining homesites through leaseholds by certain retail dealers.

From 1976 to April of 1978 (when the People filed this complaint) available homesites in the North County area continued to decline. By 1978, "an insignificant number" of homesites existed, and only seven or eight homesites were available **[***5]** for individual consumer lease or rental which were not subject to the requirement that the mobilehome be purchased from Mobile. During the period 1976-1978, Mobile had obtained leaseholds on between 50 to 100 of the 600 homesites then available.

---

[1] ***HN1***[] The substantial evidence rule applies to appeal court review of preliminary injunctions. Also the familiar rule requires, when evaluating the trial court's exercise of discretion in granting a preliminary injunction, that the facts be viewed in the light most favorable to the order. (*San Diego Gas & Elec. Co. v. San Diego Congress of Racial Equality, 241 Cal.App.2d 405, 407 [50 Cal.Rptr. 638]*.)

[2] The North County area has in recent years experienced the immigration of many new residents. This influx has resulted in an increased demand for housing. The current need, coupled with inflationary pressures, has forced many new residents to seek alternatives to conventional housing. Thus an expanding market for mobilehomes has been an outgrowth of these forces. Mobilehome housing, as consumer goods, is comprised of two components: mobilehomes, a moveable commodity, and mobilehome park space, a right of use of real property. Within a particular geographical area, these two components are necessary compliments.

By 1978, Mobile had made such lease arrangements with 14 mobilehome parks in **[**752]** North County. Pursuant to this "arrangement" the trailer **[*7]** park owner referred prospective mobilehome tenants to Mobile to secure an available space. Mobile in turn advised such prospective tenants that such park space was available only upon the purchase of a new mobilehome from Mobile.

Prospective tenants, due to their individual preference to locate in one particular mobilehome park, as opposed to any other such park, were forced to forego selective shopping for mobilehomes and were compelled either to purchase such a home, not of their own choosing, and pay the price demanded, or live elsewhere.

As of mid to late 1978, Mobile had such arrangements with respect to the majority of available space in La Moree Mobilehome Estates, and La Moree actively participated in referring prospective tenants to Mobile. A majority of the retail dealers **[***6]** in mobilehomes in the North County area sell brand name mobilehomes that meet the specifications for entry into La Moree. By virtue of its extensive involvement in the foregoing "arrangements," Mobile has been able to price its new homes at levels exceeding those of its North County competitors. Retail dealers in North County without such business arrangements are in imminent danger of going out of business.

II

Defendants contend the preliminary injunction issued was "mandatory" in nature and was improperly issued because it encompassed matters that must await determination on trial. Secondly, defendants argue that the trial court abused its discretion in granting the injunction in that "no California case" holds the species of "tying" agreement [3] here imposed to be illegal.

[*7]** The resolution of these contentions requires, first, an examination of the factual and legal prerequisites to issuance of a preliminary injunction under *Code of Civil Procedure sections 526* and *527*. *Code of Civil Procedure section 527*, so far as here pertinent, provides: ***HN3***[] "An injunction may be granted at any time before judgment upon a verified complaint, or upon affidavits if the complaint in the one case, or the affidavits in the other, show satisfactorily that sufficient grounds exist therefor."

[*8] ***CA(2)***[] **(2)** In *Continental Baking Co. v. Katz, 68 Cal.2d 512, 528 [67 Cal.Rptr. 761, 439 P.2d 889]*, the Supreme Court summarized the basic principles governing issuance of a preliminary injunction: "***HN4***[] 'The granting or denial of a preliminary injunction does not amount to an adjudication of the ultimate rights in controversy. It merely determines that the court, balancing the respective equities of the parties, concludes that, pending a trial on the merits, the defendant should or that he should not be restrained from exercising the right claimed by him.' [Citations.] ***HN5***[] The general purpose of such an injunction is the preservation of the status quo until a final determination of **[***8]** the merits of the action. [Citations.] ***CA(3)***[] **(3)** Thus, the court examines all of the material before it in order to consider 'whether a greater injury will result to the defendant from granting the injunction than to the plaintiff from refusing it; . . .' [Citations.] In making that determination the court will consider the probability of the plaintiff's ultimately prevailing in the case and, it has been said, will deny a preliminary injunction unless there is a reasonable probability that plaintiff will be successful in the assertion of his rights. [Citations.] As was said in *Family Record Plan, Inc.* v. *Mitchell* . . . . 'In the last analysis the trial court must determine which party is the more likely to be injured by the exercise of its discretion [citation] and it must then be exercised in favor of that party [citation].'" (See also *Weingand v. Atlantic Sav. & Loan Assn., 1 Cal.3d 806, 820 [83 Cal.Rptr. 650, 464 P.2d 106]*.)

[753]** ***CA(4)***[] **(4)** Further ***HN6***[] the granting or denial of a preliminary injunction, even though the evidence with respect to an absolute right therefor may be conflicting, rests in the sound discretion of the trial court and may not be disturbed on **[***9]** appeal except for an abuse of discretion. (*People v. Black's Food Store, 16 Cal.2d 59, 61 [105 P.2d 361]*; *Allied Artist Pictures Corp. v. Friedman, 68 Cal.App.3d 127 [137 Cal.Rptr. 94]*.)

---

[3] ***HN2***[] A "tying" arrangement is defined as: ". . . an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier." (*Northern Pac. R. Co. v. United States, 356 U.S. 1, 5-6 [2 L.Ed.2d 545, 550, 78 S.Ct. 514]*.)

HN7[] Discretion is abused in the legal sense "whenever it may be fairly said that in its exercise the court in a given case exceeded the bounds of reason or contravened the uncontradicted evidence." (*Estate of Parker, 186 Cal. 668, 670 [200 P. 619]*; *State Farm etc. Ins. Co. v. Superior Court, 47 Cal.2d 428, 432 [304 P.2d 13]*.)

CA(5)[] **(5)** Finally, HN8[] appellate review of the issuance of a preliminary injunction requires a determination whether substantial evidence supports the discretion exercised by the trial court. (*Fresno Canal etc. Co. v. People's Ditch Co., 174 Cal. 441, 447 [163 P. 497]*; *Weingand v. Atlantic Sav. and Loan Assn., supra, 1 Cal.3d 806, 820*; *City & County of San Francisco v. Evankovich, 69 Cal.App.3d 41, 54 [137 Cal.Rptr. 883]*.)

[*9] III

We begin our task by examining defendants' contention that the decision in *Sherman v. Mertz Enterprises, supra, 42 Cal.App.3d 769*, precluded the granting of the preliminary injunction **[***10]** here. *Mertz* involves an appeal from the granting of a *summary judgment*. HN9[] On such motion, the function of the trial court is not "issue determination" but rather "issue finding." (*Walsh v. Walsh, 18 Cal.2d 439, 441 [116 P.2d 62]*.) The appeal court reversed the judgment, holding Sherman was entitled to a trial upon the claim that the tying agreement (similar to that used here) was illegal. Concerning tying agreements, the *Mertz* court stated at pages 779-780: ""For our purposes a tying arrangement may be defined as an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. Where such conditions are successfully exacted competition on the merits with respect to the tied product is inevitably curbed. Indeed 'tying agreements serve hardly any purpose beyond the suppression of competition.' [Citation.] They deny competitors free access to the market for the tied product, not because the party imposing the tying requirements has a better product or a lower price but because of his power of leverage in another **[***11]** market. At the same time buyers are forced to forego their free choice between competing products. For these reasons 'tying agreements fare harshly under the laws forbidding restraints of trade.' [Citation.]" (Fns. omitted.) [Citation.] Tying arrangements are illegal per se "whenever a party has sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product" [citations] and when "a total amount of business, substantial enough in terms of dollar-volume so as not to be merely *de minimis*, is foreclosed to competitors by the tie. . . ." [Citation.]' [Citation.]"

The question here presented is whether defendants should be restrained pendente lite -- a totally different factual and legal issue. Defendants' reliance upon *Sherman v. Mertz Enterprises, supra*, is misplaced.

IV

In the instant case, an examination of the three provisions of the temporary injunction in light of applicable rules of law evidences an appropriate and a sound exercise of discretion.

[*10] CA(6)[] **(6)** HN10[] The California ***antitrust law*** -- the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) is patterned after the federal Sherman **[***12]** Act. Both have their roots in the common law; federal cases interpreting the Sherman Act are applicable with respect to the Cartwright Act. (*Milton v. Hudson Sales Corp., 152 Cal.App.2d 418, 440 [313* ***[**754]*** *P.2d 936]*; *Rolley, Inc. v. Merle Norman Cosmetics, 129 Cal.App.2d 844 [278 P.2d 63, 282 P.2d 991]*.) In 1961 California incorporated section 3 of the federal Clayton Act in *Business and Professions Code, section 16727*. The Clayton Act goes beyond common law and the Sherman Act to inhibit trade restraints at their inception; federal interpretations thereof are similarly applicable. (*Chicago Title Ins. Co. v. Great Western Financial Corp., 69 Cal.2d 305, 315 [70 Cal.Rptr. 849, 444 P.2d 481]*; *Corwin v. Los Angeles Newspaper Service Bureau, Inc., 4 Cal.3d 842, 852, 853 [94 Cal.Rptr. 785, 484 P.2d 953]*.)

HN11[] The provisions of the Sherman Act, and therefore *sections 16720* and *16726* of the Cartwright Act, codify the common law prohibition against combinations in restraint of trade. (*Sherman v. Mertz Enterprises, supra, 42 Cal.App.3d 769, 775*; 2 Areeda & Turner, ***Antitrust Law*** (1978) § 302, pp. 2-4.)

The objective of these acts is **[***13]** to proscribe unlawful, "unreasonable" restraints upon trade or commerce and thus, the statutes embrace "virtually any economic act in our infinitely interconnected national economy." (1 Areeda

& Turner, ***Antitrust Law*** (1978) § 232a, p. 229.) ***HN12***[] Both federal and state decisional law hold trade or commerce in real estate, or property rights in real estate, to be within the protections of the Sherman Act. (*Northern Pacific Railway Company v. United States, supra, 356 U.S. 1, 7-8 [2 L.Ed.2d 545, 550-551]*; *Sherman v. Mertz Enterprises, supra, 42 Cal.App.3d 769, 776-778*; *Jomicra, Inc. v. California Mobile Home Dealers Assn., 12 Cal.App.3d 396, 401 [90 Cal.Rptr. 696]*.)

By contrast ***HN13***[] section 3 of the Clayton Act and its California counterpart -- *section 16727* of the Cartwright Act -- are restricted to transactions involving "commodities." (Cf. *15 U.S.C. (1973) § 14* with Cal. Bus. & Prof. Code (West 1964) *§ 16727*.) And realty or property rights in realty have been denied the status of commodity under the Clayton Act. (*Plum Tree, Inc. v. N. K. Winston Corporation (S.D.N.Y. 1972) 351 F.Supp. 80, 86-87*; *Gaylord Shops, Inc.* v. *Pittsburg Miracle Mile T.* **[***14]** *& C. Shop. C*. (W.D.Pa. 1963) *219 F.Supp. 400, 403*.)

CA(7)[] **(7)** Nevertheless, ***HN14***[] tying arrangements involving rights in real property are not removed from the prohibitions of the antitrust laws, for such tying **[*11]** arrangements are made unlawful by *section 1* of the Sherman Act and *Business and Professions Code sections 16720* and *16726* of the Cartwright Act.

In point is *Northern Pacific Railway Company v. United States, supra, 356 U.S. 1*, where the railroad had deeded and leased land by instruments containing "preferential routing clauses" which compelled the grantees or lessees of such land to ship products of that land by the Northern Pacific railroad unless rates or services of competing lines were more favorable. The United States Supreme Court defined ***HN15***[] a "tying arrangement" as an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product or at least agrees that he will not purchase that product from any other supplier (*id. at p. 5 [2 L.Ed.2d at p. 550]*) and applied this definition to the sale or lease of land "tied" or conditioned upon use of the railroad's transportation facilities. This "tying arrangement" **[***15]** was held per se unlawful restraint of trade in violation of *sections 1* and *4* of the Sherman Act (*15 U.S.C. §§ 1*, *4*). The Supreme Court reasoned: "Where such conditions are successfully exacted competition on the merits with respect to the tied product is inevitably curbed. Indeed ***HN16***[] 'tying agreements serve hardly any purpose beyond the suppression of competition.' [Citation.] They deny competitors free access to the market for the tied product, not because the party imposing the tying requirements has a better product or a lower price but because of his power or leverage in another market. At the same time buyers are forced to forego their free choice between competing products. For these reasons 'tying agreements fare harshly under the laws forbidding restraints of **[**755]** trade.' [Citation.]" (*Northern Pacific Railway Company v. United States, supra, at p. 6 [2 L.Ed.2d at p. 550]*.)

Similarly, *Sherman v. Mertz Enterprises, supra, 42 Cal.App.3d 769*, and *Jomicra, Inc. v. California Mobile Home Dealers Assn., supra, 12 Cal.App.3d 396*, factually involved tying arrangements between the rental of trailer space and a required purchase of the mobilehome **[***16]** from a particular dealer. The fact that land or rights in land was one of the "tied" products in no way prevented the scheme from being violative of the Cartwright Act. We find nothing in the statutes or judicial interpretations that supports defendants' contention that the species of agreement, business practice here involved is lawful or prohibits a preliminary injunction on the factual showing made to the trial court.

CA(8)[] **(8)** ***HN17***[] While the reasonableness of the tying arrangement involved in this case is a question of fact yet to be determined on trial, nevertheless, **[*12]** the conditioning of mobilehome park space on the purchase of a mobilehome from a particular retail dealer "raises a serious issue of illegal conduct to restrain trade and competition." (*Jomicra, Inc. v. California Mobile Home Dealers Assn., supra, 12 Cal.App.3d 396, 401*.) The undisputed facts here support the trial court's exercise of discretion in granting the temporary injunction.

Nor does the fact that the legality or illegality of the particular business arrangement must await trial determination -- prevent the issuance of a preliminary injunction where circumstances dictate. Here the uncontradicted facts **[***17]** show agreements, business practices that fit the judicial definition of an illegal tying agreement. The evidence before the court was ample to show economic hardship on consumers and competitors results from this device. The evidence, viewed in the light most favorable to the order, warrants an inference that an illegal restraint of commerce was ongoing. [4] Moreover, the injunction does not prevent defendants from selling their mobilehomes or leasing or selling their property interests in the homesites and therefore poses only an insignificant inconvenience to their business. We conclude the injunctive provision prohibiting the conditioning of homesite availability on mobilehome lease or purchase was a reasonable exercise of the trial court's discretion.

[*18]** V

CA(9)[] **(9)** The second provision of the preliminary injunction prohibits defendants from misrepresenting the availability of mobilehome homesites. This provision merely requires that defendants conform their conduct to the standards of honest and fair dealing under the Unfair Practices Act. (*Bus. & Prof. Code, § 17200*.) The trial court validly exercised its statutorily granted injunctive powers in this regard. (*Bus. & Prof. Code, § 17203*.)

VI

CA(10a)[] **(10a)** Finally, defendants assert that the injunction provision (c) requiring the retail dealers to remove the mobilehome models where **[*13]** displayed in violation of *Vehicle Code section 11709, subdivision (c)*, is mandatory in character and therefore improperly granted.

This contention confuses the distinction between mandatory and prohibitive relief. ***CA(11)***[] **(11)** ***HN18***[] The designation given an injunction by the trial court does not determine whether the decree is prohibitive or mandatory. Instead, the appellate court must examine the terms and effect of the injunction in order to discover its character. (*Feinberg v. One Doe Co., 14 Cal.2d 24, 28 [92 P.2d 640]*.)

[756]** ***CA(12)***[] **(12)** ***HN19***[] The purpose of mandatory relief is to compel the performance of a substantive **[***19]** act or a change in the relative positions of the parties. (*Mark v. Superior Court, 129 Cal.1, 6-7* [*61 P. 436]*; *Ambrose v. Alioto, 62 Cal.App.2d 680, 685 [145 P.2d 32]*.) By contrast, the prohibitive order seeks to restrain a party from a course of conduct or to halt a particular condition. (See 38 Cal.Jur.3d, Injunctions, § 8 (1977) pp. 470-472.) The character of prohibitory injunctive relief, however, is not changed to mandatory in nature merely because it incidentally requires performance of an affirmative act. (*United Railroads v. Superior Court, 172 Cal. 80, 88-89 [155 P. 463]*.)

CA(10b)[] **(10b)** ***HN20***[] Under the provisions of *section 11709, subdivision (c) of the Vehicle Code*, it is unlawful to display mobilehome model homes within a mobilehome park after that park has reached 70 percent occupancy. (*Veh. Code, § 11709, subd. (c)*.) Provision (c) of the trial court's preliminary injunction commands defendants to remove those model mobilehomes displayed at mobilehome parks in contravention to the Vehicle Code. While the act of removal is an affirmative act, it is incidental to the injunction's prohibitive objective to restrain further violation of a valid statutory provision. **[***20]** Thus, the third provision of the preliminary injunction is prohibitive in character and properly issued to halt continuing violation of the Vehicle Code.

We conclude: No abuse of discretion in issuing the preliminary injunction is shown. The order granting the preliminary injunction is affirmed.

End of Document

---

[4] While no findings of fact were made by the trial court until after it had lost jurisdiction, findings were not required before entry of the preliminary injunction. (*Code Civ. Proc., § 632*; *Taliaferro v. Hoogs, 236 Cal.App.2d 521, 530 [46 Cal.Rptr. 147]*.) Our search is not for findings but rather for substantial evidence to support the exercise of discretion here made. (*City & County of San Francisco v. Evankovich, supra, 69 Cal.App.3d 41, 54*.)

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

HN2[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

The generic concept of boycott refers to a method of pressuring a party with whom one has a dispute by withholding, or enlisting others to withhold, patronage or services from the target.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN3[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

Boycotters and the ultimate target need not be in a competitive relationship with each other. Concerted refusals to deal where the target is a customer of some or all of the conspirators who is being denied access to a desired good or service because of a refusal to accede to particular terms set by some or all of the sellers is unlawful.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN4[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

For a defendant's activity to fall within the scope of the boycott exception to the McCarran-Ferguson Act, *15 U.S.C.S. §§1012-1013*, there must first be concerted activity by individual actors. There must also be present a boycott, the essence of which is the pressuring of a party with whom one has a dispute by withholding or enlisting others to withhold patronage or services from the target. The target can be a customer.

Opinion by: DOYLE

Opinion

[*829] The issue presented in this antitrust action by an insurance agent and his firm against the defendant-appellee life insurance company and others is whether the trial court erred in its construction and application of the

McCarran-Ferguson [1.] exception, the result of which was a holding that it was inapplicable to the facts of the case. The allegation in the complaint is that the insurance company, which acted in concert with Equity Services, Inc. and the National Life General Agents Association, refused to deal with the plaintiffs.

[2]** Robert W. Card had been associated with National Life Insurance Company since 1966, and had been authorized to solicit applications for life insurance and annuity contracts issued by National Life and had been authorized, in addition, to sell shares of mutual funds, etc., through an associated company, a broker-dealer called Equity Services, Inc.

PROCEEDINGS AND FACTS

The dispute came to a head when Card and his corporation, R. W. Card & Associates, sought to become a general agent for an insurance company other than National Life, which action was contrary to the contract between Card and National Life. The other insurance company was Provident Life & Accident Insurance Company. It was the signing of this general agent's contract with Provident Life that brought about the termination by National Life of Card's general agency with it. This occurred in February 1974.

The coconspirators in this alleged Sherman Act boycott are: National Life Insurance Company; an unnamed party, the General Agents Association of National Life, which consists of all of the general agents of that company; Lawrence Leland, an executive vice-president of National Life Insurance Company; and William **[**3]** Ryan, a general agent for National Life Insurance Company, who resides in San Francisco, California. It is said that other persons, firms and corporations participated in the unlawful combinations, conspiracies and agreements to boycott, coerce and intimidate.

The allegations in respect to § 1 of the Sherman Act are somewhat extensive, but they boil down to the conspiracy to terminate and the termination of Card's contract with National Life as a general agent.

[*830] The thread which runs through National Life's answer is that the company is exempt from the Sherman Act because it is an insurance company which is regulated by the laws of the several states, and is therefore covered by the exemption provisions of the McCarran-Ferguson Act and not subject to the exception set forth in that Act.

There seems to be little question but that Card, under his contract with National Life as a general agent, was precluded from entering into a general agency agreement with any other company. Card recognizes this, but makes the claim that his agreement with Provident was a personal producing general agent's contract which was limited in its terms and did not run contrary to his general **[**4]** agent contract with National Life.

The main contention of plaintiffs-appellants is that the McCarran Act, *15 U.S.C. §§ 1012-1013*, does not exempt National Life's activity from the Sherman Act because the action taken by National Life in terminating the contract and refusing to deal with Card was in fact and in law an act which constituted boycott, coercion and intimidation.

The trial court gave careful consideration to this contention and concluded that in essence the action, if any, was in the nature of breach of contract, a suit which is subject to state court jurisdiction, but which falls short of being an act of boycott, coercion or intimidation. The district court decided this by applying the law on the subject, and particularly the exemption statutes referenced, [2.] to the undisputed facts.

---

1. *15 U.S.C. §§ 1012-1013*.

2. The McCarran Act, *15 U.S.C. §§ 1012* and *1013*, provides as follows:

§ 1012. Regulation by State law; Federal law relating specifically to insurance; applicability of certain Federal laws after June 30, 1948

(a) The business of insurance, and every person engaged therein, shall be subject to the laws of the several States which relate to the regulation or taxation of such business.

[5]** The thrust of the governing statute, as shown, is to remove the business of insurance from federal antitrust regulation. It provides that the Sherman Act, the Clayton Act and the Federal Trade Commission Act are not applicable to the business of insurance to the extent that such business is regulated by state law. *Section 1013* carves out a single exception to nonapplicability of the antitrust laws, which is the agreement to boycott, coerce, intimidate, or acts of boycott, coercion or intimidation.

Additional facts regarded as important by the plaintiffs must be mentioned. Plaintiffs say that they are engaged in the business of providing insurance consulting services specializing in the use of insurance in corporate and estate planning. Card had been affiliated with the National Life Insurance Company of Vermont since 1964, and had held an Agent's Appointment Agreement with the said company since 1966. The most recent contract had been executed in 1971. Card states that he was regarded as an independent contractor and not an employee. Card, as an individual, **[*831]** assigned his rights to commissions to Robert W. Card and Associates, Inc. As a consultant he had acquired **[**6]** considerable recognition not only from National Life but also from other insurance companies, had received awards, was a member of the President's Club, etc.

National Life Insurance Company is said to be one of the largest life insurance companies in the United States. It has a general agency system for marketing its insurance. The insurer appoints general agents who are responsible for actually merchandising products in the territory and also for training agents. The compensation is commissions.

The general agents of National Life have a corporation known as the General Agents Association, an entity said to be owned, controlled and financed by general agents with National Life. The general agents meet with the officers of National Life and the officers of National Life consult with the general agents about all major policy decisions. The agents are permitted to hold agent appointment agreements with competing insurance companies on a brokerage basis. The general agents are not allowed by National Life to hold any type of General agent's contract with a competing insurance company.

In January 1974, Card met with National Life's Vice-President, Lawrence W. Leland, and reached **[**7]** an informal agreement, whereby he would be allowed to place business with other companies so long as he gave fifty-one percent of the business to National Life.

In February 1974, Card met with Vice-President Johnston of Provident Life & Accident Insurance Company and negotiated a personal producing general agent's contract. He was told at that time that National Life would terminate him if he signed a general agent's contract with Provident. Such a contract was executed with Provident to be effective March 1, 1974.

Following some disagreements which Card had with one William Ryan, a San Francisco general agent who communicated to the home office that Card was contracting with companies other than National, and after having

---

(b) No Act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any State for the purpose of regulating the business of insurance, or which imposes a fee or tax upon such business, unless such Act specifically relates to the business of insurance: Provided, That after June 30, 1948, the Act of July 2, 1890, as amended, known as the Sherman Act, and the Act of October 15, 1914, as amended, known as the Clayton Act, and the Act of September 26, 1914, known as the Federal Trade Commission Act, as amended, shall be applicable to the business of insurance to the extent that such business is not regulated by State law.

§ 1013. Suspension until June 30, 1948, of application of certain Federal laws; Sherman Antitrust Act applicable to agreements to, or acts of, boycott, coercion, or intimidation

(a) Until June 30, 1948, the Act of July 2, 1890, as amended, known as the Sherman Act, and the Act of October 15, 1914, as amended, known as the Clayton Act, and the Act of September 26, 1914, known as the Federal Trade Commission Act, and the Act of June 19, 1936, known as the Robinson-Patman Anti-Discrimination Act, shall not apply to the business of insurance or to acts in the conduct thereof.

(b) Nothing contained in this chapter shall render the said Sherman Act inapplicable to any agreement to boycott, coerce, or intimidate, or act of boycott, coercion, or intimidation.

been told by one of Ryan's agents that "Ryan was out to get Card's contract with National Life terminated," Card contacted Leland at National Life, who said that his contract was not in jeopardy.

Following a meeting in Puerto Rico in April 1974, Leland was told by Ryan that Card had a general agent's contract with Provident. Leland verified this, and it was then that he terminated the Card contract.

Plaintiffs-Appellants make the following contentions:

First, **[**8]** that summary judgment should be sparingly used in antitrust litigation, and in essence had it been sparingly used, it would not have been granted here.

Second, that the trial court erred in concluding that plaintiffs had failed to allege or establish a Sherman Act boycott. Although some circuits have given the exception a very narrow interpretation which holds that the boycott exception should be limited to situations where agents or insurance companies have been blacklisted by combinations of insurance companies or agents, other circuits have taken a less restricted view. They have held that an antitrust action can be brought in cases amounting to boycott in accordance with the Sherman Act generally. Appellants say that under this latter approach they can recover. We must disagree.

In their brief appellants cite some factual material which they regard as particularly cogent in establishing the existence of a conspiracy having the object of boycotting Card and his associates, as follows: the policy of National Life prohibiting its agents from holding general agent's contracts with competing companies; participation of the general agents in the formulation of that policy; complaints **[**9]** by general agent William Ryan concerning Card's interest in representing insurers other than National Life; discussions among officers and general agents of National Life with Ryan at a General Agents' Association meeting immediately prior to the termination **[*832]** of Card's contract; the revelation by Provident Life to National Life that Card had signed a general agent's contract; the refusal of National Life to deliver agreed upon contracts to Card at the behest of the general agents; motivation for National Life agents to prevent Card from holding personal producing general agents' contracts with competing insurers.

THE BOYCOTT QUESTION

It is our conclusion that neither the facts cited nor the law relied upon gave rise to an agreement to boycott, coerce or intimidate or of an act of boycott, coercion or intimidation.

The trial court, Judge Arraj, gave careful consideration to the issue before us and ruled against the plaintiff. The court granted the summary judgment on behalf of the defendants. The court said that undoubtedly the plaintiffs had shown the first two elements of §§ 1012-1013 in that they had established (1) that the activity constituted "the business of insurance," **[**10]** and (2) that it is regulated by state law, but had failed, the court continued, to establish that it was an act of boycott, coercion or intimidation. The court believed that the business of insurance, as used in the Act, was concerned with the relationship between the company and its policyholders and that the laws regulating this relationship, directly or indirectly, were the laws regulating the business of insurance. This was set forth in *Securities and Exchange Commission v. National Securities, Inc., 393 U.S. 453, 89 S. Ct. 564, 21 L. Ed. 2d 668 (1969)*. National Life's regulation of its general agents, the court said, was part of the "business of insurance." Also, the court said that National Life meets the second requirement for a McCarran Act exemption the regulation by state law.

Accordingly, the issue boiled down to whether or not the agreement constituted a boycott or was to coerce or intimidate.

In granting the summary judgment the district court held that the evidence failed to establish that this was true and that it was not necessary to determine the case under the narrow view. See *Meicler v. Aetna Casualty and Surety Co., 506 F.2d 732 (5th Cir. 1975)*; *Addrisi v.* ***[**11]*** *Equitable Life Assurance Society, 503 F.2d 725 (9th Cir. 1974)*, Cert. denied, *420 U.S. 929, 95 S. Ct. 1129, 43 L. Ed. 2d 400 (1975)*; *Black v. Nationwide Mutual Insurance Co., 429 F. Supp. 458 (W.D.Pa.1977)*, *Aff'd, 571 F.2d 571 (3d Cir. 1978)*; Blackley v. Farmers Insurance Group, Inc., 1976-2 Trade Cas. P 61,061 (D.Utah 1976); *Transnational Insurance Co. v. Rosenlund, 261 F. Supp. 12 (D.Or.1966)*.

The more liberal construction of the boycott exception is shown in *Barry v. St. Paul Fire & Marine Insurance Co., 555 F.2d 3 (1st Cir. 1977)*, *Aff'd, 438 U.S. 531, 98 S. Ct. 2923, 57 L. Ed. 2d 932 (1978)*; *Monarch Life Insurance Co. v. Loyal Protective Life Insurance Co., 326 F.2d 841 (2d Cir. 1963)*, Cert. denied, *376 U.S. 952, 84 S. Ct. 968, 11 L. Ed. 2d 971 (1964)*; *Ballard v. Blue Shield of Southern West Virginia, Inc., 561 F.2d 262 (4th Cir. 1976)*; *Proctor v. State Farm Mutual Automobile Insurance Co., 182 U.S.App.D.C. 264, 561 F.2d 262 (1977)*.

The only decisions in the Tenth Circuit are from district courts. One of these was by Judge Matsch in Western Health Care Corp. v. Colorado Hospital Service, No. 76-M-760 (D.Colo. Feb. 16, 1977). The narrow approach to the exception was adopted **[**12]** in that case.

The so-called narrow construction cases insist that Congress was engaged in preventing the blacklisting by the combinations of insurance companies, so this would have to be shown under that view.

The broader approach includes a concerted refusal to deal. See *Barry v. St. Paul Fire & Marine Insurance Co., supra*, and *Monarch Life Insurance Co. v. Loyal Protective Insurance Co., supra.*

The trial court said that the result was the same regardless of whether the narrow or the broad view was taken, because even adopting the broad view, the acts did not constitute a boycott under the Sherman Act. Even under the broader view, it is necessary that there be a combined, concerted **[*833]** refusal to deal which so threatens free competition as to constitute a per se violation of the Sherman Act. The primary issue for this court is whether the defendants violated the exception under the broad construction or the narrow one. In our view there was no violation under either construction.

The United States District Court for the District of Utah, Judge Anderson, rendered a decision which dealt with the issues before us, Blackley v. Farmers Insurance Group, Inc., 1976-2 Trade **[**13]** Cas. P 61,061 (D.Utah 1976). As in our case, plaintiff was a terminated insurance agent who alleged that his termination by the insurance company pursuant to an exclusive general agent provision in his contract constituted a boycott. The court disagreed, saying that the essential activity protected was that of dealing with clients and the restriction of their right to choose companies freely. The court said that a restriction dealing with the plaintiff was not enough.

To the same effect is *Black v. Nationwide Mutual Insurance Co., 429 F. Supp. 458 (W.D.Pa.1977)*. The court there said that the practices in issue were governed by the state law and under state law the termination was not a boycott.

The Supreme Court in its 1978 term rendered its decision in *St. Paul Fire & Marine Insurance Co. v. Barry, 438 U.S. 531, 98 S. Ct. 2923, 57 L. Ed. 2d 932 (1978)*. The Supreme Court's decision in St. Paul is helpful in considering the nature of a boycott in the present context. This was a class action by a number of licensed physicians and their patients against four insurance companies engaged in writing malpractice insurance in the State of Rhode Island. The allegation was that a conspiracy **[**14]** existed between three of the four companies in that they refused to deal on any terms with the policyholders of the fourth. This was a means of compelling them to submit to new ground rules set by the fourth, whereby coverage on an "occurrence" basis would not be renewed and coverage would only issue on a "claims made" basis. [3.] The insurance companies moved to dismiss the antitrust claim contending that it was barred by the McCarran-Ferguson Act. This motion was granted by the district court. The court of appeals reversed, holding that the complaint stated a claim within the boycott exception in § 3(b) of that Act, the provision with which we are dealing.

The Supreme Court adopted the less restrictive **[**15]** view of the exception to the McCarran-Ferguson Act and affirmed the decision of the court of appeals. It resolved the issue whether the boycott exception applied to policyholders and insurers by concluding that it did. It did not, however, hold that the § 3(b) exception necessarily applied to "all concerted activity violative of the Sherman Act * * *."

[3.] Footnote 3 explains the difference between an "occurrence" policy and a "claims made" policy. The latter is much narrower in its coverage. It applies only to claims made during the life of the policy, whereas the "occurrence" basis protects the policyholder from any act done while the policy is in effect.

The important ruling of the case was that the exception contained in § 3(b) of the McCarran-Ferguson Act applied not alone to concerted activity against competitive insurers and agents, but also to policyholders and insurers.

The opinion of the Court made a statement as part of its conclusion which is significant here. It said:

> Moreover, ***HN1***[] conduct by individual actors falling short of concerted activity is simply not a "boycott" within § 3(b). Cf. Times Picayune v. United States, 345 U.S. (594) at 625 (*73 S. Ct. 872, 889, 97 L. Ed. 1277*).

438 U.S. at 555, 98 S. Ct. at 2937.

The Supreme Court expressed its own definition of boycott. It said:

> ***HN2***[] The generic concept of boycott refers to a method of pressuring a party with whom one has a dispute by withholding, or enlisting others to withhold, patronage or services **[**16]** from the target. The word gained currency in this country largely as a term of opprobrium to describe certain tactics employed by parties to labor disputes. **[*834]** * * * Thus it is not surprising that the term first entered the lexicon of ***antitrust law*** in decisions involving attempts by labor unions to encourage third parties to cease or suspend doing business with employers unwilling to permit unionization.

438 U.S. at 541, 98 S. Ct. at 2930.

The Court said that ***HN3***[] the boycotters and the ultimate target need not be in a competitive relationship with each other. The Court went on to say:

> This Court also has held unlawful concerted refusals to deal in cases where the target is a customer of some or all of the conspirators who is being denied access to a desired good or service because of a refusal to accede to particular terms set by some or all of the sellers.

Id.

The Court concluded that the conduct shown in St. Paul was within the common understanding of a boycott. The four insurance companies which controlled the market in medical malpractice insurance are alleged to have agreed that three of the four would not deal on any terms with the policyholders **[**17]** of the fourth. As a means of ensuring policyholder submission to new restrictive ground rules of coverage, St. Paul obtained the agreement of the other petitioners, strangers to the immediate dispute, to refuse to sell any insurance of its policyholders.

The St. Paul case differs substantially from our case. Nevertheless, it is helpful because it teaches ***HN4***[] that there must first be concerted activity by individual actors. There must also be present a boycott, the essence of which is the pressuring of a party with whom one has a dispute by withholding or enlisting others to withhold patronage or services from the target. The target can be a customer.

The decision in St. Paul thus furnishes guidance for considering whether a boycott exists in the present case. We hold that regardless of how it is considered there was not present the element of coercion.

PRESENCE OF SEVERAL CONSPIRATORS

We have not overlooked the related issue on which Judge Arraj based his decision in the district court, namely, that all of the "conspirators" were part of National Life Insurance, whereby National was in effect conspiring with itself. On this we agree with Judge Arraj that the General Agents Association, **[**18]** consisting as it did of general agents of National Life Insurance Company, was really a part of the National Life Insurance Company structure and they could not be regarded as conspirators. The same is true of the defendant Ryan and the defendant Leland. Ryan is a general agent for National Life Insurance Company and Leland is executive vice-president, so they cannot be effective conspirators either. So, although we believe that it is of importance to go to the merits of the case, in so doing the problem of whether there is a boycott is the ultimate issue to be resolved. We nevertheless recognize that ***HN5***[] the presence of legally viable conspirators is also essential and is not unrelated to the boycott issue.

In sum, this case is lacking in all of the essentials necessary to fulfill the *§ 1013* requirement. Not only is there a deficiency in the area of conspirators, but also the evidence fails to establish an agreement to boycott, coerce or intimidate or an act of boycott, coercion or intimidation.

The judgment of the district court is affirmed.

Concur by: McKAY

Concur

McKAY, Circuit Judge, concurring:

I concur with the majority opinion insofar as it affirms Judge Arraj's conclusion **[**19]** that the parties alleged to have acted in concert could not, as a matter of law on the undisputed facts of this case, have committed among themselves a boycott of plaintiff in violation of the Sherman Act. I express no view on the other issues treated in the opinion.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN1[] **Monopolies & Monopolization, Actual Monopolization**

To prevail on a monopolization claim, a plaintiff must establish the possession of monopoly power and the wilful acquisition or maintenance of that power. Defining the relevant product and geographic markets is the first step in determining whether monopoly power exists. The issue of whether monopoly power exists is a quintessential question of fact.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN2[] **Regulated Practices, Market Definition**

To prevail on an attempted monopolization claim, a plaintiff must prove specific intent to monopolize and the dangerous probability of success.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN3[] Regulated Practices, Monopolies & Monopolization

Products are in the same market if they are "reasonably interchangeable." When a product is controlled by one interest, without substitutes available in the market, there is monopoly power. In considering what is the relevant market for determining the control of price and competition, no more definite rule can be declared than that commodities reasonably interchangeable by consumers for the same purposes make up that part of the trade or commerce, monopolization of which may be illegal.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN4[] Regulated Practices, Monopolies & Monopolization

The "reasonable interchangeability" test is but the first step in defining the scope of the relevant product market. The reasonable interchangeability of the uses, or the cross-elasticity of demand, of a product and its possible substitutes merely determines the "outer boundaries" of a product market. Within this broad market, well-defined submarkets may which, in themselves, constitute product markets for antitrust purposes.

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Civil Procedure > Judgments > Pretrial Judgments > General Overview

HN5[] Pretrial Judgments, Judgment on Pleadings

In deciding a motion for judgment on the pleadings, a court must take as being true the material facts alleged in plaintiffs' complaint. For purposes of a *Fed. R. Civ. P. 12(c)* motion, a complaint should not be dismissed unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. Where the proof is largely in the hands of alleged conspirators, dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN6[] Statute of Limitations, Time Limitations

N.Y. C.P.L.R. § 214(2) provides that an action to recover upon a liability, penalty or forfeiture created or imposed by statute except as provided in *§§ 213* and *215*, must be commenced within three years of the accrual of the cause of action.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN7[] Statute of Limitations, Time Limitations

N.Y. C.P.L.R. § 213(1) provides for a six year statute of limitations for actions for which no limitation is specifically prescribed by law, and is intended to govern equitable actions.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Energy & Utilities Law > Oil & Petroleum Products > Gasoline Fuels > Gasoline Dealers & Distributors

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Energy & Utilities Law > Oil, Gas & Mineral Interests > Purchase Contracts > Price Terms

HN8[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Section 210 of the Economic Stabilization Act of 1970 (ESA) provides that any person suffering legal wrong because of any act or practice arising out of this title, or any order or regulation issued pursuant thereto, may bring an action in a district court for appropriate relief, including damages. 12 U.S.C.S. § 1904. The ESA provides for refund of overcharges and, in certain instances, for treble damages. An "overcharge" is defined as the amount by which the consideration for the sale of goods or services exceeds the applicable ceiling under regulations or orders issued under this title.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN9[] **Statute of Limitations, Time Limitations**

The issue of when the statute of limitations begins to run may turn not on the time when the defendant sets in motion the chain of events that led to ultimate injury, but rather when the plaintiff first had a claim for relief. The test is when the particular plaintiff became entitled to vindicate his individual rights. Nor is the failure to utilize the modern procedure of declaratory judgment enough to start the statute running. The declaratory judgment remedy is an optional device.

Opinion by: WERKER

Opinion

MEMORANDUM DECISION

HENRY F. WERKER, D.J.

Defendant Mobil Oil Corporation ("Mobil") moves pursuant to *Fed. R. Civ. P. 12(c)* for judgment on the pleadings with respect to count II of the amended complaint and pursuant to *Fed. R. Civ. P. 12(b)(6)* for dismiss of count III of the amended complaint for failure to state a claim upon which relief can be granted.

The facts of this case are set forth in the Court's opinion conditionally certifying the action as a class action, see *Jennings Oil Co. v. Mobil Oil Corp., 80 F.R.D. 124 (S.D.N.Y. 1978)*, and thus will not be repeated here.

COUNT II

Count II of the amended complaint charges Mobil with violating section two of the Sherman Act, *15 U.S.C. § 2*, by monopolizing [1] **[*2]** and attempting to monopolize [2] the sale and distribution of Mobil products to Mobil branded retail service stations. Mobil contends that the relevant product market cannot as a matter of law be defined to consist solely of Mobil products and that count II should therefore be dismissed.

[*3] The Supreme Court in *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377 (1956)*, set forth the fundamental rule that ***HN3***[] products are in the same market if they are "reasonably interchangeable." [3] The Court there held that "[when] a product is controlled by one interest, without substitutes available in the market, there is monopoly power." *Id. at 394*.

HN4[] The "reasonable interchangeability" test is but the first step in defining the scope of the relevant product market. The reasonable interchangeability of the uses (or the cross-elasticity of demand [4]) of a product and its possible substitutes merely determines the "outer boundaries" of a product market. *Brown Shoe Co. v. United States, 370 U.S. 294, 325 (1962)*. "[Within] this broad market, well-defined submarkets may which, in themselves, constitute product markets for **[*4]** antitrust purposes." *Id. at 325*.

Notwithstanding Mobil's contentions otherwise, the possibility exists in the instant suit that plaintiffs will prove at trial that Mobil products in themselves constitute such a submarket for antitrust purposes. [5] Mobil's assertion that a product market cannot as a matter of law be defined to consist solely of its own products must be rejected. [6]

---

[1] ***HN1***[] To prevail on a monopolization claim, a plaintiff must establish the possession of monopoly power and the wilful acquisition or maintenance of that power. *United States v. Grinnell Corp., 384 U.S. 563, 570-71 (1966)*. See generally Berkey Photo, Inc. v. Eastman Kodak Co., Nos. 78-7445, 78-7448, slip op. at 3146-54 (2d Cir. June 25, 1979). Defining the relevant product and geographic markets is the first step in determining whether monopoly power exists. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 394-95 (1956)*; *United States v. Grinnell, 384 U.S. at 570-76*. The issue of whether monopoly power exists is "a quintessential question of fact." *Brager & Co. v. Leumi Securities Corp., 429 F. Supp. 1341, 1347 (S.D.N.Y. 1977)*. Accord, *International Boxing Club v. United States, 358 U.S. 242, 244-45 (1959)* (applying "clearly erroneous" standard in reviewing district court's findings as to market definition).

[2] ***HN2***[] To prevail on an attempted monopolization claim, a plaintiff must prove specific intent to monopolize and the dangerous probability of success. *American Tobacco Co. v. United States, 328 U.S. 781, 785 (1946)*; *United States v. Aluminum Co. of America, 148 F. 2d 416, 431-32 (2d Cir. 1945)*. See generally ABA, ***Antitrust Law*** Developments 60-63 (1975). Although there is some authority to the effect that market definition is not necessary to an analysis of an attempted monopolization claim, the majority view is otherwise. See generally *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d 256, 276 & n.69 (5th Cir. 1978)*, cert. denied, ***99 S. Ct. 1289 (1979)***, and cases and authorities therein cited.

[3] "In considering what is the relevant market for determining the control of price and competition, no more definite rule can be declared than that commodities reasonably interchangeable by consumers for the same purposes make up that 'part of the trade or commerce,' monopolization of which may be illegal." *351 U.S. at 395*. See also *id. at 404*.

[4] See *United States v. E.I. du Pont de Nemours & Co., 351 U.S. at 394, 400-04*.

[5] ***HN5***[] In deciding a motion for judgment on the pleadings, the Court must take as being true the material facts alleged in plaintiffs' complaint. *Hospital Bldg. Co. v. Trustee of Rex Hosp., 425 U.S. 738, 740 (1976)*. For purposes of a *Rule 12(c)* motion, a "complaint should not be dismissed 'unless it appears beyond doub that the plaintiff can prove no set of facts in support of his

[*5] The structure of the gasoline industry is such that some oil producers compete with their own customers. In the instant case, Mobil-branded retail service stations purchase gasoline directly from Mobil itself as well as through Mobil-branded independent distributors. Hence, despite its "natural monopoly" over its own products, Mobil competers with its independent distributors in terms of selling gasoline and other Mobil products to Mobil service stations for sale to the public. On the other hand, Mobil and Mobil-branded distributors do not compete with other oil companies and other branded distributors for the wholesale distribution of gasoline to Mobil-branded service stations. Since "a market for antitrust purposes is the area of effective competition," M. Handler, 2 Twenty-Five Years of Antitrust 1050 (1973) (emphasis added), the product market may be defined in this case to consist solely of Mobil products.

With respect to the reasonable interchangeability test, it is clear that Mobil gasoline may be interchangeable with other brands of gasoline from the point of view of consumers. However, Mobil gasoline may not have been interchangeable with other brands from the point **[*6]** of view of the distributors. Because of restrictive covenants in the contracts between Mobil and its distributors, the distributors could not sell other types of gasoline to Mobil-branded or non-branded service stations. Plaintiffs' Mem. in Opp. to Defendant's Motion to Dismiss, at 27-28 & n., quoting wholesale distributor agreement. In addition, the oil egulations required the oil companies to allocate their products among their established wholesale customers, thus rendering it difficult for distributors to shift to different supliers. Id. at 29-30 & nn, citing 10 C.F.R. § 211.9(a).

Plaintiffs thus allege a situation where a product market (Mobil gasoline and accessories) is controlled by one of their competitors (Mobil) without substitutes being reasonably available in the wholesale market. Assuming these facts to be true, which I must do at this juncture, the conclusions that Mobil possessed monopoly power or that the dangerous probability existed that Mobil could have successfully monopolized the market can be drawn. See *United States v. E.I. du Pont de Nemours & Co., 351 U.S. at 394*.If plaintiffs can also prove that Mobil wilfully acquired or maintained that power **[*7]** or that Mobil had the specific intent to monopolize the market, they may prevail on count two of the amended complaint. Accordingly, the motion for judgment on the pleadings with respect to count two must be denied.

COUNT III

Count III of the amended complaint charges Mobil with violating the Economic Stabilization Act of 1970, 12 U.S.C. § 1904 n. (the "ESA"), as amended and incorporated in the Emergency Petroleum Allcoation Act, *15 U.S.C. § 751 et seq.* (the "EPAA"), by violating various regulations promulgated thereunder, more specifically, Special Rule No. 1, Cost of Living Council, *38 Fed. Reg. 6284*, and 10 C.F.R. §§ 210-12. Plaintiffs' charges arise from Mobil's

---

claim which would entitle him to relief.'" *George C. Frey Ready-Mixed Concrete, Inc. v. Pine Hill Concrete Mix Corp., 554 F.2d 551, 553 (2d Cir. 1977)*, quoting *Conley v. Gibson, 355 U.S. 41, 45-46 (1957)*. In antitrust cases in particular, "where 'the proof is largely in the hands of the alleged conspirators,'… dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly." *Hospital Bldg. Co. v. Trustees of Rex Hosp., 425 U.S. at 746*, quoting *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473 (1962)*.

[6] See, e.g., *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d at 282* ("Several cases indicate that it is possible under certain prescribed circumstances to limit the relevant market to a single firm's products."); *Heatransfer Corp. v. Volkswagenwerk, A.G., 553 F.2d 964, 979-81 (5th Cir. 1977)*, cert. denied, ***434 U.S. 1087 (1978)*** (affirming jury's finding that product market consisted of the sale of air-conditioners for Volkswagen, Porsche and Audi automobiles); *Coleman Motor Co. v. Beckman Instruments, Inc., 525 F.2d 1338, 1349 (3d Cir. 1975)*, vacating *376 F. Supp. 546, 562 (W.D. Pa. 1974)* (third circuit did not foreclose possibility on remand of jury finding that product market could consist of wholesale market for Dodge automobiles); *United States v. CBS Inc., 459 F. Supp. 832, 836-39 (C.D. Cal. 1978)* (held, each television network's prime time television programs could constitute relevant submarket for antitrust purposes); *Castoe v. Amerada Hess Corp., 1976-2 Trade Cases (CCH) P61,054 (S.D.N.Y. 1976)* (motion to dismiss attempted monopolization claim on ground that a defendant could not as a matter of law attempt to monopolize its own product denied); *Joe Westbrook, Inc. v. Chrysler Corp., 419 F. Supp. 824, 840-41 (N.D. Ga. 1976)* (in section one case, held that under certain circumstances, "a single brand of automobiles could be construed as the relevant market"). See also *Mullis v. Arco Petroleum Corp., 502 F.2d 290 (7th Cir. 1974)*; Comment, The Propriety of the Single Firm's Product as the Relevant Market in Attempt to Monopolize Cases, 29 Baylor L. Rev. 77 (1977). The Court is not, of course, defining at this time the product market to consist solely of Mobile products, since this is a matter to be resolved at trial.

March 1973 reduction in the discount in the price of gasoline sold by Mobil to distributors while the price of gasoline sold directly to service stations was kept constant. Mobil contends that because the price increase occurred in March 1973 and suit was not filed until March 1977, count III is barred by the applicable statute of limitations.

Since neither the ESA nor the EPAA contains a time limitations provision, the Court must turn to the most analogous statute of limitations of the forum state. *Ashland **[*8]** Oil Co. v. Union Oil Co., 567 F.2d 984, 989-90 (T.E.C.A. 1977)*, cert. denied, *435 U.S. 994 (1978)*. The most analogous New York statute of limitations in this case is ***HN6***[] *N.Y.C.P.L.R. § 214(2)* (McKinney Supp. 1978-1979), which provides that "an action to recover upon a liability, penalty or forfeiture created or imposed by statute except as provided in *sections 213* and *215*…" must be commenced within three years of the accrual of the cause of action. See *Hornblower & Weeks-Hemphill, Noyes v. Burchfield, 366 F. Supp. 1364 (S.D.N.Y. 1973)*.

Plaintiffs contend that the exception in *section 214(2)* is applicable to this suit and that *N.Y.C.P.L.R. § 213(1)* (McKinney 1972) should be applied instead of *section 214(2)*. I disagree. ***HN7***[] *Section 213(1)* provides for a six year statute of limitations for actions "for which no limitation is specifically prescribed by law…" and is intended to govern equitable actions. See J. McLaughlin, Practice Commentaries C213:1, *N.Y.C.P.L.R. § 213* (McKinney 1972). Hence, with respect to any claims for money damages, *section 213(1)* would certainly not be applicable. Furthermore, the reference in *section 214(2)* to *section 213* is intended to make reference **[*9]** to *subdivision (7) of section 213* which covers stockholders' derivative actions. J. Weinstein, H. Korn & A. Miller, 1 New York Civil Practice P214.03 (1978). Count III, of course, does not involve stockholders' derivative claims, but falls squarely within *section 214(2)*. The period of limitations to be applied is thus three years.

Mobil maintains that the three year period is to be measured from the date of the allegedly illegal price increase, i.e., March 1973, when the regulations were purportedly breached. Mobil relies in part on express language in Special Rule No. 1 of the Cost of Living Council to the effect that "a firm… may not increase the price for a covered product above its base price…." Special Rule No. 1, P4, *38 Fed. Reg. 6284* (emphasis added).

Mobil's reading of Special Rule No. 1 is overly narrow. By its very terms, the rule "establishes mandatory rules governing price adjustments for the sale of crude petroleum and petroleum products." Id. P1. More importantly, the ESA is clearly concerned with overcharges as well as unlawful price increases. ***HN8***[] Section 210 provides that "[any] person suffering legal wrong because of any act or practice arising out **[*10]** of this title, or any order or regulation issued pursuant thereto, may bring an action in a district court… for appropriate relief, including… damages." ESA § 210(a), 12 U.S.C. § 1904 n. The ESA provides for refund of overcharges and, in certain instances, for treble damages. An "overcharge" is defined as "the amount by which the consideration for… the sale of goods or services exceeds the applicable ceiling under regulations or orders issued under this title." Id. § 210(c) (emphasis added). Certainly, plaintiffs had no claim for overcharges until they actually purchased gasoline from Mobil and were in fact overcharged.

In *Barninger v. National Maritime Union, 372 F. Supp. 908 (S.D.N.Y. 1974)*, then District Judge Gurfein held:

But ***HN9***[] the issue of when the statute [of limitations] began to run may turn not on the time when the defendant set in motion the chain of events that led to ultimate injury, but rather when the plaintiff first had a claim for relief. The test is when the particular plaintiff became entitled to vindicate his individual rights….

Nor is the failure to utilize the modern procedure of declaratory judgment enough to start the statute running…. **[*11]** The declaratory judgment remedy is an optional device.

372 F. Supp. at 913, citing inter alia *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321 (1971)*.

In the instant action, plaintiffs could very well have sought a declaratory judgment under section 210(a) of the ESA. However, they could not have had any claim for the refunding of overcharges until they purchased gasoline and were overcharged. With each purchase of gasoline at an unlawful price, a new claim for an overcharge accrued. Accord, *Thomas v. Petro-Wash, Inc., 429 F. Supp. 808, 812 (M.D.N.C. 1977)* (Sherman Act and Clayton Act case).

Accordingly, as the plaintiffs themselves contend, "the statute of limitations began to run from the date of each individual sale." Plaintiffs' Mem. in Opp. to Defendant's Motion to Dismiss, at 48. Sinced this action was not filed until March 22, 1977, any of plaintiffs' claims arising from sales occurring prior to three years before that date are time-barred. Since the amount of the alleged unlawful increase was known, damages were ascertainable. The claims arising from the time of the price increase until three years before March 22, 1977 were not "speculative, uncertain **[*12]** or incapable of proof" and thus could have been sued upon within three years from the time they accrued. Compare *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. at 338-39*. Those claims are therefore barred.

CONCLUSION

The motion for judgment on the pleadings as to count II of the amended complaint is denied. The motion to dismiss count III is granted to the extent that all claims accruing prior to three years before the filing of the action are dismissed.

SO ORDERED.

Civil Procedure > Remedies > Provisional Remedies > Replevin

Civil Procedure > Remedies > Provisional Remedies > Sequestration

HN3[] **Remedies, Provisional Remedies**

Fed. R. Civ. P. 64 makes state law control the availability of provisional remedies to secure satisfaction of a judgment, and specifically provides that the remedies thus available include arrest, attachment, garnishment, replevin, sequestration, and other corresponding or equivalent remedies. The precise scope of *Rule 64* is somewhat unclear. According to a narrow interpretation of the Rule, the phrase "and other corresponding or equivalent remedies," was never intended to exclude temporary equitable relief otherwise proper under *Fed. R. Civ. P. 65*, even though that relief operates only to secure satisfaction of a final judgment and state law offers no equivalent remedy.

Business & Corporate Law > ... > Shareholder Actions > Actions Against Corporations > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN4[] **Shareholder Actions, Actions Against Corporations**

Mass. Gen. Laws ch. 214, § 3(7) confers jurisdiction on the supreme and superior courts in actions to reach and apply shares or interests in corporations. Massachusetts state courts rely on *§ 3(7)*, together with their power to issue injunctions pendente lite, to grant a plaintiff an equitable attachment of defendants' shares of stock by restraining their transfer prior to final adjudication of plaintiff's substantive claim.

Civil Procedure > Remedies > Provisional Remedies > Attachment

Civil Procedure > Remedies > Judgment Interest > General Overview

Civil Procedure > Remedies > Provisional Remedies > General Overview

HN5[] **Provisional Remedies, Attachment**

The conditions for issuance of a writ of attachment are set forth in Mass. R. Civ. P. 4.1(c), which requires that the plaintiff show a reasonable likelihood that he will recover judgment, including interest and costs, in an amount equal to or greater than the amount of the attachment over and above any liability insurance shown by the defendant to be available to satisfy the judgment.Massachusetts law empowers the attaching officer under certain circumstances to require security from the plaintiff before or after attachment in order to indemnify the officer from liability for an improper attachment. Mass. Gen. Laws ch. 223, § 45A. Otherwise, there is no requirement for an attachment bond.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Likelihood of Success

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN6[] **Grounds for Injunctions, Likelihood of Success**

The *Due Process Clause of the Fourteenth Amendment* compels the notice and hearing procedures implemented by Mass. R. Civ. P. 4.1(c). The preliminary injunction that will limit disposition of stock and assets owned or controlled by defendants amounts to a deprivation of property within the meaning of the *Fourteenth Amendment*, requiring prior notice and hearing. In particular, plaintiffs must demonstrate more than just a probability of success on the merits in order to prevail on their motion for a preliminary injunction; they must also show a reasonable likelihood that they will recover a judgment in excess of the total value of the property that is the subject of plaintiffs' motions.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN7[] **Conspiracy to Monopolize, Sherman Act**

A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. Not all tie-ins fall within the Sherman Act's prohibition against a contract, combination, or conspiracy in restraint of trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Courts treat tying arrangements as per se illegal. In order to establish an illegal tie, under the per se theory, the plaintiff must prove (1) that tying and tied products are separate, and (2) that the defendant has sufficient economic power with respect to the tying product appreciably to restrain free competition in the market for the tied product. It is also relevant to consider whether the seller's behavior follows the general pattern found unacceptable in earlier tying cases.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Burdens of Proof

HN9[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Courts are developing two inroads on the per se doctrine in tying cases. Some courts expand the concept of two separate products by permitting business justifications for aggregation of the products to enter into the single product analysis. By holding that a challenged arrangement constitutes only a single product, courts avoid the strictures of the per se approach entirely, even though at times producing rather unusual results. A second line of attack, which is often not clearly distinguished from the first, takes the form of increasing the availability of affirmative defenses to a liability finding. Although these two approaches are often confused, there is an important difference. The plaintiff has the burden of proof on all issues implicated in the single product determination, whereas the defendant has the burden of proof with respect to each affirmative defense.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN10[] Sherman Act, Defenses

In addition to the elements of the per se doctrine, the plaintiff in a private antitrust action must also show as part of his case in chief that he was injured by the challenged practice. Once the prima facie case is established the defendant may respond with several affirmative defenses based on limited business justifications. Finally, the plaintiff's failure to prove all elements of the per se theory does not foreclose his antitrust claim; the challenged practice must then be examined according to the rule of reason in order to determine if a violation of *§ 1* of the Sherman Act has nevertheless occurred.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN11[] Tying Arrangements, Sherman Act Violations

A *§ 1* of the Sherman Act violation does not require a conspiracy, to which the multitude of *§ 1* tying cases involving a single seller of tied and tying products amply attests. Tying arrangements are condemned under *§ 1* as contracts in restraint of trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN12[] Price Fixing & Restraints of Trade, Tying Arrangements

The cases support a four-pronged analysis: (1) examination of the product structure itself, (2) investigation of the defendant's product marketing practices, (3) consideration of the behavior of other industrial sellers and (4) analysis of the efficiencies gained by and the business justifications for the product combination.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN13[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The single product determination frequently hinges as much on the way the two products are coupled and on the character of each product as on the fact that their sales are connected at all.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN14[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The franchisor is free to demonstrate that the tie constitutes a necessary device for controlling the quality of the end product sold to the consuming public. As part of this defense, however, the franchisor must establish that the tie constitutes the method of maintaining quality that imposes the least burden on commerce. If there are less burdensome alternatives, a franchisor is obligated to employ them rather than the tie.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN15[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Plaintiffs in a tying case need not prove a tying product monopoly but only that defendants enjoyed sufficient economic power in the tying product market appreciably to restrain free competition in the tied product market. An appreciable restraint is shown if the seller exercises some control over some of the buyers in the market and enjoys an advantage over competing tying product suppliers.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN16[] **Private Actions, Remedies**

In a private antitrust action, the plaintiff, in addition to proving a violation and an injury, must also show that the violation was the direct and material cause of the injury he suffered. Plaintiff's burden on the causation issue is not a heavy one; he need only establish the causal connection "with reasonable probability" and to "a fair degree of certainty."

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN17[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Coercion has no relevance to a determination of antitrust liability; it is relevant, if at all, only to determining whether a tie-in exists, that is, whether the seller has conditioned the sale of one product on the purchase of another. Once a tie is established, liability follows if the other two elements of the per se rule power in the tying product market and foreclosure of a not insubstantial amount of interstate commerce in the tied product are satisfied. Neither of these two elements incorporates a coercion requirement. The requisite economic power may be found on the basis of either uniqueness or consumer appeal. Such an inference does not permit an inquiry into individual coercion.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN18[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Coercion may have some relevance for proving the tie in some situations, but in a case in which the tie is manifest in the express terms of a standard form contract, independent proof of individual coercion is entirely unnecessary.

Counsel: **[**1]** Donald B. Gould, Goodwin, Proctor & Hoar, Boston, Mass., for plaintiffs.

James D. St. Clair, Robert W. Mahoney, Hale & Dorr, Boston, Mass., for defendants.

James F. McHugh, John J. Curtin, Jr., Bingham, Dana & Gould, Boston, Mass., for Toyota Motor Sales, U.S.A., Inc.

Opinion by: GARRITY

Opinion

[*976] MEMORANDUM OF DECISION

The precise characterization of the motions now before the court is disputed by the parties. Anderson Foreign Motors, Inc., a Toyota automobile dealer, brought this class action against New England Toyota Distributor, Inc. (hereinafter NET) and George A. Butler, formerly President and Treasurer and now Chairman of the Board and Chief Executive Officer of NET, [1.] **[**2]** for violation of *Section 1* of the Sherman Antitrust Act, *15 U.S.C. § 1*. [2.] Plaintiffs complain of an allegedly illegal tying arrangement **[*977]** in which defendants require dealers to purchase NET's new car delivery services along with the purchase of Toyota automobiles for resale. On April 12, 1978, following a hearing, this court granted plaintiffs' motion for class certification, defining the class as all persons and entities who were Toyota dealers after January 25, 1972.

Plaintiffs now bring two motions: (1) a motion pursuant to *Fed.R.Civ.P. Rule 64* for approval of the attachment of certain real property and assets and (2) a motion pursuant to *Fed.R.Civ.P. Rule 65* for a preliminary injunction to limit the disposition of certain stock and assets of NET controlled by the defendants.

Plaintiffs seek through the pending motions to secure payment of an eventual judgment entered **[**3]** in plaintiffs' favor by restraining the disposal of certain assets in any manner injurious to plaintiffs' interests. The characterization problem stems from the nature of the property that plaintiffs wish to encumber: (1) specific parcels of real estate owned by NET and Butler and assets owned by NET and (2) the stock, rights, and assets of NET. **HN1**[] Although real estate can be the subject of an ordinary motion for attachment under Massachusetts law, [3.] Mass.R.Civ.Pro., Rule 4.1; *M.G.L. c. 223, § 42*, stock cannot be attached in an action seeking only money

---

[1.] The original complaint included as a defendant Toyota Motor Sales, U.S.A., the national Toyota distributing concern which imported and distributed automobiles to regional wholesale distributor-franchisees like NET. Toyota Motor Sales, however, was subsequently removed as a party-defendant on request of counsel.

[2.] Although tying arrangements can violate both *Section 1* of the Sherman Act and *Section 3* of the Clayton Act, only the former statutory provision applies to this case, since the jurisdictional prerequisites for a Clayton Act violation are not present. In particular, the tied product in this case, delivery services, is not within the Clayton Act's prohibition against ties involving "goods, wares, merchandise, machinery, supplies or other commodities." *15 U.S.C. § 14*; See, *Moore v. Jas. H. Matthews & Co., 9 Cir. 1977, 550 F.2d 1207, 1214*; *United States v. Jerrold Electronic Corporation, E.D.Pa.1960, 187 F. Supp. 545, 554*, Aff'd per curiam, 1961, *365 U.S. 567, 81 S. Ct. 755, 5 L. Ed. 2d 806*.

[3.] **HN2**[] *Fed.R.Civ.P. Rule 64* requires that a federal court look to the law of the forum state for any provisional remedies to secure a final judgment:

At the commencement of and during the course of an action, all remedies providing for seizure of person or property for the purpose of securing satisfaction of the judgment ultimately to be entered in the action are available under the circumstances and in the manner provided by the law of the state in which the district court is held, existing at the time the remedy is sought . . . .

damages, *M.G.L. c. 223, § 71*. But see, *Krohn Hite v. Berube, D.Mass.1974, 372 F. Supp. 1262, 1263* (state court appears to have effected equitable attachment by injunction). Plaintiffs, therefore, have treated what is in reality a motion for an equitable attachment of defendants' stock and assets as a motion for a preliminary injunction prohibiting NET and Butler from transferring or diminishing the value of the stock and assets other than in the ordinary course of business.

[4]** We must first decide a threshold question as to the availability of a provisional remedy in the form of the preliminary injunction that plaintiffs seek. This issue was not discussed by the parties, but since it relates to the power of this court, we must address it. ***HN3***[] *Fed.R.Civ.P. Rule 64* makes state law control the availability of provisional remedies to secure satisfaction of a judgment, and specifically provides that "(t)he remedies thus available include arrest, attachment, garnishment, replevin, sequestration, and other corresponding or equivalent remedies, . . ." The precise scope of *Rule 64* is somewhat unclear. See, 7 Moore's Federal Practice P 64.04(3). According to a narrow interpretation of the Rule, 7 Moore's, Supra, at 64-20-21, the phrase "and other corresponding or equivalent remedies, . . ." was never intended to exclude temporary equitable relief otherwise proper under *Fed.R.Civ.P. Rule 65*, even though that relief operates only to secure satisfaction of a final judgment and state law offers no equivalent remedy. Under this interpretation, we plainly have power to grant plaintiffs' motion, whether or not Massachusetts law permits equitable attachment of shares of stock.

[5]** However, the Rule is susceptible of a broader interpretation. It may make state law the Exclusive source of available remedies to secure a final judgment. Even under this broad interpretation, we still have power to grant plaintiffs' motion for a preliminary injunction. The motion in effect seeks an equitable attachment. *Daley v. Ort, D.Mass.1951, 98 F. Supp. 151, 152*. Although in Daley a motion identical to plaintiffs' motion in this case was denied because the court could find no authority for an equitable attachment prior to verdict under Massachusetts or federal law, the court appears to have overlooked ***HN4***[] *M.G.L. c. 214, § 3(7)*, (formerly *M.G.L. c. 214, § 3(8)*), **[*978]** which confers jurisdiction on the Supreme and Superior courts in "actions to reach and apply shares or interests in corporations, . . ." Massachusetts state courts rely on *§ 3(7)*, together with their power to issue injunctions Pendente lite, to grant a plaintiff an equitable attachment of defendants' shares of stock by restraining their transfer prior to final adjudication of plaintiff's substantive claim. See, *McCarthy v. Rogers, 1936, 295 Mass. 245, 3 N.E.2d 787*; Cf., *Salvucci v. Sheehan, 1965, 349 Mass. **[**6]** 659, 662-63, 212 N.E.2d 243*. Hence Massachusetts law appears to provide a procedure comparable to that used by plaintiffs in this case, and we will treat plaintiffs' motion for a preliminary injunction as in the nature of an action to reach and apply coupled with a motion for temporary relief.

We now turn to the standards for exercising our power under *Rules 64* and *65*. ***HN5***[] The conditions for issuance of a writ of attachment are set forth in Mass.R.Civ.Pro., Rule 4.1(c), which requires that the plaintiff show "a reasonable likelihood that (he) will recover judgment, including interest and costs, in an amount equal to or greater than the amount of the attachment over and above any liability insurance shown by the defendant to be available to satisfy the judgment." Cf., *M.G.L. c. 223, § 42A*. Because there is no evidence of liability insurance, the central question on the motion for approval of attachment is whether plaintiffs are likely to prevail on the merits and obtain damages in the necessary amount. Massachusetts law empowers the attaching officer under certain circumstances to require security from the plaintiff before or after attachment in order to indemnify the officer from liability **[**7]** for an improper attachment. *M.G.L. c. 223, § 45A*. Otherwise, there is no requirement for an attachment bond.

The standards for granting the preliminary injunction that plaintiffs seek differ only slightly from those governing the attachment. ***HN6***[] The *due process clause of the Fourteenth Amendment* compels the notice and hearing procedures implemented by Mass. Rule 4.1(c). *Bay State Harness Horse R. & B. Ass'n v. PPG Industries, Inc., D.Mass.1973, 365 F. Supp. 1299*. The preliminary injunction that plaintiffs seek will limit disposition of stock and assets owned or controlled by defendants and thus also amounts to a deprivation of property within the meaning of the *Fourteenth Amendment*, requiring prior notice and hearing. *Fuentes v. Shevin, 1972, 407 U.S. 67, 92 S. Ct. 1983, 32 L. Ed. 2d 556*. In particular, plaintiffs must demonstrate more than just a probability of success on the merits in order to prevail on their motion for a preliminary injunction; they must also show a reasonable likelihood that they will recover a judgment in excess of the total value of the property that is the subject of plaintiffs' two motions. Cf., *Fuentes, supra, at 97*, [4] *92 S. Ct. 1983*.

[8]** Because plaintiffs' motion under *Rule 65* is in the nature of a equitable attachment, we do not require a strong showing of irreparable injury or a favorable balance of harms. Plaintiffs fear that they will not be able to obtain satisfaction for a final judgment that likely may exceed twelve million dollars, see, Part II.A Infra, without executing on the stock and assets of NET. It is our opinion that this fear is reasonably justified. Moreover, if defendants were to sell the stock and other personal property and, with the proceeds, purchase real estate, plaintiffs would be able to attach the real estate under Mass. Rule 4.1(c) without showing irreparable harm. There **[*979]** is no reason for a different result in this case just because the property happens to be in the form of stock.

After reviewing the numerous briefs and affidavits, we find that plaintiffs have demonstrated a probability of success on the merits and a reasonable likelihood of recovering a judgment in excess of seven million dollars and have otherwise satisfied the requirements of Mass.R.Civ.P. Rule 4.1(c). Therefore, we grant plaintiffs' motion for approval of attachment in the requested amount of seven million **[**9]** dollars. However, we cannot decide the motion for a preliminary injunction without some evidence of the value of the property that is the subject of that motion. Furthermore, without such evidence we are also unable to set the amount of the bond required by *Fed.R.Civ.P. Rule 65(c)*. Therefore, we are issuing a contemporaneous procedural order calling for either a stipulation of the parties or evidence of the value of the property and briefs on the issue of the amount of the security that should be required.

The parties have submitted a number of relevant affidavits in connection with both the current motion and the prior motion for class certification. Before embarking on an analysis of the issues, we will first outline generally the significant factual background. NET was the sole distributor of Toyota automobiles in the five state New England area Vermont, Maine, New Hampshire, Massachusetts and Rhode Island until March 1978 when Toyota Motor Sales, U.S.A., Inc. (hereinafter TMS), the national distributor-franchisor, assumed NET's New England distributorship. Pursuant to standard franchise agreements between NET and its dealers, NET sold automobiles to New England Toyota dealers, **[**10]** transporting the cars from the Port of Boston to the dealers' various locations in the five state area. Prior to 1972 NET had subcontracted this transportation function to independent common carriers and had required dealers to reimburse NET for its transportation costs. In that year, however, NET unilaterally changed its transportation policy, relying on the right it reserved in its dealer franchise contracts, "to deliver all Toyota products purchased by DEALER by whatever mode of transportation and from whatever point DISTRIBUTOR may from time to time establish or select." Toyota Dealer Sales and Service Agreement, Article III, PP 1, 2 (Defendants' Exhibit 1 to 5/10/76 Deposition of Ross Anderson); Accord, Toyota Dealer Sales and Service Agreement, Article VI, P B.1 (Plaintiffs' Exhibit 1 to 5/10/76 Anderson Deposition) ("most recent" agreement). NET purchased a number of tractors and trailers and in 1972 began to transport the vehicles to dealers on its own trucks, charging the dealers for the cost of carrying the cars according to Article III, P 2, of the earlier Sales and Service Agreement. The contract between TMS and NET required NET to execute this standard Agreement with each **[**11]** of its dealers. See, 11/2/70 and 3/7/73 Distributor Agreements between Toyota Motor Sales, U.S.A., Inc. and New England Toyota Distributors, Inc., Article III. Each dealer was charged the same average amount for each automobile he purchased, the total charge for all automobiles averaged over all the cars sold.

The change in delivery policy met with some opposition, mainly from the Toyota Dealer Council, an independent dealer body organized to negotiate modifications in some of NET's policies. The Dealer Council and vocal dealers objected to what they felt were excessive delivery prices charged by NET. At a later date, the dealers, dissatisfied

---

[4] Of course, the seven million dollar attachment includes property that is also covered by the motion for a preliminary injunction. The overlap should not be counted twice, since attachment alone constitutes a sufficient property deprivation to trigger due process requirements. In addition, because NET no longer distributes Toyota automobiles in New England, it may be that NET's stock has no value apart from the value of the company's assets. If so, the stock would add nothing to the total value of the property plaintiffs wish to encumber. On the other hand, NET's stock may be worth more than the attachment amount of $ 5,000,000 or even more than likely damages of $ 12,000,000. At this point, we lack sufficient information to make these determinations.

with the efforts of the Council, formed the Toyota Dealers Alliance to continue negotiations with NET. Following unsuccessful attempts to change NET's transportation policy, the Dealers Alliance filed a complaint with the Federal Trade Commission in July 1976 alleging an illegal tie of the sale of automobiles to the sale of delivery services. The present action was commenced on January 30, 1976.

Defendants make two principal arguments in opposition to plaintiffs' motions. First, they contend that plaintiffs are unlikely to succeed on the merits **[**12]** for three reasons: (1) that a *Section 1* violation requires **[*980]** a conspiracy and after dismissal of TMS there is no basis for a conspiracy finding; (2) that delivery services and automobiles are a single product, a delivered car, and thus there can be no unlawful tie; and (3) that even if automobiles and delivery services are separate products, there is no proof that plaintiffs suffered any injury as a direct result of the tie since plaintiffs have not shown that defendants "coerced" them into purchasing the two in tandem. Second, defendants argue that in any event plaintiffs have failed to show that they are likely to recover damages in excess of the property they seek to attach. In the following analysis we discuss each argument separately.

I. Probability of Success on the Merits

A. Background

HN7[] A tying arrangement is "an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier." *Northern Pac. R. Co. v. United States, 1958, 356 U.S. 1, 5-6, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545*. Not all tie-ins fall within the Sherman Act's **[**13]** prohibition against a "contract, combination, . . . or conspiracy in restraint of trade . . . ." The theory of illegal tie-ins has evolved in response to the dual economic evils of tying: the tying arrangement harms competing sellers of the tied product by foreclosing them from access to the market for reasons having nothing to do with the merits of the tying seller's product, and harms buyers by restricting their range of choice in the tied product market. *Northern Pac. R. Co., supra, at 6, 78 S. Ct. 514*; *Times-Picayune v. United States, 1953, 345 U.S. 594, 605, 73 S. Ct. 872, 97 L. Ed. 1277*. The seller who enjoys a powerful position in the tying product market seeks to extend his economic power into the tied product market. Since demand for the tied product varies directly with demand for the tying product, the seller need only reduce the price of his tying product in order to increase sales of the tied product. In this manner he is able to reap his monopoly profit at the same time as gaining a foothold in the market for the tied product. It is this leverage made possible by the seller's strong economic position in the typing product market that offends antitrust values. *Times-Picayune, **[**14]** supra, at 614, 73 S. Ct. 872*; See, W. S. Bowman, Jr., Tying Arrangements and the Leverage Problem, 67 Yale L.J. 19 (1957).

Historically, ***HN8***[] courts have treated tying arrangements as Per se illegal. In order to establish an illegal tie, under the Per se theory, the plaintiff must prove (1) that tying and tied products are separate, *Fortner Enterprises v. U.S. Steel (Fortner I), 1969, 394 U.S. 495, 507-508, 89 S. Ct. 1252, 22 L. Ed. 2d 495*, (2) that the defendant has sufficient economic power with respect to the tying product appreciably to restrain free competition in the market for the tied product, *Fortner Enterprises (Fortner I), supra, at 499-500, 89 S. Ct. 1252*; *Northern Pacific R. Co., supra, 356 U.S. at 6, 78 S. Ct. 514*. It is also relevant to consider whether the seller's behavior follows the general pattern found unacceptable in earlier tying cases. *Kentucky Fried Chicken v. Diversified Packaging, 5 Cir. 1977, 549 F.2d 368, 375*.

HN9[] Courts have developed two inroads on the Per se doctrine in tying cases. Some courts have expanded the concept of two separate products by permitting business justifications for aggregation of the products to enter into the single product analysis. See, **[**15]** *Dehydrating Process Co. v. A. O. Smith Corp., 1 Cir. 1961, 292 F.2d 653, 655-57*, Cert. denied 1961, *368 U.S. 931, 82 S. Ct. 368, 7 L. Ed. 2d 194*; Forrest v. Capital Buildings & Loan Assn., E.D.La.1974, 385 F. Supp. 831, 838-39, Aff'd per curiam, 5 Cir. 1974, *504 F.2d 891*, Cert. denied, 1975, *421 U.S. 978, 95 S. Ct. 1980, 44 L. Ed. 2d 470*; *Automatic Radio Mfg. Co. v. Ford Motor Company, D.Mass.1965, 242 F. Supp. 852, 856-57*; *United States v. Jerrold Electronics Corporation, E.D.Pa.1960, 187 F. Supp. 545, 558-60*, Aff'd per curiam 1961, *365 U.S. 567, 81 S. Ct. 755, 5 L. Ed. 2d 806*; L. A. Sullivan, The Law of Antitrust, 443 (1977). **[*981]** By holding that a challenged arrangement constitutes only a single product, courts have avoided the strictures of the Per se approach entirely, even though at times producing rather unusual results. See, e.g., *Jerrold Electronics Corporation, supra* (components of antenna system are single product during start-up phase of business but separate products at a later stage). A second line of attack, which is often not clearly distinguished from the first, takes the form of increasing the availability of affirmative defenses to a liability finding. See, **[**16]** *Kentucky Fried Chicken, supra, at 376-78*; *Northern v. McGraw-Edison Co., 8 Cir. 1976, 542 F.2d 1336, 1347*, Cert. denied 1977, *429 U.S. 1097, 97 S. Ct. 1115, 51 L. Ed. 2d 544*; *Baker v. Simmons Company, 1 Cir. 1962, 307 F.2d 458*; *Jerrold Electronics Corporation, supra, at 556-58*; Annot., *14 A.L.R.Fed. 458, 492, 495 (1973)*. Although these two approaches are often confused, there is an important difference. The plaintiff has the burden of proof on all issues implicated in the single product determination, whereas the defendant has the burden of proof with respect to each affirmative defense. In our opinion, there is no need in the instant case to sort out who should bear the burden as to each issue in this case, See generally, M. E. Ross, The Single Product Issue in Antitrust Tying: A Functional Approach, 23 Emory L.J. 963, 989-992, 1011-14, since it appears likely that even if plaintiffs were assigned the burden of proof on all issues, they would still prevail.

HN10[] In addition to the elements of the Per se doctrine already discussed, the plaintiff in a private antitrust action must also show as part of his case in chief that he was injured by the challenged practice. See, *Ford Motor Co. **[**17]** v. Webster's Auto Sales, Inc., 1 Cir. 1966, 361 F.2d 874, 883*. Once the prima facie case is established the defendant may respond with several affirmative defenses based on limited business justifications. Finally, the plaintiff's failure to prove all elements of the Per se theory does not foreclose his antitrust claim; the challenged practice must then be examined according to the rule of reason in order to determine if a violation of *Section 1* of the Sherman Act has nevertheless occurred. *Fortner Enterprises (Fortner I), supra, 394 U.S. at 499-500, 89 S. Ct. 1252*.

It should also be noted that ***HN11***[] a *Section 1* violation does not require a conspiracy, to which the multitude of *Section 1* tying cases involving a single seller of tied and tying products amply attests. See generally, *Northern Pac. R. Co., supra*; *Times-Picayune, supra*; *International Salt Co. v. United States, 1962, 332 U.S. 392, 68 S. Ct. 12, 92 L. Ed. 20*. "Tying arrangements are condemned under (*Section 1*) as "contracts in restraint of trade.' " *Baker, supra, at 467*. In the instant case, the required element of concerted action is supplied by the existence of the vertical tie-in contract containing the tie-in clause, Viz., **[**18]** Article III, PP 1, 2 of the Toyota Dealer Sales and Service Agreement, as interpreted and enforced by *NET. Bogosian v. Gulf Oil Corporation, E.D.Pa.1975, 393 F. Supp. 1046, 1048, 1048 n. 3*, Rev'd on oth. grds., *3 Cir. 1977, 561 F.2d 434*, Cert. denied, 1978, *434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791*; See, *Osborn v. Sinclair Refining Company, 4 Cir. 1963, 324 F.2d 566, 573*; Cf., *United States v. Parke, Davis & Co., 1959, 362 U.S. 29, 44-47, 80 S. Ct. 503, 4 L. Ed. 2d 505*; *United States v. Schrader's Son, Inc., 1920, 252 U.S. 85, 99-100, 40 S. Ct. 251, 64 L. Ed. 471*; *Ford Motor Co., supra, at 879*; *Sum of Squares, Inc. v. Market Research Corp. of Am., S.D.N.Y.1975, 401 F. Supp. 53, 55-56*. In *Solomon v. Houston Corrugated Box Co., Inc., 5 Cir. 1976, 526 F.2d 389*, upon which defendants rely, the court expressly found that the contract between the two defendants was "not restrictive in any sense," *Id., at 394*. This answers defendants' argument that plaintiffs cannot assert a *Section 1* violation following the dismissal of TMS as a party.

B. Is there a tie?

Having carefully examined the parties' arguments on this important issue, the court concludes that Toyota automobiles and delivery **[**19]** services are two separate products **[*982]** for purposes of determining a *Section 1* violation. Because the parties devoted so much attention to this issue, we will present our analysis in some detail.

One initial point deserves special mention. Labeling a product aggregation does not involve a process of discovery; there are no a priori, determinate categories of single products that might serve as templates against which to measure the particular product configuration at issue. Any such judgment is basically normative, requiring an answer to an essentially prescriptive question: should the seller be forced to market the products separately?

Standards for analyzing a product aggregation have been developed by only a few courts. See, e.g., *Siegel v. Chicken Delight, 2 Cir. 1971, 448 F.2d 43, 47-49*; *Kugler v. AAMCO Automatic Transmissions, Inc., D.Minn.1971, 337 F. Supp. 872, 874-76*, *Aff'd 8 Cir. 1972, 460 F.2d 1214*; *Jerrold Electronics Corporation, supra at 559*. See generally, 2 Callman, Unfair Competition, Trademarks and Monopolies, § 38.2(b)(1)(b) (3d ed. 1969. Supp.1977). In

Siegel, the challenged arrangement involved the tying of certain supplies to the sale of franchise licenses. **[**20]** An important issue was whether a license could ever be a separate tying product. The court summarized the necessary inquiry in the following terms:

> In determining whether an aggregation of separate items should be regarded as one or more items for tie-in purposes in the normal case of sales of products, the courts must look to the function of the aggregation. Consideration is given to such questions as whether the amalgamation of products resulted in cost savings apart from those reductions in sales expenses and the like normally attendant upon any tie-in, and whether the items are normally sold or used as a unit with fixed proportions. *448 F.2d at 48*.

Jerrold Electronics Corporation sets forth more specific guidelines: (1) whether other members of the industry sell the products separately, (2) whether versions of the alleged single product differ in significant respects, (3) whether the customer is charged separately for the products, and (4) whether any components of the alleged single product are sold separately. *Id. at 559*. Kugler used two approaches to determining whether advertising, the tied product, and an AAMCO franchise license, the tying item, were one product **[**21]** for antitrust purposes. The court first applied the four Jerrold Electronics standards, and then it looked to the industry as a whole to determine if the products had been or could be sold separately. *337 F. Supp. at 875*.

HN12[] These three cases support a four-pronged analysis: (1) examination of the product structure itself, (2) investigation of the defendant's product marketing practices, (3) consideration of the behavior of other industrial sellers and (4) analysis of the efficiencies gained by and the business justifications for the product combination. We will discuss each factor in turn.

An examination of the product structure in the instant case reveals several important points. The automobile product and the delivery service do not naturally merge into a third identifiable unit. Moreover, the finished Toyota automobile delivered at the Post of Boston is able to perform all the functions for which it was designed. Delivering it to the dealer's location adds nothing to the automobile Qua automobile. In short, there is no relationship between the car and its delivery inherent in the nature of the automobile itself and thus no conceptual barrier to treating the two as separate products. **[**22]** See, *Fortner Enterprises v. U. S. Steel (Fortner I), 1969, 394 U.S. 495, 508-09, 89 S. Ct. 1252, 22 L. Ed. 2d 495*.

NET, however, sold its transportation services in a fixed one-to-one proportion to the sale of its cars. The dealer was not required to purchase carrying services from NET above and beyond those needed to move the cars that he bought. Although in many cases this factor might offer some support for a single product conclusion, See, D. Turner, The Validity of Tying Arrangements Under the ***Antitrust Law***, 72 Harv.L.Rev. 56, 68-72 (1958), the facts of this case greatly weaken its persuasive force. The **[*983]** only need dealers might have had for NET carrying services in addition to car delivery from Boston was the occasional transportation of vehicles sold or exchanged between dealers from one dealer's location to the other's premises. The initial delivery of automobiles thus represents the overwhelming segment of dealer demand for car delivery services.

NET's product marketing approach is also relevant. Although the dealer pays one price for the car, the carrying charge is an item separable from the cost of the vehicle. The dealer can quote the ultimate consumer a base **[**23]** price for the car that does not include carrying and handling charges. The fact that these costs are kept distinct suggests that both the dealer and NET treated the car and its delivery as separate items. See, *Jerrold Electronics Corporation, supra.* On the other hand, there is no evidence that NET sold its transportation services to other than its franchised dealers and for purposes other than the transportation of its automobiles.

Much of the controversy surrounding this issue focussed on the third factor, the significance of intra-industry comparisons. Defendants submitted evidence suggesting that throughout the domestic automobile industry distributors control the transportation of vehicles to their dealers. The general acceptance of this aggregated product configuration, defendants insist, is strong support for the existence of a single product. We disagree. A favorable intra-industry comparison, although relevant, is by no means conclusive on the single product issue. See, *Jerrold Electronics Corporation, supra, at 559*. All firms in an oligopolistic market, for example, might use the same economically inefficient, but financially lucrative, tie-in. If the uniformity of the practice **[**24]** were determinative, a clearly suspect tying arrangement would often be insulated from Per se scrutiny.

The comparison that defendants offer suffers from a serious weakness. Their evidence shows that although automobile manufacturers do control delivery of their vehicles, all except for Subaru employ independent common carriers to transport the cars. [5] NET uses its own trucks. This is a crucial distinction. Defendants are wrong in arguing that the only important question is who ought to have the right to control transportation services. Of equal importance is how that control is exercised. ***HN13***[] The single product determination frequently hinges as much on the way the two products are coupled and on the character of each product as on the fact that their sales are connected at all. See, e.g., *Kentucky Fried Chicken, supra* ; *Crawford Transport Company v. Chrysler Corporation, 6 Cir. 1964, 338 F.2d 934*, Cert. denied, 1965, *380 U.S. 954, 85 S. Ct. 1088, 13 L. Ed. 2d 971*; *Miller Motors, Inc. v. Ford Motor Company, 4 Cir. 1958, 252 F.2d 441, 446*; Forrest v. Capital Building & Loan Assn., E.D.La.1974, 385 F. Supp. 831, Aff'd per curiam, 5 Cir. 1974, *504 F.2d 891*, Cert. denied 1975, *421 U.S. 978,* ***[**25]*** *95 S. Ct. 1980, 44 L. Ed. 2d 470*. The ultimate concern of antitrust theory is with the anti-competitive effect generated by particular economic practices. Because different ways of tying two products can produce different market effects, they can also have different antitrust consequences.

In this case, NET's practice of using its own trucks has a potentially more serious economic impact than does an approach which employs independent common carriers and, therefore, NET gains no support from the marketing practices of other automobile distributors. First, the use of independent common carriers encourages the development of a market in the tied product. NET's practice, on the other hand, removes a substantial segment of the demand for delivery services from the competition of that market. Secondly, automobile manufacturers who use independent carriers can allow dealers to suggest potential carriers for the distributor's **[**26]** approval, perhaps according to a set of pre-established **[*984]** criteria. This kind of arrangement, although superficially similar to NET's practice, permits more dealer freedom than does NET's scheme, and dealer freedom of choice is an important value protected by tie-in law.

With respect to the fourth factor implicated in single product analysis the business justifications for one product treatment defendants suggest two reasons for distributor control over delivery. First, they insist that distributor selection of carriers is necessary to ensure timely delivery of a first class product for resale to the consumer. The reputation of Toyota and thus the livelihood of the manufacturer and distributor is made or broken at the dealer level, and therefore the distributor has a strong interest in supervising the dealer's management of his business in order to ensure product quality. Second, defendants suggest that NET's delivery system enhances efficient marketing of Toyota cars by promoting competition among dealers located at varying distances from Boston. Without a centralized delivery scheme, they argue, dealers closest to Boston would have a decided competitive advantage, since **[**27]** their transportation costs would be less than those of outlying dealers.

Business justifications for aggregated product treatment, however, have been interpreted very narrowly. Cf., *Standard Oil Co. v. United States, 1949, 337 U.S. 293, 306, 69 S. Ct. 1051, 93 L. Ed. 1371*. Consider, for example, defendants' first justification: the preservation of customer goodwill and product reputation. Although some courts use quite general terms when discussing this issue, the cases involve factual situations in which the tying arrangement at stake was the only way that the seller could ensure the maintenance of goodwill. See, e.g., *Baker, supra* (mattress company's leasing of signs to motels, advertising company's mattresses available in motel, necessitated requirement that motel stock only company's mattresses); *Dehydrating Process Co., supra, at 657* (tie of silo to sale of unloader justified by customer complaints of improperly functioning unloader when bought separately and absence of any other supplier manufacturing silos to defendant's specifications). And recently some courts have made these limitations explicit [6] *Kentucky Fried Chicken, supra, at 376*; *Northern, supra, 356 U.S. 1, 78 S.* ***[**28]*** *Ct. at 519*.

---

[5] Prior to 1972, NET itself had subcontracted the delivery function to independent common carriers.

[6] This trend appears to be most marked in those opinions which analyze justifications as affirmative defenses; however, their teachings apply with equal force to the single product issue.

Kentucky Fried Chicken, a case upholding an approved source system by which the franchisor exercised some control over supply sources used by its franchisees, adopted a least restrictive alternative-type analysis to confine the goodwill defense:***HN14***[]

> (T)he franchisor is free to demonstrate that the tie constitutes a necessary device for controlling the quality of the end product sold to the consuming public. . . . As part of this defense, however, the franchisor must establish that the tie constitutes the method of maintaining quality that imposes the least burden on commerce. If there are less burdensome alternatives, a franchisor is obligated to employ them rather than the tie. *549 F.2d at 376*.

The facts of the instant case do not support such a compelling business justification. Defendants have suggested **[**29]** no reason why NET could not merely issue a list of common carrier requirements to dealers and permit dealers to select carriers that conform to those requirements. In *Northern v. McGraw-Edison Co., 8 Cir. 1976, 542 F.2d 1336*, Cert. denied 1977, *429 U.S. 1097, 97 S. Ct. 1115, 51 L. Ed. 2d 544*, the court struck down an arrangement whereby the purchase of dry cleaning equipment from the seller was tied to the sale of the dry cleaning franchise. The Northern court recognized a goodwill-product quality defense but limited it to those situations in which substitutes for the tied product had to comply with such precise and detailed specifications that other manufacturers might not be able to market a product functionally compatible with the tying product. *Id. at* ***[*985]*** *1347*. Defendants' product quality argument failed to meet this exacting standard. It is unlikely that NET will fare any better with its tying arrangement.

Even if central control over delivery proved to be necessary, there are less restrictive alternatives available to NET. Cf., *Kentucky Fried Chicken, supra at 376*. *Crawford Transport Company, supra*, illustrates one such alternative. Like Chrysler in the Crawford case, **[**30]** NET could assume control over the selection of independent common carriers according to a set of established standards. Furthermore, both dealers and independent carriers could suggest candidates, and NET might then select among them, perhaps limiting the total number. We do not suggest that such an arrangement would not violate *Section 1* under any circumstances, but it does seem likely that it would not be Per se illegal.

The second NET interest, promoting inter-dealer competition, will also not justify the restrictive tying arrangement in the instant case, even assuming substantial inter-dealer competition. All centrally controlled delivery systems further this interest to the same extent, and as discussed above, there are less burdensome alternatives to the system NET has selected.

Thus, each of the four prongs of single product analysis outlined above points in the direction of treating new cars and delivery services as two separate products. See, *BBD Transportation Co., Inc. v. U.S. Steel Corp., N.D.Calif.1976, 1976-2 Trade Cases (CCH) P 61079 at 69874*. See generally, M. E. Ross, 23 Emory L. J., Supra, at 1014; Note, Product Separability: A Workable Standard to Identify Tie-In **[**31]** Arrangements Under the Antitrust Laws, 46 S.Calif.L.Rev. 160 (1972). Cost savings seem unlikely to result from jointly selling an automobile and a service which is entirely independent of the manufacture of the car to which it is tied. See, D. Turner, 72 Harv.L.Rev., Supra, at 71-72. Indeed, dealer objections to the arrangement in the instant case suggest that it might not be an economically efficient approach.

Defendants place considerable reliance on *Crawford Transport Co. v. Chrysler Corporation, E.D.Ky.1962, 235 F. Supp. 751*, *Aff'd 6 Cir. 1964, 338 F.2d 934*, Cert. denied 1965, *380 U.S. 954, 85 S. Ct. 1088, 13 L. Ed. 2d 971*, quoting extensively from the opinion of the District Court. Holding that Chrysler's selection of independent common carriers to transport cars sold to its dealers did not offend *Section 1* of the Sherman Act, the District Court reasoned that Chrysler's strong interest in seeing to it that cars are delivered in a form attractive to consumers necessitate treating transportation as "part of the sale of an automobile", *235 F. Supp. at 753, 755*. The District Court did not devote an in-depth analysis to this issue and in particular did not consider less restrictive **[**32]** alternatives to the approach employed by Chrysler. Moreover, as the opinion of the Court of Appeals made clear, the Crawford arrangement differed significantly from the arrangement in the instant case. In Crawford, independent common carriers were used to haul the cars; Chrysler did not profit in any way from the provision of transportation services and, therefore, did not use its economic position in the automobile market as leverage to invade the car delivery market. NET, on the other hand, used its own trucks and, as plaintiffs claim, profited from providing delivery services. Although the Court of Appeals stressed the economic necessity for central control of automobile delivery, *338 F.2d at 939*, it did not draw the same conclusion from this observation as the District Court had done, Viz., that it supported a single product inference. Instead, the Court of Appeals based its conclusion on the absence of any economic gain to Chrysler. Cf., *Ohio-Sealy Mattress Mfg. Co. v. Seely, Inc., 7 Cir. 1978, 585 F.2d 821, 835*, Cert. denied, *440 U.S. 930, 99 S. Ct. 1267, 59 L. Ed. 2d 486*.

In response to our question at the hearing, both sides submitted briefs on the issue of who had title to **[**33]** the automobiles before acceptance by the dealers. Defendants argue that NET retained title, while plaintiffs contend that title passed to the dealers at some point prior to completion of delivery. We doubt whether title has any relevance **[*986]** to the existence of an illegal tie. We have been unable to locate any case which turns on this factor, and neither party offers any argument on the merits based on title. In our opinion, enforcement of the antitrust laws should not depend on the technical requirements and ambiguities of "title".

If NET were responsible for damage to the automobiles in transit (whether or not it had formal "title"), it might be reasonable to allow NET considerable latitude in arranging for safe delivery. However, in this case plaintiffs have shown to our satisfaction a reasonable likelihood that dealers were responsible for transit damage to cars during a good portion of the time period spanned by plaintiffs' claims. Defendants' argument to the contrary based on the September 8, 1978 affidavit of Mr. Benson DeWitt, in which he claims that NET reimbursed dealers $ 18,762.91 for repairs dealers made as a result of car damage at Boston or in transit during **[**34]** the period 1975 through 1977, overlooks the fact that NET was then both seller and common carrier and as common carrier, not as seller, was responsible for the loss.

Even if NET, as seller, were responsible for damage, it does not follow that NET was justified in tying delivery to cars. As we discussed Ante, there are several less restrictive alternatives that adequately protect product quality in this case.

From the foregoing analysis it appears that NET's arrangement conforms to the classic model of a tie-in. There is a tying product, Toyota automobiles, and a tied product, automobile delivery, and there are markets in both the tied product and the tying product. NET, seller of the tying product, also sold the tied product, Cf., *Kentucky Fried Chicken, supra, at 377*; *Crawford Transport Company, supra*; *Miller Motors, Inc., supra, at 446*, and dealers had to purchase the tied product from NET. Finally, NET's arrangement was authorized by neither state nor federal law. Cf., *Forrest v. Capital Buildings & Loan Assn., supra, at 837*.

This is not a case of a company unilaterally extending itself into a new market by horizontal or vertical integration, which without more does not generally **[**35]** offend *Section 1*. When a firm integrates horizontally or vertically, it enters the new market as a competitor, and the increase in competition is plainly desirable. In the instant case, however, NET did not enter the common carrier market as a competitor. To the contrary, it exploited its franchisees' dependence to secure its own economic position by creating a steady demand for its services. Although Toyota automobiles were an integral feature of the franchise arrangement, delivery services were not. Thus, NET's arrangement suffers from the evils common to all illegal ties.

C. Seller's Economic Power

After *Northern Pac. Ry. Co. v. United States, 1958, 356 U.S. 1, 78 S. Ct. 514, 2 L. Ed. 2d 545*, ***HN15***[] plaintiffs in a tying case need not prove a tying product monopoly but only that defendants enjoyed sufficient economic power in the tying product market appreciably to restrain free competition in the tied product market. *Id., at 11, 78 S. Ct. 514*; Accord, *Fortner Enterprises v. U.S. Steel (Fortner I), 1969, 394 U.S. 495, 502-03, 89 S. Ct. 1252, 22 L. Ed. 2d 495*. An appreciable restraint is shown if the seller exercises some control over some of the buyers in the market and enjoys an advantage **[**36]** over competing tying product suppliers. *U.S. Steel Corp. v. Fortner Enterprises (Fortner II), 1977, 429 U.S. 610, 621-22, 97 S. Ct. 861, 51 L. Ed. 2d 80*; *Fortner Enterprises (Fortner I), supra, 394 U.S. at 503, 89 S. Ct. 1252*.

The tying product market in this case is the market for new automobiles foreign and domestic and the relevant buyers are dealers in those automobiles. By virtue of its franchise agreements, NET controlled a group of those dealers, namely those who sold Toyota automobiles in the five state New England area. It thus appears likely that plaintiffs will be able to satisfy the Fortner Standards.

[*987] D. "Not Insubstantial" Amount of Interstate Commerce

In view of the very liberal interpretation given this element of the tying test by the Supreme Court, it is quite probable that plaintiffs will be able to demonstrate that "a total amount of business, substantial enough in terms of dollar-volume so as not to be merely De minimus is foreclosed to competitors by the tie . . . ." *Fortner Enterprises (Fortner I), supra, at 501, 89 S. Ct. at 1258*. Other common carriers engaged in the new vehicle delivery business in New England were foreclosed from access to that **[**37]** portion of the tied product market represented by the sale of Toyota vehicles to regional Toyota dealers.

E. Causation

It appears likely from the affidavit evidence submitted by both parties that plaintiffs have suffered injury in the form of overcharges for new car delivery. Since NET changed its transportation policy in 1972, the freight and handling charge has been a hotly disputed issue between the dealers, acting first through the Toyota Dealer Council and then through the Toyota Dealer Alliance, and NET. Furthermore, following the termination of NET's distributorship franchise and TMS' assumption of New England distribution, TMS, making use of independent common carriers, reduced the delivery cost from the $ 139.95 per car charged by NET to $ 77.50 per car. The marked difference between these two figures, plaintiff maintains, can only be explained as an overcharge by NET.

Defendants argue that TMS is able to charge less for delivery because, by eliminating NET's distributorship, TMS earns more profit on each automobile. Even assuming TMS now makes more from the sale of an automobile, it is not apparent to this court, and defendants have not explained, why TMS should choose **[**38]** to absorb some of its legitimate delivery costs instead of charging the entire $ 139.95 to its dealers. It seems probable both from the long history of negotiations between NET and its dealers and the unexplained reduction in delivery charges following the entry of TMS as the New England distributor that NET had overcharged dealers for its delivery services. [7.]

Defendants argue further that **[**39]** even if plaintiffs could prove their claims of injury resulting from NET's delivery overcharges, they are still unable to demonstrate that the challenged tying arrangement was a material cause of that injury, since dealers voluntarily accepted NET's exclusive control over vehicle delivery. ***HN16***[] In a private antitrust action, the plaintiff, in addition to proving a violation and an injury, must also show that the violation was the direct and material cause of the injury he suffered. See, *Ford Motor Co. v. Webster's Auto Sales, Inc., 1966, 361 F.2d 874, 883*. Plaintiff's burden on the causation issue is not a heavy one; he need only establish the causal connection "with reasonable probability" and to "a fair degree of certainty." Id.

As we understand defendants, they argue that in order to establish causation, buyers in a private antitrust action must prove that they were coerced by the seller to purchase the tied product. It is unclear at precisely which point proof of coercion is relevant. Often it has been treated as a factor in determining the existence of a tie. In other cases it has entered into the liability analysis as an element relevant to a seller's possession of market power. **[**40]** And on occasion coercion has been viewed as a requirement of plaintiff's standing under Section 4 of the Clayton Act, that is, to establish that plaintiff was harmed by the **[*988]** tie-in. Our analysis bears on the relevance of coercion to all facets of this case.

[7.] In oral argument, defendants contended that the dealers suffered no injury at all because they passed on any overcharges to consumers. In general defendants who are direct purchasers cannot make use of a pass-on theory to defend against a private antitrust damages action. *Illinois Brick v. Illinois, 1977, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707*; *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 1968, 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231*. Nor is it likely that this case falls within any exception to the Hanover Shoe doctrine, if any exists. See, *Illinois Brick, supra, 431 U.S. at 743-45, 97 S. Ct. 2061*.

We are impressed with the array of considerations arguing against a coercion requirement in a case like the instant one involving an express tie. As the court in *Bogosian v. Gulf Oil Corp., 3 Cir. 1977, 561 F.2d 434*, Cert. denied, 1978, *434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791*, explained:

> It has never been an element of plaintiff's case to disprove, nor even a permitted defense, that the tied product is superior to others available on the market, or that even without the tie requirement plaintiff would have purchased the tied product. The short answer to defendants is, and always has been, that without a tie requirement, "i?f the manufacturer's brand of the tied product is in fact superior to that of competitors, the buyer will presumably choose it anyway." *Standard Oil v. United States, 337 U.S. 293, 306, 69 S. Ct. 1051, 1058, 93 L. Ed. 1371 (1949)*.

561 F.2d at 449

Distinguishing an earlier **[**41]** case, *Ungar v. Dunkin' Donuts of America, Inc., 3 Cir. 1976, 531 F.2d 1211*, Cert. denied, 1976, *429 U.S. 823, 97 S. Ct. 74, 50 L. Ed. 2d 84*, on which numerous courts have relied to support the coercion requirement in varied fact situations, the Bogosian court held, at 450, that a plaintiff need only show that the seller expressly conditioned the sale of the tying product on the purchase of the tied product. Whereas in Ungar coercion was relevant to proving the existence of the tie because the conditional nature of the sale was not apparent from the express agreement or from the operation of its terms, the challenged gas station leases in Bogosian expressly required the lessee to purchase specified amounts of defendant's gasoline. The instant case is on all fours with Bogosian : the conditioning of the sale of cars on the purchase of delivery services from NET is manifest in the provisions of the dealer franchise agreement, a standard contract that TMS required NET to sign with all its dealers.

Bogosian emphasized that ***HN17***[] coercion has no relevance to a determination of antitrust liability; it is relevant, if at all, only to determining whether a tie-in exists, that is, whether the seller **[**42]** has conditioned the sale of one product on the purchase of another. Once a tie is established, liability follows if the other two elements of the Per se rule power in the tying product market and foreclosure of a not insubstantial amount of interstate commerce in the tied product are satisfied. Neither of these two elements incorporates a coercion requirement. See, *Fortner Enterprises v. U.S. Steel (Fortner I), 1969, 394 U.S. 495, 499-500, 89 S. Ct. 1252, 22 L. Ed. 2d 495*; *United States v. Loew's Inc., 1962, 371 U.S. 38, 83 S. Ct. 97, 9 L. Ed. 2d 11*; *Northern Pac. R. Co. v. United States, 1958, 356 U.S. 1, 78 S. Ct. 514, 2 L. Ed. 2d 545*. In *United States v. Loew's, supra*, for example, the Court noted that "the requisite economic power may be found on the basis of either uniqueness or consumer appeal, . . ." *371 U.S. at 45 n. 4, 83 S. Ct. at 102*. Such an inference does not permit an inquiry into individual coercion.

The Supreme Court's Per se test is designed to eliminate detailed evidentiary inquiries of the type that would be required to prove individual buyer coercion. The advisability of this mechanical rule-oriented approach rests on the Supreme Court's judgment right or wrong **[**43]** that tying arrangements offer the consumer little benefit and much potential harm. It is the nature of the test that it focuses not on the buyer's state of mind but rather on the seller's actions; tying doctrine seeks to deter a seller's conduct in unnecessarily conditioning the sale of one product on the purchase of another. *Bogosian, supra, at 450*. See generally, A. D. Austin, The Individual Coercion Doctrine in Tie-In Analysis: Confusing and Irrelevant, 65 Calif.L.Rev. 1143 (1977).

HN18[] Coercion may have some relevance for proving the tie in some situations, but in a case like the instant one in which the tie is manifest in the express terms of a standard form contract, independent proof of individual coercion is entirely unnecessary. This appears to be the approach of a majority **[*989]** of courts. See, e.g., *Bogosian, supra*; *Moore v. Jas. H. Matthews & Co., 9 Cir. 1977, 550 F.2d 1207, 1216-17*; *Hill v. A-T-O, Inc., 2 Cir. 1976, 535 F.2d 1349, 1355*; *Schuler v. Better Equip. Launder Center, Inc., D.Mass.1977, 74 F.R.D. 85, 87*; *AAMCO Automatic Transmissions, Inc. v. Tayloe, E.D.Pa.1976, 407 F. Supp. 430, 434-35*; *Thompson v. T. F. I. Companies,* *Inc., N.D.Ill.1974, 64 F.R.D. 140, 146*; **[**44]** *Abercrombie v. Lum's, Inc., S.D.Fla.1972, 345 F. Supp. 387, 390*. But see, *Hehir v. Shell Oil Co., D.Mass.1976, 72 F.R.D. 18, 21-22*. [8.]

[45]** II. Additional Requirements

Plaintiffs have succeeded in demonstrating a probability of success on the merits. In order to prevail on their motions, however, plaintiffs must also show that they will probably prove damages in excess of the amount of the property they seek to encumber. Moreover, in order to obtain a preliminary injunction, plaintiffs must offer a bond in an amount sufficient to protect the defendants from their losses should this court's ruling be reversed on appeal.

A. Damages in Excess of Attachment

Plaintiffs calculate their probable damages according to a formula that converts the difference between NET's delivery charge before the TMS take-over and TMS's delivery charge after the take-over into a percentage of the NET delivery charge. This percentage, plaintiffs contend, represents the rate of NET overcharge for each automobile. They then apply the percentage to each of the NET delivery prices over various periods of NET distributorship and arrive at a grand total by multiplying the resulting figures by total cars sold during the corresponding periods and summing over time. After trebling, this total, according to plaintiffs' calculations, is more than twelve **[**46]** million dollars, an amount greatly exceeding the amount of their attachment, two million dollars of real property and five million dollars of assets. [9.]

Plaintiffs' damage formula, in our opinion at this stage of the proceedings, is a reasonable one, especially in light of the liberal standards controlling proof of damages in private antitrust actions. See, *Haverhill Gazette Company v. Union Leader Corporation, 1 Cir. 1964, 333 F.2d 798, 804-807*. Defendants' principal argument in opposition to the use of this method is that it fails to take into account the larger profit TMS enjoys from the sale of each car. As we noted at an earlier point in this **[**47]** opinion, we are unable to comprehend why TMS would absorb part of its delivery cost when it could charge the dealers the full amount.

We are satisfied that plaintiffs have established a reasonable likelihood that they will recover damages in excess of the amount of their attachment. We therefore **[*990]** approve the attachment in the amount of seven million dollars. However, we are unable at this time to determine the value of the property encumbered by plaintiffs' motion for a preliminary injunction. In a contemporaneous procedural order we are calling for a stipulation of the parties or affidavits bearing on this remaining question.

B. Posting of Security

Plaintiffs must post a bond sufficient to hold the defendants harmless if it turns out that the preliminary injunction was erroneously granted; setting the precise amount of the bond lies within the discretion of the issuing court.

[8.] Even if proof of individual coercion were an element of a tying violation, it appears from an examination of the affidavit evidence that there is a reasonable likelihood that plaintiffs would prevail on this issue. Only in 1972 did NET switch from hiring independent common carriers to using its own transportation facilities. Dealers who voluntarily accepted centralized delivery with the use of independent contractors could not also be deemed to have agreed to delivery by NET itself. The switch-over appears to have been a unilateral NET decision pursuant to the general terms of the standard dealer franchise agreement reserving the seller's right to control delivery. Dealers were not allowed to negotiate this new arrangement; they could either accept it or risk termination of their franchise. See, Toyota Dealer Sales and Service Agreement, Article XIII, P B(3) (most recent agreement) (Pltff's Ex. 1 to 5/10/76 Anderson Dep). Considering the large investment of each dealer in his ongoing business and the fact that no dealer could purchase Toyotas from another distributor, the latter alternative was hardly a realistic one. NET, therefore, exercised its power in the tying product market, its economically powerful position vis a vis its dealers, to coerce compliance with the new delivery system. Cf., *F. T. C. v. Texaco, 1968, 393 U.S. 223, 226-29, 89 S. Ct. 429, 21 L. Ed. 2d 394*.

[9.] We have considered the results of the informal survey conducted by Ronald A. Joseph, President of NET, in December 1976, just prior to commencement of this litigation. 1/6/77 Affidavit of R. A. Joseph. The survey purports to indicate that 22 of 75 dealers did not object to the NET delivery scheme. We attach little weight to this highly informal, self-serving study.

Fed.R.Civ.P., Rule 65(c); *N. E. Airlines v. Nationwide Charters & Conventions, Inc., 1 Cir. 1969, 413 F.2d 335, 338*; *Continental Oil Company v. Frontier Refining Company, 10 Cir. 1964, 338 F.2d 780, 782-83*. Unlike Continental Oil Company, on which plaintiffs rely in support of their contention that **[**48]** a bond is not required, there is no evidence in the instant case that plaintiffs have sufficient assets to respond in damages if either of the defendants is injured by reason of the wrongful issuance of this injunction.

Due to the absence of any estimates relating to the value of the stock and assets involved in this motion and damages which might result from the contemplated restraint on their alienation during the pendency of these proceedings, we are unable to determine a proper amount for the bond. Therefore, in the contemporaneous procedural order mentioned above, we are also calling, conditionally, for briefs on the issue of the amount of security which should be required and evidence of the total value of the stock and assets referred to in plaintiffs' motion under *Fed.R.Civ.P., Rule 64*.

HN1[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Inter-seller price verification is where specific firms are identified as selling specific services to specific customers at specific prices, all in advance of the sale. Such information exchanges are not per se violations of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*. The Supreme Court has recognized that they can serve to render the conduct of commercial affairs more intelligent through the free distribution of knowledge of all the essential factors entering into the commercial transaction and that it is not the purpose or the intent of the Sherman ***Antitrust Law***, *15 U.S.C.S. § 1, et seq.*, to inhibit the intelligent conduct of business operations. However, such information exchanges are not necessarily or per se legal either; their legality under the antitrust laws depends specifically on their effect upon competition. In particular, the exchange of price information among competitors carries with it the potential for the development of concerted price-fixing arrangements which lie at the core of the Sherman Act's prohibitions.

HN2[] **Entitlement as Matter of Law, Appropriateness**

In passing upon a motion for summary judgment, the court is required to view the facts in the light most favorable to the party opposing the motion and to give to that party the benefit of reasonable inferences to be drawn from underlying facts, and summary judgment is an extreme remedy, and one which is not to be granted unless the movant has established his right to a judgment with such clarity as to leave no room for controversy, and the other party is not entitled to recover under any discernible circumstances.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN3[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The antitrust outcome does not turn merely on the presence of sound business reason or motive. The inquiry is whether, assuming non-predatory motives and business purposes, the effect upon competition in the marketplace is substantially adverse. The promotion of self-interest alone does not invoke the rule of reason to immunize otherwise illegal conduct. It is only if the conduct is not unlawful in its impact in the marketplace or if the self-interest coincides with the statutory concern with the preservation and promotion of competition that protection is achieved.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] **Summary Judgment, Entitlement as Matter of Law**

Summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot.

Counsel: David Essling, Johnson, Essling, Williams, Essling & Daly, St. Paul, Minn., for appellants.

James R. Safley (on brief), Robins, Davis & Lyons, Minneapolis, Minn., argued; and Barry G. Reed, Minneapolis, Minn., on brief, for appellee.

Judges: Before GIBSON, Chief Judge, HENLEY, Circuit Judge, and HANSON, * Senior District Judge.

Opinion by: HANSON

Opinion

---

* The Honorable William C. Hanson, Senior United States District Judge for the Southern District of Iowa, sitting by designation.

[*1145] Appellants brought this private antitrust action under *28 U.S.C. § 1337* and *Sections 4*, 12 and 16 of the Clayton Act against the Greater Minneapolis Area Board of Realtors (the Board) and 19 of its member firms, alleging that the defendants had contracted, combined or conspired to fix and maintain brokerage fees charged in connection with the sale of real property, in violation of *Section 1* of the Sherman Act and certain Minnesota statutes. [1] The district court [2] granted the Board's motion for summary judgment and directed entry of final **[**2]** judgment in its favor pursuant to *Rules 56* and *54(b), F.R.Civ.P.* The only question presented on this appeal is whether the record presents a genuine issue of material fact concerning involvement of the Board in an alleged combination or conspiracy to fix and maintain brokerage fees. Because we conclude that it does, we reverse.

I.

Penne Realty and all defendants except the Board are real estate brokerage firms. John Penne is president of Penne Realty. (Penne Realty and Penne will be referred to herein collectively as "Penne.") The brokerage firms are in the business of bringing sellers and buyers of real estate together. The firms compete both for sellers, or "listings," and for sales. People with real estate for sale sign listing agreements with individual firms that bind the seller, among **[**3]** other things, to pay a commission to the listing firm when the property is sold. This commission is normally some percentage of the selling price, agreed upon between the seller and the firm with which the property is listed. Penne offers its customers rates of 4% Or 5%; the defendant firms offer their customers rates of 6% Or 7%. There is thus competition on the basis of price for sellers (listings) between Penne and the defendant firms.

The Board is a trade association that promulgates and enforces rules and regulations governing its members and provides them with various professional, educational and social services. Penne Realty and all the defendant firms are members of the Board. The directors and many of the officers of the Board are drawn from persons engaged in the real estate business; during the last six years many of these have been persons employed by firms that are defendants in this case. Members of the Board are required to submit disputes between themselves to the Board's Ethics and Arbitration Committee. This committee is also composed of persons who are members of the Board.

The most important professional service the Board offers its members is its Multiple **[**4]** Listing Service (MLS), in which about 400 firms participate, including Penne Realty and all of the defendant firms. The MLS is a cooperative selling service that works as follows. When a participating firm secures the right to sell a property (a listing), it normally must file the listing agreement with the MLS, along with a "listing circular" containing information about the listed property. The MLS distributes these listing circulars to other participating firms, all of which may then try to find a buyer for the listed property. Under Minnesota law only the MLS member with which the seller has listed the property is entitled to be paid the commission for its sale. If the listing firm itself finds the buyer, it keeps the entire commission. If another broker finds the buyer, the sale is called "cooperative," and the listing broker divides the commission **[*1146]** with the broker that has found the buyer. The Board's MLS is the only such service in the Minneapolis area, and there is evidence that participation in it is necessary for a brokerage firm to compete effectively with other firms. The workings of the MLS are at the heart of this lawsuit.

One main problem comes in **[**5]** deciding how to divide the commission on a cooperative sale. This problem is not so severe when all firms charge at the same rate for their services. This evidently was the case in Minneapolis prior to 1969 or 1970, when virtually all firms charged 6%, and the Board required that the commission be divided 50/50 between listing and selling firms. In 1972 the Board withdrew that requirement, and it appears that at present the most usual division between firms charging at the same rate has shifted to 55/45 in favor of the listing firm.

However, when firms charge different percentages of the selling price as their commission that is, when they compete for listings on the basis of price the following problem arises. Suppose that firm A charges 4% And firm B charges 7%, and that A and B divide commissions on cooperative sales on a straight 55/45 basis. Then if A sells a B listing for $ 100,000, A earns 45% Of the $ 7,000 B collects as its fee, or $ 3,150. But if B sells an A listing for $

---

[1] *Minn. Stats. Sections 325.81, subd. 1*, and its successor statutes, *Minn. Stats. Sections 325.8013* and *325.8015*.

[2] The Honorable Earl R. Larson, Senior United States District Judge, District of Minnesota.

100,000, B only earns 45% Of the $ 4,000 that A collects as its fee, or $ 1,800. Quite aside from the different incentives and disincentives this creates, B may think the arrangement unfair, since **[**6]** A, the cut-rate broker, appears to have the best of both worlds: because of its lower fee, A has an advantage in the competition for listings; and yet A benefits from B's higher fee whenever it sells one of B's listings. For these and perhaps other reasons, B might seek to alter its fee-splitting arrangement with A as follows: Instead of dividing its full 7% Commission with A when A sells one of its listings, B will divide only so much of the commission with A as A would have collected had A listed the property and charged its usual fee. Thus, if A now sells a B listing for $ 100,000, A only earns 45% Of $ 4,000, or $ 1,800 the same as B would earn if it sold A's listing for $ 100,000. This not only prevents A from benefiting from B's higher fee when A sells a B listing, but it actually benefits B. For whereas under the old arrangement B only kept $ 3,850, or 55% Of its $ 7,000 commission when A sold its listing, B Now keeps $ 4,200 or 74.3% Of the fee. What B loses in listings to A's price competition it may gain back from A's zeal to sell houses. And now, of course, it will be A who will feel it is being treated unfairly, since when A and B cooperate on a sale of one of B's **[**7]** listings, the division of the commission is almost 75/25 in favor of B, whereas when they cooperate on a sale of one of A's listings the division is only 55/45 in favor of A. Penne, who takes the part of the cut-rate broker A, refers to this latter method of dividing fees on cooperative sales as "punitive," thereby suggesting that the higher-priced firms that divide their fees with it on this basis are punishing it for its lower rates.

Until 1969 or 1970, the Board recommended that its members charge 6% On most listings. [3] When this recommended fee schedule was eliminated, some members began charging 7%. These firms did not wish to split their fees on a straight 50/50 or 55/45 basis with the firms charging less than they, as above. In January 1971 the Board adopted the following rule:

[8]**

> On a cooperative sale the listing firm shall divide half the gross brokerage fee received with the selling firm, after payment of the Multiple Listing fee. Listing firm shall, however, have the right to base the division of fees on the brokerage fee the selling firm regularly charges on sales of similar type properties.

[*1147] This rule gave the "punitive split" [4] of commissions the sanction of the Board.

At about the same time that commission rates began to vary and "punitive splits" received the sanction of the Board, the Board also began to print a roman numeral in a special place on the MLS listing circulars it distributed to each MLS participant on every listed property. This roman numeral indicated the commission rate at which the listing firm was charging the seller on that listing. Thus, the circulars on Penne's listings would ordinarily have a "IV" or "V" in one corner; **[**9]** other firms would have a "VI" or "VII". The reason given for the institution of this form of interseller price information exchange was that each firm was entitled to know what fee it would divide with the listing firm on a cooperative sale of the given listed property.

In 1972 the Board retracted all written rules concerning the division of commissions on cooperative sales. It is clearly established in the record that since that time the Board has frequently made public pronouncements dissociating itself from both the setting of commission rates and the division of commissions on cooperative sales, and informing its member firms that they are to individually determine their commissions and the division of commission they will offer on cooperative sales. Penne has offered no evidence that since 1972 the Board has made recommendations to any of its member firms regarding the division of commissions. However, the Board has continued to print roman numerals on the MLS listing circulars, indicating the commission rate at which the listing firm is charging the seller on the listed property. [5] Furthermore, the "punitive split" has continued even without the

---

3 This recommendation was enforced by the Board through a rule providing that a member firm could submit a listing at less than 6% Only if it "agreed" to pay the selling firm 50% Of a 6% commission. This variant of the "punitive split" discussed above was apparently also dropped in 1969 or 1970.

4 By using this term we mean to imply no opinion as to the legality or illegality of the practice referred to.

5 We note that listing firms are not required to have the commission rate information printed on the listing circulars. However, if the information is not supplied on a given circular, it can be obtained simply by calling the MLS and asking what the commission rate is on the listing in question. Apparently most firms, including Penne, have the information printed most of the time.

official sanction of the **[**10]** Board. In December 1973, soon after Penne applied for admission to the Board, one of Minneapolis' largest real estate brokerage firms, Edina Realty, caused a letter to be distributed to all member firms of the MLS, announcing that it would impose "punitive" divisions of commissions on cooperative sales on firms charging less than 7%. Edina stated that it would divide commissions on cooperative sales of its listings on the basis of the lowest fee offered to the general public by the selling firm. During the next few months many other firms publicly followed suit, and all of the defendant firms in this case have allegedly divided commissions with Penne on such a "punitive" basis.

[11]** II.

The crux of Penne's charges against all the defendants is that they have combined or conspired to fix and maintain brokerage fees by the use of essentially three devices: imposing "punitive" divisions of commissions on cooperative sales upon brokers who charge lower rates; "blacklisting" brokers who charge lower rates by refusing to cooperate in the sale of their listings; and making deprecatory statements about brokers who charge lower rates to their customers and potential customers. Penne alleges that all of these devices have been used against it in particular. The Board is said to be the "vehicle" of the alleged conspiracy. Its involvement is predicated mainly on its dissemination of its member firms' price information, usually by publication of the information on the MLS listing circulars, but sometimes through other means (See n.5 Supra).

That the Board's dissemination of this information is a form of ***HN1***[] interseller price verification there can be no doubt: specific firms are identified as selling specific **[*1148]** services to specific customers at specific prices, all in advance of the sale. Such information exchanges are not Per se violations of *Section 1* of the **[**12]** *Sherman Act, United States v. Citizens and Southern National Bank, 422 U.S. 86, 113, 95 S. Ct. 2099, 45 L. Ed. 2d 41 (1975)*; *United States v. Container Corp., 393 U.S. 333, 339, 89 S. Ct. 510, 21 L. Ed. 2d 526 (1969)* (concurring opinion); the Supreme Court has recognized that they can serve to render the conduct of commercial affairs "more intelligent through the free distribution of knowledge of all the essential factors entering into the commercial transaction(,)" and that "(it) was not the purpose or the intent of the Sherman Anti-Trust Law to inhibit the intelligent conduct of business operations(.)" *Maple Flooring Mfg. Assn. v. United States, 268 U.S. 563, 583, 45 S. Ct. 578, 585, 69 L. Ed. 1093 (1925)*.

However, such information exchanges are not necessarily or Per se legal either; their legality under the antitrust laws depends specifically on their effect upon competition. See *United States v. Container Corp., Supra, 393 U.S. at 337, 89 S. Ct. 510*; *Maple Flooring Mfg. Assn. v. United States, Supra, 268 U.S. at 585, 45 S. Ct. 578*. In particular, as the Supreme Court recently reiterated, the exchange of price information among competitors carries with it the potential "for the **[**13]** development of concerted price-fixing arrangements which lie at the core of the Sherman Act's prohibitions." *United States v. United States Gypsum Co., 438 U.S. 422, 457, 98 S. Ct. 2864, 2884, 57 L. Ed. 2d 854 (1978)*. It is the development of precisely such a price-fixing arrangement that Penne alleges in this case.

We think that on the question of the role in this alleged conspiracy of the price information exchange fostered by the Board, "it is (not) quite clear what the truth is, . . . (or that) no genuine issue remains for trial," *Sartor v. Arkansas Natural Gas. Corp., 321 U.S. 620, 627, 64 S. Ct. 724, 728, 88 L. Ed. 967 (1944)*, Quoted in *Poller v. Columbia Broadcasting System, 368 U.S. 464, 467, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*, and hence that summary judgment was improper in this case. We are guided by the rule that

> (***HN2***[] i)n passing upon a motion for summary judgment the court is required to view the facts in the light most favorable to the party opposing the motion and to give to that party the benefit of reasonable inferences to be drawn from underlying facts(,)

and that

> summary judgment is an extreme remedy, and one which is not to be granted unless the **[**14]** movant has established his right to a judgment with such clarity as to leave no room for controversy and that the other party is not entitled to recover under any discernible circumstances.

See *Unlaub Co., Inc. v. Sexton, 568 F.2d 72, 76 (8th Cir. 1977)*; *Robert Johnson Grain Co. v. Chemical Interchange Co., 541 F.2d 207, 209-10 (8th Cir. 1976)*. The Board simply has not demonstrated that Penne is not entitled to recover against it under any discernible circumstances. On the contrary, upon the record as it now stands, it remains an open question whether the price information exchange "has had an anti-competitive effect in the industry, chilling the vigor of (Penne's) price competition." *United States v. Container Corp., Supra 393 U.S. at 337, 89 S. Ct. at 512*. The record presents at least the following factual issues relating to this question:

1. "Punitive Splits." There is evidence that some of Penne's competitors have adopted the practice of dividing commissions with Penne and other cut-rate firms on a "punitive" basis. Penne alleges not only that this practice is employed pursuant to a conspiracy to fix brokerage fees, but also that the Board's dissemination of commission **[**15]** rate information on its MLS listing circulars and otherwise facilitates the practice. Admittedly the summary judgment record contains little evidence that shows How the price information exchange facilitates the practice of the "punitive split;" [6] **[*1149]** however, we believe there is sufficient evidence to raise genuine issues about the connection between the two. Among other things there is the historical fact that the dissemination of the price information began at about the same time that the "punitive split" was officially sanctioned by the Board; and Penne's analysis of the alleged legitimate business purpose of the dissemination of the information, which suggests that at best only the "high-priced" firms benefit by it. Penne should be allowed to make its argument to a fact finder after a full exploration of the connections between the Board and the alleged conspiracy to fix brokerage fees. We believe that if Penne can prove a conspiracy to fix prices through the use of the "punitive split," a fact finder might find that the price information exchange fostered by the Board is implicated in the conspiracy. At the very least, nothing in the record forecloses such a finding. **[**16]**

2. "Blacklisting." There is evidence that some of Penne's competitors have refused to cooperate with Penne on the sale of its listings, or at least on the sale of those of its listings on which it was charging only a 4% Or 5% Commission. Such refusals to deal, if proven and proven to have been undertaken pursuant to a conspiracy to stifle Penne's price competition, could well constitute violations of *Section 1* of the Sherman Act. See *Worthen Bank and Trust Co. v. National Bank Americard Inc., 485 F.2d 119 (8th Cir. 1973)*. The record presents a genuine issue of fact relating to the role played by the Board's dissemination of Penne's commission rates on specific listed properties in the alleged conspiracy to "blacklist" Penne's low-commission listings.

3. "Deprecatory statements" to Penne customers. There is evidence that some of Penne's competitors have approached persons **[**17]** who have listed their properties with Penne at 4% Or 5%, and have told them that Penne listings would not sell; that other brokers would not show the properties because of the low commission rate; and that the persons should cancel their agreements with Penne and list with a different firm. Such activity might be found to have both the purpose and effect of "chilling the vigor of Penne's price competition" in violation of Section I of the Sherman Act. The record presents genuine issues of fact relating to the role played by the Board's dissemination of Penne's commission rates on specific listed properties, both in enabling Penne's competitors to identify customers whom Penne is charging only 4% Or 5%, and in aiding Penne's competitors in making their alleged deprecatory statements. [7]

[18]** III.

The Board makes three arguments for its claim that its dissemination of commission rate information on its MLS listing circulars and otherwise raises no genuine issues of material fact about its involvement in the alleged conspiracy of the other defendants. One is that there is a legitimate business reason for the practice, since "(knowlege) of the brokerage fee which the owner has agreed to pay the listing broker is . . . a matter of legitimate

---

[6] This would involve a fuller exploration of how the defendant firms implement the practice than is presented in the record before us.

[7] There is evidence that some of Penne's competitors have shown Penne customers the listing circulars on their properties, pointed to the roman numeral indicating the commission rate, explained what it meant, and then gone from there to explain why other brokers would allegedly not show or sell Penne listings.

concern to such (potentially cooperative) selling broker." However, even aside from Penne's analysis suggesting that only the "high-priced" firms benefit from the dissemination of the price information by the Board, the law is settled that

> *HN3*[] (t)he antitrust outcome does not turn merely on the presence of sound business reason or motive. . . . Our inquiry is whether, assuming nonpredatory motives and business purposes . . ., the effect upon competition in the marketplace is substantially adverse. The promotion of self-interest alone does not invoke the rule of reason to immunize otherwise illegal conduct. It is only if the conduct is not unlawful in its impact in the marketplace or if the self-interest coincides with the statutory **[**19]** concern with **[*1150]** the preservation and promotion of competition that protection is achieved. *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*.

United States v. Arnold, Schwinn & Co., 388 U.S. 365, 375, 87 S. Ct. 1856, 1863, 1864, 18 L. Ed. 2d 1249 (1967). [8]

The Board also argues that "dissemination of Penne commission charges on MLS listings cannot possibly result in damage or injury to (Penne) as their commission charges are heavily advertised and intended by (them) to **[**20]** be of common knowledge in the real estate industry." It is clear from the record that Penne does advertise its fees widely, even in Board publications specifically intended for consumption by those involved in the real estate business. However, as we have indicated, we believe that there are genuine issues specifically about the illegitimate use by Penne's competitors of the commission rate information disseminated by the Board. There are therefore genuine issues of fact relating to damage or injury to Penne as a result of the Board's dissemination of the information, even taking Penne's own advertisement of its rate structure into consideration.

Finally, the Board points out that under the terms of an injunction entered as part of the settlement of a previous antitrust suit in which it was involved, it was expressly permitted to disseminate commission rate information. See Edward C. Forbes, et al. v. Greater Minneapolis Area Board of Realtors, et al., No. 4-72 Civil 569 (D.Minn. August 29, 1975) (unpublished). The pertinent language of the injunction is as follows:

> VIII. Nothing in this Injunction shall be deemed to prohibit circulation by the Board's multiple listing services **[**21]** of information, in connection with bona fide efforts to sell real property, concerning the commission which a broker has agreed upon with his clients, or the percentage division thereof which a listing broker has agreed to pay a selling broker, arrived at in accordance with this Injunction.

The Board also notes that the circulation of commission rate information has been permitted by other courts in cases involving real estate boards and multiple listing services. [9]

The short answer to this argument is that nothing in the Forbes injunction or the other cases cited by the Board can be construed to countenance **[**22]** the sort of dissemination of price information as is here involved if such dissemination is shown to have anti-competitive effects forbidden under the Sherman Act. We hold only that the record in this case presents fact questions on this latter issue that cannot be resolved on a motion for summary judgment.

IV.

---

[8] Insofar as Schwinn held that certain vertical territorial restraints were illegal Per se, it was of course overruled by *Continental T.V., Inc. v. G.T.E. Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. However, the principles quoted above from Schwinn were not affected by G.T.E. Sylvania. See *Hecht v. Pro-Football, Inc., 187 U.S.App.D.C. 73, 87 n. 67, 570 F.2d 982, 996 n. 67 (D.C.Cir. 1977)*, Cert. denied, ***436 U.S. 956, 98 S. Ct. 3069, 57 L. Ed. 2d 1121***.

[9] See Murphy v. Alpha Realty, Inc., 1978-2 Trade Cases P 62,388 (N.D.Ill.1978); Hill v. Art Rice Realty Co., 1974-2 Trade Cases P 75,364 (D.Ala.1974); U. S. v. Greater Pittsburgh Board of Realtors, 1973-1 Trade Cases P 74,454 (W.D.Pa.1973); U. S. v. Los Angeles Realty Board, 1973-1 Trade Cases P 74,366 (C.D.Cal.1973); U. S. v. Long Island Board of Realtors, Inc., 1972 Trade Cases P 74,068 (E.D.N.Y.1972).

In view of the foregoing, we need not consider in detail Penne's other allegations against the Board. If proven, they would tend to implicate the Board more closely in the "punitive split" policies of the defendant firms than the mere price information exchange discussed above might do, [10] and would raise questions about the intent behind and reasonableness of a certain advertising **[*1151]** restriction that the Board imposed on its members for some years. [11] Since the Board is to remain in the litigation in any case, we think Penne should be allowed to explore these other alleged connections between the Board and the alleged conspiracy among the defendant firms in as much detail as the facts will warrant. Suffice it to say that on these other matters as well we are not convinced by the material now in the record that it is quite clear what the truth is and that no **[**23]** genuine issues remain for trial.

[24]** We express no opinion on the strength or weakness of Penne's case against the Board, but hold only that the Board's involvement in the alleged conspiracy to fix and maintain brokerage fees has not been conclusively disproved by pretrial discovery and that there remain material issues of fact that can only be resolved at later stages of the litigation. As the Supreme Court has cautioned, "***HN4***[] summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot." *Poller v. Columbia Broadcasting System, Supra, 368 U.S. at 473, 82 S. Ct. at 491*. [12]

The judgment of the district court is reversed, and the case is **[**25]** remanded for further proceedings.

End of Document

---

[10] Penne alleges that the Board distributed the letters of some of its member firms in which they announced their "punitive split" policies soon after Penne applied for membership in the Board; and that the Board has enforced these "punitive split" policies through its Ethics and Arbitration Committee.

[11] The rule read as follows:

Section 5 Solicitations. On a cooperative sale, only the listing participant is authorized to make any contact with the neighbors with sold cards, brochures, letters and the like, except with the consent of the listing broker.

The Rule was withdrawn in 1978. The district court concluded that the fact of this advertising restriction "does not help plaintiffs because rules relating to advertising are independent of rules relating to commission splits." Memorandum and Order of February 14, 1977. However, Penne's claim against the Board does not rest solely on the issue of "punitive" commission splits; the claim is rather that the Board has been involved in a conspiracy to fix and maintain brokerage fees. The Board's advertising restriction would conceivably have something to do with such a conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

It is fundamental to the law of conspiracy that there must be at least two entities in order for there to be a conspiracy; a single entity cannot conspire with itself. In determining whether the component parts of a single, commonly owned business enterprise are to be treated as separate entities which are capable of conspiring with each other in violation of the Sherman Act, or are to be treated merely as parts of a single entity which is incapable of conspiring with itself, the courts have generally held that affiliated corporations within a single, commonly owned enterprise are separate entities which are capable of conspiring with each other in violation of the Sherman Act. When individual officers are acting on behalf of the corporation, they are merely parts of a single entity and are thus incapable of conspiring either with each other or with the corporation.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN2[] **Sherman Act, Penalties**

A restraint may result as readily from a conspiracy among those who are affiliated or integrated under common ownership as from a conspiracy among those who are otherwise independent. Similarly, any affiliation or integration flowing from an illegal conspiracy cannot insulate the conspirators from the sanctions which Congress has imposed. The corporate interrelationships of the conspirators, in other words, are not determinative of the applicability of the Sherman Act. That statute is aimed as substance rather than form.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Antitrust & Trade Law, Sherman Act**

Where one person not only is the sole or principal owner of affiliated corporations, but also was the only person involved in the corporations' decision-making processes, the one person and the affiliated corporations were to be treated as a single entity and there could be no conspiracy among the affiliated corporations.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

Antitrust law is concerned with the concerted action of distinct economic entities. In any case, whether such action has occurred turns on the particular facts. Separate incorporation is just one among many factors; it may be significant in an antitrust sense or it may be only a technicality, a byproduct of decisions with no antitrust impact. The corporate structure itself determines whether there are separate units or one entity.

Opinion by: **[*1]** FOLEY

Opinion

Memorandum Opinion Granting Summary Judgment

FOLEY, D.J.: The Syufy counterdefendants filed a motion for summary judgment on the counterclaim November 6, 1978. On June 11, 1979, the Court heard oral argument on the motion and took the matter under submission.

Disposition of the Original Complaint

In their complaint, plaintiffs charged defendant exhibitors with a violation of *§ 1* of the Sherman Act. Plaintiffs alleged that certain Las Vegas theatre owners conspired with non-named film distributors to confine the exhibition of first run films to defendants' theatres. In addition, defendants were charged with secretly agreeing to divide first run films among themselves to the exclusion of Syufy. The trial before a jury began in 1975 and, at the conclusion of the plaintiff's case, the Court granted defendants' motion for a directed verdict. Syufy filed a notice of appeal which was dismissed without prejudice in light of the pending counterclaim. The counterclaim went to trial in 1976, and Syufy's motion for a mistrial was granted. The counterclaim was then severed from the original complaint, and the directed verdict on the claim was affirmed by the Court of **[*2]** *Appeals (575 F. 2d 233)*.

One of the reasons for the directed verdict as to plaintiffs' claim and the affirmance on appeal was that there was no evidence that the film distributors offered films for bid on a day and date basis. Without such evidence, there could be no conspiracy among the exhibitors not to bid on a day and date basis, for a film exhibitor could only bid for films consistent with the distributors' bid invitations. No agreement was shown among the distributors to offer films a certain way. (See Revised Findings of Fact and Conclusions of Law, entered August 19, 1975.)

The Counterclaim

The defendants' counterclaim charges a violation of *§ 1* of the Sherman Act (*15 U.S.C. § 1*). Counterclaimants allege that the various Syufy corporations conspired among themselves and with the non-party distributors to restrain competition by forcing distributors and exhibitors to offer and exhibit motion pictures in the manner Syufy desired, that is, on a day and date basis only. Counterclaimants charge that the various Syufy entities engaged in a program and plan, through the use of litigation, threats, coercion and fabrication of evidence, to eliminate and prevent competition **[*3]** between Syufy theatres and other theatres in the Western United States.

In counterclaimants' trial brief, filed April 2, 1976, they limit their request for damages to their attorneys' fees trebled:

If the complaint in this action is found to have been brought as part of or in furtherance of a conspiracy to restrain competition by forcing distributors and competing exhibitors to exhibit motion pictures on a day and date basis, then the counterclaimants are entitled to recover as damages their attorneys' fees trebled. (Counterclaimants' trial brief, page 18.)

Counterclaimants are therefore not attempting to prove or recover actual damages to their businesses in addition to attorneys' fees.

Issues on the Summary Judgment Motion

1. Was there a conspiracy or combination within the meaning of *§ 1* of the Sherman Act?

2. Can the bringing of a lawsuit be a violation of the antitrust laws?

3. Do Syufy's acts constitute a restraint of trade or competition as would injure the counterclaimants?

Contract, Combination, or Conspiracy

In order to prevail on their counterclaim, counterclaimants must prove, as a threshold element, that there was a combination, conspiracy, or **[*4]** agreement within the meaning of *§ 1* of the Sherman Act. If there was, the case should go to trial; if not, summary judgment should be granted to the counter-defendants. Without proof of a conspiracy or combination, the entire counterclaim fails, despite the fact that other factual issues may remain undecided.

Counterclaimants attempt to satisfy the conspiracy element in three ways:

1. Intracorporate conspiracy among the various Syufy corporations:

HN1[] It is fundamental to the law of conspiracy that there must be at least two entities in order for there to be a conspiracy; a single entity cannot conspire with itself. In determining whether the component parts of a single, commonly owned business enterprise are to be treated as separate entities which are capable of conspiring with each other in violation of the Sherman Act, or are to be treated merely as parts of a single entity which is incapable of conspiring with itself, the courts have generally held that affiliated corporations within a single, commonly owned enterprise are separate entities which are capable of conspiring with each other in violation of the Shereman Act. When individual officers are acting on behalf of **[*5]** the corporation, they are merely parts of a single entity and are thus incapable of conspiring either with each other or with the corporation.

In *United States v. Yellow Cab Co., 332 U.S. 218, 227 (1947)*, a case involving a conspiracy among affiliated and subsidiary corporations, the Court held that:

HN2[] [A] restraint may result as readily from a conspiracy among those who are affiliated or integrated under common ownership as from a conspiracy among those who are otherwise independent. Similarly, any affilation or integration flowing from an illegal conspiracy cannot insulate the conspirators from the sanctions which Congress has imposed. The corporate interrelationships of the conspirators, in other words, are not determinative of the applicability of the Sherman Act. That statute is aimed as substance rather than form.

Accord, *Perma Life Muffers, Inc. v. International Parts Corp., 392 U.S. 134 (1968)*, (a familyowned business consisting of a parent and three subsidiaries could conspire); *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons. Inc., 340 U.S. 211 (1951)*, (rule especially applicable where conspiring subsidiaries held themselves out as competitors); *Joseph E. Seagram **[*6]** & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F. 2d 71 (9th Cir. 1969)*, cert. denied, *396 U.S. 1062 (1970)*, (common owner-ship and control do not liberate corporations from the impact of the antitrust laws).

In some cased decided by the lower federal courts, it has been held that *HN3*[] where one person not only was the sole or principal owner of affiliated corporations, but also was the only person involved in the corporations' decision-making processes, the one person and the affiliated corporations were to be treated as a single entity and there could be no conspiracy among the affiliated corporations. See *Rayco Manufacturing Co. v. Dunn, 234 F. Supp. 593 (N.D. Ill. 1964)*, (subsidiary corporations, parent corporation, and individual owner held to be one and the same person for purposes of *§ 1* conspiracy); *Windsor Theatre Co. v. Walbrook Amusement Co., 94 F. Supp. 388 (D. Md. 1950)*, aff'd, *189 F.2d 797 (4th Cir. 1951)*, (no evidence that the activities of the two defendant corporations were directed or caused by anyone other than a single person who was the president and chief executive of both corporations.

In *Knutson v. Daily Review, Inc., 548 F. 2d 795 (9th Cir. 1976)*, cert. **[*7]** denied, *433 U.S. 910 (1977)*, the Court held that a corporation and its wholly owned subsidiary formed a single unified structure and could not therefore conspire to restrain trade in violation of *§ 1* of the Sherman Act, where the same individual was the controlling shareholder of the parent corporation, president of both corporations, and publisher of all five newspapers involved, and the corporations did not compete or hold themselves out as competitors. In Knutson, the Court stated:

HN4[] ***Antitrust law*** is concerned with the concerted action of distinct economic entities. In any case, whether such action has occurred turns on the particular facts. Separate incorporation is just one among many factors; it may be significant in an antitrust sense or it may be only a technicality, a byproduct of decisions with no antitrust impact. The corporate structure itself determines whether there are separate units or one entity. (*548 F. 2d at 802*; footnote omitted.)

In the instant case, there are no genuine issues of material fact as to whether Syufy's various corporations constituted a single entity for the purposes of *§ 1*. In the affidavit of Raymond J. Syufy, filed October 23, 1978, he **[*8]** states that the four corporations were wholly owned by himself or members of his immediate family; Syufy was was owner, operator and managing agent for each corporation. He was ultimately responsible for all decisions and for buying and booking of films. The two drive-in theatres owned by him did not hold themselves out as competitors or in fact compete. This Court holds that the Knutson case controls here. The Syufy corporations cannot be held to have conspired among themselves.

2. Conspiracy element satisfied by Katz settlement:

Lloyd Katz was a named defendant in the original claim. Subsequently, he settled with Syufy and agreed to play day and date with Syufy's drive-ins in Las Vegas. Counterclaimants assert that the settlement agreement between Syufy and Katz, albeit coerced, establishes the conspiracy requirement. Their argument is not persuasive. The Katz agreement was entered into afer the counterclaim was filed, was subject to the approval of the Court, and no antitrust objections were raised at the time of the settlement (May 28, 1974).

3. Conspiracy or agreements with nonparty distributors:

Counterclaimants allege in their comlaint, and asserted at oral **[*9]** argument on June 11, 1979, and in their letter to the Court of June 19, 1979, that the *§ 1* conspiracy element is satisfied by the Syufy agreements with the third party film distributors, named in the counterclaim as coconspirators but not as counteredefendants. This alleged combination between Syufy and the distributors was not covered in the original pretrial order, in the trial brief on the counterclaim, nor in counterclaimants' requested jury instructions. It was not briefed by either side on the summary judgment motion. It is not stated to be an issue of fact for trial by counterclaimants in their points and authorities in opposition to summary judgment. The issue was totally ignored from the time the counterclaim was filed until oral argument on June 11, 1979. There is no evidence adduced at the trial on the original claim to support this theory of a conspiracy between Syufy and the distributors. No distributors were called to testify, nor were any of their depositions taken. Counterclaimants' position is that the coerced agreements obtained by Syufy through other litigation and threats of litigation satisfy the requirements of *§ 1*. However, the only agreements introduced **[*10]** at the trial (defense exhibits in evidence AV-5, AV-6, and AW) were agreements between Syufy and some distributors concerning the exhibition of motion pictures in Northern California only.

The allegation that there was an illegal combination between Syufy and the distributors is inconsistent with this Court's findings on the motion for a directed verdict on the claim (entered August 19, 1975) and the position taken by the counterclaimants during the trial. Counterclaimants, in the position of having to refute Syufy's allegations that there was a conspiracy between themselves and the distributors, argued throughout the trial of plaintiffs' claim that the distributors were at all times acting lawfully and independently in the manner in which they offered films in Las Vegas (Tr. 2988, 3046, 3047). Defendants requested a jury instruction that the distributors were acting lawfully as a matter of law (defendants' requested jury instruction No. 20). This Court found that "Distributors decide to whom they will license their motion pictures on the basis of earning the most money in each market area." (Finding of Fact No. 25) This Court also found that the bid invitation controls the manner **[*11]** of licensing (Finding No. 27).

Counterclaimants also have a standing problem. Assuming arguendo that the agreements with the distributors constitute an illegal restraint of trade, it is difficult to see how they would have any impact on the Las Vegas market, and how these counterclaimants could claim any injury. Actual damages would be limited to businesses in the geographical area affected by the agreements, that is, Northern California. The damages claimed here are simply the costs of defendaing the original lawsuit. Therefore, there appears to be no causal connection between the alleged agreements and damages to these counterclaimants.

Counterclaimants' position simply does not make sense. If, through coercion and litigation, Syufy obtained agreements with distributors which forced them to offer films day and date in Northern California, how does this cause any damage to these counterclaimants? Certainly the agreements did not concern the bringing of a lawfuit in Las Vegas; that was Syufy's own doing. Counterclaimants' argument is circular: Syufy brought lawsuits to force exhibitors to play day and date; as a result of the lawsuits, the distributors were coerced into **[*12]** signing agreements; therefore, the agreements constitute a combination in restraint of trade; and these counterclaimants are damaged in the amount of their attorneys' fees. This is absurd. Even if the counterclaimants prove the agreements between the distributors and Syufy, they have to prove the resultant restraint of trade and causally connected damages. Injury by way of litigation costs is not enough. Counterclaimants cannot bring in peripheral agreements simply to satisfy the jurisdictional requirements and then claim any damage, however unrelated.

This Court holds as a matter of law that as to the agreements before the Court (AV-5, AV-6, AW) there is no illegality as would support damages or injunctive relief in this case. Furthermore, there cannot be any other pertinent evidence to be offered.All of the counterdefendants' evidence in support of its counterclaim has already been offered on the trial of the counterclaim in 1976, which resulted in a mistrial.

Additionally, it should be noted that throughout their papers counterclaimants have mistakenly relied on *Beacon Theatres, Inc. v. Westover [1958 TRADE CASES P98,923], 252 F. 2d 864* (9th Cir.), rev'd on other grounds **[*13]** [*1959 TRADE CASES P69,360], 359 U.S. 500 (1958)*, for the proposition that the bringin of a lawsuit to coerce distributors or exhibitors to enter into an agreement or contract is, without more, a violation of the Sherman Act. Beacon did not so hold. In Beacon, plaintiffs sought a declaratory judgment that their behavior was lawful under the Sherman Act, and sought to restrain or enjoin the defendant from bringing suit or threatening antitrust litigation. Procedurally, our case is very different. Counterclaimants seek treble damages under the antitrust laws, not simply an injunction against vexatious litigation. Having elected to proceed under the Sherman Act, they must satisfy all the elements of *§ 1*.

The counterdefendants' motion for summary judgment must be granted because there is not a genuine issue of material fact as to whether there was a combination, conspiracy or agreement under any of counterclaimants' three theories discussed supra. Counterdefendants are entitled to judgment as a matter of law.

This memorandum opinion constitutes the Court's findings of fact and conclusions of law. Let summary judgment be entered accordingly.

The Missouri ***antitrust law*** of 1974, *Mo. Rev. Stat. § 416.041.2*, does not exempt the insurance industry solely because its activities are regulated.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN11[] **Scope, Exemptions**

The exemption in the Missouri ***antitrust law*** of 1974, *Mo. Rev. Stat. § 416.041.2*, represents a codification of the "state action" doctrine of federal ***antitrust law***, which provides that while a state may not give immunity to those who would violate the Sherman Act, *15 U.S.C.S. §§ 1*, *2*, legitimate statutory measures to solve economic problems through regulatory schemes will not violate federal antitrust laws despite their anticompetitive features.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN12[] **Exemptions & Immunities, Parker State Action Doctrine**

The threshold inquiry in determining if an anticompetitive activity is state action of the type that the Sherman Act, *15 U.S.C.S. §§ 1*, *2*, was not meant to proscribe is whether the activity is required by the state acting as sovereign.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN13[] **Exemptions & Immunities, Parker State Action Doctrine**

Courts consistently refuse to find that regulation gives rise to an implied exemption without first determining that exemption was necessary in order to make the regulatory act work, and even then only to the minimum extent necessary.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN14[] **Exemptions & Immunities, Parker State Action Doctrine**

Under the "state action" exemption, anticompetitive activities are exempt if they are compelled by state regulations. The "state action" doctrine does not relieve antitrust liability for anticompetitive conduct which also violates state regulations for particular industries.

Torts > ... > Commercial Interference > Contracts > General Overview

HN15[] **Commercial Interference, Contracts**

The right of recovery for inducing a breach of contract is but one instance of the protection which the law affords against unjustified interference in business relations. An existing contract may be the basis for greater protection, but some protection is appropriate against unjustified interference with reasonable expectancies of commercial relations even where an existing contract is lacking.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Business Relationships > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN16[] **Intentional Interference, Elements**

The elements of a cause of action for tortious interference with business relations under Missouri law are: (1) A contract or a valid business relationship or expectancy (not necessarily a contract); (2) Defendant's knowledge of the contract or relationship; (3) Intentional interference by the defendant inducing or causing a breach of the contract or relationship; (4) The absence of justification; and, (5) Damages resulting from defendant's conduct.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN17[] **Defenses, Demurrers & Objections, Motions to Dismiss**

A petition is sufficient against a motion to dismiss if it invokes the substantive principles of law which entitle plaintiff to relief and alleges facts which inform the defendant of what plaintiff will attempt to establish at trial.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN18[] **Pleadings, Rule Application & Interpretation**

A pleader is required to state only the ultimate facts and it is not necessary to plead the facts or circumstances by which the ultimate facts will be established.

Opinion by: SEILER

Opinion

[*311] This is an appeal in a suit wherein plaintiffs sought damages for lost commissions in the sale of insurance **[**2]** allegedly caused by defendants' acts in restraint of trade, claimed to be unlawful under both the former and new Missouri antitrust statutes, and for tortious interference with plaintiffs' business relations. The trial court held that the former ***antitrust law*** did not apply to the types of insurance involved in this case, that all activities of the insurance industry are exempt from the Missouri ***antitrust law*** of 1974 under *§ 416.041.2, RSMo 1978*, and that plaintiffs failed to assert a cause of action for tortious interference with business relations. The trial court granted defendants' motion to dismiss the actions. Plaintiffs appealed and filed a motion to transfer the case prior to opinion from the court of appeals, western district, to this court under rule 83.06. We granted the motion to transfer because of the general interest and importance of the questions presented and we will treat the case as though here on original appeal. *Mo. Const. art. V, § 10*.

Appellants are insurance brokers who filed a petition in the circuit court of Miller County alleging that over the years respondents had violated § 416.010, RSMo 1969, of the former antitrust statute and *§ 416.031, RSMo 1978*, **[**3]** of the new antitrust statute, by engaging in unlawful contracts, combinations, undertakings or conspiracies that constitute an unreasonable restraint of trade or commerce. Appellants also allege that respondents' activities constituted tortious interference with appellants' business relations. Respondents are as follows: Forrest T. Jones & Co., an insurance brokerage company; Missouri State Teachers Association (MSTA), a corporation organized to represent the interests of teaching and nonteaching personnel of elementary and secondary schools in Missouri; American Health and Life Insurance Co., Fidelity Security Life Insurance Co., and New York Life Insurance Co., past or present underwriters of group insurance coverage for teachers employed by Missouri school districts; Forrest T. Jones, Dorothy M. Jones, Richard F. Jones, and M.M. Morrison, officers and directors of Forrest T. Jones & Co.; J.A. Kinder, officer, and Everett Keith, former officer of MSTA; James E. Woodruff, licensed insurance agent and director of the MSTA Group Insurance Plan; and, Warren P. Gardner, officer and director of Fidelity Security Life Insurance Co.

Specifically, appellants allege in their petition, among **[**4]** other things, that respondent Forrest T. Jones & Co., had made gifts to and provided entertainment for persons in positions of authority with MSTA or its affiliated groups, that respondent Forrest **[*312]** T. Jones & Co. had entered into agreements with MSTA and its agents and school districts to withhold necessary statistical data, or to provide incomplete or false data, concerning MSTA members employed by particular school districts from potential competitors of Forrest T. Jones & Co., and that Forrest T. Jones & Co. entered into agreements with school districts pursuant to which districts could obtain group accident and health insurance only if they also purchased group life insurance. Appellants allege that Forrest T. Jones & Co. acted as agents of American Health and Life Insurance Co., Fidelity Security Life Insurance Co., and New York Life Insurance Co. in the above anticompetitive activities.

On appeal, appellants contend that the trial court improperly dismissed the action. Appellants submit that the former antitrust statute did apply to life, health and accident insurance, and that § 416.041.2 of the new statute does not exempt entire industries. Rather, appellants contend, **[**5]** § 416.041.2 of the new statute merely codifies the "state action" doctrine of federal ***antitrust law*** and exempts only specific anticompetitive activities and arrangements in fact expressly approved or regulated by the state. Appellants contend further that the alleged anticompetitive activities of the respondents were not expressly approved or regulated by the division of insurance and are therefore outside of the scope of the exemption granted in § 416.041.2. Moreover, appellants argue that they have stated a cause of action for respondents' tortious interference with appellants' business relations. Respondents answer that the former antitrust statute was limited in its application to activities related to products, commodities, articles or things and did not apply to insurance, except for the express inclusion of insurance of property against loss or damage by fire, lightning or storm in the statute. As to the new antitrust statute, respondents answer that the statutes relating to the regulation and supervision of the insurance industry are an exclusive and complete code. Accordingly, respondents submit, the insurance industry's activities are regulated by the state and therefore **[**6]** are exempt under § 416.041.2. Respondents also submit that the appellants' failure to allege the existence of a contract or a pre-existing business relationship is fatal to the claim of tortious interference with appellants' business relations. We will discuss these issues in the order that they are set out above.

The "old" antitrust statute, originally enacted in 1907, did not apply to restraints in trade occurring in connection with service activities. Almstead and Tyler, State Antitrust Laws: New Directions in Missouri, 39 Mo. L. Rev. 489, 489-90 (1974). The statute applied only to activities relating to products, commodities, articles and things. *See* §§ 416.010 through 416.040, RSMo 1969, and Bond, The Antitrust Laws of Missouri, 27 J. Mo. B. 61, 62 (1971). Section 416.040 of the old antitrust statute, however, expressly included insurance of property against loss or damage by fire, lightning or storm within the purview of the statute. The statute did not otherwise apply to services or other types of insurance, such as the life, health and accident insurance contracts involved in this case. The trial court correctly held that the old antitrust statute did not apply to the **[**7]** insurance contracts and activities which are the subject of this litigation.

Arguably in part because the old antitrust statute did not apply to service contracts, but whatever the reason, the General Assembly enacted the Missouri ***antitrust law*** of 1974 (the Act), *§§ 416.011 to 416.161, RSMo 1978*, with a much broader scope of application. *See* Almstead and Tyler, 39 Mo. L. Rev. at 490-91. The Act closely parallels provisions of the Sherman and Clayton Acts of federal ***antitrust law***. ***HN1***[] Section 416.031.1 of the Act makes unlawful every contract, combination or conspiracy in restraint of trade or commerce, conduct which is prohibited by *§ 1* of the Sherman Act, *15 U.S.C. § 1 (1976)*. ***HN2***[] Section 416.031.2 of the Act makes unlawful monopolization, attempted monopolization, and conspiracy to monopolize trade or commerce, conduct which is prohibited by *§ 2* of the Sherman Act, *15 U.S.C. § 2 (1976)*. ***HN3***[] Section 416.031.3 **[*313]** of the Act makes unlawful specified acts that substantially lessen competition or tend to create a monopoly, conduct which is prohibited by § 3 of the Clayton Act, *15 U.S.C. § 14 (1976)*. Like the federal antitrust laws, ***HN4***[] the Act applies to "any individual, corporation, **[**8]** firm, partnership, incorporated or unincorporated association of any other legal or commercial entity", *§ 416.021 (2), RSMo 1978*, and "any economic activity involving or relating to any commodity or service." *§ 416.021 (4), RSMo 1978*.

HN5[] The Act expressly exempts, with some qualifications, labor, agricultural and horticultural organizations in *§ 416.041.1, RSMo 1978*, the same organizations expressly exempted from federal antitrust laws by § 6 of the Clayton Act, *15 U.S.C. § 17 (1976)*. ***HN6***[] In § 416.041.2, the Act exempts "activities or arrangements expressly approved or regulated by any regulatory body or officer acting under statutory authority of this state or of the United States." At issue is whether this provision is a codification of the "state action" doctrine of federal ***antitrust law***, which exempts anticompetitive conduct which is required or approved by state law, or whether, as respondents contend, this provision exempts the insurance industry because its activities are regulated by state law.

HN7[] The Act directs that its provisions "shall be construed in harmony with ruling judicial interpretations of comparable federal antitrust statutes." *§ 416.141, RSMo 1978*. The legislature, **[**9]** through this section and the Act's substantive provisions based on federal antitrust laws, intended to provide a ready body of precedent for interpreting the law and a single standard of business conduct already known and acquiesced in by businesses in Missouri. *See* Almstead and Tyler, 39 Mo. L. Rev. at 519.

The United States Supreme Court has spoken clearly as to the construction to be given to exemptions to the federal antitrust laws and therefore provides guidance for the construction to be given to exemptions under the Act. In *Abbott Laboratories v. Portland Retail Druggists Association, Inc., 425 U.S. 1, 47 L. Ed. 2d 537, 96 S. Ct. 1305 (1976)*, the court most recently stated that ***HN8***[] antitrust laws are to be construed liberally and exceptions from their application are to be construed strictly. *425 U.S. at 11*. In another recent case, the Supreme Court addressed the question whether a congressional regulatory scheme serves as an implied exemption from federal ***antitrust law***. ***HN9***[] "Implied antitrust immunity is not favored, and can be justified only by a convincing showing of clear repugnancy between the antitrust laws and the regulatory system." *United States v. National Association **[**10]** of Securities Dealers, Inc., 422 U.S. 694, 719-20, 45 L. Ed. 2d 486, 95 S. Ct. 2427 (1975)*. In construing the Act in harmony with these ruling judicial interpretations of comparable federal antitrust statutes, we read § 416.041.2 narrowly and find that ***HN10***[] it does not exempt the insurance industry solely because its activities are regulated. Moreover, we find that respondents have not shown that an implied exemption is justified by clear repugnancy between the antitrust laws and the regulatory system.

