Every contract possesses an implied covenant of good faith and fair dealing in which "neither party will do anything which will injure the right of the other to receive the benefits of the agreement." *Foley v. Interactive Data Corp., 47 Cal. 3d 654, 684, 254 Cal. Rptr. 211, 765 P.2d 373 (1988)*. When a plaintiff brings both a breach of contract and a breach of the implied covenant claim, the latter will be superfluous and subject to dismissal if both claims cite the same underlying breach. *See* *Landucci v. State Farm Ins. Co., 65 F. Supp. 3d 694, 716 (N.D. Cal. 2014)* (citation omitted); *Careau & Co. v. Sec. Pac. Bus. Credit, Inc., 222 Cal. App. 3d 1371, 1395, 272 Cal. Rptr. 387 (1990)*. A plaintiff may, however, bring both claims if they are based on two different breaches. *Id.; see also* *Daly v. United Healthcare Ins. Co., No. 10-CV-03032-LHK, 2010 U.S. Dist. LEXIS 116048, 2010 WL 4510911, at *4 (N.D. Cal. Nov. 1, 2010)*.

Plaintiff's breach of the covenant of good faith and fair dealing claim is based on the same allegations as the breach of contract allegations, as well as allegations that Defendants treated Plaintiff differently from other retailers including by placing additional requirements on Plaintiff, blocking the use of the Ralph Lauren name in Plaintiff's online advertising, emotionally abusive treatment, and threatening to take false action on false charges. While **[*14]** some of these additional allegations may overlap with Plaintiff's breach of contract claim (for example, to the extent that the parties' alleged implied contract allowed Plaintiff to advertise that she was a Ralph Lauren retailer, any breach of that agreement would be actionable in the context of the breach of contract claim), it is plausible that some of the allegations arise out a separate agreement that the parties should conduct themselves in good faith. "[I]n the context of the insurance contract, it has been held that the insurer's responsibility to act fairly and in good faith with respect to the handling of the insured's claim is not the requirement mandated by the terms of the policy itself—to defend, settle, or pay. It is the obligation ... under which the insurer must act fairly and in good faith in discharging its contractual responsibilities." *Careau, 222 Cal. App. 3d at 1394-95* (internal citation and quotation marks omitted). Here, taking the allegations as true—as the Court must at this stage—Plaintiff's allegation that

Defendants placed requirements on her that they did not on other retailers, and that these requirements were punitive and had the effect of destroying Plaintiff's business, is sufficient **[*15]** to allege "a conscious and deliberate act, which unfairly frustrates the agreed common purposes and disappoints the reasonable expectations of the other party thereby depriving that party of the benefits of the agreement." *Id. at 1395*.

Plaintiff's motion to amend this claim is therefore granted.

4) Fifth Claim: Violation of Fiduciary Obligations

The elements of a claim for a breach of fiduciary duty are: (1) existence of a fiduciary duty, (2) breach of the fiduciary duty, and (3) damages proximately caused by the breach. *See* *Tribeca Cos., LLC v. First Am. Title, 239 Cal. App. 4th 1088, 1114, 192 Cal. Rptr. 3d 354 (2015)*. Only certain legal relationships trigger automatic fiduciary duties. *See* *Gilman v. Dalby, 176 Cal. App. 4th 606, 614, 98 Cal. Rptr. 3d 231 (2009)*. For example, joint ventures, partnerships and agency relationships. *City of Hope Nat'l Med. Ctr. v. Genentech, Inc., 43 Cal. 4th 375, 386, 75 Cal. Rptr. 3d 333, 181 P.3d 142 (2008)*. A plaintiff cannot generally "turn an ordinary breach of contract claim into a breach of fiduciary duty." *Gilman, 176 Cal. App. 4th at 614* (citing *Wolf v. Superior Court, 107 Cal. App. 4th 25, 30, 130 Cal. Rptr. 2d 860 (2003))*. Fiduciary duties attach to a contractual relationship only when the relationship requires that the fiduciary act with undivided loyalty on behalf of the beneficiary and never profit or advantage from the parties' dealings. *See* *Wolf, 107 Cal. App. 4th at 30*.

Although Plaintiff alleges that the parties "expressly entered into a partnership relationship with Plaintiff," she does not allege that Defendants "knowingly undert[ook] to act on behalf and **[*16]** for the benefit of another, or [] enter[ed] into a relationship which imposes that undertaking as a matter of law." *Genentech, 43 Cal. 4th at 386* (internal citation and quotation marks omitted). (Dkt. No. 16-2 at ¶ 108.) Plaintiff has thus not alleged facts which plausibly suggest that the parties entered into a partnership which gave rise to fiduciary obligations beyond the contractual relationship alleged here. Accordingly, allowing the proposed amendment of this claim would be futile.

5) Sixth Claim: Interference with Prospective Advantage

The elements of a claim for intentional interference with prospective economic advantage are: (1) an economic relationship between the plaintiff and some third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) the defendant's intentional acts designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm to the plaintiff proximately caused by the defendant's acts." *Reeves v. Hanlon, 33 Cal. 4th 1140, 1152 n.6, 17 Cal. Rptr. 3d 289, 95 P.3d 513 (2004)* (citation omitted). In addition, "a defendant's conduct must be 'wrongful by some legal measure other than the fact of interference itself.'" *MJC Am., Ltd. v. Gree Elec. Appliances, Inc. of Zhuhai, 2014 WL 12600963, at *4 (C.D. Cal. Jan. 21, 2014)* (quoting *Della Penna v. Toyota Motor Sales, USA, Inc., 11 Cal. 4th 376, 393, 45 Cal. Rptr. 2d 436, 902 P.2d 740 (1995))*. "[A]n act is independently wrongful if it **[*17]** is unlawful, that is, if it is proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1159, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*.

Plaintiff alleges that the same conduct which gives rise to her breach of implied covenant of good faith and fair dealing gives rise to an action for intentional interference with prospective advantage because Defendants knew their conduct would "interfere with the economic relationship that existed between PLAINTIFF and the clientele she had built up over the course of approximately 15 years." (Dkt. No. 16-2 at ¶ 115.) These allegations are not sufficiently specific to state a claim because Plaintiff must identify a specific relationship with which Defendants have allegedly interfered. "Without an existing relationship with an identifiable buyer, [plaintiff]'s expectation of a future sale was 'at most a hope for an economic relationship and a desire for future benefit.'" *Roy Allan Slurry Seal, Inc. v. Am. Asphalt S., Inc., 2 Cal. 5th 505, 516, 213 Cal. Rptr. 3d 568, 388 P.3d 800 (2017)* (quoting *Westside Ctr. Assocs. v. Safeway Stores 23, Inc., 42 Cal. App. 4th 507, 527, 49 Cal. Rptr. 2d 793 (1996))*. Amendment of this claim based on the presently alleged facts would be futile.

6) Seventh Claim: Intentional Infliction of Emotional Distress

The elements of a claim for intentional infliction of emotional distress are: (1) extreme and outrageous conduct by the defendant **[*18]** with the intention of causing, or reckless disregard of the probability of causing, emotional distress; (2) the plaintiff's suffering severe or extreme emotional distress; and (3) actual and proximate causation of the emotional distress by the defendant's outrageous conduct. *Corales v. Bennett, 567 F.3d 554, 571 (9th Cir. 2009)* (internal citation omitted). Conduct is outrageous if it is so extreme as to exceed all bounds of that usually tolerated in a civilized community. *Id. at 571*.

Plaintiff alleges that Defendants engaged in a conspiracy "intended to intimidate and terrify PLAINTIFF" that was "extreme and outrageous." (Dkt. No. 16-2 at ¶ 120.) This is not sufficient to state a claim for intentional infliction of emotional distress. "Liability for intentional infliction of emotional distress does not extend to mere insults, indignities, threats, annoyances, petty oppressions, or other trivialities." *Hughes v. Pair, 46 Cal. 4th 1035, 1051, 95 Cal. Rptr. 3d 636, 209 P.3d 963 (2009)* (internal citation and quotation marks omitted) (concluding that threats that, unless plaintiff granted the defendant sexual favors, he would use his authority as a trustee of the trust set up for plaintiff's son to deny her requests for funds, "fall far short of conduct that is so outrageous" that it exceed[s] all bounds of that usually tolerated **[*19]** in a civilized community.") (internal citation and quotation marks omitted). Plaintiff has not identified the statements which give rise to her intentional infliction of emotional distress claim beyond describing them as containing "hatefulness, viciousness, animosity, and malice." (Dkt. No. 16-2 at ¶ 48.) To state a claim, Plaintiff must identify conduct that "exceeds all bounds of that usually tolerated in a civilized community." *Hughes, 46 Cal.4th at 1050-51*. Because she has failed to do so, the proposed amendment of this claim is futile.[2]

7) Eighth Claim: Violation of the Robinson-Patman Act

The Robinson—Patman Act of 1936, *15 U.S.C. § 13*, prohibits price discrimination that is likely to have an anticompetitive effect. In essence, this Act makes it unlawful for a seller to discriminate in price between purchasers of similar commodities when the price discrimination results in competitive harm. *See, e.g., Best Brands Beverage, Inc. v. Falstaff Brewing Corp., 842 F.2d 578, 584 (2d Cir.1987)*. Accordingly, to state a claim under the Robinson—Patman Act, a plaintiff must allege: (1) two or more contemporaneous sales by the same seller; (2) at different prices; (3) of commodities of like grade and quality; (4) the discrimination had the requisite anticompetitive effect; and (5) the discrimination caused injury **[*20]** to the plaintiff. *Rutledge v. Elec. Hose & Rubber Co., 511 F.2d 668, 677 (9th Cir.1975)*.

The Robinson—Patman Act "does not ban all price differences charged to different purchasers of commodities of like grade and quality[]; rather, the Act proscribes price discrimination only to the extent that it threatens to injure competition." *Volvo Trucks N. Am., Inc. v. Reeder-Simco GMC, Inc., 546 U.S. 164, 176, 126 S. Ct. 860, 163 L. Ed. 2d 663 (2006)* (internal citation and quotation marks omitted). Secondary line cases such as this "involve price discrimination that injures competition among the discriminating seller's customers (here, [Ralph Lauren

---

[2] Defendants also contend that this claim is barred by the statute of limitations. The statute of limitations for the intentional infliction of emotional distress is two years. *See* *Cal. Civ. Proc. Code § 335.1* (identifying two-year statute of limitations); *Pugliese v. Superior Court, 146 Cal. App. 4th 1444, 1450, 53 Cal. Rptr. 3d 681 (2007)*("Causes of action for assault, battery and intentional infliction of emotional distress are governed by the two-year statute of limitations set forth in Code of Civil Procedure *section 335.1*."). Because the complaint was filed May 8, 2017, the offensive phone call—which occurred in November 2013—cannot be the basis for the intentional infliction of emotional distress claim. (Dkt. No. 16-2 at ¶ 47). However, Plaintiff contends that some of the conduct of which she complains occurred within two years of the filing of the complaint. (Dkt. No. 30 at 13:8-9.) The Court is uncertain how this can be the case given that the complaint alleges that Ralph Lauren terminated its relationship with Plaintiff on May 8, 2015—exactly two years prior to the filing of the complaint. (*Id.* at ¶ 76.) Plaintiff will nonetheless be granted leave to amend this claim to the extent that she has a good faith basis to allege outrageous conduct that occurred within the two-year statute of limitations.

wholesalers]); cases in this category typically refer to 'favored' and 'disfavored' purchasers." *Id.* "A hallmark of the requisite competitive injury, our decisions indicate, is the diversion of sales or profits from a disfavored purchaser to a favored purchaser." *Id. at 177*. Alternatively, plaintiff may allege that a favored competitor received "a significant price reduction over a substantial period of time" to support a permissible inference of competitive injury. *Id.* (internal citation and quotation marks omitted).

Plaintiff alleges that Defendants "lessened competition by greatly disadvantaging and thereby injuring a particularly successful competitor," that Defendant gave "unfair discounts" to third party competitors "which directly **[*21]** cost PLAINTIFF sales and growth" because customers saw the lower prices offered by Plaintiff's competitors. (Dkt. No. 16-2 at ¶ 127.) As pled, Plaintiff's claim lacks the specificity necessary to plead a claim under the Robinson—Patman Act. Other than Plaintiff's vague allegation that Defendants gave unfair discounts to her competitors, Plaintiff has not identified the discounts, that they were for the same or comparable products, that they were contemporaneous, or that they had an anti-competitive effect. Plaintiff cannot simply recite the elements of a claim, but rather, must provide sufficient factual allegations so that Defendants have fair notice of the claims against them. *See* *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (holding that while a complaint "does not need detailed factual allegations, ... a plaintiff's obligation to provide the 'grounds of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do.... Factual allegations must be enough to raise a right to relief above the speculative level."); *see also* *GVF Cannery, Inc. v. California Tomato Growers Ass'n, Inc., 511 F. Supp. 711, 717 (N.D. Cal. 1981)* ("bare, conclusory allegation does not set forth a basis for relief under the Act.") This is particularly true for a **[*22]** Robinson—Patman Act claim because the Act "proscribes price discrimination only to the extent that it threatens to injure competition." *Volvo, 546 U.S. at 176*. Accordingly, the proposed amendment of this claim is futile.

8) Ninth Claim: RICO

The civil RICO Act makes it "unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt." *18 U.S.C. § 1962(c)*. To state a civil RICO claim, a plaintiff must allege facts showing: "(1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity (known as predicate acts) (5) causing injury to plaintiff's business or property." *Living Designs, Inc. v. E.I. Dupont de Nemours & Co., 431 F.3d 353, 361 (9th Cir. 2005)* (internal quotation marks and citation omitted).

Plaintiff's RICO claim appears predicated on her allegations that Defendants gave unfair discounts to other retailers including One Kings Land and Bloomingdales and Defendants "whipsaw[ed]" Plaintiff with contradictory communications. (Dkt. No. 16-2 at pp 132.) Plaintiff lists a series of communication which she alleges constitute the predicate **[*23]** acts. (*Id.*) Plaintiff's allegations fail to state a RICO claim. In particular, Plaintiff has failed to allege the members of the enterprise or the racketeering activity. While she alleges a pattern of racketeering activity under *18 U.S.C. § 1961(5)*, based on violations of *18 U.S.C. § 1341* (mail fraud) and *18 U.S.C. § 1343* (wire fraud), she has failed to allege facts that support a plausible inference that Defendants' conduct violates these statutes; instead, Plaintiff has merely quoted the statutes. To state a claim, Plaintiff must plead conduct which would constitute mail or wire fraud, or another offense specified in *18 U.S.C. § 1961(1)*.

The Court thus concludes that leave to amend Plaintiff's RICO claim based on the present allegations would be futile.

9) Tenth Claim: Discrimination

Plaintiff's tenth claim for relief alleges that Defendants violated the Unruh Civil Rights Act under *California Civil Code §§ 51*, *51.5*. *California Civil Code § 51* provides, in general terms, that all persons are entitled to the full and equal accommodations, advantages, facilities, privileges, or services in all business establishments of every kind whatsoever. *Id.; Sprewell v. Golden State Warriors, 266 F.3d 979, 989 (9th Cir.)*, opinion amended on denial of reh'g, *275 F.3d 1187 (9th Cir. 2001)*. *California Civil Code § 51.5* prohibits a business establishment from discriminating against any person because of their sex. *Id.* To establish a claim for **[*24]** violation of the Unruh Act, with an exception not relevant to the facts of this lawsuit, a plaintiff must prove intentional discrimination by a business establishment. *See Cohn v. Corinthian Colleges, Inc., 169 Cal. App. 4th 523, 528, 86 Cal. Rptr. 3d 401 (2008)* ("The Unruh Act requires intentional discrimination to protect against "all unreasonable, arbitrary, or invidious discrimination.").

Plaintiff alleges that Defendants discriminated against her on the basis of her gender and ethnicity by engaging in "extraordinarily harsh and rude direct communications," making "baseless complaints," and favoring other vendors such that "the only conclusion that can reasonably be drawn is that the treatment...could only be explained by animus toward her immutable characteristics of gender, and apparent nationality and sexual orientation." (Dkt. No. 16-2 at ¶ 144.) These allegations are insufficient to state a claim for violation of the Unruh Act. Plaintiff must "state in [her] complaint nonconclusory allegations setting forth evidence of unlawful intent." *Grier v. Brown, 230 F. Supp. 2d 1108, 1120 (N.D. Cal. 2002)* (internal citations and quotations omitted) (dismissing Unruh Act claims where plaintiff pled that defendant "discriminated against them" and "intended to deprive them" of their civil rights, and noting that the Unruh Act and the **[*25]** *Equal Protection Clause* require the same showing of discriminatory intent). Plaintiff's FAC does not include factual allegations that plausibly suggest such intent.

Accordingly, leave to amend Plaintiff's Unruh Act claim based on the present allegations would be futile.[3]

10) Eleventh Claim: *California Business and Professions Code § 17200*

Plaintiff's eleventh claim for relief is for violation of California's Unfair Competition Law, Business and Professions Code *§ 17200 et seq.* ("UCL"). To state a claim under the UCL, a plaintiff must allege an "unlawful, unfair, or fraudulent business act or practice" or "unfair, deceptive, untrue or misleading advertising." *Cal. Bus. & Prof. Code § 17200*. To succeed on a UCL claim under any of these theories, a plaintiff must establish that the defendant engaged in one of the practices that the statute prohibits and that, as a result of that conduct, he or she suffered actual injury. *Marolda v. Symantec Corp., 672 F.Supp.2d 992, 1003 (N.D. Cal. 2009)*.

Plaintiff alleges that Defendants violated the UCL through "the unfair business practices alleged hereinabove, including but not limited to the conduct set forth in ¶s 24, 26. 28, 30-35, 37-44, 36, 52, 56-57, 60-62, 64 and 69-78." (Dkt. No. 16-2 at ¶ 151.) Plaintiff's general reference to 21-pages of factual allegations is insufficient to state a claim **[*26]** under the UCL. "[W]ith respect to business-competitor cases, to state a claim under the UCL's 'unfair' prong the alleged unfairness must 'be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition.'" *Levitt v. Yelp! Inc., 765 F.3d 1123, 1136 (9th Cir. 2014)* (quoting *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 186-87, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (an act or practice is "unfair" under the UCL only if the conduct "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition."). Plaintiff has not tethered her UCL claim to a violation of antitrust laws. To the extent that Plaintiff seeks to tether it to her price discrimination or RICO claims, because the Court has concluded that those claims are inadequately pled, the UCL claim necessarily fails as well. *See Hicks v. PGA Tour, Inc., 165 F.Supp.3d 898, 911 (N.D. Cal. Feb. 9, 2016)* ("[W]here the same

---

[3] Defendants also insist that Plaintiff's Unruh Act claim is barred by the one-year statute of limitations. The actual statute of limitations for Unruh Act claims is somewhat unsettled. *See Kemp v. Regents of Univ. of Cal., No. C-09-4687 PJH, 2010 U.S. Dist. LEXIS 79654, 2010 WL 2889224, at *6 (N.D. Cal. July 22, 2010)* (discussing split within the California appellate courts and the absence of Ninth Circuit or California Supreme Court authority on point). Because this issue has not been fully briefed and the basis for Plaintiff's discrimination claim is unclear, the Court declines to address this issue now; however, the parties should address this issue should Plaintiff amend this claim.

conduct alleged to be unfair under the UCL is also alleged to be a violation of another law, the UCL claim rises or falls with the other claims.") (internal citation omitted).

Accordingly, the proposed amendment to Plaintiff's UCL claim is futile and is denied.

***

The Court thus grants the motion to amend with respect **[*27]** to Plaintiff's first claim for breach of implied contract and her fourth claim for breach of the implied covenant of good faith and fair dealing. The motion for leave to amend is denied with respect the remainder of Plaintiff's proposed claims because as currently pled amendment would be futile. However, because the Court cannot hold that the claims cannot be saved by further amendment, Plaintiff is granted leave to amend her second, third, fifth, sixth, seventh, eighth, ninth, tenth, and eleventh claims, but only to the extent that she has a good faith basis consistent with *Federal Rule of Civil Procedure 11* to do so. *See* *Nordyke v. King, 644 F.3d 776, 788-89 (9th Cir. 2011)*, on reh'g en banc, *681 F.3d 1041 (9th Cir. 2012)* (finding that even if a court denies leave to amend based on futility, it should grant further leave to amend if the proposed complaint could be saved by amendment). While the Court cannot say with certainty that no viable amendment is possible, these claims appear farfetched and merely an as-of-yet unsuccessful attempt to turn an ordinary contract dispute into a tort action.

B. Defendant's Motion to Dismiss

Having granted in part and denied in part Plaintiff's motion to amend her complaint, the prior version of the complaint on which Defendants' motion to dismiss is based is no **[*28]** longer operative. The motion to dismiss is therefore denied a moot. This denial is without prejudice to the filing of a new motion to dismiss should Plaintiff elect to file a second amended complaint.

CONCLUSION

For the reasons stated above, Plaintiff's motion to amend the complaint the complaint is GRANTED IN PART and DENIED IN PART. (Dkt. No. 15.) Defendants' motion to dismiss is DENIED AS MOOT. (Dkt. No. 10.) Plaintiff's administrative motion regarding case scheduling is also DENIED AS MOOT. (Dkt. No. 18.)

Within 21 days, Plaintiff shall either file a further amended complaint or a statement that she intends to stand on her First Amended Complaint and its two claims (breach of implied contract and breach of the implied contract of good faith and fair dealing). The case management conference scheduled for August 30, 2018 is continued to September 27, 2018 at 11:00 a.m. One week before the conference that parties shall submit a new joint case management conference statement that includes a proposed case schedule and a proposal for early ADR.

This Order disposes of Docket Nos. 10, 15, and 18.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

In addressing a defendant's jurisdictional challenge under Fed. R. Civ. P. 12(b)(1), a court takes the allegations in the complaint as true, inquiring whether these allegations establish a basis for the exercise of subject matter jurisdiction. Yet, conclusory allegations or legal conclusions masquerading as factual conclusions will not suffice to withstand a properly supported Rule 12(b)(1) motion to dismiss.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

When determining whether a plaintiff's claims are subject to dismissal under Fed. R. Civ. P. 12(b)(6) for failure to state a claim, a court must construe the complaint in a light most favorable to plaintiff and accept all well-pleaded factual allegations as true. However, the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Motions to Dismiss, Failure to State Claim

While a complaint attacked by a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Rather, to withstand a motion to dismiss, the complaint's factual allegations, accepted as true, must be enough to raise a right to relief above the speculative level and to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. This plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged -- but it has not shown -- that the pleader is entitled to relief. If a plaintiff does not nudge its claims across the line from conceivable to plausible, its complaint must be dismissed.

Civil Procedure > Parties > Joinder of Parties > Permissive Joinder

HN4[] Joinder of Parties, Permissive Joinder

Under *Fed. R. Civ. P. 20(a)(2)*, parties may be joined in one action as defendants if: (i) the claims against them arise out of the same transaction, occurrence, or series of transactions or occurrences, and (ii) any question of law or fact common to all defendants will arise in the action. The standards for permissive joinder under this Rule are liberally construed, in order to promote trial convenience and expedite the final determination of disputes by avoiding multiple lawsuits where possible. In this manner, permissive joinder serves the larger objective under the Federal Rules of entertaining the broadest possible scope of action consistent with fairness to the parties. The permissive joinder of defendants is also encouraged for purposes of judicial efficiency.

Civil Procedure > Parties > Joinder of Parties > Permissive Joinder

HN5[] Joinder of Parties, Permissive Joinder

To warrant the joinder of specific conspiracy claims in a single suit, a plaintiff must show that these claims (i) arise out of the same transaction, occurrence, or series of transactions or occurrences, and (ii) involve a question of law or fact common to all defendants. *Fed. R. Civ. P. 20(a)(2)(A)-(B)*.

Civil Procedure > Parties > Joinder of Parties > Permissive Joinder

HN6[] Joinder of Parties, Permissive Joinder

In addressing the question of whether claims arise out of the same transaction, occurrence, or series of transactions or occurrence, courts have inquired whether there is a logical relationship between the separate causes of action that a plaintiff seeks to join in a single case. The logical relationship test is satisfied if there is substantial evidentiary overlap in the facts giving rise to the cause of action against each defendant. Stated differently, the plaintiffs' claims must share an aggregate of operative facts. This is a flexible and case-specific standard, and the mere fact that a case involves independent actors as defendants does not necessarily bring the case outside the scope of *Fed. R. Civ. P. 20*.

Civil Procedure > Parties > Joinder of Parties > Misjoinder

HN7[] Joinder of Parties, Misjoinder

Misjoinder of parties is not a ground for dismissing an action. *Fed. R. Civ. P. 21*. Nonetheless, a court has wide latitude in fashioning appropriate relief, including adding or dropping a party or severing any claim against a party.

Civil Procedure > Trials > Consolidation of Actions

HN8[] Trials, Consolidation of Actions

Fed. R. Civ. P. 42(a) authorizes a court to join for hearing or trial any or all matters at issue in the actions and to issue any other orders to avoid unnecessary cost or delay.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Constitutional Law > ... > Case or Controversy > Standing > Elements

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN9[] Standing, Burdens of Proof

To demonstrate U.S. Const. art. III standing, a plaintiff must first allege that it has suffered an "injury in fact" -- that is, an invasion of a legally protected interest that is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical. Second, the alleged injury must be fairly traceable to the challenged action of the defendant, and not the result of the independent action of some third party not before the court. Third, the plaintiff must allege that a favorable federal court decision is likely to redress the alleged injury. The party invoking federal jurisdiction bears the burden of establishing these elements. Because Article III standing is not a mere pleading requirement but rather an indispensable part of the plaintiff's case, each element of this standard must be supported in the same way as any other matter on which the plaintiff bears the burden of proof, i.e., with the manner and degree of evidence required at the successive stages of the litigation. At the motion to dismiss stage, general factual allegations of injury resulting from the defendant's conduct may suffice, for on a motion to dismiss a court presumes that general allegations embrace those specific facts that are necessary to support the claim.

Civil Procedure > Preliminary Considerations > Justiciability > Standing

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN10[] Justiciability, Standing

The United States Supreme Court has cautioned that standing is not dispensed in gross, and that a plaintiff instead must demonstrate standing for each claim he seeks to press and for each form of relief that is sought.

Civil Procedure > Preliminary Considerations > Justiciability > Standing

Constitutional Law > ... > Case or Controversy > Standing > Elements

Evidence > Inferences & Presumptions > Inferences

HN11[] Justiciability, Standing

Standing cannot be inferred but instead must affirmatively appear in the record.

Civil Procedure > Special Proceedings > Class Actions > Class Members

Constitutional Law > ... > Case or Controversy > Standing > Elements

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN12[] Class Actions, Class Members

It may be appropriate to defer a standing inquiry until a plaintiff has an opportunity to engage in discovery that could uncover evidence of relevant transactions and resulting injury in each of the pertinent jurisdictions. Yet, the courts typically adopt this approach in class actions, where the named plaintiffs generally lack information about transactions engaged in by members of the putative plaintiff class.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Constitutional Law > ... > Case or Controversy > Standing > Elements

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN13[] Purchasers, Indirect Purchasers

The United States District Court for the Eastern District of Michigan has rejected challenges to the Article III standing of end-payor plaintiffs in antitrust matters. In one of these decision, the court explained that the defendant part suppliers had cited no authority requiring an indirect purchaser to allege the detailed mechanics of the pass-through process to plead injury-in-fact and causation for purposes of constitutional standing to survive a *Fed. R. Civ. P. 12(b)(6)* motion.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN14[] Standing, Requirements

The Sixth Circuit has emphasized that antitrust standing and Article III standing are not one and the same, and that a claim is subject to dismissal under *Fed. R. Civ. P. 12(b)(6)* when the former is lacking. To establish the requisite antitrust standing, a plaintiff cannot rely solely upon allegations of harm resulting from a violation of the antitrust laws, because Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property. Rather, even when a plaintiff alleges an antitrust violation and resulting harm, his claim may not go forward if other relevant factors -- the nature of the plaintiff's injury, the tenuous and speculative character of the relationship between the alleged antitrust violation and the plaintiff's alleged injury, the potential for duplicative recovery or complex apportionment of damages, and the existence of more direct victims of the alleged conspiracy -- weigh heavily against judicial enforcement of the plaintiff's antitrust claim.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN15[] **Standing, Requirements**

Antitrust standing is a threshold, pleading-stage inquiry, and when a complaint by its terms fails to establish this requirement, a court must dismiss it as a matter of law. Yet, the United States Supreme Court's AGC factors are to be balanced, and no single factor is conclusive. Although AGC by its terms applies only to claims under federal ***antitrust law***, the same or similar principles of antitrust standing govern state law antitrust claims.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN16[] **Standing, Requirements**

The alleged injury of paying higher prices for a product due to a lack of competition in the market is sufficient to establish antitrust standing.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN17[] **Purchasers, Indirect Purchasers**

The United States District Court for the Eastern District of Michigan has recognized that a state's enactment of an Illinois Brick repealer statute evidences a state policy to allow indirect purchasers to bring antitrust claims despite a heightened risk of duplicative recovery. Yet, the court has not gone so far as to say that these enactments render the threat of duplicative recovery wholly irrelevant to an antitrust standing inquiry under the United States Supreme Court's decision in AGC. To the contrary, rather than relying solely on a state's repeal of Illinois Brick as conclusively resolving AGC's "duplicative recovery" factor in favor of an indirect purchaser's antitrust standing, the court has gone on to cite specific allegations by the indirect purchaser that lessen the risk of duplicative recovery. In its Fuel Senders decision, for example, the U.S. District Court for the Eastern District of Michigan pointed to the indirect purchasers' allegations that the overcharges they paid were distinct and traceable, and it further observed that the direct purchaser original equipment manufacturers were not pursuing their own antitrust claims.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN18[] **Standing, Requirements**

For antitrust standing purposes, a plaintiff need not be a direct participant in the relevant markets, so long as the market in which it did participate is inextricably linked and intertwined with these markets.

Insurance Law > Claim, Contract & Practice Issues > Subrogation > Equitable Subrogation

HN19[] Subrogation, Equitable Subrogation

The doctrine of equitable subrogation, as applied in the insurance context, allows an insurer to sue a third party for injuries that the third party caused to the insured, when the insurer compensated the insured for those injuries. Although this theory of recovery is governed by state law and an insurer's right of subrogation therefore varies from state to state, the doctrine of equitable subrogation generally allows insurers to stand in the shoes of their insured to seek indemnification by pursuing any claims that the insured may have had against third parties legally responsible for the loss. In pursuing this recovery, the insurer (or subrogee) succeeds to the rights of its insured (the subrogor), and seeks to require the party who caused the damage to reimburse the insurer for the payment the insurer has made to its insured.

Insurance Law > Claim, Contract & Practice Issues > Subrogation > Equitable Subrogation

HN20[] Subrogation, Equitable Subrogation

As a general matter, a subrogation claim by an insurer depends upon the claim of the insured and is subject to whatever defenses the tortfeasor has against the insured. Thus, when an insured settles with or releases a third party from liability for a loss that the third party has caused, the insurer's subrogation right against such party may be destroyed. There is an exception to this general rule. Where a third party obtains a release from an insured with knowledge that the latter has already received payment from the insurer or with information that, reasonably pursued, should give him knowledge of the existence of the insurer's subrogation rights, such a release does not bar the insurer's right of subrogation. This exception is intended to prevent a release from operating as a fraud upon the insurer.

Insurance Law > Claim, Contract & Practice Issues > Subrogation > Equitable Subrogation

HN21[] Subrogation, Equitable Subrogation

A subrogation claim brought by an insurer depends upon the claim of its insured and is subject to whatever defenses the tortfeasor has against the insured. Ordinarily, then, once an insured settles with or releases a third party from liability for a loss that the third party has caused, the insurer's right of subrogation is extinguished.

Insurance Law > Claim, Contract & Practice Issues > Subrogation > Equitable Subrogation

HN22[] Subrogation, Equitable Subrogation

Where a third party obtains a release from an insured with knowledge that the latter has already received payment from the insurer or with information that, reasonably pursued, should give him knowledge of the existence of the insurer's subrogation rights, such a release does not bar the insurer's right of subrogation.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Releases

HN23[] Affirmative Defenses, Releases

Fed. R. Civ. P. 8(c)(1) identifies "release" as an affirmative defense that must be asserted in response to a complaint.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Affirmative Defenses

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN24[] Defenses, Demurrers & Objections, Affirmative Defenses

It generally is not appropriate to grant a Fed. R. Civ. P. 12(b)(6) motion to dismiss on the basis of an affirmative defense, because a plaintiff ordinarily has no obligation to plead around this affirmative defense in order to state a viable claim. To be sure, a motion to dismiss may be granted where the undisputed facts as set forth in the pleadings conclusively establish an affirmative defense as a matter of law.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Governments > Legislation > Statute of Limitations > Pleadings & Proof

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Statute of Limitations

HN25[] Motions to Dismiss, Failure to State Claim

A defendant's statute of limitations challenge is an affirmative defense that must be set forth in response to a complaint. Fed. R. Civ. P. 8(c)(1). A plaintiff ordinarily need not plead around such affirmative defenses, and a motion under Fed. R. Civ. P. 12(b)(6), which considers only the allegations in the complaint, is generally an inappropriate vehicle for dismissing a claim based upon the statute of limitations. Nonetheless, dismissal under Rule 12(b)(6) is appropriate where the allegations in the complaint affirmatively show that the claim is time-barred, and it is the plaintiff's burden in this instance to affirmatively plead circumstances which would indicate why the events giving rise to a claim were not discovered earlier or why the statute of limitations should be tolled.

Antitrust & Trade Law > Regulated Practices > Private Actions

Governments > Legislation > Statute of Limitations > Time Limitations

HN26[] Regulated Practices, Private Actions

A federal antitrust claim must be brought within four years after the claim accrues. 15 U.S.C.S. § 15b.

Antitrust & Trade Law > Regulated Practices > Private Actions

Governments > Legislation > Statute of Limitations > Time Limitations

HN27[] Regulated Practices, Private Actions

In antitrust matters, the requisite inquiry notice that triggers claim accrual is not established through the availability of limited information in the public domain regarding a government investigation. More generally, the statute of limitations inquiry is not made in light of all the connections that subsequently came to light, but rather must be confined to the information disclosed at the time of the publicity in question.

Antitrust & Trade Law > Regulated Practices > Private Actions

Governments > Legislation > Statute of Limitations > Extensions & Revivals

HN28[] **Regulated Practices, Private Actions**

As an example of a "continuing violation," the United States Supreme Court has cited a price-fixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, explaining that each sale to the plaintiff qualifies as an overt act that is part of the antitrust violation and thereby starts the statutory period running again. Sixth Circuit decisions have emphasized that under the continuing violation doctrine, an overt act by the defendant is required to restart the statute of limitations and the statute runs from the last overt act.

Antitrust & Trade Law > Regulated Practices > Private Actions

Governments > Legislation > Statute of Limitations > Extensions & Revivals

HN29[] **Regulated Practices, Private Actions**

Although each overt act starts a new period of limitation for antitrust claims arising from this act, the commission of a separate new overt act generally does not permit a plaintiff to recover for the injury caused by old overt acts outside the limitation period.

Civil Procedure > ... > Notice of Class Action > Content of Notice > Opt Out Provisions

Governments > Legislation > Statute of Limitations > Tolling

HN30[] **Content of Notice, Opt Out Provisions**

The commencement of a class action suit tolls the applicable statutes of limitation for all those who would have been members of the putative class but instead elect to opt out of the class action and file individual claims.

Governments > Legislation > Statute of Limitations > Pleadings & Proof

Governments > Legislation > Statute of Limitations > Tolling

HN31[] **Statute of Limitations, Pleadings & Proof**

A plaintiff generally need not plead facts in avoidance of a statute of limitations defense. However, a plaintiff must affirmatively allege facts in support of tolling where it is otherwise apparent from the face of the complaint that the time limit for bringing the claim has passed.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN32[] **Private Actions, State Regulation**

Under the antitrust laws of certain states -- i.e., Alabama, Mississippi, Nevada, New York, North Carolina, South Dakota, Tennessee, and West Virginia, as well as the District of Columbia, a plaintiff must allege a nexus between the defendant's conduct and intrastate commerce.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN33[] **Private Actions, State Regulation**

Under Utah law, a plaintiff must be a citizen of the state or a resident of the state in order to bring to claim under Utah's Antitrust Act. *Utah Code Ann. § 76-10-3109(1)(a)*. In reliance on this statutory language, a number of courts have dismissed claims brought under Utah ***antitrust law*** by plaintiffs who were neither citizens nor residents of Utah.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN34[] **Private Actions, State Regulation**

The Oregon legislature has mandated that the state's ***antitrust law*** applies only to intrastate trade or commerce, and to interstate trade or commerce involving an actual or threatened injury to a person or property located in this state. *Or. Rev. Stat. § 646.715(2)*.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN35[] **Private Actions, State Regulation**

A number of states have enacted so-called "Illinois Brick repealer statutes" -- that is, statutes that override the United States Supreme Court's decision in Illinois Brick and allow recovery by indirect purchasers under state law. Effective January 1, 2008, New Hampshire passed such a law allowing recovery of damages by indirect purchasers. *RSA § 356.11*. Likewise, effective May 1, 2006, Utah amended a provision of its ***antitrust law*** to permit recovery by indirect purchasers. *Utah Code Ann. 76-10-3109(1)(a)*.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN36[] **Private Actions, State Regulation**

In Static Random Access Memory, the United States District Court for the Northern District of California discussed the Hawaiian Supreme Court's holding in 1999 that the Hawaiian legislature had not conferred a private claim for relief under *Haw. Rev. Stat. § 480-13* for unfair methods of competition in violation of *Haw. Rev. Stat. § 480-2*. As explained in Static Random Access Memory, although the Hawaiian legislature's 2002 enactment supplanted this particular aspect of the Hawaiian Supreme Court's decision in Robert's Hawaii School Bus, the Hawaiian court emphasized in that same decision that its interpretation of *Haw. Rev. Stat. § 480-2* as it read in 1999 did not operate to limit private claims for violations of *Haw. Rev. Stat. §§ 480-4* or *480-9*. Because the indirect purchaser plaintiffs in Static Random Access Memory were pursuing a price-fixing conspiracy claim under *Haw. Rev. Stat. § 480-4*, and not a claim for unfair methods of competition under *Haw. Rev. Stat. § 480-2*, the court in that case reasoned that the state legislature's 2002 amendment to *§ 480-2* could not properly be construed as an implied repeal of a previously existing Illinois Brick-style limitation on indirect purchaser recoveries under *Haw. Rev. Stat. § 480-4*, where this latter provision was wholly unaffected by the legislature's 2002 enactment.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN37[] **Private Actions, State Regulation**

One way a plaintiff can establish a deceptive trade practice under Nevada law is by showing that the defendant knowingly violated a state or federal statute or regulation relating to the sale or lease of goods or services. *Nev. Rev. Stat. § 598.0923*. Nevada is s "nexus state," and a plaintiff's antitrust claim under Nevada law is subject to dismissal for lack of allegations of a nexus between defendants' allegedly unlawful conduct and injury sustained by plaintiff in Nevada. It follows that a plaintiff cannot establish a deceptive trade practice under *§ 598.0923* by appealing to a violation of Nevada ***antitrust law***. There are other ways to demonstrate that a defendant has engaged in a "deceptive trade practice" as defined under Nevada law. In particular, *§ 598.0923* provides that a person engages in a deceptive trade practice if he or she knowingly fails to disclose a material fact in connection with the sale or lease of goods or services.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN38[] **Deceptive & Unfair Trade Practices, State Regulation**

Ark. Code Ann. § 4-88-107(a) defines the deceptive and unconscionable trade practices made unlawful and prohibited by this chapter. *N.M. Stat. Ann. § 57-12-2(E)* defines an unconscionable trade practice.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN39[] **Deceptive & Unfair Trade Practices, State Regulation**

Ark. Code Ann. § 4-88-107(a) does not limit itself to unconscionable acts. Allegations of false or deceptive acts suffice to state a claim.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN40[] **Deceptive & Unfair Trade Practices, State Regulation**

The definition of an "unconscionable trade practice" in N.M. Rev. Stat. 57-12-2(E) encompasses acts or practices that take advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree or that result in a gross disparity between the value received by a person and the price paid.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN41[] **Standing, Requirements**

Courts have applied the factors identified in the United States Supreme Court's AGC decision to determine whether a plaintiff's injuries are too remote from a defendant's alleged wrongdoing to permit a recovery under federal or state ***antitrust law***. The courts have engaged in a similar "remoteness" inquiry, either with or without specific reference to the AGC factors, in determining whether a plaintiff may pursue a claim under the consumer protection laws of Arkansas, New York, or Vermont.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN42[] **Deceptive & Unfair Trade Practices, State Regulation**

Under the Vermont Consumer Fraud Act (VCFA), *Vt. Stat. Ann. tit. 9, § 2451 et seq.*, only a "consumer" may bring a suit alleging a violation of this statute. *Vt. Stat. Ann. tit. 9, § 2461(b)*. The VCFA defines a "consumer" as a person who purchases, leases, contracts for, or otherwise agrees to pay consideration for goods or services not for resale in the ordinary course of his or her trade or business but for the use or benefit of his or her business or in connection with the operation of his or her business, *Vt. Stat. Ann. tit. 9, § 2451a(a)*, and Vermont law provides more generally that a statutory reference to a "person" encompasses corporations. *Vt. Stat. Ann. tit. 1, § 128*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN43[] **Deceptive & Unfair Trade Practices, State Regulation**

In Wilder, a plaintiff brought a claim under the Vermont Consumer Fraud Act (VCFA), *Vt. Stat. Ann. tit. 9, § 2451 et seq.*, based on the defendant insurer's alleged failure to make a payment as allegedly called for under a settlement agreement, but the Supreme Court of Vermont held that this claim was subject to dismissal on two grounds. First, the court reasoned that the selling of an insurance policy is not a contract for "goods or services" within the meaning of the VCFA. Next, the court observed that it was not dealing with a contractual situation between buyer and seller, but that the court instead was being asked to read into the VCFA a transaction one step removed from a transaction in which a buyer purchases goods or services. In the court's view, the VCFA deals solely with consumer transactions in which there is an actual sale of goods or services involving a buyer, a seller, and the goods or services, and it declined to stretch the Act's meaning as to evade the Legislature's intent.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN44[] **Private Actions, State Regulation**

Unjust enrichment may not supply a valid cause of action in states where the plaintiffs are otherwise barred from recovery under the relevant antitrust and consumer protection statutes. However, a plaintiff is permitted under *Fed. R. Civ. P. 8(a)(3)* to plead multiple theories of recovery in the alternative, and there is no requirement that each such theory must rest upon its own independent set of allegations.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN45[] **Purchasers, Indirect Purchasers**

A number of states have enacted so-called Illinois Brick repealer statutes that permit recovery by indirect purchasers under state ***antitrust law*** despite the prohibition against such a recovery under federal ***antitrust law***. In the absence of such a repealer statute, however, some courts have reasoned that an indirect purchaser plaintiff should not be permitted to recover under the equitable theory of unjust enrichment, as this would permit the plaintiff to circumvent the bar expressed through state law and policy against recovery by an indirect purchaser.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN46[] **Equitable Relief, Quantum Meruit**

The critical inquiry in evaluating the direct benefit element of a claim of unjust enrichment is not whether the benefit is conferred directly on the defendant, but whether the plaintiff can establish that the relationship between his detriment and the defendant's benefit flows from the challenged conduct of the defendant.

Opinion

[*808] **OPINION AND ORDER REGARDING DEFENDANTS' COLLECTIVE MOTION TO DISMISS SECOND AMENDED COMPLAINT**

I. INTRODUCTION

Plaintiffs GEICO Corporation and a number of affiliated entities (collectively "GEICO") brought this suit on September 2, 2016, asserting federal antitrust and state law claims against fourteen auto parts manufacturers and suppliers **[**3]** arising from alleged conspiracies among the Defendant manufacturers and suppliers to fix prices, rig bids, and allocate the markets for sixteen auto parts. GEICO was a putative member of the proposed liability and settlement classes in a number of the class action suits comprising *In re Automotive Parts Antitrust Litigation*, No. 12-md-02311. However, GEICO has elected to opt out of the settlement classes certified to date in this multidistrict litigation ("MDL"), and to instead pursue its own claims as, in effect, an indirect purchaser of certain of the auto parts involved in the MDL.

Before the Court is Defendants' collective motion to dismiss GEICO's second amended complaint. Among other grounds for dismissal, Defendants contend (i) that GEICO has alleged an implausible single conspiracy involving sixteen auto parts or, alternatively, has improperly joined sixteen separate conspiracies in a single suit, (ii) that GEICO lacks both Article III and antitrust standing, (iii) that GEICO's claims have been released by virtue of the settlements reached by GEICO's insureds, (iv) that GEICO's claims are barred by the relevant statutes of limitation, and (v) that GEICO's state law claims are **[**4]** subject to dismissal for a number of reasons.

On November 9, 2017, the Court heard oral argument on Defendants' motion.[1] For the reasons set forth below, Defendants' motion is **GRANTED IN PART and DENIED IN PART**, and Plaintiffs are granted leave to file amended pleadings in accordance with the Court's rulings.

II. FACTUAL AND PROCEDURAL BACKGROUND

Plaintiff GEICO offers several forms of insurance coverage, including automobile insurance. It brought this suit under federal ***antitrust law*** and the laws of a number of states, alleging that the fourteen Defendant auto part manufacturers and suppliers unlawfully conspired among themselves and with other non-party co-conspirators to fix prices, rig bids, and allocate the markets for sixteen auto parts: air flow meters, alternators, ATF warmers, automotive wire harness systems, electronic throttle bodies, fuel injection systems, high intensity discharge ("HID") ballasts, ignition coils, inverters, motor generators, occupant safety restraint systems, radiators, starters, steering angle sensors, switches, and valve timing control devices. The named Defendants include (i) Autoliv, Inc., and its subsidiaries, Autoliv ASP, Inc., Autoliv B.V. & Co. KG, **[**5]** Autoliv Safety Technology, Inc., and Autoliv Japan Ltd.; (ii) Hitachi Automotive Systems, Ltd. ("HIAMS"); (iii) Lear Corporation and an affiliated joint venture, Kyungshin-Lear Sales and Engineering, LLC; (iv) Panasonic Corporation and its subsidiary, Panasonic Corporation of North America; (v) T.RAD Co., Ltd. and its subsidiary, T.RAD North America; and (v) TRW Deutschland Holding GmbH and its affiliate, **[*809]** ZF TRW Automotive Holdings Corporation.

According to GEICO's complaint, each of the sixteen auto parts at issue is installed in new cars as part of the automotive manufacturing process. In particular, original equipment manufacturers ("OEMs") purchase these parts from automotive parts suppliers, including Defendants, by issuing requests for quotes ("RFQs") to the suppliers and selecting winning bidders. These supply arrangements typically last between four and six years. In addition,

---

[1] The Court also heard argument on a separate motion to dismiss brought by Defendants Lear Corporation and Kyungshin-Lear Sales & Engineering, LLC. This motion will be addressed in a separate opinion and order.

Defendants and other auto parts suppliers sell the auto parts at issue to automotive repair professionals, who install these parts in automobiles to replace worn out, defective, or damaged parts.

In 2010, authorities in the United States, the European Union, and Japan began investigating a suspected conspiracy **[**6]** among auto part manufacturers and suppliers to engage in anticompetitive cartel conduct. Over time, a number of manufacturing firms and executives have pleaded guilty to conspiracies to fix prices, rig bids, or allocate the market for specific auto parts. The firms that have pleaded guilty and paid criminal fines include five Defendants in this case: Autoliv, Inc., HIAMS, Panasonic Corporation, T.RAD Co. Ltd., and TRW Deutschland Holding GmbH. In addition, the guilty pleas that resulted from this antitrust investigation encompass each of the sixteen auto parts at issue here.

Beginning in 2011, civil antitrust suits were brought in federal district courts throughout the United States on behalf of various classes of plaintiffs who alleged that they were injured as a result of the auto part price-fixing conspiracies revealed in the above-cited government investigations. On February 7, 2012, the United States Judicial Panel on Multidistrict Litigation transferred these actions to the Eastern District of Michigan, and this Court subsequently entered a series of orders to coordinate and consolidate these suits in multidistrict litigation designated as *In re Automotive Parts Antitrust Litigation* ***[**7]*** , No. 12-md-02311. Generally speaking, this litigation has been organized into separate class actions for each of the dozens of auto parts that were the subject of alleged price-fixing conspiracies among the suppliers of these parts.

GEICO alleges that it was a putative member of the proposed classes in sixteen of these suits — *i.e.*, the class actions corresponding to the sixteen auto parts identified in the present complaint. In April of 2016, GEICO elected to opt out of the settlement classes certified in these class actions. Instead, it brought the present suit on September 2, 2016, asserting federal antitrust and state law claims similar to those being pursued in the ongoing multidistrict litigation. In support of these claims brought on its own behalf, GEICO alleges that it has been injured by Defendants' alleged conspiracies to fix the prices of the designated sixteen auto parts, by virtue of (i) its own purchase of these auto parts for use in a fleet of vehicles that it owns, and (ii) its reimbursement of insureds and third-party claimants for either (a) payments made to repair professionals involving the replacement of these auto parts, or (b) the full value of a vehicle that **[**8]** has been declared a total loss. Defendants now seek the dismissal of GEICO's federal and state law claims on a variety of grounds.

III. STANDARD OF REVIEW

In their present motion, Defendants ask the Court to dismiss GEICO's second amended complaint under *Fed. R. Civ. P. 12(b)(1)* for lack of subject matter jurisdiction, and under *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim upon which relief can be granted. ***HN1***[] In addressing Defendants' **[*810]** jurisdictional challenge under the first of these two *Rule 12* provisions, the Court "takes the allegations in the complaint as true," inquiring whether these allegations establish a basis for the exercise of subject matter jurisdiction. *Gentek Building Products, Inc. v. Steel Peel Litigation Trust, 491 F.3d 320, 330 (6th Cir. 2007)*. Yet, "conclusory allegations or legal conclusions masquerading as factual conclusions will not suffice" to withstand a properly supported *Rule 12(b)(1)* motion to dismiss. *O'Bryan v. Holy See*, *556 F.3d 361, 376 (6th Cir. 2009)* (internal quotation marks and citation omitted).

Similarly, ***HN2***[] when determining whether GEICO's claims are subject to dismissal under *Rule 12(b)(6)* for failure to state a claim, the Court must construe the complaint in a light most favorable to Plaintiff and accept all well-pleaded factual allegations as true. *League of United Latin American Citizens v. Bredesen, 500 F.3d 523, 527 (6th Cir. 2007)*. Again, however, "the tenet that a court must accept as true all of the allegations contained in **[**9]** a complaint is inapplicable to legal conclusions." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)*.

Moreover, ***HN3***[] "[w]hile a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (2007)* (internal quotation marks, alteration, and citations omitted). Rather, to withstand a motion to dismiss, the complaint's factual allegations, accepted as true, "must be enough to raise a right to relief above the speculative level," and to "state a claim to relief that is plausible on its face." *Twombly, 550 U.S. at 555, 570, 127 S. Ct. at 1965, 1974*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678, 129 S. Ct. at 1949*.

The Supreme Court has emphasized that this plausibility standard "is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Iqbal, 556 U.S. at 678, 129 S. Ct. at 1949*. "[W]here the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged — but it has not shown **[**10]** — that the pleader is entitled to relief." *Iqbal, 556 U.S. at 679, 129 S. Ct. at 1950* (internal quotation marks, alteration, and citation omitted). If a plaintiff does "not nudge[] [its] claims across the line from conceivable to plausible, [its] complaint must be dismissed." *Twombly, 550 U.S. at 570, 127 S. Ct. at 1974*.

IV. ANALYSIS

A. GEICO's Complaint Properly Pleads a Separate Conspiracy for Each of the Auto Parts Involved in This Case.

As the first of the several challenges advanced in their motion, Defendants argue that GEICO's complaint "posits farfetched allegations of an overarching, sixteen-part conspiracy involving all Defendants." (Dkt. 62, Defendants' Motion to Dismiss, Br. in Support at 3.) In Defendants' view, this claimed conspiracy encompassing all of the Defendant auto part suppliers is not plausible for two reasons: (i) all but two of these suppliers make completely different auto parts, and (ii) GEICO has failed to alleged specific facts in support of its conclusory assertion that "[e]ach Defendant acted **[*811]** as the principal of or agent for the other Defendants with respect to the acts, violations, and common course of conduct alleged" in the complaint, (Dkt. 53, Second Amended Complaint ("SAC") at ¶ 41).

In response, GEICO asserts that Defendants have "misconstrued **[**11]** [its] conspiracy allegations," and that its complaint is more properly read as "alleg[ing] sixteen separate conspiracies, each involving different Defendants, different parts and different price fixing arrangements." (Dkt. 65, Plaintiffs' Response Br. at 5-6.) GEICO further denies any intention to "allege that each Defendant acted as a principal or agent for [all of] the other Defendants" across all sales of the sixteen parts referenced in the complaint. Instead, it insists that the allegations in question link each Defendant only to those other Defendants or non-party co-conspirators who are involved in alleged price-fixing activities with respect to a particular part. (*Id.* at 6.) As discussed below, the Court agrees with GEICO that Defendants' suggested reading of the complaint is not tenable. In the Court's view, the complaint is properly construed as pleading sixteen separate part-specific conspiracies, with each Defendant auto part supplier facing liability only for the particular part-specific conspiracies in which it is alleged and found to have joined.