As noted above, the Act expressly applies to "any individual, corporation, firm, partnership, incorporated or unincorporated association or any other legal or commercial entity" and to "any economic activity involving or relating to any commodity or service." *§§ 416.021(2)*, *(4)*, RSMo 1978. In the exemption in § 416.041.2, the legislature chose the words "activities or arrangements expressly approved or regulated". To say that certain activities, otherwise proscribed by the Act, are exempt because they are approved by the state or in compliance with the legislature's regulatory scheme for a given industry, is quite a different matter from saying that because an industry is regulated, **[**11]** its activities are exempt from the Act, irrespective of whether the activities are in compliance with or in violation of the regulations applicable to the industry. Nowhere in the Act is there an express exemption for regulated businesses and industries, or the insurance industry in particular, although in § 416.041.1 the legislature specifically exempted agricultural, horticultural **[*314]** and labor organizations from the purview of the Act. Rather than interpret the scope of the exemption in § 416.041.2 so broadly as to exempt by mere implication potentially hundreds of businesses and industries, we adhere to the narrow construction given to exemptions to the federal antitrust statutes, as we are directed to do by *§ 416.141* of the Act.

HN11[] The exemption in § 416.041.2 represents a codification of the "state action" doctrine of federal ***antitrust law***, first enunciated by the United States Supreme Court in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. [1] In *Parker*, the court held that while a state may not give immunity to those who would violate the Sherman Act, legitimate statutory measures to solve economic problems through regulatory schemes will **[**12]** not violate federal antitrust laws despite their anticompetitive features. The court, in *Parker*, upheld a California statute that adopted a mandatory marketing and pricing program for the state's raisin crop. Since *Parker*, the "state action" exemption has been further explained by recent Supreme Court decisions.

In *Goldfarb v. Virginia State Bar, 421 U.S. 773, 44 L. Ed. 2d 572, 95 S. Ct. 2004 (1975)*, the court found that the "state action" exemption did not apply to the Virginia Bar Association's minimum fee schedule and therefore its enforcement by the bar association constituted unlawful price fixing under the Sherman Act. The court states that ***HN12***[] "[the] threshold inquiry in determining if an anticompetitive activity is state action of the type that the Sherman Act was not meant to proscribe is whether the activity is required by the State acting as sovereign." *421 U.S. at 790*. And in **[**13]** *Cantor v. Detroit Edison Co., 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1966)*,

[1] *See generally* Comment, The Missouri "State Action" Antitrust Exemption, 45 U.M.K.C.L. Rev. 257 (1976).

the Supreme Court directly addressed the issue of implied exemptions from the federal antitrust laws through state regulation. In *Cantor*, the court found that despite the state's participation in and approval of a light bulb exchange program, the "state action" exemption did not apply and the program restrained competition in violation of the Sherman Act. The court explained that it "has ***HN13***[] consistently refused to find that regulation gave rise to an implied exemption without first determining that exemption was necessary in order to make the regulatory [act] work, 'and even then only to the minimum extent necessary.'" *428 U.S. at 597*.

Under the Supreme Court's interpretation of the "state action" exemption in *Goldfarb* and *Cantor*, which we use as guidance in construing the exemption in § 416.041.2 of the Act, it is clear that the alleged anticompetitive conduct of respondents does not fall within the scope of the exemption. There is no question that the state does not require the anticompetitive conduct alleged. Nor does this case involve "activities or arrangements expressly approved" **[**14]** by the state. Nor is the alleged anticompetitive activity even arguably insulated on the ground that it is in compliance with state statutes regulating the insurance industry. In sharp contrast, respondents contend that they are exempted from the Act because their allegedly anticompetitive conduct may violate insurance regulations that prohibit unfair practices and fraud under *§§ 375.930 to 375.948, RSMo 1978*. Respondents thus contend that these prohibitions against unfair practices and fraud give rise to an implied exemption from the Act for such unlawful activities. ***HN14***[] Under the "state action" exemption, anticompetitive activities are exempt if they are compelled by state regulations. The "state action" doctrine does not relieve antitrust liability for anticompetitive conduct which also violates state regulations for particular industries. This is not a case where an implied exemption from the Act is necessary "in order to make the regulatory act work" under the "state action" doctrine as articulated in *Cantor. 428 U.S. at 597*.

[*315] After applying "ruling judicial interpretations of comparable federal antitrust statutes", which we are directed to use as guidance in our construction **[**15]** of the Act by *§ 416.141*, we find that the alleged anticompetitive activities at issue do not fall within the scope of the "state action" exemption in § 416.041.2. The decision of the trial court in granting the respondents' motion to dismiss appellants' cause of action under the Act was in error.

The last issue in the case at bar is whether appellants' petition pleaded facts sufficient to state a claim upon which relief can be granted for tortious interference with business relations. Respondents contend that appellants must allege the existence of a contract or a pre-existing business relationship as an element of the cause of action. In *Downey v. United Weatherproofing, Inc., 363 Mo. 852, 253 S.W.2d 976, 980 (1953)*, this court held that a reasonable expectancy of commercial relations is protected.

> ***HN15***[] "The right of recovery for inducing a breach of contract is but one instance of the protection which the law affords against unjustified interference in business relations. An existing contract may be the basis for greater protection, but some protection is appropriate against unjustified interference with reasonable expectancies of commercial relations even where an existing **[**16]** contract is lacking."

Respondents cite *Salomon v. Crown Life Insurance Co., 536 F.2d 1233* (8th Cir.), *cert. denied*, *429 U.S. 961, 50 L. Ed. 2d 329, 97 S. Ct. 387 (1976)* as authority for their contention that a contract or a pre-existing business relationship is a necessary element of a claim of tortious interference with business relations. In *Saloman*, the Eighth Circuit correctly stated ***HN16***[] the elements of a cause of action for tortious interference with business relations under Missouri law:

> "(1) A contract or a valid business relationship *or expectancy* (not necessarily a contract);
>
> (2) Defendant's knowledge of the contract or relationship;
>
> (3) Intentional interference by the defendant inducing or causing a breach of the contract or relationship;
>
> (4) The absence of justification; and,
>
> (5) Damages resulting from defendant's conduct."

536 F.2d at 1238 (emphasis added). Respondents submit that, in any event, the trial court's dismissal of appellants' petition was proper because appellants failed to show the existence of a reasonable expectancy of commercial relations or that respondents had knowledge of the appellants' expectancy of commercial relations.

[17]** In *Scheibel v. Hillis, 531 S.W.2d 285* (Mo. banc 1976), this court held that ***HN17***[] a petition is sufficient against a motion to dismiss if it invokes the substantive principles of law which entitle plaintiff to relief and alleges facts which inform the defendant of what plaintiff will attempt to establish at trial. *531 S.W.2d at 290*. We believe that appellants have met this minimum requirement. On its face, count IV of appellants' petition alleges that appellants had an expectancy of business relations, as it claims interference with "actual and potential business relations." The count also alleges that respondents' acts were intentional and without justification, and that appellants have suffered damages as a result of respondents' intentional conduct. The only element of tortious interference with business relations which is not stated in count IV is respondents' knowledge of appellants' expectancy of business relations. Count IV does, however, incorporate by reference the allegations in the other counts of the petition which charge that respondents acted unlawfully in restraint of trade. These allegations supply the knowledge element necessary for the tort.

Appellants allege that **[**18]** respondents conspired with school districts and entered into illegal "tying" agreements, under which districts could obtain group accident and health insurance only if they purchased group life insurance, and other anticompetitive agreements that caused school districts to refuse to deal with appellants and other competitors of respondents. Appellants **[*316]** also allege that respondents gave financial contributions and gifts to school board members and employees to shut out respondents' competitors in the insurance market for the 80,000 employees of the state's school districts. While these allegations do not specifically state that respondents knew of appellants' individual expectancies of commercial relations, the allegations claim that respondents knew their activities tortiously interfered with the business relations of respondents' potential competitors, and that appellants were potential competitors.

Appellants' petition invokes the substantive principles of law which entitle appellants to relief and informs the respondents of what appellants will attempt to establish at trial. As we stated in *Scheibel*:

> "Plaintiff could be compelled by motion . . . to plead **[**19]** more specifically or by interrogatories to give more information . . . but this does not mean the petition does not state a cause of action in its present form. ***HN18***[] A pleader is required to state only the ultimate facts and it is not necessary to plead the facts or circumstances by which the ultimate facts will be established."

531 S.W.2d at 290. Appellants stated a cause of action for tortious interference with business relations and the trial court erred in dismissing count IV of appellants' petition for failure to state a claim upon which relief can be granted.

The judgment of the trial court is affirmed in part and reversed in part, and the cause is remanded to the trial court for further proceedings consistent with this opinion.

Rendlen, Morgan, JJ., Welborn, Sp. J., and Finch, Sr. J., concur.

Dissent

Bardgett, C.J.

I concur in the principal opinion except as to that part which reaffirms earlier holdings that **[**20]** the "old" antitrust statutes, sections 416.010-416.040, RSMo 1969, do not apply to life, health or accident insurance contracts. I agree that the earlier cases so held but I believe those cases were wrong. In my opinion, the "old" antitrust statutes which play some part in the instant case apply to insurance industry, company, or brokerage activities in connection with all forms of insurance. I would therefore reverse and remand for further proceedings on all counts.

HN1[] **Civil Procedure, Discovery & Disclosure**

Although summary judgment is available in antitrust cases, it should be used sparingly. Summary judgment may be appropriate where the facts involved in a determinative issue of law are clear, undisputed or unrefuted, but, if there is a genuine issue as to any material fact, a trial is absolutely necessary. The function of the court, at a *Fed. R. Civ. P. 56(c)* hearing, is solely to determine whether such an issue exists. Pre-discovery summary judgment involves an additional issue: whether the party against whom summary judgment is sought is entitled to develop its case through discovery, before summary disposition against it.

HN2[] **Air & Space Transportation, Antitrust**

In appropriate situations, plaintiffs in antitrust cases are entitled to discovery prior to summary disposition. A plaintiff's entitlement to discovery prior to a ruling on a motion for summary judgment is not unlimited, however. The entitlement lives only so long as there are factors which discovery might clear up, having some bearing on whether summary judgment should be entered. When the record becomes clear enough to disclose that further discovery is not needed to develop significant aspects of the case and that such discovery is not likely to produce a genuine issue of material fact, discovery should be ended.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN3[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

An agreement among competitors to fix prices is unlawful per se. Once the agreement is shown, a complete violation is proved.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Evidence > Admissibility > Circumstantial & Direct Evidence

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Evidence > Types of Evidence > Circumstantial Evidence

HN4[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Proof of a price-fixing conspiracy need not be direct. While particularly true of price-fixing conspiracies, it is well recognized law that any conspiracy can ordinarily only be proved by inferences drawn from relevant and competent circumstantial evidence, including the conduct of the defendants charged. Parallel business behavior, although not itself illegal, is admissible circumstantial evidence from which the fact finder may infer agreement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN5[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

Uniformity of price may be and has been considered some evidence tending to establish an illegal agreement. Price uniformity among competitors does not, of itself, violate the antitrust laws, however. If it is the result of independently reached pricing decisions, the element of "agreement" necessary to establish an illegal price-fixing combination or conspiracy is absent. But it does permit an inference that the defendant's conduct stemmed from an agreement, tacit or express, rather than from independent business decisions.

Headnotes/Summary

Headnotes

1. Trade Regulation--Summary Judgment

Although summary judgment is available in antitrust cases, it should be used sparingly. V.R.C.P. 56(c).

2. Judgments--Summary Judgment--Issue of Material Fact

Summary judgment may be appropriate where the facts involved in a determinative issue of law are clear, undisputed or unrefuted, but if there is a genuine issue as to any material fact, a trial is absolutely necessary. V.R.C.P. 56(c).

3. Judgments--Summary Judgment--Issue of Material Fact

The function of the court at a hearing on a motion for summary judgment is to determine whether a genuine issue as to any material fact exists. V.R.C.P. 56(c).

4. Trade Regulation--Summary Judgment

Prediscovery summary judgment involves an issue additional to whether a genuine issue exists as to any material fact: whether the party against whom summary judgment is sought is entitled to develop its case through discovery, and in appropriate situations, plaintiffs in antitrust cases are entitled to such discovery, though the entitlement is not unlimited and lives only so long as there are factors which discovery might clear up and which have some bearing on whether summary judgment should be entered, and when the record becomes clear enough to disclose that further discovery is not needed to develop significant aspects of the case and that discovery is not likely to produce a genuine issue of material fact, discovery should be ended. V.R.C.P. 56(c).

5. Trade Regulation--Price-Fixing--Elements

An agreement among competitors to fix prices is unlawful per se, and once the agreement is shown a complete antitrust violation is proved.

6. Trade Regulation--Price-Fixing--Proof

Proof of a price-fixing conspiracy need not be direct, and like any other conspiracy can ordinarily be proved only by inferences drawn from relevant and competent circumstantial evidence, including the conduct of the defendants, with parallel business behavior, although not itself illegal, being admissible circumstantial evidence from which the fact finder may infer agreement.

7. Trade Regulation--Price-Fixing--Evidence

Uniformity of price may be and has been considered some evidence tending to establish an illegal price-fixing agreement; it permits an inference that conduct stemmed from an agreement, tacit or express, rather than from independent business decisions.

8. Trade Regulation--Price-Fixing--Price Uniformity

Price uniformity among competitors does not of itself violate the antitrust laws; if it is the result of independently reached pricing decisions, the element of agreement necessary to establish an illegal price-fixing combination or conspiracy is absent.

9. Trade Regulation--Summary Judgment

Where record before trial court in state's price-fixing action was not clear enough to disclose that further discovery was not needed to develop significant aspects of the case, and state's affidavits indicated that discovery might produce a genuine issue of material fact, and there was evidence of parallel pricing, discovery should have been allowed and summary judgment for defendants without allowing discovery was reversible error.

Opinion by: DALEY

Opinion

[*427] **[**510]** This action was brought, on June 15, 1978, against the Rutland County Board of Realtors (Board) and twenty-seven real estate brokers alleging that the defendants fixed prices, in violation of *9 V.S.A. § 2453(a)* of the Consumer Fraud Act. It sought an injunction, restitution, penalties and costs. Only defendants Heritage Realty of Vermont (Heritage) and Fenton-Ryan Realty (Fenton-Ryan) appeared and answered. The remaining defendants stipulated to judgment against them. On September 5, the State filed interrogatories and requests for production. Heritage and Fenton-Ryan **[***2]** responded with objections to the interrogatories and motions for more definite statement. On November 16, the State filed a motion to compel. The defendants in turn, without complying with the request for discovery, filed motions for summary judgment with supporting affidavits. The State filed counter-affidavits and, pursuant to V.R.C.P. 56(f), it also filed an affidavit claiming that it could not fully respond to the motions for summary judgment because the court had not allowed it to conduct discovery. After hearing, the court granted summary judgment in favor of the defendants. The State appeals.

The Board is a nonprofit corporation whose members are licensed brokers and others engaged in the real estate profession. It maintains a multiple listing service (MLS) for the use of its members. As a condition of membership, all brokers must submit their sales listing agreements to the MLS. It then distributes them to the other members. If the listing broker sells the property, the entire commission or fee is paid to that broker. If a broker other than the listing broker sells the property, the commission is split between the two brokers.

The State's complaint alleged that **[***3]** during February, 1977, most members of the Board attended a meeting at which, by vote of the membership, the commission for sale of residential real estate was set at seven percent, and at which it **[*428]** was also agreed that commissions between the listing and the selling broker would be split 50-50. Prior to 1977, the customary rate in Rutland County had been six percent and the split 60-40. It further alleged that the rate-setting agreement was an unfair method of competition, in violation of the Consumer Fraud Act, *9 V.S.A. § 2453(a)*, and that the defendants had participated in the agreement.

By affidavit filed in support of their motions for summary judgment, the defendants claim that they had no part in the alleged conspiracy. Heritage's affidavit shows that although it was represented at the meeting, its representative objected to **[**511]** the consideration of commission rates, and, when the matter was brought up for a vote, she refused to participate. The State's affidavit, however, claimed that no one objected to the vote, and, furthermore, that although Heritage and not listed any properties at seven percent during the preceding year, the first two properties **[***4]** it listed after the meeting were at seven percent. Fenton-Ryan's affidavit indicated that no one from its firm was present at the meeting, and that neither of its proprietors knew about the vote. The State's affidavits show, on the other hand, that although in 1976 no properties were listed at seven percent, by the next year 12 of 22 properties placed in the MLS bulletin were so listed.

The plaintiff contends that it should have been allowed to conduct discovery before the motion for summary judgment was ruled on and that, in any event, the order granting the motion was improper because its affidavits raised genuine issues of material fact.

HN1[] Although summary judgment is available in antitrust cases, it should be used sparingly. *Norfolk Monument Co. v. Woodlawn Memorial Gardens, Inc., 394 U.S. 700, 704 (1969)* (per curiam). "[Summary] judgment may be appropriate where the facts involved in a determinative issue of law are clear, undisputed or unrefuted," *Littlejohn v. Shell Oil Co., 483 F.2d 1140, 1145* (5th Cir.), *cert. denied*, *414 U.S. 1116 (1973)*, but, if there is a genuine issue as to any material fact, a trial is absolutely necessary. *Sykas v. Kearns **[***5]** , 135 Vt. 610, 612, 383 A.2d 621, 623 (1978)*. The function of the court, at a Rule 56(c) hearing, is solely to determine whether such an issue exists. *Fonda v. Fay, 131 Vt. 421, 422, **[*429]** 306 A.2d 97, 98 (1973)*. Prediscovery summary judgment involves an additional issue: Whether the party against whom summary judgment is sought is entitled to develop its case through discovery, before summary disposition against it. II P. Areeda & D. Turner, ***Antitrust Law*** para. 316e (1978).

HN2[] In appropriate situations, plaintiffs in antitrust cases are entitled to such discovery. *Universal Brands, Inc. v. Philip Morris Inc., 546 F.2d 30, 36 (5th Cir. 1977)*. "A plaintiff's entitlement to discovery prior to a ruling on a motion for summary judgment is not unlimited," however. *Aviation Specialties, Inc. v. United Technologies Corp., 568 F.2d 1186, 1190 (5th Cir. 1978)*. "[This] entitlement lives only so long as there are factors which discovery might clear up, having some bearing on whether summary judgment should be entered." *Universal Brands, Inc. v. Philip Morris Inc., supra, 546 F.2d at 36*. "When the record becomes clear enough to disclose that further discovery **[***6]** is not needed to develop significant aspects of the case and that such discovery is not likely to produce a genuine issue of material fact, discovery should be ended." *Aviation Specialties, Inc. v. United Technologies Corp., supra, 568 F.2d at 1190*.

The gravamen of the complaint here is that the defendants agreed to fix commission rates on the sale of residential real estate. ***HN3***[] An agreement among competitors to fix prices is unlawful per se. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 218 (1940)*. Once the agreement is shown, a complete violation is proved.

HN4[] Proof of a price-fixing conspiracy need not be direct. *United States v. Foley, 598 F.2d 1323, 1328 (4th Cir. 1979)*. "While particularly true of price-fixing conspiracies, it is well recognized law that any conspiracy can ordinarily only be proved by inferences drawn from relevant and competent circumstantial evidence, including the conduct of the defendants charged." *Esco Corp. v. United States, 340 F.2d 1000, 1007 (9th Cir. 1965)*. Parallel business behavior, although not itself illegal, is admissible circumstantial evidence from which the fact finder may infer agreement. *First National* **[***7]** *Bank v. Cities Service Co., 391 U.S. 253, 287-88 (1968)*; **[*430]** *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 540-41 (1954)*.

[512]** ***HN5***[] "[Uniformity] of price may be and has been considered some evidence tending to establish an illegal agreement." *United States v. Chas. Pfizer & Co., 217 F. Supp. 199, 201 (S.D.N.Y. 1963)*. Price uniformity among competitors does not, of itself, violate the antitrust laws, however. *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., supra, 346 U.S. at 540-41*. If it is the result of independently reached pricing decisions, the element of "agreement" necessary to establish an illegal price-fixing combination or conspiracy is absent. But it does permit an inference that the defendant's conduct stemmed from an agreement, tacit or express, rather than from independent business decisions. See *id. at 540*.

By granting summary judgment, the trial court here ruled that, as a matter of law, the defendants had not participated in a price-fixing agreement. Furthermore, by not allowing discovery, it implicitly ruled that discovery would not produce a genuine issue of material **[***8]** fact. While the State's affidavits are deficient in this regard, the grant of summary judgment was nonetheless inappropriate because it was premature. The State should have been allowed to develop its case before summary disposition against it. The record before the trial court was not "clear enough to disclose that further discovery [was] not needed to develop significant aspects of the case." *Aviation Specialties, Inc. v. United Technologies Corp., supra, 568 F.2d at 1190*. On the contrary, the State's affidavits indicate that discovery may produce a genuine issue of material fact.

We do not say that the evidence of parallel pricing compels an inference in this case that the defendants participated in a price-fixing conspiracy, but neither can we say, as a matter of law, and especially without discovery, that an inference of no agreement is compelled. *Esco Corp. v. United States, supra, 340 F.2d at 1007*. Summary judgment is, under the circumstances, premature. The State should not be denied the **[*431]** opportunity to assemble evidence from the defendants in support of its claim, if such evidence does, in fact, exist.

Reversed and remanded for discovery **[***9]** .

Opinion by: [*1] COPPLE

Opinion

Memorandum and Order

Factual Background

COPPLE, D. J.: Plaintiffs Alaska, Idaho, Montana, Oregon, Washington, and certain private individuals filed complaints alleging antitrust violations by the defendants beginning in 1965. The defendants are Chevron Chemical Co.; Collier Carbon & Chemical Corp.; Cominco American, Inc.; Phillips Pacific Chemical Co.; J. R. Simplot and Simplot Industries, Inc.; Union Oil Co. of California; Western Farm Service, Inc.; Shell Oil Co. and its subsidiaries Shell Chemical, Inc. and Ind./Ag. Chemicals, Inc.; and Phillips Petroleum Co.

The complaints allege injuries to plaintiffs arising out of a combination and conspiracy in restraint of fertilizer trade or commerce and combination and conspiracy to monopolize such trade or commerce in violation of *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1 et seq. (1976)*. The complaints further allege injury to the plaintiffs arising out of acquisitions by defendants of formerly independent fertilizer dealers in violation of section 7 of the Clayton Act, *15 U.S.C. § 18 (1976)*. More specifically, the plaintiffs charge defendants with fixing and stabilizing factory, wholesale, and retail **[*2]** prices of fertilizer in the Northwest region. The Northwest region includes Alaska, Idaho, Montana, Oregon, Washington, and four Canadian provinces. The plaintiff also charge defendants with eliminating competition by exchanging trade information, adopting uniform prices, trading fertilizer among themselves at discount prices, artificially restricting the supply of fertilizer, and acquiring independent fertilizer wholesalers, distributors, and retailers.

On August 9, 1978, the Court granted the plaintiffs' motion to amend the definition of the plaintiffs' class to read as follows:

A class consisting of all persons in each of the respective states involved in this litigation who, during the period in controversy, have purchased commercially manufactured fertilizer for their own use within said (states) from a defendant, or from an entity owned or controlled by a defendant, either.

(A) directly; or

(B) indirectly under circumstances which are the economic equivalent of a pre-existing cost-plus contract; but

(C) Excluding

i) defendants and entities owned or controlled by any of them;

ii) the state of Oregon and its agencies, political subdivisions and municipalities;

[*3] iii) those whose fertilizer purchases for use within the state of Washington, Oregon, Idaho, and Montana during the period in controversy did not not equal or exceed $500 in cost; and

iv) those whose fertilizer purchases with the State of Alaska during any one year during the period in controversy did not equal or exceed $250 in cost.

The Court then certified the actions as class actions under *Rule 23(b)(3)*, but also ordered further discovery with regard to *Illinois Brick Co. v. Illinois [1977-1 TRADE CASES P61,460], 431 U.S. 720 (1977)*, in order to further delineate the plaintiffs' class. Then, on July 2, 1979, the Court ordered that the following six matters be heard:

(a) delineation of plaintiffs' class in light of Illinois Brick;

(b) defendants' motion for reconsideration of an order concerning certain Illinois Brick issues or for certification for interlocutory appeal;

(c) defendants' motion for summary judgment on the complaints of the State of Alaska and the complaint of Smith and Minoggie;

(d) defendants' motions to dismiss and to strike allegations of fraudulent concealment;

(e) the form of class notice to be approved by the Court; and

(f) plaintiffs' **[*4]** motion to compel discovery.

Each of these matters will be considered separately in the discussion that follows.

Analysis

(a) Delineation of plaintiffs' class in light of Illinois Brick

The discovery in connection with this issue was to be completed within ninety days of the August 9, 1978 order. The period has elapsed, and the parties have filed memoranda in support of their respective positions. The Court is now in a position to decide whether, in light of Illinois Brick, those who bought fertilizer (1) from retailers allegedly controlled by defendants [*], (2) from retailers who sold fertilizer on consignment from defendants, or (3) from cooperatives owned by the purchasers have standing to sue for damages as plaintiffs and thus may be included in the class of plaintiffs to be given notice. For the reasons that follow, those falling within the above-mentioned categories do not have standing to sue for damages and therefore cannot be included in plaintiffs' class.

---

[*] This does not include subsidiaries or outlets wholly owned by defendants. That situation is addressed in part (b) infra .

In Illinois Brick, the Supreme Court ruled that indirect purchasers could not **[*5]** sue antitrust violators for damages. The Supreme Court reasoned that to allow indirect purchasers to sue would create a risk of double recovery, reduce the incentive of direct purchasers to sue, and impose unreasonable burdens on courts because of the difficulties of measuring, tracing, and apportioning damages. The Supreme Court indicated, however, that in situations where complex market interactions were circumvented, the indirect purchasers would be entitled to bring suit. *431 U.S. at 736* & n. 16.

The plaintiffs have not established a factual basis for concluding that defendants somehow control the independent retail companies so as to circumvent the complex interaction of market forces. The affidavits submitted by defendants establish without dispute that the defendants did not control the independent retailers by making decisions as to whom to sell and at what price. Although defendants exert some control over the price charged by the independent retailers in that the retail price is a function of the wholesale price, the retailers decide whether to absorb all or part of the overcharge or to pass on the overcharge. In either case, the independent retailers have a claim **[*6]** for damages either because of the absorbed overcharge or lost profits due to reduced sales from having passed on the entire overcharge. Thus, the Illinois Brick rule requires the exclusion from plaintiffs' class of those who purchased fertilizer from independent retailers.

The same reasoning applies in the situation where purchases were made from independent retailers who hold fertilizer on consignment from defendants. Even assuming that title to the fertilizer passed to plaintiffs directly from defendants and that defendants set the price of the fertilizer sold to plaintiffs, such an arrangement does not circumvent complex market interactions. Although the consignment agreements do give defendants considerable control over the independent retailers, the question under, Illinois Brick is whether an overcharge is borne by the plaintiffs or by some middleman. The agency relationship between defendants and these independent retailers does not mean the independents are not injured by the alleged illegal overcharge either because of lost profits due to reduced sales or because they are required to absorb all or part of the overcharge. There is no evidence that the consignee-independent **[*7]** retailers are paid by the defendant-manufacturers independently of the amount of fertilizer sold. Thus, purchases from the independent dealers who sold fertilizer on consignment from the defendants cannot give the purchasers a basis for claiming damages. Moreover, nothing bars these independent retailers from suing the defendants. To permit those who purchased from these retailers to sue for damages would reduce the incentive of the independent retailers to sue for damages to enforce the antitrust laws, create the risk of double recovery because of the difficulty of apportioning damages, and impose on the Court a considerable burden in tracing and apportioning damages.

Plaintiffs also have not established circumstances sufficient to permit plaintiffs who are members of cooperatives to sue defendants for damages. The cooperatives purchase fertilizer from the defendants. They then sell the fertilizer to the member-patrons and others. The complex interaction of market forces is circumvented to a degree because any loss the cooperatives incur from reduced sales because of passing on the overcharge is suffered indirectly and uniformly by the members of the cooperative in the form **[*8]** of reduced dividends or reduction in capital growth of the cooperative. Any overcharge borne by the cooperative would be passed on to the member-patrons in the same manner. But there remain considerable tracing and apportioning problems. This is because those who are members of the cooperatives purchase fertilizer in varying amounts. Thus, to compensate the ultimate purchasers in an equitable fashion, it must be determined how much, if any, of the alleged overcharge was passed on to the purchasers directly. If all of the overcharge was directly passed on, then those member-patrons who purchased more price-fixed fertilizer than others would receive more compensation than the others. But if all of the overcharge was absorbed by the cooperative, then the member-patrons of the cooperative would receive essentially the same amount of damages, regardless of the amount of fertilizer they purchased individually. Also, fertilizer allegedly price-fixed is mixed with fertilizer that has not been price-fixed, thus creating additional tracing problems as to the damages to be awarded individual purchasers of fertilizer from the cooperatives.

Plaintiffs' argument that the cooperative cannot **[*9]** sue because the cooperatives suffered only indirect injury at the retail level is invalid. The complaint in the present litigation seeks damages for price-fixing at the factory, wholesale, and retail price levels. Nothing prevents the cooperatives from suing for price-fixing at the wholesale level, and although the damage suffered by the cooperatives may be less than that suffered by the member-patrons, that does not prevent the cooperatives from recovering for full overcharge. See P. Areeda & D. Turner, ***Antitrust law***, P337e (1978). That a cooperative may seek recovery for the full overcharge regardless of the amount of the overcharge passed on to the member-patrons also makes irrelevant the plaintiffs' point that cooperatives may not assert the rights of its members under the antitrust laws. Given the problems of apportionment, tracing, and the possibility of double recovery, those purchased from cooperatives can not be permitted to sue merely because they are members of the cooperatives.

(b) Defendants' motion for reconsideration of an order concerning the "ownership or control" exception in Illinois Brick or for certification for interlocutory appeal

On August 9, 1978, **[*10]** the Court ruled that those who purchased or paid for commercial fertilizer from a defendant, or from an entity owned or controlled by a defendant, either (1) directly or (2) indirectly under circumstances that are the economic equivalent of a pre-existing cost-plus contract could be included within plaintiff's class. The defendants contend that this ruling is in error and ask the Court for a redetermination of whether an exception to the Illinois Brick rule exists where the direct purchaser is a wholly owned subsidiary of the defendant.

In Illinois Brick, the Supreme Court indicated that there are exceptions to the rule precluding indirect purchasers from suing for damages in antitrust actions: one is the pre-existing cost-plus contract situation, *431 U.S. at 736*, and "[another] situation in which market forces have been superseded and the pass-on defense might be permitted is where the direct purchaser is owned or controlled by its customers." *Id. at 736 n. 16*. The defendants are, of course, correct in contending that the example of the circumvention of market forces set forth in footnote 16 does not expressly apply to situations where plaintiffs purchase from direct purchaser **[*11]** was completely independent by defendants. And it is true that if the direct purchaser was cmopletely independent from the defendants, only the direct purchaser and not the ultimate purchasers would be permitted to sue the defendants for overcharges under the holding and rationale of Illinois Brick. Yet, the circumvention of complex market forces is the focal point of whether suit may be maintained against sellers who do not sell directly to the buyer, and market forces will be circumvented in a sense by the defendants' ownership of businesses selling fertilizer to the plaintiffs. For three reasons, purchasers of fertilizer from subsidiaries wholly owned by defendants should be allowed to sue defendants for damages.

First, if the direct supplier to the plaintiff-purchaser is owned by the defendant, it is likely that the direct supplier will pass on the overcharge since to fail to do so would reduce the profit the supplier-subsidiary would otherwise make, which the defendant-parent corporation receives directly or indirectly through dividend or increased capitalization of the subsidiary. Presumably, the defendant-parent corporation would make no net gain from the overcharge if **[*12]** the entire overcharge were absorbed by its subsidiary.

Second, if the subsiidary is permitted to sue, to the exclusion of all others, for lost profit due to reduced sales caused by passing on the overcharge partially or completely and/or for damages from absorbing all or part of the overcharge, the defendant will in effect compensate its subsidiary for all damages from the overcharge, including the damages incurred by the plaintiff-purchasers from any overcharge passed on to them. The damages paid to the wholly owned subsidiary constitute an indirect payment by the defendant to itself, thereby defeating an objective of the antitrust laws -- to make anti-competitive activity unprofitable.

Third, to prevent the plaintiff-purchasers from suing would have a deleterious effect on the enforcement of antitrust laws. As noted by the Supreme Court in Illinois Brick, private enforcement of the antitrust laws is essential to the proper functioning of that statutory scheme. See *id. at 745-46*. Although independent retailers may be hesitant to sue their wholesalers for fear of disrupting relations, it is highly unlikely that a subsidiary would sue its parent. Therefore, it is necessary **[*13]** to allow those who purchased from the defendants' subsidiaries to sue for damages. In reaching this same conclusion, the Third Circuit Court of Appeals stated:

To adopt any other view would invite evasion [of the antitrust laws] by the simple expedient of inserting a subsidiary between the violator and the first non-controlled purchaser. The Supreme Court anticipated this situation in Illinois Brick's now famous footnote 16, commenting on exceptions to nonuse of defensive passing on… Mirroring that exception to offensive passing on reflects the situation here where the direct seller is owned by the alleged price fixer.

In re Sugar Industry Antitrust Litigation, 579 F. 2d 13, 19 (3d Cir. 1978). See also *In re Beef Industry Litigation, 1979-2 CCH TRADE CASES P62,802 at 78-676* (August 17, 1979). In a subsequent Third Circuit decision, the court concluded that those who purchased from the defendants' subsidiaries were not entitled to sue for damages. *Midwest Paper Products Co. v. Continental Group, Inc., 596 F. 2d 573, 589 (3d Cir. 1979)*. Although the court in Midwest Paper purported to distinguish its earlier decision, the basis for that distinction is not readily discernible.As **[*14]** a result, the position of the Third Circuit with respect to this question is unclear. However, the reasoning of the In re Sugar Industry Antitrust Litigation decision is sound and will be followed in the present case.

The defendants have moved that the ruling on purchases from subsidiaries wholly owned by defendants be certified for interlocutory appeal. The criteria for certification under *28 U.S.C. § 1292(b) (1976)* are that the district court is of the opinion (1) that the August 9, 1978 order involves a controlling question of law, (2) as to which there is substantial ground for difference of opinion, and (3) that an immediate appeal may materially advance the ultimate termination of the litigation. In essence, the court must weigh the benefits and costs resulting from an immediate appeal.

Whether plaintiffs who purchase fertilizer from subsidiaries wholly owned by defendants may sue defendants for damages under Illinois Brick is clearly a controlling legal question. Resolution of the question will determine whether certain purchasers should be included in the plaintiffs' class and whether the named plaintiffs can in fact sue for damages, and if so, what transactions **[*15]** may be considered for purposes of computing damages. If the Ninth Circuit rules that those who purchase from subsidiaries wholly owned by defendants cannot sue defendants for damages, there may be no remaining plaintiffs, thereby considerably advancing the ultimate termination of the case. There is obviously substantial ground for difference of opinion on this issue as well. Thus, the order will be certified for appeal as a similar order was certified for interlocutory appeal under *28 U.S.C. § 1292(b)* in *Hanover v. United Shoe Machinery Corp., 185 F. Supp. 826, 831* (N.D. Pa.), aff'd, *281 F. 2d 481* (3d Cir.), cert. denied, *364 U.S. 901 (1960)*. It should be noted, however, that discovery with respect to matters unrelated to the issue certified for interlocutory appeal should continue while the appeal is pending.

(c) Defendants' motions for summary judgment

The facts with regard to the State of Alaska are not in dispute. The State of Alaska bases its claim for damages on purchases made by the State through local retailers and purchases made by the University of Alaska from defendant Collier Carbon & Chemical Co. These purchases are not sufficient, however, to give the State **[*16]** of Alaska standing to sue the defendants for damages.

The State of Alaska has not alleged that the retailers from whom it purchased fertilizer were owned or controlled by the defendants or that it bought fertilizer under circumstances that circumvented the complex interactions of market forces. There being no factual dispute that Alaska did not purchase fertilizer directly from defendants or in a manner otherwise circumventing complex interaction of market forces, the State of Alaska is not entitled to sue the defendants for damages on the basis of these purchases. See Illinois Brick Co. v. Illinois, supra.

Nor do purchases made by the University of Alaska give the State of Alaska standing to sue. Although the University of Alaska is an instrumentality of the state, it is an independent corporate entity holding title to all real and personal property conveyed to it, it has the capacity to sue or be sued, and the University's board of regents is responsible for the care, control, and management of all real and personal property and all money of the University. *University of Alaska v. National Aircraft Leasing, Ltd., 536 P. 2d 121, 123 (1975)*. Moreover, it cannot be said that **[*17]** the State of Alaska has incurred damages to the extent that the University of Alaska has, on the theory that the funds used to pay any overcharge came from the State of Alaska, because the University of Alaska receives substantial funds from sources other than the State of Alaska. For instance, in 1974 over one-third of the budget for the University of Alaska came from federal and private sources. Therefore, the State of Alaska cannot be considered a direct or indirect purchaser of fertilizer based on purchases made by the University of Alaska.

The facts concerning the claims of plaintiffs Smith and Minoggie are also undisputed. Vincent Dobbins, who is a tenant farmer on land owned by plaintiffs Smith and Minoggie jointly and plaintiff Smith individually, purchases fertilizer from defendants for use on plaintiffs Smith's and Minoggie's farm land. From gross profit is subtracted the expense of the fertilizer. One-third of the net profit is given to the plaintiffs and tenant farmer Dobbins retains the remaining two-thirds profit. Thus, it is clear that the tenant farmer bears two-thirds of any overcharge by the defendants, and the plaintiffs bear one-third. Apportionment and **[*18]** tracing do not present a problem, and there is no threat of double recovery. The complex interactions of market forces normally associated with the sale of a commodity by an independent middleman are not present because Dobbins is not a middleman. He is not seeking to sell fertilizer to the plaintiffs either for a profit or without regard to profit. There is no evidence that Dobbins billed plaintiffs separately for fertilizer or other evidence to suggest that Dobbins and the plaintiffs treated Dobbins' purchase of fertilizer as a transaction preceding a sale of fertilizer to Smith and Minoggie. Rather, Dobbins, as a tenant farmer, is in effect an agent of the plaintiffs: he buys fertilizer to be used on the plaintiffs' land in order to make a profit for the plaintiffs from which his efforts as a tenant farmer are compensated on a percentage basis. Plaintiffs Smith and Minoggie are not indirect purchasers and, therefore, are entitled to sue the defendants for damages.

(d) Defendants' motions to dismiss and to strike allegations of fraudulent concealment

The issues now being considered were first before the court in 1975 in connection with defendants' motions to dismiss, to **[*19]** strike, or to compel a more definite statement with respect to all plaintiffs' claims that arose more than four years before the plaintiffs filed their complaints. In its Memorandum and Order of December 3, 1975, the Court concluded that "dismissing or striking the claims antedating four years of filing would not be proper at this stage of the litigation. Instead, plaintiffs may amend to adequately plead fraudulent concealment if they can do so." Shortly thereafter, the plaintiffs filed their first amended complaint, and on January 16, 1976, defendants again moved to dismiss and to strike the fraudulent concealment allegations. Finally, in April of 1979, the plaintiffs filed their second amended complaint, and the defendants renewed their motions to dismiss and to strike by filing the present motions.

The plaintiffs seek to invoke the doctrine of fraudulent concealment in order to avoid the four-year statute of limitation for actions under federal ***antitrust law***. In support of their claim, plaintiffs have alleged that they did not discover the defendants' unlawful activities until just prior to filing the complaints for two reasons: first, the unlawful activities were self-concealing, **[*20]** and second, the defendants acted affirmatively to prevent disclosure of the defendants' unlawful activities.

The plaintiffs have failed to state with particularity the circumstances giving rise to the defendants' alleged self-concealing conduct. Thus, the Court cannot determine whether, through the exercise of ordinary diligence, the plaintiffs might have discovered the defendants' alleged unlawful activities at an earlier time. In other words, the allegation of fraudulent concealment based on conduct that was self-concealing remains conclusory and thus defective under *Rule 9(b), Federal Rules of Civil Procedure*. Cf. *Hall v. E. I. DuPont De Nemours & Co., 312 F. Supp. 358, 362 (E.D.N.Y. 1970)* (mere non-disclosure or denial does not constitute fraud or deceit for tolling purposes; otherwise, the tolling exception to the statute of limitations would eclipse the basic statute itself).

As for the affirmative acts of concealment, the plaintiffs have pleaded in subparagraph (f) of paragraph 31 of their complaint:

(f) there were affirmative acts of concealment by defendants including

(1) the submission of bids which were required to be competitive, had the appearance of regularity **[*21]** and were by their submission represented to be competitive and regular, but which in fact were not;

(2) falsely signing non-collusion affidavits and/or certificates of regularity;

(3) making false and misleading statements concerning the cause of and justification for prices and price increases and the existence of shortages; and

(4) other acts presently unknown to plaintiffs.

These specific acts of concealment do not, however, constitute fraudulent concealment or conduct that is pleaded with sufficient particularity to meet the requisites of *Rule 9(b)*. Bids that had the appearance of regularity and their submission, which allegedly inferred that the bids were complete and regular, are not affirmative acts aimed at fraudulent concealment of anticompetitive conduct; such acts are at best passive conduct of concealment, if not simply silence. The submission of bids is merely failure to disclose the existence of a possible claim for relief, and that does not constitute an affirmative act of concealment. See *Suckow Borax Mines Consolidated v. Borax Consolidated, Ltd., 185 F. 2d 196, 209 n. 10 (9th Cir. 1950)*, cert. denied, *340 U.S. 943 (1951)* (an answer to an accusation of **[*22]** wrongdoing that is, in practical effect, no more than a failure to disclose the existence of a cause of action does not constitute fraudulent concealment, and the statute of limitations is not suspended merely by reason of the plaintiffs' ignorance of or failure to discover the existence of the cause of action). Similarly, falsely signing non-collusion affidavits or the like is not sufficient to permit an inference that the plaintiffs, who are not insensitive to the implications of the antitrust laws nor naive about the conduct of antitrust violators, would be significantly influenced by a simple denial of wrongdoing. In short, under the circumstances of the present case, such conduct would not lead a reasonable person to believe that he did not have a claim for relief, and, therefore, cannot serve as a basis for invoking the doctrine of fraudulent concealment. See *Rutledge v. Boston Woven Hose & Rubber Co., 576 F. 2d 248, 250 (9th Cir. 1978)*. In addition, signing non-collusion affidavits or certificates, of regularity amount to no more than a denial of wrongdoing, which does not constitute fraudulent concealment. *King & King Enterprises v. Champlin Petroleum Co., 446 F. Supp.* ***[*23]*** *906, 912 (E.D. Okla. 1978)*. Finally, the allegations of false and misleading statements are inadequate under *Rule 9(b)* because they are no more than conclusory allegations; plaintiffs have not identified the content of the statements, who made the statements, or when statements were made.

There are two additional reasons for granting defendants' motion to strike the allegations of fraudulent concealment. First, the plaintiffs have not stated when the alleged fraudulent concealment was discovered or what that discovery was, as expressly required by the Court in its Memorandum and Order of December 3, 1975.

Even under modern liberal rules of pleading "justice" still requires that a plaintiff seeking to escape the statute in such a case [fraudulent concealment] shall make "distinct averments as to the time when the… concealment… was discovered, and what the discovery is, so that the Court may clearly see, whether by the exercise of ordinary diligence, the discovery might not have been before made."

Moviecolor Ltd. v. Eastman Kodak Co., 288 F. 2d 80, 88 (2d Cir. 1961). The plaintiffs have stated that they discovered the existence of their cause of action in a report published **[*24]** by the Canadian Province of Manitoba, but they have not averred the information required by the Court in connection with the discovery of the alleged concealment.

Second, the plaintiffs have failed to explain how the facts that motivated them to file their complaint were not available to them at an earlier date, and whether or not the unavailability of such facts flowed from the defendants' conduct. This was also required by the Court in its Memorandum and Order of December 3, 1975. Although the plaintiffs alleged that they discovered the facts of a possible antitrust violation in the Manitoba report, which coucerned an investigation into the manufacture, distribution, and pricing of chemical fertilizers, there is no explanation of why the report was not discovered until nearly two years after it was published. The inference to be drawn is that plaintiffs were not diligent in discovering the basis for their claim of relief. In this type of situation, the plaintiffs cannot reply on the doctrine of fraudulent concealment to avoid the statute of limitations. See *Willmar Poultry Co. v. Morton-Norwich Products, 520 F. 2d 289, 295-96 (8th Cir. 1975)*, cert. denied, *424 U.S. 915 (1976)*; **[*25]** *Gaetzi v. Carling Brewing Co., 205 F. Supp. 615, 623 (E.D. Mich. 1962)*. In addition, the plaintiffs have not alleged that the information in the Manitoba report was not otherwise available to them prior to its publication.

The plaintiffs have been given adequate opportunity, but have failed to plead fraudulent concealment with the specificity required by *Rule 9(b)* and have failed to explain why they could not have discovered the cause of action or the concealment earlier. It is, therefore, proper to strike the allegations of fraudulent concealment and dismiss those claims antedating the fouryear period preceding the filing of plaintiffs' complaint.

(e) Form of class notice

This Court has enlisted the aid of counsel in the preparation of the notice to be given members of the class. The forms of notice proposed by the plaintiffs and the defendants meet the general requirements of *Rule 23(c)(2), Federal Rules of Civil Procedure*, but both are inadequate as formulated.

The form of notice proposed by plaintiffs assumes that resolution of the Illinois Brick issues addressed earlier in this Memorandum and Order would be deferred, perhaps until trial, and that fraudulent concealment **[*26]** tolls the statute of limitations. Neither assumption is correct, and the plaintiffs' proposed form of notice is, therefore, inconsistent with the rulings of this Court.

The form of notice proposed by the defendants contains a section requiring members of plaintiffs' class to file a statement of claim prior to litigation or be barred from recovery. Requiring class members to submit a statement of claim, as proposed by defendants, under pain of being barred from any recovery is tantamount to requiring class members to opt into this class action. Such a requirement is inappropriate and contrary to the majority view which postpones the requirement of filing a statement and proof of claim until after liability has been established. See Manual for Complex Litigation, § 1.45 at 37-38 (1973).

In all other respects, the defendants' proposed form of notice is acceptable. The form of notice permits incorporation of the rulings concerning the Illinois Brick issues by listing on the reverse side of the notice the entities (other than the defendants) from which purchases will permit a suit for damages. Thus, on the reverse side can be listed the retailers of fertilizer that are subsidiaries **[*27]** wholly owned by defendants. Notice will not be disseminated, however, until after the Ninth Circuit reviews the matter certified for interlocutory appeal.

(f) Plaintiffs' motion to compel discovery

The plaintiffs move for an order compelling answers to (1) interrogatories concerning occurrences taking place on or after January 1, 1965 affecting a geographic region composed of fourteen states and four Canadian provinces and (2) testimony by defendants J. R. Simplot Co., Inc. and Cominco American, Inc. concerning occurrences that took place on or after January 1, 1965. Defendants argue that discovery should be limited to a time period beginning on January 1, 1970 and to a geographic area consisting of the five Northwestern states involved in this action.

The plaintiffs are correct in contending that *Rule 26(b), Federal Rules of Civil Procedure*, has been liberally interpreted to permit broad discovery limited only by the requirement that the material or information sought be somehow remotely relevant to the general subject matter involved in the action. But the Federal Rules of Civil Procedure, including *Rule 26(b)*, "shall be construed to secure the just, speedy, and inexpensive **[*28]** determination of every action." *Fed. R. Civ. P. 1*. In keeping with the Rules of Civil Procedure and in the interest of facilitating the progress of this litigation, the plaintiffs' motion must be carefully scrutinized.

Plaintiffs have not advanced a persuasive reason for allowing discovery concerning occurrences taking place on or after January 1, 1965. They argue that the information they seek to discover is relevant to their claims of antitrust violations preceding the four-year statute of limitation because fraudulent concealment tolls the statute of limitation. But, as indicated previously in this Memorandum and Order, the claims based on events preceding the statute of limitations period are to be dismissed with prejudice. The plaintiffs also cite cases where courts have held that discovery can go beyond the period for damages permitted by the statute of limitations. See, e.g., *Quonset Real Estate Corp. v. Paramount Film Distributing Corp., 50 F.R.D. 240, 242 (S.D.N.Y. 1970)*. Yet other courts have recognized the need to limit the time frame of discovery. See, e.g., *Professional Adjusting Systems of America, Inc. v. General Adjustment Bureau, Inc., 373 F. Supp. 1225, 1228* ***[*29]*** *(S.D.N.Y. 1974)*. In balance, the plaintiffs have not presented sufficient justification for the burden that would be placed on the defendants and the court by extending the time frames for discovery. However, this conclusion does not preclude requests for discovery into matters occurrring on or after January 1, 1965 if a specific need can be demonstrated.

The plaintiffs' request for information concerning an area composed of four Canadian provinces and nine states in addition to Alaska, Idaho, Montana, Oregon, and Washington must also be denied. Only the five named states are involved in this litigation as parties. The alleged conspiracy involves only the above-named states and the four Canadian provinces. The request for information concerning states adjacent to the northwestern states to the south and east does not appear relevant to establishing antitrust violations and the results thereof, at least to the degree necessary to counterbalance the undue burden, delay, and possible obfuscation of issues that would result if such discovery were compelled. Other courts have not hesitated to restrict the geographic scope of discovery where such action was warranted. See, e.g., **[*30]** *Professional Adjusting Systems of America, Inc. v. General Adjustment Bureau, supra, at 1228*; *William Goldman Theatres, Inc. v. Metro-Goldwin-Mayer, Inc., 54 F.R.D. 201, 202 (E.D. Pa. 1971)*. As for the discovery of information concerning the Canadian provinces, the plaintiffs have alleged in their complaints that the conspiracy included the sales of fertilizer in four particular Canadian provinces. The defendants need not produce documents physically located in Canada, however, in order to prevent a possible conflict with Canada resulting from the Court's exercise of its power to compel discovery.

The defendants have stated that they would have this Court limit initial discovery to the geographic area composed of Alaska, Washington, Oregon, Montana, and Idaho,... and the period from January 1, 1970 through June 11, 1975, the four year statute of limitations period plus a one and one-half year period for "background" information. Defendants recognize that these initial limitations on discovery are not absolutes, and that one or more plaintiffs may have a particularized need for specific information outside these limits.

Defendants' Joint Memorandum in Opposition to Plaintiffs' **[*31]** Motions for Leave to Compel Discovery and to Propound Document Requests at 5. The limitation proposed by the defendants is reasonable, with the clarification that information that the defendants have within the five-state northwest region concerning the four Canadian provinces is discoverable. The burden on the defendants and the Court that would be caused by adopting the scope of discovery requested by the plaintiffs, the delay and possible obscuring of issues, and the possible frustration of antitrust goals are not outweighed by the remote relevance, if any, of that sought to be discovered by the plaintiffs. Therefore, their motion must be denied, but without prejudice.

It Is Ordered:

1. The plaintiffs' class is further delineated to exclude those who purchased fertilizer (a) from independent retailers, (b) from retailers who sold fertilizer on consignment from defendants, and (c) from cooperatives owned by the purchasers.

2. The order of August 9, 1979 permitting those who purchased commercial fertilizer from a defendant, or an entity owned or controlled by a defendant, either directly, or indirectly under circumstances that are the economic equivalent of a preexisting **[*32]** cost-plus contract is reaffirmed, and the matter is certified for interlocutory appeal pursuant to *28 U.S.C. § 1292(b) (1976)*.

3. Defendants' motion for summary judgment pursuant to *Rule 56, Federal Rules of Civil Procedure*, with respect to claims made by the State of Alaska is granted, and the State of Alaska's complaint and cause of action are dismissed. Defendants' motion for summary judgment pursuant to *Rule 56, Federal Rules of Civil Procedure*, with respect to claims made by plaintiffs Smith and Minoggie is denied.

4. Defendants' motion to strike allegations of fraudulent concealment is granted. Defendants' motion to dismiss claims antedating the four-year period preceding the filing of plaintiffs' complaint is granted, and the complaint and action with respect to those claims are dismissed.

5. The form of notice proposed by the defendants with the deletion of section IV of that form of notice is adopted for purposes of *Rule 23(b)(2), Federal Rules of Civil Procedure*. The notice to class members shall be disseminated following review of order numbered 2 above by the Ninth Circuit Court of Appeals on interlocutory appeal.

6. Plaintiffs' motion to compel discovery **[*33]** is denied.

Section 7 of the Clayton Act, 15 U.S.C.S. § 18, only extends to acquisitions made by corporations. 15 U.S.C.S. § 18.

Antitrust & Trade Law > Clayton Act > General Overview

HN3[] **Antitrust & Trade Law, Clayton Act**

A corporation may be found to be in violation of Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, where the stockholders make purchases on behalf of the corporation.

Antitrust & Trade Law > Clayton Act > General Overview

HN4[] **Antitrust & Trade Law, Clayton Act**

See *15 U.S.C.S. § 18*.

Antitrust & Trade Law > Clayton Act > General Overview

HN5[] **Antitrust & Trade Law, Clayton Act**

Once a defendant demonstrates to the court that a stock purchase is solely for investment, then the burden is upon the plaintiff to prove that the defendant is not covered by the investment exemption under *15 U.S.C.S. § 18*.

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN6[] **Antitrust & Trade Law, Clayton Act**

The following 2-pronged test is used to determine whether a stock acquisition falls under the investment exception to the Clayton Act, *15 U.S.C.S. § 18*: (1) a factual determination of whether the acquisition is made solely for investment; and (2) a factual determination of whether the stock is being used by voting or otherwise to bring about or attempt to bring about a substantial lessening of competition.

Antitrust & Trade Law > Clayton Act > General Overview

HN7[] **Antitrust & Trade Law, Clayton Act**

To determine whether a stock acquisition is made solely for the purposes of investment, the court looks to whether the stock is purchased for the purpose of taking over the active management and control of the acquired company.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN8[] **Relevant Market, Product Market Definition**

The Clayton Act, *15 U.S.C.S. § 18*, only prohibits acquisitions where the effect may be substantially to lessen competition, in any line of commerce in any section of the country. Accordingly, the court is first required to determine the relevant market, the area of effective competition. This determination is to be made by reference to a product market ("the line of commerce") and a geographic market ("the section of the country").

Antitrust & Trade Law > Clayton Act > General Overview

HN9[] **Antitrust & Trade Law, Clayton Act**

In determining whether the subject acquisition violates § 7 of the Clayton Act, *15 U.S.C.S. § 18*, a plaintiff must show that the particular acquisition is reasonably probable to effect a substantial lessening of competition or tend to create a monopoly. The court is required to look to the probable future effects of the acquisition.

Antitrust & Trade Law > Clayton Act > General Overview

HN10[] **Antitrust & Trade Law, Clayton Act**

A prima facie case of an antitrust violation is made out only if there is also proof that the industry is one where concentration is already great or has been recently increasing.

Opinion

[*1096] MEMORANDUM OF DECISION AND ORDER OF JUDGMENT FOR DEFENDANTS

Defendant Tracinda Investment Corporation (hereinafter "Tracinda") is a Nevada corporation, the stock of which is owned entirely by defendant Kirk Kerkorian (hereinafter "Kerkorian") with Kerkorian serving as its only Director. Kerkorian owns approximately 6% Of the outstanding common stock of Metro-Goldwyn-Mayer, Inc. (hereinafter MGM). Tracinda owns approximately 42% Of MGM's common stock. Thus, Kerkorian, individually, and through Tracinda, owns approximately 48% Of MGM's common stock and is its controlling shareholder.

As of November 17, 1978, Kerkorian owned 490,700 shares of the common stock of Columbia Pictures Industries, Inc., (hereinafter "Columbia"), representing approximately five percent (5%) of Columbia's outstanding common stock. On or **[**2]** about December 26, 1978, Tracinda commenced a tender offer for approximately 1,750,000 shares of the common stock of Columbia, representing approximately nineteen percent (19%) of Columbia's outstanding common stock. Tracinda's tender offer for Columbia stock was consummated on or about January 16, 1979. As a result of the tender offer and subsequent purchases, Kerkorian individually and through Tracinda now owns 2,438,700 shares of Columbia's common stock, representing approximately twenty-five percent (25%) of Columbia's outstanding common stock.

In January, 1979, plaintiff had originally sought a Temporary Restraining Order staying the Tracinda tender offer, alleging violation of Section 7 of the Clayton Act. *15 U.S.C. § 18*. [1] **[**3]** This Court denied that application for

---

1. ***HN1***[] *15 U.S.C. § 18* in pertinent part provides:

Temporary Restraining Order **[*1097]** and Motion for Preliminary Injunction, [2.] but allowed plaintiff leave to amend its complaint to seek divestiture of the Columbia stock held by Tracinda. Plaintiff did amend its complaint to seek divestiture, still basing this action upon an alleged violation of Section 7 of the Clayton Act.

Court trial in this action commenced on August 1, 1979, and ended August 14, 1979. Having heard the testimony of the witnesses, having read the pleadings and all relevant papers in support of and in opposition to this action, having reviewed the evidence presented in this action and having heard from counsel for plaintiff and counsel for defendants, this court now enters its Memorandum of Decision and Order for Judgment, which shall constitute its findings of fact and conclusions of law herein pursuant to *Rule 52(a), F.R.Civ.P.*

NON-CORPORATE DEFENDANT

Plaintiff's First Amended Complaint names as defendants herein Tracinda and Kerkorian. The prayer of that complaint asks this Court to adjudge the acquisition of Columbia stock by Kerkorian And Tracinda to be in violation of Section 7 of the Clayton Act and to order Kerkorian And Tracinda to divest themselves of Their stock in Columbia. ***HN2***[] Since Section 7 of the Clayton Act only extends to acquisitions made by corporations, *Hudson Valley Asbestos Corporation v. Tougher Heating **[**4]** & Plumbing Co., Inc., 510 F.2d 1140, 1145 (2d Cir. 1975)*; *GAF Corporation v. Circle Floor Co., 329 F. Supp. 823, 829 (S.D.N.Y.1971)*, *Aff'd 463 F.2d 752 (2d Cir. 1972)*, Cert. dismissed *413 U.S. 901, 93 S. Ct. 3058, 37 L. Ed. 2d 1045 (1973)*, the first question to be confronted by this Court is whether plaintiff may properly seek divestiture under Section 7 of the Clayton Act of the Columbia stock personally purchased and owned by Kerkorian.

HN3[] A corporation may be found to be in violation of Section 7 where the stockholders made purchases on behalf of the corporation. GAF Corporation v. Circus Floor Co., supra. This case, however, does not present such a situation. Plaintiff did not allege, nor was there any evidence presented, that Kerkorian acquired any Columbia stock on behalf of Tracinda or any other corporation or that his personal acquisitions are otherwise attributable to Tracinda or any other corporation. Moreover, in its complaint, plaintiff only alleges the 19% Acquisition by Tracinda to be a violation of Section 7 and is silent in this respect upon the acquisitions by Kerkorian. [3.] Accordingly, plaintiff

---

No corporation engaged in commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no corporation subject to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of another corporation engaged also in commerce, where in any line of commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly.

No corporation shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no corporation subject to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of one or more corporations engaged in commerce, where in any line of commerce in any section of the country, the effect of such acquisition, of such stocks or assets, or of the use of such stock by the voting or granting of proxies or otherwise, may be substantially to lessen competition, or to tend to create a monopoly.

[2.] *United States v. Tracinda Inv. Corp., 464 F. Supp. 660 (C.D.Cal.1979)*.

[3.] The Government's First Amended Complaint provides in pertinent part:

"V.

VIOLATION ALLEGED

17. The effect of the acquisition alleged in paragraph 6 may be substantially to lessen competition or to tend to create a monopoly in the aforesaid interstate trade and commerce in violation of Section 7 of the Clayton Act in the following ways, among others:

a. Actual and potential competition between MGM and Columbia will be substantially lessened; and

b. Concentration will be increased to the detriment of actual and potential competition."

Paragraph 6 alleges:

has not stated sufficient facts, nor presented evidence, upon which relief **[**5]** may be granted against defendant Kerkorian and, in respect to this defendant, the complaint is hereby dismissed for lack of jurisdiction. Thus this action may be properly maintained only for divestiture of the 19% Of Columbia stock acquired by Tracinda.

[6]** Even if the personal acquisitions by Kerkorian were properly before this Court, since each of the findings of fact and conclusions of law reached by this Court and contained herein apply equally to Tracinda And to Kerkorian, this Court must nevertheless **[*1098]** order judgment in favor of Kerkorian as well as Tracinda. Thus the findings and conclusions set forth below apply and cover both defendants in this action.

INVESTMENT EXEMPTION

Section 7 of the Clayton Act does not condemn every acquisition that may result in the prohibited anticompetitive consequences. An acquisition may escape a challenge under Section 7, even though it may be in violation of the section's substantive provisions, if it falls within the specific exemptions provided for in Section 7, one of which provides that acquisitions of stock where the acquisition is made solely for purposes of investment are not included in the prohibition of Section 7. [4.] 2 Von Kalinowski, Antitrust Laws and Trade Regulations § 15.03. Furthermore, it is necessary to make a clear distinction between an exemption and a defense. 7 Von Kalinowski, Supra., § 44.01(2). Some courts have made this distinction, noting that this provision **[**7]** constitutes an exemption rather than a defense, United States v. du *Pont & Co., 353 U.S. 586, 589, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957)*; *Anaconda Co. v. Crane Co., 411 F. Supp. 1210, 1218 (S.D.N.Y.1975)*, while another Court has failed to make this distinction, *Gulf & Western Indus., Inc. v. Great A. & P. Tea Co., Inc., 476 F.2d 687, 693 (2d Cir. 1973)*. In view of the specific language of this section it would appear that the former cases are correct.

HN5[] Once a defendant has demonstrated to the Court that a stock purchase was solely for investment, then the burden is upon the plaintiff to prove that the defendant is not covered by the investment exemption. As stated in *Anaconda Co. v. Crane Co., [**8] 411 F. Supp. 1210, 1219 (S.D.N.Y.1975)*:

> In cases where the "solely for investment" exemption does not apply, a plaintiff need only show a reasonable probability of a lessening of competition. . . . Thus the anti-competitive effects may be attacked in their incipiency. The statutory exemption, however, conspicuously omits this language. Once it is established to the satisfaction of the Court that the acquisition is "solely for investment," the statute requires a showing that the defendant is "using the (stock) by voting or otherwise to bring about or in attempting to bring about, the substantial lessening of competition . . . ."

Thus, whenever the pleadings of the parties and the evidence adduced at trial in a Section 7 action bring forth facts which reasonably support a determination that the purchase of stock was "solely for investment," then this exemption issue must be addressed by the Court, regardless of whether it has been raised as an affirmative defense by defendants.

Here plaintiff submitted as Exhibit 262, the "Stockholders' Agreement" a contract entered into by Kerkorian and Tracinda, and by Columbia, at the time the tender offer was extended. This contract **[**9]** specifically recites that the acquisition of Columbia stock was "solely for investment" and "not with a view to exercising control over the Company" (Columbia). This contract also limits the extent to which Kerkorian may utilize the newly acquired stock, specifically providing that in a shareholders vote for directors, Kerkorian shall vote his stock in favor of the nominees for election of directors as proposed by the management of Columbia, and shall cast this vote proportionately to the other shares present at the meeting and voting in favor of such nominees. Additionally, the contract places a limit on Tracinda and Kerkorian's Columbia stock ownership at 25.5%. Accordingly, this contract

---

"6. On or about December 26, 1978, defendant Tracinda began its tender offer for approximately 1,750,000 shares of the common stock of Columbia Pictures Industries, Inc. (hereinafter referred to as "Columbia'), representing approximately 19% Of Columbia's outstanding common stock. The tender offer is scheduled to be consummated on or about January 16, 1979."

4. ***HN4***[] *15 U.S.C. § 18* in pertinent part provides in the first sentence of paragraph three thereof:

This section shall not apply to corporations purchasing such stock solely for investment and not using the same by voting or otherwise to bring about, or in attempting to bring about, the substantial lessening of competition.

in and of itself raises the issue of the investment exemption in the first sentence of the third paragraph of Section 7 of the Clayton Act, which the Court is then required to determine at the onset, before it **[*1099]** takes up or engages in any meaningful examination of the substantive prohibitions contained in the first and second paragraphs of Section 7.

In discussing this investment exemption, the cases have not specifically used any particular approach. The statute and the cases, however, **[**10]** do support ***HN6***[] a 2-pronged test: (1) a factual determination of whether the acquisition was made solely for investment; and (2) a factual determination of whether the stock is being used by voting or otherwise to bring about or attempt to bring about a substantial lessening of competition. United States v. du *Pont & Co., supra*; *Pennsylvania R. Co. v. Interstate Commerce Commission, 66 F.2d 37, 39-40 (3d Cir. 1933)* Aff'd per curiam, *291 U.S. 651, 54 S. Ct. 559, 78 L. Ed. 1045 (1934)*; *Swift & Co. v. Federal Trade Commission, 8 F.2d 595, 599 (7th Cir. 1925)*; *Anaconda Co. v. Crane Co., supra, at 1218-1219*; *Hamilton Watch Co. v. Benrus Watch Co., 114 F. Supp. 307, 314 (D.Conn.1953)*.

Before the Court can make a determination of whether the stock acquisition here was made solely for the purpose of investment, it is necessary to determine what is meant by the term "investment" as used in the context of Section 7. In one case it was noted that the word "investment" is one of broad application, including in its various uses purchases of practically every kind and description and for every purpose. It ordinarily signifies the use of money to purchase property, personal or real, for any purpose from **[**11]** which income or profit is expected, presently or in the future, speculatively or permanently. [5.] **[**12]** *Pennsylvania R. Co., v. Interstate Commerce Commission, supra, at 39*. The factors courts have viewed to make this factual determination are as varied as the extent of human endeavor. Courts have looked at such factors as subsequent agreements restricting the use of the newly acquired stock, *Anaconda Co. v. Crane Co., supra, at 1218*; and the extent to which the defendant already maintains a diversified investment portfolio as well as the price paid for the stock in comparison to the market value of the stock. *Hamilton Watch Co. v. Benrus Watch Co., 114 F. Supp. 307, 316 (D.Conn.1953)*. The ultimate definitive factor ***HN7***[] the courts have looked to, however, is whether the stock was purchased for the purpose of taking over the active management and control of the acquired company. [6.] *Anaconda Co. v. Crane Co., supra, at 1218-19*; *Hamilton Watch Co. v. Benrus Watch Co., supra, at 316*; *United States v. Wilson Sporting Goods Co., 288 F. Supp. 543, 556 (N.D.Ill.1968)*; Gulf & Western Indus., Inc. v. Great A. & P. Tea Co., Inc., supra, at 674; *Swift & Co. v. Federal Trade Commission, supra, at 598*.

Acquiring the stock of a company for the purpose of control and acquiring the stock for the purpose of investment are not necessarily inconsistent, nor are they mutually exclusive concepts in the practical business world. The use of these concepts in the context of Section 7, however, must be restrained by the legislative intent of that statute. The purpose of Section 7 was to arrest combinations in their incipiency and before consummation. United States v. du **[*1100]** *Pont & Co., supra, 353 U.S. at 597, 77 S. Ct. 872*. **[**13]** Where by stock acquisition one corporation controls another, a combination of the two companies is necessarily created. Where control is nonexistent, there is no combination. Accordingly, in the context of a Section 7 action, this control-investment distinction is not only a valid dichotomy, but is a most useful judicial tool in tackling the investment exemption issue.

---

5. The Government asserts that the test for "investment" should turn solely on whether the effect of the acquisition is or may be substantially to lessen competition. Such an interpretation would give absolutely no meaning to the 2-pronged specific language Congress deliberately chose to include in the investment exemption and it would completely obliterate the investment exemption. Thus this Court doubts the validity of such an approach. In view of this Court's conclusions in respect to the effect of this acquisition, even if this approach were taken, the Court's decision for defendants herein would not change on this investment exemption issue.

6. This is not to say that the only two possible purposes are investment or control. In United States v. du *Pont & Co., 353 U.S. 586, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957)*, the Court found that the acquisition by du Pont of General Motors stock was not made solely for investment based upon du Pont's use of its General Motors stock position to remain a major supplier to General Motors. In the present action, however, since the Government's position is that defendants purchased this stock for control as opposed to investment, this control-investment distinction is relevant.

We find that there has been absolutely no showing that the stock acquisition herein in question was made for the purpose or even with the slightest intent of controlling Columbia. The evidence clearly shows that both Kerkorian and Tracinda made their stock acquisitions solely for investment, and with no intention of controlling Columbia. Central to this finding is the already mentioned contract between the defendants and Columbia, placing in concrete written form the assurances Kerkorian and Tracinda had previously orally given to the Columbia directors and management. We also properly rely upon and cite Kerkorian's reaffirmation of that contract during his testimony at the trial.

The contract bears a striking resemblance to the consent order submitted by the defendants in the case of *Anaconda Co. v. Crane Co., 411 **[**14]** F. Supp. 1210 (S.D.N.Y.1975)*. That case arose out of an offer by Crane Company to exchange certain subordinate debentures to be issued by it for five million common shares (22.6%) of the Anaconda Company, a corporation which owned a major competitor of Crane. In response to an action filed by Anaconda to restrain that offer, Crane submitted a consent order providing that Crane would be limited to the 22.6% Acquisition and that Crane would not seek representation on the Board of Directors of Anaconda. *Id. at 1217*. On the basis of the consent order, the Court in that case determined that Crane did intend to hold the Anaconda stock solely as an investment. *Id. at 1218*.

As in the Anaconda case, the defendants here have voluntarily restricted themselves in the amount of stock they can acquire and in the extent to which they may utilize their stock to vote for directors. Moreover, unlike the Anaconda case where the consent order was submitted only after the offer was challenged, the contract here was agreed to well before Court action was instituted herein, and serves as even stronger evidence that at the time of the acquisition, the stock purchase was made solely for investment.

The Government **[**15]** attempts to rebut this overwhelming demonstration by arguing that the contract, upon defendants' insistence, will expire in three years. [7.] The Government claims that defendants' insistence upon this time limitation shows an intent other than solely for investment. Additionally, the Government asserts that since the defendants will be free of these restrictions at the end of the three year period, they are of little effect and the Court should make a determination based upon the circumstances that will exist After the termination of the three year period. The fact that this contract will last three years, as opposed to ten, twenty or fifty years, bears very little weight upon the ultimate determination of intent at the time of acquisition, although the Court does take it into consideration. Defendants' willingness to enter into any such agreement providing for such restrictions for a reasonable period of time clearly shows defendants' intent at the time of the acquisition. There is no special magic to a ten year or a five year or even a three year commitment. Furthermore, the fact that Kerkorian wanted a definite time limit only shows that he did not wish to be restricted in perpetuity, **[**16]** foreclosing all choices in the future. An unwillingness so to restrict oneself in order to maintain some flexibility is not inconsistent with a present intent to purchase solely for investment. Furthermore, this Court will not engage in the **[*1101]** guessing game argued by the Government. We do not know, in fact no one knows or can know, what conditions will exist upon the termination of this contract, and we refuse to base any judgment on pure speculation. [8.]

[17]** The Government further argues against the applicability of the investment exemption here by pointing to a consultation provision in the Stockholders' Agreement. This provision requires Columbia to consult with Kerkorian on certain major and material financial matters and any changes in top management. The Government seems to argue that this shows an intent to control, and that through such consultation and other business and social meetings Kerkorian will or could dominate the present directors and management to such an extent that he would control Columbia. The Government, however, ignores that portion of the Agreement that provides that "(n)othing in

---

[7.] Columbia wanted the restrictions to last ten (10) years. The defendants would only agree to a three (3) year period.

[8.] The Government also pointed out that the restrictions on Kerkorian and Tracinda could terminate at any time because the contract provides for an early termination in the event of the withdrawal of certain key managerial persons from employment at Columbia. Yet here again for the Court to base its judgment on this possibility would call for speculation: speculation concerning whether these key persons will ever withdraw, and speculation concerning the conditions that would exist at the time of any such withdrawal. Actually, this contract provision gives us further evidence of defendants' investment intent, since it clearly illustrates defendants' undoubted commitment and loyalty to the present management of Columbia.

this section shall limit the absolute and unfettered discretion of (Columbia) after such advice and consultation to act on such matters in any manner it deems appropriate." Plaintiff's Exhibit 262, at p. 5. This provision clearly convinces us that the power to control always has been, now is, and will continue to be in the present top management and Board of Directors. Furthermore, a consultation provision such as this one is not inconsistent with a present intent that the acquisition is solely for investment. Any substantial investor, **[**18]** acting reasonably, would want to be kept informed about the possible major financial and top management changes contemplated in any corporation where he has placed his money.

Likewise, the Court gives little credence to the second main thrust of plaintiff's argument here, that Kerkorian will control Columbia through his influence over the present management and directors of Columbia. The Court has had the opportunity to observe two members of this group testifying during the course of this trial, Francis T. Vincent, Jr., President of Columbia, and Herbert A. Allen, a member of the Board of Directors of Columbia. Both of these men are confident, intelligent, articulate, self-assured, alert and responsible men. It is inconceivable to this Court how anyone could argue that these men could be mere "toadies" or "lackies" serving anyone, even Kerkorian. It is true that both of these men testified that they will listen to Kerkorian's advice and consultation. This inclination, however, is not the result of Kerkorian's stock position, but is in recognition of Kerkorian's vast knowledge and experience in the business world. [9.] Accordingly, the uncontradicted evidence clearly shows that the **[**19]** stock acquisition in question was made solely for investment purposes and was not made with any intent to take over active managerial control of Columbia, or for any purpose other than investment.

As to the second prong of the investment exemption test, there can be no doubt. The Government failed to produce a single scintilla of evidence to show **[**20]** that Kerkorian has used, is using, or is threatening **[*1102]** to use, the stock by voting or otherwise, to bring about or in attempting to bring about, the substantial lessening of competition. [10.] On the contrary, all the witnesses testified that there has been no actual or threatened lessening of competition since the acquisition. Accordingly, it is the determination of this Court that this acquisition of Columbia stock comes squarely within the investment exemption and thus no violation of Section 7 of the Clayton Act can be shown. And in fact none has been shown.

[21]** POTENTIAL ANTICOMPETITIVE EFFECTS

This Court could but does not rest its decision and judgment solely on the investment exemption. The evidence clearly has shown that there will be no reasonably probable anticompetitive effects of the acquisition in question. In arriving at this conclusion it is necessary to review the evidence and applicable law with respect to the substantive prohibitions contained in the first two paragraphs of Section 7.

A. INTERFACE BETWEEN COLUMBIA AND MGM

Columbia is engaged in the production and distribution of theatrical motion pictures, television series and features, and phonograph records and tapes. Columbia also manufactures and sells amusement games through its Gottlieb

---

[9.] When one considers that even if divestiture were granted with respect to the Tracinda stock, Kerkorian would still be a substantial stockholder with 5% And as such would have access to the management in order to voice his opinion, the Government's position that the additional 19% Of Columbia stock gives Kerkorian a greater voice is absurd in view of the stature of the people in the management of Columbia. Indeed the acquisition by Tracinda actually undermines Kerkorian's position since the Stockholders' Agreement restricts the use of Kerkorian's stock, as well as Tracinda's, while prior to that Agreement there were no restrictions on Kerkorian's personal holdings.

[10.] In the substantive provisions of the first two paragraphs of Section 7, Congress showed concern for the probable future consequences of the acquisition by utilizing the language "May be substantially to lessen competition." On the other hand, with the investment exemption, Congress exhibited a concern for the past and present effect of the acquisition by utilizing the language "and not Using the same . . . to bring about . . . the substantial lessening of competition." Thus while evidence of competitive conduct since the acquisition may not be a determining factor when discussing whether a violation of the substantive provisions of Section 7 has occurred, *Ash Grove Cement Co. v. F.T.C., 577 F.2d 1368, 1378-1380 (9th Cir. 1978)*, this evidence is of primary concern when determining the application of the investment exemption. See *Anaconda Co. v. Crane Co., 411 F. Supp. 1210, 1219 (S.D.N.Y.1975)*.

division, prints and sells sheet music, and operates radio and television stations. Columbia distributes both motion pictures produced by others and motion pictures which Columbia itself produces. In recent years, approximately one-fourth to almost one-half of the motion pictures distributed by Columbia have been produced by others.

MGM owns and operates two hotel-casinos in Nevada, has begun construction of a third hotel-casino in New Jersey, owns and operates a laboratory which **[**22]** processes motion picture film, owns and operates a sound studio where space is leased to others, owns an office building where space is leased to others, owns a library of motion pictures, produces motion pictures and other programs intended for initial viewing on television, and produces theatrical motion pictures. The theatrical motion pictures produced by MGM are distributed in the United States and Canada by United Artists Corporation (hereinafter "UA"). Cinema International Corporation (hereinafter "CIC") distributes MGM pictures in other countries.

MGM was a distributor of motion pictures to theatres until it went out of that business in approximately October 1973. Since that time MGM has not distributed to any theatre any motion picture, whether produced by MGM or by any other producer. When MGM went out of the distribution business it sold all its distribution facilities located in the United States and abroad and severed its employment relationship with every one of the persons employed in its distribution operations, except for a few persons who were offered positions in other parts of MGM's business. In accordance with a contract entered into between MGM and UA in October **[**23]** 1973, MGM pays UA 22.5 percent of the gross film rentals of each MGM-produced picture, as a fee for UA's distribution of the picture. None of MGM's capital is invested in any facility for the distribution of motion pictures. Since it went out of the distribution business, MGM has not entered into any **[*1103]** contract with any exhibitor of motion pictures to license the exhibition of any motion picture.

At the time MGM left the business of distribution, it made a major change in its production arm as well. At that time, MGM decided to reduce substantially its production of motion pictures. From late 1973 to date MGM has produced only two to five pictures in each year, while in the past MGM had produced three to four times that many motion pictures in each of the prior five years. MGM hoped that by this action it could maintain better control of the quality of its product.

It is in the context of potential competition between these two companies that this acquisition is to be judged. As noted in *Brown Shoe v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*, ***HN8***[] the Clayton Act only prohibits acquisitions where the effect may be substantially to lessen competition, **[**24]** "in any line of commerce in any section of the country." Accordingly, this Court is first required to determine the relevant market, the area of effective competition. This determination is to be made by reference to a product market ("the line of commerce") and a geographic market ("the section of the country"). *Brown Shoe Co. v. United States, supra, at 324, 82 S. Ct. 1502, 1523*.

B. THE PRODUCT MARKET

The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. Within this broad market, however, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. *Brown Shoe Co. v. United States, supra, at 325, 82 S. Ct. 1502*.

Throughout its complaint, plaintiff referred to the product **[**25]** market as the production and distribution of motion pictures. In pretrial and in trial, plaintiff attempted to narrow this product market in two respects: (1) to motion pictures grossing over one million dollars and (2) to "quality" motion pictures. This Court finds both of these attempts to narrow the product market inappropriate when measured against the Brown Shoe criteria.

Plaintiff's contention that only motion pictures grossing over one million dollars are in the effective area of competition draws an arbitrary distinction with no basis in fact. Relative success of a particular product is not a factor contained in the Brown Shoe analysis. To argue that motion pictures grossing one million dollars compete with each other while motion pictures grossing $ 999,999 do not compete is a flight of fantasy this Court will not take. This distinction is not recognized by the public; whether grossing more than one million dollars, or grossing less, each motion picture is manufactured with the same facilities; as a product line, each does not have characteristics peculiar to itself rendering it generally noncompetitive with others; and each is not directed toward a distinct class of customers.

[26]** This same analysis is equally applicable to the "quality" distinction asserted by plaintiff. Again, this distinction bears little relation to reality. Time and again this Court was presented with examples of low-budget or "non-quality" motion pictures made by independent or minor producers that were very successful in the market place and that effectively competed with the high budget or "quality" motion pictures produced by various of the major producers. The distinctions plaintiff has attempted to draw are as unrealistic in this case as the "price/quality" differences rejected in the Brown Shoe case. Accordingly, this Court finds the relevant product market to encompass motion pictures generally.

Plaintiff also has maintained throughout this action that production And distribution **[*1104]** of motion pictures represents a cluster of activities composing a single line of commerce. The concept of a "cluster of activities" giving rise to a single line of commerce has previously been raised in *United States v. Philadelphia National Bank, 374 U.S. 321, 356, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*, and in *United States v. Phillipsburg National Bank, 399 U.S. 350, 359, 90 S. Ct. 2035, **[**27]** 26 L. Ed. 2d 658 (1970)*. In these cases, the cluster of activities, such as demand deposits, savings and time deposits, consumer loans, commercial and industrial loans, real estate mortgages, trust services, safe deposit boxes and escrow services were customarily provided by commercial banks, the Court finding the line of commerce to be "commercial banking."

A review of these facts leads to the conclusion that plaintiff herein has not properly applied this concept of a "cluster of activities." The activities in the two bank cases were all activities that would be provided a customer at the same level of a vertical chain of a particular product. In the present action, however, the activities involved, production and distribution, are not on the same level but are on two different vertical steps leading ultimately to the exhibition of motion pictures to the public. Thus this action is more closely aligned with the Brown Shoe case. The Brown Shoe case dealt with the merger of two large shoe companies. Each shoe company engaged in both the manufacturing and retailing of shoes, again two different steps in the vertical chain of this particular product. The Court in Brown Shoe did not define **[**28]** the line of commerce as the manufacture and retail of shoes. Rather the line of commerce was defined by the product itself, men's, women's and children's shoes, separately. It is interesting to note, moreover, that in discussing the horizontal effects of the merger, both the lower court and the Supreme Court considered manufacturing and retailing separately and not jointly. Thus, implicitly, if not expressly, both courts by their analysis found these two different steps on the vertical chain of this product to be two separate and distinct lines of commerce.

In the present action, the evidence is overwhelming and virtually without contradiction that motion picture production, motion picture distribution, and motion picture exhibition are each separate and distinct lines of commerce within the commercial realities of the motion picture industries. The evidence is equally overwhelming and again virtually uncontradicted that the production and distribution of motion pictures, taken together, is not a single line of commerce within the commercial realities of the motion picture industry. Production and distribution are recognized as separate and distinct activities; each utilizes separate **[**29]** and distinct facilities; and each has characteristics peculiar to itself rendering it generally noncompetitive with the other.

In the present action, production of motion pictures is the only relevant line of commerce. As stated earlier, in determining the relevant line of commerce, the Court's attention should be directed to the effective area of competition. Columbia engages in both the production and distribution of motion pictures. There is no question, however, that since 1974, MGM has not engaged in motion picture distribution.

Plaintiff has attempted to assert that MGM still is in the business of distribution of motion pictures based upon its relationship with UA. Under the terms of the distribution contract between MGM and UA, the power of approval of the policy decisions is mutual while UA has control over the day to day operation of the distribution of MGM motion pictures. It is common in the motion picture industry for producers to participate with their distributors in making the decisions regarding key aspects of the distribution process, such as the release date, the release pattern, the selection of theaters to exhibit the picture, the advertising budget, and the terms **[**30]** of contracts with exhibitors. That practice is reflected in the contracts between producers and distributors, such as MGM's distribution agreements with UA and CIC; a producer **[*1105]** such as MGM does not become a distributor by reason of such joint participation with its distributor in such distribution decisions.

Some producers engage independent contractors called "producers' representatives" to assist them in dealing with distributors on such matters as release patterns, advertising campaigns, marketing strategies, and other matters relating to the distribution of the producer's picture. MGM uses several of its employees to perform these same functions. The use of "producers' representatives," whether they be independent contractors or employees, does not transform a producer into a distributor.

It is clear from the evidence at trial that MGM does not compete with Columbia in distribution and has not done so since late 1973. Accordingly, the only effective area of competition herein involved is the production of motion pictures. It inevitably follows that the relevant product market, or line of commerce, is production; Not production And distribution.

C. GEOGRAPHIC MARKET

[31]** The criteria to be used in determining the appropriate geographic market are essentially similar to those used to determine the relevant product market. Congress prescribed a pragmatic, factual approach to the definition of the relevant market and not a formal, legalistic one. The geographic market selected must, therefore, both correspond to the commercial realities of the industry and be economically significant. *Brown Shoe Co. v. United States, supra, 370 U.S. at 336, 82 S. Ct. 1502*. The Court has also looked to the area where the effect of the merger on competition will be direct and immediate. *United States v. Marine Bancorporation, 418 U.S. 602, 619, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1973)*. Additionally, the relevant geographic market is the market area in which the seller operates "and to which the purchaser can practically turn for supplies." *United States v. Phillipsburg National Bank & Trust Co., supra, 399 U.S. at 357-358, 90 S. Ct. at 2043*; *United States v. Philadelphia National Bank, supra, 374 U.S. at 359, 83 S. Ct. 1715*; *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*.

The evidence shows in the present action that **[**32]** the market for production of motion pictures is world-wide. Foreign produced motion pictures directly compete in the United States with films domestically produced. Furthermore, domestic production companies derive a substantial portion of their income from foreign distribution and this in turn substantially affects the ability of these companies to compete domestically. Accordingly, the most relevant geographic market for motion picture production in this action is the entire world, since that is the market area in which motion picture producers operate and to which the distributors of motion pictures can practically turn for supplies of motion pictures. [11.]

[33]** D. ABSENCE OF ANTICOMPETITIVE EFFECT OR PROBABLE ANTICOMPETITIVE EFFECT

HN9[] In determining whether the subject acquisition violates Section 7, this Court is bound by prior case law which has held that a plaintiff must show that the particular acquisition is reasonably probable to effect a substantial lessening of competition or tend to create a monopoly. This section does not require certainty concerning the proscribed effect, neither does the statute deal with ephemeral possibilities. This Court is required to look to the probable future effects of the acquisition. *Brown Shoe, supra, 370 U.S. at 323, 82 S. Ct. 1502*.

[11.] This is not to say that this Court will look to the world-wide effects for all purposes. This Court is well aware of the limits contained within Section 7 when it refers to any section of the Country. The Court's conclusion with respect to the geographic market rests in a recognition of the extent to which the world-wide nature of this industry effects competition here in the United States.

Prior cases have looked at various factors in making this determination. The Brown Shoe case was primarily concerned with the **[*1106]** relative market share which companies may control by merger and also the trend in that particular industry toward an increased concentration of the market by the top producers and retailers. *Brown Shoe Co. v. United States, supra, 370 U.S. at 343, 82 S. Ct. 1502*. Later cases, however, have moved away from this strict reliance on statistics and toward a more comprehensive view of the industry. The Court has stated that Congress indicated **[**34]** plainly that a merger had to be functionally viewed, in the context of its particular industry. Statistics reflecting the shares of the market controlled by the industry leaders and the parties to the merger are, of course, the primary index of market power; but only a further examination of the particular market its structure, history and probable future can provide the appropriate setting for judging the probable anticompetitive effect of the merger. *United States v. General Dynamics Corp., 415 U.S. 486, 498, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1973)*. The primary question then is the effect on competition generally in an economically significant market.

In the present action, plaintiff has utterly failed to show any anticompetitive effect. All the credible evidence points to the opposite direction, that there will be no substantial lessening of competition as a result of the subject acquisition. There has been no evidence that competition between MGM and Columbia will be affected, let alone evidence that competition in the line of commerce would be affected. Much of the prior case law speaks in terms of merger. While defendants have effective control of MGM, they do not control Columbia **[**35]** by reason of this acquisition. As discussed earlier, defendants are limited in their use of the stock in question and the day to day operation of Columbia is and will remain in the hands of the present management. Accordingly, at the present time it is absurd to talk of merger. The evidence clearly and uncontradictorily points to the conclusion that these two companies will remain separate companies, operating separately and competing against each other.

Plaintiff has suggested the existence of anticompetitive effects in only two particulars: (1) defendants will use their position to gain access to competitively sensitive information to better the position of one company to the detriment of the other; and (2) defendants will use their control of MGM to cease production of motion pictures in that company. [12.] **[**37]** Neither of these fears are supported by the evidence. The Stockholders' Agreement entered into by the defendants and Columbia specifically restricts the defendants' access to competitively sensitive information. [13.] Furthermore, it is ludicrous to argue that the defendants, who have substantial investments in both companies, would do anything that would competitively hurt either **[**36]** company. This is not a situation where the investment in the acquired company is minor compared to the investment in the acquiring company. Additionally, it is equally illogical to suggest that the management of Columbia would allow the defendants access to competitively damaging information when they are not required to do so. In regard to the second alleged anticompetitive effect, all the credible evidence showed that both Columbia and MGM are still in the motion picture **[*1107]** production business with no proclivities to lessening production below present levels. Accordingly, the Court is absolutely convinced that the subject stock acquisition will not result in a substantial lessening of competition.

Even assuming a merger of MGM and Columbia, plaintiff has failed to show the requisite anticompetitive effect. Plaintiff primarily relied upon a statistical showing of relative market shares. These statistics were taken from data published annually by Variety, a newspaper specializing in news events in the entertainment industry. Annually, Variety publishes lists purporting to show all motion pictures having gross rentals [14.] in the United States and

---

12. The possible vertical aspects of this acquisition have never been raised by the Government and are not properly before the Court. Even if these effects were before the Court, this decision would not be altered. The present contract between MGM and UA prevents any vertical consolidation between MGM and Columbia. This contract runs through 1983. This Court will not speculate with respect to what conditions will exist at that time and will not base this ruling on such speculation. Furthermore, the vertical aspects are taken into consideration later in the Court's conclusions with regard to the competitive effect of this acquisition even if the line of commerce is assumed to be production And distribution, which it is not.

13. If divestiture were to be ordered with respect to Tracinda's holdings, Kerkorian would still retain a substantial interest in Columbia and possibly would no longer be restricted by the Stockholders' Agreement. Thus there might arguably be less of a likelihood that competitively sensitive information will fall into the wrong hands so long as Tracinda retains its stock and the Stockholders' Agreement remains in effect.

14. As used in the context of the Variety lists, gross rentals means the total amount a distributor receives from an exhibitor for one particular motion picture.

Canada of one million dollars or more, together with a figure purporting to be the gross rentals for each particular picture.

[38]** This data, however, is totally irrelevant for use in this action. The effective area of competition herein relevant is the production of motion pictures. This data does not even purport to represent relative market shares in this line of commerce. The figures contained in the Variety data are the rentals received by the Distributors not the producers. It may be argued that the Court could extrapolate upon this data to determine various producers' market share, since many of the major producers distribute their product through their own company and as a result the distribution figures are relevant in determining production figures. This, however, is folly, because while some major producers distribute through their own companies, the distribution arms of these major companies also distribute many motion pictures produced by other companies. Additionally, the terms of these distribution agreements between the distribution arms of major companies and the independent producers vary considerably; as a result, any sort of factual division of these revenues between distribution and production is impossible without more specific data. The use of the Variety lists as a proxy for dollar volume **[**39]** of commerce would ignore these facts and attribute to each distributor the full rentals, even if that distributor kept only its fee and its expenses, and remitted the balance to an unrelated and independent producer. Two important distortions would occur: (1) A highly disproportionate amount of the dollar volume of commerce would be attributed to distributors and therefore improperly imply a degree of concentration among those firms; and (2) Columbia's market position would be overstated because it would incorrectly attribute to Columbia as a producer the revenues Columbia remits to the independent producers whose many pictures it distributes.

In any event, Variety lumps together the totals for the United States and Canada, whereas the uncontradicted testimony of one of plaintiff's own witnesses was that there can be very sharp differences in the popularity of particular pictures in the United States and in Canada. [15.] Since this data does not represent a measure of the relevant line of commerce, it is irrelevant for these proceedings.

[40]** Assuming this data is relevant, its obvious unreliability leads this Court to totally discount it. This data is derived from lists compiled by Variety reporters from data supplied voluntarily by some, but not all distributors, on a non-uniform basis, subject to no systematic verification, but subject to such adjustments as the intuitive judgments of Variety reporters dictate. Mistakes are common. For example, the 1978 Variety list of annual film rentals, while purporting to report every motion picture having rentals in the United States and Canada of one million dollars or more in 1978, omitted at least 29 pictures having **[*1108]** total rentals of $ 195.3 million, including "Saturday Night Fever," a Paramount picture having gross rentals of about $ 71.5 million. "Saturday Night Fever," if not omitted, would have been Variety's second ranking picture of 1978.

Plaintiff's efforts to supply some of the omitted film rental data during trial, and after defendants had pointed out many Variety deficiencies, failed to discharge plaintiff's burden to show the volume of commerce in the relevant line of commerce. The corrections were themselves based on other stories appearing in Variety, **[**41]** the accuracy of which is subject to many of the doubts which apply to the Variety lists initially relied on by plaintiff.

In this case, there is no market share data at all on production; and only totally unreliable data has been offered by plaintiff as to distribution, and as to "production and distribution." Moreover, plaintiff's so-called "production and distribution" data, as modified at trial, would not, even if reliable, make out a Prima facie violation of Section 7. Even plaintiff's revised data, as shown on plaintiff's exhibit 315, set forth for the period 1975-1978 an MGM average share of 2.2% And a Columbia average share of 9.7%, well below the level normally considered by plaintiff for legal action under its Merger Guidelines. 1 CCH 1977 Trade Reg. Rptr. P 4510, at 1, 6, pp. 6881, 6884. Furthermore, the data, as shown on defendant's exhibit GGGG, set forth for the period 1974-1978 an MGM average share of 1.75% And a Columbia average share of 6.72%, even further below plaintiff's Merger Guidelines. While those Guidelines do not bind this Court, they reinforce this Court's conclusion that no tendency toward a lessening a competition will ensue

[15.] In its complaint, the Government alleged other uses for motion pictures to be for commercial television broadcasts, pay cable television broadcasts, and for use in the home video disc and cassette playback units. The Variety lists do not purport to measure the income from these sources. Thus, again, the relevance of this data must be questioned.

from the subject acquisition. **[**42]** Accordingly, while the Court has rejected plaintiff's theory that the production and distribution of motion pictures constitutes a single line of commerce, if the Court were to assume the existence of such line of commerce and if the Court were to assume the merger of MGM and Columbia, there would be no reasonable probability of a substantial lessening of competition or any tendency to create a monopoly in any geographic market, either in the United States, any section of the United States or throughout the world.

The history, structure and probable future of the motion picture industry support this Court's conclusions. There are hundreds of firms (even thousands) engaged in motion picture production and many new firms have entered motion picture production recently. There are no barriers to entry into the business of motion picture production. A relatively small investment is required to enter motion picture production, and all of the elements necessary to carry on the business of motion picture production are in plentiful supply and easily available, including numerous sources for financing production. Approximately four hundred theatrical motion pictures are produced in the United **[**43]** States alone each year and rated by the Motion Picture Association of America Rating Service. According to the Motion Picture Association of America, about three-fourths of the rated motion pictures are released each year.

Motion picture producers individually and as a whole lack significant market power because many other forms of entertainment and leisure collectively constitute a good substitute for consumer expenditures on motion pictures. Any numerical expression of a firm's share of the motion picture production market, while not provided by plaintiff at the trial herein, would necessarily depict significantly less market power than the same numerical expression would depict in industries where there are no individual or collective substitutes for the product. There are no dominant firms engaged in the production of motion pictures who engage in interdependent or parallel behavior with the capacity effectively to determine price and total output of goods and services.

Plaintiff attempted to show a dominance by eight major companies. Plaintiff's data, however, failed to show a highly concentrated market. On the contrary, the evidence has shown a dynamic market with heavy competition **[**44]** from outside these major **[*1109]** eight and within these majors, with one additional company, American International Pictures, on the verge of being recognized, and indeed being recognized, as a "major" and an additional company, Associated Film Distributors, thereby entering the market on the scale of a "major" company.

In ranking the various companies plaintiff has placed Columbia fifth and MGM ninth among the major companies. There is little argument concerning the placing of Columbia within the "major" companies. MGM's placement, however, is based on nostalgia rather than present day fact. MGM, since 1974, [16.] has produced approximately four theatrical motion pictures per year, or approximately one percent or less of the total number of theatrical motion pictures produced in the United States alone. While MGM is an important producer, it is by choice no longer one of the major companies, as compared to other production companies.

[45]** Even taking into consideration the distribution of motion pictures, the structure and history of this market shows dynamic competition. Entry into motion picture distribution, while not as easy as entry into motion picture production, is also relatively easy. There are a large number of firms, probably more than one hundred, engaged in motion picture distribution in the United States alone. Recent entrants into motion picture distribution, such as Associated Film Distributors, demonstrate that entry is not difficult. This healthy competition, and lack of substantial barriers to entry, limit the ability of any company or companies to establish a monopoly or exert market power. Motion picture distributors individually and as a whole lack significant market power because many other forms of entertainment and leisure collectively constitute a good substitute for consumer expenditures on motion pictures. There are no dominant firms engaged in the distribution of motion pictures who engage in interdependent or parallel behavior with the capacity effectively to determine price and total output of goods and services.

---

16. In determining whether there has been a violation of Section 7, this Court is primarily concerned with the probable future effects of the acquisition. The present condition of the industry and the participants to the acquisition is of chief importance. Evidence of past conditions can also be helpful in determining future effects. The further one retreats into the past, however, the less relevant will be the evidence retrieved. In view of MGM's major reorganization of late 1973, this Court holds that the statistics and other evidence alleged to show the volume of commerce and the market shares of individual firms in the motion picture industry in years prior to 1974 do not represent current conditions and do not aid in predicting the probable competitive effects of defendants' acquisition of Columbia stock. Accordingly, such evidence of years prior to 1974 is held to be inadmissible.

Plaintiff has failed to prove that there is concentration in the relevant **[**46]** market. Plaintiff has therefore failed to make out ***HN10***[] a Prima facie case of an antitrust violation. Such a case is made out only if there is also proof that the industry is one "where concentration is already great or has been recently increasing . . . ." *United States v. General Dynamics Corp., 415 U.S. 486, 497, 94 S. Ct. 1186, 1194, 39 L. Ed. 2d 530 (1974)*. In any event the production of motion pictures is not an industry where concentration is already great or has been recently increasing. Thus, no Prima facie case could have been made solely by the use of statistics asserted by plaintiff to show MGM's and Columbia's shares of "production and distribution."

Even if plaintiff had shown that motion picture production were greatly concentrated or recently increasing in concentration, and even if plaintiff had shown the combined share of MGM and Columbia of either of such markets, such market-share statistics would have given "an inaccurate account of the acquisition's probable effects on competition." *United States v. Citizens and Southern National Bank, 422 U.S. 86, 121-122, 95 S. Ct. 2099, 2119, 45 L. Ed. 2d 41 (1975)*; *United States v. Marine Bancorporation, 418 U.S. 602, 631, 94* ***[**47]*** *S. Ct. 2856, 41 L. Ed. 2d 978 (1974)*; *United States v. General Dynamics Corp., 415 U.S. 486, 497-498, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974)*. Even if **[*1110]** the statistical data offered by plaintiff were reliable, all relevant industrial facts show that the subject acquisition would not lessen competition in violation of section 7 of the Clayton Act. Id.

At this point, the Court perhaps should indicate that both during the trial and in the decisional process it discounted as unreliable and unscientific much of the expert testimony offered by the plaintiff, while relying heavily upon the technical economic skills and knowledge of the defense expert and the two Court appointed experts. The reasons for this preferential conclusion of the Court on expert credibility is best illustrated by a comparison of the Curricula vitae and expertise of the Government witnesses, Gerald Hellerman, a "Financial Analyst" and Philip M. Eisenstat, an "Applied Statistics" expert, both employees of the Antitrust Division of the United States Department of Justice, on the one hand, with those of the defense witness, James Mack Folsom, Vice-President of Glassman-Oliver Economic Consultants, Inc., and **[**48]** the Court appointed witnesses, Dr. Robert Wayne Clower, U.C.L.A. Professor of Economics, and Dr. J. Fred Weston, Professor, Graduate School of Management at U.C.L.A.

It is informative and interesting to compare the resume of Eisenstat, and testimony of Hellerman (Appendix A), With Curriculum Vitae of Folsom, Biographical Summary, etc., of Clower, and Bio-Bibliography of Weston (Appendix B). Moreover, their respective testimonial statements confirm the Court's belief in the superior knowledge and expertise of Folsom, Clower and Weston, as conclusively becomes evident when one compares the testimony of Hellerman, Rep. Tr. pp. 1356-1440, and Eisenstat, Rep. Tr. pp. 1709-1932, With the testimony of Folsom, Rep. Tr. pp. 1935-2100, Clower, Rep. Tr. pp. 2111-2263, and Weston, Rep. Tr. pp. 2264-2411.

Plaintiff has not shown that the production or the distribution of motion pictures is either concentrated or recently increasing in concentration. The statistical showing by plaintiff of MGM and Columbia combined market shares MGM 2.2% Plus Columbia 9.7%, combined shares 11.9% For the years 1975-1978 (Ex. 315), or MGM 1.75% Plus Columbia 6.72%, combined shares 8.47% For the years 1974-1978 (Ex. **[**49]** GGGG) even if reliable, does not make out a violation of Section 7 of the *Clayton Act. United States v. General Dynamics Corp., 415 U.S. 486, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974)*. In *United States v. Tidewater Marine Service, Inc., 284 F. Supp. 324, 338-342 (E.D.La.1968)*, the court held that even if the combined shares were 31 percent, the merger would not be unlawful because the market was not concentrated but was vigorously competitive, and entry was not difficult. To like effect is United States v. International Harvester Co., 1976-2 Trade Cases P 61,028 at 69,527 (N.D.Ill.1976), *Aff'd, 564 F.2d 769, 773 (7th Cir. 1977)*, Reh. denied and Reh. en banc denied (1978), where the court ruled that the combination of market shares of 8 percent and 14 percent of four-wheel drive tractors was not unlawful in context, where the top four firms had a 73 percent share, where one of the participants had a weak financial position (but was not a failing company), and where the industry was vigorously competitive and trending away from concentration. See also *United States v. Crowell, Collier & MacMillan, Inc., 361 F. Supp. 983 (S.D.N.Y.1973)* (combination of firms of 41.9% And 0.6% Not barred); **[**50]** *United States v. M.P.M., Inc., 397 F. Supp. 78 (D.Col.1975)* (combined market share of 31.6% Held not anticompetitive); *United States v. Consolidated Foods Corp., 455 F. Supp. 108, 134-141 (E.D.Pa.1978)* (combining nation's fourth largest firm in industry having a 7% Share with the eleventh firm having a 3% Share, where top three ranking firms after the merger would control 62.5% Of the market, held not anticompetitive); In re the Pillsbury Company and Fox Deluxe Foods, FTC Dkt. 9091, opinion of the Commission, 17-18 (June 15, 1979) (combining 15.4% With 1.7% Is not unlawful, even though industry was "concentrated").

Conditions in the production of motion pictures differ from conditions in the grocery industry as described in *United States v. Von's Grocery Co., 384 U.S. 270, 86 S. Ct. **[*1111]** 1478, 16 L. Ed. 2d 555 (1966)*, conditions in the beer brewing industry as described in *United States v. Pabst Brewing Co., 384 U.S. 546, 86 S. Ct. 1665, 16 L. Ed. 2d 765 (1966)* and conditions in the business of manufacturing aluminum and copper conductors as described in *United States v. Aluminum Co. of America, 377 U.S. 271, 84 S. Ct. 1283, 12 L. Ed. 2d 314 (1964)*, in these important ways: **[**51]** (a) there is no trend in concentration in the production of motion pictures; (b) there is no trend toward horizontal integration in the production of motion pictures; (c) there are no significant economic barriers to entry into motion picture production; and (d) there is no shrinkage in the number of firms engaged in motion picture production. Further, in Alcoa, the products in question were made by the leading firm (27.8% And 32.5% Of the relevant markets) in a highly oligopolistic industry.

CONCLUSION AND ORDER

The Government attempted to shape the contours of the action by referring to the profiles of totally unreliable statistics which happened to be readily available. The slavish reliance placed on this unreliable data by the Government is not warranted when one looks at the realities of this industry and, specifically, the realities of the two motion picture production companies, MGM and Columbia. These realities as found by this Court, based upon all the evidence before it, clearly show that neither the subject stock acquisition, nor the use of such stock by voting or granting of proxies or otherwise, nor the possible merger of Columbia and MGM does or would substantially **[**52]** lessen competition, or does or would tend to create a monopoly; nor is there any threat whatsoever that any such thing may occur.

Therefore, there is no possible violation of section 7 of the Clayton Act. And, finally, as initially found and concluded by the Court, the investment exemption set forth in the first sentence of the third paragraph of Section 7 of the Clayton Act, *15 U.S.C. § 18*, clearly and convincingly applies to this stock acquisition and takes both defendants, Kerkorian, and Tracinda, out of its prohibitory parameters. [17.]

[53]** It ineluctably follows that the plaintiff is not entitled to any order requiring the defendants or either of them to divest themselves of any of the stock of Columbia purchased and now held by them.

One last matter remains and that is the question of whether to award the usual allowable costs to defendants and against plaintiff. All parties agree that this determination is within the discretionary power of the Court. After consideration of the entire case, its complexity, the difficult **[*1112]** questions of law involved, and the tremendous factual work load and legal burden undertaken and so successfully carried by defendants, the Court exercises its

---

17. Incidentally, the Government's non-expert witnesses were drawn chiefly from small film exhibitors and all of these witnesses, curiously enough, testified that they had no evidence of any act or threat, that could by the wildest imagination be traced to either of the defendants, that would tend to show that the defendants had purchased any portion of the Columbia stock other than solely for investment, or that the defendants had used, were using, or threatened in any way to use the stock by voting or otherwise to bring about or in attempting to bring about the substantial lessening of competition. Nor could the Government witnesses give a shred of credible evidence that the effect of the Columbia stock acquisition was, could be, may be, or might even possibly be, substantially to lessen competition, or to tend to create a monopoly in any line of commerce in any section of the country.

Moreover, these Government witnesses, which ran the gamut from an admitted pornographer, through small, middle size and one or two fairly large film exhibitors, to retired financial experts without any recent expertise other than occasional consultations, and the chief of the "Star Wars" producer, in every instance but one or two vague guesses or opinions, admitted that the relevant line of commerce was production, Not production And distribution, and that there is no concentration, monopoly or denial of access to new producers in this relevant line of commerce. Even some of the Government witnesses opined that the relevant geographical market is world-wide, and not merely the United States or the United States and Canada, and that competition in production was and is being increasingly manifest, in its effect, both in increasing competition in the United States and increasing competition in every section of the United States in film production.

discretion in favor of defendants and against plaintiff, even though plaintiff is the Government. *Rule 54(d), F.R.Civ.P.*; *28 U.S.C. § 2412*; Local Rule 15, C.D.Cal.; United States v. O.K. Tire & Rubber Co., 1978-2 CCH Trade Cases, par. 62,331, p. 75,973 (D. Idaho 1978); *Subscription Television, Inc. v. Southern California Theatre Owners Assoc., 576 F.2d 230, 234 (9th Cir. 1978)*; *United California Bank v. THC Financial Corp., 557 F.2d 1351, 1361 (9th Cir. 1977)*.

LET JUDGMENT BE ENTERED ACCORDINGLY.

TABLE

HELLERMAN DIRECT

Transcript **[**54]** of his Deposition.

Mr. Weidman: That's right. Mr. Hellerman had been deposed by counsel.

The Court: Well, all right. At least I take it the defendants are aware of it, but we still don't have a curriculum vitae. Where is that little piece of paper that apparently was given to the defense. Has anybody got it?

Mr. Rothman: Your honor, we can't locate it.

The Court: All right, Mr. Hellerman, but go ahead. But I'll give you five minutes at the most. Give us your curriculum vitae.

Don't ask any questions. He can just narrate it to save time.

The Witness: In 1959, I received a Bachelor of Arts degree with a major in economics from the University of Massachusetts in Amhurst.

In 1962, I received a Masters of Business Administration, also from the University of Massachusetts.

At graduate school, I received a teaching fellowship based on class standing.

My Work: In 1962, I started to work at the Securities and Exchange Commission as a financial analyst in the branch of investment companies.

The Court: In what?

[*1113] The Witness: In the branch involved with investment company regulation.

The Court: Branch investment companies?

The Witness: The branch involving the work of **[**55]** regulating investment companies.

The Court: All right.

The Witness: Under the Investment Company Act of 1940.

The Court: All right.

The Witness: In 1967, I was promoted to Branch Chief of the Public Utility Holding Company Act of 1935.

The Court: All right.

The Witness: In 1972, I was requested by Senator Phillip A. Hart, Chairman of the Anti-Trust and Monopoly Subcommittee of the United States Senate, to be detailed to his subcommittee to act as special adviser.

The Court: Subcommittee of what?

The Witness: Of the judiciary committee.

The Court: All right.

The Witness: Of the United States Senate.

The Court: All right.

The Witness: In 1976, I joined the anti-trust division of the Department of Justice and I am presently employed there.

The Court: All right. I think that's enough. Go ahead. I think he's qualified as an expert.

By Mr. Weidman:

Q. Mr. Hellerman, as part of your duties with the anti-trust division, have you been an advisor to the trial staff of United States vs. Tracinda ?

A. That is correct.

Q. And what have you done along those lines?

A. I have made recommendations as to witnesses, potential witnesses or people knowledgeable in the industry. I have **[**56]** accompanied counsel to various interviews, and I have advised during the court proceeding on matters which dealt with finance and corporate matters.

Q. As part of your duties, did you study the financial condition of Columbia and MGM?

A. Yes. I've had a computer print out done at one point of all the companies or of many of the companies in the motion picture industry which is sort of a knee jerk reaction when assigned to an industry or asked to work on an industry.

TABLE

[*1114] (Completed all requirements for Ph.D. except thesis.)

Major Fields: Industrial Organization and Agricultural Economics

HONORS, SCHOLARSHIPS, FELLOWSHIPS:
Special Scholarship, Vanderbilt
Earhart Fellowship 2 years
Ford Foundation Dissertation Fellow
Valedictorian, UGA, Class of "53
Phi Kappa Phi National Honorary
Beta Gamma Sigma National Honorary
Distinguished Service Award, FTC

PROFESSIONAL EXPERIENCE:
Research Assistant Displaced Person's Adjustment to U.S. Economy, Gregor Sebba, UGA.
Instructor, Industrial Organization and Statistics, Vanderbilt, Summer 1959.

Instructor and Assistant Professor, Duke University, **[**57]** 1959-64. (Courses Taught: Principles of Economics, Marketing, Managerial Economics, and Industrial Organization.)
Economist, Division of Economic Evidence, Bureau of Economics, Federal Trade Commission, 1964-68.
Assistant to the Director, Bureau of Economics, Federal Trade Commission, 1969.
Chief, Division of Economic Evidence, Bureau of Economics, Federal Trade Commission, 1970-72.
Assistant Director, Bureau of Economics, Federal Trade Commission, 1972-73.

Acting Director, Bureau of Economics, Federal Trade Commission, 1973-74.
Deputy Director, Bureau of Economics, Federal Trade Commission, 1974-77 and 1978.
Acting Director, Bureau of Economics, Federal Trade Commission, 1977-78.

PUBLICATIONS AND TESTIMONY:

"Trends in Employment and Earned Income of Older Workers" with Juanita M. Kreps and C. E. Ferguson, Employment, Income, and Retirement Problems of the Aged, Duke University Press, 1963.
The Use of Games of Chance in Food and Gasoline Retailing, FTC Economic Report, 1968.
The 1973 Line of Business Report, FTC Economic Staff Report, 1967, with F. M. Scherer, et al.

Comment on State of **[**58]** Competition in Food, forthcoming in Journal of Agricultural Economics.
Testified in: S&H, Allied Chemical Jim Robbins, Great Lakes Carbon, Papercraft, Kennecott-Peabody, and General Dynamics.
Testified before several congressional committees on diverse subjects Sweepstake Promotions, Price Discrimination, Small Business Role in Economy, Food Retailing, Steel Imports and on FTC Budget.
Speeches before lawyers (e.g., Practicing Law Institute) and business groups.

ROBERT WAYNE CLOWER

I. Biographical Summary (as of August 1, 1979)

Degrees

Doctor of Letters, Oxford University, 1978

[*1115] Master of Letters, Oxford University, 1952 (Thesis: Theories of Capital Accumulation with Special Reference to their Ability to Explain the Experience of the United States since 1870)
M.A. Econ., Wash. State Univ., 1949 (Thesis: A Theory of Economic Prognosis Applied to Modern American Society)
B.A. Econ., with Highest Distinction, Wash. State Univ., 1948 (Thesis: The Keynesian Contribution to Economic Positivism)

Learned Societies and Professional Associations

American Econ. Assn. (Member of Executive Committee, 1978-80);

[59]**

Royal Econ. Society; Econometric Society (Fellow since 1978);
American Assn. of Rhodes Scholars; Phi Kappa Phi; Phi Beta Kappa;
Honorary Fellow, Brasenose College, Oxford

Professional Career

Professor of Economics, UCLA, 1971 to present
Adjunct Professor, Washington State University, 1978-
Visiting Prof. of Econ., Univ. of Western Ontario Fall, 1974 and Fall, 1977
Visiting Prof., Institute for Advanced Study, Vienna, Austria March, 1974
Visiting Prof., Bank of Italy Research Staff Seminar, Perugia, Italy Oct., 1973
Visiting Prof., Monash Univ., Summer, 1972
Dean, School of Social Studies and Prof. of Econ., Univ. of Essex 1968-69
Visiting Prof. of Econ., Makerere College, Kampala, Uganda Summer, 1965
John Maynard Keynes Visiting Prof. of Econ., Univ. of Essex 1965-66
Prof. of Econ., Northwestern Univ., 1963-71
Visitor to Faculty of Econ., Cambridge Univ., Michaelmas Term, 1962
Director, Northwestern Univ. Economic Survey of Liberia, 1961-62
Chairman, Dept. of Econ., Northwestern Univ., 1958-64

Assoc. Prof. of Econ., Northwestern Univ., **[**60]** 1957-62

Visiting Prof. of Econ., Univ. of the Punjab, Lahore, West Pakistan 1954-56
Asst. Prof. of Econ., Wash. State Univ., 1952-57
Instructor in Econ., Wash. State Univ., 1948-49

Miscellaneous

Managing Editor, Economic Inquiry, 1973 to present
Executive Committee, American Econ. Assn., 1978-81
American Consulting Editor, Penguin Books, 1966 to present
John Simon Guggenheim Memorial Foundation Fellowship, 1965-66
Editorial Board, American Economic Review, 1963-66
Ford Foundation Faculty Research Fellowship, 1960-61
Chairman, Oxford-London-Cambridge Joint Economic Seminars, 1950-52
Nuffield College Studentship, 1950-52
Rhodes Scholarship, 1949-52
Honorary Fellow, Brasenose College, Oxford, 1978-

Personal Data

Date of Birth: Feb. 13, 1926; Married, 6 children
Office: Dept. of Economics, UCLA, Los Angeles, Calif. 90024 (213-825-4422)
Home: 3136 Barry Ave., Los Angeles, Calif. 90066 (213-390-3225)
Military Service: U.S. Army, 1943-46, final rank of Warrant Officer (JG)

JUDGMENT FOR DEFENDANTS AND AGAINST PLAINTIFF

This action came on for trial before the Court, the Honorable A. Andrew Hauk, United States District Judge, presiding, on August 1, 1979, and the issues having been duly tried, and the Court having rendered and entered its Memorandum of Decision and Order of Judgment, constituting the Court's findings of fact and conclusions of law,

IT IS HEREBY ORDERED, ADJUDGED AND DECREED:

1. That defendant Kerkorian be, and he hereby is, dismissed from and out of the Complaint, First Amended **[**110]** Complaint, and each and every cause of action therein alleged or attempted to be alleged therein, for lack of jurisdiction.

2. That defendant Tracinda be, and it is hereby, dismissed from and out of the Complaint, First Amended Complaint and each and every cause of action alleged or attempted to be alleged therein, because said defendant Tracinda is exempted from Section 7 of the Clayton Act, *15 U.S.C. 18*, by the first sentence of paragraph three thereof.

3. That plaintiff take nothing of or from defendants or either of them, and defendants have judgment against plaintiff on the merits.

4. That the Complaint, First Amended Complaint and each and every cause of action alleged or attempted to be alleged therein against defendants or either of them, be and the same are dismissed on the merits.

[*1134] 5. That defendants shall have and recover its and his respective costs of suit incurred herein.

International Asso. of Machinists & Aerospace Workers, ("IAM") v. Organization of Petroleum Exporting Countries ("OPEC")

United States District Court, Central District of California

September 18, 1979

No. 78-5012-AAH (SX)

Reporter

477 F. Supp. 553 *; 1979 U.S. Dist. LEXIS 9713 **; 1979-2 Trade Cas. (CCH) P62,868

INTERNATIONAL ASSOCIATION OF MACHINISTS AND AEROSPACE WORKERS, ("IAM"), An Association, Plaintiff, v. THE ORGANIZATION OF THE PETROLEUM EXPORTING COUNTRIES ("OPEC"); THE DEMOCRATIC AND POPULAR REPUBLIC OF ALGERIA, ("ALGERIA"); THE REPUBLIC OF ECUADOR, ("ECUADOR"); THE GABONESE REPUBLIC, ("GABON"); REPUBLIC OF INDONESIA, ("INDONESIA"); IMPERIAL GOVERNMENT OF IRAN, ("IRAN"); REPUBLIC OF IRAQ, ("IRAQ"); STATE OF KUWAIT, ("KUWAIT"); LIBYAN ARAB REPUBLIC, ("LIBYA"); FEDERAL REPUBLIC OF NIGERIA, ("NIGERIA"); STATE OF QATAR, ("QATAR"); KINGDOM OF SAUDI ARABIA, ("SAUDI ARABIA"); STATE OF UNITED ARAB EMIRATES, ("UNITED ARAB EMIRATES"); AND THE REPUBLIC OF VENEZUELA, ("VENEZUELA"), Defendants.

Energy & Utilities Law > Antitrust Issues > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN7[] Purchasers, Direct Purchasers

A plaintiff in a price fixing case may recover only if it purchased directly from the alleged price fixer. An indirect purchaser may not recover on the basis of the so-called pass-on or pass-through doctrine.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN8[] Private Actions, Purchasers

The evidentiary complexities and uncertainties involved in the defensive use of pass-on against a direct purchaser are multiplied in the offensive use of pass-on by a plaintiff several steps removed from the defendant in the chain of distribution.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN9[] Private Actions, Purchasers

The two primary features of the cost-plus contract are: (1) a direct and easily measurable pass-on of costs; and (2) a commitment for a fixed quantity, precluding evidentiary complexities due to considerations of decreasing sales.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN10[] Regulated Practices, Price Fixing & Restraints of Trade

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN12[] Private Actions, Purchasers

Illinois Brick and Hanover Shoe do not preclude an indirect purchaser from seeking injunctive relief. In contrast to the treble damage action, a claim for injunctive relief does not present the countervailing considerations such as the risk of duplicative or ruinous recoveries and the spectre of a trial burdened with complex and conjectural economic analyses that the supreme court emphasized when limiting the availability of treble damages.

HN13[] Remedies, Damages

15 U.S.C.S. § 15 of the Clayton Act, which provides for damages for any person who shall be injured by conduct in violation of the antitrust laws, and *§ 16* of the Clayton Act, *15 U.S.C.S. § 26*, which allows injunctive relief against threatened loss or damage. For purposes of *§ 16* the complainant need only demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN14[] Antitrust & Trade Law, Clayton Act

The test for standing under *§ 16* of the Clayton Act, *15 U.S.C.S. § 26* has been framed in terms of a proximate cause standard that is less constrained than that under *§ 4* and which might in fact be no more rigorous than the general rule of standing.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN15[] Purchasers, Indirect Purchasers

The multiplicity of suit problem does not exist in the context of *§ 16* of the Clayton Act, *15 U.S.C.S. § 26*, injunctive relief. The remedy of an injunction does not give rise to recovery of a fund from which a court would have the impossible task of attempting to apportion the recovery among a long line of indirect purchasers on a chain of distribution. An indirect purchaser may sue for injunctive relief under the antitrust laws.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

International Law > ... > Foreign Sovereign Immunities Act > Jurisdiction > Subject Matter Jurisdiction

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > Statutory Sources

International Law > Foreign & International Immunity > Sovereign Immunity > General Overview

HN16[] Subject Matter Jurisdiction, Jurisdiction Over Actions

Subject matter jurisdiction is granted to the district courts to hear actions against foreign states under 28 U.S.C.S. § 1330(a). District courts only have jurisdiction to hear such actions when the foreign state is not entitled to immunity. Consequently, the question of sovereign immunity has been given jurisdictional status by its express inclusion in the statute.

International Law > Foreign & International Immunity > Sovereign Immunity > General Overview

HN17[] Foreign & International Immunity, Sovereign Immunity

See 28 U.S.C.S. § 1330(a).

International Law > Dispute Resolution > General Overview

International Law > Foreign & International Immunity > Sovereign Immunity > General Overview

HN18[] International Law, Dispute Resolution

Sovereign immunity is a doctrine of international law under which domestic courts must refrain from asserting jurisdiction over a foreign state.

International Law > Foreign & International Immunity > Sovereign Immunity > General Overview

HN19[] Foreign & International Immunity, Sovereign Immunity

Under the absolute sovereign immunity theory, a foreign state could not be sued whatsoever without its consent. Under the restrictive theory, foreign states and sovereignties are not immune insofar as their commercial activities are concerned. The immunity of the sovereign is recognized with regard to sovereign or public acts of a state, but not with respect to private acts.

International Law > Foreign & International Immunity > Sovereign Immunity > General Overview

International Law > Foreign & International Immunity > General Overview

HN20[] Foreign & International Immunity, Sovereign Immunity

Any claim of sovereign immunity must be decided in conformity with principles set forth in the Foreign Sovereign Immunities Act. 28 U.S.C.S. § 1602.

International Law > ... > Exceptions > Commercial Activities > Direct Effects

International Law > Foreign & International Immunity > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

HN27[] **Antitrust & Trade Law, Sherman Act**

Section 8 of the Sherman Act, *15 U.S.C.S. § 7*, and *section 1* of the Clayton Act, *15 U.S.C. § 12*, define person or persons, to include corporations and associations existing under or authorized by the laws of the territories, the laws of any state, or the laws of a foreign country.

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN28[] **International Aspects, International Application of US Law**

Foreign sovereigns are not persons subject to Sherman Act liability.

Antitrust & Trade Law > International Aspects > International Application of US Law > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN29[] **International Aspects, International Application of US Law**

The Sherman Act does not confer jurisdiction on United States courts over acts of foreign sovereigns. By its terms, it forbids only anticompetitive practices of persons and corporations. The Sherman Act refers only to persons, not to states or nations, and both the Sherman Act and the constitution would be badly misinterpreted to permit liability for acts of a sovereign.

Antitrust & Trade Law > Clayton Act > General Overview

HN30[] **Antitrust & Trade Law, Clayton Act**

Plaintiff in an injunctive action under 15 U.S.C.S. § 26 is required to show only threatened loss or damage, this damage must be proximately caused by the alleged anticompetitive actions of the defendants.

International Law > Foreign & International Immunity > Sovereign Immunity > General Overview

HN31[] Foreign & International Immunity, Sovereign Immunity

Mere approximation of occurrence, however, does not demonstrate causation, in and of itself. Plaintiff is required to present specific evidence satisfactory to the court to establish this causation. 28 U.S.C.S. § 1608(e).

Civil Procedure > ... > Default & Default Judgments > Default Judgments > Entry of Default Judgments

International Law > Foreign & International Immunity > Sovereign Immunity > General Overview

Civil Procedure > Judgments > Pretrial Judgments > General Overview

Civil Procedure > ... > Pretrial Judgments > Default & Default Judgments > General Overview

International Law > Foreign & International Immunity > General Overview

HN32[] Default Judgments, Entry of Default Judgments

Under 28 U.S.C.S. § 1608(e) the court cannot enter a default judgment automatically upon failure or refusal of a foreign sovereign to appear after being served as required by the Foreign Sovereign Immunities Act.

Opinion

[*558] MEMORANDUM OF DECISION AND ORDER OF JUDGMENT FOR DEFENDANTS

INTRODUCTORY

In September, 1960, defendants Iran, Iraq, Kuwait, Saudi Arabia and Venezuela met in Baghdad, Iraq. The result of this meeting and subsequent meetings was the Organization of Petroleum Exporting Countries (hereinafter "OPEC"). Thereafter, defendants Algeria, Ecuador, Gabon, Indonesia, Libya, Nigeria, Qatar and The United Arab Emirates joined OPEC, bringing to 13 the number of member nations. The principal aim of this organization was stated as "the unification of petroleum policies for the Member Countries and the determination of the best means for safeguarding the interests of Member Countries individually and collectively." Resolution of the First Conference, Resolution 1.2(4). To accomplish this goal, the organization expressed the desire to "formulate a system to ensure the stabilization of prices by, among other means, the regulation of production, with regard to the interests of the producing and of the consuming nations, and to the necessity of securing a steady income to the producing countries, an efficient economic and regular supply of this source of energy to **[**3]** consuming nations. . . . " Id. Resolution 1.1(3). The system that was implemented by OPEC included, among other features, the setting of prices for the sale of their crude oil.

Plaintiff International Association of Machinists and Aerospace Workers (hereinafter "IAM") filed this action in December 1978, by way of Complaint and then a day later by way of First Amended Complaint, challenging the price setting activities of OPEC and its 13 member nations, naming each nation and OPEC as defendants. Plaintiff alleged that these price setting activities violated *Section 1* of the Sherman Act, *15 U.S.C. § 1*, [1] under which price

* Briefs of amici curiae urging granting of the injunction were filed by Joel D. Joseph, and Daniel J. Popeo, Washington, D.C., for the Washington Legal Foundation, Washington, D.C.; by Congressman Jim Leach, Washington, D.C., in pro. per. with general agreement by Congressman Tom Railsback, Washington, D.C.; by Public Advocates, Inc., San Francisco, Cal. by Angela Glover Blackwell and Robert L. 1 ***HN1***[] *15 U.S.C. § 1* provides:

fixing has, in a long line of cases, [2] **[**5]** **[*559]** been ruled a Per se violation. [3] The injury plaintiff has allegedly received is the payment of higher prices for gasoline at the service station pumps, by virtue of the anticompetitive actions taken by defendants and the antitrust violations involved. In this action, plaintiff asks for damages under *Section 4* of the Clayton Act, *15 U.S.C. § 15*, [4] and injunctive relief under *Section 16* of the Clayton Act, *15 U.S.C. § 26*, [5] **[**6]** praying this Court to enjoin the price setting activities of these defendants, OPEC and **[**4]** member nations. Plaintiff claims that jurisdiction of this Court is based upon the Foreign Sovereign Immunities Act of 1976 (hereinafter "FSIA"), *28 U.S.C. § 1602, Et seq.*, particularly *28 U.S.C. § 1605(a)(2)*, [6] as well as upon the Sherman and Clayton Acts.

Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding one million dollars if a corporation, or, if any other person, one hundred thousand dollars, or by imprisonment not exceeding three years, or by both said punishments, in the discretion of the court.

[3] ***HN2***[] The Per se category of antitrust violations is made up of agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to precise harm they have caused or business excuse for their use. *Sitkin Smelting & Refining Co. v. FMC Corp., 575 F.2d 440, 446 (3d Cir. 1978)*.

[4] ***HN3***[] *15 U.S.C. § 15* provides:

Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

[5] ***HN4***[] *15 U.S.C. § 26* provides:

Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws, including sections 13, 14, 18 and 19 of this title, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings, and upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue: Provided, That nothing herein contained shall be construed to entitle any person, firm, corporation, or association, except the United States, to bring suit in equity for injunctive relief against any common carrier subject to the provisions of the Act to regulate commerce, approved February fourth, eighteen hundred and eighty-seven, in respect of any matter subject to the regulation, supervision, or other jurisdiction of the Interstate Commerce Commission. In any action under this section in which the plaintiff substantially prevails, the court shall award the cost of suit, including a reasonable attorney's fee, to such plaintiff.

[6] ***HN5***[] *28 U.S.C. § 1605(a)(2)* provides:

(a) A foreign state shall not be immune from the jurisdiction of courts of the United States or of the States in any case

(2) in which the action is based upon a commercial activity carried on in the United States by the foreign state; or upon an act performed in the United States in connection with a commercial activity of the foreign state elsewhere; or upon an act outside the territory of the United States in connection with a commercial activity of the foreign state elsewhere and that act causes a direct effect in the United States;

On June 25, 1979, plaintiff moved for a preliminary injunction. At that time, none of the defendants had made an appearance in this action or had filed an opposition to that motion. Since default had been entered by the Clerk on only three of the defendants, and since the remainder of the defendants still had time within which they could file an answer, the motion for preliminary injunction was continued. This Court wanted to give each and every defendant a full opportunity to be heard prior to ruling on the motion for preliminary **[**7]** injunction. Furthermore, the Court was aware of the constraints of the FSIA, in particular the provision that ***HN6***[] "No judgment by default shall be entered by the court . . . unless the claimant establishes his claim or right to relief by evidence satisfactory to **[*560]** the court." *28 U.S.C. § 1608(e)*. Since the preliminary injunction sought by plaintiff would have given plaintiff a good measure of what it sought, it would have been inappropriate for this Court to proceed on an incomplete record without a full hearing. So the Court ordered the evidentiary hearing on the motion for preliminary injunction consolidated with the trial on the final injunction under *Rule 65 of the Federal Rules of Civil Procedure*, together with the evidentiary hearing on the motion for default judgment, all to be heard on August 20, 1979. In this manner, the requirements of *28 U.S.C. § 1608(e)* could be fulfilled while allowing defendants sufficient time to appear and oppose this action and at the same time allowing plaintiff sufficient time to prepare and gather evidence in support of the injunction. Moreover, the Court also issued an Order To Show Cause asking for factual and legal assistance on some **[**8]** eighteen basic questions from the defendants, and from any other knowledgeable sources as Amici curiae, with the requirements that plaintiff effect service on the defendants and on numerous Federal and State officials and agencies, and make copies available to the news media. See Appendix A.

In response, 11 briefs were submitted, and plaintiff and four Amici curiae appeared by counsel. As ordered, the consolidated hearings and trial proceeded on August 20, 1979. As of that date, each of the 13 member nations had been validly served. Each, however, had chosen not to make an appearance in this action, and as a result, a default entry had been made by the Clerk of Court against each of the 13 member nations, with determination of whether the Court would make and enter a default judgment to abide the outcome of the hearings and trial.

What follows now shall constitute the Court's written findings of fact and conclusions of law, pursuant to *Rule 52(a), F.R.Civ.P.*

At the outset, the Court pointed out that OPEC could not legally be served either under FSIA, *28 U.S.C. § 1602* ff., or under the International Organizations Immunities Act, (hereinafter "IOIA"), *22 U.S.C. § 288 Et seq.*, or **[**9]** otherwise, holding that FSIA applies only to foreign sovereignties, which OPEC is not; and, IOIA applies only to those international organizations "in which the United States participates," and the United States does not participate in OPEC. The Court added its doubts that OPEC could ever be legally served with process. But, in any event, plaintiff and its counsel admitted that OPEC could not be and had not been legally served. Whereupon the Court dismissed OPEC from the lawsuit and out of the case entirely.

Thereupon the consolidated hearings and trial commenced and ran four days and four evenings, usually from 9:30 a.m. to anywhere from 8:30 p.m., to 11:30 p.m., with appropriate recesses for rest, physical relief and meals. At the conclusion of a full day of argument, the Court issued its oral decision from the Bench dismissing the case as against all the remaining defendants, to wit, the 13 nations, members of OPEC, and ordering judgment against the plaintiff.

PLAINTIFF AS "INDIRECT PURCHASER"

1. Damages

In the early stages of the proceedings, the Court dismissed the damage portion of plaintiff's complaint. Plaintiff did not allege any direct purchase from defendants. The injury **[**10]** claimed allegedly resulted from the purchase of gasoline here in the United States. Since plaintiff did not allege or show that it purchased any crude oil or gasoline from the defendants, or had any dealings with the defendants at all, it necessarily had to be and was and is an "indirect purchaser" of and from the defendants with respect to the gasoline it purchased in the United States. The most that plaintiff could show or claim was that it purchased in the United States, at service station pumps, gasoline which in part may have been refined in the United States by American companies from defendants' crude. Viewing the facts in a light most favorable **[*561]** to plaintiff, it is clear that since the defendants' crude oil passed f. o. b. the particular defendant country's port, was sold and title passed from defendants to purchasers at such ports, was sold again and title passed again and again through crude buyers, crude shippers, crude resellers, refineries, was re-refined into gasoline, then went through gasoline distributors and marketing wholesalers and gasoline retailers until the gasoline was purchased by plaintiff at the service station pumps, plaintiff was and is at the **[**11]** very best an indirect purchaser, eight times removed from the defendants, that is, an indirect purchaser of domestic gasoline eight times removed from defendants, and not a direct purchaser of defendants' foreign crude.

As an indirect purchaser, plaintiff is precluded from seeking damages. In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, the Supreme Court held that ***HN7***[] a plaintiff in a price fixing case may recover only if it purchased directly from the alleged price fixer. An indirect purchaser may not recover on the basis of the so-called pass-on or pass-through doctrine, urged by plaintiff. Plaintiff cannot establish antitrust injury by showing that the additional cost imposed on crude oil by the price fixing defendants has been passed on to the plaintiff by the first direct purchaser from the defendants and any intermediate purchasers along the line through the refineries and on to the service station pumps as gasoline.

The Illinois Brick case followed the earlier decision of *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*. In the Hanover Shoe case, the defendant, accused of monopolizing **[**12]** shoe machinery, attempted to defend against this charge by asserting that plaintiff was not injured by any acts committed by the defendant because the plaintiff, a shoe manufacturer, passed the additional costs along to the ultimate consumer. The Supreme Court rejected this pass-on or pass-through doctrine as a defense which could be asserted in an action for treble damages under *§ 4* of the Sherman Act, *15 U.S.C. § 4*. The Supreme Court based its holding on the difficulties and uncertainties of proof concerning such a defense when it stated:

> A wide range of factors influence a company's pricing policies. Normally the impact of a single change in the relevant conditions cannot be measured after the fact; indeed a businessman may be unable to state whether had one fact been different (a single supply less expensive, general economic conditions more buoyant, or the labor market tighter, for example), he would have chosen a different price. Equally difficult to determine, in the real economic world rather than an economist's hypothetical model, is what effect a change in a company's price will have on its total sales. Finally, costs per unit for a different volume of total sales are **[**13]** hard to estimate. Even if it could be shown that the buyer raised his price in response to, and in the amount of, the overcharge and that his margin of profit and total sales had not thereafter declined, there would remain the nearly insuperable difficulty of demonstrating that the particular plaintiff could not or would not have raised his prices absent the overcharge or maintained the higher prices had the overcharge been discontinued. Since establishing the applicability of the passing-on defense would require a convincing showing of each of these virtually unascertainable figures, the task would normally prove insurmountable.

Hanover Shoe v. United Shoe Mach., supra, 392 U.S. at 492-493, 88 S. Ct. at 2231.

Additionally, the Court was concerned about the antitrust laws losing their effectiveness if such a defense were allowed. If this defense was carried to the extreme, the only possible plaintiffs would necessarily be the ultimate customers who, in the instances in Hanover Shoe, were buyers of single pairs of shoes. Since such individuals would only have a tiny stake in a lawsuit and, therefore, little interest in it, those who violate the antitrust laws by price fixing **[**14]** or monopolizing would retain the fruits of their illegality because no one would be available to bring and prosecute vigorously **[*562]** any class action against them. *Id. at 494, 88 S. Ct. 2224*.

In Illinois Brick, the Court was faced with the choice of either carving out an exception to Hanover Shoe, or disallowing the use of the pass-on doctrine both offensively and defensively. In disallowing its use, offensively and defensively, the Court noted that "The principal basis for the decision in Hanover Shoe was the Court's perception of the uncertainties and difficulties in analyzing price and out-put decisions "in the real economic world rather than an economist's hypothetical model,' *392 U.S., at 493, (88 S. Ct. at 2231*), and of the costs to the judicial system and the efficient enforcement of the antitrust laws of attempting to reconstruct those decisions in the courtroom." *Illinois Brick Co. v. Illinois, supra, 431 U.S. at 731-732, 97 S. Ct. at 2068*. The Court went on to find that "***HN8***[] the evidentiary complexities and uncertainties involved in the defensive use of pass-on against a direct purchaser are multiplied in the offensive use of pass-on by a plaintiff several steps removed **[**15]** from the defendant in the chain of distribution." *Id. at 732, 97 S. Ct. at 2068*. Thus, the evidentiary complexities of the pass-on doctrine, where one could become mired in a determination of how much damage to apportion to each purchaser in a long chain of distribution, led the Court to reject the offensive use of this doctrine. Additionally, the Court was concerned with exposing defendants to multiple liability if the pass-on doctrine were allowed to be used offensively, but not defensively, because in such a situation, each purchaser in the chain of distribution could recover the full measure of his own injury, and damages, as well as the injury and damages of each purchaser below him, and yet the defendant could not offset the recovery of the first purchaser against the recovery of the second purchaser, or the recovery of any subsequent purchaser against any recovery of further subsequent purchasers, or Vice versa. *Id. at 730-731, 97 S. Ct. 2061*.

The Court was also concerned about the problems of joinder inherent in such a situation, such as impossibility of joinder, frustrating attempts at class actions, difficulties in properly apportioning recoveries, and other inherent problems. **[**16]** *Id. at 737-741, 97 S. Ct. 2061*.

The Court did recognize that there may be instances where an indirect purchaser could be a proper plaintiff. A pre-existing cost-plus contract was cited as such an exception to the Court's opposition to application of the pass-on doctrine. The interaction of supply and demand would not complicate the damage determination in such a situation since the indirect purchaser would be tied to a fixed quantity with the overcharge being directly passed on. *Id. at 736, 97 S. Ct. 2061*. The Court also recognized that another situation where the pass-on doctrine might be allowed is where the direct purchaser is owned or controlled by its customer. *Id. at 736 n. 16, 97 S. Ct. 2061*.

In the present action, plaintiff does not even allege that it is a direct purchaser, and it is clearly an indirect purchaser. Plaintiff, however, asserts that it falls into the exceptions of Illinois Brick and has the right to maintain the action for damages. Plaintiff attempts to support this assertion based on three theories: (1) that certain Federal pass-through regulations are analogous to the cost-plus contract; (2) that domestic oil companies have conspired with the defendants; **[**17]** and (3) that the defendants control the United States oil companies with which plaintiff deals.

HN9[] The two primary features of the cost-plus contract which led the Court to cite this as a possible exception to Illinois Brick are: (1) a direct and easily measurable pass-on of costs; and (2) a commitment for a fixed quantity, precluding evidentiary complexities due to considerations of decreasing sales. The Federal pass-through regulations upon which plaintiff relies have neither of these characteristics. Plaintiff alleges that consumer prices for gasoline directly reflect any price increase by the OPEC nations, based on the pass-through **[*563]** statute, 15 U.S.C. § 753(b)(2), [7] which allows a dollar-for-dollar pass-through of net increases in the cost of crude oil. Plaintiff's exhibits in support of its motion for preliminary injunction, however, irrefutably establish that the actual pass-through is accomplished in a banking mechanism. The oil companies "bank" these pass-throughs until such time, as they believe, the market will allow an increase in the price of gasoline. The pass-through, if it occurs at all, is not direct and is not easily measurable. Furthermore, consumers are **[**18]** not required to buy a fixed quantity of gasoline. Consequently, evidentiary problems much the same as in Illinois Brick could and most surely would arise. Therefore, this pass-through statute and the regulations of the Department of Energy thereunder, 10 C.F.R. 212.83, pp. 277-290 (1978), are not in any way analogous to a true cost-plus contract and cannot serve as an exception to Illinois Brick.

Plaintiff's contentions with respect to conspiracy with "certain private companies and other entities" (Plaintiff's First Amended Complaint, par. 24, page 11, lines 15-21), and control of them by the OPEC countries are **[**19]** equally

---

[7] ***HN10***[] 15 U.S.C. § 753(b)(2) provides in pertinent part:

(2) In specifying prices (or prescribing the manner for determining them), the regulation under subsection (a) of this section

(A) shall provide for a dollar-for-dollar pass-through of net increases in the cost of crude oil, residual fuel oil, and refined petroleum products at all levels of distribution from the producer through the retail level;

frivolous. While plaintiff does allege a conspiracy in its complaint, the allegation is extremely general and vague. Plaintiff utterly fails to allege any facts to support a conspiracy charge, and does not even name any domestic oil companies as engaging in any such conspiracy, or being controlled in any way by OPEC or its members. Furthermore, plaintiff's complaint contains absolutely no allegations concerning control. Moreover, no evidence of any kind was adduced at the hearings and trial to show any kind of such conspiracy or control. Consequently, these contentions must fall.

The Court, therefore, must and does strike and dismiss from the First Amended Complaint the prayer for damages.

2. Injunctive Relief

Aside from seeking damages, plaintiff has prayed the Court to enjoin the defendants from continuing to conspire to fix prices. This claim is based on *Section 16* of the Clayton Act, ***HN11***[] *15 U.S.C. § 26*, which states in part:

> Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws **[**20]** . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity . . . . [8]

While the Supreme Court has spoken clearly and definitively concerning an indirect purchaser's right to seek damages in Illinois Brick, the Court has not made a definitive statement concerning the right of an indirect purchaser to seek injunctive relief. Both Illinois Brick and Hanover Shoe involved damage actions only, and the Supreme Court limited its ruling to the question of damages. Thus, whether an indirect purchaser may properly seek injunctive relief for an antitrust violation remains an open question.

In *Mid-West Paper Products Company v. Continental Group, Inc., 596 F.2d 573 (3d Cir. 1979)*, the Court of Appeals for the Third Circuit held that ***HN12***[] Illinois Brick and Hanover Shoe do not preclude an indirect purchaser from seeking injunctive relief. The Court based this holding on the finding, at 590, that

> in contrast to the treble damage action, a claim **[**21]** for injunctive relief does not present the countervailing considerations such as the risk of duplicative or **[*564]** ruinous recoveries and the spectre of a trial burdened with complex and conjectural economic analyses that the Supreme Court emphasized when limiting the availability of treble damages.

In support of this ruling the Court draws a distinction between *Section 4* of ***HN13***[] the Clayton Act (*15 U.S.C. § 15*) which provides for damages for any person who shall be injured by conduct in violation of the antitrust laws, and *Section 16* (*15 U.S.C. § 26*) which allows injunctive relief against threatened loss or damage. The Court went on to state that

> for purposes of *§ 16* the complainant "need only demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur" . . . . *Id. at 591* (footnote omitted).

This distinction between the plaintiff's obligation to show that he has actually been injured under *Section 4*, and plaintiff's obligation to show only threatened injury under *Section 16*, led the Court to conclude that

> ***HN14***[] the test for standing under *Section 16* has been framed in terms of **[**22]** a proximate cause standard that is "less constrained" than that under *§ 4* and which might in fact be no more rigorous than the general rule of standing. *Id. at 591-592* (footnotes omitted).

[8] For full text of *15 U.S.C. § 26*, see footnote 5, Supra.

The Court also showed concern for plaintiffs that have obviously been damaged yet have been foreclosed from seeking relief, and additional concern for the enforcement mechanisms of the antitrust laws if these plaintiffs should be completely barred from seeking redress. *Id. at 593*.

A suit for injunctive relief does not present many of the problems that led the Court in Illinois Brick to preclude an indirect purchaser from seeking damages. For instance, as stated in *Hawaii v. Standard Oil Co., 405 U.S. 251, 261, 92 S. Ct. 885, 891, 31 L. Ed. 2d 184 (1972)*, "100 injunctions are no more effective than one." Thus ***HN15***[] the multiplicity of suit problem does not exist in the context of *Section 16*, injunctive relief. The remedy of an injunction does not give rise to recovery of a fund from which a Court would have the impossible task of attempting to apportion the recovery among a long line of indirect purchasers on a chain of distribution. Accordingly, some of the evidentiary and joinder problems that perplexed **[**23]** the Court in Illinois Brick are not present in an injunctive action. This is not to say, however, that all the evidentiary problems are nonexistent. The dynamics of the marketplace could still lead to extremely complex and complicated evidentiary problems in determining whether an indirect purchaser has been injured by the prohibited action. Counterbalanced against this possible difficulty of proof, however, is the recognition that should the indirect purchaser be precluded from seeking injunctive relief, he would be totally without any remedy for an injury that is many times all too real. In view of the desire of Congress for effective enforcement procedures under the ***antitrust law***, this Court does not believe that Congress intended to totally exclude such a large class of potential plaintiffs from the protection of the antitrust laws. Accordingly, this Court agrees with the Mid-West Paper decision and concludes that an indirect purchaser may sue for injunctive relief under the antitrust laws. But this does not end the matter in some way favorable to plaintiff because we must look for and find jurisdiction if plaintiff is to prevail.

JURISDICTION

HN16[] Subject matter jurisdiction is granted **[**24]** to the district courts to hear actions against foreign states under *28 U.S.C. § 1330(a)*. [9] As explicitly provided by this **[*565]** statute, however, district courts only have jurisdiction to hear such actions when the foreign state is not entitled to immunity. Consequently, the question of sovereign immunity has been given jurisdictional status by its express inclusion in this statute and must be the first question addressed by this court in determining whether this Court has been presented evidence satisfactory to support its jurisdiction to grant plaintiff's claim for relief. [10]

[25]**

HN18[] Sovereign immunity is a doctrine of international law under which domestic courts must refrain from asserting jurisdiction over a foreign state. This doctrine was first recognized in the case of *The Schooner Exchange v. M'Faddon, 11 U.S. (7 Cranch) 116, 3 L. Ed. 287 (1812)*. Until recently, when a foreign state wished to assert immunity, it would request the Department of State to make a formal suggestion of immunity to the court. The courts had begun to rely quite heavily on the practices and policies of the State Department and to place less emphasis on whether immunity was supported by the law and practice of nations, that is, international law.

The theory of absolute sovereign immunity initially predominated all judicial discussion and decision. ***HN19***[] Under this theory, a foreign state could not be sued whatsoever without its consent. But as the law evolved in this area, a restrictive theory of immunity began to gather growing support. Under the restrictive theory, foreign states

---

9 ***HN17***[] *28 U.S.C. § 1330(a)* provides:

(a) The district courts shall have original jurisdiction without regard to amount in controversy of any non-jury civil action against a foreign state as defined in *section 1603(a)* of this title as to any claim for relief in personam with respect to which the foreign state is not entitled to immunity either under sections 1605-1607 of this title or under any applicable international agreement.

10 A Federal Court in every case must first determine, on its own motion if the question is not otherwise suggested, whether the court has jurisdiction. *Warner v. Territory of Hawaii, 206 F.2d 851, 852 (9th Cir. 1953)*. Accordingly, whenever the question of lack of jurisdiction arises, whether it be by the parties, by the court itself, or by the suggestion of Amici curiae as in this case, it is the duty of the court to review this issue of jurisdiction.

and sovereignties are not immune insofar as their commercial activities are concerned. This theory was first stated as United States policy in 1952 in a letter ("the Tate Letter") from the Acting Legal Advisor **[**26]** of the Department of State, Jack B. Tate, to the Acting Attorney General, Philip B. Perlman:

> . . . . (T)he immunity of the sovereign is recognized with regard to sovereign or public acts (Jure imperii) of a state, but not with respect to private acts (Jure gestionis). 26 Dep't State Bull. 984 (1952).

In 1976, Congress enacted the Foreign Sovereign Immunities Act. The legislative history is clear that the Act codified the restrictive theory of sovereign immunity. Additionally, a principal purpose of this act was "to transfer the determination of sovereign immunity from the executive branch to the judicial branch thereby . . . assuring litigants that these often crucial decisions are made on purely legal grounds and under procedures that insure due process." House Report No. 94-1487, p. 7, 5 U.S.Code Cong. & Admin.News (1976), pp. 6604, 6606. After the enactment of FSIA, ***HN20***[] any claim of sovereign immunity must be decided in conformity with principles set forth in this act. ***HN21***[] *28 U.S.C. § 1602*.

Under it, the FSIA, foreign states are granted immunity from the jurisdiction of American courts subject to certain exceptions. *28 U.S.C. § 1604*. [11] The only exception to immunity upon **[**27]** which plaintiff relies provides that foreign states are not immune in any case:

> in which the action is based upon a commercial activity carried on in the United States by the foreign state; or upon an act performed in the United States in connection with a commercial activity of the foreign state elsewhere; or upon an act outside the territory of the United States in connection with a commercial activity of the foreign state elsewhere and the act causes a direct effect in the United States. *28 U.S.C. § 1605(a)(2)*.

[*566] Accordingly, for this court to have subject matter jurisdiction the defendant must show that the activities engaged in by the defendants are "Commercial activities." **[**28]**

As shown by the evidence, the pricing mechanism used by the member nations involves mutual agreement on what is called the "government take." The government take is the amount of money the government will receive for each barrel of oil extracted within its borders and sold. Initially, each of the OPEC member sovereignties received this "take" by levying a tax on the foreign company extracting the oil or by charging the foreign company a royalty for the oils extracted. As each country gained a greater proprietary interest in the company extracting the oil, a greater amount of the "take" was derived from "buyback," a term used to signify the amount a foreign state receives through the ownership, partial or total, of the company extracting and selling the crude oil. Today, the "government take" is accomplished and maintained by taxation and direct price quotation and demand, supported by production controls, sometimes euphemistically referred to as "conservation."

While price-fixing is the more publicized aspect of the crude oil activities carried on by the OPEC countries, it is not the heart of the pricing mechanism for crude. The foundation of these activities is the ability and willingness **[**29]** to control production of crude oil. As testified by the preeminent expert in the field of World Petroleum Economics, Dr. Morris A. Adelman, one of the two Court appointed experts: [12]

---

[11] ***HN22***[] *28 U.S.C. § 1604* provides:

Subject to existing international agreements to which the United States is a party at the time of enactment of this Act a foreign state shall be immune from the jurisdiction of the courts of the United States and of the States except as provided in *sections 1605 to 1607* of this chapter.

[12] The Court, dissatisfied with the apparent expertise and proposed testimony of the plaintiff's experts, Dr. Arnold E. Safer, Dr. James R. Kurth, and Dr. Stanley J. Foster, and after consulting the outstanding academic economic authorities in the United States, appointed as its own experts, Dr. M. A. Adelman, Professor of Economics at Massachusetts Institute of Technology, and Dr. Philip K. Verleger, Jr., Senior Research Scientist, School of Organization and Management, Yale University who until very recently had been working as Special Assistant to the Assistant Secretary for Economic Policy in the Department of the

[30]**

> Control of supply is the essence of monopoly; price fixing the result . . . . (T)he OPEC nations can raise or lower prices at will by controlling output. Most of the (crude oil) price increases since 1970 have in fact resulted from output restriction. Prices have also been raised by taxation and by direct price quotation. These two methods are convenient, but not necessary. Court Exhibit 26, Statement of M.A. Adelman. pp. 1, 12-13.

In order to determine whether these activities are "commercial activities," the Court must once again return to the FSIA for guidance. ***HN23***[] *Section 1603(d)* defines "commercial activity" as follows:

> A "commercial activity" means either a regular course of commercial conduct or a particular commercial transaction or act. The commercial character of an activity shall be determined by reference to the Nature of the course of conduct or particular transaction or act, rather than by reference to its purpose. (Emphasis added.)

The legislative history in the House Report elaborates, referring to ***HN24***[] a foreign state's commercial acts as "those which private persons normally perform," and "of the same character as . . . might be made by a private person." **[**31]** House Report No. 94-1487, at pp. 14, 16 5 U.S.Code Cong. & Admin.News (1976), pp. 6613, 6615. If **[*567]** the activity is one which normally could be engaged in by a private party, it is a commercial activity and the foreign state is not entitled to immunity. House Report No. 94-1487 at 16, 5 U.S.Code Cong. & Admin.News (1976), p. 6615. If the activity is one in which only a sovereign can engage, the activity is noncommercial.

These standards are somewhat nebulous, however, in the context of a particular factual situation. As discussed by counsel for Amicus Curiae, Indonesia-U.S. Business Committee for the Indonesian Chamber of Commerce, the determining factor is how the court defines the act or activity. An act or activity can be defined broadly, such as "hiring of employees," an activity carried on by private parties, and thus, "commercial," or it can be defined narrowly, such as, "employment of diplomatic, civil service or military personnel," a governmental activity. It was suggested that in determining whether to define a particular act narrowly or broadly, the court should be guided by the legislative intent of the FSIA, to keep our courts away from those areas that touch **[**32]** very closely upon the sensitive nerves of foreign countries.

This Court agrees that this "commercial activity" should be defined narrowly. This determination, while based partially on the factor mentioned above, is premised primarily on the recognition that a court must base its ruling on specific facts. By basing a ruling on a Generalized view of the evidence, a court may be basing its ruling on half-truths. This Court is required to make its ruling upon the Specific evidence presented in the evidentiary hearings and trial. From the evidence presented to this Court, it is clear that the nature of the activity engaged in by each of these OPEC member countries is the establishment by a sovereign state of the terms and conditions for the removal of a prime natural resource to wit, crude oil from its territory.

In determining whether the activities of the OPEC members are governmental or commercial in nature, the Court can and should examine the standards recognized under international law. The United Nations, with the concurrence of the United States, has repeatedly recognized the principle that a sovereign state has the sole power to control its natural resources. See, e.g., Resolution **[**33]** 1803, G.A. Res. 1803, § I(1), 17 U.N. GAOR, 2d Comm. 327, U.N. Doc. A/C 2/5 R 850 (1962):

Treasury. Both of the experts were unanimously acknowledged by their peers as the two most outstanding and erudite experts in the field of both World and domestic petroleum economics.

That this action by the Court was a wise course is amply demonstrated by even a casual comparison between plaintiff's experts and the Court appointed experts, not only as to Expertise, compare the curriculum vitae of Safer, Foster and Kurth (Exhibits 1, 7 and 10) With the curriculum vitae of Adelman and Verleger (Exhibits 25 and 37); but also as to testimony, Compare testimony of Safer (Rep.Tr.552-900), testimony of Foster (Rep.Tr.903-1020) and testimony of Kurth (Rep.Tr.1022-1122, 1162-1185) With testimony of Adelman (Rep.Tr.1230-1522) and testimony of Verleger (Rep.Tr.1523-1615).

This comparison confirms the wisdom of the Court's complete reliance upon its own appointed experts as contrasted with its skeptical consideration of plaintiff's experts.

> Bearing in mind its resolution 1515 (XV) of 15 December 1960, in which it recommended that the sovereign right of every State to dispose of its wealth and its natural resources should be respected,
>
> Considering that any measure in this respect must be based on the recognition of the inalienable right of all States freely to dispose of their natural wealth and resources in accordance with their national interests, and in respect for the economic independence of States, . . .
>
> Declares that;
>
> 1. The right of people and nations to permanent sovereignty over their national wealth and resources must be exercised in the interest of their national development and of the well-being of the people of the State concerned. [13]

Accord, Charter of Economic Rights and Duties of States, G.A. Res. 3281, **[**34]** Ch. II, Art. 2(1), U.N. Doc. A/RES/3281 (XXIX) (1974); Declaration on the Establishment of a New International Economic Order in 1974, G.A. Res. 3201 (S-VI), *§ 4(e)*, U.N. GAOR, 6th Spec. Sess., Supp. (No. 1) 3, U.N. Doc. A/9559; Resolution 3171, G.A. Res. 3171, 28 U.N. GAOR 30 (Vol. 1) at 52, U.N. Doc. A/9030 (1973); Resolution 3016, G.A. Res. 3016, Preamble and *§ 1*, *27* U.N. GAOR, Supp. (No. 30), U.N. Doc. A/8730; Resolution 2158, G.A. Res. 2158, § I(1), 21 U.N. GAOR, Supp. (No. 16) 29, U.N. Doc. A/6316 (1966). The United States' endorsement of this principle derives from its control, as a sovereign, of the development of its own **[*568]** lands and resources. See, e.g., *U.S. Constitution, Art. 4, Sec. 3, Cl. 2*.

The control over a nation's natural resources stems from the nature of sovereignty. By necessity and by traditional recognition, each nation is its own master in respect to its physical attributes. The defendants' control over their oil resources is an especially sovereign function because oil, as their primary, if not sole, revenue-producing resource, is crucial to the welfare of their nations' peoples. As stated by Dr. Adelman:

> It is difficult or impossible **[**35]** to separate the OPEC governments as governments from their role as oil producers. They began their price fixing role by levying taxes on foreign companies operating within their borders. The oil revenues are the great bulk of governmental revenues. Indeed for the OPEC nations supplying most of the oil, the oil revenues are the great bulk of the whole national product. Court Exhibit 26, Statement by M.A. Adelman, p. 9.

We need not look beyond our own borders for examples of a government taking a determinative role in the marketing of its wealth and natural resources. *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, involved an antitrust challenge to a California state program which controlled the marketing of raisins grown in the state, so as to restrict competition among the growers, and maintain prices. According to the defendants in that case, (California officials), the activity was for the benefit and protection of the public welfare. The Court, in reversing the grant of injunctive relief to plaintiff, held that the program was "an act of government," *Id. at 352, 63 S. Ct. 307*, and reasoned:

> It is plain that the prorate program here was never intended **[**36]** to operate by force of individual agreement or combination. It derived its authority and efficacy from the legislative command of the state and was not intended to operate or become effective without that command. *Id. at 350, 63 S. Ct. at 313*.

Similar activity has been carried on by other States and the Federal Government in this country. The discovery of the East Texas Oil Field in the early 1930's led to distressing conditions in the crude oil industry. This new oil became a drug on the market and was being sold for as little as 10 cents a barrel in Texas, at a time when the price throughout the country had soared to more than $ 3.00 a barrel. The State of Texas and other States, had, in order to prevent waste, and to conserve their natural resources, passed certain statutes and imposed restrictions requiring proration, and limiting the quantities that could be taken from the wells in various fields. The Federal

[13] The United States voted in favor of Resolution 1803, which passed by a vote of 104-0-6. Resolution 1803, G.A. Res. 1803, § I(1), 17 U.N. GAOR, 2d Comm. 327, U.N. Doc. A/C 2/5 R 850 (1962).

Connally Hot Oil Act, 49 Stat. 30, *15 U.S.C. § 715, Et seq.*, was enacted by the Congress to enforce the state statutes, by prohibiting the shipment in interstate commerce of crude oil produced in violation of state laws and regulations. *United States v. Brumfield, 85* ***[**37]*** *F. Supp. 696, 699 (W.D.La.1949)*. Thus, certain States in the United States have restricted production of crude oil in order to maintain and stabilize prices and, thereafter, the Federal Government not only acquiesced in this activity, but made the States' acts effective by the assistance of Federal law enforcement.

In view of our own State and Federal domestic crude oil activities, there can be little question that establishing the terms and conditions for removal of natural resources from its territory, when done by a sovereign state, individually and separately, is a governmental activity. [14] Plaintiff, **[*569]** however, asserts that, while this may be true, the actions of the OPEC nations in coming together to conspire to fix prices is commercial and, thus, not immune. Plaintiff's position, however, is untenable. It is ridiculous to suggest that the essential nature of an activity changes merely by the act of two or more countries coming together to agree upon how they will carry on that activity. The action of sovereign nations coming together to agree on how each will perform certain sovereign acts can only, itself, be a sovereign act. The act derives its authority and efficacy **[**38]** from the command of the sovereign nation and is not intended to operate or become effective without that command.
[39]**

In view of all the evidence presented, this Court finds that the activity carried on by the defendant OPEC member nations is Not "commercial activity;" that, therefore, defendants are entitled to immunity under *28 U.S.C. § 1604*; and that, consequently, this Court lacks subject matter jurisdiction under *28 U.S.C. § 1330(a)*.

---

[14] The legislative intent of FSIA does state that a " "regular course of commercial conduct' includes the carrying on of a commercial enterprise such as a mineral extraction company, an airline or a state trading corporation." House Report No. 94-1487 at 16, 5 U.S.Code Cong. & Admin.News (1976) pp. 6614-6615.

Plaintiff contends that because the OPEC member nations have a proprietary interest in the oil companies which are extracting the oil from within their respective territories, the price fixing activities in which the defendants engage are necessarily "commercial" in view of this legislative intent. While it may be true that through their activities as partial or total owners of these companies, the defendant nations do engage in commercial activities, this does not mean, and the legislative intent does not support the conclusion, that all activities, even those remotely connected with these companies, are necessarily commercial. The fact that a nation owns and operates an airline company, does not mean that all government activities regulating the use of airspace, or the ingress and egress of airplanes to and from the nation's airports, are commercial activities. Accordingly, we must look to the specific activities in which the defendants engage.

Here, a clear distinction must be drawn between the activities each government engages in by virtue of its proprietary interests and the activities in which it engages by virtue of its status as a sovereign. The activities of which plaintiff complains are clearly governmental. These activities are engaged in by the defendants in their status as sovereigns and not in their status as proprietors. This determination is conclusively established by looking to the nature of these activities and comparing them with governmental activities of other nations as we have already done.

This determination is further supported by the activities of the nations herein involved. Prior to Any proprietary interest in any oil extracting company, each defendant nation set the terms of the withdrawal of its resources, through the mediums of taxation and royalties. Thus, the defendants were engaging in this governmental conduct setting terms for crude production long before they obtained any ownership in any production companies. It necessarily follows that these activities are engaged in by virtue of each defendant's status as a sovereign because these activities preceded Any proprietary interest. Therefore, the essential nature of the activity is governmental.

Furthermore, this governmental nature does not change merely because the medium through which the activity is accomplished has changed. When defendants' obtained ownership interests in their respective oil production companies, the media being utilized by the defendants to fix the terms of oil extraction were altered and were changed. Through their proprietary interests the nations could directly control the establishment of these terms. But this change in format does not change the essential nature of the activity, which is still governmental.

As a result, the conclusion is irrefutable that these activities are governmental in nature.

And, since this Court lacks subject matter jurisdiction, it also lacks personal jurisdiction, as mandated by *28 U.S.C. § 1330(b)*. [15]

In concluding this phase of our decision, it is instructive and helpful to note that the United States Government itself has implicitly recognized the activities of the OPEC member nations to be Sovereign activities in connection with the production and marketing of crude oil, when the United States entered **[**40]** into consent decrees with the so-called "Big Seven" or "Seven Sisters" the 7 largest American oil companies doing business with the OPEC member nations. These consent decrees entered into on November 14, 1960, for a period of 25 years until November 14, 1985, in the Department of Justice Antitrust Division Case No. 1163, grant specific "exceptions" and "permissive provisions" allowing these American companies to engage in price fixing, production control and market allocation programs for crude oil when required to do so by the law of any foreign nation, specifically the sovereignties which later organized and became **[*570]** members of OPEC, and which are defendants herein. United States v. Standard Oil Co. (New Jersey), 1960 CCH Trade Cases P 69,849, p. 77,335, S.D.N.Y., Civil Action No. 86-27 (Nov. 14, 1960); United States v. Gulf Oil Corp., 1960 CCH Trade Cases P 69,851, p. 77,344, S.D.N.Y., Civil Action No. 86-27 (Nov. 14, 1960).

FOREIGN SOVEREIGNTY CANNOT BE DEFENDANT IN ANTITRUST ACTION

Even if subject matter jurisdiction did exist, dismissal of the complaint would still be necessary and appropriate. ***HN26***[] *Section 1* of the Sherman Act provides in part that "(e)very Person who **[**41]** shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony . . . ." (Emphasis added. [16]) Any person guilty of such a felony is subject to liability for treble damages. *15 U.S.C. § 15*. It is apparent from the statutory language that plaintiff is entitled to relief in the instant action only if the defendants are "persons" as that term is used in *section 1*.

HN27[] Section 8 of the Sherman Act, *15 U.S.C. § 7*, and *section 1* of the Clayton Act, *15 U.S.C. § 12*, define "person" or "persons," "to include corporations and associations existing under or authorized by the laws of the Territories, the laws of any State, or the laws of a foreign country." This statutory language does not support the conclusion that foreign sovereigns are "persons" subject to Sherman Act liability. The case law accords with this interpretation.

In *Parker v. Brown, supra, 317 U.S. 341, 63 S. Ct. 307, **[**42]** 87 L. Ed. 315 (1943)*, the Supreme Court held that a domestic State is not a person who may be sued under the antitrust laws. The Court reasoned, at 351, *63 S. Ct. at 313*:

> The Sherman Act makes no mention of the state as such, and gives no hint that it was intended to restrain state action or official action directed by a state. The Act is applicable to "persons" including corporations (*§ 7*), and it authorizes suits under it by persons and corporations (*§ 15*). A state may maintain a suit for damages under it, *Georgia v. Evans, 316 U.S. 159, (62 S. Ct. 972, 86 L. Ed. 1346*) but the United States may not sue for damages, *United States v. Cooper Corp., 312 U.S. 600, (61 S. Ct. 742, 85 L. Ed. 1071*) conclusions derived not from the literal meaning of the words "person" and "corporation" but from the purpose, the subject matter, the context and the legislative history of the statute.
>
> There is no suggestion of a purpose to restrain state action in the Act's legislative history. The sponsor of the bill which was ultimately enacted as the Sherman Act declared that it prevented only "business combinations." 21 Cong.Rec. 2562, 2457; see also at 2459, 2461. That its purpose was to **[**43]** suppress combinations to

[15] ***HN25***[] *28 U.S.C. § 1330(b)* provides:

(b) Personal jurisdiction over a foreign state shall exist as to every claim for relief over which the district courts have jurisdiction under subsection (a) where service has been made under *section 1608* of this title.

[16] For full text of *Section 1* of the Sherman Act see Footnote 1, Supra.

> restrain competition and attempts to monopolize by Individuals and corporations, abundantly appears from its legislative history. (Emphasis added.)

These same considerations apply with equal force to foreign nations. [17]
[44]**

[*571] In *Hunt v. Mobil Oil Corp., 550 F.2d 68, 78 n. 14 (2d Cir. 1977)*, Cert. denied, *434 U.S. 984, 98 S. Ct. 608, 54 L. Ed. 2d 477 (1977)*, the court concluded that ***HN28***[] foreign sovereigns are not "persons" subject to Sherman Act liability. Plaintiff in that case alleged, Inter alia, that certain private party defendants had entered into anticompetitive agreements with the government of Libya. Though Libya was not named as a defendant, the Second Circuit considered Libya's liability under the Sherman Act and held that "Libya cannot be guilty of a Sherman Act violation . . . because it is not a person or corporation within the terms of the Act but a sovereign state."

A similar conclusion is found in *Interamerican Refining Corporation v. Texaco Maracaibo, Inc., 307 F. Supp. 1291, 1298 (D.Del.1970)*, where the court held that ***HN29***[] "(t)he Sherman Act does not confer jurisdiction on United States courts over acts of foreign sovereigns. By its terms, it forbids only anticompetitive practices of persons and corporations." (footnote omitted). Later the court added: "The Sherman Act refers only to persons, not to states or nations, and both the Act and the Constitution would be badly misinterpreted **[**45]** to permit liability for acts of a sovereign." *Id. at 1298 n. 18*.

Plaintiff has asserted that this Stare decisis precedent has been altered by the FSIA. Plaintiff relies on a reference contained in the Legislative History of the FSIA, House Report No. 94-1487, p. 19, 5 U.S.Code Cong. & Admin.News (1976), p. 6618, which provides:

> Neither the term "direct effect" nor the concept of "substantial contacts" embodied in *section 1603(e)* is intended to alter the application of the Sherman Antitrust Act, *15 U.S.C. 1, Et seq.*, to any defendant. Thus, the bill does not affect the holdings in such cases as *United States v. Pacific & Arctic Ry. & Nav. Co., 228 U.S. 87, (33 S. Ct. 443, 57 L. Ed. 742) (1913)*, or *Pacific Seafarers, Inc. v. Pacific Far East Line, Inc., (131 U.S.App.D.C. 226,) 404 F.2d 803 (D.C. Cir. 1968)*, cert. denied, *393 U.S. 1093, (89 S. Ct. 872, 21 L. Ed. 2d 784) (1969)*. (footnotes omitted.)

---

[17] Plaintiff has argued that Parker v. Brown has lost its effect through the decisions in *Goldfarb v. Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)* and *LaFayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*. Goldfarb was an action challenging under *§ 1* of the Sherman Act a minimum fee schedule published by the Fairfax County Bar Association and enforced by Virginia State Bar. The State Bar and the County Bar attempted to use the Parker v. Brown doctrine as a defense because the State Bar was a State Agency and, as argued by the County Bar, the ethical codes and the activities of the State Bar prompted it to issue fee schedules. The Court, however, rejected these arguments, holding that anticompetitive activities must be compelled by direction of the State acting as a sovereign before the Parker v. Brown doctrine may be relied upon. *421 U.S. at 791, 95 S. Ct. 2004*. The Court, finding that these activities were not compelled by the State, held that the Parker v. Brown doctrine did not apply to the activities of these State and County Bar defendants.

Here, the activities in which the OPEC defendants are engaged, are conducted by each sovereign nation itself. Thus we can only conclude that the nation by its direction has compelled these activities.

Our case here is clearly distinguishable from Goldfarb by the simple fact that we are not dealing with an agency of the state but the state itself. Accordingly, Goldfarb does not apply here except to the extent that it further supports the determination that when the state itself is conducting the activity, there is no violation of the antitrust laws.

LaFayette is equally inappropriate. The Court concluded in LaFayette that municipalities should not be excluded from the reach of the antitrust laws. The Court found that Parker v. Brown's exemption from the antitrust laws was limited to official action directed by the state. *435 U.S. at 412, 98 S. Ct. 1123*. The Court supported its ruling by stating that "States' subdivisions generally have not been treated as equivalents of the States themselves." Id. (Footnote omitted). Once again, we are not involved with any subdivisions of the OPEC nations, but the nations themselves. Accordingly, LaFayette does not apply to our suit here.

Neither of the cases cited in the legislative history, however, supports a conclusion that a foreign nation may be sued for violating our antitrust laws. *United States v. Pacific & Arctic Co., supra*, involved an alleged conspiracy between American and Canadian carriers (not foreign **[**46]** sovereignties or nations) to monopolize certain transportation partly within and partly without the United States. Since this action was brought under our Federal Antitrust laws, a crucial question in this case was the extra-territorial reach of our domestic laws. The Court held that our laws did apply. Basic to the Court's reasoning was that the monopoly consisted of

> control to be exercised over transportation in the United States, and, so far, is within the jurisdiction of the laws of the United States, criminal and civil. If we may not control foreign citizens or corporations operating in foreign territory, we certainly may control such citizens and corporations operating in our territory, as we undoubtedly may control our own citizens and our own corporations. *228 U.S. at 106, 33 S. Ct. at 448*.

[*572] The other case, *Pacific Seafarers, Inc. v. Pacific Far East Line, Inc., supra*, arose from an attempt by American firms to deny another American firm access to a line of international shipping trade created by Congress for the general benefit of American shipping. This case, just as the Pacific & Artic case, did not involve a foreign sovereign, even tangentially. Congress **[**47]** was chiefly concerned with the continuing effectiveness of these two cases when it referred to the applicability of the Sherman Act to "any defendant." Since, in neither of these cases, was there any attempt to assert jurisdiction over a foreign state, Congress' concern cannot be interpreted to authorize a judicial assertion of jurisdiction over a foreign state for violation of our antitrust laws.

In addition, the language in the legislative history clearly tells us that the FSIA was not intended to alter the application of the Sherman Act. Prior to the enactment of the FSIA, the only definitive statement on this point was the holding in *Interamerican Refining Corp., supra, 307 F. Supp. 1291 (D.Del.1970)*, that foreign nations are not "persons" who may be sued.

Therefore, this Court in this OPEC case is still bound by all the precedents to hold that the foreign sovereignties cannot be made defendants here, despite a recent Supreme Court decision allowing a foreign sovereignty to be an antitrust plaintiff.

In *Pfizer Inc. v. India, 434 U.S. 308, 98 S. Ct. 584, 54 L. Ed. 2d 563 (1978)*, the Supreme Court held that a foreign nation may be a "person" under our antitrust laws as a plaintiff **[**48]** for the purpose of bringing suit. The determining factor in the result reached by the Court was that it did not "require the Judiciary in any way to interfere in sensitive matters of foreign policy." *434 U.S. at 319, 98 S. Ct. at 591*. To include foreign nations within the ambit of "persons" who may be sued as defendants, however, would require judicial interference in sensitive foreign policy matters. [18] Since Congress has never indicated any intent to extend liability of the Sherman Act to actions of a foreign sovereign, and since the accepted doctrine is that "questions of "general policy' especially with respect to foreign sovereigns and absent explicit legislative authority are beyond the province of the Judicial Branch," *Id. at 330, 98 S. Ct. at 597* (Powell, J., dissenting), this Court must refrain from extending the Pfizer ruling beyond the strict confines of that case.
[49]**

Therefore, a foreign nation may sue, but not be sued, under the United States antitrust laws [19] and, perforce, the Court is compelled here to dismiss the entire action against the defendants, members of OPEC, because they cannot be made defendants herein in this antitrust suit and no valid claim for relief can be alleged or proved against them.

---

[18] Giving a foreign sovereign the Option to sue, merely allows the nation to use our judicial system if it wishes. Allowing foreign sovereigns to be sued, however, would Require their presence in our courts. Thus the latter poses the greater threat to sensitive matters of foreign policy.

[19] This determination is consistent with the Court's rulings concerning domestic States under the antitrust laws. States may sue, *Georgia v. Evans, 316 U.S. 159, 62 S. Ct. 972, 86 L. Ed. 1346 (1942)*, but not be sued, *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, under the antitrust laws.

NO PROXIMATE CAUSE, NO INJUNCTIVE RELIEF

Even if the activity of the OPEC nations were not sovereign and governmental in nature and even if a foreign state could be sued under the American Antitrust Laws, the evidence adduced at trial does not support the granting of an injunction. Plaintiff failed to show the requisite causal connection between the alleged injury **[**50]** (rise in domestic gasoline prices) and the alleged anticompetitive conduct (price fixing of OPEC crude oil prices). The evidence clearly demonstrated that the dramatic rise in prices in 1973-1974 and in 1978-1979 was primarily caused by factors other than a rise in the crude oil.

[*573] While ***HN30***[] plaintiff in an injunctive action under *§ 16* is required to show only threatened loss or damage, this damage must be proximately caused by the alleged anticompetitive actions of the defendants. *Mid-West Paper Products Co. v. Continental Group, 596 F.2d 573, 590 (3d Cir. 1979)*; *Tugboat, Inc. v. Mobile Towing Co., 534 F.2d 1172, 1174 (5th Cir. 1976)*; *Jeffrey v. Southwestern Bell, 518 F.2d 1129, 1132 (5th Cir. 1975)*; *Reibert v. Atlantic Richfield Company, 471 F.2d 727, 731 (10th Cir. 1973)*. In order to demonstrate that the injury or damage was proximately caused by defendants' anticompetitive conduct, the plaintiff must demonstrate by a preponderance of the evidence that: (1) the alleged prohibitive conduct of OPEC was a substantial factor in the occurrence of any injury or damage to IAM; and (2) the plaintiff is engaged in activities intended to be protected by the American antitrust laws. **[**51]** *Reibert v. Atlantic Richfield Company, supra, at 731*. Plaintiff here (IAM) has utterly failed to meet the first of these two tests.

Plaintiff alleges that it has been damaged because it had to pay higher domestic gasoline prices by reason of the higher foreign OPEC crude oil prices attributable to the price fixing activities of the defendants, members of OPEC. Particularly, plaintiff alleges that the OPEC crude oil price hikes in 1973-1974 and in 1978-1979 resulted in higher domestic gasoline prices and were responsible for injury to plaintiff. Therefore, in order for the plaintiff to satisfactorily demonstrate causation, plaintiff must prove that the crude oil price increases were a substantial factor in the occurrence of the gasoline price hikes.

Dramatic gasoline price increases and dramatic crude oil price hikes did in fact occur during these two time periods, 1973-1974 and 1978-1979. ***HN31***[] Mere approximation of occurrence, however, does not demonstrate causation, in and of itself. Plaintiff is required to present specific evidence satisfactory to the Court to establish this causation. *28 U.S.C. § 1608(e)*. This, plaintiff has failed to do. Rather the evidence clearly and convincingly **[**52]** shows that the increase of domestic gasoline prices during these time periods was not the proximate result of increase in foreign OPEC members crude oil prices.

Domestic gasoline prices of late have principally been the result of a shortage of refinery capacity, Department of Energy allocation regulations, and shortages in crude oil at domestic refineries in 1973 and 1979. Federal regulations have also greatly discouraged refiners from adding much needed refining capacity. The quota required by the Mandatory Oil Import Program discouraged construction of additional refining capacity between 1958 and 1973. After 1973, Federal Energy Administration regulations promulgated under authority granted in the Emergency Petroleum and Allocation Act discouraged refiners from adding to refinery capacity by preventing them from recovering the incremental or marginal costs of the additional capacity. These margins had been essentially frozen at their nominal 1973 levels.

At the same time these Federal regulations were restricting the expansion of refining capacity, other Federal regulations were reducing the supply of gasoline. Two regulations promulgated by the Environmental Protection Agency, **[**53]** one prohibiting use of the additive MMT in unleaded gasoline and the other reducing the level of lead in gasoline, have both resulted in reduced production and availability of domestic gasoline.

In the context of this already restrained supply situation, an unexpected surge in domestic gasoline consumption in the latter half of 1978 significantly contributed to increased domestic gasoline prices. This unexpectedly high level of fourth quarter consumption caused refiners to reduce inventories below planned levels and thus further induced gasoline price increases. Ordinarily the loss in inventories could have been made up by increased utilization of refineries. Reduction in Iranian production (completely unrelated to any price fixing activities), however, decreased the world supply of crude oil, reduced the amount of crude oil available to the United States, and prevented **[*574]** refiners from operating refineries at a level which would have enabled them to rebuild the reduced inventories. This lower level of inventories of domestic gasoline then substantially contributed to higher prices.

During this time of reduced availability of domestic gasoline due to lack of sufficient refining **[**54]** capacity and reduction of crude oil supply, additional Federal regulations increased the severity of this shortage. The Department of Energy promulgated a series of regulations for the allocation of petroleum products during a period of shortage which established a series of priorities for different types of users and established certain set aside requirements for government supply of gasoline. Because of the compulsory requirement of supplying "priority" customers and the necessity to hold aside the "set aside" gasoline under these regulations, many filling stations received only 80% of the gasoline they had received the year before. Thus, as soon as a crisis developed, both the Federal Department of Energy and various State energy offices stepped in to turn a small shortage into a large and horrendous shortage. The result was excessive price increases and long lines at domestic service stations. These increases in domestic gasoline prices once again demonstrate that Federal regulation of the petroleum market has posed a greater threat to the American consumer than any other single factor.

As can readily be seen, the rise in OPEC members' foreign crude oil prices was not a substantial **[**55]** factor in the rise of domestic gasoline prices. In fact, some respected economists believe that the increased domestic gasoline prices actually caused the rise in OPEC members' foreign crude oil prices. The increase of these crude oil prices occurred only after the gasoline price hikes. These hikes along with the Federal and State systems of controlled allocations created a climate where spot prices of foreign and even domestic petroleum were inevitably bid up. These higher prices on petroleum product markets signaled foreign crude oil exporters that the market would support higher crude oil prices. As made clearly evident by this cause and effect relationship, the rise in foreign crude oil prices, including those of OPEC members, was not a substantial factor in the increased prices of domestic gasoline, and therefore was not the proximate cause of plaintiff's injury in, like the general public, being forced to pay higher prices for domestic gasoline.

Even if plaintiff had been able to demonstrate that the increases of foreign OPEC members' crude oil prices was a substantial factor in the general rise of domestic gasoline prices, proximate cause could not have been shown without more **[**56]** specific evidence. Plaintiff was not maintaining and could not maintain, this action on behalf of the general public or the average American consumer. Rather the action here is necessarily being brought and maintained by a specific plaintiff (IAM), with the result that proximate cause must be established to connect the alleged prohibited conduct of the OPEC members in raising foreign crude oil prices to the specific injury allegedly suffered by plaintiff, IAM, in paying higher domestic gasoline prices. Here plaintiff did not even attempt to establish that the domestic gasoline it purchased was the product of any of the crude oil purchased from one of the defendant members of OPEC. All this Court could do is engage in nebulous speculation as to whether plaintiff was a purchaser of gasoline manufactured from defendants' product, in any way at all. Once again, proximate cause has not been established by the plaintiff and the Court must deny plaintiff's prayer for injunctive relief.

NO DEFAULT JUDGMENT AND NO WAIVER

HN32[↑] Under *28 U.S.C. § 1608(e)* the Court cannot enter a default judgment automatically upon failure or refusal of a foreign sovereign to appear after being served as required **[**57]** by the Foreign Sovereign Immunities Act. The Court, as previously pointed out in the Order to Show Cause (Appendix A), and in the "Introductory" hereinabove **[*575]** at page 4, must conduct a full and complete hearing to determine if the plaintiff (claimant) has established "his claim or right to relief by evidence satisfactory to the Court." This was one of the reasons the Court consolidated the full trial of the Final Injunction and hearing upon the Preliminary Injunction with this hearing on Default Judgment, and heard all relevant evidence. The Court is convinced that plaintiff did not carry its burden of showing by a preponderance of the evidence that it was entitled to any relief. A fortiori, this Court cannot and will not enter any Default Judgment against any of the defendants.

Since no Default Judgment is entered here against any of the defendants', there is no waiver by defendants of their sovereign immunity, nor do they admit any of plaintiff's allegations concerning such sovereign immunity, each Defendant's sovereignty, or that the defendants' activities with OPEC concerning crude oil prices are in any way "commercial activities."

CONCLUSION

The Court should not conclude **[**58]** this discussion without reaffirming its admiration of plaintiff and its counsel for bringing this action, a commendation already stated by the Court at trial. In this suit, plaintiff has brought public attention in the United States and throughout the World to the frustration and anger all American gasoline consumers must feel about increasing domestic gasoline prices as a large part of the increasing costs of energy, a frustration in great part due undoubtedly to their own inertia and unjustified reliance on Federal and State bureaucracy. The Federal Executive Branch, through its Cost of Living Council and regulations, its Federal Energy Administration and Emergency Petroleum Allocations, its Department of Energy and accompanying maze of enigmatic and incomprehensible regulations, along with inept State interventions, has helped to create the energy crisis, has helped to intensify this crisis, and has utterly failed to resolve it, through inaction and ineffective action, as illustrated by the domestic gasoline price increases and long service station lines. When the Executive Branch so completely falters in its handling of an obvious and major problem, it is extremely tempting for **[**59]** the Court to take the initiative. However, we must recognize that we are a court of limited jurisdiction with the ability to handle problems only within the confines of the law and only within the power granted to this Court by Congress. Through its Order to Show Cause of June 25th, the Court endeavored to give the Executive Branch every opportunity to assist the Court in its handling of this matter. The Executive Branch, however, remained silent, perhaps hoping this storm would blow over.

With the persistent initiative of plaintiff, aided by the outstanding Amicus curiae briefs and through oral argument submitted on behalf of plaintiff by Richard A. Fine, Esq., and S.C. Yuter, Esq., In propria persona, and submitted by Latham and Watkins and Antonin Scalia, Esq., on behalf of Amicus, Indonesia-U.S. Business Committee of the Indonesian Chamber of Commerce and Industry, and by Holmes and Warden, and Khalid Abdullah Tariq Al Mansour, Esq., and Faisal Bin Fahad Al Talal, Esq., on behalf of Amicus, Concerned Black Americans In Support of Africa and the Middle East, the Court has been able to arrive at a just and legally unassailable position here. While this action must be dismissed, **[**60]** the storm and crisis still exist and will not be resolved through inaction. It is only to be hoped that the Executive Branch as the Federal Governmental leader in the field of Foreign Relations, as well as domestic and international Energy, will now take over and bring appropriate relief to the American consumer in the entire field of Energy, and particularly in foreign as well as domestic crude oil prices and domestic gasoline prices. To do less, or to put the burden back on the Judicial branch again is intolerable.

This Court may only act where Congress has given it power to act. For purposes of asserting jurisdiction over a foreign sovereign, Congress has given this Court power to act only when the sovereign does not have immunity from suit. Here the sovereign does **[*576]** have immunity from suit because the activity of which plaintiff complains is, by its nature, sovereign and governmental. There being no waiver, express or implied, of this immunity by the defendant nations, the Court is powerless to act.

Even if the Court did have jurisdiction to act, the defendant nations could not be held accountable for their activities under American antitrust laws. Foreign nations are **[**61]** not persons who may be sued under the American antitrust laws. While the Supreme Court did recently hold that foreign nations may bring suit for violations of American antitrust laws, this Court will not extend this ruling in the absence of a clear Congressional mandate changing the antitrust laws so as to permit the joining of a sovereign state as a defendant.

Plaintiff also failed on the merits. The requisite proximate cause was not established by evidence satisfactory to the Court. The causal connection between the alleged violation and the alleged injury was not shown Generally, because the evidence revealed that the principal determinants of the price of gasoline were other than the rise of crude oil prices. Neither was this causal connection shown Specifically, because the plaintiff failed to establish through specific evidence that it was a buyer, directly or indirectly, of crude oil which originated from any of the defendant nations.

As a result, this Court has no alternative but to terminate this action in favor of the defendants and against the plaintiff, and the Complaint and First Amended Complaint must be dismissed.

LET JUDGMENT BE ENTERED ACCORDINGLY.

APPENDIX A **[**62]**

TO: PLAINTIFF herein, and its attorneys and counsel of record.

TO: DEFENDANTS herein, and each of their respective attorneys and counsel, whether of record or not.

TO: UNITED STATES OF AMERICA; UNITED STATES DEPARTMENT OF JUSTICE, and ATTORNEY GENERAL OF THE UNITED STATES; UNITED STATES DEPARTMENT OF STATE and SECRETARY OF STATE OF THE UNITED STATES; UNITED STATES DEPARTMENT OF ENERGY and SECRETARY OF ENERGY OF THE UNITED STATES; and their attorneys and counsel, ATTORNEY GENERAL OF THE UNITED STATES and UNITED STATES ATTORNEY, CENTRAL DISTRICT OF CALIFORNIA.

TO: STATES OF THE UNITED STATES and SECRETARY OF STATE and ATTORNEY GENERAL of each State, and their respective attorneys and counsel.

AND

TO: All persons and entities to whom these presents shall come, concern or appertain, **[**63]** and their respective attorneys and counsel.

YOU AND EACH OF YOU WILL PLEASE TAKE NOTICE that because of the complexities of the within lawsuit, the difficulties in framing the issues therein contained, and the far-reaching effects of judicial determination thereof, the Court has this day and date made and entered the following Orders:

[*577] I. ORDER TO SHOW CAUSE

On MONDAY, AUGUST 20, 1979, at 10:00 o'clock A.M. Pacific Daylight Saving Time, or as soon thereafter as attorneys and counsel can be heard, in Courtroom 1, United States Courthouse, 312 North Spring Street, Los Angeles, California 90012, the above entitled United States District Court, Central District of California, the Honorable A. Andrew Hauk, Judge Presiding, will hear: from any and all of the aforesaid parties, persons, entities, organizations, sovereigns, sovereignties; from all departments, agencies and instrumentalities thereof; and from any and all attorneys and counsel thereof: any and all cause, causes, reasons, rationales and theories which they or any of them have and desire to present, express or suggest to the Court with respect to, in support of or in opposition to, in question of or in answer **[**64]** to any or all of the following inquiries:

GENERAL

1. Is the within lawsuit a viable, valid, legal, proper and justiciable controversy validly and legally brought in and pending before this Court?

2. Does the within lawsuit raise any issue or issues that are or can be validly and legally determinable in and by this Court?

3. Are any or all of the issue or issues which the within lawsuit raises validly and legally determinable only by the Legislative and/or Executive branches of the United States Government rather than by the Judicial branch thereof?

4. Are the acts and activities of defendants, as alleged by plaintiff in the within lawsuit "Acts of State" Not within the reach, purview or coverage of the laws of the United States, and therefore not within the jurisdiction of the United States Courts, and more particularly this Court?

SUBJECT MATTER JURISDICTION

5. Does the within lawsuit sufficiently state or set forth any valid and legal claims for relief, or raise any issues under and by virtue of the Foreign Sovereign Immunities Act of 1976, *28 United States Code §§ 1602-1611*, Public Law 94-583, 90 Stat. 2892 (Oct. 21, 1976), so as to invest subject matter jurisdiction in this **[**65]** Court?

6. Does the within lawsuit sufficiently state or set forth any valid and legal claims for relief, or raise any issues under and by virtue of the Sherman Antitrust Act, *Section 1*, *15 United States Code 1*, and the Clayton Act, *Sections 4* and *16*, *15 United States Code 15* and *26*, so as to invest subject matter jurisdiction in this Court?

7. Do any of the acts and activities of the defendants, as alleged by plaintiff in the within lawsuit, constitute "commercial activity (carried on) in the United States (by the foreign state)," *28 U.S.C. 1605(a)(2)* and *1603(d)*; or "commercial activity carried on (elsewhere) and having substantial contact with the United States," *28 U.S.C. 1605(a)(2)* and *1603(e)*; or "an act performed in the United States in connection with a commercial activity (of the foreign state) elsewhere," *28 U.S.C. 1605(a)(2)*; or "an act outside the territory of the United States in connection with a commercial activity (of the foreign state) elsewhere and that act causes a direct effect in the United States," *28 U.S.C. 1605(a)(2)*?

8. Is the within lawsuit "(a case) not otherwise encompassed in paragraph (2) above (*28 U.S.C. 1605(a)(2)*), in which money damages are sought **[**66]** against a foreign state for . . . damage to or loss of property, occurring in the United States and caused by the tortious act or omission of that foreign state or of any official or employee of that foreign state while acting within the scope of his office or employment," except "any claim based upon the exercise or performance or the failure to exercise or perform a discretionary function regardless of whether the discretion be abused" and except "any claim arising out of malicious prosecution, abuse of process, libel, slander, misrepresentation, deceit, or interference with contract rights," *28 U.S.C. 1605(a)(5)*? Note : Legislative History seems to indicate this kind of a case was intended to cover "a traffic accident or other noncommercial tort," 1976 U.S.Code **[*578]** Cong. & Admin.News, Vol. 5, p. 6604 at p. 6620, 94th Cong. 2d Sess., and would appear irrelevant in the context of the within lawsuit.

IN PERSONAM JURISDICTION

9. Have any or all of the defendants been validly and legally served with process, i. e., Summons and Complaint and First Amended Complaint, under and by virtue of the Foreign Sovereign Immunities Act of 1976, *28 U.S.C. 1608*? If so, which defendant or **[**67]** defendants, and in what manner? Does any such service invest in personam jurisdiction in this Court over the defendant or defendants so served?

PLAINTIFF'S RIGHT TO SUE; STANDING

10. Damages Clayton Act, *Section 4*, *15 U.S.C. 15*

Is not plaintiff precluded from bringing the within lawsuit against defendants, in that plaintiff is an indirect purchaser of gasoline sold to plaintiff by and through third parties other than defendants, which gasoline was manufactured and refined by said third parties from oil produced and sold by defendants directly to said third parties; and further in that plaintiff utilizes and relies upon so-called "pass on" and "pass through" theories to support its claim for damages allegedly suffered by paying higher and higher prices from time to time for said gasoline, which gasoline prices plaintiff claims were raised and caused to be raised by reason of the higher and higher oil prices fixed and raised by defendants, which oil price raises were "passed on" or "passed through" to plaintiff by the third party intermediate buyers of oil produced by defendants, which third party intermediate buyers manufactured and refined into the gasoline ultimately purchased **[**68]** by plaintiff? Note : See *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, particularly at 728-729, at 735-736, and at 744-748, *97 S. Ct. 2061*, wherein the United States Supreme Court in a 6-3 decision, while not addressing the standing issue, applies the Hanover Shoe (*Hanover Shoe Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968))* doctrine against defensive use of "pass on" theories by antitrust defendants to Offensive use of such "pass on" theories by antitrust plaintiffs who are indirect purchasers from intermediate third parties other than defendants.

11. Injunctive Relief Clayton Act, *Section 16*, *15 U.S.C. 26*

Although by the ruling of *Illinois Brick, supra*, the Supreme Court effectively bars, or may effectively bar, plaintiff's claim for damages against defendants, does it bar injunctive relief in favor of plaintiff and against defendants? Note : See *Mid-West Paper Products Co. v. Continental Group, Inc., 596 F.2d 573 (3d Cir. 1979)* wherein the Court of Appeals for the Third Circuit in a 2-1 decision, holds that indirect purchasers have standing to sue for and obtain injunctive relief under Clayton **[**69]** Act, *Section 16*, *15 U.S.C. 26*, even though barred from damage actions under Clayton Act, *Section 4*, *15 U.S.C. 15*, by the Supreme Court in the Illinois Brick case, Supra.

DEFAULT ENTRY AND DEFAULT JUDGMENT

12. Is plaintiff, by reason of effective, valid and legal service of process, entitled to Default Entry by Clerk when a defendant fails or refuses to file and serve "an answer or other responsive pleading to the complaint within sixty days after service (upon such defendant)," *28 U.S.C. 1608(d)*? If so, as against which defendant or defendants, and why? What is the effect of any such Default Entry by Clerk ?

13. What must the Court do by way of evidentiary hearing before making or entering an effective, valid and legal Default Judgment, in order to comply with the mandatory language of the Foreign Sovereign Immunities Act of 1976, ***HN33***[↑] *28 U.S.C. Section 1608(e)* which provides:

> "(e) No judgment by default shall be entered by a court of the United States . . . against a foreign state, a political **[*579]** subdivision thereof, or an agency or instrumentality of a foreign state, unless the claimant establishes his claim or right to relief by evidence satisfactory to the court."

[70]**

14. In this connection, "since sovereign immunity is an affirmative defense which must be specially pleaded, the burden will remain on the foreign state to produce evidence in support of its claim of immunity." Legislative History, 1976 U.S.Code Cong. & Admin.News, Vol. 5, p. 6616. In other words, the foreign state must produce prima facie evidence of immunity. What, therefore, is the effect of the foreign state's failure to answer or file a responsive pleading? What is the result of a default judgment against the foreign state? Does this mean that the foreign state by failing to assert the affirmative defense and by defaulting, has explicitly or by implication waived immunity and left itself open by way of default judgment against it for injunctive relief?

ATTACHMENT OR EXECUTION

(Attachment in Aid of Execution)

15. Before Judgment Against A Defendant's Property Used For A Commercial Activity In The United States.

Does the Court have any jurisdiction or power to issue a writ of attachment (garnishment, sequestration, arrest or seizure) Pendente lite against property in the United States belonging to a defendant, Prior to entry of Judgment? If so, is not that jurisdiction and **[**71]** power limited to situations where:

> (a) the defendant has "Explicitly waived" immunity against pre-judgment attachment; and

(b) "the purpose of the attachment is to secure satisfaction of a judgment that has been or ultimately may be entered against the foreign state, and not to obtain jurisdiction." *28 U.S.C. 1610(d)(1)* and *(2)*. (Emphasis ours).

16. After Judgment Against A Defendant's Property Used For A Commercial Activity In The United States.

Does the Court have any jurisdiction or power to issue a writ of execution (or a writ of attachment in aid of execution) against property in the United States belonging to a defendant After entry of Judgment? If so, is not that jurisdiction and power limited to situations where:

(a) "the foreign state has waived its immunity . . ." either Explicitly or by Implication ; Or

(b) "the property is or was used for the commercial activity upon which the claim is based," Or *28 U.S.C. 1610(a)(1)* and *(2)* (Emphasis ours, and other permissive executions After judgment in the Act are not relevant.) Or

(c) The execution or attachment in aid of execution is against property of an "agency or instrumentality of a foreign **[**72]** state," which agency or instrumentality has "waived its immunity . . . either Explicitly or by Implication," or "the judgment relates to a claim" under *28 U.S.C. 1605(a) (2)* or *(5)*, "regardless of whether the property is or was used for the activity upon which the claim is based." *28 U.S.C. 1610(a)(1)* and *(2)* (Emphasis ours).

17. In connection with inquiries 14 and 15 above, what is the proper, valid and legal meaning of the word "explicitly" when applied to waiver of immunity? And what is the meaning of the words "explicitly or by implication" when applied to waiver of immunity in *28 U.S.C. 1610*?

PROPRIETY OF PRELIMINARY INJUNCTION

18. Has plaintiff met the conditions necessarily prerequisite to obtaining a preliminary injunction? Has it demonstrated or can it demonstrate to the satisfaction of the Court that:

1. It is probable and there is a clear likelihood that plaintiff will, after trial on the merits, prevail and be **[*580]** awarded judgment against defendants, either for damages or for final injunctive relief?

2. Is the injury, damage and hardship to defendants that would be caused by the Court in granting the preliminary injunction be outweighed by the **[**73]** injury, damage and hardship to plaintiff that would be caused by the Court in not granting the preliminary injunction?

3. Is any injury or damage suffered or allegedly anticipated to be suffered by plaintiff irreparable and certain to occur?

4. Is it in the public interest to grant the preliminary injunction to plaintiff?

II. ORDER CONTINUING HEARING ON PRELIMINARY INJUNCTION

IT IS FURTHER ORDERED THAT the hearing of plaintiff's Motion For a Preliminary Injunction be and the same is hereby continued for further hearing to the date of MONDAY, August 20, 1979, in Courtroom 1, United States Courthouse, Los Angeles, California 90012, the Honorable A. Andrew Hauk, Judge Presiding.

III. ORDER SETTING CASE FOR TRIAL ON FINAL INJUNCTION AND EVIDENTIARY HEARING RE DEFAULTS AND CONSOLIDATING TRIAL AND EVIDENTIARY HEARING WITH HEARING ON PRELIMINARY INJUNCTION

IT IS FURTHER ORDERED that, pursuant to *Rule 65(a)(2), F.R.Civ.P.*, the trial on the merits of the Final Injunction sought in the within lawsuit, and pursuant to *28 U.S.C. 1608(e)* the evidentiary hearing re defaults, be and the same hereby are consolidated with the further hearing on plaintiff's Motion for a Preliminary **[**74]** Injunction, and the said trial on the merits of the Final Injunction, the said evidentiary hearing re defaults, and the further hearing on

Preliminary Injunction be and the same are hereby set for MONDAY, AUGUST 20, 1979, in Courtroom 1, United States Courthouse, Los Angeles, California 90012, the Honorable A. Andrew Hauk, Judge Presiding.

IV. ORDER FOR SERVICE

IT IS FURTHER ORDERED that attorneys and counsel for plaintiff shall serve a copy of this Order to Show Cause upon the plaintiff and all persons who have appeared in the within lawsuit by serving it or its, or them or their, respective attorneys and counsel of record, by registered mail, return receipt requested; upon all defendants who have not appeared herein, and their attorney and counsel by serving said defendants by registered mail, return receipt requested, and by following the procedure of service through the Secretary of State in Washington, District of Columbia, to the attention of the Director of Special Consular Services, as provided in the Foreign Sovereign Immunities Act, *28 U.S.C. 1608(a)(4)*; upon the United States of America, and its Department of Justice and Attorney General, its Department of State and Secretary **[**75]** of State, its Department of Treasury and Secretary of Treasury, its Department of Energy and Secretary of Energy by registered mail, return receipt requested, addressed to the Attorney General of the United States, United States Department of Justice, Washington, D.C. and to the United States Attorney, Central District of California, United States Courthouse, Los Angeles, California 90012; upon each and all States of the United States and each respective Governor, Secretary of State and Attorney General, by registered mail, return receipt requested, addressed to the Honorable Attorney General of each State of the United States, at the State Capitol Building of each such State; and upon all other persons to whom this Order shall come, concern, or appertain, by making copies hereof available to all news media and to any such persons requesting a copy. Such copy and service thereof shall be effected and effective if made and done, including service of a copy of the First Amended Complaint and Summons upon those not as yet served therewith, all in the **[*581]** English language. And all pleadings, motions, answers, points and authorities, and papers of every kind desired to be filed **[**76]** by any of the persons served shall be filed in the within Court and with its Clerk of Court on or before Wednesday, August 1, 1979, and served upon attorneys and counsel for plaintiff, Law Offices of Richard I. Fine, 10100 Santa Monica Boulevard, Los Angeles, California 90067 on or before the same date.

Dated: Monday, June 25, 1979

/s/ A. Andrew Hauk

UNITED STATES DISTRICT

JUDGE

CENTRAL DISTRICT OF

CALIFORNIA

JUDGMENT FOR DEFENDANTS AND AGAINST PLAINTIFF

The Court having made and entered its Memorandum of Decision and Order of Judgment For Defendants, which constitutes its findings of fact and conclusions of law pursuant to *Rule 52(a) F.R.Civ.P.*, and good cause appearing,

IT IS HEREBY ORDERED, ADJUDGED AND DECREED:

1. That judgment is rendered in favor of defendants and against plaintiff, and the Complaint and First Amended Complaint herein, and each and every cause of action alleged or attempted to be alleged therein, be and the same are dismissed with prejudice, for lack of jurisdiction.

2. That judgment is rendered in favor of defendants and against plaintiff, and the Complaint and First Amended Complaint herein, and each and every cause of action alleged or attempted **[**77]** to be alleged therein, be and the same are dismissed with prejudice, because each and all defendants are sovereignties which cannot be made defendants in an Antitrust action under either the Sherman Act, *Section 1*, *15 U.S.C. 1*, or the Clayton Act, *Section*

16, *15 U.S.C. 26*, and no claim for relief under the said Antitrust laws can legally or properly be made, stated or shown by plaintiff against defendants.

3. That plaintiff take nothing of or from defendants, or any of them, and defendants have judgment against plaintiff on the merits.

4. That the Complaint and First Amended Complaint herein, and each and every cause of action alleged or attempted to be alleged therein against defendants or any of them, be and the same are dismissed on the merits.

5. That plaintiff pay its own costs of suit incurred herein.

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN1[] **Antitrust & Trade Law, Sherman Act**

A definition of the relevant market is essential in a claim under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, because without a definition of that market there is no way to measure the defendant's ability to lessen or destroy competition.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Regulated Practices, Market Definition**

The relevant factors for defining the market in a *§ 2* Sherman Act case are similar to those used to define the market in a § 7 Clayton Act case. In *§ 2* cases under the Sherman Act, as in § 7 cases under the Clayton Act, there may be submarkets that are separate economic entities, and there is no reason to differentiate between "line" of commerce in the context of the Clayton Act and "part'" of commerce for purposes of the Sherman Act.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN3[] **Relevant Market, Product Market Definition**

The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. However, within this broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN4[] **Regulated Practices, Market Definition**

High cross-elasticity between two products suggests that they are in the same market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN5[] **Regulated Practices, Market Definition**

The law does not require an exclusive class of customers for each relevant submarket.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > General Intent

HN6[] **Monopolies & Monopolization, Attempts to Monopolize**

While the completed offense of monopolization under *15 U.S.C.S. § 2* demands only a general intent to do the act, for no monopolist monopolizes unconscious of what he is doing, a specific intent to destroy competition or build monopoly is essential to guilt for a mere attempt charged.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Elements

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Franchise Agreements

HN7[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement is defined as an agreement by a party to sell one product but only on the condition that the buyer also purchases a different or tied product. Tying arrangements are unreasonable in and of themselves whenever a party has sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN8[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A franchise license itself can be a tying product.

Business & Corporate Compliance > ... > Trademark Law > Conveyances > Franchises

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Elements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Governments > Courts > Authority to Adjudicate

Trademark Law > Conveyances > General Overview

Business & Corporate Compliance > ... > Trademark Law > Conveyances > Licenses

Trademark Law > ... > Licenses > Licensable Subject Matter > Tying Arrangements

HN9[] **Conveyances, Franchises**

A franchise license constitutes a separate and distinct marketable item. The weight of judicial authority supports the proposition that if prospective franchisees are compelled to purchase equipment or other tied products in order to obtain the franchise and trademark, an illegal tying arrangement exists.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

Business & Corporate Compliance > ... > Trademark Law > Conveyances > Franchises

Trademark Law > Conveyances > General Overview

HN10[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A seller's untruthful representation may constitute breach of contract or fraud or other state law violations, but it cannot constitute the missing link in an illegal tying arrangement.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN11[] **Monopolies & Monopolization, Conspiracy to Monopolize**

A corporation can conspire in violation of *15 U.S.C.S. § 1* with its wholly-owned, unincorporated sales division.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

HN12[] **Consumer Protection, Deceptive & Unfair Trade Practices**

The elements of actionable fraud are: (1) false representation of material fact; (2) knowledge of falsity or lack of reasonable ground for believing the matter asserted to be true; (3) intent to induce reliance thereon; (4) justifiable reliance by the plaintiff; and (5) resulting damage.

Opinion by: PELL

Opinion

[*707] The defendant, Fotomat Corporation, is engaged in the retail sale of film processing, film, and camera related products which are sold insofar as the present litigation is concerned from small (9' X 5'), "drive-thru" kiosks located generally in shopping center parking lots. It obtained the rights to this retailing concept in 1967 and opened its first stores in April of that year. It also began selling franchises, and by 1971, 1,035 units were open, 680 company stores and 355 franchised stores. These stores sell mostly to amateur photographers. The customer **[**2]** drives up to the side of the kiosk and gives his exposed film to a "Fotomate" who operates the kiosk. He may also purchase film or other items from the Fotomate. One or two days later the customer returns and receives the processed work. In each metropolitan area in which it operates, Fotomat runs a pickup and delivery service to the kiosks from a central area office which is staffed by an area manager and some assistants. A route driver runs a daily pickup and delivery circuit of all the kiosks in the area, delivering the previous day's developed film and picking up that day's film. At the end of the route, the driver delivers the film to the processor.

The plaintiff, Photovest Corporation, was formed in 1968 by three individuals desiring to invest in Fotomat franchises. Photovest was incorporated for the purpose of operating a block of Fotomat kiosks in the Indianapolis area. On August 26, 1968, Photovest signed a master franchise purchase agreement obligating it to purchase 15 franchises to operate 15 Fotomat stores in Marion County, Indiana. Specific store sites had not been selected, but each store was bound by the standard Fotomat franchise agreement and the standard **[**3]** Fotomat lease agreement, which would be separately signed upon the opening of each store. Photovest agreed to pay $ 21,000 for each franchise for a total of $ 315,000. It also agreed to pay Fotomat royalties and advertising fees based on

* Chief Judge Howard T. Markey of the United States Court of Customs and Patent Appeals is sitting by designation.

monthly gross sales. Additional details of the franchise agreement as well as other pertinent facts will be set forth throughout this opinion where relevant to the specific argument being discussed.

In December 1974, Photovest filed this action [1] charging Fotomat, Inter alia, with violations of both federal and state antitrust laws, breach of contract, fraud, and tortious breach of contract. After trial in the district court, the judge made extensive findings of fact and conclusions of law and awarded Photovest damages totaling $ 3,017,161.86. Prior to the district court's decision, Fotomat had paid Photovest $ 41,484.53 which reduced the final judgment to $ 2,923,557.

[4]** In this appeal, Fotomat raises numerous arguments regarding the antitrust, breach of contract, and damages aspects of the district court's decision. It also argues that some of the procedures followed by the district court judge violated Fotomat's due process rights. We will address one of these procedural problems first.

[*708] I. EXCHANGE OF BRIEFS PROCEDURE

Fotomat argues that it was prejudiced, and indeed was deprived of due process, by the fact that Photovest submitted an extensive trial brief to the district court judge without at the same time providing Fotomat with a copy. On Friday, December 3, 1976, Fotomat's counsel first discovered that Photovest had earlier filed a 207 page trial brief with the district court judge and that Photovest did not intend to serve a copy on Fotomat. Earlier that day Fotomat had given Photovest a copy of its trial brief. Since the trial was to begin on Monday, December 6, 1976, Fotomat immediately complained to the judge of the In camera filing. The judge found that the pretrial order did not require pretrial exchange of briefs and that there was no record of any agreement to such an exchange. He said he "would leave counsel where **[**5]** they find themselves." At that time, Photovest agreed to return Fotomat's trial brief which Fotomat had earlier served on it. On Monday, December 6, the first day of trial, Fotomat filed a motion to reconsider and the judge granted a hearing. After hearing arguments on the exchange of briefs issue, he ordered Photovest to serve its brief on Fotomat with some modifications. Photovest was allowed to edit and delete certain portions of its brief "to avoid tipping off Fotomat's witnesses." It served the edited brief on Fotomat on December 16, 1976, the ninth day of the trial. Trial was then recessed for two months. The judge advised Fotomat that it could submit a revised trial brief prior to resuming trial and could follow the same procedure as Photovest in submitting its trial brief. That is, Fotomat could submit a complete version to the court and a modified version to Photovest. All briefs were to be exchanged at the conclusion of the trial. In January, 1977, Fotomat served Photovest with its 38-page trial brief filed with the court on December 3, 1976, and on February 11, 1977, Fotomat filed a 290-page supplemental trial brief and served a copy on Photovest. After the recess, **[**6]** trial resumed on February 14 at which time Fotomat again objected to not being served a copy of Photovest's unedited trial brief. Photovest then voluntarily agreed to give Fotomat a copy of the unedited version which it did later that day.

Fotomat contends that it was prejudiced by this procedure and that the procedure violates the Federal Rules of Civil Procedure and the Constitution. Before addressing the propriety of the delayed exchange of trial briefs, we note that there is in this case the additional factor that Fotomat was apparently unaware of the procedure until the first day of trial by which time Photovest had already submitted its unedited brief to the court. The record indicates that this was a result of a bona fide misunderstanding between counsel at the pretrial stages. Nothing in the record suggests any foul play or attempts to secure an unfair advantage by either party. Accordingly, the only issues are whether the procedure violates either the Federal Rules of Civil Procedure or the Constitution, or is otherwise undesirable, and if so, whether Fotomat was prejudiced by it. We also note that the delayed exchange of trial briefs is not an unusual procedure in **[**7]** the Southern District of Indiana. Local Rule 19(k) of the District Court for the Southern District of Indiana [2] does not appear to require pretrial exchange of trial briefs and the practice in that district is not to exchange until the conclusion of trial.

---

[1] Photovest amended its complaint on several occasions throughout the litigation. Our discussion proceeds on the basis of the final amended complaint.

[2] The rule provides:

(k) Subsequent to Pretrial Conferences. At such time as directed by the court, each party shall submit the following to the trial judge, unless notified to the contrary:

[*709] [8]** Fotomat contends that the procedure violates *Rule 5(a), Fed.R.Civ.P.*, which requires service on all the parties of

> Every order required by its terms to be served, every pleading subsequent to the original complaint unless the court otherwise orders because of numerous defendants, every paper relating to discovery required to be served upon a party unless the court otherwise orders, every written motion other than one which may be heard ex parte, and every written notice, appearance, demand, offer of judgment, designation of record on appeal, And similar paper . . . .

(Emphasis added.) Fotomat argues that a trial brief is a "similar paper" under *Rule 5(a)* and thus that the procedure employed in this case is inconsistent with *Rule 5(a)*. [3] However, neither Fotomat nor Photovest has provided any federal case involving the application of the rule to trial briefs, and our independent research has been equally unsuccessful. Indeed, "the language of *Rule 5* has given rise to little controversy." 4 Wright & Miller, Federal Practice and Procedure: Civil § 1141 at 570 (1969). As a result, we are left to write on a clean slate.

[9]** The inclusion of the words "and similar paper" in *Rule 5(a)* indicates that the drafters did not intend the preceding list of documents to be exhaustive. Wright and Miller state that the words suggest an expansive application of the rule. Id., § 1143 at 577. Even an expansive application of the rule does not, in our opinion, clearly mandate pretrial exchange of trial briefs. *Rule 5(a)* provides an extensive list of documents before concluding with the phrase "and similar paper." Given the prominence and significance of the trial brief in the litigation process, its glaring absence from the list of documents specifically mentioned in the rule supports the inference that the drafters did not intend *Rule 5(a)* to apply to trial briefs. This inference is buttressed by the existence of local rules like the one before us, none of which, as far as we have been able to determine, have been successfully challenged as inconsistent with *Rule 5(a)*. [4]

[10]** We also note that the rule does not address the timing of the service. The procedure in the present case clearly provided for service on all parties since it always contemplated exchange at the close of trial. The only unusual aspect was that service on the court occurred well before service on the opposing party. Therefore, arguably the rule does not have any application to the issue before us.

Fotomat also argues that the delayed exchange procedure violates the *Due Process Clause of the Fifth Amendment*. Again we note the absence of any cases involving a due process challenge to a delayed exchange of trial briefs procedure. None of the cases cited by Fotomat involves a closely analogous situation, and instead, Fotomat relies on broad language from due process decisions all of which are clearly distinguishable. For example, Fotomat cites *Haller v. Robbins, 409 F.2d 857, 859 (1st Cir. 1969)*, for the proposition that a party's constitutional

---

(1) A trial brief, the nature, and extent of which will be directed by the judge. Copies of all foreign statutes involved, with reference, to their source, shall also be submitted.

(2) In non-jury cases, proposed findings of fact and conclusions of law, including citations for each conclusion of law if available.

(3) In jury cases, requested charges to the jury covering issues to be litigated shall be filed in duplicate with the clerk. Each charge shall cite appropriate authority.

A copy of requested charges also shall be served on opposing counsel.

[3] *Rule 83, Fed.R.Civ.P.*, grants district courts the authority to adopt local rules to regulate their practice "in any manner not inconsistent with these rules."

[4] See, e. g., Rule 20(c) of the District of Kansas which provides:

Any party in an action or proceeding before this court may submit a trial brief to the judge in advance of trial, provided prior notice of intention to submit such trial brief is given to all opposing counsel of record at least three days prior to such submission. . . . Two copies of such trial brief shall be delivered to the judge, but such trial brief need not be served upon opposing counsel. After the trial, all briefs shall be filed with the clerk.

See also E.D.Mich.Rules XV and XVI; S.D.Miss.*Rule 5*; E.D. and W.D.Ark.Rule 13.

rights are infringed if counsel for the opposing party is allowed "to convey information or to discuss any matter relating to the merits of the case" with the trial judge in the absence of opposing counsel. Haller was a habeas corpus case **[**11]** in which the petitioner raised a due process challenge to ex parte communications by the county attorney. The petitioner entered a guilty plea to a kidnapping charge in the state court; but sometime between his arraignment and his **[*710]** sentencing, the county attorney, in the absence of petitioner and his attorney, informed the presiding judge of a statement made by the petitioner's victim of an episode of sordid behavior by petitioner while the victim was in his custody. The judge sentenced petitioner without the petitioner knowing of the ex parte communication. The court of appeals held this to be a violation of due process. The present case differs in many respects, but a critical distinction is that the trial briefs were to be exchanged after trial giving both parties an opportunity to respond to any inaccuracies or misleading information before the court rendered judgment. This fact also distinguishes and renders unpersuasive Fotomat's reliance on *Bowman Transp., Inc. v. Arkansas-Best Freight System, Inc., 419 U.S. 281, 288 n.4, 95 S. Ct. 438, 42 L. Ed. 2d 447 (1974)*; *Home Box Office, Inc. v. F.C.C., 185 U.S.App.D.C. 142, 189, 567 F.2d 9, 56 (D.C.Cir.1977)*; and *United **[**12]** States v. Miller, 495 F.2d 362, 364-65 (7th Cir. 1974)*.

Fotomat contends that exchange after trial is too late and that this timing transgressed the due process requirement that notice and opportunity to be heard "be granted at a meaningful time and in a meaningful manner." *Fuentes v. Shevin, 407 U.S. 67, 80, 92 S. Ct. 1983, 1994, 32 L. Ed. 2d 556 (1972)*. However, we are of the opinion that exchange of trial briefs at the conclusion of trial is a sufficiently meaningful time for purposes of due process analysis. None of Fotomat's authority on this issue suggests otherwise. See, e. g., *Edelberg v. Illinois Racing Board, 540 F.2d 279, 285 n.9 (7th Cir. 1976)*, and cases cited therein.

That the delayed exchange of trial briefs procedure is not inconsistent with *Rule 5(a), Fed.R.Civ.P.*, and is not per se violative of due process protections does not mean that we approve of it without reservation. Indeed, we are of the opinion that exchange of trial briefs at the time they are filed with the court is sounder procedure, being one more consistent with the elimination of gamesmanship aspects of litigation and, indeed, with the quest for truth, presumably the ultimate aim of adversarial **[**13]** litigation. Any benefits that a delayed exchange may provide are outweighed by the increased potential for prejudice and by the added difficulties resulting from postponing until after trial the curing of any real prejudice caused by the trial briefs. The district court judge, particularly in the case of a long and complex trial, who has entertained incorrect concepts about some aspects of the case during the course of the trial because of an ex parte brief, is placed in the difficult position of returning to a status quo ante position prior to engaging in the decisional process.

The district court judge in the present case explained his reasons for the procedure on the first day of trial:

> I have to go back and give you the basis for my position in the District for not exchanging briefs. 99 percent of our cases are not cases of this nature, that are well prepared by both sides, and I grew up in that period when we had a lot of counter-punchers practicing law, and they were educated by the opposing party and did little or no work, but they were very adept at using the work of counsel on the other side. That was basically the background of the rule that I have followed on exchange **[**14]** of briefs.

Although we are somewhat sympathetic to the problem for which the delayed exchange procedure was designed, that problem can be mitigated to some degree by merely requiring the parties to submit their briefs for exchange simultaneously. Moreover, we are more concerned with assuring that a party at all times is as well advised of his opponent's arguments as is the trial judge than we are with the problems of the "counterpuncher."

For these reasons under our supervisory power we hereby direct any district court of this circuit which now follows the practice of delayed exchange of trial briefs to require in all future cases each party to serve his trial brief on all other parties at some reasonably short time before or after **[*711]** he files the brief with the court or provides a copy to the judge. [5]

---

[5] Our authority to direct procedures in the district court derives from our supervisory powers over the district court. In *LaBuy v. Howes Leather Co., 352 U.S. 249, 259-60, 77 S. Ct. 309, 315, 1 L. Ed. 2d 290 (1957)*, the United States Supreme Court stated that "supervisory control of the District Courts by the Courts of Appeals is necessary to proper judicial administration in the

[15]** We find no reason to reverse the district court in the present case on this issue because although we deem more desirable the procedure just announced, the district court's procedure in this case had not been demonstrated to have prejudiced the defendant. The delayed exchange procedure was abandoned early in the trial. Photovest gave Fotomat an edited version of its trial brief on the ninth day of trial, and after a two month recess in the trial, gave it the full, unedited version on the tenth day of trial. As to the first nine days of trial, Fotomat was given the right to call any Photovest witness who had testified during that portion of the trial. [6] During the remaining 21 days of trial, Fotomat did not cite any prejudice from the delay in service. Indeed, in all of its briefs and arguments in this appeal, Fotomat has failed to demonstrate any specific instance of prejudice resulting from the trial brief procedure.

[16]** II. ATTEMPT TO MONOPOLIZE

The district court held that Fotomat violated *§ 2* of the Sherman Act, *15 U.S.C. § 2*, and the Indiana statutory counterpart, *Ind.Code 24-1-2-2*. [7] *Section 2* of the Sherman Act prohibits attempts to monopolize. Generally, a plaintiff claiming that the defendant violated this section must prove specific intent and conduct manifesting that intent to monopolize and a dangerous probability of success in a relevant market. [8] See generally L. Sullivan, Handbook of the Law of Antitrust §§ 50-52 (1977) (hereinafter Sullivan), and cases cited therein. Before discussing the specific intent and dangerous probability of success elements, we will first address the relevant market issue, one which the parties have vigorously contested.

[17]** A. Relevant Market

HN1[] A definition of the relevant market is essential because "without a definition of that market there is no way to measure (the defendant's) ability to lessen or destroy competition." *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 350, 15 L. Ed. 2d 247 (1965)*. There is some authority for the proposition that in an attempt to monopolize case, as distinguished from a monopolization case, a definition of the relevant market is not necessary. In *Lessig v. Tidewater Oil Co., 327 F.2d 459, 474-75 (9th Cir. 1964)*, Cert. denied, *377 U.S. 993, 84 S. Ct. 1920, 12 L. Ed. 2d 1046*, the court stated that "(w)hen the charge is attempt (or conspiracy) to monopolize, rather than monopolization, the relevant market is "not in issue.' " [9] The great weight of authority, **[*712]** however, requires a definition of the relevant market. See, e. g., *United States v. Empire Gas Corp., 537 F.2d 296, 298-99 (8th Cir. 1976)*, Cert. denied, *429 U.S. 1122, 97 S. Ct. 1158, 51 L. Ed. 2d 572*; *Morton Bldgs. of Nebraska, Inc. v. Morton Bldgs., Inc., 531 F.2d 910, 919 (8th Cir. 1976)*; *Coleman Motor Co. v. Chrysler Corp., 525 F.2d 1338, 1348* ***[**18]*** *(3d Cir. 1975)*; *George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc., 508 F.2d 547, 550 (1st Cir. 1974)*, Cert. denied, *421 U.S. 1004, 95 S. Ct. 2407, 44 L. Ed. 2d 673*; *Bendix Corp.*

---

federal system." This pronouncement has been reaffirmed by every court of appeals that has confronted the issue including our own. See ***Burton v. United States, 483 F.2d 1182, 1187-88 (9th Cir. 1973)***, and cases cited therein. See also *United States v. Jacobs, 547 F.2d 772 (2d Cir. 1976)*.

[6] At oral argument in this court, Fotomat argued that some of Photovest's witnesses during the first nine days of trial were adverse witnesses. Photovest disputed this assertion contending that it called adverse witnesses later in its case. Regardless of the accuracy of Fotomat's assertion, it failed to indicate anything in Photovest's trial brief that would have caused prejudice.

[7] See notes 27 & 31 Infra.

[8] A private plaintiff can sue for damages under *§ 2* if he has been "injured in his business or property." *15 U.S.C. § 15*. He can sue for injunctive relief against threatened loss or damage from a *§ 2* violation. *15 U.S.C. § 26*.

[9] This follows from the court's rejection of the premise that probability of actual monopolization is an essential element of proof of attempt to monopolize. The court rejected this premise on the theory that "specific intent itself is the only evidence of dangerous probability the statute requires perhaps on the not unreasonable assumption that the actor is better able than others to judge the practical possibility of achieving his illegal objective." *327 F.2d at 474*. See *Knutson v. Daily Review, Inc., 548 F.2d 795, 813-14 (9th Cir. 1976)*, Cert. denied, ***433 U.S. 910, 97 S. Ct. 2977, 53 L. Ed. 2d 1094***. See also Turner, Antitrust Policy and the Cellophane Case, 70 Harv.L.Rev. 281, 305 (1956).

v. Balax, Inc., 471 F.2d 149, 161-64 (7th Cir. 1972), Cert. denied, *414 U.S. 819, 94 S. Ct. 43, 38 L. Ed. 2d 51 (1973)*; Cooper, Attempts and Monopolization: A Mildly Expansionary Answer to the Prophylactic Riddle of Section Two, 72 Mich.L.Rev. 373, 385 & n.37 (1974). Indeed, one commentator has concluded that the Lessig approach "reeks of overkill." Hibner, Attempts to Monopolize: A Concept in Search of Analysis, 34 A.B.A. Antitrust L.J. 165, 171 (1967). We are similarly unpersuaded by Lessig and thus shall proceed to analyze the relevant market in the present case.

[19]** The district court concluded that Fotomat attempted to monopolize "the drive-thru retail photo processing submarket in the Indianapolis metropolitan area." Fotomat argues that the district court erred in defining the submarket and that a proper definition of the relevant submarket is much broader and would include photo processing services offered in drugstores, supermarkets, etc. [10] Under its broader market definition, it argues that its share of the market was insufficient as a matter of law to give rise to any probability that it could succeed in monopolizing that market.

HN2[] The relevant factors for defining the market in a *§ 2* Sherman Act case are similar to those used to define the market in a § 7 Clayton Act case. In *United States v. **[**20]** Grinnell Corp., 384 U.S. 563, 572-73, 86 S. Ct. 1698, 1704-05, 16 L. Ed. 2d 778 (1966)*, the Court stated that "in *§ 2* cases under the Sherman Act, as in § 7 cases under the Clayton Act (*Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510*) there may be submarkets that are separate economic entities," and that "we see no reason to differentiate between "line' of commerce in the context of the Clayton Act and "part' of commerce for purposes of the Sherman Act." See *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1270-71 (9th Cir. 1975)*; *L. G. Balfour Co. v. F.T.C., 442 F.2d 1, 11 (7th Cir. 1971)*. Accordingly, the Brown Shoe Opinion is instructive even though it is a Clayton Act § 7 case involving a product market rather than a service market. [11] The Court stated:

[21]**

> The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. However, within this broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

370 U.S. at 325, 82 S. Ct. at 1523-24 (footnotes omitted).

[*713] The market definition problem in the present case is whether Drive-thru photo processing is, as found by the district court, a relevant submarket. One of the most important indicia suggested in Brown Shoe is whether drive-thru photo processing is offered at prices distinct from other methods of photo processing. This is in essence asking whether there is a low level of cross-elasticity of demand between drive-thru and other methods. The **[**22]** concept of cross-elasticity, defined and explained in the margin, [12] first appeared in the case law in *Times-Picayune*

---

[10] We note here that although delineating the scope of the relevant market entails analysis of both geographic market and product market, our analysis will address only the latter because the parties do not dispute the geographic delineation used by the district court.

[11] For purposes of market definition, we shall use product market and service market interchangeably unless indicated otherwise. In most circumstances the same antitrust analysis applies to both. See, e. g., *United States v. Connecticut National Bank, 418 U.S. 656, 94 S. Ct. 2788, 41 L. Ed. 2d 1016 (1974)*; *United States v. Grinnell Corp., 384 U.S. 563, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *International Boxing Club of New York v. United States, 358 U.S. 242, 79 S. Ct. 245, 3 L. Ed. 2d 270 (1959)*.

HN3[] -

Publishing Co. v. United States, 345 U.S. 594, 612 n. 31, 73 S. Ct. 872, 97 L. Ed. 1277 (1953), where the Court used it to support its conclusion that advertising in other media was not a close enough substitute for newspaper advertising to be included in the same market. ***HN4***[] High cross-elasticity between two products suggests that they are in the same market. [13]

[23]** The district court found that:

> Retail processing delivered to the amateur photographic consuming public by the drive-thru method has a very low or no significant price cross-elasticity with other methods of retailing processing.

Fotomat contends that this finding is largely unsupported in the record. We cannot agree. The record indicates that Fotomat's prices for photo processing were approximately 20% Or more above conventional forms of retailing. Fotomat's Vice-President of Marketing Services testified that Fotomat's print processing prices were over 50% Higher than those of most drug store or discount store services. Yet Fotomat was able to grow despite its significantly higher prices. Similar price differentials were found to be very significant in defining the submarket in *Avnet, Inc. v. F.T.C., 511 F.2d 70 (7th Cir. 1975)*, Cert. denied, *423 U.S. 833, 96 S. Ct. 56, 46 L. Ed. 2d 51*. One of the issues in Avnet was whether rebuilt or reconditioned used components (auto electrical units such as generators, alternators, etc.) should be included in the same market as comparable new components. This court upheld the F.T.C.'s decision to exclude the used components: **[**24]**

> The Commission found that prices for rebuilt or reconditioned used components varied from 25% To 50% Below the prices of comparable new items. Moreover, it noted the absence of any substantial interaction in price between the two lines. These factors are sufficient to support the finding that they should be placed in different submarkets.

Id. at 77. See also *Cass Student Advertising, Inc. v. National Educational Advertising Service, Inc., 516 F.2d 1092, 1100 (7th Cir. 1975)*, Cert. denied, *423 U.S. 986, 96 S. Ct. 394, 46 L. Ed. 2d 303*. Although Fotomat argues that the record establishes substantial similarity and interaction in prices between drive-thru and other retailers of processing, it has failed to provide any citation to the record in support of this argument, and in our independent review of the record we have not discovered any. Therefore, Fotomat's ability to charge distinctive prices, albeit not determinative of a submarket, [14] is an important factor suggesting that the district court's delineation of a submarket was correct.

[25] [*714]** Because a primary aspect of the service at issue, photo processing, is nearly identical whether done by drive-thru kiosks or conventional retailing methods, we might have been inclined to afford the price differential less weight than in other situations where the products appear to be less similar. Our inclination derives from the possibility that the reason for the price differential may be price-insensitive consumers. Cf. *Columbia Metal Culvert Co., Inc. v. Kaiser Aluminum & Chemical Corp., 579 F.2d 20, 28 & n. 22 (3d Cir. 1978)*, Cert. denied, *439 U.S. 876, 99 S. Ct. 214, 58 L. Ed. 2d 190 (1978)*. However, since there is no conclusive evidence that

---

[12] Products that are similar to each other, that are substitutes for each other, display positive cross-elasticity. That is, if the price of A remains constant, an increase in the price of B will generate more sales of A as buyers switch to it. High cross-elasticity means that if the price of A remains constant, an X % Increase in the price of B will generate a greater than X % Increase in the sales of A. See *United States v. DuPont & Co., 351 U.S. 377, 400, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*.

[13] This is not always the case. As Professors Areeda and Turner explained:

Notwithstanding high cross-elasticity between two products at given prices, the producer . . . of one product has market power if he has a significant cost advantage that would persist as he expanded output. (But) since producers with such an advantage will be motivated to cut price and expand their sales, the case will often be taken into account, at least partially, by adjusting market shares to reflect clear trends.

II P. Areeda & D. Turner, ***Antitrust Law*** at 371 n. 1 (1978); See also Sullivan at 56.

[14] See *United States v. Continental Can Co., 378 U.S. 441, 455, 84 S. Ct. 1738, 12 L. Ed. 2d 953 (1964)*; *Beatrice Foods Co. v. F. T. C., 540 F.2d 303, 310 (7th Cir. 1976)*.

consumers in this market are price insensitive, we must afford the price differential its due weight. Moreover, a closer analysis of the products show that although the end product of the drive-thru and the conventional method is nearly identical, the total service is quite different.

The differences in the total service provided by drive-thru as compared to conventional retailing are reflected by industry perception of the drive-thru submarket as a separate economic entity, another Brown Shoe factor suggesting a relevant **[**26]** submarket. The district court found that "the drive-thru retail photographic processing business has achieved recognition within the photographic industry as a separate method of doing business and a separate market." More important than industry perception is consumer perception. Expert testimony indicated that consumers do treat drive-thru as a separate submarket. The convenience and service of drive-thru kiosks apparently segregate them from other forms of retailing. Consumers are willing to pay a premium for the convenience of drive-thru service. And the Fotomate, with whom a customer deals, is more of a specialist than salespersons in many drug stores or discount stores that offer photo processing.

Another Brown Shoe factor, "specialized vendors," also supports the district court's finding of a drive-thru submarket. It is quite clear that kiosks are a specialized method of retailing distinct from other conventional methods.

Fotomat is disturbed by the district court's finding of a drive-thru submarket in view of the fact that the district court found that a given customer might purchase photo processing from both drive-thru and conventional retailers depending on which **[**27]** is more convenient under the circumstances. Fotomat suggests that this precludes the existence of a submarket. We cannot agree. ***HN5***[] The law does not require an exclusive class of customers for each relevant submarket. See, e. g., *United States v. Aluminum Company of America, 377 U.S. 271, 84 S. Ct. 1283, 12 L. Ed. 2d 314 (1964)* (the Court recognized a distinction between markets for insulated aluminum and insulated copper wire despite the fact that the same customers bought each for similar purposes). Moreover, in the present case it is significant that at a given time a customer who finds a kiosk convenient will use it regardless of its higher prices.

Recognizing that in defining the relevant submarket the legal "guidelines offer no precise formula for judgment and (that) they necessitate, rather than avoid, careful consideration based on the entire record," [15] we conclude that the district court properly defined the relevant submarket.

[28]** B. Specific Intent & Conduct

Having affirmed the district court's delineation of the drive-thru submarket we **[*715]** turn now to the issue of whether Fotomat intended to monopolize the market. Although the case law contains some confusing dicta regarding the need to prove specific intent in an attempt to monopolize case, the Supreme Court has stated that:

> ***HN6***[] While the completed offense of monopolization under *§ 2* demands only a general intent to do the act, "for no monopolist monopolizes unconscious of what he is doing," a Specific intent to destroy competition or build monopoly Is essential to guilt For the Mere attempt now charged.

---

[15] *United States v. Continental Can Co., 378 U.S. 441, 449, 84 S. Ct. 1738, 1743, 12 L. Ed. 2d 953 (1964)*. We note also that although in Brown Shoe and DuPont relatively expansive markets were found to be appropriate, subsequent Supreme Court opinions have recognized narrower markets. Thus, in *International Boxing Club, Inc. v. United States, 358 U.S. 242, 79 S. Ct. 245, 3 L. Ed. 2d 270 (1959)*, the Court held the relevant market to be the promotion of championship boxing contests in contrast to all professional boxing events, despite the claimed physical identity of the products involved. See also *United States v. Connecticut National Bank, 418 U.S. 656, 94 S. Ct. 2788, 41 L. Ed. 2d 1016 (1974)*; *United States v. Grinnell Corp., 384 U.S. 563, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *Cass Student Advertising, Inc. v. National Educational Advertising Service, Inc., 516 F.2d at 1094*.

Times-Picayune Publishing Co. v. United States, 345 U.S. at 626, 73 S. Ct. at 890. Accord, *United States v. Griffith, 334 U.S. 100, 105, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)*. Although the specific intent requirement has been criticized, See, e. g., Cooper, Attempts and Monopolization: A Mildly Expansionary Answer to the Prophylactic Riddle of Section Two, 72 Mich.L.Rev. at 398-400 (1974); III P. Areeda & D. Turner, ***Antitrust Law*** P 822 (1978), and the requisite proof to establish it is not well-settled, the district court found, and the **[**29]** record supports its finding of, the requisite intent, and Fotomat has not argued error in this regard.

Fotomat directs its argument to the district court's finding of predatory conduct and contends that either the finding is not supported by the record or that its conduct was not the sort which is proscribed by the antitrust laws. Photovest's theory, accepted by the district court, was that when Fotomat determined that owning the kiosks was more profitable then franchising them, Fotomat, among other things, saturated the market with company-owned kiosks to reduce severely the profitability of Photovest's kiosks and thereby attempted to reduce substantially the value of Photovest's kiosks so that Fotomat could buy them at a low price. Saturating the market was not the only method that Fotomat used, according to the district court, to reduce the profitability of Photovest's kiosks. It found that Fotomat engaged in the following conduct in an intentional attempt to do so:

> concealment of discounts available from processors, retention of discounts from processors, the markup of film, the placement of company stores in such a manner as to siphon business from plaintiff, attempts **[**30]** to coerce plaintiff into remaining with Carhart, refusal to relocate losing stores, insistence on escalating rents and a number of miscellaneous found facts. Each of these was designed to reduce plaintiff's profits for purposes of reacquiring plaintiff's stores at the lowest possible price. [16]

Although we will discuss only the primary components of Fotomat's attempt to monopolize, an analysis of these components requires a thorough review of the factual context in which they occurred. [17]

From its **[**31]** inception in 1967, Fotomat intended to "blitz the industry," that is, to preempt the desirable sites for drive-thru kiosks nationally. Because it did not have a vast capital supply with which to do this, it established a franchising arrangement to provide capital and operating management for its rapidly expanding network and to permit simultaneous development of many metropolitan areas. During its initial years of operation, the bulk of Fotomat's revenue was derived from the sale of franchises, not from operations.

By about June 1969, Fotomat concluded that the profits it derived from company-owned kiosks were significantly greater than those it derived from franchised stores. After 1969, no significant franchise sales were made except to fulfill commitments to "block" franchisees who had rights to purchase additional stores. In 1971, a new franchise relations director was employed **[*716]** by Fotomat with instructions to "work himself out of a job."

The franchise arrangement with Photovest began in 1968. The investors who ultimately formed Photovest responded to an advertisement in the Wall Street Journal in which Fotomat solicited the purchase of franchises in several states **[**32]** including Indiana. The Photovest principals made two trips to Fotomat's headquarters in La Jolla, California, where they were given an extensive sales talk. Fotomat represented that each store had a "market area" consisting of the geographic area from which the store drew its customers and that as a general rule no store would be constructed within two miles of any existing store so as not to infringe on the market area of the existing store. It represented that it would select sites for the franchisees based on sophisticated demographic studies which it and others had conducted. It also represented that two stores would not overlap each other's market areas because Fotomat's royalties applied only to receipts of stores in excess of $ 2,500 per month and thus Fotomat could not afford to have overlapping in market areas. It described a store sales level of $ 60,000 per year as "modest," $ 90,000 per year as "satisfactory," $ 120,000 per year as "above average," and $ 150,000 per year as "high." Fotomat estimated that the Marion County (Indianapolis) area would support fifteen stores which it

---

[16] Beginning in May 1968, Fotomat's franchise agreements contained a buy-back option by which Fotomat was entitled to repurchase the franchise after three years at a price equal to the greater of $ 50,000 or 5 times the total net profit for the 12 month period preceding exercise of the option.

[17] Although this factual discussion is taken primarily from the district court's opinion, we have found that the record supports it.

identified as the "saturation" level of the area. [18] It told the investors that it would **[**33]** provide the franchisee with essential support services, including daily pickup and delivery of film, customer service, administrative support, kiosk maintenance and complete merchandising support.

On August 26, 1968, Photovest signed a master franchise purchase agreement obligating it to purchase fifteen franchises to operate fifteen Fotomat stores in Marion County, Indiana. Each store was made subject to the standard Fotomat franchise agreement and the standard Fotomat lease agreement which **[**34]** would be separately signed when each store was opened. Photovest agreed to pay $ 21,000 for each franchise. The price was payment for use of Fotomat's trademark name, a small amount of equipment, original inventory, and miscellaneous items of a value less than $ 1,000. Photovest also agreed to pay Fotomat as a royalty and continuing franchise fee 12% Of the franchisee's gross sales in excess of $ 2,500 per month. The franchisee was required to pay Fotomat an additional 3% Of all gross sales to be "expended by Fotomat for the purpose of advertising, public relations, and the promotion of the total franchise operation."

The agreement expressly required that the franchisee "purchase all merchandise, photo-processing services and other services from Fotomat or from such other sources as have been approved in writing by Fotomat." But Fotomat agreed to sell "all film and film processing" to the franchisee "at Fotomat's cost without any markup whatsoever." If Fotomat itself entered the photo processing business, it could charge the franchisee for its photo processing services, but only at such rates as "shall be comparable to or less than those prevailing in the industry in operator's **[**35]** general market area."

The agreement required Photovest to lease the store from Fotomat at a rent of $ 375 per month with a cost-of-living escalator effective after five years. Expiration or termination of the lease would terminate the franchise. Fotomat agreed to perform "general services including frequent pickup and delivery of film, frequent delivery of inventory, maintenance of inventories, and regular merchandising services." The term of the franchise was ten years with renewal options for three additional five year periods upon payment of $ 7,000 per period. Photovest had a right of first refusal which **[*717]** could be exercised on any additional stores Fotomat offered for sale in Marion County.

1. Saturating the Market

In 1971, Fotomat's executives in charge of site selection believed that Fotomat had an obligation to the franchisees "to not intentionally pull customers from (the franchisee's) operating stores to ours (company stores) and to act in good faith in the performance of our positioning of the units relative to franchised stores." These beliefs and the understanding or informal policy against "overlaps" of franchised stores were based on Fotomat's knowledge **[**36]** of the basis on which the franchises were sold. As of June 16, 1971, there were eighteen Fotomat stores in the Indianapolis vicinity; fifteen were Photovest's franchised stores, all located in Marion County, and three were company stores located in adjoining counties.

In about 1972, Fotomat began to modify its previous procedures and began to overlap franchised stores on a systematic basis. In 1973, Fotomat devised a "four point program" in response to a Kansas City franchisee's objection to Fotomat's placement of stores in proximity to a franchised store. The program provided that if a store were opened within two miles of a franchised store, the franchisee could either (1) buy a franchise for the store for $ 21,000 and take a lease at $ 375.00 per month, (2) choose either unit within six months of the opening of the new unit, (3) sell the franchised unit back to Fotomat "at a negotiated price" (Fotomat represented that the franchisee could choose a unit if, after a sufficient time, it is determined to close one of the units), or (4) do nothing. This four point policy was not disclosed to Photovest until June 1974, when a store was placed in Indianapolis within one and one half **[**37]** miles of one of Photovest's best stores with an annual sales volume of $ 88,471. Photovest did exercise the option to buy, and that store became its sixteenth store. It believed at the time that the location was

---

[18] In October 1968, after Photovest purchased the fifteen franchises in Marion County, Fotomat placed an advertisement in the Wall Street Journal soliciting the purchase of franchises in certain midwestern cities. The ad stated that Fotomat was "one of the fastest growing franchise systems in the nation" and that "only a few key franchise areas are still available." The ad prominently displayed the names of various midwestern cities, including Indianapolis, with a line drawn through the name and the notation "sold out."

not good, but hoped to deter Fotomat from placing additional overlapping stores in Marion County and purchased to "set a precedent."

In 1974, two other stores were installed within two miles of a Photovest store. Neither was offered to Photovest under the four point program, and when such omission was called to Fotomat's attention, its response was to ignore Photovest's requests. Beginning on October 17, 1974, and up to the date of trial of this case, Fotomat opened ten more stores in and around Marion County. In March 1975, in its next four option offer, Fotomat announced that the price for a franchise store was now $ 30,000 and the required monthly rental would be $ 500 per month. It was not economically feasible for Photovest to accept new stores on those terms, a fact which was known to Fotomat. Since March 1974, Fotomat has opened fourteen new stores in the Indianapolis metropolitan area. Twelve of these represent new sites, while two of them are relocations. Over **[**38]** one-half of the new stores since 1973 have physically overlapped existing stores in Marion County, Indiana.

Prior to the effect of the overlaps, three Photovest stores had attained all-time sales highs in excess of $ 90,000 per year, and two others exceeded $ 80,000. Although all were growing, by trial Photovest's best store was at $ 70,576, and like most other stores, was dropping sharply. Photovest's annual sales reached $ 1,071,670 in the year the overlaps started, and the most recent data available at trial showed its annual sales at approximately $ 900,000, even with a sixteenth store. As of January 1977, ten of Photovest's stores were below Photovest's overall break-even point, and five were below the incremental break-even point of $ 50,000. [19] **[**39]** By trial, Photovest was incurring substantial losses. It was valued by professional **[*718]** business appraisers as worthless and the district court agreed. [20] The district court found that the new company stores were the principal cause of the decline in Photovest's sales. The record supports this finding.

Thus the critical issue in this regard is whether this conduct, albeit destructive of Photovest's profit levels, is proscribed by *§ 2* of the Sherman Act. Fotomat poses the issue as whether the antitrust laws are violated by locating a store close to a competitor in the hopes of taking some customers from the competitor. It argues that the law does not proscribe such behavior because the antitrust laws specifically encourage competitive store locations and condemn competitors **[**40]** who allocate territories among themselves. It attempts to draw support for its arguments primarily from three cases, none of which we find provides persuasive support. *National Society of Professional Engineers v. United States, 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*; *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *United States v. Topco Associates, Inc., 405 U.S. 596, 611, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*.

Topco Associates was a cooperative association of regional supermarket chains. Its basic function was to serve as a purchasing agent for its members and to obtain for them high quality merchandise under private labels to make them competitive with larger national and regional chains. The Government sued Topco under *§ 1* alleging that it combined and conspired with its members to enforce territorial allocation of markets. The territorial allocations effectively insulated members from competition in Topco-brand goods. The Court found the arrangement to be a per se violation of *§ 1* and was not persuaded to the contrary by the district court's determination that the agreements among members allowed **[**41]** them to compete more effectively with the large supermarket chains. The district court had found for Topco in part because "by limiting the freedom of its individual members to compete

---

[19] Photovest's break-even point is $ 55,000 exclusive of general overhead and $ 65,000 after all expenses. The incremental break-even point (i. e. the point at which sales exceed the direct costs of the particular store and begin to contribute to general overhead) is $ 50,000 for a franchised store. Because a franchised store must pay royalties, advertising fees and rents, which company stores do not pay, the break-even point of a company store is significantly lower. For example the incremental break-even point for a company store is $ 21,000 to $ 25,000.

[20] Fotomat argues that the district court's finding that Photovest's franchises were worthless is inconsistent with its finding that sales dropped "a mere 15%" from 1975 to 1977. These findings are not inconsistent since Photovest had relatively high fixed costs and relatively slim profit margins per store. Thus a 15% Drop in sales could mark the difference between a profitable enterprise and a bankrupt enterprise. This is also supported by the fact that franchisees would buy blocks of franchises so that a minor drop in the sales at one or two stores could be temporarily absorbed by the other stores in the block.

with each other, Topco was doing a greater good by fostering competition between members and other large supermarket chains." *405 U.S. at 610, 92 S. Ct. at 1135*.

Fotomat argues that the Supreme Court's rejection of this reasoning suggests that the antitrust laws could not proscribe its adding stores in Indianapolis which overlapped the market areas of Photovest franchises. [21] This quantum leap in legal reasoning ignores an important aspect of antitrust analysis. Fotomat's reasoning ignores the whole concept of predatory practices which was not an issue in Topco. Many predatory practices promote competition in the short run, but if they are used to effect a monopoly by eliminating competition, they are illegal under the Sherman Act. The enforcement of *§ 2* of the Sherman Act will often result in a sacrifice of the most competitive conduct in the short run if the ultimate goal of that conduct is the establishment of monopoly power.

[42]**

[*719] In *Schine Chain Theatres, Inc. v. United States, 334 U.S. 110, 119, 68 S. Ct. 947, 952, 92 L. Ed. 1245 (1948)*, the Court sustained district court findings that the defendant "made threats to build theaters or to open closed ones in order to force sales of theaters in various towns or to prevent entry by an independent operator." The Court stated that the district court was justified in drawing the inference of unlawful purpose from this conduct. Id.

More recently, the Third Circuit found that there was sufficient evidence from which the jury could have found a *§ 2* violation, part of that evidence being the defendant's intentional location of a competing factory in the immediate vicinity of the plaintiff's plant. *Columbia Metal Culvert Co. v. Kaiser Aluminum & Chemical Corp., 579 F.2d 20, 31 (3d Cir. 1978)*. Each defendant's conduct in Schine and Columbia Metal may have promoted competition in the short run, but that did not foreclose the possibility of antitrust liability. Fotomat's citation of Brunswick [22] and National Society of Professional Engineers is unpersuasive for the same reasons.

[43]**

Fotomat also contends that the evidence of record does not support the findings that it expanded in the Indianapolis market for anticompetitive purposes. It relies in great part on the fact that the franchise agreement did not contain a provision prohibiting it from opening new stores which overlapped Photovest's franchised stores. But a party's right to sue for antitrust violations is not dependent on the existence of a contract provision prohibiting the alleged anticompetitive behavior. Moreover, the record in this case clearly supports the district court's findings regarding Fotomat's purpose in locating new stores in Indianapolis. One example of support for this finding is Fotomat's location decisions for its new stores in Indianapolis. It opened new stores in close proximity to Photovest's best stores. One of Photovest's best stores was devastated by Fotomat's opening of three new stores in its immediate market area. One of these new store's sales never exceeded Fotomat's incremental break-even point and by trial were well below it. Notwithstanding Fotomat's operations personnel recommendations to remove it, Fotomat did not close it, apparently willing to lose money in **[**44]** the short run hoping to reduce the profitability of Photovest's store for future buy-back. Indeed, after being bracketed by these three new stores, Photovest's store's annual sales of $ 88,000 dropped 40%. A Fotomat internal memorandum written by an area manager establishes that Fotomat "anticipated" that the new store would "siphon" volume from Photovest's store. [23] Also, it should be remembered

---

[21] Fotomat seems to suggest that if it respected the market areas and did not open overlapping stores, it might be subject to antitrust prohibitions against territorial allocations. But in *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 57 n.26, 97 S. Ct. 2549, 2561 n.26, 53 L. Ed. 2d 568 (1977)*, the Court, in rejecting the inherent illegality of territorial allocations, stated:

We also note that Per se rules in this area may work to the ultimate detriment of the small businessmen who operate as franchisees. To the extent that a Per se rule prevents a firm from using the franchise system to achieve efficiencies that it perceives as important to its successful operation, the rule creates an incentive for vertical integration into the distribution system, thereby eliminating to that extent the role of independent businessmen.

[22] See *Ohio-Sealy Mattress Mfg. Co. v. Sealy, Inc., 585 F.2d 821, 831-32 & n.14 (7th Cir. 1978)*, Cert. denied, ***440 U.S. 930, 99 S. Ct. 1267, 59 L. Ed. 2d 486***.

that Fotomat's conduct regarding new store locations must be viewed along with its other behavior which in total was found to support a § 2 violation. Otherwise, lawful practices may become unlawful if they are part of an illegal scheme. See *Schine Chain Theatres v. United States, 334 U.S. at 119, 68 S. Ct. 947, 92 L. Ed. 1245* .
[45]**

2. Processing Discounts and Film Markups

Another part of the scheme by Fotomat to reduce the profitability of Photovest's stores so that they would eventually be less expensive to buy back was Fotomat's concealment of and retention of discounts it obtained on processing and its markup of Fotomat brand film.

The franchise agreement obliged Fotomat to sell all film and processing to Photovest "at Fotomat's cost without any markup whatsoever." The arrangement between Fotomat and its processors involved processing prices stated in tiers of discounts from the retail price. For example, if the **[*720]** retail price was $ 1.00 and Fotomat was given a discount of 47% Plus 10%, its wholesale price would be $ 0.477 ($ 1.00 47% = $ 0.53; $ 0.53 10% = $ 0.477). Over the years, the second tier discount increased. Fotomat passed on the first tier discount to Photovest but retained the second tier discount. Since the discount terms granted to Fotomat by its processors were highly confidential, Photovest was unaware of Fotomat's retention of the second tier discounts. These discounts ultimately rose to 12% For print and 21.6% For chrome and were secretly retained by Fotomat, as the district **[**46]** court found, both in violation of the contract, and for the purpose of reducing Photovest's profitability.

Similarly, Fotomat introduced private label Fotomat brand film which Fuji and GAF manufactured and sold to Fotomat. Fotomat then sold it to Photovest at prices 7% To 26% Above its cost, in violation of the franchise agreement and as part of its scheme to reduce Photovest's profitability.

3. The Processing Tie

The master franchise agreement gave Photovest the option to purchase processing from Fotomat or "such other sources as have been approved in writing by Fotomat." But twelve of the individual franchise agreements signed on the opening of new stores from December 30, 1968, through 1971 deleted all reference to "approved sources" and required processing to be purchased from Fotomat. In June 1971, Fotomat informed all franchisees that they could use any processor they wished despite the contract provision.

In the summer of 1974, Photovest began looking for another print processor because of quality problems with Carhart (Fotomat's processor). In September, Photovest informed Fotomat that it intended to switch its print processing to Colorcraft. Fotomat demanded that Photovest **[**47]** also change its chrome processor and perform its own pickup and delivery and customer service, despite the fact that Fotomat was contractually required to provide both pickup and delivery and customer service in return for royalty payments from Photovest. Although Fotomat's refusal to perform pursuant to the contract exerted pressure on Photovest to stay with Carhart, Photovest persisted and ultimately signed a contract with Colorcraft.

The pressure Fotomat exerted on Photovest to stay with Carhart put Photovest in a no-win situation. Either it stayed with Carhart and lost the discounts that Fotomat wrongly retained and suffered the loss in sales resulting from inferior quality processing, or it switched processors and lost the customer service and pickup and delivery services which Fotomat threatened to terminate. [24] **[**48]** Either choice subjected Photovest to an economic loss which contributed to Fotomat's plan to reduce Photovest's profits. [25]

---

[23] Other indications of Fotomat's purpose in adding numerous stores in Indianapolis include the fact that Fotomat was well aware that "the more profitable the franchise is, the more expensive and difficult it is to reacquire it," and that the franchise relations director was hired "to work himself out of a job."

[24] The yearly cost of pickup and delivery in Indianapolis was about $ 23,000 during 1974, approximately 50% Of Photovest's annual profit in 1974. The cost of customer service was $ 7,000 per year.

C. Dangerous Probability of Success

Having agreed with the district court's delineation of the relevant submarket, it is quite clear that there was a dangerous probability that Fotomat would succeed in monopolizing the market. [26] The only related issue worthy of discussion is whether Fotomat's control of the market via buy-back **[*721]** of the Photovest franchises would change the competitive dynamics of the market. Fotomat argues that since **[**49]** Photovest always followed Fotomat's recommended pricing, the buy-back would have no effect on the pricing of the goods or services in the relevant market. It argues that the same amount of photo processing would be done whether Photovest or Fotomat owned the Indianapolis drive-thru kiosks, and that the number of sites preempted by Fotomat stores would remain constant.

We are unpersuaded by this argument because it proceeds on the assumption that Fotomat's pricing behavior is not influenced by the existence of Photovest franchises and thus that if Fotomat succeeded in buying back all the Photovest franchises and obtaining a monopoly, it would not change its pricing policies. Antitrust analysis does not recognize as a defense the possibility that if a defendant obtains **[**50]** a monopoly, he might nevertheless not abuse his monopoly power to extract monopoly profits. The recognition of such a defense in an attempt to monopolize case would devastate the impact of *§ 2*.

The fact that Photovest has always followed Fotomat's suggested prices does not suggest, as Fotomat implies, that the same prices would be charged if Fotomat succeeded in buying back all Photovest stores. The forces of competition may well be restraining Fotomat's recommended prices to its franchisees. The franchisees are not bound to follow these Recommended prices. Without the restraints of competition, a monopolist often will find that it can maximize profits by selling a lower volume at higher prices than would prevail in a more competitive market. We cannot reverse the district court's finding of a *§ 2* violation on the ground that Fotomat may not, if given the opportunity, follow the path of many monopolists. Accordingly, we affirm the district court's conclusion that Fotomat violated *§ 2* of the Sherman Act.

III. THE TYING ARRANGEMENTS

The district court found that Fotomat engaged in illegal tying arrangements involving both photo processing and leasing of kiosks. The photo **[**51]** processing tie was held to be in violation of *§ 1* of the Sherman Act and its state law counterpart, *Ind. Code § 24-1-2-1*. The lease tie was held to be in violation of only this state statute apparently because of lack of sufficient effect on interstate commerce. [27]

A. The Photo Processing Tie

The district court held that:

> Defendant's securing of plaintiff's agreement to purchase print processing from defendant, by means of the franchise agreements, defendant's concealment of its discounts from processors, and its policies with respect

---

[25] The district court found that one of the contributing factors to Fotomat's attempt to monopolize was its refusal to settle this litigation. It stated: "In sum, this litigation itself has been utilized by defendant as an instrument to drain plaintiff for purposes of ultimately buying plaintiff out at an inadequate price."

We are of the opinion that the district court erred in considering this as a factor. See our discussion of this issue in section V.A., Infra. Consequently, on remand the district court must reconsider the damage award for the *§ 2* violation. The award must be reduced by $ 72,267 (the $ 24,089 litigation expenses trebled.).

[26] Fotomat and Photovest together had 30 of the 39 drive-thru outlets at the conclusion of the trial. Fotomat's regional director estimated Fotomat's and Photovest's aggregate share of sales in 1975 at 95% Of the Indianapolis drive-thru market.

[27] *Ind. Code § 24-1-2-1* is patterned after *§ 1* of the Sherman Act and Indiana courts have looked to decisional law under *§ 1* to interpret *§ 24-1-2-1*. See *Orion's Belt, Inc. v. Kayser-Roth Corp., 433 F. Supp. 301, 302-03 (S.D.Ind.1977)*; *Citizens National Bank of Grant County v. First National Bank in Marion, 165 Ind. App. 116, 331 N.E.2d 471, 478 n.5 (1975)*.

> to plaintiff's use of independent processors, constitutes an unlawful restraint of trade in violation of *Section [**52] 1* (and *Ind. Code § 24-1-2-1*).

Initially, the tying arrangement was part of the franchise agreement. From 1968 to 1971, twelve of the Photovest franchises included a contractual clause prohibiting Photovest from buying processing from anyone other than Fotomat. [28] Then in June 1971, Fotomat wrote to its franchisees, apparently with knowledge of the then recent opinion in *Siegel v. Chicken Delight, Inc., 311 F. Supp. 847 (N.D.Cal.1970)*, Aff'd in part, *448 F.2d 43 (9th Cir. 1971)*, Cert. denied, *405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972)*, advising them that they could use any processor they wished despite the provision in their agreements to the contrary. This letter, however, also assured the franchisees that Fotomat was selling processing at its cost without any markup **[*722]** whatsoever. Fotomat then adopted a policy that any franchisee who did switch print processors would have to supply its own pickup and delivery and would have to switch chrome processors. When Photovest decided to switch processors in September 1974, Fotomat responded, consistently with this policy, by demanding that Photovest change its chrome processor and do its own pickup and delivery **[**53]** and customer service.

The district court apparently concluded that an illegal tying arrangement existed from the inception. Although the district court did not analyze the alleged tying conduct in temporal segments, we find it instructive to view the conduct in three segments: (1) prior to the June 1971 Chicken Delight letter; (2) from June 1971 to September 1974; and (3) after September 1974.

In period one, prior to the June 1971 letter, the tying arrangement is clear, at least as to twelve of the sixteen Photovest franchises. These franchise agreements required Photovest to purchase its processing from Fotomat. Thus Fotomat tied the sale of processing to the franchise itself. ***HN7***[] A tying arrangement is defined as:

> an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or **[**54]** tied) product, ... They (tying arrangements) are unreasonable in and of themselves whenever a party has sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product . . . .

Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5-6, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958). ***HN8***[] The law is well-settled that a franchise license itself can be the tying product. In *Northern v. McGraw-Edison Co., 542 F.2d 1336, 1345 (8th Cir. 1976)*, Cert. denied, *429 U.S. 1097, 97 S. Ct. 1115, 51 L. Ed. 2d 544 (1977)*, the court stated:

> ***HN9***[] A franchise license constitutes a separate and distinct marketable item. The weight of judicial authority supports the proposition that if prospective franchisees are compelled to purchase equipment or other tied products in order to obtain the franchise and trademark, an illegal tying arrangement exists.

Accord, *Milsen Co. v. Southland Corp., 454 F.2d 363 (7th Cir. 1971)*; *Siegel v. Chicken Delight, Inc., 448 F.2d 43 (9th Cir. 1971)*, Cert. denied, *405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972)*.

In the present case, Fotomat's considerable economic power in the tying **[**55]** product, the trademark/franchise, was used to restrain competition in the processing market. Competing processors were effectively blocked from competing for Photovest's processing needs, a not insignificant amount of processing.

As to the four Photovest franchises which were permitted to purchase processing from Fotomat-approved sources, the tying arrangement was not established sufficiently. Photovest did not show that Fotomat unreasonably withheld approval. Indeed, it appears that Photovest never submitted a processor to Fotomat for approval during this time period. Photovest contends that the tie was nevertheless sufficiently established because Fotomat did not provide a list of approved processors. This does not in our opinion establish the requisite condition for illegal tying. Given the contractual language, which at least provides for the possibility of purchasing processing from non-Fotomat

---

[28] The other four Photovest franchises were subject to clauses which prohibited Photovest from purchasing its processing from anyone else without written approval of Fotomat.

sources, we are reluctant to find a tying arrangement without some evidence that Fotomat applied the contract language so restrictively as to constitute a de facto tying clause. "The presence of the illegal condition may be inferred from an extrinsic course of conduct supplementing **[**56]** the written contract," *Advance Business Systems & Supply Co. v. SCM Corp., 415 F.2d 55, 64 (4th Cir. 1969)*, Cert. denied, *397 U.S. 920, 90 S. Ct. 928, 25 L. Ed. 2d 101 (1970)*, but in the present case Photovest has failed to provide evidence of any conduct from which to infer the tie. Accordingly, we are of the opinion that the district court erred in including these four franchises in the tying arrangement for the period before June 1971.

In period two, from June 1971 to September 1974, we are again unable to agree with **[*723]** the district court's finding of a tying arrangement. Photovest's theory, which persuaded the district court, was that notwithstanding the "Chicken Delight" letter of June 1971, Fotomat's fraudulent representation to Photovest that it was offering processing at its cost without markup, induced Photovest to continue to purchase its processing from Fotomat's processor (Carhart). When Fotomat informed its franchisees that they could purchase processing from whomever they wished, it also assured them that it was offering them processing at its cost. Photovest argues that it had no reason to look elsewhere for processing since it assumed it was receiving **[**57]** its processing at Fotomat's cost and that Fotomat had substantial buying power. From this premise, Photovest concludes that Fotomat tied its processing to its trademark/franchise. It is at this step in the reasoning that Photovest's argument fails.

In essence, using Photovest's reasoning, we would find an illegal tying arrangement whenever a franchiser tells a franchisee, "You can buy your supplies from whomever you desire, but my prices are lower" (knowing that its prices are not lower). This cannot constitute an illegal tie because a tying arrangement requires that the defendant use his economic power in the tying product to coerce the plaintiff to purchase the tied product on terms the plaintiff would not otherwise accept but for his desire to obtain the tying product. See, e. g., *Kentucky Fried Chicken Corp. v. Diversified Packaging Corp., 549 F.2d 368, 377 (5th Cir. 1977)*; *Response of Carolina, Inc. v. Leasco Response, Inc., 537 F.2d 1307, 1326-31 (5th Cir. 1976)*. Photovest did not purchase processing from Fotomat because of Fotomat's power over the trademark/franchise. Rather it purchased from Fotomat because of Fotomat's untruthful representation that Fotomat was selling **[**58]** at cost. ***HN10***[] Fotomat's untruthful representation may constitute breach of contract or fraud or other state law violations, but it cannot constitute the missing link in an illegal tying arrangement.

Photovest cites *Advance Business Systems & Supply Co. v. SCM Corp., 415 F.2d 55 (4th Cir. 1969)*, Cert. denied *397 U.S. 920, 90 S. Ct. 928, 25 L. Ed. 2d 101 (1970)*, in support of its tying theory which appears to be a tying by lying theory. SCM manufactured and sold office copying machines and the paper and other supplies used with the machines. The plaintiff was a distributor of paper and supplies for copying machines, but distributed a different brand of paper and supplies. The court held that SCM tied its paper and supplies to its service contracts. Its service contract stated, "Because SCM photocopy machines are designed to give excellent performance with SCM photocopy supplies, . . . SCM reserves the right to suspend this agreement as to any machines in which other suppliers' paper or other supplies have been used. . . . (and) (t)his agreement shall not apply to any repairs made necessary by the use . . . (of) supplies made by other than SCM and not approved by SCM for use in SCM **[**59]** equipment." *Id. at 65*. SCM never approved any competitive paper for use in its machines even though it knew that the plaintiff's paper was safe and as effective as SCM paper for such use. Moreover, SCM representatives deliberately misrepresented to customers that use of plaintiff's supplies "would cause service calls and interrupt the continuous operation of their machines," and threatened cancellation of rental agreements with customers who used non-SCM supplies in their SCM machines. The court held that both the restrictive contract language and the conduct designed to enforce the illegal restrictions violated the Sherman Act. *Id. at 66*.

From this holding, Photovest tries to distill a rule that fraudulent inducements to purchase made by a defendant with market power in one product will entail an illegal tie. This goes too far. SCM Corp. is distinguishable from the present case because SCM threatened, both by contract and by conduct, to terminate its customers' access to the tying product (either the service and maintenance of SCM copiers or the rental or lease of the copiers themselves) if the customers failed to use the tied product **[*724]** (SCM paper and supplies). The **[**60]** fraudulent misrepresentations were used merely to justify to its customers its enforcement of the tie. In the present case, however, the fraudulent misrepresentations stood alone; they were unaccompanied by either contract language or conduct which was invoked to enforce a tie. Fotomat did not threaten to terminate the franchise if Photovest refused to use Fotomat's processor. It merely misrepresented the value to Photovest of using that processor. Indeed, the fraud was not linked in any significant way with the tying product.

The principal evils of tying arrangements are the foreclosure of competitors in the tied product market and the denial to buyers of the advantages of marketplace shopping. See *Northern Pacific Ry. Co. v. United States, 356 U.S. at 6, 78 S. Ct. 514, 2 L. Ed. 2d 545* . These evils do not arise in the present case because competitors in the processing market were free to lure Photovest's business by offering their services at lower prices than Carhart, and Photovest was free to solicit such bids. That these parties failed to do so may be attributable to poor business judgments or to torpid competitors in the processing market, or even to Fotomat's fraudulent **[**61]** misrepresentations, but not to Photovest's fear of losing the tying product (the franchise or whatever else might be characterized as the tying product). Accordingly, we are of the opinion that the district court erred in finding an illegal tying arrangement during this period.

In period three, after September 1974, we agree with the district court that Fotomat engaged in an illegal tying arrangement. It was during this period that Photovest informed Fotomat that it was switching print processors. Fotomat's response, including its demand that Photovest switch chrome processors and that it perform its own pickup and delivery and customer service, constituted the illegal tie. [29] It tied its print processing to its contractual duties to perform specific and costly services. Since Photovest could not obtain the tied services elsewhere (free of charge) Fotomat had appreciable economic power in the tying product. We also note that Fotomat's pressures to induce Photovest to purchase processing only from its processor were not grounded on quality control considerations. See *Kentucky Fried Chicken Corp. v. Diversified Packaging Corp., 549 F.2d at 376*.
[62]**

The damages computed by the district court on these tying claims under counts I and III must be recomputed on remand consistent with foregoing portion of this opinion.

B. The Lease Tie

The district court held that the contractual requirement that Photovest lease its kiosks from Fotomat constituted an illegal tying arrangement. The franchise agreements stated: "As an express condition of this agreement, Operator must continue as a lessee of a Fotomat Merchandising Island. Operator hereby agrees that the lease executed between Fotomat and Operator contemporaneously with this Agreement is pertinent to this Agreement and expiration or termination of the lease, in accordance with its terms, shall have the effect of terminating this Franchise Agreement." Photovest paid $ 375 per month for each kiosk and land until 1973 when the contractual rental escalator permitted Fotomat to raise the rent to $ 500 per month which it did. The district court found that there was no operational reason why Photovest **[*725]** could not have either constructed its own kiosks or purchased them outright from Fotomat. It found that Photovest was capable of locating suitable sites and negotiating ground **[**63]** leases had it been permitted to do so under the franchise agreements. It also found that Photovest incurred no damages from the leasing requirement until Fotomat raised the rent to $ 500.

The tying arrangement here is quite clear. The express language in the franchise agreement setting forth the condition constitutes a prima facie case. See, e. g., *Schuler v. Better Equipment Launder Center, Inc., 74 F.R.D. 85*

---

[29] Photovest contends that Fotomat's conduct in response to Photovest's desire to switch processors was a consistent policy that Fotomat had developed since June 1971. However, Photovest was unaware of this alleged policy until period three. Thus this policy cannot be used to extend the tying violation into period two.

Even if there were sufficient evidence that during period two Fotomat would have responded to Photovest's attempt to change processors in the same manner as Fotomat responded after September 1974, we would not extend the tying violation to include period two because Photovest could not have proved that it was coerced to stay with Carhart because of its desire to receive the tying product (the pickup and delivery services, etc.) since it was totally unaware that the tying product was conditioned on staying with Carhart.

(D.Mass.1977). A tie involving real estate is just as unlawful as any other tie. See *Carpa v. Ward Foods, Inc., 536 F.2d 39, 50-51 (5th Cir. 1976)*; *Milsen Co. v. Southland Corp., 454 F.2d 363, 365 (7th Cir. 1971)*.

Fotomat argues that the lease tie was rebutted by the facts that Photovest desired to purchase a "turn-key operation," a complete package including land and kiosks, and that Photovest never sought to lease land on its own. These facts, however, do not rebut the proposition that Photovest was coerced by Fotomat's appreciable market power in the franchise to accept the leasing provision. That Photovest desired a complete package does not alter the proposition that were it not for its desire to obtain and retain the franchise it would not have agreed to the leasing **[**64]** provision. Indeed, Fotomat could have offered a "complete package" without conditioning the franchise on the leasing arrangement. It could have made the leasing arrangement optional. The fact that Photovest never sought to lease land on its own is rather obviously the result of the restrictive contract and the fact that Photovest valued the franchise and did not choose to jeopardize the franchise by violating the lease clause. Furthermore, Fotomat offers no evidence to indicate that during the time period for which the district court computed damages Photovest was uncoerced. Fotomat directed its argument only to the time at which the parties entered the franchise agreement.

Fotomat's final argument regarding the tying arrangements deserves little attention. It argues that it lacked any appreciable economic power in the tying product, the trademark/franchise, to permit it to effect an illegal tie. [30] The record shows that in 1968 Fotomat was the only national franchiser of drive-thru photo processing. Its national advertising and the "billboard" effect of its forecasted 5000 stores were substantial advantages. This, in our opinion, shows the requisite economic power in the **[**65]** trademark/franchise. We, accordingly, affirm the judgment as to this issue.

IV. COMBINATION AND CONSPIRACY TO RESTRAIN TRADE

The district court concluded that since March 1972, Fotomat has engaged "in an unlawful combination and conspiracy with its wholly owned subsidiary, Fotomat Labs, Inc., designed to eliminate plaintiff as a retail competitor of defendant and as an independent purchaser of photo processing in violation of *Section 1* of the Sherman Act. . . ." [31]

[66]**

[*726] Fotomat Labs, Inc. (Labs) was incorporated in 1971 as a wholly owned subsidiary of Fotomat. In March 1972, Labs acquired 50% Of a joint venture with a subsidiary of Carhart (the independent Indianapolis processor based in New York from which Fotomat purchased print processing) to operate the Indianapolis plant. This joint venture lasted until May 1974 when Carhart again owned the plant independently. By 1974 Labs' wholly owned plants were doing much of Fotomat's print processing throughout the country.

Carhart performed Fotomat's Indianapolis processing from 1968 to February 1972. From February 1972 to May 1974, the joint venture performed the processing. Then from May 1974 to May 1976, Fotomat again used Carhart. It then switched to the Labs plant in St. Louis. In 1974, Photovest switched its processing to Colorcraft, an independent print processor in Louisville.

---

[30] The Supreme Court has explained that for purposes of tying arrangements, "appreciable restraint results whenever the seller can exert some power over some of the buyers in the market, even if his power is not complete over them . . . ." *Fortner Enterprises, Inc. v. United States Steel Corp., 394 U.S. 495, 503-04, 89 S. Ct. 1252, 1258, 22 L. Ed. 2d 495 (1969)*.

[31] The district court also held this same conduct violative of *Ind. Code § 24-1-2-1*. It further held that Fotomat violated *§ 24-1-2-1* since June 1971, before Labs was on the scene, by engaging in an unlawful scheme and design having the same purpose. The district court apparently was of the opinion that two actors, as required by *§ 1* of the Sherman Act, were not necessary under *§ 24-1-2-1*. Subsequent to the district court's opinion in this case, the Chief Judge of that district issued an opinion, with which we agree, that states that the Indiana statute does not extend beyond the bounds of federal ***antitrust law***. *Orion's Belt, Inc. v. Kayser-Roth Corp., 433 F. Supp. 301, 302-03 (S.D.Ind.1977)*. Accordingly, the district court in the present case erred in finding a violation of *§ 24-1-2-1* before March 1972.

The object of the Fotomat-Labs conspiracy, as described by Photovest, was as follows:

> Fotomat receives roughly twice the profits from a retail outlet that uses Labs rather than an outside processor. . . . (O)ne of the reasons both Fotomat and Labs sought first to deceive and then to coerce Photovest **[**67]** into remaining with Carhart was keep Photovest "within the Fotomat system" . . . so it could be converted to Labs as soon Fotomat's contractual commitment to Carhart expired. . . . Fotomat's objective was ultimately to acquire Photovest and thereby obtain for Labs Photovest's volume as a consumer of wholesale processing.

A scheme to force independent dealers out of business pursuant to a plan of vertical integration, if effected through combination or conspiracy, is a *§ 1* violation. See *Coleman Motor Co. v. Chrysler Corp., 525 F.2d 1338, 1347 (3d Cir. 1975)*. Photovest argues that the Fotomat-Labs plan was just that.

Fotomat attacks this *§ 1* violation on several fronts. First, it contends that Labs was not separate, distinct, or independent from Fotomat and thus a conspiracy could not have existed with only one member. The problem of intra-enterprise conspiracy often presents difficult issues in defining an economic unit. The Supreme Court has held that two separately incorporated subsidiaries within the same corporate family can conspire. *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 215, 71 S. Ct. 259, 261, 95 L. Ed. 219 (1951)* ("common ownership **[**68]** and control does not liberate (them) from the impact of the antitrust laws."). Accord *Perma Life Mufflers v. International Parts Corp., 392 U.S. 134, 141-42, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*; *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 598, 71 S. Ct. 971, 95 L. Ed. 1199 (1951)*. Separate incorporation, however, albeit an important factor, is not conclusive proof of the requisite two actors for a *§ 1* conspiracy. *Knutson v. Daily Review, Inc., 548 F.2d 795, 801-02 (9th Cir. 1976)*, Cert. denied, *433 U.S. 910, 97 S. Ct. 2977, 53 L. Ed. 2d 1094*. Thus we must decide each case on its particular facts. Some relevant factors to consider include "the extent of the integration of ownership, whether the two corporations have separate managerial staffs, . . . the extent to which significant efficiencies would be sacrificed if they were required to act as two firms, their history, whether they functioned as separate firms before being partially integrated, and finally, the extent to which they may, acting as one, wield market power which they would not possess if viewed as separate firms." Sullivan At 328.

The evidence in the present case shows that Labs was separately **[**69]** incorporated to minimize potential for labor relations friction which might arise from the disparity in benefits between employees of photo processing labs and existing Fotomat personnel. The executive management of Fotomat overlapped that of Labs. Moreover, Labs did not maintain separate corporate offices. Profit-related compensation for Labs personnel was calculated solely in terms of the profitability of Fotomat rather than in terms of an appraisal of Labs' independent net income. For all external purposes, financial statements and tax return **[*727]** data were consolidated. In publicly circulated financial statements, all subsidiaries of Fotomat were lumped together with the parent and referred to simply as "the Company." Historically, Labs was formed to integrate photo processing services into Fotomat owned processing facilities and never existed for the independent purpose of establishing a processing business to service non-Fotomat customers. It acted merely as the processing arm of the enterprise.

In response to this substantial evidence that Fotomat and Labs were not separate entities for antitrust purposes, Photovest offers only two statements, one by Fotomat's **[**70]** in-house counsel in which he said that Labs has independent personnel, laboratories, machinery, equipment, and costs and that it bills Fotomat just as independent processors do, and another by Fotomat's president in which he said that Labs "was a separate business and we elected to treat it as such." The fact that Labs billed Fotomat for processing and had separate costs, machinery, equipment, etc., is not very significant other than as evidence that separate accounting made for internal accounting clarity. And the isolated statement by Fotomat's president cannot be given great weight.

We would be more comfortable in deciding this issue if we had a more thorough record in this regard. It is rather curious that the record is extremely thorough, in fact overwhelming, in almost every other aspect of this case. Nevertheless, on the basis of the record before us, we are of the opinion that for antitrust purposes, Fotomat and Labs were really one entity and thus could not have conspired in violation of *§ 1*. The fact that Labs was separately incorporated and the statements of Fotomat's president and in-house counsel are not sufficient to overcome the more substantial evidence indicating **[**71]** that Labs was merely a service arm of Fotomat, more like a corporate division than a separate corporate entity. ***HN11***[] To find the two actors necessary for a *§ 1* conspiracy in this case would not be significantly different from holding, contrary to good authority, that a corporation can conspire in violation of *§ 1* with its wholly-owned, unincorporated sales division, See *H & B Equipment Co. v. International Harvester Co., 577 F.2d 239, 244 (5th Cir. 1978)*, and we do not intend in the present case to lead a movement toward a single-firm conspiracy doctrine. [32] **[**72]** Accordingly, we reverse the district court's finding of a *§ 1* conspiracy to restrain trade on the ground that Fotomat and Labs were not two separate economic entities for purposes of *§ 1* conspiracy analysis. [33] Likewise, for the reasons stated in note 31, we reverse the judgment on this issue as raised under state law.

V. STATE LAW CONTRACT CLAIMS

The district court held that Fotomat breached several provisions of the franchise agreements, but the significant issues on appeal involve the district court's holding that Fotomat breached an implied covenant of good faith and fair dealing; that Fotomat's multiple breaches of contract constituted "an oppressive, intentional, tortious wrong" requiring punitive damages; and that Fotomat's representations to Photovest since May 1970 concerning the nature and amount of its processor discounts constituted fraud for which punitive damages were appropriate.

A. Implied Covenant of Good Faith

Applying California law, the district court concluded that Fotomat breached an implied covenant of good faith and fair dealing by:

> **[*728]** (a) its saturation of the Marion County market with company-owned **[**73]** stores, including the placement of numerous company stores in the market areas of franchised stores as found; (b) its refusal to relocate losing plaintiff's stores and its imposition of onerous terms upon relocations; (c) its reduction in services to plaintiff, and its efforts to transfer expenses to the franchisees as found; (d) its efforts to prevent plaintiff from changing print processors and thereby obtain better processing at lower cost as found; (e) forcing plaintiff to bring this action to obtain rights it clearly has as found; and (f) its efforts through all of the above to destroy plaintiff's business and to recover the franchise for itself as found.

The covenant of good faith and fair dealing, according to the district court, is implied by California law in every contract and imposes a duty on each party to do nothing to destroy the right of the other party to enjoy the fruits of the contract and to do everything that the contract presupposes they will do to accomplish its purpose. Under the district court's interpretation of California law, the implied covenant prohibited actions by Fotomat that would preclude profitable operation of the franchise or coerce franchise **[**74]** owners to terminate their agreements on terms favorable to Fotomat. Fotomat argues that the covenant of good faith doctrine is essentially a rationalization for imposing otherwise unfamiliar duties on insurers, and that in a non-insurance context, the doctrine must be applied only in very narrow circumstances not present here. It is quite clear that California courts have not restricted the doctrine to insurance cases. See, e. g., *Schoolcraft v. Ross, 81 Cal.App.3d 75, 146 Cal.Rptr. 57, 59 (1978)* (deed of trust); *Osborne v. Cal-Am Financial Corp., 80 Cal.App.3d 259, 145 Cal.Rptr. 584, 589 (1978)* (real estate contract); *Ohashi v. Verit Industries, 536 F.2d 849, 853 (9th Cir. 1976)*, Cert. denied, *429 U.S. 1004, 97 S. Ct. 538, 50 L. Ed. 2d 616* (stock transfer agreement). Indeed, the doctrine has been applied to franchise agreements. *Dayton Time Lock Service, Inc. v. Silent Watchman Corp., 52 Cal.App.3d 1, 124 Cal.Rptr. 678, 683 (1975)*. Thus Fotomat's suggestion as to the limited scope of application of the doctrine is not persuasive.

---

[32] Commentators have not called for the expansion of the intra-enterprise conspiracy doctrine. One respected commentator has referred to the doctrine as "one of the weirdest concepts ever to rear its head in antitrust jurisprudence." Handler, Some Misadventures in Antitrust Policymaking Nineteenth Annual Review, 76 Yale L.J. 92, 119 (1966).

[33] Since we have decided that Fotomat and Labs were not two economic entities for *§ 1* purposes, we need not reach the issue of whether their conduct was sufficient to establish an agreement or conspiracy. However, we note that the evidence in this regard is very thin.

As to its suggestion that in a non-insurance context, the doctrine must be applied only in very narrow circumstances not present here, it cites *Hinckley* ***[**75]*** *v. Bechtel Corp., 41 Cal.App.3d 206, 116 Cal.Rptr. 33 (1974)*, as its only authority. In that case, an employee of the defendant was covered by a group life insurance program under which he had a right to convert it into an individual policy without evidence of insurability within thirty days after termination of employment. He failed to exercise that option after he retired, and when he died over a year later, his administratrix sued the defendant for breach of employment contract for the value of the group life policy. Because the language of the policy clearly prohibited recovery, the court explored but rejected the possibility of implying a term or covenant in the employment contract to allow recovery. It would have had to imply a term which would have required the employer to give special notice to its employees of the conversion right under the policy. In refusing to imply such a term the court stated that "It must be especially emphasized that appellant does not allege that it was clearly within the contemplation of the parties that Bechtel (employer) should give special notice to its employees of the conversion right . . . ." *116 Cal.Rptr. at 36*.

In contrast, in the present **[**76]** case, Photovest argued specifically that Fotomat's actions violated representations it made that were clearly within the contemplation of the parties. Moreover, Fotomat's reliance on Bechtel is unpersuasive because Bechtel addressed a request to imply a specific provision rather than a general covenant of good faith and fair dealing which is what the district court in the present case did.

Although we affirm generally the district court's holding regarding the breach of covenant of good faith and fair dealing, we disagree with one aspect of that holding. One of the means by which Fotomat was **[*729]** held to have breached that covenant was by "forcing plaintiff to bring this action to obtain rights it clearly has. . . ." In other words, Fotomat's refusal to settle and its concomitant decision to defend in this litigation contributed to Fotomat's breach of the covenant. Photovest has not provided nor have we found any authority to support the district court in this regard. The only cases offered in support by Photovest are cases which involve antitrust or other injury resulting from instituting a pattern of baseless litigation. Nothing in the case law suggests that liability **[**77]** may stem from the Defense of a lawsuit or from the decision to defend rather than settle. Such a rule would infringe basic rights in our system of jurisprudence.

> Under our jurisprudence the defendant may present any defense to such an action that he may have or that he may deem expedient, and in so doing he will not be subjecting himself to a second suit by the plaintiff based on the wrongful conduct of the defendant in causing the plaintiff to sue him or in defending the action. The rule is the same even though the wrongful conduct of the defendant is willful, intentional, malicious or fraudulent.

Ritter v. Ritter, 381 Ill. 549, 46 N.E.2d 41, 44 (1943). We, therefore, reverse the district court's award of $ 24,089 damages for litigation expenses as part of its damage award for breach of implied covenant of good faith and fair dealing. [34]

Fotomat has also argued, albeit briefly, that the record **[**78]** does not support the findings on which the district court based its conclusion that Fotomat breached an implied covenant of good faith and fair dealing. We have reviewed the record in this regard and must flatly disagree.

B. Tortious Breach of Contract

The district court held that Fotomat's "multiple breaches of its contract with Photovest constitute under Indiana law an oppressive, intentional, tortious wrong for which punitive damages are appropriate. [35] The court would reach the

---

[34] For the same reasons, we reverse the litigation expenses damage component awarded under other counts.

[35] Although this statement might be interpreted to mean that the tort liability arose from the numerosity of breaches rather than from the substance of the breaches, it is clear from the context and from the allegations in the count which the court was addressing that the number of breaches alone was not the basis for the tort liability.

same conclusion under California law." [36] It also concluded that the awarding of punitive damages was in the public interest.

[79]**

Fotomat argues that neither Indiana nor California law recognizes tort liability for oppressive breach of contract. The seminal case in *Indiana is Vernon Fire & Casualty Insurance Co. v. Sharp, 264 Ind. 599, 349 N.E.2d 173 (1976)*. In that case the Indiana Supreme Court, after first acknowledging the general rule that punitive damages are not appropriate for breach of contract, discussed exceptions to that rule. It explained that punitive damages may be awarded if the conduct of the breaching party "not only amounts to a breach of the contract, but also Independently establishes the elements of a common-law tort such as fraud." *Id. at 180*. It also explained that punitive damages could be awarded in the absence of an independent tort if "it appears from the evidence as a whole that a serious wrong, tortious in nature, has been committed, but the wrong does not conveniently fit the confines of a pre-determined tort . . . (and) That the public interest will be served by the deterrent effect punitive damages will have upon future conduct of the wrongdoer and parties similarly situated." Id. (emphasis in original).

It is, therefore, clear under Indiana law that in the proper circumstances **[**80]** punitive damages may be awarded on a tort theory in a breach of contract case. Although **[*730]** Fotomat has contested the propriety of mixing tort liability into a breach of contract setting a practice which we ourselves view as questionable, we are compelled to follow the state law as articulated by the Indiana Supreme Court in Vernon Fire & Casualty Insurance Co. In doing so, we note that Fotomat has offered no persuasive reasons why its conduct did not satisfy the requirements set forth in that case. Thus, we affirm the district court's decision that punitive damages are Appropriate. [37]

[81]**

We cannot, however, affirm the district court's award of an equal amount of actual damages for tortious breach of contract. [38] Vernon Fire & Casualty Insurance Co. does not permit the tortious breach of contract theory to be used as a means to recover actual damages. It very clearly articulated this theory as a justification only for awarding punitive damages. See *Hibschman Pontiac, Inc. v. Batchelor, 266 Ind. 310, 362 N.E.2d 845, 847 (Ind.1977)*. We, therefore, reverse the district court's award of Actual damages for tortious breach of contract. [39]

C. Fraud

The district court held that Fotomat's representations **[**82]** to Photovest since May 1970 concerning the nature and amount of its processor discounts constituted fraud under both Indiana and California law. ***HN12***[] The elements of actionable fraud are: (1) false representation of material fact; (2) knowledge of falsity or lack of

---

[36] Although the court and the parties agreed that California law applied for contract breach purposes, the court apparently applied Indiana law regarding tortious breach of contract because the tort occurred in Indiana. The parties have not contested this.

[37] Although the district court held that punitive damages were appropriate, it concluded that: "Because the court holds that defendant has violated *Indiana Code 24-1-2-1* and *24-1-2-2*, which are Indiana criminal statutes, plaintiff may not under Indiana law recover the punitive damages to which it would otherwise be entitled for activity by defendant which violates those criminal statutes."

Because the conduct which supported the punitive damages was in essence the same conduct which contributed to the antitrust treble damage liability, it would be inappropriate under Indiana law to award punitive damages in addition to the punitive aspects of the treble damage award. See *Taber v. Hutson, 5 Ind. 322, 325 (1854)*; *Glissman v. Rutt, 175 Ind. App. 493, 372 N.E.2d 1188, 1190 (1978)*.

[38] The district court stated that Fotomat's tortious breaches of contract constituted a basis for actual damages of $ 894,046.76 and for an equal amount of punitive damages.

[39] To eliminate any confusion, our holding does not disturb the district court's award of compensatory damages for normal, as distinct from tortious, breaches of contract regarding film markups, processing discounts, etc.

reasonable ground for believing the matter asserted to be true; (3) intent to induce reliance thereon; (4) justifiable reliance by the plaintiff; and (5) resulting damage. *Auto Owners (Mutual) Insurance Co. v. Stanley, 262 F. Supp. 1, 4 (N.D.Ind.1967)*; *Vasquez v. Superior Court, 4 Cal.3d 800, 94 Cal.Rptr. 796, 484 P.2d 964, 970 (1971)*. Fotomat's only significant argument is that Photovest did not satisfy the fourth element because its reliance on Fotomat's misrepresentations were not justifiable. It argues that the record proves that Photovest had knowledge of the fraud since March 1970 and thus it could not have justifiably relied on the misrepresentations. Our review of the record, however, indicates that the few amorphous bits of information that Photovest may have been aware of were insufficient to provide grounds for it reasonably to be able to construct even a rough idea of the full scope and substance of the fraud. **[**83]** [40] Accordingly, its reliance on Fotomat's fraudulent misrepresentations were justifiable. We, therefore, affirm the district court's decision regarding fraud.

VI. DAMAGES

Calculation of Photovest's damages in this case was a very complicated task for the district court, because the case involved several different legal theories with overlapping damages and variations in the statutory periods of limitation. Our disposition of the numerous issues in this appeal has **[*731]** included reversals of some aspects of the district court's decision. On remand, this will require the district court to recalculate damages, but the total damages awarded will not be drastically altered because the bulk of the damages awarded for attempt to monopolize have been affirmed; and **[**84]** damages awarded under theories that have now been reversed were for the most part duplicated in the attempt to monopolize award.

We direct the district court on remand to reassess and recalculate damages consistent with this opinion and, for greater clarity, to list the damage awards under the various counts and indicate what portion of each is duplicative of damages under another count so that the total damages may be computed by adding the non-duplicative amount of each count. We do not suggest that this procedure is required in all similar cases, but when a complex damage award, as in this case, is involved, this procedure will facilitate any subsequent review that may occur. We also do not suggest that the district court did not provide an adequate basis for the damage award. See *Allen v. W.H.O. Alfalfa Milling Co., 272 F.2d 98, 100 (10th Cir. 1959)*. The district court entered damage findings as to each count and made subsidiary findings stating the amount of the components of each award. Moreover, Fotomat's contention that the damage findings are replete with internal conflicts has not been persuasively supported.

VII. FACT FINDINGS

Fotomat argues that the district court's **[**85]** findings were adopted almost verbatim from findings submitted by Photovest, and thus that we should scrutinize those findings more critically. This court has criticized the practice of adopting the prevailing party's findings without change and has admonished the district courts to "exercise an astucious editorial pen on counsel-submitted findings." *FS Services, Inc. v. Custom Farm Services, Inc., 471 F.2d 671, 676 (7th Cir. 1972)*. We are of the opinion that findings which have been adopted wholesale from those submitted by the prevailing party should be examined more critically to determine whether they are clearly erroneous.

The present case is not an egregious example of undeviating adoption of the prevailing party's findings. The district court rejected all or most of 86 of Photovest's numerous proposed findings, reorganized findings it did accept, and edited others of them. Because it did adopt with little change the bulk of Photovest's findings, however, we have critically reviewed the contested findings and examined the record to insure that it contained the requisite support. As a result, we conclude that except where we have stated otherwise, the findings are not clearly **[**86]** erroneous.

For the reasons stated throughout this opinion, the judgment of the district court is affirmed in part, reversed in part, and remanded for proceedings consistent with this opinion. As we have noted, despite some reversals, the total

---

[40] We do not suggest that a plaintiff with knowledge of the fraud may nevertheless claim justifiable reliance just because it does not know the exact dollar amount involved or every intricate detail of the fraud. But that is not the case here.

damages awarded will not be drastically altered. Accordingly, costs in the judgment of this court will be assessed against the defendant. [41]

[41] Pursuant to Circuit Rule 16(e), that part of the foregoing opinion captioned "I. EXCHANGE OF BRIEFS PROCEDURE" has been circulated among all judges of this court in regular active service. No judge favored a rehearing En banc on the question presented by the direction that any district court of this circuit now following the practice of delayed exchange of trial briefs should require in all future cases each party to serve his trial brief on all other parties at some reasonably short time before or after he files the brief with the court or provides a copy to the judge.

Opinion by: BAKER

Opinion

[*282] MEMORANDUM AND ORDER

This is an action for damages under the Robinson-Patman Act. The plaintiff seeks to impose liability upon the individual defendants, who are governmental officials, and upon the private corporate defendant which dealt with them. The defendants have moved to dismiss or for summary judgment.

The plaintiff, Champaign-Urbana News Agency, Inc., is a Delaware corporation with its principal office and place of business in Champaign County, Illinois. Plaintiff is engaged in the business of wholesale distribution of paperback books, magazines and comic books in the States of Illinois and Indiana.

[*283] The defendant, J. L. Cummins News Company (Cummins), is an Illinois corporation with its principal place of business in Bloomington, Indiana. It is engaged in the same business **[**2]** as plaintiff and conducts a portion of that business within the Central District of Illinois.

The defendants, Martin R. Hoffman and John L. McLucas, are, respectively, Secretary of the United States Army and Secretary of the United States Air Force. In those capacities they are responsible for the administration and operation of the Army and Air Force Exchange Service (AAFES). AAFES is a nonappropriated fund instrumentality of the United States Government which operates post exchanges or commissaries located on Army and Air Force bases. The post exchanges sell a wide variety of merchandise, including paperback books, magazines and comic books, to members and employees of the United States Armed Forces and their families.

The plaintiff has filed its first amended complaint in three counts, seeking damages and injunctive relief. In Count I, plaintiff alleges that the defendant Cummins violated the Robinson-Patman Act, § 2(a), *15 U.S.C. § 13(a) (1976)*, by discriminating in the price of its goods between different purchasers and by affording a five percent discount to the Chanute Air Force Base Exchange in Rantoul, Illinois. As a result of Cummins' illegal price discrimination, the **[**3]** plaintiff claims that it has been injured and that it failed to receive the contract for sale of paperback books, magazines and comic books to the Chanute Air Force Base Exchange for the year 1976-1977. The plaintiff prays for damages against Cummins in the sum of $ 90,000 and for an injunction against the alleged illegal discriminatory sale practices.

In Count II, the plaintiff seeks a declaratory judgment against the defendants, Hoffman and McLucas, declaring that sales to the AAFES are subject to the provisions of the Robinson-Patman Act.

In Count III, the plaintiff alleges that the defendants, Hoffman and McLucas, in their capacities as Secretary of the Army and Air Force, respectively, combined and colluded with the defendant Cummins to procure a price discrimination in violation of § 2(f) of the Robinson-Patman Act to the plaintiff's injury. The plaintiff prays for damages of $ 90,000 from AAFES and that AAFES be enjoined from the practice of procuring a discrimination in price on purchases of paperback books, magazines and comic books.

The defendant, Cummins, and the defendants, Hoffman and McLucas, have separately moved to dismiss the first amended complaint with prejudice **[**4]** or for summary judgment on the grounds that the allegations show a lack of jurisdiction by the court over the subject matter and a lack of jurisdiction over the persons of the defendants, Hoffman and McLucas, and that the complaint fails to state a claim upon which relief can be granted.

The pleadings present the following issues for determination:

I. Is AAFES, as an arm of the United States government, immune from liability under the Robinson-Patman Act?

II. If so, does this sovereign immunity extend to the defendant federal officials, Hoffman and McLucas?

III. If the federal buyers AAFES, Hoffman and McLucas cannot be liable for inducing a Robinson-Patman Act violation, does the private seller thereby escape liability?

I. Is AAFES, as an arm of the United States government, immune from liability under the Robinson-Patman Act?

A. ***HN1***[] As a general rule, the United States may not be sued without its consent. 14 C. Wright, A. Miller & E. Cooper, Federal Practice and Procedure § 3654, at 156 (1976). This doctrine of sovereign immunity has been imported to the United States from English law. National Ass'n of Attorneys General, Sovereign Immunity: The Liability of Government and its **[**5]** Officials (1975).

> Consent alone gives jurisdiction to adjudge against a sovereign. Absent that consent, the attempted exercise of judicial **[*284]** power is void. The failure of officials to seek review cannot give force to this exercise of judicial power. Public policy forbids the suit unless consent is given, as clearly as public policy makes jurisdiction exclusive by declaration of the legislative body.

United States v. United States Fidelity & Guaranty Co., 309 U.S. 506, 514, 60 S. Ct. 653, 657, 84 L. Ed. 894 (1940).

The plaintiff claims *Penn Dairies, Inc. v. Milk Control Comm'n of Pennsylvania, 318 U.S. 261, 63 S. Ct. 617, 87 L. Ed. 748 (1943)*, and *Paul v. United States, 371 U.S. 245, 83 S. Ct. 426, 9 L. Ed. 2d 292 (1963)*, support its claim that AAFES purchases are subject to the Robinson-Patman Act without express consent. The cited decisions do not support that proposition because they involve federal subjection to state regulation, which concerns conflicting sovereign rights and may in turn depend on land ownership.

In *Penn Dairies, supra*, the Supreme Court, recognizing that sales on government reservations were not subject to state regulation, held that Pennsylvania **[**6]** had a right to regulate the sale of milk at an Army camp established by the United States on land belonging to the Commonwealth of Pennsylvania. Only on an exclusively federal enclave would the Commonwealth of Pennsylvania have been prohibited from exercising control over the sale of milk.

Again, on the question of the ability of a state to regulate sales at military installations, the Supreme Court in Paul held that sales for government consumption could not be regulated irrespective of whether the consumption took place on a federal enclave or on state-controlled land. Whether a state could regulate the sale of goods which were not to be consumed by the federal government raised a different problem:

> What we have said would dispose of the entire case but for the fact that some of the milk was purchased out of nonappropriated funds for use in military clubs and for resale at post exchanges. This brings us to the question whether Congress has power to exercise "exclusive legislation" over these enclaves within the meaning of *Art. I. § 8, cl. 17, of the Constitution* . . . .

371 U.S. at 263, 83 S. Ct. at 437. Whether the state had the right to regulate sales in the military **[**7]** clubs and post exchanges thus appeared to turn on the factual question of which sovereign owned the land on which the post was situated.

B. The weight of authority clearly indicates that AAFES is a branch of the Department of Defense and that its activities are protected by the doctrine of governmental immunity except in those specific instances where Congress has waived that immunity.

In *Standard Oil Co. v. Johnson, 316 U.S. 481, 62 S. Ct. 1168, 86 L. Ed. 1611 (1942)*, the Supreme Court was called upon to decide whether post exchanges, established under regulations promulgated by the Secretary of War under the authority of Congressional enactments, are arms of the government deemed by it essential for the performance of governmental function. The Court held that post exchanges are indeed arms of the government and that sales made in the post exchanges are exempt from state regulation.

> Congressional recognition that the activities of post exchanges are governmental has been frequent. Since 1903, Congress has repeatedly made substantial appropriations to be expended under the direction of the Secretary of War for construction, equipment, and maintenance of suitable buildings for **[**8]** post exchanges.
>
> . . . The object of the exchanges is to provide convenient and reliable sources where soldiers can obtain their ordinary needs at the lowest possible prices. Soldiers, their families, and civilians employed on military posts here and abroad can buy at exchanges. The Government assumes none of the financial obligations of the exchange. But government officers, under government regulations, handle and are responsible for all funds of the exchange which are obtained from the companies or detachments composing its membership. Profits, if any, do not **[*285]** go to individuals. They are used to improve the soldiers' mess, to provide various types of recreation, and in general to add to the pleasure and comfort of the troops.

Id. at 484-485, 62 S. Ct. at 1170.

The conclusion in *Standard Oil Co. v. Johnson, supra*, that post exchanges and similar facilities are instrumentalities of the United States, is reiterated in *United States v. Mississippi Tax Comm'n, 421 U.S. 599, 606, 95 S. Ct. 1872, 44 L. Ed. 2d 404 (1975)*. That case, too, dealt with the ability of a state to tax a transaction on a post exchange and the Court recognized post exchanges as arms of **[**9]** the Department of Defense.

In *United States v. Hopkins, 427 U.S. 123, 96 S. Ct. 2508, 49 L. Ed. 2d 361 (1976)*, the status of military post exchanges as arms of the Government was raised as a defense to an AAFES employee's suit for breach of employment contract. While the case turns on an interpretation of the Tucker Act, *28 U.S.C. § 1491 (1976)*, and the jurisdiction of the Court of Claims, the basic premise that AAFES is an arm of the Government remains unchanged.

It is noteworthy that Congress in defining government employees excluded AAFES personnel paid from nonappropriated funds but went on to say, "this subsection does not affect the status of these nonappropriated fund activities as Federal instrumentalities." *5 U.S.C. § 2105(c) (1976)*.

A series of lower court decisions have dealt with the status of AAFES as an arm of the government and the immunity which is attendant upon that status.

In *Ellsworth Bottling Co. v. United States, 408 F. Supp. 280 (W.D.Okl.1975)*, a soft drink concessionaire claimed that AAFES had engaged in unlawful bidding procedure in awarding a contract to the plaintiff's competitor. The district court ruled that plaintiff had a remedy under the Administrative **[**10]** Procedure Act. In discussing AAFES status, the court said:

> The AAFES is a joint major command of the U.S. Army and the U.S. Air Force under the jurisdiction of the Chief of Staff, U.S. Army and Chief of Staff, U.S. Air Force. AAFES is the entity embracing the activities, personnel, property and nonappropriated funds through which exchange service is provided within the Army and Air Force. AR 60-10/AFR 147-7 §§ 1-5. The Secretary of Defense has vested in the Secretary of the Army and the Secretary of the Air Force all functions, powers and duties relating to exchange service activities within their respective departments. AR 60-10/AFR 147-7 §§ 1-3. Thus, it is clear that the AAFES is a part of the Department of Army and Air Force and, hence part of the Department of Defense. As AAFES is part of the Executive department, the Department of Defense, it cannot be an independent establishment within the meaning of *5 U.S.C. § 104*. *Moreover, in Standard Oil Company of California v. Johnson, supra*, the Court found a post exchange, the predecessor to the modern AAFES, to be an integral part of the War Department, one of the predecessors to the Department of Defense, sharing in the duties **[**11]** intrusted to it and partaking of whatever immunities it may have under the Constitution and federal statutes.

Id. at 284 (footnote omitted).

Ellsworth also distinguishes *W. B. Fishburn Cleaners, Inc. v. Army & Air Force Exchange Service, 374 F. Supp. 162 (N.D.Tex.1974)*, a case on which plaintiff relies. Fishburn found the AAFES to be an independent establishment within the definition of *5 U.S.C. § 104*. Ellsworth points out, however, that Fishburn did not consider the effect of joint Army/Air Force regulations:

> In light of these regulations it is clear that the AAFES is a dependent part of the Departments of Army and Air Force. The AAFES is entirely under the control of these Departments. There is nothing independent about its operations under the pertinent regulations.
>
> It is possible that the Fishburn court did consider the regulations but considered, in the construction of *5 U.S.C. § 104*, that the words "or part thereof" **[*286]** were intended to modify only "Government corporation" and not "Executive department, military department." This Court would reject such a construction. Reason dictates that if an Executive or military department is excluded from **[**12]** the section's coverage, an integral part thereof would also be excluded.

408 F. Supp. at 284 n.3.

See also *Bramblett v. Desobry, 490 F.2d 405 (6th Cir. 1974)*, Cert. denied *419 U.S. 872, 95 S. Ct. 133, 42 L. Ed. 2d 111 (1974)*, which held the discharge of an AAFES employee by a base commanding officer was a governmental act granting immunity from suit; *Young v. United States, 498 F.2d 1211 (5th Cir. 1974)*, where the plaintiff was barred from bringing suit in either the Court of Claims or the District Court and was required to seek relief under the Administrative Procedure Act; *Fraley v. United States, 232 F. Supp. 491 (D.Mass.1964)*, holding that AAFES was an instrumentality of the United States and not subject to suit for personal injuries arising from a collision with an automobile owned by AAFES; *Bailey v. United States, 201 F. Supp. 604 (D.Alaska 1962)*, dismissing a suit brought on a post exchange contract because the United States had not waived sovereign immunity.

C. The examples cited by the plaintiff in its brief to illustrate the lack of governmental immunity for AAFES, E. g. federal legislation allowing imposition of state gasoline taxes, exempting AAFES from Civil **[**13]** Service control, the Tucker Act, and requiring liability insurance coverage for AAFES automobiles, tend rather to show a recognition by Congress of the governmental nature of AAFES functions. Each example is really an illustration of Congress saying, "In this particular instance we will waive the United States' immunity."

The rationale followed by the Court of Appeals for the District of Columbia in *Hecht v. Pro-Football, Inc., 144 U.S.App.D.C. 56, 444 F.2d 931 (D.C.Cir. 1971)*, in subjecting the District of Columbia Armory Board to suit under the antitrust laws, seems inapplicable to AAFES as an arm of the Department of Defense.

The Hecht decision leans heavily on cases interpreting the preemptive effect of government regulation on the application of antitrust laws to regulated industries. Thus, the Securities Exchange Commission in *Silver v. New York Stock Exchange, 373 U.S. 341, 83 S. Ct. 1246, 10 L. Ed. 2d 389 (1963)*, could not use its powers to bring about a business combination which would violate the antitrust laws. Similarly, the Comptroller of the Currency in his regulation of banks could not authorize a merger which violated the *Clayton Act. United States v. Philadelphia **[**14]** National Bank, 374 U.S. 321, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*. Regulation by the Civil Aeronautics Board will not exempt airlines from application of the antitrust laws. *Pan American World Airways v. United States, 371 U.S. 296, 83 S. Ct. 476, 9 L. Ed. 2d 325 (1963)*. Regulation by the Federal Communications Commission does not exempt broadcasters from the antitrust laws. *United States v. Radio Corporation of America, 358 U.S. 334, 79 S. Ct. 457, 3 L.E.2d 354 (1959)*. Shipping subject to regulation by the Federal Maritime Commission, on the other hand, is exempt by statute. 46 U.S.C. § 814 (1976).

However, it does seem that AAFES is not analogous to any of the regulated industries subject to federal regulatory commissions which Hecht relied upon as being comparable to the District of Columbia Armory Board. As observed above, AAFES is an arm of the Defense Department and is government in the sense that it enjoys and partakes of the immunity which that department unquestionably enjoys.

Neither can it be said that Hecht's Observations about state-created instrumentalities which are subject to antitrust legislation are persuasive that AAFES is a similar instrumentality. AAFES is **[**15]** not a federal agency with a status equivalent to the District of Columbia Armory Board. Rather, AAFES enjoys a higher and more protected status for purposes of sovereign immunity than does any District of Columbia agency. AAFES is truly a federal agency, while for purposes of sovereign immunity **[*287]** the District of Columbia Armory Board is more like a state agency or instrumentality. [1.] The antitrust laws are an exercise of Congress's commerce power and are thus supreme over any state law, including doctrines of state sovereign immunity. Although Congress may decide to exempt various activities of state government from coverage under the antitrust laws, nothing prevents Congress if it so desires from subjecting states to antitrust liability without their consent. *Georgia v. Evans, 316 U.S. 159, 162, 62 S. Ct. 972, 86 L. Ed. 1346 (1942)*. The relevant question is not the power of Congress to create state or District of Columbia antitrust liability without the consent of those governments, but whether Congress in a particular case intended to do so. *Parker v. Brown, 317 U.S. 341, 350-51, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*; See *Kurek v. Pleasure Driveway and Park District of Peoria, **[**16]** 557 F.2d 580 (7th Cir. 1977)*, Vacated and remanded, *435 U.S. 992, 98 S. Ct. 1642, 56 L. Ed. 2d 81 (1978)*, for consideration in light of *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*.

The plaintiff argues that the nature of AAFES as a business enterprise requires that it be denied antitrust immunity. The plaintiff points out that AAFES operates on nonappropriated funds and engages in merchandising not unlike that **[**17]** of a chain of huge, private, supermarkets or department stores. In reality, plaintiff says, AAFES is not carrying out a governmental function but is engaged in a proprietary activity and should be subject to antitrust liability like the defendants in *Kurek, supra.* This argument mistakenly equates the status of AAFES immunity with state immunity. The "private business" test for determining whether state activity is within the coverage of the antitrust laws has relevance only in deciding whether Congress has intended the antitrust laws to override state sovereign immunity. As has been shown, however, AAFES enjoys federal, not state, sovereign immunity and cases like Kurek are inapposite.

While the plaintiff's argument that AAFES in reality is a business enterprise is a very appealing one philosophically, this court cannot ignore the reiterated holdings of the Supreme Court that ***HN2***[] AAFES is an arm of the Department of Defense and is government.

---

1. The activities of the AAFES find their genesis in an exercise of enumerated federal powers under the Constitution; namely, the war and military powers of Art. I, § 7, clauses 11-14, together with the Necessary and Proper Clause. With regard to the District of Columbia, however, Congress is not limited to enumerated powers. It has, instead, the general police powers of a state government. U.S. Const. art. I, § 7, cl. 17; *National Mutual Insurance Co. v. Tidewater Transfer Co., Inc., 337 U.S. 582, 69 S. Ct. 1173, 93 L. Ed. 1556 (1949)*.

II. Does the sovereign immunity of AAFES extend to the defendant federal officials, Hoffman and McLucas?

HN3[] A governmental officer acting within the scope of his authority in the discharge of the duties of his office enjoys the same personal immunity **[**18]** from suit as does the government.

In *Union Carbide and Carbon Corporation v. Nisley, 300 F.2d 561, 576-77 (10th Cir. 1961)* Cert. denied *371 U.S. 801, 83 S. Ct. 13, 9 L. Ed. 2d 46 (1962)*, the United States entered into a contract with one of the litigants for production of vanadium ore, which contract was claimed to violate the antitrust laws. The question of immunity of the government agent was raised:

> The trial court was requested to instruct the jury in substance that the government itself could not violate the antitrust laws; that an agent for the government, acting within the scope of his authority, was likewise immune, and that if the authorized activities of the agent were validly conferred, the fact that the agent may have had illegal private motives in the performance of his authorized duty was irrelevant. It is true, as appellants suggest, that the antitrust laws are inapplicable to government activities. And, it may also be taken as equally true that since the government acts only through its agents, such agents are likewise immune from liability under the statute **[*288]** while acting within the scope of his authority in the furtherance of a declared governmental **[**19]** policy or legislative scheme. *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315*; *Asheville Tobacco Board of Trade v. F. T. C., 4 Cir., 263 F.2d 502*, Cf. *Atchison, Topeka & S. F. Ry. Co. v. Aircoach Transportation Ass'n, 102 U.S.App.D.C. 355, 253 F.2d 877*. But there is nothing in this agency contract to justify the inference that the government intended to transgress the antitrust laws. The contract does not purport to authorize USV to fix prices, restrain trade or achieve a monopoly in the vanadium industry, and we will not lightly infer an intention to do so. Cf. *Maryland and Virginia Milk Producers Ass'n v. United States, 362 U.S. 458, 80 S. Ct. 847, 4 L. Ed. 2d 880*; *United States v. Radio Corp. of America, 358 U.S. 334, 79 S. Ct. 457, 3 L. Ed. 2d 354*; *United States v. Borden Co., 308 U.S. 188, 60 S. Ct. 182, 84 L. Ed. 181*.

If the AAFES activities are government functions and the Secretaries are in charge of those activities, it becomes apparent that the Secretaries are immune.

The argument that the Secretaries have waived governmental immunity is untenable. The executive arms of the government, through which the United States does business, have no power to waive **[**20]** the sovereign's immunity, or create a right of suit that Congress has not sanctioned. *American Foreign Steamship Corp. v. United States, 291 F.2d 598 (2d Cir. 1961)* Cert. denied, *368 U.S. 895, 82 S. Ct. 171, 7 L. Ed. 2d 92 (1961)*. See also *Reid v. United States, 211 U.S. 529, 29 S. Ct. 171, 53 L. Ed. 313 (1909)*.

III. If the federal buyers AAFES, Hoffman and McLucas cannot be liable for inducing a Robinson-Patman violation, can the private seller, Cummins, thereby escape liability?

HN4[] Section 2(a) and (f) of the Robinson-Patman Act states that:

> It shall be unlawful for any person engaged in commerce . . . to discriminate in price between different purchasers . . . where the effect of such discrimination may be substantially to lessen competition . . . .
> . . . It shall be unlawful for any person engaged in commerce . . . knowingly to induce or receive a discrimination in price which is prohibited by this section.

On the face of the statute it is apparent that the seller and the buyer who engage in outlawed pricing activities are each subject to penalty and that the prohibitions of the statute can be applied individually as well as jointly. There is no necessity for concert **[**21]** of action by the seller and buyer to justify proceeding against the seller, although the statute does require the buyer to be witting before an action will lie against him. The different sections of the statute are independent of each other and may be separately enforced. *Federal Trade Comm'n. v. Henry Broch & Co., 363 U.S. 166, 170-71, 80 S. Ct. 1158, 4 L. Ed. 2d 1124 (1960)*. [2.]

Cummins, the seller, argues it cannot be guilty of discrimination because its buyer cannot be guilty of inducement. It presents a theory of what might be characterized as "vicarious sovereign immunity." Taking the statute at face value, Cummins' claim would fail. **[**22]** If Congress intended to prohibit All price discrimination through the Robinson-Patman Act, then a seller should not find shelter behind the sovereign immunity of a buyer and frustrate the Congressional intent. To reach that conclusion, however, it would be necessary to find that Congress intended the Robinson-Patman Act to apply to all transactions, including those of the United States.

To resolve the question of Cummins' liability, therefore, it becomes necessary to go **[*289]** beyond the initial inquiry of sovereign immunity and to probe the reasons for Congress' enactment of the Robinson-Patman Act. Did Congress intend that the Robinson-Patman Act should apply to purchases by the United States? Put another way, can the United States be a "purchaser" within the meaning of § 2(a) of the Robinson-Patman Act, Supra.

HN5[] By its own terms, the Act does not prohibit all price discrimination. It expressly exempts "purchases of their supplies for their own use by schools, colleges, universities, public libraries, churches, hospitals, and charitable institutions not operated for profit." *15 U.S.C. § 13c (1976)*. The purpose of this exemption is to allow the named institutions to make their **[**23]** purchases at the lowest possible price. *Logan Lanes, Inc. v. Brunswick Corp., 378 F.2d 212 (9th Cir. 1967)*. The exemption runs to both sellers and purchasers.

> For every purchase . . . there must be both a purchaser and a seller. It follows that if a particular purchase is exempt from the Act, both the seller and the purchaser involved in that transaction are exempt. Moreover, the benefits in the form of lower prices which are expected to accrue to non-profit institutions by reason of this statute would be illusory if only the purchasing institution, but not the sellers thereto, were exempted. No seller would be able to give a non-profit institution the benefit of a lower price which was discriminatory under the Act, if such a seller was not exempt from the sanctions of the Act in making the sale.

Id. at 215-16.

Why then was the government not exempted, the plaintiff argues, if the Act was not to apply to government purchases? The answer is straightforward and simple. The government was never included and therefore did not need to be exempted. It is an "old and well known rule that ***HN6***[] statutes which in general terms divest pre-existing rights or privileges will not (be applied) **[**24]** to the sovereign without express words to that effect." *United States v. United Mine Workers of America, 330 U.S. 258, 272, 67 S. Ct. 677, 686, 91 L. Ed. 884 (1947)*.

See *Dollar Savings Bank v. United States, 86 U.S. (19 Wall.) 227, 22 L. Ed. 80 (1874)* where it was stated:

> It is a familiar principle that the King is not bound by any act of Parliament unless he be named therein by special and particular words. The most general words that can be devised (for example, any person or persons, bodies politic or corporate) affect not him in the least, if they may tend to restrain or diminish any of his rights and interests. He may even take the benefit of any particular act, though not named. The rule thus settled respecting the British Crown is equally applicable to this government, and it has been applied frequently in the different States, and practically in the Federal courts.

Id. at 239. [3.]

[2.] It seems apparent from the statutory language that a buyer cannot be guilty of inducing if the seller cannot be guilty of discriminating, and the Supreme Court has so held. *Great Atlantic & Pacific Tea Co., Inc. v. Federal Trade Comm'n, 440 U.S. 69, 99 S. Ct. 925, 59 L. Ed. 2d 153 (1979)*. A&P, However, says nothing about the reverse case which is the situation here.

[3.] The doctrine that the sovereign retains immunity from suit unless expressly waived and the rule of construction that restrictive statutes do not apply to the sovereign unless expressly named obviously overlap to a great extent. The distinctions emerge where, as here, the action somehow depends on the legal rights of the United States, and the amenability of the sovereign to suit is not at issue.

[25]** **[*290]** The United States Attorney General, shortly after passage of the Robinson-Patman Act, relied on this principle and construed the ***HN7***[] Act as not applying to government purchases. *38 Op. Att'y Gen. 539 (1936)*.

A district court following the Attorney General held the Act inapplicable to government purchases. In *General Shale Products Corp. v. Struck Construction Co., 37 F. Supp. 598 (W.D.Ky.1941)*, Aff'd on other grounds, *132 F.2d 425 (6th Cir. 1942)*, the district court noted that Congress must have been fully aware of the Attorney General's construction of the Act when it debated and enacted the *§ 13c* exemption provisions, yet it chose specifically not to include government purchases in the Act. No less an authority than U.S. Representative Wright Patman, a sponsor of the Act, seems to have acquiesced in the Attorney General's opinion:

> Question : If a manufacturer sells to government, municipal or public institutions at a lower price than he sells to his wholesale customers, is he in violation of the law if he does not make the same price for the same quantity available to the wholesaler to whom he sells?
>
> Opinion : The Attorney General of the United States has **[**26]** ruled that the Act does not apply to the government . . . . It may be presumed that the Attorney General's reasons may also be applied to municipal and public institutions.

W. Patman, The Robinson-Patman Act: What You Can and Cannot Do Under This Law 168 (1939). For a more recent statement by Mr. Patman to the same effect, see, W. Patman, Complete Guide to the Robinson-Patman Act 30 (1963). Similar sentiments are expressed in E. Kintner, A Robinson-Patman Primer 202-03 (1970).

On at least three occasions unsuccessful bills designed to amend the Robinson-Patman Act by bringing government purchases within its coverage have been introduced into the Congress. A bill introduced by Representative Patman in 1951 would have amended the Act by adding a new subsection (g), reading, "That for purposes of this section the term "purchaser' includes the United States, any State or any political subdivision thereof." H.R. 4452, 82d Cong., 1st Sess. (1951). Two bills directly on point in this dispute, introduced by Representative Keogh, would have added the following new paragraph at the end of § 2(a) of the Act:

> For the purposes of this subsection, when any officer or agency of the **[**27]** United States (including those operating on nonappropriated funds) purchases commodities for resale, such officer or agency shall be deemed to be a purchaser of commodities to which this subsection refers, and such purchases shall be deemed to be in commerce.

H.R. 155, 86th Cong., 1st Sess. (1959); H.R. 430, 87th Cong., 1st Sess. (1961). The fact that Congress refused to pass them is persuasive evidence that Congress did not intend the Robinson-Patman Act to cover government purchases and specifically not AAFES purchases.

For example, in the United Mine Workers case, the validity of a federal court injunction against a labor strike depended on whether the Norris-LaGuardia Act covered the labor dispute. If it did, the anti-injunction provisions of that Act would have deprived the court of jurisdiction to issue the injunction. The strike occurred while the federal government had taken over operation of the mines pursuant to a Presidential declaration of national emergency. The Supreme Court recognized that the Norris-LaGuardia Act, with its anti-injunction provision, would apply if the operation of the mines had remained in private hands. But because the Act covered only "employees" and "employers" generally, the Court held that the government was not an "employer" for purposes of the Act, and the Act did not apply.

The United States Supreme Court has applied the presumption in other cases to allow the United States to pursue a common-law collection remedy prohibited by statute to other creditors, *Dollar Savings Bank v. United States, 86 U.S. (19 Wall.) 227, 238-39, 22 L. Ed. 80 (1869)*; to allow the United States to collect a debt that would have been discharged in bankruptcy had it been owed to a private party, *United States v. Herron, 87 U.S. (20 Wall.) 251, 263, 22 L. Ed. 275 (1873)*; to allow the United States to collect a partnership debt against a bankrupt out of the bankrupt's individual estate, even though the United States had not proved its claim in bankruptcy and even though private creditors would have been limited to the partnership estate, *Lewis v. United States, 92 U.S. 618, 622, 23 L. Ed. 513 (1875)*; and to allow the United States to bring a criminal indictment under a statute prohibiting the importation of alien labor, when the statute spoke of enforcement only by forfeiture and penalty, *United States v. Stevenson, 215 U.S. 190, 197, 30 S. Ct. 35, 54 L. Ed. 153 (1909)*.