As Defendants observe, this Court has previously addressed (and rejected) an attempt by indirect purchaser plaintiffs ("IPPs") in the **[**12]** multidistrict litigation to combine multiple separate part-specific cases into a consolidated complaint alleging a single, overarching conspiracy to fix the prices of eighteen different auto parts. *See* *In re Automotive Parts Antitrust Litigation, No. 12-md-02311, 2016 U.S. Dist. LEXIS 193193, 2016 WL 8200512, at *3-*4 (E.D. Mich. April 13, 2016)*. In so ruling, the Court relied in part on the assessment of the U.S. Department of Justice ("DOJ"), following "six years of grand jury investigation," that the auto part suppliers that were the target of the DOJ's investigation "engaged in various and separate and independent conspiracies" that each involved a particular component part. *2016 U.S. Dist. LEXIS 193193, [WL] at *4*. The Court further noted the absence of allegations "of deals between makers of different component parts," of competition among the defendant part suppliers "for the sales of all eighteen parts," or of a given defendant's knowledge of the conduct and actions of other defendants regarding parts that it did not sell. *Id.*

As GEICO correctly explains, this Court's ruling in the multidistrict litigation is readily distinguishable, where the IPPs in that case sought to plead a "massive hub-and-spoke conspiracy" that is nowhere to be found in the present complaint. (Plaintiffs' Response Br. at **[**13]** 6.) Here, in contrast, at the very outset of the portion of the complaint captioned "Factual Allegations," GEICO refers to Defendants' "[c]onspiracies" to "fix prices, rig bids and allocate markets" for sixteen auto parts. (SAC at ¶ 44.) GEICO then proceeds to allege sixteen separate price-fixing conspiracies, one for each auto part identified in the complaint, and each involving a subset of one or more specific Defendants along with unnamed co-conspirators. (*See id.* at ¶¶ 45-125.) Immediately following these part-specific allegations, the complaint features a section captioned "Defendants and Their Co-Conspirators Entered into Multiple Auto Part Conspiracies," in which GEICO expressly alleges (i) that "Defendants and their co-conspirators entered into numerous Auto Parts conspiracies," and (ii) that according to a DOJ official, "there were more than a dozen separate [auto part] conspiracies each operating independently." (*Id. at ¶ 126*.) Finally, GEICO enumerates each such part-specific **[*812]** conspiracy, setting forth the time periods of these conspiracies and the particular Defendant suppliers involved in each. (*See id.* at ¶¶ 126(a)-(p).) Against this backdrop, Defendants cannot succeed **[**14]** in their argument that GEICO seeks to hold them jointly and severally liable for an overarching conspiracy to fix the prices of sixteen auto parts.

To be sure, Defendants contend in their reply brief that GEICO's complaint lacks detailed allegations as to "specific meetings or instances of collusive conduct" through which the Defendant suppliers carried out the part-specific conspiracies in which they allegedly participated. (Dkt. 67, Defendants' Reply Br. at 2.) Similarly, Defendants observe that GEICO identifies only one or, occasionally, two specific Defendants as participants in each conspiracy, "leaving both Defendants and the Court to guess . . . in which of the sixteen component part conspiracies any Defendant allegedly participated." (*Id.*) Yet, because Defendants raise these attacks on the sufficiency of GEICO's allegations of conspiracy for the first time in their reply brief, the Court elects not to consider them. *See Sundberg v. Keller Ladder, 189 F. Supp.2d 671, 682-83 (E.D. Mich. 2002)* (declining to address an argument raised for the first time in a reply brief). In any event, the Court has previously rejected similar challenges to the sufficiency of the plaintiffs' allegations of a price-fixing conspiracy in its rulings in the multidistrict **[**15]** litigation, *see, e.g., In re Automotive Parts Antitrust Litigation (In re Fuel Senders), 29 F. Supp.3d 982, 995-96 (E.D. Mich. 2014)("Fuel Senders")* ; *In re Automotive Parts Antitrust Litigation (In re Instrument Panel Clusters), 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *5-*6 (E.D. Mich. July 3, 2014)* ("*Instrument Panel Clusters")*, and there is no basis for departing from these rulings here. Accordingly, GEICO's allegations of separate part-specific conspiracies are sufficient to withstand scrutiny under *Rule 12(b)(6)*.

B. Although GEICO Has Improperly Joined Its Sixteen Part-Specific Conspiracy Claims in a Single Suit, This Misjoinder Does Not Warrant the Dismissal of This Action in Its Entirety.

Even if — as the Court has now ruled — GEICO's complaint is construed as alleging sixteen separate part-specific conspiracies, Defendants argue that the complaint nonetheless runs afoul of *Fed. R. Civ. P. 20(a)(2)* by joining multiple claims and defendants in a single action despite the absence of common transactions or occurrences. Although there is some degree of overlap in the Defendant suppliers involved in the sixteen alleged conspiracies, Defendants contend that this alone does not suffice to permit joinder, where the facts and evidence needed to prove each conspiracy will be unique to a given part, the market for the part, and the specific suppliers of the part. Defendants further assert that joinder would unfairly prejudice those suppliers that are involved in only one or a few **[**16]** of the sixteen alleged conspiracies. As discussed below, the Court agrees that these sixteen alleged conspiracies may not be joined in a single suit, but finds that the remedy sought by Defendants — *i.e.*, the dismissal of GEICO's complaint in its entirety — is inappropriate and would not serve the interests of the parties or of judicial economy. Rather, the Court directs GEICO to commence a separate suit for each of the alleged part-specific conspiracies. The parties are further instructed to negotiate the terms of a proposed order to facilitate the efficient management and coordination of these several part-specific actions.

HN4[] Under *Fed. R. Civ. P. 20(a)(2)*, parties "may be joined in one action as **[*813]** defendants if," as relevant here: (i) the claims against them "aris[e] out of the same transaction, occurrence, or series of transactions or occurrences," and (ii) "any question of law or fact common to all defendants will arise in the action." The standards for permissive joinder under this Rule are "liberally construed," in order to "promote trial convenience and expedite the final determination of disputes" by avoiding multiple lawsuits where possible. *Patrick Collins, Inc. v. John Does 1-21, 282 F.R.D. 161, 166 (E.D. Mich.)* (internal quotation **[**17]** marks and citations omitted), *adopted at 286 F.R.D. 319 (E.D. Mich. 2012)*. In this manner, permissive joinder serves the larger objective under the Federal Rules of "entertaining the broadest possible scope of action consistent with fairness to the parties." *Patrick Collins, 282 F.R.D. at 166* (internal quotation marks and citation omitted). "The permissive joinder of defendants is also encouraged for purposes of judicial efficiency." *282 F.R.D. at 166*.

HN5[] To warrant the joinder of its sixteen part-specific conspiracy claims in a single suit, GEICO must show that these claims (i) "aris[e] out of the same transaction, occurrence, or series of transactions or occurrences," and (ii) involve a "question of law or fact common to all defendants." *Fed. R. Civ. P. 20(a)(2)(A)-(B)*. GEICO states without contradiction that the conspiracies alleged in its complaint implicate common questions of fact and law, including (i) whether GEICO's reimbursement of its insureds for auto parts qualifies as antitrust injury, and (ii) whether evidence of the business practices of a particular Defendant auto part supplier shows that this supplier participated in more than one of the alleged conspiracies. Thus, the dispositive issue presented by Defendants' claim of misjoinder is whether the part-specific conspiracies alleged **[**18]** by GEICO arise out of the "same transaction, occurrence, or series of transactions or occurrences."

HN6[] In addressing this question, the courts have inquired whether "there is a logical relationship between the separate causes of action" that the plaintiff seeks to join in a single case. *In re EMC Corp., 677 F.3d 1351, 1358 (Fed. Cir. 2012)*; *see also Mosley v. General Motors Corp., 497 F.2d 1330, 1333 (8th Cir. 1974)*; *Stojcevski v. County of Macomb, 143 F. Supp.3d 675, 682-83 (E.D. Mich. 2015)*. "The logical relationship test is satisfied if there is substantial evidentiary overlap in the facts giving rise to the cause of action against each defendant." *EMC Corp., 677 F.3d at 1358*. "Stated differently, the plaintiffs' claims must share an aggregate of operative facts." *Stojcevski, 143 F. Supp.3d at 683* (internal quotation marks, citations, and emphasis omitted). This is a flexible and case-specific standard, and "the mere fact that a case involves independent actors as defendants does not necessarily bring the case outside the scope of *Rule 20*." *EMC Corp., 677 F.3d at 1357-58*.

Applying this standard here, the part-specific conspiracies alleged by GEICO lack a sufficient logical relationship or evidentiary overlap to permit joinder under *Rule 20(a)(2)*. To establish a given part-specific conspiracy, GEICO must show that the particular Defendant suppliers involved in this conspiracy entered into an agreement to fix prices, rig bids, or otherwise manipulate the market for a specific auto part. **[**19]** As Defendants observe, the evidence needed to make this showing will be largely unique to the limited subset of Defendants suppliers involved in the market for the component part at issue and the characteristics of this particular market. In contrast, the remaining Defendants joined in GEICO's suit will have little or no involvement in or relationship to the **[*814]** operative facts for this conspiracy. *See Michaels Building Co. v. Ameritrust Co., N.A., 848 F.3d 674, 682 (6th Cir. 1988)* (affirming the district court's finding of improper joinder of a defendant lender, where the various loan transactions giving rise to the plaintiffs' claims "involve[d] different banks, different contracts and different terms"). Even as to those Defendant suppliers that are involved in more than one of the alleged conspiracies, the facts that establish a supplier's participation in one such conspiracy — *e.g.*, evidence of meetings, discussions, or other opportunities to collude in the setting of prices or allocation of the market — are likely to be largely if not entirely distinct from the facts that demonstrate this supplier's involvement in another part-specific conspiracy. In addition, Defendants point to the prejudice and additional expense faced by suppliers that are involved in only **[**20]** one or two of the sixteen alleged conspiracies but nonetheless must participate in large-scale discovery efforts and other pretrial proceedings encompassing all of these alleged conspiracies.

Although the Court has not addressed precisely this issue in the multidistrict litigation, it has cited similar considerations in denying a request by IPPs to consolidate eighteen separate part-specific cases into a single suit. In so ruling, the Court explained:

> [A]lthough the alleged conduct by Defendants follows a similar pattern, the facts are not the same. [In addition], the existence of different Defendants weighs against consolidation. Even though the [part-specific cases] involve overlapping parties, there are twenty-two different Defendant Groups, six Settling Defendant Groups, and eighteen different product markets. Consolidation would be unfairly prejudicial to the eighteen Defendants

> who are parties in only one or two of the eighteen [part-specific cases] and to those Defendants that have never pleaded guilty.

In re Automotive Parts Antitrust Litigation, 2016 U.S. Dist. LEXIS 193193, 2016 WL 8200512, at *2. Accordingly, the Court concluded that "rather than simplify[ing] this already complex litigation, consolidation will serve only to confuse the legal claims/defenses of the parties **[**21]** and delay a definite outcome for the parties," and thus "would not serve judicial economy or the convenience of the court and of the parties." *Id.* These same factors are present here, and militate against GEICO's joinder of sixteen separate part-specific conspiracies in a single suit.

It remains to determine the proper remedy for GEICO's misjoinder. As Defendants recognize, ***HN7***[] "[m]isjoinder of parties is not a ground for dismissing an action." Fed. R. Civ. P. 21; *see also* Letherer v. Alger Group, L.L.C., 328 F.3d 262, 267 (6th Cir. 2003), *overruled on other grounds as recognized in* Blackburn v. Oaktree Capital Management, LLC, 511 F.3d 633, 636 (6th Cir. 2008). Nonetheless, the Court has wide latitude in fashioning appropriate relief, including "add[ing] or drop[ping] a party" or "sever[ing] any claim against a party." Fed. R. Civ. P. 21; *see also* Letherer, 328 F.3d at 267.

In Defendants' view, the proper remedy here would be to dismiss this suit and require GEICO to file separate part-specific actions. (*See* Defendants' Motion, Br. in Support at 6 n.4.) Yet, to the extent that this would inconvenience the parties or fail to serve judicial economy, the Court has recognized its "expansive" authority to implement procedures that will assist in coordinating and administering GEICO's several part-specific suits. In re Automotive Parts Antitrust Litigation, 2016 U.S. Dist. LEXIS 193193, 2016 WL 8200512, at *2; *see also* ***HN8***[] Fed. R. Civ. P. 42(a) (authorizing the Court to "join for hearing or trial any or all matters **[**22]** at issue **[*815]** in the actions" and to "issue any other orders to avoid unnecessary cost or delay"). Accordingly, though the Court agrees with Defendants that the eighteen part-specific conspiracies alleged by GEICO are not properly joined in a single suit, it elects to address this misjoinder by (i) directing GEICO to sever each of its part-specific conspiracy claims into a separate suit, and (ii) instructing the parties to negotiate the terms of a proposed order to facilitate the efficient management and coordination of the sixteen part-specific actions filed by GEICO in accordance with the Court's ruling.

C. Although GEICO Has Failed in Certain Respects to Sufficiently Plead the Elements of Article III Standing for Each of the Federal and State Law Claims Asserted in Its Complaint, It Will Be Granted Leave to Address These Deficiencies in Amended Pleadings.

Defendants next mount three separate challenges to GEICO's Article III standing to pursue the federal and state law claims asserted in its complaint. First, although GEICO claims that the payments it made in its role as insurer were adversely affected by Defendants' alleged price-fixing schemes, Defendants observe that some of these payments did not entail the purchase of auto parts from any of the Defendant suppliers, and they argue that GEICO lacks "standing to sue for alleged overcharges on [a]uto [p]arts that were never purchased." (Defendants' Motion, Br. in Support at 7.) Next, Defendants **[**23]** maintain that GEICO lacks standing to sue under "the laws of any of the thirty-two states and the District of Columbia under which it seeks to recover," where it fails to allege in its complaint that it made any excessive payments for relevant auto parts "in any particular state." (*Id.* at 8.) Finally, Defendants contend that the allegations of GEICO's complaint fail to forge the requisite causal link between Defendants' alleged overcharges for auto parts and increased payments made by GEICO under its contracts with its insureds. The Court addresses each of these challenges in turn, after first summarizing the law governing Article III standing.

HN9[] To demonstrate Article III standing, a plaintiff must first allege that it has suffered an "injury in fact" — that is, "an invasion of a legally protected interest which is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical." Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 2136, 119 L. Ed. 2d 351 (1992) (internal quotation marks and citations omitted). Second, the alleged injury must be "fairly traceable to the challenged action of the defendant, and not the result of the independent action of some third party not before the court." Lujan, 504 U.S. at 560, 112 S. Ct. at 2136 (internal quotation marks, alterations, and citation **[**24]** omitted). Third, the plaintiff must allege that a favorable federal court decision is likely to redress the alleged injury. *504 U.S. at 561, 112 S. Ct. at 2136*.

As the "party invoking federal jurisdiction," GEICO "bears the burden of establishing these elements." *504 U.S. at 561, 112 S. Ct. at 2136*. Because Article III standing is "not [a] mere pleading requirement[] but rather an indispensable part of the plaintiff's case," each element of this standard "must be supported in the same way as any other matter on which the plaintiff bears the burden of proof, *i.e.*, with the manner and degree of evidence required at the successive stages of the litigation." *504 U.S. at 561, 112 S. Ct. at 2136*. At the present pleading stage of this case, "general factual allegations of injury resulting from the defendant's conduct **[*816]** may suffice, for on a motion to dismiss we presume that general allegations embrace those specific facts that are necessary to support the claim." *504 U.S. at 561, 112 S. Ct. at 2137* (internal quotation marks, alteration, and citation omitted).

1. GEICO Has Sufficiently Pleaded Injury in Fact, Even as to Those Transactions That Do Not Necessarily Involve the Purchase of a Relevant Auto Part.

As their first challenge to GEICO's allegations of Article III standing, Defendants argue that GEICO cannot establish the "injury in fact" element **[**25]** of standing with respect to alleged transactions that did not entail the purchase of any of the auto parts at issue in this case. Specifically, Defendants take issue with GEICO's assertion that it was injured each time it made a payment to an insured or third-party claimant as reimbursement for the cost of vehicle repairs. (*See, e.g.*, SAC at ¶ 49.) Defendants observe that the recipient of such a payment might elect not to repair his vehicle and instead "simply pocket the claim payment." (Defendants' Motion, Br. in Support at 7.) Similarly, Defendants point out that when GEICO reimburses an insured or third-party claimant for the value of a vehicle that is declared a total loss, (*see, e.g.*, SAC at ¶ 49), this payment almost certainly does not lead to the purchase of any of the auto parts at issue here. In such cases where "there is no sale of an [a]uto [p]art at all" flowing from GEICO's payment to an insured or third-party claimant, Defendants contend that "GEICO simply does not have standing to sue for alleged overcharges on Auto Parts that were never purchased." (Defendants' Motion, Br. in Support at 7.)

In response, GEICO first observes that the claims asserted in its complaint do **[**26]** not rest solely on reimbursement payments to insureds or third-party claimants. Rather, the complaint also alleges (i) that GEICO itself purchased the auto parts at issue, (*see, e.g.*, SAC at ¶¶ 17-25, 49),[2] and (ii) that GEICO "directly paid repair professionals" for auto parts "after the repair professional[s] repaired [the] insureds' or claimants' vehicles," (*see, e.g., id.* at ¶ 49). Because auto parts were purchased in these transactions, GEICO has adequately pleaded the "injury in fact" element of Article III standing through its allegations of injury flowing from the *supra*-competitive prices charged by Defendants for these parts. (*See id.* at ¶¶ 8, 164-65.)

Admittedly, although Defendants do not squarely raise this issue in their motion, ***HN10***[] the Supreme Court has cautioned that "standing is not dispensed in gross," and that a plaintiff instead "must demonstrate standing for each claim he seeks to press and for each form of relief that is sought." *Davis v. Federal Election Commission,* ***[*817]*** *554 U.S. 724, 734, 128 S. Ct. 2759, 2769, 171 L. Ed. 2d 737 (2008)* (internal quotation marks, alteration, and citations omitted). The question then becomes whether GEICO's direct purchases of auto parts and its reimbursement payments to insureds and third-party claimants give rise to discrete "claims" for **[**27]** which GEICO must separately establish its Article III standing, or whether GEICO's direct purchases and reimbursement

[2] In its brief in opposition to Defendants' motion, GEICO indicates that it made at least some of these direct purchases in its capacity as the owner of "thousands of vehicles (provided for use by its adjusters and other employees) as part of its fleet program." (Plaintiffs' Response Br. at 4.) As Defendants observe, however, these alleged purchases as a fleet owner are not expressly identified as such in the complaint, and a plaintiff ordinarily may not "amend [its] complaint through a response brief." *Jocham v. Tuscola County, 239 F. Supp.2d 714, 732 (E.D. Mich. 2003)*. Nonetheless, given that GEICO has been directed to file a separate suit for each of the eighteen part-specific conspiracies identified in its present complaint, the Court will allow GEICO to address this pleading deficiency when it commences these separate actions, particularly where it already has alleged that it made direct purchases of relevant auto parts, and simply did not identify the fleet-owner context in which some of these purchases were made.

payments are more properly characterized as separate items of damages that GEICO may or may not be entitled to recover upon establishing its overarching claim of a price-fixing conspiracy.

The parties' briefs have little to offer on this subject. Defendants cite a number of cases for the proposition that a plaintiff's purchase of a particular item does not confer standing to bring claims involving different, albeit similar, items that the plaintiff did not purchase. *See, e.g., Dapeer v. Neutrogena Corp., 95 F. Supp.3d 1366, 1373 (S.D. Fla. 2015)* (holding that the named plaintiff in a putative class action "lack[ed] Article III standing to bring claims on behalf of the Neutrogena [sunscreen] products he did not purchase"); *Ferrari v. Best Buy Co., No. 14-2956, 2015 U.S. Dist. LEXIS 61706, 2015 WL 2242128, at *9 (D. Minn. May 12, 2015)* (concluding that the named plaintiff "lack[ed] standing to assert claims on behalf of the class for televisions that he did not purchase or advertising that he did not see or rely upon"); *Granfield v. NVIDIA Corp., No. 11-05403, 2012 U.S. Dist. LEXIS 98678, 2012 WL 2847575, at *6 (N.D. Cal. July 11, 2012)* ("[W]hen a plaintiff asserts claims based both on products that she purchased and products that she did not purchase, claims relating to products not purchased must be dismissed for lack of standing."). Yet, these cases are wholly **[**28]** inapposite here, given GEICO's express allegations that it directly purchased and/or made reimbursement payments involving each of the relevant auto parts at issue. (*See SAC* at ¶¶ 17-25, 49, 54, 59, 64, 69, 74, 79, 84, 89, 94, 99, 105, 110, 115, 120, 125.) The decisions cited by Defendants, in contrast, involve efforts by plaintiffs to derive Article III standing from the purchases of putative class members or third parties who are not yet (and may never be) parties to the suit. These cases therefore have nothing whatsoever to say about the salient issue here — namely, whether GEICO's own direct purchases and various types of reimbursement payments are properly viewed as giving rise to separate claims that necessitate their own distinct showings of Article III standing.

GEICO's discussion on this point is similarly unhelpful. GEICO first states, as a matter of *ipse dixit* and without citation to authority, that apart from its direct purchases, it "has standing simply as an insurance company." (Plaintiffs' Response Br. at 10.) GEICO further contends that Defendants' allegedly anticompetitive conduct "illegally inflated the prices GEICO pays, whether GEICO pays for [a]uto [p]arts for its **[**29]** cars, pays repair shops directly or pays the insured or claimants." (*Id.*) Unfortunately, GEICO fails to tie these assertions in its response brief to specific allegations in its complaint, and the Court's own review of this pleading has uncovered only scant and largely conclusory support for the proposition that Defendants' allegedly anticompetitive conduct has inflicted injury on GEICO in the form of higher reimbursement payments to insureds or third-party claimants, even in instances when these insurance transactions did not entail the purchase of relevant auto parts. (*See, e.g.*, SAC at ¶¶ 164-68, 170, 193.)

Although the question is a close one, the Court finds that GEICO's allegations, albeit somewhat threadbare, are sufficient to establish the injury-in-fact element of Article III standing for each of the claims GEICO has asserted, whether as a direct **[*818]** purchaser or as an insurer reimbursing its insureds or third-party claimants. As explained, GEICO has affirmatively alleged that it sustained injuries in both capacities. On the other hand, its complaint admittedly lacks supporting detail as to precisely how Defendants' alleged price-fixing activities might have led to higher reimbursement **[**30]** payments for insurance claims that did not entail the purchase of relevant auto parts. Yet, this Court has observed in a similar context that such an "elongated . . . chain" of allegations linking price-fixing activities to increased payments poses "difficulties of proof, not pleading deficiencies." *Fuel Senders, 29 F. Supp.3d at 998*. "At this stage of the proceedings," where GEICO's claims are evaluated on the pleadings alone, GEICO need not allege precisely "how [it] intend[s] to establish" each of its theories of damages. *29 F. Supp.3d at 998*. Moreover, GEICO is not altogether relieved of the obligation to put forward allegations linking Defendants' allegedly anticompetitive activities to resulting injury: as discussed below, GEICO must overcome similar obstacles to satisfy the "fairly traceable" element of Article III standing and the requirement of antitrust standing.

2. GEICO Has Not Adequately Alleged Its Standing to Pursue Claims Under the Laws of Each of the States Referenced in Its Complaint, But It Will Be Granted Leave to Rectify This Pleading Deficiency.

Defendants' next Article III challenge is directed at GEICO's assertion of claims under the laws of thirty-two states and the District of Columbia. In Defendants' view, GEICO **[**31]** lacks standing to sue under the law of a given state in the absence of allegations that it made a payment, and hence suffered an injury, in that specific state. Because GEICO "does not allege any [p]ayments in any particular state," Defendants contend that its "conclusory assertions that it paid for something somewhere do[] not give it the right to sue under the laws of the thirty-three jurisdictions cited in the Complaint." (Defendants' Motion, Br. in Support at 8.)

In response, GEICO first suggests that it has, in fact, alleged that it suffered an actual injury in each of the states listed in the complaint. Citing Michigan as an example, GEICO points to its allegations that Defendants' conspiratorial activities (i) produced "artificially high" prices for the relevant auto parts and "eliminated price competition" for these parts "throughout Michigan," (ii) "deprived GEICO and its insureds and claimants of free and open competition" in the markets for these auto parts, and (iii) "resulted in GEICO paying supra-competitive, artificially high prices" for these auto parts. (SAC at ¶ 211(a).) GEICO further alleges that "Defendants' illegal conduct substantially affected commerce in Michigan," **[**32]** and that GEICO "has been injured in its business and property" as a "direct and proximate result" of this unlawful conduct. (*Id.* at ¶¶ 211(b)-(c).) GEICO makes essentially the same allegations for each of the other thirty-one states and the District of Columbia. As Defendants correctly observe, however, these allegations fall short of a direct assertion that GEICO actually purchased an auto part or made a reimbursement payment in Michigan or any other particular state.

Nonetheless, GEICO insists that it is reasonable to assume that it has made a purchase or reimbursement payment in each of the relevant states, where it is "the second largest automobile insurer in the United States" and "issu[es] insurance policies and adjust[s] claims in all 50 states and the District of Columbia." (Plaintiffs' Response Br. at 12.) Indeed, GEICO flatly states in its response brief that it has **[*819]** "conducted business, purchased parts and made payments for parts in every state and the District of Columbia." (*Id.*) Yet, these supposed facts about the nature and extent of GEICO's auto part purchases and insurance business are nowhere to be found in the complaint, and Defendants aptly cite the principle that **[**33]** ***HN11***[] "[s]tanding cannot be inferred" but instead "must affirmatively appear in the record." *Delaware Valley Toxics Coalition v. Kurz-Hastings, Inc., 813 F. Supp. 1132, 1139 (E.D. Pa. 1993)*. As confident as GEICO might be that it will ultimately be able to produce evidence of a purchase or payment in each of the relevant states that was adversely impacted by Defendants' allegedly anticompetitive activities, Defendants quite rightly insist that GEICO still must plead this "injury in fact" element of its Article III standing in order to pursue claims under the laws of each of the jurisdictions identified in its complaint.

To be sure, Defendants acknowledge this Court's holding in the multidistrict litigation that ***HN12***[] it may be appropriate to defer a standing inquiry until the plaintiff has an opportunity to engage in discovery that could uncover evidence of relevant transactions and resulting injury in each of the pertinent jurisdictions. *See, e.g., Fuel Senders, 29 F. Supp.3d at 1000*. Yet, Defendants correctly observe that the courts typically adopt this approach in class actions, where the named plaintiffs generally lack information about transactions engaged in by members of the putative plaintiff class. Here, in contrast, GEICO's claims rest solely upon transactions in which this insurer itself participated. Thus, there **[**34]** is no justification in this case for a wait-and-see approach to the requirement that a plaintiff must plead each of the elements of Article III standing.

Nonetheless, even though GEICO's present pleading falls short of this standard, this is not the end of the matter. The Court has previously determined that GEICO should be granted leave to bring a separate suit for each of the part-specific conspiracies alleged in its complaint, and to address other pleading deficiencies in its existing complaint. Accordingly, GEICO may avail itself of this opportunity to ensure that it has properly alleged injuries sustained in each of the jurisdictions identified in its complaint.

3. GEICO Has Sufficiently Alleged That Its Alleged Injuries Are Fairly Traceable to Defendants' Allegedly Anticompetitive Conduct.

As their final challenge to GEICO's Article III standing, Defendants argue that GEICO has failed to plead the requisite causal connection between Defendants' alleged price-fixing conspiracies and resulting injury to GEICO. It bears emphasis, as a threshold matter, that this is not an across-the-board challenge. Most notably, in transactions in which GEICO itself allegedly purchased the auto parts at issue, Defendants **[**35]** concede that such allegations, taken as true, suffice to establish a causal connection between Defendants' alleged price-fixing activities and GEICO's payment of allegedly supra-competitive prices for these parts.

Moreover, in its capacity as owner of a fleet of vehicles, GEICO is similarly situated to the End-Payor Plaintiffs ("EPPs") in the multidistrict litigation. As GEICO observes, ***HN13***[] this Court has rejected challenges to the Article III standing of EPPs. *See, e.g., Fuel Senders, 29 F. Supp.3d at 997-99*; *Instrument Panel Clusters, 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *7-*8*; *In re Automotive Parts Antitrust Litigation (In re Wire Harness Cases), 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *8-*9 (E.D. Mich. June 6, 2013)* ("*Wire Harnesses")*. In one of these decision, the Court explained that the defendant part suppliers had "cited no authority requiring an indirect purchaser to allege the detailed mechanics of the pass-through process to plead injury-in-fact **[*820]** and causation for purposes of constitutional standing to survive a *Rule 12(b)(6)* motion." *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *8*. GEICO's theory of causation, in its role as the owner of a fleet of vehicles, is fully consonant with this Court's rulings on Article III standing in the multidistrict litigation, and there is no basis for a different outcome here.[3]

Nonetheless, Defendants contend that GEICO has insufficiently pleaded the "fairly traceable" element of Article III standing in those instances "where no one — much less GEICO **[**36]** — purchased an Auto Part." (Defendants' Reply Br. at 5.) Specifically, Defendants cite the examples of claim payments (i) to insureds or third-party claimants who do not actually purchase replacement auto parts but instead pocket the payments, and (ii) made when vehicles are determined to be a total loss. As Defendants recognize, this Court has not demanded detailed allegations regarding the mechanisms by which supra-competitive auto part prices are passed through to end purchasers of vehicles. Yet, GEICO must establish a more elaborate pass-through mechanism here, under which the same allegedly anticompetitive activities that inflate the prices of new vehicles somehow result in higher claim payments for damaged or totaled vehicles. In addition, GEICO potentially has the opportunity to offset these higher claim payments through such means as increased insurance premiums. In Defendants' view, GEICO's complaint fails to address these complexities in the causal relationship between an alleged price-fixing conspiracy and resulting injury to GEICO as an insurer making claim payments. Defendants further note that GEICO's claims of injury arising from reimbursement payments for totaled vehicles **[**37]** pose a risk of double recovery, given that the original purchasers of the vehicles already have an opportunity to recover from the Defendant auto part suppliers in the multidistrict litigation for the increased cost of their vehicles due to Defendants' alleged price-fixing conspiracies.

These concerns are legitimate, and lead back to the question noted earlier: namely, whether GEICO's efforts to recover for direct part purchases, vehicle purchases as a fleet owner, and reimbursement payments as an insurer all constitute separate claims for which GEICO must establish its Article III standing, or instead reflect separate types of damages that GEICO seeks to recover through its overarching claims that Defendants engaged in price-fixing conspiracies. At a minimum, GEICO has pleaded the causal element of Article III standing as to at least some of its theories of recovery, and Defendants, as the moving parties, have not explained why more should be required at this juncture. Moreover, Defendants' challenge to GEICO's allegations of antitrust injury implicates similar issues of causation, and the Court finds that these questions are better addressed in that context. Accordingly, the Court **[**38]** concludes that GEICO has adequately alleged that its injuries are fairly traceable to Defendants' allegedly anticompetitive activities.

D. GEICO Has Adequately Alleged Its Standing Under *Antitrust Law* to Seek Redress As a Fleet Owner and a Direct Purchaser of Defendants' Auto Parts, But Not As an Insurer.

Apart from adequately pleading the elements of Article III standing, GEICO also **[*821]** must establish antitrust standing — *i.e.*, that it is appropriately situated to obtain relief under federal and state ***antitrust law***. Citing the multi-factor test adopted by the Supreme Court for determining whether a plaintiff has antitrust standing, *see*

[3] As noted earlier, to the extent that the allegations of GEICO's present complaint do not clearly set forth a theory of recovery based on GEICO's status as the owner of a fleet of vehicles, GEICO will have an opportunity to address this deficiency in the pleadings it files in response to the Court's rulings in this opinion and order.

Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 545, 103 S. Ct. 897, 912, 74 L. Ed. 2d 723 (1983) (*"AGC"*), Defendants argue that GEICO's antitrust claims are subject to dismissal because this insurer's alleged injuries are too remote from the alleged price-fixing schemes carried out by the Defendant auto part suppliers.

In response, GEICO first maintains that Defendants' challenge to its antitrust standing is foreclosed by this Court's rulings in the multidistrict litigation. To the extent that GEICO owns a fleet of vehicles and has reimbursed repair shops for their purchases of auto parts installed in the vehicles of GEICO's insureds and third-party **[**39]** claimants, GEICO argues that it is similarly situated to the EPPs in the multidistrict litigation that have withstood challenges to their antitrust standing. Moreover, GEICO points to its allegations of direct auto part purchases as demonstrating its antitrust standing. Finally, to the extent that GEICO participates in the insurance market, as opposed to the market for auto parts, it contends that these two markets are sufficiently intertwined to support a finding of antitrust standing with respect to GEICO's alleged injuries arising from its payment of insurance claims. As discussed below, the Court finds that GEICO has sufficiently pleaded its antitrust standing to pursue claims in its roles as fleet owner and direct purchaser of auto parts, but not in its capacity as an insurer making claim payments to its insureds or third-party claimants.

HN14[] The Sixth Circuit has emphasized that "antitrust standing and Article III standing are not one and the same," and that a claim is subject to dismissal under *Rule 12(b)(6)* when the former is lacking. *NicSand, Inc. v. 3M Co., 507 F.3d 442, 449 (6th Cir. 2007)*. To establish the requisite antitrust standing, a plaintiff cannot rely solely upon "allegations of consequential harm resulting from a violation **[**40]** of the antitrust laws," because "Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property." *AGC, 459 U.S. at 535, 545, 103 S. Ct. at 907, 912* (internal quotation marks and citation omitted). Rather, even when a plaintiff alleges an antitrust violation and resulting harm, his claim may not go forward if "[o]ther relevant factors — the nature of the [plaintiff's] injury, the tenuous and speculative character of the relationship between the alleged antitrust violation and the [plaintiff's] alleged injury, the potential for duplicative recovery or complex apportionment of damages, and the existence of more direct victims of the alleged conspiracy — weigh heavily against judicial enforcement of the [plaintiff's] antitrust claim." *AGC, 459 U.S. at 545, 103 S. Ct. at 912*.

HN15[] "[A]ntitrust standing is a threshold, pleading-stage inquiry[,] and when a complaint by its terms fails to establish this requirement[,] [the court] must dismiss it as a matter of law." *NicSand, 507 F.3d at 450*. Yet, the *AGC* factors "are to be balanced," and "no single factor is conclusive." *Bodie-Rickett & Associates v. Mars, Inc., 957 F.2d 287, 290 (6th Cir. 1992)*; *see also Fuel Senders, 29 F. Supp.3d at 1001*. Although *AGC* by its terms applies only to claims under federal ***antitrust law***, Defendants state without **[**41]** contradiction that the same or similar principles of antitrust standing govern the state law antitrust claims asserted in GEICO's **[*822]** complaint. *See Fuel Senders, 29 F. Supp.3d at 1002* (recognizing that the jurisdictions under which the plaintiffs in that case brought state law antitrust claims "either apply the *AGC* factors, look to federal law to interpret their state statutes, or apply a similar remoteness analysis to state antitrust claims").

In determining whether GEICO has antitrust standing, the Court must distinguish among the types of injuries alleged in GEICO's complaint and elsewhere in the record. First, GEICO alleges that it has directly purchased relevant auto parts, (*see, e.g.*, SAC at ¶¶ 17-25, 165), although the complaint does not provide any details as to the circumstances in which these purchases have occurred. Next, GEICO states — albeit in its response to Defendants' motion, and not in its complaint — that it is an indirect purchaser of relevant auto parts by virtue of its ownership of a fleet of vehicles. Finally, GEICO identifies three types of payments it has made in its role as an insurer: (i) payments to auto repair professionals on behalf of insureds and third-party claimants for replacement auto **[**42]** parts installed by the repair shop (referred to by Defendants as "Repair Payments"); (ii) reimbursement payments to insureds or third-party claimants to settle automotive damage or repair claims that potentially involved the purchase and installation of replacement auto parts ("Reimbursement Payments"); and (iii) payments to insureds or third-party claimants for the full value of vehicles declared a total loss ("Total Loss Payments"). (*See, e.g.*, SAC at ¶ 49.)

Turning first to the injuries allegedly suffered by GEICO that did not arise from the payment of insurance claims, it is clear that GEICO has standing to pursue antitrust claims arising from these injuries. To the extent that GEICO itself has purchased relevant auto parts at supra-competitive prices, this direct link between Defendants' alleged antitrust violations and resulting harm to GEICO obviates the need for consideration of the *AGC* factors. *See, e.g., In re Cardizem CD Antitrust Litigation, 332 F.3d 896, 911 (6th Cir. 2003)* (holding that ***HN16***[] the alleged injury of "paying higher prices for a product due to a lack of competition in the market" is sufficient to establish antitrust standing). As for the injuries allegedly sustained by GEICO as the owner of a fleet of vehicles, GEICO contends that this **[**43]** alleged harm is precisely the same as the injury claimed by the EPPs in the multidistrict litigation, who likewise are indirect purchasers of auto parts that were installed either (i) in new vehicles purchased by the EPPs, or (ii) in the process of repairing damaged vehicles owned by the EPPs. *See, e.g., Fuel Senders, 29 F. Supp.3d at 992-93*. As GEICO observes, this Court has held in the multidistrict litigation that EPPs satisfy the *AGC* standard for antitrust standing, *see, e.g., Fuel Senders, 29 F. Supp.3d at 1001-03*; *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *14-*18*, and Defendants fail to suggest why the outcome should be different here.

Matters are more complicated, however, when considering the injuries allegedly sustained by GEICO in its role as auto insurer. In particular, the *AGC* factors must be separately analyzed for each type of payment GEICO has made in this capacity. The Court addresses in turn each of the forms of payment made by GEICO as an insurer.

1. Repair Payments

In the case of Repair Payments, GEICO reimburses a repair professional for the cost of replacement auto parts installed in the course of repairing an insured's or third-party claimant's vehicle. In this instance — unlike the other types of payments made by GEICO as an auto **[*823]** insurer — Defendants have no cause for concern that GEICO's **[**44]** payment might have been wholly unrelated to the purchase of auto parts, such that this transaction should be characterized as occurring outside the auto parts market in which Defendants allegedly carried out their price-fixing conspiracies. Rather, the principal *AGC* factors implicated by GEICO's Repair Payments are the risk of duplicative recovery and the existence of more direct victims of Defendants' alleged antitrust violations. Accordingly, the Court focuses primarily on these two factors in determining whether GEICO has sustained an antitrust injury as a result of its Repair Payments.

In Defendants' view, "[t]he risk of duplicative recovery weighs heavily against standing here." (Defendants' Motion, Br. in Support at 14 (footnote omitted).) In particular, Defendants point to the EPPs in the multidistrict litigation as more direct victims of the alleged price-fixing conspiracies who have "already asserted . . . and settled" claims against the Defendant auto part suppliers, and thereby "vindicated the public interest" that might otherwise be served through GEICO's purportedly less direct effort to recoup its Repair Payments. (*Id.* at 15 (internal quotation marks omitted).) Indeed, Defendants **[**45]** go further in their reply brief, submitting that GEICO "seeks recovery for the same transaction — the *same* Auto Parts installed in the *same* vehicles — as the end-payors." (Defendants' Reply Br. at 7 (emphasis in original).) In light of this purported "certainty" that "a more directly affected plaintiff" may challenge — and, in Defendants' view, has challenged — the price-fixing conspiracies alleged by GEICO, Defendants assert that the relevant *AGC* factors "could not weigh more heavily against antitrust standing." (Defendants' Motion, Br. in Support at 15.)

In response, GEICO does not deny that its claims arising from Repair Payments pose a risk of duplicative recovery. Instead, it more broadly contends that "duplicative recovery is not a properly considered *AGC* factor in this case," (Plaintiffs' Response Br. at 16), where it has asserted antitrust claims under the laws of jurisdictions that have enacted so-called "*Illinois Brick* repealer statutes" — that is, statutes that override the Supreme Court's decision in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, and allow recovery by indirect purchasers under state law. In support of this sweeping invitation to disregard the possibility of duplicative recovery, GEICO points to this **[**46]** Court's decision in *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *18*, as well as another district court ruling, *In re Flash Memory Antitrust Litigation, 643 F. Supp.2d 1133, 1156 (N.D. Cal. 2009)*, that this Court has cited with approval in the multidistrict litigation.

To be sure, ***HN17***[] this Court has recognized that a state's enactment of an *Illinois Brick* repealer statute evidences a state policy to "allow indirect purchasers to bring [antitrust] claims" despite a heightened risk of duplicative recovery. *Fuel Senders, 29 F. Supp.2d at 1003*; *see also* *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *18*. Yet, the Court has not gone so far as to say that these enactments render the threat of duplicative recovery wholly irrelevant to an antitrust standing inquiry under *AGC*. To the contrary, rather than relying solely on a state's repeal of *Illinois Brick* as conclusively resolving *AGC*'s "duplicative recovery" factor in favor of an indirect purchaser's antitrust standing, this Court has gone on to cite specific allegations by the indirect purchaser that "lessen the risk of duplicative recovery." *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *18* (citing *In re Flash Memory, 643 F. Supp.2d at 1156*); *see also* *Fuel Senders, 29 **[*824]** F. Supp.3d at 1003*. In its *Fuel Senders* decision, for example, the Court pointed to the indirect purchasers' allegations that the overcharges they paid were "distinct and traceable," and it further observed that the direct purchaser OEMs were not pursuing their own antitrust claims. *29 F. Supp.3d at 1003*; *see also* *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *18* (citing similar allegations **[**47]** of "distinct and traceable" overcharges as "lessen[ing] the risk of duplicative recovery").

Here, in contrast, Defendants state without contradiction that duplicative recovery is not only a possibility but a certainty, where the settlements reached in the multidistrict litigation between the defendant auto parts suppliers and the EPPs define the settlement classes as including indirect purchasers of replacement auto parts. (*See* Defendants' Motion, Ex. B-2 (chart of relevant settlement agreement provisions).)[4] Thus, the repair professionals who are reimbursed through Repair Payments evidently are eligible to recover in the multidistrict litigation as part of the EPP settlement classes. Moreover, although the *Illinois Brick* repealer statutes reflect a policy that indirect purchasers should be permitted to bring claims even at the risk of duplicative recovery by direct purchasers, Defendants correctly observe that GEICO's Repair Payment claims "seek[] recovery for the same transaction[s] — the *same* Auto Parts installed in the *same* vehicles" — that the indirect purchaser repair professionals rely upon to obtain reimbursement through the Repair Payments. (Defendants' Reply Br. at 7 (emphasis **[**48]** in original).) Under these circumstances, two of the *AGC* factors — the risk of duplicative recovery and the existence of more direct victims — weigh heavily against GEICO's antitrust standing.

The remaining *AGC* factors do not tip the balance in GEICO's favor with respect to its Repair Payment claims. First, regarding "the nature of [GEICO's] alleged injury[,] including the status of [GEICO] as consumer or competitor in the relevant market," *Southaven Land Co. v. Malone & Hyde, Inc., 715 F.2d 1079, 1085 (6th Cir. 1983)*, all are agreed that the injuries allegedly incurred by GEICO as a result of its Repair Payments were not a product of GEICO's participation in the markets for the various auto parts at issue here. Rather, GEICO made the Repair Payments to reimburse repair professionals, who in turn were indirect purchasers of the relevant auto parts that were the subject of Defendants' alleged price-fixing conspiracies. Nonetheless, GEICO correctly observes that ***HN18***[] it need not be a direct participant in the relevant auto part markets, so long as the market in which it did participate is "inextricably linked and intertwined" with these markets. *Fuel Senders, 29 F. Supp.3d at 1002*.

The allegations of GEICO's complaint fail to forge this link. Admittedly, GEICO has affirmatively **[**49]** alleged that "[t]he individual Auto Parts Submarkets and the market for vehicles are inextricably linked and intertwined," (SAC at ¶ 166), and this Court has deemed such an allegation sufficient to establish the antitrust standing of indirect purchasers in the multidistrict litigation, *see, e.g.,* *Fuel Senders, 29 F. Supp.3d at 1002*; *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *15-*16*. These rulings are unavailing here, however, because GEICO **[*825]** has not explained how its Repair Payments could be characterized as made in "the market for vehicles" or some other market that has been recognized as inextricably intertwined with the auto part markets in which Defendants carried out their alleged price-fixing conspiracies. Rather, GEICO makes Repair Payments in its role as an auto insurer, and although GEICO insists that "this [insurance] market too is inextricably intertwined with the market[s] for Auto Parts," (Plaintiffs' Response Br. at 17), Defendants aptly observe that GEICO has neither

[4] In some more recent cases, the proposed classes do not include indirect purchasers of replacement parts, but only those individuals or entities who have purchased or leased new vehicles. (*See, e.g., Ascher v. Alpha Corp.*, No. 16-13997, Dkt. 1, Complaint at ¶¶ 143-44 (part of the Access Mechanisms Actions, No. 16-04103).) The EPP settlements identified by Defendants, however, encompass these indirect purchases of replacement parts.

pleaded any such connection in its complaint nor cited any authority recognizing such a link between a product market and an insurer of participants in that market. *Cf. Southaven Land Co., 715 F.2d at 1086* (explaining that a plaintiff's injury is "inextricably intertwined" with the injury allegedly inflicted by an antitrust **[**50]** defendant on participants in the relevant market if the plaintiff is "manipulated or utilized by [the defendant] as a fulcrum, conduit or market force to injure" the participants in that market).

To the contrary, Defendants have pointed to case law that casts doubt on GEICO's effort to forge a sufficiently close connection between its Repair Payments and the pertinent auto part markets. In *Oregon Laborers-Employers Health & Welfare Trust Fund v. Philip Morris Inc., 185 F.3d 957 (9th Cir. 1999)*, for example, the plaintiff health and welfare benefit plans brought suit against tobacco companies, asserting claims under federal and state Racketeer Influenced and Corrupt Organizations ("RICO") and antitrust laws for costs incurred in paying for treatment of smoking-related illnesses suffered by plan participants and beneficiaries. Applying the *AGC* factors, as well as similar considerations governing RICO standing, the court held that the plaintiffs could not recover under either RICO or ***antitrust law***. *Oregon Laborers-Employers, 185 F.3d at 966-67*. In support of this ruling, the court reasoned that the plaintiff benefit plans were "neither consumers nor competitors in the relevant market of cigarettes and tobacco products," and that "[t]o the extent they have suffered injury, their claims are entirely derivative of the injuries suffered **[**51]** by smokers." *185 F.3d at 967*. The court further explained that the plaintiffs' claimed injuries were too remote from the alleged wrongdoing of the defendant tobacco companies to permit a recovery under ***antitrust law***, where absent "any injury to smokers, plaintiffs would not have incurred the additional expenses in paying for the medical expenses of those smokers." *185 F.3d at 963*; *see also Laborers Local 17 Health & Benefit Fund v. Philip Morris, Inc., 191 F.3d 229, 239 (2d Cir. 1999)* (holding in a similar case involving only RICO claims that the plaintiff health and welfare benefit funds lacked standing because their claimed injuries were "purely contingent on harm to third parties" and "their damages [we]re entirely derivative of the harm suffered by plan participants as a result of using tobacco products").

In an effort to distinguish this case law involving the tobacco industry, GEICO contends that it has alleged "direct" rather than indirect or derivative injuries by virtue of "paying inflated prices for Auto Parts." (Plaintiffs' Response Br. at 16 n.13.) Yet, in making Repair Payments, GEICO does not directly "pay[] inflated prices for Auto Parts," but instead reimburses indirect purchasers for the allegedly *supra*-competitive prices they paid to acquire those parts. This is an indirect **[**52]** injury, purely derivative of the harm suffered by participants in the markets for auto parts. To be sure, GEICO has alleged that this injury is directly traceable to the harm allegedly inflicted by Defendants on the markets for auto parts, but this consideration **[*826]** is relevant to another *AGC* factor, discussed below. The fact that GEICO's alleged injuries might be directly traceable to Defendants' alleged price-fixing conspiracies does not assist GEICO in showing either (i) that it sustained these injuries as a participant in the auto part markets in which Defendants allegedly conspired, or (ii) that these auto part markets were inextricably intertwined with the insurance market in which GEICO operated when making Repair Payments. Accordingly, this *AGC* factor militates against a finding of antitrust standing.

The remaining *AGC* factors, in contrast, tend to support a finding of antitrust standing. These factors call for consideration of "the causal connection between the violation and the harm," and "the directness of the injury, and whether damages are speculative." *Fuel Senders, 29 F. Supp.2d at 1001*. Defendants posit a "complex" chain of distribution for auto parts and prices that are "affected by numerous market factors." **[**53]** (Defendants' Motion, Br. in Support at 19; *see also id.* at 13-14 (diagrams representing these distribution chains).) GEICO, on the other hand, alleges that the relevant auto parts are "identifiable, discrete physical products" that "may be traced through the chain of distribution," and that the "cost and price" of these parts "also may be traced." (SAC at ¶ 167.) The complaint further alleges that the supra-competitive prices charged by Defendants are passed along to repair professionals who obtain replacement parts in order to repair vehicles belonging to GEICO's insureds and third-party claimants, and that GEICO in turn is impacted by these supra-competitive prices when it reimburses these repair professionals for the artificially inflated costs they have incurred. (*See id.* at ¶¶ 164-65.) This Court has cited similar allegations of overcharges that are passed and traceable through the chain of distribution as sufficient to satisfy the pertinent *AGC* factors. *See, e.g., Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *17*. Though GEICO's claims admittedly add one more link to this chain of alleged overcharges, the Repair Payments theory of recovery does not inject an insurmountable degree of uncertainty or speculation into the task of tracing overcharges **[**54]** and resulting injuries through the distribution chain, particularly in the pleading stage of this litigation.

Upon balancing these various *AGC* factors, the Court concludes that GEICO lacks antitrust standing to pursue its claims arising from Repair Payments. Most notably, GEICO's recovery under this theory would be entirely duplicative of the recoveries obtained by EPPs in their settlements with Defendants in the multidistrict litigation. Moreover, these indirect purchasers of relevant auto parts are better positioned than GEICO to vindicate the public interest in holding Defendants accountable for their alleged price-fixing conspiracies. In addition, GEICO has failed to plead facts from which it could be concluded that the insurance market in which GEICO sustained its injuries is inextricably intertwined with the auto part markets in which Defendants carried out their alleged conspiracies. Although other factors tend to support a finding of antitrust standing, these considerations tip the balance decisively in the other direction.

2. Reimbursement Payments

The next type of injury identified by GEICO as supporting a recovery under ***antitrust law*** is its Reimbursement Payments — that is, **[**55]** payments made to insureds or third-party claimants to settle automotive damage or repair claims that potentially entail the purchase and installation of replacement auto parts. Much of the preceding analysis addressing GEICO's Repair Payments applies with equal **[*827]** force here, so the Court may proceed more quickly through its consideration of the *AGC* factors.

First, to the extent that GEICO's Reimbursement Payments cover the cost of replacement auto parts used in the process of repairing an insured's or third-party claimant's vehicle, these payments are materially indistinguishable from GEICO's Repair Payments in terms of the risk of duplicative recovery and the existence of more direct victims of Defendants' alleged price-fixing conspiracies. In either case, an indirect purchaser obtains replacement auto parts for use in vehicle repair, and GEICO in turn makes an insurance payment that covers the cost of this indirect purchase. Accordingly, the Court's earlier assessment of Repair Payments applies here as well: duplicative recovery is not only a possibility but a near certainty, given the settlements reached in the multidistrict litigation between the Defendant auto part suppliers and **[**56]** the indirect purchasers, and the definition of the settlement classes as including indirect purchasers of replacement auto parts.[5] Likewise, these indirect purchasers are more direct victims of Defendants' alleged antitrust violations, and they have already challenged this alleged wrongdoing and obtained relief through the settlements in the multidistrict litigation.

Next, it is clear that GEICO makes both Repair and Reimbursement Payments in its role as insurer, and not as a participant in the pertinent markets for auto parts. Consequently, the Court's analysis of the *AGC* factor concerning the nature of GEICO's alleged injury applies with equal force to both Repair and Reimbursement Payments. In

---

[5] In its response to Defendants' motion, GEICO suggests that Defendants' protest against duplicative recovery should be viewed as "a case of buyers' remorse," where Defendants agreed to settlement classes in the multidistrict litigation that "included automobile insurers" among the indirect purchasers of replacement parts, but then failed to negotiate settlement terms that accounted for the situations in which "automobile insurers [we]re the party paying for" these replacement parts. (Plaintiffs' Response Br. at 20 n.16.) In GEICO's view, "[b]ecause automobile insurers pay for the vast majority of replacement parts in the United States," Defendants' negotiation of settlement agreements that frequently result in payments to two parties arising from a single purchase of replacement parts reflects a missed opportunity to craft settlement classes that account for this marketplace reality. (*Id.*)

As Defendants observe, however, any such potential for duplicative recoveries among members of the settlement classes in the multidistrict litigation is unhelpful to GEICO in establishing antitrust standing in this case. Rather, GEICO must show that the *AGC* factors, including the risk of duplicative recovery, favor a finding of antitrust standing under the circumstances presented here, and it is wholly immaterial that insurers who are similarly situated to GEICO have been included in settlement classes in the multidistrict litigation without having to make this showing. GEICO could have obtained this benefit by participating in the settlements, but it instead elected to opt out and pursue its own claims.

short, just as with the Repair Payments, three of the *AGC* factors weigh strongly against a finding of antitrust standing.