Any construction of the Robinson-Patman Act must take into account the fundamental difference between this Act and other antitrust statutes. Although classified as an ***antitrust law***, the Robinson-Patman Act often works at cross purposes with other antitrust laws, particularly with the Sherman Act.

The Sherman Act prohibits monopolization and its economic equivalent, concerted activity by ostensible competitors. These **[*291]** practices allow individuals or collusive groups to insulate themselves from market forces and thereby to maximize profits by artificially lowering output and raising prices. E. Gellhorn, ***Antitrust Law*** and Economics in a Nutshell 87-98, **[**28]** 160-67 (1976). The Sherman Act protects competition, the theoretical heart of the free enterprise system. The Robinson-Patman Act, on the other hand, does not embody such a fundamental and generalized ideal to nearly the same extent. Congress passed the Act in 1936 "in response to the problem perceived in the increased market power and coercive practices of chain stores and other big buyers that threatened the existence of small independent retailers." *Great Atlantic & Pacific Tea Co., Inc. v. Federal Trade Comm'n, 440 U.S. 69, 99 S. Ct. 925, 59 L. Ed. 2d 153 (1979)*. See also *Federal Trade Comm. v. Henry Broch & Co., 363 U.S. 166, 80 S. Ct. 1158, 4 L. Ed. 2d 1124 (1960)*. To a great extent, the ***HN8***[] Robinson-Patman Act constitutes special-interest legislation designed to protect small businesses "from the rigors of more efficient, large scale, integrated chains." L. Sullivan, Antitrust 678 (1977). The Act, in many respects, is an antitrust aberration. [4.]

[29]** Courts must be sensitive to the unique nature of the Robinson-Patman Act and attempt to construe it consistently, when possible, with "broader policies of the antitrust laws." *Great Atlantic & Pacific Tea Co., Inc. v. Federal Trade Comm'n, supra*, at n.13. This directive by the Supreme Court is supported by commentators:

> To the extent that Robinson-Patman separates out for attack competitively harmful discrimination, it can be a positive instrument which aids antitrust enforcement; to the extent it may reach competitively neutral discriminations, its impingement on market freedom cannot be justified on antitrust grounds but only on other social grounds, if at all; furthermore, by limiting competitive choices, it begins to impinge on the interests protected by antitrust. To the extent that Robinson-Patman inhibits discriminations which are actually beneficial to competition, it collides with antitrust policy. As we shall see, the vigorous criticism so often lodged against the law is that it is not effectively integrated with antitrust and probably does more harm than good to competition. Moreover, it is often asserted that it does this harm without discernibly advancing any other **[**30]** comparably important social goal.

L. Sullivan, Antitrust 681-82 (1977).

> In practice the Act has proved to be less than satisfactory. It has been applied primarily against those small sellers who were coerced into granting discounts or into competing against larger sellers, on the one hand, and against firms engaging in vigorous competition, on the other. As a consequence the Robinson-Patman Act has been roundly criticized as being anticompetitive and contrary to the general purposes of the antitrust laws. It has been attacked for discouraging price competition and promoting price uniformity. Consequently its significance in antitrust enforcement has faded in recent years.

E. Gellhorn, supra, at 363-64.

Given the essentially anticompetitive nature of the Robinson-Patman Act, it would appear that the broader policies of antitrust are better served by interpreting the Act narrowly rather than broadly. Cf. *Great Atlantic & Pacific Tea Co., Inc. v. Federal Trade Comm'n, supra.*

The Sherman Act and Clayton Act cases plaintiff cites to urge a broad application of the antitrust laws are therefore inapposite here. Congress did not intend the Robinson-Patman Act to apply **[**31]** to government purchases, and a seller who price discriminates in favor of the United States cannot be liable under the Act. The plaintiff cannot employ the Robinson-Patman **[*292]** Act to defeat the United States in its attempts to secure the lowest price possible for goods sold in its military exchanges. Clearly that was not a result intended by the Congress.

---

4. The Act has been applied to terminate vigorous competitive activity, even when that activity was succeeding in breaking the probable monopolistic market share of an "injured" plaintiff. *Utah Pie Co. v. Continental Baking Co., 386 U.S. 685, 87 S. Ct. 1326, 18 L. Ed. 2d 406 (1967)*.

IT IS THEREFORE ORDERED that the motions to dismiss of the defendants, Martin R. Hoffman and John L. McLucas, be, and hereby are, allowed. Counts II and III of the first amended complaint are dismissed with prejudice.

IT IS FURTHER ORDERED that the motion to dismiss (which was denominated motion for summary judgment) of the defendant, J. L. Cummins News Co., Inc., be, and hereby is, allowed. Count I of the first amended complaint is dismissed with prejudice.

Opinion by: LASKER

Opinion

[*1152] Reading Industries, Inc., refines copper scrap and manufactures copper tubing. Defendants Kennecott Copper Corporation, Phelps Dodge Corporation, and The Anaconda Company, are large, vertically integrated firms which mine, mill, smelt, and refine copper. Together they produce about sixty percent of the refined copper used each year by the nation's copper fabricators, who transform refined copper into intermediate products such as copper wire, rod, sheet, and tubing. Each of the producing defendants also owns its own fabricating subsidiaries, some of which are named as defendants.

In this suit for treble damages under section 4 of the Clayton Act, *15 U.S.C. § 15*, Reading charges that between 1964 and 1970 Kennecott, Phelps **[**2]** Dodge, and Anaconda conspired to fix the price of domestically produced refined copper and to monopolize the market for the sale of domestically produced refined copper, in violation of *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*. Amended Complaint PP 40-42; [1] Defendants' Brief, Appendix A (letter of May 14, 1979 from plaintiffs' counsel to the court).

[3]** The defendants move on three grounds for summary judgment dismissing the complaint. First, they assert that the action must be dismissed on its merits because, despite extensive discovery over eight years, Reading has failed to produce any "significant probative evidence tending to support the complaint." *First National Bank v. Cities Service Co., 391 U.S. 253, 290, 88 S. Ct. 1575, 1593, 20 L. Ed. 2d 569 (1968)*. Second, they argue that under the rule of **[*1153]** *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, Reading cannot maintain this action. Finally, they contend that Reading lacks standing to sue under section 4 of the Clayton Act "both because (it) was not a "target' of (the alleged) conspiracy and because its claimed injury is too remote and indirect to sustain standing." (Defendants' Brief at 4.)

I. The Copper Market [2] and the Theory of Reading's Case

[4]** There are two sources of copper virgin ore and scrap. Primary production of domestic copper that is, production of copper from domestically mined ore is dominated by the defendants, who control sixty to seventy percent of domestic mine production and have augmented their mining hegemony by forward integration through the various phases of copper production, developing substantial smelting, refining, and fabricating capacity. Secondary copper production the recovery of copper scrap consists of two elements: recirculation of "new" scrap (defective castings, clippings, punchings, turnings, borings, skimmings, drosses, slags, and other scrap generated in the course of manufacturing copper items) and "old" scrap (obsolete, damaged, or discarded articles such as old pipe, spent cartridge casings, automobile radiators, and lithographic plates). Much new scrap is apparently returned by manufacturers directly to the copper fabricator from which the copper sheet, wire, rod, or tubing used in the manufacturing process was originally purchased, and does not pass through the "scrap market." Old scrap, and

---

[1] This complex antitrust case was initiated in 1971 but pretrial motions and skirmishes delayed in-depth discovery until about 1977. As a result of that discovery, plaintiffs advised that their theory of the case was radically altered. So different was the plaintiffs' present theory from that articulated in the original complaint that the court ordered the plaintiffs to file with it and defense counsel a "Statement of Contentions." That statement is dated August 29, 1977. After its receipt the court ordered the plaintiffs to propose an amended complaint. That document is dated July 9, 1979. By letter of July 18, 1979 defense counsel objected to certain portions of the amended complaint as inadmissible under the Federal Rules of Civil Procedure. The court invited plaintiffs to respond to the defendants' letter, which the plaintiffs did by a voluminous response dated July 31, 1979. Defense counsel answered the response by detailed letter of August 6, 1979.

In a separate ruling of this date, we have sustained the defendants' objections to (1) inclusion in the amended complaint of material expanding the scope of conspiracy to include co-conspirators not named as defendants and (2) inclusion of material relating to alleged fraudulent concealment of the conspiracy. Moreover, we have specified that allegations increasing damages from $ 18,000,000. to $ 61,000,000. must be particularized. The information contained in this note is given as background. Our ruling dismissing the complaint would not be different if the proposed amended complaint were accepted as tendered.

[2] The discussion of the copper market in this section of the opinion is based primarily on the descriptions in the parties' briefs on this motion and on Y. Levy, Copper: Red Metal in Flux 53-54 & passim (1968) (Federal Reserve Bank of San Francisco Monthly Review Supplement), and A. McMahon, Copper, A Materials Survey 253-55, 259-60 & passim (1964) (U.S. Bureau of Mines Information Circular 8225), which were submitted to the court by the defendants, and the opinion of the court in *United States v. Amax, 402 F. Supp. 956 (D.Conn.1975)*, which is cited by the plaintiffs.

whatever new scrap does enter the market, is collected by several hundred scrap dealers **[**5]** or merchants who accumulate it and sell it to smelters and refiners.

During the period 1964 to 1970 there were three significant pricing systems for copper. The first was that employed by the major domestic producers, including Kennecott, Anaconda, and Phelps Dodge (and, until 1966, by many foreign producers), who quoted a non-negotiated price (known in the industry as the "producers' price") which remained in effect until a new price was quoted. Between 1964 and 1970, all the major domestic producers quoted identical prices, and any price change announced by one producer was, for all practical purposes, immediately matched by the others. The second pricing system was the London Metal Exchange (LME). The LME is primarily a hedgers' or speculators' market, seldom used to secure the actual delivery of copper. Its importance lies in the fact that many smaller producers, (and the major foreign producers after they abandoned the producers' price in 1966), based their prices on the LME quotations. The third pricing system was the scrap market, which consisted of several hundred independent dealers whose prices, according to Reading, were "tied to, tracked and established in the open **[**6]** market relative to the LME price." (Amended Complaint P 31.) Reading alleges that the LME and the scrap market were "open markets," which Reading defines as "competitive pricing mechanisms for copper established by buyers and sellers as a function of supply and demand, including, but not limited to, the LME, the New York Commodity Exchange ("COMEX"), and the dealers market for scrap." Id. P 28.

Reading further alleges that "(during) the period 1964-1970, the U.S. producers' price, the LME price and the scrap price were interrelated, and (that) under competitive conditions, the U.S. producers' price should have approximated the LME price." Id. P 32. In fact, however, between 1964 and 1970 the producers' price was well below the LME price: during this period, refined copper sold by Kennecott, Phelps **[*1154]** Dodge, and Anaconda (at the producers' price) was considerably cheaper than refined copper available from other sources, including independent refiners and scrap dealers. Reading alleges that this was so only because the defendants conspired to keep the producers' price low, and that in furtherance of this conspiracy they chose to ration their available copper among favored **[**7]** customers rather than raise their prices to clear the market. The defendants acknowledge that each of them could have charged higher prices without losing sales in the short run, and that each of them did ration supplies among its customers, but they argue that each acted independently in refraining from raising its prices, in order to protect long term sales. In short, they argue that their conduct, though parallel, was non-collusive. If this is so, they are not accountable under the law for the effects of their actions, no matter how adverse to others. If, on the other hand, as Reading charges, the defendants' pricing behavior reflected a "contract, combination, or conspiracy" to restrain trade, or monopolize a market by fixing prices, they violated the Sherman Act. See *Albrecht v. Herald Co., 390 U.S. 145, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)*; *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 71 S. Ct. 259, 95 L. Ed. 219 (1951)*; *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*; L. Sullivan, ***Antitrust Law*** 210-13 (1977).

To prevail in this suit, however, Reading must establish not only that the defendants violated **[**8]** the antitrust laws, but also that Reading was injured "by reason of" their violation. *15 U.S.C. § 15*. Reading does not contend that as a consequence of the defendants' pricing behavior it was injured in its capacity as a copper refiner. Rather, it alleges that it was injured as a purchaser of copper for its fabricating operations. Reading did not purchase copper from the defendants, nor could it allege injury if it had, since the gravamen of its complaint is the claim that the defendants sold copper at artificially low prices. Reading purchased copper primarily from scrap dealers, and the basis for its claim of injury is that because the defendants held down the price for their refined copper, which constituted about sixty percent of the refined copper available in the domestic market, the price for the other forty percent of the available copper, including the price for the copper scrap which Reading purchased, rose to artificially high levels. That is, Reading contends that it was injured because, as a direct result of the alleged conspiracy by the defendants to maintain a low producers' price for copper, it was forced to pay more for the copper scrap it purchased from scrap **[**9]** dealers than it would have had to pay in the absence of the conspiracy.

Despite Reading's voluminous submissions on this motion, it is not entirely clear what Reading considers to be the underlying economic mechanism responsible for the alleged effect of a low producers' price on "open market" copper prices. [3] The Report **[*1155]** of Plaintiff's Economic Expert, submitted as an addendum to Reading's brief in opposition to the present motion, states that:

[10]**

> "The defendants' maintenance of an artificially low price for refined copper had three important consequences for the copper markets: (a) the defendants rationed the supplies of domestic copper that were "available' at the producer price; (b) some semifabricators, who historically had derived a large percentage of their copper from the defendants, experienced a serious shortage; and (c) the demand for copper that could not be satisfied by the defendants spilled over into other markets, causing the prices to rise in those markets." [4]

The critical predicate of Reading's economic argument appears to be the fact, accepted by the defendants (at least for the purposes of this motion), that in order to maintain the low producers' price in the face of excess demand for copper at that price, the defendants rationed their supplies of copper. [5] **[**12]** As a consequence, fabricators who did purchase refined copper from the defendants at the producers' price were not able to **[**11]** purchase as much copper as they might have wished. Reading's argument appears to be that when these fabricators turned to alternate domestic sources, such as the scrap market, to purchase the complement of their needs, they were willing and able to bid up the price of copper available from those alternate sources precisely because they had secured a portion of their requirements at the low producers' price. [6] In short, Reading argues that these fabricators were able to pay, and did in fact pay, a premium price for the copper they purchased from alternate sources, such as scrap dealers, because they had realized savings on their purchases of relatively cheap copper from the defendants, that

---

[3] In P 44 of the Amended Complaint, Reading alleges:

"44. The aforesaid combinations and conspiracies in violation of *Sections 1* and *2* of the Sherman Act had the following effects among others:

"a. Created a gap between the U.S. producers' price and the price of copper traded on open markets in which the U.S. producers' price was for the period 1964-70 significantly lower than the price of copper prevailing on the open markets during the same period;

"b. Caused dislocations in the normal supply and demand relationships in the copper market and corresponding hardships for domestic fabricators, including Reading, and resulted in distortions in the domestic copper market;

"c. Resulted in an artificially low U.S. producers' price which in turn caused the price for copper prevailing on open markets, including the dealer market for scrap, to reach artificially high premium levels. This would not have occurred but for the artificially maintained, low U.S. producers' price;

"d. Created an artificial demand for, and shortage of, U.S. producers' price copper and forced domestic fabricators, such as Reading, to purchase their requirements of copper at the artificially high open market prices;

"e. Created a substantial disparity in the raw material costs of copper for domestic fabricators by allocating lower U.S. producers' price copper to preferred and selected customers of the Defendants while forcing the remainder of the domestic fabricators, such as Reading, to purchase their copper requirements at the artificially higher open market prices; and

"f. Had the direct effect of limiting competition by smaller U.S. mine producers by restricting the amount of copper that would have been available but for the artificially low U.S. producers' price."

[4] Addendum to Plaintiffs' Brief in Opposition to Defendants' Motion for Summary Judgment, Report of Plaintiffs' Economic Expert at 94.

[5] In P 43 of the Amended Complaint, Reading alleges that

"(in) formulating and effectuating (the alleged conspiracy), Defendants . . .

(i) Allocated the available output of refined copper production to preferred customers;

. . . ."

[6] See Plaintiffs' Brief in Opposition to Defendants' Motion for Summary Judgment at 393 ("(Certain) United States fabricators, having substantial allocations of lower U.S. producers' priced copper, could afford to and did "bid-up' the price on the open markets.").

as a consequence the price for scrap copper rose to a higher level than it would have had the defendants not held the producers' price low, and that Reading was injured as a result to the defendants' allegedly illegal action.

Although the defendants do not agree with Reading's assertion that "open market" prices for copper, including the price for copper scrap, rose to higher levels than they otherwise would have had the defendants not held their prices for refined copper low, they do not dispute it on this motion. Rather, they take the position that even if Reading's analysis is correct, they are entitled to summary judgment dismissing the complaint. We have discussed Reading's thesis only because any consideration of the second and third branches of the defendants' motion for summary judgment requires an understanding of the purported causal link between the alleged antitrust violation and Reading's alleged injury. For the purposes of this motion, then, we assume that (whatever Reading's precise economic argument may be) Reading and the other firms **[**13]** that did not have access to the defendants' copper did pay more for copper than they would have had the defendants not held their prices at levels which failed to clear the market.

II. Evidence of Combination or Conspiracy

Acceptance of Reading's assumption, however, does not end the matter. To prevail **[*1156]** in this action Reading must prove not only that it was injured because the defendants held the producers' price at an artificially low level, but also that in doing so the defendants violated the antitrust laws. Reading's theory of causation purports to explain only how the market translated a low producers' price into a high scrap price it says nothing as to how the low producers' price came about in the first place. Only if the defendants acted collusively are they liable under the Clayton and Sherman Acts. They argue that they are entitled to summary judgment dismissing the action on the merits because there is no evidence suggesting that they acted in concert or otherwise violated the antitrust laws in connection with their pricing decisions.

It is a legal commonplace that ***HN1***[] "summary procedures should be used sparingly in complex antitrust litigation where motive **[**14]** and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot." *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 491, 7 L. Ed. 2d 458 (1962)* (footnote omitted). This is the paradigm of cases to which the Supreme Court's admonition is addressed. The historical facts here are not in dispute: the defendants do not deny that they quoted identical prices for refined copper, and resisted "market pressures" to raise their prices. The key, indeed the sole, issue, is whether in doing so they acted jointly or independently. Thus, proof that the defendants violated the antitrust laws will not turn on what happened, but rather on why it happened. Nonetheless, the defendants contend that this is a case in which summary judgment dismissing antitrust claims on the merits is warranted.

The rule is that ***HN2***[] if the party moving for summary judgment shows conclusively that the factual allegations of the complaint are not susceptible of any interpretation suggesting that the defendants violated the antitrust laws, the opposing party may not rely on those allegations, but must produce "significant probative **[**15]** evidence tending to support the complaint" if it is to avoid summary dismissal of the action. *First National Bank v. Cities Service Co., 391 U.S. 253, 289-90, 88 S. Ct. 1575, 1593, 20 L. Ed. 2d 569 (1968)*; *United States v. Pent-R-Books, 538 F.2d 519, 529 (2d Cir. 1976)*; *Modern Home Institute, Inc. v. Hartford Accident & Indemnity Co., 513 F.2d 102, 110-11 (2d Cir. 1975)*; *Weit v. Continental Illinois National Bank and Trust Co., 467 F. Supp. 197, 208 (N.D.Ill.1978)*. The defendants argue that application of this rule requires summary dismissal of this action. However, their argument does not carry the day. Summary judgment is not appropriate here because the defendants have not shown that Reading's factual allegations will not support an inference that the defendants violated *sections 1* and *2* of the Sherman Act. Moreover, as indicated below, Reading has come forward with evidence which does tend to support its contention that the defendants violated the antitrust laws, evidence which would suffice to defeat this branch of the defendants' motion even if the defendants had met their initial burden.

The defendants have concentrated their efforts on demonstrating that each of them had **[**16]** legitimate reasons to hold down the price of copper. While this may be so, the question is not whether the defendants had legitimate reasons for their action, but whether they acted in concert, and here the legitimate business reasons which the defendants suggest motivated their actions do not defeat the possibility that the defendants acted collusively. The defendants have submitted extensive evidence that during the period in question 1964-1970 each of them was concerned that high copper prices would lead their customers to substitute other materials (such as aluminum or plastic) for copper; each was under government pressure (in the form of jawboning) to keep prices down to curb the inflation spawned by the Vietnam war, and each was subject to leverage from large customers who frowned on price increases. This showing, however, does not exclude possible inferences of combination or conspiracy; it simply suggests alternate incentives **[*1157]** to conspire. That each of the defendants had independent motives for holding the price of copper down does not negate the possibility that they acted together to effect them. Despite the volume and quality of the defendants' submissions **[**17]** on this point, they have failed to demonstrate that the undisputed facts are not susceptible to the interpretation that they violated the Sherman Act.

Because of their failure to do so, Reading was under no compulsion to come forward on this motion with evidence in support of its claims. Nonetheless, Reading has identified a number of factors which dictate that summary dismissal of its complaint would be inappropriate even if the defendants had made the conclusive showing required by First National Bank v. Cities Service Co. In particular, Reading points to the undisputed structural characteristics of the copper market and the defendant firms, and argues that inferences of combination and conspiracy sufficient to defeat the defendants' motion for summary judgment can be drawn from these alone. In a highly concentrated, vertically integrated, interdependent industry protected from outside encroachment by enormous startup costs and limited supplies of the basic commodity (copper ore), opportunities for collusion are extensive and the potential benefits to be realized great. When there is in addition evidence, as there is here, of consciously parallel conduct, as well as evidence **[**18]** of common motives for such conduct, strong inferences of collusion are permissible. [7] At trial the jury might or might not find such inferences compelling, but on this motion for summary judgment, Reading is entitled to the benefit of those inferences. [8]

[19]**

In sum, even the defendants' view of the facts does not undercut Reading's allegations of conspiracy, and in addition Reading has adduced evidence "tending to support" them. Accordingly, this branch of the defendants' motion for summary judgment must be denied.

III. The Rule of Illinois Brick Co. v. Illinois.

As an alternate ground, the defendants urge that Reading's suit must be dismissed under the rule of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. In addressing the defendants' argument on this point, it is important to distinguish between the Supreme Court's holding in Illinois Brick and the rationale which the Court expressed for its holding. The holding of Illinois Brick was that, with a few exceptions, ***HN3***[] an indirect purchaser cannot maintain an action against a price-fixer to recover overcharges passed on to the indirect purchaser as the price-fixer's product moved through the chain of distribution. To state this holding is to demonstrate that it has no application to the facts of this case, which does not involve overcharges, indirect purchasers, or a vertical chain of distribution linking plaintiff and defendant. To apply the **[**20]** rule of Illinois Brick to the circumstances of this case would be to transmute the decision beyond recognition.

However, although the Rule of Illinois Brick has no application to this case, the Rationale for the rule has direct relevance.

---

[7] See *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*; *American Tobacco Co. v. United States, 328 U.S. 781, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*; *Interstate Circuit, Inc. v. United States, 306 U.S. 208, 59 S. Ct. 467, 83 L. Ed. 610 (1939)*; R. Posner, ***Antitrust Law***: An Economic Perspective (1976); L. Sullivan, ***Antitrust Law*** 354-64 (1977); Turner, Definition of Agreement Under the Sherman Act: Conscious Parallelism and Refusals to Deal, 75 Harv.L.Rev. 655 (1962); First, Book Review, 52 N.Y.U.L.Rev. 947 (1977).

[8] "(All) of the evidence . . . does not point in one direction and different inferences might reasonably be drawn from it . . . (It) is the jury which "weighs the contradictory evidence and inferences' and draws "the ultimate conclusion as to the facts.' " *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 700-01, 82 S. Ct. 1404, 1411, 8 L. Ed. 2d 777 (1962)* (quoting *Tennant v. Peoria & P. U. Ry. Co., 321 U.S. 29, 35, 64 S. Ct. 409, 88 L. Ed. 520 (1944))*.

There were two grounds for the Supreme Court's decision articulated in Illinois Brick. **[*1158]** The first was the need to foreclose the possibilities of multiple recovery against defendants that might ensue were indirect purchasers permitted to sue on a "pass on" theory. In *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, the Court had held that an alleged price-fixer could not interpose as a defense to a treble damages action brought by a direct purchaser the claim that the plaintiff had suffered no injury because it had passed on to its own customers any illegal overcharges it paid. If the rule of Hanover Shoe were to continue unchanged, and indirect purchasers were nonetheless allowed to sue on a pass on theory, defendants would find themselves liable to direct purchasers for the entire amount of any overcharge paid by that purchaser, and also liable to indirect purchasers for that **[**21]** portion of the overcharge that was passed on to them. To avoid such multiple liability, the Court chose to bar suits by indirect purchasers rather than modify or overrule its earlier holding in Hanover Shoe.

In determining whether or not to modify its earlier holding, the Court reexamined the grounds for the Hanover Shoe decision, and concluded that the "principle basis for the decision in Hanover Shoe," the

> "perception that the attempt to trace the complex economic adjustments to a change in the cost of a particular factor of production would greatly complicate and reduce the effectiveness of already protracted treble-damage proceedings"

applied with equal force in the circumstances of Illinois Brick, since it is no easier for a plaintiff to demonstrate how costs filter through a chain of distribution than it is for a defendant. *431 U.S. at 731-32, 97 S. Ct. 2061 at 2068, 52 L. Ed. 2d 707*. This was the second, and more crucial, ground for the Court's decision in Illinois Brick.

The perception that efforts to analyze and explicate the vagaries of the market-place must necessarily create enormous difficulties in the trial and decision of antitrust suits is markedly relevant **[**22]** here, where the core of Reading's case the link between the alleged antitrust violation and the injury Reading claims it suffered because of that violation is an economic theory about the reverbations in one part of the copper market caused by a constraint in another part of that market. Trial of this case would surely involve "the uncertainties and difficulties in analyzing price and out-put decisions "in the real economic world rather than an economist's hypothetical model' and . . . the costs to the judicial system and the efficient enforcement of the antitrust laws of attempting to reconstruct those decisions in the courtroom," *431 U.S. at 731-32, 97 S. Ct. at 2068* (footnote and citation omitted) (quoting *Hanover Shoe, 392 U.S. at 493, 88 S. Ct. 2224, 20 L. Ed. 2d 1231*), which it was the Supreme Court's central concern to minimize in Illinois Brick. While this alone is not enough to warrant extension of the narrow holding of Illinois Brick to circumstances radically different from those to which it was addressed, it does counsel special sensitivity to the difficulties and dangers inherent in attempts to trace the causal link between economically remote antitrust violations **[**23]** and injuries. Such sensitivity is crucial to an adequate consideration of the final branch of the defendants' motion, which raises the question whether Reading has standing to sue for treble damages under section 4 of the Clayton Act. See *Mid-West Paper Products Co. v. Continental Group, Inc., 596 F.2d 573, 582-87 (3d Cir. 1979)*.

IV. Standing

Section 4 of the Clayton Act provides that "(any) person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws" may sue to recover "threefold the damages by him sustained." *15 U.S.C. § 15*. As the Supreme Court has noted, however, the federal "courts have been virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Hawaii v. Standard Oil Co., 405 U.S. 251, 263 n. 4, 92 S. Ct. 885, 881 n. 14, 31 L. Ed. 2d 184 (1972)*. The decision in Illinois Brick, **[*1159]** for example, is one instance in which the Supreme Court has recognized limits to the right to sue for damages based on injuries sustained, at least in part, because of a violation of the antitrust laws. **[**24]** More generally, the lower federal courts have acknowledged such limits in formulating rules limiting plaintiffs' standing to sue for treble damages under section 4.

The reasons for these rules have been thoroughly canvassed. See, e.g., *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292, 1295 (2d Cir. 1971)* Cert. denied, *406 U.S. 930, 92 S. Ct. 1776, 32 L.*

Ed. 2d 132 (1972); Berger & Bernstein, An Analytical Framework for Antitrust Standing, 86 Yale L.J. 809, 845-58 & passim (1977). By limiting the availability of the treble damage remedy, the courts seek to limit the potential for multiple recoveries, to avoid disproportionate damage awards that threaten to debilitate or ruin defendants (with possible anticompetitive effects), to curb In terrorem suits that encumber the judicial infrastructure, and to minimize the difficulties and speculation encountered at trial in the proof of injury and calculation of damages. In general, the courts have restricted standing to those whose injury is, to a greater or lesser degree, a "direct" consequence of the alleged antitrust violation. The difficulty in each case, of course, lies in discriminating with precision **[**25]** between "direct" and "indirect" injury.

The rule in the Second Circuit is that ***HN4***[] "a plaintiff must allege a causative link to his injury which is "direct' rather than "incidental' or which indicates that his business or property was in the "target area' of the defendant's illegal act." *Billy Baxter, Inc. v. Coca-Cola Co., 431 F.2d 183, 187 (2d Cir. 1970)* Cert. denied, *401 U.S. 923, 91 S. Ct. 877, 27 L. Ed. 2d 826 (1971)*. Though the Second Circuit has sought to elucidate this standard in a number of cases, the line delimiting the "target area" of an antitrust violation has not yet been definitively drawn, and indeed may not be capable of precise definition. [9]

In Billy Baxter, the plaintiff, who franchised independent bottlers of a line of soft drinks, charged various manufacturers of competing soft drinks with violating the **[**26]** antitrust laws in an effort to drive the plaintiff's franchisees out of business. The plaintiff alleged that as a consequence its franchisees' profits had been reduced, and its own revenues had suffered accordingly. The court concluded that the franchisor did not have standing to sue because it was "one step removed from the link in the production-distribution chain receiving the first impact of the alleged misconduct." *Id. at 188*.

In a subsequent case, *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292 (2d Cir. 1971)* Cert. denied, *406 U.S. 930, 92 S. Ct. 1776, 32 L. Ed. 2d 132 (1972)* the rule was extended. There the plaintiff rented theatres to the defendant, a motion picture exhibitor. The complaint charged the plaintiff's tenant with conspiring with others to restrain the trade of competing motion picture distributors and exhibitors, and asserted that in furtherance of the conspiracy the tenant exhibited less profitable films in the theatres it rented from the plaintiff than it otherwise would have. This indisputably injured the plaintiff because the rent paid was based in part on the tenant's gross receipts. Nonetheless, the court held that **[**27]** the landlord did not have standing:

> "(T)his court has committed itself to the principle that ***HN5***[] in order to have "standing' to sue for treble damages under § 4 of the Clayton Act, a person must be within the "target area' of the alleged antitrust conspiracy, i. e., a person against whom the conspiracy was aimed, such as a competitor of the persons sued. Accordingly we have drawn a line excluding those who have suffered economic damage by virtue of their relationships with "targets' or with participants in an alleged antitrust conspiracy, rather than by being "targets' themselves."

[*1160] *Id. at 1295*. The court noted that a "line which limits standing to those against whom the antitrust violation is directed . . . establishes a reasonable and easily identifiable cut-off that avoids the unfortunate consequences of opening the floodgate to all, no matter how remote their interest or incidental their relationship," *Id. at 1296* (footnote omitted). Subsequent cases, however, and the present one, demonstrate that the "cut-off" is not always so "easily identifiable" as might be wished.

In *Long Island Lighting Co. v. Standard Oil Company of California, 521 F.2d 1269 (2d **[**28]** Cir. 1975)*, Cert. denied, *423 U.S. 1073, 96 S. Ct. 855, 47 L. Ed. 2d 83 (1976)* (LILCO), Judge Gibbons (siting by designation) noted that "the line between plaintiffs with standing and those who lack it may not in every case seem perfectly plain." *Id. at 1274*. In LILCO, the plaintiffs were two public utilities who sued three oil companies, charging that the oil companies had organized a joint boycott of Libyan oil in an effort to dissuade the Libyan government from nationalizing their oil concessions. Pursuant to the boycott, the oil companies refused to honor contracts requiring

[9] For a recent discussion of the Second Circuit's antitrust standing decisions, see *Laurie Visual Etudes, Inc. v. Chesebrough-Pond's Inc., 473 F. Supp. 951 (S.D.N.Y.1979)* (Weinfeld, J.).

them to deliver Libyan crude oil to the independent refiner who was the plaintiffs' chief source of low sulphur heating oil. The refiner was forced to negotiate new supply contracts directly with the Libyan government, on terms less favorable than its contracts with the defendant oil companies. In addition, the oil companies refused to ship Libyan oil, and as a result the refiner incurred increased transportation costs. The refiner's increased costs were passed on to the plaintiff utilities. It is clear that the utilities' costs were increased sharply as a result of the allegedly illegal boycott of Libyan **[**29]** oil. Judge Gibbons noted that "(it) was foreseeable, certainly, that in the short run this boycott would have some effect, possibly adverse, on the business or property" of the plaintiffs, but concluded that nevertheless they lacked standing to sue in the circumstances.

> "(The utilities) were not the objects of the alleged antitrust violation. Their injuries were the result of their relationship to (the refiner), an intermediate non-target. The cases recognize that suppliers, stockholders, employees, landlords, franchisors, licensors, and consumers are too remote for Clayton Act standing. The instant plaintiffs, customers of a non-target, are at least equally remote."

Id. at 1274 (footnotes omitted).

From the opinions in these cases two factors emerge as tests for the standing of antitrust plaintiffs: First, the plaintiff's status, and second, the plaintiff's proximity or remoteness from the center of the alleged conspiracy. Thus, as to status, in each case the plaintiff which was held to lack standing suffered injury which was "derivative", that is, one suffered not because of the plaintiff's role in the market but because of its status as a "creditor, stockholder, **[**30]** employee, subcontractor, or supplier of goods and services," *Calderone, 454 F.2d at 1295*, or something of the like (franchisor in Billy Baxter, landlord in Calderone, and customer in LILCO). As to proximity or remoteness, the injury of the plaintiff in the cited cases was found to be several steps removed from the immediate impact of the alleged violation.

While each of the cases touches on both of the factors mentioned, none of the opinions suggests that one or the other of the factors is a Sine qua non to the determination that a plaintiff lacks standing. We conclude that the rule of the cases is that a plaintiff lacks standing to sue if he either fails the "status" test or the "proximity-remoteness" test. That is to say, the cases teach that if the plaintiff's status is "derivative" within the meaning of the doctrine Or the plaintiff's position is remote from the center of the alleged conspiracy, the plaintiff lacks standing to sue. The question then is whether Reading passes both tests. We agree that since Reading's alleged injuries, no matter how remote, were suffered "in the market" as a consequence of market interactions and economic adjustments to the defendants' behavior, **[**31]** Reading may well have standing on the basis of the "status" test. Nevertheless, we conclude that whatever Reading's standing under the "status" **[*1161]** test, it does not have standing as defined by the "proximity-remoteness" test. In our view, Reading's claim that its injury was caused by the defendants holding down prices, which in turn is claimed to have raised prices on the LME and in the scrap market, which in turn required Reading to pay prices higher than it otherwise would have is too remote to fall within the "target area" as described by the Second Circuit cases. The causal chain at issue here is at least as involved and tenuous as those in Billy Baxter, Calderone, and LILCO where the plaintiffs were found to lack standing. Accordingly, we conclude that like those plaintiffs, Reading lacks standing to sue.

As was true in another recent case in which antitrust plaintiffs were found to lack standing, our conclusion is strengthened by the Supreme Court's decision in Illinois Brick. See *Mid-West Paper Products Co. v. Continental Group, Inc., 596 F.2d 573 (3d Cir. 1979)*. As noted earlier, the Court expressed in Illinois Brick its concern about the difficulties inherent **[**32]** in any attempt to prove the impact of a defendant's activities by tracing the economic adjustments and market interactions caused by those activities, and the danger of duplicative or ruinous recovery that often accompanies such attempts. Both are endemic here. Trial of this action would clearly be complicated by the necessity of pursuing "complex and conjectural economic lines of causation and effect," *Id. at 583*, and the potential for duplicative and ruinous recovery against the defendants is enormous, since if Reading has standing to sue, every other individual or firm who purchased copper during the period 1964-1970 at prices artificially elevated as a consequence of the alleged price-fixing conspiracy must have standing as well. In these circumstances, a decision that Reading has standing to sue could not be lightly taken.

The subject at hand is acknowledgedly complex and the arguments in support of Reading's position are respectable. Nevertheless, we conclude that the thrust of the Second Circuit cases, supplemented by the momentum of Illinois Brick, dictates the conclusion that Reading lacks standing to sue. The complaint is dismissed.

It is so ordered.

Opinion by: [*1] HAIGHT

Opinion

MEMORANDUM OPINION AND ORDER

HAIGHT, District Judge:

This case is presently before the Court on plaintiffs' motion, pursuant to *Rule 15, F.R.Civ.P.*, to further amend their complaint. Familiarity with the Court's prior opinions is assumed for the sake of this discussion. The most pertinent prior opinions are those of March 21, 1979 and June 29, 1979.

The opinion and order of June 29, 1979 considered the motion of defendants Thomson-CSF, Inc., Thomson-CSF, Paris, and Michel M. Boxberger for summary judgment dismissing the first amended complaint as to them. The opinion granted that motion, but stayed entry of judgment for thirty days, in order to permit plaintiffs to serve and file a motion to amend the complaint against those defendants, in an effort to cure jurisdictional frailities which were discussed in the June 29 opinion, and are not reiterated herein.

Plaintiffs have responded with a motion to amend their complaint as to all defendants. That motion is resisted by counsel for all defendants over whom service has been obtained, and who are still in the litigation.

The amended complaint sets forth five causes of action. The first three causes of action **[*2]** all sound in tort. They allege various theories of conspiracy, fraud, and tortious interference with plaintiffs' licensing agreements, which lie at the heart of the litigation. In the fourth cause of action, the plaintiffs charge the defendants for the first time, in litigation commenced in 1972, with violations of the United States antitrust laws. The fifth cause of action recites irreparable injury arising out of the transgressions referred to in the first four causes of action, and prays for injunctive relief.

If the proposed amended complaint consisted only of the first, second, third and fifth causes of action, it would require no discussion to demonstrate that the amendment could not be allowed.That is because, as pointed out in prior opinions, plaintiffs are New York residents, and defendants Thomson-CSF, Inc. and Boxberger were at the time of commencement of suit New York residents. In consequence, complete diversity of citizenship is not present, and the Court would lack jurisdiction.

Plaintiffs seek to overcome this obstacle by pleading, in the forth cause of action of the proposed amended complaint, a claim against all defendants based upon the antitrust laws. **[*3]** If that claims is viable, then it would establish federal jurisdiction, and this Court could entertain the other claims on principles of pendent jurisdiction.

Defendant resist the proposed amended complaint on the grounds of legal insufficiency and untimeliness. In deciding whether to grant the motion to *amend, I* must consider both these questions. ***HN1***[] The legal insufficiency of a proposed amendment is a ground for denying leave to amend. *Chapman v. Sheridan-Wyoming Coal Co., 338 U.S. 621 (1950)*; 3 Moore's Federal Practice P15.08[4], at pp. 15-105-109 (2d ed. 1978). The question of timeliness of the amendment, in view of the bar of an applicable statute of limitations, gives rise to consideration of the "relation back" provisions of *Rule 15(c)*. These questions will be considered in turn.

1. Legal Sufficiency of the Antitrust Claim.

The fourth cause of action comprises PP57-68 of the proposed amended complaint. Plaintiffs' litigation posture is that they were given an exclusive "applications" license for North America in respect of the "Secam" television process. In their proposed amended complaint, plaintiffs allege that the patents, licenses and applications of that **[*4]** process "significantly affect interstate commerce." P58. Defendants, "all or some of them," are alleged to possess a monopoly power with respect to the utilization throughout the world of the patents, licenses and applications relating to the "Secam" process. P59. Plaintiffs allege that when they obtained their exclusive applications license, "said monopoly power became threatened." P.60. Defendants are alleged to have combined and conspired, in violation of the antitrust laws, to protect that monopoly power, and to exclude plaintiffs from actual or potential competition in the North American market. Their unlawful interference and unlawful boycotts in respect of plaintiffs' license are alleged. PP61-63. Plaintiffs further allege that the defendants agreed that defendant Compagnie Francaise de Television ("CFT") would be the sole and exclusive holder of a patent relating to the "Secam 60" process despite the alleged fact that defendants Telegen, Inc. and Graduate Education Network, Inc. ("GEN") had developed that process "and therefore had a prior right to apply for any such patent." P64. Finally, plaintiffs allege that even if the defendants held valid patents with respect **[*5]** to the "Secam" and "Secam 60" process, the transactions alleged in the complaint constituted misuse of valid patents, in that the defendants conspired with one another to monopolize trade with respect to the patented processes, suppressing competition therein, and establishing and maintaining a monopoly. PP65-67. Plaintiffs claim treble damages. P68.

Counsel for defendants CFT and Joseph Roizen characterize plaintiffs' antitrust theory as specious, relying upon the observation of the Supreme Court in *Precision Instrument Manufacturing Co. v. Automotive Maintenance Machinery Co., 324 U.S. 806, 816 (1945)*, that ***HN2***[] "a patent is an exception to the general rule against monopolies and to the right to access to a free and open market." See also *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172 (1965)*.

It is not sufficient, however, to state that antitrust considerations cannot arise in the face of a valid patent held by one or more defendant. Patent and ***antitrust law*** interact with each other. A leading commentator, who then goes on to discuss the subject over seventy-three pages, commences his analysis with this observation:

"The details of the operative **[*6]** patent system in this nation are determined in part by the particulars of the patent statute and in part by the ways in which antitrust doctrine and patent law are integrated." Sullivan, Handbook of the Law of Antitrust (1977) at § 176, p. 504.

District Judge Newman (as he then was) gives an illuminating discussion in *SCM Corp. v. Xerox Corp., 463 F.Supp. 983, 997-8 (D.Conn. 1978)*, remanded on other grounds, *599 F.2d 32 (2d Cir. 1979)*:

"The cases upholding antitrust violations by holders of valid patents, despite the insulation of the patent laws, have generally done so upon a finding that the patent holder misused the patent to extend his monopoly beyond the statutory grant, e.g., Mercoid Corp. v. Mid-Continent Investment Co., supra (requiring purchase of unpatented product to obtain patented product), or that the patent holder abandoned his freedom to decide unilaterally whether or not to permit use of his patented invention and instead agreed with others not to permit licensing at all or do so only on restricted terms, e.g., *Zenith Radio Corp. v. Hazeltine Research, Inc., supra* (concerted refusal to license except on restricted terms). While normally not characterized as **[*7]** such, the concerted refusal to license cases may themselves be viewed as prohibitions against extention of the statutory patent monopoly: the patent laws give the patent owner the power to exclude, but once he makes an agreement with others not to license the patent, the patent monopoly has in a sense been extended because the power to exclude has now been given to those who derived no power from the patent itself."

Analysis of the plaintiffs' amended complaint, particularly when viewed in the light of facts established by prior proceedings in the case, makes it clear that plaintiffs do not allege a viable claim under the antitrust laws. While it is true that plaintiffs allege concerted action on the part of the defendants, it is not the sort of concerted refusal to license with which the cases are concerned. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100 (1968)*, referred to by Judge Newman in SCM Corp., involved a showing that "competing business concerns and patentees joined together to pool their Canadian patents, granting only package licenses and refusing to license imported goods." *395 U.S. at 118*. The purpose of these business competitors was to exclude concerns **[*8]** from the Canadian market unless they were willing to manufacture there. Such concerted action, the Supreme Court held, implicated the antitrust laws. Nothing resembling concerted action of that nature is alleged in the case at bar. Plaintiffs allege that the defendant CFT was the proprietary patent holder for the "Secam" and "Secam 60" processes. That has always been plaintiffs' allegation. The other defendants held various licenses from CFT. None of the other defendants may be characterized as a competitor of CFT. As I view the authorities, that is an essential element of an antitrust theory, and it is absent here. Nor do plaintiffs allege an agreement between the patent holder and others, even if competitors, not to license the patent. Plaintiffs' complaint, in essence, is that they were granted an exclusive applications license, and that defendants then combined to deny plaintiffs the fruits of that license. Plaintiffs have alleged a combination, but not that sort of combination prohibited by the antitrust laws. Plaintiffs' proposed fourth cause of action is, in essence, their tort theory dressed up in antitrust clothing for jurisdictional purposes. Plaintiffs have failed **[*9]** to submit a memorandum of authorities, calling the Court's attention to cases which might point to a different conclusion. The antitrust claim is insufficient in law, and I deny leave to amend the complaint for the purpose of asserting it.

2. Timeliness of the Proposed Amendment.

Assuming contrary to the foregoing conclusion that the amended complaint states a legally sufficient claim under the antitrust laws, the question of the claim's timeliness arises. An defendants point out, the claim is barred by the four-year statute of limitations governing federal antitrust claims. *15 U.S.C. § 15(b)*. It is of course true that *Rule 15(c)* provides that "the amendment relates back to the date of the original pleading." Thus, if plaintiffs could properly invoke *Rule 15*, the statute of limitations would be overcome. But ***HN3***[] the right to invoke *Rule 15* may itself be lost if the moving party has been quilty of undue delay, resulting in undue prejudice to the opposing party. *Foman v. Davis, 371 U.S. 178, 182 (1962)*. In the case at bar, plaintiffs have never once asserted in their pleadings an antitrust theory. Almost all of the discovery in the case has been completed, with no regard **[*10]** having been given to antitrust theories of liability. Even where an individual plaintiff has appeared entirely pro se, with a consequent liberal construction of his pleadings, there is authority for the denial of a motion to amend the complaint so as to assert an antitrust claim after the state of limitations has run. *Material Handling Industries, Inc. v. Eaton Corp., 391 F.Supp. 977, 980-981 (E.D.Va. 1975)*. In the case at bar, plaintiffs have for most of the litigation been represented by counsel. I am not persuaded by plaintiffs' contention that only recently discovered facts made them aware of a potential antitrust claim. Accordingly, even if plaintiffs alleged a viable antitrust theory, I would not permit them, by resort to *Rule 15(c)*, to deprive defendants of the defense of the statute of limitations.

CONCLUSION

For the foregoing reasons, the plaintiffs' motion to amend their complaint is denied.

In consequence, summary judgment will be entered in favor of defendants Thomson-CSF, Inc. and Boxberger. While the Court's opinion of June 29, 1979 purported to embrace defendant Thomson-CSF Paris as well, plaintiffs' counsel correctly point out that the Court's opinion of **[*11]** March 21, 1979 (at p. 12) held the motion for summary judgment on behalf of that defendant in abeyance until the deposition of M. Dubial had been accomplished. That deposition has not taken place, and so no determination is made at this time of the summary judgment motion made on behalf of that defendant. Since Thomson-CSF (Paris) is a foreign corporation, the diversity of citizenship problems presented by the other two defendants under discussion do not arise.

Finally, I have decided to certify the judgment dismissing the complaint, as against Thomson-CSF (New York) and Boxberger, as a final judgment under *Rule 54(b)*. This will make possible an appeal, at this time, of the Court's ruling that plaintiffs do not state a viable claim under the antitrust laws. In exercising my discretion to issue a *Rule 54(b)* certification, I may consider "the relationship of the adjudicated claims to the unadjudicated claims," *Cold Metal Process Co. v. United Engineering and Foundary Co., 351 U.S. 445, 452 (1956)*. On plaintiffs' theory, defendants are liable to them on an antitrust basis which exists separately and apart from the other theories of recovery. While as stated ante I do not accept **[*12]** plaintiffs' antitrust theory, it is in my judgment appropriate that plaintiffs' right to invoke the antitrust laws in this case be made the subject of a certification under the Rule.

Accordingly, the Court having determined that there is no just reason for delay, the Clerk of the Court is hereby directed, pursuant to *Rule 54(b), F.R.Civ.P.*, to enter judgment in favor of defendants Thomson-CSF, Inc. (a New York corporation) and Michel M. Boxberger, dismissing plaintiffs' complaint against them with prejudice.

It is So Ordered.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Regulated Practices, Price Fixing & Restraints of Trade

Section 1 of the Sherman Act makes illegal every contract, combination or conspiracy, in restraint of trade. 15 U.S.C.S. § 1. Although the statute speaks in terms of every concerted restraint, the courts have long interpreted this language to prohibit concerted activity which unreasonably restrains trade. Only when concerted activity is manifestly anti-competitive are per se rules of illegality applicable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > General Overview

HN5[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

A seller has a unilateral right to select its customers and to refuse to sell its goods to anyone, for reasons sufficient to itself.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN6[] Monopolies & Monopolization, Attempts to Monopolize

The purpose of the Sherman Act is to prohibit monopolies, contracts and combinations which probably would unduly interfere with the free exercise of their rights by those engaged, or who wish to engage, in trade and commerce, in a word, to preserve the right of freedom to trade. In the absence of any purpose to create or maintain a monopoly, the act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal and, of course, he may announce in advance the circumstances under which he will refuse to sell.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN7[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

A refusal to deal becomes unlawful when it produces an unreasonable restraint on trade, i.e., if there is an anticompetitive purpose or effect in selecting those with whom one will deal. A refusal to deal may not be used as a device to achieve some anticompetitive goal such as to acquire a monopoly, or to fix prices, or to establish market dominance and drive out existing competitors, or to aid the enforcement of unlawful resale price restrictions and territorial allocations, or to increase the seller's own market dominance, or to enforce a boycott, or to promote the predatory practices of the seller. This requirement of illegitimate purpose or effect marks the distinction between concerted activity which is an innocent aspect of business and concerted activity which is inimical to competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

HN8[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

A reduction in intra-brand competition is not pernicious as long as there exists inter-brand competition, which acts as a significant check on the exploitation of intra-brand market power because of the ability of consumers to substitute a different brand of the same product. The law is clear that merely changing from one exclusive distributor to another is permitted. A fortiori, it must be permissible for one distributor going out of business to be purchased by an existing distributor rather than by a new and different distributor.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN9[] **Price Fixing & Restraints of Trade, Vertical Restraints**

A case of illegal resale price maintenance is made out when a price is announced and some course of action is undertaken or threatened contingent on the willingness or unwillingness of the retailer to adopt the price. The action need not necessarily fit under the rubric coercion, but it must involve making a meaningful event depend on compliance or non-compliance with the suggested or stated price.

Opinion by: HILL

Opinion

[*1109] This appeal from the grant of a summary judgment concerns the Colgate [1.] doctrine of ***antitrust law***. As we are convinced that plaintiff-appellant Aladdin Oil Company made an insufficient showing to withstand the motion for summary judgment of defendants-appellees Texaco, Inc. and Poweram Oil Company, Inc., we affirm.

I.

This case involves the distribution of Texaco gasoline products in the Waco, McLennan County, Texas **[**2]** area. Plaintiff Aladdin Oil Company is one of a group of related corporations with basically common ownership engaged generally in distributing Mobil and Arco gasoline and other automotive products at the wholesale and retail levels in the Waco area. [2.] Defendant Texaco, Inc. is a corporation engaged in the production of gasoline and automotive products on a nationwide basis which operates on the wholesale and retail levels in the Waco area. Texaco is the owner of approximately 12 retail gasoline stations in the Waco area in addition to its wholesale distribution operations. Defendant Poweram Oil Company is a corporation engaged in the distribution of Texaco gasoline and automotive products on the wholesale and retail levels in the Waco area.

[3]** The events which precipitated this litigation may be simply stated for our purposes.

Early in 1975, a long-time Texaco distributor in the Waco area, Service Oil Company, [3.] decided to sell its assets and go out of the petroleum business. As a wholesale and retail distributor of competing products, Aladdin Oil pursued the opportunity to acquire a Texaco distributorship and entered into negotiations to purchase Service Oil. Aladdin Oil through a corporation which was to be formed to operate the distributorship, was able to reach an agreement with Service Oil for the sale of its business. The sale was subject to two contingencies. First, under the distributorship agreement between Texaco and Service Oil, any sale of the distributorship was subject to the express approval of Texaco, who the parties to this appeal agree could have (1) approved the sale; (2) disapproved the sale; (3) exercised its option to purchase the distributorship at the purchase price agreed on between Service Oil and Aladdin Oil; (4) assigned the purchase option. In addition to the contingency that Texaco approve the sale, the Aladdin Oil-Service Oil agreement provided that the sale was contingent upon Texaco's **[**4]** entering into a full one-year distributorship contract with Aladdin Oil. Soon after reaching this agreement to purchase Service Oil, Aladdin Oil contacted Texaco and requested that Texaco approve the sale and enter into a one-year distributorship agreement. The reactions of Texaco and Poweram Oil serve as the basis of this antitrust suit.

Texaco's local District Marketing Representative in Waco learned of the agreement of purchase between Aladdin Oil and Service Oil near the end of February 1975 when he obtained a copy of the agreement. Through him, representatives of Aladdin Oil arranged to meet with Texaco's District Sales Manager in an effort to obtain Texaco's agreement to waive its purchase option and to accept a new distributor in place of Service Oil. At the scheduled

---

[1.] The doctrine takes its name from the seminal case of *United States v. Colgate & Co., 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992 (1919)*.

[2.] We need not detail the complex interrelations among the various entities here loosely referred to as "Aladdin Oil." Since we affirm the summary judgment, we need not decide whether Aladdin Oil has standing to bring this suit as an assignee of the corporate and individual interests who sought to purchase Service Oil and become a Texaco distributor. *15 U.S.C.A. § 15*. We assume, without deciding, that Aladdin Oil has standing. We affirm the summary judgment on the merits. Since there is no antitrust cause of action, we need not concern ourselves further with identifying the proper plaintiff.

[3.] "Service Oil" will be used here to refer collectively to not only that company but also other affiliates and other trade names.

meeting, the Aladdin Oil representatives related the **[*1110]** plans for the formation of a new corporation **[**5]** which would become the Texaco distributor.

Following this meeting, the Texaco District Sales Manager wrote to Texaco's Regional Manager in Houston, advising him of the proposed transaction and outlining the alternatives. He set out his various concerns about the proposal and, after outlining what he deemed were Texaco's alternatives, recommended that Texaco exercise its purchase option, collapse the distributorship, and absorb the Service Oil facilities into its own operations. The handling of the matter was referred to Texaco's Assistant Regional Manager who went to Waco in early March of 1975. He met with the same representatives of Aladdin Oil who had met with the Waco District Marketing Representative. The Assistant Regional Manager reacted negatively to the proposal and he was the first to suggest that Texaco consider assigning its rights under the purchase option to Poweram Oil. To this end, a meeting was arranged with the president of Poweram Oil. At that meeting, the two Texaco officials showed the president of Poweram Oil the Service Oil-Aladdin Oil agreement. They then asked him whether his company would be interested in purchasing Service Oil, if Texaco would assign **[**6]** its option to Poweram Oil. He replied affirmatively.

Upon his return to Houston, the Texaco Assistant Regional Manager briefed his direct supervisor, the Texaco Regional Manager, on developments. He opined that Texaco did not need two distributors in Waco for several reasons which need not concern us. He did not favor, however, the recommendation of the Texaco District Sales Manager that Texaco exercise its purchase option, collapse the distributorship, and absorb the Service Oil facilities into its own operations.

Eventually, the Texaco Regional Manager and the Texaco Assistant Regional Manager concluded that Texaco should assign its purchase option to Poweram Oil. Around the middle of March 1975, such a formal written recommendation was submitted to the New York headquarters of Texaco's Sales Department which detailed several reasons. During the first part of April 1975 the recommendation was approved by the New York office. Service Oil and Poweram Oil were both notified and the purchase option was formally assigned by Texaco to Poweram Oil. Thereafter, Poweram Oil exercised the option and purchased the various assets and properties of Service Oil. Alladin Oil then filed **[**7]** this suit.

Before the District Court, plaintiff alleged Inter alia [4.] that the defendants had conspired to exclude Aladdin Oil to accomplish suppression of intrabrand competition and retail price maintenance. The District Court, after initially denying summary judgment, reversed course and upon reconsideration granted the summary judgment motions of the defendants.

[8]** II.

As a starting point we briefly note the procedural posture in which we find this case: this is a summary judgment entered in an antitrust case.

The facile notion pressed upon us that antitrust cases are typically unsuited for summary procedures can be traced to Obiter dictum in *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*. The five member majority expressed the following belief:

---

4. Plaintiff's complaint and the District Court's ruling involved alleged violations of *Sections 1* and *2* of the Sherman Act. *15 U.S.C.A. §§ 1*, *2*. Upon defendants prevailing on the federal antitrust claims, the District Court dismissed plaintiff's remaining state law claims. Here, plaintiff has abandoned the Section two claim. Any horizontal implications of the distribution arrangement under *Section 1* of the Sherman Act were not part of Aladdin Oil's theory of the case and will not be considered here. The theory of the complaint and the Summary Judgment proceeding was strictly vertical. But see *Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164 (3d Cir. 1979)*.

> We believe that summary (judgment) procedures should be used sparingly in complex antitrust litigation where motive **[*1111]** and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. It is only when the witnesses are present and subject to cross-examination that their credibility and the weight to be given their testimony can be appraised. Trial by affidavit is no substitute for trial by jury which so long has been the hallmark of "even handed justice.'

Id. at 473, 82 S. Ct. at 491 (footnote omitted). The four dissenters responded:

> Further, the Rule (56) does not indicate that it is to be used any more "sparingly' in antitrust litigation (Ante, (368 U.S.) **[**9]** p. 473 (*82 S. Ct. 486*, p. 491, *7 L. Ed. 2d 458*)) than in other kinds of litigation, or that its employment in antitrust cases is subject to more stringent criteria than in others. On the contrary, without reflecting in any way upon the good faith of this particular lawsuit, having regard for the special temptations that the statutory private antitrust remedy affords for the institution of vexatious litigation, and the inordinate amount of time that such cases sometimes demand of the trial courts, there is good reason for giving the summary judgment rule its full legitimate sweep in this field.

Id. at 478, 82 S. Ct. at 493 (Harlan, J., dissenting). Of course, on the face of *Rule 56* the dissenters were inherently correct. There is nothing in *Rule 56* itself or in the other Rules or in the Advisory Committee Notes to suggest that *Rule 56* does not apply equally to all actions. See Federal Practice and Procedure PP 56.17(1), .17(5), Wright and Miller, Federal Practice and Procedure §§ 2730, 2732. That the Summary Judgment Rule applies to antitrust cases is readily evident from the Supreme Court's later treatment of *First National Bank of Arizona v. Cities Service, 391 U.S. 253,* ***[**10]*** *88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)* in which a writ of Certiorari was granted to determine whether the summary judgment entered was consistent with the standards announced in Poller. *Id. at 259, 88 S. Ct. 1575*. On receiving a record which took 11 years to create, the Supreme Court concluded that the defendant had properly supported its motion for summary judgment, and plaintiff, in effect, had merely rested on the allegations of conspiracy contained in the complaint. Over a dissent joined in by three justices, the majority explained that *Rule 56* does indeed apply to antitrust suits:

> (N)either precedent nor logic supports petitioner's contention that the evidence to which he points is significantly probative of conspiracy and, therefore, we hold that on the facts as shown summary judgment was correctly awarded to respondent.
>
> To the extent that petitioner's burden-of-proof argument can be interpreted to suggest that *Rule 56(e)* should, in effect, be read out of antitrust cases and permit plaintiffs to get to a jury on the basis of the allegations in their complaints, coupled with the hope that something can be developed at trial in the way of evidence to support those **[**11]** allegations, we decline to accept it. While we recognize the importance of preserving litigants' rights to a trial on their claims, we are not prepared to extend those rights to the point of requiring that anyone who files an antitrust complaint setting forth a valid cause of action be entitled to a full-dress trial notwithstanding the absence of any significant probative evidence tending to support the complaint.

Id. at 288-90, 88 S. Ct. at 1593.

This Court has paid careful attention to these and other Supreme Court pronouncements concerning *Rule 56* in antitrust actions. However, simply because a case is based upon the antitrust laws does not suspend the application of *Rule 56*. The reason summary judgments may seem less common in antitrust cases is because such cases are ripe with issues of motive, intent and credibility which often must be inferred from the total circumstances. ***HN1***[] Antitrust cases are not necessarily ill-suited for summary procedures; those antitrust cases and any other types of cases which raise genuine issues of motive intent and credibility, however, are suited for a full hearing. See **[*1112]** generally Moore's Federal Practice and Procedure PP 56.17(1), **[**12]** .17(5) And cases cited; Wright & Miller, Federal Practice and Procedure §§ 2730, 2732 And cases cited. This Court has implicitly recognized these principles in decisions in which the opinions express a general concern over misuse of *Rule 56* in antitrust cases yet affirm the particular summary judgment being reviewed. See, e.g., *American Telephone and Telegraph Company v. Delta Communications Corporations, 579 F.2d 972 (5th Cir. 1978)* Adopting District Court's opinion at *408 F. Supp. 1075, 1086 (S.D.Miss.1976)* ("Although summary judgment is an available judicial tool in the (field of) antitrust area, Poller does warn that it should be cautiously used."), Aff'd on rehearing 590 F.2d 100 (1979); Scranton Construction Company v. Litton Industries Leasing Corporation, 494 F.2d 778, 781 (5th Cir. 1974), Cert. denied, *419 U.S. 1105, 95 S. Ct. 774, 42 L. Ed. 2d 800 (1975)* (footnote omitted) ("Bearing in mind the deservedly high mortality rate of summary dispositions of such litigation as this, and the disfavor with which such disposition are viewed . . . ."); Littlejohn v. Shell Oil Company, 483 F.2d 1140, 1145 (5th Cir.) (En banc), Cert. denied, *414 U.S. 1116, 94 S. Ct. 849, 38 L. Ed.* ***[**13]*** *2d 743 (1973)* ("(This) fatality rate in summarily disposing of litigation in this manner is high indeed, and largely the result of prematurity through inordinate attention to theories of law at a time when the facts have not been fully developed."). Furthermore, this Court has explicitly recognized these principles in Jones v. Borden Company, 430 F.2d 568 (5th Cir. 1970), expressing a cognizance "of decisions in this Circuit rejecting summary judgment in cases "where motive, intent, subjective feelings and reactions, consciousness and conscience (are) to be searched, and examined and cross-examined are necessary instruments in obtaining the truth.' " Id. at 574 (quoting Alabama Great Southern R.R. v. Louisville & Nashville R.R., 224 F.2d 1, 5 (5th Cir. 1955)). See also Southern Concrete Company v. United States Steel Corporation, 535 F.2d 313, 318 (5th Cir. 1976).

Thus, putting aside contrary Caveats found in Obiter dictum, ***HN2***[] we conclude that simply because a suit is brought under the antitrust laws does not foreclose a summary judgment. We agree with Judge Wisdom's borrowed observation: "But the best procedure "for a correct understanding of summary judgment (is to rely) on the text **[**14]** of the rule, rather than on quotable statements made in one or another case.' " Jones v. Borden Company, 430 F.2d at 574 (quoting 3 W. Barron & A. Holtzoff, Federal Practice and Procedure § 1232.2 at 114 (C. Wright ed. 1958)).

HN3[] Rule 56 "contemplates an orderly (procedure) within which to determine whether summary judgment is proper." Munoz v. International Alliance of the Theatrical Stage Employees and Moving Picture Machine Operators, 563 F.2d 205, 207 n. 1 (5th Cir. 1977). Once the movant carries its burden of showing that no genuine issue of material fact exists, the nonmovant must "set forth specific facts showing that there is a genuine issue for trial." Fed.R.Civ.P. 56(e). E.g., Save Our Cemeteries v. Archdiocese of New Orleans, 568 F.2d 1074, 1077 (5th Cir.), Cert. denied, *439 U.S. 836, 99 S. Ct. 120, 58 L. Ed. 2d 133 (1978)*. It is this shifting burden of going forward which the District Court held Aladdin Oil, the nonmovant here, did not satisfy. [5.]

[15]** III.

Aladdin Oil argues that the District Court erred in holding that this case involved nothing more than a wholly unilateral refusal to deal by a seller, Texaco, and the choice of one replacement distributor, Poweram Oil, instead of another potential replacement distributor, Aladdin Oil, based on legitimate reasons. We agree with the District Court.

[*1113] ***HN4***[] Section 1 of the Sherman Act makes illegal "(e)very contract, combination . . . or conspiracy, in restraint of trade." 15 U.S.C.A. § 1. Although the statute speaks in terms of Every concerted restraint, the courts have long interpreted this language to prohibit concerted activity which Unreasonably restrains trade. See, e.g., Chicago Board of Trade v. United States, 246 U.S. 231, 38 S. Ct. 242, 62 L. Ed. 683 (1918); Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911). Only when concerted activity is manifestly anti-competitive are Per se rules of illegality applicable. See, e.g., Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 2557-58, 53 L. Ed. 2d 568 (1977); Northern Pac. R. Co. v. United States, 356 U.S. 1, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958); E. A. McQuade ***[**16]*** Tours, Inc. v. Consolidated Air Tour Manual Committee, 467 F.2d 178 (5th Cir. 1972), Cert. denied, *409 U.S. 1109, 93 S. Ct. 912, 34 L. Ed. 2d 690 (1973)*.

---

5. The District Court's terse Order Granting Summary Judgment concludes:

Despite Plaintiff's allegation that Defendants' conduct in this case fell within an exception to this general rule (Colgate doctrine), Plaintiff has failed to come forward with sufficient factual material to show that there is a genuine issue for trial, as required by Fed.R.Civ.P. 56(e). Thus, summary judgment for Defendants is proper.

HN5[] Accordingly, a seller has a unilateral right to select its customers and to refuse to sell its goods to anyone, for reasons sufficient to itself. The seminal decision in this area is *United States v. Colgate & Co., 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992 (1919)*. The case came to the Supreme Court on a writ of error from a District Court judgment dismissing an indictment under the Sherman Act. The indictment was based solely on the theory that Colgate & Co. had combined with its wholesale and retail dealers to effect resale price maintenance and had procured adherence through refusals to deal. The District Court interpreted the indictment Not to allege any agreement to maintain resale prices between Colgate & Co. and its customers. The Supreme Court held itself bound by this interpretation of the indictment. Affirming the District Court, the Supreme Court held:

> ***HN6***[] The purpose of the Sherman Act is to prohibit monopolies, contracts and combinations which probably would unduly interfere with the free exercise of their rights **[**17]** by those engaged, or who wish to engage, in trade and commerce in a word to preserve the right of freedom to trade. In the absence of any purpose to create or maintain a monopoly, the act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal; and, of course, he may announce in advance the circumstances under which he will refuse to sell.

Id. at 307, 39 S. Ct. at 468. This is the now-famous Colgate doctrine. Although formally grounded on the broad premise that a seller who makes no promise is contractually free to alienate its own goods, the Colgate doctrine has evolved into a much narrower concept. Despite critical Supreme Court narrowing [6] **[**19]** and commentator **[*1114]** criticism, [7] the Colgate doctrine remains viable in ***antitrust law***. Its continued viability has been recognized in recent decisions by all our sibling Circuits [8] **[**20]** and in a long line of decisions by this Court. [9] The

6. The Supreme Court has repeatedly narrowed the Colgate doctrine, but has never overruled the precedent. See, e.g., *Continental T.V., Inc. v. GTE Sylvania, 433 U.S. 36, 97 S. Ct. 2549, 2567-68, 53 L. Ed. 2d 568 (1977)* (White, J., concurring); *Albrecht v. Herald Co., 390 U.S. 145, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)*; *United States v. Arnold, Schwinn & Co., 388 U.S. 365, 18 L. Ed. 2d 1249, 87 S. Ct. 1856 (1967)*; *United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; *Simpson v. Union, Oil Co., 377 U.S. 13, 84 S. Ct. 1051, 12 L. Ed. 2d 98 (1964)*; *United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*; *FTC v. Simplicity Pattern Co., Inc., 360 U.S. 55, 79 S. Ct. 1005, 3 L. Ed. 2d 1079 (1959)*; *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*; *Lorain Journal Co. v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*; *United States v. Bausch & Lomb Optical Co., 321 U.S. 707, 64 S. Ct. 805, 88 L. Ed. 1024 (1944)*; *Ethyl Gasoline Corp. v. United States, 309 U.S. 436, 60 S. Ct. 618, 84 L. Ed. 852 (1940)*; *FTC v. Beech-Nut Packing Co., 257 U.S. 441, 42 S. Ct. 150, 66 L. Ed. 307 (1922)*; *Frey & Son, Inc. v. Cudahy Packing Co., 256 U.S. 208, 41 S. Ct. 451, 65 L. Ed. 892 (1921)*; *United States v. A. Schrader's Son, Inc., 252 U.S. 85, 40 S. Ct. 251, 64 L. Ed. 471 (1920)*. This consistent narrowing once led Judge Moore to observe: "The Supreme Court has left a narrow channel through which a manufacturer may pass even though the facts would have to be of such Doric simplicity as to be somewhat rare in this day of complex business enterprise." *George W. Warner & Co. v. Black & Decker Manufacturing Co., 277 F.2d 787, 790 (2d Cir. 1960)*.

United States Mineral Products Co., 521 F.2d 1309 (3d Cir. 1975)*; *Brandeis Machinery & Supply Corp. v. State Equipment Co., 503 F.2d 503 (7th Cir. 1974)*; *Adolph Coors Co. v. FTC, 497 F.2d 1178 (10th Cir. 1974)*, Cert. denied, ***419 U.S. 1105, 95 S. Ct. 775, 42 L. Ed. 2d 801 (1975)***; *Butera v. Sun Oil Co., 496 F.2d 434 (1st Cir. 1974)*; *Amplex of Maryland Inc. v. Outboard Marine Co., 380 F.2d 112* (4th Cir.), Cert. denied, ***389 U.S. 1036, 88 S. Ct. 768, 19 L. Ed. 2d 823 (1967)***; *Dart Drug Co. v. Parke, Davis & Co., 120 U.S.App.D.C. 79, 344 F.2d 173 (D.C.Cir. 1965)*.

Colgate doctrine still allows individual sellers to refrain from dealing, even though the condition for dealing would otherwise violate the antitrust **[**18]** laws. However, the unilateral right to select customers is narrowly circumscribed to permit only the "mere announcement of . . . policy and the simple refusal to deal." *United States v. Parke, Davis & Co., 362 U.S. 29, 44, 80 S. Ct. 503, 512, 4 L. Ed. 2d 505 (1960)*.

Before the District Court and on this appeal, Aladdin Oil has urged that the concerted activity necessary for an antitrust violation was established by the scenario of events previously outlined. The District Court artificially isolated Texaco's refusal to grant Aladdin Oil a distributorship from Texaco's assignment of its purchase option **[**21]** to Poweram Oil. Reasoning that Texaco could have refused to grant Aladdin Oil a distributorship without regard to whether a first refusal purchase option even existed, the District Court concluded that Texaco's refusal to make Aladdin Oil one of its distributors should be isolated and separately considered under *Section 1*. Thus, isolated, the refusal to make Aladdin Oil a distributor was viewed by the District Court as a decision protected under the Colgate doctrine. This was too mechanical an approach. What Texaco had the abstract power to do does not control. Our inquiry must examine what Aladdin Oil alleged and sought to prove actually transpired between Texaco and Poweram Oil. Even thus viewed, however, we believe that Aladdin Oil has not established the existence of a genuine issue of material fact. We agree with Aladdin Oil that the conduct of Texaco and Poweram Oil must be considered together.

Aladdin Oil misapprehends the law, however, if it contends that this joint conduct, without more, violates the antitrust laws. The Court of Appeals for the Ninth Circuit best explained how the Colgate doctrine applies to such situations:

> We think it indisputable that a single **[**22]** manufacturer or seller can ordinarily stop doing business with A and transfer his business to B. All of the cases cited **[*1115]** (above) stand for this rule. The rule is also expressly recognized in the cases upon which appellee relies, and which we have discussed. There is language in many of those cases which, taken out of context, plaintiff construes as meaning that, if the seller agrees with a third party a competitor of the seller, for example, or a competitor of A to do the same thing, a Per se violation of *section 1* has occurred. This obviously cannot mean an agreement with B, the new distributor; he could not accept the distributorship without agreeing to do so. And the decisions cited (above) make it clear that the decision of the seller to transfer his business from A to B is valid even though B may have solicited the transfer and even though the seller and B may have agreed before the seller terminates his dealings with A. No case cited to us, and none that we have found, actually goes so far as plaintiff claims.

Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 78 (9th Cir. 1969), Cert. denied, *396 U.S. 1062, 90 S. Ct. 752, 24* ***[**23]*** *L. Ed. 2d 755 (1970)*. See also *Universal Brands, Inc. v. Philip Morris, Inc., 546 F.2d 30, 33 (5th Cir. 1977)*; *Quality Mercury, Inc. v. Ford Motor Co., 542 F.2d 466, 469 (8th Cir. 1976)*; *Dreibus v. Wilson, 529 F.2d 170, 173-74 (9th Cir. 1975)*; *Bowen v. New York News, Inc., 522 F.2d 1242, 1245 (2d Cir. 1975)*; *Burdett Sound, Inc. v. Altec Corp., 515 F.2d 1245, 1248-49 (5th Cir. 1975)*; *Ark Dental Supply Co. v. Cavitron Corp., 461 F.2d 1093, 1094 (3d Cir. 1972)*; *Ricchetti v. Meister Brau, Inc., 431 F.2d 1211, 1214 (9th Cir. 1970)*.

We believe this analysis controls. Under this analysis, Texaco's assignment of the Service Oil purchase option to Poweram Oil and Texaco's refusal to grant Aladdin Oil a distributorship are unilateral decisions protected by the Colgate doctrine. The role Poweram Oil played does not render the Colgate doctrine inapplicable. We see no significance in the distinction between a seller negotiating with one existing customer to transfer the complete business of another existing customer, thus eliminating a customer, and the situation here. Here a seller negotiated

---

9. See, e.g., *Daniels v. All Steel Equipment, Inc., 590 F.2d 111 (5th Cir. 1979)*; *Fulton v. Hecht, 580 F.2d 1243 (5th Cir. 1978)*; *Southern Distributing Co. v. Southdown, Inc., 574 F.2d 824 (5th Cir. 1978)*; *Universal Brands, Inc. v. Philip Morris, Inc., 546 F.2d 30 (5th Cir. 1977)*; *Burdett Sound, Inc. v. Continental Oil Co., 350 F.2d 342 (5th Cir. 1965)*; *Associated Beverages Co. v. P. Ballantine & Sons, 287 F.2d 261 (5th Cir. 1961)*; *Nelson Radio & Supply Co. v. Motorola, Inc., 200 F.2d 911 (5th Cir. 1952)*, Cert. denied, ***345 U.S. 925, 73 S. Ct. 783, 97 L. Ed. 1356 (1953)***.

with an existing customer, Poweram Oil, to transfer the complete business of a customer going out **[**24]** of business, Service Oil, while, at the same time, the attempt of a potential customer, Aladdin Oil, to establish a customer relationship was denied.

Still, sellers do not have an antitrust Carte blanche to select those with whom they will deal. *HN7*[] On the contrary, a refusal to deal becomes unlawful when it produces an unreasonable restraint on trade, I.e., if there is an anticompetitive purpose or effect in selecting those with whom one will deal. A refusal to deal may not be used as a device to achieve some anticompetitive goal such as to acquire a monopoly, [10.] **[**25]** or to fix prices, [11.] or to establish market dominance and drive out existing competitors, [12.] or to aid the enforcement of unlawful resale price restrictions and territorial allocations, [13.] **[**26]** or to increase the seller's **[*1116]** own market dominance, [14.] or to enforce a boycott, [15.] or to promote the predatory practices of the seller. [16.] This requirement of illegitimate purpose or effect marks the distinction between concerted activity which is an innocent aspect of business and concerted activity which is inimical to competition. [17.]

17. This distinction was made in Barber, Refusals to Deal Under the Federal Antitrust Laws, 103 U.Pa.L.Rev. 847 (1955):

When the element of purpose to coerce the trade policy of third parties or to secure their removal from competition is absent, the policy question raised by agreements under which the parties mutually limit their own freedom to deal with outsiders becomes more difficult, and the courts have appropriately outlined wider limits before declaring such agreements illegal.

There are many "normal and usual agreements in aid of trade and commerce,' * * * which involve the acceptance by the parties of limitations on their freedom individually to deal with others * * * . Requirements contracts, exclusive dealing contracts and contracts involving exclusive territories all involve limitations on the freedom of one or more of the parties to do business with others * * * .

Because all of these situations involve an agreement between two or more persons under which one or more of them agree not to deal with third persons and for that reason foreclose a part of the market to such third persons, they are all subject to scrutiny under the antitrust laws. But in the ordinary case these do not involve combining for the primary purpose of coercing or excluding; rather they involve combinations of two or more persons to further directly the business of the parties to the agreement, and the effect on third parties and on competition is indirect. The issue in these cases is not the existence or nonexistence of concerted refusal to deal, but rather whether the purpose and effect of the operation of the contract, association, exchange or joint sales agency was such as to unreasonably to exclude outsiders from participation in the trade in question. The

[27]** Aladdin Oil has sought to attribute such an anticompetitive Animus to Texaco and Poweram Oil by alleging that Texaco's disapproval of Aladdin Oil as a distributor and the assignment of the Service Oil first refusal purchase option to Poweram Oil were designed to lessen intrabrand competition and further a system of retail price maintenance. [18.]

Aladdin Oil's allegation of suppression of intrabrand competition is nothing more than inartful speculation. As best we can understand this allegation, we can discern no support for it in this record. Here, Texaco did not substitute a new distributor for Service Oil. Instead, Poweram Oil purchased Service Oil. To this extent, intrabrand competition in Texaco gasoline was reduced. However, this distinction from the more usual refusal to deal case does not require the application of any stricter rule. A seller may have just as valid reasons for reducing the number of purchasers as for changing purchasers. See *Oreck Corp. v. Whirlpool Corp.,* ***[**28]*** *579 F.2d 126 (2d Cir. 1978)* Commented on in 92 Harv.L.Rev. 1160 (1979). Precedents establish that abstract lessening of intrabrand competition is not enough. Even a concerted intent to eliminate an exclusive distributor does not necessarily establish a cause of action for violation of the antitrust laws. ***HN8***[] "(A) reduction in intrabrand competition is not pernicious as long as there exists interbrand competition, which acts as a "significant check on the exploitation of intrabrand market power because of the ability of consumers to substitute a different brand of the same product.' " *Daniels v. All Steel Equipment, Inc., 590 F.2d 111, 113 (5th Cir. 1979)* (quoting **[*1117]** *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 53 n. 19, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977))*. See also *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 133* (2d Cir.) (En banc), Cert. denied, *439 U.S. 946, 99 S. Ct. 340, 58 L. Ed. 2d 338 (1978)*; *Northwest Power Products, Inc. v. Omark Industries, 576 F.2d 83, 87 (5th Cir. 1978)*; *Dillon Materials Handling Inc. v. Albion Industries, 567 F.2d 1299* (5th Cir.), Cert. denied, *439 U.S. 832, 99 S. Ct. 111, 58 L. Ed. 2d 127 (1978)*; *Universal Brands, Inc. v.* ***[**29]*** *Philip Morris, Inc., 546 F.2d 30, 33 (5th Cir. 1977)*; *Dreibus v. Wilson, 529 F.2d 170 (9th Cir. 1975)*. But cf. *Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164 (3d Cir. 1979)*. The law is clear that merely changing from one exclusive distributor to another is permitted. A fortiori, it must be permissible for one distributor going out of business to be purchased by an existing distributor rather than by a new and different distributor. And, under the precedents discussed above, the prior arrangements Texaco made with Poweram Oil were permitted. Thus, there is no merit in Aladdin Oil's theory of suppression of intrabrand competition.

Just as fanciful is Aladdin Oil's claim that somehow the issue of retail price maintenance is involved in this case. The record demonstrates to the contrary. The District Court held that Aladdin Oil did not bring forth sufficient factual material on the retail price maintenance issue to show there was a genuine issue for trial as required by *Fed.R.Civ.P. 56(e)*. [19.] We agree.

[30]** Of course, Aladdin Oil's allegations of retail price maintenance alone were not sufficient to escape summary judgment. There must be a sufficient quantum of proof to carry an issue of material fact to the jury. Here there is no direct evidence that Texaco and Poweram Oil acted as they did in furtherance of a scheme violative of the antitrust laws. Rarely, if ever, can a plaintiff point to a "smoking gun" in cases such as this. Yet, a plaintiff must convince the court that it is reasonable to infer the existence of the gun from the facts shown. This Aladdin Oil did not do, either in the District Court or in this Court. See *American Telephone and Telegraph Co. v. Delta Communications Corp., 590 F.2d 100, 102 (5th Cir. 1979)*.

In *Butera v. Sun Oil Co., 496 F.2d 434 (1st Cir. 1974)*, an owner of a retail gasoline station sued his supplier and alleged that the supplier's method of adjusting its wholesale gasoline prices was tantamount to illegal resale price

---

principle of the group boycott cases that it is prima facie unreasonable for a dominant group to combine to coerce is not here applicable.

Id. at 876-77, Quoted in *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 77 (9th Cir. 1969)*, Cert. denied, ***396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755 (1970)***.

18. See note 5, Supra.

19. See note 5, Supra.

maintenance. The Court of Appeals for the First Circuit affirmed the summary judgment in favor of the supplier. In its analysis, the First Circuit distilled from the authorities the essence of a resale price maintenance cause **[**31]** of action:

> Resale price maintenance is, in the absence of state fair trade legislation, a Per se violation of the antitrust laws. *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 71 S. Ct. 259, 95 L. Ed. 219 (1951)*; *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 31 S. Ct. 376, 55 L. Ed. 502 (1911)*. But before this doctrine can come into play there must be resale price maintenance. The Supreme Court cases have involved situations in which the attempt to set retail prices was clear. In *Simpson v. Union Oil Co., 377 U.S. 13, 84 S. Ct. 1051, 12 L. Ed. 2d 98 (1964)*, upon which (plaintiff) relies, Union Oil had signed an agreement with the retailer containing the latter's promise to resell at the price set by Union Oil. In Kiefer-Stewart a refusal to sell at a fixed price was met by a concerted refusal to deal. In *Albrecht v. Herald Co., 390 U.S. 145, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)* and *United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*, the retailer was confronted with minimum or maximum prices and harassed by his supplier and others if he stepped out of line. ***HN9***[] Taken together, these cases suggest that **[**32]** a case of illegal resale price maintenance is made out when a price is announced and some course of action is undertaken or threatened contingent on the willingness **[*1118]** or unwillingness of the retailer to adopt the price. The action need not necessarily fit under the rubric "coercion", but it must involve making a meaningful event depend on compliance or non-compliance with the "suggested' or stated price. The dealers in Parke, Davis and Albrecht were told that the harassment directed against them would end as soon as they acceded to the manufacturer's price desires. The cancellation of the lease in Simpson was a direct consequence of the refusal to charge the manufacturer's desired price. The other cases adhere to the same pattern. Cf. *Lehrman v. Gulf Oil Corp., 464 F.2d 26* (5th Cir.), Cert. denied *409 U.S. 1077, 93 S. Ct. 687, 34 L. Ed. 2d 665 (1972)*; *Bowen v. New York News, Inc., 366 F. Supp. 651 (S.D.N.Y.1973)*.

Id. at 436-37 (footnotes omitted). See also *Broussard v. Socony Mobil Oil Co., 350 F.2d 346 (5th Cir. 1965)*. Following this analysis, the First Circuit concluded that there was no resale price maintenance involved. We follow this same analysis to **[**33]** the same result here.

Aladdin Oil has alleged that Texaco and Poweram Oil conspired to maintain resale prices. No announcement of prices has been shown. No "course of action (was) undertaken or threatened contingent on the willingness or unwillingness of (Aladdin Oil) to adopt the price." *496 F.2d at 437*. There was no "meaningful event (dependent) on compliance or non-compliance." Id. Here Texaco refused to deal with Aladdin Oil and arranged with Poweram Oil to take over Service Oil. There was nothing beyond this. There was no resale price maintenance which occurs only "if the producer secures adherence to his suggested prices by means which go beyond his mere declination to sell to a customer who will not observe his announced policy." *United States v. Parke, Davis & Co., 362 U.S. 29, 43, 80 S. Ct. 503, 511, 4 L. Ed. 2d 505 (1960)*. We reach this conclusion after careful review of the record and Aladdin Oil's allegations. We conclude that summary judgment was proper here. See *Southern Distributing Co. v. Southdown, Inc., 574 F.2d 824 (5th Cir. 1978)*; *Universal Brands, Inc. v. Philip Morris, Inc., 546 F.2d 30 (5th Cir. 1977)*; *Copper Liquor, Inc. v. Adolph Coors Co., 506 F.2d **[**34]** 934* (5th Cir.), On rehearing, *509 F.2d 758 (1975)*; *Butera v. Sun Oil Co., 496 F.2d 434 (1st Cir. 1974)*; *Broussard v. Socony Mobil Oil Co., 350 F.2d 346 (5th Cir. 1965)*; *Guidry v. Continental Oil Co., 350 F.2d 342 (5th Cir. 1965)*.

Since we find no merit in any of the contentions raised on appeal, the summary judgment is

AFFIRMED.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN1[] **Responses, Defenses, Demurrers & Objections**

Fed. R. Civ. P. 23(a) lists four prerequisites to a class action: (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN2[] Prerequisites for Class Action, Predominance

Fed. R. Civ. P. 23(b) provides that a class action may be maintained if the requirements of Fed. R. Civ. P. 23(a) are satisfied and in addition: (1) the prosecution of separate actions would create a risk of establishing incompatible standards of conduct for the party opposing the class as a result of inconsistent or varying adjudications or that adjudication as to individual members would as a practical matter dispose of the interests of other members not parties to the adjudication or substantially impair or impede their ability to protect their interests; or (2) the party opposing the class has acted or refused to act on grounds generally applicable to the class thereby rendering injunctive or declaratory relief as to the whole class appropriate; or (3) the court finds that the questions of law or fact common to the members of the class predominate over any questions effecting only individual members and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN3[] Class Actions, Prerequisites for Class Action

Because the declaration of class representation is attended by serious consequences, the plaintiff has the burden of establishing compliance with Fed. R. Civ. P. 23. The plaintiff's complaint must allege the existence of facts which satisfy the requirements of Rule 23.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN4[] Class Actions, Prerequisites for Class Action

A party seeking to utilize the class action format need not establish the merits of his or her case before a preliminary determination of the class action question can be made. Before an evidentiary hearing is afforded, the plaintiff must a minimal showing that his or her class action claims have substance.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] Antitrust & Trade Law, Sherman Act

Parallel behavior itself does not constitute a Sherman Act offense. It is merely circumstantial evidence of the existence of a conspiracy which violates the Act and the probative value of such parallel behavior varies depending on the circumstances in which it is found.

Opinion by: CAFFREY

Opinion

[*743] OPINION

In 1972 eight virtually identical actions were filed in this court. Each of the eight complaints alleged that a named defendant mortgagee bank had required, as a condition on the extension of credit under a mortgage agreement, that the plaintiff mortgagor property owners make monthly deposits in a tax escrow account with the defendant bank of 1/2 of the estimated annual real estate taxes on the mortgaged property. It was further alleged that although the defendant mortgagee bank enjoyed full use of the escrow funds until such time as the taxes became due to the taxing authority, it unlawfully refused to pay interest on the money held in escrow to the plaintiff property owner.

Count I alleged that the refusal to pay interest was the result of a conspiracy in the banking community in restraint of trade in violation of the Sherman Antitrust Act *15 U.S.C.A. § 1 Et seq.*

[3]** Count II alleged that the nonpayment of interest on the required escrow deposits was an illegal tie-in arrangement in violation of *15 U.S.C.A. §§ 1* and *2* and *12 U.S.C.A. § 1972*.

[*744] Count III alleged that as to mortgagors who became mortgagors after July 1, 1969, the defendant had failed to disclose the costs incident to the defendant mortgagee's refusal to pay interest on the tax escrow deposit, in violation of the Truth in Lending Act, *15 U.S.C.A. § 1601 Et seq.* (TILA).

Four judges of this Court who are also parties to mortgage agreements have disqualified themselves from sitting on a trial or any other proceeding in these cases because plaintiffs purport to bring these actions as representatives of all other mortgagors of the defendant mortgagee banks.

Inasmuch as the same law firm represented all plaintiffs and because the factual and legal issues set forth in the eight complaints were substantially similar, the cases were determined to be "related" under local rule 8(e)(2) and all were assigned to one judge in the interest of judicial economy.

Over a period of fifteen months plaintiffs amended their complaints to add Count IV which alleged that the non-interest **[**4]** paying escrow account is the result of a reciprocal agreement which plaintiffs were forced to enter as a result of defendants' exercise of monopoly power in violation of the federal ***antitrust law*** *15 U.S.C.A. §§ 1* and *2*. Plaintiffs in seven of the eight cases were also allowed to amend their complaints to add Count V which asserted an express and implied trust theories under State law and called upon the Court to exercise pendent jurisdiction.

Five defendants have filed the following motions:

In Chait v. Watertown Savings Bank (72-2283-C) the defendant has moved for dismissal of the plaintiffs' complaint which centers around a 1968 mortgage agreement.

In Feinstein v. Waltham Federal Savings and Loan Association (72-2284-C) the escrow account in issue had been provided for in the parties' December 1965 mortgage agreement. Defendant mortgagee has filed a motion to dismiss and for summary judgment.

The complaint in Liskov v. Cambridgeport Savings Bank (72-2285-C) involves a 1970 mortgage agreement. Defendant bank has pleaded in its answer that the complaint fails to state a claim upon which relief may be granted and has also filed a motion for summary judgment or judgment on the **[**5]** pleadings.

In Plotnick v. Suffolk Franklin Savings Bank (72-2286-C) the defendant moved for dismissal or summary judgment in response to plaintiffs complaint which is based on a 1964 mortgage agreement between the parties.

In Zabin v. Lexington Trust Co. (72-2286-C) the plaintiffs' claim is based on a mortgage agreement dated June 29, 1966. Defendant has filed motions to dismiss.

The motions currently before the Court for consideration also include plaintiffs' motions for determination of class action status in all eight cases and plaintiff's motion for partial summary judgment in Liskov v. Cambridgeport Savings Bank. The plaintiffs' motion for determination of class action status will be discussed first. Having in mind that, in large part the defendants' motions encompass the same issues, they will be discussed simultaneously thereafter.

PLAINTIFFS' MOTIONS FOR DETERMINATION OF CLASS ACTION STATUS

HN1[] *Fed.R.Civ.P. 23(a)* lists four prerequisites to a class action:

(1) the class is so numerous that joinder of all members is impracticable,

(2) there are questions of law or fact common to the class,

(3) the claims or defenses of the representative parties are **[**6]** typical of the claims or defenses of the class, and

(4) the representative parties will fairly and adequately protect the interests of the class.

HN2[] *Fed.R.Civ.P. 23(b)* provides that a class action may be maintained if the requirements of 23(a) are satisfied and in addition (1) the prosecution of separate actions would create a risk of establishing incompatible standards of conduct for the party opposing the class as a result of inconsistent or varying adjudications or that adjudication as to individual members would as a **[*745]** practical matter dispose of the interests of other members not parties to the adjudication or substantially impair or impede their ability to protect their interests, or (2) the party opposing the class has acted or refused to act on grounds generally applicable to the class thereby rendering injunctive or declaratory relief as to the whole class appropriate, or (3) the Court finds that the questions of law or fact common to the members of the class predominate over any questions effecting only individual members and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy.

HN3[] Because **[**7]** the declaration of class representation is attended by serious consequences, plaintiff has the burden of establishing compliance with *Fed.R.Civ.P. 23*. *Cook County College Teachers Union, Local 1600, A.F.T. v. Byrd, 456 F.2d 882* (7th Cir.), Cert. denied, *409 U.S. 848, 93 S. Ct. 56, 34 L. Ed. 2d 90 (1972)*; *Philadelphia Electric Co. v. Anaconda American Brass Co., 43 F.R.D. 452 (E.D.Pa.1967)*. The complaint must allege the existence of facts which satisfy the requirements of that rule. *Cook County College Teachers Union, Local 1600, A.F.T. v. Byrd, supra.* *Gillibeau v. City of Richmond, 417 F.2d 426 (9th Cir. 1969)*; 7A Wright and Miller Federal Practice and Procedure: Civil § 1798 at 241-242 (1972).

Although plaintiffs in each of the eight consolidated complaints now under consideration by the Court allege that the class consists of all mortgagors of each of the eight defendant mortgagee banks who are "too numerous to permit practical joinder", beyond that numerosity they allege no facts which would render the class action procedure appropriate here.

While it is clear that ***HN4***[] a party seeking to utilize the class action format need not establish the merits of his case before a preliminary **[**8]** determination of the class action question can be made *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974)*; *Wilcox v. Commerce Bank of Kansas, 474 F.2d 336 (10th Cir. 1973)*; *Miller v. Mackey International, Inc., 452 F.2d 424 (5th Cir. 1971)*; *Philadelphia Electric Co. v. Anaconda American Brass Co., supra*, before an evidentiary hearing need be afforded, plaintiffs should make a minimal showing that their class action claims have substance. *Rossin v. Southern Union Gas Co., 472 F.2d 707 (10th Cir. 1973)*.

In light of the foregoing and because the tolling of the statute of limitations insures no damage will result to purported class members by denying class action status in this case despite the excessive passage of time. *American Pipe & Construction Co. v. Utah, 414 U.S. 538, 94 S. Ct. 756, 38 L. Ed. 2d 713 (1974)*, plaintiffs' motions for class action status should be denied.

Count I

In count one of their complaints, plaintiff mortgagors allege that they have been required as a condition of obtaining their mortgages, to make monthly deposits of one twelfth of their annual property taxes, with the defendant mortgagees, and that the defendants have **[**9]** declined to pay interest on the amounts so deposited. Plaintiffs further allege that defendants' failure to pay interest is the result of "agreements, combinations and conspiracies with other banks, lending institutions and organizations" in violation of *15 U.S.C.A. § 1*.

Although they make their allegations in individual complaints, all plaintiffs have used the same words to allege the existence of the same conspiracy. All five complaints were filed on the same day at a time when all plaintiffs were represented by the same counsel. Clearly, therefore, when they alleged the existence of a conspiracy in count one of their complaints, all plaintiffs had access to the same information.

It is not possible to determine from the complaints themselves exactly what that information was. Plaintiffs' allegations of conspiracy are conclusory and do not recite operative facts as required by the ruling in *Heart Disease Foundation v. General Motors Corp., 463 F.2d 98 (2d Cir. 1972)*. However, in the time period which has elapsed **[*746]** since the complaints were filed, discovery in three of the five cases [1] has revealed that plaintiffs had only two bases for their conclusory allegations **[**10]** of conspiracy:

(1) that virtually all banks require such an interest free tax escrow arrangement as a condition of extending credit in real estate mortgage cases
(2) that banks have joined together to lobby against bills which would reform that practice.

I rule that, even assuming that both of these basis exist in fact, defendants are entitled to summary judgment on count one.

HN5[] Parallel behavior itself does not constitute a Sherman Act offense. It is merely circumstantial evidence of the existence of a conspiracy which violates the act, *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 540-41, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*, and the probative value of such parallel behavior varies depending on the circumstances in which it is found *Delaware Valley Marine Supply Co. v. American Tobacco Company, 297 F.2d 199 (3rd **[**11]** Cir. 1961)*, Cert. denied *369 U.S. 839, 82 S. Ct. 867, 7 L. Ed. 2d 843 (1962)*. Discovery has revealed that plaintiffs have no knowledge of circumstances which cast suspicion on the parallel business behavior in this case. It is just as likely therefore that the banks acted independently as it is that they acted pursuant to an agreement. Illegal conduct will not be presumed.

As stated by counsel for Cambridgeport Savings in his memorandum "the plaintiffs' contention is that, adorned with no more than the knowledge that a business policy is common to the mortgage industry, they are entitled to select some members of the industry at random and to root through their files and records in the hope of finding some hard evidence of an agreement."

> ***HN6***[] While we believe that the plaintiff is entitled to all favorable inferences, he is not entitled to build a case on the gossamer threads of whimsey, speculation and conjecture.
>
> *Hahn v. Sargent, 523 F.2d 461, 467 (1st Cir. 1975)*, Quoting, *Manganaro v. Delaval Separator Co., 309 F.2d 389, 393 (1st Cir. 1962)*.

Similarly the combined lobbying efforts of defendants and others in the banking industry lend no support to plaintiffs' allegations **[**12]** of conspiracy. It is clear that ***HN7***[] the antitrust laws do not prohibit combinations for the purpose of influencing legislation. *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*. Evidence of an agreement between the defendants and others to unite

---

[1] Feinstein v. Waltham Federal Savings and Loan Association, Liskov v. Cambridgeport Savings Bank, and Plotnick v. Suffolk Franklin Savings Bank.

their lobbying efforts would therefore not provide the basis for a claim under *15 U.S.C.A. § 1*. Additionally, the fact that the banks joined together for a lawful purpose is not evidence that they joined together for an unlawful one. Therefore no inference may be drawn from the existence of such an agreement which casts suspicion on the parallel behavior discussed above.

In light of the foregoing and without considering the other defenses raised, I rule that summary judgment should enter for the defendants on count one.

Count II

Count two alleges that requiring a mortgagor to make a monthly deposit with the mortgagee of one twelfth of the annual real estate taxes assessed against the mortgaged property as a condition of obtaining a mortgage constitutes an illegal tie-in arrangement in violation of *12 U.S.C.A. § 1972* and *15 U.S.C.A. §§ 1* and *2*. Plaintiffs' theory is **[**13]** that such a tax escrow account requires plaintiffs to provide additional property to the defendant banks as a condition to the extension of credit.

As a general rule, ***HN8***[] statutes have prospective effect unless the legislature clearly manifests its intention that the statute act retrospectively. There is no indication of any such intent in the legislative history of *§ 1972* or in the act itself. Therefore, **[*747]** since *12 U.S.C.A. § 1972* became effective on December 31, 1970 it has no applicability to the five mortgage agreements currently under the court's consideration which were all executed prior to that date.

Plaintiffs also contend in count two that the mandatory tax escrow account constitutes a tying arrangement in restraint of trade which violates *15 U.S.C.A. §§ 1* and *2*.

Defendants Waltham Federal Savings and Loan Association and Suffolk Franklin Savings Bank maintain that any claims against them under the Sherman Antitrust Act are banned by the statute of limitations. At least insofar as the allegations of count two are concerned, this court so rules.

The mortgage agreement between the Feinsteins and Waltham Federal Savings and Loan Association was executed in 1965. **[**14]** The mortgage agreement between the Plotnicks and Suffolk Franklin Savings Bank was executed in 1964. ***HN9***[] *15 U.S.C.A. § 15b* provides:

> Any action to enforce any cause of action under *sections 15* or *15a* of this title shall be forever barred unless commenced within four years after the cause of action accrued . . .

I rule that if those agreements constituted illegal tying arrangements plaintiffs had four years after the agreements were executed to bring suit in the United States District Court pursuant to *15 U.S.C.A. § 15* and that the statute of limitations had run as to both actions prior to July 24, 1972 when the complaints were filed.

Accordingly, the motions to dismiss of defendants Waltham Federal Savings and Loan Association and Suffolk Franklin Savings Bank should be allowed as to count two and the court will go on to consider the allegations of illegal tying arrangements under the Sherman Antitrust Act only against the three remaining defendants.

HN10[] The Sherman Act forbids the extension of market dominance over one product into the market for another product by making the purchase of the first product a condition of purchasing the second.

In *Fortner Enterprises, Inc.* ***[**15]*** *v. United States, 394 U.S. 495, 507, 89 S. Ct. 1252, 22 L. Ed. 2d 495 (1969)*, the Supreme Court stated that the preliminary determination to be made at the outset of every tie-in case is whether two separate products are in fact involved. Plaintiffs contend that in order to obtain credit from the defendants, the plaintiffs were also required to accept defendants' tax escrow services. The issue therefore is whether extension of credit and tax escrow services are two separate services or separate elements of the same service.

In *Stavrides v. Mellon National Bank & Trust Co., 353 F. Supp. 1072 (W.D.Pa.1973)* the court ruled that a complaint containing similar factual allegations stated a claim upon which relief could be granted. This court agrees "whether the defendants are selling one product or two, whether there is any legitimate business justification for the escrow requirement, and whether the escrow service is an ancillary part of the loan itself are clearly questions of disputed fact" *Stavrides v. Mellon National Bank & Trust Co., supra at 1077*. Therefore, the motions of the remaining three defendants for dismissal or judgment on count two should be denied.

Count III

In count **[**16]** three of their complaints, plaintiffs allege that as to plaintiffs who became mortgagors after July 1, 1969 the defendants have failed to disclose the costs incident to the defendants' refusal to pay interest on tax escrow deposits. Plaintiffs contend that such a failure to disclose violates the TILA *15 U.S.C.A. § 1601 Et seq.* and the regulations promulgated thereunder, specifically *12 C.F.R. 226.1 Et seq.*

As discussed above, the court has denied class action status to the plaintiffs in all eight of the consolidated cases now before it. As a result, the allegations of count three fail to state a claim upon which relief can be granted in Chait v. Watertown Savings Bank (72-2283-C), Feinstein v. Waltham Federal Savings and Loan Assoc. (72-2284-C), Plotnick v. Suffolk Franklin Savings **[*748]** Bank (72-2286-C) and Zabin v. Lexington Trust Co. (72-2287-C) because the mortgage agreements of the individual plaintiffs in those cases were executed prior to the effective date of the statute. Accordingly the motions to dismiss of the defendants in those cases should be allowed as to count three.

In Liskov v. Cambridgeport Savings Band (72-2285-C) the mortgage agreement at issue was **[**17]** executed in 1970, after the effective date of the disclosure provisions. Notwithstanding that fact, however, plaintiff is not entitled to recover under the TILA.

HN11[] The TILA specifically exempts escrows for future payment of taxes from disclosure *15 U.S.C.A. § 1605(e)(3)*, *12 C.F.R. 226.4(e)*. *Stavrides v. Mellon National Bank & Trust, 487 F.2d 953 (3d Cir. 1973)* and even if such costs were not exempt from disclosure, actions brought under the TILA are subject to a one year statute of limitations. *15 U.S.C.A. § 1640(e)*. Reference to the case file establishes that when plaintiffs filed their action on July 24, 1972, the statute of limitations had already run as to their mortgage agreement with the defendant.

Accordingly, defendant Cambridgeport Savings Bank's motion for summary judgment should be allowed as to count three.

Count IV

In count four, plaintiffs allege that the defendant mortgagees acting in concert with other banks have monopoly power in the real estate credit market in Massachusetts. Plaintiffs further allege in count four that the defendants have made use of that monopoly power by imposing upon plaintiffs a reciprocal agreement under the terms of which defendants **[**18]** extend credit to plaintiffs in return for which plaintiffs deposit money with the defendants in interest free accounts. Plaintiffs contend that these are reciprocal agreements which violate the Sherman Antitrust Act, *15 U.S.C.A. § 1*. I rule that such a practice, even if established at trial, would not constitute a reciprocal dealing arrangement.

HN12[] Reciprocity is basically the policy of favoring one's customers in purchasing commodities sold by them." *United States v. Penick and Ford, Ltd., 242 F. Supp. 518, 521 (D.N.J.1965)*. To hold that the plaintiffs' willingness to open interest free accounts was a "product" would stretch the concept of reciprocity too far. *Stavrides v. Mellon National Bank & Trust Co., supra at 1077*. Count four should be dismissed as to all five defendants.

Count V

In count five of their complaints the plaintiff mortgagors ask the court to exercise pendent jurisdiction over a claim which is based on state law. Plaintiffs allege that the defendant mortgagees are accountable to them for monies earned through the investment of funds which plaintiffs deposited in tax escrow accounts as required by their mortgage agreements.

Plaintiffs' theory appears to be that **[**19]** any monies earned through the investment of the tax escrow funds were held by the defendant mortgagees in trust for the benefit of the plaintiff mortgagors by reason of trusts created by the mortgage instruments. Plaintiffs further assert that even in the absence of express trusts created by the agreements, the court should impose constructive trusts because each of the defendant mortgagees has been unjustly enriched by the tax escrow arrangements.

A copy of the mortgage agreement form used by each defendant mortgagee has been filed in each of the five cases which have motions currently under consideration. Because the court will refer to the copies of those agreements in the process of ruling on the motions before it, those motions will be treated as motions for summary judgment as to count five.

I rule that the mortgage agreements filed in these cases are integrated agreements which are subject to the parol evidence rule. *Restatement (Second) of Contracts §§ 235*, *239* (Tent. Drafts Nos. 1-7, 1973) and that the court may as a matter of law interpret those agreements to determine the understanding of the parties. **[*749]** *Robert Industries Inc. v. Spence, 362 Mass. 751, 755,* ***[**20]*** *291 N.E.2d 407 (1973)*.

Four of the five agreements in question [2.] provide for the payment of monthly estimated tax payments into an escrow account and contain no provision with regard to the investment of those funds or the payment of interest of the mortgagor.

Under Massachusetts law, ***HN13***[] a mortgagor who claims that the bank does not have the right to treat tax escrow funds as its own, must show a clear understanding of that effect, *Carpenter v. Suffolk Franklin Savings Bank, 370 Mass. 314, 346 N.E.2d 892 (1976)*. I rule that due to the absence of any provision in the contract tending to show such a clear understanding between the parties, no trusts were created by those agreements as a matter of law.

In the case of Feinstein v. Waltham Federal Savings and Loan Association **[**21]** (72-2284-C) the agreement required the plaintiff to make monthly tax escrow payments to the mortgagee "in trust" but no provisions were included for the investment of those funds or the payment of interest. In addition, plaintiff Feinstein testified in deposition that he knew at the time that he entered the agreement that he would not be paid interest on the amounts deposited in the escrow account. In light of the foregoing, I rule that no trust was created by the mortgage agreement in that case.

The plaintiffs also contend that the court should impose constructive trusts because the defendant mortgagees have been unjustly enriched. I rule that even assuming all of plaintiff's allegations to be true, in the absence of an allegation of fraud under Massachusetts law no such unjust enrichment has occurred as to justify the imposition of a constructive trust in this case *Carpenter v. Suffolk Franklin Savings Bank, supra.* Accordingly, summary judgment should enter for the five defendants as to count five.

PLAINTIFFS' MOTION FOR PARTIAL SUMMARY JUDGMENT IN LISKOV V. CAMBRIDGEPORT SAVINGS BANK

Plaintiffs' motion for partial summary judgment in Liskov v. Cambridgeport Savings Bank should **[**22]** be denied.

End of Document

[2.] Those four agreements are the agreements at issue in Chait v. Watertown Savings Bank (72-2283-C), Liskov v. Cambridgeport Savings Bank (72-2285-C), Plotnick v. Suffolk Franklin Savings Bank (72-2286-C), and Zabin v. Lexington Trust Co. (72-2287-C).

Civil Procedure > Settlements > Settlement Agreements > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN1[] **Settlements, Settlement Agreements**

The main judicial concern in approving settlements is that the rights of the passive class members not be jeopardized by the proposed action.

Civil Procedure > Settlements > Settlement Agreements > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN2[] **Settlements, Settlement Agreements**

Approval of a compromise depends upon whether the proposal is "fair, reasonable, and adequate." The Manual for Complex Litigation, § 1.46, identifies a number of factors to be considered: the opinion of counsel as to the fairness of the settlement; the calculation and size of the settlement figure; the strength of plaintiff's case; the complexity of further suit; adequacy of recovery; and opposition to the settlement.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN3[] **Private Actions, Standing**

Each merchant has one cause of action against a defendant for any antitrust violations. This claim is either retained by the merchant or assigned to another. One claim does not give rise to separate actions to be prosecuted by different plaintiffs. The law prohibits such splintering of actions and multiplication of suits.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN4[] **Purchasers, Direct Purchasers**

In the area of antitrust, the policy against fragmentation is buttressed by the United States Supreme Court, which states that the "pass-on" theory of ***antitrust law*** (that is, overcharges are "passed on" at every step in the chain of distribution) cannot be used in litigation, either offensively or defensively. The practical effect of this decision is to allow only direct purchasers to sue for damages under the antitrust laws.

Opinion by: [*1] McGLYNN

Opinion

Memorandum of Decision

McGLYNN, J.:

I. Motion for Approval of Partial Settlements

A hearing on the partial settlement agreements in the Fine Paper Antitrust Litigation was held on September 10, 1979. The proposed agreements resolve all claims which the private purchaser class and five state [1] government entity classes have against six of the named defendants. [2] The settling defendants hold a share of approximately 38% of the fine paper market and have compromised the claims for $30 million.

---

[1] Connecticut, Illinois, Kansas, Minnesota and South Dakota.

[2] St. Regis Paper Company, International Paper Company, Potlach Corporation, Union Camp Corporation, Weyerhaeuser Company and Boise Cascade Corporation.

The settlement agreements were filed of record on January 10, 1979 and January 25, 1979. On May 11, 1979, preliminary approval of the settlement was entered (Pretrial Order No. 44). The Notice of Pendency of Class Action and Proposed Settlements was mailed to the classes on June 29, 1979 and published in the Wall Street Journal on July 2, 1979.

No member of any of the plaintiff classes have objected to the settlements. ***HN1***[] "The main judicial concern **[*2]** [in approving settlements] is that the rights of the passive class members not be jeopardized by the proposed action." Wright and Miller, Federal Practice and Procedure: Civil § 1797. I am satisfied that the negotiated settlements are fair and reasonable to the settling parties. The settlements do not impinge in any way on the nonsettling defendants' ability to litigate further or to negotiate their own settlements. Consequently, the nonsettling defendants are in no position to object. See *Seiffer v. Topsy's Int'l Inc., 70 F.R.D. 622 (D. Kan. 1976)*; *Wainwright v. Kraftco Corp., 53 F.R.D. 78 (N.D. Ga. 1971)*; *Philadelphia Electric Co. v. Anaconda American Brass Co., 42 F.R.D. 324 (E.D. Pa. 1967)*.

HN2[] Approval of a compromise depends upon whether the proposal is "fair, reasonable and adequate". The Manual for Complex Litigation, § 1.46, identifies a number of factors to be considered: the opinion of counsel as to the fairness of the settlement, the calculation and size of the settlement figure, the strength of plaintiff's case, the complexity of further suit, adequacy of recovery, and opposition to the settlement.

(a) Opinion of Counsel

Counsel for all settling parties are **[*3]** experienced in the field of antitrust litigation and unequivocally recommend approval. Their opinion that the settlements are fair, reasonable and adequate must be accorded weight.

The settlement of litigation on terms agreeable to all parties is one of the most important tasks we undertake… [It] cannot be disputed that a court should refrain from merely substituting its own judgment of the merits of a settlement for that of counsel ultimately associated with the litigation and consequently far more able to weigh its relative strengths and weaknesses. *Jamison v. Butcher and Sherrerd, 68 F.R.D. 479, 481 (E.D. Pa. 1975)*.

(b) Calculation and Size of Figure

The settlements of $30 million average $790,000 for each 1% of total industry sales during the five year period, 1973 to 1977. The settlement figures were reached by means of a well-documented economicstatistical study. The alleged overcharge on net sales by settling defendants was estimated, and a percentage of those figures was agreed upon as the settlement amount. Sufficient economic data and factual information validate this result. The monies have been invested in interest-bearing Certificates of Deposit and are **[*4]** ready for distribution.

(c) Case Strength

The strength of plaintiffs' case is another factor to be weighed in the approval process. It cannot be estimated with absolute precision in the case of a partial settlement. "… [Class] counsel are naturally reluctant to expose their case to the full view of other parties who are still actively litigating their positions and who are in direct opposition to the stance of plaintiffs and the class." *Seiffer, supra at 629*. Plaintiffs continue to conduct extensive discovery in this case and are convinced that the law and facts would compel a judgment against settling defendants. Of course, counsel for the defendants dispute plaintiffs' claims with great vigor. And unquestionably, there are many intricate issues of law and fact which may be resolved adversely to one side or the other. Given these contingencies, plaintiffs feel that a middle course is prudent, and I have no reason to disagree.

(d) Complexity of Further Suit

All settling parties benefit substantially from this compromise. This litigation has already proven complex and time consuming and may continue to be for some time. By settling, six of the defendants are relieved **[*5]** of the costs in time and expense and the risks involved in further litigation. Plaintiffs are guaranteed an early recovery of at least part of their claims and at the same time eliminate the risk of a totally adverse judgment.

(e) Adequacy

In light of the fact that these settlements are partial in the sense that plaintiffs can pursue their claims against the remaining nine defendants which have substantial assets and earnings, the amount of the settlements are more than adequate.

(f) Opposition

Perhaps the most salient aspect of the settlements is that the terms have not been opposed by any members of the classes, thus demonstrating that in the view of many, the settlements are fair, reasonable and adequate.

Accordingly, the settlements are approved.

II. Objections of the State of New York to the Proposed Settlements

The State of Connecticut filed an amended complaint in the Fine Paper litigation purporting to act "… on behalf of all persons and governmental entities in the United States…" In its motion for class certification, however, Connecticut requested to be designated class representative of a class consisting solely of the State of Connecticut and all **[*6]** governmental subdivisions within that state. The court granted the request and certified a statewide governmental entity class for Connecticut. This class is participating in the settlement with the six mill defendants.

The state of New York has filed objections to the proposed settlement contending that it relied upon Connecticut's representation of a nationwide class of governmental entities but that Connecticut is going to participate in the settlement only on behalf of itself and its political subdivisions. New York also has asked leave to serve special interrogatories directed to special counsel for Connecticut to which Connecticut has objected.

New York is not a named plaintiff, nor is it a member of any class certified in this litigation, and, therefore, it does not have standing either to object to the settlements or to serve interrogatories.

New York argues that under *Fed. R. Civ. Pro. 23(e)*, a noncertified class cation cannot be dismissed or settled without court approval. In support of this contention, New York relies on cases which hold that in the pre-certification stage, a suit filed as a class action is treated as such for purposes of compromise or dismissal. **[*7]** *Kahan v. Rosenstiel, 424 F. 2d 161 (3d Cir. 1970)*; *Rothman v. Gould, 52 F.R.D. 494 (S.D.N.Y. 1971)*; *Yaffe v. Detroit Steel Corp., 50 F.R.D. 481 (N.D. Ill. 1970)*; *Philadelphia Electric Company, supra.*

In all of these cases, however, the class representative sought either a complete dismissal of the class action or a compromise before the class had been certified. Here, Connecticut is not attempting to dismiss or settle the claims of a nationwide class. It is acting only on behalf of itself and its political subdivisions. There is no abandonment of any member of a nationwide class of governmental entities since such a class has not been certified. See *Wood v. RexNoreco, Inc., 61 F.R.D. 669 (S.D.N.Y. 1973)*. Thus, there is no prejudice to New York since none of its claims [3] or rights will be compromised by Connecticut. Moreover, there is no prejudice to New York by reason of the passage of time since under the rule of *American Pipe and Construction Co. v. Utah, 414 U.S. 538 38 L. Ed. 2d 713 (1974)*, the statute of limitations was tolled from the commencement of the action by Connecticut to at least the date of the entry of the order designating the classes on February 16, 1979. **[*8]** [4]

III. Objections of the State of Washington

[3] It is not certain that New York has any claims. According to papers filed in support of its objections, New York states "[To] date… New York has not been shown sufficient evidence upon which a responsible complaint of its own could be based." (Objections of the State of New York to the Proposed Settlement with Certain Defendants, p. 5, filed 8/20/79).

[4] The record discloses that New York had knowledge that Connecticut intended to limit its class representation. (Response to Objections of the State of New York to the Proposed Settlement with Certain Defendants, exhibit B, filed 9/7/79).

In addition, notice of class designation excluding a nationwide governmental class was published on July 2, 1979 in the Wall Street Journal.

The state of Washington has filed a Notice of Exclusion of Claims from Class Action and Proposed Settlement. The claims to which Washington refers are those purportedly assigned to the state by various paper merchants. Whenever the state purchased fine paper in the years involved in this litigation, the purchase orders contained the following clause.

Vendor and Purchaser recognize that **[*9]** in actual economic practice overcharges resulting from antitrust violations are in fact borne by Purchaser. Therefore, Vendor hereby assigns to Purchaser any and all claims for such overcharges. (Notice of Exclusion of Claims from Class Action and Proposed Settlement, p. 2, filed 8/20/79).

Based on this provision, Washington maintains that it can split its claims out of the settlement either to pursue them in a private suit or assert them in this litigation.

These claims cannot be excluded from the settlement for two reasons. First, assuming arguendo that the claims are validly assigned, Washington was not timely in objecting or opting out. The Notice of Exclusion is an ambiguous pleading which does not comport with the established optout procedure.

Second, to allow Washington's claims to be split out of the settlement would result in an impermissible fragmentation of the suit. ***HN3***[] Each merchant has one cause of action against a defendant for antitrust violations. This claim is either retained by the merchant or assigned to another. Washington's conception implies that a merchant's right of action is divided into as many claims as there are resales. Each resale then would **[*10]** constitute a separate cause of action against defendants.

One claim does not give rise to separate actions to be prosecuted by different plaintiffs. The law prohibits such splintering of actions and multiplications of suits.

… [In] accordance with public policy, partially to conserve the court's time but probably in the main to prevent the hardship upon defendant of unnecessary piecemeal litigaion, a single cause of action cannot be split so as to be properly made the subject of different actions… 1B Moore's Federal Practice P0.410[2].

HN4[] In the area of antitrust, this policy against fragmentation has been buttressed by the Supreme Court's decision in *Ill. Brick Co. v. Ill., 431 U.S. 720, 52 L. Ed. 2d 707 (1977)*, reh. denied *434 U.S. 881 (1977)*. The Court ruled that the "pass-on" theory of ***antitrust law*** (i.e., overcharges are "passed on" at every step in the chain of distribution) cannot be used in litigation, either offensively or defensively. The practical effect of this decision is to allow only direct purchasers to sue for damages under the antitrust laws. One prong of the Court's analysis was the potential problems of multiple litigation and liability.

Permitting **[*11]** the use of pass-on theories under § 4 essentially would transform treble-damages actions into massive efforts to apportion the recovery amount all potential parties that could have absorbed part of the overcharge… However appealing this attempt to allocate the overcharge might seem in theory it would add whole new dimensions of complexity to treble-damages suits and seriously undermine their effectiveness, *431 U.S. at 737*.

To allow Washington to assert these "partial assignments" would essentially effect a circumvention of the holding and rationale of Illinois Brick. The merchants, as direct purchasers, would retain their claims except for the resales to Washington. Washington would then seek to sue the manufacturers on the basis of indirect purchases.

Furthermore, *Fed. R. Civ. Pro. 23* is designed to prevent a multiplicity of suits which can be conveniently litigated in one forum as a class action. Washington's assignment theory is totally inconsistent with the present state of the law and, therefore, its attempt to opt out unspecified parts of the claims of unidentified middleman must be denied.

HN11[] **Sherman Act, Scope**

Michigan's Anti-Trust Law is patterned after the Sherman Act adopted in 1890. Although Michigan courts are not required to follow the interpretations of the Sherman Act by the federal courts, it is in the federal law where Michigan courts find most discussion relative to the restraint of trade provisions.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN12[] **Regulated Practices, Price Fixing & Restraints of Trade**

In order to constitute a reasonable restraint of trade, competitors must not be oppressed or coerced; prices must not be arbitrarily fixed or maintained; the quality must not be impaired so that the old price buys a worse article. The fundamental test is a detriment to the public. All the circumstances surrounding the contract should be taken into consideration. The court should consider the relationship of the parties and their relation with the subject matter dealt with, and its relation with the general public, the facts peculiar to the business, its condition before and after the restraint was imposed, the purpose or end sought to be attained.

Headnotes/Summary

Headnotes

1. Trial -- Pretrial Orders -- Course of Litigation.

A pretrial order which limits the issues to be presented at trial controls the subsequent course of the litigation.

2. Parties -- Standing -- Residency.

A party who commences an action in Michigan while then a resident of Michigan does not lose his standing by subsequently removing his residence from the state.

3. Motions -- Summary Judgment -- Allegations -- Res Judicata.

A plaintiff's allegations must be accepted as true when ruling upon a defendant's motion for summary judgment; such a ruling does not decide as a substantive matter that those allegations are in fact true nor is the ruling res judicata as to those matters.

4. Corporations -- Ultra Vires -- Sale of Real Property.

The sale of a hospital by the corporate owner of the hospital was not an ultra vires action where neither Michigan's corporation law nor the articles of incorporation of any of the successive owners of the hospital place any restrictions on the ownership, acquisition or conveyancing of any of the corporation's real or personal assets.

5. Quo Warranto -- Corporations **[***2]** -- Parties -- Court Rules.

An action in quo warranto asserting a violation by a corporation of the state's antitrust laws may be brought by private citizens to enforce a public interest where the Attorney General has refused to bring such an action (GCR 1963, 715.2).

6. Monopolies -- Antitrust Laws -- Detriment to Public Factors Considered.

The fundamental test of whether or not a monopoly violates the ***antitrust law*** is whether there is a detriment to the public; a contract of sale which allegedly creates a restraint of trade should be considered by taking into account such factors as the circumstances surrounding the contract, the relationship of the parties and their relationship to the subject matter dealt with, the subject matter's relation to the general public, the facts peculiar to the business, its condition before and after the restraint was imposed, and the purpose or end sought to be attained.

Syllabus

Stanley P. Oleksy, M.D., and several others brought an action in quo warranto against Sisters of Mercy of Lansing, Michigan and W. A. Foote Memorial Hospital, Inc., seeking to set aside the sale of Mercy Hospital in Jackson by the Sisters of Mercy to W. A. Foote Memorial Hospital. **[***3]** The Jackson Circuit Court, Richard Robinson, J., entered a pre-trial order limiting the issues at trial to whether the defendants exceeded their corporate powers and whether the defendants violated the antitrust laws. Trial was held on these issues and a judgment was entered for the defendants. The plaintiffs appeal, and the defendants cross-appeal raising various issues challenging the plaintiffs' ability to maintain the action. *Held*:

1. Plaintiff Oleksy did not lose his standing to participate in the action by virtue of his removing his residence from the state after the action was commenced.

2. In the pleadings of a previous action between these parties it was alleged that the Sisters of Mercy held the property as a charitable trust. That action was concluded by a summary judgment for the defendants. For purposes of the summary judgment the plaintiffs' allegations were necessarily accepted as true, but the summary judgment was not res judicata as to the issue because the issue was not decided as a substantive matter.

3. The Sisters of Mercy did not abuse their corporate authority or engage in ultra vires conduct in selling the hospital. No restrictions on the ownership, **[***4]** acquisition or conveyancing of property were placed in the articles of incorporation of the Sisters of Mercy or any of the previous successive owners of the hospital, nor are any such restrictions contained in the corporation laws of the state.

4. The plaintiffs have standing to assert a violation of the state's antitrust laws by virtue of a court rule which allows private citizens to act to prosecute antitrust actions where the Attorney General, who has statutory authority to bring such an action, has refused to do so.

5. The sale of Mercy Hospital did not violate the antitrust laws of Michigan. The sale was not made with the purpose of restricting trade or commerce, the record does not indicate that the sale created a monopoly in hospital care in Jackson County, the business is a highly regulated one, and the evidence does not indicate that the quality of care changed after the sale or that the price of care is significantly different than elsewhere.

Counsel: *Alvin G. Dahlem* and *Phillip H. Berkemeier*, for plaintiffs.

Dykema, Gossett, Spencer, Goodnow & Trigg (by *John H. Schomer, Jack C. Radcliffe, Jr*., and *James B. Falahee, Jr.)*, for W. A. Foote Memorial Hospital, **[***5]** Inc.

Colombo & Colombo (by *Louis J. Colombo, Jr*., and *Lawrence F. Raniszeski)*, for Sisters of Mercy of Lansing, Michigan.

Judges: J. H. Gillis, P.J., and R. B. Burns and N. J. Kaufman, JJ.

Opinion by: PER CURIAM

Opinion

[*772] **[**456]** The plaintiffs in this cause appeal from an order of the Jackson County Circuit Court denying their action in quo warranto seeking to set aside the sale of Mercy Hospital in Jackson, Michigan, by defendant Sisters of Mercy of Lansing, Michigan, to defendant W. A. Foote Memorial Hospital.

After a pretrial conference, the trial court entered a pretrial order limiting **[**457]** the issues to be presented at trial to: whether defendants have **[*773]** exceeded their corporate powers; and, whether defendants have violated the anti-trust laws. It is fundamental that this ***HN1***[] pre-trial order controls the subsequent course of the litigation. See GCR 1963, 301.3 and *Bednarsh v Winshall, 374 Mich 667; 133 N.W.2d 202 (1965)*.

After an extensive trial upon these questions, the trial court set forth its conclusions in a well-written, well-reasoned opinion. We recognize the trial court's unique position, allowing it to survey the briefs and facts **[***6]** presented first-hand, and observe the witnesses appearing before it. Moreover, we find ourselves in complete accord with the trial court's conclusions. Therefore, as we do not feel that we can improve upon the trial court's opinion, we adopt it as our own and set it forth in full herein. Our adoption of this opinion necessarily renders moot the various procedural challenges to plaintiffs' maintenance of this action that defendants have raised in their cross-appeal, to-wit: questions of standing, estoppel, laches, and res judicata.

As the trial court stated:

"This is an action in the nature of quo warranto seeking to set aside the August 29, 1975, sale of Mercy Hospital in Jackson, Michigan, by defendants, Sisters of Mercy of Lansing, Michigan (hereinafter called 'Mercy'), to defendant, W. A. Foote Memorial Hospital, Inc. (hereinafter called 'Foote'). At that time Foote operated a private non-profit hospital in Jackson and the Sisters of Mercy operated Mercy Hospital also in Jackson. Prior to the sale of Mercy Hospital to Foote, plaintiffs had unsuccessfully attempted to purchase Mercy Hospital. The plaintiff, Committee to Preserve Mercy Hospital, is a non-profit corporation **[***7]** organized for the purpose of taking over ownership and operation of Mercy Hospital.

"In 1975, the Sisters of Mercy entered into an agreement to sell Mercy Hospital to Foote, such agreement **[*774]** being consummated on August 29, 1975. On July 31, 1975, while negotiations between the Sisters of Mercy and Foote were still pending, the individual plaintiffs filed a complaint against the Sisters of Mercy (Jackson County No. 75-004921-CZ) seeking a preliminary injunction restraining the Sisters of Mercy from conveying Mercy Hospital; an injunction restraining the Sisters of Mercy from using the proceeds from such sale in any community other than Jackson; and an order transferring Mercy Hospital to a then unspecified group. This complaint (hereinafter called 'Oleksy I') alleged that the proposed sale violated a charitable trust created by the contributions of plaintiff and others.

"In response to this complaint, the Sisters of Mercy filed a motion for summary judgment, which was heard by Judge Russell Noble on August 5, 1975, together with a motion to intervene filed by Bruce A. Barton, then prosecuting attorney for Jackson County. On August 11, 1975, Barton filed an amended motion **[***8]** to intervene which attached a proposed complaint of intervener. In addition to adopting all the allegations of the Oleksy I complaint, Barton's complaint set forth the basis for an action in the nature of Quo Warranto. He further alleged that the Sisters of Mercy lacked corporate authority to convey the hospital facilities to Foote.

"On August 15, 1975, Judge Noble dismissed Oleksy I and denied Barton's motion to intervene, holding that the Attorney General was the proper party to maintain the actions since the complaints sought enforce the terms of a charitable trust under *MCLA 554.351 et seq.*

"Motions for rehearing were filed by the parties and denied and plaintiffs appealed to the Michigan Court of Appeals. Barton took no appeal. However, on August 19, 1975, Barton filed a complaint in the nature of Quo Warranto (Jackson County Circuit Court No. 75-005068-CZ) naming only the Sisters of Mercy as a defendant, this complaint containing essentially the same allegations as were set forth in Oleksy I.

"On September 2, 1975, the Sisters of Mercy filed a motion for summary judgment and thereafter Barton filed an amended complaint in the nature of quo **[**458]** warranto adding Foote **[***9]** as a defendant and further alleging that the sale constituted an abuse and misuse of corporate **[*775]** authority between Sisters of Mercy and Foote, and further asserting that the sale constituted a violation of the Michigan Anti-trust Statutes.

"Defendants' motion for summary judgment was granted as to all of plaintiffs' allegations and Barton thereupon appealed to the Michigan Court of Appeals. The two appeals then pending before the Court of Appeals were consolidated for purpose of hearing and disposition, and on March 9, 1977, the Court of Appeals issued an opinion affirming the judgments of dismissal *(Oleksy, et al. v Sisters of Mercy of Lansing, Michigan, et al., 74 Mich App 374 [253 N.W.2d 772 (1977)])*. No appeal was taken by either of the plaintiffs or Barton to the Supreme Court.

"Approximately 10 months later plaintiffs requested and this court granted leave to file a complaint in the nature of quo warranto. The defendants filed motions to set aside the order granting leave to file said action of quo warranto and alternatively for accelerated judgment and summary judgment of dismissal, such motions being denied by this court on April 26, 1978. Defendants **[***10]** then filed an application for leave to appeal and designation of appeal as emergency appeal and a motion for immediate consideration thereof with the Court of Appeals. On June 7, 1978, the Court of Appeals [Docket No. 78-1515] denied defendants' application for leave to appeal for failure to persuade the Court for the need for immediate appellate review. The defendants then filed an application for leave to take an emergency appeal to the Michigan Supreme Court, which application was denied *[403 Mich 827 (1978)]*.

"On October 12, 1978, pursuant to a stipulation of the parties, this court entered an order dismissing all allegations of the complaint respecting the existence and representation of a class of persons in the prosecution of this action.

"Other than the two central issues of ultra vires conduct and violation of the anti-trust laws, which will be addressed last, the pleadings and proofs raised several lesser issues which can be disposed of with little discussion:

[*776] "I

"Should Plaintiff, Stanley P. Oleksy, be dismissed as a party, being no longer a resident of Michigan?

"The answer is no. Defendants have been unable to direct our attention to any authority **[***11]** in support of their claim that one who commences an action in Michigan while then a resident of Michigan, loses his standing by subsequently removing his residence from the state. It is this writer's opinion that the two main issues in this case (ultra vires conduct and anti-trust violations) are not issues which turn on residency.

"II

"Is plaintiffs' claim that the Sisters of Mercy held as trustees of a charitable trust res judicata?

"The answer is no. As pointed out by defendants, their motions for summary judgment, pursuant to GCR 1963, 117.2(1), must accept as true plaintiffs' allegations that Mercy Hospital was held as a charitable trust, and do not constitute an admission by them that such a charitable trust existed. In like manner, the opinion in *Oleksy v Sisters of Mercy, 74 Mich App 374 (1977)*, in ruling on defendants' motion for summary judgment, of necessity, had to accept as true plaintiffs' allegation that the hospital held in charitable trust. It did not decide, as a substantive matter, that such was the case.

"III

"The religious issue.

"Defendants have renewed their challenge to the court's jurisdiction over this dispute on grounds that it is a religious **[***12]** dispute under the *First* and *Fourteenth Amendments to the United States Constitution*. In determining that this court does **[**459]** have jurisdiction, I find nothing in the trial record which would cause a change in this court's opinion dated April 18, 1978.

"IV

"Did defendants, Sisters of Mercy, abuse their corporate authority or engage in ultra vires conduct in selling Mercy Hospital to Foote?

"The answer is no. Plaintiffs presented ten witnesses (counsel stipulated that an additional twenty witnesses **[*777]** would have if sworn and questioned, testified to the same effect) who testified that they made contributions to Mercy Hospital during the hospital fund drive held in the mid-1950's. There was evidence that the solicitation of contributions by Mercy stressed Mercy's desire to continue to provide hospital facilities for the Jackson area. Nine of the ten witnesses stated that they would not have contributed had they known that twenty years later Mercy would sell the hospital and take the proceeds out of the Jackson community (although no clear proof was offered on this subject, defendants did not seriously oppose plaintiffs' claim that the sale proceeds were to be used **[***13]** by Mercy elsewhere than in Jackson).

"The foregoing testimony is supportive of plaintiffs' claim that defendants breached the terms of a charitable trust. However, assuming a charitable trust had been created, the issue of whether its terms were violated by defendants was not before the court, since the Michigan Court of Appeals in *Oleksy I* has determined that ***HN2***[] prosecution of such violations has, by statute, been assigned exclusively to the Attorney General.

"It may well be that had Michigan's Attorney General elected, as did California's Attorney General, to act to prohibit this sale as a violation of the terms of a charitable trust, a Michigan court would have found such violation, based on Mercy's fund solicitations, as did the California court in *Queen of Angels Hospital v Younger, [66 Cal App 3d 359]* 136 Cal Reptr 36 (1977). Our Attorney General did not so elect.

HN3[] "Michigan's General Corporation Act provides:

"'Section 125. Any non-profit corporation, the objects of which require the transaction of business * * * the care and custody of property, * * * shall have the right and power to acquire, hold, protect and convey such properties as are naturally or properly **[***14]** within the scope of its Articles * * *' MCLA 450.125 [MSA 21.126].

HN4[] "Our Business Corporation Act provides:

"'Section 261. A corporation, subject to any limitation provided in this act, in any other statute of this state or in its Articles of Incorporation, shall have power in furtherance of its corporate purposes to:

(f) purchase, receive, take by grant, gift, devise, bequest **[*778]** or otherwise, lease or otherwise acquire, own, hold, improve, employ, use and otherwise deal in and with, real or personal property, or an interest therein, wherever situated;

(g) sell, convey, lease, exchange, transfer or otherwise dispose of * * * any of its property, or an interest therein, wherever situated.' *MCLA 450.1261* [MSA 21.200(261)].

"Title to the real estate on which Mercy Hospital is situated was acquired in 1915 by deed (Def Mercy Ex 4) to Sisters of Mercy, Diocese of Detroit, a predecessor to the present defendant, Mercy. This deed contained no restrictions as to the use of the lands or as to reconveyance. The Articles of Association of the grantee (Def Mercy Ex 21b) set forth as the purpose of the corporation 'the diffusing of moral and religious knowledge'.

"In 1937, **[***15]** the Sisters of Mercy, Diocese of Detroit, conveyed the hospital lands by deed (Def Mercy Ex 6) to its successor, Mercy Hospital of the City of Jackson, a non-profit corporation, organized in 1915, whose Articles of Association (Def Mercy Ex 22a) stated its purpose to be:

"'Article II * * * To conduct a hospital and furnish care and medical attendance to sick and disabled persons'.

[460]** This deed (Def Mercy Ex 6) likewise contained no restrictions as to use or as to reconveyance.

"In 1946, Mercy Hospital of the City of Jackson conveyed the hospital lands by deed (Def Mercy Ex 8) to its successor, The Sisters of Mercy, Lansing, Michigan. This deed, like the others, contained no restrictions as to use or as to reconveyance. The Articles of Incorporation of this non-profit corporation (Def Mercy Ex 25) set forth its purpose as:

"'Article II. To establish, maintain and conduct charitable institutions in the State of Michigan for the care and relief of indigent and other sick, infirm, aged or orphaned persons; * * * to perform corporal * * * works of mercy and to hold, own, manage and control real and personal properties and funds to be used for the * * * purposes aforesaid'.

[*16]** "In 1976, subsequent to the sale which is the subject **[*779]** of this lawsuit, The Sisters of Mercy, Lansing, Michigan merged with the following:

The Sisters of Mercy of Hammond, Indiana

The Sisters of Mercy of Grand Rapids

St. Joseph's Mercy Hospital of Dubuque (Iowa)

Sisters of Mercy Health Corporation

St. Joseph's Mercy Hospital of Detroit to form the present ownership of the hospital lands in question, Sisters of Mercy Health Corporation. The plan of merger (Def Mercy Ex 25) adopted as the purposes of the Health Corporation the purposes of its constituent predecessors.

"The proofs indicate that the original corporation, Sisters of Mercy, Diocese of Detroit, owned and operated various hospitals throughout Michigan, one of which is the hospital owned and operated by defendant, Mercy, in Jackson.

"Neither Michigan's corporation laws nor the Articles of Incorporation of the successive owners of the hospital at Jackson place any restrictions on the ownership, acquisition or conveyancing of real or personal assets. As pointed out by defendant, Mercy, in its brief, ***HN5***[] the burden rests on the one charging ultra vires conduct to sustain the charge. *American Employers' Insurance* ***[***17]*** *Company v H G Christman & Bros Co, 284 Mich 36, 43 [278 NW 750 (1938)]*. This plaintiffs have not done.

"Plaintiffs apparently rely on *Queen of Angels Hospital v Younger, supra*, to support their claim that ***HN6***[] a violation of the terms of a charitable trust can also be an ultra vires act. This writer does not quarrel with such a contention, but merely points out, as was pointed out by the California court, that the power given to the Angels of Mercy by its Articles of Incorporation 'to establish, own, maintain and operate a hospital in the City of Los Angeles' did not include the power to abandon its hospital in favor of out-patient clinics. No comparable restriction on the instant conveyance is contained in Mercy's Articles of Incorporation.

"V

"Do plaintiffs have standing to assert a violation of Michigan's anti-trust laws?

"The answer is yes. ***HN7***[] The persons who are entitled to **[*780]** seek relief under Michigan's anti-trust law are described in two different sections of the law:

" *MCLA 445.702* [MSA 28.32] directs the Attorney General or the Prosecuting Attorney to protect the public interest:

"'For a violation of any of the provisions of this act by any corporation **[***18]** or association mentioned herein, it shall be the duty of the attorney general or the prosecuting attorney of the proper county, to institute proper suits or quo warranto proceedings * * *'

" *MCLA 445.711* [MSA 28.38] permits the enforcement of private rights:

"'In addition to the criminal and civil penalties provided, any person who shall be injured in his business or property by any other person or corporation or association or partnership, by reason of anything forbidden or declared to be unlawful by this act, may sue therefor * * * and to recover **[**461]** two-fold the damages by him sustained * * *'

"Defendants are correct in asserting that plaintiffs have no standing to sue to enforce a private right under the act because they are not engaged in commerce and they have not shown any injury to their business or property. (See *MCLA 445.711* above.)

HN8[] "GCR 1963, 715.2 provides:

"'(1) *Actions by Attorney General*. Actions for quo warranto shall be brought by the Attorney General when the actions are against:

(a) persons specified in sub-rule 715.1(1);

(b) persons who usurp, intrude into, or wrongfully hold or exercise any office in any public corporation created by the authority **[***19]** of this state;

(c) any association, or number of persons, acting as a corporation within this state without being legally incorporated;

(d) a corporation that offends against any of the provisions of the act or acts creating, offering, or renewing the corporation;

(e) a corporation that violates the provisions of any law by which the corporation shall have forfeited its charter by misuser;

[*781] (f) a corporation that has forfeited its privileges and franchises by non-user;

(g) a corporation that has done or omitted any acts which amount to a surrender of its corporate rights, privileges and franchises; or has exercised any franchise or privilege not conferred upon it by law.'

"Our Court of Appeals in *Oleksy I, supra*, in holding that ***HN9***[] the attorney general has authority to prosecute anti-trust actions under the above rule, not only gave the rule precedence over conflicting *MCLA 445.702*, but found his anti-trust power within subsections (c)-(g) above -- areas where, under subsections (3) and (4) of the Rule, private citizens are given power to act if the attorney general refuses to. Plaintiffs are correct when they say that they have stepped into the attorney general's **[***20]** shoes to enforce a public interest.

"VI

"Did the sale of Mercy Hospital to Foote violate Michigan's anti-trust law?

"The answer is no. ***HN10***[] Michigan's Anti-Trust Law, *MCLA 445.701* [MSA 28.31] *et seq*. provides:

"'445. 701 Sec. 1. That a trust is a combination of capital, skill or arts by 2 or more persons, firms, partnerships, corporations or associations of persons, or of any 2 or more of them, for either, any or all of the following purposes:

1. To carry out restrictions in trade or commerce.

5. * * * Every such trust as is defined herein is declared to be unlawful * * *'

"As stated in *Barrows v Grand Rapids Real Estate Board, 51 Mich App 75 [214 N.W.2d 532] (1974)*:

HN11[] "'The Michigan Act is patterned after the Sherman Act adopted in 1890. Although Michigan courts are not required to follow the interpretations of the Sherman Act by the federal courts, it is in the federal law where we find most discussion relative to the restraint of trade provisions'.

"58 CJS 989-90 has this to say about the factors to be considered in determining whether one is looking at a monopoly which violates or does not violate the Sherman Act (so far as those factors are applicable to this case): **[***21]** ***HN12***[]

[*782] "'* * * in order to constitute a reasonable restraint of trade, competitors must not be oppressed or coerced; prices must not be arbitrarily fixed or maintained; the quality must not be impaired so that the old price buys a worse article * * * The fundamental test is a detriment to the public. All the circumstances surrounding the contract should be taken into consideration. The court should consider the relationship of the parties and their relation with the subject matter dealt with, and its relation with the general public, the facts peculiar to the business, its condition before and **[**462]** after the restraint was imposed, the purpose or end sought to be attained.'

"We shall attempt an analysis of the facts in this case in light of these factors, not necessarily in the order mentioned above.

"1. *All the circumstances surrounding the contract and the relationship of the parties*. Mercy Hospital has served the City of Jackson and its environs since 1915. In the late 1960's the sisters who operated the hospital were confronted with two problems, (i) they were unable to attract nuns in sufficient numbers to staff the hospital, (ii) in order to meet state standards, **[***22]** they would have to spend several millions of dollars in renovations. This would require them to assume a debt which they felt unable to meet. In 1973, they publicly announced their decision to withdraw from operation of the hospital, and invited the citizens of the area to assume ownership and operation of the hospital. For 15 months, the sisters engaged in negotiations with a group, composed in part of these plaintiffs, directed to that end. When these negotiations collapsed, the contract of sale which is before us was entered into between Mercy and Foote.

"This situation contains some of the element of 'economic necessity' found by our Supreme Court in *Attorney General, ex rel. State Banking Commissioner v Michigan National Bank; Grand Ledge State Bank v State Banking Commissioner, 377 Mich 481 [141 N.W.2d 73] (1966)*, as a justification for permitting the reduction of banking services in the City of Grand Ledge from two to one bank. Another aspect of the Grand Ledge merger situation which the court looked upon with **[*783]** favor was the 'open and competitive bidding' by two outside banks prior to the merger. Although our record does not reveal competitive bidding between **[***23]** Foote and any other bidder, it was only after 15 months of negotiations between Mercy and other interested parties failed that Foote entered the picture. In the absence of evidence to the contrary, Foote's offer, made only after another offer had been rejected, points to a purpose other than one to restrict trade or commerce. Surely lacking here is the picture of 'high finance and less lofty subterfuge' which the court found so repugnant in *Peoples Savings Bank v Stoddard, 359 Mich 297 [102 N.W.2d 777] (1960)*.

"2. *The parties relation with the subject matter dealt with and its relation to the general public*. Both Mercy and Foote and their predecessors, have been in the health care business for many years, and it is probably safe to say that between them they have provided most of the health care for the residents of the City of Jackson and the immediately surrounding area. Nothing in the record indicates that either party has offered any specialized hospital care which could characterize them as other than general hospitals. The single difference between them may be that Mercy espoused a prolife philosophy and Foote did not.

"One witness testified that the 'primary service **[***24]** area' for both Mercy and Foote was Jackson County. On the other hand, the testimony of other witnesses indicated that a substantial number of Jackson County residents use hospitals in adjoining counties. It does not appear from this record that Foote and Mercy, before their contract, enjoyed a hospital care monopoly in Jackson County, or that Foote enjoys one since their contract, either geographically or as to types of service offered. Additionally, as to the service aspect of the claimed monopoly, the record indicates that while Foote is now the only allopathic hospital left in Jackson County, osteopathic doctors serve on its staff as well as on the staff of the county's only osteopathic hospital. This issue is probably made moot however by the evidence to the effect that the distinctions between allopathy and osteopathy are rapidly disappearing if not already extinct.

"3. *The facts peculiar to the business*. The hospital **[*784]** care business in Michigan is a highly regulated industry. Cost containment restrictions are imposed upon all hospitals not only by state but by federal agencies. In addition, cost controls are imposed indirectly by the three major third party **[***25]** payors (Blue Cross/Blue Shield, Medicare and Medicaid) as a result of the restrictions which they attach to their hospital reimbursement. Although, none of the agencies **[**463]** can absolutely control a hospital's costs or charges, it is safe to say that both of these items are highly controlled. Likewise, through their sanctions, these agencies are able to exercise a measure of control over the quality of physical plant, equipment and care.

"4. *The condition of the industry before and after the contract*. This is directed to the quality of care and the level of patient care charges, before and after the contract of merger. Plaintiffs offered no proofs as to the quality of care at either Mercy or Foote, either before or after the merger, so one must assume that it is at least no worse now than it was before.

"Plaintiffs' witness, Furlong and Denton, testified that the situation since the merger places it within the power of Foote to control prices without limitations. This flies in the face of existing facts: a plaintiffs' witness testified that the cost of a bed in the intensive care unit had gone from $ 111.00 per day at Mercy in 1974 to $ 269.00 per day at Foote in **[***26]** 1978. No information was supplied concerning what portion of the increase resulted from inflation. His testimony that the highest cost for intensive care unit care elsewhere in the state in 1978 was $ 190.00 was contradicted by testimony of defendant's witness who testified that hospitals comparable to Foote and with comparable ICU charged between $ 200.00 and $ 300.00 per day. Defendant's witness further testified that patient per day cost at Foote for the 12 month period ending March 31, 1978, was $ 167.00, and that the average for the twenty-six other hospitals within the same category for the same period was $ 190.00.

"Summing up, I cannot find a monopoly in this record. And if one does exist, I find no intent to restrict trade thereby, nor any such restriction in fact.

"In view of the rulings herein on the issues of ultra **[*785]** vires conduct and violation of the anti-trust laws, it is not necessary to discuss the issues of estoppel and laches raised by defendants.

"Judgment may enter for defendants in accordance with this Opinion. No costs, a public question being involved.

"Dated February 7, 1979.

/s/Richard Robinson

Circuit Judge."

In recognizing the wisdom **[***27]** of this trial court opinion, we are not unmindful of the factors that prompted plaintiffs' actions. It is difficult to accept change, especially where, as here, a hospital facility, owned and operated by the Sisters of Mercy for so many years, is sold. Many emotions are aroused when such a sudden transfer occurs. Historical, ethnic, and sentimental values all come into play with the emphasis placed on preservation.

On the other hand, however, neighborhoods and businesses, including non-profit organizations, as here, do change with the times. This might be for any number of reasons. In the instant case, it was mainly due to financial pressures. Realistically, when all the legal arguments are set aside, what we have here is a sale from a willing seller to a willing buyer. Our sympathies go out to the plaintiffs who might feel abandoned by this transaction. Legally, however, we deem it to be a proper one.

Affirmed; defendants' cross-appeal is dismissed. No costs, a quasi-public question being involved.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN1[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

It would be destructive of rights of association and of petition to hold that groups with common interests may not, without violating the antitrust laws, use the channels and procedures of state and federal agencies and courts to advocate their causes and points of view respecting resolution of their business and economic interests vis-a-vis their competitors.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Not all conduct that might be characterized as advocacy before legislative, administrative or judicial bodies is automatically protected. That the objective of perjury, fraud, and bribery may be to influence some governmental action can hardly be considered redeeming. Consequently, there are exceptions to the rule that resort to governmental bodies is conduct immune from antitrust attack. Where such conduct is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor application of the Sherman Act would be justified. Similarly, where the objective of the conduct is to harass and deter competitors from having free and unlimited access to the agencies and courts, it will not be immune.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Scope

HN3[] Exemptions & Immunities, Noerr-Pennington Doctrine

Where conduct properly proscribed is coupled with conduct protected by the *first amendment*, the latter does not cure the former. *First Amendment* rights are not immunized from regulation when they are used as an integral part of conduct which violates a valid statute. They may not be used as the means or the pretext for achieving substantive evils, which the legislature has the power to control. Thus, an otherwise illegal scheme to restrain competition is not legitimated simply because it includes plans to lobby the legislature, commence a lawsuit, or speak to the press.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Tying Arrangements, Clayton Act

Where a corporation and its wholly owned subsidiary avail themselves of the privilege of doing business through separate corporations, the fact of common ownership can not save them from any of the obligations that the law imposes on separate entities. As a general proposition, a parent and its subsidiary may constitute independent conspirators purposes of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*. Whether or not the affiliated corporations are competing or non-competing is not dispositive; even non-competing affiliated corporations may act in concert to adversely affect free market competition, e.g., by tying one product to another; by compelling restrictive purchase agreements; by fixing maximum resale prices.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

HN5[] Defenses, Demurrers & Objections, Motions to Strike

A pleading should be stricken only when it appears beyond peradventure that it is sham and false and that its allegations are devoid of factual basis; otherwise it would deprive a party of his right to a trial of the issues posed by his complaint it would mean trial by affidavits.

HN7[] **Civil Actions, Discovery**

Those who seek to avoid disclosure of commercial information by a protective order under *Fed. R. Civ. P. Rule 26(c)* bear a heavy burden of demonstrating that disclosure will work a clearly defined and very serious injury.

Counsel: [1]** Rogers & Wells, New York City by John J. Sheehy, James B. Weidner, and James V. Ryan, New York City, for plaintiffs and counterdefendants.

Rogers, Hoge & Hills, New York City by Frank H. Gordon, New York City, and Covington & Burling, Washington, D. C. by Harry L. Shniderman, and James C. McKay, Jr., Washington, D. C., for defendants.

Winthrop, Stimson, Putnam & Roberts, New York City by John B. Daniels, New York City, for third party American Express Company.

Opinion by: CANNELLA

Opinion

[*758] MEMORANDUM AND ORDER

Motion to dismiss Counts 1 and 2 of defendants' counterclaim, for failure to state a claim upon which relief can be granted, is denied. *Fed.R.Civ.P. 12(b) (6)*.

Motion to dismiss Count 3 of defendants' counterclaim, on the ground that the defendants do not have standing to raise it, is denied.

Motion to strike portions of defendants' counterclaims, as sham and false, is denied. *Fed.R.Civ.P. 11*.

Defendants' objections, to rulings made by the Honorable Leonard A. Bernikow, United States Magistrate, at a hearing held on October 24, 1978, are dismissed. *28 U.S.C. § 636(b)(1)(A)*.

Defendants' motion, for an Order placing materials on the public record, is denied.

[2]** Jurisdiction in this case is based on *15 U.S.C. §§ 15*, *26*.

[*759] BACKGROUND

The plaintiffs Citicorp and Citicorp Services Inc. ("CSI") are Delaware and New York corporations, respectively, both with their principal places of business in New York City. Citicorp conducts a wide range of financial and banking activities, and most pertinent to the instant case, is the issuer of "First National City Travelers Checks," which CSI, its wholly owned subsidiary, distributes and sells.

The defendants Interbank Card Association ("Interbank") and MCTC Corporation ("MCTC") are both not-for-profit membership corporations organized under the laws of Delaware, with their principal places of business in New York City. The defendant John J. Reynolds is President and a director of both Interbank and MCTC. Interbank has over 8,000 members, largely commercial banks and other thrift institutions located throughout the United States. It is the owner and exclusive licensor of the service mark "Master Charge" and an accompanying logo, which it has licensed most of its members to use on credit cards. Interbank is governed by a Board of Directors selected by its members.

According to the complaint, **[**3]** some of Interbank's members created MCTC for the purpose of entering the travelers check market. The defendants concede, as they must to uphold MCTC's standing to raise its counterclaim, that Interbank has licensed MCTC to use the "Master Charge" service mark and logo on travelers checks, and that MCTC has definite plans to issue, distribute and sell "Master Charge Travelers Cheques" through the members of Interbank.

A travelers check is a device for payment. Its "issuer" is the company that prints the check and offers it for sale, usually through a bank acting as selling agent. The check, which is customarily issued in various standard denominations of American or foreign currency, is much like a cashier's check in that the issuer is, in effect, drawer and drawee. [1.] Upon purchasing a travelers check, the purchaser must sign it in the presence of the selling agent. Then, upon negotiating the check, the purchaser must fill in the date and countersign it in the presence of the person who accepts it as payment. He may also designate that person as payee. The extent of the issuer's promise is to pay on demand the amount indicated by the denomination of the check, provided that **[**4]** the check is properly countersigned, and, in the event that the check is lost or stolen, after having been signed at purchase, but before being countersigned, to provide the purchaser with an immediate refund or replacement. [2.]

Although they have been in use since 1891, the legal status of travelers checks remains largely unresolved. [3.] They have been characterized as "contracts," [4.] "money," [5.] **[**6]** and various types of "negotiable instruments, **[*760]** " [6.] including "cashier's checks" [7.] and "certificates of deposit." [8.] Fortunately, for the purposes of this case, their

It is common knowledge that any establishment issuing travelers checks intends its checks to be readily and freely passable from one person to another as money. This is not only intended, but it is widely advertised that travelers checks are readily accepted in commerce as money and that they are safer. The public is made to believe that travelers checks are a substitute for money, a medium of exchange, which are self-identifying and accepted everywhere, but, unlike currency, they can be carried without danger of loss or theft because of the protective device of signature and countersignature.

We believe that if travelers checks are intended by the issuer and accepted by the public as a medium of exchange to take the place of money, they should be subjected to the same rules of law applicable to money under like circumstances.

We therefore hold that travelers checks upon being printed become a medium of exchange or acquire negotiable characteristics and all the risk of theft is with the issuer. The issuer is thus liable to any bona fide holder of stolen travelers checks who has paid valuable consideration.

471 P.2d at 533-34, 42 A.L.R.3d at 842-43.

6. Official comment 4 of *section 3-104 of the Uniform Commercial Code* provides: "Traveler's checks in the usual form . . . are negotiable instruments under this Article when they have been completed by the identifying signature."

commercial attributes are more important than their legal ones. Because they are issued in standard denominations, easily negotiated, and readily accepted worldwide, they are the virtual equivalent of money, but because of the issuer's promise to refund or replace lost or stolen checks, they **[**5]** are safer.

The issuer's gain from the sale of travelers checks derives from two sources. One is a "commission," as much as one percent of the face amount of the check, charged to the purchaser, a portion of which the selling agent retains. [9] **[**7]** The other is the "float," which is the money paid for the checks which remains at the disposal of the issuer until the purchaser negotiates them. [10] An established issuer doing a steady business can expect a steady "float," and thus will have a fairly constant amount of money available for investment. According to one estimate, American Express had a $ 1.9 billion float at the end of 1977. [11]

The market in United States dollar travelers checks is highly concentrated. Estimates vary, and, of course, ultimate proof on this question must await trial, but many sources suggest that 90% To 95% Of the United States dollar travelers checks sold are issued by three companies: American Express, with approximately 55% To 60% Of sales; Citicorp, with approximately 20%; and BankAmerica Corp., with approximately 15%. Other issuers with small market shares are Thos. Cook & Son (Bankers) Ltd., Barclays Bank, and Republic Money Orders, Inc.

Citicorp and CSI filed the complaint in this case on April 12, 1978, charging that the defendants' plan to issue and market Master Charge Travelers Cheques violates *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, and *section 7* of the Clayton Act, *15 U.S.C. § 18*. Plaintiffs allege that purchasers of travelers checks ordinarily do not express a strong preference for a particular brand, and that **[**8]** the vast majority of purchasers will actually accept whatever check a selling agent offers them. Since most selling agents are banks that are also members of Interbank, plaintiffs contend that Interbank would be in a unique position to determine the brand purchased by most purchasers of travelers checks. No other issuer would have such power at the "point of sale." According to plaintiffs, the members of Interbank would be able to foreclose competition because 90% Of a bank's customers who wish to purchase travelers checks will buy whatever brand the bank favors.

The defendants have counterclaimed against the plaintiffs, and have joined as additional counter-defendants Citibank, N.A., its Senior Vice President David M. Phillips, Citicorp Credit Services, Inc., and Citibank (New York State), N.A. (Hereinafter these parties and the plaintiffs will be referred to collectively as the "Citicorp parties.") Phillips, in addition to being Senior Vice President of Citibank, N.A., has been, at all pertinent times, a director of Interbank.

The counterclaim is divided into three counts. Counts One and Two charge the Citicorp parties with conspiracy "among themselves and with others" to prevent **[**9]** Interbank's and MCTC's entry into the travelers check market. Aside from conclusory allegations, the particular conduct alleged as constituting this conspiracy consists essentially of only six acts or practices: (1) from 1969 through 1977, cooperating with **[*761]** Interbank in the development of Master Charge Travelers Cheques, in the hope of protecting their own "interests in the travelers check field"; [12] (2) when cooperation failed, threatening to sue; [13] (3) publicizing a legal opinion letter that Interbank's and MCTC's proposed entry violated ***antitrust law***; [14] (4) disclosing to a trade publication controlled by American Express a confidential contrary opinion prepared by Interbank's counsel; [15] (5) bringing this suit; [16] and (6) making with CSI's

14. Id.

selling agents, which, as noted above, are mostly banks, "discriminatory arrangements and contracts . . . (,) the effect of which is to impede or prevent other financial institutions from entering the travelers check market through the Master Charge Travelers Cheque program." [17.] The defendants also allege that Phillips breached his contractual and fiduciary obligations to Interbank by disclosing the confidential legal opinion. **[**10]**

Count Three of the counterclaim alleges that the Citicorp parties have violated ***antitrust law*** also by arranging to acquire Carte Blanche Corporation ("Carte Blanche"). Carte Blanche's principal business is allegedly the issuance of "general purpose credit cards" bearing the "Carte Blanche" service mark and logo, and the provision of services to cardholders and to the merchants who honor the cards. The defendants assert that the acquisition will substantially reduce competition in the general purpose credit card market, as well as the travelers check market, and is therefore prohibited by *section 7* of the Clayton Act, *15 U.S.C. § 18*.

"General purpose credit cards," according to the counterclaim, are "credentials which provide (their holders) with the right to purchase goods or services on credit at a wide variety of business establishments," as distinguished from credit **[**11]** cards issued by individual companies, such as oil companies, airlines, and large retail chains. Allegedly, "(t)here are only five domestic general purpose credit cards accepted on a national scale by merchants and available to consumers": Master Charge, Visa, American Express, Diners Club, and Carte Blanche. [18.]

Like a travelers check, a credit card is a device for payment that is in some ways equivalent to cash. Unlike a travelers check, however, a credit card is also a device for borrowing money. In exchange for goods and services, the cardholder gives the merchant his promise to pay. The "issuer" of the card "in effect finances the merchant's accounts receivable by discounting the sales slips and collecting payment from the cardholder, either at once or on a deferred revolving credit basis." [19.]

[12]** DISCUSSION

Counts One and Two

The Citicorp parties seek dismissal of Counts One and Two of the counterclaim on two grounds. First, they argue that their conduct is protected by the so-called Noerr-Pennington doctrine, which is essentially a claim that it is protected by the *first amendment*. Second, they assert that since they are subsidiaries and an employee of a single corporate entity, they cannot legally be guilty of conspiracy.

In *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*, the Supreme Court summarized the principles of its earlier decisions in *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, and *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*:

> **[*762]** ***HN1***[] (I)t would be destructive of rights of association and of petition to hold that groups with common interests may not, without violating the antitrust laws, use the channels and procedures of state and federal agencies and courts to advocate their causes and points of view respecting resolution of their business and economic interests Vis-a-vis **[**13]** their competitors.

404 U.S. at 510-11, 92 S. Ct. at 612. The Court noted, however, that ***HN2***[] not all conduct that might be characterized as advocacy before legislative, administrative or judicial bodies is automatically protected. That the objective of perjury, fraud, and bribery may be to influence some governmental action can hardly be considered

15. Id. P 11.

16. Id. P 12.

17. Id. P 13.

18. Id. P 20.

19. B. Clark & A. Squillante, The Law of Bank Deposits, Collections and Credit Cards 187 (1970).

redeeming. See *id. at 512-13, 92 S. Ct. 609*. Consequently, there are exceptions to the rule that resort to governmental bodies is conduct immune from antitrust attack. Where such conduct is a "mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor . . . application of the Sherman Act would be justified." *Noerr, supra, 365 U.S. at 144, 81 S. Ct. at 533*. Similarly, where the objective of the conduct is "to harass and deter . . . competitors from having "free and unlimited access' to the agencies and courts," it will not be immune. See *California Transport, supra, 404 U.S. at 515, 92 S. Ct. at 614*.