However, the comparison between Repair and Reimbursement Payments breaks down in situations where the latter are not, in fact, used to cover the cost of purchasing replacement auto parts. As Defendants observe, the recipient of a Reimbursement Payment will not necessarily use this payment to purchase replacement parts, but instead might elect to forgo repairs and pocket **[**57]** the insurance proceeds. In these circumstances, two of the *AGC* factors no longer militate against standing, because the absence of a part purchase means that there is neither a risk of duplicative recovery nor a more direct victim **[*828]** who is better positioned to challenge Defendants' alleged antitrust violations. Yet, any advantage to GEICO under these two factors is more than offset by other considerations. After all, if a Reimbursement Payment is not used to cover the cost of replacement parts, it cannot possibly be viewed as made in either the market for auto parts or any other market that is inextricably intertwined with this market. GEICO has not cited any authority for treating such payments in a wholly separate market as antitrust injuries. *Cf. Southaven Land Co., 715 F.2d at 1086-87* (finding that an injury that was only a "tangential by-product" of the defendant's allegedly anticompetitive conduct was "not sufficiently linked to the pro-competitive policy of the antitrust laws" to confer antitrust standing). It follows that the *AGC* factor addressing the nature of GEICO's alleged injury tilts the balance decisively against a finding of antitrust standing in instances where a Reimbursement Payment is not associated with **[**58]** the purchase of a relevant auto part.

As for the remaining *AGC* factors — the causal connection between the violation and the harm, and the directness of the injury and the related question whether damages are speculative — they are no more favorable to a claim of antitrust standing derived from Reimbursement Payments than from Repair Payments, and arguably less so under some circumstances. To the extent that a Reimbursement Payment compensates for the purchase of auto parts, GEICO has alleged (i) that both the parts and their costs may be traced through the chain of distribution, and (ii) that the *supra*-competitive prices charged by Defendants for these parts were passed along to GEICO by its insureds, third-party claimants, or the repair professionals that obtained and installed these parts. (*See* SAC at ¶¶ 164-65, 167.) As discussed earlier, similar allegations were deemed sufficient in the multidistrict litigation to establish the antitrust standing of indirect purchasers, *see, e.g. Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612 at *17*, and the Court has explained that GEICO's Repair Payment claims do not add so much complexity to the pass-through of overcharges that they should tip the balance of the relevant *AGC* factors against standing. **[**59]** It follows, then, that the Court's reasoning with respect to GEICO's Repair Payments should likewise govern the analysis of GEICO's Reimbursement Payments, at least insofar as these two types of payments reflect similar reimbursements to indirect purchasers for the cost of obtaining auto parts at allegedly supra-competitive prices.

The same cannot be said for the situation in which no parts are purchased in connection with a Reimbursement Payment. Even assuming that the claim payments made by GEICO in these circumstances bear some relationship to the allegedly supra-competitive prices of auto parts that would have to be acquired if the insured's or third-party claimant's vehicle were actually repaired, Defendants correctly observe that GEICO's complaint is wholly silent as to the claim adjustment process used by GEICO to determine the amounts of these payments. Thus, the Court is left to speculate on such relevant matters as (i) whether insureds and third-party claimants are reimbursed for the full amount they would have paid for the replacement parts necessary to repair their vehicles, and (ii) whether GEICO's agreements with its insureds invariably provide for this full reimbursement **[**60]** or instead apply different claim adjustment schemes and formulas that depend upon the insured's choice of a particular policy or type of coverage. As Defendants aptly summarize, GEICO's Reimbursement Payments are "a further step removed from the market[s] in which Defendants participated," **[*829]** (Defendants' Reply Br. at 12), which injects additional uncertainty into the analysis of the *AGC* factors that call for consideration of (i) the causal connection between Defendants' alleged antitrust violations and harm to GEICO, and (ii) the directness of GEICO's injury and speculative nature of the resulting harm. In light of the Court's conclusion that GEICO's allegations are insufficient to establish its antitrust standing to pursue its Repair Payment claims, these same allegations necessarily fail to overcome the additional obstacles that stand in the way of GEICO's effort to recover its Reimbursement Payments under ***antitrust law***.

3. Total Loss Payments

The final type of injury for which GEICO seeks to recover is its Total Loss Payments — *i.e.*, payments made to insureds or third-party claimants for vehicles declared a total loss. Again, the analysis of the *AGC* factors with respect to GEICO's Total **[**61]** Loss Payments does not differ considerably from the analysis of GEICO's other claims arising from its payments as an insurer. Indeed, because the injuries arising from GEICO's Total Loss Payments are materially indistinguishable from the injuries sustained by this insurer as a result of Reimbursement Payments where no auto parts are purchased, the Court travels no new ground in addressing GEICO's antitrust standing to recover its Total Loss Payments.

First, because GEICO's Total Loss Payments do not reimburse their recipients for any purchase of replacement auto parts, there is neither a risk of duplicative recovery nor a more direct victim who is better situated to challenge the alleged antitrust violations that led to GEICO's injuries. Accordingly, as is the case with Reimbursement Payments where no auto parts are purchased, these two *AGC* factors favor a finding of antitrust standing for GEICO's claims arising from Total Loss Payments.

The remaining *AGC* factors, however, tip the balance decisively against a finding of antitrust standing. First, because Total Loss Payments are not made in connection with the purchase of auto parts, the injury allegedly inflicted on GEICO does not occur **[**62]** in the auto part markets in which Defendants allegedly conspired. As already discussed in the context of Reimbursement Payments that do not cover the cost of replacement parts, GEICO has not put forward any allegations or authority to support a finding that the insurance market in which Total Loss Payments are made is inextricably linked with the market for auto parts.

The final two *AGC* factors — the causal connection between the violation and the harm, and directness of the injury and the related question whether the resulting damages are speculative — also militate against a finding of antitrust standing. GEICO's apparent theory of harm with respect to Total Loss Payments is that these payments, like the prices paid for new vehicles, are inflated by virtue of Defendants' overcharges for the component parts of the vehicles. As observed earlier, however, GEICO has not described its claim adjustment process for determining the amount of Total Loss Payments, much less alleged that Defendants' alleged overcharges somehow affect this process in a predictable manner and produce increased payments that can be traced to Defendants' overcharges and quantified in order to arrive at a non-speculative **[**63]** award of damages. Rather, the complaint addresses this subject at only the highest level of generality, inviting the Court to assume (i) that the supra-competitive prices allegedly charged by Defendants somehow pass into the insurance market and produce increased Total Loss Payments, (ii) that the extent of these increases can be accurately **[*830]** measured and properly apportioned among the Defendant auto part suppliers, and (iii) that any such means of measuring and apportioning damages will be equally valid across the various forms of auto insurance coverage offered by GEICO.

Indeed, Defendants correctly point out that GEICO's effort to recover for its Total Loss Payments introduces still more levels of uncertainty into the process of attributing fault to particular Defendant suppliers and quantifying the resulting harm to GEICO. As Defendants observe, GEICO "fails entirely to allege how insureds or claimants came to possess" the vehicles for which Total Loss Payments are made, leading to the possibility that some of these vehicles might have "passed through multiple, intervening, used vehicle transactions — including private sales transactions, dealer trade-ins, and non-arm's-length transactions **[**64]** like gifts from family members — on the path from the OEMs to the insureds." (Defendants' Motion, Br. in Support at 22.) Even assuming that GEICO could provide a reasonable measure of harm resulting from a Total Loss Payment for a vehicle purchased as new by an insured, GEICO does not limit its attempted recovery to only this subclass of Total Loss Payments, nor does its complaint attempt to address, or even acknowledge, the myriad complicating factors that must be considered when Total Loss Payments are made for used vehicles. Accordingly, GEICO lacks standing to assert antitrust claims arising from this type of payment.

E. To the Extent That GEICO Seeks to Recover from Defendants Under a Theory of Subrogation, the Court Cannot Determine the Viability of This Potential Avenue of Recovery Under the Present Record.

To the extent that GEICO seeks to recover in this case as an insurer, rather than a direct purchaser of auto parts or the owner of a fleet of vehicles, Defendants argue that any such claims have been settled and released under the terms of the settlement agreements entered into by the EPPs and the defendant auto parts suppliers in the multidistrict litigation. Specifically, **[**65]** Defendants point to provisions in these settlements in which the EPPs (i) broadly released all claims they could bring against the defendant suppliers arising from the conduct alleged in the multidistrict litigation, and (ii) agreed that these releases encompassed not only any claims that the EPPs themselves had brought or could have pursued, but also any claims that could be asserted derivatively on their behalf. (*See* Defendants' Motion, Ex. B-2, Index of Relevant Settlement Agreement Provisions in Multidistrict Litigation.) Indeed, most of these settlement agreements expressly included "insurers" in the list of non-parties whose derivative claims were released by the members of the EPP settlement classes. Defendants further observe that GEICO plainly had notice of these settlements, given its election to opt out of the settlement classes, but that it nonetheless failed to lodge any objections to the releases or any other terms of these agreements. It follows, in Defendants' view, that any claims asserted by GEICO in this case in its role as insurer have been released by GEICO's insureds as members of the EPP settlement classes.

In response, GEICO first insists — and Defendants do **[**66]** not dispute — that Defendants' appeal to the releases in the EPP settlement agreements has no effect on GEICO's ability to pursue recoveries based on (i) its direct purchases of relevant auto parts, or (ii) its purchase and ownership of a fleet of vehicles. In these capacities, GEICO is properly characterized as an EPP. Because it opted out of the settlements **[*831]** reached by the EPPs in the multidistrict litigation, it preserved its right to independently assert claims of the sort advanced, and then settled and released, by the EPPs — namely, claims of injury to vehicle and replacement part purchasers resulting from Defendants' alleged price-fixing conspiracies. Although Defendants challenge these claims on other grounds, they do not contend that the releases granted to them in the multidistrict litigation operate to bar GEICO from seeking to recover in its roles as automobile and auto part purchaser. Rather, the parties disagree only as to the viability of GEICO's claims in its capacity as insurer.

Despite their differences as to the merits of GEICO's claims as insurer, the parties seemingly agree that these claims — and, more specifically, the possible release of these claims via the EPP **[**67]** settlement agreements — are properly analyzed under the law governing an insurer's right of subrogation. As explained by the Sixth Circuit, ***HN19***[] the doctrine of equitable subrogation, "as applied in the insurance context, allows an insurer to sue a third party for injuries that the third party caused to the insured, when the insurer compensated the insured for those injuries." *National Surety Corp. v. Hartford Casualty Insurance Co., 493 F.3d 752, 756 (6th Cir. 2007)*. Although this theory of recovery is governed by state law and an insurer's right of subrogation therefore varies from state to state, the parties agree upon the general contours of the law of subrogation as it applies here. In particular, "[t]he doctrine of equitable subrogation allows insurers to 'stand in the shoes' of their insured to seek indemnification by pursuing any claims that the insured may have had against third parties legally responsible for the loss." *Allstate Insurance Co. v. Mazzola, 175 F.3d 255, 258 (2d Cir. 1999)*. In pursuing this recovery, the insurer (or subrogee) "succeeds to the rights of" its insured (the subrogor), and seeks to "require the party who caused the damage to reimburse the insurer for the payment the insurer has made" to its insured. *Allstate, 175 F.3d at 258* (internal quotation marks and citations omitted).

HN20[] "As a general matter, a subrogation claim by an insurer depends **[**68]** upon the claim of the insured and is subject to whatever defenses the tortfeasor has against the insured." *Allstate, 175 F.3d at 260* (internal quotation marks and citations omitted). Thus, "[w]hen an insured settles with or releases a third party from liability for a loss that the third party has caused, the insurer's subrogation right against such party may be destroyed." *Gibbs v. Hawaiian Eugenia Corp., 966 F.2d 101, 106 (2d Cir. 1992)*. There is an exception to this general rule. "Where a third party obtains a release from an insured with knowledge that the latter has already received payment from the insurer or with information that, reasonably pursued, should give him knowledge of the existence of the insurer's subrogation rights, such a release does not bar the [insurer's] right of subrogation." *Gibbs, 966 F.2d at 107*. This exception is intended to prevent a release from "operat[ing] as a fraud upon the insurer." *Allstate, 175 F.3d at 261*.

As discussed, the law of subrogation is relevant here only with respect to GEICO's claims arising from payments to its insureds or third-party claimants. GEICO does not dispute that under the terms of the settlements reached with the defendant auto part suppliers in the multidistrict litigation, the EPPs (i) broadly agreed to release the defendants from liability for any claims **[**69]** the EPPs brought or could have pursued relating to the conduct alleged in their complaints, and (ii) defined this release as encompassing not just the EPPs themselves, but also any third party **[*832]** that could assert the EPPs' claims derivatively. (*See id.*) Indeed, Defendants note that nearly all of the settlement agreements expressly listed insurers as among the third parties whose claims were released. Moreover, there is no dispute that GEICO was aware of the terms of the EPP settlements, given its express election to opt out of the settlement classes, but it did not lodge any objections to any aspect of these settlements.

It follows, in Defendants' view, that GEICO's claims in the present suit are barred to the extent that they arise from GEICO's role as insurer and seek to recover for payments made to insureds or third parties as reimbursement for the purchase of auto parts at *supra*-competitive prices. As Defendants observe, these insureds and third-party claimants "are members of the EPP settlement classes," (Defendants' Motion, Br. in Support at 24), and they therefore have settled and released their claims against Defendants arising from the auto part purchases covered by the settlements. **[**70]** Moreover, these releases encompass not only the claims that were brought or could have been brought by the EPPs themselves, but also claims asserted derivatively by third parties such as GEICO that rest upon the same underlying auto part transactions. Accordingly, Defendants maintain that any claims asserted by GEICO as an insurer, regardless of the underlying legal theory of recovery, have been released as a result of the EPPs' settlements in the multidistrict litigation.[6]

As Defendants recognize, however, the doctrine of subrogation arguably provides an avenue for GEICO to avoid this result, assuming it can identify a viable basis for such a recovery here. Under this theory, GEICO "succeeds to the rights of" its insureds in order to "require [Defendants] to reimburse [GEICO] for the payment[s] [it] has made" to its insureds arising from the losses they sustained in purchasing auto parts at *supra*-competitive prices. *Allstate, 175 F.3d at 258* (internal quotation marks and citations omitted). This "right of subrogation attaches, by operation of law, upon [GEICO's] payment of an insured's loss," *Allstate, 175 F.3d at 260*, and it is precisely these claim payments that GEICO seeks to recover from Defendants through the various claims it **[**71]** has asserted in its role as insurer.

As observed earlier, ***HN21***[] a subrogation claim brought by GEICO as insurer "depends upon the claim of [its] insured and is subject to whatever defenses the tortfeasor has against the insured." *Allstate, 175 F.3d at 260* (internal quotation marks and citations omitted). Ordinarily, then, once an insured "settles with or releases a third party from liability for a loss that the third party has caused," the insurer's right of subrogation is extinguished. *Gibbs, 966 F.2d at 106*. Defendants contend that under this usual rule, the EPPs' settlements and releases in the multidistrict litigation preclude GEICO from pursuing claims of subrogation in this case, as these claims are subject to the same defense of release that would prevent the EPPs themselves from seeking any additional recovery from Defendants. Defendants further point out that GEICO does not even purport to assert any claims of subrogation in its complaint. This pleading deficiency is particularly acute, in Defendants' view, where GEICO's rights to subrogation "depend[] **[*833]** on the terms of its contracts with its insureds and the [state] law[s] governing those contracts," but where GEICO has failed to "allege[] any of the terms of its insurance contracts" **[**72]** or "any facts showing that it could meet the required elements for a subrogation claim under the laws of any state." (Defendants' Motion, Br. in Support at 25-26.)

Yet, while the releases granted by the EPPs in their settlements ordinarily would operate to defeat GEICO's right of subrogation, this rule is subject to a recognized exception that arguably might apply here. Specifically, ***HN22***[] "[w]here a third party obtains a release from an insured with knowledge that the latter has already received payment from the insurer or with information that, reasonably pursued, should give him knowledge of the existence of the insurer's subrogation rights, such a release does not bar the [insurer's] right of subrogation." *Gibbs, 966 F.2d at 107*. In GEICO's view, Defendants cannot establish that they lacked knowledge or notice of GEICO's claim

[6] Of course, to the extent that the Court has determined elsewhere in this opinion and order that GEICO's claims as an insurer are defeated on other grounds, it need not decide whether these claims were released under the EPP settlements. This includes, most notably, GEICO's claims under ***antitrust law*** resting upon repair, replacement, and total loss payments made pursuant to GEICO's policies with its insureds.

payments to its insureds and its resulting right of subrogation, particularly in light of "the nature of the [a]uto [p]arts business (in which insurance companies are intricately involved in paying for parts and labor to restore insureds' vehicles to pre-loss condition)." (Plaintiffs' Response Br. at 32.) Defendants, for their part, note the absence of any allegations in the complaint **[**73]** that GEICO "notified Defendants of any subrogation rights that may have accrued as a result of paying claims to the EPPs," and they further observe that GEICO has not "attempt[ed] to identify the EPPs whose claims might be subrogated, to notify the Defendants of the number or value of EPP claims that might be subrogated, or to put Defendants on notice that they were at risk of paying the EPP claims twice if the Settlement Agreements became effective." (Defendants' Motion, Br. in Support at 27.)

This dispute cannot be resolved in the context of the present *Rule 12(b)(6)* motion to dismiss. First, Defendants correctly observe that GEICO has not even attempted to plead a theory of subrogation in its present complaint, and the Court cannot analyze the viability of this theory of recovery in a vacuum. Next, through their appeal to the release provisions in the EPP settlement agreements, Defendants have raised an affirmative defense to GEICO's claims as an insurer. *See* ***HN23***[] *Fed. R. Civ. P. 8(c)(1)* (identifying "release" as an affirmative defense that must be asserted in response to a complaint). As uniformly recognized in the case law, ***HN24***[] it generally is not appropriate to grant a *Rule 12(b)(6)* motion to dismiss on the basis of an affirmative defense, **[**74]** because a plaintiff ordinarily has no obligation to plead around this affirmative defense in order to state a viable claim. *See, e.g., Estate of Barney v. PNC Bank, N.A., 714 F.3d 920, 926 (6th Cir. 2013)*; *Cataldo v. U.S. Steel Corp., 676 F.3d 542, 547 (6th Cir. 2012)*; *see also Deckard v. General Motors Corp., 307 F.3d 556, 560 (7th Cir. 2002)*.

To be sure, a motion to dismiss may be granted where the "undisputed facts" as set forth in the pleadings "conclusively establish an affirmative defense as a matter of law." *Estate of Barney, 714 F.3d at 926* (internal quotation marks and citations omitted). Here, however, the pleadings do not address, much less conclusively resolve, the factual question whether Defendants had knowledge or notice of GEICO's potential subrogation rights arising from its claim payments to EPPs, such that the releases granted by the EPPs to Defendants did not operate to extinguish these rights. Consequently, GEICO's ability to pursue its claimed right of subrogation — assuming that it intends to pursue such a theory of recovery, and that such a **[*834]** claim is properly asserted in the amended pleadings authorized elsewhere in this opinion and order — is not defeated at the present juncture by the affirmative defense of release.

F. The Timeliness of This Suit Turns upon Factual Issues That The Court Cannot Resolve in the Context of a *Rule 12(b)(6)* Motion to Dismiss.

According to Defendants, GEICO's federal antitrust **[**75]** claims are governed by a four-year statute of limitations, and its state law antitrust claims "are subject to statutes of limitation ranging from two to four years." (Defendants' Motion, Br. in Support at 30.) Similarly, GEICO's state law consumer protection and unjust enrichment claims are governed by statutes of limitation "ranging from three to six years." (*Id.*) Defendants contend that all of GEICO's federal and state law claims are time-barred under these statutes of limitation, where GEICO's claims purportedly accrued "at the very latest . . . in February 2010," when the DOJ and foreign investigative agencies announced raids and investigations of auto part manufacturers, yet GEICO did not bring this suit until more than six years later, in September of 2016. (*Id.* at 30-32.) Although Defendants acknowledge that GEICO has invoked various mechanisms — including state discovery rules, the doctrine of fraudulent concealment, class action tolling, and the continuing violation doctrine — in an effort to bring its claims within the applicable limitation periods, they argue that GEICO's allegations fail to support these various attempts to save its allegedly untimely filing.

In response, GEICO views **[**76]** the pertinent case law — including, most notably, this Court's rulings in the multidistrict litigation — as supporting its appeals to discovery rules, fraudulent concealment, and class action tolling to extend the deadline for timely commencement of this suit. At a minimum, to the extent that Defendants offer speculation or cite extrinsic evidence that might cast doubt upon GEICO's allegations of timely filing, GEICO contends that such factual issues are not properly resolved in the context of a *Rule 12(b)(6)* motion to dismiss. As discussed below, the Court finds that GEICO has the better of this argument.

HN25[] Defendants' statute of limitations challenge is an affirmative defense that must be set forth in response to a complaint. *See* Fed. R. Civ. P. 8(c)(1). A plaintiff ordinarily need not plead around such affirmative defenses, and "a motion under Rule 12(b)(6), which considers only the allegations in the complaint, is generally an inappropriate vehicle for dismissing a claim based upon the statute of limitations." Cataldo, 676 F.3d at 547; *see also* In re Automotive Parts Antitrust Litigation (In re Wire Harness Cases — Truck & Equipment Dealer Actions), 2015 U.S. Dist. LEXIS 176199, 2015 WL 10376960, at *3 (E.D. Mich. Dec. 30, 2015) ("Wire Harnesses — Trucks"). Nonetheless, dismissal under Rule 12(b)(6) is appropriate where "the allegations in the complaint affirmatively show that **[**77]** the claim is time-barred," Cataldo, 676 F.3d at 547, and it is the plaintiff's burden in this instance to affirmatively "plead circumstances which would indicate why [the events giving rise to a claim] w[ere] not discovered earlier" or "why the statute [of limitations] should be tolled," Auslender v. Energy Management Corp., 832 F.2d 354, 356 (6th Cir. 1987).

Both sides agree that HN26[] a federal antitrust claim must be brought within four years after the claim accrues. *See* In re Automotive Parts Antitrust Litigation (In re Occupant Safety Restraints), 2014 U.S. Dist. LEXIS 120725, 2014 WL 4272784, at *10 (E.D. Mich. Aug. 29, 2014) **[*835]** (*"Occupant Safety Restraints")* (citing 15 U.S.C. § 15b). In addition, GEICO's state law antitrust claims "are subject to statutes of limitation ranging from two to four years." (*See* Defendants' Motion, Br. in Support at 30 (citing authorities collected in Ex. C).) GEICO's state law "consumer protection claims are subject to statutes of limitation ranging from three to six years," and its equitable claims of unjust enrichment likewise are subject to the same periods of limitation that govern its state law antitrust and consumer protection claims. (*Id.*) As GEICO observes, however, even where its state law consumer protection and unjust enrichment claims may be governed by the same statutes of limitation, these claims "may be subject to different accrual and tolling rules." (Plaintiffs' Response Br. at 25 n.23.)

As the starting point **[**78]** of their statute of limitations challenge, Defendants maintain that the statutes of limitation for GEICO's various claims "began to run, at the latest, in February 2010, which is when GEICO alleges both that Defendants engaged in the last overt act in furtherance of the alleged conspiracy and that it learned of investigations of suppliers of [a]uto [p]arts for antitrust violations." (Defendants' Motion, Br. in Support at 28.) Because "all of GEICO's claims are governed by limitations periods of six years or less," (*id.*), and because GEICO did not bring this suit until September of 2016, Defendants contend that GEICO's complaint is subject to dismissal in its entirety as untimely filed. In response, GEICO asserts that the allegations of its complaint are sufficient to raise factual issues as to both the accrual of its claims and the availability of tolling, so that it would not be appropriate to resolve these questions of fact in the context of a Rule 12(b)(6) motion to dismiss.

Turning first to the matter of claim accrual, Defendants cite two sets of allegations in GEICO's complaint as purportedly demonstrating that GEICO's claims accrued in February of 2010 at the latest. First, GEICO alleges that **[**79]** the DOJ and its law enforcement counterparts in Europe and Japan conducted "[p]arallel raids" in February of 2010 as "part of a coordinated international operation" to investigate suspected anticompetitive activities by auto part suppliers. (SAC at ¶¶ 129-31.) In connection with these raids, the DOJ "issued a general statement that it was 'investigating the possibility of anticompetitive cartel conduct of automotive electronic component suppliers' but provided no further detail." (Id. at ¶ 131.) Next, Defendants read GEICO's complaint as alleging that "Defendants committed the last overt acts in furtherance of the alleged conspiracy" in February of 2010. (Defendants' Motion, Br. in Support at 31 (citing SAC at ¶ 179).)

Neither of these allegations, properly construed in the context of the complaint as a whole, demonstrates conclusively that GEICO's claims accrued by February of 2010 at the latest. Regarding the February 2010 announcements by the DOJ and other law enforcement authorities that they were investigating possible anticompetitive conduct by auto part suppliers, this Court has found that HN27[] the requisite inquiry notice that triggers claim accrual is not established through the **[**80]** "availability of limited information in the public domain" regarding a government investigation. In re Automotive Parts Antitrust Litigation (In re Ceramic Substrates), No. 16-03802, Dkt. 27, 2017 U.S. Dist. LEXIS 221151 at *22 (E.D. Mich. May 5, 2017) (*"Ceramic Substrates")*. As the Court explained in the multidistrict litigation, although the government investigations into the suspected antitrust activities of auto part suppliers garnered "substantial and widespread" publicity over time, the initial February 2010 announcements identified only some **[*836]** auto part suppliers and a small subset of the auto parts, markets, and alleged conspiratorial activities that have since engendered the multiplicity of complaints filed in the multidistrict litigation. *See* [*Wire Harnesses — Trucks, 2015 U.S. Dist. LEXIS 176199, 2015 WL 10376960, at *4-*5*]. More generally, this Court emphasized that "[t]he statute of limitations inquiry is not made in light of all the connections that subsequently came to light," but rather must be confined to the information disclosed "at the time of the publicity" in question. [*2015 U.S. Dist. LEXIS 176199, [WL] at *6*].

In addition, GEICO affirmatively alleges that it remained unaware of Defendants' alleged price-fixing conspiracies for a period of time after the DOJ's initial February 2010 announcement. **[**81]** Specifically, GEICO alleges (i) that Defendants and their coconspirators "met and communicated in secret and agreed to keep the facts about their collusive conduct from being discovered," (ii) that they "engaged in other surreptitious activity, including the use of code names and meeting at private residences or remote locations," (iii) that they "coordinated their pricing in a manner to avoid detection," and (iv) that due to these affirmative efforts to conceal price-fixing activities, GEICO lacked knowledge or inquiry notice "until the public announcements of the government investigation[s] into each Auto Part." (SAC at ¶¶ 183-84.) This Court has repeatedly held that similar allegations of active concealment were sufficient to support appeals to the doctrine of fraudulent concealment, and thereby defer the accrual of claims. *See, e.g.,* [*Occupant Safety Restraints, 2014 U.S. Dist. LEXIS 120725, 2014 WL 4272784, at *10-*11*]; [*In re Automotive Parts Antitrust Litigation (In re Fuel Senders), 2014 U.S. Dist. LEXIS 61635, 2014 WL 1746121, at *11 (E.D. Mich. April 30, 2014)*]; [*In re Automotive Parts Antitrust Litigation (In re Wire Harness Cases), 2013 U.S. Dist. LEXIS 80337, 2013 WL 2456584, at *12 (E.D. Mich. June 6, 2013)*]. Therefore, factual issues remain as to the significance of the DOJ's February 2010 announcement to the accrual of GEICO's claims.

Nonetheless, Defendants insist that there must be an ascertainable end date to GEICO's appeals to discovery rules and fraudulent concealment, and they point to the allegation in the complaint that "the statutes of limitations **[**82]** as to GEICO's claims did not begin to run, at the earliest, until [the] DOJ publicly announced the investigation into each Auto Part." (SAC at ¶ 176.) Based on this allegation, Defendants have produced a chart summarizing their views as to which of GEICO's part-specific claims would be time-barred by a statute of limitations that began to run on the date of the public announcement of an investigation into a given auto part. (*See* Defendants' Reply, Exhibit A.) Yet, GEICO's invocation of discovery rules and the doctrine of fraudulent concealment cannot be addressed in isolation, without regard for its concurrent appeals to the continuing violation doctrine and class action tolling, both of which are discussed below. GEICO notes, for example, that although a Defendant supplier's sales of a specific auto part at [*supra*]-competitive prices "may have stopped when the Department of Justice made an announcement for that ***particular*** part," discovery might yet reveal that "some conspirators . . . did not exit the conspiracy immediately upon the DOJ announcement and continued to [sell this part at] illegally inflated prices." (Plaintiffs' Response Br. at 24 n.20 (emphasis in original).) Once again, **[**83]** then, factual issues preclude the Court from accepting Defendants' argument that the dates of the DOJ's public announcements should be viewed as hard-and-fast deadlines for the accrual of GEICO's claims.

As for Defendants' contention that GEICO has acknowledged the February 2010 accrual of its claims by alleging that **[*837]** "Defendants engaged in the last overt acts in furtherance of the alleged conspiracies in February 2010," (Defendants' Reply Br. at 18), this argument both misreads GEICO's complaint and misstates the law governing continuing violations. First, GEICO alleges that "Defendants committed their last overt acts in furtherance of the various conspiracies ***beginning*** in February of 2010," (SAC at ¶ 179 (emphasis added)), not that the last of the overt acts for ***each and every one*** of the sixteen alleged part-specific conspiracies occurred by February 2010 at the latest. Next, although Defendants suggest that GEICO "contradicts . . . controlling Sixth Circuit precedent" by asserting that "claims accrued with each sale of an Auto Part," (Defendant's Reply Br. at 20 n.22), GEICO points to controlling Supreme Court precedent that supports its appeal to the continuing violation doctrine. **[**84]** Specifically, ***HN28***[] as an example of a "continuing violation," the Court cited a "price-fixing conspiracy that brings about a series of unlawfully high priced sales over a period of years," explaining that "each sale to the plaintiff" qualifies as an "overt act that is part of the violation" and thereby "starts the statutory period running again." [*Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 1990, 138 L. Ed. 2d 373 (1997)*] (internal quotation marks and citations omitted). The Sixth Circuit decisions cited by Defendants are not to the contrary, but merely emphasize that under the continuing violation doctrine, "an overt act by the defendant is required to restart the statute of limitations and the statute runs from the last overt act." [*DXS, Inc. v. Siemens Medical Systems, Inc., 100*]

F.3d 462, 467 (6th Cir. 1996) (quoting Peck v. General Motors Corp., 894 F.2d 844, 849 (6th Cir. 1990)). Consistent with this case law, GEICO alleges that "Defendants committed an overt act in furtherance of the conspiracies each time they sold an Auto Part to an OEM," and that "[f]or each [such] overcharge . . ., a cause of action accrued, restarting the relevant statute of limitations." (SAC at ¶¶ 178-79.) Accepting these allegations as true, the Court finds that GEICO's claims continued to accrue after February of 2010, and it rejects Defendants' appeal to this date as the last viable point of accrual.[7]

Finally, Defendants **[**85]** challenge GEICO's attempt to invoke class action tolling as an additional means of avoiding the applicable statutes of limitation. As all parties here recognize, ***HN30***[] the commencement of a class action suit tolls the applicable statutes of limitation for all those who would have been members of the putative class but instead "elect[] to opt out of the **[*838]** class action [and] file individual claims." Weston v. AmeriBank, 265 F.3d 366, 368 (6th Cir. 2001). GEICO alleges in its complaint that it "was a putative member of the proposed classes" in each of the sixteen part-specific cases that were transferred into the multidistrict litigation before this Court. (SAC at ¶ 186.) It follows, in GEICO's view, that the running of the relevant statutes of limitation was "tolled from the filing of the[se] class [action] suits until GEICO opted out of the litigation on April 11, 2016." (*Id.*)

Defendants argue that this blanket allegation of class membership and attendant tolling is inadequate on two grounds. First, Defendants point to GEICO's failure to identify any specific putative class in the multidistrict litigation, much less "explain how it was a member of that class." (Defendants' Motion, Br. in Support at 33.) Next, Defendants fault GEICO for failing **[**86]** to "allege which (if any) state law claims, covering which (if any) Auto Part and which (if any) of its Payments, were tolled and for how long those claims were tolled, let alone whether any tolling in fact was long enough to rescue any of its claims." (*Id.*) Defendants maintain that these gaps in GEICO's allegations are especially problematic in light of the evolving definitions of the indirect purchaser classes in the multidistrict litigation, where at least some of the EPP complaints defined the plaintiff classes as all persons and entities that indirectly purchased specified auto parts "for personal use and not for resale." *See, e.g., LaCava v. Delphi Automotive LLP*, No. 11-14399, Dkt. 1, Complaint at ¶ 75 (E.D. Mich. Oct. 5, 2011); *In re Automotive Parts Antitrust Litigation (In re Wire Harness Systems)*, No. 12-103, Dkt. 132, Second Consolidated Amended Class Action Complaint at ¶ 177 (E.D. Mich. June 20, 2013). In Defendants' view, GEICO's claims arising from payments made to insureds or third-party claimants cannot plausibly be characterized as involving purchases of auto parts "for personal use and not for resale."

In response, GEICO first contends that it is enough that it was **[**87]** a putative member of the settlement classes certified by the Court in each of the settlements reached by the EPPs and the auto part suppliers in the multidistrict litigation. (*See* Plaintiffs' Response, App. A (chart listing the settlement class definitions for each of the sixteen part-specific settlements reached between EPPs and auto part suppliers).) Even assuming that the initial complaints in some of these cases featured narrower definitions of the plaintiff classes, GEICO points to case law holding that class action tolling extends to members of the expanded class ultimately certified by the Court. *See* Genden v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 114 F.R.D. 48, 54 (S.D.N.Y. 1987); *see also* Harris v. Union Electric Co., 787 F.2d 355, 361 n.2 (8th Cir. 1986) (finding that class action tolling extended to "those members who were subsequently added to the class as a result of the court's redefinition"); Smith v. Pennington, 352 F.3d 884, 894 (4th

---

[7] As Defendants observe, ***HN29***[] athough each overt act starts a new period of limitation for claims arising from this act, "the commission of a separate new overt act generally does not permit the plaintiff to recover for the injury caused by old overt acts outside the limitation period." Klehr, 521 U.S. at 189, 117 S. Ct. at 1990-91. Accordingly, Defendants argue that GEICO should not be permitted to recover "for acts (and damages) that are alleged to have occurred years outside any applicable limitations period," and they have provided a chart summarizing the purported cut-off dates for recoverable auto part purchases under the relevant statutes of limitation of various states that govern each of the state law theories of recovery asserted by GEICO. (*See* Defendants' Reply Br. at 20-21 (citing Defendants' Reply, Exhibit B).)

Plainly, however, GEICO cannot be expected at this juncture to identify and allege each individual auto part sale for which it seeks to recover, so this matter cannot be resolved in the context of a Rule 12(b)(6) motion. Moreover, it is possible, as already discussed, that the accrual of claims arising from earlier auto part sales might be deferred by resort to discovery rules or the doctrine of fraudulent concealment, and this again is not an issue that is amenable to resolution through a motion to dismiss.

Cir. 2003) (similarly looking to a plaintiff's motion for class certification as supplying the operative definition for tolling purposes, even though this definition was "more narrow than is arguably dictated by [the plaintiff's] complaint"). Although Defendants attempt to distinguish *Genden* on the ground that the court's initial (and narrower) class certification ruling in that case was "conditional" and subject to later reevaluation, **[**88]** *see* Genden, 114 F.R.D. at 54, they fail to suggest why the same rule should not apply here, where no class at all had been certified, conditional or otherwise, prior to the settlement classes proposed by the parties (including Defendants here) and accepted by the Court. Moreover, even **[*839]** accepting that *Genden* and the other above-cited cases are not directly on point, it bears emphasis that Defendants have cited no case in which a court has declined to apply class action tolling to the members of a broader settlement class, and instead limited this tolling to a narrower class as defined in the plaintiff's initial complaint.

As for Defendants' protest that GEICO's complaint lacks specificity as to precisely which of the complaints or settlement classes in the multidistrict litigation operated to "toll[] which of [GEICO's] claims over what period of time," (Defendants' Reply Br. at 18-19), GEICO points in response to the rule, cited earlier, that ***HN31***[] a plaintiff generally need not plead facts in avoidance of a statute of limitations defense. *See* *Bishop v. Lucent Technologies, Inc., 520 F.3d 516, 520 (6th Cir. 2008)*. Although it is true that a plaintiff must affirmatively allege facts in support of tolling where it is otherwise "apparent from the face of the complaint that the time limit **[**89]** for bringing the claim has passed," *Bishop, 520 F.3d at 520* (internal quotation marks, alteration, and citation omitted), nothing of the sort is apparent here. Rather, GEICO has alleged that it is a member of the putative EPP class in each of the relevant part-specific cases in the multidistrict litigation. It further states without dispute that prior to opting out, it was a member of the settlement class in each of these cases. Moreover, GEICO's appeal to class action tolling must be considered in conjunction with its invocation of the discovery rule and the doctrine of fraudulent concealment and its allegations of continuing violations. The complex, fact-intensive interactions among these legal principles preclude a determination as a matter of law that Defendants necessarily will prevail on their affirmative defense of the statute of limitations.

G. Defendants' Challenges to GEICO's Antitrust Claims Under the Laws of Various States

Defendants next seek the dismissal of many of GEICO's state law antitrust claims on various grounds. The Court addresses each of these challenges in turn.

1. GEICO's Antitrust Claims Under the Laws of the So-Called "Nexus" States Must Be Dismissed for Failure to Allege a Nexus [**90] Between Defendants' Conduct and Intrastate Commerce.

The parties agree that ***HN32***[] under the antitrust laws of certain states — *i.e.*, Alabama, Mississippi, Nevada, New York, North Carolina, South Dakota, Tennessee, and West Virginia, (*see* Defendants' Motion, Br. in Support at 35 (citing Ex. D, collecting relevant authority)) — as well as the District of Columbia (collectively, the "Nexus States"), the plaintiff must "allege a nexus between the defendant's conduct and intrastate commerce." *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *19*. In seeking the dismissal of GEICO's claims brought under the antitrust laws of these jurisdictions, Defendants argue that the allegations of GEICO's complaint fail to establish this requisite nexus, where "GEICO does not allege purchases of [relevant] [a]uto [p]arts in the Nexus States or that any GEICO plaintiff resides in the Nexus States." (Defendants' Motion, Br. in Support at 35.) The Court agrees.

In an effort to turn aside Defendants' challenge to its allegations of a nexus with intrastate commerce, GEICO points to the passages in its complaint alleging that Defendants' conduct "(i) fixed, raised, maintained and stabilized" the prices of relevant auto parts in each of the Nexus States, (ii) "restrained, **[**91]** suppressed and eliminated price competition for" the relevant auto parts throughout each of the Nexus States, (iii) "deprived GEICO and **[*840]** its insureds and claimants of free and open competition" in the submarkets for the relevant auto parts, and (iv) "resulted in GEICO paying supra-competitive, artificially high prices for" relevant auto parts. (SAC at ¶¶ 202-27.) GEICO further alleges that "in each of the . . . states" identified in its complaint, it "has been injured in its business and property" as a result of Defendants' alleged price-fixing conspiracies. (*Id.* at ¶ 228.) In GEICO's view, this Court has "found the EPPs' similar allegations to be sufficient to support [the] EPPs' state antitrust claims." (Plaintiffs' Response Br. at 34 (citing *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *20)*.)

Yet, as Defendants correctly observe, this Court has distinguished its *Wire Harnesses* ruling in other decisions in the multidistrict litigation, and the grounds for this distinction are present here. Most notably, in *In re Automotive Parts Antitrust Litigation (In re Wire Harness Cases), 2015 U.S. Dist. LEXIS 176199, 2015 WL 10376960, at *7 (E.D. Mich. Dec. 30, 2015)*, the Court observed that the EPPs in *Wire Harnesses* had "alleged residency of the named plaintiffs in the nexus states," while the truck and equipment dealership ("TED") plaintiffs had made no such "express or implied allegations **[**92]** of in-state residency or injury." Because none of the TED plaintiffs alleged that they "reside[d] or were injured in the nexus states," the Court ordered the dismissal of the antitrust claims brought under the laws of those states. *Id.*

This reasoning leads to the same outcome here. Although GEICO views the allegations of its complaint as establishing that it paid "supracompetitive, artificially high prices for [a]uto [p]arts in" each of the Nexus States, (Plaintiffs' Response Br. at 34), Defendants correctly observe that the complaint stops short of "mentioning where any purchases were made," (Defendants' Reply Br. at 21). Rather, the complaint alleges only (i) that Defendants' alleged price-fixing conspiracies "resulted in GEICO paying supra-competitive, artificially high prices for" relevant auto parts, (*see, e.g*. SAC at ¶ 202(a)), and (ii) that as a result, GEICO "has been injured in its business and property" in "each of" the jurisdictions identified in its complaint, (*id.* at ¶ 228). As Defendants point out, GEICO "does not dispute that it must allege a purchase in a Nexus State to maintain a claim under a Nexus State's antitrust laws," yet it notably fails to do so. (Defendants' **[**93]** Reply Br. at 21.) As with the TED plaintiffs, the Court likewise concludes here that GEICO's antitrust claims under the laws of the Nexus States are subject to dismissal for lack of allegations of a nexus between Defendants' allegedly unlawful conduct and GEICO's commercial activity within those jurisdictions.

To be sure, if the Court were to consider GEICO's alleged injuries sustained in its role as insurer, it might be reasonable to infer that GEICO, as one of the nation's largest automotive insurers, has made relevant payments to its insureds or third-party claimants in each of the Nexus States. As explained earlier, however, the allegations of GEICO's complaint are insufficient to establish GEICO's standing as an insurer to bring antitrust claims under federal or state law. Rather, GEICO's antitrust claims are viable only to the extent that they rest upon GEICO's direct purchase of relevant auto parts or its ownership of a fleet of vehicles, and GEICO's complaint fails to allege any such purchases of relevant auto parts or vehicles in any of the Nexus States. It follows that GEICO's antitrust claims under the laws of the Nexus States must be dismissed.

2. Because None of the GEICO [94] Entities Is a Citizen or Resident of Utah, GEICO Cannot Pursue an Antitrust Claim Under Utah Law**.

HN33[] Under Utah law, a plaintiff must be "a citizen of this state or a resident of **[*841]** this state" in order to bring to claim under Utah's Antitrust Act. *Utah Code Ann. § 76-10-3109(1)(a)*. In reliance on this statutory language, a number of courts have dismissed claims brought under Utah ***antitrust law*** by plaintiffs who were neither citizens nor residents of Utah. *See, e.g., In re Opana ER Antitrust Litigation, 162 F. Supp. 3d 704, 725 (N.D. Ill. 2016)*; *In re Aggrenox Antitrust Litigation, 94 F. Supp.3d 224, 251-52 (D. Conn. 2015)*; *In re Niaspan Antitrust Litigation, 42 F. Supp.3d 735, 759-60 (E.D. Pa. 2014)*. Defendants contend that GEICO's claim under Utah ***antitrust law*** is likewise subject to dismissal, where none of the GEICO entities named as plaintiffs in this action is a Utah citizen or resident.

In response, GEICO states that it has sufficient contacts with the State of Utah to sue or be sued in the courts of that state. Be that as it may, Utah ***antitrust law*** demands Utah citizenship or residency, and not the capacity to sue or be sued in that state. Although GEICO suggests that the above-cited cases are inapposite, those cases precisely track the language of the pertinent Utah statute, and do not engage in the jurisdictional inquiry urged by GEICO. Nor has GEICO identified any case law or other authority that supports its proposed reading of Utah

antitrust **[**95]** ***law***. In accordance with the uniform weight of authority, the Court finds that GEICO's antitrust claim under Utah law must be dismissed.

3. GEICO's Antitrust Claim Under Oregon Law Is Subject to Dismissal for Lack of Allegations of Injury to a Person or Property in That State.

HN34[] The Oregon legislature has mandated that the state's ***antitrust law*** applies only to "intrastate trade or commerce, and to interstate trade or commerce involving an actual or threatened injury to a person or property located in this state." *Oregon Rev. Stat. § 646.715(2)*. As already discussed with respect to the antitrust laws of the Nexus States, the allegations of GEICO's complaint do not establish a connection between Defendants' allegedly unlawful conduct and any relevant intrastate activities engaged in by any of the GEICO entities in the state of Oregon, where none of these entities reside in that state. This leaves only the possibility that Defendants' allegedly anticompetitive activities had an effect on interstate trade or commerce that threatened or caused injury "to a person or property located in" Oregon.

The Court agrees with Defendants that the allegations of the complaint fail to support this theory of recovery. Again, the GEICO **[**96]** entities do not reside in Oregon, nor is there any allegation that GEICO owns any property in that state. To the extent that GEICO points to the allegations of its complaint as demonstrating that "Defendants caused GEICO to pay supracompetitive, artificially high prices for [a]uto [p]arts in Oregon," (Plaintiffs' Response Br. at 36), the cited portion of the complaint alleges only that Defendants' alleged price-fixing conspiracies "resulted in GEICO paying supracompetitive, artificially high prices for [a]uto [p]arts," (SAC at ¶ 221(a)), without indicating that any such purchases occurred in Oregon. Although GEICO further asserts that it made payments to repair facilities located in Oregon and to insureds and third-party claimants who reside in that state, (Plaintiffs' Response Br. at 36), the complaint lacks any such specific allegations and, in any event, the Court has already determined that GEICO lacks standing as an insurer to bring antitrust claims under state or federal law arising from its alleged reimbursement payments to repair facilities, insureds, or third-party claimants. Finally, Defendants aptly observe that even if GEICO made such payments **[*842]** as an insurer to facilities **[**97]** or individuals located in Oregon, the resulting injury presumably would be sustained by the GEICO entities in the states where they reside, and this would not establish the requisite injury "to a person or property located in" Oregon as necessary to bring an antitrust claim under that state's law. Thus, GEICO has failed to plead a viable antitrust claim under Oregon law.

4. GEICO Cannot Recover Damages Under New Hampshire's or Utah's Antitrust Laws for Conduct That Occurred Prior to the Enactment of Legislation That Permits Recovery by Indirect Purchasers.

As noted earlier, ***HN35***[] a number of states have enacted so-called "*Illinois Brick* repealer statutes" — that is, statutes that override the Supreme Court's decision in *Illinois Brick, supra*, and allow recovery by indirect purchasers under state law. Effective January 1, 2008, New Hampshire passed such a law allowing recovery of damages by indirect purchasers. *See* *N.H. Rev. Stat. Ann. § 356.11*. Likewise, effective May 1, 2006, Utah amended a provision of its ***antitrust law*** to permit recovery by indirect purchasers. *See* *Utah Code Ann. 76-10-3109(1)(a)*. Defendants contend, and GEICO does not dispute, (*see* Plaintiffs' Response Br. at 36-37), that these enactments operate to limit GEICO's recovery under the antitrust laws of **[**98]** New Hampshire and Utah to the damages resulting from Defendants' alleged anticompetitive activities that occurred on or after the effective dates of these *Illinois Brick* repealer provisions. Indeed, the Court so held in the multidistrict litigation, *see* *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *19*, and GEICO does not suggest any basis for a different outcome here.

Defendants further contend that GEICO's recovery under Hawaiian ***antitrust law*** is similarly limited by the Hawaiian legislature's June 2002 passage of an amendment to *Haw. Rev. Stat. § 480-2*. In Defendants' view, this enactment created an avenue for indirect purchaser recovery where none was available before. Defendants recognize that this Court rejected this same argument in the multidistrict litigation, *see* *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *18*, but they suggest that the Court mistakenly relied on a ruling, *In re*

Static Random Access Memory (SRAM) Antitrust Litigation, No. 07-md-01819, 2010 U.S. Dist. LEXIS 131002, 2010 WL 5094289, at *5 (N.D. Cal. Dec. 8, 2010), that cannot be reconciled with certain decisions of the Hawaiian courts holding that the relevant June 2002 amendment to the Hawaiian law of unfair competition should be applied only prospectively. (Defendants' Reply Br. at 22 n.25 (citing Hawaii Medical Ass'n v. Hawaii Medical Service Ass'n, Inc., 113 Haw. 77, 148 P.3d 1179, 1209 (Haw. 2006), and Tour2000 Co. v. Koreana Tour Service, Inc., No. 28209, 2009 Haw. App. LEXIS 675, 2009 WL 3437431, at *12 (Haw. Ct. App. Oct. 23, 2009)).)

The state court decisions cited by Defendants do not warrant a departure from the Court's **[**99]** ruling in the multidistrict litigation. As noted, this Court relied on the decision in Static Random Access Memory, 2010 U.S. Dist. LEXIS 131002, 2010 WL 5094289, at *5, and ***HN36***[] that court, in turn, discussed the Hawaiian Supreme Court's holding in 1999 that the Hawaiian legislature had not conferred "a private claim for relief under [Haw. Rev. Stat.] § 480-13 for unfair methods of competition in violation of [Haw. Rev. Stat.] § 480-2." Robert's Hawaii School Bus, Inc. v. Laupahoehoe Transportation Co., 91 Haw. 224, 982 P.2d 853, 880 (Haw. 1999) (footnote omitted). As explained in Static Random Access Memory, 2010 U.S. Dist. LEXIS 131002, 2010 WL 5094289, at *5, although the Hawaiian legislature's 2002 enactment supplanted this particular aspect of the Hawaiian Supreme Court's decision in *Robert's Hawaii School Bus*, the **[*843]** Hawaiian court emphasized in that same decision that its interpretation of Haw. Rev. Stat. § 480-2 as it read in 1999 did not operate to limit "private claims for violations of [Haw. Rev. Stat.] §§ 480-4 or 480-9." Robert's Hawaii School Bus, 982 P.2d at 880. Because the indirect purchaser plaintiffs in *Static Random Access Memory* were pursuing a price-fixing conspiracy claim under Haw. Rev. Stat. § 480-4, and not a claim for unfair methods of competition under Haw. Rev. Stat. § 480-2, the court in that case reasoned that the state legislature's 2002 amendment to § 480-2 could not properly be construed as an implied repeal of a previously existing *Illinois Brick*-style limitation on indirect purchaser recoveries under § 480-4, where this latter provision was wholly unaffected by the legislature's 2002 enactment. Static Random Access Memory, 2010 U.S. Dist. LEXIS 131002, 2010 WL 5094289, at *5.

Viewed against this backdrop, **[**100]** the state court decisions cited by Defendants are inapposite, and do nothing to undermine this Court's reliance on Static Random Access Memory. In each of these cases, the court held that the legislature's 2002 amendment to Haw. Rev. Stat. § 480-2 did not apply retroactively to permit recovery ***under § 480-2*** for unlawful acts committed prior to the June 28, 2002 effective date of this amendment. *See* Hawaii Medical Ass'n, 148 P.2d at 1209; Tour2000 Co., 2009 Haw. App. LEXIS 675, 2009 WL 3437431, at *12. Here, however, as in *Static Random Access Memory*, GEICO has asserted claims of price-fixing conspiracies, which are governed by Haw. Rev. Stat. § 480-4 rather than § 480-2. Nothing in the Hawaiian legislature's 2002 amendment of the latter statute suggests an intention to repeal an *Illinois Brick* limitation that was previously found in the former statute. To the contrary, § 480-4 was wholly unchanged by this 2002 amendment. Accordingly, the Court adheres to its ruling in Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *18, and finds that the 2002 amendment does not limit GEICO's recovery under Hawaiian ***antitrust law***.

H. Defendants' Challenges to GEICO's Claims Under the Consumer Protection Laws of Various States

In the third count of its second amended complaint, GEICO seeks to recover under the consumer protection statutes of various states. Defendants challenge these claims on various grounds, **[**101]** each of which is addressed below.

1. GEICO Has Adequately Pleaded Violations of the Consumer Protection Laws of Arkansas, New Mexico, and Nevada.

In Defendants' view, three of GEICO's state law consumer protection claims — *i.e.*, the claims brought under the consumer protection laws of Arkansas, New Mexico, and Nevada — are subject to dismissal as wholly derivative of federal or state law antitrust claims that likewise should be dismissed. In support of their challenges to GEICO's claims under Arkansas and New Mexico law, Defendants point primarily to the decision in In re Graphics Processing Units Antitrust Litigation, 527 F. Supp.2d 1011, 1029-30 (N.D. Cal. 2007), as purportedly "dismissing

Arkansas and New Mexico consumer protection claims based on failed antitrust claims." (Defendants' Motion, Br. in Support at 38-39.) Yet, as GEICO points out, the court in *Graphics Processing Units* did not dismiss the Arkansas and New Mexico claims due to the plaintiffs' purported failure to establish an underlying violation of ***antitrust law***, but rather for failure to allege unconscionable conduct within the meaning of the relevant state statutes. *See* *Graphics Processing Units, 527 F. Supp.2d at 1029-30*. Similarly, although Defendants cite the decision in **[*844]** *Wallis v. Ford Motor Co., 362 Ark. 317, 208 S.W.3d 153, 161-62 (Ark. 2005)*, as support for the proposition that a claim under the Arkansas Deceptive Trade Practices **[**102]** Act ("ADTPA") is subject to dismissal if it is "premised on antitrust violations," (Defendants' Motion, Br. in Support at 38-39), the court in that case addressed a design defect claim, not allegations of antitrust violations, and it held that the plaintiff had not pleaded the requisite "actual damage or injury" through allegations of "diminution in value of the product," *Wallis, 208 S.W.3d at 161*. Accordingly, *Wallis* is inapposite, as this Court previously explained in the multidistrict litigation. *See* *Instrument Panel Clusters, 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *19-*20*.

Defendants fare somewhat better in their challenge to GEICO's consumer protection claim under Nevada law, but not enough to secure the dismissal of this claim. As Defendants observe, ***HN37***[] one way a plaintiff can establish a "deceptive trade practice" under Nevada law is by showing that the defendant "knowingly. . . [v]iolate[d] a state or federal statute or regulation relating to the sale or lease of goods or services." *Nev. Rev. Stat. § 598.0923*. In this case, GEICO has alleged that "Defendants' unlawful conduct constitutes deceptive trade practices in violation of *Nevada Revised Statutes § 598.0923*[] because Defendants knowingly violated" Nevada's antitrust statute. (SAC at ¶ 236(b).) As discussed earlier, Nevada is one of the "Nexus States," and GEICO's antitrust claim **[**103]** under Nevada law is subject to dismissal for lack of allegations of a nexus between Defendants' allegedly unlawful conduct and injury sustained by GEICO in Nevada. It follows that GEICO cannot establish a deceptive trade practice under *§ 598.0923* by appealing to a violation of Nevada ***antitrust law***. *See* *Sobel v. Hertz Corp., 698 F. Supp.2d 1218, 1230 (D. Nev. 2010)* (dismissing the plaintiffs' claim under *§ 598.0923* for failure to establish an underlying violation of another Nevada statute), *rev'd on other grounds*, *674 F. App'x 663 (9th Cir. 2017)*.

This is not the end of the matter, however, because there are other ways to demonstrate that a defendant has engaged in a "deceptive trade practice" as defined under Nevada law. In particular, GEICO points to different language in *§ 598.0923* providing that a person engages in a deceptive trade practice if he or she knowingly "[f]ails to disclose a material fact in connection with the sale or lease of goods or services." Admittedly, GEICO's complaint does not expressly cite to or rely upon this particular definition of a deceptive trade practice, but GEICO nonetheless insists that it has sufficiently invoked this provision through its citation to Nevada's Deceptive Trade Practices Act as a whole. (*See* SAC at ¶ 236.) GEICO further asserts that it has adequately pleaded **[**104]** this type of unlawful practice through its allegations that Defendants knowingly agreed to fix prices of auto parts and "undertook efforts to conceal their agreements from GEICO and other purchasers." (*Id.* at ¶ 236(a).) Although this Nevada claim has not been artfully pleaded, the Court finds that it withstands Defendants' present challenge, particularly where GEICO will have an opportunity to provide more detailed allegations when it files the amended pleadings authorized elsewhere in this opinion and order.

Next, Defendants contend that GEICO's claims under the consumer protection laws of Arkansas and New Mexico are subject to dismissal on the additional ground that GEICO has failed to allege unconscionable conduct as purportedly dictated by the relevant state statutes. *See* ***HN38***[] *Ark. Code Ann. § 4-88-107(a)* (defining the "[d]eceptive and unconscionable trade practices made unlawful and prohibited by this chapter"); *N.M. Stat. Ann. § 57-12-2(E)* **[*845]** (defining an "unconscionable trade practice"). As GEICO observes in response, however, this Court rejected essentially the same challenges in the multidistrict litigation. *See* *Fuel Senders, 29 F. Supp.3d at 1008-09*; *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *24-*25*. Regarding Arkansas's consumer protection law, the Court explained that ***HN39***[] the state statute "does not limit itself to unconscionable **[**105]** acts," and that allegations of "false or deceptive acts" suffice to state a claim. *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *24*. As for the New Mexico statute, the Court observed that ***HN40***[] its definition of an "unconscionable trade practice" encompasses acts or practices that "take[] advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree" or that "result[] in a gross disparity between the value received by a person and the price paid." *2013 U.S. Dist. LEXIS 80338, [WL] at *25* (quoting *N.M. Rev. Stat. 57-12-2(E)*). In support of their consumer protection claims under

Arkansas and New Mexico law, the EPPs and IPPs in the multidistrict litigation made allegations similar to those advanced by GEICO here, and the Court found these allegations sufficient to withstand scrutiny under *Rule 12(b)(6)*. *See Fuel Senders, 29 F. Supp.3d at 1008-09*; *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *24-*25*. Defendants do not acknowledge these rulings, much less explain why the result here should be different. Accordingly, the Court finds that GEICO has sufficiently pleaded claims under the consumer protection laws of Arkansas, New Mexico, and Nevada.

2. To the Extent It Seeks to Recover as an Insurer, GEICO's Alleged Injuries Are Too Remote from Defendants' Alleged Wrongdoing To Sustain Its Consumer Protection Claims Under the Laws of Arkansas, New York, [106] and Vermont.**

As discussed earlier, the ***HN41***[] courts have applied the factors identified in the Supreme Court's *AGC* decision to determine whether a plaintiff's injuries are too remote from the defendant's alleged wrongdoing to permit a recovery under federal or state ***antitrust law***. Defendants argue, and GEICO does not dispute, that the courts have engaged in a similar "remoteness" inquiry, either with or without specific reference to the *AGC* factors, in determining whether a plaintiff may pursue a claim under the consumer protection laws of Arkansas, New York, or Vermont. *See, e.g. Independence County v. Pfizer, Inc., 534 F. Supp.2d 882, 888-89 (E.D. Ark. 2008)* (addressing a claim under Arkansas's consumer protection statute), *aff'd*, *552 F.3d 659 (8th Cir. 2009)*: *State of New York v. Daicel Chemical Industries, Ltd., 42 A.D.3d 301, 840 N.Y.S.2d 8, 12 (N.Y. App. Div. 2007)* (applying New York law); *In re Dynamic Random Access Memory (DRAM) Antitrust Litigation, 536 F. Supp.2d 1129, 1142 (N.D. Cal. 2008)* (finding that a claim under New York's consumer protection statute "should be assessed with reference to [the] *AGC* factors"); *Fucile v. Visa U.S.A., Inc., No. S1560-03, 2004 Vt. Super. LEXIS 42, 2004 WL 3030037, at *3 (Vt. Super. Ct. Dec. 27, 2004)* (applying Vermont law). In Defendants' view, just as GEICO purportedly has failed to satisfy the *AGC* factors with respect to its claims under federal and state ***antitrust law***, it likewise cannot satisfy these factors in support of its claims under the consumer protection laws of these three states.

The Court addressed this issue in the multidistrict **[**107]** litigation, explaining that its analysis of the *AGC* factors with respect to the plaintiffs' antitrust claims applied as well to the remoteness inquiry called for under the consumer protection laws of Arkansas, New York, and Vermont. *See Fuel Senders, 29 F. Supp.3d at 1012*; *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612,* ***[*846]*** *at *30*. In this case, the Court's earlier analysis of the *AGC* factors led to the conclusion that GEICO could pursue antitrust claims in its capacities as a purchaser of auto parts and the owner of a fleet of vehicles, but not as an insurer. As in the multidistrict litigation, the Court finds that this analysis applies as well to GEICO's consumer protection claims under the laws of Arkansas, New York, and Vermont. Thus, GEICO may pursue these claims only to as to transactions in which it purchased relevant auto parts or acted in its capacity as owner of a fleet of vehicles, but not in its capacity as an insurer that made payments to repair facilities, insureds, or third-party claimants.

3. GEICO Has Alleged a Sufficient Nexus Between Defendants' Alleged Anticompetitive Conduct and the States of California, New Hampshire, New York, and North Carolina.

Defendants next point to requirements under the consumer protection laws of California, New Hampshire, New **[**108]** York, and North Carolina that there must be a nexus between a defendant's allegedly unlawful conduct and intrastate commerce, and they argue that the allegations of GEICO's complaint fail to establish this required nexus. In response, GEICO observes that this Court addressed precisely these same challenges in the multidistrict litigation, finding that the allegations in those cases satisfied the nexus requirements of the various state consumer protection statutes. *See Fuel Senders, 29 F. Supp.3d at 1010-12* (considering claims under the consumer protection laws of California, New York, and North Carolina); *Instrument Panel Clusters, 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *21-*23* (same); *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *28-*29* (addressing claims under California law).

To be sure, these rulings were based in part on allegations that residents of these states purchased the auto parts at issue. *See, e.g., Fuel Senders, 29 F. Supp.3d at 1010*. Despite GEICO's claims to the contrary, the complaint here lacks comparable allegations that GEICO paid supra-competitive prices for relevant auto parts in each of the states in question. Nonetheless, this Court also cited allegations that the defendant auto suppliers' "anticompetitive conduct caused supracom[]petitive price effects nationwide" as sufficient to establish the required nexus with intrastate commerce, *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *29*; *see also Fuel Senders, 29 F. Supp.3d at 1010-12*; *Instrument Panel Clusters, 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *21-*23*, and **[**109]** GEICO has made similar allegations in support of the claims at issue here, (*see* SAC at ¶¶ 234(c), 237(c), 239(e), 240(e)). Moreover, although this Court has not addressed claims under New Hampshire's consumer protection statute in its decisions in the multidistrict litigation, GEICO points to the ruling of another court that the nexus requirement of the New Hampshire statute was satisfied through allegations that the "defendants colluded to fix the price of chocolate products that were then introduced into the New Hampshire market." *In re Chocolate Confectionary Antitrust Litigation, 749 F. Supp.2d 224, 235 (M.D. Pa. 2010)*. It follows that GEICO's similar allegations here are likewise sufficient to satisfy this requirement.

Faced with these arguments by GEICO, Defendants do not even acknowledge the relevant rulings of this Court in the multidistrict litigation, much less endeavor to explain why GEICO's allegations here are sufficiently distinguishable to warrant a different outcome. In the absence of any suggestion why it should not do so, the Court elects to adhere to its decisions in the multidistrict litigation, and therefore holds that GEICO has adequately pleaded **[*847]** the nexus element of its consumer protection claims under the laws of California, New Hampshire, New York, **[**110]** and North Carolina.

4. GEICO Need Not Satisfy the Standards of *Fed. R. Civ. P. 9(b)* to State a Consumer Protection Claim Under Florida Law.

Defendants next challenge GEICO's claim under Florida consumer protection law, arguing that such claims must be pleaded with the particularity mandated by *Fed. R. Civ. P. 9(b)* for allegations of fraud. Once again, however, the Court squarely rejected this assertion in *Wire Harnesses, 2013 U.S. Dist. LEXIS 80338, 2013 WL 2456612, at *23-*24*, despite the defendants' appeal in that case to precisely the same unpublished opinion relied upon by Defendants here. Defendants do not attempt to distinguish this Court's prior ruling, nor even acknowledge it. Thus, the Court finds no basis for departing from its analysis of this issue in the multidistrict litigation.[8]

5. GEICO's Consumer Protection Claim Under Vermont Law May Rest Upon Its Purchases of Auto Parts for Its Own Benefit, But Not Its Payments as an Insurer.

HN42[] Under the Vermont Consumer Fraud Act ("VCFA"), *Vt. Stat. Ann. tit. 9, § 2451 et seq.*, only a "consumer" may bring a suit alleging a violation of this statute, *Vt. Stat. Ann. tit. 9, § 2461(b)*. As relevant here, the VCFA defines a "consumer" as "a person who purchases, leases, contracts for, or otherwise agrees to pay consideration for goods or services not for resale in the ordinary course of his or her trade or business **[**111]** but for the use or benefit of his or her business or in connection with the operation of his or her business," *Vt. Stat. Ann. tit. 9, § 2451a(a)*, and Vermont law provides more generally that a statutory reference to a "person" encompasses corporations such as the GEICO entities in this case, *see Vt. Stat. Ann. tit. 1, § 128*. In Defendants' view, even if an insurance company such as GEICO might qualify as a "person" under the VCFA, it is not eligible for treatment as a "consumer" under the Vermont act because, to the extent that it made payments as an insurer, it did not engage in

[8] In their reply brief, Defendants do not address GEICO's consumer protection claim under Florida law, but instead suggest for the first time that GEICO's claim under New York's consumer protection law must be pleaded with particularity. (*See* Defendants' Reply Br. at 23-24.) Because this argument was advanced for the first time in Defendants' reply brief, the Court declines to consider it. *See Sundberg, 189 F. Supp.2d at 682-83*.

these transactions for the "use or benefit" of its own business, but rather for the benefit of its insureds. It follows, according to Defendants, that GEICO's claim under the VCFA must be dismissed.

In response, GEICO points to case law holding, in reliance on the plain language of the VCFA itself, that this Vermont statute "countenances a lawsuit brought by a corporation that purchased goods or services for the use or benefit of the business or in connection with the operation of the business, as long as the goods or services were not purchased for resale." *Ascension Technology Corp. v. McDonald Investments, Inc., 327 F. Supp.2d 271, 276 (D. Vt. 2003)*. In light of this interpretation, GEICO argues that it has sufficiently pleaded a claim under the VCFA through **[**112]** its allegations that it "purchased [relevant] [a]uto [p]arts from Defendants at artificially and illegally inflated prices on behalf of itself and as part of its contractual obligations to its insureds and claimants." (Plaintiffs' Response Br. at 42.) GEICO asserts that under either circumstance, auto parts were purchased "in connection with the operation of [GEICO's] business," whether as an **[*848]** owner of vehicles or as an insurer, and it maintains that this is sufficient to support a claim under the VCFA.

As Defendants point out, however, the Supreme Court of Vermont has held to the contrary, at least as to transactions engaged in by an insurer. ***HN43***[] In *Wilder v. Aetna Life & Casualty Insurance Co., 140 Vt. 16, 433 A.2d 309 (Vt. 1981)*, the plaintiff brought a claim under the VCFA based on the defendant insurer's alleged failure to make a payment as allegedly called for under a settlement agreement, but the court held that this claim was subject to dismissal on two grounds. First, the court reasoned that "the selling of an insurance policy is not a contract for 'goods or services' within the meaning of" the VCFA. *Wilder, 433 A.2d at 310*. Next, and of relevance here, the court observed that "we are not dealing with a contractual situation between buyer and seller," but that the court instead was **[**113]** being "asked to read into the [VCFA] a transaction one step removed" from a transaction in which a buyer purchases goods or services. *433 A.2d at 310*. In the court's view, the VCFA "deal[s] solely with consumer transactions in which there is an actual sale of goods or services involving a buyer, a seller, and the goods or services," and it declined to "stretch [the Act's] meaning as to evade the Legislature's intent." *433 A.2d at 310*.

The Court agrees with Defendants that this reading of the VCFA by Vermont's highest court precludes GEICO from recovering under the Act in its role as insurer. Although GEICO's payments as an insurer may reflect or somehow involve an underlying purchase of a relevant auto part — though, as already discussed, this is not invariably the case — such an insurance transaction is one step removed from the consumer transaction that the VCFA is intended to regulate — *i.e.*, the underlying purchase of a relevant auto part by a buyer from a seller. To be sure, GEICO allegedly engages in some consumer transactions of this sort in its role as the owner of a fleet of vehicles, and it may pursue a claim under the VCFA arising from these transactions. To the extent, however, that GEICO seeks to recover **[**114]** in its capacity as an insurer that makes payments to insureds or third-party claimants, the Court finds that such a recovery is not permitted under the VCFA.

I. Defendants' Challenges to GEICO's State Law Claims of Unjust Enrichment

Finally, Defendants argue that GEICO's common-law claims of unjust enrichment brought under the laws of various states are subject to dismissal on a number of grounds. The Court addresses each of these challenges in turn.

1. GEICO May Properly Pursue Its Claims of Unjust Enrichment as an Alternative Theory of Recovery, Even If These Claims Rest Upon the Same Allegations as GEICO's State Law Antitrust Claims.

First, and most broadly, Defendants argue that all of GEICO's state law claims of unjust enrichment are subject to dismissal because the allegations in support of these claims "do nothing more than recast, and are duplicative of, the allegations of anticompetitive conspiratorial conduct that underlie GEICO's antitrust claims." (Defendants' Motion, Br. in Support at 42.) In support of this challenge, Defendants point to cases holding that ***HN44***[] "unjust enrichment may not supply a valid cause of action in states where [the] plaintiffs are otherwise barred from **[**115]** recovery under [the] relevant antitrust and consumer protection statutes." *In re Packaged Seafood Products*

Antitrust Litigation, 242 F. Supp.3d 1033, 1088 (S.D. Cal. 2017); *see also* In re Opana ER Antitrust Litigation, MDL 2580, 2016 U.S. Dist. LEXIS 105915, 2016 WL 4245516, at *2 (N.D. Ill. Aug. 11, 2016).

[*849] As GEICO correctly observes in response, however, a plaintiff is permitted under Fed. R. Civ. P. 8(a)(3) to plead multiple theories of recovery in the alternative, and there is no requirement that each such theory must rest upon its own independent set of allegations. *See, e.g.,* In re K-Dur Antitrust Litigation, 338 F. Supp.2d 517, 544 (D.N.J. 2004). Defendants' argument to the contrary rests upon an overly broad reading of the above-cited cases, which hold only that a plaintiff who would otherwise be ***barred from recovery*** under the law of a particular state or its underlying policies cannot invoke a theory of unjust enrichment as a means of avoiding this state law bar. In *In re Packaged Seafood Products*, for example, the court first held that the end purchaser plaintiffs in that case could not pursue unjust enrichment claims "where the state otherwise bars indirect-purchaser recovery," but it then proceeded to evaluate the plaintiffs' "unjust enrichment arguments in states where their claims ***are not otherwise barred*** under [the] relevant antitrust and consumer protection laws." 242 F. Supp.3d at 1089 (emphasis added). To be sure, Defendants separately challenge GEICO's unjust enrichment claims under the laws of **[**116]** various states as an inappropriate end run around state laws that would otherwise bar its recovery, and the Court addresses these challenges below. Yet, Defendants' proposed application of this principle as an across-the-board bar to GEICO's recovery under a theory of unjust enrichment is not well taken, and the Court rejects it.

2. Defendants Have Failed to Provide Support for Their Assertion That the Antitrust Laws of Illinois, Maryland, and Rhode Island Preclude Recovery by Indirect Purchasers.

Defendants next advance a more specific variation on the broad contention addressed above: namely, that Plaintiff cannot pursue claims of unjust enrichment under the laws of three specific states — Illinois, Maryland, and Rhode Island — because indirect purchasers purportedly are precluded from recovering under the antitrust laws of these states. As noted earlier, ***HN45***[] a number of states have enacted socalled *Illinois Brick* repealer statutes that permit recovery by indirect purchasers under state ***antitrust law*** despite the prohibition against such a recovery under federal ***antitrust law***. In the absence of such a repealer statute, however, some courts have reasoned that an indirect purchaser plaintiff **[**117]** should not be permitted to recover under the equitable theory of unjust enrichment, as this would permit the plaintiff to circumvent the bar expressed through state law and policy against recovery by an indirect purchaser. *See* In re Packaged Seafood Products, 242 F. Supp.2d at 1088-89; In re Opana ER, 2016 U.S. Dist. LEXIS 105915, 2016 WL 4245516, at *2. In their present motion, Defendants assert that the three above-referenced states have not enacted *Illinois Brick* repealer statutes, but rather "continue to bar indirect purchaser claims under state ***antitrust law***." (Defendants' Motion, Br. in Support at 43.) It follows, in Defendants' view, that GEICO should not be permitted to pursue claims of unjust enrichment under the laws of these states.

As GEICO aptly observes in response, however, Defendants cite no authority whatsoever for their *ipse dixit* assertion that the three specified states bar recovery by indirect purchasers under state ***antitrust law***. To the contrary, GEICO states without contradiction that under Illinois law, at least, indirect purchaser plaintiffs are barred only from pursuing a ***class action*** antitrust suit. *See* 740 Ill. Comp. Stat. 10/7(2). Likewise, while the court in *In re Packaged Seafood Products* found **[*850]** that unjust enrichment claims could not be brought under the laws of states that "otherwise bar[] indirect-purchaser **[**118]** recovery," it notably proceeded to address the unjust enrichment claims of the indirect purchaser plaintiffs under the laws of states that did not "otherwise bar[]" recovery by indirect purchasers, and it identified Rhode Island as one such state. 242 F. Supp.3d at 1089, 1092. This leaves only Maryland, and Defendants do not identify any support whatsoever for their contention that indirect purchasers are barred from recovering under Maryland ***antitrust law***. Accordingly, Defendants have not identified a basis for the dismissal of GEICO's unjust enrichment claims under the laws of Illinois, Maryland, or Rhode Island.

3. GEICO Has Adequately Pleaded That Its Alleged Overpayments for Auto Parts Conferred a Benefit on Defendants, and That These Injuries Flowed from Defendants' Allegedly Unlawful Conduct.

In the fourth count of its second amended complaint, GEICO has asserted claims of unjust enrichment under the laws of 28 states and the District of Columbia. According to Defendants, the unjust enrichment laws of thirteen of these states, as well as the District of Columbia, require a plaintiff to allege that it conferred a direct benefit upon the defendant. As this Court has observed in the multidistrict litigation, **[**119]** ***HN46***[] the "critical inquiry" in evaluating this "direct benefit" element of a claim of unjust enrichment is "not whether the benefit is conferred directly on the defendant, but whether the plaintiff can establish [that] the relationship between his detriment and the defendant's benefit flows from the challenged conduct" of the defendant. *Fuel Senders, 29 F. Supp.3d at 1015* (internal quotation marks and citation omitted). In Defendants' view, GEICO has failed to allege this requisite relationship, nor has it "describe[d] how it is possible to trace [GEICO's] alleged detriment through a quagmire of insurance contracts, deductibles, full and partial reimbursements, apportionments of fault, discount arrangements with suppliers and repair shops, payment caps, or insurance settlements for total losses to the Defendants' benefit." (Defendants' Motion, Br. in Support at 44.)

Yet, as a threshold matter, although this Court in the multidistrict litigation found it necessary to conduct a lengthy and comprehensive state-by-state inquiry in order to resolve a similar "direct benefit" challenge, *see, e.g., Fuel Senders, 29 F. Supp.3d at 1015-29*; *Instrument Panel Clusters, 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *26-*38*, Defendants fail to engage in any such analysis here. Instead, Defendants merely provide a list of purportedly relevant case law **[**120]** as an exhibit to their motion, (*see* Defendants' Motion, Ex. F-1), without discussing these decisions or otherwise attempt to illustrate how the "direct benefit" element of a claim of unjust enrichment might be construed or applied under the law of any given state. Plainly, the Court is under no obligation to fashion arguments or conduct such a state law survey on Defendants' behalf.

In any event, Defendants' challenge on this point is largely defeated by the Court's analysis of this issue in the multidistrict litigation. As the Court emphasized at the threshold of its state-by-state inquiry, GEICO's allegations in support of its claims of unjust enrichment must not be considered "in isolation, but in light of all of the factual allegations in the complaint[]." *Fuel Senders, 29 F. Supp.3d at 1014*; *see also* *Instrument Panel Clusters, 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *25*. The Court further observed that "although the particular elements of [a claim of] unjust enrichment **[*851]** vary from jurisdiction to jurisdiction," this theory of recovery generally entails a showing "that Defendants received a benefit and under the circumstances of the case, retention of the benefit would be unjust." *Fuel Senders, 29 F. Supp.3d at 1014*.

Against this backdrop, the Court has repeatedly embarked on the state-by-state analysis that Defendants **[**121]** have failed to provide in their present motion. Specifically, on at least three separate occasions in the multidistrict litigation, this Court has expressly addressed and rejected the "direct benefit" challenge advanced by Defendants here under the laws of eleven of the thirteen states identified in Defendants' motion, as well as the District of Columbia. *See* *In re Automotive Parts Antitrust Litigation (In re Bearings), 50 F. Supp.3d 836, 864-65 (E.D. Mich. 2014)* ("Bearings"); *Fuel Senders, 29 F. Supp.3d at 1017-28*; *Instrument Panel Clusters, 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *30-*38*. In the course of this state-by-state inquiry, the Court considered, and distinguished, many of the cases cited in Defendants' table of purportedly relevant authority. Defendants have not acknowledged this Court's rulings in the multidistrict litigation, much less attempted to distinguish them, so there is no basis for the Court to depart from its prior treatment of the very same issues advanced by Defendants here.

These leaves only the unjust enrichment laws of two states, Alabama and Mississippi, that the Court had no occasion to address in the multidistrict litigation. In support of their reading of Alabama law as demanding that a plaintiff must have conferred a direct benefit upon the defendant, Defendants point to the decision in **[**122]** *Danny Lynn Electrical & Plumbing, LLC v. Veolia ES Solid Waste Southeast, Inc., No. 2:09cv192, 2011 U.S. Dist. LEXIS 78557, 2011 WL 2893629, at *6 (M.D. Ala. July 19, 2011)*. In that case, the plaintiffs alleged that they paid unlawfully inflated waste removal fees to the corporate defendant, and that this defendant, in turn, paid a portion of its increased profits to the individual defendant employees in the form of higher annual bonuses. Because "there was no money paid *by* the plaintiffs *to* the named individual[]" defendants, and there likewise was "no benefit conferred upon the individual defendants *by* the plaintiffs," the court held that the plaintiffs could not pursue claims of unjust enrichment against these individuals. *Danny Lynn Electrical, 2011 U.S. Dist. LEXIS 78557, 2011 WL 2893629, at *6* (emphasis in original). Yet, as explained by this Court in distinguishing an analogous "direct benefit" case decided under Florida law, the decision in *Danny Lynn Electrical* does not "involve the flow of payment up a chain of distribution." *Fuel Senders, 29 F. Supp.3d at 1018*. Rather, the plaintiff in that case sought to expand the pool of defendants to include not only the corporate defendant that had demanded allegedly excessive fees, but also those individuals to whom the company had distributed a portion of its allegedly unlawful profits. Thus, the Alabama case law identified by Defendants fails to establish the proposition for which it is cited: **[**123]** namely, that a claim of unjust enrichment under Alabama law cannot rest upon a benefit that allegedly is traceable through a chain of distribution from the indirect purchaser plaintiff to the defendant supplier.

The Mississippi decision cited by Defendants is likewise distinguishable — and, indeed, this Court has already distinguished it in the multidistrict litigation, albeit on slightly different grounds. In *Omnibank of Mantee v. United Southern Bank, 607 So.2d 76, 93 (Miss. 1992)*, the court held that "a person who has conferred a benefit on another, by making a contract with a third person, is not entitled to restitution from the other merely because of the failure of performance by the **[*852]** third person." As this Court observed in the multidistrict litigation, *Omnibank* "does not address the relationship of indirect purchasers [to defendant suppliers] on a price-fixing conspiracy claim, and there was no allegation of wrongdoing by the defendant" in that case. *Fuel Senders, 29 F. Supp.2d at 1022*. Just as *Omnibank* did not support the "benefit of the bargain" challenge advanced by the defendants in *Fuel Senders*, it has nothing to say about the "direct benefit" issue raised by Defendants here, and Defendants have not even attempted to put forward an argument that might lead the Court to conclude **[**124]** otherwise.

To be sure, Defendants point out that GEICO, in its role as insurer, has a more attenuated relationship with the Defendant auto parts suppliers than the indirect purchaser plaintiffs in the multidistrict litigation. Most notably, when GEICO makes a Total Loss Payment — *i.e.*, a payment to an insured or third-party claimant for the total loss of a vehicle — none of this payment is spent on the purchase of auto parts for the totaled vehicle, and Defendants therefore derive no benefit from such payments. Even where GEICO's payment as an insurer can ultimately be traced to the purchase of auto parts, Defendants observe that this payment is affected by myriad factors apart from Defendants' allegedly supracompetitive pricing, such as the terms of insurance contracts, deductibles, discount arrangements, payment caps, and insurance settlements. (*See* Defendants' Motion, Br. in Support at 44.) Although this Court has recognized in the multidistrict litigation that, under the laws of the relevant states, the requisite benefit to the defendant need not be conferred through direct contact with the plaintiff, *see Bearings, 50 F. Supp.3d at 864-65* (collecting cases), and other federal district courts have reached the same **[**125]** conclusion under the laws of many of the same states, *see, e.g., In re Processed Egg Products Antitrust Litigation, 851 F. Supp.2d 867, 927-34 (E.D. Pa. 2012)*; *In re TFT-LCD (Flat Panel) Antitrust Litigation, 599 F. Supp.2d 1179, 1189-90 (N.D. Cal. 2009)*, GEICO nonetheless must allege that there is a "relationship between [its] detriment and [Defendants'] benefit [that] flows from the challenged conduct" of the Defendant auto parts suppliers, *Fuel Senders, 29 F. Supp.3d at 1015* (internal quotation marks and citation omitted).

Admittedly, this requisite relationship between GEICO's detriment and benefit to one or more Defendant suppliers may be difficult, if not impossible, to ascertain in the case of at least some of GEICO's payments as an insurer. Nevertheless, GEICO has identified other transactions in which it makes payments analogous to those remitted by a traditional indirect purchaser. Most significantly, in its role as owner of a fleet of automobiles, GEICO stands in precisely the same role as other end purchaser plaintiffs who have bought vehicles at allegedly inflated prices due to Defendants' alleged price-fixing conspiracies. Even in GEICO's role as an insurer that makes payments to repair shops to cover the cost of replacement parts used in fixing an insured's or third-party claimant's vehicle, GEICO points to the widespread reliance on insurance to pay for replacement parts, (*see* Plaintiffs' **[**126]** Response Br. at 17), and it argues that this "generally-understood insurance paradigm" will enable it to forge a connection between its payments and a benefit to the Defendant parts suppliers, (*id.* at 45-47). Against this backdrop, the Court is satisfied that GEICO has adequately pleaded a relationship between its detriment and benefit to the Defendant suppliers for at least some of the transactions identified in the complaint, and the Court declines at this juncture to inquire too deeply into **[*853]** which particular transactions may support a recovery under the unjust enrichment laws of a given state and which may not.

4. GEICO Need Not Allege That It Failed To Receive the Benefit of the Bargain or Bargained-For Consideration in the Transactions Giving Rise to Its Claims of Unjust Enrichment.

Defendants next point to the laws of seventeen states, as well as the District of Columbia, as purportedly mandating the dismissal of claims of unjust enrichment "where [the] parties voluntarily have negotiated, entered into and fully performed their bargain." (Defendants' Motion, Br. in Support at 44 (quoting *In re Intel Corp. Microprocessor Antitrust Litigation, 496 F. Supp.2d 404, 421 (D. Del. 2007)* (internal quotation marks and citation omitted)).) In Defendants' view, although GEICO alleges that it **[**127]** was overcharged for relevant auto parts, this allegation alone "is insufficient to state a claim for unjust enrichment where, as here, GEICO does not assert that it did not obtain what it bargained for (*e.g.*, the settlement of an insurance claim)." Similarly, Defendants contend that GEICO's unjust enrichment claims under the laws of nine states are defeated by virtue of Defendants having provided "bargained-for consideration" in the form of functioning auto parts delivered to OEMs or other direct purchasers. (Defendants' Motion, Br. in Support at 45-46.) Once again, however, Defendants' support for these challenges consists largely of tables of purportedly relevant authorities, (*see* Defendants' Motion, Exs. F-2, F-3), without any accompanying explanation of what these cases hold or how they might apply to the facts and allegations presented here.

More importantly, Defendants again have made no attempt to distinguish the decisions of this Court in the multidistrict litigation that addressed and rejected these very same challenges. In *Bearings, 50 F. Supp.3d at 865*, for instance, the defendant auto part suppliers contended that the IPPs' claims of unjust enrichment were subject to dismissal because the plaintiffs **[**128]** had "entered into . . . voluntary agreement[s] and received the benefits of their respective bargains." The Court found that the case law cited by the defendants in support of this challenge — a series of decisions that overlaps considerably with the cases cited by Defendants here — "does not support dismissal of a price-fixing claim on this basis," but instead was distinguishable on the ground that the plaintiffs in those cases had entered into contractual relationships with the defendants. *Bearings, 50 F. Supp.3d at 865-67* (surveying cases from a number of jurisdictions). Thus, the Court concluded that the IPPs' unjust enrichment claims were not subject to dismissal, explaining that "[i]n contrast to the case law cited by Defendants, here the parties were not in a direct bargaining relationship" through which the IPPs could have attained the benefit of a contractually agreed-upon bargain. *50 F. Supp.3d at 867*; *see also* *Fuel Senders, 29 F. Supp.3d at 1015-28* (likewise addressing most of the cases cited by Defendants here and concluding that the IPPs' claims of unjust enrichment were not subject to dismissal under this authority); *Instrument Panel Clusters, 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *26-*38* (same).

These same decisions in the multidistrict litigation likewise defeat Defendants' contention that they cannot be held liable for unjust **[**129]** enrichment because they "provided consideration in exchange for any payments they received." (Defendants' Motion, Br. in Support at 46 (footnote omitted).) In *Bearings, 50 F. Supp.3d at 863*, for example, the Court first observed that the defendants had "failed to cite a single case finding that payment or receipt of anything **[*854]** of value from a defendant will defeat a plaintiff's claim[] for unjust enrichment." As for the cases cited by the defendants in support of this challenge — nearly all of which Defendants likewise rely upon in this case — the Court found them distinguishable as either (i) arising "in the context of general contractor/subcontractor relationships," or (ii) addressing "inapposite" and fact-specific circumstances such as the terms of a particular contract or the liability of a principal for the actions of its agent. *Bearings, 50 F. Supp.3d at 863-64* (surveying cases); *see also* *Fuel Senders, 29 F. Supp.3d at 982*; *Instrument Panel Clusters, 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *26*. Consistent with these prior rulings in the multidistrict litigation, the Court holds that GEICO's unjust enrichment claims withstand Defendants' "benefit of the bargain" challenge, as well as Defendants' contention that the remedy of unjust enrichment is unavailable where the Defendant auto part suppliers provided consideration in exchange for the payments **[**130]** they received.

5. GEICO Has Satisfied the Specific Pleading Requirements Identified in Defendants' Motion.

Finally, Defendants maintain that GEICO has not met the specific pleading requirements purportedly imposed under the unjust enrichment laws of Illinois, Mississippi, New York, Tennessee, and West Virginia. As GEICO correctly observes in response, however, the Court rejected these very same challenges to state law claims of unjust enrichment in its decisions in the multidistrict litigation. *See* *Bearings, 50 F. Supp.3d at 867* (rejecting the defendants' challenge under Illinois law);[9] *Fuel Senders, 29 F. Supp.3d at 1022* (declining to dismiss the IPPs' claim under Mississippi law); *Fuel Senders, 29 F. Supp.3d at 1024* (rejecting the contention that the IPPs' claim under New York law was subject to dismissal because the connection between them and the defendant suppliers was "too attenuated"); *Bearings, 50 F. Supp.3d at 868* (declining to apply an exhaustion-of-remedies requirement to the IPPs' claim under Tennessee law); *Fuel Senders, 29 F. Supp.3d at 1028* (finding that the IPPs had adequately pleaded the elements of a claim of unjust enrichment under West Virginia law).

This leaves only Defendants' cursory contention — advanced in the span of three sentences and unaccompanied by any reasoned argument or discussion of supporting authority — that the **[**131]** laws of eleven states and the District of Columbia foreclose a claim for unjust enrichment where "the subject of the dispute is covered by a contract" that "affords [the plaintiff] an adequate remedy at law." (Defendants' Motion, Br. in Support at 47.) Although Defendants state as a matter of *ipse dixit* that the subject of the dispute in this case is covered by the "contract[s] between GEICO and its insureds," (*id.)*, GEICO correctly observes in response that the true matter in dispute here — namely, "the artificially inflated prices caused by Defendants' [allegedly] illegal conduct" — cannot remotely be viewed as covered by or addressed in GEICO's insurance contracts with its insureds. (Plaintiffs' Response Br. at 49.) Nor do Defendants suggest how any relief available to GEICO under its insurance contracts might serve as an adequate remedy at law for the overcharges giving rise to its claims of unjust enrichment. Finally, the **[*855]** Court has addressed and distinguished many of the cases identified by Defendants in support of this challenge. *See* *Fuel Senders, 29 F. Supp.3d at 1019*; *Instrument Panel Clusters, 2014 U.S. Dist. LEXIS 90724, 2014 WL 2993753, at *27*. Accordingly, this final challenge to GEICO's claims of unjust enrichment lacks merit.

V. CONCLUSION

For these reasons, the Court **GRANTS IN PART [**132]** and **DENIES IN PART** Defendants' April 14, 2017 collective motion to dismiss GEICO's second amended complaint (Dkt. 62). Specifically, this motion is granted as to: (i) GEICO's improper joinder of sixteen part-specific antitrust conspiracy claims in a single suit; (ii) GEICO's inadequate allegations of Article III standing to assert claims under the laws of each of the various jurisdictions identified in its complaint; (iii) GEICO's lack of antitrust standing in its capacity as insurer to pursue claims under federal and state ***antitrust law***; (iv) GEICO's assertion of antitrust claims under the laws of the nine jurisdictions identified earlier in this opinion as the "Nexus States," as well as the laws of Utah and Oregon; (v) GEICO's assertion of antitrust claims under the laws of New Hampshire and Utah arising from conduct that predated the states' enactment of *Illinois Brick* repealer provisions; and (vi) GEICO's assertion of consumer protection claims under the laws of Arkansas, New York, and Vermont in its capacity as insurer. With respect to GEICO's improper joinder of separate part-specific conspiracies in a single suit and its inadequate allegations of Article III standing, GEICO **[**133]** is granted leave to file separate suits for each of the alleged part-specific conspiracies, and it may take this opportunity to address the Article III standing deficiencies identified in this opinion and order. In all other respects, Defendants' motion is denied.

IT IS SO ORDERED.

Date: August 30, 2018

Opinion

MEMORANDUM OPINION

This matter comes before the Court on Defendant Mohamed Abdellahi Mohamed Horma's Motion to Dismiss Counts One through Four of the Indictment (the "Motion to Dismiss"). (ECF No. 14.) The United States responded,[1] (ECF No. 21), and Horma replied, (ECF No. 24). The United States filed a Sur-Reply,[2] which the Court will not

---

[1] The United States also filed an "Amended Response" the day after filing its Response, and one day after its deadline to respond to Horma's Motion to Dismiss. (ECF No. 22.) No motion accompanied the "Amended Response." The Court will not consider the Amended Response.

[2] *Local Rule of Criminal Procedure 47* governs motions in criminal cases. *Local Criminal Rule 47(F)(1)* prescribes the timeline by which parties must file response and reply briefs to criminal motions. *See* *E.D. Va. Loc. Crim. R. 47(F)(1)*. It also states: "No further briefs or written communications may be filed without first obtaining leave of Court." *Id.*

consider. (ECF No. 25.) Pursuant to the Court's order, the parties submitted additional briefing on several discrete issues. (ECF Nos. 37, 38.) On July 9, 2018, the Court heard arguments on the Motion to Dismiss, during which the parties referred to stipulations and presented exhibits, which they later filed.[3] (ECF Nos. 41, 42.) The Motion to Dismiss is ripe for disposition. For the reasons discussed **[*2]** below, the Court must deny without prejudice the Motion to Dismiss as to all Counts.

I. Factual and Procedural Background

Horma, bom in Morocco and a citizen of Mauritania, came to the United States on December 29, 2013, at the age of nineteen. He entered on a valid six-month B-l/B-2 tourist visa, which expired on June 28, 2014. On February 4, 2014, more than four months before his tourist visa expired, Horma filed an Application for Asylum (the "Asylum Application") with the United States Citizenship and Immigration Services (the "USCIS"). USCIS received the Asylum Application on February 13, 2014. Pursuant to *8 U.S.C. § 1158(d)(2)*,[4] Horma could not have been granted employment authorization "prior to 180 days after the date of filing" of the Asylum Application. *8 U.S.C. § 1158(d)(2)*. Given this timing, Horma became eligible for work authorization after his six-month visa expired. On September 21, 2015, USCIS notified Horma that he was eligible to apply for work authorization, (Referral Not. 2, ECF No. 41-3), but nothing in the record establishes whether Horma actually received it. The record indicates that he worked as an Uber driver. (Nov. 15, 2016 Tr. 17, ECF No. 41-9.)

On April 16, 2014, the Asylum Office Director sent Horma a "Notice of Intent to Deny" (the "NOID"), expressing an intent to deny Horma's Asylum Application and articulating why. On May 13, 2014, Horma submitted a rebuttal through counsel responding to the reasons articulated in the NOID for the intended denial and including additional information. On September 17, 2015, Horma received a Notice to Appear to demonstrate why he should not be removed from the United States. The Notice to Appear included notification to Horma that he was "removable" as a non-citizen who overstayed his tourist (nonimmigrant) visa and remained in the United States "without authorization." (Not. Appear 1, ECF No. 41-4.) The Notice to Appear also ordered Horma to "appear before an immigration judge" to show cause why he should not be removed from the United States, but it did not set a date for Horma's hearing, noting it **[*4]** only as "TBD," or To Be Determined. (*Id.*)

On September 21, 2015, USCIS issued a Referral Notice stating that, "after careful consideration," Horma's Asylum Application was not deemed credible. (Stip. 8; Referral Not. 1.) The Referral Notice also advised Horma that his

---

The United States did not seek leave of Court to file its Sur-Reply, instead declaring that some of Horma's arguments in his Reply "warrant[] only a brief response." (U.S. Reply 1, ECF No. 25.) *E.D. Va. Local Criminal Rule 47* provides that the Court (and not a party) determines the need for additional briefing. *See* *E.D. Va. Loc. Crim. R. 47(F)(1)*. The Court will disregard the Sur-Reply.

[3] At the hearing, the parties presented the record unconventionally. They did not have a list of proposed stipulations or a complete version of exhibits. An oral recitation of stipulated facts proved unfruitful: the United States could not identify important dates, and gave conflicting dates for some events. The United States also offered, contrary to local rules, only unredacted versions of exhibits that included sensitive identifying information about Horma.

So as not to further delay the hearing, the Court directed the parties to jointly file redacted exhibits and written stipulations. At the end of the hearing, the parties requested until close of business July 12, 2017, to make this joint filing, which the Court ordered. On July 12, 2017, Horma filed an Unopposed Motion for Leave, seeking additional time to file the Stipulations. (ECF No. 40.) Soon thereafter, Horma filed the Stipulations. (ECF No. 42.) The Court will grant the Motion for Leave. (ECF No. 40.)

[4] *Section 1158(d)(2)* provides that

> [a]n applicant for asylum is not entitled to **[*3]** employment authorization, but such authorization may be provided under regulation by the Attorney General. An applicant who is not otherwise eligible for employment authorization shall not be granted such authorization prior to 180 days after the date of filing of the application for asylum.

8 U.S.C. § 1158(d)(2).

Asylum Application was referred to an immigration judge who would independently consider it. The Referral Notice stated in bold: "**This is not a denial of your asylum application**." (Referral Not. 1.) On May 5, 2016, USCIS sent Horma a Notice of Hearing in Removal Proceedings in Immigration Court informing Horma that an immigration judge would hear his matter on March 2, 2021.[5] Nothing in the record suggests that Horma has ever appeared before an immigration judge.[6]

On July 13, 2016, while Horma's Asylum Application was pending, he was arrested in Howard County, Maryland, and charged with: (1) shipping, importing, selling into or within, or transporting into Maryland cigarettes or other tobacco products on which the tobacco tax had not been paid, in violation of *Maryland Tax Code § 13-1015(a)*[7] (the "Maryland Tax Statute"); and, (2) unlawful and willing possession, sale, or attempt to sell unstamped or improperly stamped cigarettes, in violation **[*5]** of *Maryland Tax Code 13-1014*.[8] (Stip. 10; Md. Compl., ECF No. 41-6.) On July 27, 2016, a grand jury in Howard County indicted Horma on both of those charges. On September 2, 2016, Horma was arraigned in the Circuit Court for Howard County, Maryland ("the Howard County Court"), on both charges.[9] At the arraignment, the Howard County Court informed Horma of the charges against him and their maximum possible penalties, and Horma stated on the record that he had received a copy of the indictment.

Just over two months later, on November 15, 2016, Horma, with the assistance of an interpreter, pled guilty to felony transportation of untaxed cigarettes, in violation of the Maryland Tax Statute. Horma was sentenced to eleven months' imprisonment, all suspended; a fine of $107,550, with all but $2,000 suspended; and two years of unsupervised **[*6]** probation.

The next day, on November 16, 2016, law enforcement obtained and executed a search warrant for Horma's residence. During the execution of that warrant, law enforcement allegedly recovered a Ruger firearm and ammunition.[10]

---

5 The United States asserts in briefing that this date was later advanced to August 3, 2018. (Resp. Mot. Dismiss 3.) The United States submitted no stipulation or exhibit supporting this assertion. No evidence before the Court indicates that Horma's hearing before an immigration judge might occur on a date other than March 2, 2021. To date, neither party has reported that a hearing has occurred.

6 Horma asserts in briefing that he has "submitted to biometrics administered by immigration officials[, and] attended all scheduled interviews[,]" to facilitate a full adjudication of his Asylum Application. (Mot. Dismiss 2.) This claim has no bearing on the Court's holding.

7 The Maryland Tax Statute provides that

> [a] person who willfully ships, imports, sells into or within, or transports within, [Maryland] cigarettes or other tobacco products on which the tobacco tax has not been paid in violation of [various regulations governing the sale and transportation of cigarettes] is guilty of a felony and, on conviction, subject to the penalties set forth in *subsections (b)* and *(c)* of this section.

Md. Code, Tax-Gen. § 13-1015(a).

8 *Section 13-1014* of the Maryland Tax Code provides that "[a] person who willfully possesses, sells, or attempts to sell unstamped or improperly stamped cigarettes in [Maryland] in violation of [various regulations governing the sale and transportation of cigarettes] is guilty of a misdemeanor." *Md. Code, Tax-Gen. § 13-1014(a)(1)*.

9 Horma's arraignment occurred without the benefit of an interpreter. Given Horma's presentation in this Court, and having reviewed the record, nothing that occurred in the Howard County Court gives the Court pause.

10 The United States asserted in its briefing that: (1) on November 16, 2016, Horma was arrested in Albemarle County on charges of Possession of Cigarettes with the Intent to Distribute; (2) law enforcement executed a search warrant on Horma's vehicle, during which they uncovered a receipt for a firearm purchased for cash on November 12, 2016, from the War Store; (3) the Ruger recovered during the search of Horma's residence was found in Horma's bedroom dresser; and, (4) Horma admitted that he "had taken the gun from the purchaser" and kept it in his room. (Resp. Mot. Dismiss 4-5.) The United States put none of these facts before the Court in the form of either exhibit or stipulation. The Court, therefore, will not consider them in ruling on the Motion to Dismiss.

On February 20, 2018, a federal grand jury in the Eastern District of Virginia returned a five-count Indictment, (ECF No. 9), and on May 15, 2018, returned a five-count Superseding Indictment,[11] (ECF No. 28). The Superseding Indictment charges Horma as follows:[12]

> **Count One**: Possession of a Firearm by an Illegal Alien, in violation of *18 U.S.C. § 922(g)(5)(A)*, on September 21, 2016.
>
> **Count Two**: Possession of a Firearm and Ammunition by an Illegal Alien, in violation of *18 U.S.C. § 922(g)(5)(A)*, on November 12, 2016.
>
> **Count Three**: Receipt of a Firearm by a Person Under Indictment, in violation of *18 U.S.C. §§ 922(n)* and *924(a)(1)(D)*, on September 21, 2016.
>
> **Count Four**: Receipt of a Firearm by a Person Under Indictment, in violation of *18 U.S.C. §§ 922(n)* and *924(a)(1)(D)*, on November 12, 2016.
>
> **Count Five**: False Statements in the Acquisition of a Firearm, and Aiding and Abetting that Crime, in violation of *18 U.S.C. §§ 922(a)(6)* and *(2)*, on November 12, 2016.

Horma moves to dismiss Counts One through Four of the Superseding Indictment.[13] As to Counts One and Two, Horma contends that the charges must be dismissed **[*7]** because he does not qualify as "an alien . . . illegally or unlawfully in the United States," as set forth in *18 U.S.C. § 922(g)(5)(A)* because he "has only ever been present in the United States on a valid visa, or later under a period of authorized stay due to a pending bona fide asylum application." (Mot. Dismiss 1-2.) As to Counts Three and Four, Horma argues that the Maryland Indictment cannot support a charge under *18 U.S.C. § 922(n)* because the crime for which he was under indictment does not constitute "a crime punishable by imprisonment for a term exceeding one year," *18 U.S.C. § 922(n)*, as that phrase is defined in *18 U.S.C. § 921(a)(20)*. (Mot. Dismiss 1.) Horma argues in the alternative that *§ 922(n)* is void for vagueness, and that it amounts to an unconstitutional infringement of the *Second Amendment to the United States Constitution*.

Based on the record presented to the Court, Horma's challenge to Counts One and Two must fail because the parties did not brief the proper legal issues or provide determinative factual evidence. *Title 18, Section 922(g)(5)(A)* prohibits someone who "is illegally or unlawfully in the United States" from possessing a firearm. *18 U.S.C. § 922(g)(5)(A)*. On the record presented, the Court cannot determine the legality of Horma's presence in the United States after his visa expired.

First, USCIS policies and provisions distinguish **[*8]** between a person's immigration status and the lawfulness of his or her presence in the United States. *See infra* Part II B. A person may be in illegal *immigration status* and be

[11] The Superseding Indictment contains only typographical changes, and charges Horma with the same five crimes arising from the same alleged conduct as the original Indictment. Although the United States filed the Superseding Indictment after much of the briefing on the Motion to Dismiss concluded, the parties' arguments regarding the original Indictment apply with equal force to the Superseding Indictment. The Court did not order new briefing after the United States filed the Superseding Indictment, nor did Horma seek any. For clarity, the Court refers to the Superseding Indictment, throughout this Memorandum Opinion.

[12] In briefing, the United States expanded on the facts underlying the charges in the Superseding Indictment. Specifically, the United States asserted that, underlying the charges in Counts One and Three, on September 21, 2016, Horma went to a Richmond shooting range and rented a gun and ammunition, which he paid for using his credit card. As to the charges in Counts Two, Four, and Five, the United States contended that, on November 12, 2016, Horma and an unidentified individual went to a federally licensed firearms dealer, where the unidentified individual purchased a handgun and ammunition. Horma and the individual returned to Horma's residence, and Horma put the handgun in his bedroom dresser. The United States introduced no stipulation or exhibit supporting these facts, however. The Court therefore will not consider these facts in ruling on the Motion to Dismiss.

[13] Horma does not challenge Count Five in the Motion to Dismiss.

unlawfully present. Under certain circumstances, a person may be in *illegal immigration status*, but retain *lawful presence* in the United States. Horma may have illegal immigration status but retain legal presence.

Second, because parties failed to identify this critical distinction, they also failed to develop the factual record necessary to make this fact-specific determination. Despite the Court's specific request to identify the date of Horma's work authorization, the parties failed to include that information in the record they placed before the Court. The determination of Horma's lawful or unlawful presence turns on that date. The Court will deny without prejudice the Motion to Dismiss Counts One and Two.

As to the challenges to *§ 922(n)* with regard to Counts Three and Four, Horma's argument that the Maryland Tax Statute does not constitute "a crime punishable by imprisonment for a term exceeding one year," *18 U.S.C. § 922(n)*, as defined in *18 U.S.C. § 921(a)(20)* fails. His vagueness challenge to *§ 922(n)* also fails. Those aspects of Horma's challenge will be denied **[*9]** with prejudice. But, given the parties' briefing and relevant United States Court of Appeals for the Fourth Circuit precedent, the Court declines to reach Horma's *Second Amendment* challenge on this record. The Court will deny without prejudice that aspect of Horma's Motion to Dismiss Counts Three and Four.

II. Counts One and Two: Possession of a Firearm by an Illegal Alien

Title 18, *Section 922(g)(5)(A)* prohibits someone who is "illegally or unlawfully in the United States" from possessing a firearm. *18 U.S.C. § 922(g)(5)(A)*. The United States contends that, because Horma's tourist visa expired before the adjudication of his asylum application, he was illegally or unlawfully in the United States at the time he allegedly possessed the firearm. Horma counters that he applied for asylum before his tourist visa expired, meaning that he never became illegally or unlawfully present for purposes of *18 U.S.C. § 922(g)(5)(A)*.

USCIS guidance and policies make clear that a material difference exists between a person's immigration status and the lawfulness of his or her presence in the United States. A person's immigration status may be illegal, but he or she may still be lawfully present in the United States. Because neither party identified the distinction between a person's immigration **[*10]** status and the lawfulness of his or her presence, the parties did not brief whether "illegally or unlawfully in the United States" in *18 U.S.C. § 922(g)(5)(A)* refers to a person's immigration status, the lawfulness of his or her presence, or both. Conflicting findings about status and presence could create an ambiguity when *§ 922(g)(5)(A)* is applied.

Critical to the finding here, though, is whether and when Horma received a work authorization. Horma's immigration status became illegal when he overstayed his original visa. However, whether Horma accrued unlawful presence from that day forward depends upon whether he worked without first receiving a work authorization. Here, Horma may present a hybrid situation: he has illegal immigration status, but, if he did not work without authorization, he has not yet begun to accrue unlawful presence.

The United States failed to present, and the Court has been unable to find, any authority that suggests that *Section 922(g)(5)(A)* contemplates only a person's illegal immigration status. Horma may, then, distinguish himself from the defendants in the cases cited by the United States in support of their position. For the reasons outlined below, the Court finds that, absent a more complete record, it must deny **[*11]** without prejudice the Motion to Dismiss Counts One and Two.