There is an even more fundamental principle of *first amendment* doctrine which applies here. ***HN3***[] Where conduct properly proscribed is coupled with conduct protected **[**14]** by the *first amendment*, the latter does not cure the former. See, e.g., *Ohralik v. Ohio State Bar Ass'n, 436 U.S. 447, 456, 98 S. Ct. 1912, 56 L. Ed. 2d 444 (1978)*; *Runyon v. McCrary, 427 U.S. 160, 175-76, 96 S. Ct. 2586, 49 L. Ed. 2d 415 (1976)*; *Cox v. Louisiana, 379 U.S. 559, 563, 85 S. Ct. 476, 13 L. Ed. 2d 487 (1965)*. As the Supreme Court stated flatly in California Transport, "*First Amendment* rights are not immunized from regulation when they are used as an integral part of conduct which violates a valid statute. . . . (They) may not be used as the means or the pretext for achieving "substantive evils' . . . which the legislature has the power to control." *404 U.S. at 514-15, 92 S. Ct. at 613-614* (citing *Giboney v. Empire Storage & Ice Co., 336 U.S. 490, 69 S. Ct. 684, 93 L. Ed. 834 (1949)*, and *NAACP v. Button, 371 U.S. 415, 444, 83 S. Ct. 328, 9 L. Ed. 2d 405 (1963))*. Thus, an otherwise illegal scheme to restrain competition is not legitimated simply because it includes plans to lobby the legislature, commence a lawsuit, or speak to the press. See *Commerce Tankers Corp. v. National Maritime Union, 553 F.2d 793, 800* (2d Cir.), Cert. denied, *434 U.S. 923, 98 S. Ct. 400, 54* ***[**15]*** *L. Ed. 2d 280 (1977)*; *United States v. Braniff Airways, Inc., 453 F. Supp. 724, 730-31 (W.D.Tex.1978)*.

The defendants' counterclaim charges that the Citicorp parties entered into discriminatory contracts with the selling agents for First National City Travelers Checks. Although this allegation is rather sparse in detail, the Court finds that, together with allegations of the Citicorp parties' intentions to exclude defendants from the travelers check market, it is sufficient to state a claim upon which relief can be granted. Viewed in a light most favorable to the defendants, the counterclaim alleges that the contracts between the Citicorp parties and the selling agents were designed to prevent or impede new entry into the travelers check market, and that they had that effect. If proven, this could constitute a group boycott violative of *section 1* of the Sherman Act. See, e.g., *United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; *Klor's Inc. v. Broadway-Hale Stores, Inc.. 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*. Consequently, the counterclaim does not seek to predicate an antitrust violation solely on activity protected by the **[**16]** *first amendment*, and, therefore, cannot be dismissed on the basis of the Noerr-Pennington doctrine.

The second ground proffered for dismissal of Counts One and Two of the counterclaim, namely, that commonly-owned corporate entities cannot be held to have conspired with one another, is not the law. In *Perma Life Mufflers, Inc. v. International* ***[*763]*** *Parts Corp., 392 U.S. 134, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*, the Supreme Court held that ***HN4***[] "since (a corporation and its wholly owned subsidiary) availed themselves of the privilege of doing business through separate corporations, the fact of common ownership could not save them from any of the obligations that the law imposes on separate entities." *Id. at 141-42, 88 S. Ct. at 1986*. As Judge Neaher has aptly summarized:

> As a general proposition, a parent and its subsidiary may constitute independent conspirators for *§ 1* purposes. . . .
>
> Whether or not the affiliated corporations are competing or non-competing is not dispositive; even non-competing affiliated corporations may act in Concert to adversely affect free market competition, E. g., by tying one product to another; by compelling restrictive purchase agreements; **[**17]** by fixing maximum resale prices.

Diehl & Sons, Inc. v. International Harvester Co., 426 F. Supp. 110, 116-17 (E.D.N.Y.1976) (citations and footnotes omitted).

Moreover, the counterclaim alleges that the Citicorp parties entered into discriminatory contracts with selling agents, most of which allegedly are independent banks. Thus, it also alleges a conspiracy with entities that are not Citicorp subsidiaries.

Count Three

The Citicorp parties maintain that Interbank lacks standing to complain of the Carte Blanche acquisition, since Interbank does not actually issue credit cards, but merely licenses its members to use the Master Charge service mark and logo on the cards they issue. They rely primarily on *Billy Baxter, Inc. v. Coca-Cola Co., 431 F.2d 183 (2d Cir. 1970)*, Cert. denied, *401 U.S. 923, 91 S. Ct. 877, 27 L. Ed. 2d 826 (1971)*, in which the Second Circuit held that a franchisor and trademark licensor was an inappropriate plaintiff to sue for "damage caused by illegal interference with the marketing of its franchisees' products." *Id. at 189*.

While it is conceded that Interbank does not issue credit cards, it is not conceded that its interest lies merely in the royalties **[**18]** paid by its members. Interbank allegedly provides the promotional and administrative services without which a credit card would be unmarketable. It advertises the Master Charge mark; without such promotion it is doubtful that merchants would honor the card or that customers would carry it, irrespective of who issued it. In addition, Interbank provides data transmission services to its members. [20]

Most important, credit **[**19]** cards are not soft drinks. The value of a card lies not in its inherent qualities, but in the services to which the card entitles its owner. Competition does not cease when a customer chooses a card from among the "big five." Each time a cardholder uses a card to purchase goods and services from a participating merchant, he purchases commodities and services from the credit card organization: goodwill and credit, and remittance and billing services. Not all issuers provide all these services. Apparently, Carte Blanche does. The banks that issue Master Charge cards do not.

It is therefore inaccurate to say that only issuers compete in the "credit card market," because competition is not limited to signing up cardholders. This is further evidenced by the fact that many persons carry more than one card. Interbank, the actual seller of some of the goodwill and services purchased by holders of Master Charge cards, has a substantial interest in preserving competition for these services, and any conduct that tends to diminish that competition would directly injure Interbank. **[*764]** Thus, Interbank has standing to challenge the Citicorp parties' acquisition of Carte Blanche.

[20]** As to MCTC, the Citicorp parties point out quite correctly that it does not have standing to complain of conduct aimed at the market for credit card services. Nevertheless, the Court is inclined to uphold its standing on two grounds.

First, at this stage of the case, the pertinent product market has yet to be defined. There may be significant "interchangeability of use or . . . cross-elasticity of demand between" credit card services and travelers checks. See *Kennecott Copper Corp. v. Curtiss-Wright Corp., 584 F.2d 1195, 1203 (2d Cir. 1978)*. If so, then a merger between a leading issuer of travelers checks and one of the five major providers of credit card services might be shown to diminish competition in a market that properly includes both products. Such a diminution would directly injure a corporation on the verge of entering the travelers check market.

---

[20] In *Sulmeyer v. Seven-Up Co., 411 F. Supp. 635 (S.D.N.Y.1976)*, Judge Stewart upheld a soft drink franchisor's standing to complain of unlawful marketing and distribution of soft drinks, where it had been shown that the franchisor:

manufactured concentrates, franchised bottlers, supplied advertising and promotional material, offered substantial assistance to its franchisees, and was actively involved in supervising the work of the franchisees.

Id. at 638. In addition, the franchisor had alleged that the defendants had coerced its potential franchisees to refrain from doing business with it.

Second, MCTC alleges that Citicorp plans to use Carte Blanche as a vehicle for marketing its travelers checks, which, it is claimed, would raise substantial barriers to new entry in the travelers check market. See, e.g., *FTC v. Procter & Gamble Co., 386 U.S. 568, 579, 87 S. Ct. 1224, 18 L. Ed. 2d 303 (1967)*. At this stage, **[**21]** the Court cannot say that this claim is unprovable. And, while MCTC might be in a position to overcome such a barrier by exploiting its relationship with Master Charge card issuers this alone cannot defeat its standing, since it would still have an interest in an unfettered market. The antitrust laws protect "Competition, not Competitors." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*.

Motion to Strike

Counts One and Two also allege that David M. Phillips, Senior Vice President of Citibank, revealed a confidential opinion letter, prepared by Interbank's outside counsel, to Phillip Brooke, who was at the time editor of a trade publication entitled "Action Report." Action Report is published by Payment Systems, Inc., allegedly a subsidiary of American Express. Action Report subsequently published an article written by Brooke which revealed the contents of the letter. The counterclaim further alleges that Phillips was at the time a director of Interbank, and thus had fiduciary obligations not to reveal its confidences.

The **[**22]** Citicorp parties have now moved to strike as sham and false the allegations concerning Phillips. They charge that the only basis for the allegations is speculation. Furthermore, they contend that they have proven them false.

The defendant John J. Reynolds, Chief Executive Officer of Interbank, concedes that he has no direct evidence that Phillips or anyone else at Citibank actually released the opinion letter. He does claim to know, however, that Phillips had the letter, and that as an Interbank director, Phillips voted against the Master Charge Travelers Cheque plan for the express reason that it would be detrimental to Citicorp's travelers check subsidiary, CSI. The defendants also claim to have evidence that CSI, although not an Interbank member, had a copy of the opinion letter before its general publication.

The evidence that purportedly proves the falsity of the allegations consists of the following: (1) Phillips' denial; (2) Brooke's refusal to answer questions as to his source; and (3) a Payment Systems Vice President's disavowal of any knowledge of Brooke's source.

Fortunately, all parties agree with Judge Weinfeld's statement of the law in Murchison v. Kirby:

> **[**23]**
>
> ***HN5***[] A pleading should be stricken only when it appears beyond peradventure that it is sham and false and that its allegations are devoid of factual basis; otherwise it would deprive a party of his right to a trial of the issues posed by his complaint it would mean trial by affidavits.

27 F.R.D. 14, 19 (S.D.N.Y.1961) (footnotes omitted).

[*765] The Court finds that the moving parties have not proven the allegations against Phillips to be false beyond peradventure. Indeed, on the basis of what the parties have presented thus far, the Court cannot discern where the truth lies, which is precisely why this matter should be decided by trial and not affidavit.

Objections to Magistrate's Discovery Rulings

Defendants served a subpoena duces tecum on American Express, not a party to this action. Included in their document requests were the following:

(9) All documents referring to any contacts or proposed contacts with the Department of Justice, or any other federal or state agency concerning the Master Charge or VISA travelers checks.

(19) Studies, reports, surveys or memoranda estimating the size or the expansion of the size of the United States dollar travelers **[**24]** check market.

(20) Studies, reports, surveys, or memoranda estimating the market share or predicting the future market share of any issuer of United States dollar travelers checks.

(21) Studies, reports, surveys or memoranda concerning relevant aspects of travelers checks including but not limited to the 1973 A.C. Nielsen Retailer Attitude Survey and the 1975 A.C. Nielsen Retailer Acceptability Survey.

(22) Studies, reports, surveys, or memoranda concerning consumer acceptance of travelers checks or consumer preference for a particular brand of travelers check.

At a hearing on October 24, 1978, Magistrate Bernikow sustained American Express' objections to all of these requests. Defendants now seek this Court's reconsideration of the Magistrate's rulings.

Defendants bear a heavy burden. ***HN6***[] The Court may reconsider discovery matters referred to a Magistrate pursuant to *section 636(b)(1)(A)* of Title 28, if the Magistrate's rulings are "clearly erroneous or contrary to law." Moreover, in resolving discovery disputes, the Magistrate is afforded broad discretion, which will be overruled only if abused. See *Sherrell Perfumes, Inc. v. Revlon, Inc., 77 F.R.D.* ***[**25]*** *705, 707 (S.D.N.Y.1977)*. In considering, on the one hand, the defendants' need for information, especially information that could help to define the relevant markets in this case, and, on the other, American Express' interests in protecting its privacy and property, the Magistrate's rulings were neither clearly erroneous on the facts nor contrary to law. Accordingly, the Court will not reconsider them.

Motion to Disclose Confidential Materials

Defendants seek to have various materials produced by the Citicorp parties and others who are not parties to this suit made public. Defendants argue, quite correctly, that even with respect to materials disclosed for pretrial discovery purposes, secrecy is the exception, not the rule. As Judges Brieant and Edelstein have held, ***HN7***[] those who seek to avoid disclosure of commercial information by a protective order under *Rule 26(c) of the Federal Rules of Civil Procedure* bear a heavy burden of demonstrating that "disclosure will work a clearly defined and very serious injury." *Reliance Insurance Co. v. Barron's, 428 F. Supp. 200, 202-203 (S.D.N.Y.1977)*; *United States v. IBM, 67 F.R.D. 40, 46 (S.D.N.Y.1975)*.

In the instant case, however, the parties **[**26]** including defendants and non-parties that have produced materials in response to discovery requests and orders have done so pursuant to a stipulation prohibiting disclosure. This stipulation provides that where one or more of its signatories wishes to disclose any confidential information, and another objects, they may submit their dispute to the Court, which may order disclosure.

The stipulation is silent about the standard to be applied to determine whether disclosure is warranted, except that it shall be "for good cause shown." But regardless of what may constitute "good **[*766]** cause," the Court is constrained to agree with those opposing the defendants' motion that disclosure now is premature. The motion is in large part predicated on the presumption that the Court would need to refer to confidential materials in order to rule on the combined motions now before it. Since this has not turned out to be so, there is no compelling reason to destroy confidentiality, at least not for now.

CONCLUSION

Accordingly, the motions to dismiss or strike portions of the counterclaim are denied. Defendants' request to place certain materials on the public record is denied, and its objections **[**27]** to Magistrate Bernikow's discovery rulings are dismissed.

SO ORDERED.

HN2[] **Costs & Attorney Fees, Costs**

When note provisions allow a creditor to charge a debtor for the costs of collection, including attorney fees, such fees may include all costs attributable to collecting the debt.

Judges: Before ROSS, STEPHENSON and HENLEY, Circuit Judges.

Opinion by: STEPHENSON

Opinion

[*824] This is an appeal from the findings and judgment of the district court [1.] in favor of the defendant-counterclaimant bank in the amount of its loan, plus attorney fees and costs, against plaintiff-appellant. The two primary issues on appeal are whether defendant bank violated the Bank Holding Company Act of 1970 in making the loans to plaintiff, and whether the trial court's award of attorney fees and costs was proper. We affirm.

[2]** Originally defendant-appellee herein, Third Northwestern National Bank of Minneapolis (Bank), brought suit in the Minnesota state courts to collect a $ 30,000 obligation evidenced by promissory notes signed by Willis M. Duryea, Jr., plaintiff-appellant herein. Thereafter Duryea commenced this federal court action against the Bank, claiming the loans in question violated the Bank Holding Company Act Amendments of 1970, *12 U.S.C. § 1971, et seq.*; the Sherman Act, *15 U.S.C. § 1*; Minnesota ***antitrust law***, *Minn.Stat.Ann. § 325.8013* (Supp.1979); Minnesota common law fraud and unjust enrichment; violation of the Securities Act of 1933, *15 U.S.C. §§ 77a-77aa*; the Securities Exchange Act of 1934, *15 U.S.C §§ 78a-78hh*; and Minnesota Blue Sky Law, Minn.Stat.Ann. Ch. 80 (1968) (current version Minn.Stat.Ann. Ch. 80A (Supp.1979)). Duryea also named as defendants the Bank's past president, Bruce C. Winslow (Winslow), Robert L. Krause (Krause), Krause Investment Corporation (KIC), and Variable Investment Corporation (VIC). Appellee Bank counterclaimed on its loan for $ 30,000 plus interest and costs of collection, including attorney fees. [2.]

[3]** The magistrate found for the Bank on its counterclaim and against Duryea on all of his claims, and awarded the Bank full recovery of the loan ($ 30,000), a stipulated amount of interest, and $ 22,097.21 as costs of collection, which included attorney fees.

The record discloses that appellant Duryea was approached by Krause, [3.] a long-standing friend, accountant and financial adviser of his, concerning a condominium development in Desert Hot Springs, California, in which Krause was involved. Krause proposed to Duryea that Duryea borrow money from the Bank, where Winslow, a friend of Krause, was president; then the money that Duryea had borrowed from the Bank would be invested in the condominium project of Krause. Krause's corporation, KIC, would pay the cost of the loan and all interest involved. The reason for this roundabout method of obtaining funds was that the Bank at that time did not want to extend credit directly to the project. Krause, Winslow and Duryea were all aware of what was being done with the money.

[4]** Duryea never met or talked with any official of the Bank. Krause prepared and furnished the Bank with Duryea's financial statement. Krause prepared the note and secured Duryea's signature on the note. It was Duryea's belief that he was entering into negotiations with the Bank to borrow money for the purpose of helping Krause finance development of the project which KIC was constructing. When Duryea signed the note, it was his intention to lend the proceeds to Krause for use on the project.

In connection with the loan, Duryea intended, at some unspecified future date, to **[*825]** purchase one of the condominiums from KIC. Although not reduced to writing, it was understood that Duryea would receive some preference and consideration from KIC when it came time to offer the condominiums for sale.

---

1. Pursuant to stipulation of the parties the district court ordered that trial of this cause be before the United States Magistrate "and that any appeal be directly to the Court of Appeals for the Eighth Circuit from the judgment entered by this court consistent with and pursuant to the Findings of Fact, Conclusions of Law, and Recommended Order for Judgment of the Magistrate, and without appeal to the undersigned." We "remanded to the district court for consideration of the conclusions of law made by the United States Magistrate and certification of the results to this court." *Duryea v. Third Northwestern National Bank of Minneapolis, 602 F.2d 809 at 810 (8th Cir. 1979)* (footnote omitted). The latter has now been received and considered.

2. Krause, KIC and VIC were dismissed at the commencement of the trial.

3. Duryea had been Krause's personal physician for several years.

Initially, on November 18, 1971, $ 20,000 was loaned by the Bank to Duryea, and the money order was taken by Krause to Duryea, who endorsed it over to KIC. At the same time, Krause gave Duryea a note from KIC for $ 20,000. The notes were due in 90 days and renewed every 90 days thereafter. Approximately a year later an additional $ 10,000 was borrowed from the Bank by Duryea after **[**5]** discussions with Krause. The money was furnished to KIC and subsequently the note from Duryea to the Bank and the note from KIC to Duryea were increased to $ 30,000 to reflect the increased loan. As before, Krause handled all note renewals and paid all interest on Duryea's notes to the Bank. Eventually, KIC went into bankruptcy, the note to Duryea became worthless, and the Bank demanded payment from Duryea on his $ 30,000 note plus interest and costs including attorney fees.

Duryea limits his appeal to the court's finding that there was no violation of the Bank Holding Company Act (BHCA) by the Bank and the amount of attorney fees awarded the Bank.

HN1[] The BHCA, *12 U.S.C. § 1972 (Supp.1978)*, provides in pertinent part:

> A bank shall not in any manner extend credit * * * on the condition or requirement
> (3) that the customer provide some additional credit, property, or service to such bank, other than those related to and usually provided in connection with a loan * * *.

The intent of the BHCA Amendments of 1970, which include the above, is "to provide specific statutory assurance that the use of the economic power of a bank will not lead to a lessening of competition **[**6]** or unfair competitive practices." The purpose is to "prohibit anti-competitive practices which require bank customers to accept or provide some other service or product or refrain from dealing with other parties in order to obtain the bank product or service they desire." 1970 U.S.Code Cong. & Admin.News, pp. 5519, 5535. The amendments prohibit certain types of tying arrangements within the banking industry but are not intended to interfere with the conduct of appropriate traditional banking practices. *Clark v. United Bank of Denver Nat'l Ass'n, 480 F.2d 235, 238* (10th Cir.), Cert. denied, *414 U.S. 1004, 94 S. Ct. 360, 38 L. Ed. 2d 240 (1973)*. The intent and purpose of the amendments are very similar to those of the antitrust laws in that both seek to guard against unfair competition. *Swerdloff v. Miami Nat'l Bank, 584 F.2d 54 (5th Cir. 1978)*.

The trial court found with reference to the alleged violation of the BHCA Amendments that "Duryea was not coerced, required, or encouraged by the Bank to loan money to Krause or KIC;" further that "Duryea provided no service to the Bank in connection with its loans to him," and concluded, "(t)he Bank has not violated the Bank Holding Company **[**7]** Act of 1970 (*12 U.S.C. § 1972*)."

Duryea contends that the court's findings are clearly erroneous and therefore its conclusion that there was no violation of the BHCA was in error. We disagree.

Initially we note that the record discloses that Duryea was never in the Bank and never met the Bank officials. The most that can be said is that during a discussion between Winslow (Bank president) and Krause, Winslow told Krause that Winslow would be willing to loan money to Krause's credit-worthy Minnesota friends if they wanted to help. Thereafter, Krause asked Dr. Duryea if he wanted to participate, and Duryea willingly agreed. The court found and the record discloses that as early as 1970 Duryea and his wife visited the project at the request of Krause, and were impressed with it, and expressed interest in purchasing a condominium in the project at some future time. However, no agreement was made then or at any subsequent time **[*826]** with respect to any future sale of a condominium unit.

Thereafter, in November 1971, Krause, acting in Duryea's behalf, secured the loan papers which Duryea executed. The notes contained no unusual restrictions or conditions. Likewise the Bank's **[**8]** money orders issued to Duryea were without restriction. They were delivered by Duryea's friend, Krause. No one from the Bank was present when Duryea received the money orders and endorsed them to KIC. Duryea simply reloaned the money to KIC and in exchange received KIC's note in the same amount personally guaranteed by Krause. At that time KIC was a solvent corporation engaged in several real estate development projects in Minnesota. Duryea renewed the note every 90 days for approximately a year and then loaned the additional $ 10,000 to KIC on November 13, 1972.

KIC was not one of the Bank's customers during this period. The trial court was fully justified in finding that Duryea was not coerced, required or encouraged by the Bank to loan money to Krause or KIC.

The Bank did not participate in the management of, or control, or direct the development of the project. It imposed no condition or requirement upon Duryea. Duryea re-lent the money to KIC, not because the Bank demanded it, but because Duryea wanted to participate in the transaction. Krause was Duryea's friend, accountant and financial adviser. Furthermore, Duryea was interested in obtaining a condominium in the **[**9]** project at some time in the future. Duryea performed no service to the Bank in connection with its loans to Krause. We are satisfied the district court correctly concluded that the Bank had not violated the Bank Holding Company Act of 1970.

Appellant further claims the court erred in awarding attorney fees and costs to the Bank in the sum of $ 22,097.21, because it included legal services rendered the Bank in defending Duryea's claims of illegal banking practices. [4.] Appellant contends attorney fees should have been limited to those directly incurred in collecting the note, i. e., the cost of prosecuting the counterclaim.

The district court in approving the award of attorney fees stated:

> If the Bank had instituted suit to collect the note and plaintiff had, by way of counterclaim, served the complaint that is the basis of this action, all costs of both bringing suit and defending against the counterclaim would be "costs of collection" of **[**10]** the note. See *Taylor v. Continental Supply Co., 16 F.2d 578 (8th Cir. 1926)*. This court sees little difference where plaintiff brings suit to Prevent collection of the note. Because it is necessary for the Bank to defend against such an action in order to collect on the note, attorney's fees incurred in defending against plaintiff's suit are a "cost of collection" as that term is used in the note. A contrary result would permit the maker of a note by winning the "race to the courthouse" to coerce settlement. This would render the "cost of collection" provision of little value, apparently contrary to what the parties to the note intended.

We agree with the district court. For additional authority supporting the proposition that ***HN2***[] when note provisions allow a creditor to charge a debtor for the costs of collection, including attorney fees, such fees may include all costs attributable to collecting the debt. See *Vandeputte v. Soderholm, 298 Minn. 505, 216 N.W.2d 144 (1974)*, and in other jurisdictions, *Michael-Regan Co. v. Lindell, 527 F.2d 653 (9th Cir. 1975)*. **[**11]**

Affirmed.

---

4. The attorney fees are not otherwise claimed to be excessive.

Criminal Law & Procedure > ... > Bribery > Commercial Bribery > Elements

Criminal Law & Procedure > ... > Crimes Against Persons > Bribery > General Overview

HN10[] Criminal Offenses, Employee Fraud

Extortion is defined as unlawful obtaining of money from another. The distinction between bribery and extortion is the former offense consists in the offering a present, or receiving one, if offered; the latter, in demanding a fee or present, by color of office. Furthermore, extortion and bribery, by definition, are mutually exclusive.

Banking Law > ... > Criminal Offenses > Employee Fraud > General Overview

Criminal Law & Procedure > ... > Racketeering > Extortion > Penalties

HN11[] Criminal Offenses, Employee Fraud

Exaction is defined as the wrongful act of an officer or other person in compelling payment of a fee or reward for his services, under color of his official authority, where no payment is due. The distinction between extortion and exaction, then, is a fine one. Extortion involves a case in which the person illegally obtains more than is due, when something is initially due him; exaction involves obtaining something of value when there was nothing due him in the first instance. In the present case, it is arguable under the alleged facts that both, or either, extortion and exaction occurred, and, therefore, the fine distinction is of little importance.

Civil Procedure > Remedies > Damages > Punitive Damages

Torts > ... > Types of Damages > Punitive Damages > General Overview

Civil Procedure > Remedies > Damages > General Overview

Torts > Remedies > Damages > General Overview

Torts > ... > Types of Damages > Compensatory Damages > General Overview

HN12[] **Damages, Punitive Damages**

Misconduct sufficient to justify an award of compensatory damages also justifies the imposition of a punitive award.

Opinion by: CLARKE

Opinion

[*718] MEMORANDUM OPINION AND ORDER

The plaintiffs, Hometowne Builders, Inc. (hereinafter "Hometowne"), and Robert H. Merriman, President of Hometowne, filed a Complaint in this Court on April 27, 1979, against defendants, Atlantic National Bank (hereinafter "Atlantic"), Charles M. Reynolds, Jr., President of Atlantic, Levi E. Willis, an acting President of Atlantic at the time of certain alleged injurious actions, and G. Wesley Hardy, an officer of Atlantic. Hometowne is a Virginia corporation with its principal place of business in Virginia Beach, Virginia, and Atlantic is a bank organized under the federal banking laws with its principal place of business in Norfolk, Virginia. All other named individual defendants and plaintiff Merriman are residents of the State of Virginia. Jurisdiction of this Court is based upon *28 U.S.C. § 1331*, as plaintiffs have alleged violations of *12 U.S.C. § 1972*, thereby entitling them to sue for damages under *12 U.S.C. § 1975*, and of *18 U.S.C. [**2] § 215*, thereby subjecting defendants to potential civil liability under *12 U.S.C. § 503*.

Specifically, Count One of the Complaint alleges that defendants violated *12 U.S.C. § 1972*, a statute which prohibits certain tying arrangements by banks, namely that an extension of credit cannot be conditioned upon agreements to obtain additional credit, property, or service from the lending bank. Plaintiffs contend that Atlantic tied increases in mortgage loan commitments to plaintiff Merriman's sons, for which plaintiff Merriman had cosigned as surety, to the purchase of stock in Atlantic by both Hometowne and Merriman. Accordingly, plaintiffs have brought suit under *HN1*[] *12 U.S.C. § 1975*, which provides, in pertinent part: "Any person who is injured in his business or property by reason of anything forbidden in *section 1972* of this title may sue therefor . . . and shall be entitled to recover three times the amount of the damages sustained . . . ." Plaintiffs seek both treble damages ($ 3,000.00) and punitive damages ($ 250,000.00) for the alleged violation of *12 U.S.C. § 1972*.

Count Two of the Complaint alleges that plaintiffs Hometowne and Merriman conducted a substantial amount of business **[**3]** with Atlantic during 1974, 1975, and 1976, and that at various times during this period defendants

Willis and Hardy, as officers and directors of Atlantic, extracted certain illegal contributions from plaintiffs payable to Willis or Hardy or to corporations or organizations with which Willis or Hardy were connected. Plaintiffs contend that they made these contributions because they did not wish to endanger their existing and future loan transactions with Atlantic and because "plaintiffs were informed by the defendants that the aforesaid so-called donations were of a religious and charitable nature, and that such solicitation of funds was an entirely legal and normal practice of the defendant, Atlantic National Bank." Complaint at P 24. The Complaint further claims that the aforesaid actions of defendants violated ***HN2***[] *18 U.S.C. § 215*, a criminal statute, which reads:

> Whoever, being an officer, director, employee, agent, or attorney of any bank, the deposits of which are insured by the Federal Deposit Insurance Corporation, of a Federal intermediate credit bank, or of a National Agricultural Credit Corporation, except as provided by law, stipulates for or receives or consents or agrees **[**4]** **[*719]** to receive any fee, commission, gift, or thing of value, from any person, firm, or corporation, for procuring or endeavoring to procure for such person, firm, or corporation, or for any other person, firm, or corporation, from any such bank or corporation, any loan or extension or renewal of loan or substitution of security, or the purchase or discount or acceptance of any paper, note, draft, check, or bill of exchange by any such bank or corporation, shall be fined not more than $ 5,000 or imprisoned not more than one year or both.

Then, ***HN3***[] by virtue of *12 U.S.C. § 503*, the named officers and directors would be civilly liable in their individual capacities for the alleged violations of *18 U.S.C. § 215*, and plaintiffs seek compensatory ($ 880.00) and punitive ($ 750,000.00) damages.

This matter now comes before the Court on defendants' Motion to Dismiss filed pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. Defendants have asserted two grounds for dismissal: (1) Plaintiffs are not entitled to claim punitive damages over and above the treble damages authorized by *12 U.S.C. § 1975*; consequently, the claim for punitive damages in Count One should **[**5]** be dismissed. (2) Plaintiffs lack standing under *12 U.S.C. § 503* to assert their private cause of action, and all of the claims in Count Two should be dismissed. The Court has heard oral argument, has reviewed the briefs submitted with the authorities cited therein, and will now address separately defendants' grounds for dismissal.

Count One: Punitive Damages

It is important to note initially that plaintiffs have not alleged in Count One any facts which constitute a cause of action under the common law, as the common law did not prevent tying the sale of one product or service to the sale of another. Rather, plaintiffs specifically rely upon their statutory cause of action in *12 U.S.C. § 1975* because of the violation of *12 U.S.C. § 1972*, which latter section does prohibit certain tying arrangements by banks and bank holding companies. Defendants do not challenge in their current motion plaintiffs' standing to assert the cause of action in Count One or the applicability of *12 U.S.C. § 1972* to the facts of this case; however, they do challenge plaintiffs' claim for punitive damages under this statutory cause of action.

Since the ***HN4***[] common law cannot provide a basis for claiming punitive **[**6]** damages, it is necessary to examine the statute to determine if plaintiffs can maintain such a claim. The statute specifically provides for recovery of treble damages and a reasonable attorney's fee but makes no reference to punitive damages of any kind. Therefore, it is necessary to examine the legislative history of *12 U.S.C. § 1972 Et seq.* to determine whether plaintiffs have any implied right to recover punitive damages under these sections. The legislative history does not mention punitive damages, with the only comment on damages being: "(Private) parties are given the right to sue for injunctive relief as well as treble damages when they have sustained damages, or are threatened by loss or damage, by reason of a violation of this section's prohibitions." Senate Report No. 91-1084, 91st Cong., 2d Sess., Reprinted in (1970) U.S.Code Cong. & Admin.News, pp. 5519, 5536. The absence of any discussion of punitive damages in excess of treble damages is a strong indication that such damages were not contemplated by Congress and were not implied in the statute.

Moreover, the legislative history of *12 U.S.C. § 1972 Et seq.* clearly demonstrates that these sections were considered additions **[**7]** to the antitrust laws. In "(The) Supplementary Views of Messrs. Bennett, Tower, Percy, and Packwood" to Senate Report No. 91-1084, Supra, these senators pointed out that the Senate Banking and Currency Committee was "writing new ***antitrust" law*** in the tying arrangement provision. Id. at 5546. These senators also argued that the Senate version of the tying arrangement provision made certain legitimate banking practices "per se violations of ***antitrust law***." Id.

[*720] In his supplementary views, Senator Brooke discussed the antitrust nature of the proposed tying provisions. He cited *Standard Oil Co. v. United States, 337 U.S. 293, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949)*, an antitrust tying case, in his analysis and quoted extensively from a letter containing the views of the Antitrust Division of the Justice Department as set forth by Assistant Attorney General Richard W. McLaren. Senate Report No. 91-1084, Supra at 5558-61. This letter indicated that the Justice Department considered the tying arrangement proposal a "most valuable supplement" to the antitrust laws. Furthermore, the Justice Department suggested a four-year statute of limitations, rather than the proposed seven-year **[**8]** period, for "(consistency) with Section 4b of the Clayton Act." Id. at 5561. Thus, the legislative history of *12 U.S.C. § 1972 Et seq.* indicates that Congress designed these sections as part and parcel of the antitrust laws.

The question then becomes whether there is any implied right to recover punitive damages under *12 U.S.C. § 1972 Et seq.* as part of the antitrust laws. In *Hansen Packing Co. v. Armour & Co., 16 F. Supp. 784 (S.D.N.Y.1936)*, the district court addressed the issue of the availability of punitive damages under the antitrust laws as follows: ***HN5***[] "In trebling the amount of actual damages, it seems indisputable that the statutes carry their own symbol of punishment. The plaintiff can recover only what the statutes give him." *16 F. Supp. at 788*. The court then struck the claim for punitive damages.

Similarly, in *John Mohr & Sons, Inc. v. Jahnke, 55 Wis.2d 402, 198 N.W.2d 363 (1972)*, the Supreme Court of Wisconsin addressed the question of whether punitive damages were recoverable under § 133.01 of the Wisconsin Antitrust Act. This section was a substantial reenactment of § 1 of the Sherman Act. The Supreme Court of Wisconsin denied punitive damages on dual grounds. First, **[**9]** the court ruled that the recovery of both treble damages and punitive damages amounted to the "double recovery of a penalty" in violation of the due process clause of the United States Constitution. 198 N.W.2d at 367. Second, the court held that since § 133.01 created the cause of action and provided only for treble damages as the statutory remedy, the statutory remedy was exclusive. *198 N.W.2d at 368*. Therefore, punitive damages were not recoverable under the Wisconsin antitrust laws.

This Court agrees with the district court in New York, as well as with the Wisconsin Supreme Court, that ***HN6***[] both treble damages and punitive damages are not recoverable under the antitrust laws. The combination of treble damages and punitive damages is necessarily duplicative as a punitive element is inherent in the trebling of actual damages. Since the legislative history clearly indicates that *12 U.S.C. § 1972 Et seq.* is an addition to the antitrust laws, an award of punitive damages in excess of the treble damages specifically provided for in the statute is not recoverable under this statutory cause of action. Accordingly, the Court GRANTS defendants' Motion to Dismiss the claim for punitive damages **[**10]** in Count One of the Complaint.

Count Two: Standing

Count Two alleges that defendants extracted illegal contributions from plaintiffs in violation of *18 U.S.C. § 215*, and plaintiffs seek to recover the contributions, as well as punitive damages, from defendants. The statutory basis for the private cause of action is ***HN7***[] *12 U.S.C. § 503*, which reads in pertinent part:

> If the directors or officers of any member bank shall knowingly violate or permit any of the agents, officers, or directors of any member bank to violate any of the provisions of *sections . . . 220* (now *section 215*) . . . of Title 18, every director and officer participating in or assenting to such violation shall be held liable in his personal and individual capacity for all damages which the member bank, its shareholders, or Any other persons shall have sustained in consequence of such violation. (emphasis added).

[*721] Defendants argue that plaintiffs received the benefit of several loans from Atlantic; consequently, they suffered no injury and lack standing to assert a cause of action under *12 U.S.C. § 503*. The Court agrees with defendants that *HN8*[] the sustaining of actual damage is an essential element **[**11]** of a cause of action under *§ 503*; the issue then becomes whether plaintiffs have suffered any damages "in consequence of" the alleged violation of *18 U.S.C. § 215*.

Defendants essentially contend that the contributions were additional consideration for inducing the bank to exceed normal risk criteria and to make an improvident loan to plaintiffs. In their "Memorandum in Support of Motion to Dismiss" at 9, defendants state: "Plaintiffs received the benefit of several loans from Atlantic which no other lending institution would grant on substantially similar terms and conditions in accordance with sound banking practices." Although the defendants do not specifically use the term, they, in effect, accuse the plaintiffs of bribery. [1.]

Plaintiffs, on the other hand, have characterized the transaction **[**12]** differently by contending that they initially wished to further Atlantic's efforts to help the Black community and took out a loan for two automobiles followed by several construction loans over a period of a few years. Then, they were unable to say "no" to a bank officer's request for a "donation" to an allegedly non-profit enterprise controlled by that officer because all of the loans were "tied together under a cross-collateralization scheme, whereby a default on any one of the loans, however minor, (would) result in foreclosure on any or all of the outstanding loans, leading to financial ruin." "Memorandum in Support of Motion to Overrule Defendants' Motion to Dismiss" at 3. In effect, plaintiffs argue that they had no choice but to make the contributions because their overall continued financial viability was at stake. Such an argument characterizes the transactions in question as extortion [2.] **[**13]** or exaction. [3.]

The characterization of the actions and contributions complained of as bribery or extortion controls whether plaintiffs have been damaged by such actions. If it is assumed from the outset, as defendants contend, that plaintiffs engaged in bribery and therefore are not injured because they received the benefit of their bargain, then the Court can conclude that plaintiffs were not damaged by the violations **[**14]** of *18 U.S.C. § 215*. If the violations are considered to be acts of extortion, on the other hand, a different conclusion results. However, whether the transactions in question are to be considered as bribery or as extortion is certainly a question over which reasonable men may differ. Accordingly, this determination should be based upon the evidence presented at trial. The defendants are well within their rights in asserting bribery as a defense; but the plaintiffs are well within their rights to argue under the same set of facts that they have been damaged.

Defendants further argue that plaintiffs are not among the group of persons whom **[*722]** *18 U.S.C. § 215* was designed to protect. They rely upon *United States v. Lane, 464 F.2d 593* (8th Cir.), Cert. denied, *409 U.S. 876, 93 S. Ct. 127, 34 L. Ed. 2d 129 (1972)*, and *United States v. Etheridge, 414 F. Supp. 609 (E.D.Va.1976)* (Kellam, J.). The Court in Lane stated:

> It seems clear to us that the purpose of the Act was to protect the deposits of banks having federal insurance by preventing unsound and improvident loans to be made from such deposits by officers and directors of the bank. The Congress was not interested in who **[**15]** received the commission but was merely insulating loan

---

1. *HN9*[] Bribery is defined in Black's Law Dictionary, at 239 (4th ed. 1968) as: "The offering, giving, receiving, or soliciting of any thing of value to influence action as official or in discharge of legal or public duty."

2. *HN10*[] Extortion is defined in Id. at 696 as: "Unlawful obtaining of money from another." The distinction between bribery and extortion is: "the former offense consists in the offering a present, or receiving one, if offered; the latter, in demanding a fee or present, by color of office." Id. at 697. Furthermore, extortion and bribery, by definition, are mutually exclusive. *People v. Feld, 262 App.Div. 909, 28 N.Y.S.2d 796, 797 (1941)*.

3. *HN11*[] Exaction is defined in Black's Law Dictionary, Supra at 664, as: "The wrongful act of an officer or other person in compelling payment of a fee or reward for his services, under color of his official authority, where no payment is due." The distinction between extortion and exaction, then, is a fine one. Extortion involves a case in which the person illegally obtains more than is due, when something is initially due him; exaction involves obtaining something of value when there was nothing due him in the first instance. Id. In the present case, it is arguable under the alleged facts that both, or either, extortion and exaction occurred, and, therefore, the fine distinction is of little importance.

> transactions from the influence of such a practice. When a commission is stipulated by an officer of a bank, the probability is that his judgment on the merits of the loan is adversely affected tremendously. This evil is not removed by a stipulation that provides for payment of a commission to a third party, especially where an interest in the third party is traceable directly to the banker. In such a case, the banker is violating a position of trust that he owes to the bank. This position is buttressed by the fact that *Section 215* is found in the Bribery, Graft and Conflicts of Interests Chapter of the Title (Chapter XI).

464 F.2d at 595, passage Cited in *United States v. Etheridge, supra at 610-11*.

This Court agrees that *18 U.S.C. § 215* was designed "to protect the deposits of banks" from dissipation through unwise lending practices and that plaintiffs are not depositors. However, because the statute protects depositors in one situation does not necessarily mean that this is the only class of persons protected by the statute. First, the statute is a criminal one and in and of itself protects the public in general. Moreover, **[**16]** both cases relied upon by defendants involved situations in which the United States brought a criminal action against the bank officer who had violated *§ 215*; such a suit by the United States thereby protects the deposits of the bank. Plaintiffs, however, have alleged that defendants violated *18 U.S.C. § 215*, and then they base their civil cause of action on *12 U.S.C. § 503*, which gives a cause of action to "the member bank, its shareholders, or Any other persons " damaged by the violation by bank officers of *18 U.S.C. § 215*. (emphasis added).

There is no indication in the legislative history, or any other authority to the contrary, that "any other persons" may only be the bank's depositors. Rather, a better interpretation would be that since the civil cause of action in *§ 503* is based upon a violation of a criminal statute, the phrase "any other person" permits plaintiff, or any member of the general public, whether a depositor of the bank or not, to bring an action under *§ 503*, if they allegedly suffered the requisite damage under that section. In the present case, plaintiffs have made sufficient allegations of violations of *18 U.S.C. § 215* by the defendants, and such allegations **[**17]** bring them within the language of *12 U.S.C. § 503* granting a cause of action to "any other persons."

Defendants further contend that even if plaintiffs may maintain their cause of action under *§ 503*, they cannot claim punitive damages under that section. *Section 503* specifically provides for damages but makes no mention of punitive damages. Unlike 12 U.S.C. § 1275, the *§ 503* provision for damages is not clarified in any way by the specification of treble damages or by any legislative history indicating that the statute is an addition to the antitrust laws. See discussion Supra. Rather, *§ 503* merely permits damages, and there is no other statutory language or legislative history to aid in the interpretation of what damages are allowed. It has been settled for years, however, that "the federal law permits the recovery of exemplary or punitive damages," *Basista v. Weir, 340 F.2d 74, 87 (3d Cir. 1965)*, and the Supreme Court has held that ***HN12***[] "misconduct sufficient to justify an award of compensatory damages also justifies the imposition of a punitive award." *Curtis Publishing Co. v. Butts, 388 U.S. 130, 161, 87 S. Ct. 1975, 1994, 18 L. Ed. 2d 1094, 1114 (1967)*.

Since the misconduct **[**18]** complained of in the present case involves violation of a **[*723]** criminal statute and since the rationale for punitive damages is one of deterrence, the claim for such damages seems appropriate under *§ 503*. Absent any indication that punitive damages were not intended under *§ 503*, plaintiffs' Claim for such damages is permissible and defendants' Motion to Dismiss is DENIED. The Court further notes, however, that whether plaintiffs are entitled to the requested punitive damages is a matter to be determined from the evidence at trial.

In summary, defendants' Motion to Dismiss plaintiffs' claim for punitive damages in Count One is GRANTED, and defendants' Motion to Dismiss all or any portion of plaintiffs' claim in Count Two is DENIED. Finally, the Court in its discretion DENIES defendants' Motion for Certification of an interlocutory appeal of this Order pursuant to *28 U.S.C. § 1292*. The Court is not of the opinion that an interlocutory appeal will "materially advance the ultimate termination of the litigation" as required for certification under *§ 1292(b)*.

HN1[] **Standing, Clayton Act**

The Clayton Act, *15 U.S.C.S. §§ 15* and *26*, confers a private cause of action for damages or injunctive relief upon any person who is injured in his business or property as a result of violations of the antitrust laws.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN2[] Motions to Dismiss, Failure to State Claim

The standards for ruling a motion to dismiss are well settled. The complaint must be liberally construed in favor of the plaintiff; the facts alleged by him must be taken as true, and he is entitled to the benefit of all reasonable inferences in his favor that may be drawn from the alleged facts. Furthermore, a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. The court also takes note that the United States Court of Appeals for the Eighth Circuit has only recently repeated the United States Supreme Court's admonition that summary procedures should be used sparingly in complex antitrust litigation.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN3[] Antitrust & Trade Law, Sherman Act

The Sherman Act, *15 U.S.C.S. § 1*, provides that every contract, combination or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is illegal. To state a cause of action under *§ 1* a party must set forth the following factual allegations in its pleading: (1) that the defendants contracted, combined, or conspired among each other; (2) that the combination or conspiracy produced adverse, anticompetitive effects within relevant product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiff was injured as a proximate result of that conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Entry of Pleas > Guilty Pleas > General Overview

HN4[] Antitrust & Trade Law, Sherman Act

It is not necessary to plead a formal agreement. An allegation that conduct was joint or collaborative is sufficient.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] Antitrust & Trade Law, Sherman Act

It is beyond dispute that the Sherman Act, *15 U.S.C.S. § 1*, and the antitrust laws in general were aimed at the anti-competitive acts of business firms or entities, but two persons or entities can constitute a conspiracy.

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Sherman Act, Remedies**

The antitrust laws were enacted for the protection of competition, not competitors. Thus, if an antitrust plaintiff alleges nothing more than that a competitor in interstate commerce has by means of unfair business practices deprived plaintiff of key employees, business and confidential records or information and customers, but does not allege any public injury resulting from the defendant's conduct, plaintiff must seek relief at common law and not under the Sherman Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Since the United States Court of Appeals for the Eighth Circuit has joined other circuits in holding that a conspiracy to eliminate a competitor by means of unfair trade practices must be tested under the rule of reason, plaintiff must allege facts to establish that defendants alleged wrongful acts unreasonably restrained trade in a particular sector of the economy. To demonstrate such unreasonable and anti-competitive impact, it is obviously necessary that a plaintiff must identify the product and geographical markets allegedly affected by antitrust violations.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The rule of reason is applied to business practices that are not substantially devoid of redeeming attributes.

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

Because the court is sensitive to the recent reminder of the United States Court of Appeals for the Eighth Circuit that motions to dismiss antitrust actions should be sparingly granted, and the United States Supreme Court's instruction that allegations should not be disregarded merely because they appear to be mere conclusions of the pleader, the court is reluctant to dismiss an action without concurrently giving plaintiff an opportunity to cure the deficiencies noted in the court's order.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

An antitrust complaint must allege facts from which it can be determined that conduct charged to be in violation of the antitrust laws was reasonably calculated to prejudice the public interest by unduly restraining the flow of interstate commerce. The absence of such public injury allegations in plaintiff's present complaint demands dismissal of plaintiff's Sherman Act, *15 U.S.C.S. § 1*, claim.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

HN11[] **Remedies, Damages**

The Sherman Act, *15 U.S.C.S. § 2*, condemns any attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states, or with foreign nations. To maintain an action to recover for damages sustained from an attempt to monopolize a party must plead, in addition to the obvious element of business injuries, the following factual elements: (1) an overt act or acts, or a course of conduct; (2) a specific intent to monopolize a relevant market; and,(3) a dangerous probability of success.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN12[] **Monopolies & Monopolization, Attempts to Monopolize**

Specific intent to monopolize must be well pleaded.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] **Monopolies & Monopolization, Attempts to Monopolize**

Specific intent to monopolize or to obtain monopoly power may be defined for purposes of the Sherman Act, *15 U.S.C.S. § 2*, as an intent to control prices or to restrict competition unreasonably.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN14[] **Monopolies & Monopolization, Attempts to Monopolize**

The United States Court of Appeals for the Eighth Circuit, along with a majority of courts, has ruled that demonstration of a dangerous probability of success of an attempt to monopolize must include a showing of the relevant market within which that probability occurred. The relevant market is comprised of two components -- (1) relevant product market and (2) relevant geographic market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN15[] **Monopolies & Monopolization, Attempts to Monopolize**

The United States Court of Appeals for the Eighth Circuit has indicated that the factors which point to dangerous probability consist primarily of economic data, such as the number of firms within the relevant market and the defendant's percentage share of that market, the defendant's power to control prices, and barriers to entry into the relevant industry-product market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN16[] **Monopolies & Monopolization, Attempts to Monopolize**

The phrase "attempt to monopolize" means the employment of methods, means and practices which would, if successful, accomplish monopolization, and which, though falling short, nevertheless approach so close as to create a dangerous probability of it.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN17[] **Monopolies & Monopolization, Conspiracy to Monopolize**

The elements of the offense of a conspiracy to monopolize are somewhat different from those of an attempt to monopolize, namely: (1) the existence of a combination or conspiracy; (2) overt acts in furtherance of that combination or conspiracy; (3) a substantial amount of commerce affected; and (4) specific intent to monopolize.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

HN18[] **Private Actions, Standing**

The Sherman Act, *15 U.S.C.S. § 1*, was not enacted to afford a remedy for wrongs, which are actionable under state law, and result from combinations and conspiracies which fall short, both in their purpose and effect, of any form of market control of a commodity, such as to monopolize the supply, control its price, or discriminate between its would-be-purchasers.

Helmstetter, Kansas City, Mo., John M. Kilroy, Jr. and George A. Barton, of Shughart, Thomson & Kilroy, Kansas City, Mo.

Opinion by: CLARK

Opinion

Memorandum and Order

CLARK, D.J.: Plaintiff, H.J. Hodes & Co. (Hodes), a Missouri corporation, commenced this action against defendant Triangle Brass & Specialities Co. (Triangle), and several of Triangle's officers, by filing its complaint on July 27, 1979, alleging, inter alia, that defendants had violated *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2 (1976)*. Defendants responded by filing their motion to dismiss on August 30, 1979. After reviewing the thorough briefs submitted by counsel on each side, the Court has concluded that the motion to dismiss should be granted.[1]

[*2] I. Factual Background

Plaintiff Hodes, a corporation, which is organized under the laws of Missouri and has its principal place of business in Kansas City, Missouri, is engaged in the business of distributing plumbing specialty supplies to wholesale and retail outlets in various parts of the United States.The individual defendants -- Robert H. Hodes, James R. Fitts and James E. Caton -- are all residents of Missouri and are officers and employees of the corporate defendant Triangle, which is also engaged in the distribution of plumbing specialty supplies throughout the United States. While Triangle is organized under the laws of Missouri, its principal place of business is located in Lenexa, Kansas. Prior to the incorporation of Triangle, the individual defendants were employed in various capacities by plaintiff Hodes. Robert H. Hodes had served as president of Hodes until his resignation from that position on November 24, 1978; he also had been a member of the Board of Directors of Hodes for a considerable period of time until he resigned from that position on May 15, 1979. James R. Fitts had served as the sales manager of Hodes until his resignation from that employment **[*3]** on November 15, 1978. James E. Caton had been Hodes' sales representative in the Kansas City, Missouri metropolitan area until he was discharged in December, 1978.

Plaintiff alleges that at some point in time during the period extending from September, 1978 through January, 1979 the individual defendants formed a conspiracy or combination to eliminate Hodes from the plumbing specialty supplies distribution market. In furtherance of that conspiracy, it is said that defendants Robert H. Hodes and James R. Fitts resigned their positions with plaintiff Hodes, taking with them certain confidential corporate records, including Hodes' customer lists. Mr. Hodes then allegedly incorporated Triangle for the purpose of conducting business in such a manner that plaintiff Hodes would be injured in its business and eventually destroyed. All these individual defendants apparently became officers of the newly incorporated Triangle, and in carrying out Triangle's business, it is alleged that they engaged in various unfair tactics designed to injure Hodes: they approached customers, suppliers and independent salesmen of Hodes and made deceptive and/or false representations such as statements **[*4]** that Trinagle was a "new Hodes company", and that H.J. Hodes Co. was going out of business and Triangle was its successor; they employed a tradename deceptively similar to that used by Hodes; [2] they attempted to induce various independent-contractor salesmen to cancel their contracts with plaintiff Hodes and enter into contracts with Triangle; they induced some of the same salesmen to submit to Triangle products orders they had received from customers who had originally selected Hodes as their supplier; and they contacted Hodes'

---

[1] Defendant has submitted various exhibits and affidavits with its brief in support of its motion to dismiss. Were we to consider these materials in ruling the present motion, we would be required to treat the motion as one for summary judgment under *Rule 56, Fed. R. Civ. P.* See *Jennings v. Davis, 476 F. 2d 1271, 1273-4 (8th Cir. 1973)*; *Rule 12(b), Fed. R. Civ. P.* The Court believes, however, that defendant's motion can be granted on the pleadings in this case, and thus, the motion will be treated as one for dismissal under *Rule 12(b)(6), Fed. R. Civ. P.*

[2] Plaintiff's tradename is "Red Dog"; defendant Triangle allegedly is using the tradename "Black Tom". While any deceptive similarity between these two tradenames escapes the Court's scrutiny on the record before us, we will accept this allegation as a proven fact, as we must in reviewing a motion to dismiss. See *Profesional Beauty Supply v. National Beauty Supply, Inc. [1979-1 TRADE CASES P62,485], 594 F. 2d 1179, 1181 (8th Cir. 1979)*.

suppliers and by representing that Triangle was Hodes' successor, persuaded said suppliers to divert limited supplies of certain materials, which Hodes had ordered, from Hodes to Triangle.

Claiming that it has **[*5]** suffered substantial monetary damages to its business and is in need of injunctive relief to prevent further irreparable damage, Hodes filed this action under Sections 4 and 16 of ***HN1***[] the Clayton Act, *15 U.S.C. §§ 15* and *26 (1976)*, which confer a private cause of action for damages or injunctive relief upon any person who is injured in his business or property as a result of violations of the antitrust laws. In Counts I and II of its complaint Hodes alleges that the defendants' activities contravened *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2 (1976)*. In addition to its federal antitrust claims, Hodes raised various claims under Missouri law: Count III alleges that all of the defendants violated the Missouri ***Antitrust Law***, *MO. REV. STAT. §§ 416.031* (1969); Count IV alleges that all of the defendants have engaged in unfair competition and tortious interference with Hodes' business; Count V alleges that all of the defendants engaged in tortious interference with contractual relationships between Hodes and its independent-contractor salesmen; Count VI charges defendant James E. Caton with the breach of a restrictive covenant not-to-compete; and Count VII charges defendant **[*6]** Robert H. Hodes with a breach of his fiduciary duty to Hodes while he was a director of that corporation. Since diversity of citizenship is neither alleged nor exists, it appears that plaintiff is basing its submission of its state law claims (Counts III to VII) to this Court on the doctrine of pendent jurisdiction set forth in *United Mine Workers v. Gibbs, 383 U.S. 715, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966)*. Thus, if Hodes has failed to state a claim under Section 4 of the Clayton Act, its state law claims must be dismissed along with its federal antitrust claims. See *id. at 726, 16 L. Ed. 2d at 228*; *Seven-Up Bottling Co. v. Seven-Up Co., 561 F. 2d 1275, 1281 (8th Cir. 1977)*.

II. Standards for Ruling a Motion to Dismiss

HN2[] The standards for ruling a motion to dismiss are well settled. "The complaint must be liberally construed in favor of the plaintiff; the facts alleged by him must be taken as true, and he is entitled to the benefit of all reasonable inferences in his favor that may be drawn from the alleged facts." *Stifel, Nicolaus Co., Inc. v. Dain, Kalman & Quail, Inc., 578 F. 2d 1256, 1260 (8th Cir. 1978)*. Furthermore, "a complaint should not be dismissed for failure to **[*7]** state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Quality Mercury, Inc. v. Ford Motor Co., 542 F. 2d 466, 472 (8th Cir. 1976)*, cert. denied, sub. nom. *Prestige Lincoln-Mercury, Inc. v. Quality Mercury, Inc., 433 U.S. 914, 97 S. Ct. 2986, 53 L. Ed. 2d 1100 (1977)* [quoting *Hospital Bldg. Co. v. Trustees of Rex Hospital, 425 U.S. 738, 746-7, 96 S. Ct. 1848, 1853, 48 L. Ed. 2d 338, 344-5 (1976)]*. The Court also takes note that the Eighth Circuit has only recently repeated the Supreme Court's admonition that "summary procedures should be used sparingly in complex antitrust litigation." Penne v. Greater Minneapolis Area Bd. of Realtors, No. 78-1776, slip opinion at 18 (8th Cir. September 5, 1979) [quoting *Poller v. Columbia Broadcasting System, 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458, 464 (1962)]*. Applying these principles, the Court has determined that various, significant deficiencies in plaintiff's complaint mandate dismissal of the same, with the qualification that plaintiff shall have the opportunity to cure such deficiencies by filing an amended complaint within thirty **[*8]** days of the date of this order.

III. Sherman Act *§ 1* Conspiracy Claim

Plaintiff contends that the individual defendants -- Hodes, Fitts, and Caton -- entered into a conspiracy [3] in contravention of *Section 1* of the Sherman Act, *15 U.S.C. § 1 (1976)*.Section ***HN3***[] 1 provides that "[e]very

---

[3] While plaintiff's conspiracy allegations suffer from some ambiguity and might be construed as setting forth contentions that the three individual defendants engaged in a conspiracy, and that the corporate defendant Triangle also engaged in that conspiracy, in its suggestions, plaintiff disclaims any intention to state the latter contention. Indeed, in identifying the participants in the alleged conspiracy in paragraph 14 of its complaint, plaintiff avers that "Defendant Hodges, Defendant Fitts and Defendant Caton conspired and agreed", but makes no mention of Triangle as a conspirator. We agree with the defendants however, that absent an allegation that they -- the individual defendants, officers and employees of Triangle -- were acting beyond the scope of any corporate authorization when allegedly engaging in anticompetitive acts, Triangle could not legally and conceptually have been a co-conspirator to the alleged conspiracy of the individual defendants. See *Morton Bldgs. of Nebraska, Inc. v. Morton Bldgs., Inc., 531 F. 2d 910, 917 (8th Cir. 1976)*. ("Since more than one entity or person is required to establish a conspiracy, the

contract, combination… or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is illegal." *15 U.S.C. § 1*. To state a cause of action under *Section 1* a party must set forth the following factual allegations in its pleading:

[*9] (1) [t]hat the defendants contracted, combined, or conspired among each other;

(2) that the combination or conspiracy produced adverse, anticompetitive effects within relevant product and geographic markets;

(3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and

(4) that the plaintiff was injured as a proximate result of that conspiracy. *TV Signal Co. of Aberdeen v. American T. & T Co., 465 F. Supp. 1084, 1087 (D.S.D. 1979)* [quoting *Martin B. Glauser Dodge Co. v. Chrysler Corp., 570 F. 2d 72, 81 (3rd Cir. 1977)*, cert. denied, *436 U.S. 913, 99 S. Ct. 677, 56 L. Ed. 2d 413 (1978)* (emphasis added)].

See generally 1 J. Von Kalinowski, Antitrust Laws and Trade Regulation § 3.03[1], at 3-62 to 63; 14 id § 105.01, at 105-3.

There is little question that plaintiff has alleged facts satisfying the first, third, and fourth elements of this test. Hodes' allegation that the three individual defendants at some time entered into a conspiracy sufficiently avers the plurality of actors required in the first element. See *Quality Mercury, Inc. v. Ford Motor Co., supra, 542 F. 2d 469* ***HN4***[] ("[I]t… [is] not necessary to plead a formal **[*10]** agreement… An allegation that conduct was 'joint or collaborative'… [is] sufficient.") Defendants, however, contend that conspiratorial plurality is not present in this case, reasoning that since their individual acts were performed on behalf of the corporate defendant Triangle, "their acts are the acts of the corporation, [and thus] there can be no intra-corporate conspiracy." *Kendall Elevator Co, Inc. v. L.B.C. & W. Assoc. of S.C. Inc., 350 F. Supp. 75, 78 (D.S.C. 1972)*. Defendants also cite the Fifth Circuit's statement in *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F. 2d 256 (5th Cir. 1978)*, cert. denied, *U.S. , 99 S. Ct. 1289, L. Ed. 2d. (1979)*, that "[e]ssential to every *§ 1* offense is concert of action between separate business entities", *id. at 286* (emphasis added), apparently as support for the proposition that individual persons, such as themselves, are incapable of forming a conspiracy in contravention of *§ 1*.

To the extent that defendants suggest that only business entities such as corporations can form the conspiracy or concert of action forbidden by *§ 1*, they are clearly incorrect. ***HN5***[] It is beyond dispute that *§ 1* and **[*11]** the antitrust laws in general were aimed at the anti-competitive acts of business firms or entities, see generally L. Sullivan, Handbook of the Law of Antitrust §§ 60 & 61 (1977), but as the court in *Kendall Elevator Co., Inc., supra*, (which defendants cite) recognized, "two persons or entities… [can] constitute a conspiracy." *350 F. Supp. at 78* (emphasis added; see J. Von Kalinowski, supra, § 6.01[2], at 6-22. If plaintiff merely alleged that the individual defendants had performed acts on behalf of Triangle and that these acts were the substance of a conspiracy among the defendants, the Court would have difficulty in finding the requisite plurality of actors. As one commentator observes, "[i]f… the directors of a corporation authorizes the corporation officers to regulate the enterprises's outlet so that the business gets a better price for its product and if the officers assert their authority completely within the framework of the corporation, without any agreements or understandings with competitors, the actions of the directors and officers will not constitute a violation of *§ 1*. The only actor in this instance is one corporation doing business through its agents." **[*12]** Id. § 6.01[2], at 6-22 to 6-23 n. 39. Here, however, plaintiff alleges that the individual conspirators entered into the forbidden concert of action prior to the incorporation of Triangle, and then incorporated and operated Triangle only as "a corporate shell through which to execute said conspiracy." Thus, we cannot say that the individual defendants' actions were those of one entity.

---

general rule is that a conspiracy cannot be based on an agreement between a corporation and its officers, agents, or employees. The only exception arises when the officers or agents, were, at the time of the conspiracy, acting beyond the scope of their authority or for their own benefit.") Accordingly, the Court treats plaintiff's complaint as alleging a conspiracy among only the individual defendants.

While the Court believes that plaintiff has adequately alleged the existence of a conspiracy, illegal conduct pursuant to that conspiracy, and business injuries to plaintiff's business, which were proximately caused by the conspiracy, the complaint is fatally deficient in its failure to set forth any factual allegations as to the second element of a § 1 action -- "adverse, anticompetitive effects within relevant product and geographic markets." The only allegations that remotely suggest anti-competitive effect are plaintiff's averments in Paragraph 7 of its complaint that the acts of the "co-conspirators… have occurred in the course of interstate commerce and involve and affect and will continue to involve and affect the interstate commerce", and in Paragraph 14 that the "agreement [of the **[*13]** alleged conspirators] was in restraint of trade." Beyond these averments, plaintiff has only made allegations as to the intent and purpose of the defendants to injure and destroy plaintiff's business. Plaintiff argues in its suggestions that its complaint is only technically defective in the absence of several phrases or words such as the adjective "unreasonable" to characterize the nature of the alleged restraint of trade, but this argument fails to address the critical omission of factual allegations which demonstrate that the alleged wrongful acts are ones that the antitrust laws were designed to reach.

HN6[] The "antitrust laws… were enacted for the 'protection of competition, not competitors'." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701, 712 (1977)* [quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510, 533 (1962)* (emphasis in original)]. Thus, if "an antitrust plaintiff alleges nothing more than that a competitor in interstate commerce has by means of unfair business practices deprived plaintiff of key employees, business and confidential records or information [and customers], but does **[*14]** not allege any public injury resulting from the defendant's conduct, plaintiff must seek relief at common law and not under § 1 of the Sherman Act." *Stifel, Nicolaus & Co., Inc. v. Dain, Kalman & Quail, Inc., supra, 578 F. 2d at 1261* (emphasis added). ***HN7***[] Since the Eighth Circuit has joined other circuits in holding that a conspiracy to eliminate a competitor by means of unfair trade practices must be tested under the "rule of reason", [4] see *id. at 1259-60*; see generally 1 J. Von Kalinowski, supra § 6.02[2], at 6-85 to 6-86 n. 32, plaintiff must allege facts to establish that defendants alleged wrongful acts unreasonably restrained trade in a particular sector of the economy. See id. § 6.02[1], at 6-77. To demonstrate such unreasonable and anti-competitive impact, it is obviously necessary that a plaintiff must identify the product and geographical markets allegedly affected by antitrust violations. See *TV Signal Co. of Aberdeen v. American T. & T. Co., supra, 465 F. Supp. at 1086-90*. In Paragraph 8 of its complaint, plaintiff indirectly characterizes the product market as the distribution of "plumbing specialty supplies through independent contractor salesmen to wholesale **[*15]** and retail outlets", and the geographical market as the "United States". Plaintiff fails, however, to further allege facts showing unreasonable restraint of trade in those markets.

HN9[] Because the Court is sensitive to the recent reminder of the Eighth Circuit that motions to dismiss antitrust actions should be "sparingly" granted, see Penne v. Greater Minneapolis Bd. of Realtors, supra, slip op. at 18, and the Supreme Curt's instruction that allegations should not be disregarded merely because they appear to be "'mere conclusions of the pleader'", *United States v. Employing Plasterers **[*16]** Assn., 347 U.S. 186, 188, 74 S. Ct. 452, 98 L. Ed. 618, 623 (1954)*, we are reluctant to dismiss this action without concurrently giving plaintiff an opportunity to cure the deficiencies noted in this order. The Court emphasizes, however, our belief that, under the most favorable reading of all the facts presently set forth in the complaint, plaintiff has not sufficiently pled an unreasonable restraint on trade in the designated market area. The Court agrees with plaintiff that it is not necessary that Hodes allege that defendant Triangle is a "significant factor" in the market. See *Metal Lubricants Co. v. Engineered Lubricants Co., 411 F. 2d 426, 430 (8th Cir. 1969)*. However, as defendants observe, the Metal Lubricants case does not stand for the proposition that antitrust plaintiffs should always be permitted to proceed to an evidentiary hearing, since in that case the Eighth Circuit was reviewing a district court's findings after a trial and not an order dismissing a complaint. Indeed, the Eighth Circuit's approval of a dismissal of a § 1 claim in *Stifel,*

---

[4] ***HN8***[] The "rule of reason" set forth by the Supreme Court in *Standard Oil Co. of New Jersey v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*, is applied to business practices that are not substantially "devoid of redeeming attributes". *Stifel, Nicolaus & Co., Inc., v. Dain, Kalman & Quail, Inc., supra, 578 F. 2d at 1259*; see generally L. Sullivan, supra §§ 65-68. The rule requires a court to weigh competing factors to determine whether a particular "restraint, on balance, substantially impedes competition, rather than encouraging or regulating it in neutral ways." Id. § 68, at 188-89.

Nicolaus & Co., supra, 578 F. 2d at 1260-2 illustrates that dismissal is an appropriate disposition when the pleadings fail **[*17]** to set forth factual allegations of anti-competitive effect.

It may be that plaintiff could have alleged facts, which if proven, would establish with some specificity that trade has been or is being unreasonably restrained in the plumbing specialties distribution market throughout the United States, but those allegations are not before the Court. However, since defendants have not filed an answer but rather have exercised their option to file a motion to dismiss, which is not a "responsive pleading" within the meaning of Rule 15(a) Fed. R. Civ. P., see 6 C. Wright & A. Miller Federal Practice and Procedure § 1475, at 388 (1970), we believe plaintiff should be given the opportunity to file an amended complaint. See Rule 15(a). supra. In this connection, the Court notes the decision of the district court in Stifel, Nicolaus & Co., supra, to permit the plaintiff in that case to amend its complaint to set forth allegations of anti-competitive effect. In amending its complaint, plaintiff is instructed to bear in mind the Eighth Circuit's observation that ***HN10***[] "[a]n antitrust complaint must 'allege facts from which it can be determined that conduct charged to be in violation of the **[*18]** antitrust laws was reasonably calculated to prejudice the public interest by unduly restraining the flow of interstate commerce.'" Quality Mercury, Inc. v. Ford Motor Co., supra, 542 F. 2d at 472 (emphasis added) [quoting Kinnear-Weed Corp. v. Humble Oil & Refining Co., 214 F. 2d 891, 894 (5th Cir. 1954)]. The absence of such public injury allegations in plaintiff's present complaint demands dismissal of plaintiff's § 1 claim. See Larry R. George Sales Co. v. Cool Attic Corp., 589 F. 2d 266 (5th Cir. 1979) (and cases cited therein); Bryan v. Stillwater Bd. of Realtors, 578 F. 2d 1319, 1323-4 (10th Cir. 1977); and Kinnear-Weed Corp. v. Humble Oil & Refining Co., supra.

III. Sherman Act § 2 Attempt to Monopolize Claim

Plaintiff Hodes also alleges in Paragraph 14 of its complaint that the conspiracy of the individual defendants and the actions carried out by those defendants and Triangle in furtherance of that conspiracy "constitute an attempt to monopolize the plumbing specialists supplies business in the United States." ***HN11***[] Section 2 of the Sherman Act condemns any "attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade **[*19]** or commerce among the several states, or with foreign nations." 15 U.S.C. § 2 (1976). To maintain an action to recover for damages sustained from an "attempt to monopolize" a party must plead, in addition to the obvious element of business injuries, the following factual elements:

(1) an overt act or acts, or a course of conduct;

(2) a specific intent to monopolize a relevant market; and,

(3) a dangerous probability of success.

See Stifel, Nicolaus & Co., Inc. v. Dain, Kalman & Quail, Inc., supra, 578 F. 2d at 1262; United States v. Empire Gas Corp., 537 F. 2d 296, 298-9 (8th Cir. 1976), 429 U.S. 1122, 97 S. Ct. 1158, 51 E. Ed. 2d 572 (1977); Agrashell, Inc. v. Hammons Prods. Co., 479 F. 2d 269, 284 (8th Cir. 1973), cert. denied, *414 U.S. 1022, 94 S. Ct. 445, 38 L. Ed. 2d 313 (1973)*; see generally 2 J. Von Kalinowski, supra § 9.01[1].

There is no dispute that plaintiff's complaint sets forth a course of actions allegedly undertaken by all of the defendants pursuant to a conspiracy to monopolize trade; nor do defendants question the suffered injuries as a proximate result of sufficiency of plaintiff's allegations that it has that conduct. In addition, defendants apparently **[*20]** do not claim that plaintiff has failed to adequately allege the second element of specific intent. [5]

---

[5] While defendants do not question the sufficiency of plaintiff's pleadings of specific intent, the Court believes that this element has, at best, been only indirectly pleaded. In the only paragraphs of its complaint in which plaintiff makes allegations concerning defendants' intent, paragraphs 14, 16, 18 and 19, its sole repeated claim is that defendants acted with "the intent to injure and destroy the plaintiff in its business and property." ***HN12***[] "Specific intent to monopolize must be well pleaded…." Hiland Dairy, Inc. v. Kroger Co., 402 F. 2d 968, 971 (8th Cir. 1968), cert. denied, ***395 U.S. 961, 89 S. Ct. 2096, 23 L. Ed. 2d 748 (1969)*** (emphasis added.) Not only does plaintiff fail to even make pro forma allegations of intent or purpose to monopolize, but, more

Defendants contend, however, that nowhere in the complaint has plaintiff set forth factual allegations establishing the third element of dangerous probability of success. Upon a thorough review of plaintiff's complaint, the Court is compelled to agree with this criticism.

[*21] ***HN14***[] The Eighth Circuit, along with a majority of courts, has ruled that demonstration of a "dangerous probability of success of an attempt must include a showing of the relevant market within which that probability occurred." *United States v. Empire Gas Corp., supra, 537 F. 2d at 302*. The "relevant market", as previously noted, is comprised of two components -- (1) "relevant product market and (2) relevant geographic market." *Id. at 303*. As the Court observed in its discussion of the *section 1* claim, plaintiff has not directly or expressly addressed these two components in its complaint. However, we liberally infer from its allegations and its suggestions to the Court, that both plaintiff and defendant Triangle compete in the distributions of plumbing specialty supplies in a market extending throughout the United States, and thus that the relevant product market is the distribution of plumbing specialty supplies to wholesale and retail outlets and the relevant geographic market, the entire country.

Plaintiff fails, however, to allege that there was, or is, a dangerous probability that defendants would succeed in their alleged attempt to monopolize the relevant market. This deficiency **[*22]** is not merely one of omission to include the phrase "dangerous probability of success" in the pleadings; plaintiff has not set forth any factual allegations raising the type of factors which courts have considered in determining the existence of dangerous probability. ***HN15***[] The Eight Circuit has indicated that the factors which point to dangerous probability consist primarily of economic data", *Agrashell, Inc. v. Hammons Prods. Co., supra, 479 F. 2d at 285*, such as the number of firms within the relevant market and the defendant's percentage share of that market, *Hiland Dairy, Inc. v. Kroger Co., supra, 402 F. 2d at 974*, the defendant's power to control prices, *Stifel, Nicolaus & Co., Inc. v. Dain, Kalman & Quail, Inc., supra, 578 F. 2d at 1262*, and barriers to entry into the relevant industry-product market. *United States v. Empire Gas Corp., supra, 537 F. 2d at 305*. See generally 2 J. Von Kalinowski, supra § 9.01[2][a].

Although plaintiff represents to the Court in its suggestions that only 10 companies occupy the plumbing specialties distribution market, [6] it makes no allegations in its complaint as to the status of the positions that plaintiff or defendant Triangle occupy **[*23]** in that market. Indeed, it seems that plaintiff's allegations in paragraphs 15 and 16 acknowledging that Triangle is a relatively new entrant in that market, incorporated sometime in the early months of 1979, suggest that defendant lacked the ability to monopolize the market. [7] The complaint is devoid of any

---

significantly, it does not allege "conduct or acts" from which intent to monopolize the relevant market (presumably the plumbing specialties distribution market in the geographical market of the entire United States) might be inferred. See ***id. at 975***. ***HN13***[] "Specific intent to monopolize or to obtain monopoly power may be defined for purposes of *§ 2* of the Sherman Act as an intent to control prices or to restrict competition unreasonably." *United States v. Empire Gas Corp., supra, 537 F. 2d at 302*. In the earlier discussion of the *§ 1* claim, the Court concluded that plaintiff failed to aver any facts demonstrating or even suggesting that the allegedly wrongful acts of defendants were causing anti-competitive effects in the relevant market. It would seem to follow, then, that the complaint lacks allegations of predatory acts or acts unreasonably restraining trade, such as would establish specific intent to monopolize. See *Hiland Dairy, Inc. v. Kroger Co., supra, 402 F. 2d at 975*. Since the Court believes that the issue of dangerous probability is dispositive of dismissal of the present *§ 2* claim, we find it unnecessary to rule as a matter of law that plaintiff's allegations do not allege a specific intent to monopolize. Plaintiff is cautioned, however, that an amended complaint will not withstand a motion to dismiss unless it clearly sets forth allegations of conduct which is exclusionary and anti-competitive in nature. *Union Lender Corp. v. Newspapers of New England, Inc., 180 F. Supp. 125, 140-41 (D. Mass. 1959)*, aff'd in part and rev'd in part, *284 F. 2d 582 (1st Cir. 1960)*, cert. denied, ***365 U.S. 833, 81 S. Ct. 747, 5 L. Ed. 2d 744 (1961)***.

[6] Although the Court has construed plaintiff's allegations in paragraph 8 of its complaint to satisfy the requirement that the relevant market be identified, we believe plaintiff should supply more clarity and specificity in setting forth the area of trade which it contends is adversely affected by defendants' actions. "Without a definition of that market there is no way to measure… [the defendants'] ability to lessen or destroy competition." *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247, 251 (1965)*. In redrafting this portion of its complaint, plaintiff is directed to the Eighth Circuit's discussion of the issue of relevant market in *United States v. Empire Gas Corp., supra, 537 F. 2d at 302-5*.

[7] We are not stating that a firm's status as a new entrant ends the inquiry into its ability to monopolize or its possession of market power; but such a factor, in the absence of other information, mitigates against the likelihood that the new entrant possesses

factual allegations as to economic data, and even under a favorable construction, simply does not plead "that the person[s] charged with the attempt [Triangle and the individual defendants] have sufficient market control to make it likely that [they could] achieve… [a] monopoly." 2 J. Von Kalinowski, supra § 9.01[2][a], at 9-7. ***HN16***[] "The phrase 'attempt to monopolize' means the employment of methods, means and practices which would, if successful, accomplish monopolization, and which, though falling short, nevertheless approach so close as to create a dangerous probability of it…" *American Tobacco Co. v. United States, 328 U.S. 781, 785, 90 L. Ed. 1575, 1581 (1946)* (emphasis added). In view of plaintiff's failure to allege any facts which would indicate a dangerous probability of success by defendants in their alleged attempt to monopolize, plaintiff's *section* ***[*24]*** *2* claim must be dismissed, [8] accord *Hiland Dairy, Inc. v. Kroger Co., supra, 402 F. 2d at 976-7*; *Unibrand Tire & Prod. Co. v. Armstrong Rubber, 429 F. Supp. 470, 477 (W.D.N.Y. 1977)*, again, with the qualification that plaintiff will be afforded an opportunity to cure this defect.

[*25] Conclusion

The Court has determined that plaintiff's *§ 1* and *§ 2* claims suffer from the absence of factual allegations that defendants' alleged actions had caused, or were likely to cause, anti-competitive effects in the relevant market of trade. In reaching this determination, the Court observes that the nature of the wrongful acts alleged by plaintiff may, if proven, constitute a basis for recovery under the common law of Missouri, and indeed, the courts of that state appear to be the appropriate forum for resolving plaintiff's grievances. ***HN18***[] "[T]he Sherman Act 'was not enacted to… afford a remedy for wrongs, which are actionable under state law, and result from combinations and conspiracies which fall short, both in their purpose and effect, of any form of market control of a commodity, such as to monopolize the supply, control its price, or discriminate between its would-be-purchasers.'" *Stifel, Nicolaus & Co., Inc. v. Dain, Kalman & Quail, Inc., supra, 578 F. 2d at 1261* [quoting *Apex Hosiery Co. v. Leader, 310 U.S. 469, 512, 60 S. Ct. 982, 1002, 84 L. Ed. 1311, 1333 (1940)]*. However, cognizant of "the long-standing policy of encouraging private enforcement of the antitrust **[*26]** laws", *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707, 725 (1977)*, we extend to plaintiff an opportunity to cure the critical defects of its complaint, which have been noted in this memorandum.

Since the Court has determined that plaintiff's federal antitrust claims in Counts I and II of its complaint should be dismissed, plaintiff's state law claims in Counts III through VII must also be dismissed because the Court has no basis for exercising pendent jurisdiction over these claims. See *United Mine Workers v. Gibbs, supra, 383 U.S. at 726, 16 L. Ed. 2d at 228*.

Accordingly, it is hereby

---

monopoly power or the ability to monopolize, espectially if it has not been transacting business as an established firm in another business market. See generally P. Areeda, Antitrust Analysis P227-241 (2d Ed. 1974); L. Sullivan, supra, §§ 9-11.

[8] The Court has evaluated plaintiff's *§ 2* claim as an "attempt to monopolize" claim in accordance with the language of the pleading. However, since plaintiff also alleged a *§ 1* conspiracy, the *§ 2* claim might be construed to plead a "conspiracy to monopolize". ***HN17***[] The elements of this offense are somewhat different from those of an attempt to monopolize, namely:

> "(1) the existence of a combination or conspiracy;
>
> "(2) overt acts in furtherance of that combination or conspiracy;
>
> "(3) a substantial amount of commerce affected; and
>
> "(4) specific intent to monopolize."

2 J. Von Kalinowski, supra, § 9.02[1], at 9-29 to 9-30. While the Court has found that plaintiff sets forth sufficient factual allegations to state the existence of a conspiracy, overt acts, and arguably specific intent to monopolize (see note 5 supra), our ruling on the *§ 1* claim indicated that plaintiff failed to make any allegation as to the effect of defendants' alleged actions on the relevant market. See Part III supra. Nowhere in the complaint does plaintiff allege facts that could, even when liberally construed, be said to plead an impact on a substantial amount of interstate commerce. Thus, even if we were to infer from plaintiff's complaint an intention to allege a conspiracy to monopolize, an essential element of that offense is not presented in the factual averments of the complaint.

Ordered that defendant's motion to dismiss Counts I and II of plaintiff's complaint for failure to state a claim upon which relief can be granted and to dismiss Counts III through VII for lack of subject matter jurisdiction is granted without prejudice to filing in the proper forum of the claims set forth in Counts III through VII; and it is further

Ordered that plaintiff shall have thirty days from the date of this order within which to file an amended complaint.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN3[] **Monopolies & Monopolization, Actual Monopolization**

Illegal monopolization under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, has two distinct elements: 1) possession of monopoly power in the relevant market and 2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN4[] **Monopolies & Monopolization, Actual Monopolization**

Monopoly power is defined as the power to control prices or exclude competition. The material consideration in determining whether a monopoly exists, is not that prices are raised and that competition is excluded, but that power exists to raise prices or to exclude competition when it is desired to do so.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN5[] **Monopolies & Monopolization, Actual Monopolization**

The simplest way of showing monopoly power is to marshal evidence showing the exercise of actual control over prices or the actual exclusion of competitors.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] **Regulated Practices, Market Definition**

Market share is the critical factor in antitrust cases brought under § 2 of the Sherman Act, 15 U.S.C.S. § 2.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN7[] Monopolies & Monopolization, Actual Monopolization

Although courts have been quick to find monopoly power where the market share is 75-80 percent or greater, this should be regarded as a starting point. Thus, while the existence of such monopoly power ordinarily may be inferred from the predominant share of the market, such an inference does not have to follow automatically. Only a careful factual analysis of the market in question will reveal whether monopoly power, in fact, exists.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN8[] Monopolies & Monopolization, Actual Monopolization

There are two factors in particular that could offset the inference of monopoly power that goes with possession of a high market share: 1) entry barriers and 2) temporal considerations. If entry barriers are low, the threat of potential competition operates as a significant check on monopoly power since competitors will quickly enter the market if prices are raised significantly. Similarly, possession of monopoly power may only indicate short-term success from innovation that will quickly dissipate as competitors catch up.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Monopolies & Monopolization, Actual Monopolization

Mere possession of monopoly power is not illegal. A monopolist which achieves that status because of a superior product, business acumen, or historic accident cannot be faulted. However, if a monopolist abuses its monopoly power and acts in an unreasonably exclusionary manner vis-a-vis rivals or potential rivals, then § 2 of the Sherman Act, 15 U.S.C.S. § 2, is violated.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] Per Se Rule & Rule of Reason, Per Se Violations

As a general rule, there exists no duty to deal, so long as the determination is made unilaterally. In contrast, concerted refusals to deal are in many situations per se violative of § 1of the Sherman Act. 15 U.S.C.S. § 1.

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

HN11[] **Distributorships & Franchises, Antitrust Issues**

Franchisees and distributors that have been unilaterally terminated have discovered that ordinarily the law offers them no remedy absent proof that a conspiracy against them took place. An agreement with another distributor to replace the terminated distributor does not count as a conspiracy. Even the use of unfair business practices as part of the termination may not invoke sanction under the antitrust laws.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN12[] **Monopolies & Monopolization, Attempts to Monopolize**

A business is free to deal with whomever it pleases so long as it has no purpose to create or maintain a monopoly.

HN17[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

Although a general intent to monopolize is all that is ordinarily required to find a violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, cases discussing a monopolist's duty to deal have effectively required a finding of specific intent to monopolize.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN18[] Actual Monopolization, Anticompetitive & Predatory Practices

As preservation of competition is at the heart of the Sherman and Clayton Acts, a practice should be deemed "unfair" or "predatory" only if it is unreasonably anti-competitive. In a case under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, only a thorough analysis of each fact situation will reveal whether the monopolist's conduct is unreasonably anti-competitive and thus unlawful.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN19[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

In many cases, a refusal to deal designed to accomplish vertical integration, without more, should not be a basis for imposing antitrust liability. There are situations, however, where a refusal to deal as part of a vertical integration scheme is anti-competitive. That is, 1) where integration facilitates price discrimination so that the monopolist can reap the maximum monopoly profit from different consumers; 2) where integration increases first-level entry barriers so that potential competitors are stymied; and 3) where integration facilitates evasion of regulation of monopoly profits. In such cases, a court should not hesitate to find a violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN20[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Situations where a refusal to deal as part of a vertical integration scheme is anti-competitive include: 1) where integration facilitates price discrimination so that the monopolist can reap the maximum monopoly profit from different consumers; 2) where integration increases first-level entry barriers so that potential competitors are stymied; and 3) where integration facilitates evasion of regulation of monopoly profits.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN21[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

A finding of anti-trust liability in a case of a refusal to deal should not be made without examining business reasons which might justify the refusal to deal.

Predatory conduct on a defendant's part goes a long way toward establishing a violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*.

Counsel: Martin W. Brown, Cobb, Edwards, Hamlet, Nichol & Woodall, Michael C. Williams, Memphis, Tenn., for plaintiff-appellant.

Stephen H. Biller, Memphis, Tenn., Sam M. Phelps, Tuscaloosa, Ala., for defendant-appellee.

Judges: Before KEITH and MERRITT, Circuit Judges, and **[**2]** GREEN, * Senior District Judge.

Opinion by: KEITH

Opinion

* The Honorable Ben C. Green, Senior District Judge for the Northern District of Ohio, sitting by designation.

[*846] This case presents intriguing questions of single firm monopoly power under *section 2* of the Sherman Antitrust Act, *15 U.S.C. § 2*. [1] The principle issue presented is one of the most unsettled and vexatious in the antitrust field: under what circumstances does a monopolist have a duty to deal? [2]

[3]** The plaintiff, Andrew Byars (Byars), had a long-standing business relationship with the defendant, Bluff City News Co. (Bluff City). [3] Bluff City changed ownership in 1970 and ended all of its business dealings with Byars. The plaintiff then brought this action, alleging that Bluff City was a monopolist which violated the Sherman Anti-Trust Act when it refused to do business with him. In addition, plaintiff added pendent claims of common-law unfair competition, based on an alleged campaign of "dirty tricks" waged against him by Bluff City. After a bench trial, the district court found for the defendant in all respects. Plaintiff appeals. Because we feel that additional fact-finding is needed, we remand for further proceedings.

[4]** FACTS

Background

Printed materials are published by various publishers in the United States and distributed through approximately 15 national distributors to regional wholesale distributors who, in turn, distribute the periodicals to retail outlets such as newsstands and convenience stores for resale to the general public.

Bluff City is one of a number of regional distributors of periodicals in the United States. For over thirty years, it has been a wholesale distributor of paperback books, magazines, and other periodicals to retail outlets in the Memphis-Shelby County, Tennessee, metropolitan area. As a regional wholesaler, Bluff City thus occupied a middle rung in the distribution chain. Following general industry practice, Bluff City's employees would regularly deliver magazines to the various retail outlets and pick up any unsold magazines for credit. [4]

[5]** **[*847]** Early in 1957, Mr. S. I. Bernbaum, Bluff City's owner at that time, determined that a number of small outlets did not sell enough magazines to justify the cost of the regular pick up and deliveries by Bluff City's employees. Desirous of not losing their business altogether, Mr. Bernbaum arranged to have Mr. Howard Troyer

[3] Bluff City was a proprietorship owned by Mr. S. I. Bernbaum until 1970 when the business was sold to Mr. Guy Momam and family. At the time of sale, the company was incorporated and remains so to this day. We shall at all times refer to the company as Bluff City, both pre and post incorporation.

[4] As is indicated below, allowing credit for unsold magazines is critical to the industry. Since periodicals go out of date quickly, no retailer would accept more than a minimal number of periodicals for resale if he bore the risk of loss. Accordingly, it is industry practice for regional wholesalers to accept unsold periodicals for credit from retailers so long as returns are made within a certain time period. Similarly, the national distributors accept unsold magazines for credit from the regional wholesalers. It is not clear from the record whether the ultimate loss for unsold magazines is borne by the national distributors or by the publishing companies themselves. Of course, to the extent that the national distributors are owned by the publishing companies, the question is academic.

service these small outlets. Pursuant to the new arrangement, Troyer would buy periodicals from Bluff City at ten per cent less than wholesale price and sell them to small retail outlets which Bernbaum preferred not to service in the regular manner.

Troyer was a friend and co-worker of the plaintiff, Andrew Byars. Later in 1957, Troyer suggested that Byars join him in distributing magazines to the small retail outlets. A year later, Byars and Troyer separated their operations geographically. Troyer would buy periodicals at ten per cent less than wholesale and sell them to small retail outlets in a certain area of the Memphis-Shelby County region; Byars would do the same for the remaining areas.

Byars and Troyer distributed periodicals part-time. Each had the right to solicit new customers, at least so long as they were small retail outlets which Bluff **[**6]** City would not care to service. In 1967, Troyer, desirous of giving up his part-time distribution of periodicals, sold his accounts to Byars. From then on, Andrew Byars was the only person handling the small accounts.

Byars worked diligently. He would solicit additional accounts and make separate payment agreements with his customers. He billed the customers on invoices marked "Andrew Byars News." He drove a truck with this label on the side, and employed various people to help him on a part-time basis. By 1970 the plaintiff was serving approximately 150 retail outlets and had a gross sales volume of almost $ 350,000.00.

The parties have entered into a heated dispute on the issue of whether Byars was an employee of Bluff City. Plaintiff himself characterized his position as that of a "rack jobber." The district court stated that Byars was an employee in the "common law sense" because he was subject to some degree of control by Bluff City. Our review of the record persuades us that Byars' relationship with Bluff City is a classic example of that of an independent contractor that is, someone who is paid to complete a job, but whose day-to-day activities are not subject to control by **[**7]** the employer. [5]

Unlike Bluff City's regular employees, Byars was not paid a salary. Instead, Byars would turn over to Bluff City all of the money which he had collected from the retail outlets he serviced and would receive a monthly check representing his commission on sales. His commission was set at ten percent, later increased to ten and one half percent. [6] Bluff City News was not aware of all of Byars' accounts, and did not directly supervise the manner in which he serviced them. If Bluff City received complaints from one of Byars' retail outlets, the complaint would be referred directly to Byars himself. Similarly, Byars was furnished a federal tax form 1099 at the end of the year, while route salesmen who were Bluff City employees were furnished W-2 forms. [7] Further, the risk of loss from outdated **[**8]** returns or similar difficulties, was borne directly by Byars. [8] In contrast, Bluff **[*848]** City's employees were not held responsible for similar losses incurred on their routes. [9]

---

[5] See 57 C.J.S. Master and Servant § 580 Et seq.; 53 Am.Jur.2d, Master and Servant § 4 Et seq.; *41 Am.Jur.2d, Independent Contractors § 5 Et seq.* See also *26 U.S.C. § 3121*; *26 C.F.R. § 31.3121(d)-1 (1978)*.

[6] This was apparently done voluntarily, as a goodwill gesture reflective of then-existing harmonious relations between Byars and Bluff City.

[7] Compare *26 U.S.C. §§ 1401-02* With *26 U.S.C. §§ 3101-02*.

[8] As indicated in n. 4, Supra, there exists a general return privilege in the industry for unsold periodicals. However, sometimes retailers would not return unsold periodicals within allotted time periods. As a matter of goodwill, the wholesale supplier would accept these late returns for credit and bear the loss itself.

[9] Still, as in most such relationships, there is some indication that plaintiff was regarded as an employee of Bluff City. The plaintiff qualified for and received prizes and bonuses awarded from time-to-time by Bluff City to its regular route men. Similarly he also received Christmas certificates and participated in Bluff City's group insurance plans. Bluff City insured plaintiff's inventory and provided free warehouse space where he picked up the magazines. The plaintiff appeared on Bluff City's roster of employees. On balance, however, it is clear that both Byars and Bluff City recognized that Byars was different from a regular employee and that he had considerable discretion in the servicing of his own accounts which Bluff City's regular employees did not.

[9]** The relationship between Byars and Bluff City operated smoothly for many years. In 1970, however, the fortunes of the business world upset the harmony of the Status quo. In May of 1970, Bluff City's owners, S. I. Bernbaum and family, sold the business to Mr. Guy Moman and family. [10] The national distributors from whom Bluff City received its publications were informed of the sale; they continued to do business with Bluff City's new owners. From June 1, 1970, until December 31, 1970, Bluff City's new owners permitted the plaintiff to continue to operate in the same manner which he had previously.

By the end of 1970, the new owners had become unhappy with the arrangement with Byars. Testimony credited by the district court revealed that, as a matter of business preference, the new owners did not want to continue the independent contractor relationship with Byars. Instead, the new owners wanted to revert to the pre-1957 manner of operation in which they directly serviced Byars' small customers **[**10]** themselves.

There is no dispute that a series of meetings took place between Byars and the new owners. There is considerable dispute as to what took place at these meetings. The district court credited testimony that the new owners gave Byars several months in which to convince them that the arrangement should continue. Unconvinced that Byars' route fit in with their way of doing business, Bluff City's new owners decided to terminate the arrangement. Mr. Moman testified, and the district court found, that he determined to terminate the independent "rack jobber" arrangement with Byars and instead to pay Byars a salary, employing him directly in a supervisory position. According to Moman, this arrangement was not acceptable to Byars. [11]

[11]** Whatever the dispute as to the circumstances leading up to Bluff City's termination of its arrangement with Byars, there is no dispute that as of January 1, 1971, Bluff City did terminate the arrangement and refused to deal with him. It then took over and serviced Byars' former accounts itself. [12]

The Industry

The wholesale publication distribution industry recognizes two separate markets for periodicals. The "primary line" periodicals are those which are generally acceptable to the general public. "Primary line" periodicals are limited to those periodicals which are distributed by approximately 15 major national distributors. This classification does not include periodicals categorized by the industry **[**12]** as "secondary line periodicals"; that is, periodicals which are not as acceptable to the general public. Although the distinction between primary and secondary line periodicals is not entirely clear, it appears that the secondary periodicals are those periodicals which are of special interest to a limited public. Thus, highly specialized and/or sexually-oriented periodicals are regarded as being within the secondary **[*849]** line. All agree that the dispute in this case centers around the distribution of primary line periodicals in the Memphis and Shelby County, Tennessee area.

After January 1, 1971, plaintiff was unable to acquire any primary line periodicals for resale. He attempted to obtain such periodicals at wholesale prices from the national distributors who supplied these periodicals to Bluff City. In each instance, he was turned down. Cut off from his former source of supply and unable to locate a new one, plaintiff was unable to sell primary line periodicals to his customers. He struggled along, and was able to stay in business for several years by selling secondary line periodicals which he obtained from other distributors. Throughout this period, Byars tried continuously **[**13]** to obtain primary line periodicals from other sources and requested that Bluff City sell to him, but such requests were refused.

---

[10] See n. 3, Supra.

[11] For cases presenting factually similar situations, See *Knutson v. Daily Review Inc., 548 F.2d 795 (9th Cir. 1976)*, Cert. denied, ***433 U.S. 910, 97 S. Ct. 2977, 53 L. Ed. 2d 1094 (1977)***; *McGuire v. Times Mirror Co., 405 F. Supp. 57 (C.D.Cal.1975)*; *Millcarek v. Miami Herald Publishing Co., 388 F. Supp. 1002 (S.D.Fla.1975)*.

[12] It is undisputed that Mr. Moman did not employ limited service independent salesmen in any of his other wholesale distribution agencies in Alabama and Mississippi. Thus it appears that in terminating Byars, Bluff City's new owners acted in accordance with their general approach to conducting their business.

Beginning in October, 1973, Byars was finally able to obtain primary line periodicals from sources outside of normal distribution channels. This source of supply is subject to termination without notice, as was Byars' arrangement with Bluff City News. Although this new source of supply has enabled Byars to compete somewhat with Bluff City in the sale of primary line periodicals, there was testimony that the source of supply is limited. As a result, Byars has been unable to fully compete with the defendant since he cannot expand the number of stores which he services.

In the ordinary case, this tale would elicit much sympathy but no legal redress. Thorny legal issues are presented, however, because of Bluff City's alleged status as a monopolist and because of the alleged "dirty tricks" it played on Byars when he tried to stay in business after the parties' relationship terminated.

I. The Relevant Market

In a typical *section 2* monopolization or attempt to monopolize case, the issues of relevant product market and relevant geographic market are usually hotly **[**14]** contested. [13] In this case, however, there is no dispute whatsoever as to these issues. The parties have stipulated that the relevant product market is over-the-counter sale of "primary line" periodicals. [14] The parties have also stipulated that the relevant geographic market encompasses the area around Memphis where Bluff City distributes periodicals that is Memphis and Shelby County, Tennessee; Southhaven, Mississippi; and West Memphis, Arkansas. The question which this case presents, then, is whether Bluff City's refusal to deal with Byars constituted illegal monopolization within the stipulated market.

[15]** II. Monopolization in Violation of *Section 2* of the Sherman Act

In *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966)*, the Supreme Court noted that ***HN3***[] illegal monopolization under *Section 2* of the Sherman Act has two distinct elements: 1) possession of monopoly power in the relevant market and 2) "the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." Id. [15]

A. Possession of Monopoly Power

The Supreme Court has defined ***HN4***[] monopoly power as "the power to control prices or exclude competition." *United States v. Grinnell, 384 U.S. 563, 571, 86 S. Ct. 1698, 1704,* ***[**16]*** *16 L. Ed. 2d 778 (1966)*; *United States* ***[*850]*** *v. DuPont and Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. ". . . (T)he material consideration in determining whether a monopoly exists, is not that prices are raised and that competition is excluded, but that power exists to raise prices or to exclude competition when it is desired to do so." *American Tobacco Company v. United States, 147 F.2d 93, 112 (6th Cir. 1944)* (McAllister, J.), *Aff'd, 328 U.S. 781, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*.

As the Supreme Court noted in *American Tobacco Company v. United States, 328 U.S. 781, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*, ***HN5***[] the simplest way of showing monopoly power is to marshal evidence showing the exercise of actual control over prices or the actual exclusion of competitors. This was the approach taken in older cases. See *United States v. Int'l Harvester Co., 274 U.S. 693, 708, 47 S. Ct. 748, 71 L. Ed. 1302 (1927)*; *United*

---

[13] See e. g. *United States v. Grinnell Corp., 384 U.S. 563, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *United States v. E. I. DuPont DeNemours and Co., 366 U.S. 377, 81 S. Ct. 1243, 6 L. Ed. 2d 318 (1956)*; *Telex Corp. v. I.B.M., 510 F.2d 894* (10th Cir.), Cert. dismissed, ***423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975)***.

[14] This market excludes "primary line" periodicals distributed through direct readers' subscriptions and excludes all sales of "secondary line" periodicals.

[15] For an excellent discussion of *§ 2* of the Sherman Act, see Judge Kaufman's opinion in *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263 (2d Cir. 1979)*. We, of course, express no opinion on whether we agree with the Berkey court's application of the law to the facts of that case.

States v. United States Steel Corporation, 251 U.S. 417, 451, 40 S. Ct. 293, 64 L. Ed. 343 (1920). See also United States v. Swift & Co., 286 U.S. 106, 52 S. Ct. 460, 76 L. Ed. 999 (1932).

In order to better deal with antitrust cases, courts developed **[**17]** what can best be described as a shortcut formula which entails measuring the market share possessed by the alleged monopolist. The leading case taking this approach is United States v. Aluminum Co. of America (Alcoa), 148 F.2d 416, 424, 429 (2d Cir. 1945), where Judge Learned Hand saw no need for additional analysis when confronted with evidence of massive market control. He simply pointed to the fact that Alcoa possessed a 90 percent share of the relevant market and concluded that the company possessed monopoly power. [16] The Supreme Court expressly approved Judge Hand's views in American Tobacco Co. v. United States, 328 U.S. 781, 813-14, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946), and ever since **HN6**[] market share has been the critical factor in § 2 antitrust cases. [17]

[18]** **HN7**[] Although courts have been quick to find monopoly power where the market share is 75-80% or greater, [18] **[**19]** this should be regarded as a starting point. Thus, while "the existence of such (monopoly) power ordinarily may be inferred from the predominant share of the market" United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966), such an inference does not have to follow **[*851]** automatically. [19] **[**20]** Only a careful factual analysis of the market in question will reveal whether monopoly power, in fact, exists. [20]

---

[16] In a famous dictum, Judge Hand stated that it was doubtful whether 60 or 64% of the market would be enough to constitute a monopoly and that 33% would certainly not be enough. United States v. Aluminum Co. of America, 148 F.2d 416, 424 (1945).

[17] This is the reason why relevant market is so critical in antitrust cases. How one defines the relevant market determines market share and market share all but determines whether one is a monopolist. See e. g. United States v. DuPont & Co., 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956) (Majority's broad definition of relevant market resulted in a finding that DuPont had 20% of that market and was therefore not a monopolist. The dissent would have defined the market more narrowly and inferred monopoly power from DuPont's 75% share of this market). See also Sullivan, Antitrust § 12 Et seq.

[18] See United States v. Grinnell, 384 U.S. 563, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966) (87% of the market); Int'l Boxing Club, Inc. v. United States, 358 U.S. 242, 79 S. Ct. 245, 3 L. Ed. 2d 270 (1959) (81% of championship fights); American Tobacco Co. v. United States, 328 U.S. 781, 66 S. Ct. 1125,, 90 L. Ed. 1575 (1946) (80% of market constituted monopoly power); Sunkist Growers, Inc. v. Winckler & Smith Citrus Prod. Co., 284 F.2d 1 (9th Cir. 1960), Rev'd on other grounds, 370 U.S. 19, 82 S. Ct. 1130, 8 L. Ed. 2d 305 (1962) (70% of market for by-product oranges); Kansas City Star Co. v. United States, 240 F.2d 643 (8th Cir.) Cert. denied, ***354 U.S. 923, 77 S. Ct. 1381, 1 L. Ed. 2d 1438 (1957)***, (96% of narrowly defined market for communications media operations); United States v. Besser Mfg. Co., 96 F. Supp. 304 (E.D.Mich.1951), Aff'd on the other grounds, 343 U.S. 444, 72 S. Ct. 838, 96 L. Ed. 1063 (1952) (65% of market where balance divided between 50 small competitors); United States v. Paramount Pictures, Inc., 85 F. Supp. 881 (S.D.N.Y.1949) (70% of market for first run theatres in 92 largest American cities). See also United States v. DuPont & Co., 351 U.S. 377, 425, 76 S. Ct. 994, 1022, 100 L. Ed. 1264 (1956) (Warren, C. J. dissenting) ("Since DuPont has the lion's share of that market, it must have monopoly power, as the majority concede").

[19] See P. Areeda, Antitrust Analysis: Problems, Text, Cases. 18-20, 197-203 (2d ed. 1974); Note, The Development of the Sherman Act Section 2 Market Share Test and Its Inapplicability to Dynamic Markets, 49 So.Calif.L.Rev. 154, 182-186 (1975). These commentators have noted that **HN8**[] two factors in particular could offset the inference of monopoly power which goes with possession of a high market share: 1) entry barriers and 2) temporal considerations. If entry barriers are low, the threat of potential competition operates as a significant check on monopoly power since competitors will quickly enter the market if prices are raised significantly. Similarly, possession of monopoly power may only indicate short-term success from innovation which will quickly dissipate as competitors catch up. A careful examination of the publishing industry might reveal other factors which could raise doubts whether the defendant possesses monopoly power.

One factor which deserves assessment is the conduct of the national distributors. It is clear that to the extent that Bluff City does have a monopoly in the relevant market, that monopoly exists at the pleasure of the national distributors. It may be that the national distributors carefully police the conduct of the regional distributor and are quick to withdraw an exclusive franchise at the first sign of consumer dissatisfaction. On the other hand, the national distributors may not care about the regional distributors' conduct so long as they make their profit.

Reverting to pre-Alcoa analysis, the district court did not attempt to measure Bluff City's market share. Thus, it did not address uncontroverted proof **[**21]** that measured both in terms of the number of outlets served and dollar volume of sales, Bluff City possesses approximately ninety percent (90%) of the relevant market. [21] This is hardly surprising since the only sources of wholesale primary-line periodicals in the Memphis area are the two litigants. And, since Byars was cut off by the defendant, he has struggled to get primary-line periodicals to resell to his customers. Indeed, from January 1971 to October 1973, the plaintiff was unable to secure primary-line periodicals from any source and, as a result, Bluff City controlled virtually 100% Of the relevant market.

The district court concluded that Bluff City did **[**22]** not have monopoly power. This determination was based on two facts. First, the court below emphasized that the relationship between Bluff City and the national periodical distributors was terminable at will. The court found that it was the economics of the industry which led the national distributors to deal exclusively with a single regional distributor such as Bluff City. [22] **[**23]** Periodicals are highly perishable; when they get out of date, they are worthless. Few retailers would sell magazines **[*852]** to the public if they bore the risk of loss for unsold out-of-date periodicals. Accordingly, industry practice is to allow unlimited return of unsold periodicals to the regional distributor and from the regional distributor back to the national distributors. Industry experience has shown that where there are two or more regional distributors competing with each other, confusion and high rates of return of unsold merchandise are the order of the day. [23] To minimize these problems, national distributors have made the independent [24] decision to deal with only one regional distributor whenever possible.

---

[20] See *Pac. Coast Agr. Export Ass'n v. Sunkist Growers, Inc., 526 F.2d 1196 (9th Cir. 1975)*, Cert. denied, ***425 U.S. 959, 96 S. Ct. 1741, 48 L. Ed. 2d 204 (1976)*** (defendant's share of the relevant distribution market ranged from 45-70%, but competitors were small and defendant had monopoly power over supply market); *United States v. United Shoe Machinery Corp., 110 F. Supp. 295, 343 (D.Mass.1953)*, Aff'd per curiam, *347 U.S. 521, 74 S. Ct. 699, 98 L. Ed. 910 (1954)*, (court gave "some weight" to 75 plus percent market share, but performed careful analysis of the shoe machinery industry to reach its conclusion that defendant possessed monopoly power). Cf. *United States v. General Dynamics Corp., 415 U.S. 486, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974)* (Court did not discuss market share, but concluded from its analysis of the industry that no substantial lessening of competition would result from a merger challenged under § 7 of the Clayton Act).

[21] At the time of trial, the defendant served 554 customers, the plaintiff served 59. Three other retail outlets received publications from other sources. Our examination of confidential dollar sales volume figures submitted under seal shows that between 1973 and 1975, Bluff City had from 94% To 96% Of the relevant market measured in sales volume.

[22] This case does not present any issues involving a violation of *section 1* of the Sherman Act because of a joint refusal to deal, sometimes referred to as a group boycott. See e. g. *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*; *William Goldman Theatres v. Loew's, Inc., 150 F.2d 738 (3d Cir. 1945)*, Cert. denied, *334 U.S. 811, 68 S. Ct. 1016, 92 L. Ed. 1742 (1948)*. It is true that none of the primary line national periodical distributors would deal with plaintiff, despite his requests that they do so. Testimony in the record reveals that each distributor made an independent decision not to sell to plaintiff, and that no conspiracy or joint refusal to sell took place.

[23] Although we accept this finding, we note that it may not be true under all circumstances. If two distributors both supply the same magazines to a retail store, then there will be an increase in unsold magazines and confusion as to which distributor's magazines were sold. If two distributors compete among themselves as to which retail stores to service, these adverse effects do not necessarily follow so long as only one distributor ends up supplying each store.

[24] The decision made by the national distributors is similar to that made by national film companies to only allow distributors with a full line of products to market posters and other movie display accessories. The Third Circuit upheld this decision because it was independently made for valid business reasons. See *Lawlor v. National Screen Service Co., 270 F.2d 146 (3d Cir. 1959)*, Cert. denied, ***362 U.S. 922, 80 S. Ct. 676, 4 L. Ed. 2d 742 (1960)***.

In another analogous case, the Second Circuit upheld the right of publishing companies to cease doing business with a regional distributor with whom they were dissatisfied and to replace it with a system of 13 smaller regional distributors. Each company acted independently and for a valid business reason. See *Interborough News Co. v. The Curtis Publishing Co., 225 F.2d 289 (2d Cir. 1955)* *Aff'ing 127 F. Supp. 286 (S.D.N.Y.1954)*.

[24]** Secondly, the district court emphasized that since October of 1973, the plaintiff has been able to obtain periodicals from a distributor in another state at an even better discount than he formerly obtained from Bluff City. The court also pointed out that Byars has been doing business with Johnson Publications, a publisher and distributor of black oriented magazines since 1973.

We do not believe that the district court's analysis of Bluff City's market position suffices to support its conclusion that Bluff City did not possess the power to raise prices or exclude competition. Rather, this record fairly supports the conclusion that industry practice has resulted in a limited number of exclusive regional wholesalers. However, the fact that national periodical distributors have legitimately and individually chosen to deal only with Bluff City does not mean that Bluff City lacks monopoly power in the relevant market. On the contrary, it appears that the national distributors have conferred a monopoly upon Bluff City. That there may have been valid business reasons for this cannot disguise Bluff City's market dominance.

The other factors cited by the district court are also flawed. The **[**25]** court did not address evidence that Byars' source of primary line periodicals at the time of trial was limited and that he has been unable to expand his business as a result. The court further failed to address proof that from January 1971 to October 1973, Byars was unable to secure primary line periodicals from any source, and that as a result, Bluff City controlled virtually 100% of the relevant market during that time. Finally, it appears that the "black-oriented" periodicals supplied by the Johnson Distributing Company are not primary line periodicals but secondary line periodicals which are not within the relevant product market in this case. [25]

[26]** We think that fresh fact-finding on this issue is in order. The district court should first consider Bluff City's market share. As indicated, it appears to be at least 90 percent. It may well be, that despite this, Bluff City does not possess monopoly **[*853]** power. Only a careful factual analysis will reveal if this is so. [26]

[27]** B. Abuse of Monopoly Power

If the court below does find that Bluff City possesses monopoly power, the record before us suggests that at worst, such power was thrust upon Bluff City by the national periodical distributors who, for valid business reasons, chose to deal only with it. This is significant because ***HN9***[] mere possession of monopoly power is not illegal. A monopolist which achieves that status because of "a superior product, business acumen, or historic accident," *United States v. Grinnell Corp., supra, 384 U.S. at 571, 86 S. Ct. at 1704*, cannot be faulted. [27] Such monopolists

---

[25] In its brief and in a post-argument supplemental letter, Bluff City argued that there were other wholesalers active in the area. However, there is no finding below to this effect and other wholesalers appear to serve only 3 stores in the stipulated geographic market. The existence of potential competition of course, can check the exercise of monopoly power. See n. 19, Supra. The parties are free to argue this issue on remand.

[26] Important to this determination will be an analysis of plaintiff's allegations of adverse effect upon the small retailers. There is evidence in the record, not addressed by the district court, that when Bluff City took over servicing Byars' former small retail customers, the result was inferior service at greater cost which the small retailers were forced to bear since they had nowhere else to turn for primary-line periodicals.

Byars' customers mostly operated neighborhood convenience stores. When Bluff City cut off Byars and took over his accounts, it imposed a service charge on them which Byars had not. In addition, Bluff City provided some of the stores only with drop shipment service, i. e., magazine bundles were simply dropped off. Byars always provided full service, i. e., he always placed the new magazines on the store racks. A number of the small store operators testified that Bluff City's services were very poor compared with Byars'. Specifically, Bluff City was slow in giving credit for returns and was sometimes overly rigid in demanding that retailers carry large numbers of unwanted titles. It appears that the retailers preferred Byars' eager-to-please personalized service to Bluff City's "assembly-line" approach. This evidence, if credited, lends strong support to plaintiff's contention that Bluff City possesses monopoly power.

[27] The classic case is that of a "natural" monopoly such as that possessed by a utility company in a city. For example, in *Otter Tail Power Co. v. United States, 410 U.S. 366, 369, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*, the Court noted that "(e)ach town in

are "tolerated but not cherished" because of "considerations of fairness and the need to preserve proper economic incentives." *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 274 (2d Cir. 1979)*. However, if a monopolist abuses its monopoly power and acts in an unreasonably exclusionary manner vis-a-vis rivals or potential rivals, then *§ 2* is violated. If, after the additional fact-finding ordered on remand, the district court finds that Bluff City did in fact possess monopoly power, it must then determine whether Bluff City abused this power by refusing to deal with Byars.

[28]** Plaintiff contends that Bluff City abused its monopoly power in two ways: First, by refusing to deal with him and second by engaging in a series of "dirty tricks" against him. The district court agreed that Bluff City had cut the plaintiff off and had refused to deal with him, [28] but ruled that it was perfectly within its rights in doing so. The court further concluded that prior to January 1, 1971, there existed no competition between the plaintiff and Bluff City. Rather, it found a dependent, but non-competitive relationship whereby the defendant serviced the small accounts which Bluff City did not desire. While this finding is fully supported by the evidence, [29] it is unquestionably **[*854]** true that after January 1, 1971, the plaintiff desired to and indeed, finally did, compete against Bluff City. Further, it is also uncontroverted that Bluff City has continued to refuse to deal with the plaintiff and that the plaintiff has had difficulty competing as a result.

[29]** The district court dealt only obliquely with the evidence in the record regarding Bluff City's predatory "dirty tricks" against the plaintiff. [30] It discussed this evidence at the end of its opinion, when dealing with a related claim of common-law unfair competition not when dealing with the antitrust allegations. It specifically referred to testimony indicating that some of plaintiff's magazines had been removed from racks in retail outlets served by both plaintiff and defendant and to testimony of disparaging remarks made about plaintiff and his financial condition. The court concluded that "this testimony is controverted and upon cross examination of the witnesses the willfulness and unfairness was deflated." The court also stated that "the proof does not establish that these (sic) so-called unfair competition was done pursuant to instruction from or in furtherance of an adopted policy of the management of the defendant."

[30]** III. Refusals to Deal

Otter Tail's service area generally can accommodate only one distribution system, making each town a natural monopoly market for the distribution and sale of electric power at retail."

Other examples of a "natural" monopoly are the single newspaper in a small-town, See *Times-Picayune Publishing Company v. United States, 345 U.S. 594, 602-603, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*; *Union Leader Corp. v. Newspapers of New England, Inc., 284 F.2d 582 (1st Cir. 1960)*, Cert. denied, *365 U.S. 833, 81 S. Ct. 747, 5 L. Ed. 2d 744 (1961)*; *United States v. Hartke-Hanks Newspapers, Inc., 170 F. Supp. 227 (N.D.Tex.1959)*, or the single movie in a small town, See *United States v. Griffith, 334 U.S. 100, 106, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)*; *John Wright & Assoc. v. Ullrich, 328 F.2d 474 (8th Cir. 1964)* which cannot support more than one of those entities. See also *Clark Marine Corp. v. Cargill, Inc., 226 F. Supp. 103 (E.D.La.1964)*, *Aff'd 345 F.2d 79 (5th Cir. 1965)*, Cert. denied, ***382 U.S. 1011, 86 S. Ct. 620, 15 L. Ed. 2d 526 (1966)***.

[28] Indeed, there is absolutely no dispute that this occurred.

[29] To be sure, there is some evidence in the record which indicated that some stores were offered the choice of being served by Byars or by Bluff City. On the whole, however, Byars and Bluff City served distinct customer groups.

[30] There was some testimony in the record which, if credited, could result in a finding of predatory conduct by Bluff City. These alleged activities included: 1) removal of plaintiff's periodicals from sales racks at various retail outlets; 2) covering up of plaintiff's periodicals on the racks to put them out of the view of prospective buyers; 3) below cost pricing of those few periodicals being distributed by the plaintiff; 4) disparagement of the plaintiff, his financial condition, and the periodicals he was able to obtain; 5) surreptitious addition of its own periodicals identical to those placed on racks by plaintiff in order to increase plaintiff's return and diminish plaintiff's profits; 6) intimidation of plaintiff's customers to purchase periodicals solely from defendant; 7) threats to the regional representative of an independent news company with reprisals if he assisted plaintiff in the direct purchase of periodicals from independents. See generally *Photovest Corp v. Fotomat Corp., 606 F.2d 704 (7th Cir. 1979)*; 3 Areeda & Turner, ***Antitrust Law*** P 37 Et seq. (1978).

The district court appeared to take the broad view that a company has the unfettered right to deal with whom it pleases regardless of the circumstances. It is true that *HN10*[] as a general rule, there exists no duty to deal, so long as the determination is made unilaterally. See e. g. *Associated Press v. United States, 326 U.S. 1, 14-15, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)*; *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992 (1919)*. In contrast, Concerted refusals to deal are in many situations Per se violative of section one of the Sherman Act. See *United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; *Klor's Inc. v. Broadway-Hale Stores, 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*; McDonnell v. Michigan Chapter # *10 Am. Inst. of Real Estate Appraisers, 587 F.2d 7 (6th Cir. 1978)*; *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126* (2d Cir.) Cert. denied, *439 U.S. 946, 99 S. Ct. 340, 58 L. Ed. 2d 338 (1978)*; Sullivan, Antitrust § 83 Et seq. (1976).

HN11[] Franchisees and distributors which have been unilaterally terminated have discovered to their chagrin that ordinarily the law offers them no remedy **[**31]** absent proof that a conspiracy against them took place. See e. g. *Daniels v. All Steel Equipment, Inc., 590 F.2d 111 (5th Cir. 1979)*; *Fray Chevrolet Sales, Inc. v. General Motors Corp., 536 F.2d 683, 686 (6th Cir. 1976)*; *Burdett Sound, Inc. v. Attic Corporation, 515 F.2d 1245 (5th Cir. 1975)*; *Elder-Beerman Stores Corp. v. Federated Dept. Stores, Inc., 459 F.2d 138 (6th Cir. 1972)*; *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke and Liquors, Ltd., 416 F.2d 71* (9th Cir.), Cert. denied, *396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755 (1969)*; *Ace Beer Distributors, Inc. v. Kohn, Inc., 318 F.2d 283 (6th Cir. 1963)*, Cert. denied, *375 U.S. 922, 84 S. Ct. 267, 11 L. Ed. 2d 166 (1964)*; *Aaron E. Levine & Co., Inc. v. Calkraft Paper Co., 429 F. Supp. 1039, 1046-47 (E.D.Mich.1976)*; *B & B Oil & Chemical Co. v. Franklin Oil Corp., 293 F. Supp. 1313 (E.D.Mich.1968)*. Cf. *Daily Press, Inc. v. United Press Int'l, 412 F.2d 126, 134-35* (6th Cir.), Cert. denied, *396 U.S. 990, 90 S. Ct. 480, 24 L. Ed. 2d 453* ***[*855]*** *(1969)*. An agreement with another distributor to replace the terminated distributor does not count as a conspiracy. *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke and Liquor, Ltd., supra at* ***[**32]*** *78*, See also *Packard Motor Car Co. v. Webster Motor Car Co., 100 U.S.App.D.C. 161, 163-164, 243 F.2d 418, 420-21* (D.C. Cir.) Cert. denied, *355 U.S. 822, 78 S. Ct. 29, 2 L. Ed. 2d 38 (1957)*. Even the use of unfair business practices as part of the termination may not invoke sanction under the antitrust laws. See *Northwest Power Products, Inc. v. Omark Ind. Inc., 576 F.2d 83 (5th Cir. 1978)*. But see *Industrial Bldg. Materials, Inc. v. Interchemical Corp., 437 F.2d 1336 (9th Cir. 1970)*. See generally Annot., Refusals to Deal as Violations of the Federal Antitrust Laws, 41 A.L.R.Fed. 175 (1979).

The above authorities effectively show that if Bluff City is found on remand not to possess monopoly power, it could have terminated, with impunity, its relationship with Byars. However, if the court on remand finds that Bluff City does possess monopoly power, added obligations are imposed on the defendant which would not attach in the ordinary refusal to deal context. Should the court on remand find that Bluff City possesses monopoly power, we propose below a framework for its analysis of the abuse of such power in the refusal to deal context.

A. General Case Law on Refusals to Deal by Monopolists

[33]** There exist two conceptually similar lines of cases which impose a duty to deal upon a monopolist. The first is a straightforward "intent" test which originated from Dicta in *United States v. Colgate & Co., supra, 250 U.S. at 307, 39 S. Ct. at 468* where the Court stated that *HN12*[] a business is free to deal with whomever it pleases so long as it has no "purpose to create or maintain a monopoly." See also *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 468-69, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*.

The intent test was applied in *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 47 S. Ct. 400, 71 L. Ed. 684 (1927)*. There, the Court affirmed a finding of illegal monopolization where a monopolist refused to deal and the jury inferred monopolistic intent because the defendant's policies were "in pursuance of a purpose to monopolize." *Id. at 375, 47 S. Ct. at 404*. Kodak had monopoly power over the national wholesale market for certain photographic supplies. It desired to vertically integrate and take over retail distribution of these supplies as well. To that end, it began buying out distributors. One such distributor, however, refused to be bought out. Kodak responded **[**34]** by refusing to sell photographic supplies to the distributor at wholesale prices. From these facts, the jury was permitted to infer an illegal intent to monopolize. Kodak comes perilously close to establishing an absolute duty to deal since it permitted a finding of illegal intent where the only evidence of monopolistic purpose was Kodak's desire to buy out retail distributors and its inability to provide an independent business reason for its refusal to deal.

Two other Supreme Court decisions have found refusal to deal by monopolists to be illegal. In *Lorain Journal v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*, a newspaper which was indispensable to local businesses refused to sell advertising space to customers who bought advertising on a local radio station. The Court found that this conduct was designed to destroy the competitor and enjoined it as an illegal attempt to monopolize.

In *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*, the Court found that a private utility company with monopoly power in a wholesale power market had illegally "sought to substitute for competition anticompetitive uses of its dominant **[**35]** economic power." *Id. at 380, 93 S. Ct. at 1031*. In addition to supplying wholesale power, Otter Tail also was responsible for providing power at retail to the inhabitants of certain small towns. Otter Tail's wrongful conduct was its refusal to sell power at wholesale **[*856]** prices or to "wheel" [31] power to municipalities who proposed to replace Otter Tail in the local retail market with their own power companies.

Two lower-court cases have found a monopolist's refusal to deal unlawful because it was done with intent to preserve a monopoly. See *Poster Exchange, Inc. v. Nat'l Screen Service Corp., 431 F.2d 334 (5th Cir. 1970)*, Cert. denied, *401 U.S. 912, 91 S. Ct. 880, 27 L. Ed. 2d 811 (1971)* (". . . National Screen intentionally used **[**36]** the monopoly power it had at the manufacturing level to eliminate Poster as a competitor at the distributor-jobber level."); *United States v. Klearflax Linen Looms, 63 F. Supp. 32, 39 (D.Minn.1945)* ("(monopolist) cannot refuse to sell if its design and purpose is to establish a wrongful monopoly.").

There also exists a second, related line of cases which has been styled as promulgating ***HN13***[] the "bottleneck theory of ***antitrust law***." [32] **[**37]** Under this approach, a business or group of businesses which controls a scarce facility has an obligation to give competitors reasonable access to it. The seminal case is *United States v. Terminal Railroad Assoc., 224 U.S. 383, 32 S. Ct. 507, 56 L. Ed. 810 (1912)* where a group of railroads acquired ownership over a facility which constituted the only feasible terminal for rail traffic coming to the city of St. Louis from the West. [33] The Court ruled that the terminal owners had to make the facility equally accessible to all users. [34]

---

[31] To wheel electricity is to transfer it from one place to another via transmission lines. There were other sources of wholesale power, but Otter Tail would not allow its transmission lines to be used to transfer the power to the municipalities. See *Otter Tail, supra at 368*.

[32] See *United States v. Otter Tail Power Co., 331 F. Supp. 54, 61 (D.Minn.1971)*, Aff'd in relevant part, *410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*; A. Neale, The Anti-Trust Laws of the United States of America 66-69, 127-33 (2d ed. 1970); Note, Refusals to Deal by Vertically Integrated Monopolists, 87 Harv.L.Rev. 1720, 1740-52 (1974).

[33] Areeda & Turner, Supra at P 729g would limit these cases to situations where a Group of competitors obtained a vertically integrated facility. We are not so sure. There may indeed be significant considerations of fairness and efficiency where a single innovative firm builds or obtains a unique facility. However, many such situations arise purely by chance or accident. We question the wisdom of permitting exclusionary behavior by the accidental owner of a unique facility while prohibiting such conduct if the facility is owned by two or more competitors at least so long as the judicial price regulation problem we discuss below can be overcome.

[34] See also *Associated Press v. United States, 326 U.S. 1, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)* (A.P.'s bylaws, restricting membership by competitors of existing members struck down as unreasonable restraint on competition); ***Woods Exploration & Pro. Co. v. Aluminum Co. of America, 438 F.2d 1286, 1303-09 (5th Cir. 1971)***, Cert. denied, ***404 U.S. 1047, 92 S. Ct. 701, 30 L. Ed. 2d 736 (1972)*** (defendants hindered plaintiff from extracting natural gas from a field by refusing access to transport facilities, pooling arrangements or a right-of-way); *Six Twenty-Nine Productions, Inc. v. Rollins Telecasting, Inc., 365 F.2d 478 (5th Cir. 1966)* (Local radio station refused to pay normal commission for material prepared by an advertising agency, effectively refusing to deal with it. Reasonableness of station's action an issue of fact); *Packaged Programs Inc. v. Westinghouse Broadcasting Co., 255 F.2d 708 (3d Cir. 1958)* (Hastie, J.) (Factual issue whether T.V. station's refusal to accept a competitor's

[38]** In theory, the distinction between the "intent" theory and the "bottleneck" theory is that the former focuses on the monopolist's state of mind while the latter examines the detrimental effect on competitors. In practice, however, there exist many overlapping considerations. This is especially evident in a situation where a monopolist seeks to vertically integrate into a submarket containing only one potential competitor. Since only one competitor is involved, a refusal to deal simultaneously operates as the intentional maintenance of a monopoly as well as the destruction of competition.

[*857] The overlapping factors are apparent upon examination of *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*. There, the Court found unlawful use of monopoly power where Otter Tail used its monopoly position as a regional supplier of wholesale power to preserve its position as a retail supplier of power in certain towns. Otter Tail refused to deal with certain proposed municipal power systems which needed access to backup wholesale electricity which only Otter Tail could provide. Otter Tail's conduct, however, was unusually predatory. It refused **[**39]** to allow use of its power lines so that the municipalities could not obtain power from other suppliers. Additionally, it invoked restrictive contract clauses for the same reason. Finally, it engaged in a pattern of harassing litigation against any municipality which desired to set up its own retail power system. Notwithstanding the above, Otter Tail had long-standing dealings with municipalities which had always had their own power companies. Only when a municipality which had previously obtained retail power from Otter Tail proposed to establish its own power system would Otter Tail retaliate.

As can be seen, Otter Tail did much more than simply refuse to deal. Its overall conduct made it plain that it was seeking to destroy a potential competitor in the local retail market. Moreover, Otter Tail could advance no evidence showing that its conduct was at all beneficial to the public. If anything, the evidence showed the contrary. [35] The only justification offered was self-preservation, and the court rejected that defense. [36] Although the district court in Otter Tail relied separately on the "intent test" and the "bottleneck" test, See *331 F. Supp. 54, 61 (D.Minn.1971)*, the Supreme **[**40]** Court's discussion incorporated both in a brief overall analysis. See *410 U.S. 366, 377, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*.

B. Refusals to Deal in Different Factual Situations

Whether the analysis of refusals-to-deal by monopolists is **[**41]** premised on the "intent" test or the "bottleneck" test, there is a discernible uniformity of holdings of illegal refusals-to-deal in various factual contexts.

First, there are ***HN14***[] situations where a monopolist uses its monopoly power in one market to distort competition in another market by refusing to deal. This is forbidden, at least absent a valid business justification for the refusal to deal. [37] **[**42]** *Six Twenty-Nine Prods, Inc. v. Rollins Telecasting, Inc., 365 F.2d 478 (5th Cir. 1966)*; *Packaged Programs, Inc. v. Westinghouse Broadcasting Co., 255 F.2d 708 (3d Cir. 1958)*; Cf. *United States v.*

---

film programs was done in the exercise of valid business judgment or to eliminate the competitor); *Gamco, Inc. v. Providence Fruit & Produce Bldg., Inc., 194 F.2d 484* (1st Cir.), Cert. denied, ***344 U.S. 817, 73 S. Ct. 11, 97 L. Ed. 636 (1952)*** (Group of defendants had to provide equal access to their commercially unique building. However, denial of access to a competitor would be proper if done for valid business reasons.).

[35] Municipal power systems are preferred customers for cheap Bureau of Reclamation power. If Otter Tail could be made to "wheel" the power, it could be provided more cheaply to consumers than electricity previously obtained from Otter Tail. Indeed, this was the heart of Otter Tail's claim that it properly refused to deal to preserve itself. See *United States v. Otter Tail Power Co., 331 F. Supp. 54, 57, 64 (D.Minn.1971)*.

[36] The Court did not conclude that self-preservation was an invalid consideration. Rather, it accepted the district court's conclusion that Otter Tail's fears were greatly exaggerated. See *United States v. Otter Tail Power Co., 331 F. Supp. 54, 64 (D.Minn.1971)*, Aff'd in relevant part, *410 U.S. 366, 380-82, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*.

[37] On the closely related issue of "price squeezes" by vertically integrated monopolists, See *United States v. Aluminum Co., supra, 148 F.2d at 436-38*; *United States v. Corn Prods. Ref. Co., 234 Fed. 964 (S.D.N.Y.1916)*; *Grand Caillou Packing Co., 65 F.T.C. 799*, Aff'd in part, rev'd in part, sub nom. *La Peyre v. F.T.C., 366 F.2d 117 (5th Cir. 1966)*; Areeda & Turner, *Supra at PP 728-29*.

Griffith, 334 U.S. 100, 68 S. Ct. 941, 92 L. Ed. 1236 (1948) (Invalidating use of monopoly power in one geographic market to acquire monopoly power in another). [38]

[43]** **[*858]** Second, there is the context in which ***HN15***[] a monopolist refuses to deal with customers who deal with its rivals. This behavior is inherently anti-competitive; Lorain Journal, supra, makes it clear that this is illegal, either as monopolization or attempt to monopolize. See also North Texas Producers Ass'n v. Metzger Dairies, Inc., 348 F.2d 189 (5th Cir. 1965), Cert. denied, *382 U.S. 977, 86 S. Ct. 545, 15 L. Ed. 2d 468 (1966)*; Kansas City Star Co. v. United States, 240 F.2d 643 (8th Cir.), Cert. denied, *354 U.S. 923, 77 S. Ct. 1381, 1 L. Ed. 2d 1438 (1957)*.

Third, there is the context in which ***HN16***[] a group of competitors control an indispensable facility which cannot be easily duplicated. This is the classic case where the "bottleneck theory" applies. Absent valid business reasons, equal access is required for all. [39] See United States v. Terminal R.R. Ass'n, Supra; Gamco, Inc. v. Providence Fruit & Produce Bldg., 194 F.2d 484 (1st Cir.), Cert. denied, *344 U.S. 817, 73 S. Ct. 11, 97 L. Ed. 636 (1952)*.

[44]** Fourth, there is the most conceptually difficult context of all that in which a monopolist seeks to vertically integrate. These were the circumstances in Eastman Kodak Co. v. Southern Photo Materials Co., supra, where Kodak cut off one of its retail distributors as part of its efforts to vertically integrate into the retail distribution of photography supplies. Likewise, in Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973), Otter Tail, among other things, refused to deal when small towns proposed to replace it with their own retail power systems. In that case, Otter Tail used its monopoly power in the wholesale power market to prevent the displacement of its (natural) monopoly in the local retail power market.

A third case of a refusal to deal as part of a vertical integration plan is Poster Exch., Inc. v. Nat'l Screen Serv. Corp., supra. National Screen had a monopoly in the sale of certain movie posters and other paraphernalia. This monopoly arose because as a matter of independent and legitimate business judgment, movie companies preferred to deal only with it to distribute these materials. [40] For years, Poster Exchange had bought materials **[**45]** from National Screen at wholesale prices for resale. The two companies thus competed with one another in the retail

---

[38] Griffith contains a famous dictum which also provides a rationale for halting abuse of monopoly power: "the use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor, is unlawful." 334 U.S. at 107, 68 S. Ct. at 945. Griffith makes it clear that an exclusionary, anti-competitive use of monopoly power is illegal. See Pac. Coast Agr. Export Ass'n v. Sunkist Growers, Inc., 526 F.2d 1196 (9th Cir. 1975), Cert. denied, ***425 U.S. 959, 96 S. Ct. 1741, 48 L. Ed. 2d 204 (1976)*** (defendant, which had monopoly power over the supply of oranges, Inter alia, refused to deal with same firms which competed with it in the distribution of oranges to Hong Kong. "Sunkist's control of supply was employed to extend its monopoly illegally into distribution"); Smith Kline Corp. v. Eli Lilly & Co., 427 F. Supp. 1018 (E.D.Pa.1976) (Higgenbotham, J.), Aff'd 575 F.2d 1056 (3d Cir.), Cert. denied, ***439 U.S. 838, 99 S. Ct. 123, 58 L. Ed. 2d 134 (1978)*** (defendant misused its monopoly power where it linked the purchase of competitive drugs to drugs over which it had a valid monopoly.) See also Berkey Photo, Inc. v. Eastman Kodak Co., supra.

[39] Cases such as Donovan v. Pennsylvania Co., 199 U.S. 279, 26 S. Ct. 91, 50 L. Ed. 192 (1905) and Export Liquor Sales, Inc. v. Ammex Warehouse Co., 426 F.2d 251 (6th Cir. 1970), Cert. denied, ***400 U.S. 1000, 91 S. Ct. 460, 27 L. Ed. 2d 451 (1971)***, are distinguishable. Those cases upheld the right of a tunnel and terminal, respectively, to give out exclusive contracts for the operation of a business on their premises. Since the tunnel and terminal operators were not competitors of the excluded businesses, they had no reason to arbitrarily abuse their monopoly position. See TV Signal Co. of Aberdeen v. AT & T Co., 462 F.2d 1256 (8th Cir. 1972). We must concede, however, that there exists tension between these cases and those cases adopting the "bottleneck" theory.

[40] This was because the national movie companies "have traditionally insisted that licensees to manufacture its accessories have national distribution facilities . . ." Poster Exchange, Inc. v. National Screen Service Corp., 198 F. Supp. 557, 559 (N.D.Ga.1961), Aff'd, 305 F.2d 647 (5th Cir. 1962) (opinion granting preliminary injunction). Of course, Poster Exchange (or any other company) could theoretically have set up nationwide distribution facilities to qualify for a license from the national movie companies, but that would have required a "multimillion dollar investment". Poster Exchange, Inc. v. National Screen Service Corp., 431 F.2d at 339. The court held that this was not a reasonable alternative. Id.

distribution market. Subsequently, National Screen refused to deal with Poster Exchange and litigation ensued. **[*859]** The Fifth Circuit affirmed a finding that National Screen had unlawfully used its monopoly power as a supplier to try to eliminate Poster Exchange as a competitor at the distribution level. Although the court's holding of unlawful refusal-to-deal in Poster Exchange was based on a finding of specific intent to exclude, in Dicta, the court indicated that it might have been sufficient to find that an unlawful monopoly would result as a consequence of National Screen's refusal to deal. *431 F.2d at 388 n. 12*.

[46]** Bluff City's position in this case is akin to that of National Screen. See Poster Exch. Inc. v. Nat'l Screen Serv. Corp., Supra. In both cases, industry economics led a group of national companies to deal exclusively with one distributor. Bluff City's refusal to deal as part of a vertical integration scheme is similar to that in Otter Tail, Kodak and Poster Exchange. [41] And as in Otter Tail, there is evidence (albeit so-far uncredited) that Bluff City engaged in other predatory activity. If the district court rules that Bluff City is in fact, a monopolist, application of Otter Tail, Kodak and Poster Exchange would seemingly result in a quick finding of liability. However, such a quick finding of liability here would void consideration of many factors which militate against imposing an absolute duty to deal on a monopolist in the vertical integration context.

[47]** IV. Refusals to Deal An Analytical Framework

We believe that even if Bluff City does possess monopoly power, a finding of liability does not necessarily follow from its conduct here. ***HN17***[] Although a general intent to monopolize is all that is ordinarily required to find a *§ 2* violation, [42] cases discussing a monopolist's duty to deal have effectively required a finding of Specific intent to monopolize. See *Kodak, supra, 273 U.S. at 375, 47 S. Ct. 400*. Indeed, the very basis of the "intent theory" outlined above is specific intent to monopolize. The issue remains what standards should be employed by which to judge Bluff City's behavior. [43]

[48]** The "specific intent" standard, most often seen in attempt to monopolize situations, has itself caused problems. Some courts have given weight to the company's subjective state of mind. See e. g. *Southern Blowpipe & Roofing Co. v. Chattanooga Gas Co., 360 F.2d 79 (6th Cir. 1966)*, Cert. denied, *393 U.S. 844, 89 S. Ct. 126, 21 L. Ed. 2d 114 (1968)*. Other courts have adopted a "fairness" approach to evaluate the monopolist's conduct, measured by industry **[*860]** practice, with allowance made for otherwise improper defensive tactics. See *Union Leader Corp. v. Newspapers of New England, Inc., 180 F. Supp. 125 (D.Mass.1959)*, *Mod'd, 284 F.2d 582 (1st Cir. 1960)*, Cert. denied, *365 U.S. 833, 81 S. Ct. 747, 5 L. Ed. 2d 744 (1961)*. Most courts, however, have been content

---

[41] Assuming that the district court finds that Bluff City possessed monopoly power, that power extended over wholesale distribution of primary-line periodicals in the Memphis-Shelby County area. Within this market, there existed what can be viewed as a submarket consisting of small retail outlets served by the plaintiff. By refusing to deal with the plaintiff, Bluff City used its power to exclude Byars from the small-store submarket so that it could take over his business thus vertically integrating into the small-store market.

For the relevant factors which are used in defining a submarket under *§ 2*, See *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*; *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d 256, 283-84 (5th Cir. 1978)*, Cert. denied, ***440 U.S. 939, 99 S. Ct. 1289, 59 L. Ed. 2d 499 (1979)***. In this case both sides recognized the existence of the small-store submarket composed of distinct customers served by Byars and arranged their business dealings accordingly.

[42] Further, that intent can readily be found if it is a natural and likely consequence of the monopolist's conduct. See *United States v. Griffith, 334 U.S. 100, 105, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)*; *United States v. Aluminum Co. of America, 148 F.2d 416, 431-432 (1945)*.

[43] For an interesting approach to allowable conduct in a situation where two newspapers were engaged in a life-and-death struggle for ascendancy in a one-newspaper town, See *Union Leader Corp. v. Newspapers of New England, Inc., 180 F. Supp. 125 (D.Mass.1959)*, *Mod'd, 284 F.2d 582 (1st Cir. 1960)*, Cert. denied, ***365 U.S. 833, 81 S. Ct. 747, 5 L. Ed. 2d 744 (1961)***. See also *Lamb Enterprises Inc. v. Toledo Blade Co., 461 F.2d 506, 514-15* (6th Cir.), Cert. denied, ***409 U.S. 1001, 93 S. Ct. 325, 34 L. Ed. 2d 262 (1972)***.

to adopt standardless language such as "bold, relentless and predatory," Lorain Journal Co. v. United States, supra 342 U.S. at 149, 72 S. Ct. 181, 96 L. Ed. 162, while others have examined legitimate business purpose. See Times-Picayune Publ. Co. v. United States, 345 U.S. 594, 73 S. Ct. 872, 97 L. Ed. 1277 (1953). One commentator has characterized judicial approaches in this area as falling into one of three categories: **[**49]** (1) the legitimate business purpose approach, (2) the unfairness approach and (3) the gestalt approach. Hawk, Attempts to Monopolize Specific Intent as Antitrust's Ghost in the Machine, 58 Cornell L.Rev. 1121 (1973).

However one characterizes the approaches used, we think it clear that what should matter is not the monopolist's state of mind, but the overall impact of the monopolist's practices. ***HN18***[] As preservation of competition is at the heart of the Sherman and Clayton Acts, [44] **[**50]** a practice should be deemed "unfair" or "predatory" only if it is unreasonably anti-competitive. In a § 2 case, only a thorough analysis of each fact situation will reveal whether the monopolist's conduct is unreasonably anti-competitive and thus unlawful. See Berkey Photo, Inc. v. Eastman Kodak Co., supra; California Computer Prod. v. IBM, (9th Cir. No. 77-1563, decided June 27, 1979); Greyhound Computer v. I.B.M., 559 F.2d 488 (9th Cir. 1977), Cert. denied, *434 U.S. 1040, 98 S. Ct. 782, 54 L. Ed. 2d 790 (1978)*; Scott Publ. Co. v. Columbia Basin Publishers, Inc., 293 F.2d 15 (9th Cir. 1961). [45]

Courts which have been confronted with joint refusals to deal have carefully analyzed the fact situation before them to see whether defendants' conduct was anti-competitive. See Neeld v. Nat'l Hockey League, 594 F.2d 1297 (9th Cir. 1979) (citing cases); Oreck Corp. v. Whirlpool, supra; E. A. McQuade Tours, **[**51]** Inc. v. Consolidated Air Tour Manual Comm., 467 F.2d 178 (5th Cir. 1972), Cert. denied, *409 U.S. 1109, 93 S. Ct. 912, 34 L. Ed. 2d 690 (1973)*. See also *McCourt v. California Sports, Inc., 600 F.2d 1193, 1215 (6th Cir. 1979)* (Edwards C. J., dissenting) and cases cited. Cf. Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979); Catalano, Inc. v. Target Sales, 605 F.2d 1097, (9th Cir. 1979). We think that similar analysis is required in a case where there is a unilateral refusal-to-deal by a monopolist.

The anti-competitive impact of the first three refusal-to-deal situations outlined above in Part III B., is obvious. [46] However, **[*861]** the case of the monopolist who seeks to vertically integrate is more difficult. In theory, a monopolist will only take over lower level operations if it is at least as efficient as the lower-level firm. In other words, a monopolist will only vertically integrate if it can do the job cheaper than having someone else do it. If the lower level firm, (i. e. a distributor) is more efficient, it should be able to sell more and thus increase the monopolist-manufacturer's sales. Substitution of a **[**52]** more efficient distributor (the monopolist) for a less-efficient one via a refusal to deal would ordinarily enhance competition in the distribution market.

It also should not make any difference if both levels are natural monopolies. The reason for this is that there exists one profit-maximizing monopoly price to the consumer of any given product. Two rational monopolists dealing with each other in a vertical relationship would set the price at this point and then allocate the monopoly profit between themselves. However, if agreement proves impossible because of misperception, as is likely to be the case, then

---

[44] ". . . the policy unequivocally laid down by the (Sherman) Act is competition." Northern Pac. R. Co. v. United States, 356 U.S. 1, 4, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958). See also National Society of Prof'l Engineers v. United States, 435 U.S. 679, 689, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978).

[45] Careful factual analysis is crucial in examining alleged violations under the rule of reason under § 1 of the Sherman Act, See Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918), as well as § 7 of the Clayton Act, See United States v. General Dynamics, 415 U.S. 486, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974). See also Continental T.V. Inc. v. GTE Sylvania Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977) (Vertical restrictions in sale transactions to be judged under a rule of reason standard. Although these restrictions may limit intrabrand competition, in many cases economic benefit may result from interbrand competition); Sandura Co. v. FTC, 339 F.2d 847 (6th Cir. 1964) (valid business reasons justified vertical territorial restraints.)

[46] On the issue of arbitrary refusals to deal, See 3 Areeda & Turner, Supra at P 736. Cf. America's Best Cinema Corp. v. Fort Wayne Newspapers, 347 F. Supp. 328 (N.D.Ind.1972) (monopoly newspaper publisher could refuse to accept advertising for X-rated films).

the probable result will be a price to the consumer higher than the optimal monopoly price. The reason is that the first-level monopolist will **[**53]** charge the second level monopolist a price calculated to maximize its monopoly profit. Faced with this high cost, the second level monopolist will often have no choice but to set its price to the consumer at a correspondingly high level higher than the optimal monopoly price which the two monopolists would have set had they been able to agree. [47]

[54]** In contrast, a single vertically-integrated monopolist has no such problems it will merely set the price to the consumer at the optimum monopoly level. And to the extent that economies of scale result from the vertical integration, then the consumer will benefit. The monopolist will reap more profit, but the optimal monopoly price to the consumer will be lower. Thus, ***HN19***[] in many cases, a refusal to deal designed to accomplish vertical integration, without more, should not be a basis for imposing liability. See Areeda & Turner, *Supra at P 725*; [48] Sullivan, antitrust 129-30 (1976). See also *Sargent-Welch Scientific Co. v. Ventron Corp., 567 F.2d 701, 712 (7th Cir. 1977)*, Cert. denied, *439 U.S. 822, 99 S. Ct. 87, 58 L. Ed. 2d 113 (1978)* (monopolist can terminate a dealer on efficiency grounds).

There are ***HN20***[] situations, however, where a refusal to deal as part of a vertical integration scheme is anti-competitive. **[**55]** That is, 1) where integration facilitates price discrimination so that the monopolist can reap the maximum monopoly profit from different consumers; 2) where integration increases first-level entry barriers so that potential competitors are stymied; and 3) where integration facilitates evasion of regulation of monopoly profits. See Areeda & Turner, *Supra at PP 725, 726*; Note, Refusals to Deal by Vertically Integrated Monopolists, 87 Harv.L.Rev. 1720 (1974). In such cases, a court should not hesitate to find a *§ 2* violation. The problem is identifying the proper situation.

[*862] The situation presented by this case requires careful analysis. There is evidence in the record that Bluff City was not as efficient as Byars and that it imposed a service charge on the small retailers and provided curtailed service to them. [49] This might be viewed as inefficiency-induced price discrimination. It might also be that neither Byars nor Bluff City were rational profit-maximizing monopolists. In addition, although the district court ruled that no competition existed between Byars and Bluff City, that may not be literally true. For an unknown number of retailers, there existed a choice between **[**56]** being served by Byars or Bluff City. [50] At least to this extent, there was always competition between them. It is clear that the national magazine publishers find it in their best interest to deal with only one wholesale distributor. [51] However, some testimony regarding Byars' post-cutoff efforts tends to show that the small retailers benefited greatly when Byars was able to actively compete with Bluff City. The fact that the national distributors found it in their best interest that Bluff City be the only distributor in Memphis does not mean that it is in the public interest. Byars is now competing with Bluff City, is surviving and the market may be benefiting from the competition.

---

[47] To illustrate, with an example taken from Areeda and Turner, Supra at P 725c. Assume raw copper ingot costs $ 40.00 and that the cost of making copper pipe is $ 35.00. A vertically integrated monopolist with control over both copper ingot and copper manufacturing would set the price of the copper pipe to the consumer at the optimum monopoly level say $ 100.00. Where there were two separate monopolists, the one with control over the ingot would set the price of the ingot to the second monopolist at $ 65.00 so that the former could reap all of the monopoly profit. The second monopolist would now be facing costs of $ 100.00 $ 65.00 for the ingot and $ 35.00 for manufacturing costs. It would set the ultimate price to the consumer at some level above $ 100.00. Even if the first monopolist were to lower its price to the second monopolist, absent agreement, the ultimate price to the consumer would always be above $ 100.00.

[48] Areeda and Turner would find a vertical integration presumptively lawful and would outlaw it only in rare cases.

[49] See n. 26, Supra.

[50] See n. 29, Supra.

[51] See n. 23, Supra and accompanying text.

We have listed all of the above as possible factors to be weighed. It is for the district judge, as factfinder, to analyze the evidence and make a determination whether Bluff City's cut-off of Byars was justifiable on efficiency **[**57]** grounds. [52]

This does not end the analysis, however. ***HN21***[] A finding of anti-trust liability in a case of a refusal to deal should not be made without examining business reasons which might justify the refusal to deal. [53] The rationale for this is that since we tolerate the existence of some monopolists, we must give them some leeway in making business decisions. See *Sargent-Welch Scientific Co. v. Ventron Corp., supra, 567 F.2d at 711-13* (lawfulness of a monopolist's termination of a dealer depends upon the purpose for which it was done); *Intern'l Railways of Cent. America v. United Brands, 532 F.2d 231, 239-40* (2d Cir.), Cert. denied, *429 U.S. 835, 97 S. Ct. 101, 50 L. Ed. 2d 100 (1976)* (defendant's refusal to deal proper because it "had no reasonable business alternative but to abandon an unprofitable and uncomfortable operation."); *Clark v. United Bank of Denver Nat'l Assoc., 480 F.2d 235, 238* (10th Cir.), Cert. denied, *414 U.S.* ***[**58]*** *1004, 94 S. Ct. 360, 38 L. Ed. 2d 240 (1973)*.

[59]** Bluff City argues forcefully that there were valid business reasons for its desire to terminate its relationship with the plaintiff. Bluff City argues that its termination of Byars was motivated by its desire to minimize returns of unsold periodicals and to **[*863]** have precise data over its sales and returns. It contends that the stricter control which resulted from its termination of dealings with the plaintiff qualified it for the "affidavit return" privilege which entitled the defendant to merely execute an affidavit as to the number of returns rather than return the actual magazines or covers for credit to the national distributors. [54]

[60]** The district court did not address these issues directly although it did state that "exhibit (16) supports the contention of the defendant that one of the reasons the defendant was discontinuing the cash route system with the plaintiff was the failure of the system to produce accurate records which are important to the national distributors in this industry." Exhibit 16 is a letter written by Bluff City to its retail customers announcing that it was terminating its arrangement with Byars and taking over all of his accounts for itself. There is no indication from this exhibit that the reason plaintiff was being terminated was because of inaccurate records or other specific business reasons. It is true that the exhibit states that "during this (changeover), our records may not be entirely accurate and complete." However, there is no indication other than that there would be natural confusion in record-keeping due to the takeover.

A monopolist's self-serving, Ex post facto business justifications must be examined with care. If Bluff City can show that cutting off the plaintiff was essential to its securing of the "Affidavit return" privilege, then its conduct could be justifiable. However, **[**61]** the district court erred in finding support for this explanation in exhibit 16. We will not attempt to outline the parameters of allowable business justifications for a refusal to deal. [55] Each case must

---

[52] The district court may find it useful to hear expert testimony on this issue.

[53] Although there exist various policy arguments in support of the "business justification defense" to a monopolist's refusal to deal, See *Sargent-Welch Scientific Co. v. Ventron Corp., supra, 567 F.2d at 712*, it is also allowed by the case law. See *Kodak, supra, 273 U.S. at 375, 47 S. Ct. 400* (by implication); *Gamco, Inc. v. Providence Fruit and Produce Bldg., Inc., supra, 194 F.2d at 487-88*. The theoretical justification is that valid business purpose can offset a finding of monopolistic intent. See *United States v. Paramount Pictures, 334 U.S. 131, 174, 68 S. Ct. 915, 92 L. Ed. 1260 (1948)*; *Six Twenty-Nine Productions, Inc. v. Rollins Telecasting Inc., supra, 365 F.2d at 486*. See also the Fifth Circuit opinion in *Kodak, Eastman Kodak Co. v. Southern Photo Material Co., 295 F. 98 (5th Cir. 1923)*, *Aff'd 264 U.S. 359, 44 S. Ct. 453, 68 L. Ed. 868 (1927)*. See generally the discussion of legitimate business purposes in *Times-Picayune Publ. Co. v. United States, 345 U.S. 594, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*; *United States v. Columbia Steel Co., 334 U.S. 495, 68 S. Ct. 1107, 92 L. Ed. 1533 (1948)*.

[54] As indicated in n. 4, Supra, credit for unsold publications is allowed to the retailer by the wholesaler and to the wholesaler by the national publishers. Ordinarily, dealers or wholesalers must return some proof that a magazine was indeed unsold such as a torn-off cover. Trusted wholesalers, however, are allowed to simply execute an affidavit certifying that a certain number of periodicals were unsold.

necessarily turn on its own facts. See *Otter Tail, supra, 410 U.S. at 381-82, 93 S. Ct. 1022, 35 L. Ed. 2d 359* (noting that Otter Tail could not be made to deal where that would threaten its ability to serve the public and that the district court retained on-going jurisdiction to give relief should difficulties occur).

[62]** Similarly, we think that the district court should carefully examine the alleged "dirty tricks." [56] ***HN22***[] Predatory conduct on Bluff City's part would go a long way toward establishing a *§ 2* violation. See *Otter Tail, supra.* For this reason, a careful analysis of alleged misconduct is in order. We agree that plaintiff's evidence on this is somewhat thin. However, it should be examined along with the other factors we have mentioned.

One final factor requires examination the feasibility of forming a final decree. An injunction ordering a monopolist to deal might enmesh a court in difficult problems of price regulation. In the "bottleneck theory" cases, Supra, no price regulation problems arose because a court could simply order the owners of a unique facility to treat all customers on equal terms. The **[*864]** same thing is generally true in any setting in which the monopolist deals with some businesses but refuses to deal with others.

In a case such as this, where there is only one cut-off **[**63]** firm, however, judicial regulation problems abound. In *Otter Tail, supra*, the presence of a regulatory agency the Federal Power Commission obviated problems of judicial price setting. See *410 U.S. at 375-377, 93 S. Ct. 1022, 35 L. Ed. 2d 359*. In the ordinary case, however, the difficulty of setting a price at which the monopolist must deal might well justify withholding relief altogether. [57] In this case, we have a history of previous dealing between the parties where they set a price 1 01/2 % below wholesale. *As in Poster Exchange, Inc., supra*, this greatly facilitates the structuring of a decree. [58]

[64]** V. CONCLUSION

Although the record is arguably clear enough for us to rule here, we think that the better course of action is to remand for explicit fact-finding and any supplemental proceedings the district court may wish. In assessing whether Bluff City possessed monopoly power and second, whether an unlawful refusal-to-deal took place, the district court should focus on the following: 1) Whether Bluff City can offset the inference of monopoly which accompanies its massive market share; 2) Whether Bluff City's refusal to deal was justifiable on efficiency grounds; 3) Whether other business reasons justified the refusal to deal; 4) Whether, and to what extent, Bluff City engaged in predatory "dirty tricks", [59] 5) Whether an injunction ordering Bluff City to deal with the plaintiff is feasible.

---

[55] A common justification for anti-competitive behavior is self-preservation. That argument has not been made in this case, but it could be since imposing a broad duty to deal on Bluff City could result in its replacement by a competitor to which it was forced to sell periodicals at below-wholesale prices. This would be similar to Otter Tail's argument that if it were forced to sell and "wheel" power to any municipality which requested it to do so, then it would be forced out of business. See the district court and the Supreme Court discussion of Otter Tail's need-to-survive defense. *410 U.S. 366 at 380-82, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*; *331 F. Supp. 54, 64 (D.Minn.1971)*.

[56] See n. 30, Supra.

[57] Fear of judicial "utility regulation" permeates Areeda & Turner's analysis of monopolists' refusals to deal. We agree that federal judges do not make good regulators of business conduct. However, courts must be careful not to abdicate their responsibilities under the Antitrust laws in the name of expedience. When the adverse effect of allowing a monopolist to maintain certain practices is clear, a court should stay its hand rarely, if ever.

[58] There exists no theoretical distinction between ordering a monopolist to deal with a former customer and ordering the monopolist to deal with anyone who comes along. Yet, as a practical matter, it is far different to order the reestablishment of a ruptured relationship than to order a monopolist to deal with a stranger. The difficulty of setting reasonable terms, especially price, should be a substantial factor when confronted with the latter situation. An alternative analytical view would be that there exist valid business reasons why a monopolist should not have to deal with a stranger.

[59] Findings of fact on this issue would also dispose of Byar's separate claim of unfair competition based on the same alleged "dirty tricks."

Vacated and remanded for further proceedings. Appellant shall recover his **[**65]** costs in this court.

Contracts Law > Defenses > Illegal Bargains

Governments > Legislation > Statute of Limitations > Time Limitations

Civil Procedure > Remedies > Damages > General Overview

Governments > Legislation > Types of Statutes

HN6[] **Defenses, Illegal Bargains**

Wis. Stat. § 133.23 is remedial in nature. It is not punitive and, therefore, is not a "statute penalty." A statute which is punitive in nature is designed to encourage private enforcement of the statute. A statute which allows recoupment on a contract, however, is only intended as a cure to the injured party for payments made under an invalid contract. It is not a supplement to the government enforcement apparatus.

Opinion by: BROWN

Opinion

[*809] **[**150]** This is an appeal from a judgment dismissing that part of defendant's counterclaim alleging damages resulting from violations of the Wisconsin ***Antitrust Law***. The trial court reasoned the antitrust claim was barred by *sec. 893.21(1)*, Stats., [1] which establishes a period of two years for the commencement of actions for statutory **[**151]** penalties. The sole issue is whether the antitrust claim was subject to the two year statute of limitations or a six year statute of limitations under sec. 133.23, Stats. The answer to the question demands statutory construction of each. That analysis has not been previously made in our state courts.

[*2]** The facts necessary to the determination of the issue show that Open Pantry and Falcone entered into an agreement on December 18, 1967, whereby Falcone agreed to operate a grocery store in premises leased to him by Open Pantry. Falcone was to use the Open Pantry name and pay franchise fees for its use. In February 1970, Falcone moved out of the grocery store and **[*810]** terminated his association with Open Pantry. Open Pantry then sued for franchise fees, rent and other debts allegedly due. Falcone responded with an answer and counterclaim, but it was not until his fourth amended counterclaim of June 4, 1973 that a claim was alleged for damages resulting from the Wisconsin ***Antitrust Law***. Falcone asked for recovery of all payments directly made to Open Pantry, which payments were denominated in the franchise agreement. In addition, Falcone asked for a return of all rent paid to Open Pantry. Further, he demanded that Open Pantry repay him for the transfer of a retail class "A" license to sell fermented malt beverages. Also, he demanded that Open Pantry pay him for the debts he incurred in order to run his business. In 1977, Falcone amended his counterclaims for the fifth **[***3]** time. The damages claimed were the same as that of June 4, 1973 except that Falcone asked for treble damages pursuant to *sec. 133.01*, Stats. We will decide which of his various claims are barred by the two year statute of limitations and which fall under the six year statute of limitations.

SECTION 893.21(1) THE TWO YEAR STATUTE OF LIMITATIONS

Section 133.01, Stats., the Wisconsin ***Antitrust Law***, is intended as a reenactment of the first two sections of the Sherman Antitrust Act but applicable to intrastate transactions. *City of Madison v. Hyland, Hall & Co., 73 Wis.2d 364, 375, 243 N.W.2d 422 (1976)*. *Section 133.01*, Stats., gives any person the right to sue for treble damages. The applicable provision, *sec. 133.01*, Stats., sets out the penalties for those in violation of the act:

HN1[] Any such person, corporation, company, partnership, trustee or association shall also be liable to any person **[*811]** transacting or doing business in this state for threefold the damages he may sustain by reason of the doing of anything forbidden by this section and the cost of suit including a reasonable attorney's fee.

The substantive purpose of *sec. 133.01*, Stats., is to punish the **[***4]** offender by allowing treble damages. Therefore, it is a punitive statute. *State ex rel. Nordell v. Kinney, 62 Wis.2d 558, 562, 215 N.W.2d 405 (1974)*. It is also remedial because it seeks to preserve our free enterprise system. *City of Madison, supra, at 373, 243 N.W.2d at 427*. We find that ***HN2***[] when an injured party makes a claim by using language within the verbal frame of *sec. 133.01*, Stats., he is suing under the punitive-remedial portion of the antitrust statute.

HN3[] When a person sues under the punitive-remedial portion of the antitrust statute, he is suing for damages that are exclusively statutory. *City of Madison, supra, at 388, 243 N.W.2d at 434*. The injured party, when suing under this statute, is not limited to damages for breach of contract nor is he limited to mere recovery of what he has paid into the contract. As was stated in *City of Madison, supra, at 388-89, 243 N.W.2d at 435*, "the injured party is entitled to receive not only the excess beyond the market price, which is the starting point under the treble damages law, but is also entitled to recoup the amount he would **[**152]** have been obligated to pay had not the contract price been fixed as a result **[***5]** of the illegal collusion."