A. Legal Standard: In This Criminal Motion to Dismiss, The Court May Consider the Stipulated Evidence Before It

Federal Rule of Criminal Procedure 12(b)(1) states that "[a] party may raise by pretrial motion any defense, objection, or request that the court can determine without a trial on the merits." *Fed. R. Crim. P. 12(b)(1)*. A court may not decide a criminal case on a motion for summary judgment, *United States v. Weaver, 659 F.3d 353, 355 n.* (4th Cir. 2011)*, so in deciding a pretrial motion to dismiss the indictment, "a court may not dismiss an indictment . .

. on a determination of facts that should have been developed at trial," United States v. Engle, 676 F.3d 405, 415 (4th Cir. 2012). However, "a district court may consider a pretrial motion to dismiss an indictment where the government does not dispute the ability of the court to reach the motion and proffers, stipulates, or otherwise does not dispute the pertinent facts." Weaver, 659 F.3d at 355 n. * (citing United States v. Flores, 404 F.3d 320, 325 (5th Cir. 2005); United States v. Yakou, 428 F.3d 241, 247, 368 U.S. App. D.C. 162 (D.C. Cir. 2005)). In *Engle*, the Fourth Circuit affirmed the District Court's denial of Engle's motion to dismiss and distinguished *Weaver* by stating: "*Weaver* is inapplicable . . . because the government did not proffer or stipulate to the pertinent facts . . . and . . . some of the relevant . . . facts were developed only at trial." Engle, 676 F.3d at 416 n. 7.

B. Legal Standard: A Distinction [*12] Exists Between Immigration Status and Unlawful Presence

USCIS guidance makes clear that an alien's immigration status and the lawfulness of his or her presence constitute related, but separate inquiries. UNITED STATES CITIZENSHIP AND IMMIGRATION SERVICES, ADJUDICATOR'S FIELD MANUAL ch. 40.9(a)(2) ("Adjudicator's Field Manual"), available at https://www.uscis.gOv/ilink/docView/AFM/HTML/AFM/0-0-0-l/0-0-0-17138/0-0-0-18383.html#0-0-0-617 (last accessed Aug. 26, 2018).[14]

1. USCIS Determines an Alien's Immigration Status by Examining Compliance with His or Her Visa Requirements

An alien maintains legal immigration status as long as he or she complies with the requirements of his or her visa. *See, e.g.*, Adjudicators Field Manual ch. 40.9(a)(2)-(3); Memorandum for Thomas E. Cook, Acting Assistant Comm'r, Office of Adjudications, Immigration and Naturalization Serv. from Janice Podolny, Chief, Inspections Law Div., Office of Gen. Counsel (Mar. 27, 2003) ("Cook Memo"), available at https://www.uscis.gov/sites/default/files/files/pressrelease/PofStav4023Pub.pdf (last accessed Aug. 26, 2018). The USCIS Policy Manual states that "[f]oreign nationals in unlawful immigration status generally include: **[*13]** foreign nationals who entered the United States without inspection and admission or parole; and [f]oreign nationals whose lawful immigration status expired or was rescinded, revoked, or otherwise terminated." UNITED STATES CITIZENSHIP AND IMMIGRATION SERVICES, POLICY MANUAL vol. 7, pt. B, ch. 3 (2017) ("USCIS Policy Manual"), available at https://www.uscis.gov/policvmanual/HTML/PolicvManual-Volume7-PartB-Chapter3.html. The USCIS Policy Manual states that an alien's immigration status changes to illegal "[o]n the day after the foreign national's authorized status has . . . expired . . . while he or she is physically present in the United States." *Id.*

As described in other USCIS guidance, whether a foreign national has a pending asylum application or other pending change of status application does not affect whether the person's immigration status changes to illegal. "[A] pending application or petition does not automatically afford protection against removal if the foreign national's status expires after submission of the application." *Id.* The Cook Memo explains that a pending application for extension of status or change of status does not create a "'bridge' of continuing status." Cook **[*14]** Memo. 3. The pending application, if filed while the alien maintains legal status, will result in "a continuation of the period of stay authorized by the Attorney General," even though it does not result in "a continuation of 'status.'" *Id.* at 4. In this circumstance, the alien would have illegal immigration status, but would not begin to accrue unlawful presence.[15]

---

[14] Agency "interpretations contained in policy statements, agency manuals, and enforcement guidelines, all of which lack the force of law—do not warrant" the level of deference given under Chevron U.S.A. Inc. v. NRDC, 467 U.S. 837, 104 S. Ct. 2778, 81 L. Ed. 2d 694 (1984). Christensen v. Harris Cty., 529 U.S. 576, 587, 120 S. Ct. 1655, 146 L. Ed. 2d 621 (2000). The USCIS's interpretation "is nonetheless 'entitled to respect ... to the extent that [its] interpretations have the power to persuade.'" FDIC v. Cashion, 720 F.3d 169, 179 (4th Cir. 2013) (quoting Christensen, 529 U.S. at 587). The Court finds the USCIS's interpretation of the interaction between lawful status, period of authorized stay, and unlawful presence to be reasonable and persuasive.

[15] An alien may regain legal status after his or her status has changed to illegal status. For example, if an alien has timely filed an application for extension of status or change in status that USCIS then grants, his or her immigration status reverts back to legal status as of "the date the adjustment application [was] filed." USCIS Policy Manual ch. (E)(1).

2. USCIS Policies and the *Immigration and Nationality Act ("INA")* Allow an Alien's Presence to Remain Lawful, Even After His or Her Status Becomes Illegal

The lawfulness of an alien's presence in the United States depends upon his or her immigration status, but requires a different inquiry. Title 8 of the United States Code defines an alien as unlawfully present "if the alien is present in the United States after the expiration of the period of stay authorized by the Attorney General or is present in the United States without being admitted or paroled." *8 U.S.C. § 1182(a)(9)(B)(ii)*. The Adjudicator's Field Manual describes the process of accruing unlawful presence as "[n]onimmigrants admitted until a specific date will . . . begin to accrue unlawful presence on the day following the date the authorized period of admission expires." Adjudicator's Field Manual **[*15]** ch. 40.9(E)(i).

Certain exceptions exist to these general rules. Relevant here, the Immigration and Nationality Act ("INA") creates a statutory exception for those aliens who file an asylum application. *8 U.S.C. § 1182(a)(9)(B)(iii)(II)*.[16] In that circumstance, "[t]he period of authorized stay begins on the date the alien files a bona fide application for asylum," Adjudicator's Field Manual ch. 40.9 (F)(ii), and continues until that application has been adjudicated, Cook Memo 5. However, this tolling provision applies only if the alien complies with all requirements, including refraining from working without authorization during the pendency of his or her asylum application.[17] *8 U.S.C. § 1182(a)(9)(B)(iii)(II)*.

In sum, with regard to an alien who files for asylum, whether he or she presents as unlawfully present, or has accrued time qualifying as unlawful, depends upon when he or she filed his or her asylum application. If he or she filed the application **[*16]** while in legal immigration status, then he or she accrues no unlawfully present days, even if his or her visa expires during the pendency of his or her asylum application. See *8 U.S.C. § 1182(a)(9)(B)(iii)(II)*; Adjudicator's Field Manual ch. 40.9(F)(ii); Cook Memo. In that circumstance, the alien's immigration status would be illegal, but his or her presence in the United States would not be unlawful.[18]

C. Analysis: On the Record Before it, the Court Cannot Determine Whether Horma was "Illegally or Unlawfully Present in the United States," for the Purposes of *18 U.S.C. § 922(g)(5)(A)*

---

[16] *Title 8, Section 1182(a)(9)(B)(iii)(II)* states:

> No period of time in which an alien has a bona fide application for asylum pending under *section 1158* of this title shall be taken into account in determining the period of unlawful presence in the United States under clause (i) unless the alien during such period was employed without authorization in the United States.

8 U.S.C. § 1182(a)(9)(B)(iii)(II).

[17] An alien may also be in illegal immigration status, have already accrued some unlawful presence time, but not currently accruing additional unlawful presence time. This situation occurs when an alien does not timely file for a change of status or extension of status, but files once his or her immigration status has become illegal. The Adjudicator's Field Manual states that "[a] grant of asylum does not eliminate any prior periods of unlawful presence." Adjudicator's Field Manual ch. 40.9 (F)(ii). If an alien files for asylum after his or her immigration status has become unlawful, then he or she will not accumulate any additional unlawful presence from the date he or she files his or her application, but he or she will be subject to the days already accumulated at the time he or she filed for asylum. *Id.* While the record plainly demonstrates that Horma filed for asylum, it remains silent as to whether he ever filed for an extension of status.

[18] While not relevant here, if an alien filed the application while in illegal immigration status, then he or she would accrue unlawfully present days beginning the day after his or her visa expires until the day he or she files his or her asylum application. See Adjudicator's Field Manual ch. 40.9(F)(ii). And any subsequently-filed asylum application would not retroactively convert unlawfully present days into lawful presence, but it does prevent the applicant from accruing additional unlawful presence. *Id.*

The Court may consider this motion pursuant to *Federal Rule of Criminal Procedure 12(b)(1)* because the United States and Horma have submitted stipulated facts, (ECF No. 42), and joint exhibits, (ECF No. 41), and the United States has not contended that the Court lacks the ability to decide this motion. *Weaver, 659 F.3d at 355* n. *. However, the Court lacks the necessary factual record to resolve the legal issue before it.[19] Neither the exhibits nor the stipulated facts establish the essential fact of whether Horma received work authorization before working as an Uber driver. Although the United States did not allege that Horma violated the mandate to refrain from working without authorization, Horma did not expressly claim, either **[*17]** at the hearing or in his briefing, that he worked only in compliance with the work authorization requirements. Counsel for Horma declined to do so even when given the opportunity at the hearing, and both parties failed to answer the Court's inquiry when they subsequently filed stipulations and exhibits. The Court must make this threshold determination before it can decide whether *18 U.S.C. § 922(g)(5)(A)* applies to Horma. The Court must deny Horma's Motion to Dismiss without prejudice as to Counts One and Two because to do otherwise on the incomplete record before it would require the Court to improperly resolve a factual uncertainty.[20] *Engle, 676 F.3d at 415*.

1. Horma's Immigration Status Has Become Illegal

To maintain his or her legal immigration status, an alien must comply with the requirements of his or her visa, including the date by which he or she must leave the country. *See* Adjudicator's Field Manual ch. 40.9 (a)(2); Cook Memo 4. If the alien does not comply with those requirements, such as overstaying the validity of his or her visa, then his or her immigration status changes from legal to illegal. Id The filing of an extension of status or change of status application does not create a "bridge" of continuing legal **[*18]** status, but USCIS's subsequent approval of that application retroactively converts the alien's status from illegal to legal as of the date he or she filed his or her application. Cook Memo 3-4.

On December 29, 2013, Horma entered the United States on a valid tourist visa. On February 4, 2014, while that visa was still in effect and Horma still had lawful immigration status, he applied for asylum with USCIS. Horma's tourist visa expired on June 28, 2014—more than two months after he applied for asylum. Horma's timely filing for asylum may have tolled his accrual of unlawful presence. However, as recognized in the Cook Memo, "[t]here is simply no analogous rule or guidance providing for a continuation of the alien's 'status.'" Cook Memo 4. On June 29, 2014, the day after his visa expired, Horma's status became illegal.[21]

2. Horma's Presence May Be Lawful or Unlawful

That said, the Court cannot determine the legality of Horma's presence on the record before it. Under current USCIS policies, an alien may be in illegal or unlawful immigration status, but not accruing unlawful presence. *See* Adjudicator's Field Manual ch. 40.9; Cook Memo. Generally, if an alien's status expires on a specific **[*19]** day, the alien's status becomes illegal and he or she begins to accrue unlawful presence on the following day. Adjudicator's Field Manual ch. 40.9(E)(i). An exception exists for asylum applicants: "[n]o period of time in which an alien has a bona fide application for asylum pending under *[§] 1158* of this title shall be taken into account in determining the period of unlawful presence in the United States ..." *8 U.S.C. § 1182(a)(9)(B)(iii)(II)*; *see* Adjudicator's Field Manual

[19] The Court cannot resolve factual uncertainties on a pre-trial motion and the factual record must drive the legal analysis. *See Weaver, 659 F.3d at 355 n ** (concluding that a district court may rule on a pretrial motion to dismiss "where the government does not dispute the ability of the court to reach the motion and proffers, stipulates, or otherwise does not dispute the pertinent facts").

[20] Per *Weaver*, the Court may rule on motions in criminal cases by relying on stipulated facts to make legal determinations. *659 F.3d at 355 n. **. In the alternative, all factual uncertainties must be submitted to the fact finder at trial.

[21] If USCIS grants Horma's asylum application, then that approval may convert Horma's immigration status to legal status. *See* USCIS Policy Manual vol. 7, pt. B, ch. 3 (E)(1).

ch. 40.9(F)(ii). This exception tolls the accrual of unlawful presence time. It does not apply if the alien worked without authorization.[22] *8 U.S.C. § 1182(a)(9)(B)(iii)(II)*.

On December 29, 2013, Horma entered the United States on a valid tourist visa. On February 4, 2014, he applied for asylum while that visa was still in effect and Horma still had lawful immigration status. Horma's tourist visa expired on June 28, 2014—more than two months after he applied for asylum. Horma was therefore legally and lawfully present in the United States and in legal immigration status when he entered "[a] period of authorized stay." (Resp. Mot. Dismiss 16.) Although Horma states in his Motion to Dismiss that "after a certain amount of time had passed, he was given authorization to work in the United States," **[*20]** (Mot. Dismiss 2), Horma presents nothing, despite two opportunities to do so, establishing that he began employment only after receiving that authorization. Indeed, neither party provided the date on which Horma received this authorization. The parties submitted joint exhibits and stipulated facts that merely establish that Horma was eligible to receive work authorization as of at least September 21, 2015, and that—at some point in time—he worked as an Uber driver. (Referral Not. 2, ECF No. 41-3; Nov. 15, 2016 Tr. 17, ECF No. 41-9). Given this factual uncertainty, the Court cannot ascertain the lawfulness of Horma's continued presence in the United States.

This information is critical because whether Horma received work authorization before he began work affects the lawfulness of his presence in the United States. If Horma began working before receiving his work authorization, then he has started to accrue unlawful presence. See *8 U.S.C. § 1182(a)(9)(B)(iii)(II)*. Combined with his illegal immigration status, Horma would have no claim that *18 U.S.C. § 922(g)(5)(A)* fails to reach him.

But if he did not begin working until after he received his work authorization, Horma would be in illegal immigration status, but would be lawfully present. *8 U.S.C. § 1182(a)(9)(B)(iii)(II)*. **[*21]** Only in this second factual scenario would it be necessary, or appropriate, for the Court to determine how or if *18 U.S.C. § 922(g)(5)(A)* applies to Horma. Because the record does not establish the necessary facts, as the discussion below demonstrates, the Court cannot determine the applicability of the challenged statute to Horma.

3. *Section 922(g)(5)(A)* May Be Ambiguous As to Horma

Section 922(g)(5)(A) makes it unlawful for "any person . . . who, being an alien . . . is illegally or unlawfully in the United States" to possess a firearm. *18 U.S.C. § 922(g)(5)(A)*. The statute does not make clear whether it applies only to a person's immigration status or the lawfulness of his or her presence. The case law cited by the parties and expanded upon by the Court does not provide determinative precedent for this case. *Section 922(g)(5)(A)* may be ambiguous when applied to Horma.[23]

Neither party identifies any case law addressing whether an alien who applies for a change in status while, as Horma was, in *legal* immigration status acquires unlawful presence by virtue of his or her continued presence in the United States awaiting final determination of a pending status adjustment application. Nor does the Court see such a case. Rather, several federal circuit courts have addressed the applicability of *Section 922(g)* when **[*22]** an alien applied for a change of status *after* his or her immigration status became illegal, which lead to him or her being unlawfully present in the United States and in an illegal immigration status. *See, e.g.,* *United States v. Rehaif, 888 F.3d 1138, 1140-41, 1147-48 (11th Cir. 2018)* (affirming the jury instruction that "[a]n alien illegally or unlawfully in the United States is an alien whose presence within the United States is forbidden or not authorized by law," and affirming the defendant's *18 U.S.C. § 922(g)(5)(A)* conviction when the defendant rented a gun nine months after USCIS terminated his visa); *United States v. Al Sabahi, 719 F.3d 305, 309-10 (4th Cir. 2013)* (finding that *18 U.S.C.*

---

[22] An asylum applicant can only become eligible for work authorization 180 days after filing his or her asylum application. *8 U.S.C. § 1158(d)(2)*.

[23] If, in fact, Horma's immigration status has become illegal, but his presence has not become unlawful, the statute may not apply to Horma. A question would exist whether Horma was "in" the United States "unlawfully or illegally" to a degree that would establish that element of the offense. The Court cannot decide that knotty issue here.

§ 922(g)(5)(A) applied when the defendant applied for a change of status four years after his status became illegal); *United States v. Latu, 479 F.3d 1153,1157-59 (9th Cir. 2007)* (finding that *18 U.S.C. § 922(g)(5)(A)* applied when the defendant applied for a change of status three months after his status became illegal); *United States v. Elrawy, 448 F.3d 309, 312-14 (5th Cir. 2006)* (finding that *18 U.S.C. § 922(g)(5)(A)* applied when the defendant filed for a change of status one month after his status became illegal); *United States v. Bazargan, 992 F.2d 844, 847-49 (8th Cir. 1993)* (finding that *18 U.S.C. § 922(g)(5)* applied when the defendant filed an asylum application four months after violating his visa requirements).

If, in fact, Horma did not work without authorization, then his situation may be distinguishable from the defendants in *Al Sabahi, Latu, Elrawy*, and *Bazargan*. Specifically, each of those defendants presented **[*23]** as in illegal immigration status and either accruing or having accrued some amount of unlawful presence. In those cases, Title *18 U.S.C. § 922(g)(5)(A)* clearly applies. If Horma began to drive for Uber before he received his work authorization, then his situation cannot be distinguished from that faced by the defendants in *Al Sabahi, Latu, Elrawy*, and *Bazargan*. In that case, Horma's immigration status would be illegal, as discussed supra, and he would have accrued unlawful presence time because the tolling provision in *8 U.S.C. § 1182(a)(9)(B)(iii)(II)* would not apply.

The parties put into play Horma's work status without tying together necessary loose ends. A claim that Horma received work authorization stands alongside evidence that Horma worked. But the joint exhibits and stipulated facts show only that Horma became eligible to receive work authorization and that he worked. They do not identify receipt of work authorization, or whether Horma received work authorization before commencing employment. The timing of these events are critical to a finding of lawful or unlawful presence. Given these circumstances, the Court must deny without prejudice Horma's Motion to Dismiss Counts One and Two.

III. Counts Three and Four: Possession of a Firearm [*24] While Under Indictment

Horma brings several challenges to the charges in Counts Three and Four. First, he contends that a plain reading of the Maryland statute under which he was convicted does not qualify as a predicate conviction for purposes of a *§ 922(n)* charge for receipt of a firearm by a person under indictment. For the reasons below, this challenge fails. Next, Horma contends that *Section 922(n)* is void for vagueness under *Johnson v. United States, 135 S. Ct. 2551, 192 L. Ed. 2d 569 (2015)*. This challenge also fails given the statutory construct of the Maryland law, and given *Johnson's* narrow holding.

As to Horma's *Second Amendment* challenge, however, the Court is constrained to deny his challenge without prejudice. It must do so because both parties failed to identify or apply the governing standard of review within the Fourth Circuit for evaluating *Second Amendment* challenges. This failure presented the Court with an inadequate record on which to evaluate the constitutionality of the statute. More understandably, the parties also did not brief these constitutional challenges based on what is now the law of the case: that Horma's immigration status has changed to illegal status, but that his presence may be either lawful or unlawful. These deficiencies oblige this Court to deny the Motion to Dismiss **[*25]** Counts Three and Four, but to do so without prejudice.

A. Horma's Challenge That the Maryland Indictment Cannot Support a Charge Under *18 U.S.C. § 922(n)* Fails

1. Statutory Framework

Two statutes are relevant to the charges in Counts Three and Four. First, *18 U.S.C. § 922(n)* (the "Non-Receipt Statute") provides that "[i]t shall be unlawful for any person who is under indictment for a crime punishable by imprisonment for a term exceeding one year to . . . receive any firearm or ammunition which has been shipped or transported in interstate or foreign commerce." *18 U.S.C. § 922(n)*. Congress also exempted certain crimes from the definition of "a crime punishable by imprisonment for a term exceeding one year." Relevant here, *18 U.S.C. §*

921(a)(20)(A) (the "Business Practices Clause") states: "[t]he term 'crime punishable by imprisonment for a term exceeding one year' does not include . . . any [f]ederal or [s]tate offenses pertaining to antitrust violations, unfair trade practices, restraints of trade, or other similar offenses relating to the regulation of business practices." 18 U.S.C. § 921(a)(20)(A).

The Business Practices Clause thus provides that someone under indictment for a federal or state offense "pertaining to antitrust violations, unfair trade practices, restraints of trade, or other similar offenses relating to the regulation of business **[*26]** practices" does not violate the Non-Receipt Statute by receiving, possessing, or shipping a firearm. 18 U.S.C. §§ 921(a)(20)(A); 922(n). Horma contends that the Maryland Indictment constitutes just such an indictment, meaning that he cannot have violated § 922(n), the Non-Receipt Statute.

2. Principles of Statutory Interpretation Guide the Court's Analysis

Under well-settled principles of statutory construction, the Court's analysis must "begin, as always, with the language of the statutory text," and "[i]n the absence of a definition from Congress, [the Court] accord[s] words in a statute their ordinary, contemporary, common meaning." United States v. Midgett, 198 F.3d 143, 145-46 (4th Cir. 1999) (internal citation and quotation marks omitted). "The plainness or ambiguity of statutory language is determined by reference to the language itself, the specific context in which that language is used, and the broader context of the statute as a whole." Robinson v. Shell Oil Co., 519 U.S. 337, 341, 117 S. Ct. 843, 136 L. Ed. 2d 808 (1997). When "the terms of [a] statute are unambiguous on their face, or in light of ordinary principles of statutory interpretation," judicial inquiry normally ends. United States v. Morison, 844 F.2d 1057, 1064 (4th Cir. 1988) (quoting United States v. James, 834 F.2d 92, 92 (4th Cir. 1987)); *see also* United States v. Wells, 519 U.S. 482, 495, 117 S. Ct. 921, 137 L. Ed. 2d 107 (1997) ("[Courts] presume that Congress expects its statutes to be read in conformity with th[e] [Supreme] Court's precedents).

a. "Relating to" Modifies Only "Other [*27] Similar Offenses"

"According to the rule of the last antecedent, 'a limiting clause or phrase should ordinarily be read as modifying only the noun or phrase that it immediately follows.'" United Seniors Ass'n v. Soc. Sec. Admin., 423 F.3d 397, 402 (4th Cir. 2005) (quoting Barnhart v. Thomas, 540 U.S. 20, 26, 124 S. Ct. 376, 157 L. Ed. 2d 333 (2003)). Applying this basic grammatical rule to the Business Practices Clause, the Qualifying Clause, "relating to the regulation of business practices" refers only to the preceding antecedent "other similar offenses." *See, e.g.,* United States v. Stanko, 491 F.3d 408, 414 (8th Cir. 2007) (applying the rule of the last antecedent similarly and rejecting the defendant's suggestion that the Qualifying Clause serves as a "descript[or] of the commonalities between each of the enumerated offenses and as an indication of a congressional intent to exclude any business-related offense"). The question for the Court, then, is how to determine the scope of "other similar offenses related to the regulation of business practices." Principles of statutory interpretation guide that analysis as well.

b. The Qualifying Clause Is Limited By the Enumerated List of "Antitrust Violations, Unfair Trade Practices, [and] Restraints of Trade"

Congress's inclusion of the word "similar" to modify "offenses" in the Qualifying Clause "indicates an intent to limit the [B]usiness [P]ractices [C]lause's reach to offenses which are 'comparable' or 'nearly corresponding' to the enumerated offenses." Stanko, 491 F.3d at 414 (quoting *Webster's Third* ***[*28]*** *New International Dictionary* 2120 (2002)). Construing the statute otherwise would render the word "similar" superfluous and without meaning. *See, e.g.,* Bowsher v. Merck & Co., 460 U.S. 824, 833, 103 S. Ct. 1587, 75 L. Ed. 2d 580 (1983) (identifying the "settled principle of statutory construction that [the court] must give effect, if possible, to every word of the statute"); *see also* United States v. Ivester, 75 F.3d 182, 185 (4th Cir. 1996) (stating that the Fourth Circuit is "reluctant to interpret statutory provisions so as to render superfluous other provisions within the same enactment").

Other established principles of statutory interpretation support this reading. Under the doctrines of *ejusdem generis* (of the same kind or class) and *noscitur a sociis* (it is known by its associates), "where general words follow specific words in a statutory enumeration, the general words are construed to embrace only objects similar in nature to those objects enumerated by the preceding specific words." *United States v. Bursey, 416 F.3d 301, 306 (4th Cir. 2005)* (quoting *Wash. State Dep't of Soc. & Health Servs. v. Guardianship of Danny Keffeler, 537 U.S. 371, 384, 123 S. Ct. 1017, 154 L. Ed. 2d 972 (2003))*. Here, the Qualifying Clause refers generally to "offenses relating to the regulation of business practices," certainly less specific than the three enumerated types of offenses preceding the Qualifying Clause—"antitrust violations, unfair trade practices, and restraints of trade." *18 U.S.C. § 921(a)(20)(A)*. These doctrines of statutory interpretation therefore instruct that the Qualifying Clause should be **[*29]** "understood as a reference to subjects akin" to the specifically enumerated offenses.[24] *United Seniors Ass'n, 423 F.3d at 403* (defining the doctrine of *ejusdem generis*).

In light of established principles of statutory construction, the Court interprets the Qualifying Clause, "other similar offenses relating to the regulation of business practices," as referring to offenses similar to the Enumerated Offenses, "antitrust violations, unfair trade practices, [and] restraints of trade." *18 U.S.C. § 921(a)(20)(A)*.

c. The Business Practices Clause Does Not Cover Horma's Maryland Indictment

The Maryland Tax Statute undergirding Horma's Maryland Indictment makes it a felony to "willfully ship[], import[], sell[] into or within, or transport[] within, [Maryland] cigarettes or other tobacco products on which the tobacco tax has not been paid." *Md. Code, Tax-Gen. §13-1015(a)*. For the Business Practices Clause to apply to the Maryland Tax Statute, the Maryland Tax Statute would have to constitute an offense similar to "antitrust violations, unfair trade practices, [or] restraints of trade." *18 U.S.C. § 921(a)(20)(A)*. The Maryland Tax Statute is not similar to those offenses, and the Business Practices Clause does not therefore exempt it from the definition of a crime punishable by imprisonment for a term exceeding one year.

i. The Enumerated Offenses All Directly Regulate Business Activity in Order to Prevent Unfair Competition

All of the enumerated **[*30]** offenses share commonalities: they each regulate business directly, broadly seek to prevent unfair competition, and govern behavior affecting consumers and competitors.

Antitrust law is "the body of laws designed to protect trade and commerce from restraints, monopolies, price-fixing, and price discrimination." ***Antitrust Law***, *Black's Law Dictionary* (10th ed. 2014). The Supreme Court has expressed its "general view that the primary purpose of the antitrust laws is to protect interbrand competition." *State Oil Co. v. Khan, 522 U.S. 3, 15, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*; *see also* *Novell, Inc. v. Microsoft Corp., 505 F.3d 302, 315 (4th Cir. 2007)* ("Antitrust laws . . . are the Magna Carta of free enterprise." (alteration in original) (quoting *United States v. Topco Associates, Inc., 405 U.S. 596, 610, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)))*.

The phrase "unfair trade practices" could have a much broader definition than "antitrust violations." *See, e.g.,* *Stanko, 491 F.3d at 416* (noting that "unfair trade can include generally any 'inequitable business practice'"). Indeed, unfair trade practices surely include unfair competition, which involves "[d]ishonest or fraudulent rivalry in

---

[24] Horma argues that, when interpreting statutes that include the phrase "relating to," courts have given "relating to" broad meaning, and therefore the Qualifying Phrase, "the phrase 'relating to the regulation of business practices' should likewise be given a broad meaning sufficient to cover transportation of unstamped cigarettes." (Mot. Dismiss 11.) The Supreme Court of the United States has instructed that the doctrine of *noscitur a sociis* (it is known by its associates), "while not an inescapable rule, is often wisely applied where a word [or phrase] is capable of many meanings in order to avoid the giving of unintended breadth to the Acts of Congress." *Jarecki v. G.D. Searle & Co., 367 U.S. 303, 307, 81 S. Ct. 1579, 6 L. Ed. 2d 859, 1961-2 C.B. 254 (1961)*. Given the relevant principles of statutory interpretation, and given that the specific language "antitrust violations, unfair trade practices, [and] restraints of trade" precedes "offenses relating to business practices," Horma's proposed broad reading of the Qualifying Clause cannot prevail.

trade and commerce; [especially] the practice of endeavoring to pass off one's own goods or products in the market for those of another by means of imitating or counterfeiting the name, brand, size, shape, or other distinctive characteristic of the article or its packaging." **[*31]** *Unfair Competition*, Black's Law Dictionary (10th ed. 2014).

Finally, "restraint of trade" broadly includes "[a] limitation on business dealings or professional or gainful operations," and in the antitrust context involves "[a]n agreement between two or more businesses or a combination of businesses intended to eliminate competition, create a monopoly, artificially raise prices, or otherwise adversely affect the free market." *Restraint of Trade*, Black's Law Dictionary (10th ed. 2014). The term "refers not to a particular list of agreements, but *to a particular economic consequence*, which may be produced by quite different sorts of agreements in varying times and circumstances." *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 731, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)* (emphasis added).

Despite the different scope of each of these phrases, the Court does not interpret each phrase in a vacuum. Rather, under the doctrine of *noscitur a sociis*, reading each phrase in light of the terms around it, the Court interprets the enumerated offenses so as to "avoid ascribing to one word a meaning so broad that it is inconsistent with its accompanying words, thus giving unintended breadth to the Acts of Congress." *Gustafson v. Alloyd Co., 513 U.S. 561, 575, 115 S. Ct. 1061, 131 L. Ed. 2d 1 (1995)*. It therefore becomes apparent that,

> while the term 'unfair trade practices' **[*32]** *can* apply broadly to any inequitable business practice, the meaning it carries here must be determined by reference to the other two enumerated terms[—]antitrust violations and restraints of trade[—] both of which clearly involve negative economic effects on consumers or competition.

Stanko, 491 F.3d at 416.

Furthermore, each of the enumerated offenses speaks to competition and the effects on *consumers* and *competitors. See, e.g., Stanko, 491 F.3d at 416* (noting that the enumerated offenses include "criminal statutes addressing only economic harm to competition or consumers"). This focus on consumers and competitors—rather than other general societal concerns—becomes apparent when looking at the purpose of the enumerated offenses. A United States District Court for the District of New Jersey persuasively discussed this purpose, stating:

> [T]he purpose of the antitrust and other laws specifically mentioned in [the Business Practices Clause] is to lay down a scheme of acceptable and unacceptable behavior by imposing direct restraints against certain business procedures, and requirements and regulations for the carrying out of a business enterprise. Such regulatory laws have the purpose of protecting the consumer while promoting appropriate competitive business **[*33]** and pricing practices.

*United States v. Kruckel, No. 92-61 l(JBS), 1993 U.S. Dist. LEXIS 20777, 1993 WL 765648, at *16 (D.N.J. Aug. 13, 1993)*. The Kruckel court correctly concludes that the enumerated offenses focus on consumers and competitors. *Id.*

ii. The Maryland Tax Statute Prevents Unfair Competition Only Indirectly

Even Horma admits that the Maryland Tax Statute only incidentally regulates business activities or unfair competition. (Mot. Dismiss 10 ("[T]he [Maryland Tax Statute] punishes commercial activity *which necessarily impacts* competition and consumers . . . ." (emphasis added)).) This indirect effect on competition and consumers cannot bring the Maryland Tax Statute within the ambit of the Qualifying Clause.

Each of the enumerated offenses is specifically designed to minimize unfair practices that affect business and consumers. The Maryland Tax Statute, in contrast, addresses transportation or sale of cigarettes or tobacco products on which a state tobacco tax has not been paid. *See Md. Code, Tax-Gen. § 13-1015(a)*. Although, as Horma argues, it is certainly true that businesses who sell tobacco products lawfully—by paying the state tobacco tax—"face unfair competition when illicit cigarettes enter a market," because those tobacco products can be sold at a lower retail price, (Mot. Dismiss 10 (quoting **[*34]** *Protecting Our Cigarette Brands*, http://www.altria.com/our-companies/philipmorrisusa/protecting-our-cigarette-brands/Pages/default.aspx), the Maryland Tax Statute does not regulate *business* practices in the same way that "federal or state offenses pertaining to antitrust violations, unfair trade practices, [or] restraints of trade" do, *18 U.S.C. § 921(a)(20)(A)*. The Maryland Tax Statute *indirectly* affects competition and consumers, but does not do so in a way that makes it similar to the enumerated offenses.

The Maryland Tax Statute, therefore, falls outside the Business Practices Clause, and does not qualify as an exception to a "crime punishable by imprisonment for a term exceeding one year," on which a prosecution under the Non-Receipt Statute could not be based. Given this finding, the Court will next evaluate Horma's void for vagueness argument.

B. Horma's Contention That *§ 921(a)(20)(A)* is Void for Vagueness Under the *Due Process Clause* Poes Not Succeed

Horma contends that *§ 921(a)(20)(A)* is void for vagueness under the Supreme Court's 2015 holding in *Johnson v. United States, 135 S. Ct. 2551, 192 L. Ed. 2d 569 (2015)*. The plain meaning of the Business Practices Clause demonstrates congressional intent to limit the offenses within that exclusion to those pertaining to antitrust violations, unfair trade practices, restraints of trade, or offenses *similar* to them, countermanding **[*35]** Horma's proposed broad reading of the Qualifying Clause. Given the clear meaning of the Business Practices Clause and Johnson's narrow holding, the statute survives a vagueness analysis.

1. Legal Standard

The government violates Due Process when it deprives a person of "life, liberty, or property under a criminal law so vague that it fails to give ordinary people fair notice of the conduct it punishes, or so standardless that it invites arbitrary enforcement." *Johnson, 135 S. Ct. at 2556* (citing *Kolender v. Lawson, 461 U.S. 352, 357-58, 103 S. Ct. 1855, 75 L. Ed. 2d 903 (1983))*. The doctrine of vagueness "is a corollary of the separation of powers—requiring that Congress, rather than the executive or judicial branch, define what conduct is sanctionable and what is not." *Sessions v. Dimaya, 138 S. Ct. 1204, 1212, 200 L. Ed. 2d 549 (2018)*. The touchstone of the vagueness analysis "is whether the statute, either standing alone or as construed, made it reasonably clear at the relevant time that the defendant's conduct was criminal." *United States v. Lanier, 520 U.S. 259, 265, 117 S. Ct. 1219, 137 L. Ed. 2d 432 (1997)*.

A defendant asserting that a statute is void for vagueness must show a lack of fair warning of "what the law intends to do if a certain line is passed." *McBoyle v. United States, 283 U.S. 25, 27, 51 S. Ct. 340, 75 L. Ed. 816 (1931)*. "The . . . principle is that no [person] shall be held criminally responsible for conduct which he [or she] could not reasonably understand to be proscribed." *Lanier, 520 U.S. at 265* (first alteration in original) (quoting *Bouie v. City of Columbia, 378 U.S. 347, 351, 84 S. Ct. 1697, 12 L. Ed. 2d 894 (1964))*. Courts have identified three means to evaluate **[*36]** whether a statute meets the fair warning requirement:

> First, the vagueness doctrine bars enforcement of a statute which either forbids or requires the doing of an act in terms so vague that men of common intelligence must necessarily guess at its meaning and differ as to its application. Second . . . the canon of strict construction of criminal statutes . . . ensures fair warning by so resolving ambiguity in a criminal statute as to apply it only to conduct clearly covered. Third . . . due process bars courts from applying a novel construction of a criminal statute to conduct that neither the statute nor any prior judicial decision has fairly disclosed to be within its scope.

Id. at 266 (citations and quotation marks omitted). "[T]he failure of 'persistent efforts . . . to establish a standard' [for enforcing or applying a law] can provide evidence of vagueness." *Johnson, 135 S. Ct. at 2558* (second alteration in original) (quoting *United States v. L. Cohen Grocery Co., 255 U.S. 81, 91, 41 S. Ct. 298, 65 L. Ed. 516 (1921))*.

2. *Johnson*'s Narrow Holding

Horma asserts that *§ 921(a)(20)(A)* is void for vagueness under the Supreme Court holding in *Johnson. Johnson* decided a vagueness challenge to the so-called "Residual Clause" of *18 U.S.C. § 924(e)*, the *Armed Career Criminal Act ("ACCA")*.[25] ACCA provides enhanced penalties for individuals convicted of firearm crimes **[*37]** under *18 U.S.C. § 922(g)* who have three or more previous convictions "for a violent felony or a serious drug offense, or both." *18 U.S.C. § 924(e)(1)*. ACCA defines a "violent felony" as:

> any crime punishable by imprisonment for a term exceeding one year . . . that—
>
> (i) has as an element the use, attempted use, or threatened use of physical force against the person of another; or[,]
>
> (ii) is burglary, arson, extortion, involves [the] use of explosives, *or otherwise involves conduct that presents a serious potential risk of physical injury to another*.

18 U.S.C. § 924(e)(2)(B) (emphasis added).

Although courts generally "do not doubt the constitutionality of laws that call for the application of a qualitative standard . . . to real-world conduct," *Johnson, 135 S. Ct. at 2561*, the Supreme Court held that two features of ACCA's Residual Clause "conspire[d] to make it unconstitutionally vague," *id. at 2557*. First, it left "grave uncertainty about how to estimate the risk posed by a crime" because "[i]t ties the judicial assessment of risk to a judicially imagined 'ordinary case'[26] of a crime, not to real-world facts or statutory elements." *Id.* Further, ACCA's Residual Clause simultaneously left "uncertainty about how much risk it takes for a crime to qualify as a violent felony." *Id. at 2558*.

The Supreme Court reasoned that most laws "require gauging the riskiness of conduct in which an individual defendant engages *on a particular occasion*." *Id. at 2561*. ACCA's Residual Clause, however,

> requires application of the "serious potential risk" standard to an idealized ordinary case of the crime. Because "the elements necessary to determine the imaginary ideal are uncertain *both in nature*[27] *and degree of effect*,"

---

[25] ACCA's Residual Clause defines a violent felony as including any felony that "involves conduct that presents a serious potential risk of physical injury to another." *18 U.S.C. § 924(e)(2)(B)(ii)*.

[26] *Johnson*'s finding of vagueness also rested on the uncertainty created by using the "ordinary case" analysis coupled with a qualitative standard. This "ordinary case" analysis follows from the requirement that a court "[d]eciding whether the residual clause covers a crime . . . picture the kind of conduct that the crime involves in 'the ordinary case,' and . . . judge whether that abstraction presents a serious potential risk of physical injury." *Johnson, 135 S. Ct. at 2557*. This categorical approach requires courts in the sentencing context to apply the facts considering a so-called ordinary case of the offense, instead of contemplating the facts underlying the defendant's previous conviction. *See Mathis v. United States, 136 S. Ct. 2243, 2251, 195 L. Ed. 2d 604 (2016)*; *see also* 3 Charles Alan Wright & Sarah N. Welling, *Federal Practice and Procedure* § 549 (4th ed. 2018) (describing that the categorical approach governs when "the government seeks to use a previous conviction to increase the sentence being imposed for the current conviction," and is used to analyze "whether the previous conviction qualifies to increase the sentence"); **[*38]** *Chapman v. United States, No. 1:16cv512, 326 F. Supp. 3d 228, 2018 U.S. Dist. LEXIS 121172, 2018 WL 3470304, at * 11 (E.D. Va. July 19, 2018)*, *appeal filed by United States v. Chapman* (4th Cir. 2018) ("As the Supreme Court explained in *Johnson*, one of the predominant features of the ACCA residual clause that gave rise to its unconstitutional indeterminacy was that it did not limit the risk-of-force analysis to the conduct surrounding the elements of the crime but instead required courts to 'imagine' how a stylized version 'of the crime subsequently plays out.'" (quoting *Johnson, 135 S. Ct. at 2557-58*)).

[27] Regarding the uncertainty as to the nature of a crime that carries a "serious potential risk," the Supreme Court noted that other laws using

> terms like "substantial risk," "grave risk," and "unreasonable risk" . . . . [did not] link[] a phrase such as "substantial risk" to a confusing list of examples. "The phrase 'shades of red,' standing alone, does not generate confusion or unpredictability; but

> this abstract inquiry offers significantly less predictability than one "[t]hat deals with the actual, not with an imaginary condition other than the facts."

Id. (emphasis added) (quoting *Int'l Harvester Co. of Am. v. Kentucky, 234 U.S. 216, 223, 34 S. Ct. 853, 58 L. Ed. 1284 (1914))*. The combined "indeterminacy about how to measure the risk posed by a crime [and] indeterminacy about how much risk it takes for the crime to qualify as a violent felony" rendered ACCA's Residual Clause "more unpredictab[le] and arbitrar[y] than the *Due Process Clause* tolerates." *Id. at 2558*.

3. *Section 921(a)(20)(A)* Survives a Vagueness Analysis

Horma contends that "[b]y enumerating certain offenses, and then announcing a mismatched residual category, [*18 U.S.C.] § 921(a)(20)(A)* is remarkably similar to [ACCA's] Residual Clause." (Mot. Dismiss 13.) This contention, however, flows from Horma's proposed broad reading of the Qualifying Phrase, "relating to the regulation of business practice." *18 U.S.C. § 921(a)(20)(A)*. The phrase "other similar offenses" precedes the Qualifying Phrase, however, and the Court interprets the statute in a way that avoids rendering the word "similar" superfluous and without meaning. *See supra* Part III.A.; *see also* *Bowsher, 460 U.S. at 833* (articulating the "settled principle of statutory construction that [the court] must give effect, if possible, to every word of the statute"). Moreover, the design of each of the enumerated offenses in the Business Practices Clause specifically minimizes unfair practices that affect business and consumers, meaning that *§ 921(a)(20)(A)* does not suffer from the same lack of similarity among specified crimes that contributed to render ACCA's Residual Clause unconstitutionally vague.

Furthermore, the Fifth, Seventh, and Eighth Circuits have each held that the Business Practices Clause is not unconstitutionally vague.[28] In *Stanko*, the Eighth Circuit **[*40]** held that "Congress used the comparative term 'similar' to modify 'offenses[.]' . . . The term 'similar' indicates an intent to limit the business practices clause's reach to offenses which are 'comparable' or 'nearly corresponding' to the enumerated offenses." *Stanko, 491 F.3d at 414*. Similarly, the Seventh Circuit upheld the Business Practices Clause against a vagueness challenge, stating that "the word 'similar' limits the term 'offenses,' so that it refers back to the three enumerated offenses, and is further limited by 'relating to the regulation of business practices.'" *United States v. Schultz, 586 F.3d 526, 531 (7th Cir. 2009)*. "Accordingly, an ordinary individual would have notice that the *§ 921(a)(20)(A)* exception applies only if he or she committed an enumerated or similar offense related to the regulation of business practices." *Id.* Finally, the Fifth Circuit concluded that "the plain meaning of the statute indicates Congress's intent to limit the offenses that fall within the *§ 921(a)(20)(A)* exclusion to those pertaining to antitrust violations, unfair trade practices, restraints of

---

> the phrase 'fire-engine red, light pink, maroon, navy blue, **[*39]** or colors that otherwise involve shades of red' assuredly does so."

Johnson, 135 S. Ct. at 2561 (quoting *James v. United States, 550 U.S. 192, 230 n.7, 127 S. Ct. 1586, 167 L. Ed. 2d 532 (2007)* (Scalia, J., dissenting)). ACCA's Residual Clause, however, "forces courts to interpret 'serious potential risk' in light of the four enumerated crimes—burglary, arson, extortion, and crimes involving the use of explosives[, each of which is] . . . 'far from clear in respect to the degree of risk each poses.'" *Id. at 2558* (quoting *Begay v. United States, 553 U.S. 137, 143, 128 S. Ct. 1581, 170 L. Ed. 2d 490 (2007))*. This lack of clarity contributed to the statute's unconstitutional vagueness.

[28] Horma describes the analysis in these cases as inapposite because each was decided before *Johnson*, and thus "do[] not address the contention . . . that the reasoning of *Johnson* applies to *§ 921(a)(20)*." (Reply Mot. Dismiss 6, ECF No. 24.) Undergirding *Johnson*'s holding of unconstitutional vagueness, however, was the fact that

> the enumerated crimes [in ACCA] were themselves too varied to provide . . . assistance. Trying to reconcile them with each other, and then **[*41]** compare them to whatever unlisted crime was at issue drove many a judge a little batty. And more to the point, the endeavor failed to bring any certainty to [ACCA's Residual Clause's] application.

Dimaya, 138 S. Ct. at 1221. The enumerated offenses in the Business Practices Clause, however, lack such incongruity. Nothing in the subsequent history of these cases indicates that their vagueness holdings were abrogated by *Johnson*, and counsel for Horma stated at oral argument that he had not seen anything indicating such an abrogation. (July 9, 2018 Tr. 41, ECF No. 43.) Horma's argument under *Johnson* fails to persuade.

trade, or offenses *similar* to them." United States v. Coleman, 609 F.3d 699, 707 (5th Cir. 2010) (emphasis added) (quoting Dreher v. United States, 115 F.3d 330, 332 (5th Cir. 1997)).

The Business Practices Clause does not suffer from the infirmities underlying ACCA's Residual Clause that led to the Supreme Court's holding in Johnson. Rather, the statute makes it "reasonably clear at the relevant time that [Horma's] conduct was criminal." Lanier, 520 U.S. at 265. Horma was on notice that his indictment for possession of unstamped cigarettes in violation of the Maryland Tax Statute did not amount to an offense exempted under § 921(a)(20)(A), meaning that, pursuant to § 922(n), he could not receive a gun. The Court cannot find that 18 U.S.C. § 921(a)(20)(A) is unconstitutionally vague. The Motion to Dismiss on that basis must be denied.

IV. The Inadequate Record as to Horma's Second Amendment Challenge

Given that § 922(n) is not unconstitutionally vague, the Court must evaluate Horma's Second Amendment challenge. Here, the record prevents a finding. In their briefing, both parties failed to apply the governing Fourth Circuit standard for Second Amendment challenges. Reliance on the governing standard would have guided the parties to place necessary information before the Court to assess the purpose and fit of § 922(n). Furthermore, the applicable law of the case may **[*42]** change materially based on the Court's decision about Horma's illegal immigration status versus his lawful or unlawful presence.

A. Neither Party Articulates or Applies the Fourth Circuit's Standard for Second Amendment Challenges

Supreme Court precedent and the governing standard within the Fourth Circuit for evaluating Second Amendment challenges direct that courts should first address an as-applied review, and only then proceed to the facial validity of a statute if the as-applied challenge falters. Despite this long established principle, both parties bypass Horma's as-applied challenge and proceed directly to arguing the facial validity of § 922(n).

"A facial challenge to a legislative Act is, of course, the most difficult challenge to mount successfully, since the challenger must establish that no set of circumstances exists under which the Act would be valid." United States v. Salerno, 481 U.S. 739, 745, 107 S. Ct. 2095, 95 L. Ed. 2d 697 (1987).

> Whe[n] a party brings both as-applied and facial constitutional challenges, it is appropriate to determine first whether the law is constitutional as applied to the challenging party's conduct, and then only if the as-applied challenge fails, to determine whether it is necessary to consider the facial challenge. This is so "for reasons relating both to the proper **[*43]** functioning of courts and to their efficiency," as addressing facial challenges unnecessarily "would convert use of the overbreadth doctrine from a necessary means of vindicating the plaintiff's own right not to be bound by a statute that is unconstitutional into a means of mounting gratuitous wholesale attacks upon state and federal laws."

United States v. Masciandaro (Masciandaro I), 648 F. Supp. 2d 779, 786 (E.D. Va. 2009) (quoting Board of Trustees v. Fox, 492 U.S. 469, 485, 109 S. Ct. 3028, 106 L. Ed. 2d 388 (1989) and citing Brockett v. Spokane Arcades, Inc., 472 U.S. 491, 502-04, 105 S. Ct. 2794, 86 L. Ed. 2d 394 (1985)), *aff'd*, 638 F.3d 458 (2011). Furthermore, because "a party ordinarily 'can only succeed in a facial challenge by "establish[ing] that *no set of circumstances exists* under which the [law] would be valid," *i.e.*, that the law is unconstitutional in *all* of its applications,'" if a defendant fails to establish that a challenged law is unconstitutional as applied to *him*, that will often also, *a priori*, decide the facial challenge. Masciandaro I, 648 F. Supp. 2d at 792; *see also* United States v. Masciandaro (Masciandaro II), 638 F.3d 458, 474 (4th Cir.), *cert. denied*, *565 U.S. 1058, 132 S. Ct. 756, 181 L. Ed. 2d 482 (2011)* ("[A] person, such as Masciandaro, to whom a statute was constitutionally applied, 'will not be heard to challenge that statute on the ground that it may conceivably be applied unconstitutionally to others, in other situations not before the Court.'" (quoting Broadrick v. Oklahoma, 413 U.S. 601, 610, 93 S. Ct. 2908, 37 L. Ed. 2d 830 (1973))).

Despite this caselaw and his statement that he challenged "both the facial validity of *§ 922(n)* as well as its particular application to him," (Mot. **[*44]** Dismiss 16), Horma's *Second Amendment* argument reads only as a facial challenge. Nowhere does Horma discuss the particular facts of *his* case or the conduct in which *he* engaged that the statute proscribed. Horma also never discussed whether the Court should address one challenge before the other, or how the outcome of the Court's analysis of his as-applied challenge would impact the outcome of his facial challenge. The United States also proceeds straight to an argument of facial invalidity without addressing how or why it should do so. According to the United States, although Horma "challenges the constitutionality of *18 U.S.C. § 922(n)* as applied to him, . . . the facial validity of the statute means that it provides little cover for [Horma]." (Resp. Mot. Dismiss 15.)

Moreover, neither party presents their arguments regarding the constitutionality of *§ 922(n)* under the governing—and binding on this Court—Fourth Circuit standard. Clear Fourth Circuit law dictates how the Court must undertake a *Second Amendment* analysis. This Court must first ask "whether the challenged law imposes a burden on conduct falling within the scope of the *Second Amendment's* guarantee." *United States v. Chester, 628 F.3d 673, 680 (4th Cir. 2010)*. Second, "[i]f the challenged regulation burdens conduct that was within the scope of the *Second Amendment* as historically **[*45]** understood, then [the court] moves to the second step of applying an appropriate form of means-end scrutiny." *Id.*

In order to determine the "appropriate form of means-end scrutiny," a court must determine whether the challenged law encumbers "core" *Second Amendment* rights.[29] "[L]aws burdening 'core' *Second Amendment* conduct receive strict scrutiny, while less severe burdens receive only intermediate scrutiny." *United States v. Hosford, 843 F.3d 161, 168 (4th Cir. 2016)* (citing *Masciandaro II, 638 F.3d at 471*). Finally, "unless the conduct at issue is not protected by the *Second Amendment* at all, the Government bears the burden of justifying the constitutional validity of the law." *Chester, 628 F.3d at 680*.

The United States, apparently relying on the reasoning of *United States v. Laurent, 861 F. Supp. 2d 71 (E.D.N.Y 2011)*, a case from a district court within the Second Circuit, contends that "because the statute places some burden on the right, but does not substantially burden the right, intermediate scrutiny is the appropriate form of means-end scrutiny." (Resp. Mot. Dismiss 14.) Horma, citing to a Fourth Circuit case but seemingly ignoring the progression of its analysis, asserts that "[t]he corollary of *Kolbe [v. Hogan, 849 F.3d 114 (4th Cir. 2017)* (en banc),] is that, when a statute does effectively disarm individuals, and leaves them unable to acquire any firearm for protections, strict scrutiny should be the proper standard." **[*46]** (Mot. Dismiss 22.) The Court cannot find that a ruling on a constitutional issue would serve the ends of justice when both parties failed to identify, articulate, and present their arguments in the context of the binding law this Court must apply.

B. The Parties Premise Their Arguments on Opposite Findings as to Horma's Immigration Status

Throughout briefing, the parties premise their *Second Amendment* arguments on diametrically different assumptions about Horma's immigration status, neither of which this Court adopts. Horma did not even acknowledge the *potential* that his immigration status could affect this Court's constitutionality determination until the Court expressly ordered him to do so. (*See* June 4, 2018 O. 3-4, ECF No. 36.) At that point, Horma stated that his immigration status "is not relevant to the challenge to the *facial* validity of *§ 922(n)*, but would preclude an *as-applied* challenge to *§ 922(n)*." (Def.'s Suppl. Br. 1, ECF No. 37 (emphasis added).) To the extent any status could be determined, Horma contended that he remained in the United States legally.

The United States argued consistently that Horma's status as a nonimmigrant alien, whether legally present or not, "defeats [Horma's] alleged expectation **[*47]** of a right to acquaint himself with a firearm for self-defense purposes because his possession of any firearm is manifestly illegal." (Resp. Mot. Dismiss 15.) According to the United

---

[29] *Heller* identified the "core" *Second Amendment* right as "the right of a law-abiding, responsible citizen to possess and carry a weapon for self-defense." *Chester, 628 F.3d at 683* (emphasis omitted) (citing *Heller, 554 U.S. at 634-35*).

States, a separate provision in *§ 922(g)*, *18 U.S.C. § 922(g)(5)(B)*, which prohibits even *lawfully* present nonimmigrant aliens from possessing firearms absent certain narrow exceptions "reflects Congress's judgement that non[]immigrant aliens are not entitled to the *Second Amendment* right to bear arms." (*Id.*) In its supplemental brief, the United States reiterated its position that "[i]f this [C]ourt concludes that Horma is an illegal alien, he would not enjoy the protection of the *Second Amendment*, and his invocation of it to mount a challenge to *§ 922(n)*—or any statute under the sun—would necessarily fail." (U.S. Suppl. Br. 5, ECF No. 38 (footnote omitted).)

Because the parties premise their arguments on their opposing positions regarding Horma's immigration status, they brief past each other. The Court now has concluded that Horma may lie somewhere between these two positions: he may not be *unlawfully* present for the purposes of *§ 922(g)(5)(A)*, but neither has his immigration status remained legal. *See supra* Part II. In light of the distinction between immigration status and presence, **[*48]** and given that the Court lacks a record to determine the issue of presence or the constitutionality of the statue, much of the parties' briefing does not address the *Second Amendment* issue this Court must decide.

C. The Court Has an Inadequate Record Before It

Finally, it would not serve the ends of justice for the Court to rule on Horma's *Second Amendment* challenge on the present record. At least twice, the Fourth Circuit has remanded cases presenting *Second Amendment* challenges to statutes because of an inadequate record from which to determine whether the United States carried its burden under intermediate scrutiny.[30] *See* *United States v. Carter, 669 F.3d 411, 421 (4th Cir. 2012)*; *Chester, 628 F.3d at 683*. In *Chester*, the Fourth Circuit noted that "[t]he government has offered numerous plausible *reasons* why the disarmament of domestic violence misdemeanants is substantially related to an important government goal; however, it has not attempted to offer sufficient *evidence* to establish a substantial relationship between [the statute at issue there] and an important governmental goal." *628 F.3d at 683*. Similarly, in *Carter*, recognizing that "the burden of demonstrating the fit rests on the government," and noting that "the government did not present sufficient evidence to substantiate the fit," the Fourth Circuit also remanded **[*49]** "the case to allow [the government] to do so and to allow Carter to respond." *669 F.3d at 421*.

Here, the Court has a record perhaps even less hearty than those in *Chester* and *Carter*. Although the parties offered evidence related to Horma's immigration status and his asylum application, neither side presented evidence as to the relationship between *§ 922(n)* and an important governmental goal.[31] Moreover, the bulk of the United States' argument related to the *fit* of the statute—not any relationship between the statute and the government interest.

The fit inquiry, however, merely constitutes the *start* of a court's intermediate scrutiny analysis. The Fourth Circuit directs that courts "begin [the] reasonable fit inquiry by considering the precise contours of' the challenged statute. *United States v. Staten, 666 F.3d 154, 162 (4th Cir. 2011)*. At this initial stage, the court looks at the kind of conduct prohibited by the statute, and whether the statute contains any narrowing features. *See, e.g.,* *United States v.*

---

[30] The Court makes no determination at this point about what level of scrutiny would apply to Horma's *Second Amendment* claim, noting only that, on this record, intermediate scrutiny likely would apply to Horma's *Second Amendment* challenge.

The Fourth Circuit has held that "laws burdening 'core' *Second Amendment* conduct receive strict scrutiny, while less severe burdens receive only intermediate scrutiny." *Hosford, 843 F.3d at 168* (citing *Masciandaro II, 638 F.3d at 471*). Heller identified the "core" *Second Amendment* right as "the right of a law-abiding, responsible citizen to possess and carry a weapon for self-defense." *Chester, 628 F.3d at 683* (emphasis omitted) (citing *Heller, 554 U.S. at 634-35*). Because both parties agree that Horma is not a citizen, Horma could not likely invoke the core *Second Amendment* right. *See id.* (holding that Chester's *Second Amendment* claim "is not within the core right identified in *Heller* . . . by virtue of Chester's criminal history as a domestic violence misdemeanant"). The parties remain free to argue otherwise.

[31] "[I]intermediate scrutiny places the burden of establishing the required fit squarely upon the government." *Chester, 628 F.3d at 683*.

Chapman, 666 F.3d 220, 228-29 (4th Cir. 2012) ("Of critical importance to our reasonable fit analysis is the fact that numerous features of [the challenged statute] keep its prohibitory sweep exceedingly narrow."). After the Court has established "the narrowness of [the challenged statute's] prohibitory sweep, **[*50]** . . . [it] tum[s] to evaluate *the evidence offered by the government in support of its reasonable fit burden*." Staten, 666 F.3d at 163 (emphasis added). At this second stage, under intermediate scrutiny, the United States would have the burden of establishing a reasonable fit between the *specific, identified* government interest and the *specific scope* of the challenged regulation.

The Fourth Circuit has identified that "the Constitution does not mandate a *specific* method by which the government must satisfy its burden under heightened judicial scrutiny." Carter, 669 F.3d at 418 (emphasis added). Under intermediate scrutiny, for instance, in order to carry its burden of establishing a reasonable fit between the governmental interest and the regulation, "the government may resort to a wide range of sources, such as legislative text and history, empirical evidence, case law, and common sense." Id. at 418. The Fourth Circuit also has suggested that when a statute includes an "important limiting principle," the United States need not establish an especially "fulsome" record. *See id.* Even when a statute contains such a limiting principle, however, "the government still bears the burden of showing that [the statute]'s limited imposition on Second Amendment rights **[*51]** *proportionately advances* the goal of preventing gun violence." Id. at 419 (emphasis added). Furthermore, "the nature and quantity of any showing required by the government 'to satisfy heightened judicial scrutiny of legislative judgments will vary up or down with the novelty and plausibility of the justification raised.'" *Id.* (quoting Nixon v. Shrink Mo. Gov't PAC, 528 U.S. 377, 391, 120 S. Ct. 897, 145 L. Ed. 2d 886 (2000)).

Although, during oral argument, the United States relied heavily on the record laid out in Laurent in attempting to make its showing, this Court will not base such a finding on a factual record established seven years ago by a different court, with different litigants, with material not before this Court. *See* Laurent, 861 F.Supp.2d at 105 (citing to the Bureau of Justice Statistics *Compendium of Federal Justice Statistics*, 2004 54 (2006), which found that "only 1.8% of felony defendants violated the terms of their pre-trial release by committing any other crime.").

With these principles in mind, cognizant of the Fourth Circuit's apparent reluctance to decide Second Amendment challenges on inadequate evidentiary records, and in the interests of justice, the Court will deny this aspect of Horma's Motion to Dismiss as to Counts III and IV without prejudice.

For the reasons stated above, the Court will deny without **[*52]** prejudice aspects of the Motion to Dismiss as to all Counts; and grant the Motion for Leave. An appropriate Order shall follow.

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate if there are no genuine issues of material fact and the moving party can demonstrate that it is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. A fact is material if it might affect the outcome of the suit, and a dispute is genuine if the evidence is such that it could lead a reasonable jury to return a verdict for either party. A court considering a motion for summary judgment must view the facts in the light most favorable to the nonmoving party and give that party the benefit of all reasonable inferences to be drawn from those facts. However, the nonmoving party may not rest upon allegations, but must produce probative evidence sufficient to demonstrate a genuine issue of material fact for trial.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN2[] Scope, Monopolization Offenses

Section 2 of the Sherman Antitrust Act imposes liability on every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states. 15 U.S.C.S. § 2. To establish a § 2 violation, a plaintiff must show that the defendant (1) possessed monopoly power in the relevant market, and (2) willfully acquired or maintained the monopoly power by anticompetitive conduct as opposed to gaining that power as a result of a superior product, business acumen, or historical accident. Minnesota anti-trust law is interpreted consistent with the federal court's construction of the Sherman Act.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

HN3[] Scope, Monopolization Offenses

Enforcement of a patent procured by fraud on the United States Patent and Trademark Office (PTO) may be violative of § 2 of the Sherman Act provided the other elements necessary to a § 2 case are present. To succeed on a Walker Process sham litigation claim, a plaintiff must prove: (1) the defendant fraudulently obtained patents through knowing and willful misconduct before the PTO, and maintained and enforced the patents with knowledge of the fraudulent procurement; and (2) all other elements to establish a Sherman Act monopolization claim are present.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

HN4[] Defenses, Fraudulent Procurement of Patent

The evidentiary showing required to satisfy the first Walker Process sham litigation element is nearly identical to that required to prove inequitable conduct. The inequitable conduct standard requires proof by clear and convincing evidence that a patentee acted with the specific intent to deceive the United States Patent and Trademark Office (PTO). A finding of gross negligence or negligence under a should have known standard does not satisfy the intent requirement. Rather, clear and convincing evidence must establish that an individual owing a duty of candor to the PTO (1) had actual knowledge of omitted information; (2) knew that the omitted information was material to the PTO's 's decision to award the patent; and (3) made a deliberate decision to withhold it. 37 C.F.R § 1.56(c). Because direct evidence of deceptive intent is rarely present, the intent to deceive may be inferred from indirect and circumstantial evidence. However, to meet the clear and convincing evidence standard, the specific intent to deceive must be the single most reasonable inference able to be drawn from the evidence. Indeed, the evidence must be sufficient to require a finding of deceitful intent in the light of all the circumstances. Thus, where multiple reasonable inferences may be drawn, intent to deceive cannot be found.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Inequitable Conduct

HN5[] Defenses, Inequitable Conduct

When an alleged omitted co-inventor does not claim to be such, it can hardly be inequitable conduct not to identify that person to the United States Patent and Trademark Office (PTO) as an inventor.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN6[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Bundling is the practice of offering, for a single price, two or more goods or services that could be sold separately. A bundled discount occurs when a firm sells a bundle of goods or services for a lower price than the seller charges for the goods or services purchased individually. Bundled discounts are generally pro-competitive because they result in lower prices to consumers. Sellers also benefit through bundling by saving on consumer transaction costs and capitalizing on economies of scope. Buyers often find package sales attractive; a seller's decision to offer such packages can merely be an attempt to compete effectively, conduct that is entirely consistent with the Sherman Act. However, bundled discounts have the potential to be anticompetitive if they exclude an equally or more efficient competitor who sells only a single product in the bundle.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN7[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Bundled discounts are somewhat similar to predatory pricing and tying. Predatory pricing occurs when a seller prices its product below cost and has a reasonable probability of recouping its losses by charging monopoly prices after the predation period has ended. Tying occurs when a seller coerces buyers into purchasing two products by tying them together, thereby forcing buyers to purchase the "tied" product from that seller rather than from a rival. But, there is an important distinction between bundling and tying claims. In a traditional tying claim, a seller forces the buyer to purchase the products as a package and will not sell the "tied" products separately. In a bundling claim, the buyer has the option of accepting the cost savings by purchasing the bundle or forgoing the savings by purchasing the products separately. The buyer is only "coerced" into taking the bundle because of the lower prices. Due to the distinction, an essential element of unlawful package discounting is that the purchaser is "forced" to take the bundle, which means that a rational, profit-maximizing buyer did not have good competitive options.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN8[] **Actual Monopolization, Anticompetitive & Predatory Practices**

An essential element of unlawful package discounting is that the purchaser be "forced" to take the bundle, which means that a rational, profit-maximizing buyer did not have good competitive options.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN9[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The discount attribution test is performed by allocating the full amount of the discounts given by a defendant on a bundle to the competitive product or products. If the resulting price of the competitive product or products is below the defendant's average variable cost to produce them, the bundle has the potential to exclude an equally efficient rival who makes only the competitive product. However, if the resulting price of the competitive product remains above the defendant's cost to produce them, the bundle falls into a safe harbor and is not actionable as exclusionary.

Antitrust & Trade Law > Procedural Matters

HN10[] **Antitrust & Trade Law, Procedural Matters**

Antitrust injury is a required element in any private antitrust action. Antitrust injury means harm to competition, not merely harm to competitors.

Antitrust & Trade Law > Sherman Act

HN11[] **Antitrust & Trade Law, Sherman Act**

It is in the interest of competition to permit dominant firms to engage in vigorous competition, including price competition. Indeed, the mere fact that a market has few competitors does not transform every action by one of them into an antitrust violation. Rather, even in a duopoly, a plaintiff must offer some other reason to think that the challenged behavior harmed competition. Harm to competition is measured by increased price, reduced output, or decreased quality.

Torts > ... > Contracts > Intentional Interference > Elements

HN12[] **Intentional Interference, Elements**

To establish tortious interference with a contract under Minnesota law, a plaintiff must show: (1) the existence of a contract, (2) the defendant's knowledge of the contract, (3) the defendant's intentional procurement of the breach of contract, (4) the defendant acted without justification, and (5) damages.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN13[] **Intentional Interference, Elements**

A claim for tortious interference with prospective economic advantage has five elements: (1) the existence of a reasonable expectation of economic advantage belonging to the plaintiff; (2) the defendant's knowledge of that expectation; (3) the defendant's wrongful interference with that expectation; (4) a reasonable probability that the plaintiff would have realized the expectation absent the defendant's conduct; and (5) damages. Liability for a tortious interference with prospective economic advantage claim rests on whether the actor's conduct was improper. For purposes of the tort, "improper" means are those that are independently wrongful, such as threats, violence, trespass, defamation, misrepresentation of fact, restraint of trade, or any other wrongful act recognized by statute or the common law.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

HN14[] **Defenses, Bad Faith Enforcement**

Federal patent law preempts state-law tort liability for a patentholder's good faith communications asserting infringement of its patent and warning about potential litigation. A plaintiff claiming that a patent holder has engaged in wrongful conduct by asserting claims of patent infringement must establish that the claims of infringement were objectively baseless.

Trade Secrets Law > Trade Secret Determination Factors > Definition Under Common Law

Trade Secrets Law > Trade Secret Determination Factors > Economic Value

Trade Secrets Law > Trade Secret Determination Factors > Generally Known

Trade Secrets Law > Trade Secret Determination Factors > Definition Under Uniform Act

HN15[] **Trade Secret Determination Factors, Definition Under Common Law**

A party seeking protection under the Minnesota Trade Secrets Act must show both the existence and the misappropriation of a trade secret. For information to be considered a trade secret, a party must show that: (1) the information is not generally known or readily ascertainable; (2) the information derives independent economic value from being secret; and (3) the party made reasonable efforts to maintain the information's secrecy.

Opinion

[*1193] MEMORANDUM OPINION AND ORDER

I. INTRODUCTION

On June 6, 2018, the undersigned United States District Judge heard oral argument on Plaintiff Inline Packaging, LLC's ("Inline") Motion for Partial Summary Judgment [Docket No. 540] and Motion to Exclude Expert Testimony [Docket No. 610]. Defendant Graphic Packaging International, LLC's ("Graphic") Motion for Summary Judgment [Docket No. 635], Motion to Exclude Expert Testimony [Docket No. 773], and Motion to Strike Pleading [Docket No. 788] were also heard on the same date.

Additionally before the Court is Inline's Objection [Docket No. 538] to Magistrate **[**2]** Judge Leo I. Brisbois' March 8, 2018 Order **[*1194]** [Docket No. 534] denying Inline's Motion to Amend to Plead Punitive Damages [Docket No. 504]. For the reasons set forth below, Graphic Packaging's motion for summary judgment is granted, Inline's motion for partial summary judgment is denied, all other motions are denied as moot, and Inline's Objection is denied as moot.

II. BACKGROUND

A. Parties

Inline and Graphic compete in the susceptor food packaging industry. Compl. [Docket No. 1] ¶ 2. Inline alleges Graphic is a monopolist in the United States susceptor food packaging market who has maintained its dominant position through a combination of anticompetitive tactics including unlawful discount bundling and sham intellectual property assertions. See generally, id. Inline contends that these tactics were employed in response to Inline's inroads at major food companies, and that Graphic's conduct has foreclosed Inline from selling to the market's largest purchasers of susceptor food packaging.

B. Susceptor Market

Susceptor food packaging is active food packaging that converts microwave energy to high surface temperatures which crisp and brown foods. Compl. ¶ 60. Of the handful of companies that **[**3]** supply susceptor products in the U.S., Graphic holds by far the largest market share at approximately 95% of the market, and Inline is second with approximately 4.6%. Hicks Decl. [Docket No. 638] Ex. 2 [Docket No. 640] ("Levinsohn Report") Ex. 4.

Inline and Graphic compete for supply contracts with consumer packaged goods food companies ("CPGs"). Compl. ¶¶ 20-21. The five largest purchasers of susceptor products in the U.S. are Nestlé, Conagra, Heinz, Schwan's, and Pinnacle. Levinsohn Report ¶ 187, Ex. 5. These five CPGs accounted for nearly 93% of U.S. susceptor sales in 2016. Id. Ex. 5.

C. Paperboard Market

Although Inline manufactures and sells only susceptor products, Graphic manufactures and sells paperboard/folding carton food packaging as well as susceptor products. Lindell Decl. [Docket No. 614] Ex. E [Docket No. 619] ("Saravia Report") ¶¶ 46-51. Graphic operates seven North American mills that produce paperboard to be used for manufacturing folding cartons. Id. ¶ 48. Graphic's paperboard customers include the five large CPGs listed above. Id. ¶ 52. Graphic's revenue and profits from sales of paperboard to these five customers far exceed its revenue and profits from sales of susceptor **[**4]** products to these same CPGs. Id. From 2010 to 2016, Graphic's revenue from paperboard sales to these CPGs was $1.9 billion, whereas its revenue from susceptor sales was $0.4 billion. Id. Graphic's gross profits from paperboard sales to these customers was $0.8 billion over this time period, while its gross profits from sales of susceptors was $0.2 billion. Id.

Graphic faces intense competition in the paperboard market from WestRock (formerly RockTenn), International Paper, Burd & Fletcher, and other regional and private label competitors. Id. ¶¶ 48, 53. In 2015, WestRock's reported revenue was $15.5 billion, which more than tripled Graphic's revenue of $4.3 billion for that year. Id. ¶ 53. Competition between Graphic, WestRock, and International Paper is intensified because these three firms are vertically integrated with paper mills. Id. ¶ 54. To cover the large fixed costs of running the mills while also offering competitive prices, the firms must operate the mills at full or close to full capacity. Id. **[*1195]** Thus, these firms are dependent on and must compete for large paperboard orders that will enable them to operate more efficiently and offer lower prices. Id.

Companies purchasing paperboard **[**5]** products employ strategies to encourage direct competition between paperboard suppliers to drive down prices. Id. ¶ 56. Business is sometimes awarded through reverse auctions and by seeking multiple bids for new lines of products or before re-signing contracts for an existing line of products. Id.

For example, in early 2014, Heinz conducted an open market bid and reverse product auction on its folding carton volume, even though Graphic had an existing contract for that volume of products through April 2015. Id. Although Graphic was successful in retaining the business, Heinz extracted a 5.8% price reduction on some products, with the reductions starting before the end of the original contract term. Id. Customers also seek discounts and incentives that suppliers agree to in order to retain business. Id. ¶ 58. This competition suggests that customers wield significant power in dictating contract terms and is likely one reason why Graphic's profit margins on paperboard products are lower than susceptor products, 9% to 23% for paperboard versus 32% to 46% for susceptors. Levinsohn Report ¶ 101.

D. Graphic's Supply Agreements

Graphic holds multi-year supply agreements with four of the five **[**6]** major CPGs for the supply of susceptor and paperboard products. See id. ¶¶ 132-185; Hicks Decl. ¶ 30. These contracts govern their purchases of susceptor and paperboard products from Graphic. Levinsohn Report ¶¶ 133, 144, 151, 158, 164, 168, 175, 179. The contracts, which extend from one to four years, are common in the industry. See, e.g. Hicks Decl. Ex. 12 [Docket No. 650] ("Jones Dep.") 124:7-11; Hicks Decl. Ex. 14 [Docket No. 652] ("Ferrara Dep.") 95:12-12; Hicks Decl. Ex. 15 [Docket No. 653] ("Dorman Dep.") 142:17-144:1; 145:6-23.

These supply contracts also include an array of financial incentives. For example, Graphic's supply agreement negotiated in 2010 with Heinz included price caps, price reductions, and improved payment terms for both paperboard and susceptor products. Levinsohn Report ¶ 139. Graphic's 2012 contract with Schwan's included year-over-year price reductions and an annual rebate program that provided discounts for both paperboard and susceptor products if Schwan's purchased a target incremental amount of susceptor products. Id. ¶ 156. Graphic's 2014 contract with Conagra included fixed pricing, caps on paperboard price fluctuations, annual price reductions, and **[**7]** required Graphic to pay all tooling and die and equipment costs. Id. ¶ 168. Graphic's 2014 amendment to its supply agreement with Pinnacle included a cap on paperboard prices, a $1.25 million signing bonus that Pinnacle would have to repay if it stopped purchasing from Graphic, and a commitment to pursue productivity improvements to reduce Pinnacle's costs by at least 4% each year. Id. ¶ 180. Similar contractual terms are common in the paperboard and susceptor industries. See, e.g. Jones Dep. 124:7-11; Ferrara Dep. 95:3-12; Dorman Dep. 145:13-23.

Graphic's 2010 contract with Heinz was contingent upon Graphic receiving Heinz's Smart Ones Artisan Pizza business, which was under contract with Inline at the time. Levinsohn Report ¶ 136. During the negotiation period leading up to the 2010 Heinz contract, Graphic viewed Inline as a "competitive threat." Id. ¶ 141. Graphic's internal emails from May 2009 reflect concern that Inline is "pushing to get business at a major CPG[s] like Heinz, Nestlé, or Schwan [sic]. We want to keep them out of **[*1196]** these locations to limit their credibility and growth." Id. ¶ 154.

E. Nestlé's Susceptor Sleeve Business

Since at least 2005, Nestlé has been one of Graphic's **[**8]** major customers. First Lorentz Decl. [Docket No. 543] Ex. 65 ("Best Dep.") 60:25-61:6. Unlike the other four large CPGs, however, Nestlé's purchases from Graphic are not covered by a supply agreement.

In 2009, Graphic viewed Inline's competitive efforts to secure business from Nestlé as having risen to a "troubling level." First Lorentz Decl. Ex. 67 [Docket No 557]. Graphic understood that Nestlé perceived Graphic's susceptor prices as "very high" because Graphic was "'unchecked' in the market." Id. Ex. 68 [Docket No. 558]. In late 2011, Inline was successful in securing Nestlé's Kahiki susceptor sleeve[1] business for supply in 2012. Id. Ex. 69 ("Seefeldt Dep.") 179:10-20.

All of Nestlé's susceptor sleeve business—including the Kahiki line that Inline secured in 2012—was scheduled for renewal at the end of June 2014. Graphic was aware that Inline was a serious competitor for this business. First Lorentz Decl. Ex. 72 [Docket No. 561]; id. Ex. 73 [Docket No. 562] at GPI 00104156. In the summer of 2013, Nestlé sent requests for proposals ("RFP") to Graphic, Inline, and other suppliers that covered three Nestlé product lines: Kahiki, Croissant Pocket, and Hot Pocket sleeves. Id. Ex. 87 [Docket **[**9]** No. 575]; First Watkins Decl. [Docket No. 590] ¶ 3. Nestlé explained that the product specifications would be distributed through an online system called "Ariba." First Watkins Decl. ¶ 3. Suppliers would submit proposals through the Ariba system for Nestlé's review. Id. If Nestlé elected to award business on the basis of a RFP proposal, that decision would be communicated to the supplier. Id. Ex. A [Docket No. 591].

Inline submitted RFP proposals for Nestlé's Kahiki, Croissant Pocket, and Hot Pocket susceptor sleeve business. Wolfe Decl. [Docket No. 600] ¶ 4. Nestlé, however, elected not to award any business through the RFP process, but decided to conduct a one-day, best and final auction event on January 7, 2014 using the Ariba system. Id. Ex. B [Docket No. 602].

Shortly before the auction, Inline received an email from Nestlé stating that "the Susceptors that you bid on in the previous RFP Susceptor Part I are going to be taken to a best and final auction." First Watkins Decl. ¶ 6. The terms and conditions governing the auction provided that a two or three year contract would be awarded, that the lowest bid price does not guarantee a business award, and that a formal contract would **[**10]** be drafted after the auction that would take precedent over anything specified in the RFP. Id. Ex. B [Docket No. 592].

Inline bid on five susceptor sleeve lots. First Watkins Decl. ¶ 9. As bidding on each lot progressed on the Ariba system, participants were able to see if another supplier had submitted a lower bid. Id. ¶ 10. If a lower bid had been received, there was an opportunity for suppliers to respond with another, lower bid of their own. Id. This bidding activity occurred on lot 2, which was the Kahiki business. Id. The back-and-forth competition resulted in a 20% reduction from the starting bid. Id.

[*1197] For each the five susceptor sleeve lots on which Inline submitted bids, Inline's bid price was the lowest. Id. ¶ 12. Nestlé communicated to Inline through the Ariba system that Inline had been awarded each of the five susceptor sleeve lots. Id. ¶ 12, Ex. F [Docket No. 596].

After the auction closed, Nestlé informed Graphic that it intended to move its entire susceptor sleeve business to the lowest bidder. Seefeldt Dep. 230:13-23; First Lorentz Decl. Ex. 96 [Docket No. 583]. Nestlé "[e]xpressed disappointment in [Graphic's] lack of an aggressive move and the fact [Graphic] did not **[**11]** get aggressive in the auction." First Lorentz Decl. Ex. 96. Graphic viewed Nestlé's statement as an attempt to elicit a reaction from Graphic. Id. Graphic intended to respond by "send[ing] a very strong message to Nestlé on how [Graphic] perceive[d] this underhanded move." Id.

Graphic suspected Inline was the lowest bidder in the Ariba auction. First Lorentz Decl. Ex. 9 [Docket No. 546] ("Voyzey Dep.") 192:23-193:9. Graphic communicated to Nestlé that it had patents on susceptor sleeves, and that a new supplier would likely be infringing those patents if Nestlé elected to steer its susceptor business away from Graphic. Seefeldt Dep. 221:19-222:18.

On February 24, 2014, Nestlé informed Inline that it was going to purchase only lots 2, 5 and 6, the Kahiki and Croissant Pocket sleeves, from Inline, representing about 10% of Nestlé's total susceptor sleeve business. First Lorentz Decl. Ex. 76 at 246:15-23; Ex. 99 [Docket No. 586] 68:6-8. Nestlé awarded Graphic lots 3 and 4, the Hot Pocket product line, which were overwhelmingly Nestlé's largest susceptor sleeve lines. Voyzey Dep. 207:7-10.

---

[1] Nestlé uses susceptor sleeves to package certain food products. Hot Pockets, for example, are packaged in a foldable and tearable susceptor sleeve that serves the dual function of browning and crisping as well as providing a holder for carrying the Hot Pocket. First Lorentz Decl. Ex. 55 [Docket No. 553].

F. Graphic's Patent Assertions

In December 2013, before the Ariba auction, Jeff Martinez ("Martinez"), **[**12]** Graphic's representative for the Nestlé account, emailed Nestlé and stated that at least two Graphic patents covered Nestlé susceptor sleeves. Second Lorentz Decl. [Docket No. 824] Ex. 177 [Docket No. 888].[2] After the auction ended, Graphic communicated to Nestlé that Graphic's patents would likely be infringed if Nestlé awarded any its susceptor sleeve business to Inline. Seefeldt Dep. 222:10-18; Voyzey Dep. 199:13-18. Because infringement threats can create concerns about the viability of a supplier and the impairment of Nestlé's supply chain, Nestlé takes threats relating to intellectual property infringement "very seriously." First Lorentz Decl. Ex. 101 [Docket No. 588] ¶ 6. Graphic eventually did retain the Hot Pocket sleeve business. Id. Ex. 97 [Docket No. 584]. After Inline lost the Hot Pocket business to Graphic, Nestlé employee Judge stated to Inline's president, Jeffrey Watkins ("Watkins"), that Graphic had told Nestlé that Inline would be infringing Graphic's patents if Inline were to become the supplier of the Hot Pocket packaging. Second Lorentz Decl. Ex. 167 [Docket No. 879] 256:21-257:8.

Shortly after Nestlé awarded its 2014 business to Graphic and Inline, Graphic considered **[**13]** reminding Nestlé of Graphic's patents on the susceptor sleeves, but decided that "the patent issue will not force **[*1198]** Nestlé to give us any more share or prevent them from bringing In Line [sic] in with a simple die change." Id. Ex. 184 [Docket No. 892]. Graphic decided instead to use the patent issue "with In Line [sic] where the legal issue would be anyway." Id. William Sedlacek ("Sedlacek") of Graphic suggested waiting until the current contract had nearly ended and then "play the patent card." Id. Doing so would force Inline to "requalify a revised die cut, essentially starting over again, having wasted time and expense while they pursue the current die cut." Id. In his deposition, Sedlacek defended this practice, describing waiting to "play the patent card until it has the most impact and turmoil" on Inline as "competitive strategy." Id. Ex. 185 [Docket No. 893] ("Sedlacek Dep.") 137:16-20.

On May 5, 2015, Graphic sent Inline a cease and desist letter asserting that Inline was infringing Graphic's intellectual property, specifically U.S. Patent Nos. 8,872,078 (the "'078 Patent"); D694,106; D694,124; and D727,145 (collectively, the "Asserted Patents"), which related to Nestlé's susceptor sleeves. Second Lorentz Decl. Ex. **[**14]** 187 [Docket No. 895]. The letter stated that Graphic intended to serve Inline with a patent infringement lawsuit unless Inline cease all infringing activities. Id. The following day, Graphic notified Nestlé about the cease and desist letter sent to Inline. Id. Ex. 186 [Docket No. 894].

When considering Nestlé's 2016 business award, Nestlé's Andrew Leach ("Leach") recognized that "Inline offered slightly higher savings although moving more volume away from [Graphic] would increase the likelihood of [Graphic] taking legal action on the perceived patent infringement." Id. Ex. 191 [Docket No. 898]. Nestlé eventually agreed to a three year extension with Graphic, which obligated Nestlé to purchase at least 85% of its susceptor sleeve business from Graphic. Id. Ex. 192 [Docket No. 899].

G. Origin of Asserted Patents

In 2005, Graphic obtained the Asserted Patents relating to susceptor sleeves. These are the same patents that Graphic asserted to Nestlé before the Ariba auction and to Inline in 2015. Kelly Fitzwater ("Fitzwater"), a Graphic designer, is identified as the first and sole inventor of the Asserted Patents and their underlying applications. Because Inline challenges the validity of **[**15]** the Asserted Patents on inventorship grounds, their origin is reviewed here.

---

[2] The issue of patent infringement had been a component of Graphic and Nestlé's relationship. In a 2012 email discussing moving sleeve business from Graphic to Inline, Nestlé employee Shannon Gavie ("Gavie") told Nestlé's head of packaging procurement, Lou Judge ("Judge"), to "be careful given [Graphic's] likelihood to want to sue us." Second Lorentz Decl. Ex. 173 [Docket No. 884]. Judge and Gavie respectively characterized Graphic as "litigation happy" and "Patent happy and like to threaten to sue." Id. Exs. 174 [Docket No. 885]; 175 [Docket No. 886].

The Asserted Patents represent the end result of susceptor sleeve redesigns. In the early 2000s, Corey Brower ("Brower"), a Nestlé packaging engineer, was involved in Projects Quantum and Roxanne.[3] First Lorentz Decl. Ex. 11 ("Brower Dep.") 15:11-16; 17:8-13. Project Quantum addressed increasing the filling within the Hot Pocket, and Project Roxanne was directed to increasing the portability of the Hot Pocket. Id. 17:16-19:18.

Brower communicated with Graphic regarding particular sleeve design features that Nestlé wanted. Id. 33:9-12. After receiving instructions from Brower, Graphic would supply susceptor sleeve design samples to Nestlé, which Brower and others at Nestlé would test and rate. Brower would then typically relay the suggested revisions **[*1199]** or changes back to Jeff Voyzey ("Voyzey") at Graphic. Id. 33:14-36:3.

In a June 12, 2001 memo, Brower described Nestlé's interest in particular design concepts with tear strips, pillow packs, and gussets. Id. 25:13-26:13; First Lorentz Decl. Ex. 14. Shortly after the June 2001 memo, Deb Pair ("Pair"), then a designer at Graphic, created drawings 50019D and 50019F **[**16]** that included the requested features. First Lorentz Decl. Exs. 18, 19. Graphic made 500 sample sleeves from each drawing and sold them to Nestlé for a total of $3,632. Id. Exs. 15-16.

After July 2001 and prior to 2005, Nestlé explored sleeve options without pillow packs and tear strips. Id. 39:9-13. Nestlé briefly explored a flexible sleeve, but decided to move back to the pillow pack and tear strip because it was unable to achieve product quality out of a flexible susceptor. Id. 39:14-40:23.

On March 30, 2005, Graphic and Nestlé entered into a Joint Development Agreement ("JDA") to "cooperate in the development of certain thermal insulating, hand held microwave sleeve packaging for hand held food products . . . and/or new cost reducing processes for producing Nestlé's existing microwave sleeve for hand held products." First Lorentz Decl. Ex. 22. Nestlé agreed to furnish Graphic with packaging criteria and concepts, assist Graphic as requested, and to test concepts developed by Graphic. Id. ¶ 4. The JDA provided for seven years of mutual exclusivity—Nestlé would purchase 100% of its requirements from Graphic and Graphic would not provide the same packaging to Nestlé's competitors—for **[**17]** any designs that Nestlé ultimately selected. Id. ¶ 5.1. The JDA also contemplated patents. Inventions that were solely invented by one party were to remain the property of the originating party. Id. ¶ 5.2 Inventions that were jointly invented were to be owned jointly "in accordance with the law governing such jointly owned patents." Id.

Fitzwater, who became a designer for Graphic in 2003, began working on Project Roxanne near the end of 2005. First Lorentz Decl. Ex. 5 ("Fitzwater Dep.") 19:16-22, 27:11-18. Between September 6 through September 23, 2005, Fitzwater drafted five drawings in response to instructions from Voyzey. Id. 144:13-20; First Lorentz Decl. Exs. 26, 28-34. Fitzwater began by modifying drawing 50019D, which had been created by Graphic designer Pair in 2001. First Lorentz Decl. Ex. 25, 26. Fitzwater testified in her deposition that each of her later drawings was "very different" from Pair's original design, and that she ultimately "changed the whole package." Hicks Decl. Ex. 17 [Docket No. 655] 145:18-25, 197:10-21.

Shortly after Fitzwater drafted the drawings, draft invention disclosures were prepared for Fitzwater's signature. First Lorentz Decl. Exs. 35-37. These **[**18]** partially completed, unsigned disclosure forms briefly describe the different opening features of each drawing. Id. Exs. 35-37. Each of the three forms list September 13, 2005 as the conception date of the invention, and September 23, 2005 as the date the first drawing was made. Id.

On September 30, 2005, Brower emailed Fitzwater and expressed his excitement for the concepts that Fitzwater had drafted. Id. Ex. 38. Brower requested a variation on the design that would "reduc[e] the number of tear down panels from two to one. The tear would be located approximately half way down the sleeve, exposing more of the sandwich with the first tear." Id. Fitzwater then created a new drawing that incorporated Brower's requests. Id. Ex. 40.

---

[3] Prior to Nestlé's acquisition of Chef America, Incorporated ("Chef America"), Brower was a Chef America employee. Brower Dep. 14:12-17. When Nestlé acquired Chef America, Brower became a Nestlé employee. Id. 15:11-16. For ease of clarity, hereinafter, Chef America will be referred to as Nestlé when discussing events that occurred prior to Nestlé's acquisition of Chef America.

In an October 2, 2005 email, Voyzey relayed Brower's excitement for the pillow **[*1200]** pack designs to Mark Sinclair, a Graphic employee. Id. Ex. 38. In the email, Voyzey stated that Fitzwater "has submitted these designs to see if they are patentable. We need to move quickly to see if these are patentable concepts and if so to get them protected as soon as possible." Id.

Three new invention disclosures were drafted. Id. Exs. 41-43. Unlike the invention disclosure forms **[**19]** prepared the month before, these new forms were fully completed and bear Fitzwater's signature, dated October 7, 2005. Id. The September 13, 2005 conception date and September 23, 2005 date of first drawing remain, but one of the signed disclosure forms also identifies drawing 51616G as first being drawn on September 23, 2005. Id. Inline claims this date is incorrect, because drawing 51616G was created on October 3, 2005 in response to Brower's September 30, 2005 request. Compare id. Ex. 35, with id. Ex. 43.

On December 8, 2005, Graphic filed a Provisional Application with the U.S. Patent and Trademark Office ("USPTO") for "Package with Removable Panel." Id. Ex. 54. The Provisional Application lists Fitzwater as the inventor and includes many of the drawings Fitzwater drafted in September 2005. Id.

Brower does not recall Graphic advising him that it was seeking patent protection on these designs. Brower Dep. 66:15-19. Voyzey also does not recall telling anyone at Nestlé that the patent would be filed showing Fitzwater as the sole inventor. Second Lorentz Decl. Ex. 141 [Docket No. 859] 112:5-21.

During the week of December 12, 2005, Nestlé conducted consumer testing on three sleeve designs. **[**20]** First Lorentz Decl. Ex. 55. Although the consumer testing was generally positive, some customers complained the bottom did not stay closed. Id. An alternative design with a locking tab was developed for a second testing group, which was well received. Id. After testing, Brower directed Fitzwater to add a locking tab to the design preferred by the customers. Id. Ex. 57. Fitzwater drafted the new design on December 20, 2005. Id. Ex. 58 [Docket No. 555].

On December 5, 2006, Graphic added the locking tab to a Non-Provisional Application, which also listed Fitzwater as the inventor. Id. Ex. 59. In addition to making other claims and acknowledgments, Fitzwater stated in a Declaration for Patent Application that she believes she is "an original, first and sole inventor" of the "Package with Removable Panel" design submitted on December 8, 2005. Id. Ex. 60. In her deposition, however, Fitzwater agreed that once she submitted the designs the patent application "was out of her hands," and that she was never involved in the "actual process, sitting with the lawyers." Fitzwater Dep. 174:25-175:4; 178:1-4.

H. Graphic's Manufacture of Smart Ones Design

Another issue in contention is Graphic's alleged **[**21]** misappropriation of a susceptor design that Inline had shared with Heinz. On September 3, 2008, Jeffrey Watkins, the president of Inline, met with Richard Parysek ("Parysek") of Heinz. Second Watkins Decl. [Docket No. 817] ¶ 2. During this meeting, Watkins provided a prototype of the "Micro-Bake II" design, which was an improvement on Inline's original Micro-Bake susceptor disk that Inline produced and sold to Heinz. Id. ¶¶ 3-4. Watkins provided the prototype to Heinz under express terms that it be treated as confidential. Id. ¶ 3.

In early 2011, Heinz agreed to move its susceptor disk business to Graphic. Second Lorentz Decl. Ex. 178 [Docket No. 889] at 5-6. However, Graphic was unable to provide a susceptor disk that matched the **[*1201]** performance of the disk Inline supplied. Id. at 6. Heinz directed Graphic to "review current Microbake susceptor" and provided recommended designs. Id. Graphic later began supplying Heinz with a new dual susceptor disk that included similar specifications and materials to Inline's confidential "Micro-Bake II" design. Id.

I. Graphic's Patent Suit Against Inline

On June 5, 2015, Graphic filed a patent infringement suit against Inline. See Graphic Packaging Int'l, Inc. **[**22]** v. Inline Packaging, LLC, No. 15-3476 (JNE/LIB) (the "Patent Suit"). In the Patent Suit, which remains pending, Graphic alleges that Inline infringed its Asserted Patents. See generally Patent Suit Compl. [Patent Suit Docket No. 1].

On January 12, 2016, the Patent Office's Patent Trial and Appeal Board ("PTAB") granted a petition by Inline seeking *inter partes* review ("IPR") of the claims in the '078 Patent. See Inline's Mem. Supp. Mot. Stay [Patent Suit Docket No. 52] at 2. The Patent Case was stayed pending the PTAB's decision in the IPR proceedings. See Order, Apr. 6, 2016 [Patent Suit Docket No. 66]. On January 10, 2017, the PTAB issued a Final Written Decision invalidating the '078 Patent. The Federal Circuit affirmed the judgment and denied Graphic's request for a panel rehearing and rehearing en banc. The mandate issued on April 17, 2018, and the stay in the Patent Case was lifted on July 20, 2018. See Order, July 20, 2018 [Patent Suit Docket No. 82].

J. Inline's Antitrust Suit Against Graphic

On July 31, 2015, Inline filed this lawsuit (the "Antitrust Suit") against Graphic. Inline alleges that Graphic, in response to price competition from Inline and others, engages in anticompetitive conduct to maintain **[**23]** a monopoly in the crisping and browning susceptor packaging market. Compl. ¶¶ 23-58, 81-110. According to Inline, Graphic's conduct has caused Inline to lose existing and potential customers. Id. ¶¶ 111, 114.

Inline asserts five claims against Graphic: Count I—Tortious Interference with Prospective Business Relations; Count II—Tortious Interference with Existing Contractual Relations; Count III—Misappropriation of Trade Secrets; Count IV—Violation of *Minn. Stat. § 325D.52* for Maintenance or Use of a Monopoly Power; and Count V—Violation of the Sherman Antitrust Act, *15 U.S.C. § 2*. Id. ¶¶ 121-48.

The tortious interference claims relate to Graphic's assertions to Nestlé that the Hot Pockets sleeve design was protected by the Asserted Patents. The misappropriation of trade secrets claim is based on Graphic's alleged copying of the susceptor packaging design that Inline had created for Heinz's Weight Watcher's Smart Ones pizza. The antitrust claims are premised on two theories of anticompetitive behavior: baseless threats of sham litigation (relating to the Asserted Patents) and predatory discount bundling (relating to Graphic's supply agreements with four of the five major susceptor purchasers).[4]

III. DISCUSSION

A. Summary [24] Judgment Motions**

1. Standard of Review

HN1[] Summary judgment is appropriate if there are no genuine issues of material **[*1202]** fact and the moving party can demonstrate that it is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. A fact is material if it might affect the outcome of the suit, and a dispute is genuine if the evidence is such that it could lead a reasonable jury to return a verdict for either party. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A court considering a motion for summary judgment must view the facts in the light most favorable to the nonmoving party and give that party the benefit of all reasonable inferences to be drawn from those facts. *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. However, the nonmoving party "may not rest upon allegations, but must produce probative evidence

---

[4] Inline also alleged that Graphic engaged in the anti-competitive practice of "baiting/submarine patent activities." Compl. ¶¶ 55-58; 106-10. Claims based on this theory of antitrust liability were dismissed by the Court in February 2016. See Mem. Op. Order, Feb. 23, 2016 [Docket No. 36] at 22-23, 32.

sufficient to demonstrate a genuine issue [of material fact] for trial." *Davenport v. Univ. of Ark. Bd. of Trs., 553 F.3d 1110, 1113 (8th Cir. 2009)* (citing *Anderson, 477 U.S. at 247-49*).

2. Graphic's Summary Judgment Motion

Graphic moves for summary judgment on all of Inline's claims.

a. Antitrust Claims (Counts IV and V)

Inline asserts antitrust claims against Graphic under both *Minn. Stat. § 325D.52* (Count IV) and the Sherman Antitrust Act, *15 U.S.C. § 2* (Count V). ***HN2***[] *Section 2* of the Sherman Act imposes liability on "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, **[**25]** to monopolize any part of the trade or commerce among the several States." *15 U.S.C. § 2*. To establish a *§ 2* violation, Inline must show that Graphic (1) "possessed monopoly power in the relevant market," and (2) "willfully acquired or maintained this monopoly power by anticompetitive conduct as opposed to gaining that power as a result of a superior product, business acumen, or historical accident." *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1060 (8th Cir. 2000)* (internal quotations omitted). "Minnesota anti-trust law is interpreted consistent with the federal court's construction of the Sherman Act." *Lamminen v. City of Cloquet, 987 F. Supp. 723, 734 (D. Minn. 1997)* (citing *State by Humphrey v. Road Constructors, Inc., 474 N.W.2d 224, 225 n.1 (Minn. Ct. App. 1991)*; see also *Lorix v. Crompton Corp., 736 N.W.2d 619, 626 (Minn. 2007)* ("As the purposes of Minnesota and federal ***antitrust law*** are the same, it is sensible to interpret them consistently.").

Inline alleges that Graphic is a monopolist in the United States susceptor food packaging market who has maintained its dominant position through a combination of anticompetitive tactics. Compl. ¶¶ 20-120. Inline identifies these tactics to include sham intellectual property assertions and unlawful discount bundling. Id. ¶¶ 23-38, 81-97. Inline claims that this conduct foreclosed Inline from selling to the market's largest susceptor purchasers.

i. Sham Patent Threats and Litigation

Inline argues that Graphic engaged in sham **[**26]** patent threats and litigation by obtaining the Asserted Patents through fraud on the PTO (commonly referred to as Walker Process fraud), and maintaining and enforcing the Asserted Patents with knowledge of the fraud. Compl. ¶ 4, 29-38, 89-97; Hicks Decl. Ex. 98 [Docket No. 736] ("Pl.'s Resp. Interrog.") at Resp. Nos. 28, 29. Inline explains that Graphic procured the Asserted Patents through fraud by not disclosing that: (1) persons at Nestlé were joint inventors of the Asserted Patents; and (2) sales of the 50019D and 50019F designs were made to Nestlé in 2001.

[*1203] ***HN3***[] "[E]nforcement of a patent procured by fraud on the Patent Office may be violative of *§ 2* of the Sherman Act provided the other elements necessary to a *§ 2* case are present." *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 174, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. To succeed on a Walker Process sham litigation claim, a plaintiff must prove: (1) the defendant fraudulently obtained patents through knowing and willful misconduct before the PTO, and maintained and enforced the patents with knowledge of the fraudulent procurement; and (2) all other elements to establish a Sherman Act monopolization claim are present. *TransWeb, LLC v. 3M Innovative Props. Co., 812 F.3d 1295, 1306 (Fed. Cir. 2016)*.

HN4[] The evidentiary showing required to satisfy the first Walker Process element is "nearly **[**27]** identical" to that required to prove inequitable conduct. *Id. at 1307*. The inequitable conduct standard requires proof by clear and convincing evidence that "the patentee acted with the specific intent to deceive the PTO." *Therasense, Inc. v. Becton, Dickinson & Co., 649 F.3d 1276, 1290 (Fed. Cir. 2011)*. A finding of gross negligence or negligence under a "should have known standard" does not satisfy this intent requirement. Id. Rather, clear and convincing evidence must establish that an individual owing a duty of candor to the PTO (1) had actual knowledge of omitted information; (2) knew that the omitted information was material to the PTO's decision to award the patent; and (3) made a deliberate decision to withhold it. Id.; *37 C.F.R § 1.56(c)*.

Because direct evidence of deceptive intent is rarely present, the intent to deceive may be inferred from indirect and circumstantial evidence. *Therasense, 649 F.3d at 1290*. "However, to meet the clear and convincing evidence standard, the specific intent to deceive must be the single most reasonable inference able to be drawn from the evidence. Indeed, the evidence must be sufficient to require a finding of deceitful intent in the light of all the circumstances." Id. (internal quotations and citations omitted) (emphasis in original). Thus, where multiple reasonable inferences **[**28]** may be drawn, intent to deceive cannot be found. *Id. at 1290-91*.

a. Inventorship

Inline argues that Fitzwater, Voyzey, and Graphic's chief intellectual property counsel, Barry Biddle, Esq., all engaged in inequitable conduct because all three owed a duty of candor to the PTO and knew that Fitzwater was not the first and sole inventor of the Asserted Patents.

In arguing that Fitzwater was not the first and sole inventor, Inline does not identify the specific individual or individuals who allegedly co-invented the Asserted Patents. Rather, Inline and its expert contend that "someone at or associated with Nestlé," such as Brower or one of his colleagues, contributed to the inventions claimed in the Asserted Patents and should have been named as a co-inventor. Hicks Decl. Ex. 4 [Docket No. 642] ("Kowalchyk Report") ¶¶ 8, 92; Pl.'s Mem. Opp'n Summ. J. [Docket No. 812] at 37. Graphic responds that neither Brower nor anyone else at Nestlé has ever claimed to be an inventor or co-inventor of the Asserted Patents. Graphic argues there can be no specific intent to deceive the PTO by failing to name an alleged co-inventor when no person claims they are a co-inventor.

The Federal Circuit has held that "[w]hen an **[**29]** alleged ***HN5***[] omitted co-inventor does not claim to be such, it can hardly be inequitable conduct not to identify that person to the PTO as an inventor." *Pro-Mold & Tool Co., Inc. v. Great Lakes Plastics, Inc., 75 F.3d 1568, 1576 (Fed. Cir.* ***[*1204]*** *1996)*; see also Keystone Retaining Wall Sys., Inc. v. Rockwood Retaining Walls, Inc., No. 00-496, 2001 WL 951582, at *9 (D. Minn. Aug. 22, 2001) (finding non-disclosure of alleged co-inventor did not constitute intent to deceive PTO where alleged co-inventor submitted an affidavit stating he was not an inventor); *Brixham Sols. Ltd. v. Juniper Networks, Inc., No. 13-616, 2014 U.S. Dist. LEXIS 7929, 2014 WL 250204, at *7 (N.D. Cal. Jan. 22, 2014)* ("In the absence of allegations identifying the specific individual or individuals who allegedly co-invented the claimed invention and setting forth specific facts showing how each of these individuals contributed to the conception of a particular claim or claims, [a plaintiff's] inequitable conduct allegation based on this theory is insufficient as a matter of law.").

To this day, neither Brower nor anyone else at Nestlé claims to be an inventor of the Asserted Patents. Brower testified in his deposition that he does not consider himself an inventor of the '078 Patent. Hicks Decl. Ex. 19 [Docket No. 657] 74:11-24. He also submitted a declaration stating that he "was not previously familiar with the legal standard for inventorship" and that he is "not prepared now, many years after the applications were filed, to determine whether [he] or anyone else at Nestlé is or is **[**30]** not an inventor." First Lorentz Decl. Ex. 8 ("Brower Decl.") [Docket No. 543, Attach. 3] ¶ 19. Lou Judge, head of packaging procurement for Nestlé, has testified that no one at Nestlé claims to be an inventor of the Asserted Patents. Judge Decl. [Docket No. 770] ¶ 111. Despite Brower and Nestlé's knowledge of this lawsuit and Inline's allegations that Graphic intentionally excluded Nestlé personnel as inventors, no current or former Nestlé employee has challenged inventorship before the PTO. Stoll Decl. [Docket No. 760] Ex. 1 [Docket No. 761] ("Stoll Report") ¶ 93.

Based on the absence of any person claiming to be a co-inventor with Fitzwater of the Asserted Patents, Inline cannot show that an individual associated with the filing or prosecution of the Asserted Patents acted with specific intent to deceive the PTO by failing to name an alleged co-inventor. Thus, Graphic's nondisclosure of joint inventors does not satisfy the first element of Inline's Walker Process sham litigation claim.

b. Prior Sales

Inline argues that Graphic engaged in inequitable conduct by not disclosing to the PTO the sales of the 50019D and 50019F design samples to Chef America in 2001. Inline argues that the **[**31]** sales were material to the prosecution of the Asserted Patents.[5] Graphic disputes that the prior sales were material or that it engaged in inequitable conduct.

The Court need not resolve the issue of whether the prior sales were material because even if they were, Inline has offered no argument or evidence (and certainly not clear and convincing evidence) that anyone at Graphic owing a duty of candor to the PTO knew that the prior sales were material yet deliberately chose not to disclose them. The evidence shows that Biddle did not begin working for Graphic until 2004, years after Project Quantum and the sale of the 50019D and 50019F designs to Chef America had occurred. Hicks Decl. Ex. 18 [Docket No. 656] ("Biddle Dep.") 12:21-13:1, 207:20-24. Biddle has testified that he had no knowledge of Project Quantum, the 50019D and 50019F designs, or the sale of the designs, and there is no evidence to the contrary. Id. 129:15-130:23, 207:20-24.

[*1205] To the extent that Inline suggests Biddle was obligated to investigate Project Quantum—a project he did not know about—Inline must show that Biddle was presented with "sufficient information . . . to suggest the existence of specific information the **[**32]** materiality of which may be ascertained with reasonable inquiry." *Brasseler, U.S.A. I., L.P. v. Stryker Sales Corp., 267 F.3d 1370, 1382 (Fed. Cir. 2001)*. In other words, Inline must prove that Biddle "had notice that a potentially invalidating event took place, and that [he] willfully ignored such notice in a conscious effort to avoid complying with [his] duty to disclose." *Id. at 1385*. The record lacks any evidence to support such a finding.

Even if Inline could establish that Biddle had notice of the 50019D and 50019F designs and prior sales, Inline offers no evidence that Biddle knew they were material. Indeed, Biddle continues to believe that the designs are not material to the Asserted Patents. Biddle Dep. 207:6-208:10; see Biomed. Enters., Inc. v. Solana Surgical, LLC, No. 14-95, 2016 WL 4198305, at *5 (W.D. Tex. May 9, 2016) (finding that a patentee's continued assertion that references were not prior art "support[ed] the conclusion that no one with a duty to disclose knew [the references] to be material prior art").