HN4[] Since this is a suit which is punitive-remedial in nature and since it is a statutorily created penalty, we conclude that *sec. 893.21(1)*, Stats., is the applicable statute of limitations for such an action. A similar result was

---

[1] 893.21 Within 2 years. Within 2 years:

(1) An action by a private party upon a statute penalty or forfeiture when the action is given to the party prosecuting therefor and the state, except when the statute imposing it provides a different limitation.

reached in *Grengs v. Twentieth Century Fox Film Corporation, 232 F.2d 325, 329 (7th Cir. 1956)*. In *Grengs*, **[*812]** the seventh circuit court of appeals held that suits for treble damages under the Wisconsin ***Antitrust Law*** are subject to the two year limitations because they are suits by private parties upon a statutory penalty.

Therefore, to the extent that the June 4, 1973 counterclaim is a claim for damages multiplied by three, the defendant is asserting the punitive-remedial claim for relief, and the claim is barred by the two year statute of limitations.

SECTION 133.23 THE SIX YEAR STATUTE OF LIMITATIONS

Section 133.23 provides a distinct remedy for recovery of contract payments. *City of Madison, supra, at 387, 243 N.W.2d at 434*. The pertinent provision is as follows:

HN5[] Any payments made upon, under or pursuant to such contract or agreement to or for the benefit of such person, may be recovered in an action **[***6]** by the party making any such payment, his heirs, personal representatives or assigns; provided that suit for such recovery is brought within 6 years after the making of said contract or agreement.

This is a different type of claim than the punitiveremedial claim of *sec. 133.01*, Stats. This claim is limited to the return of what was paid by the injured party upon the illegal contract and that contract alone. The substantive purpose of sec. 133.23 has previously been held to allow recoupment of the contract payment by the injured party. *City of Madison, supra, at 364, 387, 243 N.W.2d at 434*. ***HN6***[] The statute is remedial in nature. It is not punitive and, therefore, is not a "statute penalty." A statute which is punitive in nature is designed to encourage private enforcement of the statute. *John Mohr & Sons, Inc. v. Jahnke, 55 Wis.2d 402, 411, 198 N.W.2d 363, 368 (1972)*. A statute which allows recoupment on **[*813]** a contract, however, is only intended as a cure to the injured party for payments made under an invalid contract. It is not a supplement to the government enforcement apparatus. Section 133.23, Stats., cannot be used, in this case, to award damages for lost rent, **[***7]** repayment for funds paid as a result of debts to financial institutions, repayment for salaries paid to employees, or repayment of fees paid for a license to sell fermented malt beverages. These are matters which are outside the instant contract. To the extent that the pleadings request only recovery of monies paid on a contract said to be in restraint of trade, the six year statute of limitations applies.

THE PLEADINGS IN THIS LAWSUIT

The June 4, 1973 amended counterclaim asks not only for recoupment of the franchise fees but also for other damages. For instance, Falcone asks for recoupment of rental payments, but the lease agreement is in no way connected with the franchise agreement. The franchise agreement makes no demand that Falcone sign a lease with Open Pantry for rental property. The lease payments, therefore, cannot be said to have been made "upon, under or pursuant" to the franchise agreement. Additionally, Falcone seeks damages for debts incurred to financial institutions. The franchise agreement does not dictate that Falcone enter into debt obligations with financial institutions. As such, the obligations cannot be considered as claims for recovery under the **[***8]** franchise agreement. These claims come under the more far reaching statute allowing for relief of "actual damages multiplied by three" under *sec. 133.01*, Stats. *Section 133.01* claims, as we stated above, are barred by the two year statute of limitations. Payments made for a class "A" **[*814]** license to sell fermented malt beverages **[**153]** and claims made by Falcone for repayment of the time he spent in conducting the business of the franchise also fall under the "actual damages multiplied by three" claim.

We, therefore, hold that Falcone's counterclaim for his initial franchise fee, his building service fee, his inventory deposit and his monthly franchise fee of 4% of the gross sales are not barred by the two year statute of limitations because they seek recovery for payments made under the franchise agreement itself and are subject to the six year statute of limitations. Since the June 4, 1973 counterclaim is within the six year statute of limitations, that part of the judgment which would bar those claims is reversed. All other claims made by Falcone including the treble damages are barred by the two year statute of limitations, and the trial court's judgment is affirmed **[***9]** as to the other claims.

Our decision does not hold that if a party begins an action well within the two year statute of limitations, he can ask for recoupment as part of the treble damages to be awarded under *sec. 133.01*, Stats., and then in a separate claim ask for recoupment on the contract under sec. 133.23, Stats. Such a holding would impose a double recovery for recoupment. As such, the question of whether the legislature intended that there be a double penalty would have to be decided. This question is not before us under the facts of the case, and we decline to resolve it for that reason. We point out, however, that it has been discussed in *dicta* by the supreme court in *City of Madison v. Hyland, Hall & Co., supra, at 388-89, 243 N.W.2d at 434-35*.

By the Court. -- Judgment affirmed in part, reversed in part, and remanded.

Antitrust & Trade Law > Sherman Act > General Overview

Governments > Legislation > Statutory Remedies & Rights

Antitrust & Trade Law > Clayton Act > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

There is no statutory right of contribution provided for under either the Sherman Act, *15 U.S.C.S. § 1 et seq.*, or the Clayton Act, *15 U.S.C.S. § 12 et seq.*

Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > General Overview

Governments > Courts > Common Law

Torts > ... > Multiple Defendants > Contribution > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

HN2[] **Federal & State Interrelationships, Federal Common Law**

At common law no right of contribution exists among intentional tortfeasors. This no-contribution rule is subsequently extended to cases involving unintentional conduct and is adopted by the federal common law. This rule, however, has been modified in some cases, at least among unintentional tortfeasors, and the Eighth Circuit has rejected the rule in its entirety in the antitrust context.

Torts > ... > Multiple Defendants > Contribution > General Overview

HN3[] **Multiple Defendants, Contribution**

Allowance of contribution in effect ensures that the burden upon a particular defendant would be ameliorated by a division of liability. Even assuming, however, that the arguments concerning the relative deterrent effects are inconclusive, this inconclusiveness would hardly be a compelling reason upon which to base a rule allowing contribution.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN4[] **Private Actions, Standing**

Court has emphasized its belief that some aspects of the In pari delicto doctrine should be retained under the antitrust laws. Plaintiff is barred where he and defendant bear substantially equal responsibility for injury. Plaintiff is barred where the fault of the parties is reasonably within the same scale. Plaintiff is barred where he actively participated in the formation and implementation of an illegal scheme. Plaintiff is barred who violated the law in cooperation with defendant. Subsequent lower court opinions have concluded that an In pari delicto defense should be refused only to those plaintiffs who do not bear equal responsibility for creating and establishing an illegal scheme, or who are required by economic pressures to accept such an agreement.

Securities Law > ... > Express Liabilities > Misleading Statements > General Overview

Securities Law > Civil Liability Considerations > Right to Contribution

HN5[] **Express Liabilities, Misleading Statements**

A number of cases have recognized a right of contribution under certain provisions of the federal securities laws that do not expressly provide for such a right. As these cases have recognized, however, both the Securities Act of 1933 and the Exchange Act of 1934 make express statutory provision for contribution, and the allowance of contribution in these cases can be explained under the general principle that the securities laws are to be administered In pari materia. *15 U.S.C.S. § 77k(f)*, and *§§ 9(e)* and *18(b) of the 1934* Act, *15 U.S.C.S. §§ 78i(e)*, *78r(b)*.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN6[] **Private Actions, Remedies**

Antitrust co-conspirators are jointly and severally liable for all damages caused by the conspiracy to which they were a party. A private plaintiff need not sue all co-conspirators but may choose to proceed against any one or more of them.

Constitutional Law > Bill of Rights > Fundamental Rights > Eminent Domain & Takings

Constitutional Law > Substantive Due Process > Scope

HN7[] **Fundamental Rights, Eminent Domain & Takings**

U.S. Const. amend. V, commands that the federal government refrain from depriving a person of his property without due process of law. Due process has both a procedural and a substantive aspect. Procedural due process ensures the observance of certain procedural safeguards designed to afford protection against arbitrary governmental deprivation. Under this analysis, property may not be taken without providing the minimal protections of notice and an opportunity to be heard. Substantive due process requires that all legislation be rationally related to the furtherance of a legitimate governmental objective.

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

Constitutional Law > Equal Protection > General Overview

HN8[] **Judicial Review, Standards of Review**

In applying the equal protection rationality requirement, the courts have utilized various standards of review depending on the type of legislation being scrutinized. In reviewing economic regulation the courts have exhibited the same deference to legislative judgment accorded under a due process analysis. The test generally applied in such cases is whether there is any conceivable basis justifying the governmental classification.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

Constitutional Law > Substantive Due Process > Scope

Constitutional Law > Equal Protection > Nature & Scope of Protection

HN9[] **Fundamental Rights, Procedural Due Process**

Although the *Fifth Amendment*, *U.S. Const. amend. V*, does not contain an *equal protection clause*, the protections guaranteed under that concept have, to a large degree, been implied under the amendment's due process clause.

Opinion by: THORNBERRY

Opinion

[*899] Texas Industries, Inc., the defendant in a civil antitrust action, appeals the dismissal of its third-party complaint impleading its alleged coconspirators and seeking contribution. The sole issue is whether a right of contribution is available to an antitrust defendant under the federal antitrust laws. We hold that there is no such right of contribution.

I.

This action was instituted on September 8, 1975, by Wilson P. Abraham Construction Corp., not a party to this appeal, against Texas Industries, Inc. [1.] **[**3]** for damages arising out of an alleged price-fixing scheme. Abraham's complaint asserts that Texas Industries and certain unnamed coconspirators engaged in an unlawful combination and conspiracy to raise and stabilize the price of ready-mix concrete in the New Orleans area in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*. [2.] Abraham seeks to recover treble damages under *15 U.S.C. § 15*.

Discovery instituted by Texas Industries revealed that the unnamed alleged coconspirators were Radcliff Materials, Inc., Jimco, Inc., and OKC Dredging, Inc. Texas Industries then filed a third-party complaint against these parties seeking contribution from them should it be found liable to Abraham in the main demand. The third-party defendants filed motions to dismiss the third-party complaint pursuant **[**4]** to Rule 12(b)(6) for failure to state a claim upon which relief could be granted.

On October 4, 1977, the district court entered a Minute Entry granting the motions to dismiss the third-party complaint with prejudice on the ground that no right of contribution exists among antitrust coconspirators under federal law. Although persuaded by Texas Industries' arguments in favor of allowing contribution, the court deferred to what it considered the "weight of authority" [3.] denying such a right to an antitrust defendant. On March 29, 1978,

---

[1.] A former employee of Texas Industries, Frank T. Dooley, was also named as a defendant but has never been served.

[2.] On January 26, 1973, a grand jury handed down criminal indictments charging Texas Industries and one of its employees, Radcliff Materials, Inc. and one of its employees, Jahncke Services, Inc. (later changed to OKC Dredging, Inc.) and one of its employees, and Jimco, Inc. with violations of *15 U.S.C. § 1*. The indictments charged the existence of an unlawful combination and conspiracy in unreasonable restraint of interstate trade and, in particular, accused the defendants of entering into an agreement to raise and stabilize the price of ready-mix concrete in the New Orleans area. The criminal proceedings were ultimately concluded upon the entry of Nolo contendere pleas by each of the defendants.

[3.] The court cited four cases as holding that there is no right to contribution among coconspirators in a federal antitrust case. *American Motor Inns, Inc. v. Holiday Inns, Inc., 521 F.2d 1230 (3d Cir. 1975)*; *Walker Distrib. Co. v. Lucky Lager Brewing Co., 323 F.2d 1* (9 Cir. 1963); *Sabre Shipping Corp. v. American President Lines, Ltd., 298 F. Supp. 1339 (S.D.N.Y.1969)*; *Wainwright v. Kraftco Corp., 58 F.R.D. 9 (N.D.Ga.1973)*. However, only the decisions in Sabre Shipping, which confronted the issue of contribution, and Kraftco, which arguably implies a no-contribution rule, are in point. The decisions in American Motor the court determined that there was no just reason for delay and directed that the Minute Entry be entered as a final judgment. Texas Industries appealed.

[5]** In their briefs and at oral argument the third-party defendants correctly asserted **[*900]** that no federal court had ever recognized a right of contribution among antitrust coconspirators. See Olson Farms, Inc. v. Safeway Stores, Inc., (1977-2)Trade Reg.Rep. (CCH) P 61,698 (D.Utah 1977), Argued and submitted, No. 77-2068 (10 Cir. March 16, 1979); El Camino Glass v. Sunglo Glass Co., (1977-1)Trade Reg.Rep. (CCH) P 61,533 (N.D.Cal.1976); *Sabre Shipping Corp. v. American President Lines, Ltd., 298 F. Supp. 1339 (S.D.N.Y.1969)*. [4.] Unfortunately for the third-party defendants, however, the most recent, and only appellate, court to specifically consider this issue abruptly jettisoned the limited precedent and adopted the very position previously rejected by the district courts. In *Professional Beauty Supply, Inc. v. National Beauty Supply, Inc., 594 F.2d 1179* (8 Cir. 1979), an Eighth Circuit panel, with one judge dissenting, held that an antitrust defendant should, at least under certain circumstances, be entitled to contribution from those "joint tortfeasors" [5.] not sued by the plaintiff in the main demand. Although we have carefully considered the arguments set forth in the majority's **[**6]** opinion, we are unable to agree that a right of contribution should be allowed among violators of the antitrust laws.

[7]** II.

HN1[] There is no statutory right of contribution provided for under either the Sherman Act, *15 U.S.C. § 1 et seq.*, or the Clayton Act, *15 U.S.C. § 12 et seq.* We do not, however, interpret this omission as evidence that Congress necessarily intended to deny contribution under the antitrust laws. But see *Sabre Shipping, supra, 298 F. Supp. at*

Inns and Walker Distributing only state the general rule that an antitrust plaintiff need not sue all coconspirators but may choose to proceed against any one or combination of them.

[4.] See also *Goldlawr, Inc. v. Shubert, 276 F.2d 614, 616 (3d Cir. 1960)* (dictum); *Baughman v. Cooper Jarrett, Inc., 391 F. Supp. 671, 678 n. 3 (W.D.Pa.1975)*, Aff'd and modified on other grounds, *530 F.2d 529* (3d Cir.), Cert. denied, ***429 U.S. 825, 97 S. Ct. 78, 50 L. Ed. 2d 87 (1976)*** (dictum); *Gould v. American-Hawaiian S.S. Co., 387 F. Supp. 163 (D.Del.1974)* (dictum); *Wainwright v. Kraftco Corp., 58 F.R.D. 9, 11-12 (N.D.Ga.1973)* (arguably by implication); *Washington v. American Pipe & Constr. Co., 280 F. Supp. 802, 804-05 (S.D.Cal.1968)* (arguably by implication). But see *Chevalier v. Baird Sav. Ass'n, 72 F.R.D. 140, 145 n. 6 (E.D.Pa.1978)* (dictum).

[5.] The case law has uniformly characterized a private antitrust suit as a tort action. See, e. g., *Solomon v. Houston Corrugated Box Co., 526 F.2d 389, 392 n. 4* (5 Cir. 1976); *Simpson v. Union Oil Co., 311 F.2d 764, 768* (9 Cir.), Rev'd on other grounds, *377 U.S. 13, 84 S. Ct. 1051, 12 L. Ed. 2d 98 (1963)*; *Williamson v. Columbia Gas & Electric Corp., 110 F.2d 15 (3d Cir. 1939)*, Cert. denied, ***310 U.S. 639, 60 S. Ct. 1087, 84 L. Ed. 1407 (1940)***; *Tondas v. Amateur Hockey Ass'n, 438 F. Supp. 310, 315 (W.D.N.Y.1977)*; *Wolf Sales Co. v. Rudolph Wurlitzer Co., 105 F. Supp. 506 (Colo.1952)*.

One commentator, however, has questioned the assumption that private antitrust actions sound in tort or that antitrust violators are necessarily "tortfeasors." Note, Contribution in Private Antitrust Suits, 63 Cornell L.Rev. 682, 692-97 (1978). As that writer notes, a large percentage of antitrust actions do not involve activity considered tortious under the common law. Since the no-contribution rule has traditionally applied only to joint tortfeasors, the writer suggests that the courts should carefully examine the nature of the particular antitrust violation to see what common law form of action most closely resembles the plaintiff's statutory claim. Because he concludes that price-fixing arrangements more closely resemble quasi-contract than tort, he apparently would award contribution in this case.

We cannot subscribe to this analysis. First, the focus of the antitrust laws is not so much on the defendant's unjust enrichment as on the injuries the plaintiff has suffered. In fact, the plaintiff's right to damages is totally independent of whether the defendant has profited at the plaintiff's expense. Thus, we cannot agree that price-fixing "more closely resembles quasi-contract than tort." Second, the anti-competitive activity which escaped liability at common law has, because of altered social and economic conditions, become unacceptable behavior in modern society. Indeed, conduct once non-tortious has become criminal under the antitrust statutes. It is difficult to believe that the law of torts, which has always been in constant flux, would not have eventually encompassed such conduct if legislation had not preempted the field. We believe that the same rationale justifying a no-contribution rule among "tortfeasors" applies to intentional antitrust violators. See Corbett, Apportionment of Damages and Contribution Among Coconspirators in Antitrust Treble Damages Actions, 31 Fordham L.Rev. 111, 114 (1962).

1345. It is more likely that this narrow question, although a matter of some importance, never occurred to the drafters of the legislation. Our task, therefore, is to guess what Congress "would have intended on a **[*901]** point not present to its mind, if the point had been present." [6.] We agree with the case law that this issue must be resolved by reference to federal common law. [7.]

[8]** Texas Industries advances a number of arguments for implication of a right of contribution. First, it argues that the deterrent effect of treble damages is dissipated by the possibility that only one of a number of conspirators would actually be liable for the injury. We conclude, consistent with prevailing economic theory, [8.] however, that that very possibility of imposition of sole liability has an enhanced deterrent effect. The chance that a participant may be faced with a full judgment is more likely to discourage anticompetitive conduct than would ensuring that each participant pays only some fair share. ***HN3***[] Allowance of contribution in effect ensures that the burden upon a particular defendant would be ameliorated by a division of liability. See *Sabre Shipping Corp. v. American President Lines, Ltd., 298 F. Supp. 1339 (S.D.N.Y.1969)*; El Camino Glass v. Sunglo Glass Co., 1977-1 Trade Cases P 61,533 (N.D.Cal.1976). Even assuming, however, that the arguments concerning the relative deterrent effects are inconclusive, See *Professional Beauty Supply, Inc. v. National Beauty Supply, Inc., 594 F.2d 1179* (8 Cir. 1979) (Hanson, J., dissenting in part), this inconclusiveness would hardly **[**9]** be a compelling reason upon which to base a rule allowing contribution. *Id. at 1189*.

[10]** Second, Texas Industries suggests that a rule prohibiting contribution would encourage collusion by the plaintiff with one or more of the potential defendants to the action. Similarly, the Eighth Circuit expressed concern that under a no-contribution rule a large or powerful wrongdoer would have sufficient economic influence to coerce a plaintiff into excluding it as a defendant. Although the possibility of collusion or coercion has always existed under a no-contribution rule, the courts and legislatures have not deemed this threat sufficient to counterbalance the advantages derived from denying contribution to wrongdoers. Texas Industries has not suggested that there has been collusion or coercion in **[*902]** this case, and we are unwilling to assume that the plaintiff engaged in or

[7.] *Professional Beauty Supply, Inc., supra, 594 F.2d at 1182*; El Camino Glass, supra at 72, 111 n. 1; ***Sabre Shipping Corp., supra, 298 F. Supp. at 1343***. See generally *Sola Electric Co. v. Jefferson Co., 317 U.S. 173, 176, 63 S. Ct. 172, 87 L. Ed. 165 (1942)*.

HN2[] At common law no right of contribution existed among intentional tortfeasors. Merryweather v. Nixan, 8 Durn. & East 186, 101 Eng. Rep. 1337 (K.B.1799). This no-contribution rule was subsequently extended to cases involving unintentional conduct, See W. Prosser, Law of Torts § 50 at 305-06 (4th ed. 1971), and was adopted by the federal common law. *Union Stock Yards Co. v. Chicago, B. & Q. R. R., 196 U.S. 217, 25 S. Ct. 226, 49 L. Ed. 453 (1905)*. This rule, however, had been modified in some cases, at least among unintentional tortfeasors, See, e. g., *Kohr v. Allegheny Airlines, Inc., 504 F.2d 400* (7 Cir. 1974), Cert. denied, *421 U.S. 978, 44 L. Ed. 2d 470, 95 S. Ct. 1980 (1975)*, and the Eighth Circuit has rejected the rule in its entirety in the antitrust context. See *Professional Beauty Supply, Inc. v. National Beauty Supply, Inc., 594 F.2d 1179* (8 Cir. 1979). The Professional Beauty Supply court relied upon *Cooper Stevedoring Co. v. Fritz Kopke, Inc., 417 U.S. 106, 94 S. Ct. 2174, 40 L. Ed. 2d 694 (1974)*, as indicative of the erosion of the no-contribution rule. Even assuming that Cooper Stevedoring, an admiralty case, is apposite, it would not be dispositive of the present case since the implication of a cause of action under the federal common law is a discrete inquiry focused upon the circumstances of a particular case.

[8.] Economists have argued that business managers, particularly in larger organizations, are generally "risk averse" that is, they are deterred more by the slight prospect of a large loss than by the strong prospect of a small loss. If this hypothesis is correct, application of the rule denying contribution should inhibit those managers who are aware of the rule from participating in unlawful group activity: Although the rule decreases the likelihood that an individual participant will be held liable, it increases the size of the potential liability.

Note, Supra, 63 Cornell L.Rev. at 702. The author of the note suggests that the participant's unfamiliarity with the no-contribution rule may limit its deterrent effect. We are convinced, however, that, as a class, antitrust defendants are more likely to be familiar with the no-contribution rule than tortfeasors in general. Furthermore, the percentage of participants unaware of the rule will certainly decrease as the rule is applied.

yielded to these tactics. Should a defendant establish that it is the victim of such maneuvering, it may well have an independent cause of action, at least as against its coconspirators.

Third, Texas Industries contends that a rule denying contribution is inconsistent with the Supreme Court's rejection of In pari delicto as a defense to an antitrust action in *Perma Life Mufflers, Inc. v. International **[**11]** Parts Corp., 392 U.S. 134, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*. Texas Industries reasons that if a participant in an unlawful scheme is not precluded from recovering treble damages from the other participants, no possible rationale can justify the denial of his right to seek contribution from his fellow wrongdoers.

As an initial matter, we are unable to agree with Texas Industries' assessment of the Court's decision in Perma Life. Notwithstanding the language in Justice Black's principal opinion, [9] the decision does not endorse a wholesale rejection of the In pari delicto doctrine in an antitrust treble damages action. First, the Court made clear that the culpable plaintiff in that case was economically less powerful than the defendant and was not in any meaningful sense a voluntary participant in the illegal scheme. *Id. at 139, 88 S. Ct. 1981*. Consequently, the Court had no opportunity to decide whether a plaintiff might, wholly apart from In pari delicto, be precluded from recovery because of his "complete involvement" in the illegal scheme. *Id. at 140, 88 S. Ct. 1981*.

[12]** More important, five members of the Perma Life ***HN4***[] court emphasized their belief that some aspects of the In pari delicto doctrine should be retained under the antitrust laws. *Id. at 146, 88 S. Ct. 1981* (White, J., concurring) (plaintiff barred where he and defendant bear "substantially equal responsibility" for injury); *Id. at 147, 88 S. Ct. 1981, 1989* (Fortas, J., concurring in the result) (plaintiff barred where "the fault of the parties is reasonably within the same scale"); *Id. at 149, 88 S. Ct. at 1989* (Marshall, J., concurring in the result) (plaintiff barred where he "actively participated in the formation and implementation of an illegal scheme"); *Id. at 154, 88 S. Ct. 1981* (Harland, J., and Stewart, J., concurring in part and dissenting in part) (plaintiff barred who violated the law "in cooperation with defendant"). Subsequent lower court opinions have concluded that Perma Life refuses an In pari delicto defense only to those "plaintiffs who do not bear equal responsibility for creating and establishing an illegal scheme, or who are required by economic pressures to accept such an agreement." *Premier Electrical Constr. Co. v. Miller Davis Co., 422 F.2d 1132, 1138* (7 Cir.), **[**13]** Cert. denied, *400 U.S. 828, 91 S. Ct. 56, 27 L. Ed. 2d 58 (1970)*. See *Bernstein v. Universal Pictures, Inc., 517 F.2d 976 (2d Cir. 1975)*; *Columbia Nitrogen Corp. v. Royster Co., 451 F.2d 3, 15-16* (4 Cir. 1971); See also *Javelin Corp. v. Uniroyal, Inc., 546 F.2d 276, 278-79* (9 Cir. 1976); *Dreibus v. Wilson, 529 F.2d 170, 174* (9 Cir. 1975); ABA ***Antitrust Law*** Developments 297-99 (2d ed. 1975). [10]

Furthermore, the partial rejection of the In pari delicto defense in Perma Life does not require that we recognize a right of contribution among antitrust coconspirators. There is an obvious and fundamental difference between a rule that bars suit by a plaintiff who in any way participated **[**14]** in the antitrust violation and a rule that forbids a defendant from obtaining contribution from his fellow wrongdoers. A rule barring any culpable plaintiff diminishes the deterrent effect of the antitrust laws by reducing the pool of potential private attorneys **[*903]** general who can instigate costly and uncertain antitrust litigation. However, as we previously noted, a rule prohibiting contribution among antitrust coconspirators not only does not frustrate deterrence but may very well enhance the statutes' deterrent effect by preventing a defendant from cutting its losses. [11]

---

[9] We therefore hold that the doctrine of In pari delicto, with its complex scope, contents, and effects, is not to be recognized as a defense to an antitrust action.

392 U.S. at 140, 88 S. Ct. at 1985.

[10] In *Greene v. General Foods, 517 F.2d 635, 646-47* (5 Cir. 1975), a panel of this court indicated that it "seriously question(ed)" the argument that In pari delicto retained vitality after Perma Life. That court, however, expressly did not rule on this point. See also *Kestenbaum v. Falstaff Brewing Corp., 514 F.2d 690* (5 Cir. 1975).

[11] In a contribution action there is necessarily an antitrust defendant who is faced with potential liability to an injured plaintiff; deterrence does not suffer if contribution is denied since a real threat of liability exists for all participants in the illegal scheme any one of them could have been selected as the defendant in the plaintiff's action. On the other hand, a rule that bars suit by

[15]** Fourth, Texas Industries asserts that the denial of contribution in an antitrust context is inconsistent with the allowance of contribution under other federal statutes. ***HN5***[] A number of cases have recognized a right of contribution under certain provisions of the federal securities laws that do not expressly provide for such a right. *Gould v. American Hawaiian Steamship Co., 387 F. Supp. 163 (D.Del.1974)*, Vacated on other grounds, *535 F.2d 761 (3d Cir. 1976)*; *Alexander & Baldwin, Inc. v. Peat, Marwick, Mitchell & Co., 385 F. Supp. 230 (S.D.N.Y.1970)*, Aff'd per curiam, *442 F.2d 1376 (2d Cir. 1971)*; *De Haas v. Empire Petroleum Co., 286 F. Supp. 809 (D.Colo.1968)*, Modified on other grounds, *435 F.2d 1223* (10 Cir. 1970). As these cases have recognized, however, both the Securities Act of 1933 and the Exchange Act of 1934 make express statutory provision for contribution, [12.] and the allowance of contribution in these cases can be explained under the general principle that the securities laws are to be administered In pari materia. *Globus, Inc. v. Law Research Service, Inc., 318 F. Supp. 955, 958 (S.D.N.Y.1970)*, Aff'd per curiam, *442 F.2d 1376 (2d Cir. 1971)*; Fisher, Contribution in 10b-5 **[**16]** Actions, 33 Bus.Lawyer 1821, 1826 (1973); Note, Supra, 63 Cornell L.Rev. at 698 n. 85. Since there is no express provision for contribution under the antitrust laws, we are unable to use cases decided under the securities laws as authority for implying such a right in this case.

As further evidence of a judicial trend toward contribution in other areas of federal law, Texas Industries cites both FELA cases [13.] and sex discrimination cases decided under the Civil Rights Act. [14.] The FELA cases were negligence actions in which contribution was allowed on the basis of state law and, therefore, do not support Texas Industries' argument that a federal right of contribution should be extended to an antitrust defendant. The cases decided under the Civil Rights Act do not even discuss the rationales for allowing contribution. We decline to discard an established rule of law by relying on cases **[**17]** that offer no reasons.

Finally, Texas Industries proffers that denying contribution amounts to a taking of property without due process and equal protection of the laws as guaranteed by the *Fifth Amendment*. This constitutional violation is premised on the supposed unfairness which results when an antitrust defendant is forced to bear a disproportionate share of the damages caused by the conspiracy to which he was a party. Although **[**18]** we realize that the denial of contribution among wrongdoers, together with a plaintiff's right to sue and collect from only **[*904]** one defendant, [15.] can saddle a defendant with a substantial financial burden, we do not think the imposition of this burden offends constitutional principles.

HN7[] The *Fifth Amendment* commands that the federal **[**19]** government refrain from depriving a person of his property "without due process of law." Due process has both a procedural and a substantive aspect. Procedural due process ensures the observance of certain procedural safeguards designed to afford protection against arbitrary governmental deprivation. Under this analysis, property may not be taken without providing the minimal

---

any plaintiff who participated in the wrong will, in many instances, mean that no defendant will face liability since there is no plaintiff willing to bring the action a result that clearly undermines the deterrence objectives of the antitrust laws.

12. Section 11(f) of the 1933 Act, *15 U.S.C. § 77k(f)*, and *§§ 9(e)* and *18(b) of the 1934* Act, *15 U.S.C. §§ 78i(e)*, *78r(b)*.

13. *Chicago & N. W. Ry. v. Minnesota Transfer Ry., 371 F.2d 129* (8 Cir. 1967); *Zontelli Bros. v. Northern P. Ry., 263 F.2d 194* (8 Cir. 1959); *Blair v. Cleveland Twist Drill Co., 197 F.2d 842* (7 Cir. 1952); *Patterson v. Pennsylvania Ry., 197 F.2d 252 (2d Cir. 1952)*.

14. *Stevenson v. International Paper Co., 432 F. Supp. 390 (W.D.La.1977)*; *International Union of Electrical, Radio and Machine Workers v. Westinghouse Electric Corp., 73 F.R.D. 57 (W.D.N.Y.1976)*; *Lynch v. Sperry Rand Corp., 62 F.R.D. 78 (S.D.N.Y.1973)*; *Gilbert v. General Electric Corp., 59 F.R.D. 267 (E.D.Va.1973)*.

15. ***HN6***[] Antitrust coconspirators are jointly and severally liable for all damages caused by the conspiracy to which they were a party. *Solomon v. Houston Corrugated Box Co., 526 F.2d 389, 392 n.4* (5 Cir. 1976); *Wainwright v. Kraftco, 58 F.R.D. 9, 11-12 (N.D.Ga.1973)*; *Washington v. American Pipe & Constr. Co., 280 F. Supp. 802, 804 (S.D.Cal.1968)*. A private plaintiff need not sue all coconspirators but may choose to proceed against any one or more of them. *Hennessey v. National Collegiate Athletic Ass'n, 564 F.2d 1136* (5 Cir. 1977); *American Motor Inns, Inc. v. Holiday Homes, Inc., 521 F.2d 1230 (3d Cir. 1975)*; *Walker Distrib. Co. v. Lucky Lager Brewing Co., 323 F.2d 1* (9 Cir. 1963).

protections of notice and an opportunity to be heard. Texas Industries does not, and cannot, claim a procedural due process infringement. The judicial proceeding required before the treble damages penalty can be imposed goes far beyond the threshold requirement of procedural due process.

Substantive due process requires that all legislation be rationally related to the furtherance of a legitimate governmental objective. Since the close of "the Lochner era" [16.] in the late 1930's judicial scrutiny of economic or social legislation has been virtually nonexistent. Instead, especially in the realm of economic regulation, the courts have exhibited great deference to legislative judgment and have upheld legislation if there is Any rational basis for enacting a particular economic measure. See, e. g., *United States **[**20]** v. Carolene Products Co., 304 U.S. 144, 58 S. Ct. 778, 82 L. Ed. 1234 (1938)*. Indeed, the courts have even been willing to hypothesize legislative objectives and possible reasons for the law's enactment. See, e. g., *Williamson v. Lee Optical Co., 348 U.S. 483, 75 S. Ct. 461, 99 L. Ed. 563 (1955)*.

Texas Industries' substantive due process argument cannot survive in such a harsh climate. We have no difficulty in concluding that a rule denying contribution to antitrust coconspirators comports with the "mere rationality" test utilized by the courts to scrutinize economic legislation. Although denying contribution **[**21]** may create a more severe penalty under the treble damages provision of the antitrust laws than exists at common law, the powerful deterrent effect provided by such a penalty is certainly a rational basis for a no-contribution rule.

Texas Industries' equal protection argument is equally unacceptable. The equal protection guarantee of the *Fifth Amendment's due process clause* [17.] requires that all governmental classifications rationally relate to a legitimate governmental purpose. The essence of the requirement is that the government treat all those similarly situated similarly. See Tussman & tenBroech, The Equal Protection of the Laws, 37 Calif.L.Rev. 341 (1949). ***HN8***[] In applying the **[*905]** equal protection rationality requirement, the courts have utilized various standards of review depending on the type of legislation being scrutinized. In reviewing economic regulation the courts have exhibited the same deference to legislative judgment accorded under a due process analysis. The test generally applied in such cases is whether there is any "conceivable basis" justifying the governmental classification. [18.] Under this analysis, denying contribution does not deprive Texas Industries **[**22]** of equal protection of the law. The purpose of the antitrust laws is to preserve and promote the public interest in competition by ensuring the existence of an open and free market. We cannot say that a no-contribution rule, because of its deterrent effect, is not rationally related to the achievement of this purpose.

[23]** III.

Throughout this opinion we have treated all antitrust defendants as equally culpable, and, therefore, equally undeserving of contribution. An argument could be made, however, that a distinction should be drawn between intentional and unintentional violators. The crux of this argument rests upon the conclusion that an antitrust

---

16. This phrase takes its name from the Supreme Court's opinion in *Lochner v. New York, 198 U.S. 45, 25 S. Ct. 539, 49 L. Ed. 937 (1905)*, and refers to the period between 1897 and 1937 when the Court invalidated must state and federal legislation on substantive due process grounds. See L. Tribe, American Constitutional Law §§ 8-2 to 8-7 (1978); J. Nowak, R. Rotunda, & J. Young, Constitutional Law 397-410 (1978).

17. ***HN9***[] Although the *Fifth Amendment* does not contain an *equal protection clause*, the protections guaranteed under that concept have, to a large degree, been implied under the amendment's due process clause. See *Weinberger v. Wiesenfeld, 420 U.S. 636, 638 n.2, 95 S. Ct. 1225, 43 L. Ed. 2d 514 (1975)*. ("This Court's approach to *Fifth Amendment* equal protection claims has always been precisely the same as to equal protection claims under the *Fourteenth Amendment*."); *Schneider v. Rusk, 377 U.S. 163, 168, 84 S. Ct. 1187, 12 L. Ed. 2d 218 (1954)*; *Shapiro v. Thompson, 394 U.S. 618, 641-42, 89 S. Ct. 1322, 22 L. Ed. 2d 600 (1969)*; *Bolling v. Sharpe, 347 U.S. 497, 74 S. Ct. 693, 98 L. Ed. 884 (1954)*.

18. See, e. g., *McGowan v. Maryland, 366 U.S. 420, 81 S. Ct. 1101, 6 L. Ed. 2d 393 (1961)*; *Williamson v. Lee Optical, 348 U.S. 483, 75 S. Ct. 461, 99 L. Ed. 563 (1955)*; L. Tribe, Supra § 16-3.

defendant whose liability is premised solely upon the illegal effects of its actions should not be treated as harshly as a defendant whose culpability arises from a determination of an illegal purpose. Even assuming that inequity may occur in a particular case, however, we believe that creating a contribution right for an unintentional violator may inimically affect the implementation of the antitrust laws. The possible detriments that can be envisioned make this an inappropriate case for the exercise of our power to shape the federal common law even to this limited extent.

First, allowing a right of contribution for an unintentional violator may diminish the deterrent function of trebled damages. As an initial matter, deterrence in reference to an unwitting price-fixer may appear to be irrelevant. We believe it reasonable to assume, however, that even **[**24]** businesses of the purest motives necessarily steer wide of any conduct the effects of which may violate the law, in the knowledge that full, trebled damages possibly await even an unintentional transgression. Allowing contribution may diminish this prophylactic, chilling effect by reducing the threatening specter of sole liability. Businesses may be encouraged to risk anticompetitive conduct secure in the knowledge that proof of illegal purpose is often impossible and that liability for illegal effects will be dissipated.

Second, the overall effects upon plaintiff's case of allowing contribution even for an unintentional violation are problematic. In *Professional Beauty Supply, Inc. v. National Beauty Supply, Inc., 594 F.2d 1179* (8 Cir. 1979), the court, in allowing contribution for all antitrust defendants, dismissed this concern by pointing out that district courts have considerable discretion in managing complex cases to diminish any adverse effects upon plaintiffs. However, as Judge Hanson, a district judge sitting by designation, noted in his partial dissent, private plaintiffs may derive cold comfort from "the mere possibility of the favorable uses of district court discretion." **[**25]** *Id. at 1190*.

> Aware that litigation may spiral out of their control, it is foreseeable that some plaintiffs will decide to forego a legitimate cause of action. Though district courts have the power to superintend complex litigation, the multiplication of issues and parties remains to be grappled with, and the chilling effect on the incentive to bring or pursue a lawsuit is unlikely to be diminished by the mere possibility of the favorable uses of district court discretion.

Id. at 1190. (Hanson, Jr., dissenting in part).

Similarly, a district judge in this circuit has rejected implication of third-party **[*906]** claims based upon his determination that such claim would be unmanageable. See In re Corrugated Container Antitrust Litigation, -- - F. Supp. -- (S.D.Tex.1979). These concerns expressed by district judges buttress our conclusion that allowance of third-party claims may open a Pandora's box of procedural problems, against which district court discretion may prove a palliation.

Third, there appears to be no reason for drawing a distinction between intentional and unintentional violators other than to ensure equity in a particular case. There may well be **[**26]** antitrust violators who are entirely unwitting, but we refuse to distort the antitrust laws in order to remedy a problematic inequity. Moreover, any contribution may well amount to a windfall of sorts for a defendant because of the fortuity of plaintiff's proof.

IV.

Our decision in this case is certainly subject to reasonable contrary arguments. In this area of interstitial lawmaking, however, to forge a new rule with questionable benefits and such possible detriments is a bad practice. Those aggrieved by this decision always have recourse to Congress, a forum better suited to evaluation of the competing interests and policies involved. In the absence of more compelling arguments in favor of contribution, this court is reluctant to create such a right as a matter of federal common law.

Affirmed.

Dissent by: MORGAN(In part)

Dissent

LEWIS R. MORGAN, Circuit Judge, concurring in part and dissenting in part:

I concur in the majority opinion insofar as it denies a right of contribution to defendants who have intentionally violated the antitrust laws. I dissent, however, from the determination that an unintentional violator [1.] should be absolutely barred from seeking contribution from his **[**27]** fellow wrongdoers.

Historically, no right of contribution has been available among intentional tortfeasors. The courts have reasoned that limited judicial resources should not be wasted on a party whose cause of action is founded upon his own deliberate wrong. Restatement (Second) of Torts § 836A, Comment a (1979); Restatement of Restitution, Introductory Note to Ch. 3, Title C at 386 (1937). As noted in the majority opinion, Texas Industries **[**28]** has offered no convincing reason for departing from the common law no-contribution rule in the context of an intentional violation of the antitrust laws. What the majority fails to note is the modern trend toward recognizing a right of contribution among unintentional tortfeasors. Three fourths of the American jurisdictions [2.] now agree with Dean Prosser's observation that

> (t)here is obvious lack of sense and justice in a rule which permits the entire burden of **[**29]** a loss, for which two defendants were equally, unintentionally responsible, to be shouldered onto one alone.

Prosser, Law of Torts § 50 at 307. Absent proof that the purposes of the antitrust laws would be frustrated under a limited contribution rule, I would, in the interest of fairness, award contribution to a defendant **[*907]** whose liability is based solely on an unintentional violation of the antitrust laws.

The majority suggests that awarding contribution to unintentional violators could undermine the ***antitrust law***'s effectiveness in discouraging anticompetitive behavior. According to the court's analysis, two problems arise even under a limited contribution rule: (1) the deterrent effect of the private damage action may be diminished if defendants are allowed to distribute the financial burden of a treble damages judgment and (2) the lawsuit will be made more complex and difficult to manage, thereby dissuading plaintiffs from bringing such actions. Neither argument is persuasive.

The deterrence argument has been relied on by courts as a reason both for denying and for awarding contribution in an antitrust case. Compare El Camino Glass v. Sunglo Glass Co. with **[**30]** *Professional Beauty Supply, Inc., 594 F.2d 1179 (8th Cir. 1979)*. The majority opinion favors the position adopted by the district court in El Camino Glass that denying contribution Enhances the deterrent effect of the antitrust laws by preventing defendants from distributing the financial burden of a treble damages judgment. However, as the Professional Beauty Supply court noted, the argument can also be made that denying contribution Diminishes the law's deterrent effect by allowing some participants to avoid all responsibility for their wrongdoing. I agree with Judge Hanson's assessment that the arguments on either side of the deterrence question are at best inconclusive. *Professional Beauty Supply, Inc., supra, 594 F.2d at 1189* (Hanson, J., dissenting in part). The deterrence argument, therefore, is an inadequate reason for rejecting a rule designed to achieve fairness among parties guilty of no conscious wrongdoing.

[1.] Although intent is a necessary element of a criminal antitrust offense, a defendant may incur Civil liability for an unintentional violation of the antitrust laws. *United States v. United States Gypsum Co., 438 U.S. 422, 98 S. Ct. 2864, 57 L. Ed. 2d 854, 869 n.13 (1978)*. There is nothing new in this principle, for the courts have long recognized that "the Per se rule against price fixing applies to any arrangement among competitors which, In purpose or effect, directly or indirectly inhibits price competition." L. Sullivan, Antitrust § 74 at 198 (1977) (emphasis added).

[2.] Note, Contribution in Private Antitrust Suits, 63 Cornell L.Rev. 682, 698 (1978). A number of courts have allowed contribution among unintentional wrongdoers under federal common law. See, e. g., *Kohr v. Allegheny Airlines, 504 F.2d 400 (7th Cir. 1974)*, Cert. denied, ***421 U.S. 978, 95 S. Ct. 1980, 44 L. Ed. 2d 470 (1975)***; *Gomes v. Brodhurst, 394 F.2d 465 (3rd Cir. 1967)*; *Knell v. Feltman, 85 U.S. App. D.C. 22, 174 F.2d 662 (1949)*. The *Restatement (Second) of Torts § 886A* (1979) recognizes a right of contribution among unintentional tortfeasors.

Furthermore, even if one accepts the premise that a no-contribution rule has an increased deterrent effect on those contemplating anticompetitive activity, this is no reason for denying contribution to unintentional violators. As Assistant Attorney General Shenefield **[**31]** recently observed in testimony before a Senate subcommittee considering a proposed bill allowing contribution in price-fixing cases, [3.] "contribution is most compelling where the tortious conduct is unintentional; In such situations a lack of contribution would have no deterrent effect." [4.] This position makes more sense than the court's conclusion that businesses will somehow "steer wide" of illegal activity which they never realized was illegal in the first place. Clearly, deterrence is a valid reason for denying contribution only among those who Intentionally violate the antitrust laws.

[32]** The court is also concerned that some businesses "may be encouraged to risk anticompetitive conduct secure in the knowledge that proof of illegal purpose is often impossible and that liability for illegal effects will be dissipated." Majority opinion at 905. The assumption that intentional violators will be able to pass themselves off as unwitting transgressors is inconsistent with the realities of the proposed contribution action. Any party seeking contribution will invariably be opposed by contribution defendants who have a vested interest in establishing that the contribution plaintiff was an intentional violator of the antitrust laws. Moreover, these contribution defendants, unlike many antitrust plaintiffs, will be in an excellent position to know whether the party was, in fact, an intentional wrongdoer. Under these circumstances few, if any, intentional tortfeasors will succeed in presenting themselves as unwitting transgressors.

In its second argument the court expresses concern that allowing contribution will **[*908]** make the lawsuit more complex and difficult to manage, thereby dissuading some plaintiffs from pursuing a legitimate cause of action. Although the authorities **[**33]** considering the question unanimously agree that permitting contribution does threaten the plaintiff's ability to control the size and scope of his lawsuit, [5.] they disagree as to the trial court's ability to recognize and eliminate that threat. It is clear the *Fed.R.Civ.P. 42(b)* authorizes trial judges to order separate trials whenever a plaintiff is inconvenienced or prejudiced by a defendant's expansion of his suit. Relying on language from Judge Hanson's dissent in Professional Beauty Supply, the majority warns that the discretionary nature of the separation remedy may nevertheless dampen some plaintiff's enthusiasm about initiating an antitrust action.

I simply cannot believe that the discretionary **[**34]** nature of the *Rule 42(b)* separate trials provision would discourage an antitrust plaintiff from seeking treble damages should the court recognize a right of contribution among unintentional violators. The district courts are certainly aware of the antitrust plaintiff's status as a private attorney general and of the important role played by the private damage action in enforcing the objectives of the antitrust laws. The special solicitude accorded these plaintiffs necessarily requires a liberal exercise of the separate trials provision. Realizing his favored position, the antitrust plaintiff is not likely to assume that the trial judge would deny separation and allow defendant to complicate the lawsuit or otherwise add to the private litigant's burden. Hence, the incentive to sue provided by the treble damages action is not jeopardized if contribution is allowed.

Although some unfairness to unintentional violators must be tolerated if ***antitrust law*** policy is thwarted by allowing contribution, I do not believe that the dangers envisioned by the majority withstand close scrutiny. Absent more convincing proof that a limited contribution rule would compromise the effectiveness of the **[**35]** antitrust laws, I would not force a defendant guilty of no conscious wrongdoing to bear total responsibility for the sins of many.

[3.] S. 1468, 96th Cong., 1st Sess. (July 9, 1979).

[4.] Testimony of Assistant Attorney General John Shenefield before Senate Subcommittee on Antitrust, Monopoly and Business Rights, June 8, 1979. Other writers agree that "denying contribution can consistently deter only willful lawbreakers; it will not inhibit many violations committed unintentionally or in response to economic coercion. Thus, the deterrence rationale provides at best a weak justification for blanket denial of contribution." Note, Supra, 63 Cornell L.Rev. at 702-03; Restatement of Restitution, Supra, at 386.

[5.] *Professional Beauty Supply, supra, 594 F.2d 1184*; *Id at 1190* (Hanson, J., dissenting in part); El Camino Glass, supra at 72,112; ***Sabre Shipping Corp. v. American President Lines, Ltd., 298 F. Supp. 1339, 1346 (S.D.N.Y.1969)***; Note, Contribution in Private Antitrust Suits, 63 Cornell L.Rev. 682, 700-01 (1978).

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] **Sherman Act, Claims**

In order to establish that defendant company monopolized in violation of the Sherman Act, *15 U.S.C.S. § 2*, plaintiff has to prove: 1) that the defendant was in possession of monopoly power in a relevant market; and either 2) that the defendant has willfully acquired or maintained that power; or 3) that the defendant used its monopoly power, whether lawfully or unlawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor.

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Antitrust & Trade Law, Sherman Act**

Two types of evidence are relevant to an appraisal of defendant's ability to control price or exclude competition. The first category can be broadly labelled "market structure," and encompasses evidence that is relevant to an estimation of the nature and significance of constraints on defendant's power. The second category, "market performance" relates to a comparison between the actual past functioning of the market and the manner in which monopolized or competitive markets are predicted to function.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Antitrust & Trade Law, Sherman Act**

The greater the barriers faced by a new entrant, the more probable it is that control of a particular market share enables defendant to exercise monopoly power.

Counsel: Richard J. Lucas, Orrick, Herrington, Rowley & Sutcliffe, San Francisco, Cal., for plaintiff.

William W. Vaughn, O'Melveny & Myers, Los Angeles, Cal., for defendant.

Opinion by: SCHNACKE

Opinion

[*971] OPINION

I.

Plaintiff, Transamerica Computer Company, Inc. ("Transamerica"), has alleged that certain activities of Defendant, International Business Machines Corporation ("IBM"), violated *Section 2* of the Sherman Act which forbids the monopolization or attempted monopolization of any part of trade or commerce. [1]

An appreciation of the nature of the computer industry **[**2]** and the parties' respective roles is helpful to an understanding of, and indispensable to an evaluation of, that conduct.

Computers, like the punched card accounting equipment that preceded them, depend upon the capabilities of the electronic circuits. Because of the laws of physics involved, an electronic circuit, if properly designed, is capable of performing both arithmetic and logical functions. For instance, it is possible to design a circuit that will add two numbers together (an arithmetic function), and another circuit that will compare the result of the addition to a third number and choose between various alternatives on the basis of that comparison (a logical function). The sequence **[*972]** of arithmetic and logical functions that are to be performed is known as a program. With punched card accounting equipment, programs were "hard-wired", that is, the sequence of functions to be performed by the arithmetic and logical circuits was predetermined, and could only be altered by actually switching wires around within the machine.

In 1951, in response to the needs of the Bureau of the Census, Sperry Rand Corporation introduced the first stored-program computer, the Univac **[**3]** 1. This first computer differed from its predecessors in that it was possible easily to alter the program that determined the sequence of functions to be performed. No longer was it necessary to "hard-wire" the program; the sequence of functions desired could now be indicated to the computer through "softer" and more flexible means. A program could be punched into a series of cards and the content of those cards could then be read into the computer. The computer would turn to this data read in from the cards for instructions as to what arithmetic and logical functions it was to perform, and in what sequence. A program could be altered simply by altering a punched card, and new programs could be carried out merely by causing the machine to read in a different set of punched cards.

IBM offered its first electronic computer in 1953. That machine, like those offered by competitors, utilized vacuum tubes to perform the electronic circuit functions. Before long, this first generation of computers was outmoded by a

---

1 *15 U.S.C. Section 2*.

second-generation whose transistorized circuits performed more economically and more reliably. In 1964, IBM announced a series of machines, the System/360; these were the first **[**4]** of the third generation computers. The 360s not only employed improved components (integrated circuits replace transistors), they also relied upon a single general design or architecture for a broad spectrum of machines. That meant that one computer was capable of efficiently performing both scientific and commercial tasks, and, perhaps most important, it meant that customers who outgrew their smaller machines could "migrate" to larger machines without the need to change their existing programs; the whole 360 family of computers was program-compatible to an unprecedented degree. As a result, System/360 was a tremendous commercial success.

In 1970 IBM announced its 370 system, a further significant improvement, and superior to the 360 system.

The new 370 system involved improved central processing units as well as new and improved peripherals. All of the acts Transamerica claims caused it damage were related to the introduction of the 370 system.

IBM is a supplier of computer systems, supplying all, or nearly all of the user's computing needs. It offers a wide range of services and products, both software and hardware. [2]

[5]** The hardware of a computing system consists of a central processing unit ("CPU"), which houses the arithmetic and logical electronic circuits, and a variety of peripheral gear.

The functions of peripherals include: storing data for later access by the CPU; feeding data into the CPU (input); and accepting data from the CPU (output). A machine capable of reading data on punched cards and transferring that data to the CPU is considered an input peripheral, while a printer attached to the CPU functions as an output peripheral. Some peripherals perform all three functions. Disk drives and tape drives are examples of peripherals capable of storing data, inputting data, and outputting data. Data is stored on disks and is "randomly" accessed very rapidly by an access arm with the capability of reading or writing data. The access arm can be made to move to a particular track on the disk where the data is to be read or written. Tape drives are used for reading and writing data sequentially. Random access **[*973]** of data on tape reels is impractical because it is so time consuming.

The tape and disk drives which attached to System/360 CPUs were a lucrative part of IBM's business, so lucrative **[**6]** in fact, that they attracted competition. In the late 1960's, several companies began marketing copies of IBM's tapes, disks and printers, which were "plug-compatible" with IBM CPUs. A user could simply unplug the IBM peripheral, substitute the cheaper copy, and plug it into the IBM CPU. The companies providing this new competition became known in the industry as plug-compatible manufacturers ("PCMs").

The PCMs enjoyed a tremendous success. They were offering equivalent or better performance at a substantial discount. But in order to sustain their growth the PCMs needed funds. Most computer systems were leased rather than sold. This meant that the PCMs were unable to realize a quick return on their capital investment; much of their capital was tied up in ownership of leased machines, an investment that would not be recouped for years. The PCMs needed money to finance the manufacture of machines to meet a growing demand as well as to pay for the engineering costs of developing new products. They sought financing from a variety of sources: the sale of equity and debt securities; bank loans; the use of leasing companies; and more complex arrangements.

Transamerica Computer Company, **[**7]** Inc., was incorporated in late 1967 as a wholly-owned subsidiary of Transamerica Corporation, a large non-bank financial conglomerate with wholly-owned subsidiaries in the insurance, auto rental, motion picture and other businesses. The parent was well financed, with nearly unlimited credit, and desired a "window to the computer industry." Transamerica made a number of ventures into computer related financing. The transactions central to this case are Transamerica's purchase of millions of dollars worth of on-lease tapes and disks from two PCMs, Marshall Industries ("Marshall") and Telex Corporation ("Telex").

---

[2] Programs have come to be known as "software" while the term "hardware" has been reserved to refer to the physical machinery associated with the computer.

These manufacturers leased their equipment to end users. After it was on lease, the equipment was "sold" to Transamerica under an arrangement by which the manufacturers were obligated to collect the rents, to service and maintain the equipment, and to remarket it as leases expired. Unlike some leasing companies which buy equipment, find users, collect rentals, etc., Transamerica had no function except to supply capital. In many cases the end users were unaware of Transamerica's ownership of their equipment, and, indeed, at various times there was considerable doubt as to whether **[**8]** specific equipment was owned by Transamerica or the manufacturer. The arrangements also contemplated that, after Transamerica had been reimbursed some agreed amount, further rental revenues would be shared between it and the manufacturer. There were two important reasons for this structuring of what was basically a financing arrangement. First, Transamerica expected that, as "owner" of the equipment, it would be permitted to take, for the substantial benefit of its parent, the investment tax credit then available under the tax laws. And, second, the manufacturers hoped to treat the transfers of title to Transamerica as sales, thus increasing their current profit picture, and aiding them in sales of their corporate stock. Neither of these benefits would have resulted if Transamerica had simply lent money to the manufacturer.

Telex and Marshall were but two of the companies which were successful in displacing IBM peripheral equipment by offering it at prices well below those IBM was charging. IBM responded to the PCM competition by offering certain of its own products at substantially reduced prices, and by offering its peripherals for lease on longer and better terms than it had previously. **[**9]** In addition, new CPUs were introduced that were incompatible with the PCMs' existing peripherals. These actions, and others described herein, are those that Transamerica contends were the means by which IBM monopolized and attempted to monopolize in violation of *Section 2*.

[*974] Following a seven month trial, a jury was unable to reach a unanimous verdict on any of the issues presented. The parties, before commencement of the trial, foresaw that possibility, and, stipulated that the case would be submitted to the Court for decision in the event of jury disagreement. (It might be well for the courts or Congress to consider whether such an arrangement might be Compelled by the trial judge in advance of trial. No one case should be allowed to monopolize the court's time indefinitely to the exclusion of the rights of other litigants. If, after one long jury trial, it becomes apparent that further jury trials would be inordinately time consuming, without any realistic expectation that the issues would be resolved, the matter should be resolved otherwise. The best method would seem to be by decision of the trial judge on the evidence presented at the jury trial.)

This Court, having **[**10]** heard and fully reviewed all of the evidence, has made the findings of fact and come to the conclusions of law that are incorporated in this opinion.

II.

HN1[] In order to establish that IBM monopolized in violation of *Section 2* of the Sherman Act, [3] plaintiff must prove:

1) that the defendant was in possession of monopoly power in a relevant market;

and either

2) that the defendant has willfully acquired or maintained that power; [4]

or

---

[3] *15 U.S.C. Section 2*.

[4] *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)* ("Grinnell "); *California Computer Products, Inc., et al. v. International Business Machines Corporation, 613 F.2d 727 (9th Cir. 1979)* ("CalComp "); *Greyhound Computer Corp. v. International Business Machines Corporation, 559 F.2d 488, 492 (9th Cir. 1977)*, Cert. denied, ***434 U.S. 1040, 98 S. Ct. 782, 54 L. Ed. 2d 790 (1978)*** ("Greyhound").

3) that the defendant used its monopoly power, whether lawfully or unlawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor. [5]

[11]** The first essential inquiry must be whether IBM possessed monopoly power; whether it had the power to control prices in, or to exclude competition from some relevant market [6] during the years here in question, 1969 to 1973.

III.

In general, ***HN2***[] two types of evidence are relevant to an appraisal of defendant's ability to control price or exclude competition. The first category can be broadly labelled "market structure," and encompasses evidence that is relevant to an estimation of the nature and significance of constraints on defendant's power. The second category, "market performance" relates to a comparison between the actual past functioning of the market and the manner in which monopolized or competitive markets are predicted to function.

A. Market Structure

Economic theory teaches that a monopolist, because it is in **[**12]** a position to control price by varying the quantity of goods it produces and sells, will be able to sell its goods at a price higher than would prevail were the market competitive. [7] **[**13]** As a result it will earn supra-normal profits. In competitive markets, two forces are at work which inhibit the ability of a firm to charge more than the competitive price level **[*975]** and earn more than a normal profit. First, if a producer raises its price above the price for competing goods, then customer demand for the higher-priced article will fall off in favor of cheaper alternatives, and the producer will be forced to lower its price again. Second, even if the producer were able to charge relatively more for its product for a time, the resultant supra-normal profits would lure new competitors into the market, and the additional supply of competing goods that they offer to customers would cause prices and profits to return to competitive levels. [8] If that first force ("demand substitutability") and that second force ("supply substitutability") are sufficient checks upon defendant's power to control price, then the market is effectively competitive. If not, defendant is a monopolist.

An inquiry into demand substitutability calls for a definition of the relevant market and measurement of defendant's share of that market. [9] The relevant market is comprised of defendant's product, products that are fungible, and of those products which the customer would consider to be reasonable alternatives. [10] If a small increase in the price of product A will cause customers to shift their allegiance to product B, then the cross-elasticity of demand is high, the products are reasonable alternatives, and they belong in the same relevant market.

International Business Machines Corp., 510 F.2d 894, 926-928 (10th Cir. 1975)*, Cert. dismissed, ***423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975)*** ("Telex").

[6] *United States v. E. I. duPont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)* ("DuPont "); CalComp, supra n. 4, at 734; *Greyhound, supra n. 4, 559 F.2d at 496*.

[7] See P. Areeda, Antitrust Analysis, 13 n. 33 (1974).

[8] Id.

[9] *Walker Inc. v. Food Machinery, 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*; *Twin City Sportservice Inc. v. Charles O. Finley and Co., 512 F.2d 1264, 1270 (9th Cir. 1975)*; Case- *Swayne Co. v. Sunkist Growers, Inc., 369 F.2d 449, 454 (9th Cir. 1966)*, Rev'd on other grounds, *389 U.S. 384, 88 S. Ct. 528, 19 L. Ed. 2d 621 (1967)*.

[10] *DuPont, supra n. 6, 351 U.S. at 395, 76 S. Ct. 994*. Note that in some circumstances services or a combination of services and products may provide reasonable alternatives to the selection of a product. *Grinnell, supra n. 4, 384 U.S. at 572, 86 S. Ct. 1698*. The use of the term "product" here does not indicate that this possibility has not been considered.

[14]** The geographic aspects of the relevant market must also be considered. [11] Thus, if small changes in the price of a product in one location will cause customers to turn to alternatives available in another location, then the quantity of reasonably alternative products supplied at both locations should be considered as part of the relevant market. The relevant geographic market is the area of effective competition within which the seller operates and to which the purchaser can practically turn for supplies. [12]

With the relevant market defined, the defendant's share of that market can be measured. A relatively small market share would lead to **[**15]** the inference that monopoly power was not present since the ready availability of substitutes would defeat attempts to use that power. The larger defendant's market share, the stronger is the inference that competitors would be unable to effectively check exercises of monopoly power. [13]

The distribution of the share of the market not supplied by defendant is also telling. Defendant's share is more likely to indicate monopoly power if the rest of the market is widely distributed among many small competing suppliers than it would be if the size of competitors and the market share held by them approached defendant's size and share. [14]

[16]** **[*976]** Under some circumstances it may be proper to apply the concept of supply substitutability to the definition and measurement of the relevant market and to include within the market any suppliers which might readily and easily enter by producing a reasonably acceptable alternative product.

HN3[] The greater the barriers faced by a new entrant, the more probable it is that control of a particular market share would enable defendant to exercise monopoly power. [15]

Anything that tends to inhibit firms from readily and easily entering the marketplace can be analyzed as an entry barrier. Thus, the capital an entrant would have to invest is a factor, as are the employee skill levels required for a firm to be successful. Product differentiation, product loyalty, or any customer disinclination to accept the product from different suppliers **[**17]** are hurdles the new entrant may have to overcome. And, the existence of economies of scale or a dwindling market demand would make entry difficult.

Within a market, as defined by demand cross-elasticity considerations, economically significant submarkets may exist. [16] Submarkets are zones of actual or potential competition [17] that are sufficiently distinct from the larger market that one firm could exercise the power to control price or the power to exclude competition within them. [18]

[18]** Practical aids in identification of such zones of competition include industry or public recognition of the submarket as a separate economic entity the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. [19] If these indicia indicate a submarket exists, market structure and market performance should be examined to determine whether defendant is in possession of monopoly power. [20]

B. Market Performance

Evidence of the actual operation of the market or submarket can also provide valuable clues as to the existence of monopoly power. If defendant has, in the past, successfully controlled price or excluded **[**19]** competition, that is direct and convincing evidence that it had the power to do so. [21]

Less direct evidence can also be persuasive. Many courts have examined defendant's profit record on the theory that persistent excess profits are inconsistent with the competitive model and attributable to the possession of monopoly power. [22] **[**20]** Monopoly **[*977]** is also expected to result in technological stagnation. Without a competitive spur, the monopolist is thought not to have any incentive to innovate. Thus, the rate of technological progress in the industry is relevant. [23]

In a competitive industry firms are expected to be "price takers." That is, they will be unable to affect price by variations in the quantity of goods they offer for sale. Where it appears defendant was a "price maker," able to choose among a range of price options in order to achieve its profit goals, or able to disregard cost and set price according to utility to the consumer (functional pricing), it may indicate monopoly power. [24], [25]

[21]** Market history, in terms of entry and growth of new firms or exit of failed firms, and whether concentration is increasing or decreasing are additional factors that can indicate whether the competitive process is functioning properly or not. [26]

Transamerica asserts that IBM had monopoly power in three markets:

---

18 Cf. *Grinnell, supra n. 4, 384 U.S. at 573, 86 S. Ct. 1698*. Note that existence of a submarket does not necessarily negate the relevancy of the larger market. *U. S. v. Phillipsburg National Bank, 399 U.S. 350, 360, 90 S. Ct. 2035, 26 L. Ed. 2d 658 (1970)*.

1. The manufacture and placement of general purpose electronic digital computer systems ("systems market");

2. The manufacture and placement of tape drives and their controllers plug-compatible to IBM CPUs ("tape market"); and

3. The manufacture and placement of disk drives and their controllers plug-compatible to IBM CPUs ("disk market").

C. The General Purpose Systems Market

Computer systems are the functioning combination of hardware (CPUs and peripherals) **[**22]** and software that a user may employ to satisfy data processing requirements. Transamerica draws a distinction between general purpose systems and special purpose systems. Special purpose systems are those that are designed for and dedicated to specialized applications. For instance, a special purpose computer system might be utilized to control a manufacturing or a chemical process. General purpose systems, on the other hand, are those that are capable of easily and economically being adapted to a variety of data processing applications. A general purpose computer system might be used to process a company's payroll, to update its books of account, or to allow its engineers to solve complex mathematical problems while sitting at a remote terminal. Some (but not all) general purpose systems are capable of performing all these tasks concurrently. By definition, all general purpose systems allow the user to switch easily from one task to another.

This Court accepts the view that the market for general purpose computer systems should be analyzed separately from the market for special purpose computer systems. The systems sold to satisfy these different needs are not readily interchangeable **[**23]** and different suppliers specialize in each of the markets.

Transamerica's definition of the systems market is, however, too narrow. Only suppliers of complete systems are included, suppliers of parts of systems are ignored. Firms which offer the user parts of systems have become a major competitive force in the computer industry, and, because they significantly constrain IBM's power to control the price of the systems it sells, a **[*978]** market definition that ignores them is incorrect.

At one time the only option a general purpose systems user had was to choose between suppliers of complete systems. If an IBM user was dissatisfied with IBM's peripheral equipment or with IBM's software, the only recourse was to remove the entire IBM system as a unit, and replace it with an entire system from another manufacturer. Since that time, literally thousands of companies have entered the systems market, not as suppliers of entire systems, but rather as specialists providing users with replacements for parts of their computer systems. IBM did not charge the user one price for an entire computer system, rather they priced each component of their systems individually. That meant that companies **[**24]** which focused on replacing parts of a system could offer the user a better price on that part and the user was still free to acquire the rest of the system from IBM.

The PCMs are perhaps the best example of such specialists. Some PCMs got their start by copying IBM's tape drives and offering them to IBM's systems customers. Other PCMs specialized in replacing IBM's disk subsystems with their own versions. Still others recognized a competitive opportunity in supplying printers for use on IBM's systems, and some PCMs competed with IBM for sales of the electronic memories attached to IBM CPUs.

Entry barriers proved remarkably low, and the PCMs proliferated. Today, a user could replace practically every part of an IBM system with hardware from a PCM. The same is true for software. Software firms offer programs to users of IBM systems that are reasonable alternatives to the programs available from IBM. And the entry barriers faced by an entrepreneur with a software package to sell are truly insignificant.

A market definition should "recognize competition where, in fact, competition exists" [27], and should include all significant competition even though that competition differs in form **[**25]** or nature. [28] **[**26]** Transamerica's

---

[27] *Brown Shoe, supra n. 16, 370 U.S. at 326, 82 S. Ct. at 1524*.

[28] *United States v. Continental Can Co., 378 U.S. 441, 449-50, 84 S. Ct. 1733, 12 L. Ed. 2d 953 (1964)*.

systems market definition fails this fundamental test. By assuming that only manufacturers offering complete systems compete with IBM, Transamerica ignores the fact that IBM systems users had other reasonable alternatives; they could replace parts of their IBM systems. In many ways, partial replacement was a more significant constraining force than total replacement. Customers found partial replacement attractive because it did not involve a scrapping of the user's investment in programming and personnel skills, and it allowed users to reduce data processing costs without abandoning entirely the security of the IBM fold. Partial replacement of parts of IBM systems was a significant constraining force on IBM's market power during the 1969-1973 time period. [29] Billions of dollars worth of equipment was being replaced piecemeal by IBM systems users. A market definition that ignores this cannot be accepted.

Some minicomputers (minis), small, relatively inexpensive computer systems should also have been included in Transamerica's general purpose systems market definition. Transamerica included the smaller IBM systems, but excluded the thousands of minis that were directly competitive with those small IBM systems. That exclusion would have had more validity in the past. When they were first introduced minis were limited, or at least thought to be limited to special purpose applications. But things changed. By May, 1970, Computerworld, a widely read industry newspaper, recognized that the ". . . new minicomputers and microcomputers showed drastic changes in design that make them truly general purpose **[*979]** . . . . For the first time, they offer a reasonable alternative to "full-sized' systems." Advertisements by minicomputer manufacturers emphasized that theme, and apparently users got the message. In August of 1972, Computerworld reported:

> "They (minis) are being used **[**27]** as true general purpose computers, running a range of applications such as order entry, sales analysis, payables, receivables, general ledger, inventory control, payroll, price ticket printing and credit authorization . . . ."

During the relevant time period minis were being sold as reasonable alternatives to the smaller general purpose systems offered by IBM. When connected together, several minis were a reasonable alternative to the acquisition of larger systems. And minis, whether used as data collection devices, intelligent terminals, pre-processors, or stand-alone systems, could ease the workload of larger general purpose systems, thereby providing the user with a viable alternative to the acquisition of a more powerful system. The competition minis provided was significant, and their exclusion from the systems market definition was incorrect.

IBM also faced other constraints not contemplated by Transamerica's systems market definition. Service bureaus buy computing systems and make them available to others by renting out time on them or doing work on them for the benefit of end-users. Time-sharing companies make their computers available to many users who access them concurrently **[**28]** via remote terminals. In both cases, users may turn to such companies during peak periods, or for the specialized services they offer. Leasing companies are financial intermediaries; they buy computer systems, or parts of computer systems, from manufacturers and lease them to users. Service bureaus, time-sharing companies and leasing companies all provide significant competition for IBM. However, their exclusion from the market definition is analytically correct. These companies all buy computers from systems manufacturers, add some financial or technical services, then turn around and offer the computers to the end user. Their basic product is computing power. Their basic raw material is a computer system. Since they all must buy equipment from manufacturers, if one manufacturer has the power to control price at the time of the initial sale, it has the power to indirectly control the price at which the computer re-enters the market with the added services. Where it is possible that a defendant might indirectly control the price at which goods re-enter the market, that alternative source of goods should be excluded from the market definition. [30] But the nature and the volume of the **[**29]** business done by service bureaus, time-sharing companies, and leasing companies need not be totally ignored. Although exclusion from market definition is called for, the constraints these companies provide decrease the likelihood that defendant's market share reflects monopoly power.

---

[29] The IBM actions of which Transamerica complains all took place within a ten month period, September 1970 to July 1971.

[30] Alcoa, supra n. 44, at 425.

This Court agrees with Transamerica's contention that the concept of supply substitutability does not affect the systems market definition since there has been no evidence that any firms are in a position to readily shift their production facilities into the manufacture of general purpose systems, and also agrees that the United States constitutes the relevant geographic market.

Transamerica has made no effort to measure IBM's share of the market as this Court would define it, i. e., including minicomputer manufacturers, software suppliers, and PCMs as competitors. Nonetheless, the evidence of IBM's market share, in the market as defined by Transamerica, will be examined for whatever light it might **[**30]** shed on the issue of IBM's market power.

The most common measurement of market shares is a comparison of the competitors' annual sales. [31] Here, Transamerica, **[*980]** however, has used what is called the "installed base" method.

Included in each company's installed base for any year are all computer systems ever leased or sold by that company which are still in use in that year. Those systems, no matter how old they are, are valued at their original purchase price or their current purchase price, whichever is higher. Transamerica insists that this method is appropriate because the general purpose computer systems market is predominantly a lease market. Any measurement that failed to recognize past activity, they argue, would ignore the substantial revenues IBM enjoys from machines leased and shipped in **[**31]** the past and ignore the substantial hold IBM has on those customers due to software lock-in. [32]

The computer industry is characterized by cyclical development or "generations" of computer equipment. These cycles can be expected to produce sharp fluctuations in one company's share of annual shipments, and the tendency of the installed base method to smooth out these swings is another advantage claimed for it.

Installed base is a method traditionally employed by the computer industry, including at one time IBM itself, and this too is a reason advanced for its adoption here.

[32]** IBM counters that installed base reflects more history than current market power. IBM is right. IBM has been successful in the computer field almost since the industry's inception. Thus, inclusion of all IBM machines still in use distorts their share. The successes of newer companies (such as the PCMs) are camouflaged by the large installed bases of more established manufacturers.

The installed base method credits IBM with purchased machines from which it no longer enjoys any revenue, and even with machines that have come back into the market to compete against it. Machines sold in an earlier year to leasing companies, time-sharing companies, service bureaus, and used machines are all attributed to IBM's market share in later years. Transamerica insists this is proper because IBM, as the original manufacturer, indirectly controls the prices at which such machines and services can be offered. While such reasoning supports an exclusion of this competition from market definition, it does not warrant an attribution of the value of their capital equipment to the manufacturer's market share except in the year of the initial sale. [33]

[33]** The lease nature of the business is an insufficient reason for abandoning an annualized approach. By 1973, less than half of IBM's general purpose systems were leased. And if software lock-in, or any other factor, persuades users not to switch vendors, then the future successes that installed base would predict will ultimately be reflected

---

[31] See *United States v. Pabst Brewing Company, 384 U.S. 546, 550, 86 S. Ct. 1665, 16 L. Ed. 2d 765 (1966)*; *United States v. Von's Grocery Co., 384 U.S. 270, 272, 86 S. Ct. 1478, 16 L. Ed. 2d 555 (1966)*.

[32] Software lock-in is a term used to describe the disinclination of users to switch from one computer manufacturer's line of equipment to another's. If a user were to switch allegiance, it would incur substantial costs in converting its existing programs to the formats required by the other manufacturer's machine. As a result, over 80 percent of all users remain with the same manufacturer when they replace their general purpose systems.

[33] Transamerica's reliance on Alcoa, supra n. 44, at 424-25, is misplaced. The Court there excluded secondary ingot from the market definition. It did not include the secondary ingot in defendant's market share.

in annual shipment data. One of Transamerica's industry market share experts, recognizing the infirmities of installed base, recently discontinued his use of that method.

It is not necessary to discard all of Transamerica's data because the installed base measurement method is unacceptable. Annual shipments can be approximated from the installed base figures in evidence by subtracting one year's installed base from the following year's. This will yield a figure for net shipments. Net shipments appear to be a more desirable indicator then gross shipments because many computers are shipped to users who return their older machines to the manufacturer. Cyclical **[*981]** fluctuations can be accounted for by averaging the share figures for several years.

In some of its data Transamerica has included the value of equipment placed by the PCMs as part **[**34]** of IBM's share. This is clearly incorrect, and Transamerica has offered no convincing rationale for it. It would be possible to rehabilitate this data by extracting from IBM's share the value of disks and tapes supplied by PCMs. However, the value of PCM supplied printers, electronic memories, and other gear cannot be separated out, providing still another reason for viewing the resulting figures cautiously.

IBM's share of net shipments (less all PCM products) has been calculated to be: 65.4 percent; 67.9 percent; 51.4 percent; 56.4 percent; 56.5 percent; 30.6 percent; and 64.4 percent, for the years 1969 through 1975 respectively. Over the entire seven-year period IBM shipped 57.4 percent of all general purpose systems (net). The next largest share was shipped by the PCMs as a group with 14 percent over the seven years. Burroughs was the second largest manufacturer of systems with 7.7 percent, followed by Univac with 4.9 percent, and Honeywell with 4.6 percent. [34]

[35]** Even in a properly defined market these market share statistics would not be overwhelming. Other courts have doubted whether sixty percent of a market would be enough. [35] But while a finding of monopoly power is not foreclosed by IBM's share if the setting is conducive to the exercise of such power and if other indicators confirm its presence, [36] such a finding is certainly not compelled by these market shares.

The distribution of the remainder of the market serves to enhance IBM's power. No single manufacturer approaches the success IBM enjoys. However, their shares are growing while IBM's is shrinking. IBM's share tends generally downward, indicating that monopoly power is not present, **[**36]** or, if present, that the monopolist's grip is weakening.

Consistent supra-normal profits may be attributable to an ability to control price. Here IBM's profits have been very substantial. Its after-tax return on equity during the 1964 to 1973 period was consistently 30 to 70 percent above the Fortune 500 median, while its after-tax return on sales doubled and sometimes tripled the industrial giants' median. But the inference that a defendant that enjoys healthy profits only does so because of an unhealthy market structure is not a strong one. Good management, superior efficiency and differences in accounting provide explanations that are just as plausible, and none of those explanations is inconsistent with an effectively competitive market.

One thing excessive profits can be expected to result in is increased entry by firms hungry to participate in the rich rewards. Transamerica says that this has not occurred because the entry barriers faced by potential entrants are insurmountable. It is true that enormous barriers are faced by firms wishing to enter this market as suppliers of complete computer systems. Between $ 500 million and $ 1 billion in capital would be required; a national **[**37]** network of sales and maintenance offices staffed with highly skilled personnel is imperative; the entrant would have

---

[34] See defendant's exhibits 6183 and 6515A.

[35] Alcoa, supra n. 44, at 424.

[36] The Ninth Circuit has expressly affirmed findings of monopoly power where defendant's share was 45-70 percent. *Pacific Coast Agr. Export Association v. Sunkist Growers, Inc., 526 F.2d 1196, 1204 (9th Cir. 1975)*, Cert. denied, ***425 U.S. 959, 96 S. Ct. 1741, 48 L. Ed. 2d 204 (1976)***.

to fund research and development projects; a broad product line must be offered; and customer loyalty due to software lock-in would have to be overcome. Because such a large commitment would be involved for entry as a systems supplier, it is not surprising to find that there has been no new entry on that basis since the early 1960's.

The flaw in Transamerica's entry barrier analysis is a consequence of its market definition error. Competition and entry in this market does not occur on only a full-system **[*982]** basis. Entry could, and did occur where companies recognized profitable opportunities in less inclusive offerings. Storage Technology Corporation, one of the most successful PCMs, was started by a bright engineer with $ 225,000 in equity capital, and experienced phenomenal growth. It was not alone. In 1970, International Data Corporation, (IDC) a company specializing in statistical studies of the computer industry, reported:

> "Just 15 years ago, the number of companies in the infant industry could be counted on the fingers of one hand; today well over **[**38]** 4,000 companies produce computers, related equipment and supplies, or offer data processing and programming services."

IDC thought there had been "an explosive proliferation of options for the computer user." In 1971, Transamerica, in a presentation to its parent Board of Directors, agreed, saying:

> "The frequency of entry into the data processing industry is quite high compared with any other industry, and there are usually at any one time, more competitors than anyone would really like to have."

The new entrants were growing. From 1967 to 1975 the value of PCM equipment attached to IBM systems increased from $ 15.8 million to $ 2.6 billion. In the same period, leasing companies jumped from holding 8.3 percent of the IBM CPUs to 26.7 percent. And the market as a whole was growing; most of IBM's full-systems competitors participated in that growth. Digital Equipment Corporation, (DEC) for example, was founded in 1957 with DEC initial capitalization of $ 70,000. By 1977 it had computer related revenues of $ 1.1 billion. One commentator has referred to IBM's systems competitors as the "billion dollar dwarfs."

This is not the story of a stagnant, dominated industry. There **[**39]** is no doubt that the pace of technological progress in the computer industry is extraordinary. Commentators are fond of saying that had the auto industry kept the same pace over the last 30 years, a Rolls-Royce would cost $ 2.50 today and would have an EPA gas rating of 2,000,000 miles per gallon.

There is some evidence that IBM sought to maximize profits by choosing a price for its products from a range of alternative prices. But that is not necessarily inconsistent with an effectively competitive market. The range of price options available to IBM was never so broad that it could set a price without regard to competitors' prices. And, in most cases, the range was only theoretical, because competitive pressures, not IBM preference, dictated which price had to be adopted.

This market was not monopolized. IBM did not control prices, it reacted to the prices set by others. IBM's market share (if the market had been properly defined) was below 57 percent and falling. Entry was easy for anyone with a good idea and the courage to exploit it, and new entrants, along with the old, grew and prospered. This Court finds that Transamerica has failed to prove that IBM had monopoly power in the **[**40]** general purpose systems market.

Nonetheless, Transamerica's other contentions will be considered on the assumption that IBM Did have such monopoly power.

D. Tape and Disk Markets

The hardware of a computing system was previously described as consisting of a CPU and peripherals. Further refinement of that over-simplification is necessary for an understanding of the peripherals markets alleged to be relevant.

Certain control functions must be performed if peripheral gear is to function properly. The access arm of a disk drive, for example, must be positioned over the proper track before data can be read from, or written onto that track. These control functions can be performed by the arithmetic and logical circuits of the CPU, in which case the control function is said to be "integrated" into the CPU. But when the CPU is tied up with control functions, it is not free to perform more sophisticated tasks, **[*983]** and so an alternative design was incorporated into the architecture of System/360. Most of the peripherals attachable to System/360 CPUs were not integrated. The control functions were performed by two independent "boxes" or machines with arithmetic and logical circuits: **[**41]** channels and control units.

A limited number of channels could be attached to most System/360 CPUs. Channels funnel data into the CPUs' main electronic memory, and take from the memory data that is to be written onto any of the peripheral devices that may attach to the channel, and send it to its destination. Channels perform control functions common to a variety of peripheral gear.

It is possible to attach a number of control units to each channel on the system, and the peripheral devices attach to the control unit. Control units perform the control functions that are required by the specific type of peripheral that attaches to it. Thus, one type of tape drive, expecting specific control functions to be performed, only attaches to a specific type of control unit. Other types of tape drives require a different control unit, and the same is true of disks. But various types of control units can be attached to the same channel.

PCMs typically supplied a combined package of disks and disk control units attachable to, or "plug-compatible" with, IBM channels. This meant that the user could remove the IBM control unit and disk combination (known as a "subsystem"), plug in the PCMs' replacements **[**42]** and the computing system would continue to function with very little inconvenience. That was so because the PCMs had duplicated the "interface" between the IBM channel and the IBM disk control units. An interface has both physical aspects (in terms of the number of wires involved and their arrangement in a connector), and protocol aspects (what a given pulse sequence on a particular wire is understood to indicate by the machine receiving the pulse).

Unlike PCM disk suppliers who provide subsystems, PCM tape suppliers concentrated initially on tape drives and generally did not sell tape control units. Thus, the interface that they duplicated was the interface between IBM tapes and IBM control units.

Although many computer manufacturers designed their systems with this CPU-channel-control unit-peripheral hierarchy of control functions, no other systems were designed so that the interface between the channel and control unit (disks) or the interface between the control unit and peripheral device (tapes) was precisely the same as the corresponding IBM interface. Thus, tape drives and disk drive-control unit combinations developed for use on IBM's System/360 could not, without some interface **[**43]** modifications, be plugged into another computer manufacturer's system, and vice versa.

The two peripherals markets alleged by Transamerica consist of tape drives and tape control units, and disk drives and disk control units that can be plugged into IBM CPUs without any modifications, i.e., that are plug-compatible.

These peripherals markets will be examined together. Both markets, if they can be so described, became economically significant in the late 1960's, when PCMs began duplicating the peripherals that would attach to IBM's computers. Prior to that time some of the PCMs supplied peripherals to IBM's general purpose systems competitors, who then incorporated them into the systems they offered. When the systems competitors took to manufacturing their own peripherals, the PCMs turned their attention to marketing peripheral replacements to IBM users.

Having already accepted a definition of a systems market that encompasses all the economic activity on the peripherals front, perhaps "submarket" would be the proper term to apply here. In any event, the Brown Shoe submarket indicia can provide valuable clues as to whether plug-compatible tapes and control units and plug-compatible **[**44]** disks and control units are sufficiently distinct that they could be monopolized.

[*984] Industry recognition of the peripherals markets as separate economic entities could hardly be more evident. IBM studied the "tape market" and "disk market" separately and referred to them repeatedly by those or similar appellations. Others in the industry, including witnesses called by both sides, referred to and treated the tape and disk markets as separate economic entities.

The peculiar uses and characteristics of the products involved have already been spoken of. Because the interfaces between IBM CPUs and control units and between IBM control units and peripherals were unique, the tapes or disks described as plug-compatible to IBM CPUs could only be used with those CPUs. Users with systems provided by other manufacturers could not use them at all, and IBM users could use nothing else. Thus, customers for plug-compatible tapes and disks were readily identifiable and distinct.

The production facilities for tapes were different from the production facilities for disks, and both were different from the production facilities for other components of the system. IBM's main disk facilities **[**45]** were in California; its main tape facilities in Colorado; and its CPUs were manufactured elsewhere. However, the production facilities of independents and systems manufacturers producing non-IBM-plug-compatible tapes and disks were probably not so different from the facilities for the corresponding plug-compatible peripherals. This is so because the tapes and disks were similar in almost all respects save for the unique interface electronics.

Prices were distinct. In setting its prices IBM was less influenced by the prices of non-plug-compatible tapes and disks than by the PCMs' prices. Users were price sensitive. Lower prices for equivalent or superior performance was the PCMs' selling point. With it they managed to attract millions of dollars worth of business away from IBM.

Finally, the PCMs were specialized. Peripherals were their major activity. Many supplied only plug-compatible tapes or only plug-compatible disks. Those that supplied both, made the combination only after experiencing an initial success with the one device or the other. The Brown Shoe submarket criteria indicate that the peripherals markets are capable of being dominated, and the markets should be examined **[**46]** further.

IBM attacks these markets as narrow for three reasons: (1) they ignore the interchangeability between tapes and disks; (2) they fail to include as potential suppliers either the systems manufacturers who make their own peripherals, or the independents who manufacture peripherals for them; and (3) they fail to account for the constraint of systems competition on peripheral price discretion.

IBM's first argument, that tapes and disks are interchangeable, is without merit. In configuring a system, users have several alternatives. Various types of media are available to store and access data. Principal among these are tapes, disks and electronic memory. In that order, data is accessed by the CPU with increasing rapidity, but also with increasing cost. Electronic memory is so expensive that it is only used as a temporary storage area for data. Data is read into the electronic memory (from a tape or disk perhaps) where the CPU can readily access and work with it, then written from electronic memory onto another medium for more permanent storage. Electronic memory is not really a peripheral, rather more a part of the CPU itself, and is not a reasonable alternative to either tape **[**47]** or disk.

For some applications a disk must be used. Where the CPU must access data frequently, but not necessarily in a serial fashion, a disk is indispensable; tapes are not an alternative regardless of the price differential. Applications where many users access a central computer through remote terminals (such as an airline reservations system) are only feasible if the data for them is kept on disk (or other direct access device). This is so because every data record on a disk pack can be reached within a fraction of a second by a lightning-quick access arm.

[*985] To reach a particular record on a tape, the tape reel must be spun until the proper spot is reached. It might take as long as one minute to reach a particular data record, ages by comparison with disk speeds. However, if the records on a tape reel are sorted so that the CPU can access them seriatim, then the time required to access records in a tape file is quite acceptable. So, tapes are typically used only for data which can be accessed serially, and only disks are used when data must be accessed randomly. Still, there is some overlap.

For some serial data files either a tape or disk can be used. Because the **[**48]** cost of storing data on disks is much greater than the cost of tape storage, only with relatively short files would the user consider tape and disk to be alternatives. Most system users employ both disks and tapes.

Indications are that the incidence of actual substitution between tape and disk is not high. Neither IBM nor the PCMs considered tape prices when pricing disks or vice versa. IBM's Financial Procedures Manual calls for calculation of the impact on existing products' profits caused by introduction of a new product. If tapes and disks were reasonable alternatives, one would expect that a new tape would impact the profitability of old disk products and that new disk devices would impact the profits of existing tape products. Yet only rarely were such impact calculations made. The manual also calls for competing products to be identified. Tapes were not so identified when disks were introduced, nor were disks, when tapes were introduced.

The head of IBM's Computer Division testified that slight variations in the price of disks would not affect the demand for tapes; that variations of 40, 50 or 100 percent in price would be required. That is not the high degree of price cross-elasticity **[**49]** that is required if two products are to be considered reasonable substitutes and placed in the same market.

IBM's second argument for a broader market definition, supply substitutability, calls for the inclusion of firms with a high cross-elasticity of production. This contention would require a finding that producers are capable of quickly and easily entering the market to produce alternatives. That finding cannot be made. Producers of non-plug-compatible peripherals would have to change the interfaces in their devices to cope with IBM's CPUs. Interface changes would cost hundreds of thousands, if not millions of dollars, and might require a year to carry out. Under these circumstances it would be improper to include this potential competition in the peripherals market definition.

IBM's third attack, emphasizing the influence of systems competition, has merit. The cost of peripherals accounts for 50 to 70 percent of the total cost of a typically configured general purpose computer system. Efforts made at controlling price in the peripherals submarkets would be felt by systems market competitors because control of peripheral prices translates indirectly into control of systems prices. **[**50]** If the systems market were effectively competitive, one would expect that the pressures exerted by that competition would be sufficient to defeat attempts to wield monopoly power in a peripheral submarket. Thus, the existence of monopoly power in a peripherals market must be predicated upon a finding of monopoly power in the systems market.

Transamerica's expert economist agreed. He testified that by definition IBM could not have monopoly power in the peripherals market if it did not have monopoly power in the systems market. This Court's conclusion that IBM lacked systems market monopoly power is thus fatal to Transamerica's peripheral markets claims. Nonetheless, this inquiry will proceed under the assumption that IBM had a systems monopoly.

As with the systems market, Transamerica combined a narrow definition of the peripherals market with a distorting share measurement technique, the installed base. Installed base measurement makes even less sense here than it did in the systems market. For many years, IBM faced absolutely no competition for the tapes and disks that attached to its CPUs. As a result, **[*986]** it built a tremendous installed base of those peripherals. Even **[**51]** if the PCMs had won every sale from 1968 onward, many years would have to pass before the installed base figures would show PCM competition was significant. And the software lock-in argument rings hollow here. By definition, every product in these markets is plug-compatible; none of the competitors enjoys any advantages traceable to software lock-in.

Transamerica's mistaken failure to recognize systems competition in its market definition invalidates its share measurement data. However, the net shipments of peripherals in the market, as Transamerica has defined it, can be calculated in the same manner as net shipments were calculated for the systems market. The installed base at the end of one year is subtracted from the installed base at the end of the following year to indicate net shipments over that year. Thus, the 1969 net shipment figures were calculated by subtracting the 1968 year end installed base from the 1969 year end installed base. Years prior to 1969 are ignored. Before that time PCM competition was insignificant and IBM's net shipments were almost 100 percent of all net shipments of tapes and disks that hooked onto its CPUs.

The following two tables show the total **[**52]** net shipments of peripherals (drives and control units) for the years 1969 through 1975 as derived from the installed base data. [37] IBM's share appears both in dollars and as a percentage of total. That portion not attributable to IBM was divided amongst the PCMs. Dollar figures are shown in terms of thousands of dollars of monthly rental value.

---

[37] See defendant's exhibits 6528 and 6533.

TABLE

It would be difficult to conclude that a company possessed monopoly power in a market where its net shipments were negative at the very time it allegedly used or maintained that power. That is the case here. In 1971, IBM was losing ground to its PCM competitors. That was a relatively lean year for everyone, but more so for IBM than for its competitors. The PCMs were increasing their customer base at IBM's expense.

Even the aggregate numbers are unconvincing. IBM's mere 53.8 percent of the tape market suggests monopoly power is not present. The 77.1 percent figure in the disk market would support a monopoly finding, **[**53]** but the significance of this market share is diminished by the realization that IBM had 100 percent of the market only a few years before, and the failure of the market definition to account for systems competition means these numbers must be viewed circumspectly. These share figures are also inflated by Transamerica's inclusion into the market of products which the PCMs never duplicated, and areas of the country where PCMs chose not to compete.

[*987] Entry barriers around these markets are extraordinarily low. The market definition excluded potential suppliers (such as systems competitors and their independent peripherals sources) because they were incapable of quickly and easily supplying substitute products. But the hurdles those potential suppliers must clear are far lower than those new systems market entrants face. Firms already producing peripherals have the production facilities, the trained staffs, and the research and development expertise needed; all that remains for them is to study the IBM interface and duplicate it. Two of the most prominent systems competitors, Univac and CDC, have done just that. Both manufacture peripherals for their own computer systems, and **[**54]** also manufacture IBM plug-compatible peripherals that compete in the markets at issue here. And many PCMs market their wares to other systems manufacturers as well as to IBM end-users. While the cost, in time and money, of developing an interface is sufficient to exclude systems manufacturers and independents from the market definition, it does not provide a formidable entry barrier around the market as defined.

The entry barriers faced by completely new entrants into the peripherals market have already been discussed in relation to the systems market. Those barriers are low, as is demonstrated by the history of entry into peripherals manufacture. PCMs, attracted by IBM's high profits on its peripherals, stormed these markets and flooded them with cheaper copies of the IBM gear. IBM, unable to maintain its relatively high price, was forced to react with lower prices and improved products. This picture is consistent with the dynamics of an effectively competitive market, not a monopolized one.

This Court will not be misled by the share figures propounded by Transamerica. Those calculations ignore the significant constraint of systems competition, and measure the markets as an aggregation **[**55]** of all peripherals in use, when there is no reason for doing so. Accurate share figures cannot be determined from this record, but the data which can be rescued indicates that IBM did not have market control, and that its share was not dominant. Entry barriers are low, and entry has been easy, frequent, and successful. Even if a systems monopoly were not a prerequisite to peripheral market control, or even if IBM had a systems monopoly, this Court would find, as it does here, that Transamerica has failed to prove that IBM had monopoly power in either the tape or the disk market.

IV.

PRICING CONDUCT

A defendant not in possession of monopoly power may nonetheless incur antitrust liability by attempting to monopolize. Transamerica alleged that IBM attempted to monopolize by its pricing conduct, by its design conduct, and by its long-term leases. IBM's conduct will be examined first under the assumption that IBM did possess monopoly power. Following that, the conduct that would have violated the monopolization provision of *Section 2* will be re-examined to determine whether, in light of the absence of monopoly power, an attempt to monopolize has been proved.

IBM responded to the lower **[**56]** prices and increased successes of the PCMs by offering some of its own products at substantially reduced prices. Transamerica claims that those prices were predatory and violated the antitrust laws.

The concept that prices can be used as a means of acquiring or maintaining monopoly power is not new; it has long been recognized that financially powerful firms might coerce or destroy their rivals by pricing at unremunerative levels. Attempts to distinguish between predatory pricing and legal price behavior, by comparing defendant's costs with its prices, are new. In an article published in 1975, Professors Areeda and Turner suggested that pricing conduct should be conclusively presumed legal if price levels exceeded either defendant's average variable cost or defendant's short-run **[*988]** marginal cost. [38] Reaction to the Areeda and Turner proposal has been mixed. Courts have embraced it; academicians have criticized and rejected it.

[57]** An understanding of the relationship between these cost measures is critical to an appreciation of the effect that imposition of the Areeda and Turner rule would have. All three kinds of cost (average cost, average variable cost, and marginal cost) will at first decline, then later increase as a firm's output is expanded. Average cost (which includes both fixed and variable costs) will always be greater than average variable cost (which only includes variable costs). At low output levels, marginal cost will be less than both of the other cost measures. As output is increased, marginal cost will rise until at some point it will be greater than average variable cost (but less than average cost). If output is increased still further, marginal cost will increase to the point that it exceeds both average cost and average variable cost. [39]

A monopolist has the power to control **[**58]** market price by varying the quantity of goods it offers for sale. As that quantity is varied, the monopolists' marginal, average variable, and average cost will also vary. If market demand would permit it, [40] the monopolist would have the following options: 1) setting a market price in excess of both average cost and marginal cost; 2) setting a market price below average cost but greater than marginal cost; or 3) setting a market price below both average cost and marginal cost. Areeda and Turner would conclusively presume the monopolist's conduct legal if it exercised option 1) or option 2), and would conclusively presume conduct illegal only if option 3) was chosen.

IBM argues that the Areeda and Turner rule is the law of the Ninth Circuit and is binding upon this Court. Transamerica maintains that prior cases are distinguishable, and that a monopolists' pricing is illegal **[**59]** if it sets a market price below the point at which it would maximize profits if the purpose and effects of that action are to unnecessarily exclude competition. Neither standard is appropriate in this case. If a monopolist, in response to actual or threatened entry into a previously controlled market, reduces prices below its full cost, there are strong implications of conduct that unreasonably restricts competition. Therefore, and for reasons hereinafter stated, the IBM conduct will be judged against a "full cost" standard.

A. Predatory Pricing Case Law.

In 1976, the Ninth Circuit Court of Appeals, in Hanson v. Shell Oil Co. [41] ("Hanson "), held that a plaintiff's failure to show that a defendant's prices were below its marginal or average variable costs was a failure as a matter of law to present a Prima facie predatory pricing case under *Section 2*. One year later, in Janich Bros., Inc. v. American Distilling Co. [42] ("Janich "), the Ninth Circuit, relying heavily on Areeda and Turner, upheld a directed verdict against a plaintiff whose proof suffered from the same insufficiency. If those cases are binding upon this Court, in this case,

---

[38] Areeda and Turner, Predatory Pricing and Related Practices Under *Section 2* of the Sherman Act, 88 Harv.L.Rev. 697 (1975) ("Areeda and Turner"). Areeda and Turner recognized that marginal cost data are typically unavailable, and suggested that average variable cost could be used as a surrogate. Id., at 716-18. The terminology and definitions employed here are the same as used by Areeda and Turner. See id., at 700-03.

[39] For a diagrammatic representation of the relationship between these cost measures and the quantity of output, See id., at 701 n. 14.

[40] The monopolist would only have these options if the demand curve intersected the average cost curve to the left of minimum average cost.

[41] *541 F.2d 1352 (9th Cir. 1976)*, Cert. denied, ***429 U.S. 1074, 97 S. Ct. 813, 50 L. Ed. 2d 792 (1977)***.

[42] *570 F.2d 848 (9th Cir. 1977)*, Cert. denied, ***439 U.S. 829, 99 S. Ct. 103, 58 L. Ed. 2d 122 (1978)***.

then, as IBM suggests, Transamerica's predatory **[**60]** pricing allegations must fall as a matter of law, for there was no evidence of **[*989]** any IBM price below marginal or average variable costs.

Both Hanson and Janich involved non-monopolists, charged with attempting to monopolize. In attempt cases, a plaintiff must establish specific intent to control prices or destroy competition, predatory or anticompetitive conduct, and dangerous probability of success. But it may be misleading to list those three as separate and independent elements. In fact, there is a great deal of interrelation between them. Specific intent may be established by direct evidence, such as memos or statements made by corporate officers, or alternatively, specific intent can be inferred from the defendant's conduct. [43] Dangerous probability can be shown by proof of substantial **[**61]** power in a relevant market, or it can be inferred from conduct which independently violates Section 1 and is of a kind "clearly threatening to competition or clearly exclusionary", or it can be inferred from specific intent. [44] In extreme cases only conduct need be proven directly; specific intent can be inferred from the conduct and dangerous probability can be inferred from the specific intent. [45]

A firm that prices its product at levels above marginal or average variable cost is not necessarily engaged in clearly exclusionary conduct. A firm that prices its products below those levels is. These standards then, are appropriate for judging the pricing conduct of a firm charged with attempting to monopolize where no independent evidence of specific intent and no independent evidence of dangerous probability (relevant market proof) is admitted. Hanson and Janich **[**62]** were such cases, and the application of very strict standards to plaintiff's proof was proper in those circumstances.

However, less egregious conduct may violate *Section 2* if engaged in by a monopolist [46] or by one attempting to monopolize if there is also direct proof of specific intent or direct proof of a dangerous probability of success. [47] Hanson and Janich are deemed therefore to leave open the appropriate standards to apply to cases with different facts.

The same is true of CalComp. [48] IBM thinks CalComp Foreclosed any further inquiry by adopting the Areeda and Turner marginal cost standard. CalComp dealt with the pricing conduct of a monopolist and decided that if prices were reasonable they did not violate the law, and that price reductions which responded to lower prices of competitors, but still left defendant's products "substantially profitable", were reasonable. [49] However, CalComp carefully limited its pronouncements to the **[**63]** facts of the case before it. The court recognized that on a different showing, even profitable prices might violate *Section 2* if set by the monopolist to discourage new entrants (limit pricing), and also held out the possibility that other aspects of a defendant's conduct might make prices in excess of marginal cost predatory. [50] Those "refinements" are at odds with the fundamentals of the Areeda and Turner analysis, where it was argued that the prices should be conclusively presumed to be legal if they exceeded marginal or average variable cost. [51]

It does not seem warranted to conclude that the CalComp opinion mandates adoption of a conclusion it flatly contradicts.

B. Prices Above Average Cost Should be Conclusively Presumed Legal.

Theoretical "perfect" competition does not contemplate stasis. Economists realize **[*990]** that the prospects of supra-normal profits will induce entrepreneurs **[**64]** and innovators to supply new markets or invent new products. For a time, the innovator will be the market's sole supplier, in possession of monopoly power, and able to charge a profit maximizing price, with returns well in excess of "normal" profits. This is the reward that accrues to those whose ventures into new fields are successful.

Charging a monopoly price and earning monopoly profits is in no way anticompetitive. To the contrary, it can provide the competitive incentive that keeps an economy dynamic and innovative. But the monopoly power that accrues to the innovator is not expected to be permanent. High profits will attract imitators. Initially, the imitators will price their products incrementally below the innovators', sufficiently low to attract customers for the goods they can produce, sufficiently high to preserve as much profit to themselves as possible. Eventually the market's supra-normal profits will attract enough new entrants so that the price will be driven down to the point where all suppliers are covering their costs and enjoying no more than a normal profit on their investment (price will equal average cost). This state of perfect competition will continue until **[**65]** another innovator starts the innovation-monopoly-imitator-competition cycle over again.

However, the monopolist may seek to disrupt that competitive process in order to preserve to itself the benefits of monopoly. For instance, when faced with competition, the monopolist might choose to price so low that the new entrant, no matter how efficient, is driven out of business. Once that is accomplished, the monopolist can return to profit maximization and supra-normal profits. Extinguishing the competitive threat in that fashion also serves to raise entry barriers. Potential entrants will be on notice that even if they have a good product, efficiently produced and marketed, the monopolist will not allow them to sell at a price which returns a profit.

The great problem in fixing a legal standard by which pricing conduct should be measured is that it is extremely difficult to distinguish between a monopolist's price reduction that is a normal, expected component of the dynamic competitive process, and the predatory, undesirable conduct just described. If the law is overzealous in guarding against predatory pricing, it may well inhibit the competitive dynamics it seeks to promote.

It is **[**66]** tempting to consider the monopolist's intent in order to distinguish between pro and anticompetitive price reductions. But where is the line between illegal, undesirable, "predatory intent" and the legal, desirable intent to prevail in the competitive struggle? Appropriately low prices are to be encouraged, not discouraged. The punitive impact of the antitrust laws must not be permitted to compel high prices. Unless some objective, understandable standard is established for the guidance of businessmen, they must either forego competitive price decreases or risk punitive damages that might turn on some careless word once spoken in a board room. [52] Businessmen must have notice of what is violative of the law. A test based strictly on intent would not serve that goal.

The first **[**67]** issue to be addressed in adopting a cost-based test is whether any range of pricing conduct should be beyond the reach of the law. A "free zone" of price activity would preserve competitive incentives, but could also sanction undesirable conduct. If monopolists are allowed with impunity to lower price to a level equal to their average cost, then the monopolist might lower its price from the profit maximizing level to a level competitors cannot meet in order to discourage entry and preserve the monopoly (limit pricing). Or, entry could be defeated and discouraged by temporary reductions to average cost levels, followed by a return to monopoly pricing once the threat had been vanquished. In **[*991]** either case, the competitive process would be thwarted, and the monopolist could preserve its status without risking antitrust liability.

---

[52] See Areeda and Turner, Supra n. 38, at 699; R. Posner, ***Antitrust Law***: An Economic Perspective 189-90 (1976) ("Posner"); Williamson, Predatory Pricing: A Strategic and Welfare Analysis, 87 Yale L.J. 284, 287-288 (1977) ("Williamson").

Areeda and Turner considered these possibilities, but concluded, as this Court does, that preservation of incentives is more important than the minimal threat to competition presented by a free zone above average cost. Only less efficient competitors would be eliminated by price manipulations above the average cost level. Competitors who are as efficient **[**68]** as the monopolist will continue to make at least normal profits, while the more efficient will profit more. [53]

It would be all but impossible to distinguish between above cost limit pricing conduct and a monopolist's pro-competitive reaction to lower priced competitors. [54] One external characteristic is common to both cases, a lowered price. Any attempt to attach liability to the one will surely inhibit the indistinguishable other.

Even a monopolist is permitted to compete in the battle for trade. [55] And the preservation of competitive incentives, even for that monopolist, is deemed such an important consideration that monopolization is condoned where condemnation would provide a disincentive to compete. [56] Protection of relatively inefficient competitors **[**69]** is a lesser consideration. [57] Monopolists can compete by being more efficient than their rivals, [58] and the most significant manifestation of that efficiency is a lower price. If the monopoly is attained or preserved because the monopolist is profitable at price levels where others are not, so be it. Lower prices and increased efficiency are to be fostered. This Court agrees with Areeda and Turner that price reductions which result in prices that exceed defendant's average cost should be conclusively presumed legal. [59]

[70]** C. Prices Below Average Cost Should not be Conclusively Presumed Legal.

Efficiency is no longer the sole determinant of survival once price is permitted to drop below the monopolists' average cost; cash reserves become paramount. If price is insufficient to cover average cost, the monopolist will be losing money, less efficient rivals will be losing money, equally efficient rivals will be losing money, and quite possibly, even More efficient rivals will be losing money. Average cost is the breakeven price level. Competitors with average costs equal to the monopolist's, break even when the monopolist does. Competitors with average costs lower than the monopolist's are more efficient and are making a profit when the monopolist is just breaking even. If a monopolist is permitted to set price as low as marginal cost with impunity, it can drive from the market all competitors whose average costs exceed the monopolist's marginal costs unless their staying power is as great as the monopolist's.

The difference between these cost levels can be quite significant. Evidence in the case at bar suggests IBM's marginal costs or average variable costs might be as little as 50 percent of their average **[**71]** costs. If that is so, then IBM could destroy rivals who are twice as efficient (their average costs are one-half of IBM's) simply because IBM had a bigger bankroll, and fear no antitrust liability under the Areeda and Turner rule.

58 *Otter Tail Power Co. v. United States, 410 U.S. 366, 380, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*; *United Shoe, supra n. 13, at 342*.

59 See also *International Air Ind., Inc. v. American Excelsior Co., 517 F.2d 714, 723 (5th Cir. 1975)*, Cert. denied, ***424 U.S. 943, 96 S. Ct. 1411, 47 L. Ed. 2d 349 (1976)***; *Weber v. Wynne, 431 F. Supp. 1048, 1059 (D.N.J.1977)*.

Courts which have adopted the Areeda and Turner rule have not always considered **[*992]** its potential for abuse. In Int'l Air Ind., Inc. v. American Excelsior Co., [60] the court recognized that equally efficient rivals could be driven out but incorrectly assumed that more efficient competitors were safe. [61] The court in Weber v. Wynne [62] acknowledged the threat to equally efficient firms, but said nothing of the fate of the more efficient. [63] The Court in Hanson thought only the less efficient were endangered:

> "If its prices were above its (marginal or average variable) costs, and nevertheless Shell's did drive Hanson out of business, this can only be because Hanson was so inefficient that at prices at which Shell could make a reasonable profit he could not." ([64])

And finally, CalComp perpetuated that misconception in this Circuit:

> "The thrust of this analysis is that price reductions up to the point of marginal cost are consistent with competition on the merits, since in this case only less efficient firms will be disadvantaged, while a firm pricing below marginal cost by definition incurs losses, so that competition on the basis of efficiency in this situation is frustrated." ([65])

[73]** Average cost is the point to which the normal forces of competition will tend to lower price. To repeat what is self-evident, if a firm sells below its average cost it is incurring a loss, equally efficient firms are incurring a loss, and more efficient firms (if their average cost is lower than the monopolist's average cost but greater than the price) will also be incurring a loss. Only firms able to withstand losses for as long as the monopolist decides to inflict them will survive, others will perish. If a monopolist is permitted to set a price below its average cost, competition on the basis of efficiency is frustrated, and competition on the basis of wealth replaces it.

Areeda and Turner have opted to place a potent weapon in the hands of the monopolist. Their reasons for doing so should be carefully examined. They have identified four major reasons supporting their position: [66]

(1) it will deter frivolous suits;

[74]** (2) a price floor above marginal cost will tend to preserve inefficient rivals;

(3) short-run welfare is maximized by pricing at marginal cost; and

(4) even if long-run welfare is not maximized, long-run consequences are too speculative to incorporate into a legal rule.

The first justification smacks of overkill. Surely it is not necessary to go so far as to allow a monopolist to destroy its competitors in order to protect that monopolist's incentive to price competitively. A prophylactic rule is required in order to preserve incentives, but sanctioning all price levels above average cost serves this purpose as well. [67]

---

[60] *517 F.2d 714 (5th Cir. 1975)*, Cert. denied, ***424 U.S. 943, 96 S. Ct. 1411, 47 L. Ed. 2d 349 (1976)***.

[63] *Id., at 1060 n. 16*.

[64] Hanson, supra n. 41, at 1358.

[65] CalComp, supra n. 4, at 734. Note that the court in *Murphy Tugboat Co. v. Crowley, 454 F. Supp. 847 (N.D.Cal.1978)* also appeared confused by the cost terminology: " . . . price above full costs, i. e., above the level of average variable costs to which legitimate competition would tend to lower it." *Id., at 852*. Full cost (average cost) is the level to which legitimate competition would tend to lower price. Average variable costs are always lower.

[66] Areeda and Turner, Williamson on Predatory Pricing, 87 Yale L.J. 1337; 1339 (1978).

Areeda and Turner's second reason is interesting, but highly questionable. Apparently, they feel it is the monopolist's function to destroy less efficient competition, [68] and that survival of inefficient firms is **[*993]** undesirable. Even if there is some **[**75]** value in the elimination of competitors who are less efficient than the monopolist, this reasoning overlooks the tendency of a price floor at marginal cost to destroy equally efficient and more efficient rivals unless they have pockets as deep as the monopolist's.

The welfare maximization argument is really the most significant. What is meant is simply that a monopolist with excess capacity, i. e., average cost exceeds marginal cost, will be making more goods available to the consumer at lower prices if allowed to price as low as marginal cost than the monopolist would if forced to utilize less of its capacity by producing less and pricing in excess of average cost. Social resources are wasted because there is a divergence between the cost of the incremental output (marginal cost) and the value of that output **[**76]** to consumers. And, since excess capacity exists, it would be a waste of social resources to attract new entrants who would construct even more facilities. [69]

That short-run welfare maximization argument is short-sighted. While it is true that resources are most efficiently utilized and that consumers benefit when the monopolist prices at marginal cost, such beneficence cannot be expected to continue. Once the competitive threat has been extinguished, the monopolist will return to higher prices and profits. When that happens, society will suffer a greater welfare loss. Fewer goods will be produced, efficient capacity will be idled, and consumers will be paying much more than incremental production costs. Professor Scherer recognized that the inclination of monopolies to maximize their profits at the consumers' expense would mean that welfare would be maximized if the monopolist's price reduction was checked at some point above marginal cost. But he was unable **[**77]** to quantify precisely a limitation on price that would maximize long run welfare, i. e., a price rule that would insure that the discounted welfare loss from the anticipated future price gouge would be most offset by the temporary benefits of lower prices. [70] Professor Williamson is also suspicious of Areeda and Turner's approach. In his opinion negligible benefits would flow from temporary price cuts to the marginal cost level, if followed by a return to monopoly pricing. [71]

Areeda and Turner do not argue with Scherer's long-run welfare analysis. They acknowledge that the net long-run consequences of marginal cost pricing might be adverse because of its exclusionary effect, but reject consideration of long-run effects because they are difficult to determine (their fourth reason for adopting a marginal cost standard). [72] Indeed, the welfare maximization **[**78]** problem is complex. In addition to the return to monopoly prices scenario, Scherer described several other cases, some of which would find welfare maximized with price limitations above marginal cost, and some with price limitations below that point. [73] However, ease of application is a poor argument for adopting a rule that admittedly ignores important considerations of economic efficiency, especially when the main justification for that rule is economic efficiency. [74]

In any event, the marginal cost test is not easy to apply either. In fact it is frequently impossible to apply.

[74] See Schmalensee, Supra n. 67, at 903.

It is almost too easy to criticize rule proposals in this area as administratively complex. The initial Areeda and Turner article has engendered much academic discussion and several counter-proposals. It seems that every attempt to formulate rules **[**79]** has been criticized by proponents of other rules as an unworkable solution. Areeda and Turner fare no better. Marginal cost is not **[*994]** a cost recognized by accountants. It is a figment of the economist's imagination. It is not recognized in the books of account, and thus, it is unlikely that any evidence of marginal cost could be easily developed. Areeda and Turner recognized that in their initial article, and suggested average variable cost could be used as a proxy, [75] and that in situations of strained capacity an average cost test could be applied. [76] But they seem to have retreated from that position of late, perhaps as a result of pointed criticism of the logic and feasibility of average cost and average variable cost tests. [77] They now emphasize that theirs is a short-run marginal cost standard, and that the other measures are simply approximations of marginal cost. If plaintiff can show that marginal cost is significantly higher than average cost, or if defendant fails to show that average variable cost is not significantly below marginal cost, then prices in excess of the surrogate standard are not safe under their rule. [78] The burden is always on someone to offer **[**80]** marginal cost evidence, but the data is not there.

Areeda and Turner's justifications are not convincing. They argue that a marginal cost test will optimize social welfare. Then they admit that it will not. They argue that a marginal cost test is easier to apply then a long-run welfare maximizing test, then they suggest surrogates because marginal cost data is impossible to come by. But even if their theory had merit, if all the world's economists were of one voice, and like Areeda and Turner, placed their faith in the monopolist to maximize social welfare by eliminating competitors from crowded industries through temporary provision of more and lower priced goods, the Congress and the courts **[**81]** have already placed their faith elsewhere. The goal of welfare maximization through proper resource allocation is to be accomplished by a system of effective competition, not by reliance on the presumed beneficence of a monopolist. [79] In the words of Justice Black, the Sherman Act " . . . rests on the premise that the unrestrained interaction of competitive forces will yield the best allocation of our economic resources, the lowest prices, the highest quality and the greatest material progress . . ." [80] The economic rationale behind the act cannot be overcome by arguments that the monopolist has provided economic benefits. [81]

More than just economic considerations impelled the Congress to adopt competition as the Acts' unequivocal policy. **[**82]** Chief Justice Warren said:

> ". . . we cannot fail to recognize Congress' desire to promote competition through the protection of viable, small, locally owned businesses. Congress appreciated that occasional higher costs and prices might result from the maintenance of fragmented industries and markets. It resolved these competing considerations in favor of decentralization." ([82])

Economic considerations aside, justifiable apprehension of excessive economic power concentrations underlie the law's aversion to monopolies. [83]

[*995] Areeda and Turner have made a policy judgment. The economic analysis **[**83]** used to justify that judgment is incomplete, and the judgment itself stands contradicted by the economic, political, and social policies of the Sherman Act.

A conclusive presumption of the legality of an unprofitable low price, merely because it is above marginal cost, a cost which is all but incapable of proof, would truly be a "defendant's paradise." [84] This Court rejects it.

D. Prices Below Average Cost are Illegal if They are Unreasonable.

There are no simple bright line tests that are universally applicable. Williamson proposes a complex set of "Per-se " rules, a different rule to be applied depending upon whether the dominant firm is reacting to new entrants or already established firms, whether a short, long or intermediate-run is involved, and whether the demand function is normal or conditions of chronic excess supply are found. [85] Scherer calls for evaluation of the many criteria that would affect long-run welfare maximization, examined in the light of the monopolist's **[**84]** intent and the structural consequences of its pricing behavior. [86]

Professor Schmalensee recently attempted to apply the Williamson rules to the facts of a monopolization case heard before the Federal Trade Commission, but found them imprecise, difficult to apply, and based on an economic model probably at variance with real world conditions and certainly at variance with the facts of the case he discussed. [87] Having already rejected Areeda and Turner's approach as incapable of being "defensibly applied to all, or even most, cases," Schmalensee concluded that Scherer's rule of reason analysis was the only economically defensible policy choice and that an average cost test could be employed to dismiss patently groundless charges of predation. [88]

[85]** This approach is not wholly without precedent. In a thoughtful concurring opinion to the case discussed by Schmalensee, Commissioner Pitofsky distinguished Ninth Circuit cases and applied the same rule. [89] The average cost standard adopted here also finds support in several trade rules promulgated by the Federal Trade Commission, [90] in state statutes prohibiting below cost sales, [91] **[**86]** in a predatory pricing rule propounded by Professor Posner, [92] in a recommendation by the National Commission for the Review of Antitrust Laws and Procedures that the marginal cost standard be abandoned in favor of a more flexible analytical approach, [93] and

finally by the Supreme Court's holding in Utah Pie Co. v. Continental Baking [94] that a jury could infer price cuts were predatory if price was below average cost. [95]

[*996] If the monopolist chooses to price below average cost, something unusual is taking place. A decision has been made to sell goods at a loss, and such activity is worthy of investigation. It may be a predatory act with the design and effect of starving out competitors, or it may in some way be justified.

Prices below average cost would be reasonable if the monopolist was merely liquidating excess, **[**87]** perishable, or obsolete merchandise. [96] Prices below average cost would be warranted if shrinking demand forced the monopolist to minimize its losses by selling at the best price-cost relationship available to it, [97] or where the industry suffers from chronic excess capacity. [98] And the same might be true of promotional pricing, meeting competitors' prices, or even occasional price wars, if carried out under appropriate circumstances. [99] Intent evidence can prove helpful here. The monopolist's own evaluation of the situation, whether it thought it was cutting losses or cutting throats, can help to clarify the nature of the acts undertaken.

[88]** A monopolist's prices should be judged according to whether or not they are reasonable, and prices above the monopolist's average cost should be Per se reasonable. That standard will be applied to the facts of this case.

E. IBM's Pricing Conduct.

IBM did not simply reduce the prices of its existing products, instead it responded to PCM competition by introducing several "new" products, all of which were, to some degree, repackaged versions of prior offerings. By offering the new products at lower prices, while maintaining higher prices on the older versions, IBM managed to avoid the disastrous effect an across-the-board price reduction would have had on revenues from installed machines, and yet still had a vehicle with which to challenge the PCMs. It is the prices of these new products that Transamerica claims were predatory.

In 1964 IBM introduced a disk drive known as the 2311. In 1965 an improved version, the 2314, was announced. At first, 2314-type disks were only available in a package of eight disks or "spindles" (plus one spindle as a spare). Later, IBM offered a one spindle version (the 2312), a two spindle version (the 2318), and a four spindle version (the 2313), all **[**89]** of which could be connected to the CPU through a control unit (the 2314). The functional characteristics (access time, capacity, and data transfer rate) of all versions were practically identical, and all are known as "2314-type disks. The PCMs also marketed 2314-type disks. Most PCMs offered some functional improvements (principally a reduced access time), all offered only single spindle versions, and all offered lower prices than IBM.

In September of 1970, IBM announced a new computer system, the System/370, Model 3 70/145 . At the same time, a three-spindle version of the 2314-type disks was announced for use on that new system. This new version

was known as the 2319A and was code-named "Mallard." It connected directly to the System/370 Model 145 CPU (and later to the System/370-135) by means of an integrated file adapter ("IFA") which eliminated the need for a control unit. The 2319A was available at a monthly rental of $ 1,000, a price substantially less than IBM's one, two and four **[*997]** spindle versions (if comparison is made on a per spindle basis, i. e., monthly rental divided by number of spindles), and a price Transamerica claims was predatory.

Three months after **[**90]** the 2319 announcement, in December of 1970, IBM announced a three-spindle version 2314 for use on the older System/360 CPUs. This was known as the 2319B. It attached to the 360 CPU through a control unit (2314B), and a channel. At the same time IBM announced the 2319A2, a second set of three spindles for attachment on the 3 70/145 CPU behind the first set (the 2319A). The 2319B and the 2319A2 were both priced at $ 1,000 (monthly rental). Transamerica claims that price was predatory.

In July of 1971, still another three-spindle 2314-type was announced: the 2319A3. Unlike the other versions, the 2319A3 (code named "Zoom") had its own power supply. It was to be used exclusively on the 3 70/135 CPU, where power constraints had previously limited configurations to a maximum of five spindles. Zoom extended that maximum to eight. Because of the extra power equipment, the 2319A3 was priced at $ 1050 monthly rental, slightly higher than the other 2319s. Transamerica also claims this price was predatory.

In 1964 and 1965, IMB announced various models of the 2401-type tape drives and 2803 control units. Improved tape drives, the 2320s, were announced in 1968. In November of 1970, IBM announced **[**91]** an improved control unit, the 3803, and three new tape drives to go with it, the 3420 Models 3, 5 and 7. The functional characteristics of the new tapes (data transfer rate, tape speed, and tape density) were practically identical with those of the 2420. The combined tape program was code-named "Aspen." Transamerica claims that the Aspen prices were predatory.

At the same time as the Aspen announcement, November of 1970, IBM announced a new model 2401 tape drive, the 2401 Model 8. Two control units for that model, the 2803 Model 3 and the 2804 Model 3, were also announced. This program was code-named "Mandan." The 2401 Model 8 was almost identical to the seven-track version of the 2401 Model 2, but the price was substantially lower. Transamerica claims that the Mandan prices were predatory.

IBM analyzed the financial aspects of each of these programs (the 2319A, the 2319B/A2, the 2319A3, Aspen, and Mandan) prior to announcement in order to predict the costs, revenues, and profits that could be expected. A common procedure was followed in all pre-announcement financial analyses. The Product Manager, an employee of the engineering division, identified the forecast assumptions. These **[**92]** included a description of the product, competing products, follow-on products, delivery schedules, etc. The forecast assumptions were then used to project the number of units that would be sold and leased at various price levels (the demand function), and from this the program revenue at those prices could be calculated. Direct costs (those that could be readily identified with the product in question) were estimated by the manufacturing division. Indirect costs were assigned to the products through three apportionment methods. By allocating a portion of the indirect costs (such as corporate overhead) to each product, as well as the direct costs, IBM followed a full-cost philosophy of financial analysis and hoped thereby to be able to predict a program's profitability. Full costs, direct plus indirect, were subtracted from revenues, to give predicted program profits.

Each of the product programs at issue here was expected at announcement to return substantial profits to IBM. Zoom (the 2319A3), by far the smallest program, was projected to return a $ 900,000 profit, or 4.5 percent of revenue; Mandan was expected to produce $ 29.2 million in profits, or 33.6 percent of revenue; Aspen **[**93]** was projected to bring in $ 473.3 million in profits, or 26 percent of revenue; the 2319B/A2 program was predicted to bring in a $ 71.6 million profit, or 31.5 percent of revenue; and finally, the 2319A was projected to bring in $ 55.2 million in profits, 31 percent of its revenues. It is only through the application of several "adjustments" to the IBM announcement **[*998]** financial analyses that Transamerica is able to claim that any of the prices at issue here were below average cost. Each of the adjustments Transamerica suggested is discussed below.

1. The Revenue Apportionment Adjustment.

As mentioned above, IBM uses three apportionment techniques for determining what indirect costs a particular product or program should bear. The indirect costs that are most closely associated with engineering are apportioned among products according to the relationship between that product's direct engineering costs, and total direct engineering cost. Similarly, indirect costs that are associated with production are allocated to the ratio between the product's direct production costs and total direct production costs. Finally, indirect costs that are not otherwise apportionable, such as **[**94]** marketing, general and administrative expenses, are apportioned to products according to the relationship between that product's revenues and total revenues.

IBM allocates over 50 percent of a product's costs through the revenue apportionment method. Transamerica complains that this method provides a monopolist with too much flexibility. They say that where a price cut is involved it permits the monopolist to drastically reduce price and still not be pricing below cost because reduction in price means a reduction in revenue and thus a reduction in revenue-apportioned costs. When revenue is reduced on one product, some of the costs previously associated with it are automatically transferred to other products. Transamerica characterizes all the products at issue here as disguised price cuts: The 2319s as disguised price cut versions of the 2314; Mandan as a disguised price cut on 2401 Model 2; and Aspen as a disguised price cut on the 2420.

Through its expert accountant Peterson, Transamerica invokes "generally accepted cost accounting principles," and adjusts the revenue-apportioned costs assigned to each of the products at issue. Assuming that he was in fact dealing with price cuts, **[**95]** Peterson increased each new program's revenue-apportioned costs by multiplying the costs assigned at its announcement by the ratio between the "old" price and the lower "new" price.

The basis for Mr. Peterson's adjustment is suspect. The phrase "generally accepted cost accounting principles" does not appear in accounting literature. It, like the adjustment it supposedly requires, appears to have been invented for purposes of this lawsuit.

The adjustment is predicated on the existence of a price cut when, at least in some circumstances, different products are clearly involved. And, it assumes that the cost allocated to the product at the old price was somehow "correct" and should be maintained, when in fact it is precisely the inability to associate these expenses with any particular product that makes an apportionment method necessary. It would be equally logical (or illogical) to assume the previously assigned costs were too large and the new ones are "correct."

Revenue apportionment is a generally accepted and commonly used method of indirect cost allocation. IBM used it consistently long before making the cost analyses at issue here. Peterson's adjustment would abandon that consistency, **[**96]** and with it any assurance that full costs are recovered. Increasing the costs assigned to one product without somehow decreasing the costs that other products must bear would lead to an over-recovery of costs, and make the full-cost recovery rationale and program profit predictions meaningless.

All methods of indirect cost recovery are arbitrary and flawed in some respects. The flexibility of revenue apportionment is apparent, yet this Court will not attempt to "correct" that characteristic by mandating the use of a patch work system based on one accountant's views of the facts of this particular case. To do so would not only be bad accounting, it would be bad law. Businessmen would have no notice of what was required to be done if arbitrary adjustments were allowed to be applied after the fact to their reasonable and consistent cost accounting.

[*999] This is not to suggest that under other circumstances cost accounting adjustments might not be warranted. Where a defendant itself abandons consistency in attempts to circumvent the law, adjustments might be appropriate. That, however, is not the case here. The revenue apportionment adjustment is rejected.

2. The Manufacturing **[**97]** Cost Adjustments.

All the 2319 programs were reuse programs. For instance, 80 percent of the 2319As were not newly built, but were built by reconditioning and slightly altering used 2313s that had come off rent. Mandan was a total reuse program; all the units involved were reused, off rent, tape drives and control units. In the announced financial analyses for these products, IBM assigned a full manufacturing cost to those units that were to be newly built, but the reused units were costed at the cost of conversion efforts plus their remaining undepreciated net book value. Since IBM uses an accelerated depreciation technique (sum of the years' digits), and since the 2313s had already been depreciated for three years (of a total four year depreciation life), the net book value used to represent the manufacturing cost of the 2319s was only 10 percent of the cost of building them new. With Mandan, the reused units were even older, and, since their net book value was insignificant, the only manufacturing cost reflected was the minor expense involved in reworking the units.

Peterson testified that this was in conflict with the "benefit principle", which he termed the single most important **[**98]** "generally accepted cost accounting principle." He suggested two alternative adjustments. The first would simply account for all machines at the cost of building them new, whether that was in fact done or whether they were "retreads." The second, more complex, adjustment would require the reworked product's cost accounting to bear a manufacturing cost equal to the new cost multiplied by the ratio between the expected rental life of the new product and the total lives of the old and the new products. In effect, the second adjustment would be the same as using net book value, had IBM depreciated over the total life of both products using a straight-line method.

IBM's Financial Procedures Manual calls for using new cost in some situations, scrap value in others, and permits net book value to be used in yet other cases. IBM argues that the manual would have permitted the use of scrap value and so their use of net book value was conservative. Transamerica interprets the manual differently, claiming it mandates the use of new cost. Mr. Peterson contradicted that. He testified that IBM complied with the manual in its handling of reused products. This Court agrees with Mr. Peterson, and finds **[**99]** that IBM followed its cost accounting procedures consistently. Until some cost accounting principles become generally accepted (and others generally rejected), it seems that a reasonable procedure, consistently followed, should not be vulnerable to subsequent manipulations. IBM's depreciation method is reasonable and generally accepted. The cost accounting for the original product reflected its full cost, and use of net book value is a reasonable means of apportioning some of the cost to the new product. Deviations from consistent procedures in this area would cause the same inconsistencies as would be created by the revenue apportionment adjustment. Accordingly, this Court rejects the manufacturing cost adjustments.

3. Shorter Rental Lives.

The programs at issue here were predominantly leasing programs. Few units were expected to be sold. Consequently, the length of time forecasters predict units to be producing rental revenues, the average rental life, is a critical factor in determining a program's profit. IBM predicted a 48 month life for the 2319A, 50 months for the 2319B/A2, and 58 months for Mandan. No witness ever opined that IBM should have chosen shorter lives, but Peterson **[**100]** produced alternative profit calculations based upon much shorter (and therefore less profitable) **[*1000]** lives for these products. The apparent inference was that the lives chosen at announcement were unreasonably long, and that the shorter lives should have been substituted.

This Court refuses to make that inference. Although the alternative lives presented were found in IBM documents, Transamerica has invariably chosen the shortest lives reflected in any IBM document while ignoring longer lives for other products in the same document, and ignoring longer lives for the same product in other documents. The shorter lives all appear in documents dated well after announcement and can be explained in part by the intervention of unexpected increased PCM successes, in part by the intervening funding of impacting IBM programs, and in part by the unreliable nature of the documents themselves, at least as far as the reliability of the lives contained therein is concerned. There is no evidence that anyone in IBM contemplated shorter lives at any time prior to the announcement dates. One of Transamerica's witnesses, a man experienced in the financial aspects of computer leasing, testified **[**101]** that he thought the most reliable estimate of life would be that made by IBM, and that he didn't know how he could go back in hindsight and assign a different life. Absent some evidence that shorter lives were, in fact, required, this Court must decline to substitute shorter rental lives.

4. Cost of Capital Adjustment.

As already indicated, this Court would consider prices to be Per-se reasonable only if they exceeded average cost, where average cost is defined to include a reasonable return on capital invested. If a company is thinly capitalized, most of these capital costs will be reflected as interest on the books of account. Conversely, if a company depends upon equity capital to fund its programs, no interest expense will appear, and the opportunity cost of the capital invested in the program will have to be estimated and imputed. Unless all capital costs are in some way included in the cost-price equations, a Per-se sanctioning of price in excess of average cost would favor strong firms, able to use equity capital over weaker firms depending on borrowings.

Estimating capital cost is not an impossible task. It requires some estimate of the amount of capital invested in a program **[**102]** and of the duration of that investment, and some basis for finding a "normal" rate of return on such an investment. Transamerica proved none of these. No evidence of invested capital has been introduced and no witness has ventured an opinion as to what the cost of capital ascribable to any program might be. Reliance instead is placed on a "Program Evaluation Technique" ("PET"), a method of estimating cost of capital described in IBM's Financial Procedures Manual.

Transamerica first revealed it was relying on PET to indicate IBM's program revenues were insufficient to cover its cost of capital during counsel's closing argument. As a result, no witness has had an opportunity to be examined or cross-examined as to the propriety of such an approach. Some flaws are apparent, however.

The method applied by Transamerica is the least sophisticated of several PET options. It employs a matrix with which one can determine a current value of profits (as a percent of revenue) if one knows the rental life of the program, and the program's expected (undiscounted) profits percentage. For instance, if a program with a 36 month rental life were expected to yield a 20 percent profit, then the matrix **[**103]** would indicate that when discounted to present value the profit returned would be only 8.8 percent. The PET explanation describes the cost of capital as a cutoff rate established by management, and sets that rate at 7 percent. Assuming that a 7 percent return is a normal return, then the hypothetical program's profits exceed the cost of capital invested (8.8 percent exceeds 7 percent).

But there is a caveat that concludes the description of the PET matrix which warns against its use if the program being analyzed deviates from the pattern the matrix **[*1001]** developers assumed was typical. Clearly they have made some assumptions as to the level of investment, and the annualized cash flow of the program. There was no showing here as to what those assumptions were, or that the investments in any of the programs at issue are similar. Moreover, even if that evidentiary gap could be bridged, the matrix shows that programs with profits in excess of 25 percent more than cover capital costs at all rental lives. The programs at issue here, once the specious adjustments rejected above are ignored, were all expected to earn profits in excess of 25 percent and thus in excess of capital costs. **[**104]** [100]

Transamerica's cost of capital adjustment suffers from a failure of proof. It was plaintiff's burden to establish this element of its case. This Court will not attempt to estimate that which plaintiff has failed to quantify.

5. FTP Adjustment.

FTP (Fixed Term Plan) was a long-term lease plan offered by IBM on peripheral equipment. FTP was announced in May of 1971. Prior to that time customers could either buy peripheral equipment, or lease it on a month to month basis. With FTP, IBM offered customers a one year lease at an 8 percent **[**105]** discount from the monthly rental price, or a two year lease at a 16 percent discount. Transamerica offered no evidence that FTP caused a decrease in the profits of any product. Indeed, all the evidence indicates that IBM projected that FTP would increase revenues and profits over the levels expected if FTP were not announced.

Transamerica's argument for an FTP adjustment to the profits of the programs at issue here, did not surface until after the close of evidence. They compare an IBM projection of program profits at one time (before and without application of FTP) with another and later profit projection which included the application of FTP. They conclude

---

[100] The only exception to this was the 2319A3. It should be emphasized that this Court does not accept the PET matrix as proof of capital costs, but even if it had, it would find the price of the 2319A3 reasonable, and not to have damaged Transamerica in any way. The 2319A3 was a specialized program, a disk drive with a power supply, and there is no evidence that Transamerica or any other competitor even considered supplying the very limited market this product addressed.

from the comparison that FTP caused revenues and profits to decline, and seek to apply the computed decline pro-rata to the revenues and profits of the products in issue. This method is unacceptable. It fails to give effect to other circumstances which changed between the two projections, and, more importantly, it ignores the fact that the second projection, specifically designed to compute the effect of FTP under the circumstances existing at that time, showed that FTP could be expected to increase both revenues and profits. **[**106]** Unrelated forecasts cannot be so manipulated.

FTP undoubtedly created a new price-cost relationship, one not reflected in the announcement financial analyses, and one probably unanticipated at that time. But there is evidence to indicate that FTP reduced costs and increased revenues; there is no convincing evidence to the contrary. Accordingly, this Court refuses to decrease projected profits as a result of FTP.

6. Additional Evidence that Prices were Reasonable.

This Court has concluded that the IBM announcement financial forecasts for the 2319s, Aspen and Mandan were reasonable, and that IBM reasonably anticipated that those prices, even after FTP discounts were applied, would exceed average costs. [101] **[**107]** Although profit expectations at the product's **[*1002]** introduction may be the primary consideration in analyzing a firm's pricing behavior, [102] evidence of actual profitability is also relevant.

IBM's financial analyses are updated at various times after a product's announcement. These updates reflect the realities of marketplace experience with the product, and thus more accurately reflect its profit picture. Financial analyses of the 2319A and 2319B done one year after announcement showed those products to be expected to produce profits (as a percent of revenue) of 40.2 percent and 34.5 respectively. One year after announcement, Mandan was expected to bring in 25.8 percent in profits, and Aspen 17.4 percent. A little over a year after that, Aspen's profits had improved to 20.5 percent. A financial analysis of all the 2319s combined and updated through 1978 indicated that the combined programs yielded 28.4 percent in profits. This evidence confirms the findings that IBM reasonably expected substantial profits on all the peripherals at issue; that the prices (including FTP) were above cost, and reasonable; and that the prices were legal.

Even if those prices had been slightly below cost, and their reasonableness thus open to inquiry, **[**108]** this Court would not hesitate to find them reasonable. The 2319s and Mandan were programs which reused third generation equipment at a time when fourth computer generation had already been announced. That older equipment was soon to become obsolete, and it is reasonable for a manufacturer in such circumstances to reduce price and squeeze as much revenue as possible from equipment before demand dwindles.

Reasonableness is also indicated by comparisons between the PCMs' prices and IBM's. Such comparisons indicate that IBM's prices did not undercut the PCMs' prices, they did not even equal them, they merely closed the gap; the PCMs' prices were still lower.

Shortly after the announcement of FTP, IBM announced price increases on some of its CPUs. Transamerica suggests that this was done to offset profits lost on peripherals as a result of FTP, and was a use of monopoly power in one market to gain a competitive advantage in another. The evidence indicates otherwise. First, FTP was expected to increase long term profits. Second, if a competitive advantage is gained by lowering price to a level in excess of average cost, the competitive advantage is efficiency related, not monopoly related, **[**109]** and equally efficient competitors will continue to make at least a normal profit. If the monopolist foregoes some excessive profits but still prices above average cost, it is immaterial how, or whether, the foregone profits are recouped. Conversely, if price is set below average cost, recouping losses by monopoly pricing in another market would be a strong

---

[101] This conclusion is reinforced by the fact that IBM included estimates of cost contingencies, allowances for unexpected cost increases, in its announcement financial analyses that ranged from 5.2 percent of expected revenue (for the 2319B) to 7.8 percent (for Aspen). This Court would be inclined to diminish defendant's costs by the amounts included as contingencies if the price-cost relationship were a closer question.

[102] CalComp, supra n. 4, at *613 F.2d at 740 n. 19*.

indication that the lowered price was unreasonable. The critical issue is whether price exceeded average cost. If, as here, it did, the price is reasonable, will eliminate only the less efficient, and does not violate the antitrust laws.

This Court finds that all the prices at issue here exceeded average cost, were reasonable, and were legal.

V.

DESIGN CONDUCT

It is not difficult to imagine situations where a monopolist could utilize the design of its own product to maintain market control or to gain a competitive advantage. For instance, the PCMs were only able to offer IBM's customers an alternative because they had duplicated the interface, the electrical connection between the IBM System/360 CPU and the IBM peripheral (or peripheral subsystem). Had IBM responded to the PCMs' inroads on its assumed monopoly by changing the **[**110]** System/360 interfaces with such frequency that PCMs would have been unable to attach and unable to economically adapt their peripherals to the ever-changing interface designs, and, if those interface changes had no purpose and effect other than the preclusion **[*1003]** of PCM competition, this Court would not hesitate to find that such conduct was predatory. Or, if a monopolist frequently changed the teleprocessing interface by which its computers communicate with remote terminals in such a way that its terminals would continue to function while others would fail, and, if the only purpose and effect of the change was to gain a competitive advantage in the terminal market (where the monopolist lacked monopoly power), that use of monopoly power would be condemned.

It is more difficult to formulate a legal standard for design conduct than it is to imagine clearly illegal situations. Any such standard must properly balance a concern for the preservation of desirable incentives with the need to prevent monopolization by technology. Like pricing, equipment design can have pro-competitive as well as anticompetitive aspects. Truly new and innovative products are to be encouraged, and are **[**111]** an important part of the competitive process. For this reason, the acquisition or maintenance of monopoly power as a result of a superior product does not violate the Sherman Act. One court has even suggested that where there is a valid engineering dispute over a product's superiority the inquiry should end; the product is innovative and the design is legal. [103] That view, probably the result of a concern for the creativity that has characterized the history of computers, is overprotective. It ignores the possibility that a superior product might be used as a vehicle for tying sales of other products, and would pronounce products superior even where the predominant evidence indicated they were not.

Another approach would be to examine the designers' intent. If a technological design were chosen for an illegal purpose (such as to effectuate a tie) and if that purpose was fulfilled, it would be illegal. [104] If that **[**112]** standard were to apply only where the intent was solely an illegal one, creativity would not be stifled. But usually many results are intended, and if only one, even the predominating, intent is illegal, and thus punished, legitimate incentives will be imperiled. Discerning corporate intent is seldom easy, and, in any event, the law against monopolization is much more concerned with the effect of conduct rather than with its purpose.

A more generalized standard, one applicable to all types of otherwise legal conduct by a monopolist, and one recently adopted by the Ninth Circuit, must be applied to the technological design activity at issue here. If the design choice is unreasonably restrictive of competition, the monopolist's conduct violates the Sherman Act. [105] This standard will allow the factfinder to consider the effects of the design on competitors; the effects of the design on consumers; the degree to which **[**113]** the design was the product of desirable technological creativity; and the monopolist's intent, since a contemporaneous evaluation by the actor should be helpful to the factfinder in determining the effects of a technological change.

A. Interface Changes.

The PCMs were engaged primarily in replacing only peripherals attached to IBM systems. To the extent that IBM could prevent (or make inordinately expensive) the physical attachment of such gear, it had the power to eliminate competition. Transamerica complains that this was what was done by interface changes made when the new products at issue here were designed.

The interface between the Aspen tape drives (3420 Models 3, 5 and 7) and the Aspen control unit (3803) differed significantly from the interface utilized by the immediate predecessor tapes (2420s) and **[*1004]** control **[**114]** units (2803s). PCMs wishing to attach their 2420 copies to the new and improved control unit were effectively precluded from doing so. The cost of adapting a 2420 to the new interface format were prohibitive. Transamerica charges that the interface change was unnecessary, and that its only purpose and effect was to preclude PCM competition for tapes attachable to the 3803.

The evidence is to the contrary. Not only was the 3803 a superior product (as Transamerica concedes), the interface itself was a superior product. It had fewer wires and connectors. This meant switching between tapes and control units could be done more simply (fewer switch points), enabling IBM to integrate the switching mechanism into the control unit and thereby eliminate the need for a costly and bulky separate switching device. The pulses on the wires were multiplexed. That meant more sense information could be transmitted and diagnostics and maintenance were improved. Signals were converted from analog to digital at the tape head (rather than in the control unit), meaning information could be transmitted more reliably (with less noise interference). And, tape drives were attached to the 3803 radially (rather **[**115]** than serially), making maintenance and computer room layout easier. All of these changes required interface changes, and all were undeniably improvements.

Transamerica (which never owned any 2420s anyway) will not be heard to complain that it was somehow injured by an improved product. The Aspen interface was just that. It was adopted by IBM because it was a product improvement, and even if its effect was to injure competitors, the antitrust laws do not contemplate relief in such situations.

The Mandan interface was also changed. It was different from the interface between the predecessor 2401 Model 2 tape drive and its control unit, the 2803 Model 1. But this interface change was truly minimal. Five wires were added, and two wires were removed. The evidence was uncontradicted that: the change was purposeful, to identify the model to the control unit; the change was ordinary, all 2401 models were so identified; and the impact on PCMs was insignificant, the technical information was made public and with it a qualified engineer could adapt a 2401 Model 2 interface in one hour. There was no evidence that any PCMs wished to hook onto the Mandan control unit, but had they so desired, **[**116]** this interface change would certainly not have precluded it.

A more complex problem is presented by the interface between the 2319A and the IFA. The IFA represented a different mode of peripheral attachment than had been utilized on most System/360 CPUs. Instead of a CPU to channel to control unit to peripheral attachment, the IFA resided in the CPU itself and attached directly to the peripheral device. That eliminated the need for control units and channels, saving the user space and money. The IFA, unquestionably a superior product, was an optional feature for sale or lease on the 145 and 135 System/370 CPUs.

From approximately 1969 until mid-1970, IBM's Endicott laboratory, responsible for the design of the 145, planned to design the IFA so that IBM 2314-type disks would attach with minor modifications. This was known as the Apricot plan. IBM's Hursley laboratory in England, responsible for the development of the 135, the sister to the 145 CPU, opposed this plan and, as early as 1968, and again in 1969, had proposed specifications for disk drives that were ultimately adopted by IBM in the summer of 1970 and announced as the 2319, code named Mallard. Under Apricot, a user could **[**117]** have attached IBM 2312s (one spindle), IBM 2318s (two spindles), or IBM 2313s (four spindles) in any combination. IBM 2314-type spindles would attach because the planned Apricot interface duplicated the interface between the 2314 control unit and the drives. PCM 2314-type drives would not have attached without modification to the Apricot IFA, but because the 2314 interface was well known, the PCMs could have quickly and easily duplicated that interface and made their drives available for **[*1005]** attachment to the IFA.

Primarily because of this exposure to PCM competition, IBM dropped Apricot and adopted the Mallard (2319A) plan.

With Mallard, one of the spindles was removed from the frame of a 2313. Into that vacant space IBM moved some of the control electronics that would have resided in the CPU under Apricot. The result was that the interface into the IFA was different under Mallard than under Apricot. And because it was different, and unknown to the PCMs, their efforts at copying the interface had to be delayed until they could examine the device IBM had produced.

With Mallard IBM bought itself some time. The interface change meant that PCM copies would not be available **[**118]** as quickly as if a known interface had been used. In a lease oriented market, where product obsolescence limits rental lives, time is money. If the PCMs could be sufficiently delayed, their market might even be limited to the point that the expense and trouble of duplicating the 2319A interface would no longer be worth it.

IBM's predominant intent in adopting the Mallard design was undoubtedly to preclude or delay PCM competition and gain a competitive advantage. However, other considerations also played a role. Mallard alleviated some difficult technical problems. It saved some space in the space-critical 135 CPU; it resulted in the location of a diagnostic device (the CE panel) near the drives where it was easier to use; it reduced cable lengths and electrical noise interference problems; and it simplified engineering control and record keeping for IBM by assuring that the engineers and the laboratories that were most familiar with the disk-related electronics would be responsible for them. On this record, the Mallard concept was a superior design.

Mallard's effect should also be considered. It appears the market segment affected by the 2319A was not something that held a great **[**119]** attraction for PCMs. The 2319A was expected to be an interim disk file for the 135 and the 145. Once IBM's 3330 became available, 2314-type devices would no longer be very attractive because the 3330's offered better performance at lower price. And during that interim, PCMs had their hands full supplying System/360 users with 2314-type disk drives and control units. These subsystems were more profitable for the PCMs (and therefore more attractive) than supplying only disk drives for attachment to the once-contemplated Apricot would have been. For instance, Telex had a backlog of orders for 2314-type subsystems that lasted until November of 1973, and thus, had little capacity or motivation to copy either the Apricot or Mallard interface in order to supply the less profitable drives. And, in any event, PCMs were not effectively precluded from competing for disk placements on the 135 and 145. Selector channels were available on the machines, and PCM subsystems attached without modification to those channels.

Mallard was a design adopted primarily to preclude PCM competition, but it was a superior design, and its effect on competition was negligible. A finding adverse to IBM on this aspect **[**120]** of its conduct would amount to a punishment for intent alone. This Court concludes that Mallard interface did not unreasonably restrict competition, and did not violate the Sherman Act.

B. Price Differences Justified by Design Changes.

Transamerica alleges that the Aspen and Mandan tapes, and the 2319s were in reality simply repackaged old devices, that the design changes that differentiated them from their predecessors were meaningless except insofar as they permitted IBM to continue to enjoy monopoly profits on its on-lease older equipment while meeting PCM competition with lower priced "new" machines. This price discrimination between users is, they say, entry barrier raising conduct of the type condemned in United Shoe. [106]

[*1006] The premise for this argument, the identity of products, is inapplicable to the Aspen tape drives. The Aspen 3420s were partly built from parts salvaged from 2420s, but over half of the 3420 parts were new. Conversion of a 2420 drive to the 3420 drive **[**121]** was impossible. And the changes made resulted in an improved product. Newer technology was used for the circuitry. A data format not available on the 2420 could be used on the 3420 (NRZI). And changes were made to enhance the reliability, availability and serviceability of the

[106] Supra n. 13.

newer tapes. The Aspen tapes were different and better products than the 2420s, available to all customers, not price discrimination.

The differences between the 2314s and the 2319s were not as great. The functional characteristics (including reliability, availability, and serviceability) were identical. Packaging was different. The 2319s came only in three-spindle versions; prior to the 2319 announcements, no 2314s were available in three-spindle packages. Even if that is insufficient to conclude that different products are involved, the manner in which the 2319s were marketed refutes any allegations that they represented price discrimination. The 2319As were widely publicized and available to all customers whether or not PCM competition threatened. The same is true with the 2319Bs. Within one year of the announcement, IBM had placed over 20,000 2319B spindles, more than they predicted they would place. Users **[**122]** knew that the 2319B was a 2314-type device with a lower pre-spindle price, and they chose it in great numbers. No price discrimination was involved with the 2319s.

The 2319B price discrimination claim surfaced early in the trial, and IBM convincingly refuted it. Mandan was different. Both parties essentially ignored the alleged price discrimination aspect of Mandan. That was probably because Mandan was a relatively insignificant program; only 550 Mandan units were ever sold by IBM.

The Mandan 2401 Model 2 was a slow (75 inches per second) tape drive introduced by IBM in 1964. By 1970 IBM had a warehouse full of these older drives and 2803 controllers. To make them more competitive, IBM made the minimal interface changes already described, changed the name plates, and offered a seven-track only, Mandan subsystem (the 2401 Model 2 came in either seven or nine-track versions) at reduced prices. There is some evidence that IBM did not put its greatest marketing efforts into the Mandan program. But to conclude it was discriminatorily priced would require an inference from its poor market reception that it was only offered to customers if PCM competition threatened. That is an inference **[**123]** this Court will not make on the skimpy record before it. And, in any event, this Court previously endorsed a conclusive presumption that price manipulations resulting in prices greater than average cost were legal. Mandan's prices were above average cost and would have eliminated only less efficient competitors. Mandan did not unreasonably restrict competition, and did not violate the Sherman Act.

C. Design Changes on the System/370 Models 115 and 125.

The 115 and 125 were the smallest of IBM's fourth generation System/370 CPUs. Initially it was planned that an improved product, the 3340 disk drive, would attach natively to these machines through an IFA-type device. When it became apparent that the 3340 would not be ready at the time of the announcement of the 115 and 125, IBM planned to natively attach third generation disk drives (2314 types) as an interim disk solution. That plan did not last long. IBM realized that permitting third generation IBM equipment also meant permitting third generation PCM equipment, and that once users had third generation disk equipment installed, they would resist efforts to persuade them to migrate to IBM's fourth generation disks. The plans to natively **[**124]** attach third generation disk equipment on these machines were dropped in favor of fourth generation equipment.

Transamerica claims the failure to introduce a new CPU with native attachment capabilities for old disk equipment violates **[*1007]** the Sherman Act. There is no doubt that the 115 and the 125 were superior products. Nor is there any doubt that the disks ultimately selected were superior products. Their data rates, access times, and capacity exceeded the performance available in third generation disks. This performance improvement was critical if the machines were to operate efficiently in a virtual mode, and a virtual operating system later became standard on both the 115 and the 125. Even if, as Transamerica suggests, the switch to newer and better disks was done to impact competition and occasioned some delay in the program, this Court would find that the introduction of an improved CPU with a superior disk natively attached did not violate the law. [107]

[125]** At one time, the 115/125 plans called for a selector channel to be made available on these machines. A selector channel would have permitted attachment of all the higher speed devices that were attachable to selector channels on the older System/360 CPUs. But that meant IBM would be exposed to PCM competition from channel

[107] Cf. *Berkey, supra n. 5, at 282*.

attached third generation tapes and disks, while trying to sell the natively attached fourth generation equipment. Primarily to preclude this competitive threat, IBM investigated the possibility of dropping the plans for a selector channel.

At that point it was determined that the selector channel had become superfluous. A different plan had already emerged to attach IBM's System 7 process control computers, and the IBM disks and tapes that would have attached to the selector, could be natively attached instead. The number of potential users of these systems that were already using systems with channel attached peripherals was insignificant. By far the greatest number of "migrator systems" were ones that did not have selector channels or peripherals that would attach to selectors. In short, IBM had no further need for the selector; its only function would have been **[**126]** to provide a means of PCM attachment. Eliminating it saved IBM time and development expense. The selector channel elimination did not unreasonably restrict competition.

The 115 and 125 also included a byte multiplexor channel for attaching slower speed devices. A byte multiplexor channel can operate in either byte mode or burst mode. If a multiplexor can operate in burst mode at the same speed at which a tape or disk peripheral can operate, it is possible to attach some relatively slow devices to it.

The byte multiplexor on the 115 and the 125 was initially planned to be able to transfer data at a rate of 50,000 characters per second (50KB). That would have permitted attachment of PCM copies of IBM's 2401 Model 1 and 2415 Model 6 tape drives which operated at 30,000 characters per second (30KB). When the head of the IBM's Computer Division called upon the engineer in charge of the 115 and 125 project to investigate the possibility of removing the selector channel, he also inquired about removing the multiplexor. The engineer's response was that while selector channel removal was feasible, multiplexor channel removal was not, but he would like "to investigate further the possibility **[**127]** of reducing the speed of the multiplexor channel and eliminating the possibility of attaching higher speed devices, e.g., 30KB magnetic tape."

When they were announced, the byte multiplexor on the 115 and the 125 were capable of operating at 29 thousand characters per second (29KB), just short of the speed that would have enabled the PCMs to attach. IBM's explanation is that an engineering problem caused by virtual storage operation caused the degradation. But there is no contemporaneous evidence of any such problem.

IBM degraded system performance, making its product less attractive to users. The only purpose served and the only effect of the degradation was the preclusion of competition. The law tolerates the perpetuation of a monopoly only where necessary to preserve competitive incentives **[*1008]** and to avoid being unfair to the innocent monopolist. [108] **[**128]** The law need not tolerate deliberate acts where the only purpose and effect is to use monopoly power to gain a competitive advantage. Slowing down the multiplexor on the 115 and 125 was unreasonably restrictive of competition and would have violated *Section 2* of the Sherman Act if IBM had monopoly power. [109]

VI.

OTHER CONDUCT

---

[108] *Id. at 275*.

[109] It should be noted here that any finding this Court might make that the multiplexor degradation violated the Sherman Act would be accompanied by a finding that Transamerica suffered no injury as a result of that conduct. The market for the tapes excluded by this conduct was insignificant. Only tape drives with data rates between 30 and 50KB were affected. Those were older, low performance technology devices that would only have been competitive at prices far below those contemplated in Transamerica's damage claim. Transamerica probably owned some of them, but its President didn't know how many, and any Transamerica owned were purchased in the second Telex tape contract. Because that contract was not an arms-length transaction, this Court would be reluctant to award Transamerica any damages on the equipment purchased thereunder. Also, there is no evidence that Transamerica in the past supplied peripherals for the 115/125 migrator systems, or that it intended to, or took any steps to supply peripherals for the 115 and 125 systems.

One aspect of IBM's long-term lease plan, **[**129]** the pricing aspect, has already been discussed. Transamerica claims that even if the resultant price were not predatory, FTP was exclusionary and violated the Sherman Act. The basic argument, relying on United Shoe, [110] is that entry barriers are artificially raised when a monopolist leases its product for long terms; would-be competitors are unable to woo customers away from the monopolist because the lease provisions lock them out. United Shoe's leasing practices violated the Sherman Act even though they conformed to long-standing traditions in the shoe machinery business and were similar to leases employed by competitors.

IBM recognized the potential lock-out effect of FTP. They knew that if customers would opt for the longer leases on their peripheral devices, PCMs would be kept at bay long enough for IBM to complete its development and introduction of improved products. The improved products would also be leased for long terms, and PCM copies of the improvements would also be locked out. **[**130]** But an awareness of the truism that one's own successes in the market will mean losses for others is insufficient in itself to make an activity unreasonably restrictive of competition and illegal.

IBM's competitors all offered long term leases on their equipment. Leasing companies offered terms of two to nine years. Systems competitors offered three to six year terms, and PCMs offered terms of up to five years. Most PCM equipment was leased for one year terms, very few leases were shorter.

Despite the product introductions late in 1970, (2319s, Aspen, Mandan) IBM continued to lose business to the PCMs at an alarming rate. The lack of a long-term lease in IBM's marketing portfolio was a principal reason.

And customers brought that to IBM's attention. In April of 1971 the Comptroller General of the United States (IBM's largest customer) issued a report directing that acquisition of computer equipment be made on multiyear leases to the extent practical. IBM was the only major computer equipment supplier that did not offer a long-term lease alternative.

An economic recession forced customers to cut back on investment in computer equipment. IBM's peripherals, mostly on 30-day leases, **[**131]** were more vulnerable to the belt-tightening than PCM gear on longer contracts at cheaper prices. PCMs reacted to IBM's 1970 announcements by slashing their own prices and offering special concessions not available from IBM. As a result, IBM was losing ground in a growth market, suffering negative net placements while the PCM installation rate continued to climb.

[*1009] Against this background IBM adopted FTP. It gave the customer one and two-year lease options at an 8 percent and 16 percent discount respectively. Premature cancellation by the customer would lead to a penalty payment equivalent to two and a half months rent on the one-year lease and five months rent on the two year version. No penalty was incurred if the customer canceled prior to machine installation. FTP applied to most tape drives, disk drives and printers.

It was a manifestly reasonable reaction to competition. The lock-in effect was limited. After thirteen months, the two year customer could break the lease, pay the penalty and still be in the same position financially as if a month-to-month lease had been chosen. The one year customer's breakeven point came after nine months. Many PCMs did not offer such **[**132]** liquidated damages provisions; the defaulting customer would be liable for the total rent for the remaining contract term. And the lock-in did not effectively lockout. The PCMs enjoyed healthy increases in tape and disk placements and revenues from 1968 until 1975. PCMs' copies of the 3330 and the 3420, the equipment supposedly locked out to the greatest extent, were by far their best sellers. By 1976 PCMs had placed more of these devices than all of their older technology combined.

The situation before the court in United Shoe [111] was different. United Shoe did not sell its machines (as IBM does) or make them available on 30-day leases (as IBM does); it only rented them and only for ten-year periods. The

---

[110] Supra n. 13.

[111] Id.

court refused to decree that United Shoe be required to abolish long term leasing altogether, five-year leases were permitted, in part because abolishing long term leasing would have disabled United Shoe's ability to compete. [112] The same consideration applies here. If FTP's one and two-year leases are condemned, that would severely handicap IBM's ability to compete in a market where buyers prefer long-term leases. FTP did not unreasonably restrict competition, and did not violate **[**133]** the Sherman Act.

Extended Term Plan ("ETP") was a similar long-term lease plan announced on March 1, 1972. Transamerica introduced very little evidence on ETP, and failed to show it was unprofitable or unreasonably restricted competition. ETP did not violate the Sherman Act.

Transamerica also complains that the System/360, and several time-sharing and scientific 360 models, were announced prematurely and at predatory prices. Evidence of these 1964 and 1965 announcements was admitted to permit the finder of fact to understand the history of the computer industry and to evaluate other conduct against that background. No evidence has been offered from which an inference could be drawn that these acts in any way injured Transamerica. All these announcements were made years before Transamerica was incorporated, and if anyone was negatively affected, it was systems competitors, not the PCMs or their financiers. Whether phrased in terms of causation or standing to sue, [113] Transamerica's **[**134]** contentions that IBM somehow violated the law with these announcements are immaterial to any cause of action for which it can hope to recover damages, and they will receive no further attention here. Likewise, no attention is required to Transamerica's contentions that IBM excluded competition by increasing System/370 purchase multipliers and by eliminating its so-called technological discount for the purchase of leased equipment. Transamerica makes no claim for relief based on these acts, and introduced no evidence supporting an inference that the events adversely affected its business.

VII.

ATTEMPT LIABILITY

In the preceding three sections IBM's conduct was analyzed under the assumption **[*1010]** that IBM was in possession of monopoly power. The pricing, marketing and design conduct which forms the gravamen of Transamerica's complaint was found permissible even for a monopolist. Those **[**135]** acts cannot, then, be impermissible for one whose market power falls short of monopoly. One act, the reduction of the 115/125 multiplexor channel capacity, would have violated the Sherman Act had IBM been in possession of monopoly power. The question addressed here is whether, assuming the market structure was such that IBM was dangerously close to monopoly power, the law forbidding attempts to monopolize has been broken.

Beyond the assumed dangerous probability of success there are two additional elements of the attempt offense, the specific intent to control prices or destroy competition, and predatory or anticompetitive conduct. There is some independent evidence of specific intent. IBM's Chairman deemed market share a consideration well above that of profit, and IBM fought hard to maintain market share. They undertook intensive studies of the chief PCM competitors in order to determine their viability and to predict what would be required to contain them. That is not enough to prove illicit intent. More than an intent to win every sale, even if that would result in the demise of a competitor, is required before it can be concluded a defendant has the type of exclusionary intent **[**136]** condemned by the ***antitrust law***. Intent and conduct are closely related; [114] and there must be some element of unfairness in the conduct before an anticompetitive intent can be found, as distinguished from the benign intent to beat the opposition. [115]

---

[112] ***Id., at 349, 352***.