Similarly, there is no evidence that Fitzwater had any knowledge of the 50019F design or the sales to Chef America in 2001. Although she had knowledge of the 50019D design, she testified it was "very different" than the claimed design. Hicks Decl. Ex. 17 at 145:18-25, 222:15-225:16. Although Inline contends that 50019D served as a starting point for Fitzwater's **[**33]** work on Project Roxanne, Fitzwater testified that she "changed the whole package." Id. at 197:10-21. Thus, clear and convincing evidence that Fitzwater had actual knowledge of (1) the materiality of the 50019D and 50019F designs, or (2) the prior sales is totally lacking.

Further, even if Voyzey could somehow be considered as owing a duty of candor to the PTO,[6] Inline offers no evidence or argument that he knew the designs were material or that he intended to deceive the PTO by not disclosing them.

Thus, Inline cannot show that the "single most reasonable inference" to be drawn is that Biddle, Fitzwater, or Voyzey intended to deceive the PTO by not disclosing the prior sales. *Therasense, 649 F.3d at 1290*.

---

[5] The sale of a purported invention more than one year prior to the filing of a patent application bars patentability. *35 U.S.C. § 102(a)-(b)*.

[6] Under *37 C.F.R. § 1.56(c)*, persons owing a duty of disclosure to the PTO include the inventor named in the application, the attorney or agent who prepares or prosecutes the application, and "[e]very other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor." Inline's own expert admits that the facts do not support a determination that Voyzey owes a duty of candor to the PTO. Hicks Decl. Ex. 16 [Docket No. 654] ("Kowalchyk Dep.") 31:22-32:4.

Because Graphic's naming of Fitzwater as the sole inventor and nondisclosure of prior sales did not constitute inequitable conduct, Inline cannot satisfy the first element of its Walker Process sham litigation claim. Thus, Graphic is entitled to summary judgment on this claim.

c. Additional Sham Litigation Theory

Inline argues that its sham litigation claim rests on a second theory in addition to Walker Process fraud. Specifically, Inline contends that antitrust liability for sham litigation can also arise if the **[**34]** litigation is (1) objectively baseless, and (2) brought with subjective bad faith. Pl.'s Mem. Opp'n Summ. J. at 23 (citing *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1068 (Fed. Cir. 1998))*. Inline contends that it was objectively baseless for Graphic to threaten and then **[*1206]** to pursue the patent litigation against Inline "in light of the known collaboration with Nestlé, the Joint Development Agreement, and the direct evidence demonstrating Fitzwater was not the first and sole inventor." Id. at 24.

This argument is a recycled version of Inline's argument that Graphic procured the Asserted Patents through fraud by not disclosing that others at Nestlé were joint inventors of the Asserted Patents. Just as Graphic cannot have engaged in fraud on the PTO by failing to name someone from Nestlé as a co-inventor when no one at Nestlé claims to be a co-inventor, Graphic's pursuit of litigation on the Asserted Patents cannot be objectively baseless on inventorship grounds when no one at Nestlé claims to be a co-inventor. Therefore, Inline's sham litigation claim must be dismissed.

ii. Discount Bundling

Inline alleges that Graphic engaged in anticompetitive bundling of food susceptor packaging with other discounted paperboard packaging. ***HN6***[] "Bundling is the practice of offering, **[**35]** for a single price, two or more goods or services that could be sold separately. A bundled discount occurs when a firm sells a bundle of goods or services for a lower price than the seller charges for the goods or services purchased individually." *Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 894 (9th Cir. 2008)*.

Bundled discounts are generally pro-competitive because they result in lower prices to consumers. *Id. at 895*. Sellers also benefit through bundling by saving on consumer transaction costs and capitalizing on economies of scope. *Id. at 895-96*. The Supreme Court has observed that "[b]uyers often find package sales attractive; a seller's decision to offer such packages can merely be an attempt to compete effectively—conduct that is entirely consistent with the *Sherman Act*." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*.

However, bundled discounts have the potential to be anticompetitive if they exclude an equally or more efficient competitor who sells only a single product in the bundle. *PeaceHealth, 515 F.3d at 896*. The following hypothetical provides an example of how a bundled discounter can exclude single-product rivals without pricing its products below its cost to produce them:

> Assume for the sake of simplicity that the case involved the sale of two hair products, shampoo and conditioner, the latter made only by A and the former by **[**36]** both A and B. Assume as well that both must be used to wash one's hair. Assume further that A's average variable cost for conditioner is $2.50, that its average variable cost for shampoo is $1.50, and that B's average variable cost for shampoo is $1.25. B therefore is the more efficient producer of shampoo. Finally, assume that A prices conditioner and shampoo at $5 and $3, respectively, if bought separately but at $3 and $2.25 if bought as part of a package. Absent the package pricing, A's price for both products is $8. B therefore must price its shampoo at or below $3 in order to compete effectively with A, given that the customer will be paying A $5 for conditioner irrespective of which shampoo supplier it chooses. With the package pricing, the customer can purchase both products from A for $5.25, a price above the sum of A's average variable cost for both products. In order for B to compete, however, it must persuade the customer to buy B's shampoo while purchasing its conditioner from A for $5. In

> order **[*1207]** to do that, B cannot charge more than $0.25 for shampoo, as the customer otherwise will find A's package cheaper than buying conditioner from A and shampoo from B. On these assumptions, **[**37]** A would force B out of the shampoo market, notwithstanding that B is the more efficient producer of shampoo, without pricing either of A's products below average variable cost.

Ortho Diagnostic Sys. v. Abbott Lab., 920 F. Supp. 455, 467 (S.D.N.Y. 1996), as corrected (Mar. 22, 1996).

HN7[] Bundled discounts are somewhat similar to predatory pricing and tying. *PeaceHealth, 515 F.3d at 900*; 3A Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 749d2 at 325 (2008). Predatory pricing occurs when a seller prices its product below cost and has a reasonable probability of recouping its losses by charging monopoly prices after the predation period has ended. *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*. Tying occurs when a seller coerces buyers into purchasing two products by tying them together, thereby forcing buyers to purchase the "tied" product from that seller rather than from a rival. 3A Areeda & Hovenkamp ¶ 749d2 at 324.

But, there is an important distinction between bundling and tying claims. In a traditional tying claim a seller forces the buyer to purchase the products as a package and will not sell the "tied" products separately. In a bundling claim, the buyer has the option of accepting the cost savings by purchasing the bundle or forgoing the savings by purchasing the products separately. Id. at 325. The buyer is only "coerced" into taking **[**38]** the bundle because of the lower prices. Id. Due to this distinction, "an essential element of unlawful package discounting is that the purchaser be 'forced' to take the bundle—which means that a rational, profit-maximizing buyer did not have good competitive options." Id. ¶ 749d3 at 326.

To determine whether bundled discounts have the potential to exclude an equally efficient rival from the market, the Ninth Circuit has developed the "discount attribution" standard.[7] Under this cost-based rule:

> the full amount of the discounts given by the defendant on the bundle are allocated to the competitive product or products. If the resulting price of the competitive product or products is below the defendant's incremental cost to produce them, the trier of fact may find that the bundled discount is exclusionary for the purpose of *§ 2*. This standard makes the defendant's bundled discounts legal unless the discounts have the potential to exclude a hypothetical equally efficient producer of the competitive product.

Peace Health, 515 F.3d at 906 (emphasis in original). The discount attribution standard has been recognized by multiple **[*1208]** courts as the appropriate test to apply to bundling claims. See, e.g., *Collins Inkjet Corp. v. Eastman Kodak Co., 781 F.3d 264, 273-74 (6th Cir. 2015)*; *Safeway Inc. v. Abbott Labs., 2010 U.S. Dist. LEXIS 2145, 2010 WL 147988, at *3-5 (N.D. Cal. Jan. 12, 2010)*.

Inline contends that its expert, Dr. Levinsohn, performed the discount attribution test for nine of Graphic's supply contracts with its customers and that all nine failed the discount attribution test. See Levinsohn Report. Graphic disputes this conclusion and argues that it is entitled to summary judgment on Inline's discount bundling claim because: (1) Graphic did not bundle susceptor and paperboard products; (2) Inline has not shown that Graphic has monopoly power in the leveraging market (paperboard); (3) the discount attribution test shows Graphic's susceptor price is above cost; and (4) the alleged bundles have not harmed competition.

---

[7] There is no current Eighth Circuit precedent addressing the applicable standard for evaluating bundling claims. In 2010, the Eighth Circuit analyzed a discount bundling theory in which the Court seemed to, at least implicitly, endorse a discount bundling test that requires a below cost pricing component after attributing the entire discount on all products within a package to the competitive product. See *Southeast Missouri Hosp. v. C. R. Bard, Inc., 616 F.3d 888, 893 (8th Cir. 2010)* ("Bard I"). However, this decision was vacated shortly after its publication and decided on alternative grounds while making no reference to the discount bundling theory. See *Southeast Missouri Hosp. v. C. R. Bard, Inc., 642 F.3d 608 (8th Cir. 2011)* ("Bard II"). Because Bard **[**39]** I was vacated, this Court gives it no precedential value in determining how, in the future, the Eighth Circuit may evaluate a discount bundling claim.

a. Whether Graphic Bundled

Graphic argues that it did not engage in bundling because the discounts on paperboard were not conditioned upon the purchase of susceptor packaging. Graphic contends that Inline leaps to the conclusion that whenever susceptors and paperboard are included in the same contract, any discount, rebate, or signing bonus in the contract was necessarily conditioned on the purchase of susceptors and would not have been available if only paperboard had been purchased. Graphic argues that this assumption lacks evidentiary support **[**40]** and is contradicted by the declarations and deposition testimony its customers. Several customers have testified that their discounts were not conditioned on the purchase of susceptors, and that it was the customer, not Graphic, who made the decision of which products to include in its purchase from Graphic. See Hicks Decl. Ex. 12 [Docket No. 650] ("Jones Dep.") 27:1-15, 109:1-111:9, 118:15-125:14; Hicks Decl. Ex. 13 [Docket No. 651] ("Sitterly Dep.") 180:18-181:4; Hicks Decl. Ex. 14 [Docket No. 652] ("Ferrara Dep.") 89:1-92:23, 97:5-17; Hick Decl. Ex. 15 [Docket No. 653] ("Dorman Dep.") 142:8-144:21. Thus, argues Graphic, discounts cannot constitute anticompetitive bundling when the customers ask for the discounts, deny that the discounts were conditioned on the purchase of susceptors, and deny that they were coerced into purchasing susceptors from Graphic.

Inline responds that because this is not a tying case, it need not show that discounts on one product were expressly tied to the purchase of another product. This argument misses the mark. Although Inline need not show that a customer who purchased paperboard was required to also purchase susceptors (a traditional tying claim), **[**41]** Inline must show that if customers had purchased only paperboard (and no susceptor packaging) from Graphic, they would not have received any discount on their paperboard purchases. Thus, Inline must show that Graphic conditioned discounts and incentives on the purchase of susceptor and paperboard as a bundle.

That being said, Inline has adduced sufficient evidence to raise a fact issue about whether the discounts were conditioned on the purchase of susceptor and paperboard as a bundle. The supply contracts at issue include both paperboard and susceptor products as well as discount terms that are specific to those contracts. Levinsohn Report ¶ 109; Hicks Decl. Exs. 28-36 [Docket Nos. 666-674] (Supply Agreements). Viewing this evidence in the light most favorable to Inline, a reasonable jury could conclude that the discounts were conditioned upon the purchase of both product categories as a discounted bundle.

[*1209] b. No Monopoly or Market Power in Leveraging Market

Graphic also argues that even if Inline could show that bundling occurred, a bundling claim requires the plaintiff to also show the defendant had monopoly power in the leveraging market (here, the paperboard market) and Inline has **[**42]** failed to do so. Inline responds that, although monopoly power or significant market power is required for a tying claim, the discount attribution test imposes no such requirement for a plaintiff to prevail on a discount bundling claim. Rather, contends Inline, courts look to the economic realities of a bundling claim to determine if the bundle is anticompetitive. Inline argues that the economic reality here is that Graphic's paperboard volume was so massive that even a small discount on the paperboard component of the bundle dwarfed any discount a single-product susceptor competitor could feasibly offer on the purchase of susceptors alone.

The Tenth Circuit has recognized that there is no support in the caselaw for the proposition that the discount attribution test can properly be used to show coercion by a non-monopolist in the leveraging market. *Suture Express v. Owens & Minor Distrib. Inc., 851 F.3d 1029, 1043 (10th Cir. 2017)* (citing *Collins Inkjet, 781 F.3d at 270-78* (applying test to defendant with 100% market share in leveraging market); *PeaceHealth, 515 F.3d at 891-92, 910* (applying test to near-monopolist in leveraging market)).

Regardless of whether monopoly power in the leveraging market is required, Inline's economic expert, Dr. Levinsohn, admits that at least some market power is needed in the leveraging market for Inline's **[**43]** discount bundling theory to be viable. Hicks Decl. Ex. 10 [Docket No. 648] ("Levinsohn Dep.") 20:8-12; 38:16-24; 39:13-18.[8] Despite admitting that some market power is needed, Dr. Levinsohn did not claim that Graphic possesses market power in paperboard in either of his expert reports. See generally Levinsohn Report; Levinsohn Rebuttal. Dr. Levinsohn's only opinion about Graphic's market power is that Graphic holds substantial market power in the susceptor market. Levinsohn Report ¶ 101.

The only content in Dr. Levinsohn's Reports that arguably addresses Graphic's market power in the paperboard market is found in a footnote in Dr. Levinsohn's Rebuttal Report. See Levinsohn Rebuttal at 5 n.20. The footnote references selected statements in Graphic's sales and marketing documents regarding Graphic's market shares in various market segments such as "frozen pizza," "frozen foods," and "CRB/SUS food markets." See id. Dr. Levinsohn testified in his deposition that these documents "give context to Graphic's position in the folding market" and constitute "the evidentiary record on what Graphic's position in the folding carton market is." Levinsohn Dep. 52:21-53:8. However, Dr. Levinsohn provides no analysis of the **[**44]** documents, much less a conclusion stating what Graphic's market position is in the paperboard market. Additionally, Dr. Levinsohn conceded that he was "not sure" whether the market shares referenced in some of the documents pertained to both **[*1210]** paperboard and susceptor, or to paperboard only. Id. 52:5-16. He also stated that "[o]ne would need to do a little more research" to determine whether a document stating Graphic's position in the North American market was relevant to Graphic's market power in the U.S. paperboard market. Id. 49:7-13.

After the submission of his expert reports, Dr. Levinsohn testified in his deposition that Graphic had sufficient market power to offer exclusionary bundles because Graphic's accounting margins in the paperboard market were large enough to absorb discounts on the bundle. Id. at 24:5-25:5; 132:2-10; 133:21-136:25. To the extent that this constitutes an expert opinion on Graphic's market power in paperboard, the opinion is untimely. Additionally, accounting margins are not reliable evidence of market power. 3 Areeda & Hovenkamp ¶ 516f at 142 ("[S]ubstantial accounting profits—say, 20%—may be consistent with trivial or zero economic profit and thus do not **[**45]** necessarily indicate any market power."); *Bailey v. Allgas, Inc., 284 F.3d 1237, 1252 (11th Cir. 2002)* (stating a company's profit margins "reveal[] very little about its market power"); *Garnica v. HomeTeam Pest Def., Inc., 230 F. Supp. 3d 1155, 1159 (N.D. Cal. 2017)* ("[I]nferring market power from gross margins is a dicey proposition, and high gross margins are generally not by themselves sufficient to prove such power."). Thus, Inline has not produced sufficient evidence from which a reasonable jury could find that Graphic had the necessary market power in the paperboard market to economically coerce a buyer into accepting the bundle.

Inline's failure to show that Graphic had market power in the leveraging paperboard market is fatal to its bundling claim. "[A]n essential element ***HN8***[] of unlawful package discounting is that the purchaser be 'forced' to take the bundle—which means that a rational, profit-maximizing buyer did not have good competitive options." 3A Areeda & Hovenkamp ¶ 749d3 at 326. The unrebutted evidence shows that a buyer does have good competitive options, because Graphic faces vigorous competition in the paperboard market. Thus, buyers are not coerced to take Graphic's bundle. Rather, they can purchase susceptors from Inline and purchase paperboard from another source at competitive prices.

Resisting this **[**46]** conclusion, Inline argues that market power in the leveraging market is not a required element of a bundling claim under PeaceHealth. However, Inline's own economic expert admits that market power in paperboard is needed for Graphic's bundling claim to be anticompetitive.

c. Discount Attribution Test

[8] Dr. Levinsohn also opined that market power is not necessary for an incumbent to foreclose a new entrant when only a fraction of shares are contestable in a given time period. Hicks Decl. Ex. 6 [Docket No. 644] ("Levinsohn Rebuttal") ¶ 18. However, the example he provides to support this proposition involves a single-product hypothetical. Id. This hypothetical does not support Inline's allegations that Graphic has willfully maintained its monopoly in susceptor packaging by bundling it with a second product—paperboard packaging. See Compl. ¶¶ 81-88.

Even if Inline could show that Graphic held sufficient market power in paperboard to support a claim for unlawful bundling, Dr. Levinsohn did not correctly apply the discount attribution test to Graphic's allegedly bundled contracts. When the test is properly applied, it is undisputed that eight of the nine contracts pass the test.

HN9[] As explained earlier, the discount attribution test is performed by allocating "the full amount of the discounts given by the defendant on the bundle . . . to the competitive product or products." *PeaceHealth, 515 F.3d at 906*. If the resulting price of the competitive product or products is below the defendant's average variable cost to produce them, the bundle has the potential to exclude an equally efficient rival who makes only the competitive product. However, if the resulting price of the competitive product remains above the defendant's cost to produce them, the bundle **[*1211]** falls into a **[**47]** safe harbor and is not actionable as exclusionary. *Id. at 906, 909*.

Here, Dr. Levinsohn allocated the full amount of the discounts on the bundle to only 20% of the competitive product (susceptors), rather than to the full amount of susceptors in the bundle. Levinsohn Report Ex. 7. Dr. Levinsohn explained that he allocated the discounts to only a fraction of the susceptors in the bundle because large buyers are unwilling to "put all of their eggs in the basket" of a susceptor manufacturer who has not previously supplied susceptors to a given buyer, and thus "only a subset of a buyer's susceptor purchases are 'contestable' to an entrant." Levinsohn Report ¶ 97. Dr. Levinsohn estimated the "contestable share" here to be 20% because "Inline's share of a buyer's purchases . . . never exceeds 20 percent in the first year of supply, and Inline never supplied more than one new product line to a large buyer in the first year of supply." Id. Under Dr. Levinsohn's "contestable share" variation of the discount attribution test, none of Graphic's contracts passed the test. Id. ¶¶ 97, 114, 148-49, 161-62, 171-72, 183-85, Ex. 7.

No precedent exists for Dr. Levinsohn's "contestable share" variation of the discount **[**48]** attribution test.[9] Although the contestable share method might, in some instances, identify discount bundles that are capable of excluding an equally efficient rival who cannot contest all sales of the competitive product, the method is prone to error, would increase enforcement and litigation costs, and would chill procompetitive price cuts. See *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 234 (1st Cir. 1983)* ("Rules that seek to embody every economic complexity and qualification may well, through the vagaries of administration, prove counter-productive, undercutting the very economic ends they seek to serve. . . . [W]e must be concerned lest a rule or precedent that authorizes a search for a particular type of undesirable pricing behavior end up by discouraging legitimate price competition.") (internal citations omitted).

The contestable share method is prone to error because it has the potential to condemn an overly broad category of bundled discounts that include non-predatory, above-cost discounts that could be matched by an equally efficient rival.

A modification of the earlier referenced shampoo/conditioner hypothetical illustrates this point. Suppose Firm A prices shampoo (the competitive product) at $3 and conditioner at $5 **[**49]** if purchased separately, and sells the products as a bundle for $7. Firm A's average variable cost for shampoo is $1.50. Under the PeaceHealth discount attribution test, the entire packaged discount, $1, would be subtracted from the shampoo price of $3, resulting in an effective price of $2, which is above Firm A's average variable cost. The bundled price of $7 thus passes the PeaceHealth test and falls within the safe harbor for packaged discounts that will not be condemned as anticompetitive, because the $7 bundle is not "below the defendant's incremental cost" and could be matched by an "equally efficient producer of the competitive product." *PeaceHealth at 909*.

[*1212] However, the same $7 bundle would fail Dr. Levinsohn's "contestable share" test. For example, if Firm A sells 10 bundles of shampoo and conditioner, and the total discount of $10 ($1 per bundle x 10 bundles) were

---

[9] Inline argues that support for the contestable share analysis can be found in a Competitive Impact Statement filed in U.S. v. United Regional Health Care Sys., No. 11-00030, 2011 WL 13054949 (N.D. Texas Feb. 25, 2011). The Competitive Impact Statement is a document filed in the case by the government in connection with a proposed final judgment. Moreover, the document acknowledges that the contestable share method differs from the PeaceHealth test, and that measuring the contestable share "may in some cases be impractical." Id.

applied to only 20% of the shampoo sales (2 shampoos x $3 = $6), the effective price of the two shampoos would be $-4.

The contestable share analysis would also add to enforcement costs by fueling litigation over the proper percentage of contestable shares. Mark S. Popofsky, Section 2, Safe Harbors, and the Rule of Reason, 15 Geo. Mason L. Rev. 1265, 1295 (2008). Here, for example, **[**50]** Graphic's expert, Dr. Saravia, opines that Dr. Levinsohn's selection of a 20% contestable share is flawed for at least three reasons: Inline has provided no evidence that it ever attempted to obtain more than 20% of a customer's susceptor purchases in the first year; there is no reason to assume that the asserted 20% first-year contestable share is appropriate to use during the entire term of the contracts; and if historic shares of sales volume rather than unit volume are measured, Inline's contestable share increases to over 40% for Inline's first-year contract with Schwan's. Saravia Report ¶¶ 99-108.

Additionally, and perhaps most significantly, the contestable share analysis would chill competition by eliminating the safe harbor of the discount attribution test. As Dr. Levinsohn admits, "[t]here is no basis to assume that Graphic would know exactly what portion of a buyer's demand is contestable to an entrant, and therefore there is no basis to assume Graphic would be able to exactly tailor its bundle offering to foreclose Inline with minimum amounts of discounts and incentives." Levinsohn Rebuttal at 19, n.74. Thus, it would be impossible for a seller to know whether its bundled discount conforms with ***antitrust*** **[**51]** ***law*** or has the potential to violate of the Sherman Act. The Supreme Court has repeatedly cautioned that "the costs of erroneous findings of predatory-pricing liability [a]re quite high because 'the mechanism by which a firm engages in predatory pricing—lowering prices—is the same mechanism by which a firm stimulates competition,' and, therefore, mistaken findings of liability would 'chill the very conduct the antitrust laws are designed to protect.'" *Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U.S. 312, 320, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)* (quoting *Brooke Grp., 509 U.S. at 226* (alterations omitted); accord *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 451, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*. "Because cutting prices in order to increase business often is the very essence of competition, . . . it 'is beyond the practical ability of a judicial tribunal to control [above cost discounting] without courting intolerable risks of chilling legitimate price cutting.'" *Concord Boat, 207 F.3d at 1061* (alteration in original) (quoting *Brooke Grp., 509 U.S. at 223*).

Inline does not dispute that if the contestable share analysis is not applied, only one of Graphic's nine challenged contracts fail the PeaceHealth test. Moreover, Dr. Levinsohn admits that he has not analyzed whether this single contract has caused anticompetitive injury. Levinsohn Dep. 171:20-172:9, 283:2-287:24.

d. Harm

Even assuming all of Graphic's alleged bundles fail the discount attribution **[**52]** test, Inline has not shown ***HN10***[] antitrust injury, which is a required element in any private antitrust action. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Antitrust injury means harm to competition, not merely harm to competitors. See **[*1213]** *id. at 488* ("The antitrust laws . . . were enacted for the protection of competition, not competitors.") (internal quotations omitted). Thus, to prevail on its bundling claim, Inline must show that Graphic's conduct resulted in harm to consumers.

Inline argues that consumers have been harmed because Graphic's conduct has resulted in the exclusion of its only viable competitor, Inline, from 93% of the susceptor packaging market. Inline thus contends that consumers were deprived of access to a budding secondary supplier that was capable of challenging Graphic's dominant market position with lower prices and innovative products. ***HN11***[] However, "[i]t is in the interest of competition to permit dominant firms to engage in vigorous competition, including price competition." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 341, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. Indeed, "the mere fact that a market has few competitors does not transform every action by one of them into an antitrust violation. Rather, even in a duopoly, a plaintiff must offer some other reason to think that the challenged behavior harmed competition." **[**53]** *MacDermid Printing Sols. LLC v. Cortron Corp., 833 F.3d 172, 186 (2d Cir. 2016)*.

Harm to competition is measured by increased price, reduced output, or decreased quality. See *Brooke Grp., 509 U.S. at 242* (finding no antitrust injury where challenged practices did not threaten to restrict output or raise prices above a competitive level); *MacDermid, 833 F.3d at 184* ("[P]roving an adverse effect on competition without showing increased price, reduced output, or reduced quality in the market has remained possible in theory but elusive in practice."). Here, other than arguing that prices would have been lower absent Graphic's bundling, Inline's expert, Dr. Levinsohn, performed no analysis. See Levinsohn Report ¶ 189; Levinsohn Rebuttal ¶¶ 11-13. Moreover, when Dr. Levinsohn was asked how there could be "any consumer harm" from Graphic's bundled discounts if another company such as Westrock was able to sell paperboard at competitive prices, his only response was that he "completely understand[s] the question" and would "need to think it through." Levinsohn Dep. 167:11-18. (quotations omitted).

Based on this record, no reasonable jury could conclude that Graphic's alleged discounted bundles resulted in harm to competition.

iii. Exclusivity

In addition to opposing Graphic's summary judgment arguments on bundling, Inline argues **[**54]** that the contracts are anticompetitive for an additional reason: "they are exclusive, all-requirements contracts that have foreclosed in excess of 40% of the susceptor market for almost a decade." Pl.'s Mem. Opp'n Summ. J. at 812. Inline contends that Graphic's summary judgment does not address this aspect of Inline's challenge to Graphic's contracts.

The operative Complaint, even broadly construed, does not allege an exclusive dealing claim. Indeed, the word "exclusive" does not appear anywhere in the Complaint or in Inline's memorandum in opposition to Graphic's motion to dismiss in 2015. See generally Compl.; Pl.'s Mem. Opp'n Mot. Dism. [Docket No. 31].[10] The **[*1214]** only reference in the Complaint to requirements contracts are Inline's allegations that "[s]upplier needs are often met through longterm requirements and related contracts," and that "Graphic's competitors operating in the susceptor food packaging market, but not the paperboard food packaging market, such as Inline, are precluded from securing contracts with food company buyers who purchase susceptor and paperboard packaging through Graphic's discounted bundle because, in order to do so, Inline and other smaller competitors would **[**55]** need to sell their susceptor food packaging at a loss." Compl. ¶¶ 66, 84.

Moreover, even if Graphic's antitrust claim could be construed as alleging exclusive dealing, such a claim would still be subject to a price-cost test such as the discount attribution test because the bundled discounts are the alleged mechanism by which Graphic induced its customers to enter into the contracts. See *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 273 (3d Cir. 2012)* ("[I]n the context of exclusive dealing, the price-cost test may be utilized . . . when the plaintiff alleges that price is the vehicle of exclusion.") (citing *Concord Boat, 207 F.3d at 1060-63*). Inline's argument premised upon exclusive all-requirements contracts as anticompetitive conduct is rejected.

b. Tortious Interference Claims (Counts I and II)

---

[10] In January 2018, Inline moved to amend its Complaint to add a claim for punitive damages. Among the changes in the Proposed Amended Complaint are 9 additional paragraphs in the "Discount Bundling" section. See Redlined Proposed Am. Compl. [Docket No. 504, Attach 2] ¶¶ 29-37. The added paragraphs describe Graphic's supply contracts as "bundled, exclusive requirements contracts" which gave Graphic the right to supply a customer for a multi-year term, and allege that "Graphic knew that the bundled requirements would tie up the vast majority of the market, thereby foreclosing Inline from selling susceptor food packaging to any contracted food company buyers, and that such a result would have anticompetitive effects." Id. ¶¶ 29, 35. However, exclusive dealing is not among the theories of liability listed in the Proposed Amended Complaint. Rather, the stated theories are: discount bundling, sham litigation and threats thereof, interference with business relationships, misappropriation and misuse of intellectual property, and baiting/submarine patent activities. See generally, id. Moreover, Inline's stated purpose in seeking to amend the Complaint was solely to plead punitive damages, not to add a claim for exclusive dealing. See Pl.'s Mem. Supp. Mot. Am. Compl. [Docket No. 381] at 1, 42.

Inline's tortious interference claims are predicated on Graphic's patent assertions and threats of litigation that allegedly impacted Nestlé's award of its Hot Pocket sleeve business in 2014 and 2016. Pl.'s Mem. Opp'n Summ. J. at 39. The contract claim relates to the 2014 award, and the prospective economic business advantage relates to both the 2014 and 2016 award. Id.

Graphic seeks summary judgment on these claims, arguing that state law tort liability cannot **[**56]** arise from a patent holder's good faith conduct in warning about potential litigation. Graphic further argues that the tortious interference with contract fails for the additional reason that there was no contract with which to interfere.

HN12[] To establish tortious interference with a contract under Minnesota law, a plaintiff must show: (1) the existence of a contract, (2) the defendant's knowledge of the contract, (3) the defendant's intentional procurement of the breach of contract, (4) the defendant acted without justification, and (5) damages. *Kjesbo v. Ricks, 517 N.W.2d 585, 588 (Minn. 1994)*.

HN13[] A claim for tortious interference with prospective economic advantage also has five elements: "(1) the existence of a reasonable expectation of economic advantage belonging to the plaintiff; (2) the defendant's knowledge of that expectation; (3) the defendant's wrongful interference with that expectation; (4) a reasonable probability that the plaintiff would have realized the expectation absent the defendant's conduct; and (5) damages." *Daum v.* ***[*1215]*** *Planit Sols., Inc., 619 F. Supp. 2d 652, 658 (D. Minn. 2009)* (citations omitted). Liability for a tortious interference with prospective economic advantage claim rests on whether the actor's conduct was improper. *Fox Sports Net N., L.L.C. v. Minn. Twins P'ship, 319 F.3d 329, 337 (8th Cir. 2003)*. "For purposes of this tort, improper means are those that **[**57]** are independently wrongful such as threats, violence, trespass, defamation, misrepresentation of fact, restraint of trade or any other wrongful act recognized by statute or the common law." *Harman v. Heartland Food Co., 614 N.W.2d 236, 241 (Minn. Ct. App. 2000)*.

Graphic's assertions of patent rights did not constitute improper conduct because, as discussed above, the assertions were not objectively baseless. ***HN14***[] "Federal patent law preempts state-law tort liability for a patentholder's good faith communications asserting infringement of its patent and warning about potential litigation." *Matthews Int'l Corp. v. Biosafe Eng'g, LLC, 695 F.3d 1322, 1332-33 (Fed. Cir. 2012)*. "A plaintiff claiming that a patent holder has engaged in wrongful conduct by asserting claims of patent infringement must establish that the claims of infringement were objectively baseless." *Id. at 1332* (quoting *Globetrotter Software, Inc. v. Elan Computer Grp., Inc., 362 F.3d 1367, 1375 (Fed. Cir. 2004))*. Based on the absence of improper conduct, Graphic is entitled to summary judgment on the tortious interference claims.

Inline's tortious interference with contract claim fails for the additional, independent reason that no contract existed. Inline argues that a contract with Nestlé was created by the notification Inline received through the Ariba system stating that Inline had been awarded all lots in the auction. See First Watkins Decl. Exs. F, G [Docket Nos. 596, 597]. **[**58]** Inline contends that the terms of the contract are set forth in the Terms and Conditions circulated by Nestlé before the RFP process, as well as the supplemental terms that Nestlé circulated prior to the auction. Id. Exs. B, D [Docket Nos. 592, 594].

However, the Terms and Conditions for the RFP process include the following provisions which establish that a business award through the Ariba system does not constitute a final award or a contract:

> • Bid format — Initial bid will be a request for proposal. Nestlé reserves the right to go to a second phase ranking event.
> • Bidding Process — Bidding for this RFP package will be through an online bidding process. Nestlé reserves the right to continue negotiations post-RFP completion.
>
> • Supplier Selection and Participation — Each supplier must honor its final bid pricing. Additional volume may be added or removed due to changes in the business plan or as a result of allocation — it is expected that each supplier will support reasonable volume changes. Any business award is contingent upon successful completion of the Nestlé qualification Process. Business may be awarded individually or in aggregate based on competitive factors. **Lowest bid price [**59] does not guarantee a business award**.

• Contract — It is Nestlé's intent to draft a formal contract for the supply of cartons to each of these locations. The terms of the contract, as agreed to and signed by both parties, shall take precedence over anything specified in this RFP.

Hicks Decl. Ex. 55 [Docket No. 693] at GPI_00008791 (emphasis in original).

"[T]he mere acceptance of a bid does not necessarily constitute a contract. **[*1216]** When a bid requires certain formalities . . ., such as a written contract, or the furnishing of a bond, such language often indicates that even after acceptance of the bid no contract is formed until the requisite formality has been complied with." *City of Lonsdale v. NewMech Cos., Inc., No. 07-105, 2008 Minn. App. Unpub. LEXIS 31, 2008 WL 186251, at *7 (Minn. Ct. App. Jan. 22, 2008)* (internal citations and quotations omitted). Here, the RFP provision addressing the issue of "Contract" explicitly states Nestlé's "intent to draft a formal contract," the terms of which would "take precedence over anything specified in this RFP." Hicks Decl. Ex. 55 at GPI_00008794. This language clarifies that no contract was formed by the Ariba notification. Nestlé also "reserve[d] the right to continue negotiations post-RFP completion," and expressly stated that the "[l]owest bid price does not guarantee a business **[**60]** award." Id. at GPI_00008789-90.

Further, Nestlé included the following language in its emails to vendors when inviting them to participate in the RFP and auction through Ariba: "If you are not familiar with Ariba, Nestlé uses Ariba as an information gathering tool to help us run and collect information and price proposals from multiple suppliers in an efficient manner." Hicks Decl. Ex. 52 [Docket No. 690]; Wolfe Decl. Ex. C [Docket No. 603] (emphasis added). This language clearly expresses Nestlé's intent that the Ariba auction, by itself, would not create a binding contract. Thus, the record unequivocally establishes that Nestlé's award notification through the Ariba system was not a binding contract between Nestlé and Inline.

Summary judgment is granted to Graphic on Inline's tortious interference claims.

c. Trade Secrets Claim (Count III)

Graphic argues that it is entitled to summary judgment on Inline's trade secrets claim because there is no evidence that Inline's design meets Minnesota's standard for trade secret protection. Inline's trade secrets claim is based on allegations that in 2013, Graphic began producing susceptor food packaging for Weight Watchers' Smart Ones pizza that **[**61]** copies a design created by Inline. Compl. ¶ 53. Inline alleges that it shared the design with Heinz in 2008 under the condition that it remain confidential. Id.

HN15[] A party seeking protection under the Minnesota's Trade Secrets Act must show both the existence and the misappropriation of a trade secret. *Electro-Craft Corp. v. Controlled Motion, Inc., 332 N.W.2d 890, 897 (Minn. 1983)*. For information to be considered a trade secret, a party must show that: (1) the information is not generally known or readily ascertainable; (2) the information derives independent economic value from being secret; and (3) the party made reasonable efforts to maintain the information's secrecy. *Wilson v. Corning, Inc., 171 F. Supp. 3d 869, 881-82 (D. Minn. 2016)* (citing *Electro-Craft, 332 N.W.2d at 899-901*).

Graphic argues there is no evidence that the design was a secret, that the design of a product available for purchase at a grocery store derived economic value from being secret, or that Inline took efforts to keep it secret. Inline responds that Inline's president, Jeffrey Watkin,s met with Richard Parysek of Heinz in Chicago in September 2008 and provided him with a prototype of the "Micro-Bake II" design under the express terms that it be treated as confidential. Second Watkins Decl. ¶¶ 1-3; Hicks Decl. Ex. 178 [Docket No. 889] (Pl's Resp. Interrogs.) Resp. No. 30. However, in his **[**62]** deposition testimony, Watkins could not recall whether it had **[*1217]** been communicated to Heinz that the design remain confidential. Hicks Decl. Ex. 25[Docket No. 663] ("Watkins Dep.") 306:9-23. Nor could Watkins recall what specific confidentiality agreements were in place with Heinz. Id. Similarly, a research and development employee from Heinz testified in his deposition that he was not aware of a confidentiality agreement between Heinz and Inline. Hicks Decl. Ex. 13 [Docket No. 651] ("Sitterly Dep.") 195:6-9. Thus, the Court will not consider the conclusory statements in Watkins' declaration. See *Ballard v. Heineman, 548 F.3d 1132, 1136 (8th Cir. 2008)* ("[C]onclusory affidavits devoid of specific allegations rebutting the moving party's evidence cannot defeat a summary judgment motion."); *Denson Int'l Ltd. v. Liberty Diversified Int'l, Inc., No. 12-3109, 2015 U.S. Dist.*

*LEXIS 116092, 2015 WL 5123262, at *5-6, n.4 (D. Minn. Sept. 1, 2015)* (granting summary judgment on trade secrets claim and disregarding conclusory allegations in corporate designee's declaration).

Other than Watkins' conclusory and inconsistent assertions that Inline took efforts to keep the information secret, Inline has not directed the Court to any evidence showing that the design was a secret, that Inline took efforts to maintain the design's secrecy, and that those efforts were reasonable. Moreover, Inline provides no **[**63]** analysis of damages for its trade secrets claim. Based on the absence of evidence for each element of the trade secrets claim, Graphic is entitled to summary judgment on this claim.

d. Damages Claims

Graphic also argues it is entitled to summary judgment on all damages claims because Inline cannot prove damages related to foreclosed customers or the Nestlé sales with a reasonable degree of certainty. This issue need not be discussed because all claims have been dismissed on other grounds.

3. Inline's Motion for Partial Summary Judgment

Inline moves for partial summary judgment on two issues: (1) that the Asserted Patents are invalid due to incorrect inventorship, and (2) on the liability elements of Inline's tortious interference with contract claim. Based on the conclusion that Graphic is entitled to summary judgment on Inline's antitrust and tortious interference claims, Inline's motion for partial summary judgment is denied.

B. Additional Motions, Pending Objection

Because summary judgment is granted to Graphic on all claims, the parties' Daubert motions, Graphic's Motion to Strike, and Inline's pending Objection are denied as moot.

IV. CONCLUSION

Based upon the foregoing, and all of the **[**64]** files, records and proceedings herein, **IT IS HEREBY ORDERED** that:

1. Plaintiff Inline Packaging, LLC's Motion for Partial Summary Judgment [Docket No. 540] is **DENIED**;

2. Inline's Motion to Exclude Expert Testimony [Docket No. 610] is **DENIED** as moot;

3. Defendant Graphic Packaging International, LLC's Motion for Summary Judgment [Docket No. 635] is **GRANTED**;

4. Graphic's Motion to Exclude Expert Testimony [Docket No. 773] is **DENIED** as moot;

5. Graphic's Motion to Strike Pleading [Docket No. 788] is **DENIED** as moot; and

[*1218] 6. Inline's Objection [Docket No. 538] to Magistrate Judge Leo I. Brisbois' March 8, 2018 Order [Docket No. 534] denying Inline's Motion to Amend to Plead Punitive Damages [Docket No. 504] is **DENIED** as moot.

LET JUDGMENT BE ENTERED ACCORDINGLY.

BY THE COURT:

/s/ Ann D. Montgomery

ANN D. MONTGOMERY

U.S. DISTRICT JUDGE

Dated: September 5, 2018.

Judges: ANITA B. BRODY, J.

Opinion by: ANITA B. BRODY

Opinion

MEMORANDUM

Plaintiffs James E. Deanne, William Gonzales, John Martich, and Carrie D. Cooper (collectively, "Plaintiffs"), on behalf of themselves and the putative class members they seek to represent, have negotiated and agreed to a Fourth Amended Class Action Settlement Agreement ("Settlement Agreement") with Defendants Comcast Corporation, Comcast Holdings Corporation, Comcast Cable Communications, Inc., and Comcast Cable Communications Holdings, Inc. (collectively, "Comcast") in this multidistrict litigation ("MDL"). On February 22, 2018, Plaintiffs filed a Motion for Certification of a Settlement Class and Preliminary Approval of Class Action Settlement. Plaintiffs move for an order: (1) granting preliminary approval of the Settlement Agreement; (2) certifying a Settlement Class; (3) approving the proposed forms of Notice and directing Notice to the Settlement Class; (4) approving the proposed Claim Form; (5) appointing a Claims Administrator to disseminate Notice and receive and process Class Members' claims; and (6) setting a schedule **[*2]** for completion of the Settlement approval process. For the reasons set forth below, I will grant the motion in part and preliminarily approve the Settlement Agreement and preliminarily certify the Settlement Class. Because of deficiencies in the proposed Notice and proposed Claim Form, I will deny the portion of the motion that seeks approval of the proposed Notice and proposed Claim Form, the appointment of a Claims Administrator, and the establishment of a schedule for completion of the Settlement approval process. In order to cure these deficiencies, Plaintiffs will be ordered to submit an amended motion that only seeks approval of revised proposed forms of Notice, a revised proposed Claim Form, appointment of a Claims Administrator, and a revised proposed schedule for completion of the Settlement approval process.

I. BACKGROUND

Comcast is the largest provider of cable multi-channel video programming distribution in the United States, servicing over twenty-four million customers in thirty-nine states and the District of Columbia. Comcast provides cable services in exchange for a monthly fee based upon the level of service provided. Comcast provides two cable products, Basic Cable **[*3]** and Premium Cable. Customers who subscribe to Premium Cable pay higher monthly fees than those who subscribe only to Basic Cable. Customers who subscribe to Premium Cable have access to high-definition channels, On Demand, numerous specialty channels, an interactive programming guide, and the ability to purchase pay-per-view programs and additional channels, like HBO. Premium Cable customers must rent a cable television set-top box ("Set-Top Box") from Comcast in order to access Premium Cable. The Set-Top Box enables Premium Cable subscribers to view Premium Cable content and use Premium Cable services.

In 2008, individuals began filing lawsuits against Comcast, alleging that Comcast unlawfully tied the sale of Premium Cable to the rental of a Set-Top Box from Comcast. On June 17, 2009, the Judicial Panel on Multidistrict Litigation transferred and consolidated these lawsuits before me as a multidistrict litigation, pursuant to *28 U.S.C. § 1407*. *See* MDL Panel Transfer Order, ECF No. 1. In total, twenty-four civil actions were consolidated into this MDL.[1]

On November 23, 2009, Plaintiffs filed a First Amended **[*4]** Consolidated Class Action Complaint. *See* First Am. Consolidated Class Action Compl., ECF No. 26. On September 30, 2010, Plaintiffs filed a Second Amended Consolidated Class Action Complaint. *See* Second Am. Consolidated Class Action Compl., ECF No. 109. On June 10, 2011, Plaintiffs filed a Third Amended Consolidated Class Action Complaint. *See* Third Am. Consolidated Class Action Compl., ECF No. 122. On October 24, 2017, Plaintiffs filed the currently operative Fourth Amended Consolidated Class Action Complaint, alleging that Comcast's unlawful tying arrangement violates *Section 1 of the Sherman Act, 15 U.S.C. § 1*, the antitrust and consumer protection laws of Washington, the Business & Professions Code of California, and the Consumer Credit and Protection Act of West Virginia. *See* Fourth Am. Consolidated Class Action Compl., ECF No. 253 [hereinafter Compl.].

From the outset of the class action, Comcast sought arbitration of certain claims. On January 6, 2010, Comcast moved to compel arbitration. *See* Mot. Compel, ECF No. 35. On July 22, 2011, after the filing of Plaintiffs' Third Amended Consolidated Class Action Complaint, Comcast filed a new motion to compel arbitration. *See* Mot. Compel, ECF No. 127. During **[*5]** 2010 and 2011, the parties engaged in discovery only regarding arbitration.

From January 2012 through September 2012, the parties engaged in five formal mediation sessions before Thomas Rutter, Esquire, of ADR Options in Philadelphia. Thereafter, the parties continued to engage in settlement negotiations.

During the pendency of this class action, the Supreme Court of the United States issued two important opinions on arbitration—*AT&T Mobility LLC v. Concepcion, 563 U.S. 333, 131 S. Ct. 1740, 179 L. Ed. 2d 742 (2011)* and *American Express Co. v. Italian Colors Restaurant, 570 U.S. 228, 133 S. Ct. 2304, 186 L. Ed. 2d 417 (2013)*. While the parties awaited the Supreme Court's decisions in these cases, significant delay occurred in the litigation and the

---

[1] On October 16, 2014, I entered an order approving and adopting the parties' stipulation of dismissal without prejudice of nineteen of the twenty-four civil actions. *See* Stipulation for Dismissal Order, ECF No. 201. On October 12, 2017, I entered an order voluntarily dismissing without prejudice the claims in another one of the twenty-four civil actions. *See* Voluntary Dismissal Order, ECF No. 252. On November 13, 2017, I entered an order approving the parties' stipulation of dismissal without prejudice of two additional actions. *See* Stipulation for Dismissal of Certain Pls. Order, ECF No. 258. Only two of the twenty-four civil actions remain pending: *Deanne v. Comcast Corp., et al.*, No. 09-3659 and *West Virginia ex rel. McGraw v. Comcast Corp., et al.*, No. 09-4671.

settlement negotiations. *See, e.g.* Stipulation and Order, ECF No. 114 (staying the case until the Supreme Court rendered its decision in *Concepcion*).

On November 12, 2014, Comcast filed a renewed motion to compel arbitration, reflecting the recent Supreme Court jurisprudence of *Concepcion* and *American Express*.[2] *See* Mot. Compel, ECF No. 209. This renewed motion to compel arbitration is pending. Although Comcast previously sought only to compel individual arbitration of the Sherman Act claim, it now seeks to compel individual arbitration of the Sherman Act and Washington state law claims.

Now, nearly nine years after the inception **[*6]** of this MDL and several failed settlement attempts, the parties have reached a Fourth Amended Class Action Settlement Agreement.

II. PROPOSED CLASS ACTION SETTLEMENT

A. Proposed Settlement Class

The parties define the Settlement Class as follows:

> All persons who:
>
> > (i) resided in and subscribed to Premium Cable in California, Washington, or West Virginia during the Class Period, or
> >
> > (ii) subscribed to Premium Cable in any state in the United States during the Class Period and elected to opt out of Comcast's arbitration clause as reflected in Comcast's records;
>
> and paid Comcast a rental fee for a Set-Top Box at any time during the Class Period.
>
> Excluded from the Settlement Class are: (i) those persons who opt out of this Agreement as identified in paragraph 6; (ii) all commercial account customers; (iii) Comcast officers, directors, or employees, any entity in which Comcast has a controlling interest, and the affiliates, legal representatives, attorneys, heirs, or assigns of Comcast; (iv) Class Counsel and Class Counsel's employees; and (v) Judge Anita B. Brody and members of her judicial staff of the United States District Court for the Eastern District of Pennsylvania, as well as any federal, **[*7]** state, or local governmental agency, and any judge, justice, or judicial officer presiding over this matter and members of their immediate families and judicial staffs.

Fourth Am. Class Action Settlement Agreement § 3.1, ECF No. 266 Ex. 1. [hereinafter Agreement].

B. Proposed Settlement

The Class Period covers all Class Members who rented a Set-Top Box anytime starting on or after January 1, 2005 and ending on or before the date of this Court's Order granting preliminary approval of the Settlement Agreement. *Id.* § 2.8. The Settlement is a claims-made settlement.[3] *Id.* § 9.1. Comcast will pay all claims made in the aggregate that do not exceed $15.5 million in value. *Id.* § 9.1.6. If Class Members submit more than $15.5 million worth of claims, then benefits will be distributed on a pro rata basis. *Id.* If Class Members submit less than $15.5 million worth of claims, then Comcast will retain the balance. *Id.*

---

[2] Additionally, on October 27, 2015, Comcast filed a supplemental motion to compel arbitration that is also pending. *See* Supp. Mot. Compel, ECF No. 231.

[3] "A 'claims-made' settlement is a settlement that does not have a fixed settlement fund, but rather provides that the defendant will pay claims of class members who file them, usually up to some fixed ceiling." 4 William B. Rubenstein, Newberg on Class Actions § 13:7 (5th ed.).

All Class Members will be entitled to a cash payment and Current Subscribers[4] will have the choice of either a cash payment or in-kind relief. *Id.* § 9.1. Class Members will be entitled to a cash payment in accordance with the length of time they rented a Set-Top Box from Comcast, regardless of the number of Set-Top Boxes they **[*8]** rented, as follows:

9.1.1.1 If the Claimant rented at least one Set-Top Box from 1 to 35 months (0 to 3 years), the Claimant is entitled to ten U.S. dollars and no cents ($10.00) payable by check.

9.1.1.2 If the Claimant rented at least one Set-Top Box from 36 to 59 months (3 to 5 years), the Claimant is entitled to twelve U.S. dollars and fifty cents ($12.50) payable by check.

9.1.1.3 If the Claimant rented at least one Set-Top Box for 60 or more months (more than 5 years), the Claimant is entitled to fifteen U.S. dollars and no cents ($15.00) payable by check.

Id. § 9.1.1. Current Subscribers will be entitled to elect to receive in-kind relief in lieu of a cash payment. Current Subscribers will be entitled to in-kind relief in accordance with the length of time they rented a Set-Top Box from Comcast, and will receive additional in-kind relief if they rented more than one Set-Top Box, as follows:

9.1.2.1 If the Claimant rented at least one Set-Top Box from 1 to 35 months (0 to 3 years), the Claimant is entitled to select one of the following options:

(a) three (3) free months of Showtime (up to a maximum $30.00 value); or

(b) five (5) movie or television show rentals or purchases (up to a maximum **[*9]** $29.95 value).

<u>Plus</u>, if the Claimant rented more than one Set-Top Box, one (1) additional movie or television show rental or purchase (up to a maximum $5.99 value).

9.1.2.2 If the Claimant rented at least one Set-Top Box from 36 to 59 months (3 to 5 years), the Claimant is entitled to select one of the following options:

(a) three (3) free months of Showtime (up to a maximum $30.00 value) <u>and</u> one (1) movie or television show rental or purchase (up to a maximum $5.99 value) (a combined up to maximum $35.99 value); or

(b) six (6) movie or television show rentals or purchases (up to a maximum $35.94 value).

<u>Plus</u>, if the Claimant rented more than one Set-Top Box, two (2) additional movie or television show rentals or purchases (up to a maximum $11.98 value).

9.1.2.3 If the Claimant rented at least one Set-Top Box for 60 or more months (more than 5 years), the Claimant is entitled to select one of the following options:

(a) three (3) free months of Showtime (up to a maximum $30.00 value) <u>and</u> two (2) movie or television show rentals or purchases (up to a maximum $11.98 value) (a combined up to maximum $41.98 value); or

(b) seven (7) movie or television show rentals or purchases (up to a maximum **[*10]** $37.97 value).

<u>Plus</u>, if the Claimant rented more than one Set-Top Box, three (3) additional movie or television show rentals or purchases (up to a maximum $17.97 value).

Id. § 9.1.2.

III. DISCUSSION

A. Preliminary Approval of the Proposed Settlement[5]

---

[4] Current Subscribers are "Class Members who are cable television subscribers of Comcast in the United States as of the date of the Notice provided . . . ." Agreement § 2.11.

[5] Because the Court will preliminarily certify the Settlement Class, the Court will address the fairness of the Settlement Agreement.

Plaintiffs move for preliminary approval of the Settlement Agreement. Under *Federal Rule of Civil Procedure 23(e)*, the settlement of a class action requires court approval. *Fed. R. Civ. P. 23(e)(2)*. Review of a proposed class action settlement typically proceeds in two stages. At the first stage, the parties submit the proposed settlement to the court, which must make a preliminary fairness evaluation. If the proposed settlement is preliminarily acceptable, the court then directs that notice be provided to all class members who would be bound by the proposed settlement in order to afford them an opportunity to be heard on, object to, and opt out of the settlement. *See Fed. R. Civ. P. 23(c)(3)*, *(e)(1)*, *(e)(5)*. At the second stage, after class members are notified of the settlement, the court holds a formal fairness hearing where class members may object to the settlement. *See Fed. R. Civ. P. 23(e)(2)*. If the court concludes that the settlement is "fair, reasonable and adequate," the settlement is given final approval. *Fed. R. Civ. P. 23(e)(2)*.