[113] See CalComp, Supra n. 4, at 734, holding that plaintiff there, a PCM, lacked standing to sue on this same conduct.

IBM's conduct for the most part, was beyond reproach. Only the 115/125 multiplexor degradation would have violated the Sherman Act had IBM possessed monopoly power, and **[**137]** it can only be characterized as unfair under the assumption that the market was so structured. The 115/125 multiplexor degradation was only thought unreasonable because it involved some use of the assumed monopoly power. A future market was involved, and it does not strike this Court as unfair or unreasonable for a non-monopolist to refuse to take a course of action that would make it easiest for others to copy its products or to compete for sales.

The conduct here was not illegal, was not predatory, was not anticompetitive, was not unfair, and did not unreasonably restrict competition. Transamerica has failed to prove that IBM acted with the specific intent to control prices or destroy competition, or that it engaged in anticompetitive or predatory conduct with that end in mind. This Court finds that IBM did not attempt to monopolize any part of commerce.

VIII.

DAMAGES

Transamerica has failed to establish liability on either the monopolization or the attempt claim. But even had it done so, it would still suffer an adverse judgment because its damages proof affords the factfinder no opportunity to calculate resulting injury without resort to speculation.

Transamerica claimed it **[**138]** was damaged in two respects:

1) that the revenues it actually received on its plug-compatible equipment were less than the revenues it would have received had IBM not violated the law (the lost revenues claim); and

2) that IBM's actions forced it to abandon plans to purchase more plug-compatible equipment and lose the profits it would **[*1011]** have earned by leasing that equipment (the lost profits claim).

There are four alternative lost revenues calculations, Alternatives A, B, C and D. All of the lost revenue alternatives involve some assumption about the rental rate Transamerica would have received on the plug-compatible equipment it bought from Telex and Marshall; they all require some assumption about the number of months, on average, the equipment could have been returning that full rental (the "rental life"); and all purport to make provision for revenue shortfalls attributable to causes other than IBM's act (the "revenue erosion" factor). In most cases the assumed rental rate is multiplied by the rental life for each piece of equipment, then a fixed percentage is subtracted as revenue erosion, to give the total revenue Transamerica claims it would have received absent **[**139]** IBM's acts. From this expected revenue figure Transamerica subtracts the actual revenues it received on the equipment. The revenue difference is said to be a measure of Transamerica's loss, because the expenses Transamerica actually incurred are claimed to be at least as great as the expenses it would have incurred had IBM not acted.

Lost revenue Alternative A is a calculation that produces a damages claim (before trebling) of $ 36,469,000. The disk rental rates assumed are those in effect immediately preceding IBM's 2319B announcement in December 1970. The rental lives used are equivalent to the depreciation lives assigned to Transamerica's equipment in late 1970 by its Executive Vice President, Dr. Fraser Wallace. Wallace assigned six year lives to Transamerica's tape devices and its 2311-type disks (five years if they were purchased in 1971), and eight year lives to the 2314-type disks (seven years if purchased in 1971). The late 1970 rental rates were multiplied by the rental life remaining after a designated damage start date, then revenue erosion was subtracted. Revenue erosion was assumed to be zero for the first year of the remaining disk rental life and for the first six **[**140]** months of the remaining tape rental life. The next twelve months revenue were assumed to fall by 4 percent, and every year thereafter revenue is decreased by 15 percent. This 0-4-15 revenue erosion factor was suggested by Mr. Rush, Transamerica's President. Expected revenues were decreased by actual revenues to calculate lost revenue.

---

also, Cooper, Attempts and Monopolization: A Mildly Expansionary Answer to the Prophylactic Riddle of Section Two, 72 Mich.L.R. 373, 395 (1974) and authorities cited therein.

Lost revenue Alternative B is a damage claim for $ 19,994,000. Transamerica calculated the Alternative B rental lives from a study of Telex made in 1970 by an IBM financial analyst. The study includes a chart depicting the number of units Telex was expected to have installed with customers from 1970 to 1976. Transamerica assumed Telex would have to manufacture 10 percent more drives than the maximum depicted on the installation chart (a 10 percent "float"), and from this total number of units manufactured, together with the number installed each month, Transamerica purported to calculate the average number of months each manufactured unit would product Some revenue. Rental life (the average number of months each unit would produce Full revenue, i. e., produce revenue at its original rent) was then calculated by reversing the study's assumptions of how **[**141]** much Telex's price would erode each year. The Alternative B rental life was multiplied by the same pre-act 1970 price assumed in Alternative A. No revenue erosion was applied to the quotient on the theory that price erosion and off rent units had already been considered in the Telex study. Expected revenue was increased by 10 percent of capital costs to reflect a salvage value, and then actual revenues were subtracted.

Lost revenue Alternative C is a $ 21,301,000 damage calculation. Pre-act prices were used here as well. The origin of the rental lives used was an IBM internal memorandum (the Nern Memo) sent to the author of the Telex study so that he might check his calculations. The Nern Memo lives were multiplied by pre-act prices, and, as with Alternative B, a 10 percent salvage value was added before actual revenues were subtracted.

Lost revenue Alternative D is a $ 12,700,000 calculation that results from multiplying **[*1012]** the price Transamerica was actually charging for its equipment during each month of the damage period, by the number of units of off rent in excess of 15 percent. The first 15 percent of the off rent units is a revenue erosion allocation. Only this **[**142]** portion of the off rent is assumed to be attributable to causes other than IBM's acts.

Transamerica's lost profits claim is grounded on a claimed intention to make additional purchases of plug-compatible equipment between 1972 and 1975. That intention is said to have been reflected in the profit and opportunity plans for 1971-1975 which were prepared by Transamerica in late 1970 and submitted to its parent, Transamerica Corporation, as indicative of long-range goals. According to Transamerica Corporation's Chairman, Mr. Beckett, and Transamerica's President, Mr. Rush, about one-half of the new computer equipment would have been plug-compatible peripherals. They further testified that the plan was not implemented because of IBM's conduct.

Transamerica contends that it would have invested $ 109,000,000 in plug-compatible equipment had the plan been carried out. Transamerica then theorizes that plug-compatible manufacturers would have entered into contracts whereby title to equipment would have passed to Transamerica on payment of a purchase price equal to 27 times the equipment's monthly rental price. The assumed contract would have provided that Transamerica retain all the rental **[**143]** revenues for the first 50 months. Thereafter Transamerica would have received 30 percent of the revenue and the manufacturer would get the balance.

The equipment would have produced some revenues over a 72 month life. Revenue erosion would be zero for the first year, 4 percent for the following year, and 15 percent thereafter. Estimated expenses are deducted from the anticipated rental revenues to give a lost profits figure of $ 51,200,000.

There is an alternative lost profits calculation as well. If one assumes, in addition to the 0-4-15 percent revenue erosion, that 20 percent of the units would not have produced any rental revenues after the first two years, the lost profits damages are $ 30,600,000.

The damage evidence advanced by Transamerica would permit total (untrebled) damages to be calculated between $ 43.3 million at one extreme, and $ 87.7 million at the other. In general, all the damage evidence can be characterized as showing a general decline in anticipated revenues and profits due to IBM's illegal conduct. The evidence that the decline was so caused consists of conclusory statements by Transamerica's corporate officers, and the inferences that can be drawn from the **[**144]** nature of IBM's acts and their tendency to injure one in Transamerica's position.

A plaintiff need prove no more in order to establish a Prima facie case. As the Supreme Court said in Bigelow v. RKO Radio Pictures, [116]

> . . . in the absence of more precise proof, the jury could conclude as a matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, and from the evidence of the decline in prices, profits and values, not shown to be attributable to other causes, that defendants' wrongful acts had caused damage to the plaintiffs." ([117])

And that Court has suggested that a plaintiff's burden is satisfied by proof of Some damage flowing from defendant's unlawful acts:

> "It is enough that the illegality is shown to be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling **[**145]** his burden of proving compensable injury . . . " ([118])

[*1013] So, a plaintiff, in order to withstand a directed verdict, need only prove that defendant's acts were a material cause of its reduced profits, and causation may be inferred from the nature of the acts.

Plaintiff need not negate all possible alternative sources of injury in order to get to the jury. That was the nature of Transamerica's damages proof: general declines in overall revenues and profits, and acts by IBM which would tend to cause such declines. IBM's defense concentrated on showing that Transamerica's profit and revenue projections were speculative, and, even if those projections had some merit, that Transamerica's shortfall was attributable to causes for which IBM could not be held responsible.

Because it was possible for the jury to find that Transamerica's projections were reasonable, that the conduct complained of was all illegal and was a material cause of the shortfall, and that IBM failed **[**146]** to prove that other sources were also material causes, IBM's directed verdict motion on damages was denied and the issue was submitted to the jury. However, if the factfinder determines that some of IBM's conduct was illegal and some legal, or that the shortfall was attributable in part to other causes, or that the projections were unreasonable, Transamerica's damages evidence would give no guidance. For instance, if the challenged price reductions, FTP, and some of the design conduct were all determined to be legal competition on the merits, but the multiplexor degradation on the 115/125 constituted an attempt to monopolize or monopolization, then even if the overall projections are accepted as reasonable, and other causes are rejected, damages could not be fixed without resort to speculation or guess. Where a plaintiff's damage and causation proof is generalized its case rests on all the prerequisites to that generalization. This is especially true where, as here, particularization of injury is possible. [119]

[147]** If injury is shown to be attributable to factors for which the defendant cannot be held liable, then a damage case that ignores those factors must fail. [120] This Court finds that causes other than IBM's conduct led to at least

most of Transamerica's profit and revenue shortfall, and that Transamerica's profit and revenue projections are inherently speculative. Thus, even if the Court were to find that some or all of IBM's conduct was illegal, damages could only be based on guesswork and could not be awarded.

Plaintiff could have done better. Rather than showing a general decline **[**148]** in profits and revenues, the damage proof could have been more closely connected to the individual acts complained of. Damages from the 115/125 multiplexor degradation, for instance, are limited by the number of tape devices in Transamerica's portfolio. Such limiting evidence was available, but not presented. Practically every major decision at IBM was made with the benefit of a precise market analysis. Those forecasts could have been used as the basis for determining how much impact each act had on the marketplace and on plaintiff. From the difference IBM expected each act to produce in its revenues, Transamerica could have estimated, on the basis of historical data, its share of the business that IBM wrongfully gained. Where IBM's own forecasts were not available, Transamerica could have used accepted forecasting techniques to predict impact per act. If Transamerica's proof were particularized in this **[*1014]** manner, the influence of extraneous factors would have been filtered out, and the factfinder, in the event it found some activities to be lawful competition and others to be unlawful, would not have had to speculate as to how much injury each act caused.

A. Other Factors **[**149]** Materially Contributed to Transamerica's Injury.

Transamerica's expectations were naive and its business strategy was ill-conceived. Except as a computer user, Transamerica Corporation had no experience in the computer industry prior to the formation of its computer subsidiary in late 1967. What it did have was money, and the computer industry during this period was a magnet for people with money to invest. The initial plan called for Transamerica to borrow from a sister corporation, Transamerica Financial Corporation (TFC) and to purchase whole computer systems with the borrowings. The computer systems were to be leased to end users at prices slightly below IBM's but for periods long enough to recoup expenses and make a healthy profit. Under the assumption that IBM could not alter its System/360 prices without violating the antitrust laws, Transamerica bought 360 systems. What Transamerica did not anticipate was the stiff price competition it soon faced from other leasing companies. Competitor's prices, 30 to 36 percent below IBM's, forced Transamerica out of the systems leasing field.

Recognizing its own inability to develop, market and maintain computer equipment, Transamerica **[**150]** decided the best course was to cooperate directly with manufacturers who could provide these skills. Under the "master sales agreement" concept they developed, Transamerica planned to, and did purchase computer equipment from manufacturers who had already leased the equipment to an end user. The manufacturer received immediate cash payment, but remained obligated to maintain the equipment, and, when leases expired or were otherwise terminated, the manufacturer was obligated to refurbish and remarket. Transamerica was to receive all rents until it had recovered its capital investment and a specified profit. Thereafter the residual rents were to be divided between the manufacturer and Transamerica.

Transamerica was attracted to plug-compatible peripheral manufacturers because it presumed that the System/360 peripherals they were producing would remain in demand for a relatively long time. It felt prices on that equipment would remain stable, since IBM would not risk antitrust liability by responding to PCM price competition, and because the investment tax credit (ITC) was available on that equipment and the ITC could be used by the parent corporation to offset its consolidated tax liability. **[**151]** In October of 1968 Transamerica contracted with Marshall to buy $ 5,000,000 worth of on lease 2311-type disk drives. In April of 1969 Transamerica contracted with Telex to buy $ 5,000,000 worth of on lease 729-type and 2400-type tape drives. In July of that year another contract with Telex was signed which obligated Transamerica to buy $ 45,000,000 worth of on lease 2311-type and 2314-type disk drive and control unit subsystems. Finally, in August of 1970, Transamerica contracted for another $ 10,000,000 worth of 2400-type tape drives from Telex.

Peripherals Leasing Corp. v. IBM, 458 F. Supp. 423, 435 (N.D.Cal.1978); *Admiral Theatre Corp. v. Douglas Theatre Company, 437 F. Supp. 1268, 1296 (D.Neb.1977)*, *Aff'd, 585 F.2d 877 (8th Cir. 1978)*.

Typically, these contracts obligated Transamerica to pay a price equal to over 40 times the equipments' monthly rental rate (almost the full retail price), and obligated the manufacturer to maintain and remarket throughout the rental life.

Only after 70 months could the manufacturer hope to share in the residual rental fees.

The contracts themselves contained the seeds of Transamerica's disappointment. Transamerica's interests and the manufacturer's were divergent. The manufacturer, having been paid at the outset, had little incentive to spend time and money maintaining and remarketing Transamerica's gear. The lure of residual rentals six **[**152]** years distant was insufficient. Telex was attracted to Transamerica's financing because it needed capital to fund development projects, and once those developments became realities, Telex's incentive to market Transamerica's older equipment, instead of **[*1015]** its own newer, more exciting and more profitable follow-ons, dwindled to nothing. Transamerica says now it expected Telex would market its equipment to second and third users, people who were not so interested in the latest technology. Assuming there are customers with little interest in better performance at a lower price, there is no evidence that Telex knew of any. The entire PCM industry concentrated on "leading-edge" customers, large users who demanded the latest in technology and the best price/performance.

And the peripherals that Transamerica had to offer were certainly not the latest technology. Telex and Marshall unloaded $ 6,000,000 worth of 2311-type disk drives onto Transamerica in 1968 and 1969. They were equivalent to a device announced in early 1964 by IBM. Telex recognized their obsolescence and was reluctant to purchase them from Information Storage Systems (ISS), their disk supplier. In June of 1970, **[**153]** Telex requested ISS to discontinue production of these models because the market for them was shrinking. Transamerica didn't want them either, but was obligated to purchase them by Telex in order to buy the newer 2314-type devices.

The 2314, announced by IBM in 1965, was part of the reason Transamerica's 2311 types were already obsolete. But by the time Transamerica signed a $ 45 million contract with Telex (the bulk of which was for 2314-type subsystems), the 2314 was also becoming a thing of the past. In June of 1970 IBM announced the long rumored System/370 fourth generation of computers, and with it the 3330, a disk device far superior to 2314 types. Six months later Transamerica's regional manager in charge of the Telex account concluded that the 3330 had obsoleted all of Telex's 2314 types. [121] In August of 1971 Telex announced an improved double-density 2314-type, and a 3330 copy as well. Virtual storage, announced in 1972, further reduced demand for the slower 2314 technology, as did the March 1973 IBM announcement of the 3340. Customers appreciated the improved price/performance of the newer disks. Transamerica lost little ground to the older, low priced IBM products at **[**154]** issue here; 73 percent of Transamerica's 2314-type customers replaced that equipment by the newer technology offered by IBM and the PCMs. The 2314-type disk, when Transamerica bought it, was about to become a thing of the past.

Transamerica's 2400-type tape drives were no better. Telex sold them to Transamerica a mere three months before discontinuing their production. When the second Telex tape contract was signed in August of 1970, IBM had already shipped an improved generation of tapes, the 2420s, and Telex had already announced its 2420 equivalents. Three months later IBM announced Aspen (3420) outmoding the 2420s. As Transamerica argues elsewhere, [122] "Mandan, (a 2400-type), **[**155]** was old technology, dating back two generations". In March of 1973, IBM announced Birch, still more 3420 models with vastly improved tape density (6250 bpi v. 1600 bpi). By late 1973, Telex classified the NRZI 2400s (about one-half of Transamerica's stock) "prior technology" and thought them unmarketable.

---

[121] In another context, when arguing that the 50-month rental life assumed by IBM for the 2319B was unrealistically long, Transamerica acknowledges the negative impact of the 3330 on 2314-type devices. Here they ignore it and would have this court believe that Wallace's 96-month rental life on the same type of equipment was reasonable.

[122] Transamerica advances this argument against the reasonableness of a 58-month rental life for Mandan, while maintaining a 72-month life was reasonable for its own 2400-type equipment.

Transamerica's indifference to the level of technological sophistication of the equipment in which it invested is well illustrated by the purchases on which no damages are claimed. The bulk of the first Telex tape contract was for 729 type drives. IBM announced the 729 in 1957, and it was obsoleted in 1964 when the third generation of computers, the System/360 was announced. The 729s would only attach to second-generation **[*1016]** equipment, but Transamerica paid $ 2.9 million for 729-type drives in 1968. Non-plug-compatible **[**156]** investments were also untimely. In February 1971, Transamerica's outside auditors suggested a 20 million dollar equipment write down because of the high off rent experienced. Only 20 percent of the equipment they addressed is at issue here. And two months later Transamerica's own internal assessment echoed that concern. Obsolescence had caused a $ 25,000,000 decline in the value of non-plug-compatible equipment.

Some of Transamerica's problems have to be pinned on its poor management. Its first President, according to an officer of Transamerica Corporation, failed to provide leadership or control, exercised poor judgment, misrepresented matters to the parent's officers, and violated the corporation's policy guidelines. The problems didn't come to light initially because Transamerica Corporation made the error of allowing the President to locate Transamerica in southern California, away from the parent, where its activity was difficult to monitor. By late 1969, the difficulties became clear, and the President was terminated. During 1970 Transamerica operated without a President. Fraser Wallace, the Executive Vice President, became acting Chief Executive Officer, and Edwin Carter (the **[**157]** Transamerica Corporation officer referred to above) was the acting President. But Carter could only devote part of his time to Transamerica, and Wallace, according to Carter, ignored problems until the crisis stage, entered agreements that violated corporate policy, was administratively incapable, and caused Transamerica substantial losses. Finally in 1971, James Rush became President. However Rush's experience was as an administrator. He had little knowledge of computer technology or the competition Transamerica faced. None of these executives had any experience with third-party leasing. The combination of inept management and no management produced predictable results. Working conditions at Transamerica were confused and chaotic, expensive contracts for obsolete merchandise were signed and losses inevitably followed.

Even had IBM remained the sleeping giant Transamerica presumed it to be, some of the difference between Transamerica's optimistic projections and reality would have to be ascribed to hungry PCMs scrambling to place their third generation peripherals at a time when the introduction of the fourth generation's was shrinking the market. By early 1974, Transamerica had reduced **[**158]** its price for 2314-type disk drives to under $ 200 per month. The IBM prices complained of here were $ 333 per month. Clearly the PCMs were cutting prices too. As early as November of 1970, Telex recognized that Peripherals General, California Computer Products, and Memorex would create price instability in the disk market. And customers took advantage of that. One-third of Transamerica's 2314-type disk customers were lost to other PCMs. The same PCM price competition that eventually goaded IBM into action, would, and did, cause Transamerica to lower its prices substantially below the prices assumed in its damages calculation.

Besides the injuries Transamerica claims were directly caused by IBM's pricing product actions, it is also claimed that Telex and Marshall were injured, and that the injury to the viability of the maintenance and marketing subcontractor indirectly injured Transamerica's ability to place its equipment. Telex was allegedly injured in its ability to secure financing, its ability to hire and retain qualified employees, and its ability to market, since customers were concerned the company might fail. Wholly aside from the question of whether Transamerica has standing **[**159]** to complain of the injury to a business partner, it appears that the problems of Telex and Marshall were self induced, or at least not IBM induced.

Other PCMs fared much better than Telex and Marshall. PCMs' plug-compatible disk revenues increased dramatically from $ 4.3 million in 1968 to $ 857.3 million in 1975. During that same period PCM tape revenues rose steadily from $ 23.7 million to $ 352.5 million. There was nothing about IBM's conduct that would have caused Telex and Marshall to be more impacted than **[*1017]** others; if they could not keep pace, the cause must lie elsewhere.

Marshall's products were unreliable, had excessive down-time, and were highly vulnerable to the competition of other PCMs.

Transamerica's notion that Telex was unable to obtain financing because of IBM's conduct is refuted by the evidence. Following FTP, Telex was still able to negotiate lines of credit totaling $ 69,000,000, and in November of 1971, Telex sold 27.5 million dollars worth of debentures to the public. If the financial community lost confidence in Telex, it could largely be traced to valid criticism of Telex's accounting methods made by the SEC and financial commentators in late **[**160]** 1969 and early 1970. Telex was using the financing method of accounting for its leases. Once a lease was signed, the equipment was accounted for as if it were sold. No provision was made for the substantial risk that the machine might not produce sufficient revenues to cover the recorded sale price. And the maintenance, remarketing, interest and other expenses on that equipment were to be charged against future periods. In this manner Telex kept its earnings, and its stock price, artificially inflated. When the bubble burst, Telex was forced to restate its earnings and the stock price sank along with investor confidence. In late 1972, the Accounting Principles Board issued opinion 27 (APB 27) mandating a more conservative approach. Telex reversed transactions it had previously booked as sales; the effect on Telex's fiscal 1973 results was a devastating $ 18 million loss. Investors and customers understandably became wary.

More than questionable accounting hurt Telex. By mid-1971 it had little to offer the customer, and what it did offer often functioned poorly. In June of 1971, Telex salesmen had only the 2420-type tape to sell; Telex's factories were not building anything else. Telex **[**161]** was slow to offer a 3420 equivalent, and as a result, other PCMs began replacing Telex's 729 and 2400-type tape drives with their 3420-types. Later, when the Telex 3420-type was in shipment, Telex expected one-half of them to be defective on arrival, and 25 percent to fail badly within the first three months of use. The Telex 2400-type tapes were also experiencing difficulties. Transamerica Corporation's own Computer Division found them "proven to be unacceptable in all regards." Telex, suffering from a lack of qualified tape engineers and field maintenance technicians, was late in starting, and even then produced poor quality equipment.

If Transamerica suffered problems indirectly through Telex, at least some part of those problems was due to the serious deterioration of relations between the two. In 1970, Transamerica invested heavily in a company called Computer Micro-Image Systems (CMS). CMS began to experience financial problems, and a worried Transamerica induced Telex to invest some time and money in CMS by holding the promised August, 1970 $ 10 million tape agreement as hostage. For its part, Transamerica agreed to pay Telex for its disk purchases at time of shipment rather **[**162]** than upon acceptance (about a 60 day "float" on $ 26,000,000 in remaining disk purchases), concluded the tape agreement, and, at least according to Telex's interpretation, promised Telex it would be held harmless from its CMS involvement. By March of 1971, Telex had invested $ 1.5 million in CMS, and CMS went into bankruptcy. When Telex tried to collect on the guarantee, Transamerica balked.

As a result of Transamerica's refusal to reimburse Telex, Telex concluded it would not be doing any additional business with Transamerica, and it would interpret existing contracts strictly in Telex's favor.

In November of 1971, Telex attempted to prematurely fulfill the substitution obligation on Transamerica's 2314-type disk. Transamerica disputed their right to do so. Maintenance also became an area of dispute, with Transamerica ultimately forced to pay Telex an additional $ 1.25 million to cover maintenance costs. And Transamerica felt that Telex's negligent record keeping was costing it money.

In sum, relations between Telex and Transamerica had broken down, Telex's **[*1018]** products were technologically outdated and of inferior quality, and investors and customers alike shied away **[**163]** from a company whose accounting practices were publicly criticized. Even if damage to Transamerica by virtue of injuries to Telex were cognizable, Transamerica's damage claim makes no provision for the other factors that materially caused Telex's problems.

Transamerica's damage claim also fails to take account of the recession that led to a decrease in demand in 1970 and 1971, and ignores the effect of the Tenth Circuit's opinion in Telex, [123] although Transamerica decided to increase the depreciation on its Telex equipment by.$ 1.4 million as a result of that decision.

---

[123] Supra n. 5.

Transamerica's revenue aspirations were built on sand. They depended on others to perform essential services, when those others had little incentive to perform. They counted on a tax benefit that was later suspended. They assumed a continued demand for third generation peripherals at a time when the fourth generation was being born. They trusted incompetent and inexperienced management. They ignored the threat of competition **[**164]** from other PCMs and the deterioration of relations with their principal supplier. And they assumed that the antitrust laws had so stifled IBM that non-competitive pricing conditions would prevail indefinitely. Factors other than IBM's conduct were the predominant cause of Transamerica's lost revenues.

According to Beckett and Rush, the plan to invest further in plug-compatible equipment was not implemented because of IBM's price cuts. This Court does not accept the single-cause theory with respect to the lost profits claim either. It does not appear the plan was ever firmly embraced by management, nor does it appear likely that it ever would have been.

The 1971-1975 Transamerica Profit and Opportunity Plan ostensibly called for a doubling of the subsidiary's portfolio, an investment of almost ten times the parent's consolidated 1970 earnings. The previous year's plan had called for a limitation on purchases, and in October 1970, the Transamerica Board, smarting from the obligations its officers had incurred, required that all major transactions involving over $ 1 million be subject to board approval. It was, of course, possible that the corporation made such an abrupt about-face, **[**165]** but the evidence that they did so is slim. There is no contemporaneous documentation of any discussions regarding the plan, nor was there ever any specification of manufacturer or equipment type. There is no evidence of any initial contract negotiations, product evaluations, or any other preparatory steps. And the Profit Plan was never approved by Transamerica's board although Transamerica Corporation's procedures called for that before Profit Plans become operative.

Transamerica appears to have been winding down its operations even before the IBM conduct at issue here. In October of 1970, its regional market offices, the contact point with manufacturers, were closed. The reasons for the cutback are evident. Computer equipment was becoming a less attractive investment. The Investment Tax Credit was suspended in 1970, and even if it were to be revived, the parent corporation had a surplus of carry over ITC anyway. Transamerica had changed its accounting procedures, and plug-compatible investments appeared much less profitable as a result. And Transamerica's track record was poor. In 1970, it recorded a $ 5.5 million pre-tax loss. One year later that loss grew to $ 9.6 million.

The **[**166]** source of funds for plug-compatible investing is also questionable. The parent's consolidated earnings were down sharply in 1970, and the TFC loan was drying up. TFC's bond rating suffered because the intra-company loan was viewed with suspicion, and TFC's creditors joined in that criticism. Because of that, Beckett decided that Transamerica should decrease the TFC loan balance to $ 100 million by the year-end 1973. But no mention is made of an alternative source of investment funds.

[*1019] APB 27, issued by the Accounting Principles Board had a heavy impact. It effectively precluded leasing companies from acting as mere financial intermediaries as Transamerica had. Transamerica would have had to shoulder some maintenance and remarketing responsibilities on its future equipment leases. But no indication appears as to how this was to be done.

The 1971-1975 Profit and Opportunity Plans were a dream. Nothing precludes a corporation from sketching its future so lightly, but the law precludes that corporation from collecting damages when the dream fails to become a reality. An antitrust plaintiff must have an intention to enter a business and certain degree of preparedness before **[**167]** a business expansion concept can be compensated in damages. [124] Transamerica has shown neither.

Plaintiff aggregated some very large numbers to represent its lost revenues and profits, and charges IBM with responsibility for the entire damage. This Court finds that Transamerica's lost revenues were predominantly caused

---

[124] *Hayes v. Solomon, 597 F.2d 958, 973 (5th Cir. 1979)*; *Martin v. Phillips Petroleum Company, 365 F.2d 629, 633-34 (5th Cir. 1966)*, Cert. denied, ***385 U.S. 991, 87 S. Ct. 600, 17 L. Ed. 2d 451 (1966)***.

by factors other than IBM's conduct, and that Transamerica's investment plan, if it ever reached the status of a corporate intention, was abandoned primarily for reasons other than the IBM actions challenged here. Under this state of the evidence, even if this Court were to find that some of all of IMB's conduct violated the Sherman Act, and that that conduct caused some material part of the loss, damages could not be fixed except by guess.

B. Transamerica's Damage Estimates Are Not Based On Credible **[**168]** Evidence.

If the causation problem could somehow be solved, if this Court were to find that IBM's conduct was the primary or sole cause of Transamerica's loss, the verdict would still be for IBM because the damage computations are not based on reasonable assumptions. The best example of that is Rush's revenue erosion factor.

It might be argued that Transamerica has made some provision for other causes by subtracting the 0-4-15 percent revenue erosion from its total revenue and profit expectations. But these numbers are no more than Rush's unsubstantiated self-interested guess. The fact that a witness has recognized other causative factors and decreased the damages by an arbitrary figure does not change the character of the result. Guesswork is guesswork, whether it originates on the witness stand or in the jury room.

If Rush were qualified as an industry or economic expert, his Ipse dixit might carry more weight; but he is not. He has not had any formal education in computer sciences or the computer industry. He displayed a minimum of technical knowledge on the witness stand; and his work experience has chiefly been as an administrator. The numbers assigned to revenue erosion were **[**169]** pulled out of thin air. There was no comparison with the off rent experiences of other leasing companies, or with similar firms in other industries. Indeed, an examination of Transamerica's off rent experience with non-plug-compatible equipment leads to the conclusion that the modest figures Rush applied are grossly understated and incurably optimistic.

There is more to substantiate the various rental lives assumed, but not enough. Wallace's depreciation lives were probably chosen with an eye toward maximizing the ITC on the equipment. They are unreasonably long. Wallace assigned the same 6 year life to the vintage 729 type tape drives as he did to the 2400 types, and selected disk subsystem lives of up to 8 years while Telex was depreciating the same equipment over four. Products not at issue here, to which Wallace also assigned long lives, suffered large amounts of off rent within a short time. The rental lives calculated from the Telex study were improperly calculated since no provision was made for the fact that the study included purchased units and rental **[*1020]** units in the same inventory curve, and there is no evidentiary support for the assumption of a ten percent float **[**170]** factor. Nothing more than the bare numbers support the Nern lives. Nern's assumptions appear nowhere in the record. The critical assumptions behind the Telex study and the Wallace lives are also missing. What assumptions do appear are untenable. Wallace assumed that the System/360 would not be displaced by the System/370, and the Telex study was based on the assumption that IBM would not do anything to improve its position in the peripherals markets.

Transamerica's lost revenue damage calculations are not based on credible evidence. Neither are the lost profits calculations.

The lost profits claims assume that manufacturers with products that would produce full rental revenues for 72 months would sell those products to Transamerica for a price equal to 27 times the monthly rental and a share of the rentals after 50 months. Only financially unstable concerns, desperately in need of cash would have done so. Telex turned down similar propositions because it found bank financing less expensive. Transamerica did enter four contracts with non-plug-compatible suppliers on comparable low multiple, quick-residual terms, but those suppliers were all financially distressed. A lost profits calculation **[**171]** that fails to provide for the contingency that a critical business partner would go bankrupt, cannot logically be predicated on a business plan that would only appeal to partners on the verge of financial disaster.

APB 27 is another factor that makes the envisioned contracts unlikely. Following that opinion, manufacturers were unable to book their transactions with leasing companies as sales if, as in the past, they retained remarketing and maintenance obligations. Few manufacturers would be willing to deal on that basis. The market for Transamerica's financing was drying up.

Transamerica was incapable of shouldering marketing and maintenance responsibilities itself and would have had to have made some provisions for those services. But no clear plan for accomplishing that emerges from the lost profits proof. This need to provide services also makes untenable the lost profits assumption that future expenses would run parallel to historical expenses.

The likelihood that, absent IBM's acts, Transamerica's expansion would have been successful, is severely undermined by the record of their dismal past. Through 1971 Transamerica lost about $ 16 million before taxes, and each year things **[**172]** were getting worse. While a past profit record might not be indispensable to lost future profits proof, [125] its absence goes a long way towards discrediting fanciful projections.

Courts have been properly sympathetic to the antitrust plaintiff's plight in proving what might have been, but not so sympathetic that they have permitted damage claims to be grounded on speculation rather than on relevant data. [126] Transamerica's damage estimates failed to meet this test. Where opinions were offered, they were not based on relevant data, and the assumptions behind those opinions were not shown or were not realistic. [127] Future profits were predicted only by assuming hypothetical transactions which never were likely to occur and were **[**173]** never even proposed. [128] And non-liability factors, which had a profound effect, were dismissed with an arbitrary **[*1021]** and insignificant revenue erosion deduction. [129]

This Court finds that Transamerica's evidence fails to afford it a basis on which it might justly and reasonably, have estimated damages that might have flowed from IBM's acts.

IX.

CONCLUSION

Transamerica, charged with proving that IBM had monopoly power, that IBM's conduct violated the Sherman Act, and that such conduct **[**174]** caused injury to Transamerica, has failed to carry its burden of persuasion on each of those critical elements.

The proof of monopoly power rested on a weak base. To find monopoly power, this Court would have to accept a narrow market definition, combine it with a distorting measurement technique, and evaluate the resulting statistic against a background that ignores the dynamic competitive history of the computer marketplace.

Damages proof also failed to persuade. Transamerica's projections were unreasonably optimistic. Its approach to causation leaves the factfinder, having found that some significant non-IBM causes were responsible for Transamerica's misfortunes, with no way to fix any damages attributable to IBM except by guess.

Finally, IBM's conduct could only be found illegal if this Court were to adopt a novel theory with serious and far reaching anticompetitive effects. This case has been, first and foremost, a case about conduct and what tactics a firm with assumed monopoly power can employ. Transamerica would subject a monopolist to punitive damages for any action that tends to preserve that market status, unless that action was inevitable. Thus, monopolists could

not **[**175]** reduce price from a profit-maximizing price, could not alter the design of a product, and could not change marketing techniques, if any alternative was open to them which would have less impact on competitors. The failure to walk the narrowest path would lead to liability because, on that theory, competition would otherwise be "unnecessarily", excluded, [130] and monopoly status would have been "willfully" [131] preserved as opposed to "thrust upon" [132] the defendant as the "passive beneficiary" [133] of natural forces.

This Court will not attempt to improve upon the careful critical analyses of the cases and language whereon Transamerica relies. [134] It suffices to say that Transamerica's interpretation of the seemingly restrictive language becomes untenable when that language is considered in **[**176]** the light of contradictory language from the same cases and conduct permitted to a monopolist in other cases. This Court's main concern here is with the consequences of Transamerica's suggested rule.

Monopolists do not wear a label proclaiming their market status. Ascertaining that status is unfortunately difficult, whether the determination is to be made by a court, or even by the suspected monopolist. A market must be defined and measured, the market's characteristics must be evaluated, and its historical performance must be considered. This appraisal of market power is time-consuming, arduous, And imprecise. As a result, one must expect that any legal rule governing a monopolist's conduct will affect all firms large enough to fear that some **[**177]** disgruntled competitor will charge them with the emotion-provoking title of "monopolist."

[*1022] Large firms attempting to conform their conduct to Transamerica's proposed rule would have a difficult time indeed. Any successful action they might take to win sales necessarily tends to improve or preserve their market position. Disappointed competitors, if they can conceive of some alternative price, product, modification or practice they would have preferred, would be encouraged to bring suit. Even if the large firm recognizes and tries to resolve the problem, it cannot assure its safety. One alternative might exclude or restrict one set of potential plaintiffs, while another set would be affected by the other alternative. Management's safest course might be to do nothing, but that, of course, would violate their duty to shareholders, and would do nothing to benefit a healthy, innovative and competitive market.

It is an unwise policy for the law to coddle competitors, especially if the protection comes at the expense of destroying a larger firm's incentive to compete. Even companies that choose to enter dominated markets must be prepared to face competition on the merits. Where **[**178]** a monopolist chooses an alternative that does not unreasonably restrict competition, the law is not offended. It is the choice of an unreasonable alternative, not the failure to choose the least restrictive alternative, that leads to liability.

IBM did not lie dead in the water when faced with competition. It took action. And the action it took may have caused some competitors to suffer more than other actions would have. But the action IBM took, under the circumstances in which it acted, did not unreasonably restrict competition, and thus, did not violate the law.

HN1[] **Pretrial Judgments, Nonsuits**

A nonsuit or directed verdict may be granted only where, disregarding conflicting evidence and giving to plaintiff's evidence all the value to which it is legally entitled, therein indulging in every legitimate inference which may be drawn from that evidence, the result is a determination that there is no evidence of sufficient substantiality to support a verdict in favor of the plaintiff. Neither the appellate court nor the lower court may weigh the evidence or consider the credibility of the witnesses. Plaintiff may rely on that portion of testimony which is favorable to him and disregard the unfavorable portions. Unless it can be said as a matter of law that no other reasonable conclusion is legally deducible from the evidence, and that any other holding would be so lacking in evidentiary support that a reviewing court would be impelled to reverse it upon appeal, or the trial court to set it aside as a matter of law, the court is not justified in taking the case from the jury.

HN4[] Antitrust & Trade Law, Sherman Act

Both the Sherman Act, *15 U.S.C.S. § 1 et seq.*, and its California equivalent, the Cartwright Act, *Cal. Bus. & Prof. Code § 16700, et seq.*, prohibit every contract, combination or trust which is formed for the purpose of restraining trade or commerce. Although the statutory language prohibiting restraints on trade or commerce is couched in all-encompassing terms in both acts, each has been interpreted by the courts to ban only unreasonable restraints. However, there are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN8[] **Price Fixing & Restraints of Trade, Tying Arrangements**

For the purposes of antitrust violation, a tying arrangement is defined as an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. Where such conditions are successfully exacted competition on the merits with respect to the tied product is inevitably curbed.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In order to prove an illegal per se tying arrangement there must be a showing that: a tying agreement, arrangement or condition existed whereby the sale of the tying product was linked to the sale of the tied product; the party had sufficient economic power in the tying market to coerce the purchase of the tied product; and a substantial amount of sale was effected in the tied product. Lastly, since the antitrust violation is a species of tort, the complaining party must prove that he suffered pecuniary loss as a consequence of the unlawful act.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN10[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The power over the tying product can be sufficient even though the power falls short of dominance and even though the power exists only with respect to some buyers in the market. Such crucial economic power may be inferred from the tying product's desirability to consumers or from uniqueness in its attributes.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Torts > Remedies > Damages > General Overview

HN11[] **Private Actions, Remedies**

In antitrust cases the common law rules of damages are not controlling. While, similar to other cases, damages cannot be awarded in antitrust cases upon sheer guesswork or speculation, the plaintiff seeking damages for loss of profits is required to establish only with reasonable probability the existence of some causal connection between defendant's wrongful act and some loss of the anticipated revenue. Once that is accomplished, the jury will be permitted to act upon probable and inferential proof and to make a just and reasonable estimate of the damage based on relevant data, and render its verdict accordingly.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN12[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The requisite control of the tying product may be inferred from the seller's success in imposing a tying condition upon a substantial amount of commerce in the tied product without any further reference to the market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN13[] **Price Fixing & Restraints of Trade, Tying Arrangements**

An illegal tying arrangement may be found if the offeror of the tying product has an economic interest in the tied product, even though the latter is manufactured or otherwise produced by another party or entity.

HN15[] **Private Actions, Remedies**

Under *Cal. Bus. & Prof. Code § 16727*, the plaintiff must establish that the tie-in substantially lessens competition. This standard is met if either the seller enjoys sufficient economic power in the tying product to appreciably restrain competition in the tied product or if a not insubstantial volume of commerce in the tied product is restrained. Under *Cal. Bus. & Prof. Code § 16720*, both conditions must be met.

Opinion by: CALHOUN

Opinion

[*257] CALHOUN, J. [*]

This is an appeal from a judgment of nonsuit rendered in favor of defendants in an action brought for violation of the California ***antitrust law*** (Cartwright Act, *Bus. & Prof. Code,* [1] *§ 16700 et seq.*).

The parties to the lawsuit are plaintiff Suburban Mobile Homes, Inc. (hereafter Suburban or appellant) and four named defendants (hereafter respondents): AMFAC Communities, Inc. (AMFAC), Instant Housing Corp. (Instant), Roberts & Aguirre Mobile Home Sales, Inc. (R & A), and S & S Mobile Home Sales, Inc. (S & S). Suburban is a mobile home dealer with its principal place of business in South San Francisco. AMFAC is the owner and developer of a mobile **[**2]** home park known as "Franciscan Bay Mobile Country Club" (hereafter Franciscan), located in Daly City, California. The three other respondents are mobile home dealers, selling mobile homes in the San Francisco trading area and elsewhere.

The centerpiece of the present litigation is the use of mobile home sites in the Franciscan. As the relevant evidence reveals, the Franciscan was developed by AMFAC by about 1971. It had 501 mobile home sites capable of accommodating double-wide mobile homes sold by Suburban. While at the outset the Franciscan was an open park where home sites were available to all buyers irrespective of from which dealer they purchased their mobile homes,

---

[*] Assigned by the Chairperson of the Judicial Council.

[1] Unless otherwise indicated, all further references will be made to the Business and Professions Code of California.

at the end of 1971 AMFAC entered into agreement with four mobile home dealers, including the three corespondents here. In essence, these agreements and the amendments thereto, **[*258]** secured 288 spaces out of the 501 total for four named participating dealers who gained exclusive right to display their mobile homes in the Franciscan. In return for an exclusive right to display their merchandise and reservation of home sites in the park, the participating dealers were obligated to pay a certain sum of money **[**3]** to AMFAC. For instance, the park promotion agreement concluded between R & A and AMFAC provided that R & A shall contribute to the park promotion and advertising costs up to $1,200 per month, and also that R & A shall pay AMFAC $200 for each coach sold in the park in consideration for reserving space for the home sold. The evidence introduced at trial showed that until fall 1972, R & A in fact paid AMFAC $500 for every coach sold in the Franciscan.

Since the sales of mobile homes are dependent upon the availability of suitable mobile home sites in the trading area, Suburban's business was seriously affected by the aforesaid restrictive agreements and the actual sales practice conducted pursuant thereto. The evidence adduced at the trial convincingly demonstrated that the older parks belonging to or surrounding the San Francisco trading area were already full prior to 1971, the opening date of the Franciscan. At the same time, it was shown that the Franciscan was an outstanding five-star park. It had large spaces and full recreational facilities, and was the only park close to San Francisco that had double-wide spaces available. The evidence as a whole leaves no doubt that the Franciscan **[**4]** was a unique park, both because of its location and superb facilities.

The record is replete with evidence that the exclusion of Suburban from the Franciscan resulted in considerable actual and/or potential loss of profit to appellant. Thus, it was shown that Suburban had a waiting list of customers for the Franciscan; that there were numerous prospects (half a dozen a week) who wanted mobile homes in the Franciscan; and that there were a number of concrete sales or potential sales which were lost because of the unavailability of mobile home sites in the Franciscan to the Suburban customers. In addition, it was statistically demonstrated that while Suburban filled 90 to 95 percent of the mobile home park vacancies in northern San Mateo County from 1971 to 1975, in the disputed period it could sell only six mobile homes of the total of 253 sales in the park.

Based upon the foregoing facts, appellant brought an action against respondents charging multiple violation of the Cartwright Act, including an illegal restraint of trade and an illegal tie-in arrangement (*§ § 16720*, *16726*, *16727*). Upon the conclusion of Suburban's evidence, the trial court refused to submit the case to **[**5]** the jury and granted respondents' motion for nonsuit. In accordance therewith, judgment was entered as to all causes of action in favor of respondents. The appeal is taken from the judgment.

Appellant contends on appeal that the trial court erred in granting respondents' motion for nonsuit, because the evidence of record supports the elements of an illegal tie-in arrangement which constitutes a per se violation of the Cartwright Act (*§ § 16720*, *16726*, *16727*). In the alternative, appellant argues that the evidence is sufficient to prove a restraint of trade under the "rule of reason" standard (*§ 16720*; *Standard Oil Co. v. United States (1911) 221 U.S. 1 [55 L.Ed. 619, 31 S.Ct. 502]*; *Marin County Bd. of Realtors, Inc. v. Palsson (1976) 16 Cal.3d 920, 930 [130 Cal.Rptr. 1, 549 P.2d 833]*), even if the preconditions of an unlawful tying arrangement or agreement are absent. We are persuaded that respondents' conduct, as reflected by the evidence, clearly amounts to an illegal tying arrangement which, under well established case law, constitutes a per se violation of both the federal ***antitrust law*** (Sherman Act, *15 U.S.C. § 1 et seq.*) and the California Cartwright Act (*§ § **[**6]** 16720*, *16726*). Accordingly, we are compelled to reverse the judgment.

Before discussing appellant's contention on the merit, we underline a few important preliminary matters. First is the legal principle under which a nonsuit may be **[*259]** granted. It has become the established law of this state that ***HN1***[] a nonsuit or directed verdict may be granted only where, disregarding conflicting evidence and giving to plaintiff's evidence all the value to which it is legally entitled, therein indulging in every legitimate inference which may be drawn from that evidence, the result is a determination that there is no evidence of sufficient substantiality to support a verdict in favor of the plaintiff (*O'Keefe v. South End Rowing Club (1966) 64 Cal.2d 729, 733 [51 Cal.Rptr. 534, 414 P.2d 830, 16 A.L.R.3d 1]*; *Morgenroth v. Pacific Medical Center, Inc. (1976) 54 Cal.App.3d 521, 530 [126 Cal.Rptr. 681]*). Neither the appellate court nor the lower court may weigh the evidence or consider the credibility of the witnesses (*Lasry v. Lederman (1957) 147 Cal.App.2d 480 [305 P.2d 663]*). Plaintiff may rely on that portion of testimony which is favorable to him and disregard the unfavorable portions **[**7]** (*Anthony v. Hobbie (1945) 25 Cal.2d 814 [155 P.2d 826]*). Unless it can be said as a matter of law that no other reasonable conclusion is legally deducible from the evidence, and that any other holding would be so lacking in evidentiary support that a reviewing court would be impelled to reverse it upon appeal, or the trial court to set it aside as a matter of law, the court is not justified in taking the case from the jury (*Estate of Lances (1932) 216 Cal. 397, 400 [14 P.2d 768]*; *Umsted v. Scofield Eng. Const. Co. (1928) 203 Cal. 224, 228 [263 P. 799]*).

The second point is that ***HN2***[] summary proceedings are not favored in antitrust suits. As the court put it in *Poller v. Columbia Broadcasting (1962) 368 U.S. 464, 473 [7 L.Ed.2d 458, 464, 82 S.Ct. 468]*, "summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot." (See also *Fortner Enterprises v. U.S. Steel (1969) 394 U.S. 495, 500 [22 L.Ed.2d 495, 503, 89 S.Ct. 1252]*; *Santa Clara Valley Distributing v. Pabst Brewing (9th Cir. 1977) 556 F.2d 942, 944-945*.)

Finally, **[**8]** it has been widely recognized that ***HN3***[] *sections 16720* and *16726* of the Cartwright Act were patterned after the Sherman Act (*15 U.S.C. § 1 et seq.*), and both statutes have their roots in the common law (*Corwin v. Los Angeles Newspaper Service Bureau, Inc. (1971) 4 Cal.3d 842, 852 [94 Cal.Rptr. 785, 484 P.2d 953]*). Consequently, federal cases interpreting the Sherman Act are applicable to problems arising under the Cartwright Act (*Marin County Bd. of Realtors, Inc. v. Palsson, supra, 16 Cal.3d 920, 925*; *Chicago Title Ins. Co. v. Great Western Financial Corp. (1968) 69 Cal.2d 305, 315 [70 Cal.Rptr. 849, 444 P.2d 481]*; *Sherman v. Mertz Enterprises (1974) 42 Cal.App.3d 769, 775 [117 Cal.Rptr. 188]*). With these preliminary considerations in mind, next we set out the legal principles governing the tying agreements or arrangements and apply them to the facts of the instant case.***HN4***[]

Both the Sherman Act and its California equivalent, the Cartwright Act, prohibit every contract, combination or trust which is formed for the purpose of restraining trade or commerce. [2] Although the statutory language prohibiting restraints on trade or commerce is couched in all-encompassing terms in both **[**9]** acts, each has been interpreted by the courts to ban only unreasonable restraints (*Standard Oil Co. v. United* ***[*260]*** *States, supra, 221 U.S. 1, 60 [55 L.Ed. 619, 645]*; *People v. Building Maintenance etc. Assn. (1953) 41 Cal.2d 719, 727 [264 P.2d 31]*). However, as the United States Supreme Court put it in *Northern Pac. R. Co. v. United States (1958) 356 U.S. 1, 5 [2 L.Ed.2d 545, 549-550, 78 S.Ct. 514]*, "there are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. This principle of per se unreasonableness not only makes the type of restraints which are proscribed by the Sherman Act more certain to the benefit of everyone concerned, but it also avoids the necessity for an incredibly complicated and prolonged economic investigation into the entire history of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable--an

---

[2] ***HN5***[] United States Code, *section 1* (Sherman Act) provides in part that "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal."

HN6[] *Section 16720* of the Cartwright Act sets out in relevant part that "A trust is a combination of capital, skill or acts by two or more persons for any of the following purposes:

"(a) To create or carry out restrictions in trade or commerce.

"(b) To limit or reduce the production, or increase the price of merchandise or of any commodity.

"(c) To prevent competition in manufacturing, making, transportation, sale or purchase of merchandise, produce or any commodity." (Italics added.)***HN7***[]

Section 16726, in turn, reads that "Except as provided in this chapter, every trust is unlawful, against public policy and void." (Italics added.)

inquiry so often wholly fruitless when **[**10]** undertaken. Among the practices which the courts have heretofore deemed to be unlawful in and of themselves are price fixing [citation]; division of markets [citation]; group boycotts [citation]; and tying arrangements [citation]." (Italics added.)

HN8[] For the purposes of antitrust violation, a tying arrangement is defined **[**11]** as "an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. Where such conditions are successfully exacted competition on the merits with respect to the tied product is inevitably curbed." (*Northern Pac. R. Co. v. United States, supra, 356 U.S. at pp. 5-6 [2 L.Ed.2d at p. 550*]; *Corwin v. Los Angeles Newspaper Service Bureau, Inc., supra, 4 Cal.3d at p. 856*.) The evil accompanying the tying arrangement is described as follows: "'[T]ying agreements serve hardly any purpose beyond the suppression of competition.' *Standard Oil Co. of California v. United States, 337 U.S. 293, 305-306*. They deny competitors free access to the market for the tied product, not because the party imposing the tying requirements has a better product or a lower price but because of his power or leverage in another market. At the same time buyers are forced to forego their free choice between competing products. For these reasons 'tying agreements fare harshly under the laws forbidding restraints of trade.' *Times-Picayune Publishing Co. v. United States, [**12] 345 U.S. 594, 606*." (*Northern Pac. R. Co. v. United States, supra [2 L.Ed.2d at p. 550*].) Tying arrangements are illegal per se "whenever a party has sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product . . ." (*Northern Pac. R. Co. v. United States, supra, at p. 6 [2 L.Ed.2d at p. 550*]), and when "a total amount of business, substantial enough in terms of dollar-volume so as not to be merely de minimis, is foreclosed to competitors by the tie." (*Fortner Enterprises v. U. S. Steel, supra, 394 U.S. at p. 501 [22 L.Ed.2d at p. 504*].)

In sum, *HN9*[] in order to prove an illegal per se tying arrangement there must be a showing that: a tying agreement, arrangement or condition existed whereby the sale of the tying product was linked to the sale of the tied product; the party had sufficient economic power in the tying market to coerce the purchase of the tied product; and a substantial amount of sale was effected in the tied product. Lastly, since the antitrust violation is a species of tort, the complaining party must prove that he suffered pecuniary loss as a consequence of the unlawful act (*Beegle v. Thomson [**13] (7th Cir. 1943) 138 F.2d 875, 881* [59 U.S. Pat.Q. 416]; *Alberto-Culver Company v. Andrea Dumon, Inc. (N.D. Ill. 1969) 295 F. Supp. 1155, 1157* [160 U.S. Pat.Q. 822]; *McCormack v. Theo. Hamm Brewing Co. (D. Minn. 1968) 284 F.Supp. 158, 164)*. As will be demonstrated below, all four conditions enumerated above find abundant support in the record which is but another way of saying that appellant made out a prima facie case for the consideration of the jury **[*261]** under the doctrine of an illegal tying arrangement.

(a) Existence of Tying Arrangement: As noted earlier, the existence of a tying arrangement between AMFAC and the four participating mobile home dealers (including respondents Instant, R & A and S & S) was evidenced first by the December 29, 1971, agreement which explicitly put aside and reserved 288 out of 501 home sites in the park for those dealers who displayed their mobile homes in the Franciscan and who, under the terms of other agreements and understandings, were bound to pay monetary contribution to AMFAC after each coach that was sold in the park. In addition to the written agreements, there is a host of evidence showing that the restrictive policy agreed upon **[**14]** by the parties was strictly carried out in the every day practice. For example, Instant told people coming to see its mobile home display that it would be necessary to purchase the home from it or other dealers in the area (not Suburban) if they wanted a space in the Franciscan. Mr. Cole, the park manager of AMFAC, also advised people that reservations in the park were up to the management, and that anyone reserving a space for his mobile home would have to purchase the home from one of the dealers who displayed homes in the park. Mr. O'Neil, the sales representative of R & A, likewise admitted that when people came to the Franciscan they were told that they must buy through one of the displaying dealerships (most specifically through R & A) if they wanted to get a home site in the park. The above testimonies were reaffirmed by individual home buyers as well. Thus, Mr. Bishop testified that although he wanted to buy a mobile home from Suburban, he was told by Instant that only certain dealers could get their homes on the Franciscan spaces. Mrs. Varni, who had already made a deposit in order to purchase a mobile home from Suburban, rescinded the deal and bought her coach from R & A, **[**15]** upon learning from AMFAC that only those people could move into the park who bought their homes from one of the participating dealers. Finally, the February 27, 1972, advertisement published in the San Francisco Chronicle also made it clear that the potential buyers had to select their home from the mobile homes on display in the park.

(b) Economic Power of AMFAC: Before resorting to the record to show that AMFAC possessed sufficient economic power to impose an appreciable restraint on the free competition of the tied product (here, mobile homes), we emphasize that ***HN10***[] the power over the tying product (here, home sites) can be sufficient even though the power falls short of dominance and even though the power exists only with respect to some buyers in the market. As the cases unanimously underline, such crucial economic power may be inferred from the tying product's desirability to consumers or from uniqueness in its attributes (*United States v. Loew's, Inc. (1962) 371 U.S. 38, 45 [9 L.Ed.2d 11, 18, 83 S.Ct. 97]*; *Fortner Enterprises v. U.S. Steel, supra, 394 U.S. at p. 503 [22 L.Ed.2d at p. 505*]; *Lessig v. Tidewater Oil Company (9th Cir. 1964) 327 F.2d 459, 470)*.

In the case **[**16]** at bench, the evidence demonstrates that the Franciscan was both desirable and unique within the meaning of the aforestated rule. As mentioned earlier, the Franciscan had an excellent location attracting many potential mobile home customers in the San Francisco Bay Area. The other parks within commuting distance of San Francisco (i.e., in San Mateo, Santa Clara, Alameda, Contra Costa and Marin Counties), with a few exceptions, were filled at the time the Franciscan opened in 1972. The desirability of the Franciscan was demonstrated inter alia by the fact that Suburban had a backlog of customers waiting for spaces in the Franciscan, and that dozens of other customers expressed their interest in placing their mobile homes in the Franciscan. At the same time, the Franciscan was not only highly desired but also unique. As pointed out earlier, it was a first-class park with large sites and full recreational facilities, including swimming pools. Moreover, it was the only park close to and within commuting distance of San Francisco that had spaces for double-wide coaches sold by Suburban.

[*262] (c) Substantiality of Sales: The record is also revealing with respect to the third element **[**17]** of an illegal tie-in arrangement, that is the requisite of a substantial volume of sales in the tied product. A short summary of the pertaining evidence discloses that the sale of mobile homes was tied up as to 288 spaces out of 501. The data presented at the trial substantiate that appellant's rivals took full advantage of the illegal tying agreement. Out of the 253 sales effected in the park, 247 were made by appellant's competitors (113 by R & A, 62 by Instant, 51 by S & S, and 16 all others), and appellant was able to sell only 6 mobile homes out of the total of 253. Considering the circumstance that in the period in question the sales price of single-wide mobile homes ranged from $7,000 to $12,000, and the double-wides from $10,000 to $20,000, even taking a low average of $10,000 per coach, the amount of sales in the tied product exceeds $2,500,000. This volume of sales, of course, cannot be considered insubstantial or de minimis, especially in light of the case law which held that the sum of $60,800 was regarded to be a not insubstantial amount of commerce in *United States v. Loew's, Inc., supra, 371 U.S. 38, 49 [9 L.Ed.2d 11, 20]*, and likewise the sum of almost $200,000 was **[**18]** not looked upon as "paltry or 'insubstantial'" in *Fortner Enterprises v. U. S. Steel, supra, 394 U.S. 495, 502 [22 L.Ed.2d 495, 504]*.

(d) Proof of Damages: We are equally satisfied appellant provided sufficient proof that as a result of the illegal tying arrangement it suffered considerable loss by virtue of loss of profit. In this connection, it bears emphasis that ***HN11***[] in antitrust cases the common law rules of damages are not controlling. While, similar to other cases, damages cannot be awarded in antitrust cases upon sheer guesswork or speculation, the plaintiff seeking damages for loss of profits is required to establish only with reasonable probability the existence of some causal connection between defendant's wrongful act and some loss of the anticipated revenue (*Flintkote Company v. Lysfjord (9th Cir. 1957) 246 F.2d 368, 392)*. Once that has been accomplished, the jury will be permitted to act upon probable and inferential proof and to "make a just and reasonable estimate of the damage based on relevant data, and render its verdict accordingly." (*Bigelow v. RKO Radio Pictures (1946) 327 U.S. 251, 264 [90 L.Ed. 652, 660, 66 S.Ct. 574]*.) This is in line with the California **[**19]** authorities which emphasize that while the plaintiff must show with reasonable certainty that he has suffered damages by reason of the wrongful act of the defendant, once the cause and existence of damages have been so established, recovery will not be denied because the damages are difficult to ascertain with precision (*Stott v. Johnston (1951) 36 Cal.2d 864, 875 [229 P.2d 348, 28 A.L.R.2d 580]*). On the contrary, the law only requires that some reasonable basis of computation be used and will allow damages so computed even if the result has been reached by way of approximation (*Allen v. Gardner (1954) 126 Cal.App.2d 335, 340 [272 P.2d 99]*). And where, as here, the operation of an established business was prevented or interrupted by the tort of the defendants, it has been held that the loss of prospective profits may be proven by the past volume of business and other provable data relevant to the probable future sales (*Grupe v. Glick (1945) 26 Cal.2d 680, 692 [160 P.2d 832]*; *Gainer v. Storck (1959) 169 Cal.App.2d 681, 687-688 [338 P.2d 195]*).

Appellant here established with reasonable certainty the required causal connection between respondents' wrongful conduct and its **[**20]** business loss suffered as a result of such conduct, and also provided sufficient relevant data upon which the extent of its lost profit may be ascertained by the jury by way of a reasonable estimate or approximation. To begin with, appellant introduced proof that as a consequence of the restrictive practices of respondents, its share in the mobile homes sales was drastically reduced in 1972. Thus, it was shown that while previously Suburban was one of the most successful mobile home dealers in the area capturing the lion's share of the market (90-95% of sales in northern San Mateo County and 50-60% of sales in the Pacific Skies Estate in Pacifica), it sold but a minimal **[*263]** 2.37 percent of mobile homes in the Franciscan in 1972. Moreover, appellant introduced concrete evidence as to individual losses suffered as a result of the oppressive sales policy of the respondents. The most notable of these instances were the loss of sale or potential sale to Bracato, Sinnard, Bishop, Ellis, Scott, Madrone, and Varni. Finally, Mr. Brayshaw, who was employed by Suburban as a salesman from 1971 to 1975, testified that as many as half a dozen prospects a week told him that they could not **[**21]** buy a mobile home from him for use in the Franciscan. If the aforesaid evidence is considered together with the testimony of Mr. Fischer, the president of Suburban, who explained that the net profit on a single-wide mobile home was about $1,500, and about $2,100 on a double-wide coach, it becomes clear that the jury was provided with a solid basis upon which to calculate or at least estimate the amount of damages incurred by the appellant.

Although the foregoing discussion leaves no doubt that appellant made out a prima facie case of an illegal per se tying arrangement which should have been submitted to the jury for proper consideration and resolution, respondents nonetheless insist that the granting of nonsuit was proper in the present case because: appellant failed to introduce evidence as to the relevant geographic market; an actionable tying arrangement requires that both the tying product and the tied product be sold or leased by the same entity; the proof of damages was inadequate; and appellant failed to introduce evidence to prove actual exercise of economic power--coercion. We find no merit in any of these contentions.

Respondents' first argument, that the delineation **[**22]** or proof of the relevant geographic market is a conditio sine qua non to the establishment of an actionable tying arrangement, flies directly in the face of well settled law. As pointed out earlier, the standard of illegality under the tying theory is that the seller must have "sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product . . ." (*Northern Pac. R. Co. v. United States, supra, 356 U.S. at p. 6 [2 L.Ed.2d at p. 550*]). Consistently therewith, it has been amplified that "The requirement that a 'not insubstantial' amount of commerce be involved makes no reference to the scope of any particular market or to the share of that market foreclosed by the tie" (*Fortner Enterprises v. U.S. Steel, supra, 394 U.S. at p. 501 [22 L.Ed.2d at pp. 503-504*]); and that "Since the requisite economic power may be found on the basis of either uniqueness or consumer appeal, and since market dominance in the present context does not necessitate a demonstration of market power . . ., it should seldom be necessary in a tie-in sale case to embark upon a full-scale factual inquiry into the scope of the relevant market for **[**23]** the tying product and into the corollary problem of the sellers's percentage share in that market." (*United States v. Loew's, Inc., supra, 371 U.S. at p. 45, fn. 4 [9 L.Ed.2d at p. 18, fn. 4*].) (Italics added.) Indeed, ***HN12***[] the requisite control of the tying product may be inferred from the seller's success in imposing a tying condition upon a substantial amount of commerce in the tied product without any further reference to the market (*Lessig v. Tidewater Oil Company, supra, 327 F.2d 459, 469)*.

Respondents' next contention is also mistaken. It has been established that an illegal tying arrangement does not require that one party or entity offer both the tying product and the tied product. Contrary to respondents' assertion, such violation ***HN13***[] may be found if the offeror of the tying product has an economic interest in the tied product, even though the latter is manufactured or otherwise produced by another party or entity.

The leading case dealing with that very issue is *Osborn v. Sinclair Refining Company (4th Cir. 1960) 286 F.2d 832*. In Osborn, defendant Sinclair, an oil refining company, entered into an agreement with Goodyear Tire and Rubber Company. Under the terms of the arrangement **[**24]** Sinclair agreed to sell and promote Goodyear tires, batteries and accessories through its filling station **[*264]** operators and in exchange Goodyear agreed to pay 5-10 percent commission to Sinclair on the Goodyear merchandise sold. In order to carry out the agreement, Sinclair imposed upon its filling station dealers the requirement that they purchase a certain quantity of Goodyear products and conditioned the continued sale of gasoline to them on the purchase of Goodyear merchandise. Osborn, a filling station operator who was terminated because of failing to purchase sufficient quantities of Goodyear tires, batteries and accessories, brought an antitrust suit against Sinclair, charging that the conduct in question constituted an unlawful tying arrangement under the Sherman Act. The court found for the plaintiff and held that the tying arrangement in question was illegal per se, because it involved a not insubstantial amount of commerce. As to the contention that the tying and tied products were not produced or sold by the same entity and therefore a crucial element of an illegal tie-in was lacking, the court had the following to say: "The perniciousness of the imposed tie-in **[**25]** is aggravated by the fact that the defendant is not even in the business of selling the tied products, but is employing its economic power in the gasoline industry to force his dealers to do business with a supplier in another industry under an arrangement that yields the defendant an extraneous revenue. The defendant in this case goes a step further than the supplier in the usual tie-in case, for here the tied product is not even handled or sold by the defendant, but it farms out to another, for a price, its coercive economic power." (*Osborn v. Sinclair Refining Company, supra, pp. 839-840*, italics added.)

Osborn is on all fours with the case at bench. Similar to Sinclair, AMFAC, the owner of the tying product, exerted its coercive economic power to restrict the trade of mobile homes (the tied product) sold by third parties in return for extra benefit extorted from the latter parties. Consequently, what has been said in Osborn, is equally applicable to the present case.

We note in passing that *Crawford Transport Company v. Chrysler Corporation (6th Cir. 1964) 338 F.2d 934*, and *Nelligan v. Ford Motor Company (W.D.S.C. 1958) 161 F. Supp. 738*, upon which respondents primarily rely, **[**26]** are clearly distinguishable from Osborn. The crucial distinguishing factor is that unlike in Osborn (and the case at bench), the seller of the tying product did not receive direct benefit from the tying arrangement in either Crawford or Nelligan.

Respondents' third claim, that the evidence of loss produced by appellant was inadequate, has been fully discussed and answered in the previous chapter and requires no repeated elaboration here.

Respondents' fourth claim is that there was no evidence introduced to show that AMFAC utilized economic power to coerce an appreciable number of lessees of mobile home spaces to purchase mobile homes from the participating dealers. This contention is without merit. "***HN14***[] Coercion occurs when the buyer must accept the tied item and forego possibly desirable substitutes." (*Moore v. Jas. H. Matthews & Co. (9th Cir. 1977) 550 F.2d 1207, 1217*.) As discussed previously in relation to the existence of a tying arrangement, the record makes it abundantly clear that many buyers had to accept the tied product and forego possibly desirable substitutes.

This brings us to two more unresolved questions. One is whether in the circumstances of the present case **[**27]** an unlawful tying arrangement can arise also under *section 16727*. [3] This question gains some **[*265]** significance because the burden of proving an illegal tying arrangement differs somewhat under *section 16720* and *section 16727*. ***HN15***[] Under *section 16727* the plaintiff must establish that the tie-in substantially lessens competition. This standard is met if either the seller enjoys sufficient economic power in the tying product to appreciably restrain competition in the tied product or if a not insubstantial volume of commerce in the tied product is restrained. Under *section 16720* standard, both conditions must be met (*MDC Data Centers, Inc. v. International Bus. Mach. Corp. (E.D. Pa. 1972) 342 F. Supp. 502, 504)*.

---

[3] ***HN16***[] *Section 16727* reads that "It shall be unlawful for any person to lease or make a sale or contract for the sale of goods, merchandise, machinery, supplies, commodities for use within the State, or to fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement or understanding that the lessee or purchaser thereof shall not use or deal in the goods, merchandise, machinery, supplies, commodities, or services of a competitor or competitors of the lessor or seller, where the effect of such lease, sale, or contract for sale or such condition, agreement or understanding may be to substantially lessen competition or tend to create a monopoly in any line of trade or commerce in any section of the State." (Italics added.)

[28]** In addressing the merit of the issue, we agree with respondents that *section 16727* is based on section 3 of the Clayton Act (*15 U.S.C. § 14*), hence federal decisions interpreting section 3 of that act are applicable (*Chicago Title Ins. Co. v. Great Western Financial Corp., supra, 69 Cal.2d at p. 315*). The federal cases, in turn, explain that the statutory word "commodities" in section 3 of the act obtains only to goods, wares, merchandise, machinery, supplies and other similar movable items which do not include land (*Baum v. Investors Diversified Services, Inc. (7th Cir. 1969) 409 F.2d 872, 875*; *United States v. Investors Diversified Services (D. Minn. 1951) 102 F. Supp. 645, 648)*. It is well to remember that in the case at bench the tying product is not a movable item but rather is land, more specifically, lease of land. It thus falls squarely within *N.W. Controls, Inc. v. Outboard Marine Corporation (D. Del. 1971) 333 F. Supp. 493, 500*, where the court held that "***HN17***[] If the tie does not involve a commodity but concerns land, services or credit, which do not fit the Clayton Act's language, it is governed by the Sherman Act and the plaintiff is required to bear the additional burden **[**29]** of proving that the defendant's economic power with respect to the tying product is sufficient to produce an appreciable restraint." (Italics added.) *Marin County Bd. of Realtors, Inc. v. Palsson, supra, 16 Cal.3d 920*, cited by appellant, does not control the situation here. In Palsson, the word "commodity" was interpreted under *section 16720*, the equivalent of *section 1* of the Sherman Act, and as a consequence it did not cover *section 16727* which is governed by the Clayton Act and the case interpretation thereunder.

Turning to the last issue, we note appellant's contention that it is entitled to recover also under the "rule of reason" theory has been raised only as an alternative if we would find that the elements of an unlawful tie-in have not been established. Since we have concluded that appellant has made out a prima facie case of an actionable tying arrangement under *section 16720*, the complex issues raised in appellant's alternative argument need not be reached.

That portion of the judgment granting a nonsuit as to the tie-in cause of action is reversed; in all other respects the judgment is affirmed.

Taylor, P. J., and Miller, J., concurred.

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] Sherman Act, Scope

Price fixing is contrary to the policy of competition underlying the Sherman Act, *15 U.S.C.S. § 1 et seq.*, and its illegality does not depend on a showing of its unreasonableness, since it is conclusively presumed to be unreasonable. It makes no difference whether the motives of the participants are good or evil; whether the price fixing is accomplished by express contract or by some more subtle means; whether the participants possess market control; whether the amount of interstate commerce affected is large or small; or whether the effect of the agreement is to raise or to decrease prices.

Civil Procedure > Trials > Jury Trials > Jury Deliberations

HN15[] Jury Trials, Jury Instructions

The duration of the period during which plaintiff might be expected to profit will vary from case to case; it is susceptible of no precise formulation, and must be left to the processes of the jury informed by the presentation of conflicting evidence. The court might properly instruct the jury that it may consider as one factor in its deliberations the length of time which plaintiff had been in business as of the time of defendant's anticompetitive actions; but the youth of a business, like the precise manner of its doing-in, will never alone be enough to justify severe restrictions upon the duration of damages.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Relief From Judgments > Additur & Remittitur > General Overview

Civil Procedure > ... > Relief From Judgments > Additur & Remittitur > Remittiturs

HN16[] Relief From Judgments, Motions for New Trials

The court may condition a new trial on remittitur if it feels strongly that the jury verdict is excessive. But it is arbitrary and improper to limit damages as a matter of law to the precise period of plaintiff's business operations if the reason for that limitation is either the means used to drive plaintiff out of business or the relatively short history of his business before its demise.

Opinion

[*876] Defendant-appellant, American Oil Company (Amoco), appeals from a judgment entered against it by the district court [1] upon a jury verdict of $ 100,000 (trebled by the court under the antitrust laws to $ 300,000 plus attorney fees and costs) and punitive damages of $ 25,000. Numerous issues are raised, including insufficiency of the evidence to create submissible jury issues on plaintiff's claims. We affirm on condition that plaintiff-appellee, George Arnott, file a remittitur of all damages exceeding $ 125,000 plus interest and costs.

[2]** This action involves the relationship between a major oil company, Amoco (often referred to in the record as Standard Oil), and George Arnott, one of its service station dealers. On August 6, 1973, Amoco terminated Arnott as a Standard Oil dealer by terminating his lease and evicting him from the service station. Arnott's complaint alleged, and the jury found in answer to special interrogatories accompanying the general verdict, that (1) Amoco was guilty of false and fraudulent representations in inducing Arnott to execute the service station lease agreement; [2] **[**3]** (2) Amoco breached the fiduciary duty owed to Arnott by terminating his lease without good cause and by not dealing with Arnott in good faith during the term of the lease agreement; (3) Amoco was guilty of a retail price-fixing combination in violation of the antitrust laws; and (4) Amoco breached its promise to pay certain legal fees and expenses in the amount of $ 393.75 incurred by Arnott in a state court action involving a suit brought by Amoco against Arnott and the former lessee of the service station in question. [3]

[*877] I. Facts.

The record when viewed most favorably to the jury verdict for Arnott discloses the following. In October 1971 Arnott was operating a Standard Oil station in Minneapolis, Minnesota, [4] when he was approached by Amoco's sales manager for the Sioux Falls district, Dick Lucas, about operating a Standard station at an interstate location in Sioux Falls, South Dakota. Arnott declined. He was again contacted by Lucas in late 1971 and, as a result, flew to Sioux Falls. Lucas showed Arnott projected profit figures on the service station which were considerably better than those from Arnott's Minneapolis station. Arnott agreed **[**4]** to make the change. He entered into a lease agreement dated February 18, 1972, for a one-year period. It was then a standard policy of Amoco to issue only one-year leases, but there was also evidence at the trial that these leases were routinely renewed on an annual basis if the dealer operated the station in a reasonable manner. Arnott testified that it was his understanding that as long as he operated the station in a reasonable manner and it was a profitable venture for himself and Standard Oil, he could have it for as long as he wanted, which was in accord with his experience as a Standard Oil dealer.

The lease required the service **[**5]** station to remain open twenty-four hours a day. There was no specific agreement that Amoco would supply any specified amount of gasoline to the station. The lease was later amended in certain details. At the time the lease was executed, Arnott was given a written Statement of Policy issued by Amoco which set out the dealer-company relationship. Arnott was familiar with it as it was read as a part of the dealer indoctrination schools which Arnott attended and was followed by Amoco at Arnott's prior Standard Oil stations.

---

1 The Honorable Fred J. Nichol, Chief Judge, United States District Court for the District of South Dakota.

2 Arnott also claimed that during the operation of the lease agreement Amoco misrepresented the benefits to be received by Arnott from the installation of a carwash.

3 In instructing the jury the court stated: "This is not disputed by the plaintiff (sic)." No further reference is made to this $ 393.75 item until Amoco in its reply brief complains that the court elected not to charge the jury on this issue and thus the judgment should be reversed. Earlier in the trial proceedings Amoco's counsel indicated there was no dispute about this item. Under the circumstances we pretermit any further discussion of the same.

4 Prior thereto Arnott, after attending a two-week training school sponsored by Amoco, had operated Standard Oil stations at Lake Preston, Wessington Springs, and Huron, South Dakota, during the period 1960-67. He discontinued his dealership in 1967 to become a life insurance salesman. In 1970, after again attending a dealer training school, he opened the Minneapolis station.

The Statement of Policy contained several provisions which were repeatedly violated by Amoco employees. [5] The Policy provisions **[*878]** which the record discloses were violated by Amoco may be summarized as follows: (1) Arnott would be an independent businessman who would have the right to run his station free from coercion or pressure on the part of any company representative; (2) no company representative would bring any pressure to bear on Arnott if he chose to handle competitive brands of motor oils; (3) with respect to tires, batteries, and accessories, Arnott would have complete freedom to buy these products from whomever he chose; the company would **[**6]** not tolerate coercion, harassment, or improper pressure of any kind by its salesmen in the sale of these products; (4) Arnott would have the absolute right to set his own resale price with respect to all Standard Oil products, including gasoline, and would be free to display and promote all products as he saw fit; and (5) Arnott would not be pressured into participating in advertising, sales promotions, or merchandising programs sponsored by the company.

[7]** On several occasions when Arnott placed competitive brands on display along with Standard Oil products, he was instructed by Amoco to remove the same. On one occasion Arnott purchased and placed on display Goodyear tires. Amoco's highest ranking dealer representative in South Dakota, Jack Reutschler, told Arnott that he should return the Goodyear tires and display only Atlas tires (Standard's brand) if he wanted to continue to operate the station. Arnott returned the Goodyear tires and discontinued selling them. Furthermore, Arnott's purchase of Standard's motor oil from a local wholesale distributor was discontinued by the wholesaler on instructions of Amoco, thereby requiring Arnott to purchase motor oil directly from Amoco. Arnott was also required to purchase Green Stamps, which he did at a cost of $ 3,000. Amoco threatened nonrenewal of his lease if he refused to do so. During the time Arnott operated his station, he received telephone calls from Amoco representatives instructing him to raise or lower his retail gasoline prices. When he deviated from Amoco pricing directives, Arnott was threatened with nonrenewal of his lease.

In addition, the evidence discloses that **[**8]** during the course of the lease agreement Amoco misrepresented the benefits to be received by Arnott for the installation of a carwash. Arnott was persuaded to purchase a carwash from Amoco for $ 15,430. In turn, a lease rider effective June 1, 1972, was entered into whereby Arnott was to receive a minimum monthly rebate. On October 13, 1972, Amoco cancelled the carwash rider agreement and

---

[5] Since the Statement of Policy contained several representations which Arnott claims were false and fraudulent and made with intent to deceive, which were relied upon by Arnott in entering into the lease agreement with Amoco, and which form the basis for his claim for damages as a result thereof, pertinent portions are set out as follows:

STATEMENT OF POLICY

Since we first began leasing service stations to independent dealers over 35 years ago, this company has been committed to a policy which recognizes that the dealers it serves are independent businessmen who have the right to run their stations free from coercion or improper pressure on the part of any Company representative. * * *.

FIRST, with respect to our gasoline, we believe every dealer must use his best efforts to promote their sale to the motorist. We believe every dealer should provide prompt and courteous service and just treatment to customers, hire adequate help, maintain reasonable hours of operation and keep the premises in a clean and attractive condition.

SECOND, with respect to motor oils, we expect you as a minimum to stock and display our line of oils, since most motorists who buy our gasolines also wish to purchase our motor oils. However, no Company representative may bring any pressure to bear on you if you also choose to handle some competitive brands.

THIRD, with respect to tires, batteries, and accessories, you have complete freedom to buy these products from whomever and in whatever quantities you choose. The Company will not tolerate coercion, harassment, or improper pressure of any kind by our salesmen in the sale of these products. However, because we believe our line of TBA offers you an unparalleled opportunity for additional profit, we expect our salesmen to call your attention to the merits of our products and try to sell them to you.

FOURTH, with respect to all products, you have an absolute right to set your own resale prices except in states where Standard Oil products are fair traded. You also are free to display and promote your products as you see fit. While we have developed a wide variety of advertising, sales promotion and merchandising programs which we believe will assist you in your sales efforts, you are free to reject them if you desire. We will, of course, give you our suggestions and advice on all of these matters based on our long experience in the business, but you alone must decide your own course of action.

presented Arnott with a new lease that substantially increased the amount of gallonage sales necessary before a rebate could be realized. This had the effect of reducing by one-half the monthly rental rebate paid to Arnott under the carwash agreement. In addition, the carwash installation necessitated the removal of a car hoist in one of the service bays. An Amoco representative stated that a new hoist compatible with the carwash would be installed. The new hoist was never received, and thus the station's capacity for mechanical work was reduced by half.

The difficulties Arnott had with Amoco over the misrepresentations made orally and those contained in the Statement of Policy and the carwash agreement described above took place during the first year Arnott operated the station. On one occasion **[**9]** a representative of Amoco suggested that Arnott move to a new location which was less desirable. Arnott refused to consider it.

Arnott signed a new lease agreement on December 8, 1972, effective February 19, 1973, for an additional one-year term. Arnott was not given a copy of the executed lease until June 1973. During the interim from February through May 1973 Arnott operated the station without a lease. He was advised by Amoco representatives that he was on probation and would not be given a lease unless he agreed to abide by the prices set by Amoco and to participate in their promotional programs. Arnott agreed **[*879]** to be cooperative in order to secure the lease renewal.

However, the problems continued. Amoco representatives visited the station twice a week. If matters were not handled to their satisfaction, Arnott was reminded that if he wanted to continue at his location, he would have to comply with Amoco's requirements.

The severe nationwide gas shortage which occurred in the spring of 1973 brought additional problems. On May 1, 1973, Amoco established an allocation program for each Standard Oil dealer. Arnott followed the allocation program and limited sales **[**10]** to customers. Nevertheless, he often exceeded his daily allocations and on several occasions ran out of gasoline.

Eventually Amoco's representative, Dick Lucas, suggested a program whereby Arnott was to place signs up in the daytime indicating that he was out of gasoline and then in the evening, when the service stations downtown would close, he was to remove the signs and sell gasoline. The purpose was to send motorists downtown in the daytime. Arnott refused because the costs were prohibitive. His main product was gasoline. To remain open during the daytime for oil changes and grease jobs was too costly.

During the last two weeks of his operation Arnott ran out of gasoline most evenings and eventually closed the station because it was not profitable to remain open. In addition, customers became very irate after pulling into the station only to find gasoline unavailable.

Arnott advised Amoco of his situation and that he was closing down from 10:00 p. m. to 6:00 a. m. However, Amoco advised Arnott that he was in violation of the lease in failing to maintain a 24-hour operation.

Arnott became frustrated, and on July 17, 1973, he signed a cancellation agreement to voluntarily **[**11]** leave the station. Later in the day he reconsidered his position and called an Amoco representative to rescind his consent to the cancellation. A few days later Amoco marketing representative, Clint Bucklin, told Arnott that if he cooperated with Amoco's policies, he could keep the station. The next day Bucklin advised Arnott that Bucklin apparently had acted without authority and that Arnott would be removed August 6, 1973. A formal letter to that effect dated July 26, 1973, was mailed to Arnott, who then retained counsel. Amoco was advised by letter that its August 6 takeover was being treated by Arnott as an involuntary cancellation of the lease. Arnott left the station August 6, 1973. On that date Amoco hand-delivered a letter to Arnott advising him that his lease was being cancelled effective September 5, 1973, because of violation of the 24-hour clause in the lease. Subsequently Amoco leased the station to J. K. Sadler, and Arnott sold his Standard Oil inventory and carwash to the new lessee. Additional facts disclosed by the record will be reviewed in connection with discussion of the issues raised by Amoco in this appeal.

II. Fraud and Deceit.

Amoco initially contends **[**12]** that there is no evidence of any misrepresentations, much less evidence of misrepresentations of a material fact; no evidence that the statements claimed to be false were knowingly false when made; and no evidence of an intent to defraud. These contentions have already been answered in our discussion of the facts above and require no further elaboration. ***HN1***[] We of course view the evidence together with all reasonable inferences to be drawn therefrom in the light most favorable to the jury verdict. After reviewing the record, we are inclined to agree with the statement made by the district court in denying Amoco's motion for a directed verdict:

> I must confess that I'm somewhat shocked with the manner in which the evidence shows that the Standard Oil Company undertook to negotiate the lease, and to try to, in its dealings with the dealer in connection with its lease, to completely frustrate the ***antitrust law***, and the decisions under it, in the manner in which they did this.
>
> First of all, they go and get this they negotiate this lease. They put as an addendum **[*880]** to the lease a receipt acknowledging that the lessee has received a copy of the policy statement of the **[**13]** Standard Oil. * * * And then they proceed to violate practically every single one of the paragraphs in the policy statement.

HN2[] Fraud, like other issues of fact, may be established by inferences arising from all the other facts and circumstances in evidence. *Aschoff v. Mobil Oil Corp., 261 N.W.2d 120, 124 (S.D.1977)*; *Funke v. Holland Furnace Co., 78 S.D. 374, 102 N.W.2d 668, 670 (1960)*. The record amply supports the jury finding, implicit in its verdict and answer to the pertinent interrogatories, that Amoco was guilty of misrepresentations of a material fact, that the misrepresentations were known to be false when made and were made with intent to defraud, and that Arnott relied thereon in entering into a lease agreement with Amoco.

Amoco further contends that in any event Arnott's reliance thereon did not proximately cause the loss of his station or any other loss because the initial lease had expired. The short answer is that Arnott, based on his previous experience operating Standard stations and on representations made by Amoco's Dick Lucas prior to Arnott's leaving Minneapolis and entering into the first Sioux Falls lease, was led to believe that he was entering into a dealership **[**14]** with excellent prospects for an extended period of time as long as he performed satisfactorily as a dealer. Under the circumstances, the jury could find that the mere fact that the initial lease had been amended to provide for the carwash installation and had later been renewed by a second one-year lease did not deprive Arnott of his anticipated long-term dealer relationship with Amoco at the new location.

Amoco's contention that the testimony regarding the alleged misrepresentations violated the parol evidence rule is not well taken. ***HN3***[] Such testimony is permitted when a contract is induced or procured by fraud. *Sabbagh v. Professional & Business Men's Life Ins. Co., 79 S.D. 615, 116 N.W.2d 513, 520 (1962)*.

Amoco additionally contends that even if the representations claimed to be fraudulent were fraudulent, they were made prior to the execution of the renewal lease, which was executed on December 8, 1972, for an additional one-year period, and that Arnott had full knowledge of such falsity when he executed the new lease and the amendments thereto concerning the carwash. Thus Arnott waived any right to sue for such alleged fraudulent representations; See *Taute v. Econo-Car Int'l, **[**15]** Inc., 414 F.2d 828 (9th Cir. 1969)*; *Commodity Credit Corp. v. Rosenberg Bros. & Co., 243 F.2d 504, 512* (9th Cir.), Cert. denied, *355 U.S. 837, 78 S. Ct. 62, 2 L. Ed. 2d 48 (1957)*; and Arnott is estopped from questioning the validity of the lease agreement and provisions therein. See *Schutterle v. Schutterle, 260 N.W.2d 341, 350 (S.D.1977)*. Moreover, Arnott entered into an accord and satisfaction with Amoco by the negotiation and execution of the lease rider agreements and acceptance of payments thereunder. S.D. Compiled Laws §§ 20-7-1, et seq. (1967).

The district court fully instructed the jury on the defenses urged by Amoco of waiver, estoppel, and accord and satisfaction. The instructions were proposed by Amoco. Each defense involved factual issues which were determined against Amoco by the jury. The record amply supports the jury's resolution of these issues. For example, it can hardly be said on this record that Arnott, with full knowledge of the fraud, asked for and received a material concession from Amoco. See *United Forest Prod. Co. v. Baxter, 452 F.2d 11 (8th Cir. 1971)*. The matter of the amount of damages proximately caused by Amoco's fraud and deceit will be discussed **[**16]** under "V. Damages," Infra.

III. Fiduciary Relationship.

Arnott alleged that Amoco breached the fiduciary duty owed to Arnott by terminating his lease without good cause and by not dealing with Arnott in good faith during the lease term. The court instructed the jury that a fiduciary relationship existed **[*881]** between the defendant and the plaintiff. [6] **[**17]** Amoco contends that the evidence does not support the existence of a fiduciary relationship and that the court erred in instructing that the relationship existed as a matter of law. Further, Amoco argues that it properly terminated Arnott's lease for failure to maintain a 24-hour operation as set out in the lease. [7]

[18]** Although the existence of a fiduciary relationship is a close question, the dealer-oil company relationship has been the subject of much recent litigation, and the current trend of authority recognizes that ***HN4***[] a franchise relationship exists between a service station dealer and the oil company whose trademark the dealer is promoting. Inherent in a franchise relationship is a fiduciary duty.

A New Jersey court ruled that a franchise existed between tenant-dealer Marinello and landlord Shell Oil Co. in *Shell Oil Co. v. Marinello, 120 N.J.Super. 357, 294 A.2d 253 (1972)*, *Aff'd, 63 N.J. 402, 307 A.2d 598 (1973)*, Cert. denied, *415 U.S. 920, 94 S. Ct. 1421, 39 L. Ed. 2d 475 (1974)*.

> The fact that Shell here asserts its rights as a landlord to terminate a lease is not the end of the inquiry. It is now recognized that a lease is simply a species of contract which happens to concern real estate, and we must determine under principles of contract law the construction of the document in question in a manner consistent with the true intent and purpose and the reasonable expectations of the parties as suggested not only by the contents of the instrument but the whole of the relationship that **[**19]** existed between them. * * *.
>
> Furthermore, it should be apparent that we are not dealing here with a traditional landlord-tenant relationship but with what is essentially a form of commercial venture a franchise for the marketing of Shell's products, in which both parties have a common interest and profit from the activities of the other. Shell's interest in these premises is obviously more than the interest of a landlord, and Marinello's interest transcends that of a tenant his investment and very livelihood depend on his remaining within the good graces of Shell's local **[*882]** employees who, as the record here demonstrates, exercise final and absolute authority over his tenure as a Shell dealer.

---

[6] (Y)ou are instructed that a fiduciary relationship existed between the defendant and the plaintiff. A fiduciary relationship is one founded on trust or confidence placed by one person in the integrity and fidelity of another person. Out of such a relation, the law requires that neither party exert undue influence or pressure upon the other, take selfish advantage of his trust or deal with the subject matter of the trust in such a way as to benefit himself or prejudice the other except in the exercise of the utmost good faith and with the full knowledge and consent of the other person involved.

[7] In this connection the district court further instructed the jury Inter alia :

If you find that the circumstances presented during the time period in question were such that the reason for maintaining a 24-hour operation could not be fulfilled, then you may consider that fact in deciding whether the plaintiff substantially performed his obligations under the terms of the lease, notwithstanding his failure to maintain a 24-hour operation.

You are instructed that under the laws of the State of South Dakota that the terms of the contract may be implied if manifested by the conduct of the parties. Therefore, if you should find that under all the facts and circumstances presented, that the defendant's conduct implied that it would supply plaintiff with sufficient quantities of gasoline and other petroleum products to enable the plaintiff to maintain a 24-hour operation, then you may also find that the defendant's failure to fulfill that implied condition would excuse the plaintiff's failure to maintain a 24-hour operation of the station.

You are instructed that under the laws of the State of South Dakota the failure of a party to perform under the terms of an agreement is excused when the party's performance is prevented by the act of the other party, or by the operation of law.

The district court further instructed as follows as to the essential elements which plaintiff must establish:

First, that the defendant terminated its lease with the plaintiff without good cause. In this regard, good cause is defined as the failure by plaintiff to substantially perform his obligations to the defendant under the terms of the lease;

Second, that as a direct and proximate result of the defendant's termination of the lease, the plaintiff suffered a loss; and

Third, the monetary amount of that loss.

Id. 294 A.2d at 261 (citations omitted). See *Amerada Hess Corp. v. Quinn, 143 N.J.Super. 237, 362 A.2d 1258 (1976)*.

More recently, the Pennsylvania Supreme Court determined in *Atlantic Richfield Co. v. Razumic, 480 Pa. 366, 390 A.2d 736 (1978)*, that while the dealer and oil company were landlord and tenant, their lease and business practices indicated a franchise relationship. The court defined ***HN5***[] a franchise as a license from the owner of a trademark which permits **[**20]** another to sell a product or service under the name or mark. *Id. 390 A.2d at 740*, Quoting from *Piercing Pagoda, Inc. v. Hoffner, 465 Pa. 500, 351 A.2d 207, 211 (1976)*. Razumic purchased fuel and other products from Arco and resold them under the Arco trademark. Razumic was required to have his station open twenty-four hours a day, to maintain adequate and efficient attendants, and to allow Arco to inspect the station.

The course of performance pursuant to the agreement between the parties was considered a strong indication of their relationship. *Id. 390 A.2d at 741 n.6*. Because the facts showed the actual practice of a franchise relationship, the court did not feel it was significant that the service station lease had not specified a franchise relationship. In ruling that a franchise relationship existed, the court determined that "it is clear that Razumic was not pursuing solely his own business interests. Rather, Razumic conducted his business and sold his products in accordance with methods prescribed by Arco." *Id. 390 A.2d at 740*.

It is likewise clear that Arnott was not pursuing solely his own business interests in his relationship with Amoco. Arnott sold Amoco products **[**21]** under the Amoco trademark, was expected to remain open twenty-four hours a day, was responsible for hiring adequate help, and was subject to inspections from Amoco representatives. Further examples of Amoco's control are Amoco's pricing directives, Amoco's requirement that Arnott purchase Green Stamps, and Amoco's control over Arnott's product advertising as indicated by the forced return of the Goodyear tires. Obviously, a franchise relationship in which Arnott and Amoco had a common interest and profit in the activities of each other, and not the typical landlord-tenant relationship, existed.

HN6[] A franchisee, unlike a tenant pursuing his own interests, builds the goodwill of his own business and the goodwill of the franchiser. *Atlantic Richfield Co. v. Razumic, supra, 390 A.2d at 742*. This facet of the relationship has led to the recognition that ***HN7***[] the franchise relationship imposes a duty upon franchisers not to act arbitrarily in terminating the franchise.

> (A)n Arco dealer such as Razumic can justifiably expect that his time, effort, and other investments promoting the goodwill of Arco will not be destroyed as a result of Arco's arbitrary decision to terminate their franchise **[**22]** relationship. Consistent with these reasonable expectations, and Arco's obligation to deal with its franchisees in good faith and in a commercially reasonable manner, Arco cannot arbitrarily sever its franchise relationship with Razumic. A contrary conclusion would allow Arco to reap the benefits of its franchisees' efforts in promoting the goodwill of its name without regard for the franchisees' interests.

Id. 390 A.2d at 742 (footnote omitted). See *Seegmiller v. Western Men, Inc., 20 Utah 2d 352, 437 P.2d 892 (1968)*; *Ashland Oil, Inc. v. Donahue, 159 W.Va. 463, 223 S.E.2d 433 (W.Va.1976)*; Brown, Franchising A Fiduciary Relationship, 49 Tex.L.Rev. 650 (1970-71).

In *Shell Oil Co. v. Marinello, supra, 294 A.2d at 262, 263*, the court ruled that public policy required a term to be implied in the service station lease that the lessor cannot refuse to renew the lease without good cause. The court stated:

> Surely no person would make the kind of investment in money, time and effort as did Marinello without the reasonable expectation that if he substantially performed his obligations to Shell, the latter would in turn continue to renew his lease **[*883]** and dealership. **[**23]** He was, by virtue of Shell's dominant position in their relationship and the legal structure of the agreements whose terms he could not vary, compelled to rely upon Shell's good faith in living up to these expectations.

Id. 294 A.2d at 262.

Further indication of the fiduciary nature of a franchise relationship is found in the recent surge of general franchise legislation. As of May 1, 1977, legislation under which franchisers are prohibited from terminating franchises prior to the end of their terms without good cause, are required to make payments for goodwill if franchises are terminated or not renewed at the end of their term, or are prohibited from failing to renew franchises at the expiration of their terms without good cause has been adopted in twelve states and Puerto Rico. Baird, Hay & Bailey, Government Regulation of Real Estate Franchising, 112 Real Prop., Prob. & Tr. J. 580, 594 (1977). Congress has recently enacted legislation specifically regulating the relationship between service station dealers and their franchisers in the Petroleum Marketing Practices Act, *15 U.S.C. § 2801, Et seq. (1978)*. "Congress sought to remedy a situation which had led to "numerous **[**24]** complaints by franchisees of unfair terminations or non-renewals of their franchises by franchisers for arbitrary and even discriminatory reasons.' " *Saad v. Shell Oil Co., 460 F. Supp. 114, 115 (E.D.Mich.1978)*, Quoting from S.R. 95-731 at 17. The Act prohibits the franchiser from terminating or failing to renew a franchise relationship except under specific conditions and for specific grounds. *Frisard v. Texaco, Inc., 460 F. Supp. 1094, 1097 (E.D.La.1978)*.

South Dakota, in accord with this modern trend, enacted ***HN8***[] the South Dakota Franchise Act, S.D. Compiled Laws, ch. 37-5A (1977) in 1974. S.D. Compiled Laws *§ 37-5A-66(7)* (1977) prohibits unfair or inequitable terms or conditions in franchise agreements and unfair or inequitable practices by the franchiser. Although this statute is not controlling since the Arnott lease agreement was initiated in 1973. It is relevant in determining South Dakota's position regarding franchise terminations. In both *Shell Oil Co. v. Marinello, supra, 294 A.2d at 263*, and *Atlantic Richfield Co. v. Razumic, supra, 390 A.2d at 743*, the courts' decisions relied on the public policy exemplified by the state statutes though the statutes were not controlling **[**25]** because they were enacted after the parties had established their franchise relationships. The statutes were viewed as reinforcing the obligations inherent in a franchise relationship. The South Dakota statute indicates that in South Dakota unfair or inequitable practices by a franchiser will not be tolerated. South Dakota law therefore indicates that ***HN9***[] the franchiser and franchisee of a service station operation are involved in a fiduciary franchise relationship whereby the parties should act with good faith toward each other. Judge Nichol, during an informal discussion of Amoco's motion for a directed verdict, indicated it was his view that South Dakota, in enacting the 1974 Franchise Act, "was codifying what was really the common law in South Dakota, anyway." It was the court's opinion that, in light of Amoco's superior position in dictating the terms of the lease agreement, the relationship of the parties was a matter of law. [8] We give great weight to the district court's view of state law. *American Motorists Ins. Co. v. Samson, 596 F.2d 804, 807 (8th Cir. 1979)*; *Gatzemeyer v. Vogel, 544 F.2d 988, 992 (8th Cir. 1976)*.

[26] [*884]** In light of the undisputed facts in this case, it is our view that the district court did not err in instructing that a fiduciary relationship existed between the parties and in instructing that the law requires that neither party exert undue influence or pressure upon the other. See note 6 Supra. In any event, when the instructions on breach of fiduciary duty are considered as a whole, error, if any, was harmless. See note 7 Supra.

We are satisfied that the evidence amply supports the jury's finding that Amoco breached its "fiduciary" duty of good faith and fair dealing with Arnott in terminating its lease agreement with Arnott without good cause and that as a direct and proximate result of the termination Arnott suffered damages.

IV. Violation of the Antitrust Laws.

Arnott charged that during the time he operated his service station, various Amoco representatives instructed him to raise or to lower his retail gas prices to specified levels at specified times; that when he did attempt to vary his retail

---

[8] It is true, as Amoco contends, that the court's instruction was taken from *Mobil Oil Corp. v. Rubenfeld, 72 Misc.2d 392, 339 N.Y.S.2d 623 (N.Y.City Civ.Ct.1972)*, a case in which the determination that a fiduciary relationship existed between the dealer and the oil company was reversed on appeal. In reversing, however, the court noted that the New York legislature had passed a franchise statute, but the bill was vetoed by the governor and did not become law. The court concluded that New York, therefore, had negated any fiduciary policy of termination only for cause by failing to enact the statute. *Mobil Oil Corp. v. Rubenfeld, 48 A.D.2d 428, 370 N.Y.S.2d 943, 949 (Sup.Ct.1975)*. This is plainly distinguishable from the instant case due to South Dakota's Franchise Act.

gasoline prices from those specified by Amoco, he was threatened with cancellation or nonrenewal of his short-term station lease; that as a result of Amoco's price-fixing **[**27]** activities he lost profits on gasoline sales during the term of his lease; and that his lease was cancelled because, among other reasons, he failed to follow the pricing directives of Amoco representatives, thereby causing him loss of his business and loss of future profits.

Amoco denied that it violated any antitrust laws or that it attempted to infringe upon or restrict free trade or fix prices to restrain competition or otherwise. By way of affirmative defense, Amoco alleged that Arnott made his own judgment regarding operation of the station; that if there were any representations made in connection with gasoline prices, Arnott, by renewal of his lease and riders thereto, acquiesced in such conduct and cannot now be heard to complain; and that the lease itself gave Amoco the absolute right to terminate the same on any material violation thereof, which it contends occurred when Arnott failed to operate said station twenty-four hours a day, seven days a week, as specified in the lease.

Amoco contends that there was insufficient evidence to create a submissible jury issue on price-fixing. We disagree. Although there were conflicts in the testimony of other dealers as to whether **[**28]** Amoco's calls regarding retail prices for gasoline were merely suggestions, there was sufficient evidence upon which a jury could find that retail prices were dictated by Amoco. For example, Mrs. Bill Pasco testified that she and her husband operated a Standard station in the same general area during the same period and that they would receive calls from Amoco representatives stating what price should be posted. She added, "I would say it was not a suggested price." If they deviated, "we would be checked, and my husband, he would have conversation with them. * * * We would take and put our prices where they had stated." Similarly, Greg White, who operated a Standard station in Sioux Falls during the relevant period, testified that representatives of Amoco would call, stating "your cost is this, and your selling price is this." At times when he deviated, he received calls from Standard representatives: "That you know, we should fall in line with other dealers. * * * they'd remind you next February your lease is coming up."

Arnott testified that representatives of Amoco would call and tell him what the retail price was to be, and when he failed to comply, he would receive further **[**29]** calls advising him that he was not in compliance; that his second one-year lease was withheld during February-May 1973 and he was placed on probation until he agreed to abide by the prices set by Amoco; and that a couple of days after Arnott in frustration signed a mutual cancellation agreement and then rescinded the same, he was advised by an Amoco representative that he could keep the station if he cooperated with resale pricing and other directives. Shortly thereafter, by letter dated August 6, 1973, Amoco **[*885]** notified Arnott that it was cancelling his lease effective September 5, 1973, for failure to keep the station open for operation twenty-four hours a day. Arnott's testimony with respect to coercion by Amoco's representatives in connection with the fixing of the retail price of gasoline was also corroborated by the testimony of former employees. The witnesses generally testified in terms of Amoco "fixing prices"; one witness described Arnott's price as usually being "one cent higher."

HN10[] Any resale price-fixing, whether by combination or agreement, is a per se violation of *section 1* of the Sherman Act, *15 U.S.C. § 1*. [9] In *Albrecht v. Herald Co., 390 U.S. 145, 88* ***[**30]*** *S. Ct. 869, 19 L. Ed. 2d 998 (1968)*, the Supreme Court noted that "agreements to fix maximum prices "no less than those to fix minimum prices, cripple the freedom of traders and thereby restrain their ability to sell in accordance with their own judgment.' " *Id. at 152, 88 S. Ct. at 873*, Quoting from *Kiefer-Stewart Co. v. Seagram & Sons, 340 U.S. 211, 213, 71 S. Ct. 259, 95 L. Ed. 219 (1951)*. Furthermore, ***HN11***[] "a supplier may not use coercion on its retail outlets to achieve resale price maintenance. * * * (I)t matters not what the coercive device is." *Simpson v. Union Oil Co., 377 U.S. 13, 17, 84 S. Ct. 1051, 1054, 12 L. Ed. 2d 98 (1964)*.

In *United States v. McKesson & Robbins, 351 U.S. 305, 76 S. Ct. 937, 100 L. Ed. 1209 (1956)*, the Supreme Court emphasized:

---

[9] *15 U.S.C. § 1* reads in part: ***HN12***[] "Every contract, combination * * * or conspiracy, in restraint of trade or commerce among the several States * * * is declared to be illegal(.)"

> It has been held too often to require elaboration now that *HN13*[] price fixing is **[**31]** contrary to the policy of competition underlying the Sherman Act and that its illegality does not depend on a showing of its unreasonableness, since it is conclusively presumed to be unreasonable. It makes no difference whether the motives of the participants are good or evil; whether the price fixing is accomplished by express contract or by some more subtle means; whether the participants possess market control; whether the amount of interstate commerce affected is large or small; or whether the effect of the agreement is to raise or to decrease prices.

Id. at 309-10, 76 S. Ct. at 940 (footnotes omitted).

In *Albrecht v. Herald Co., supra, 390 U.S. at 149, 88* S. Ct. (869) at 871, the Supreme Court in discussing *United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*, observed: "The combination with retailers arose because their acquiescence in the suggested prices was secured by threats of termination; the combination with wholesalers arose because they cooperated in terminating price-cutting retailers."

In the instant case there is evidence from which the jury could find that Arnott and other dealers were forced by means of threats and other **[**32]** coercive tactics to set gasoline retail prices at prices fixed by Amoco. Amoco's threat not to renew the annual lease was enough to make the dealers toe the line. In this context the suggested price became the required price. See *Lehrman v. Gulf Oil Corp., 464 F.2d 26, 37-41* (5th Cir.), Cert. denied, *409 U.S. 1077, 93 S. Ct. 687, 34 L. Ed. 2d 665 (1972)*; *Phillips v. Crown Central Petroleum Corp., 395 F. Supp. 735, 760-64 (D.Md.1975)*.

The jury could find from the evidence in the case that Amoco's actions constituted an unlawful combination under either of two theories: (1) That a combination existed between Amoco and Arnott at those times he complied, even though unwillingly, with Amoco's pricing directives; and (2) that Amoco had combined with other dealers who acquiesced in the enforced pricing policy. *Albrecht v. Herald Co., Supra, 390 U.S. at 150 n. 6, 88 S. Ct. 869*. We are satisfied that the evidence supports the jury finding of price-fixing in violation of the Sherman Act.

Amoco further urges that Arnott failed to show a causal connection between the alleged unlawful price-fixing combination and the termination of his lease. We cannot agree. The evidence discloses that **[**33]** a **[*886]** representative of Amoco told Arnott that he could keep the station if he were more agreeable in adhering to Amoco's pricing policies. It is also noted that other dealers were allowed to reduce their hours of operation during the gasoline shortage. The jury could infer that Arnott's failure to follow Amoco's pricing directives was the proximate cause of the termination of his lease and subsequent loss of income as a result thereof.

V. Damages.

Initially Amoco contends that Arnott has failed to establish the fact of damage resulting from unlawful acts on the part of Amoco. The fact of damage arising from Amoco's price-fixing activities has been discussed above. Arnott's claim for damages arising out of his contention that Amoco fraudulently induced him to enter into the lease agreement is also based on wrongful termination of the lease. He testified that he sold his home and his business in Minneapolis and acquired the dealership in Sioux Falls upon the representations of Amoco that as long as he operated the service station in a reasonable manner and it was a profitable venture for himself and Standard Oil, he could continue to operate the station. The fact of **[**34]** damage is Arnott's loss of a profitable business caused by Amoco's wrongful termination of the lease.

VI. Amount of Damages.

Arnott's claim for damages on all three complaints of Amoco's (1) fraudulent misrepresentations in inducing him to enter into the lease agreement, (2) breach of fiduciary duty, and (3) violation of the antitrust laws is based on loss of future profits. In this connection Arnott offered the expert testimony of Dr. Dennis Johnson, Professor of Economics at the University of South Dakota. Basically Dr. Johnson computed Arnott's average income with the Standard station during the years 1972-73 and compared the same with Arnott's average income without the station in 1971 and 1974-77. The figures were obtained from Arnott's income tax returns. After computing the difference of $ 11,886, Dr. Johnson multiplied that figure by Arnott's work life expectancy from the date the lease was terminated, with an allowance for productivity increase, and reduced it to its present value of $ 318,622. [10] Johnson used adjusted gross income in making his computations.

[35]** Amoco contends that the expert's projection of loss of income was speculative and completely erroneous because Arnott had a nonrenewable one-year lease which by its terms would expire February 18, 1974; further, that the proper measure of damages is the going concern value of a destroyed business. Amoco relies on *Albrecht v. Herald Co., 452 F.2d 124, 129-31 (8th Cir. 1971)*, for the proposition that there can be no recovery for loss of future profits as such; such profits may be considered only for purposes of determining lost value of business by using the capitalized profit method of valuation. The difficulty with Amoco's analysis of the Albrecht case is that it overlooks the fact that the district court in Albrecht permitted the jury to make an award based on the difference between the fair market value at the time of sale and the actual sale price received, Plus the loss of future profits. *Albrecht v. Herald Co., 321 F. Supp. 99 (E.D.Mo.1970)*, *Modified, 452 F.2d 124 (8th Cir. 1971)*. In reversing the district court, this court held that it was improper to permit a plaintiff damaged by an antitrust violation to recover both the value of the business as a going concern at the time **[**36]** of the damage and future profits of that business after the time of the damage. Future profit potential is taken into consideration in valuing the business as a going concern.

In the instant case it must be acknowledged that Arnott cannot sell his business for the fair market value and also recover future profits. However, the record demonstrates that Arnott's sale of his inventory to the new lessee selected by Amoco was not a willing buyer-willing seller transaction. Under Amoco's supervision, **[*887]** Arnott sold his Standard Oil inventory to the new lessee, a former Standard Oil salesman from Chamberlain, South Dakota, Jay Sadler. Arnott's initial investment in February 1972 was $ 27,722.14, and he sold the inventory to Sadler for $ 30,638.05. The jury could infer from all of the circumstances that it was a forced sale with no allowance for goodwill or the value of a going business and therefore that Arnott had not received the fair market value of his business.

In *Albrecht v. Herald Co., supra, 452 F.2d at 128-29*, the court discussed numerous cases in which future profits were allowed and used as a method of calculating the damage to the value of the business involved **[**37]** because no other reliable method of valuing the business was presented. [11] In *Lehrman v. Gulf Oil Corp., 500 F.2d 659 (5th Cir. 1974)*, Cert. denied, *420 U.S. 929, 95 S. Ct. 1128, 43 L. Ed. 2d 400 (1975)*, the court recognized that ***HN14***[↑] going concern value and lost future profits are viable alternative measures of antitrust damages.

> Clearly, going concern value and lost future profits are each viable alternative measures of antitrust damages. Future profits cannot be condemned as inordinately more speculative **[**38]** than the going concern value since the former is a crucial component of the latter. In addition going concern or goodwill value may present difficult problems of proof if the lessor of a particular station places restrictive conditions on the transfer of the lease. Finally, future profits accompanied by an award for any decline in asset values will often more fully compensate a businessman by measuring his lost earnings, not just what it is worth to someone else to reach for those earnings.

Id. at 663-64 (footnotes omitted). See *Lehrman v. Gulf Oil Corp., 464 F.2d 26, 43-44* (5th Cir.), Cert. denied, *409 U.S. 1077, 93 S. Ct. 687, 34 L. Ed. 2d 665 (1972)*.

Amoco argues that the short-term nature of the lease limits future damages. However, this ignores the evidence from which the jury could properly infer Arnott's long-term expectations, based on future profit projections related to

---

[10] The jury's award of actual damages was $ 100,000.

[11] Cases discussed were *Lessig v. Tidewater Oil Co., 327 F.2d 459* (9th Cir.), Cert. denied, ***377 U.S. 993, 84 S. Ct. 1920, 12 L. Ed. 2d 1046 (1964)***; *Osborn v. Sinclair Ref. Co., 324 F.2d 566 (4th Cir. 1963)*; *Atlas Bldg. Prod. Co. v. Diamond Block & Gravel Co., 269 F.2d 950 (10th Cir. 1959)*, Cert. denied, ***363 U.S. 843, 80 S. Ct. 1608, 4 L. Ed. 2d 1727 (1960)***; and *Twentieth Century Fox-Film Corp. v. Brookside Theatre Corp., 194 F.2d 846* (8th Cir.), Cert. denied, ***343 U.S. 942, 72 S. Ct. 1035, 96 L. Ed. 1348 (1952)***.

him prior to execution of the first lease and the custom and practice of long-term renewals known to Arnott through his prior experience with Amoco. The trial court instructed the jury that it should consider the terms and conditions of the lease and all other testimony concerning renewals. We **[**39]** cannot say the evidence does not support a finding that Amoco's actions indicated a long-term intention or fraudulent misrepresentation of such an intention.

There was a factual dispute concerning the duration and the reasonableness of Arnott's expectations. As stated in *Lehrman v. Gulf Oil Corp., supra, 464 F.2d at 47*:

> ***HN15***[] The duration of the period during which the plaintiff might be expected to profit will vary from case to case; it is susceptible of no precise formulation, and must be left to the processes of the jury informed by the presentation of conflicting evidence. Of course, the court might properly instruct the jury that it may consider as one factor in its deliberations the length of time which the plaintiff had been in business as of the time of the defendant's anticompetitive actions; but the youth of a business, like the precise manner of its doing-in, will never alone be enough to justify severe restrictions upon the duration of damages. ***HN16***[] The court may condition a new trial on remittitur if it feels strongly that the jury verdict is excessive. But it is arbitrary and improper to limit damages as a matter of law to the precise period of the plaintiff's business **[**40]** operations if the reason for that limitation is either the means used to drive the plaintiff out of business or the relatively short history of his business before its demise.

[*888] Finally, with respect to the damage issue, Amoco contends that Dr. Johnson was not qualified to testify as an expert witness. The contention is without merit and requires little comment. The thrust of Amoco's contentions is a rehash of its argument that the fact that the lease provided for a one-year term is controlling and therefore computations with respect to loss of future profits should not have been admitted. Dr. Johnson made computations with respect to Arnott's work life expectancy and loss of income and reduced the same to present value. ***HN17***[] The weight to be given thereto was a jury matter. We find no abuse of discretion by the trial court in admitting such testimony for whatever assistance it might give to the jury in weighing the evidence with respect to damages. Cf. *Holmgren v. Massey-Ferguson, Inc., 516 F.2d 856 (8th Cir. 1975)*.

VII. Instructions.

Appellant makes the broad allegation that the court's instructions were basically erroneous and supports this allegation with a lengthy **[**41]** enumeration of alleged errors in the instructions themselves and in the court's failure to give proposed instructions. In effect, appellant is merely repeating the argument that the evidence offered did not create a submissible case. We deem it sufficient to say that we have reviewed the instructions in detail and, when considered as a whole, we are satisfied that the issues were properly submitted to the jury.

VIII. Verdict Ambiguity.

The jury returned a general verdict in favor of Arnott and against Amoco in the sum of $ 100,000 actual or compensatory damages and punitive and exemplary damages of $ 25,000. The jury further answered special interrogatories with respect to liability only against Amoco:

> Did you find Defendant American Oil Company liable based on:

12

The district court trebled the $ 100,000 actual or compensatory damages in view of the jury's finding of liability under the antitrust laws.

Amoco contends that the verdict is ambiguous **[**42]** and that the court must speculate as to its meaning; there is no way of determining what portion of the lump sum damages was allotted to each item; it cannot be assumed that $ 100,000 was properly attributable to the antitrust claim; the court erred in trebling the award; and therefore a new trial must be ordered. See *Rea v. Ford Motor Co., 497 F.2d 577, 579* (3d Cir.), Cert. denied, *419 U.S. 868, 95 S.*

---

[12] Attorney fees in state court action were conceded not to be in dispute, so there will be no further discussion thereof. See n. 3 Supra.

Ct. 126, 42 L. Ed. 2d 106 (1974). Furthermore, the court awarded treble damages in the amount of $ 300,000 and allowed the punitive damages of $ 25,000 to stand, thus making a total award of $ 325,000. ***HN18***[] Punitive and treble damages cannot both be awarded for violation of the antitrust laws. *Hansen Packing Co. v. Armour Co., 16 F. Supp. 784, 788 (S.D.N.Y. 1936)*.

Arnott argues that the jury found for him on all three counts [13] submitted to it and that the sole evidence of damages offered was the same on all three counts loss of future profits. Arnott also points out that prior to making the record on instructions, Amoco asked for interrogatories on the issues of liability, which were granted, and that the trial court inquired of Amoco counsel whether they cared to propose any interrogatories **[**43]** on damages, which they did not. We cannot consider the latter argument because the inquiry and response were not made on the record. However, counsel for Amoco does concede, and the record indicates, that no objection was made by Amoco to the verdict form except the general objection that there were no **[*889]** submissible jury issues. Under the circumstances ***HN19***[] the failure of Amoco to request any instructions or special interrogatories on damages or to make objection to the general verdict form results in a waiver of such objections on appeal. *Fed.R.Civ.P. 51*; *Missouri Pac. R.R. v. Star City Gravel, 592 F.2d 455 (8th Cir. 1979)*; See *Richardson v. Communications Workers, 486 F.2d 801, 804-05 (8th Cir. 1973)*. ***HN20***[] Amoco also failed to object or seek clarification when the verdicts were rendered [14] **[**44]** and therefore waived objection to the form of the verdict. See Tennessee *Consol. Coal Co. v. United Mine Workers, 416 F.2d 1192, 1200-1201 (6th Cir. 1969)*, Cert. denied, *397 U.S. 964, 90 S. Ct. 999, 25 L. Ed. 2d 256 (1970)*.

It is our task to determine if it was plain error for the court not to instruct the jury with respect to awarding damages separately as to each count and not to submit interrogatories or verdict forms as to the amount of damages found on each count. ***HN21***[] Any plain error exception to *Fed.R.Civ.P. 51* is " "confined to the exceptional case where the error has seriously affected the fairness, integrity, or public reputation of judicial proceedings.' " 2 Barron and Holtzoff, Federal Practice and Procedure 475 (1961 ed.), Quoted in *Horace v. St. Louis Southwestern R.R., 489 F.2d 632, 634 (8th Cir. 1974)*.

We are persuaded that the failure of the trial court to submit verdict forms or interrogatories on each theory of recovery prevented it from trebling the $ 100,000 actual damages awarded in the general verdict. It would be purely speculative to assume that the entire general verdict of $ 100,000 was awarded as damages resulting from violation of the antitrust laws. We are, however, satisfied that the evidence amply supports an award of $ 100,000 actual and compensatory damages on any of the three counts of (1) false and fraudulent representations, (2) breach of fiduciary duty, and (3) violation **[**45]** of the antitrust laws. [15] We are also persuaded that the jury's award to Arnott and against Amoco of punitive and exemplary damages in the sum of $ 25,000 is supported by the record.

Upon condition that appellee George Arnott file a remittitur within thirty days hereof of that portion of the judgment in excess of $ 125,000, plus interest and costs from the date judgment was entered herein, the judgment is affirmed. Otherwise this cause is remanded for a new trial.

Affirmed on condition that a remittitur be filed.

Dissent by: BRIGHT

Dissent

---

[13] See n. 12 Supra.

[14] Counsel for Amoco was present when the jury returned its verdicts and in fact requested that each juror be individually polled on each and every interrogatory and verdict.

[15] Although not raised by the parties, we suggest that if a new trial occurs, the better practice is to omit from the jury instructions any reference to the trebling of damages in connection with the recovery of damages under the antitrust laws. See Devitt & Blackmar, 3 Federal Practice and Instructions § 90.39 (3d ed. 1977).

BRIGHT, Circuit Judge, concurring and dissenting:

I concur in the result reached by the majority, but only because I believe that substantial evidence **[**46]** in the record supports the jury verdict on the claim of fraud and because I believe that the payment of the suggested remittitur would constitute a reasonable resolution of this litigation. [1] I do not believe that, as a matter of law, a fiduciary relationship existed between the parties in this case, nor do I believe that the evidence demonstrates a violation of the antitrust laws. Because the majority's reasoning on those issues appears to me to be in error and because this case may be retried, I set forth my views in dissent.

[*890] I. The Relationship Between the Parties.

The district court twice **[**47]** instructed the jury that, as a matter of law, a fiduciary relationship existed between Arnott and Amoco, requiring Amoco to act for itself only with utmost good faith and the full knowledge and consent of Arnott. These strictures, though appropriate in the case of a trustee, should not be applied to a commercial lessor. Rather, the lessor should be held to the rules governing contracts in general. It is true that a franchiser might have other duties. But only if the evidence shows a relationship between lessor and lessee extending significantly into other areas is it necessary or desirable to characterize their arrangement as a franchise. Even then one must determine which of the full gamut of fiduciary responsibilities should be required of the franchiser. See *Eaton, Yale & Towne, Inc. v. Sherman Industrial Equip. Co., 316 F. Supp. 435, 445 (E.D. Mo.1970)*. In my view both the district court and the majority erred in deciding this matter; in fact, South Dakota law does not justify the conclusion they reach.

The majority acknowledges (Ante, at 883 n. 8) that Judge Nichol's instruction on fiduciary duties was based on a New York case that was later reversed. The majority maintains, **[**48]** however, that the instruction properly reflected South Dakota law because of the subsequent enactment there of a comprehensive franchise statute, S.D. Compiled Laws Ann. ch. 37-5A. The majority quotes Judge Nichol as expressly construing that franchise statute as a codification of the common law of South Dakota. Ante, at 883-884. I do not so read the record. [2]

[49]** The South Dakota franchise law contains detailed registration and public disclosure provisions akin to those found in the Securities Act of 1933, *15 U.S.C. §§ 77a-77aa (1976)*. This scheme of franchise regulation doubtless represents a substantial departure from the common law of South Dakota. But even if the franchise statute reflected existing common law standards applicable to the lease challenged here, the district court's instructions would remain unjustified. The statute merely enjoins unfair or inequitable practices. S.D. Compiled Laws Ann. §§ 37-5A-51 and 37-5A-66(7). It does not establish a fiduciary relationship between franchiser and franchisee or impose a standard of utmost good faith.

The cases cited by the majority go no further than the South Dakota statute. *Shell Oil Co. v. Marinello, 120 N.J.Super. 357, 294 A.2d 253 (1972)*, *Aff'd, 63 N.J. 402, 307 A.2d 598 (1973)*, Cert. denied, *415 U.S. 920, 94 S. Ct. 1421, 39 L. Ed. 2d 475 (1974)*, nowhere mentions the concept of a fiduciary relationship. Rather, the court there simply granted dealer Marinello's prayer for contract reformation by inferring a contractual term that Shell could

---

[1] The appellant's objection that the proof of damages offered by the appellee was speculative has merit, but it does not appear that appellant objected to some of the evidence now questioned. Moreover, the jury quite obviously did not accept the calculations of plaintiff's expert. Under these circumstances, I agree with the majority that the jury award may stand if the appellee accepts the remittitur.

[2] In the passage relied on by the majority, plaintiff's counsel was attempting to explain the New Jersey Superior Court's interpretation of that state's franchise statute in *Shell Oil Co. v. Marinello, 120 N.J.Super. 357, 294 A.2d 253 (1972)*, *Aff'd, 63 N.J. 402, 307 A.2d 598 (1973)*, Cert. denied, ***415 U.S. 920, 94 S. Ct. 1421, 39 L. Ed. 2d 475 (1974)***. Judge Nichol interrupted to observe, "In other words, they were codifying the common law." Plaintiff's counsel replied, "That's exactly right." Judge Nichol then said, "Just as Maybe South Dakota did when it adopted the Franchise Act, was codifying what was really the law in South Dakota anyway." (Emphasis added.) Plaintiff's counsel responded, "That's exactly what the New Jersey Court said."

refuse to renew his franchise (comprising **[**50]** both a lease and a multifaceted dealer agreement) only for good cause. *Atlantic Richfield Co. v. Razumic, 480 Pa. 366, 390 A.2d 736, 743 (1978)*, is to the same effect. Not only do these cases fail to state a general principle of fiduciary duty, but they are also readily distinguishable on their facts from the case at hand. Here Arnott breached the terms of his lease agreement by failing to stay open twenty-four hours a day; in terminating his lease, Amoco was proceeding under a clause permitting termination for cause. [3]

[*891] The parties in this case entered **[**51]** into a business relationship, not a fiduciary relationship. Each party served the interests of the other, but each also quite properly sought its own interests. The district court was unwilling to find the terms of their agreement unconscionable. Cf. Shell Oil Co. v. Marinello, supra, 307 A.2d at 602-03 (striking the disputed termination provision as unconscionable and contrary to public policy). I think that it was unnecessary to go beyond this conclusion, and I believe the court committed error when, on the facts of this case, it instructed the jury that a strict fiduciary relationship existed between Arnott and Amoco. [4]

II. The Antitrust Claim.

The majority concludes that Amoco combined to fix vertical prices, **[**52]** a Per se violation of *section 1* of the Sherman Act, *15 U.S.C. § 1 (1976)*. [5] Having reviewed the record, I believe that there is insufficient evidence to support this conclusion. Specifically, I find no proof of a combination or conspiracy in this case; the contract between Arnott and Amoco was admittedly innocuous. My reading of the record is supported by Judge Nichol's observation at the close of plaintiff's case: "I don't see any evidence of conspiracy or combination in this case * * * (.) " Unlike Judge Nichol, I believe this implicit finding of unilateral activity vitiates Arnott's antitrust claim. See *Quality Mercury, Inc. v. Ford Motor Co., 542 F.2d 466, 469 (8th Cir. 1976)*, Cert. denied, *433 U.S. 914, 97 S. Ct. 2986, 53 L. Ed. 2d 1100 (1977)*.

The record in this case reflects that Arnott usually posted **[**53]** his retail gasoline prices a penny or two above those suggested by Amoco. Such deviations led to "coffee" with Amoco representatives, but no change. In the only direct incident regarding prices recalled by Arnott or his employees, Dick Lucas, field sales manager for Amoco, refused one day to purchase gas from Arnott because he thought it was too expensive. Arnott let his prices stand. [6]

---

[3] The evident purpose of the statutory and common law termination requirements * * * is the protection of franchisees who have conscientiously striven to carry out their obligations under the franchise agreement. They were not intended to prevent the severance of those who deliberately disregard reasonable requirements contained in their contract with the franchiser. (*Amerada Hess Corp. v. Quinn, 143 N.J.Super. 237, 362 A.2d 1258, 1267 (1976)*.)

[4] This error was not made harmless by the context in which it occurred, as the majority suggests. Ante, at 884. The disputed instruction was repeated by the court without benefit of context when, after two hours of deliberations, the jury returned with the question, "Define fiduciary duty."

[5] *15 U.S.C. § 1* provides in pertinent part: "Every contract, combination * * * or conspiracy, in restraint of trade or commerce among the several States, * * * is hereby declared to be illegal(.)"

[6] If I were writing on a clean slate with only the rule of reason for guidance, See *Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*, I would be hard pressed to find unlawful an actual combination that succeeded in keeping down Arnott's prices. Arnott was, after all, exploiting the modicum of monopoly pricing power that he enjoyed by virtue of his location on an interstate highway.

Arnott testified that, in effect, many of his customers were ignorant of the prices charged by his off-highway competitors. He therefore found it advantageous to raise his prices; demand for his gas was not greatly reduced. Amoco, on the other hand, had a direct interest in maintaining the volume of Arnott's sales, in part because his lease payments were based solely on fuel gallonage. See *Continental T. V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 56 n. 24, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. Amoco also had an important interest in the pricing reputation of its stations generally. Success in restraining Arnott's prices would have advanced the interests of both Amoco and Arnott's customers, at the same time replicating (with respect to Arnott) the consequences of a fully competitive retail gasoline market. See *Albrecht v. Herald Co., 390 U.S. 145, 169, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)* (Stewart, J., dissenting).

[54]** **[*892]** The majority suggests two theories under which the jury could find a combination or conspiracy in this case: first, that Amoco and Arnott combined when the latter unwillingly complied with Amoco's "pricing directives"; and second, that Amoco combined with other dealers who "acquiesced in the enforced pricing policy." Ante, at 884. Both of these theories are derived from dicta in *Albrecht v. Herald Co., 390 U.S. 145, 150 n. 6, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)*. Neither one is applicable here.

First, the evidence provides no support for the notion that Arnott complied with Amoco's "pricing directives." "Directives" cannot mean merely Amoco's suggested prices: such suggestions, standing alone, were clearly permissible. *Susser v. Carvel Corporation, 332 F.2d 505, 510* (2d Cir.), Cert. granted, *379 U.S. 885, 85 S. Ct. 158, 13 L. Ed. 2d 91 (1964)*, Cert. dismissed as improvidently granted, *381 U.S. 125, 85 S. Ct. 1364, 14 L. Ed. 2d 284 (1965)*. The majority must be referring more particularly to the conversations over coffee that Arnott had with Amoco representatives when he deviated from the suggested prices. But there is no evidence that Arnott changed his prices as **[**55]** a result of these conversations, or that he thereafter hewed more closely to Amoco's suggested prices. The cited incident with Dick Lucas likewise resulted in no change; Arnott continued to price independently (I. e., generally higher than Amoco's suggested prices) throughout the period of his lease. Hence, in this case no combination existed and no actual fixing of prices occurred. Cf. *Quinn v. Mobil Oil Company, 375 F.2d 273* (1st Cir.), Cert. dismissed, *389 U.S. 801, 88 S. Ct. 8, 19 L. Ed. 2d 56 (1967)* (affirming dismissal of an antitrust complaint on similar facts).

The panel's second theory is also inapplicable to the facts of this case. Having reviewed the record, I find no substantial evidence of a combination between Amoco and its other dealers. The record simply does not support the majority's characterization of the dealers' behavior as "acquiesence in (an) enforced pricing policy." Ante, at 885. In contrast to the fragments of Mrs. Pascoe's testimony quoted by the majority, Ante, at 885, nine witnesses who were past or present Amoco lessees (including Greg White) testified that retail gas prices were only suggested by Amoco, that the dealers possessed final authority **[**56]** to set prices, and that this authority was frequently exercised independently. Moreover, not one testified that his lease had been threatened or terminated in retaliation for independence in pricing. Cf. *Umphres v. Shell Oil Company, 512 F.2d 420, 422* (5th Cir.), Cert. denied, *423 U.S. 929, 96 S. Ct. 278, 46 L. Ed. 2d 257 (1975)* (holding comparable evidence of vertical price fixing to be clearly insubstantial).

Even if a combination with other dealers were shown to exist, I would be loath to hold that it satisfies the statutory requirement of a "combination * * * in restraint of trade." In fact, any such combination would be wholly irrelevant to the restraint of trade alleged here. See *Albrecht v. Herald Co., supra, 390 U.S. at 161, 88 S. Ct. 869* (Harlan, J., dissenting). The other dealers in the Sioux Falls area had little or no interest in Arnott's affairs. To the extent that they had an interest, it was not that of Amoco: in all likelihood, the other dealers preferred that Arnott keep his price higher than that suggested, as such a policy might well bring them more customers. Cf. *Harold Friedman, Inc. v. Kroger Co., 581 F.2d 1068 (3d Cir. 1978)* (finding similarly collateral **[**57]** dealings involving the defendant to be insufficient evidence of concerted activity).

Under either of the majority's theories, Arnott failed to establish the "contract, combination or conspiracy" essential to his Sherman Act claim. Hence, the cases the majority relies upon in finding an antitrust **[*893]** violation are not

---

The Supreme Court has, however, displaced the rule of reason in cases such as this by making agreements or combinations to fix maximum prices Per se illegal. *Kiefer-Stewart Co. v. Seagram & Sons, 340 U.S. 211, 213, 71 S. Ct. 259, 95 L. Ed. 219 (1951)*; *Albrecht v. Herald Co., supra, 390 U.S. at 151, 88 S. Ct. 869*. But cf. *Continental T. V., Inc. v. GTE Sylvania Inc., supra* (restoring the rule of reason in cases addressing the legality of vertical nonprice restrictions). Notwithstanding the caveat in Continental T. V. distinguishing price from nonprice restrictions, *433 U.S. at 51 n. 18, 97 S. Ct. 2549, 53 L. Ed. 2d 568*, the Court's reasoning in that case suggests that the Per se approach adopted in Albrecht may not survive reexamination. See *Continental T. V., Inc. v. GTE Sylvania Inc., supra, 433 U.S. at 69-70, 97 S. Ct. 2549* (White, J., concurring); Posner, The Rule of Reason and the Economic Approach: Reflections on the Sylvania Decision, 45 U.Chic.L.Rev. 1, 12 (1977); Koches, Developments in the Law of Vertical Nonprice Restrictions: A Welcome Return to the Rule of Reason, 33 U.Miami L.Rev. 247, 266-68 (1978); Pitofsky, The Sylvania Case: Antitrust Analysis of Non-Price Vertical Restrictions, 78 Colum.L.Rev. 1, 16 n. 59 (1978).

controlling here. In *Simpson v. Union Oil Co., 377 U.S. 13, 84 S. Ct. 1051, 12 L. Ed. 2d 98 (1964)*, plaintiffs challenged retail service station leases that were tied to "consignment" agreements expressly empowering the supplier to set the selling price. The presence of this price-fixing term, the Court found, distinguished Simpson from *United States v. Colgate & Co., 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992 (1919)*; its enforcement made the "consignment" agreements contracts in restraint of trade. *Simpson v. Union Oil Co., supra, 377 U.S. at 24, 84 S. Ct. 1051*. In the case at hand there was no such price-fixing term; indeed, in the only written agreement concerning pricing, Arnott was promised "an absolute right to set (his) own resale prices * * *." [7]

[58]** *United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*, is also inapposite. In that case a drug manufacturer was found to have combined not only with acquiescing retailers but also with its wholesalers in order to terminate those retailers that cut prices. Similarly, in *Albrecht v. Herald Co., supra, 390 U.S. at 149-150, 88 S. Ct. 869*, the defendant newspaper publisher was found to have combined with two other persons, including a rival carrier, to force plaintiff to charge only the advertised retail price for his newspapers. In the case at hand, by contrast, Amoco acted unilaterally in terminating Arnott's lease. The other Amoco dealers cannot be said to stand in the position of the wholesalers in Parke, Davis or the rival carrier in Albrecht because they had no power over Arnott. Amoco therefore could not and did not employ the other dealers as a weapon in its dispute with Arnott.

In sum, I believe that the majority's treatment of fiduciary duties and the antitrust claims in this case is in error. I fear that their approach will also have unfortunate consequences in practice. Arnott clearly breached the express terms of his lease agreement. **[**59]** To limit unduly Amoco's power of termination in circumstances such as these (putting aside the issue of fraud), and to uphold a dubious antitrust claim by the dissatisfied lessee, invites wholesale suppliers to replace their lessees and distributors with company employees whose freedom of action will be considerably more restricted. See *Continental T. V., Inc. v. GTE Sylvania Inc., supra, 433 U.S. at 57 n. 26, 97 S. Ct. 2549*. [8] That is to say, the approach taken by the majority encourages increased concentration in the retail market for gasoline and related products. I consider this to be unwarranted and unfortunate.

[60]**

---

[7] To be sure, Arnott alleged that Amoco breached this promise. But the breach of a contract term does not transform the contract, so that what it once promised, it now forbids. Nor can it be argued that price fixing was a term in an implied contract that replaced the fraudulently induced lease agreement; as noted above, Arnott never agreed to such a term. If Amoco sought to fix Arnott's prices, it did so in spite of, not in furtherance of, the terms of their agreement. Theirs was simply not a contract in restraint of trade.

[8] Examples of this process may be found in *Call Carl, Inc. v. BP Oil Corp., 554 F.2d 623* (4th Cir.), Cert. denied, ***434 U.S. 923, 98 S. Ct. 400, 54 L. Ed. 2d 280 (1977)***; *Knutson v. Daily Review, Inc., 548 F.2d 795 (9th Cir. 1976)*, Cert. denied, ***433 U.S. 910, 97 S. Ct. 2977, 53 L. Ed. 2d 1094 (1977)***; and *McGuire v. Times Mirror Co., 405 F. Supp. 57 (C.D.Cal.1975)*.

Opinion by: FRIENDLY

Opinion

[*607] I.

This private antitrust action was commenced on June 1, 1972, in the District Court for the Eastern District of Pennsylvania. Plaintiff Ambook Enterprises a/k/a American Book Club (Ambook) is a Pennsylvania partnership which was organized to engage in the retail and wholesale selling of books and records in interstate commerce. The partners were two corporations, L-Club Corporation and American Book Club. L-Club Corporation is owned by eight persons connected with a highly regarded New York investment **[**3]** firm; an affidavit filed on its behalf states that this action has not been authorized by it. [1.] American Book Club is owned by three individuals, one of them Cletus P. Lyman, a Philadelphia attorney, whose firm, Lyman & Ash, was counsel of record when the action was brought and has participated in its prosecution, although New York counsel has now been substituted. Ambook, which began operations in January, 1968 and conducted them as a partnership since December, 1969, discontinued these in mid-1972, shortly after this action was brought.

The defendants are Time Incorporated (Time), publisher of the well-known weekly magazine of that name; the New York Times Co. (N.Y. Times), publisher of the nation's foremost newspaper; four of the country's largest advertising agencies, J. Walter Thompson Co. (JWT); Young & Rubicam International, Inc. (Y & R); Batten, Barton, Durstine & Osborn, Inc. (BBD&O); and Ted Bates & Company, Inc. (Bates); **[**4]** [2.] and American Association of Advertising

[1.] Defendants have not claimed the action to be dismissible on this ground.

Agencies (4As), a trade association engaged in formulating policies for and promoting its members including the above-named agency defendants. Ambook placed advertisements with Time and N.Y. Times, and 43 other non-defendant publications, but had no dealings with JWT, Y&R, BBD&O or Bates. It placed its ads at various times through three interrelated agencies, Newmark, Posner & Mitchell, Inc., Victor Schiff & Co. (a "division" of the Kaplan Agency), and Schiff/Brown & Co. (hereafter collectively referred to as Schiff-Brown), [3.] none of which was named as a defendant.

[5]** Ambook sought in an amended complaint to bring the action "individually and in a representative capacity on behalf of the class of all similarly situated advertisers, namely, producers, wholesalers and retailers of goods and services in interstate commerce in the United States who advertise in publications." The gravamen of the complaint was that by agreement between the two named publishers and countless others, the 4As, the named agencies and countless others, plaintiff and the class it wished to represent had been forced to utilize the services of advertising agencies, since the publishers granted the agencies a uniform discount of 15%, whereas any advertiser who wished to place an advertisement directly with the publisher was forced to pay the charges set in rate cards, which were **[*608]** 17.6% [4.] above the rates charged the agencies and, in addition, pay the costs of various services many of which were furnished by the agencies and paid for by them out of the 15% Discount. The complaint alleged that as a result of this conspiracy Ambook had paid the two publisher defendants $ 4,000 and other "conspirator publications" $ 20,000 more than if it had been able to receive the **[**6]** 15% Discount and pay its own expenses for doing what Schiff/Brown did. The corresponding figures for the class were estimated as at least $ 30 million for Time and the N.Y. Times and $ 300 million for unnamed "conspirator publications". Damages were sought against all defendants in an amount in excess of $ 500,000 for Ambook and in excess of $ 1 billion for members of the class. Injunctive relief was also requested. The District Court for the Eastern District of Pennsylvania transferred the action, pursuant to *28 U.S.C. § 1404*, to the District Court for the Southern District of New York where it was assigned to Judge Griesa.

In February, 1973, Time moved for a determination that the action could not be maintained as a class action. Ambook cross-moved for an order which, Inter alia, would allow the filing of a second amended complaint and would determine that the action should proceed as a class action. One count in the proposed second amended **[**7]** complaint was based on the Robinson-Patman Act, *15 U.S.C. § 13*. As a result of a hearing, Ambook submitted a revised definition of classes. This narrowed the field to three damage subclasses and one injunctive class. The damage subclasses were all advertisers in Time from January 1, 1968, all advertisers in the N.Y. Times excluding classified and retail advertisers from the same date, and all motion picture advertisers in the N.Y. Times from the same date; [5.] the injunctive class consisted of "(a)ll persons and entities who have advertised or who are likely to advertise in the future in the publications" of Time and the N.Y. Times.

In a considered opinion, *60 F.R.D. 476 (S.D.N.Y.1973)*, Judge Griesa held that the action could not be maintained as a class action. **[**8]** Agreeing with that determination, we see no need to discuss all the reasons the judge gave for it. It suffices that Ambook was out of business and that there was no assurance that it was "in a position to carry on class litigation in this Court in a responsible and vigorous manner", *60 F.R.D. at 487*; that Ambook had no dealings with the four agency defendants whom it had named and thus might stand differently from advertisers who had; and that, as subsequent discussion will reveal, much may hang on the ability of a particular advertiser to have established an "in house" advertising organization which the publishing defendants might have recognized or to

---

2. Bates has settled with plaintiff and no longer has any interest in this action.

3. In each instance Ambook dealt with Victor Schiff, who specialized in the direct response advertising in which Ambook was interested. Mr. Schiff was associated with Newmark, Posner & Mitchell, Inc., in an office and credit sharing arrangement, and Victor Schiff & Company had a similar arrangement with Kaplan. Newmark, Posner & Mitchell, Inc. and the Kaplan Agency were apparently members of the 4As; Schiff/Brown & Company was not.

4. This figure is simply the arithmetical relationship of 15/85.

5. As the trial judge correctly pointed out, 60 F.R.D. 481-82, the date January 1, 1968, must have been an inadvertent error for June 1, 1968, since damages prior to the latter date were barred by the four-year statute of limitations, *15 U.S.C. § 15b*.

perform equivalent services. The judge denied the motion to file the proposed second amended complaint without prejudice to a motion to file a further pleading devoid of class action allegations. An appeal to this court was dismissed for want of appellate jurisdiction, even under the "death-knell" doctrine then prevailing in this circuit but subsequently rejected by the Supreme Court in *Coopers & Lybrand v. Livesay, 437 U.S. 463, 98 S. Ct. 2454, 57 L. Ed. 2d 351 (1978)*.

Plaintiff thereupon moved for leave to file a second amended **[**9]** complaint without class action allegations. The court granted this, with two exceptions. It struck a claim of discrimination under the Robinson-Patman Act on the ground that that statute deals only with the sale of commodities, and prayers for injunctive relief under *15 U.S.C. § 25*, since *§ 25* refers only to suits by the United States, and *15 U.S.C. § 26*, authorizing injunctive relief for private parties "against threatened loss or damage by a violation of the antitrust laws", since Ambook **[*609]** had been out of business since mid-1972 and was in the process of liquidation.

Although the quondam action for a billion dollars in damages and a sweeping injunction had thus dwindled to a relatively small damage suit on its own behalf, Ambook continued to pursue it with considerable vigor. After extensive pretrial proceedings, defendants moved for summary judgment in June, 1976, which was denied a year later, primarily on the ground of lack of sufficient evidence concerning the relationship between Ambook and Schiff-Brown, 464 F. Supp. at 1129-30. After further discussion of the issues, Ambook designated the witnesses it would call on that issue at a trial of the action. These **[**10]** were Victor Schiff and Stephen Brown, the principals of the three advertising agencies Ambook had used; K. Elia Georgiades, a former Vice President of Ambook; and Milton Pierce, a person in the advertising business who had introduced Ambook to Schiff. Their depositions were taken and plaintiff accepted their testimony as true except as noted in a letter of plaintiff's attorney dated March 24, 1978, which also indicated that Ambook might call an economist to testify what fees might be paid to advertising agencies in a free market environment.

On May 1, 1978, defendants renewed their motion for summary judgment. The court granted this on January 11, 1979, in a lengthy and reasoned opinion, *464 F. Supp. 1127*. Plaintiff has appealed.

II.

It will be convenient to deal at the outset with Ambook's contention that the court erred in striking its claim under the Robinson-Patman Act.

The Robinson-Patman Act, so far as here pertinent, makes it unlawful:

> for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality, where either or any of the purchases involved **[**11]** in such discrimination are in commerce, where such commodities are sold for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, and where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them.

The question whether this applies to the sale of newspaper advertisements has not been determined by the Supreme Court, *Times Picayune Pub. Co. v. United States, 345 U.S. 594, 609-10 n. 27, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)* (dealing with similar language in § 3 of the Clayton Act), or by this court, *Syracuse Broadcasting Corp. v. Newhouse, 236 F.2d 522, 527 (1956)*.

National Tire Wholesale, Inc. v. Washington Post Co., 441 F. Supp. 81, 84-86 (D.D.C.1977), *Aff'd 194 U.S.App.D.C. 81, 595 F.2d 888 (D.C.Cir.1979)*, squarely held as the district court had done here, that ***HN1***[] newspaper advertising was not a **[**12]** "commodity" under the Robinson-Patman Act. The same result was reached in interpreting the term "commodity" under § 3 of the Clayton Act, *15 U.S.C. § 14*, in *ALW, Inc. v. United Air*

Lines, Inc., 510 F.2d 52 (9 Cir. 1975). Many other relevant cases, although less directly in point, have taken a strict view of the meaning of the term "commodities". [6.]

[13]** **[*610]** As against all this Ambook relies on a recent opinion of the Federal Trade Commission, CCH FTC Complaints and Orders P 21,448 in The Times-Mirror Co., (July 27, 1978), that the Robinson-Patman Act applies to the sale of retail newspaper advertising, to which a district court deferred in *Sun Communications, Inc. v. Waters Publications, Inc., 466 F. Supp. 387, 390-91 (W.D.Mo.1979)*. We decline to accord similar deference. The FTC opinion runs directly contrary to a statement by one of the bill's sponsors during the debate on the floor of the Senate:

> Mr. Gore. I should like to ask the Senator from Kentucky what application the provision now under discussion would have to newspapers which merely act as advertising mediums or agencies. Would it prevent a differential charge on their part respecting advertisers, based on or measured by the amount of advertising carried?
>
> Mr. Logan. No. (80 Cong.Rec. 3115, 3119 (March 3, 1936)) (emphasis added); See also 79 Cong.Rec. 9078-79 (June 11, 1935); H.R. 8277, 85th Cong., 1st Sess. (1957), discussed in *Kennedy Theater Ticket Service v. Ticketron, supra, 342 F. Supp. at 926*.

It also runs counter to a statement **[**14]** by Representative Patman in a book written only two years after passage of the Act, The Robinson-Patman Act, p. 75 (1938). We recognize that "post-passage remarks by legislators, however explicit, cannot serve to change the legislative intent of Congress expressed before the Act's passage." *Regional Rail Reorganization Act Cases, 419 U.S. 102, 132, 95 S. Ct. 335, 353, 42 L. Ed. 2d 320 (1974)*. But here the term "commodities", in the ordinary use of language, would not be taken to include newspaper advertising. To regard advertisements as commodities would involve almost insolvable problems in determining whether these were of "like grade and quality". See *Baum v. Investors Diversified Services, Inc., supra, 409 F.2d at 875*. The page of the newspaper, the month, the day of the week, and many other factors would have to be weighed in answering this question, as well as in determining defenses allowed by the Act. Whatever the rule as to the deference to be accorded an agency's interpretation of a statute it has the duty to administer, see *Federal Trade Comm'n v. Colgate-Palmolive Co., 380 U.S. 374, 385, 85 S. Ct. 1035, 13 L. Ed. 2d 904 (1965)*, "this is a case where understanding of **[**15]** the statute depends in no small measure on prior judicial decisions and legislative history subjects on which a court has a greater competence than the agency." *Pittston Stevedoring Corp. v. Dellaventura, 544 F.2d 35, 50* (2 Cir. 1976), aff'd Sub nom. *Northeast Marine Terminal Co. v. Caputo, 432 U.S. 249, 97 S. Ct. 2348, 53 L. Ed. 2d 320 (1977)*. The FTC's purported discovery, forty-two years after the event, of a meaning in the Robinson-Patman Act contrary to the ordinary reading of the language, disavowed on the floor of the Senate, disclaimed by the statute's principal author two years after its passage, raising grave problems of administration, and contrary to the consistent course of judicial decision on this and related matters, is a discovery of something that is not there. See *Romero v. International Terminal Operating Co., 358 U.S. 354, 370-71, 79 S. Ct. 468, 3 L. Ed. 2d 368 (1959)*.

III.

Turning to the claim under *§ 1* of the Sherman Act, we find no occasion for recapitulating at length the learning on the use of summary judgment in antitrust cases expressed in such leading decisions as *Poller v. C.B.S., 368 U.S.*

[6.] *Baum v. Investors Diversified Services, Inc., 409 F.2d 872* (7 Cir. 1969) (mutual fund shares); *TV Signal Co. of Aberdeen v. American Telephone & Telegraph Co., 462 F.2d 1256, 1259* (8 Cir. 1972) (space on telephone pole used for CATV service cables); *La Salle Street Press, Inc. v. McCormick & Henderson, Inc., 293 F. Supp. 1004, 1006 (N.D.Ill.1968)* (patent license), modified on other grounds, *445 F.2d 84* (7 Cir. 1971); *Kennedy Theater Ticket Service v. Ticketron, 342 F. Supp. 922 (E.D.Pa.1972)* (theater tickets); *Plum Tree, Inc. v. N. K. Winston Corp., 351 F. Supp. 80, 87 (S.D.N.Y.1972)* (shopping center leasehold); *American Telephone & Telegraph Co. v. Delta Communications Corp., 408 F. Supp. 1075, 1114 (S.D.Miss.1976)*, aff'd on district court opinion, *579 F.2d 972* (5 Cir. 1978) (television program and advertising package).

464, 467-73, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962), on the **[**16]** one hand, and First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 289-90, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968), on the other. [7.] Still a few preliminary observations may be in order. The defendants stress that this is not a case where summary judgment was **[*611]** granted on affidavits alone. The parties engaged in extensive discovery including a number of depositions, although, as will appear, there was at least one question of credibility on a point of some importance. However, there is still the point that the body having the ultimate power to draw inferences, in this instance a jury, did not see and hear the witnesses. ***HN2***[] Summary judgment for the defendants can be sustained in such a case if but only if the reviewing court is satisfied that a properly instructed jury, giving full weight to plaintiff's evidence, drawing every reasonable inference in its favor, [8.] **[**17]** and subjecting defendants' evidence to a critical eye, [9.] could not rationally have found that plaintiff was entitled to any relief.

Since defendants submitted evidence contradicting Ambook's allegations, it was incumbent upon Ambook to provide some evidentiary support for its complaint, Fed.R.Civ.Pro. 56(e); First National Bank of Arizona v. Cities Service Co., supra, 391 U.S. at 289, 88 S. Ct. 1575, although this evidence did not have to be such as would require resolution of the substantive issues in Ambook's favor. Recognizing this, Ambook has not merely relied on its allegations but has submitted evidence. [10.] The question is of its quality. As put in Cities Service, did plaintiff's case remain devoid "of Any significant probative evidence tending to support the complaint"? 391 U.S. at 290, 88 S. Ct. at 1593 (emphasis supplied).

[18]** Defendants' primary contention is that Ambook's evidence would not permit the finding of a "contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade" during the period from June 1, 1968 to June 1, 1972. There was an abundant showing that one had existed earlier. The record is replete with evidence that a prime objective of the 4As, organized in 1917, with JWT and a predecessor of BBD&O as members, was to perpetuate a dual price system. Advertisers dealing directly with the media would be charged a full card rate, whereas in the case of those employing recognized agencies, the latter would receive a 15% Deduction no more, no less none of which was rebated to the advertiser. [11.] Advertisers were thus economically forced to utilize agencies, who would receive and retain 15% Of the card rate as reimbursement for the services they performed; to the extent that the advertiser could have performed these services for less, the conspiracy increased his cost of advertising by the difference. [12.] The only exception was that a few large advertisers

---

[8.] See United States v. Diebold, 369 U.S. 654, 655, 82 S. Ct. 993, 8 L. Ed. 2d 176 (1972) (per curiam); 10 Wright and Miller, Federal Practice and Procedure § 2716, at 430-32.

[9.] See 6 Moore, Federal Practice P 56.15(3), at 56-469-472; P 56.15(8), at 56-642; Adickes v. S. H. Kress & Co., 398 U.S. 144, 157-61, 90 S. Ct. 1598, 26 L. Ed. 2d 142 (1970).

[10.] Compare Solomon v. Houston Corrugated Box Co., Inc., 526 F.2d 389, 393 (5 Cir. 1976); Beckers v. International Snowmobile Industry Ass'n, 581 F.2d 1308, 1311 (8 Cir. 1978), Cert. denied, ***440 U.S. 986, 99 S. Ct. 1801, 60 L. Ed. 2d 248 (1979)***; Merit Motors, Inc. v. Chrysler Corp., 417 F. Supp. 263, 266 (D.D.C.1976), ***Aff'd, 187 U.S.App.D.C. 11, 569 F.2d 666 (D.C.Cir. 1977)***.

[11.] The Time report, referred to below, indicates that the system may have gone back as far as 1864. Although it has become customary to speak of the 15% As a "commission", it is not such in the ordinary sense. The advertising agency is not the seller's agent but the buyer's. The system is thus better characterized as a dual price system the card rate for the direct advertiser and 15% Less when the advertising is done through an agency with the agency receiving the difference.

[12.] For example, if an advertiser could perform the services rendered by the agency at 8% Of the card rate, his costs would be 7% Less if he could deal directly with the medium at the rate accorded the agency. One item of potential saving would be any excess of the agency's profit over what would be a fair return on whatever assets the advertiser devoted to providing the services; plaintiff adduced evidence that the return on investment for five publicly traded advertising agencies during the period 1968 through 1972 averaged over 19%.

apparently had sufficient muscle that they were allowed to have "in house" agencies, who were treated in the **[**19]** same way as the independents.

[20]** **[*612]** This system was threatened when, on May 12, 1955, the United States filed a civil antitrust action in the District Court for the Southern District of New York. The defendants were the 4As and five media associations. The complaint alleged a number of conspiracies which we set forth in the margin. [13.]

[21]** In May 1956 the Government entered into a series of consent decrees with each of the defendants. These recited that no testimony had been taken and that defendants were consenting to the entry of judgment "without trial or adjudication of any issue of fact or law herein and without any findings of fact." The decree was to apply not only to each defendant and its officers, servants, employees, etc. but also "to any committee or groups of consenting defendant's membership when organized and functioning as committees or groups of consenting defendant, and to all other persons in active concert or participation with it who receive actual notice of the Final Judgment by personal service or otherwise." By paragraph IV A each defendant was

> enjoined and restrained from entering into, adhering to, promoting or following any course of conduct, practice or policy, or any agreement or understanding:
>
> (1) Establishing or stabilizing agency commissions, or attempting so to do;
>
> (2) Requiring, urging or requesting any advertising agency to refrain from rebating or splitting agency commissions;
>
> (3) Requiring, urging or requesting any media to deny or limit credit or **[**22]** agency commission due or available to any advertising agency;
>
> (4) Establishing or formulating, or attempting to establish or formulate, any standards of conduct or other qualifications to be used by any media or any association of media to determine whether media should or should not do business with or recognize any advertising agency;
>
> (5) Requiring, urging or requesting any media not to do business with or not to recognize any advertising agency;
>
> (6) Establishing or stabilizing advertising rates to be charged advertisers not employing an advertising agency, or attempting so to do;
>
> (7) Requiring, urging or requesting any media to adhere to publisher advertising rates or rate cards.

By paragraph IV B each defendant was likewise enjoined and restrained from

> requiring, urging or requesting any of its members to engage in any activities covered by Paragraphs (1) through (7) of subsection (A) of this Section IV.

The record leaves no doubt that many of the practices alleged by the Government in 1955 to have violated *§ 1* have since been eliminated. [14.] **[**25]** Taking item **[*613]** IV A (2) in particular, the evidence demonstrates that

---

13. (A) A conspiracy among all the defendants whereby the media associations adopt substantially uniform standards for recognition of advertising agencies, only agencies meeting such standards may be extended credit and allowed agency commissions, agencies which rebate any part of their commissions to advertisers will be cut off; recognition will be denied to house agencies; and gross rates would be charged to direct advertisers. Also that members of the media associations adhere to their published rates, and that agency commissions be fixed and maintained at 15% Of the gross rate for advertising. (B) A conspiracy between the 4As and its members whereby members would retain all commissions and not rebate any part of them to advertisers; commissions would be retained at 15%; and that members refrain from competing with each other by submitting advertising copy etc. in solicitation of new business. (C), (D), (E), (F) and (G) Conspiracies between the media associations and their members to substantially the same effect as (A).

14. We are, of course, fully aware that under § 5(a) of the Clayton Act, *15 U.S.C. § 16(a)*, a plaintiff cannot make use of a consent decree against a defendant in an action where no testimony was taken, and also that private plaintiffs cannot enforce government consent decrees, see *United States v. American Society of Composers, Authors and Publishers, 341 F.2d 1003, 1007-08* (2 Cir.), Cert. denied, ***382 U.S. 877, 86 S. Ct. 160, 15 L. Ed. 2d 119 (1965)***; *Dahl, Inc. v. Roy Cooper Co., Inc., 448 F.2d 17, 20* (9 Cir. 1971); *Blue Chip Stamps v. Manor Drug Stores, 421 U.S. 723, 750, 95 S. Ct. 1917, 44 L. Ed. 2d 539 (1975)*. However, we read the district court's opinion and appellees' argument as taking the consent decrees as a watershed, see *464 F. Supp. at 1137*. Conceding, as seemingly they must, that certain of the pre-1956 practices violated *§ 1*, appellees contend that all

there **[**23]** is no longer any policy of urging or requesting any advertising agency "to refrain from rebating or splitting agency commissions." At least eight types of compensation arrangements between advertisers and agencies are now in effect, [15.] although the record does not show their relative frequency or much else about them. Quite clearly there is no agreement among agencies not to solicit business from customers of their rivals, as was alleged in paragraph (B). There was, however, evidence from which a jury could conclude that a number of the practices alleged in the 1955 complaint still exist. Agency "commissions" remain a uniform 15%. Some standards are still being prescribed to determine which agencies will qualify for recognition as house agencies. And advertisers not employing a recognized agency, outside or house, are still being charged at card rates with no variance or discount available for performing the services provided by agencies. A jury could rationally conclude from the evidence here adduced that during the damage period substantially all advertising agencies and the publishing media pursued a plan whereby if a national advertiser approached a newspaper or magazine, **[**24]** he would typically be told that if he were willing to deal through a recognized agency, the agent would receive a 15% Deduction but that otherwise he would be charged the full card rate. While the 15% Deduction could play a part in negotiations between the advertiser and the agent as to the compensation the latter would receive, the record is silent how far most advertisers were aware of this. The only exception to this, if in fact it be one, was that some members of the media, including the two media defendants here, to a limited extent hereafter described, would allow the advertiser to establish a "house agency" which would be treated as an independent would have been. The critical question is whether a rational trier of facts could find that this plan was the result of an agreement among and between the media and the advertising agencies rather than representing independent identical decisions by hundreds of newspapers and magazines. See 2 Areeda and Turner, ***Antitrust Law*** § 317(e), at 82 (1978).

The leading case for the proposition that ***HN3***[] an agreement can be inferred from commonality of the conduct is *Interstate Circuit, Inc. v. United States, 306 U.S. 208, 59 S. Ct. 467, 83 L. Ed. 610 (1939)*. In that case, Interstate and Consolidated, two affiliated large chains of motion picture exhibitors, who heavily dominated a portion of the Texas motion picture market, sought an **[**26]** agreement from a group of motion picture distributors that was designed to weaken competition the exhibitors faced from nonaffiliated motion picture houses in the area. Specifically, Interstate and Consolidated advised distributors that they would not purchase films for exhibition in their theaters unless the distributors accepted two constraints. These were that in selling the distributor's product for subsequent runs the minimum admission price to adults in the evening should be 25 cents and that its pictures exhibited at a night admission of 40 cents or more should never be exhibited as double features. As a result of conferences between Interstate and Consolidated **[*614]** and eight distributors, the latter accepted these conditions with respect to four of the six Texas cities served by Interstate. The obvious result of such a joint action by the distributors was to weaken the ability of the nonaffiliated exhibitors to draw audiences away from Interstate and Consolidated by offering substantially lower prices or double features.

---

the evils existing then have since been cured. It is thus primarily the defendants who rely on the consent decree; we view it simply as a historical fact.

[15.] These are:

1. Media commissions plus percentage of other charges and additional fees for certain specified services.

2. Same as No. 1, without the additional fees for certain specified services.

3. Media commissions only.

4. One of Nos. 1, 2, or 3, plus an overall fee, sometimes called a retainer.

5. One of Nos. 1, 2, or 3, but with the addition of a guaranteed minimum profit percentage and a controlled maximum profit percentage.

6. Minimum fee or media commissions, whichever is larger.

7. Overall fee on the entire account, with no other compensation, the fee to be agreed upon in advance and billed periodically.

8. Cost plus an agreed overage.

The last two are wholly unrelated to the media 15% "commission".

Despite a lack of any express evidence that the various distributors actually agreed among themselves to abide by the demands of Interstate and **[**27]** Consolidated, the Court upheld the district court's finding of a conspiracy among the distributors, noting that "without substantially unanimous action with respect to the restrictions for any given territory there was a risk (to any distributor) of a substantial loss of the business and good will of the subsequent-run and independent exhibitors, but that with it there was the prospect of increased profits," *Id. at 222, 59 S. Ct. at 472*. In the instant case, a conspiracy among the media could be similarly inferred. In the absence of agreement, a magazine or newspaper refusing the lower rate to advertisers willing to perform the services rendered by agencies ran the risk of losing such advertising to any medium that did; indeed, one could conclude it was the threat of this that led a number of the media to grant the 15% Discount to a few house agencies. [16.] In addition, as is more fully developed below, a magazine or newspaper refusing to adhere to the dual rate system faced serious risks of reprisal from powerful agencies influencing a large section of the market.

[28]** In Interstate Circuit the Court also stressed the failure of the distributors "to tender the testimony, at their command, of any officer or agent of a distributor who knew, or was in a position to know, whether in fact an agreement had been reached among them for concerted action," *Id. at 225, 59 S. Ct. at 474*. Noting that only local managers had been called, rather than those who had authority to act, the Court thought this "persuasive that their testimony, if given, would have been unfavorable . . . ." Here the media offered no evidence to show what legitimate business advantage, save continuity and fear of reprisal, inhered in the dual rate system. No independent reason was offered for one of the media's not doing what could be thought to be in its own self-interest offering the lower rate to direct advertisers who performed the same service for which agencies received discounts as a means of increasing the offeror's share of the direct advertising market.

In *United States v. Paramount Pictures, Inc., 334 U.S. 131, 142, 147, 68 S. Ct. 915, 922, 92 L. Ed. 1260 (1948)*, the Court found the point of drawing an inference of agreement from conscious parallelism scarcely deserving of **[**29]** elaboration. It contented itself with such remarks as:

> ***HN4***[] It is not necessary to find an express agreement in order to find a conspiracy. It is enough that a concert of action is contemplated and that the defendants conformed to this arrangement,

and "the defendants either participated in evolving this uniform system of clearances or acquiesced in it and so furthered its existence."

The authority of these cases was not weakened by *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*. There a suburban theatre in a small shopping district near Baltimore complained of the judge's refusal to direct a verdict in its favor because a number of motion picture distributors and exhibitors had declined to grant it first run privileges, sought originally **[*615]** on an exclusive and later on a non-exclusive so-called "day and date" basis. The defendants advanced a multitude of substantial business reasons why the grant of first run privileges to the petitioner was counter to their individual business interests. It was in this context of upholding refusal to direct a plaintiff's verdict that Mr. Justice Clark observed, **[**30]** *346 U.S. at 541, 74 S. Ct. at 259*:

> this Court has never held that proof of parallel business behavior conclusively establishes agreement or, phrased differently, that such behavior itself constitutes a Sherman Act offense. Circumstantial evidence of consciously parallel behavior may have made heavy inroads into the traditional judicial attitude toward conspiracy; but ***HN5***[] "conscious parallelism" has not yet read conspiracy out of the Sherman Act entirely.

---

16. The fact that apparently there was little direct advertising does not undermine the possibility of this inference. A jury could find that, without substantially unanimous action by the media to prevent it, a market for such advertising could be expected to develop, a market which those adhering to the dual rate system would lose to the renegades. Nor does the fact that the effect of unanimous action would be essentially to eliminate direct advertising as a mode of doing business (except for those advertisers able to create house agencies) invalidate the analysis: non-unanimous action would have the far more deleterious effect on those adhering to the system of channeling direct advertisers to non-adhering competitors.

This explanation of how the inference from parallel conduct can be explained away by proof of legitimate business considerations [17.] was repeated in *First National Bank of Arizona v. Cities Services Co., supra, 391 U.S. at 286-88, 88 S. Ct. 1575 (1968)*. In line with this analysis is our own decision in *Modern Home Institute, Inc. v. Hartford Accident & Indemnity Co., 513 F.2d 102, 111* (2 Cir. 1975), holding that summary judgment for defendants had been properly granted in a case where any inference from "conscious parallelism" had been overwhelmed by defendants' evidence of independent interest in refusing to deal with the plaintiff. As good a recent statement on the subject of conscious parallelism as any is Chief Judge **[**31]** Seitz' in *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 446* (3 Cir. 1977), Cert. denied, *434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791 (1978)*, that:

> ***HN6***[] proof of consciously parallel business behavior is circumstantial evidence from which an agreement, tacit or express, can be inferred but that such evidence, without more, is insufficient unless the circumstances under which it occurred make the inference of a rational, independent choice less attractive than that of concerted action.

Here defendants have offered no explanation why over a period of decades none of the media has engaged in the slightest experimentation in its rate structure in the respects here material. **[**32]** No explanation has been offered why uniform discounts were given to agencies but no discount (except by the house agency device) was given to advertisers willing to perform some or all of the agency services. There is no room for the argument against the significance of conscious parallelism which has been made in the case of an oligopolistic market with an inelastic demand, namely, that any downward price move would immediately become known to and put in effect by competitors, so that the result would be disadvantageous to all. [18.] The very number of competitors, among both the media and the agencies, argues against the claim that any price movement, however limited, would be immediately followed by everyone, so that its originator would derive no benefit. It is true that after the 1956 consent decrees there was opportunity for bargaining on price, not between the advertisers and the media but between the advertisers and the agencies. However, while the record demonstrates that a variety of arrangements were developed, see note 15 Supra, it conveys no idea how extensively these were used, see *National Lead Co. v. F. T. C., 227 F.2d 825, 833* (7 Cir. 1955), rev'd on other grounds, **[**33]** *352 U.S. 419, 77 S. Ct. 502, 1 L. Ed. 2d 438 (1957)*, and particularly how available they were to advertisers like Ambook as distinguished from great national concerns. In any event, we have been cited **[*616]** to no authority that would support the proposition that a *§ 1* conspiracy to prevent advertisers from placing ads directly or at least greatly to impair their ability to do so can be cured by the possibility that some might obtain similar financial results by subsequent bargaining with the agencies. The advertiser's bargaining position with the agency was weakened by the conspiracy in his not being able to bargain with the publishers themselves for reductions based on provision of similar services and by the agency's approaching the bargaining table with him with the 15% Reduction already in hand.

In the Cities Service **[**34]** case, the Court indicated that ***HN7***[] one factor to consider in determining if agreement should be inferred from parallel conduct was whether agreement benefited the alleged conspirators as the practice in Interstate Circuit clearly had, *391 U.S. 253 at 286-87, 88 S. Ct. 1575, 20 L. Ed. 2d 569*, cf. also *Overseas Motors, Inc. v. Import Motors Limited, Inc., 375 F. Supp. 499, 534* (E.D.Mich., 1974), *Aff'd, 519 F.2d 119* (6 Cir.), Cert. denied, *423 U.S. 987, 96 S. Ct. 395, 46 L. Ed. 2d 304 (1975)*. Here there can be no question that the agencies were benefited. The effect of the parallel conduct was to give advertisers a powerful incentive to use agencies when they might otherwise have preferred to perform some or all of the agency services themselves. The 15% System also benefited the agencies by the peace and quiet of a uniform pricing policy on the part of the media, with competition among the agencies for the business of advertisers being on the basis of quality, salesmanship, or

---

[17.] Professor Handler doubts whether a verdict for the plaintiff in Theatre Enterprises would have been upheld, 1 Twenty-Five Years of Antitrust 565-66, and so do we. Defendants had proffered such overwhelming evidence of the individual reasons for their parallel behavior as completely to overcome whatever inference would arise from that alone.

[18.] See Turner, The Definition of Agreement Under the Sherman Act: Conscious Parallelism and Refusals to Deal, 75 Harv.L.Rev. 655, 665-73 (1962); cf. Posner, ***Antitrust Law*** 42-47 (1976).

contacts, rather than of their ability to obtain a lower price from the media. These advantages depended, as in Interstate Circuit, upon substantially uniform acceptance.

Admittedly the advantages to the media **[**35]** are more problematic. The dual rate agreement did benefit the media in the higher rate paid by the occasional transient direct advertiser, but the effect of the system was to reduce such advertising as much as possible. However, while Cities Service teaches that parallel conduct is less probative of an agreement if there is no benefit to the alleged conspirators therefrom, the Court specifically declined to consider the question of Coerced parallelism. [19.] Here the evidence of conscious parallelism can be joined with evidence of coercion in further support of an inference of agreement.

[36]** In 1970, Henry Luce III, publisher of Time, asked a committee to examine and report on how to eliminate the agency commission. [20.] The committee's study included interviews with advertisers, advertising agencies (including Y&R and BBD&O), and magazine competitors. The committee's report concluded there were several options eliminating, reducing, or increasing the commission or leaving it as it was. The committee recommended the latter. Increasing the commission would cost more in revenues than it would gain in increased business from agencies; elimination or reduction by a particular magazine, even such a leader as Time, would cause a risk that agencies would channel business away.

[37]** Although there is nothing particularly damaging in these recommendations, if considered alone, the report is significant in two other contexts. The first is its candid **[*617]** picture of conditions in the advertising world. Some large advertisers reported there was no longer any real need for the agencies. One advertising executive, although speaking mainly of television, said his firm worked directly with a production firm to make the ads, creative work being done either in house or by competing "boutiques". His company was fighting its "biggest agency to get on a fee system so they don't get richer than they already are. Trouble is the president of our firm and of the agency are close friends and the latter so far has fought a successful rear guard action." The same executive "couldn't care less whether TIME eliminates the agency commission except that perhaps it might hasten the demise of the system." Another function of the agency procuring space was being taken over by independent media buying services (IMBOs). The report recited numerous "indications that some big clients would like to see the agency commission system eliminated." The reason was that in many cases **[**38]** the client was getting ahead of the agency both in ability to create advertising and in knowledge of available media. As against this, the commission system kept costs in line with sales volume, and was convenient and easy to administer. A symposium in a media publication, attended by many elements of the trade, reported a host of different views about the 15% Commission. Several clients of Time were interviewed. One thought abolition of commissions was right in concept, wrong until the details of a new system were worked out. Another favored abolition but did not have much at stake since he already had his agencies on fees. Two airlines thought the time for abolition was not ripe since they already had so many problems on their hands. There was mixed reaction from the automobile industry. Expectably the agencies exhibited greater enthusiasm for maintenance of the present system. Competing magazines were equivocal; they were concerned about their position with the agencies although one conceded that "if a major, major client like Ford or General Motors said he wanted to order direct and pay his agencies in its own manner, the publication would probably go along."

---

19. "(Plaintiff) now argues that Cities' participation in the conspiracy was obtained by threats of retaliation from the other defendants. While conceivably petitioner could have argued at the trial level that under such cases as Klor's (*Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741*) . . . and Parke, Davis (*United States v. Parke-Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505*) . . . acquiescence because of threats in an illegal scheme conceived and carried out by others for their own benefit makes the acquiescing party a member of an illegal combination, we decline to pass upon such a contention when presented for the first time in this Court." *391 U.S. at 280 n. 16, 88 S. Ct. at 1588*.

20. The precise instruction was:

TIME wants to eliminate the agency commission. What are the alternatives to this method of compensation? How can these alternatives be implemented?

This language suggests that at least when the inquiry began the publisher of Time considered the agency "commission" something against Time's interest, to which it was being held by others.

The second **[**39]** way in which Time's investigation was significant was that certain agencies did not content themselves with answering the questions they were asked but made it evident that the fears of reprisal by the agencies were real. While Time management was considering the report, Edward L. Bond, Jr., Chairman of Y&R wrote Bernard M. Auer, Executive Vice President of Time, on September 24, 1970, expressing concern over Time's considering a discontinuation of the 15% Agency commission. Although he recognized that "there are some advertisers who would like to see this policy changed", he thought any such move by Time "would appear to gradually erode the full-service agency concept." He added:

> It seems to us that a policy decision made by the leader in the industry can only increase the likelihood of putting magazines in a bid and ask situation. This will give everyone great concern as to the stability of magazines and the real determination of value received

language which a jury could take to be a veiled threat that cessation of the 15% Commission by magazines would accelerate the trend toward advertising on television at the expense of the printed word. Finally

> I hope you **[**40]** will review this subject once more in light of the effects on the full-service agency; in light of the effects on your sales in terms of both cost and morale; and in light of greater fluctuations of revenues that are likely to result from the apparent uncertainty of your rate structure.

In a memorandum to top management of Time dated October 2, 1970, Auer recounted a talk with Bond in which he had explained why Time felt it must "accept business from a company direct on a net basis" and "totally rejected the concept that the agencies were working for us and media departments were doing our selling for us." [21.] **[*618]** Bond "wanted to express his feelings that this could deteriorate into a very serious problem for him and other agencies." Auer said that Time would not make a public statement and hoped Y& R would not start a controversy in the trade press. Auer's memorandum also noted that Dan Seymour of JWT had called Andrew Heiskell of Time to ask if Time was going to announce that it would accept business on a direct basis; Heiskell denied any such intention. Despite the polite tone a reasonable juror could find that two of the country's largest agencies had joined in an **[**41]** effort to put pressure on Time to adhere to existing policies which had the effect of denying advertisers the right to deal directly with the media, pay their own costs, and receive an appropriate discount. *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*, suggests that this would be actionable not only against the maker of the threat but against a complying recipient.

In sum, a jury could have concluded from all that we have recited not to speak of the inferences it might have drawn from oral testimony by persons interviewed by Time or by officials of Time or the N.Y. Times [22.] that the conscious parallelism of the dual rate system was not the result of **[**42]** hundreds of unanimous individual decisions but rather was an agreement including many publishers who believed the system made it unduly expensive to advertise and who went along with it, insofar as they did, only because of sloth or fear of reprisal. We do not say, of course, that a jury would have so found only that it might rationally have done so.

IV.

What has been established up to this point is that a jury could have found there was a contract or conspiracy in restraint of trade by some agencies and some members of the media with respect to pricing policies in the period 1968-1972. [23.] Appellees say this still leaves Ambook a long way from home.

---

21. Auer was surely right about this. The agency is the advertiser's agent, not the media's. It would be wholly improper for the agency to include in its charges to a client services as sales agent for the medium. Yet Bond could be taken as having more than implied that the agencies were doing exactly this.

22. We do not read the record as waiving any right of Ambook to call such persons. The limitation referred to above (p. 609) was on the specific issue of Ambook's relations with Schiff-Brown.

23. Appellant seemingly assumes that if an agreement for a dual pricing system existed, this would be a Per se violation of *§ 1*. Appellees, concentrating on the alleged absence of sufficient evidence of an agreement and the other points discussed in this section, did not argue whether such an agreement would constitute a Per se violation or would be subject to the rule of reason. Plaintiff made no claim that members of the media agreed among themselves to fix their card rates. The case seems more analogous to concerted refusal to deal. We note that recently there has been considerable questioning of the applicability of Per

[43]** The keystone of appellees' argument here is that Ambook did not deal with the 4A's or with any of the agency defendants but solely with Schiff-Brown. As indicated above, Schiff-Brown's relation to the 4A's was tangential at most; it surely was not a policy forming member. [24.] Schiff testified unequivocally that agreement or no agreement **[*619]** he would not have serviced the Ambook account for less than 15% Of the card rates. Any injury to Ambook's property and business must therefore come not from the dealings it had with Schiff-Brown but from the fact that except for the alleged illegal agreements, it would have been able to deal directly with Time, the N.Y. Times and other media, and have achieved substantial savings if given the same discount as the agencies or even a lesser discount if this would produce a smaller cost to the advertiser than the present system.

Appellees mount several lines of defense. They say in the first place that Ambook never sought recognition for a house **[**44]** agency that would have handled its advertising. For the N.Y. Times the answer is unavailing. A jury could have found that for the period up to February 18, 1970, such an offer would have been useless since until then the N.Y. Times would not recognize a house agency with less than three accounts. The standards laid down when that policy was abandoned were rather severe and there was no public announcement of the abandonment. The record does show that by April 9, 1973, the N.Y. Times recognized 35 house agencies but does not inform us how many such recognitions occurred during the period ended June 1, 1972. [25.] Time stands better in one respect, worse in another. It stands better in that it never had any such explicit "three-account" policy for qualification as a house agency as did the N.Y. Times. The record shows that by February 8, 1973, it had recognized 19 house agencies. [26.] It stands worse in that Ambook did make a request of Time for recognition as a house agency. This did not occur until March 1972, by which date Time may well have had ample reasons for refusing to accept Ambook's advertising at all. However, Time's stated reason for declining Ambook's request was: **[**45]**

> Direct advertisers cannot qualify for agency discount but must pay the card rates.

The media defendants contend also that Ambook was in no position to deliver advertising in a form that would enable it to realize economies if given the agency discount. They stress peculiar difficulties allegedly associated with advertising which seeks a response, often accompanied by money, as in the case of a book club, and claim that even many established agencies are unequipped or unwilling to undertake such work. Against this Mr. Lyman averred that, but for the 15% Requirement, Ambook "would have been able to hire more employees and **[**46]** more highly qualified employees if advertising services were performed within the company", or that he might also have hired an advertising consultant for a year. The Time report shows that many companies, although presumably larger than Ambook, are currently using a combination of in-house talent, outside agencies deemed particularly suitable for special promotions, and space buying services, as a substitute for the full-service agency. Indeed several such companies figure on the "house agency" lists of Time and the N.Y. Times to which we have referred above. So far as we can see, the district judge made no determination that Lyman's assertions were so outlandish

---

se rules to certain types of such refusals. The thrust of the Supreme Court decision in *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*, has not gone unnoticed. See *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126* (2 Cir.) (en banc), Cert. denied, ***439 U.S. 946, 99 S. Ct. 340, 58 L. Ed. 2d 338 (1978)***; *Gough v. Rossmoor Corp., 585 F.2d 381, 387* (9 Cir. 1978), Cert. denied, ***440 U.S. 936, 99 S. Ct. 1280, 59 L. Ed. 2d 494 (1979)***; Sullivan, Antitrust § 90 (1977). Compare *Webb v. Utah Tour Brokers Ass'n, 568 F.2d 670, 675-76* (10 Cir. 1977); *Coughlin v. Capitol Cement Co., 571 F.2d 290, 300* (5 Cir. 1978). Much seems to turn on characterization of the alleged agreement as vertical or horizontal, no easy task in the present case, and one which we decline to undertake without the benefit of argument and prior decision below. A further turning away from Per se rules was recently evinced in *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*. We think the district judge would be well advised to take evidence on the subject of reasonableness if the defendants choose to offer it and to make appropriate findings.

[24.] See note 3 Supra.

[25.] The list does not describe the companies. While we can take notice that most of these are of a size dwarfing Ambook, e.g. Burlington Industries, Santa Fe Railway and Monsanto, it may or may not contain others where no such gross disparity existed.

[26.] These are even more predominantly large companies including the three mentioned in note 25 Supra than the N.Y. Times list.

as to be unworthy of belief by a jury, and, whatever our personal views may be as to Ambook's ability to handle its advertising functions for less than the 15% Commission, we perceive no fair basis for doing so.

It therefore appears to us to have been error to grant summary judgment in favor of Time and the N.Y. Times with respect to Ambook's claims against them for alleged losses in being forced to deal with them through an agent on the 15% Commission basis.

[*620] A separate question is whether it was nevertheless **[**47]** proper to enter summary judgment in favor of the 4A's and the three remaining agency defendants, see note 2 Supra, for damages allegedly suffered by Ambook in its dealing with Time and the N.Y. Times. Appellees argue that since Ambook did not deal with the 4A's or any of the agency defendants it cannot recover from them even if they were parties to an illegal conspiracy. Relying on Judge Adams' characteristically able opinion for a divided panel in *Mid-West Paper Products Company v. Continental Group, Inc., 596 F.2d 573* (3 Cir. 1979), appellees assert that Ambook has no standing to sue the agency defendants, since Schiff-Brown was not a member of the alleged conspiracy.

This case differs from Mid-West Paper in material respects. In that case plaintiff sought to recover damages for injuries sustained in dealing with nonconspiring manufacturers who were allegedly able to charge higher prices under the anticompetitive "umbrella" erected by defendant conspiring manufacturers. Recovery was sought from conspirators despite the lack of contact with any of them. Here Ambook has indisputably dealt with Time and the N.Y. Times. Plaintiff having dealt with these members of the alleged **[**48]** illegal conspiracy, all other members are jointly and severally liable for the damages Ambook sustained. See *State of Washington v. American Pipe & Construction Co., 280 F. Supp. 802, 804-05 (W.D.Wash.1968)*; *Wall Products Co. v. National Gypsum Co., 357 F. Supp. 832, 840 (N.D.Cal.1973)*; *Tondas v. Amateur Hockey Ass'n, 438 F. Supp. 310, 315 (W.D.N.Y.1977)*. A jury could have found that, pursuant to the conspiracy, Time and the N.Y. Times denied Ambook the opportunity of placing ads directly with appropriate discounts. The Time report is evidence that the agencies rather than the media were the prime movers behind maintenance of this dual rate system. As Judge Weinfeld has said, "the law is clear that ***HN8***[] one who participates in and furthers wrongful conduct may also be held liable with the other alleged wrongdoer." *Data Digests, Inc. v. Standard & Poor's Corp., 43 F.R.D. 386, 389 (S.D.N.Y.1967)*. [27.]

[49]** On the other hand, we think summary judgment was properly granted in favor of all defendants in respect of Ambook's dealings with media not named as defendants. Ambook conceded that it never sought in-house agency treatment from them (as it did of Time), and there is no evidence of record that such an effort would have been futile. One can guess that Ambook would not have received a warm welcome, but speculation of this sort does not suffice, particularly in light of the judge's repeated directions that Ambook must adduce evidence on this subject.

We regret having been obliged to pass on issues of possibly great consequence to the advertising industry in an action by a single advertiser, now out of business, and which comes before us on appeal from the grant of summary judgment to the defendants. However, it was the defendants (including the industry's trade association) who chose to pursue this procedural course, they have been ably represented by experienced counsel, and we cannot refuse to decide issues properly tendered to us.

The order denying class action status is affirmed. The grant of summary judgment is affirmed with respect to the Robinson-Patman Act claims, and with **[**50]** respect to any damages arising from Ambook's dealings with unnamed members of the media, but is reversed with respect to the other damage claim. [28.] The cause is remanded for further proceedings consistent with this opinion. No costs.

Dissent by: MOORE

[27.] We note the pendency in Congress of legislation that would allow contribution among defendants in civil price-fixing cases, see 48 L.W. 2045 (July 17, 1979), thereby repealing Pro tanto the common law rule of no contribution among intentional joint tortfeasors, *Restatement of Torts 2d § 886A(3)* (1979).

[28.] If Ambook should be awarded damages, consideration would have to be given to the effect of its receipt from Bates, see note 2 Supra.

Dissent

MOORE, Circuit Judge (dissenting):

[*621] I dissent.

In my opinion, this case presents the rather extraordinary situation of the majority resuscitating an alleged antitrust suit, brought by a plaintiff which concededly has "been out of business since mid-1972 and was in the process of liquidation". [1.] The trial judge having given the plaintiff every opportunity by depositions, discovery and affidavits to produce such proof as it might have had to support a claim, came to the conclusion that "(t)here is no evidence sufficient to permit a finding that any of the agency defendants (Young & Rubicam, BBDO, and J. Walter **[**51]** Thompson) was a party to a combination or conspiracy injuring the business or property of Ambook during the period 1968-72". *464 F. Supp. at 1145*. The same finding was made with respect to The New York Times and Time. Based on the trial court's finding that "(T)here is no evidence that the 4A's did anything during the damage period, or for many years prior to the damage period, to promote or maintain any phase of the alleged conspiracy. . . ." *464 F. Supp. at 1136*, it granted summary judgment for the defendants.

Since I believe that cases should be decided upon the facts presented to the trial court, I take issue with the decision of the majority which by its own declarations has, in my opinion, created hypothetical and speculative situations and then, based upon inferences from these hypotheses, prophesied a possible jury conclusion.

An illustration will suffice. "A jury **[**52]** could rationally conclude from the evidence here adduced that during the damage period substantially all advertising agencies and the publishing media pursued a plan whereby If a national advertiser approached a newspaper or magazine, he Would typically be told that If he were willing to deal through a recognized agency, the agent Would receive a 15% Deduction but that otherwise he would be charged the full card rate." (emphasis added). This despite the previous statement that "At least eight types of compensation between advertisers and agencies are now in effect, although the record does not show their relative frequency or much else about them." To me, although eight types of financial arrangements are conceded to exist (post-1956), the majority's assumption as to a jury's rational conclusion is pregnant with the belief that a contrary conclusion would be irrational. In contrast to the majority's assumptions, the trial court found not on the basis of assumptions but on the proof actually before it that:

> "Neither the documents nor any other evidence proposed by Ambook suggest that, following the consent decrees of 1956, there was any step taken by the 4A's or anyone else to **[**53]** prevent advertising agencies from making whatever compensation arrangements they wished with their clients. The use of fees and cost-plus arrangements was growing, and there is no evidence that the 4A's or anyone else was engaging in any kind of conspiratorial activity to put a stop to the growth of these different compensation methods.
>
> * * * There is no evidence that the 4A's did anything during the damage period, or for many years prior to the damage period, to promote or maintain any phase of the alleged conspiracy. This finding is crucial to the present case, since it means that the alleged promoter and leader of the conspiracy was not performing these functions during the period relevant to this lawsuit." *464 F. Supp. at 1136*.

As to burden of proof, the burden was on the plaintiff to prove a conspiracy. There was no duty on the part of any defendant to justify its business policy or practices in choosing as a matter of business judgment to pay a 15% Commission instead of resorting to any of the other methods of compensation previously mentioned. Yet the majority, in effect, places the burden on the defendants of justifying their business decision **[*622]** **[**54]** by

---

[1.] The period of alleged damages was 1968-1972. The Delaware statute provides for a continuance with respect to unfinished litigation.

saying: "here the media offered no evidence to show what legitimate business advantage, save continuity and fear of reprisal, inhered in the dual rate system".

To its reliance upon "conscious parallelism" the majority adds its theory of coercion despite the fact that the trial judge found to the contrary.

The formation in 1970 of a committee to examine into the possible elimination of the agency commission instead of proving a conspiracy, in my opinion, proves the opposite. Using the majority's statement thereof: "A symposium in a media publication, attended by many elements of the trade, reported a host of different views about the 15% Commission". Clients of Time thought abolition right in concept; wrong until details of a new system were worked out. The reaction of the airlines and the automobile industry were mixed. Again, despite the fact that there was a wide divergence of views the antithesis of a conspiratorial agreement the majority not having attended the committee meetings nor having heard the discussions, chose to substitute their conclusion that a rational jury could have found that the committee acted "only because of sloth or fear of reprisal". After hearing **[**55]** Ambook and analyzing all the material Ambook was able to offer, the trial court found that: "The undisputed facts are that Time was making an independent re-examination of the 15% Commission"; that Time "consulted with representative advertising agencies with whom Time did business in normal course and advertisers who advertised in Time, to determine what their views would be on the possible discontinuance of the 15% Commission". *464 F. Supp. at 1144*.

In the field of injury to property, a hypothetical and highly speculative situation is all that Ambook has presented. It says "Ambook would have been able to hire more employees and more highly qualified employees if advertising services were performed within the company" or that he might also have hired an advertising consultant for a year. Again, no proof, merely speculative hypotheses.

A brief word concerning the majority's apologia. Some explanation was, of course, necessary to explain why a court of appeals should "pass on issues of possible great consequence to the advertising industry, in an action by a single advertiser, now out of business . . . ."

Any "regret" at "having been obliged" to pass on the issues is mollified **[**56]** by an apparent desire to have the federal courts and/or a jury of laymen dictate to the advertising and media businesses how in the courts' or juries' opinion they should conduct their business operations, despite the previous decree.

In my opinion, summary judgment was the correct procedure for the defendants to follow. *Rule 56(c) of the Federal Rules of Civil Procedure* is applicable to antitrust cases. The facts material to a decision are undisputed and have been set forth at length by the trial court. On appeal they should be sustained unless clearly erroneous. *Rule 52(a) F.R.Civ.P.*

Recent cases have been informative as to the role of summary judgment in antitrust cases. In *Lupia v. Stella D'Oro Biscuit Co., Inc., 586 F.2d 1163 (7th Cir. 1978)* the motions for summary judgment were, as here, based on a substantial record assembled by discovery and affidavits, establishing beyond the mere allegations of the pleadings, what the plaintiff was and was not able to prove. Noting that "there is no requirement that judges exercise greater caution in granting summary judgment in these (antitrust) cases than in any other", the court affirmed the judgment in favor of the defendants **[**57]** with the following comment equally applicable here:

> "Indeed, the very nature of antitrust litigation would encourage summary disposition of such cases when permissible. Not only do antitrust trials often encompass a great deal of expensive and time consuming discovery and trial work, but also, (without intending any slur on plaintiff here), the statutory private antitrust remedy of treble damages affords a special temptation for the institution of vexatious litigation, see *Poller, supra, 368* ***[*623]*** *U.S. at 474, 82 S. Ct. 486, 7 L. Ed. 2d 458* (Harlan, J. dissenting). (*Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1961)*.) The ultimate determination, after trial, that an antitrust claim is unfounded, may come too late to guard against the evils that occur along the way. Judge (now Chief Judge) Skelly Wright, in a libel case, *Washington Post Co. v. Keogh, 125 U.S.App.D.C. 32, 365 F.2d 965 (1966)*, noted that:

" * * * Summary judgment serves important functions which would be left undone if courts too restrictively viewed their power. Chief among these are avoidance of long and expensive litigation productive of nothing, **[**58]** and curbing the danger that the threat of such litigation will be used to harass or to coerce a settlement. * * * (*Id. 125 U.S.App.D.C. at 35, 365 F.2d at 968*.)' "

Lupia v. Stella D'Oro Biscuit Co., Inc., 586 F.2d at 1167.

In *First Nat. Bank v. Cities Service, 391 U.S. 253, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)*, the Supreme Court, mindful of the four cases cited by the majority here and upon which they and petitioners in Cities Service relied, affirmed in an antitrust case summary judgment in favor of the defendant.

The cardinal fallacy which I find permeates the opinion of the majority and leads to its conclusion is that it treats this case as if it were an appeal from the government's 1955 civil antitrust case which involved virtually the same issues as here presented. The 1956 consent decree dealt with the same problems now before us. The pre-1956 practices complained of were enjoined and the slate for all practical purposes was wiped clean.

The trial court found that "Ambook has specifically conceded that it has no evidence of conspiratorial activity by the 4A's during the period 1968-72, or at any time after 1960. There is no evidence that the 4A's did anything **[**59]** during the damage period, or for many years prior to the damage period, to promote or maintain any phase of the alleged conspiracy." *464 F. Supp. at 1136*. It was incumbent upon Ambook to come forward with proof of post-1956 violations. Many witnesses were deposed; scores of exhibits were introduced. A full-scale trial could not have been more exhaustive.

Having given Ambook every opportunity to submit any proof it desired in aid of its claim, the trial court concluded: "There is no evidence sufficient to permit a finding that any of the agency defendants was a party to a combination or conspiracy injuring the business or property of Ambook during the period 1968-72." *464 F. Supp. at 1145*. The same finding was made as to The New York Times and Time.

In this case I would subscribe to the words of the late Mr. Justice Harlan, joined by Mr. Justice Frankfurter, Mr. Justice Whittaker and Mr. Justice Stewart in his dissent in the five to four decision in *Poller v. Columbia Broadcasting, 368 U.S. 464, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*:

"As I see it, this is one of those cases, not unfamiliar in treble-damage litigation, where injury resulting from normal business hazards is sought **[**60]** to be made redressable by casting the affair in antitrust terms. I think that the antitrust laws do not fit this case, and that the courts below were quite correct in holding that the respondents were entitled to judgment as a matter of law." *368 U.S. at 474, 82 S. Ct. at 491*.

As in this case, the trial court had before it affidavits and depositions. The trial court in Poller had granted summary judgment in an antitrust case in favor of the defendants. I would also adopt Mr. Justice Harlan's apologia when he said

"I have gone into this matter at some length because in my opinion the Court's encouragement of this sort of antitrust "enforcement' does disservice to the healthy observance of these laws. I would affirm." *368 U.S. at 486, 82 S. Ct. at 498*.

I would find it difficult, if not impossible, to formulate a charge to a jury which would not be based upon groundless speculation hence I would affirm.

Opinion

[*1115] OPINION OF THE COURT

GIBBONS, *Circuit Judge.*

This is an appeal from an order dismissing a private treble damage action and a request for injunctive relief brought under sections 4 and 16 of the Clayton Act, *15 U.S.C. §§ 15*, *26 (1976)*, on the ground that the conduct alleged in the complaint was exempt from antitrust scrutiny because it occurred in an industry and an area subject to regulation by the Federal Communications Commission (FCC). We reverse.

I. PLEADINGS AND PROCEEDINGS IN THE DISTRICT COURT

The plaintiff is Essential Communications, Inc. (Essential), a corporation engaged in the distribution of telephone station equipment for use at telephone customers' premises. The defendants are American Telephone and Telegraph Company (AT&T), the parent corporation of the Bell System, which comprises the largest telephone communications system in the United States, Western Electric Company (WECo.), AT&T's equipment manufacturing subsidiary, and New Jersey Bell Telephone Company (NJ Bell), one of AT&T's operating subsidiaries.

On May 17, 1973, Essential filed a complaint charging AT&T, WECo. and NJ Bell with violations **[**3]** of *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2 (1976)*, in **[*1116]** that they sought to exclude from the market for telephone terminal equipment a device, called a Code-a-Phone, distributed by Essential. The complaint alleges that prior to November 1, 1968, the Bell System maintained a monopoly in the distribution, installation and service of telephone terminal equipment, by virtue of filed tariffs which prohibited customers from attaching to the Bell System station equipment obtained from any source other than Bell. On that date the decision of the Federal

Communications Commission (FCC) in *Carterfone* [1] became effective, which according to the complaint, opened up the telephone terminal equipment market to competition and which encouraged Essential to commence distributing, installing and servicing that equipment. Among the equipment distributed by Essential is the Code-a-Phone, manufactured by Ford Industries, Inc., and supplied by Ford both to Essential and to NJ Bell. This device, when electrically connected to a telephone customer's telephone line automatically answers, transfers and records incoming calls. Thus Essential and NJ Bell allegedly became competitors **[**4]** in the distribution, installation and service of Code-a-Phones. However, following the *Carterfone* decision the defendants, in an effort to hinder Essential's competition, filed with the FCC a new tariff which required customers of the Bell Systems to lease from Bell an interface device called a protective connecting arrangement (PCA) before they would be allowed to connect Essential's equipment to the Bell System network. The PCA is alleged to be unnecessary for the protection of the network since the Ford Code-a-Phones distributed by Essential were identical with those distributed by NJ Bell, and no such device is required for the latter. It is also charged that NJ Bell unreasonably delayed in furnishing PCAs to Essential's customers, and caused service difficulties for those customers by improperly installing and servicing PCAs. The complaint seeks treble damages and unspecified injunctive relief.

[5]** On October 3, 1973, by consent of the parties, the district court action was stayed so that the New Jersey Public Utilities Commission might consider the propriety of the PCA tariff. However, in 1974, the FCC asserted exclusive jurisdiction over regulation of the interconnection of customer-provided terminal equipment. When FCC jurisdiction was sustained by the Fourth Circuit Court of Appeals, [2] the New Jersey Public Utilities Commission concluded that it lacked jurisdiction to consider the validity of the PCA tariff, and the district court stay was revoked.

On August 1, 1977, the defendants moved to dismiss the complaint because the activity complained of, being subject to regulation by **[**6]** the FCC, was impliedly exempt from the antitrust laws. Finding in the Federal Communications Act of 1934, 47 U.S.C. § 151-606 (1976), an intention to repeal the antitrust laws in areas in which the FCC has exercised its regulatory authority, the district court granted the motion. [3] Thereafter, the court denied as untimely a motion to amend the complaint by adding an allegation that the defendants had committed a fraud upon the FCC by inducing the agency not to suspend the PCA tariff. This appeal followed.

II. EXEMPTION BY VIRTUE OF FEDERAL LAW

As will be developed herein, this appeal presents no issue of express statutory exemption from the antitrust laws. It involves, rather, the alleged incompatibility between the procompetitive policies of the antitrust laws and the pervasive scheme of regulation for the industry. Because the scheme of regulation varies from statute to statute, and the competitive situation varies **[*1117]** **[**7]** from industry to industry, there is no general doctrine of antitrust exemption for regulated industries. In some cases, the agency charged with regulation is also explicitly charged with the responsibility for maintaining competition, [4] and in others, as here, there is no such specific statutory delegation. In some industries, the economic desirability of maintaining a natural monopoly in the service being rendered precludes competition and instead substitutes pervasive regulation, while in others there is room for both competition in and regulation of the service. [5] Thus the extent to which antitrust enforcement is consistent with

[3] The district court's opinion is reported at *446 F. Supp. 1090 (D.N.J. 1978)*.

[4] *See, e.g., Hughes Tool Co. v. Trans World Airlines, 409 U.S. 363, 368, 34 L. Ed. 2d 577, 93 S. Ct. 647 (1973)* (Civil Aeronautics Board expressly required to consider competition); *Pan Am. World Airways, Inc. v. United States, 371 U.S. 296, 9 L. Ed. 2d 325, 83 S. Ct. 476 (1963)* (CAB statutory framework specifically refers to competitive power).

[5] *Compare United States v. Nat'l Ass'n Sec. Dealers, 422 U.S. 694, 730, 45 L. Ed. 2d 486, 95 S. Ct. 2427 (1975)* (immunity inferred from pervasiveness) *with United States v. R.C.A., 358 U.S. 334, 339-463, 3 L. Ed. 2d 354, 79 S. Ct. 457 (1959)*

governmental regulation varies from industry to industry. The Sherman Act, embodying as it does a preference for competition, has been since its enactment almost an economic constitution for our complex national economy. [6] **[**9]** A fair approach in the accommodation between the seemingly disparate goals of regulation and competition should be to assume that competition, and thus ***antitrust law***, does operate unless clearly displaced. [7] In determining whether ***antitrust law*** has been displaced, the starting point must be the statute under which the industry in question **[**8]** is regulated, in this case the Federal Communications Act of 1934, *47 U.S.C. §§ 151-609 (1976)*. [8]

[10]** A. *The Federal Regulatory Scheme for Telecommunications*

The first venture of the federal government into the regulation of telecommunications was *section 7* of the Mann-Elkins Act of 1910, ch. 309, *§ 7*, 36 Stat. 539 (1910), which added telephone and telegraph companies to the list of common carriers subject to the jurisdiction of the Interstate Commerce Commission (ICC). [9] **[**12]** That venture, however, hardly subjected the telecommunications industry to pervasive regulation. Indeed, prior to 1910 no federal regulation of common carriers could be so described. The Interstate Commerce Act of 1887 had required that railroads publish and file with the ICC rates that were just and reasonable, and prohibited certain discriminations. *See* Interstate Commerce Act, ch. 104, *§§ 1*, **[*1118]** *2*, *3*, *6*, 24 Stat. 379 (1887) Tariffs were generated solely by the carriers, and the role of the ICC was limited essentially to the effectuation of consumer protection and the antidiscrimination policy which were the chief purposes of the legislation. *Id.* In the Elkins Act of 1903, ch. 708, 32 Stat. 847 (1903), and the Hepburn Act of 1906, ch. 3591, 34 Stat. 584 (1906), the ICC was given more extensive **[**11]** tariff authority, including the authority to set aside tariffs and to fix maximum rates. [10] When the Mann-Elkins Act made telecommunications companies common carriers, it imposed upon them the obligation to provide service on request at just and reasonable rates, without unjust discrimination or undue preference. [11] They were made subject, in other words, to the basic consumer protection and antidiscrimination policy of the 1887 Act. The ICC was given jurisdiction to enforce these obligations. [12] But while the Mann-Elkins Act continued and

---

(approval by FCC of exchange of television stations under license jurisdiction of the Communications Act of 1934 did not foreclose civil action by government under § 4 of Sherman Act) and *Cain v. Air Cargo, Inc., 599 F.2d 316 (9th Cir. 1979)* (no implied antitrust immunity despite approval of CAB).

[6] *See* *Carnation Co. v. Pacific Westboard Conference, 383 U.S. 213, 218, 15 L. Ed. 2d 709, 86 S. Ct. 781 (1966)* (antitrust laws fundamental national economic policy).

[7] *See* *United States v. Nat'l Ass'n Sec. Dealers, 422 U.S. at 719-20* (implied immunity disfavored and antitrust and regulatory statutes should be reconsidered unless clear repugnancy); *Gordon v. New York Stock Exchange, 422 U.S. 659, 682-83, 45 L. Ed. 2d 463, 95 S. Ct. 2598 (1975)* (implied repeal is not favored and not casually allowed); *Silver v. New York Stock Exchange, 373 U.S. 341, 357, 10 L. Ed. 2d 389, 83 S. Ct. 1246 (1963)* (preference to "reconciles the operation of both statutory schemes with one another rather than holding one completely ousted."); *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 350-51, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)*.

[8] *See* *United States v. Borden Co., 308 U.S. 188, 198-99, 84 L. Ed. 181, 60 S. Ct. 182 (1939)* (looking to legislative history to determine whether statutory schemes repugnant); *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 352, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)*. Intent to imply immunity can be manifested by Congress in different ways, for example, through legislative history, *United States v. Nat'l Ass'n Sec. Dealers, 422 U.S. at 726* (looking to Congress' intent), "plain repugnancy between antitrust and regulatory provisions," *United States v. Philadelphia Nat'l Bank, 374 U.S. at 351*, or "pervasiveness" of the regulation, *United States v. Nat'l Ass'n Sec. Dealers 422 U.S. at 730*. The mere fact of federal regulation is not sufficient to imply immunity. *See* *Cantor v. Detroit Edison Co., 428 U.S. 579, 597 n.36, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)*.

[9] Mann-Elkins Act of 1910, ch. 309, *§ 7*, 36 Stat. 545 (1910).

[10] *See* Hepburn Act of 1906, ch. 3591, § 4, 34 stat. 584 (1906).

[11] *See* Mann-Elkins Act *§§ 7*, *12*, ch. 309, 36 Stat. 539 (1910).

enlarged the ICC tariff jurisdiction over railroads, it did not subject telecommunications companies to the broadened ICC tariff regulatory jurisdiction. [13] Even the existence of broadened ICC tariff regulatory jurisdiction over railroads was not, as of 1912, deemed to exempt railroads from the antitrust laws. [14] A fortiori the less regulated telecommunications companies were not exempt. Finally, when Congress, in 1914, enacted the Clayton Act, it was made expressly applicable to all common carriers.

The Transportation Act of 1920, ch. 91, 41 Stat. 456 (1920), substantially increased the already pervasive regulation of the railroad industry by the ICC. It also made express provision for the authorization of pooling and other anticompetitive provisions which might otherwise have violated the Sherman or Clayton Acts. **[**13]** [15] But the Transportation Act, except for a minor increase in ICC power to enforce the anti-rebate duty, [16] left the regulation of telecommunications common carriers virtually unchanged. [17] Thus under the aegis of the ICC, the competition principle was being curtailed in the railroad context in the interest of the economies thought to flow from the development of such natural monopolies, while the telecommunications companies remained fully subject to the antitrust laws.

Competition among telephone services in the same geographic area was, in the early part of the century, a fact of life. The enactment in 1914 of the Clayton Act's antimerger provisions [18] presented a serious obstacle to the rationalization of a national telephone network. The **[**14]** Willis-Graham Act addressed the problem of competing local telephone exchanges, presenting as it did the specter of waste and inconvenience from the duplication of facilities. *See* Willis-Graham Act of 1921, ch. 20, 42 Stat. 27 (1921) (current version at *47 U.S.C. § 221 (1976)*). That statute authorized the ICC to approve the consolidation of properties of telephone companies into single companies if such consolidation is "of advantage to the persons to whom service is to be rendered and in the public interest . . ." *Id.* (current version at *47 U.S.C. § 221(a)*). The **[*1119]** statute granted express immunity from the antitrust laws for such consolidations. *Id.*

Thus, as of 1921, the telecommunications industry was by federal law recognized as a common carrier, subject to the consumer protection and antidiscrimination features of the Interstate Commerce Act, and exempt from antitrust liability for consolidations **[**15]** of local competing service systems. It was, however, otherwise subject to the antitrust laws. Indeed, a government antitrust suit had in 1914 produced a consent decree against AT&T. [19] Aside from the ICC jurisdiction to enforce AT&T's obligation to provide service on request at just and reasonable rates without undue discrimination or undue preference, AT&T was free to determine its rates, its return on investment,

and its service obligation. Federal law did not even impose an obligation to interconnect with other communications common carriers. AT&T's local subsidiaries were, however, subject to regulation in other respects at the state level. This describes the state of telecommunications law when Congress passed the Federal Communications Act of 1934, *47 U.S.C. §§ 151-609 (1976)*.

[16]** Before we turn to the particulars of that Act, it is worthwhile noting the evolution of public utility regulation in the fifty years following the enactment in 1877 of the Interstate Commerce Act. The earliest, and perhaps still most common form of regulation, is the imposition on public utilities of the obligation to offer their services to all customers on a more or less equal basis. Ratemaking and the definition of service obligations were, absent discrimination, left in the hands of the carriers, subject to the forces of the marketplace, except for extreme abuses. The early ICC legislation took this form. Later, however, as natural monopolies came to be recognized, utility regulation took on a second aspect. In the absence of competition, government regulation both of service obligation and of rates was added to the earlier regulation of what, for want of a better term, can be called the antidiscrimination obligation. By the time of the passage of the Transportation Act of 1920, ICC regulation of railroads had evolved to such a stage that it included both aspects: enforcement of the antidiscrimination obligation, and detailed regulation of service obligations and rates. Telecommunications **[**17]** regulation, on the other hand, at least on the federal level, had not, prior to 1934, progressed beyond the first stage.

In 1934 Congress created the Federal Communications Commission (FCC), vesting it with all of the telecommunications jurisdiction theretofore vested in the ICC, and with additional new authority. At the same time it imposed certain new obligations on the industry. For the first time federal law imposed an obligation to interconnect or establish through routes with other common carriers. See *47 U.S.C. § 201(a) (1976)*. Many provisions of the 1934 Act were carried forward almost verbatim from the Mann-Elkins Act of 1910. [20] The 1934 Act also continued the previously applicable prohibition against unjust and unreasonable discriminations. [21]

[18]** As to tariffs, the 1934 Act continued the prior practice that tariffs be generated, at least in the first instance, by the carriers. *Section 203* of the Act required that they be filed with the FCC, *47 U.S.C. § 203(a)*, that the FCC and the public be given 30 days notice of any proposed change, *id.* *§ 203(b)*, and that no charge be demanded or collected, refunded or remitted, or any service rendered, except in accordance with a filed tariff. *Id.* *§ 203(c)*. This section does no more than carry forward the prior obligation **[*1120]** of telecommunications common carriers to avoid discriminations by adhering to filed tariffs. The FCC was, however, given two specific powers with respect to tariffs. In *section 204* it was authorized, either after a complaint or on its own initiative, to conduct a hearing concerning the lawfulness of a filed tariff, and pending the completion of that hearing, to suspend its operation for no more than three months. [22] If at the end of three months the hearing has not been completed, the carrier initiated tariff would go into effect. In *section 205(a)* the FCC was authorized, after the hearing, "to determine and prescribe what will be the just and **[**19]** reasonable charge . . . to be thereafter observed, and what classification, regulation, or practice is or will be just, fair, and reasonable to be thereafter followed. . . ." *47 U.S.C. § 205(a)*. Thus the tariff scheme of the 1934 Act carries forward the pre-existing power of the ICC to review carrier initiated tariffs, and to enforce the obligation of fair and reasonable charges. Possibly the scope of FCC authority to review and change carrier initiated tariffs is somewhat broader than that formerly held by the ICC, since it covers classifications, regulations, and practices. But for reasons to which we refer hereafter, any difference in the scope of the two authorities is not critical to the analysis of the antitrust exemption issue.

---

[20] *Compare* Mann-Elkins Act of 1910, ch. 309, *§ 7*, 36 Stat. 539 ("just and reasonable" tariff requirement) with Communications Act of 1934, ch. 652, *§ 201*, 48 Stat. 1064 (1934) (current version at *47 U.S.C. § 201(b)*).

[21] *Compare* Mann-Elkins Act of 1910, ch. 309, *§§ 7*, *12*, 36 Stat. 539 (1910) with Communications Act of 1934, ch. 652, *§ 202*, 43 Stat. 1064 (1934) (current version at *47 U.S.C. § 202(a)*).

[22] *47 U.S.C. § 204*, *as amended,* Pub. L. No. 94-376, *§ 2*, 90 Stat. 1080 (1976) (increasing period of suspension to five months).

Two other provisions of the 1934 Act bear on the exemption issue. The first is ***HN1***[] *section 221(a)*, which carries forward the Willis-Graham Act's **[**20]** limited exemption from the Clayton Act for consolidations of local service properties. [23] The other is *section 414*, which provides:

> ***HN2***[] Nothing in this chapter contained shall in any way abridge or alter the remedies now existing at common law or by statute, but the provisions of this chapter are in addition to such remedies.

47 U.S.C. § 414 (1976). Finally, nothing in the 1934 Act expressly directs the FCC when exercising its *section 205(a)* authority, to take into account antitrust considerations, although undoubtedly they bear to some extent upon the fairness or reasonableness of the charges, classifications, regulations or practices of the carrier.

[21]** From the foregoing it appears that the 1934 Act, like the Interstate Commerce Act prior to its amendment by the Transportation Act of 1920, is designed essentially for the protection of telephone users in a rather limited way from discrimination in rates or service and from excess charges. Nothing in the Act suggests an intention on the part of Congress to regulate, or, indeed, to protect, equipment sellers or other competitors except insofar as they may also be customers for communication services. The Act does not impose on the telecommunications industry the kind of comprehensive regulation which, after 1920, the ICC exercised over the railroads. Moreover, the express exemption of the Willis-Graham Act carried forward in *section 221(a)*, and the preservation of other remedies in *section 414*, suggest, when read together, that no blanket exemption from ***antitrust law*** was intended. [24] We recognize, however, that a given **[*1121]** antitrust remedy might in specific instances present an actual or potential conflict with a duty imposed by the FCC in the exercise of its customer protective tariff jurisdiction. [25] Whether the instant claim presents such a conflict is the question to **[**22]** which we now turn.

[23]** B. *The Antitrust Claims*

Since the determination of a possible antitrust exemption turns, in our view, on conflict, actual or potential, between an obligation imposed by the 1934 Act and an antitrust remedy, analysis must necessarily be discrete. AT&T's primary obligation under the 1934 Act is to adhere, in its dealings with customers, to its filed tariffs. That primary obligationis the heart of public utility regulation because if carriers were free to depart from filed tariffs the prohibition against discrimination among customers could be evaded. However, the filed tariff rule has little or nothing to do with AT&T's duties under the antitrust laws toward its competitors in the equipment supply business; competitors are not the intended beneficiaries of that rule of public utility regulation. This distinction was recognized over fifty years ago by Justice Brandeis in the leading case of *Keogh v. Chicago & Northwestern Ry. Co., 260 U.S. 156, 67 L. Ed. 183, 43 S. Ct. 47 (1922)*. In that case a railroad customer (shipper) sued for money damages under the antitrust laws alleging that the railroad tariffs filed with the ICC had been arrived at as a result of an unlawful conspiracy. **[**24]** Brandeis for a unanimous court sustained a demurrer to the complaint, observing:

---

[23] *47 U.S.C. § 221(a) (1976)* (originally enacted as Willis-Graham Act of 1921, ch. 20, 42 Stat. 27 (1921); *see* 78 Cong. Rec. 8822 (May 15, 1934) (remarks of Sen. Dill, sponsor) (with regard to areas outside specific exemption, bill examined "line by line, to see that it covered so far as possible all the existing law that is in the statutes which we are proposing to repeal, and also to see that it did not seriously conflict.").

[24] *See* *United States v. Borden Co., 308 U.S. at 201* (express immunity and surrounding legislative history implies congressional intent that conduct not within exemption is subject to antitrust laws); *Cain v. Air Cargo, Inc., 599 F.2d 316 (9th Cir. 1979)*; *Mt. Hood States, Inc. v. Greyhound Corp., 555 F.2d 687, 691 (9th Cir. 1977)*, *cert. denied on this ground,* ***434 U.S. 1008***, *rev'd on other grounds,* *437 U.S. 322, 57 L. Ed. 2d 239, 98 S. Ct. 2370 (1978)*. Although the existence of a savings clause will not deter necessarily the implication of immunity, *see* *Pan Am. World Airways, Inc. v. United States, 371 U.S. at 321* (Brennan J. dissenting) (implied immunity in CAB statutory framework that specifically refers to competition), it does provide in this particular regulatory scheme an affirmative statutory basis for applying the antitrust laws.

[25] *See* *United States v. Nat'l Ass'n Sec. Dealers, 422 U.S. at 730-35* (immunity may be inferred if agency's exercise of authority is sufficiently pervasive to create actual or potential conflict).

> HN3[] Section 7 of the Anti-Trust Act gives a right of action to one who has been "injured in his business or property." Injury implies violation of a legal right. The legal rights of shipper as against carrier in respect to a rate are measured by the published tariff. Unless and until suspended or set aside, this rate is made, for all purposes, the legal rate, as between carrier and shipper. The rights as defined by the tariff cannot be varied or enlarged by either contract or tort of the carrier. . . . And they are not affected by the tort of a third party. . . . This stringent rule prevails, because otherwise the paramount purpose of Congress -- prevention of unjust discrimination -- might be defeated. If a shipper could recover under § 7 of the Anti-Trust Act for damages resulting from the exaction of a rate higher than that which would otherwise have prevailed, the amount recovered might, like a rebate, operate to give him a preference over his trade competitors.

Id. at 163. Brandeis was dealing in 1922 with the interaction of a tariff scheme and an antitrust regime indistinguishable **[**25]** from the FCC tariff scheme and the antitrust regime now before us. If this suit were brought by Bell System customers for recovery of damages because the filed tariff imposed excess costs upon them, we would probably have to conclude that the filed tariff doctrine precluded treble damage recovery under section 4 of the Clayton Act. But the filed tariff doctrine does not confer immunity from antitrust liability generally. [26] Indeed in the *Keogh* case Brandeis observed:

> But under the Anti-trust Act, a combination of carriers to fix reasonable and non-discriminatory rates may be illegal; and if so, the Government may have redress by criminal proceedings under § 3, by **[*1122]** injunction under § 4, and by forfeiture under § 6. That was settled by *United States v. Trans-Missouri Freight Association, 166 U.S. 290, 41 L. Ed. 1007, 17 S. Ct. 540*, and *United States v. Joint Traffic Association, 171 U.S. 505, 43 L. Ed. 259, 19 S. Ct. 25*. The fact that these rates had been approved by the Commission would not, it seems, bar proceedings by the Government.

260 U.S. at 161-62.

[26]** In this case the plaintiff is not suing in the capacity of a customer for communications services. Essential seeks recovery for injury to its business or property from actions taken by the defendants in formulating a tariff, and in rendering customer services. The Bell System will not be asked to disgorge to any customers any revenues derived under the filed tariff. Indeed, it can continue to collect those revenues until a new tariff is filed. There is no policy conflict, actual or potential, therefore, between the section 4 Clayton Act remedy and the antidiscrimination purposes of the filed tariff rule.

Arguably the claim for injunctive relief, which will, of course, operate prospectively, requires a different analysis than we have made respecting the claim for damages for past activities, although Justice Brandeis, in *Keogh,* apparently did not think so. As with the damage remedy, a discrete analysis is helpful. Under the 1934 Act two different kinds of tariffs may be involved. The first is a tariff initiated entirely by a carrier and filed pursuant to section 203. If an antitrust plaintiff establishes that such a tariff was devised for an anticompetitive purpose which cannot **[**27]** satisfy antitrust criteria, an injunction under section 16 of the Clayton Act could, it seems to us, require the filing of a new tariff, and the notice as required by section 203, without in any way impinging upon the jurisdiction of the FCC. That agency's jurisdiction attaches under sections 204 and 205 only after a carrier filing, and carriers under section 203 remain free to change their filed tariffs at any time on appropriate notice. If, on the other hand, the FCC has conducted an investigation and made an order under section 205, there may be a potential for conflict between the two regulatory regimes. Here, again, the distinction between customer plaintiffs and noncustomer plaintiffs is probably significant because of the interaction between the common carrier's duty to offer service to all who seek it

Ill. 1978)* *aff'd sub nom.* *American Tel & Tel. Co. v. Grady, 594 F.2d 594*, *cert. denied,* ***American Tel. & Tel. Co. v. MCI Communications Corp., 440 U.S. 971, 99 S. Ct. 1533, 59 L. Ed. 2d 787 (1979)***, (neither congressional intent nor cases support a blanket immunity for communications carriers and interconnection should not be impliedly immune); *Jarvis v. American Tel. & Tel. Co., 1978-2 Trade Cases (CCH) P62,197 (D.C. 1978)*; *United States v. American Tel. & Tel. Co., 427 F. Supp. 57, 60 (D.D.C. 1976)*, *cert. denied,* ***434 U.S. 966, 54 L. Ed. 2d 452, 98 S. Ct. 507 (1977)***.

on reasonable terms and conditions and the antitrust considerations involved in permitting potential competitors in communication services to have access to the Bell System network. However, the federal courts, not the FCC, have the primary responsibility for the enforcement of the antitrust laws even in the customer access context. Thus abdication of the responsibility for examining **[**28]** the prospective operation of a *section 205* order ought not to be decided lightly. In this case, where the antitrust claim for prospective relief is advanced on behalf of an equipment supplier rather than a Bell System customer, undue deference to the agency may be even less appropriate, since customers, not equipment manufacturers, are the special responsibility of the FCC. Undoubtedly, the terms of a *section 205* order must be taken into account in determining whether the restraint of trade charged in the complaint is unlawful, and if so, what prospectiverelief is appropriate. But we do not think that the presence of a *section 205* order can wholly preclude a section 16 Clayton Act lawsuit; the mere potential for such an order is an a fortiori case. [27]

[29]** C. *The Commission's Tariff Activity*

With the foregoing principles in mind, we turn to the FCC tariff activity as it bears **[*1123]** upon this case. Prior to 1968 only AT&T initiated tariffs were on file, and those flatly prohibited communications service customers from connecting electrically to Bell System lines any equipment not obtained from it. [28] In 1965 Thomas F. Carter filed a suit in the Northern District of Texas under the antitrust laws seeking damages and injunctive relief from AT&T and others because they would not permit Bell System customers to use his Carterfone device. The district court denied preliminary injunctive relief pending a determination by the FCC of the validity of the Bell System tariff, and the Fifth Circuit affirmed that denial. *Carter v. American Tel. & Tel. Co., 250 F. Supp. 188, 192* (N.D. Tex.), *aff'd, 365 F.2d 486 (5th Cir. 1966)*, *cert. denied, 385 U.S. 1008, 17 L. Ed. 2d 546, 87 S. Ct. 714 (1967)*. Then, for the first time, the FCC began an investigation, pursuant to *sections 204* and *205*, of the legality under the 1934 Act of the prohibition against connection of equipment obtained from other sources. In *In re Use of the* ***[**30]*** *Carterfone Device, 13 F.C.C.2d 420*, *reconsideration denied, 14 F.C.C.2d 571 (1968)*, the FCC determined that the tariff was unreasonable within the meaning of *section 201(b)* of the Act, and requested the submission of new tariffs which would permit the use of other source equipment by customers, but would not adversely affect the telephone company's operations or the network's utility for others. In the proceedings before the FCC, AT&T maintained that it was essential to the integrity of the communications network that no electrical connection be made to it of equipment which its operating companies or manufacturing subsidiary had not examined and supplied. The 1968 FCC order rejected that contention, 13 F.C.C.2d at 423, 424, while recognizing that integrity of the network was a legitimate concern. *Id.* at 425. In response to the FCC invitation, AT&T filed a new tariff permitting Bell System customers to protect their own equipment if they used carrier-supplied PCAs. The FCC was uncertain about the necessity for use of PCAs for the protection of the network, but in the absence of technical information it permitted the tariff to become effective without ruling explicitly on **[**31]** its legality. [29] Thus customers were required to lease PCAs from Bell System operating companies if they wanted to use their own telephone station equipment.

Between 1969 and 1972 the FCC conducted formal proceedings to assist in evaluation of the technical issues relating to the impact on network integrity of customer-owned equipment. On June 14, 1972, it instituted a Notice of Inquiry and Proposed Rulemaking aimed at determining the best approach to the problem. [30] The proceedings

[28] Tariff F.C.C. No. 132 PB.7, B.24 (filed April 16, 1957), superseded by Tariff F.C.C. No. 263 P2.6.1, 2.6.9 (filed January 2, 1968) (corresponding paragraphs substantially the same).

[29] *In re* American Tel. & Tel. Co., "Foreign Attachment" *Tariff Revisions, 15 F.C.C.2d 605, 610, 611 (1968)*, *reconsideration denied, 18 F.C.C.2d 871, 874 (1969)* (Tariff Nos. 259, 260, 263).

continued for several years. On November 7, 1975, two and one-half years after the filing of Essential's complaint in the district court, the **[**32]** FCC proposed a registration program for customer-supplied equipment. [31] That regulation permits direct attachment of customer-supplied equipment if the PCA or equipment is so registered with the FCC. Non-registered equipment may be attached only through Bell System PCAs.

Thus the FCC **[**33]** activity which the defendants claim to be preemptive here is divided into three stages. Prior to the FCC decision in *Carterfone* in 1968 there was on file a carrier initiated tariff prohibiting any use **[*1124]** of customer-supplied equipment. Since Essential was not in business during that period, that tariff bears on the issue of antitrust exemption only peripherally, if at all. Between 1968 and 1975 there was on file a carrier initiated tariff, filed in response to the *Carterfone* decision, permitting use of customer-supplied equipment only in conjunction with the use of Bell System PCAs. This is the period during which Essential allegedly suffered an injury to its business or property. Therefore, it is relevant to the viability of the section 4 Clayton Act claim. However, since the tariff that was in effect during the 1968-1975 period is no longer in effect, it will have no bearing upon the availability of prospective injunctive relief under section 16 of the Clayton Act. Finally, the post-1975 tariff, in effect today, may bear upon the scope of prospective injunctive relief sought under section 16.

The claim for money damages with respect to the 1968-1975 tariff is **[**34]** by a noncustomer. Therefore, it does not run afoul of the previously discussed binding effect, that exists between AT&T and its customers, of filed tariffs. Moreover, because the FCC never *required* the filing of the tariff in the form presented, no issue is presented of action taken under compulsion of law. [32]

Similarly no issue is presented of FCC approval. The FCC never approved the 1968-1975 tariff. Instead of holding a hearing immediately after the filing as permitted by the Act, the FCC told AT&T to file a tariff subject to later approval or disapproval in accordance with certain independent studies commissioned by the agency. In effect, the FCC suspended its judgment pending further study. We do not feel that this course of conduct rises to the level of agency approval that might require implied immunity. Postponement of action by the agency cannot be construed an approval **[**35]** requiring a court to refrain from enforcing the antitrust laws, especially where, as here, the agency ultimately declared the defendant's interim conduct improper. Thus we find no basis for the conclusion that the enforcement of section 4 of the Clayton Act in the form of money damages would present a conflict with the policies of the 1934 Act.

As to the claim under section 16 for injunctive relief, we hold that its dismissal on the pleadings cannot be affirmed. It is impossible to tell whether Essential could prove facts entitling it to injunctive relief. If injunctive relief were directed at NJ Bell's marketing and service activities, while refraining from alteration of the tariff imposed by the FCC in 1975, there would be no conflict between the tariff and the injunction. Moreover, while as between AT&T and its customers the FCC has the final word in service classifications, we are not prepared to hold, at the pleadings stage of an antitrust suit, that the FCC's tariff took insufficient account of third party competitive interests and ought to be modified. The separate question of whether a court before which a section 16 antitrust claim is pending is the appropriate forum for **[**36]** the consideration of such third party interests, or whether instead, for prospective relief from the operation of a tariff, Essential should be required to intervene in the FCC proceedings, exhaust administrative remedies, and then seek judicial review under *28 U.S.C. § 2342(1) (1976)* and *47 U.S.C. § 402 (1976)*, is one which need not be answered at this time. Any injunction which may be granted might be narrow enough that that question will not arise. We hold only that the plaintiff could under the complaint prove some state

Fla. 1976)*, *appeal dismissed, 568 F.2d 1203* (5th Cir.) *cert. denied, 439 U.S. 865 (1978)*, reach different conclusions as to exemption, we find them unpersuasive.

III. EXEMPTION BY VIRTUE OF STATE LAW

In Part II we have disposed of the ground on which the district court relied in dismissing the complaint. The defendants urge as a separate ground for affirmance that the PCA tariff, and its predecessor prohibition of customer-supplied equipment, merely paralleled the service obligations imposed upon it by state law. They rely particularly upon decisions in *Quick Action Collection Co. v. New York Tel. Co.,* [1920D] Pub. U. Rep. (PUR) 137, 143-44 (N.J. Bd. Pub. Util. Comm'rs), and *In re New Jersey Bell Tel. Co.,* 100 Pub. U. Rep. (PUR) 124, 127 (N.J. Bd. Pub. Util. Comm'rs 1953), which upheld the provisions of state tariff filings prohibiting connection of customer-owned equipment. Under the *Parker v. Brown* rule, they contend, these state law tariffs confer antitrust exemption.

There are several difficulties with **[**38]** this argument. The first is that the typical state regulatory scheme is essentially no different than that of the 1934 Act. It permits carriers to initiate tariffs, requires them to adhere strictly thereto in dealing with their customers, and permits their revision, in the interest of the customers, by a state regulatory agency. [33] The analysis which we made with respect to any conflict between federal ***antitrust law*** and state utility regulation in Part II is equally applicable here. A second, and we think insurmountable objection, is the holding in *Cantor v. Detroit Edison Co., 428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)* that the provisions of utility initiated tariff filings do not furnish a predicate for a *Parker v. Brown* exemption from antitrust claims by competitors injured as a result of compliance with the tariffs. The court's analysis in *Cantor* is entirely consistent with that which we made in Part II.

Finally, **[**39]** it is not at all clear that state law has any role in determining whether the Bell System could exclude customer-supplied equipment from attachment to its network. In the period between 1968 and 1975, while the FCC was investigating the technical ramifications of the PCA tariff, seventeen different state utility commissions undertook investigations of the same subject matter. This proliferation of possibly conflicting regulatory activity led the FCC to assert primacy in authority over the terms and conditions governing connection of customer-supplied equipment to the national network. [34] **[**40]** That ruling was challenged by a state regulatory commission, but was affirmed by a divided court. [35] As we noted above, the New Jersey Public Utilities Commission, following the *Telerent* holding, declined to pass upon the validity of the PCA tariff. We need not in this case decide whether the FCC authority totally preempts state authority in the field, as the Fourth Circuit majority held, for even if there is room for state tariff regulation there is no room for a *Parker v. Brown* immunity from antitrust liability.

IV. CONCLUSION

Our rejection of the claim of antitrust exemption requires that the judgment appealed from be reversed and the case remanded for further proceedings on the merits. Our discussion of the antitrust issues does not, of course, suggest that the conduct **[*1126]** complained of would, if proved, necessarily be found to have violated either *section 1* or

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

HN5[] Remedies, Damages

Section 1 of the Sherman Act, 15 U.S.C.S. § 1, does not necessarily prohibit a conspiracy to substitute a new distributor for an existing one. Competition, the ward of the Sherman Act, may not suffer by such a substitution, and may in fact be enhanced. If, however, the substitution is motivated by a desire to damage a competitor or put it out of business, or the result is to substantially lessen competition, the Sherman Act is violated.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Requirements Contracts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Output & Requirements Contracts

HN6[] Exclusive & Reciprocal Dealing, Requirements Contracts

An exclusive supply agreement entails a commitment by a buyer to deal only with a particular seller. A requirements contract is functionally the same if it commits the buyer to acquire all the products it needs from the seller. The agreement need not specifically require the buyer to forego other supply sources if the practical effect is the same.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN7[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

A complaining trader must allege and prove that a particular arrangement unreasonably restricts the opportunities of the seller's competitors to market their product. The actual dollar amount of the total trade is not important in these dealership cases, rather it is the nature and tendency of the agreement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN8[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

Section 3 of the Clayton Act, *15 U.S.C.S. § 14*, prohibits an exclusive dealing arrangement when its effect may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN9[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

To prove a violation of *§ 3* of the Clayton Act, *15 U.S.C.S. § 14*, a plaintiff must show the exclusive dealing arrangement has or probably will foreclose competition in a substantial share of a line of commerce.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Criminal Law & Procedure > ... > Inchoate Crimes > Attempt > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Criminal Law & Procedure > ... > Inchoate Crimes > Attempt > General Overview

HN10[] **Scope, Monopolization Offenses**

To show a cause of action based upon the *§ 2*, Sherman Act, *15 U.S.C.S. § 2*, offense of attempting to monopolize, a plaintiff must sufficiently allege the defendant's specific intent to monopolize and the dangerous probability that the attempt would result in a monopoly. This latter requirement entails showing the relevant market and the power of the defendant in it.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN11[] **Monopolies & Monopolization, Attempts to Monopolize**

The gravamen of an offense involving monopolization is the power of the defendant in the market in which it competes. The mere fact that a company exerts control within its own vertical framework through trademarks or otherwise does not speak to the question of power in its own market.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN12[] **Scope, Monopolization Offenses**

Conspiring to monopolize is a separate offense under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, requiring less in the way of proof than the other *§ 2* offenses. In this context, a plaintiff need show defendants' specific intent to monopolize any part of interstate commerce. The market power in a "relevant market" need not be proved.

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

Sections 1 and *2* of the Sherman Act, *15 U.S.C.S. §§1*,*2*, overlap in part and also supplement each other. *Section 1* can be said to be directed in the main to devices or conduct that destroy competition; *§ 2* prohibits the anticompetitive result described as monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN14[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Although the offense of conspiring to monopolize appears to address the means by which competition is harmed, the gravamen of that offense is the intent to achieve the unlawful result. It is not of importance whether the means used to accomplish the unlawful objective are in themselves lawful or unlawful.

Civil Procedure > Appeals > Notice of Appeal

HN15[] **Appeals, Notice of Appeal**

To perfect an appeal, a party must file a notice of appeal that shall specify the party or parties taking the appeal; shall designate the judgment, order or part thereof appealed from; and shall name the court to which the appeal is taken. *Fed. R. App. P. 3(c)*.

Judges: Before DOYLE, McKAY and LOGAN, Circuit Judges.

Opinion by: LOGAN

Opinion

[*1370] This appeal arises out of a private antitrust suit brought by Perington Wholesale, Inc. (Perington), against Burger King Corporation (Burger King), Davmor Industries, Inc. (Davmor), and Carpenter Paper Company (Carpenter). Among other claims, Perington asserts that defendants conspired to restrain trade and conspired or attempted to monopolize in violation of the Sherman Act, *15 U.S.C. §§ 1*, *2*, and utilized a tying arrangement in violation of the Sherman Act, *15 U.S.C. § 1*, and the Clayton Act, *15 U.S.C. § 14*. Early in the proceedings the trial judge granted Carpenter's *Fed.R.Civ.P. 12(b)(6)* motion to dismiss for **[**2]** failure to state a claim against it, finding the complaint insufficiently alleged Carpenter's participation in a conspiracy. The judge later granted Burger King's and Davmor's *Fed.R.Civ.P. 56(b)* motion for partial summary judgment on the tying claims, and at the same time issued a final order dismissing the entire action, including any remaining Sherman and Clayton Act claims. [1.]

Perington challenges on appeal the propriety of the judge's disposition of the federal antitrust contentions, arguing that its complaint sufficiently stated claims for relief, [2.] and that summary judgment should not have been granted on the tying claims.

[3]** **[*1371]** The factual allegations in Perington's complaint, as amended, which we assume to be true for purposes of considering the propriety of the dismissal for failure to state recognizable claims, are as follows. Perington is engaged in the business of supplying food and nonfood products to restaurants in Colorado and Wyoming. Burger King both franchises and operates fast food restaurants in that trade area and elsewhere. Perington entered into a contract with Davmor by which Davmor agreed to sell "paper products, promotional items, condiments and frozen foods" to Perington for distribution and resale to Burger King restaurants that chose to deal with Perington. Davmor, a wholly-owned subsidiary of Burger King, operated a nationwide commissary system for supplying Burger King restaurants with goods meeting Burger King quality standards. Although Davmor supplied

---

[1.] In this Final Order of Dismissal, filed August 23, 1977, in which the judge dismissed all other claims against those defendants, apparently on his own motion, express reference was made only to the monopoly claims, but we will treat the order as also a dismissal of the conspiracy claims against Burger King and Davmor under *Fed.R.Civ.P. 12(b)(6)*.

[2.] Davmor and Burger King argue that the *Fed.R.Civ.P. 12(b)(6)* dismissal of the claims against Carpenter is not properly before this court, that order allegedly having become final before the trial court's final order of dismissal. Carpenter did not make an appearance in this appeal, although it was properly served with notice of appeal. We conclude Perington may challenge that order. In multiparty actions such as this, unless the trial judge expressly directs entry of a final judgment as to less than all the parties in accordance with the requirements of *Fed.R.Civ.P. 54(b)*, the order does not become final until entry of judgment adjudicating all the claims, rights and liabilities of all the parties. *Golden Villa Spa, Inc. v. Health Industries, Inc., 549 F.2d 1363, 1364 (10th Cir. 1977)*; *Pipeliners Local Union No. 798 v. Ellerd, 503 F.2d 1193, 1199 (10th Cir. 1974)*. Since the trial judge did not make such an entry, the order was not final until the final order of dismissal from which Perington appeals. An appeal from a final judgment draws into question all nonfinal orders preceding it. *Herron v. Rozelle, 480 F.2d 282, 285 (10th Cir. 1973)*; 9 Moore's Federal Practice P 203.18 (2d ed. 1975). The notice of appeal was not misleading and the docketing statement filed according to *Tenth Cir. R. 8* fairly apprised the parties, including Carpenter, of the issues to be argued. Therefore, we conclude the questioned matters are properly before this court.

directly restaurants in many areas of the country, it was unable to do so in Colorado. Perington's services were therefore engaged to fill this void.

The agreement, as implemented by Davmor, required that any products bearing the Burger King trademark, service mark or private label (logoed products) sold by Perington **[**4]** be acquired from Davmor, which was the exclusive source of some logoed products and the prime, though not only, source of other such items. The agreement did not impose a similar requirement concerning nonlogoed products available from Davmor. The agreement was terminable by either party for any reason.

Thereafter, Perington bought from Davmor most of the logoed products it needed for resale, but filled its needs for logoed paper cups from a different supplier. This supplier, unnamed in the complaint, was authorized by Burger King to market paper cups bearing the logo. These were known as "Solo" brand cups; Davmor supplied "Sweetheart" cups.

Notwithstanding a letter from Davmor calling to Perington's attention its breach of the exclusive supply provision, Perington continued to supply the restaurants with Solo brand cups, which it apparently acquired at a lower price than Davmor would sell Sweetheart cups. Davmor then cancelled the agreement, and Burger King wrote a letter to at least some of the restaurants notifying them that Perington had been terminated, giving reasons for the termination which Perington asserts were untrue and libelous. Thereafter, Carpenter became Davmor's **[**5]** new distributor for paper products. Due to the termination of the agreement, Perington was unable to sell any products to Burger King restaurants. (Copies of the agreement, the cancellation letter and the Burger King letter to some of its franchisees or outlets were attached to the complaint).

I

Sufficiency of Complaint to Withstand Motion to Dismiss

The essential function of a complaint under modern pleading is twofold to give opposing parties fair notice of the basis of the claim against them so they may respond to the complaint, and to apprise the court of sufficient allegations to allow it to conclude, if the allegations are proved, that the claimant has a legal right to relief. ***HN1***[] Thus, if an opposing party cannot formulate a responsive pleading because the factual allegations are too sparse, it is entitled to move for a more definite statement. *Fed.R.Civ.P. **[*1372]** 12(e)*. ***HN2***[] On the other hand, the trial court must conclude "beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief" before the pleadings can be dismissed under *Rule 12(b)(6)*. *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 102, 2 L. Ed. 2d 80 **[**6]** (1957)*.

A. Sufficiency to Give Fair Notice of Basis of Claim

Perington's original complaint made the conspiracy assertion in the following language: "Plaintiff is informed and believes, and upon information and belief alleges that defendants conspired to cancel (the agreement)." Davmor and Burger King answered, but Carpenter filed a *Rule 12(b)(6)* motion to dismiss, arguing that the allegation of its participation in the conspiracy was conclusory and therefore insufficient to state a claim for relief. The trial judge granted Carpenter's motion and gave Perington twenty days to amend the complaint in order to properly allege Carpenter's participation.

The amended complaint, filed on July 18, 1975, contained an additional count, asserted "against Carpenter Paper Company, only." Perington's allegations in that count, again asserted upon information and belief, essentially restated the allegation of the original complaint; no substance was added. [3.]

[7]** The trial judge then granted Carpenter's renewed motion to dismiss on the ground that

---

[3.] Because we have concluded that the amendment added nothing to the original complaint, we need not deal with Davmor's and Burger King's contention that the additional count's reference to Carpenter "only" somehow requires a different result concerning the allegations against them.

> (t)he Amendment to the Complaint does not specify in any manner the facts with respect to Carpenter's conduct which would make it a part of that conspiracy or combination.
> The Court also observes that this action has been pending since November 26, 1974, when the Complaint was filed; that the granting of the Motion to Dismiss previously provided for an amendment; that the plaintiff has had an adequate opportunity to develop the facts, if there are any facts, to establish liability of this defendant, and has failed to do so.

In this case it cannot be said that defendants did not have fair notice of Perington's claims, or that beyond doubt the plaintiff would be unable to prove the claim of conspiracy. The conduct complained of termination of the distributorship is adequately specified, and the allegation of conspiracy related to that conduct. Nothing in the complaint negates the claim of conspiracy. Whether the allegation is called conclusory, as it is, or factual, as it is also, is not determinative. *United States v. Employing Plasterers Ass'n, 347 U.S. 186, 74 S. Ct. 452, 98* ***[**8]*** *L. Ed. 618 (1954)*.

Moreover, pleading on "information and belief" in appropriate circumstances fits well with the spirit of the rules. We agree with *Carroll v. Morrison Hotel Corp., 149 F.2d 404 (7th Cir. 1945)*, which reasoned that although the Rules do not specifically provide for such pleading,

> *Rule 8(f)* states that "All pleadings shall be so construed as to do substantial justice"; consequently to refuse to give credence to them on defendants' motion to dismiss would be opposed to the spirit of the Rules. Furthermore, Rule 11 provides that the signature of an attorney to the pleading is a certificate that "to the best of his knowledge, information, and belief" there appears to be good ground to support the pleading; so the concept of "information and belief" is recognized under the Rules, and there appears to be no good reason why such pleading is not permissible, as in the instant case, where the matters are peculiarly within the knowledge of the defendants.

149 F.2d at 406. Cf. *Bertucelli v. Carreras, 467 F.2d 214, 215 n.4 (9th Cir. 1972)* (information was not peculiarly within the knowledge of defendants). See 5 C. Wright & A. Miller, Federal Practice & Procedure: **[**9]** Civil **[*1373]** § 1224 (1969). In antitrust actions such as this, "where the proof is in the hands of the alleged conspirators," *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*, allowing such pleading when the conduct complained of is otherwise fairly noticed seems appropriate. As noted by the Supreme Court in Conley, which involved an assertion that specific facts must be pleaded,

> ***HN3***[] All the Rules require is "a short and plain statement of the claim" that will give the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests. The illustrative forms appended to the Rules plainly demonstrate this. Such simplified "notice pleading" is made possible by the liberal opportunity for discovery and the other pretrial procedures established by the Rules to disclose more precisely the basis of both claim and defense and to define more narrowly the disputed facts and issues. Following the simple guide of *Rule 8(f)* that "all pleadings shall be so construed as to do substantial justice," we have no doubt that petitioners' complaint adequately set forth a claim and gave the respondents fair notice **[**10]** of its basis. The Federal Rules reject the approach that pleading is a game of skill in which one misstep by counsel may be decisive of the outcome and accept the principle that the purpose of pleading is to facilitate a proper decision on the merits.

355 U.S. at 47-48, 78 S. Ct. at 103 (footnotes omitted). Therefore, we hold the allegations gave fair notice of the basis of the claim sufficient to withstand the motion to dismiss. [4.]

[4.] Defendants would make much of the fact that Perington conducted no discovery, although it allegedly had ample opportunity to develop facts to show in detail the nature of the alleged violations. While we do not condone Perington's dilatory conduct of the litigation, we cannot agree that failure to discover, when the complaint is otherwise adequate, justifies dismissal for failure to state a claim for relief. If a party has had ample opportunity to discover, yet has not, the opposing party may move for summary judgment under *Rule 56* and thereby put the claimant to its proof on the merits. *Natrona Service, Inc. v. Continental Oil Co., 598*

[11]** B. Sufficiency to Show Legal Right to Relief

Perington pleaded that defendants conspired to terminate the agreement and replace Perington with Carpenter, and that the arrangement as enforced resulted in a substantial lessening of competition in the market for logoed cups, restrained trade, and conspired or attempted to monopolize the right to supply Burger King franchises. Sections 1 and 2 of the Sherman Act and sections 2 and 3 of the Clayton Act, as well as the Colorado ***antitrust law***, were cited without labeling particular acts as violations of specific sections. It is not necessary, of course, that the particular theory or law under which recovery is sought be pleaded, nor are the dimensions of a lawsuit determined by the pleadings. *Misco Leasing, Inc. v. Keller, 490 F.2d 545, 548 (10th Cir. 1974)*. ***HN4***[] But the complaint must allege facts sufficient, if they are proved, to allow the court to conclude that claimant has a legal right to relief. See *Conley v. Gibson, 355 U.S. 41, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*. The question, therefore, is whether the facts alleged would support a right to relief cognizable under the statutes invoked by Perington.

1. *Section 1* of the Sherman **[**12]** Act

Section 1 of the Sherman Act, *15 U.S.C. § 1*, ***HN5***[] does not necessarily prohibit a conspiracy to substitute a new distributor for an existing one. E. g., *Craig v. Sun Oil Co., 515 F.2d 221 (10th Cir. 1975)*, cert. denied, *429 U.S. 829, 97 S. Ct. 88, 50 L. Ed. 2d 92 (1976)*. Competition, the ward of the Sherman Act, may not suffer by such a substitution, and may in fact be enhanced. See *Ricchetti v. Meister Brau, Inc., 431 F.2d 1211, 1214-15 (9th Cir. 1970)*, cert. denied, *401 U.S. 939, 91 S. Ct. 934, 28 L. Ed. 2d 219* ***[*1374]*** *(1971)*. If, however, the substitution is motivated by a desire to damage Perington or put it out of business, or the result is to substantially lessen competition, the Sherman Act is violated. See *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71 (9th Cir. 1969)*, cert. denied, *396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755 (1970)*; *Walker Distrib. Co. v. Lucky Lager Brewing Co., 323 F.2d 1 (9th Cir. 1963)*, cert. denied, *385 U.S. 976, 87 S. Ct. 507, 17 L. Ed. 2d 438 (1966)*; *Ace Beer Distributors, Inc. v. Kohn, Inc., 318 F.2d 283* (6th Cir.), cert. denied, *375 U.S. 922, 84 S. Ct. 267, 11 L. Ed. 2d 166 (1963)*; *Englander Motors, Inc. v.* ***[**13]*** *Ford Motor Co., 267 F.2d 11 (6th Cir. 1959)*.

The original complaint asserts a conspiracy to cancel the agreement, and because of the cancellation Perington was unable to sell to Burger King franchisees and outlets. The amended complaint recites the conspiracy to terminate, and that the "purpose and intended effect was to restrain and prevent further activity" by Perington in the relevant market, and the activity was "an attempt to monopolize the right to supply Burger King franchises and retail stores." But it also asserts Davmor demanded that Perington buy Sweetheart paper cups from it, instead of the Solo brand cups it was acquiring elsewhere, and that the reason for cancelling the agreement was Perington's refusal to comply with that demand.

We do not construe the complaint to allege a primary motivation to damage Perington, or to put it out of business as a competitor of Carpenter or Davmor. Rather, the reasonable construction is that the termination was motivated by Davmor's desire to increase its share of the relevant market for paper cups. So viewed, the complaint must stand or fall upon whether there are factual allegations that if proved tend to show an actual lessening **[**14]** of competition, a restraint of trade.

The complaint describes an exclusive supply agreement which was cancelled for allegedly anticompetitive motives. ***HN6***[] An exclusive supply agreement entails a commitment by a buyer to deal only with a particular seller. A requirements contract is functionally the same if it commits the buyer to acquire all the products it needs from the seller. L. Sullivan, Handbook of the Law of Antitrust § 163 (1977). The agreement need not specifically require the buyer to forego other supply sources if the practical effect is the same. Cf. *United Shoe Mach. Corp. v. United States, 258 U.S. 451, 457, 42 S. Ct. 363, 66 L. Ed. 708 (1922)* (Clayton Act, *section 3* case). The antitrust vice of these arrangements is the foreclosure of part of the market in which the seller competes by taking away the freedom of the buyer to choose from the products of competing traders in the seller's market. See *United States v. Columbia Steel Co., 334 U.S. 495, 524, 68 S. Ct. 1107, 92 L. Ed. 1533 (1948)*. Because these arrangements may

---

F.2d 1294 (10th Cir. 1979). See also *First Nat'l Bank v. Cities Service Co., 391 U.S. 253, 288-290, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)*; *Modern Home Inst., Inc. v. Hartford Accident & Indem. Co., 513 F.2d 102 (2d Cir. 1975)*.

actually enhance competition, however, they are not deemed per se illegal. *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 333, 81 S. Ct. **[**15]** 623, 5 L. Ed. 2d 580 (1961)*. ***HN7***[] Thus, a complaining trader must allege and prove that a particular arrangement unreasonably restricts the opportunities of the seller's competitors to market their product. *United States v. Columbia Steel Co., 334 U.S. 495, 524, 68 S. Ct. 1107, 92 L. Ed. 1533 (1948)*. The actual dollar amount of the total trade is not important in these dealership cases, rather it is the nature and tendency of the agreement. *Perryton Wholesale, Inc. v. Pioneer Distrib. Co., 353 F.2d 618, 622 (10th Cir. 1965)*; *New Home Appliance Center, Inc. v. Thompson, 250 F.2d 881, 884 (10th Cir. 1957)*.

A problem with the instant complaint is that while it asserts Perington was foreclosed from selling apparently anything, including Solo cups, to Burger King restaurants, the wholesale agreement attached to the complaint expressly states that it is nonexclusive and that "no franchisee of Burger King corporation is required to purchase any item whatsoever from Wholesaler." Further, Perington's complaint alleges Burger King gave "untrue, unjustified and libelous per se " reasons to its restaurants for the cancellation.

The competition being lessened by the defendants' actions, if any, **[**16]** must be in the paper cup market, or perhaps in all supplies of which Davmor was not the sole licensee **[*1375]** under the Burger King logo policy. Thus, if the restaurants are free to purchase from any wholesaler there is no lessening of competition cognizable under the antitrust laws, although Perington may have a tort claim for libel.

We read these complaints liberally, however, as indicated in *Conley v. Gibson, 355 U.S. 41, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*. Despite the tort allegation, a reasonable inference from the complaint, as amplified by its exhibits, is that the trade practice, if not a tacit requirement imposed by Burger King and/or Davmor, is that all Burger King outlets and franchisees buy all their logoed supplies from only one supplier, i. e. one in the position Perington occupied. The Burger King letter (Exhibit C) supports that inference by stating "Even though some of you had expressed no reason or desire to change purveyors . . . I hope that you realize that this decision was made because Carpenter Paper Company will give better service and prices than you are experiencing with Perington." Thus, if coercion is exercised by Davmor and Burger King to freeze **[**17]** out other suppliers, then there could be a substantial lessening of competition in the market for supplying the restaurants. But if the restaurant managers are free to deal with Perington and others, on all items not available exclusively through Davmor, then there would not be a lessening of competition in violation of the antitrust laws.

We hold the complaint states a cause of action under *section 1* of the Sherman Act. Perhaps Burger King, or its subsidiary Davmor, could supply all logoed paper cups and other items to its outlets and franchisees without violation of the antitrust laws. But once independent businesses are employed in its distribution structure, it cannot accede to the demands of one competitor-distributor to lessen competition in that entity's market. *United States v. Arnold, Schwinn & Co., 388 U.S. 365, 87 S. Ct. 1856, 18 L. Ed. 2d 1249 (1967)*. If Carpenter is a knowing participant in an exclusive dealing contract having that effect, it would be liable. The fact Perington had itself signed such an agreement would not preclude it from suing on the antitrust violation. See *Perma Life Mufflers, Inc. v. Int'l Parts Corp., 392 U.S. 134, 88 S. Ct. 1981, 20 L. Ed.* **[**18]** *2d 982 (1968)*.

2. *Section 3* of the Clayton Act [5.]

Section 3 of the Clayton Act, *15 U.S.C. § 14*, ***HN8***[] prohibits an exclusive dealing arrangement when its effect "may be to substantially lessen competition or tend to create a monopoly in any line of commerce." *Section 3* is designed to catch in its net those arrangements that if left unchecked probably would blossom into actual restraints violating *section 1* of the *Sherman Act. Standard Fashion Co. v. Magrane-Houston Co., 258 U.S. 346, 42 S. Ct. 360, 66 L. Ed. 653 (1922)*. ***HN9***[] To prove a violation of *section 3*, a plaintiff must show the exclusive dealing arrangement has or probably will foreclose competition in a substantial share **[**19]** of a line of commerce. *Tampa*

---

5. Even though Perington's complaint pursued only the theory of a tying arrangement violating this statute, we must examine the complaint to determine if the allegations support relief on any possible theory. See *Robertson v. Johnston, 376 F.2d 43 (5th Cir. 1967)*; 5 C. Wright & A. Miller, Federal Practice & Procedure: Civil § 1357 (1969).

Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961); *Standard Oil Co. v. United States, 337 U.S. 293, 314, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949)*.

Thus the same analysis discussed above in connection with *section 1* of Sherman Act supports a claim under *section 3* of the Clayton Act. Perington's allegations, liberally construed, correspond with the requirements established by the Supreme Court in Tampa Electric for proving a *section 3* case. See *365 U.S. at 327-35, 81 S. Ct. 623*. The line of commerce the market for supplying Burger King logoed cups is identified; the relevant market area of effective competition is suggested to be Wyoming and Colorado; a substantial share of the competition in that market was or probably would be foreclosed if the Burger King restaurants are required to buy only Davmor's products. We cannot conclude that without doubt Perington would be unable to prove a *section 3* violation against the three defendants.

[*1376] 3. *Section 2* of the Sherman Act

a. Attempt to Monopolize

In its complaint, as amended, Perington asserts that defendants attempted to monopolize the "right to supply **[**20]** Burger King franchises and retail stores," in violation of *section 2* of the Sherman Act, *15 U.S.C. § 2*. We interpret this to mean an attempt to monopolize the market for all items food and nonfood, logoed and nonlogoed purchased by the Burger King restaurants located in the Wyoming and Colorado trade area. In its Final Order of Dismissal, without elaboration, the trial judge dismissed these claims as conclusory and insufficient to state a claim upon which relief could be granted. We conclude that concerning Burger King and Carpenter the complaint does fail; concerning Davmor, this claim for relief was sufficiently alleged.

HN10[] To show a cause of action based upon the *section 2* offense of attempting to monopolize, a plaintiff must sufficiently allege the defendant's specific intent to monopolize and the dangerous probability that the attempt would result in a monopoly. *Pacific Eng'r & Prod. Co. v. Kerr-McGee Corp., 551 F.2d 790, 791* (10th Cir.), cert. denied, *434 U.S. 879, 98 S. Ct. 234, 54 L. Ed. 2d 160 (1977)*. This latter requirement entails showing the relevant market and the power of the defendant in it. *E. J. Delaney Corp. v. Bonne Bell, Inc., 525 F.2d 296, 306 (10th Cir. 1975)*, **[**21]** cert. denied, *425 U.S. 907, 96 S. Ct. 1501, 47 L. Ed. 2d 758 (1976)*.

The relevant allegations against Davmor in this context are essentially the same as those relating to the *section 1* theory discussed above. Having concluded that Perington's allegations show a claim sufficient to survive a challenge to the pleading that competition in the Burger King restaurant market may be substantially lessened by Davmor's device of cancellation of Perington for not buying the logoed "Sweetheart" cups, the question here is whether Perington's allegations show a dangerous probability that Davmor would thereby acquire monopoly power in the market for supplying all items to Burger King restaurants.

Perington's complaint alleges that Davmor is the exclusive source for many of the market's products and a prime source for others, and thus dominates the relevant market. As discussed above, the allegation that upon termination Perington was eliminated completely from the market, in context with the letter of Burger King to its franchisees attached as an exhibit, supports a reasonable inference, albeit not compelled, that Davmor's use of the device resulted in the complete exclusion of Davmor's competitors **[**22]** from the relevant market. In view of Davmor's alleged dominant position, the complaint sufficiently alleges the dangerous probability that monopoly power would result, and we cannot say beyond doubt that Perington would be unable to show the specific intent to monopolize.

The "attempt to monopolize" claim against Burger King, however, was properly dismissed; the issue here is different from that concerning Davmor. ***HN11***[] The gravamen of an offense involving monopolization is the power of the defendant in the market in which it competes. See generally L. Sullivan, Handbook of the Law of Antitrust §§ 12-21 (1976). The mere fact that a company exerts control within its own vertical framework through trademarks or otherwise does not speak to the question of power in its own market. See *United States v. Du Pont De Nemours Co., 351 U.S. 377, 393, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. Burger King competes in the fast-food industry and Perington's allegations do not address that market at all. Accordingly, the claim against Burger King was properly dismissed.

For similar reasons, the claim against Carpenter is insufficient. The complaint shows on its face that Carpenter does not compete **[**23]** in the market in which Davmor operates, for it acts as a direct supplier, not an intermediate supplier. We cannot conclude under these circumstances that Carpenter could have monopolized the market for all goods used by Burger King restaurants.

b. Conspiracy to Monopolize

The remaining Sherman Act question is whether the allegations support a **[*1377]** claim that defendants conspired to monopolize the market for all goods used by Burger King restaurants. [6] ***HN12***[] Conspiring to monopolize is a separate offense under *section 2*, requiring less in the way of proof than the other *section 2* offenses. In this context, a plaintiff need show defendants' specific intent to monopolize "any part" of interstate commerce. *Salco Corp. v. General Motors Corp., Buick Div., 517 F.2d 567, 576 (10th Cir. 1975)*. The market power in a "relevant market" need not be proved. Id. Perington's complaint alleges intent; it also specifies the targeted part of interstate commerce to be the market for supplying the restaurants located in the Colorado and Wyoming trade area. The issue presented here is whether traders oriented vertically to each other can be found in violation of *section 2* by conspiring to monopolize **[**24]** one horizontal market intersecting the vertical arrangement. That is, although Burger King and Carpenter were not attempting to exclude their competitors, does their complicity in Davmor's efforts to exclude its competitors support a possible finding of a conspiracy to monopolize any part of interstate commerce? Under the circumstances of this case, we believe it does.

The literal words of the statute do not supply an obvious answer to this issue; a conspiracy aimed at "any part" of interstate commerce is prohibited, however, thus suggesting one horizontal market in which at least one coconspirator competes suffices. On the other hand, it also refers to conspiring "to monopolize," suggesting that each coconspirator must intend exclusion of its own competitors, i. e., a purely horizontal conspiracy.

HN13[] It has long been recognized that **[**25]** *sections 1* and *2* of the Sherman Act overlap in part and also supplement each other. *Standard Oil Co. v. United States, 221 U.S. 1, 59-62, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*. *Section 1* can be said to be directed in the main to devices or conduct that destroy competition; *section 2* prohibits the anticompetitive result described as monopolization. *American Tobacco Co. v. United States, 328 U.S. 781, 809, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*. ***HN14***[] Although the offense of conspiring to monopolize appears to address the means by which competition is harmed, the gravamen of that offense is the intent to achieve the unlawful result. "It is not of importance whether the means used to accomplish the unlawful objective are in themselves lawful or unlawful." *Id. at 809, 66 S. Ct. at 1139*.

The fact that Davmor's coconspirators competed in markets different from Davmor's market does not preclude finding a conspiracy to monopolize Davmor's market. It does, however, potentially impact upon whether Burger King and Carpenter had the specific intent to erect that monopoly because they would not benefit from the foreclosure of Davmor's competitors in the classical sense, i. e., there was no identity **[**26]** of competitors and hence no elimination of their competitors. Each arguably would benefit, however, from participating in Davmor's anticompetitive arrangement Carpenter as a direct supplier of Davmor products and Burger King as Davmor's parent corporation and thus arguably had reason to conspire with Davmor. This, of course, is an evidentiary question to be determined on the merits. At this stage of the proceedings, it is sufficient to conclude that the complaint supports a claim of conspiracy to monopolize against all three defendants.

II

The Tying Claim

---

[6] Whether Perington's complaint asserts the claim of conspiring to monopolize is ambiguous, but in view of the liberal rules of pleading, we conclude it fairly raises this claim.

Perington's original complaint, inter alia, alleged an unlawful tying arrangement in violation of *section 1* of the Sherman Act, *15 U.S.C. § 1*, and *section 3* of the Clayton Act, *15 U.S.C. § 14*. The alleged tied products were Sweetheart cups; no tying products were specified in the complaint, although the classic tying arrangement requires both a tying and a tied product. *Colorado Pump & Supply Co. v. Febco, 472 F.2d 637, 640* (10th Cir.), cert. denied, *411 U.S. 987, 93 S. Ct. 2274, 36 L. Ed. 2d 965 (1973)*.

[*1378] In an answer to interrogatories, Perington identified the tying product as "the right to sell to Burger **[**27]** King franchisees," but in its brief opposing defendants' *Fed.R.Civ.P. 56(b)* motion for partial summary judgment on these issues it shifted to the theory that the tying product was the right to use the Burger King logo. At a hearing before the trial judge, Perington was confronted with this Court's holding in *Redd v. Shell Oil Co., 524 F.2d 1054 (10th Cir. 1975)*, cert. denied, *425 U.S. 912, 96 S. Ct. 1508, 47 L. Ed. 2d 762 (1976)*, and abandoned its contention that the tying product was the right to use the Burger King logo. Instead, Perington argued that unspecified promotional products bearing the Burger King logo were the tying products. Perington contended that in order to acquire these products, allegedly available only from Davmor, it had to buy the tied product, Sweetheart cups, even though it could obtain suitable cups elsewhere. Because of the confusing changes in the theory of liability and because Perington could not identify the promotional products, the trial judge ordered Perington to supplement its complaint by specifically delineating the identity of the promotional products and the dates of offers conditioned on the tied product also being purchased.

Perington thereafter **[**28]** filed a second amended complaint setting forth seven specific items, noting that the list was only partial. Contrary to the court's order, the complaint did not identify when the items were conditionally offered to Perington. Defendants renewed the *Rule 56(b)* motion. Perington responded with a statement opposing the renewed motion and attached thereto the affidavit of Alton L. Perington, its President. The affidavit asserted the only facts known to Perington were that the promotional products were sold as part of promotions made after termination of the contract. The accompanying memorandum stated that information concerning promotions conducted "since" the contract's termination were peculiarly within the knowledge of defendants.

Thereafter, the trial court ordered final dismissal of Perington's tying claims, reasoning that items sold pursuant to promotions after the termination of the contract could not have been tying products. The court also noted the history of Perington's attempts to make a case of illegal tying and that it had been given more than an adequate opportunity to develop its case.

From our consideration of the record, as summarized above, we hold the trial **[**29]** court correctly granted defendants' motion for partial summary judgment. [7.] While summary judgments in antitrust litigation are to be used sparingly and are seldom justified. *United States v. Employing Plasterers Ass'n, 347 U.S. 186, 74 S. Ct. 452, 98 L. Ed. 618 (1954)*, the circumstances of this case compel the conclusion that Perington failed to survive the challenge to the merits of its claim.

After considerable assistance by the trial court in identifying its theory, followed by an order that it specifically identify the tying products and when they were conditionally offered, Perington attempted to survive the challenge by claiming the necessary proof was in the hands of defendants. Perington, however, was **[**30]** ordered to supply information concerning offerings to it made before the termination of the contract, information that, under its final theory, had to be in its own possession. Put finally to its proof, Perington simply did not come forward. See *Natrona Service, Inc. v. Continental Oil Co.. 598 F.2d 1294 (10th Cir. 1979)*. We cannot accept Perington's desire "to get to a jury on the basis of the allegations in (its) complaint( ), coupled with the hope that something can be developed at trial in a way to support those allegations. . . ." *First Nat'l Bank v. Cities Service Co., 391 U.S. 253, 289-90, 88 S. Ct. 1575, 1593, 20 L. Ed. 2d 569 (1968)*.

---

7. While the trial court treated the affidavit as "an additional amendment to the amended complaint, as amended," the order related to the *Rule 56(b)* motion and an evidentiary question. We therefore treat the affidavit as a matter outside of the pleadings and the order as one granting summary judgment.

[*1379] At the eleventh hour before oral argument of this appeal Perington submitted a supplemental brief raising the issue whether "the right to sell to Burger King franchisees" can be a tying product within the meaning of the antitrust laws. Because Perington explicitly abandoned this theory in response to a direct question by the trial court, we decline to consider this issue and express no opinion thereon.

The judgment is affirmed in part, reversed in part, and remanded with direction for further proceedings consistent herewith.

[31]** WILLIAM E. DOYLE, Circuit Judge, concurs in the opinion but in view of the remand for trial would not affirm the partial summary judgment on the tying claim.

ON REHEARING

In its petition for rehearing, Carpenter Paper Company called to our attention documents that were not before the Court when we determined that Perington had adequately raised in its appeal the propriety of the *Fed.R.Civ.P. 12(b)(6)* order dismissing Carpenter from the suit. Carpenter contends that Perington did not intend to appeal the *Rule 12(b)(6)* dismissal when the notice of appeal was filed. We granted rehearing, giving Perington Wholesale, Inc. an opportunity to answer Carpenter's arguments.

Carpenter contends the following evidence requires us to conclude Perington did not intend to appeal the dismissal of Carpenter from the lawsuit: it was not served with the notice of appeal, as inferentially supported by a letter from the clerk of the district court sent to counsel of the other parties concerning designation of the record on appeal; the notice of appeal listed only Burger King and Davmor in the caption; and the notice of appeal specified only appeal from "the final Order of Dismissal entered on the **[**32]** 23rd day of August, 1977." We disagree.

Our jurisdiction is limited to the judgment, order, or part thereof designated in the notice of appeal, *Scaramucci v. Dresser Industries, Inc., 427 F.2d 1309, 1318 (10th Cir. 1970)*, but the notice of appeal is not to be given a wooden interpretation. See *Foman v. Davis, 371 U.S. 178, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*; *Herron v. Rozelle, 480 F.2d 282, 285 (10th Cir. 1973)*. The question is whether the notice of appeal and subsequent appellate proceedings support the inference that at the time of filing the notice, appellant sought to appeal the unspecified order. *Foman v. Davis, 371 U.S. 178, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*; *Elfman Motors, Inc. v. Chrysler Corp., 567 F.2d 1252, 1254 (3d Cir. 1977)*. This is true even if the specified order appears unambiguous. *Vigil v. United States, 430 F.2d 1357 (10th Cir. 1970)*.

HN15[] To perfect an appeal, a party must file a notice of appeal that "shall specify the party or parties taking the appeal; shall designate the judgment, order or part thereof appealed from; and shall name the court to which the appeal is taken." *Fed.R.App.P. 3(c)*. Nothing in the rules requires a listing of the appellees; thus, **[**33]** it is not fatal that Carpenter did not appear in the caption of the notice of appeal.

The notice of appeal must be filed with the clerk of the district court within thirty days of the date of entry of the order of judgment appealed from. *28 U.S.C. § 2107*; *Fed.R.App.P. 4(a)*. The duty to serve the notice falls on the clerk of the district court, who failed to serve Carpenter. But this does not conclude the issue because *Fed.R.App.P. 3(d)* provides that the clerk's failure to serve the notice does not affect the validity of the appeal.

The designation in the notice of appeal of the order appealed from, quoted above, is at best ambiguous. The docketing statement, filed on October 26, 1977, pursuant to *Tenth Cir.R. 8*, did name Carpenter as an appellee and specified issues it would raise against Carpenter. This document and all motions and briefs thereafter filed in the appeal appear to have been mailed to Carpenter. The exhibits to Carpenter's petition for rehearing indicate that on February 9, 1978, it notified the Clerk of this Court of its objection to being treated as an appellee.

Appraising the above-stated objective facts, we see three possible inferences: that Perington **[**34]** always intended to appeal the **[*1380]** dismissal of Carpenter; that at the time Perington filed the notice of appeal it did not think of the order concerning Carpenter, but if it had, it would have intended to a appeal that order; or that Perington did not initially intend to appeal the order, but changed its mind before filing the docketing statement. We have no witching rod to divine Perington's subjective intent; and in a case like this we hold that the ambiguity should be resolved in favor of permitting the appeal to go forward. There is here no deception and prejudice to Carpenter. Since it did not receive the notice of appeal, Carpenter could not have been misled by the caption. The documents mailed to Carpenter fairly apprised it of the issues to be asserted against it with ample opportunity to prepare for the appeal. Carpenter could have filed with this Court a motion to dismiss for lack of jurisdiction pursuant to *Tenth Cir.R. 9* once it knew of Perington's intent to go forward against it, but did not.

The Clerk of this Court, in response to Carpenter's letter of February 9, 1978, instructed Carpenter's counsel to "do whatever the circumstances may warrant," i. e., **[**35]** to ignore the appeal at its peril. Carpenter, however, did not participate in the briefing and arguments on appeal, apparently based upon its view, which we reject, that no appeal was taken of the order dismissing it from the suit. Although Carpenter forfeited its right to be heard on the merits, this Court now chooses to grant Carpenter twenty days from the date of entry of this opinion to file a brief on the merits of its case, if it has contentions to make on the rulings decided against it. See *Fed.R.App.P. 3(a)*. The mandate against Carpenter will be withheld until the Court has considered any brief so filed.

There has also been filed herein a petition for rehearing by Perington with respect to those issues decided in our original opinion against it. That motion is denied by unanimous vote of the panel.

HN3[] **Supporting Materials, Affidavits**

No summary judgment motion is lightly granted. Summary judgment is to be denied unless the moving party demonstrates entitlement to it beyond a reasonable doubt. The court must examine all the evidence in the light most favorable to the party opposing the motion. Affidavits are not a substitute for trial. Where different inferences can be drawn from conflicting affidavits and depositions, summary judgment should be denied.

HN4[] **Summary Judgment, Evidentiary Considerations**

Admonitions against the granting of summary judgment motions in an antitrust case are not warrants for every plaintiff who can draft an antitrust complaint, no matter how groundless or improbable its allegations, to force his claim to trial despite its deficient factual underpinnings. Where the court has permitted extensive discovery, and where the requirements of *Fed. R. Civ. P. 56* are satisfied, the court may properly grant a motion for summary judgment. Moreover, when that discovery has failed to reveal any evidence to support the plaintiffs' claims, and the record contains an overwhelming amount of evidence which contradicts the plaintiffs' conspiracy allegation and poses a variety of non-conspiratorial motives, for the defendants' acts, rooted in business judgment, the defendants are entitled to summary judgment. When it becomes plain that the allegedly unlawful acts do not exist, and the plaintiffs' claims are without merit, the court has a duty to grant summary judgment. Allegations which are "glib and conclusory" are insufficient to raise genuine issues of material fact once they have been specifically denied in sworn affidavits and depositions.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN5[] **Supporting Materials, Affidavits**

Where the defendants have expressly denied by sworn testimony the plaintiffs' allegations of conspiracy to monopolize or restrain trade, it is up to the plaintiffs to produce significant probative evidence by affidavit or deposition demonstrating that a genuine issue of fact existed as to this element of the complaint, if summary judgment is to be avoided. Summary judgment cannot be defeated by the vague hope that something may turn up at trial.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN6[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, reads, in part, as follows: every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal.

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Antitrust & Trade Law, Sherman Act**

In order to prevail on a claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, a plaintiff must show (1) concerted action, and (2) an unreasonable restraint of trade. Additionally, in order to establish federal jurisdiction, a plaintiff must show that the restraint in question has a sufficient effect upon interstate commerce.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN8[] **Antitrust & Trade Law, Sherman Act**

In order to establish the existence of the "contract, combination, or conspiracy" referred to in *15 U.S.C.S. § 1*, a plaintiff must show: (1) two or more persons (2) acting in concert. The second requirement, concerted action, is usually defined as referring to a consensus or agreement by the parties to act together. The element of concerted action is especially critical to a *§ 1* claim. Essential to every *§ 1* offense is concert of action between separate business entities. It is axiomatic that unilateral activity by a single firm cannot be reached via this section.

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

Something more than mere acquiescence in the seller's offending policy would be required to support a finding of the existence of that agreement or understanding essential, in the absence of monopoly, to making out a violation of the antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

Parallel business activity does not itself constitute a violation of the Sherman Act.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

Because parallel conduct in itself establishes nothing of legal significance, an antitrust plaintiff must rely upon the surrounding circumstances to establish the basis for an inference of concerted activity. Such surrounding circumstances must demonstrate two elements before concerted action may be inferred: (1) a showing of acts by defendants in contradiction of their own economic interests, and (2) satisfactory demonstration of a motivation to enter an agreement.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Sherman Act, Claims**

If *§ 1* of the Sherman Act were to be read in the narrowest possible way, any commercial contract could be deemed to violate it. It is well-established, however, that the federal antitrust statutes are not intended and have not been construed to interfere with ordinary commercial practices in interstate commerce which are bona fide and not in restraint of trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

HN13[] **Tying Arrangements, Defenses**

Various forms of trade restraints are "per se" violations of the Sherman Act. Certain arrangements are conclusively presumed to be unreasonable restraints of trade, simply by virtue of their obvious and necessary effect on competition. Once the existence of such an arrangement has been established, no evidence of actual public injury is required, and no evidence of the reasonableness of defendant's conduct will be considered in justification. This rule of per se illegality has been applied thus far to horizontal and vertical price fixing agreements, division of markets between competitors, tying arrangements, and certain collective refusals to deal, or "group boycotts."

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN14[] **Practices Governed by Per Se Rule, Boycotts**

The courts have found boycotts to constitute per se Sherman Act violations only if they fit within one of three categories: (1) horizontal combinations to exclude competitors; (2) vertical combinations to exclude competitors; and (3) combinations designed to influence trade practices of boycott victims. When confronted with concerted refusals to deal that do not fit the classic "group boycott" pattern, the courts almost without exception have held the per se rule inapplicable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN15[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Per se treatment of business activity is not lightly invoked: a court will not indulge in this conclusive presumption lightly. Invocation of a per se rule always risks sweeping reasonable, pro-competitive activity within a general condemnation, and a court will run this risk only when it can say, on the strength of unambiguous experience, that the challenged action is a naked restraint of trade with no purpose except stifling of competition. Per se rules of illegality are appropriate only when they relate to conduct that is manifestly anti-competitive.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN16[] **Practices Governed by Per Se Rule, Boycotts**

The per se boycott rule is applicable only when the concerted action is specifically directed at third parties. The per se rule is not applicable when conduct only incidentally or indirectly causes a termination in trade relations with a third party.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN17[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The "rule of reason" entails basically a weighing process: under the rule of reason, a restraint must be evaluated to determine whether it is significantly anti-competitive in purpose or effect. In making this evaluation, a court generally will be required to analyze the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed. If, on analysis, the restraint is found to have legitimate business purposes whose realization serves to promote competition, the "anti-competitive evils" of the challenged practice must be carefully balanced against its "procompetitive virtues" to ascertain whether the former outweigh the latter. A restraint is unreasonable if it has the "net effect" of substantially impeding competition.

Antitrust & Trade Law > Sherman Act > General Overview

Banking Law > ... > Banking & Finance > Regulators > US Federal Home Loan Bank System

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

HN18[] **Antitrust & Trade Law, Sherman Act**

The standard applied by the Federal National Mortgage Association, which requires that hazard insurance be provided by a company with at least a Class VI rating in Best's Insurance Reports is reasonable. It serves a legitimate business interest and is therefore not offensive to the Sherman Act. So long as the actions are reasonable, they need not constitute the "least restrictive alternative" available.

Antitrust & Trade Law > Sherman Act > General Overview

HN19[] **Antitrust & Trade Law, Sherman Act**

Bad business judgment does not constitute a Sherman Act violation.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > Antitrust Regulations

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN20[] Monopolies & Monopolization, Attempts to Monopolize

A company has the right to choose with whom it will deal and on what terms. In the absence of any purpose to create or maintain a monopoly, the Sherman Act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal; and, of course, he may announce in advance the circumstances under which he will refuse to sell.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN21[] Scope, Monopolization Offenses

15 U.S.C.S. § 2 prohibits the actions of those who monopolize, attempt to monopolize, or conspire to monopolize.

Opinion by: ROGERS

Opinion

[*643] MEMORANDUM AND ORDER

INTRODUCTION

This is an antitrust action brought pursuant to *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, and under unspecified sections of the Kansas antitrust laws contained in *K.S.A. 50-101 Et seq.*

Plaintiffs Consolidated Farmers Mutual Insurance Company and Kansas Mutual Insurance Company are two Kansas insurance companies which as part of their **[**2]** businesses sell real property hazard insurance.

Defendant Anchor Savings Association is a Kansas savings and loan association. Defendant Fidelity Investment Company is a Kansas mortgage banker. Defendant Federal National Mortgage Association nMA is a federally chartered, privately owned [1.] **[**3]** corporation which was created "to provide supplementary assistance to the secondary market for home mortgages by providing a degree of liquidity for mortgage investments." *12 U.S.C. § 1716(a)*. When the case began, a fourth defendant was the Federal Home Loan Mortgage Corporation (FHLMC), a quasi-public corporation authorized by Congress in *12 U.S.C. § 1451 Et seq.* to aid the secondary market. By order of September 8, 1978, this Court **[*644]** dismissed FHLMC from the action on grounds of statutory immunity. [2.]

A brief background is necessary to an understanding of the nature of the action. When a home is purchased the prospective homeowner frequently obtains a mortgage loan from a savings and loan institution or a bank. This is the "primary" mortgage market. Defendants Fidelity and Anchor are in the business of originating mortgages in the primary market. In order to gain funds to make additional loans, Fidelity and Anchor sell these mortgages to institutional investors and entities such as FHLMC and FNMA. When the originator of a mortgage attempts to transfer it, the "secondary" mortgage market is involved. In the secondary market, FNMA and FHLMC facilitate the transfer of mortgages from originators to institutional investors, in part by establishing some uniformity in the mortgage transaction so that the institutional investor will have a better idea of what it is purchasing. Congress intended that the federally sponsored secondary mortgage market should provide standardized mortgage instruments. J. Murray and **[**4]** H. Judy, Uniform Multifamily Mortgage Instruments, 33 Bus.Law. 2303, 2359 (1978).

Congress mandated that FHLMC and FNMA should follow certain guidelines to guarantee the quality of the mortgages handled. ***HN1***[] In *12 U.S.C. § 1719(a)*, FNMA is instructed:

> (1) To carry out the purposes set forth in paragraph (a) of *section 1716* of this title, the operations of the corporation under this section shall be confined, so far as practicable, to mortgages which are deemed by the corporation to be of such quality, type, and class as to meet, generally, the purchase standards imposed by private institutional mortgage investors. . . .

See also *12 U.S.C. § 1454(a)(1)*.

In order to meet the Congressional mandate, FNMA and FHLMC have established several standards relating to various aspects of the mortgages they purchase. One of these standards regards the hazard insurance covering the property which secures the mortgages purchased. ***HN2***[] Both FNMA and FHLMC require that such hazard insurance be provided by a company with at least a Class VI rating in Best's Insurance Reports. [3.] FNMA adopted

[1.] Both plaintiffs' complaint and this Court's order of September 8, 1978, mistakenly refer to FNMA as a "quasi-public" corporation. Prior to 1968, the federal government did own the preferred stock of FNMA. However, the Housing and Urban Development Act of 1968, *12 U.S.C. §§ 1716b*, *1717(a)(2)*, partitioned FNMA into the Government National Mortgage Association (GNMA), under the jurisdiction of the Department of Housing and Urban Development, and FNMA became a wholly private corporation serving a public purpose.

[2.] This dismissal order is now on appeal to the Tenth Circuit Court of Appeals.

this requirement in July, 1974. [4] In 1975, FNMA determined to accept mortgages covered by hazard insurance **[**5]** provided by companies which did not meet the appropriate standard but provided reinsurance certificates by companies which did.

Anchor, which for many years has had a similar requirement regarding the insurance policies for mortgages it created, changed its standard in 1978 from the higher Best's X rating **[**6]** to a Best's VI rating. Fidelity changed its standards in 1974 to the Class VI rating in light of the fact that the majority of its home loan production was originated for sale to either FNMA or GNMA.

A Class VI rating means that an insurance company has net resources of $ 1,500,000 to $ 2,500,000. Neither plaintiff is large enough to obtain a Best's Class VI rating. For that reason, unless they make suitable arrangements for reinsurance the plaintiffs are unable to provide hazard insurance coverage for property securing mortgages which defendants Anchor and Fidelity originate with the intent of selling to FNMA, GNMA, or FHLMC.

[*645] The plaintiffs claim that the Class VI requirement is "arbitrary and without foundation", and that its promulgation by FNMA and FHLMC and the other defendants' acts of honoring that requirement constitute a "combination and boycott" in violation of federal and state antitrust laws.

This action now comes before the Court upon the motions for summary judgment filed by remaining defendants FNMA, Anchor, and Fidelity.

DISCUSSION

The major issue presented by the pending summary judgment motions is whether plaintiffs have a viable claim under *Section **[**7]** 1* of the Sherman Act. Boiled down to basics, defendants' briefs argue that plaintiffs' *§ 1* cause of action is defective in three particulars: (1) plaintiffs cannot show concerted action; (2) plaintiffs cannot show an unreasonable restraint of trade; and (3) plaintiffs cannot show an impact upon interstate commerce.

Summary Judgment

Before discussing the legal issues presented by plaintiffs' antitrust claims, we take cognizance of the applicable procedural standards. It is familiar law that ***HN3***[] no summary judgment motion is lightly granted. Summary judgment is to be denied unless the moving party demonstrates entitlement to it beyond a reasonable doubt. *Madison v. Deseret Livestock Co., 574 F.2d 1027, 1037 (10th Cir. 1978)*; *Mustang Fuel Corp. v. Youngstown Sheet & Tube Co., 516 F.2d 33, 36 (10th Cir. 1975)*. The court must examine all the evidence in the light most favorable to the party opposing the motion. *Mogle v. Sevier County School Dist., 540 F.2d 478, 482 (10th Cir. 1976)* Cert. denied, *429 U.S. 1121, 97 S. Ct. 1157, 51 L. Ed. 2d 572 (1977)*; *Frey v. Frankel, 361 F.2d 437, 442 (10th Cir. 1966)*. Affidavits are not a substitute for trial. *Madison v. Deseret Livestock Co., supra, **[**8]** 574 F.2d at 1036*; *Eagle v. Louisiana Southern Life Ins. Co., 464 F.2d 607, 608 (10th Cir. 1972)*. Where different inferences can be drawn from conflicting affidavits and depositions, summary judgment should be denied. *United States v. Diebold, Inc., 369 U.S. 654, 655, 82 S. Ct. 993, 8 L. Ed. 2d 176 (1962)*.

The Court is aware that precautions against hasty termination of a potentially meritorious action are especially crucial in the area of antitrust. *Poller v. C. B. S., Inc., 368 U.S. 464, 467, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*. Nevertheless, summary judgment can be appropriate even in an antitrust action should the party opposing such a motion fail to respond to a legally sufficient motion supported by affidavits with a showing of specific facts demonstrating the existence of genuine issues of material fact for trial. *Stevens v. Barnard, 512 F.2d 866, 878*

---

[3] The A.M. Best Company has issued reports on insurance companies since 1900. It is now the only major specialized insurance reporting and rating service in the United States. Best's provides two ratings. First is the "Financial Size Category" with which we are primarily concerned here. The second is the "Policyholders' Rating" which gives Best's opinion as to the relative permanence and safety of each company. Best's ratings are widely used in the mortgage field.

[4] Actually, in 1974 Best's "Financial Size Category" was rated alphabetically. Thus, FNMA and FHLMC adopted a BBB+ rating. In 1976 Best's converted from an alphabetical to a numerical system and Class VI became the appropriate rating.

(10th Cir. 1975); *Whitfield v. Gangas, 507 F.2d 880, 882 (10th Cir. 1974)*. Before granting motions for summary judgment in *Natrona Service, Inc. v. Continental Oil Co., 435 F. Supp. 99, 106-107 (D.Wyo.1977)*, *Aff'd 598 F.2d 1294 (10th Cir. 1979)*, Judge Brimmer of Wyoming wrote that ***HN4***[] admonitions against the granting of such motions **[**9]** in an antitrust case

> are not warrants "for every plaintiff who can draft an antitrust complaint, no matter how groundless or improbable its allegations, to force his claim to trial despite its deficient factual underpinnings. *Murdock v. City of Jacksonville, 361 F. Supp. 1083, 1086-87 (M.D.Fla.1973)*. Where the Court has permitted extensive discovery, and where the requirements of *Rule 56, Federal Rules of Civil Procedure*, are satisfied, the Court may properly grant a motion for summary judgment. *Umdenstock v. American Mortgage and Inv. Co., 495 F.2d 589 (10th Cir. 1974)*. Moreover, when that discovery has failed to reveal any evidence to support the plaintiffs' claims, and the record contains an overwhelming amount of evidence which contradicts the plaintiffs' conspiracy allegation and poses a variety of non-conspiratorial motives, for the defendants' acts, rooted in business judgment, the defendants are entitled to summary judgment. *First Nat'l Bank of Ariz. v. Cities Service Co., 391 U.S. 253, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)*; *Semke v. Enid Auto Dealers' Ass'n, 456 F.2d 1361 (10th Cir.* ***[*646]*** *1972)*. When it becomes plain that the allegedly unlawful acts do not exist, **[**10]** and the plaintiffs' claims are without merit, the Court has a duty to grant summary judgment. *Capital Temporaries, Inc. v. Olsten Corp., 365 F. Supp. 888 (D.Conn.1973)*, *Aff'd, 506 F.2d 658 (2d Cir. 1974)*.
>
> Allegations which are "glib and conclusory" are insufficient to raise genuine issues of material fact once they have been specifically denied in sworn affidavits and depositions. *Kemp Pontiac-Cadillac, Inc. v. Hartford Automobile Dealers' Ass'n, 380 F. Supp. 1382 (D.Conn.1974)*. In addition, ***HN5***[] where the defendants have expressly denied by sworn testimony the plaintiffs' allegations of conspiracy to monopolize or restrain trade, "it (is) up to the plaintiffs to produce Significant probative evidence by affidavit or deposition demonstrating that a Genuine issue of fact existed as to this element of the complaint, if summary judgment is to be avoided." *Scranton Constr. Co. v. Litton Indus. Leasing Corp., 494 F.2d 778, 782 (5th Cir. 1974)*, Cert. denied, *419 U.S. 1105, 95 S. Ct. 774, 42 L. Ed. 2d 800 (1975)* (Emphasis added); *ALW, Inc. v. United Air Lines, Inc., 510 F.2d 52 (9th Cir. 1975)*; Clark v. United Bank of Denver, supra.
>
> Summary judgment cannot be defeated "by the **[**11]** vague hope that something may turn up at trial." *Perma Research and Dev. Co. v. Singer Co., 410 F.2d 572, 578 (2d Cir. 1969)*. Where, as here, the plaintiffs have failed to turn up substantial evidence in support of their conspiracy theory, and the defendants have introduced extensive and substantial evidence negating the theory, it is unreasonable to assume a trial would provide the plaintiffs with any greater opportunity to prove their theory, especially when the most that can be hoped for is to discredit the defendants' witnesses at trial. Under these circumstances, no question of fact is presented. (*435 F. Supp. at 136-137*)

Judge O'Connor of this District made a similar statement in *Frackowiak v. Farmers Ins. Co., Inc., 411 F. Supp. 1309, 1319-1320 (D.Kan.1976)*:

> . . . this case represents an instance in which "injury resulting from normal business hazards is sought to be redressable by casting the affair in antitrust terms" that simply do not fit the case. *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 474, 82 S. Ct. 486, 491, 7 L. Ed. 2d 458, 465 (1962)* (Harlan, J., dissenting). As recently as 1968, the United States Supreme Court rejected the suggestion **[**12]** that "*Rule 56(e)* should, in effect, be read out of antitrust cases and permit plaintiffs to get to a jury on the basis of allegations in their complaints, coupled with the hope that something can be developed at trial in the way of evidence to support those allegations." *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 289-90, 88 S. Ct. 1575, 1593, 20 L. Ed. 2d 569, 592 (1968)*. In that case, the Court held, "While we recognize the importance of preserving litigants' rights to a trial on their claims, we are not prepared to extend those rights to

> the point of requiring that anyone who files an antitrust complaint setting forth a valid cause of action be entitled to a full-dress trial notwithstanding the absence of any significant probative evidence tending to support the complaint." Id.

This case has now been on file for 20 months. Much discovery in the form of depositions and interrogatories has been undertaken. Although plaintiffs protest that the pending motions are premature, they have not shown the Court that any discovery remains to be done as to Material issues of fact which are now unresolved. None of the areas in which plaintiffs now seek to delve **[**13]** is relevant to the material issues presented by the pending motions. Plaintiffs have had ample opportunity to partake in discovery as to the relevant issues, and the record compiled before the Court is quite clear.

A very strong blow to plaintiffs' prematurity argument is struck by defendants' willingness to concede virtually every factual **[*647]** allegation lodged by plaintiff, thus converting the dispute into one composed almost totally of issues of law rather than issues of fact. In its reply brief to plaintiffs' brief in opposition to the summary judgment motions, defendant Anchor wrote:

> . . . while Anchor disputes the ultimate, legal conclusions of combination and of unreasonable restraint argued by plaintiffs, and while many of plaintiffs' claims are ambiguous, inaccurate and unsupportable, for purposes of this motion, we do not dispute, to paraphrase plaintiffs' own memorandum in opposition: (1) that Anchor adopted a standard which led to the creation of a standard mortgage package to be produced within Kansas for sale in the secondary market (Plaintiffs' Opposition, p. 2); (2) that plaintiffs were excluded from the hazard insurance marketplace (assuming plaintiffs **[**14]** chose not to avail themselves of the reinsurance option which Anchor made available) by deliberate actions, i. e., requirements of defendants (Plaintiffs' Opposition, p. 2); (3) that the identical requirements as to a Best's rating were and are used by Anchor and the other defendants (Plaintiffs' Opposition, p. 3); (4) that the secondary market for mortgages is a vital part of Anchor's business (Plaintiffs' Opposition, p. 3); (5) that the circumstances or necessity for entry into the secondary market through sales to defendant, Federal National Mortgage Association dictated compliance or conformance with a standard for hazard insurance at least equal to that of FNMA (Plaintiffs' Opposition, p. 3); (6) that plaintiffs have been excluded from the marketplace of the creation of mortgages by Anchor so long as they do not meet Anchor's standard in order, among other reasons, for Anchor to make its goods (mortgages) attractive for buyers in the secondary market without regard to the individual quality of plaintiffs' product (insurance) which everyone agrees must be a part of the goods produced for the secondary market (Plaintiffs' Opposition, p. 3) (as noted Anchor would consider whether **[**15]** the secondary market standards were less than necessary to meet Anchor's needs and deemed it infeasible to review the management capabilities and financial stability of every insurance company with which its customers might do business; see the Affidavit in Support of Anchor's motion); (7) that mortgagors are denied access to mortgage financing by Anchor and Fidelity, unless they accede to the terms set by Anchor and Fidelity and thereby plaintiffs are denied a chance to compete for that hazard insurance which constitutes an integral part of the mortgage package of financing (assuming they choose not to avail themselves of the reinsurance option) (Plaintiffs' Opposition, p. 4); (8) that in a number of instances mortgagors have paid more of a premium for hazard insurance than would have been paid by purchasing insurance from one of the plaintiffs (Plaintiffs' Opposition, p. 5); (9) that it is a benefit to Anchor that Anchor is able to create an instrument which is salable in the secondary market to prospective purchasers throughout the country and this constitutes a major item of its business (Plaintiffs' Opposition, p. 5); and, (10) that Anchor had reason to exclude entities which **[**16]** did not meet its criteria, such as plaintiffs, from writing hazard insurance on mortgages created by Anchor (assuming plaintiffs chose not to avail themselves of the reinsurance option) because, among other reasons, such exclusions made Anchor's mortgages more salable in the secondary market. (Plaintiffs' Opposition, p. 5) (Doc. # 50, pp. 5-6)

Given the facts firmly established by previous discovery and the facts admitted by moving defendants, we conclude that the motions for summary judgment are ripe for disposition.

The question presented for our resolution is clear. FNMA buys mortgages on the secondary market. Rather than examine the financial situation of the thousands of insurance companies in this country which provide hazard insurance, FNMA established an objective standard, Best's Class VI **[*648]** rating, to identify acceptable hazard insurance carriers for the mortgages it purchases. A threshold size requirement was considered necessary, in part, to insure that coverage would be adequate if a major disaster occurred. In part because Anchor and Fidelity desire to sell the mortgages they originate to FNMA and FHLMC, they have also adopted the Class VI rating to **[**17]** make their mortgages more salable. These standards block plaintiffs out of the market, no matter how financially stable and well managed they may be. The legal issue is whether these facts establish an antitrust violation. We believe the answer is in the negative.

Sherman Act, *§ 1*

As mentioned previously, the major issue presented for our consideration is whether plaintiffs have a viable claim under ***HN6***[] *§ 1* of the Sherman Act, *15 U.S.C. § 1*, which reads, in pertinent part, as follows:

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal . . . .

HN7[] In order to prevail on a *§ 1* claim, a plaintiff must show (1) concerted action, and (2) an unreasonable restraint of trade. *Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*; *American Telephone & Telegraph Co. v. Delta Communications Corp., 408 F. Supp. 1075, 1088 (S.D.Miss.1976)*, *Aff'd 579 F.2d 972 (5th Cir. 1978)*. Additionally, in order to establish federal jurisdiction, a plaintiff must show that the restraint in question has a sufficient effect upon interstate **[**18]** commerce. *Goldfarb v. Virginia State Bar, 421 U.S. 773, 783-785, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*; *Hospital Bldg. Co. v. Rex Hospital Trustees, 425 U.S. 738, 743-745, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*; *United States v. Yellow Cab Co., 332 U.S. 218, 225, 67 S. Ct. 1560, 91 L. Ed. 2010 (1947)*; *Bryan v. Stillwater Bd. of Realtors, 578 F.2d 1319, 1324 (10th Cir. 1977)*. Defendants contend that plaintiffs' claims fall short in all three areas. We agree with defendants regarding the first two issues, and feel no need to discuss the close question of impact upon interstate commerce.

Concerted Action.

HN8[] In order to establish the existence of the "contract, combination, or conspiracy" referred to in *15 U.S.C. § 1*, a plaintiff must show:

> . . . (1) two or more persons (2) acting in concert. The second requirement, concerted action, is usually defined as referring to a consensus or agreement by the parties to act together. (16 J. Von Kalinowski, Business Organizations: Antitrust and Trade Regulations § 6.01(3), pp. 6-42 to 6-43 (1979))

The element of concerted action is, as noted above, especially critical to a *§ 1* claim. *Spectrofuge Corp. v. Beckman Instruments, Inc.,* ***[**19]*** *575 F.2d 256, 286 (5th Cir. 1978)* Cert. denied *440 U.S. 939, 99 S. Ct. 1289, 59 L. Ed. 2d 499 (1979)*, emphasized:

> Essential to every *§ 1* offense is concert of action between separate business entities. It is axiomatic that unilateral activity by a single firm cannot be reached via this section.

See also *Card v. National Life Insurance Co., 603 F.2d 828, 834 (10th Cir. 1979)*; *Morton Buildings of Nebraska, Inc. v. Morton Buildings, Inc., 531 F.2d 910, 916-917 (8th Cir. 1976)*; *Ford Motor Company v. Webster's Auto Sales, Inc., 361 F.2d 874, 878 (1st Cir. 1966)*.

The evidence in this case demonstrates that no concert of action occurred. The depositions and affidavits before the Court make it clear that defendants did not contract, combine, conspire, consult, or even communicate with one another regarding the adoption of the Best's Class VI rating requirement. Even plaintiffs have asserted that FNMA Unilaterally adopted the Class VI standard in 1974. Later, Anchor and Fidelity independently adopted the same standard. It is not disputed that Anchor and Fidelity were motivated, at least in part, by a perceived need to make the mortgages **[*649]** they originated more salable **[**20]** in the secondary market. [5.]

[5.] Anchor claims that its Class VI requirement is also based upon its desire to protect its shareholders and depositors, this being part of the reason why Anchor had an even higher rating requirement for many years prior to 1974.

That FNMA unilaterally established a standard to which Anchor and Fidelity later "acquiesced" does not establish concerted action within the meaning of the *Sherman Act. Frackowiak v. Farmers Ins. Co., Inc., supra, 411 F. Supp. at 1319*. Thus, in *Polytechnic Data Corp. v. Xerox Corp., 362 F. Supp. 1, 8 (N.D.Ill.1973)*, the court noted:

> Polytechnic has alleged that Xerox has combined with certain of its lessees who have "acquiesced" in the prohibition of the attachment of devices to its machines. . . . These charges do not contain the "collaborative element" of a combination or conspiracy required by the Sherman Act. Dart Drug Corp. v. Parke, Davis & Co., supra (120 U.S.App.D.C. 79, 344 F.2d 173 (D.C.Cir. 1965)).

And regarding a similar context **[**21]** it has been written:

> ***HN9***[] . . . something more than mere acquiescence in the seller's offending policy would be required to support a finding of the existence of that agreement or understanding essential, in the absence of monopoly, to making out a violation of the antitrust laws. (Barber, Refusals to Deal Under the Federal Antitrust Laws, 103 U.Pa.L.Rev. 847, 859 (1955))

In light of the fact that all of the direct evidence, and it is substantial, points to a conclusion that no concerted activity occurred in this case, plaintiffs ask the Court to infer such activity from the parallel actions of the defendants. Plaintiffs ask this Court to infer more than is justified by the law or the facts of this case. Conscious parallelism alone does not establish a *§ 1* violation. In *United States v. CIBA-GEIGY Corp., 1976-1 Trade Cases, P 60,908*, pp. 68,935, 68,960 (D.N.J.1976), the court stated simply: ***HN10***[] "Parallel business activity does not itself constitute a violation of the Sherman Act," citing *Theatre Enterprises, Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 541, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*. It has been written:

> Attempts to rely upon conscious parallelism to transform **[**22]** unilateral refusals into an allegedly collective refusal have generally been unsuccessful. (A.B.A., ***Antitrust Law*** Developments 16 (1975))

See also *First National Bank v. Cities Service, supra, 391 U.S. at 287, 88 S. Ct. 1575*; *Cackling Acres, Inc. v. Olson Farms, Inc., 541 F.2d 242, 245 (10th Cir. 1976)* Cert. denied, *429 U.S. 1122, 97 S. Ct. 1158, 51 L. Ed. 2d 572 (1977)*; *Modern Home Institute, Inc. v. Hartford Acc. & Ind. Co., 513 F.2d 102, 110 (2d Cir. 1975)*; *Independent Iron Works, Inc. v. United States Steel Corp., 322 F.2d 656, 661* (9th Cir.), Cert. denied, *375 U.S. 922, 84 S. Ct. 267, 11 L. Ed. 2d 165 (1963)*; *Weit v. Continental Illinois Nat. Bank & Trust Co., 467 F. Supp. 197, 210 (N.D.Ill.1978)*; *Hunt v. Mobil Oil Corp., 465 F. Supp. 195, 229 (S.D.N.Y.1978)*; *Raitport v. Chase Manhattan Capital Corp., 388 F. Supp. 1095, 1100 (S.D.N.Y.1975)*; Turner, The Definition of Agreement Under the Sherman Act: Conscious Parallelism and Refusals to Deal, 75 Harv.L.Rev. 655, 657-658 (1962).

HN11[] Because parallel conduct in itself establishes nothing of legal significance, an antitrust plaintiff must rely upon the surrounding circumstances to establish the basis for an inference of concerted **[**23]** activity. Such surrounding circumstances must demonstrate two elements before concerted action may be inferred:

> . . . two elements generally considered critical in establishing conspiracy from evidence of parallel business behavior (are): (1) a showing of acts by defendants in contradiction of their own economic interests, *Delaware Valley Marine Supply Co. v. American Tobacco Co., 297 F.2d 199 (3rd Cir. 1961)*, Cert. denied, *369 U.S. 839, 82 S. Ct. 867, 7 L. Ed. 2d 843 (1962)*; and (2) satisfactory demonstration of a motivation to enter an agreement, *First Nat'l Bank v. Cities Service* ***[*650]*** *Co., 391 391 U.S. 287, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)*. (*Venzie Corp. v. United States Mineral Prod. Co., Inc., 521 F.2d 1309, 1314 (3d Cir. 1975))*

See also *Admiral Theatre Corp. v. Douglas Theatre Co., 585 F.2d 877, 884 (8th Cir. 1978)*; *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 446 (3d Cir. 1977)* Cert. denied, *434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791 (1978)*; A.B.A., Antitrust Developments, Supra at 35; Turner, Supra, 75 Harv.L.Rev. at 681.

Because all three moving defendants have a strong interest in requiring that the insurance company which provides hazard insurance **[**24]** for the property securing their mortgages is financially stable, it is certainly not "in contradiction of their own economic interests" for these defendants to establish a Class VI requirement. Nor has plaintiffs' evidence satisfactorily demonstrated a motive for defendants to enter into an agreement regarding such a requirement. Defendants are in no way economically involved in the markets in which plaintiffs compete and therefore have no motivation to wish plaintiffs good or ill.

In sum, the direct evidence in the record overwhelmingly establishes that defendants did not act in concert when they each established a Class VI requirement of hazard insurance companies. The doctrine of parallel activity does not provide a basis for a finding to the contrary. Therefore, a critical element in a *15 U.S.C. § 1* cause of action is missing in this case. Summary judgment could be granted on this basis alone, for it is clear that a mere unilateral refusal to deal does not constitute a Sherman Act violation.

Unreasonable Restraint of Trade.

Even if we were to assume for purposes of argument that the acquiescence of Anchor and Fidelity in the standards set by FNMA constituted the concerted **[**25]** action required by the Sherman Act, we still could not find that plaintiffs have shown a proper claim in this case. The mere fact of combination or conspiracy does not alone establish *§ 1* liability. *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 76 (9th Cir. 1969)* Cert. denied, *396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755 (1970)*; *Natrona Service, Inc. v. Continental Oil Co., supra, 435 F. Supp. at 108*. Plaintiffs must also establish an "unreasonable restraint of trade."

Does defendants' conduct (assuming for argument that concerted activity has been shown) constitute an impermissible restraint of trade? It has been frequently noted that the wording of *§ 1* is so broad as to prohibit many kinds of perfectly normal business transactions:

> The Supreme Court has observed that ***HN12***[] if *Section 1* of the Sherman Act were to be read in the narrowest possible way, any commercial contract could be deemed to violate it. *United States v. Topco Associates, Inc., 405 U.S. 596, 606, 92 S. Ct. 1126, 1133, 31 L. Ed. 2d 515, 524 (1972)*; *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 244, 62 L. Ed. 683, 687 (1918)*. It is well-established, **[**26]** however, that the federal antitrust statutes were not intended and have not been construed to interfere with ordinary commercial practices in interstate commerce which are bona fide and not in restraint of trade. E. g., *Naifeh v. Ronson Art Metal Works, Inc., 218 F.2d 202 (10th Cir. 1954)*. (*Frackowiak v. Farmers Ins. Co., Inc., supra, 411 F. Supp. at 1316*)

See also *Associated Press v. United States, 326 U.S. 1, 23, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)* (Douglas, J., concurring); *Neeld v. National Hockey League, 594 F.2d 1297, 1298 (9th Cir. 1979)*; *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., supra, 416 F.2d at 79*; *Mardirosian v. American Institute of Architects, 474 F. Supp. 628, 636 (D.D.C.1979)*.

Notwithstanding the broad wording of *§ 1*, the Supreme Court established early on that only "unreasonable" restraints of trade were prohibited by *§ 1*. *Standard Oil v. United States, supra.* The "rule of reason" remains the prevailing mode of analysis under *§ 1*. *Smith v. Pro Football, Inc., 193 U.S.App.D.C. 19, 24, 593 F.2d 1173, 1178 (D.C. Cir. 1979)*.

[*651] Due to the fact that application of the "rule of reason" test can be an arduous task, the courts **[**27]** have established a judicial shortcut by holding that ***HN13***[] various forms of trade restraints are "per se" violations of the Sherman Act. In *E. A. McQuade Tour, Inc. v. Consolidated Air Tour Manual Committee, 467 F.2d 178, 186 (5th Cir. 1972)*, Cert. denied, *409 U.S. 1109, 93 S. Ct. 912, 34 L. Ed. 2d 690 (1973)*, the court stated:

> Certain arrangements are conclusively presumed to be unreasonable restraints of trade, simply by virtue of their obvious and necessary effect on competition. See *Northern Pacific Ry. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)*. Once the existence of such an arrangement has been established, no evidence of actual public injury is required, *Radiant Burners, Inc. v. Peoples Gas Light & Coke Co., 364 U.S. 656, 81 S. Ct. 365, 5 L. Ed. 2d 358 (1961)*, and no evidence of the reasonableness of defendant's conduct will be considered in justification. See *Northern Pacific, supra.* This rule of Per se illegality has been applied thus

> far to horizontal and vertical price fixing agreements, division of markets between competitors, tying arrangements, and certain collective refusals to deal, or "group boycotts."

Group boycotts are a well **[**28]** established form of Per se violative activity (*United States v. General Motors Corp., 384 U.S. 127, 145-146, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212-213, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*; *Fashion Originators' Guild v. F. T. C., 312 U.S. 457, 468, 61 S. Ct. 703, 85 L. Ed. 949 (1941))*, and it is within this exception to the "rule of reason" that plaintiffs attempt to categorize defendants' conduct. Perhaps the most critical question presented by the pending motions is whether defendants' conduct can be considered a group boycott deserving of Per se treatment.

Although group boycotts are generally considered Per se violations of the Sherman Act, certain conduct which is similar to a group boycott has been validated by the courts which have held either that the activity was not a boycott or that this type of boycott was not a Per se Sherman violation. Although the state of the law in this area is quite confused (*Cullum Elec. & Mechanical v. Mechanical Contractors, 436 F. Supp. 418, 428 (D.S.C.1976)* *Aff'd 569 F.2d 821 (4th Cir. 1978)*, Cert. denied *439 U.S. 910, 99 S. Ct. 277, 58 L. Ed. 2d 255*), we think ample authority **[**29]** exists for a finding that the activity asserted in this case is not a boycott of the type condemned Per se by the Sherman Act.

Regarding the definition of "boycott", the Supreme Court recently wrote in *St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 541, 98 S. Ct. 2923, 2930, 57 L. Ed. 2d 932 (1978)*:

> The generic concept of boycott refers to a method of pressuring a party with whom one has a dispute by withholding, or enlisting others to withhold, patronage or services from the target.

In the antitrust field, the "classic" group boycott has been defined as

> . . . A concerted attempt by a group of competitors at one level to protect themselves from competition from non-group members who seek to compete at that level. Typically, the boycotting group combines to deprive would-be competitors of a trade relationship which they need in order to enter (or survive in) the level wherein the group operates. The group may accomplish its exclusionary purpose by inducing suppliers not to sell to potential competitors, by inducing customers not to buy from them, or, in some cases, by refusing to deal with would-be competitors themselves. In each instance, however, The hallmark **[**30]** of the "group boycott" is the effort of competitors to "barricade themselves from competition at their own level." It is this purpose to exclude competition that has characterized the Supreme Court's decisions invoking the group boycott Per se rule. (emphasis added) (*Smith v. Pro Football, Inc., supra, 593 F.2d at 1178*)

See also Alpha-Sentura Business Services, Inc. v. Interbank Card Ass'n, 48 U.S.L.W. 2244 (D.Md. 9/11/79).

[*652] A recent analysis of the boycott law suggests that ***HN14***[] the courts have found boycotts to constitute Per se Sherman Act violations only if they fit within one of three categories: (1) horizontal combinations to exclude competitors; (2) vertical combinations to exclude competitors; and (3) combinations designed to influence trade practices of boycott victims. [6.] *Smith v. Pro Football, Inc., supra, 593 F.2d at 1178, n. 18*. See also *Worthen Bank & Trust Co. v. National Bankamericard, Inc., 485 F.2d 119, 124 (8th Cir. 1973)*; *E. A. McQuade Tours, Inc. v. Consolidated Air Tour Manual Committee, supra, 467 F.2d at 186-187*; *West Texas Utilities Co. v. Texas Elec. Service, 470 F. Supp. 798, 816 (N.D.Tex.1979)* C. Hills (ed.), Antitrust Adviser 34 (2d ed. **[**31]** 1978), Annot., 41 A.L.R.Fed. 175 § 8 (1979). The Smith opinion went on to state that:

---

6. To put this another way, in order for a boycott to constitute a Per se violation, it must have as its purpose either the exclusion of a competitor or some other anticompetitive goal. Alpha-Sentura Business Services, Inc. v. Interbank Card Ass'n, supra ; *Chastain v. American Telephone & Telegraph Co., 401 F. Supp. 151, 161 (D.D.C.1975)*; *Jones v. National Collegiate Athletic Ass'n, 392 F. Supp. 295, 304 (D.Mass.1975)*.

> When confronted with concerted refusals to deal that do not fit the classic "group boycott" pattern, the courts almost without exception have held the Per se rule inapplicable. (593 F.2d at 1179, n. 22)

We believe the Per se rule inapplicable here because this case does not present activity that could be characterized as a boycott falling within one of the three categories listed above. Plaintiffs do not compete with defendants. The Class VI requirement in no way (either horizontally, vertically, **[**32]** or diagonally) excludes competitors from defendants' markets of competition. Nor can the Class VI requirement be said to be designed to "influence the trade practices" of the boycott victims, the plaintiffs. The Class VI requirement was not adopted by FNMA to alter plaintiffs' behavior in any fashion; rather, plaintiffs were simply beneath FNMA's notice when the standards were adopted. Absolutely no anti-competitive purpose appears to have been in any way related to the adoption of the Class VI requirement by defendants. [7.]

[33]** It is important to remember that ***HN15***[] Per se treatment of business activity is not lightly invoked:

> A court will not indulge in this conclusive presumption lightly. Invocation of a Per se rule always risks sweeping reasonable, pro-competitive activity within a general condemnation, and a court will run this risk only when it can say, on the strength of unambiguous experience, that the challenged action is a "naked restraint( ) of trade with no purpose except stifling of competition." (*Smith v. Pro Football, Inc., supra, 593 F.2d at 1181*)

Thus, in *Continental T. V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 50, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*, the Supreme Court said that "Per se rules of illegality are appropriate only when they relate to conduct that is Manifestly anti-competitive."

It cannot be said that conduct is manifestly anti-competitive where, as here, absolutely no anti-competitive intent or motive existed. 16J Von Kalinowski, Supra, at § 76.02, p. 76-11 ("Rule of reason boycotts are not inspired by anti-competitive motives.") Nor can manifestly anti-competitive conduct be found when the anti-competitive effect is, as here, merely incidental. *Neeld v. National **[**34]** Hockey League, supra, 594 F.2d at 1299-1300*; 16J Von Kalinowski, Supra § 76.04(2), p. 76-41. See also 16J Von Kalinowski at § 76.02(1), p. 76-15:

> **[*653]** ***HN16***[] The Per se boycott rule is applicable only when the concerted action is specifically directed at third parties. The Per se rule is not applicable when conduct only incidentally or indirectly causes a termination in trade relations with a third party.

Because the law is clear that Per se treatment is not appropriate for defendants' conduct, the most plaintiffs can argue for is application of the "rule of reason." ***HN17***[] The "rule of reason" entails basically a weighing process:

> Under the rule of reason, a restraint must be evaluated to determine whether it is significantly anti-competitive in purpose or effect. In making this evaluation, a court generally will be required to analyze "the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed." If, on analysis, the restraint is found to have legitimate business purposes whose realization serves to promote competition, the "anti-competitive evils" of the challenged practice must be carefully balanced against its "procompetitive **[**35]** virtues" to ascertain whether the former outweigh the latter. A restraint is unreasonable if it has the "net effect" of substantially impeding competition. (*Smith v. Pro Football, Inc., supra, 593 F.2d at 1183*)

Even were the "rule of reason" to be applied, plaintiffs must fail. On the one hand, plaintiffs have not demonstrated that the anti-competitive effects of the Class VI requirement would be significant at all in terms of the impact upon

---

[7.] Plaintiffs claim that the Supreme Court's recent decision in *St. Paul Fire & Marine Ins. Co. v. Barry, supra, 438 U.S. at 531, 98 S. Ct. 2923*, substantially broadened the definition of boycott in the antitrust context. However, it appears that Barry merely held that a "boycott" includes at least the practice involved in that case, I. e., an agreement by which one company "induced its competitors to refuse to deal on any terms with its customers." *Smith v. Pro Football, Inc., supra, 593 F.2d at 1180, n. 22*. Such a factual situation is not present here. Further, Barry once again made it clear that not all concerted refusals to deal are Per se invalid. *Neeld v. National Hockey League, supra, 594 F.2d at 1298-1299 n. 3*.

the relevant market. This is especially so in light of the fact that plaintiffs have full access to the market if they merely use reinsurance certificates.

On the other hand, Congress has mandated that FNMA accept only mortgages which are "of such quality, type, and class" as to meet the standards of institutional investors. Further, FNMA is to promote uniformity in the field. Use of a standard governing hazard insurance promotes both those goals. Utilization of an objective standard is obviously necessary when one considers the tremendous volume of business being done in this area. In 1978, FNMA purchased 311,002 mortgages with an unpaid balance of $ 12,301,650,000. Anchor sold $ 16,478,360 worth of mortgages to FHLMC in 1978. Fidelity **[**36]** has approximately $ 140,000,000 in the mortgage portfolio which it services, about $ 62.8 million of this has been sold to FNMA or GNMA. With this volume of business, it is not feasible to adopt plaintiffs' suggestion that each insurance company be analyzed individually. This would be a costly and time-consuming process for there are over two hundred companies competing in the hazard insurance market in Kansas alone.

Plaintiffs claim that they are well-managed and therefore more sound financially than some companies larger in size. This may be true. However, if defendant FNMA reduced its standard to a smaller classification to include plaintiffs, or switched to reliance upon Best's "Policyholders' Rating", or made some other such adjustment, there would always be some other company which could sue making the same arguments which plaintiffs lodge in this case.

HN18[] The standard applied by defendants is reasonable. It serves a legitimate business interest and is therefore not offensive to the *Sherman Act. Neeld v. National Hockey League, supra, 594 F.2d at 1300*; *Polytechnic Data Corp. v. Xerox Corp., supra, 362 F. Supp. at 6, 8*; *Nankin Hospital v. Michigan Hospital Service, 361 F.* ***[**37]*** *Supp. 1199, 1207 (E.D.Mich.1973)*.

So long as the defendants' actions are reasonable, they need not constitute the "least restrictive alternative" available. *Foster v. Md., State Sav. & Loan Ass'n, 590 F.2d 928, 935 (D.C. Cir. 1978)*, Cert. denied, *439 U.S. 1071, 99 S. Ct. 842, 59 L. Ed. 2d 37 (1979)*; *American Motor Inns v. Holiday Inns, Inc., 521 F.2d 1230, 1249 (3d Cir. 1975)*; *Newberry v. Washington Post Co., 438 F. Supp. 470, 475 (D.D.C.1977)*.

We agree with defendants that plaintiffs' arguments reveal the fact that the real nub of plaintiffs' complaint is not an antitrust **[*654]** claim at all. Rather, plaintiffs simply feel that defendants have made a mistake in adopting a standard which precludes dealing with two such reliable companies as plaintiffs. Unfortunately for plaintiffs' position, ***HN19***[] bad business judgment does not constitute a Sherman Act violation. *Natrona Service, Inc. v. Continental Oil Co., supra, 435 F. Supp. at 110*. Plaintiffs' remedy is not to being an antitrust action, but to present their case to FNMA's board of directors. Plaintiffs stand in the shoes of any company which has lost an account. They need to send a salesman to attempt to get it back.

Upon **[**38]** contemplation, the Court concludes that the record in this case shows nothing more than unilateral refusals to deal which do not constitute Sherman Act violations. FNMA has chosen a Class VI requirement because it suits FNMA's need for a uniform, objective standard. Anchor and Fidelity have chosen the same requirement in part because it makes their product more attractive to potential purchasers. Defendants have chosen to deal with larger insurance companies. They have not chosen to deal with plaintiffs unless plaintiffs utilize reinsurance. These are independent decisions which defendants can make with impunity under the antitrust laws. It was established long ago that ***HN20***[] a company has the right to choose with whom it will deal and on what terms. In *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 468, 63 L. Ed. 992 (1919)*, the Supreme Court said:

> In the absence of any purpose to create or maintain a monopoly, the act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal; and, of course, he may announce in advance **[**39]** the circumstances under which he will refuse to sell.

See also *Fuchs Sugars & Syrups, Inc. v. Amstar Corp., 602 F.2d 1025, 1030 (2d Cir. 1979)*; *Lamb's Patio Theatre v. Universal Film Exchanges, 582 F.2d 1068, 1070 (7th Cir. 1978)*; *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 133 (2d Cir. 1978)* Cert. denied, *439 U.S. 1104, 99 S. Ct. 883, 59 L. Ed. 2d 65*; *Anaya v. Las Cruces Sun News, 455 F.2d 670, 672 (10th Cir. 1972)*; *Dahl, Inc. v. Roy Cooper Co., 448 F.2d 17, 19 (9th Cir. 1971)*; *Natrona Service, Inc. v. Continental Oil Co., supra, 435 F. Supp. at 108*; *Frackowiak v. Farmers Ins. Co., Inc., supra, 411 F. Supp. at 1317*.

The courts have upheld refusals to deal on a myriad of grounds. In A.B.A., ***Antitrust Law*** Developments, Supra at 22-23 (and Supp.), it was noted:

> Thus, individual refusals to deal have been upheld when based upon the failure of a distributor to live up to the supplier's preferred quality type image, when reliable security for payment has not been given or payments have not been made, when the refusal was based on a chronic history of customer complaints, when competitive products were sold by a customer at lower prices or lower prices were available from **[**40]** other suppliers, when a customer would not enter into a 5-year contract, when the "refusal was based on the supplier's belief that his company had been treated badly," when the refusal to deal was initiated because of a refusal by distributors to supply a newspaper with a list of its subscribers, when a manufacturer decided to choose his own distributor or establish his own exclusive outlet, when a coupler manufacturer's policy was to sell only to original equipment manufacturers or to subcontractors who manufactured components directly for them, and when the transfer from one distributor to another has been solicited by the new distributor, (w)hen a hospital did not meet an insurance company's standards designed to promote the public welfare, when the refusal was motivated by a supplier's decision to abandon a geographic market, when a supplier changed his policy and initiated a nationwide cutback in the number of dealers for its products, when a commercial loan was denied because of the applicant's inadequate financial resources and managerial qualifications, when a distributor provided inadequate sales performance in an **[*655]** area of primary responsibility, when a refusal **[**41]** to continue to supply market research data was intended to prevent the disclosure of proprietary trade secrets to a customer who had become a competitor, when a refusal was based on a curtailment of noncontractual customers during a period of shortage, and when a distributor engaged in misbranding activities. (footnotes omitted)

Defendants' actions in this case are as legal and reasonable as those just listed. It is not for this Court to substitute its judgment for the business judgment of defendants. Plaintiffs have been unable to present any authority which supports the positions they assert in any similar legal context. The cases which are factually similar to the case at hand are all in defendants' column.

A very similar case is *Shawver & Son, Inc. v. Oklahoma Gas & Electric Company, 463 F.2d 204 (10th Cir. 1972)*, in which an owner directed its general contractors not to hire a certain subcontractor in their work for the owner. The subcontractor brought an antitrust action. The 10th Circuit had no trouble affirming the trial court's decision to grant defendant's motion for summary judgment, stating:

> Case law interpreting antitrust statutes has established that in **[**42]** the absence of any purpose to create or maintain a monopoly, anti-trust laws do not restrict the right of any concern to deal with whom it pleases. *United States v. Colgate & Co., 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992 (1919)*; *Naifeh v. Ronson Art Metal Works, 218 F.2d 202 (10th Cir. 1954)*. (*463 F.2d at 205*)

In *Kendall Elevator Co., Inc. v. LBC&W Associates of S.C., Inc., 350 F. Supp. 75 (D.S.C.1972)*, defendant prepared architectural specifications for a building which required that the elevator supplier should be a manufacturer of major components "or equal". Plaintiff installed elevators, but was not a manufacturer and was therefore precluded from meeting the specifications. The plaintiff's antitrust claim was rejected. The court stated:

> As a general rule, a unilateral refusal to do business does not violate the antitrust laws so long as there is no purpose to create or maintain a monopoly. . . .

> The manufacturer of a product may select his customers and has the right to refuse to deal with anyone so long as such refusal is not in furtherance of a restrictive trade practice. An architect certainly has the same right. (*350 F. Supp. at 78*)

In a similar **[**43]** case, *Security Fire Door Company v. County of Los Angeles, 484 F.2d 1028 (9th Cir. 1973)* a plaintiff claimed an antitrust conspiracy among a county, its architects, and the supplier of a dumbwaiter system because the specifications for a county hospital construction project allegedly excluded all competition. The court rejected plaintiff's claim, holding:

> Once a purchaser's choice of product has been exercised competition is, of course, at an end. However, a purchaser is free to choose the product he desires without rendering himself an antitrust conspirator. The proscription against restraint of trade in this context seeks only to assure that the choice of product has been made freely under circumstances where the play of competition has been available rather than in response to anti-competitive factors such as coercion on the part of the supplier or agreements between suppliers not to compete with each other. (*484 F.2d at 1030*)

Plaintiffs are free to attempt to persuade FNMA to adopt a Best's classification which would not exclude them. Plaintiffs do not allege that insurance companies with a Best's VI classification have influenced defendants to adopt a classification **[**44]** which would exclude plaintiffs. The fact that no competitor of plaintiffs is a defendant in this action and that defendants have absolutely no competitive interest in the markets in which plaintiffs compete serves to highlight the inappropriateness of an antitrust cause of action in this factual situation.

In summary, we believe that plaintiffs are misusing the antitrust statutes by attempting **[*656]** to apply them to conduct which is obviously permissible and not anti-competitive. No *§ 1* Sherman Act violation can be found upon the allegations and facts presented in this case.

Other Claims

Plaintiffs have also lodged a *§ 2* Sherman Act claim and state ***antitrust law*** claims.

As defendants point out, and plaintiffs tacitly concede, a *§ 2* Sherman Act claim is not even properly alleged in this case. ***HN21***[] *15 U.S.C. § 2* prohibits the actions of those who monopolize, attempt to monopolize, or conspire to monopolize. Plaintiffs do not and cannot contend that the adoption of a Class VI requirement by defendants was an attempt by any of them to gain a monopoly in its particular market.

Because plaintiffs cannot show either a *§ 1* or *§ 2* claim under the Sherman Act, any pendent claims **[**45]** that state antitrust laws have been violated should be dismissed. *United Mine Workers v. Gibbs, 383 U.S. 715, 726, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966)*; *Prince v. Wallace, 568 F.2d 1176, 1178 (5th Cir. 1978)*; *Hodge v. Mountain States Tel. & Tel. Co., 555 F.2d 254, 261 (9th Cir. 1977)*; *Stevens v. Rock Springs National Bank, 497 F.2d 307, 310 (10th Cir. 1974)*.

CONCLUSION

Upon consideration of the entire record, the Court has no difficulty in reaching the conclusion that the motions for summary judgment must be granted.

IT IS SO ORDERED.