In deciding whether to grant preliminary approval, **[*11]** a court determines whether "the proposed settlement discloses grounds to doubt its fairness or other obvious deficiencies such as unduly preferential treatment of class representatives or segments of the class, or excessive compensation of attorneys, and whether it appears to fall within the range of possible approval." *Mehling v. New York Life Ins., 246 F.R.D. 467, 472 (E.D. Pa. 2007)* (quoting *Thomas v. NCO Fin. Sys., No. 00-5118, 2002 U.S. Dist. LEXIS 14157, 2002 WL 1773035, at *5 (E.D. Pa. July 31, 2002))*; *Mack Trucks, Inc. v. Int'l Union, UAW, No. 07-3737, 2011 U.S. Dist. LEXIS 51514, 2011 WL 1833108, at *2 (E.D. Pa. May 12, 2011)* (stating same standard); *Tenuto v. Transworld Sys., Inc., No. 99-4228, 2001 U.S. Dist. LEXIS 17694, 2001 WL 1347235, at *1 (E.D. Pa. Oct. 31, 2001)* (same). Under *Rule 23*, a settlement falls within the "range of possible approval," if there is a conceivable basis for presuming that the standard applied for final approval—fairness, adequacy, and reasonableness—will be satisfied. *See Mehling, 246 F.R.D. at 472*. In making a preliminary determination, my first and primary concern is whether there are any obvious deficiencies that would cast doubt on the proposed settlement's fairness. I will also consider whether the negotiations occurred at arm's length, whether there was significant investigation of Plaintiffs' claims, and whether the proposed settlement provides preferential treatment to certain class members. *See In re Linerboard Antitrust Litig., 292 F. Supp. 2d 631, 638 (E.D. Pa. 2003)*.

1. Whether the Settlement is Fair, Reasonable and Adequate

a. There Are No Obvious Deficiencies to Cast Doubt on the Proposed Settlement's Fairness

If the parties were to continue to litigate rather **[*12]** than settle this action, Plaintiffs would face several significant hurdles including, the risk of dismissal or ultimate loss,[6] the possibility that some putative Class Members would have to arbitrate their claims,[7] and the risk that the Court would decline to certify the case or only certify regional subclasses.[8] In light of the risks attendant with this litigation, the Settlement Agreement provides sufficient compensation to putative Class Members. Because the Settlement Agreement does not raise any red flags and adequately compensates putative Class Member, there are no obvious deficiencies to cast doubt on the proposed Settlement Agreement's fairness.

---

[6] There have been several lawsuits by cable television customers claiming that their cable television providers unlawfully tied the provision of cable services to the rental of set-top boxes. In a few of these lawsuits, Circuit Courts have rejected the claims. *See In re: Cox Enterprises, Inc., 871 F.3d 1093 (10th Cir. 2017)*; *Kaufman v. Time Warner, 836 F.3d 137 (2d Cir. 2016)*.

[7] Comcast still has pending motions to compel arbitration. In part, these motions seek to compel individual arbitration of the Sherman Act and Washington state law claims.

[8] For instance, in *In re Cox Enterprises, Inc. Set-Top Box Antitrust Litig., No. 09-ML-2048-C, 2011 U.S. Dist. LEXIS 149656, 2011 WL 6826813, at *16 (W.D. Okla. Dec. 28, 2011)*, a similar antitrust tying case against a different cable television provider, the district declined to certify a national class, holding that market power and antitrust injury could not be proven on a national level and would require multiple regional analyses.

b. The Proposed Settlement Appears to Be the Product of Good Faith, Extensive Arm's Length Negotiations

Whether a settlement arises from arm's length negotiations is a key factor in deciding whether to grant preliminary approval. *See* *Gates v. Rohm & Haas Co., 248 F.R.D. 434, 439, 444 (E.D. Pa. 2008)* (stressing the importance of arm's length negotiations in deciding to grant preliminary approval and highlighting the fact that the negotiations included "two full days of mediation before an experienced mediator"); *In re CIGNA Corp. Sec. Litig., No. 02-8088, 2007 U.S. Dist. LEXIS 51089, 2007 WL 2071898, at *2 (E.D. Pa. July 13, 2007)* (noting that a presumption of **[*13]** fairness exists where parties negotiate at arm's length, assisted by a mediator); *In re Auto. Refinishing Paint Antitrust Litig, MDL No. 1426, 2004 U.S. Dist. LEXIS 29163, 2004 WL 1068807, at *2 (E.D. Pa. May 11, 2004)* (preliminarily approving class action settlement that "was reached after extensive arms-length negotiation between very experienced and competent counsel"); 4 William B. Rubenstein, Newberg on Class Actions § 13:45 (5th ed.) ("[A] court will presume that a proposed class action settlement is fair when certain factors are present, particularly evidence that the settlement is the product of arms-length negotiation, untainted by collusion.").

Here, the parties participated in five formal mediation sessions before Thomas Rutter, Esquire, of ADR Options in Philadelphia. Thereafter, the parties participated in numerous additional robust settlement negotiations, and only reached this Fourth Amended Class Action Settlement Agreement after several failed attempts at settlement. Therefore, it appears that the proposed Settlement Agreement is the product of good faith, arm's length negotiations.

c. The Investigation of Plaintiffs' Claims Supports Preliminary Approval

Class Counsel has engaged in both formal discovery related to Comcast's motions to compel arbitration and informal discovery related to Set-Top Box technology **[*14]** and the antitrust tying allegations involved in the case.[9] The proposed Settlement was reached after repeated briefing on the threshold issue of whether Plaintiffs were compelled to individually arbitrate their claims—two full rounds of briefs prior to the Supreme Court's decisions in *Concepcion* and *American Express* and an additional round of briefs after these decisions.

By the time the parties reached this Settlement Agreement, Class Counsel had a strong grasp of the legal hurdles that Plaintiffs would face in order to succeed on their claims. Class Counsel understood that many of Plaintiffs' claims could have been dismissed at this early stage of the litigation if Comcast had prevailed on the arbitration issue. In addition, Class Counsel recognized the risk that the Court would decline to certify the case or only certify regional subclasses. Moreover, Class Counsel understood that Plaintiffs would face significant obstacles in proving their case-in-chief.

Because of the formal and informal discovery and the parties' multiple rounds of briefing on the arbitration issue, Class Counsel knew the strengths and weaknesses of the case during settlement negotiations with **[*15]** Comcast. Therefore, the investigation of Plaintiffs' claims supports preliminary approval of the proposed Settlement.

d. There Appears to Be No Preferential Treatment of Certain Settlement Class Members

---

[9] Courts have preliminarily approved class action settlements where the litigation is in its early stages and limited or no formal discovery has occurred. *See, e.g.,* *In re Nat'l Football League Players Concussion Injury Litig., 821 F.3d 410, 436-37 (3d Cir. 2016)*, *as amended* (May 2, 2016) ("In some cases, informal discovery will be enough for class counsel to assess the value of the class' claims and negotiate a settlement that provides fair compensation."); *Linney v. Cellular Alaska P'ship, 151 F.3d 1234, 1239 (9th Cir. 1998)* (In regards to class action settlements, "'formal discovery is not a necessary ticket to the bargaining table' where the parties have sufficient information to make an informed decision about settlement." (quoting *In re Chicken Antitrust Litig. Am. Poultry, 669 F.2d 228, 241 (5th Cir. 1981))*.

The proposed Settlement does not appear to provide undue preferential treatment to any individual Class Member. The Settlement Agreement provides that all putative Class Members are entitled to the same amount of cash-payment in accordance with the length of time they rented a Set-Top Box from Comcast, regardless of the number of Set-Top Boxes they rented. These cash payments range from $10.00 to $15.00 depending on the length of time a Class Member rented a Set-Top Box. If a Class Member is a Current Subscriber to Comcast, the Class Member may opt to receive in-kind relief in lieu of a cash payment from Comcast. The in-kind relief for a Class Member who rented one Set-Top Box ranges in maximum value from $29.95 to $41.98 depending on the length of time a Class Member rented a Set-Top Box. If, however, a Current Subscriber rented more than one Set-Top Box, the in-kind relief for a Class Member ranges in maximum value from $35.94 to $59.95 depending on the length of time a Class Member **[*16]** rented a Set-Top Box.

On the surface, it may appear that Current Subscribers receive preferential treatment in the Settlement Agreement because unlike Former Subscribers,[10] they are entitled to in-kind relief with a higher maximum value than the cash payment available to Former Subscribers and they receive additional in-kind relief for the rental of more than one Set-Top Box. Take for example a Former Subscriber and a Current Subscriber who each rented two Set-Top Boxes for 60 or more months. The Former Subscriber would be entitled to a $15.00 cash payment. Whereas, the Current Subscriber would be entitled to the same $15.00 cash payment or to in-kind relief with a total maximum value of $59.95 in the form of three free months of Showtime and two movie or television show rentals, plus three additional movie or television show rentals or purchases because the Current Subscriber rented more than one Set-Top Box.

It may appear inequitable that a Former Subscriber only gets $15.00 in cash and a Current Subscriber may get up to $59.95 in Comcast services. In reality, however, Current Subscribers receive nothing more from Comcast than Former Subscribers because the actual cost to Comcast to **[*17]** provide higher-value in-kind relief to Current Customers is much less than the actual cost to Comcast to provide lower-value cash payments to putative Class Members. Thus, the $59.95 maximum value of in-kind relief that a Current Subscriber may receive only costs Comcast $15.00 or less. At best, the in-kind relief is equivalent to the cash payments available to all putative Class Members. Because all putative Class Members have the option to receive an equal cash payment based on the length of time they rented a Set-Top Box, I preliminarily find that the Settlement Agreement does not provide preferential treatment to any segment of the Settlement Class.

In sum, the Settlement Agreement falls within the range of possible approval. Therefore, I will grant preliminary approval of the Settlement Agreement.

B. Preliminary Certification of the Settlement Class

Plaintiffs move for certification of the Settlement Class. Although Plaintiffs move for final certification of the Settlement Class, at the preliminary approval stage of a class action settlement, a court may instead opt to preliminarily certify a settlement class pursuant to *Federal Rule of Civil Procedure 23(e)* and reserve the certification decision for a later date. *In re Nat'l Football League Players Concussion Injury Litig., 775 F.3d 570, 583-84 (3d Cir. 2014)* **[*18]** [hereinafter *NFL I*]. "[F]or uncertified settlement classes [this] makes sense, particularly from a notice perspective." *Id. at 584*. "Permitting a district court to manage a settlement class in this manner provides the flexibility needed to protect absent class members' interests and efficiently evaluate the issues of class certification and approval of a settlement agreement." *Id. at 586*. Accordingly, the Court opts to conduct a preliminary certification analysis at this time and reserves the certification decision until after Notice of the proposed Settlement Agreement has been sent to putative Class Members.

"This preliminary determination employs a 'less rigorous analysis than that necessary for final certification' because courts conduct a 'fairness hearing in order to issue a final class certification and approve the settlement.'" *In re: Shop-Vac Mktg. & Sales Practices Litig., MDL No. 2380, 2016 U.S. Dist. LEXIS 69345, 2016 WL 3015219, at *3*

---

[10] Former Subscribers are "Class Members who were cable television subscribers of Comcast in the United States but are no longer subscribers." Agreement § 2.14.

(M.D. Pa. May 26, 2016) (quoting In re: Amtrak Train Derailment, MDL No. 2654, 2016 U.S. Dist. LEXIS 46552, 2016 WL 1359725, at *2, *4 (E.D. Pa. Apr. 6, 2016)); *see also* NFL I, 775 F.3d at 586 (noting that when the district court made a preliminary determination on class certification, "it reserved the 'rigorous analysis'" on certification until after the fairness hearing). In making this preliminary certification determination a court examines whether "the proposed class satisfies the criteria set out in Rule 23(a) and at least one of the subsections of Rule 23(b)." Manual for Complex Litigation § 21.632 (4th ed. 2004); In re: Shop-Vac, 2016 U.S. Dist. LEXIS 69345, 2016 WL 3015219, at *3 (same).

Plaintiffs seek certification of a Rule 23(b)(3) settlement class. Federal Rule of Civil Procedure 23(a) contains four threshold requirements for certification:

> (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of **[*19]** the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class.

Fed. R. Civ. P. 23(a). Rule 23(b)(3) imposes two additional requirements: "questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy."[11] Fed. R. Civ. P. 23(b)(3). The Rule 23(b)(3) requirements are commonly referred to as predominance and superiority. Sullivan v. DB Investments, Inc., 667 F.3d 273, 296 (3d Cir. 2011) (en banc).

"[T]he party proposing class-action certification bears the burden of affirmatively demonstrating by a preponderance of the evidence her compliance with the requirements of Rule 23." Byrd v. Aaron's Inc., 784 F.3d 154, 163 (3d Cir. 2015), *as amended* (Apr. 28, 2015). However, the existence of a settlement means that "certain Rule 23 considerations . . . are not applicable." Rodriguez v. Nat'l City Bank, 726 F.3d 372, 378 (3d Cir. 2013). For example, because a settlement obviates the need for trial, concerns regarding the manageability of a Rule 23(b)(3) class disappear. *See* Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 619-20, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997); *see also* Sullivan, 667 F.3d at 297 (noting that "concerns regarding variations in state law largely dissipate when a court is considering the certification of a settlement class"); In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 529 (3d Cir. 2004) ("[C]oncerns with regards to case manageability that arise with litigation classes are not **[*20]** present with settlement classes, and thus those variations are irrelevant to certification of a settlement class" (citing Amchem, 521 U.S. at 620)).

1. Rule 23(a) Requirements

a. Numerosity

Rule 23(a)(1) requires that a class be "so numerous that joinder of all members is impracticable." Fed. R. Civ. P. 23(a)(1). "No minimum number of plaintiffs is required to maintain a suit as a class action, but generally if the named plaintiff demonstrates that the potential number of plaintiffs exceeds 40, the first prong of Rule 23(a) has been met." Stewart v. Abraham, 275 F.3d 220, 226-27 (3d Cir. 2001). The parties represent that there are over 3.5 million proposed Class Members. Accordingly, Plaintiffs satisfy the numerosity requirement of Rule 23(a).

b. Commonality

---

[11] Ascertainability is typically a "necessary prerequisite" of a Rule 23(b)(3) class. Byrd v. Aaron's Inc., 784 F.3d 154, 162 (3d Cir. 2015), *as amended* (Apr. 28, 2015). In this case, however, the Third Circuit has concluded that ascertainability is not a proper basis to deny certification. *See* ORDER of USCA, ECF No. 241.

Rule 23(a)(2) requires that "there are questions of law or fact common to the class." *Fed. R. Civ. P. 23(a)(2)*. To satisfy commonality, class members' claims "must depend upon a common contention . . . of such a nature that it is capable of classwide resolution—which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke." *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*. Commonality may be shown by "demonstrat[ing] that the class members 'have suffered the same injury.'" *Id.* (quoting *Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 157, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982))*. A single common question or fact is sufficient to satisfy the commonality requirement **[*21]** of *Rule 23(a)(2)*. *Wal-Mart, 564 U.S. at 359*; *Baby Neal for & by Kanter v. Casey, 43 F.3d 48, 56 (3d Cir. 1994)*.

Here, Plaintiffs allege the same harm from the same illegal conduct: the payment of supracompetitive prices as a result of Comcast's unlawful tying of its Premium Cable to the rental of a Set-Top Box. Whether Comcast engaged in such conduct and Plaintiffs suffered harm as a result are common questions of law and fact. Thus, commonality exists.

c. Typicality

Rule 23(a)(3) requires that "the claims or defenses of the representative parties are typical of the claims or defenses of the class." *Fed. R. Civ. P. 23(a)(3)*. The typicality inquiry asks "whether the named plaintiffs' claims are typical, in common-sense terms, of the class, thus suggesting that the incentives of the plaintiffs are aligned with those of the class." *Beck v. Maximus, Inc., 457 F.3d 291, 295-96 (3d Cir. 2006)* (quoting *Baby Neal, 43 F.3d at 55*).

The Third Circuit has "set a low threshold for satisfying" the typicality requirement. *Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 183 (3d Cir. 2001)*, *as amended* (Oct. 16, 2001). The typicality requirement "acts as a bar to class certification only when 'the legal theories of the named representatives potentially conflict with those of the absentees.'" *Id.* (quoting *Georgine v. Amchem Prod., Inc., 83 F.3d 610, 631 (3d Cir. 1996)*, *aff'd sub nom.*, *Amchem Prods. v. Windsor, 521 U.S. 591, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997))*. "If the claims of the named plaintiffs and putative class members involve the same conduct by the defendant, typicality is established regardless of factual differences." **[*22]** *Newton, 259 F.3d at 183-84*.

Named Plaintiffs allege that they and all putative Class Members suffered economic damages from Comcast's illegal tying arrangement. Specifically, Plaintiffs allege that Comcast unlawfully tied the sale of its Premium Cable to the rental of a Comcast Set-Top Box, and that this tying arrangement enabled Comcast to reap supracompetitve profits from Plaintiffs and all putative Class Members who were forced to pay rental fees to Comcast to enjoy Premium Cable services. Plaintiffs satisfy the typicality requirement because the claims of the named Plaintiffs and the putative Class Members involve the same conduct by Comcast.

d. Adequacy of Representation

The final prong of *Rule 23(a)* requires that "the representative parties will fairly and adequately protect the interests of the class." *Fed. R. Civ. P. 23(a)(4)*. "The adequacy inquiry under *Rule 23(a)(4)* serves to uncover conflicts of interest between named parties and the class they seek to represent." *Amchem, 521 U.S. at 625*. The adequacy of representation requirement addresses two components: (1) the qualifications of class counsel; and (2) the interests and incentives of the class representatives. *Dewey v. Volkswagen Aktiengesellschaft, 681 F.3d 170, 181 (3d Cir. 2012)*.

i. Adequacy of Class Counsel

When examining settlement classes, courts "have emphasized the special need to **[*23]** assure that class counsel: (1) possessed adequate experience; (2) vigorously prosecuted the action; and (3) acted at arm's length from the defendant."[12] *In re Gen. Motors Corp. Pick-Up Truck Fuel Tank Prod. Liab. Litig., 55 F.3d 768, 801 (3d Cir. 1995)*.

Plaintiffs seek the appointment of Dianne M. Nast, Kenneth A. Wexler and, Stephen A. Corr as Co-Lead Class Counsel. Ms. Nast, Mr. Wexler, and Mr. Corr have been involved in this litigation since its inception and were among the first counsel to file individual complaints before the creation of this MDL. Each has played an integral role in organizing and pursuing this MDL on behalf of Plaintiffs and the putative Settlement Class. Ms. Nast, Mr. Wexler, and Mr. Corr. have extensive knowledge of ***antitrust law***, complex litigation and class action practice, and have substantial experience handling class actions and multidistrict litigations. *See* Pls.' Mem., ECF No. 266 Exs. 3, 4, and 5.

Throughout the course of this litigation, Ms. Nast, Mr. Wexler, and Mr. Corr have identified and investigated potential claims in the action. In addition, in recognition of two important Supreme Court opinions on arbitration, *Concepcion* and *American Express*, they have on several occasions re-examined the strength of their legal claims.

Moreover, **[*24]** Ms. Nast, Mr. Wexler, and Mr. Corr have vigorously prosecuted the action at arm's length from Comcast. They have engaged in adversarial motions practice, specifically related to the arbitrability of claims of putative Class Members and participated in five formal mediation sessions before Thomas Rutter, Esquire, of ADR Options in Philadelphia, as well as other negotiation sessions with Comcast.

Accordingly, Ms. Nast, Mr. Wexler, and Mr. Corr have adequately represented the putative class.

ii. Adequacy of Class Representatives

"A class representative must be part of the class and possess the same interest and suffer the same injury as the class members." *Amchem, 521 U.S. at 625-26* (quoting *East Tex. Motor Freight System, Inc. v. Rodriguez, 431 U.S. 395, 403, 97 S. Ct. 1891, 52 L. Ed. 2d 453 (1977))*. "[T]he linchpin of the adequacy requirement is the alignment of interests and incentives between the representative plaintiffs and the rest of the class." *Dewey, 681 F.3d at 183*. The purpose of the adequacy requirement is to identify intra-class conflicts that may prevent the representative plaintiffs from adequately representing the entire class. *Id. at 183-4*. "An intra-class conflict will not necessarily prevent certification if the settlement agreement contains sufficient structural protections to ensure that the interests of the class will be adequately **[*25]** represented despite the conflict." *Id. at 185*.

Only a fundamental intra-class conflict will violate *Rule 23(a)(4)*. *Id. at 184*. "A fundamental conflict exists where some [class] members claim to have been harmed by the same conduct that benefitted other members of the class." *Id. at 184*. (quoting *Valley Drug Co. v. Geneva Pharms., Inc., 350 F.3d 1181, 1189 (11th Cir. 2003))*. Additionally, "[a] conflict concerning the allocation of remedies amongst class members with competing interests can be fundamental." *Id.* Thus, a court must address two questions to determine whether the representative plaintiffs adequately represent the putative class: "(1) whether an intra-class conflict exists; and if so, (2) whether that conflict is 'fundamental.'" *Id.*

Plaintiffs James E. Deanne, William Gonzales, John Martich, and Carrie D. Cooper are adequate representatives of the proposed Settlement Class. The named Plaintiffs include both Current Subscribers and Former Subscribers

---

[12] In 2003, Congress amended *Rule 23* to include subdivision 23(g), which provides a non-exhaustive list of factors for a court to consider when scrutinizing the adequacy of class counsel's representation. *See* *Fed R. Civ. P. 23(g)*. The addition was meant to transfer the analysis of class counsel's representation from *Rule 23(a)(4)*, where it had little textual support, to *Rule 23(g)*. *See* 1 William B. Rubenstein, Newberg on Class Actions § 3.80 (5th ed.). *Rule 23(g)* "builds on" the existing *23(a)(4)* jurisprudence instead of "introducing an entirely new element into the class certification process." *See* *Fed. R. Civ. P. 23(g)* advisory committee's notes (2003 amendments). Accordingly, the Third Circuit continues to apply the factors relied on prior to the addition of *Rule 23(g)*. *See* *In re Cmty. Bank of N. Va., 622 F.3d 275, 304-05 (3d Cir. 2010)*; *In re Cmty. Bank of N. Va., 418 F.3d 277, 307 (3d Cir. 2005)*. Class Counsel's representation of the Class satisfies both *Rule 23(a)(4)* and *23(g)*.

from Washington, California, and West Virginia. No fundamental intra-class conflict exists because Mr. Deanne, Mr. Gonzales, Mr. Martich, and Ms. Cooper share the same strong interest in establishing Comcast's liability and seek the same type of damages for the same alleged anticompetitive conduct.

2. *Rule 23(b)(3)* Requirements

a. Predominance

Under *Rule 23(b)(3)*, an opt-out **[*26]** class may be maintained if "the court finds that the questions of law or fact common to class members predominate over any questions affecting only individual members." *Fed. R. Civ. P. 23(b)(3)*. Predominance "tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation," *Amchem, 521 U.S. at 623*, to determine whether the proposed class "'would achieve economies of time, effort, and expense,'" *id. at 615* (quoting *Fed R. Civ. P. 23(b)(3)* advisory committee's notes (1966 amendments)). The predominance inquiry is a more stringent version of the commonality analysis; common questions must drive the litigation. *See* *Danvers Motor Co. v. Ford Motor Co., 543 F.3d 141, 148 (3d Cir. 2008)* ("[T]he commonality requirement 'is subsumed by the predominance requirement.'" (quoting *Georgine, 83 F.3d at 626*)); *Warfarin, 391 F.3d at 528* (noting the predominance requirement to be "far more demanding" than the commonality requirement).

"[T]he focus of the predominance inquiry is on whether the defendant's conduct was common as to all of the class members, and whether all of the class members were harmed by the defendant's conduct." *Sullivan, 667 F.3d at 298*. Although it is sometimes necessary to determine whether the elements of each claim can be proved through evidence common to the class, *Sullivan, 667 F.3d at 306*, a settlement "obviates the difficulties inherent in proving the elements of varied claims at trial **[*27]** or in instructing a jury on varied state laws," *Sullivan 667 F.3d at 304*. "[W]hen dealing with variations in state laws, the same concerns with regards to case manageability that arise with litigation classes are not present with settlement classes, and thus those variations are irrelevant to certification of a settlement class." *Warfarin, 391 F.3d at 529* (citing *Amchem, 521 U.S. at 620*). Additionally, because certification of a settlement class is sought, a court is "not as concerned with formulating some prediction as to how [an] element of a Sherman Act violation would play out at trial, for the proposal is that there be no trial." *In re Ins. Brokerage Antitrust Litig., 579 F.3d 241, 269 (3d Cir. 2009)* (citations and internal quotation marks omitted).

Here, the allegation is that Comcast engaged in a common course of conduct—it unlawfully tied the sale of its Premium Cable to the rental of a Comcast Set-Top Box—and putative Class Members suffered the same injury—the payment of supracompetitve prices for their Set-Top Boxes. Accordingly, Plaintiffs satisfy the predominance requirement.

b. Superiority

Rule 23(b)(3) requires "that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. "The superiority requirement 'asks the court to balance, in terms of fairness and efficiency, the* **[*28]** merits of a class action against those alternative available methods of adjudication.'" *Warfarin, 391 F.3d at 533-34* (quoting *In re Prudential Ins. Co. Am. Sales Practice Litig. Agent Actions, 148 F.3d 283, 316 (3d Cir. 1998))*. In determining whether a settlement class action is superior, a court "consider[s] the class members' interests in individually controlling litigation, the extent and nature of any litigation, the desirability or undesirability of concentrating the litigation, and the likely difficulties in managing a class action." *In re Nat'l Football League Players Concussion Injury Litig., 821 F.3d 410, 434-35 (3d Cir. 2016)*, as amended (May 2, 2016) [hereinafter *NFL II*] (citing *Fed. R. Civ. P. 23(b)(3)(A)-(D)*).

The parties indicate that there are at least 3.5 million putative Class Members with low-dollar-value claims. Although there are numerous putative Class Members, there are a very small number of individual lawsuits pending against

Comcast. "[I]ndividual consumer class members have little interest in 'individually controlling the prosecution or defense of separate actions' because each consumer has a very small claim in relation to the cost of prosecuting a lawsuit." *Warfarin, 391 F.3d at 534* (quoting *Fed. R. Civ. P. 23(b)(3)(A)*). These costs are especially burdensome in an antitrust lawsuit. *See* ECF Nos. 128, 133. The small number of lawsuits also indicates a lack of interest in individually bringing claims. *See* *Warfarin, 391 F.3d at 534*. "[F]rom the consumers' standpoint, a class action facilitates **[*29]** spreading of the litigation costs among the numerous injured parties and encourages private enforcement of the statutes." *Id.* Moreover, settlement on a classwide basis is superior to individual adjudication because it provides putative Class Members with prompter compensation. Accordingly, Plaintiffs satisfy the superiority requirement.

In conclusion, I will preliminarily certify the Settlement Class because the Settlement Class appears to satisfy the requirements of *Rule 23*.

C. The Proposed Form and Manner of Notice

Under *Rule 23(e)(1) of the Federal Rules of Civil Procedure*, a district court "must direct notice in a reasonable manner to all class members who would be bound by the proposal." *Fed. R. Civ. P. 23(e)(1)*. For classes certified under *Rule 23(b)(3)*, a court must also ensure that class members receive "the best notice that is practicable under the circumstances, including individual notice to all members who can be identified through reasonable effort." *Fed. R. Civ. P. 23(c)(2)(B)*; *see* *Amchem, 521 U.S. at 617*. *Rule 23(c)(2)(B)* provides:

> The notice must clearly and concisely state in plain, easily understood language: (i) the nature of the action; (ii) the definition of the class certified; (iii) the class claims, issues, or defenses; (iv) that a class member may enter an appearance through an attorney if the member so desires; (v) that **[*30]** the court will exclude from the class any member who requests exclusion; (vi) the time and manner for requesting exclusion; and (vii) the binding effect of a class judgment on members under *Rule 23(c)(3)*.

Fed. R. Civ. P. 23(c)(2)(B). "In addition to the requirements of *Rule 23*, due process further requires that notice be 'reasonably calculated, under all the circumstances, to apprise interested parties of the pendency of the action and afford them an opportunity to present their objections.'" *NFL II, 821 F.3d at 435* (quoting *Mullane v. Cent. Hanover Bank & Trust Co., 339 U.S. 306, 314, 70 S. Ct. 652, 94 L. Ed. 865 (1950))*.

Plaintiffs suggest several different means to provide Notice of the proposed Settlement to putative Class Members. Comcast will provide a summary Notice to Current Subscribers in their monthly Comcast bill. *See* Agreement Ex. C. Notice by publication will also be provided in the following nationwide publications: Parade, People, Better Homes & Gardens, National Geographic, Sports Illustrated, and Reader's Digest. *See* Agreement Ex. D. Additionally, an Internet settlement website will be established to display the following: (1) a long-form Notice of the Settlement Agreement; (2) contact information for Co-Lead Class Counsel, in the form of firm name, attorney name, a phone number, address, e-mail address, and website address; (3) a **[*31]** complete copy of the Settlement Agreement; (4) frequently asked questions; and (5) a Claim Form that can be submitted electronically. All Notice sent to Current Subscribers in their monthly Comcast bill and disseminated via national publications will direct putative Class Members to the settlement website. The proposed manner of disseminating Notice appears to satisfy the requirements of *Rule 23* and due process. *See* *Zimmer Paper Prods., Inc. v. Berger & Montague, P.C., 758 F.2d 86, 90 (3d Cir. 1985)* ("It is well settled that in the usual situation first-class mail and publication in the press fully satisfy the notice requirements of both *Fed. R. Civ. P. 23* and the *due process clause*."). The form and content of the proposed Notice and the proposed Claim Form contain several flaws and do not appear to satisfy either *Rule 23* or due process. Some of the most significant deficiencies in the Notice and Claim Form are set forth below.

1. Proposed Summary Notice to Current Subscribers in their Monthly Bill

The proposed Notice to Current Subscribers in their monthly bill contains significant deficiencies, including:

a. An Inaccurate Definition of the Settlement Class

The proposed Notice defines the Settlement Class as "all persons who, *or entities which*: (a) *reside within* the states of California, Washington, or West Virginia **[*32]** or have opted out of Comcast's arbitration clause as recorded within the arbitration clause opt-out list kept at Comcast's offices; and (b) have paid Comcast a rental fee for a Set-Top Box." Agreement Ex. C (emphasis added). The italicized portions of the definition of the Settlement Class in the Notice do not comport with the following definition of the Settlement Class provided in the Settlement Agreement:

> All persons who:
>
> > (i) resided in and subscribed to Premium Cable in California, Washington, or West Virginia during the Class Period, or
> >
> > (ii) subscribed to Premium Cable in any state in the United States during the Class Period and elected to opt out of Comcast's arbitration clause as reflected in Comcast's records;
>
> and paid Comcast a rental fee for a Set-Top Box at any time during the Class Period.

Agreement § 3.1. Despite what is stated in the proposed Notice, putative Class Members are persons and not entities and putative Class Members don't currently have to reside in California, Washington or West Virginia—they had to reside there at any time during the Class Period and had to subscribe to Premium Cable during the time they lived there.

b. An Incorrect Statement Regarding Incentive Awards [*33]

The proposed Notice states that the Court will consider whether to approve incentive awards to three named Plaintiffs even though there are four named Plaintiffs.

c. A Failure to Inform Putative Class Members of the Settlement Cap

The proposed Notice does not inform putative Class Members that Comcast will only pay all claims made in the aggregate that do not exceed $15.5 million in value.

2. The Proposed Summary Notice in Nationwide Publications

The proposed Notice to be disseminated in nationwide publications contains significant deficiencies, including:

a. An Inaccurate Definition of the Settlement Class

The proposed Notice defines the Settlement Class as "all persons who, *or entities which*: (a) *reside within* the states of California, Washington, or West Virginia or have opted out of Comcast's arbitration clause as recorded within the arbitration clause opt-out list kept at Comcast's offices; and (b) have paid Comcast a rental fee for a Set-Top Box *from the start of the Class Period to the Effective Date*." Agreement Ex. D (emphasis added). The italicized portions of the definition of the Settlement Class in the Notice do not comport with the following definition of the Settlement Class **[*34]** provided in the Settlement Agreement:

> All persons who:
>
> > (i) resided in and subscribed to Premium Cable in California, Washington, or West Virginia during the Class Period, or
> >
> > (ii) subscribed to Premium Cable in any state in the United States during the Class Period and elected to opt out of Comcast's arbitration clause as reflected in Comcast's records;
>
> and paid Comcast a rental fee for a Set-Top Box at any time during the Class Period.

Agreement § 3.1. Despite what is stated in the proposed Notice, putative Class Members are persons and not entities and putative Class Members don't currently have to reside in California, Washington or West Virginia—they had to reside there at any time during the Class Period and had to subscribe to Premium Cable during the time they lived there. Moreover, putative Class Members did not have to rent a Set-Top Box during from the start of the Class Period to the Effective Date—they had to rent a Set-Top Box at any time during the Class Period.

b. A Failure to Inform Putative Class Members of the Settlement Cap

The proposed Notice does not inform putative Class Members that Comcast will only pay all claims made in the aggregate that do not exceed $15.5 million in **[*35]** value.

3. The Proposed Long-Form Notice on the Settlement Website

The proposed Notice to be published on the settlement website contains significant deficiencies, including:

a. An Inaccurate Description of the Settlement Class

The introduction to the proposed Notice states: "The Settlement offers a cash benefit *and/or* credits to *current* Comcast Customers who *reside in* the States of California, Washington, or West Virginia or who opted-out of Comcast's arbitration clause as recorded within the arbitration clause opt-out list kept at Comcast's offices, depending on the period of time each customer rented a Set-Top Box from Comcast and *how many Set-Top Boxes each customer rented.*" Agreement Ex. E, at 1 (emphasis added). The italicized portions of the definition of the Settlement Class in the Notice do not comport with the following definition of the Settlement Class provided in the Settlement Agreement:

> All persons who:
>
> > (i) resided in and subscribed to Premium Cable in California, Washington, or West Virginia during the Class Period, or
> >
> > (ii) subscribed to Premium Cable in any state in the United States during the Class Period and elected to opt out of Comcast's arbitration clause as reflected **[*36]** in Comcast's records;
>
> and paid Comcast a rental fee for a Set-Top Box at any time during the Class Period.

Agreement § 3.1. Despite what is stated in the proposed Notice, Current Subscribers either receive a cash benefit or in-kind relief. Putative Class Members don't currently have to reside in California, Washington or West Virginia—they had to reside there at any time during the Class Period and had to subscribe to Premium Cable during the time they lived there. Moreover, putative Class Members include Former Subscribers who receive the same amount of compensation regardless of the number of Set-Top Boxes they rented.

b. An Inaccurate Statement of the Available Compensation

The introduction to the proposed Notice contains a box titled "Your Legal Rights And Options In This Settlement," which includes the statement that a Class Member may "Submit a Claim Form seeking cash payment *and/or* other benefits." Agreement Ex. E, at 1 (emphasis added). The italicized portion is inaccurate because Current Subscribers either receive a cash payment or in-kind relief and Former Subscribers only receive a cash payment.

c. A Failure to Inform Current Subscribers Who Select In-Kind Relief of the Risk of Receiving [*37] No Compensation if they Leave Comcast Prior to Distribution of Benefits

In Section 9, the proposed Notice fails to inform Current Subscribers that it may take a considerable amount of time before distribution of benefits, and if they select in-kind relief and are no longer a Comcast subscriber at the time of distribution, then they will receive no compensation.

d. An Inappropriate Statement Regarding Arbitration

In Section 14, the proposed Notice states: "Unless you have opted out of Comcast's arbitration clause and class action ban, you *must arbitrate* your claim if you exclude yourself from the Settlement and Settlement Class." Agreement Ex. E § 14 (emphasis added). Because the Court has not ruled on any of Comcast's motions to compel arbitration, the italicized portion should be changed from "must arbitrate" to "may have to arbitrate."

e. An Improper Statement Regarding Certification

In Section 20, the proposed Notice states: "[T]he Court will hold a public hearing . . . to determine whether the Settlement Class *was properly certified* . . . ." Agreement Ex. E § 20 (emphasis added). Because the Court reserves decision on certification of the Settlement Class until after the fairness hearing, the italicized potion should be **[*38]** changed from "was properly certified" to "should be certified."

4. The Proposed Claim Form

The proposed Claim Form contains significant deficiencies, including:

a. A Failure to Define the Settlement Class and the Class Period

The proposed Claim Form does not provide a definition of the Settlement Class and the Class Period.[13]

b. An Imprecise Request for Subscriber Information

Part 2 of the proposed Claim Form, labeled "Subscriber Information," requires a Class Member to list his/her "Service Address (where you receive(d) Comcast service, if different from Mailing Address)." Agreement Ex. A § 2. Part 2 assumes that a Class Member only received Comcast service at one address during the thirteen-year Class Period. In thirteen years, however, many Class Members may have received Comcast service at multiple **[*39]** locations.

---

[13] As discussed, the proposed forms of Notice and the Claim Form fail to properly describe the Settlement Class and the benefit amount each Class Member may be entitled to. The Settlement Agreement defines the Settlement Class as:

> All persons who:
>
> > (i) resided in and subscribed to Premium Cable in California, Washington, or West Virginia during the Class Period, or
> >
> > (ii) subscribed to Premium Cable in any state in the United States during the Class Period and elected to opt out of Comcast's arbitration clause as reflected in Comcast's records;
>
> and paid Comcast a rental fee for a Set-Top Box at any time during the Class Period.

Agreement § 3.1. The Settlement Agreement also provides that the amount of benefit that a Class Member may receive is determined by the length of time that the Class Member rented a Set-Top Box. Therefore, the Notice and Claim Form should explain that a Class Member who paid Comcast a rental fee for a Set-Top Box will receive credit: (1) for each month that s/he lived in any of the following states, California, Washington, or West Virginia, during the Class Period and subscribed to Premium Cable; and/or (2) for each month that s/he resided in any state in the United States during the Class Period and subscribed to Premium Cable, but elected to opt out of Comcast's arbitration clause. For instance, a person who subscribed to Premium Cable in California for 24 months during the Class Period and later subscribed to Premium Cable in Washington for an additional 12 months during the Class Period would be entitled to receive a benefit amount in accordance with a Class Member who rented a Set-Top Box for 36 months.

c. An Improper Organization of Information

Part 2 of the proposed Claim Form, labeled "Subscriber Information," contains information about the validity of Settlement Credits. This information should be moved to Part 3 labeled "Benefits."

d. A Failure to Inform Current Subscribers Who Select In-Kind Relief of the Risk of Receiving No Compensation if they Leave Comcast Prior to Distribution of Benefits

Part 3 of the proposed Claim Form, labeled "Benefits," fails to inform Current Subscribers that it may take a considerable amount of time before distribution of benefits, and if they select in-kind relief and are no longer a Comcast subscriber at the time of distribution, then they will receive no compensation.

e. A Failure to Clearly Present the Compensation Available to Each Class Member

Part 3 of the proposed Claim Form, labeled "Benefits," requires a Class Member to select the type of compensation that s/he would like to receive, but provides instructions that are extremely difficult to understand and follow. Because of this confusion, there is a strong likelihood that some putative Class Members will select invalid benefit options.

f. A Failure to Properly Define the Length of [*40] Time a Class Member had to Rent a Set-Top Box in Order to Receive Maximum Compensation

Part 3 of the proposed Claim Form, labeled "Benefits," provides that a Class Member is eligible for maximum compensation if s/he "rented a Set-Top Box from 60 to 96 months (5 to 8 years)." The Settlement Agreement, however, provides maximum compensation to any putative Class Member who rented a Set-Top Box "for 60 or more months (more than 5 years)." Agreement § 9.1.

g. A Failure to Narrowly Tailor the Certification Requirements

Part 4 of the proposed Claim Form, labeled "Certification," requires each Class Member to declare under penalty of perjury that s/he is a Class Member who rented a Set-Top Box during the Class Period. Additionally, all Class Members are required to "enclos[e] a true and correct copy/copies of one of the following as proof of payments of the rental fee(s) referenced in Part 3: [] Cancelled check(s) reflecting payment; <u>or</u> [] Credit card or bank statement(s) reflecting payment; <u>or</u> [] Invoice from Comcast reflecting rental fee(s) for set-top Boxes." Agreement Ex. A § 4. This enclosure requirement should not apply to Current Subscribers because Comcast should already have proof in its possession **[*41]** that these customers rented Set-Top Boxes. As to Former Subscribers, the enclosure requirement should be more narrowly tailored to state that Class Members are required to enclose a true and correct copy of one of the following as proof of payments of the rental fee(s) referenced in Part 3: [] A Cancelled check reflecting payment to Comcast; <u>or</u> [] A Credit card or bank statement reflecting payment to Comcast; <u>or</u> [] An Invoice from Comcast reflecting a rental fee charge for one or more Set-Top Box.

Because the proposed Notice does not meet the requirements of *Rule 23* and due process, I cannot approve the proposed Notice.

IV. CONCLUSION

For the reasons set forth above, I will grant the motion in part and preliminarily approve the Settlement Agreement and preliminarily certify the Settlement Class. Because of deficiencies in the proposed Notice and proposed Claim

Form, I will deny the portion of the motion that seeks approval of the proposed Notice and proposed Claim Form, the appointment of a Claims Administrator, and the establishment of a schedule for completion of the Settlement approval process. In order to cure these deficiencies, Plaintiffs will be ordered to submit an amended motion that **[*42]** only seeks approval of revised proposed forms of Notice, a revised proposed Claim Form, appointment of a Claims Administrator, and a revised proposed schedule for completion of the Settlement approval process.

/s/ Anita B. Brody

ANITA B. BRODY, J.

ORDER

AND NOW, this 5th day of September, 2018, it is **ORDERED** that Plaintiffs' Motion for Certification of a Settlement Class and Preliminary Approval of a Class Action Settlement (ECF No. 266) is **GRANTED in part** and **DENIED in part** as follows:

- The Court preliminarily approves the Settlement Agreement and preliminarily certifies the Settlement Class.
- The Court denies the portion of the motion that seeks approval of the proposed Notice and proposed Claim Form, the appointment of a Claims Administrator, and the establishment of a schedule for completion of the Settlement approval process.

It is further **ORDERED** that, on or before **November 5, 2018**, Plaintiffs must submit an amended motion that only seeks approval of revised proposed forms of Notice, a revised proposed Claim Form, appointment of a Claims Administrator, and a revised proposed schedule for completion of the Settlement approval process.

LexisNexis® Headnotes

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Defenses, Demurrers & Objections, Motions to Dismiss**

A motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(1)* challenges a court's subject matter jurisdiction. Federal district courts are courts of limited jurisdiction that may not grant relief absent a constitutional or valid statutory grant of jurisdiction and are presumed to lack jurisdiction in a particular case unless the contrary affirmatively appears. The plaintiff bears the burden of establishing jurisdiction.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN2[] **Defenses, Demurrers & Objections, Motions to Dismiss**

Fed. R. Civ. P. 12(b)(1) motions may challenge jurisdiction facially or factually. In a facial attack, the challenger asserts that the allegations contained in a complaint are insufficient on their face to invoke federal jurisdiction. By contrast, in a factual attack, the challenger disputes the truth of the allegations that, by themselves, would otherwise invoke federal jurisdiction. To adjudicate the factual challenge, the court may review evidence beyond the complaint without converting the *Rule 12(b)(1)* motion into one for summary judgment. Once the moving party makes a factual challenge by bringing evidence before the court, the opposing party must furnish its own affidavits or other evidence to establish subject matter jurisdiction. Without assuming the truth of the complaint's factual allegations, the court nonetheless resolves factual disputes in favor of the non-moving party. Alternatively, in a facial challenge, the defendant asserts the insufficiency of the complaint's allegations to invoke federal jurisdiction as a matter of law. To adjudicate the facial challenge, the Court assumes the truth of the allegations in the complaint and draws all reasonable inferences in favor of the plaintiff.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Motions to Dismiss, Failure to State Claim

Fed. R. Civ. P. 12(b)(6) permits a party to raise by motion the defense that the complaint fails to state a claim upon which relief can be granted, generally referred to as a motion to dismiss. The Court evaluates whether a complaint states a cognizable legal theory and sufficient facts in light of *Fed. R. Civ. P. 8(a)*, which requires a short and plain statement of the claim showing that the pleader is entitled to relief. Although *Rule 8* does not require detailed factual allegations, it does demand more than an unadorned, the-defendant-unlawfully-harmed-me accusation. In other words, a plaintiff's obligation to provide the grounds' of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. A complaint will not suffice if it tenders naked assertions devoid of further factual enhancement.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN4[] Motions to Dismiss, Failure to State Claim

In order to survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. *Fed. R. Civ. P. 12(b)(6)*. A claim is facially plausible when the facts pled allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. That is not to say that the claim must be probable, but there must be more than a sheer possibility that a defendant has acted unlawfully. Facts merely consistent with a defendant's liability fall short of a plausible entitlement to relief. Further, the court need not accept as true legal conclusions contained in the complaint. This review requires context-specific analysis involving the Court's judicial experience and common sense. Where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged-but it has not shown-that the pleader is entitled to relief. Where a complaint does not survive 12(b)(6) analysis, the Court will grant leave to amend unless it determines that no modified contention consistent with the challenged pleading will cure the deficiency.

Civil Procedure > Preliminary Considerations > Justiciability > Case & Controversy Requirements

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN5[] Justiciability, Case & Controversy Requirements

U.S. Const., art. III, § 2 vests federal courts with the authority to hear Cases and Controversies. Standing to sue is a doctrine rooted in the traditional understanding of a case or controversy. The doctrine limits the category of litigants empowered to maintain a lawsuit in federal court to seek redress for a legal wrong. Standing jurisprudence contains two strands: Article III standing, which enforces the Constitution's case-or-controversy requirement, and prudential standing, which embodies judicially self-imposed limits on the exercise of federal jurisdiction. Prudential standing is not derived from Article III and encompasses at least three broad principles: the general prohibition on a litigant's raising another person's legal rights, the rule barring adjudication of generalized grievances more appropriately addressed in the representative branches, and the requirement that a plaintiff's complaint fall within the zone of interests protected by the law invoked.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Civil Procedure > ... > Justiciability > Standing > Third Party Standing

HN6[] **Standing, Burdens of Proof**

One particular aspect of the standing doctrine is parens patriae standing. States or Indian nations asserting parens patriae standing must establish Article III standing and meet the unique requirements of the parens patriae doctrine. Generally, there are two elements to establish standing to bring a parens patriae claim. First, the State must articulate an interest apart from the interests of particular private parties, i.e., the State must be more than a nominal party. Second, the State must express a quasi sovereign interest. Parens patriae means literally parent of the country. Proprietary standing is appropriate when a state itself has proprietary interests, such as owning land or participating in a business venture.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

HN7[] **Standing, Burdens of Proof**

If the requirements are prudential then Congress generally can expand standing to reach the full limits of *U.S. Const., art. III, § 2*. The United States District Court for the Southern District of California assumes without deciding that parens patriae standing is prudential and not constitutional.

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN8[] **Justiciability, Standing**

U.S. Const., art. III, § 2 and prudential standing are distinct concepts; prudential standing is a judicially crafted doctrine and does not derive from Article III. Some courts have determined that the parens patriae standing requirements are prudential and not rooted in Article III. So long as the States have shown they have standing under Article III, the standing inquiry is at an end. A quasi sovereign interest must be sufficiently concrete to create an actual controversy between the State and the defendant. This might suggest that parens patriae is rooted in Article III, but the language does not clearly hold that parens patriae is a constitutional consideration. Given the Supreme Court's language and this Court's finding that Plaintiff is not bringing a claim under the statutory parens patriae section, *15 U.S.C.S. § 15c*, it is sufficient to assume without deciding that parens patriae standing is prudential, not constitutional in nature.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN9[] **Public Enforcement, State Civil Actions**

The Hart-Scott-Rodino Antitrust Improvements Act, *15 U.S.C.S. § 15c et seq.*, creates a new right of action for States under existing federal ***antitrust law***. The Act provides that an attorney general of a State may bring a civil action in the name of such State, as parens patriae on behalf of natural persons residing in such State, in any district court of the United States having jurisdiction of the defendant, to secure monetary relief as provided in this section for injury sustained by such natural persons to their property by reason of any violation of sections 1 to 7 of this title. *§ 15c(a)(1)*.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN10[] **Public Enforcement, State Civil Actions**

The United States Congress has expressly authorized state attorneys general to bring suit under the Hart-Scott-Rodino Antitrust Improvements Act, *15 U.S.C.S. § 15c et seq.*, and a plaintiff need not demonstrate prudential standing, so long as it brings a claim for monetary relief under *15 U.S.C.S. § 15c*. *Section 15c* only allows monetary relief.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN11[] **Public Enforcement, State Civil Actions**

The Hart-Scott-Rodino Antitrust Improvements Act, *15 U.S.C.S. § 15c et seq.*, does not amend section 16 of the Clayton Act, which is codified at *15 U.S.C.S. § 26*, which provides a private cause of action for injunctive relief. The plain language of the *§ 15c* only mentions monetary-not injunctive-relief. *Section 15c* only created a new procedural means-the parens patriae civil action-through which a State could enforce already existing rights of recovery under section 4 of the Clayton Act. The Burch court's statement did not hold that *§ 15c* extends to injunctive relief, but merely recognized that the Supreme Court already allowed parens patriae actions for injunctive relief under section 16, and the Act does not disturb the United States Supreme Court's holding.

Governments > Native Americans > Authority & Jurisdiction

HN12[] **Native Americans, Authority & Jurisdiction**

The Cherokee Nation Attorney General acting as parens patriae, may bring a civil cause of action in any district court of the United States having jurisdiction over a defendant, to secure monetary or injunctive relief based on any applicable federal statute, common law, or the laws of any state. 12 CNCA § 7 (2018). Similarly, 51 CNCA § 105.B.2 authorizes the Attorney General to initiate or appear in any action in which the interests of the Nation or the People of the Nation are at issue. The court reads the Cherokee Nation provisions as authorizing the Attorney General to bring a suit under applicable substantive law, whether federal or state. That is half the equation; the other half is what constitutes applicable law.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Native Americans > Authority & Jurisdiction

HN13[] **Public Enforcement, State Civil Actions**

The concept of prudential standing in the antitrust context is intertwined with the substantive content of and intent behind the particular statute authorizing the cause of action. In sum, it is not enough that Cherokee Nation law authorizes the Attorney General to bring suit; the Nation must also demonstrate that it meets the prudential standing requirements of the state or federal substantive law in question, i.e., that it is within the class of persons who can sue under a statute.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN14[] Remedies, Injunctions

Injunctive relief is governed by section 16 of the Clayton Act, *15 U.S.C.S. § 26*, which provides any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN15[] Defenses, Demurrers & Objections, Motions to Dismiss

A jurisdictional dismissal is warranted only where the alleged claim under the Constitution or federal statutes clearly appears to be immaterial and made solely for the purpose of obtaining jurisdiction or where such a claim is wholly insubstantial and frivolous.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN16[] Public Enforcement, State Civil Actions

The United States Supreme Court's decisions, in particular Georgia v. Pennsylvania Railroad and Snapp, demonstrate that a parens patriae plaintiff must meet the two-part test outlined in Snapp.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN17[] Public Enforcement, State Civil Actions

The summary of the case law involving parens patriae actions leads to the following conclusions. In order to maintain such an action, the State must articulate an interest apart from the interests of particular private parties, i.e., the State must be more than a nominal party. The State must express a quasi-sovereign interest.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN18[] Public Enforcement, State Civil Actions

A plaintiff must demonstrate the parens patriae standing requirements outlined in Snapp to bring a section 16 of the Clayton Act, *15 U.S.C.S. § 26*, claim.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN19[] Public Enforcement, State Civil Actions

Because section 16 of the Clayton Act, *15 U.S.C.S. § 26*, does not explicitly confer plaintiff standing to bring an injunctive relief claim, a plaintiff must demonstrate it meets the standing requirements outlined by the United States Supreme Court in Snapp.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN20[] Standing, Burdens of Proof

While the United States Supreme Court has not attempted to draw any definitive limits on the proportion of the population of the State that must be adversely affected by the challenged behavior, the court does require that more must be alleged than injury to an identifiable group of individual residents.

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > Actual Controversy

Civil Procedure > ... > Declaratory Judgments > State Declaratory Judgments > Grounds for Relief

HN21[] Case & Controversy Requirements, Actual Controversy

A court may grant declaratory relief in a case of actual controversy within its jurisdiction. *28 U.S.C.S. § 2201(a)*. Accordingly, a district court must determine at the outset whether the parties have presented an actual case or controversy within the court's jurisdiction. The Declaratory Judgment Act is a procedural device only; it does not confer an independent basis of jurisdiction on the federal court. A declaratory judgment action may be entertained in federal court only if the coercive action that would have been necessary, absent the declaratory judgment procedure, could have been heard in a federal court. The Declaratory Judgment Act merely creates a remedy in cases otherwise within the court's jurisdiction; it does not constitute an independent basis for jurisdiction.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Civil Procedure > ... > Declaratory Judgments > State Declaratory Judgments > Scope of Declaratory Judgments

HN22[] Standing, Burdens of Proof

Declaratory relief is a remedy and does not modify standing requirements. In order for a plaintiff to seek declaratory relief, it must still meet the parens patriae requirements.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

HN23[] **Public Enforcement, State Civil Actions**

Infineon holds that if there is legal authority in a state that expressly authorized a parens patriae action, then courts presume the existence of such authority, and, the Cherokee Nation Attorney General has such authorization under Cherokee Nation law.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > State & Territorial Governments > Employees & Officials

HN24[] **Public Enforcement, State Civil Actions**

The California Cartwright Act, *Cal. Bus. & Prof. Code § 16760(a)(1)*, specifically authorizes the California Attorney General to bring suit on behalf of the people of California. *Cal. Bus. & Prof. Code § 16760(a)(1)* provides that the Attorney General may bring a civil action in the name of the people of the State of California, as parens patriae on behalf of natural persons residing in the state. This provision could not be plainer: where the Attorney General is empowered to bring a damages action seeking relief for violation (s) of the Cartwright Act, it is only the California Attorney General who is so empowered, and on behalf of California residents only. The out-of-state Attorneys General therefore have no parens patriae authority under the Act.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > State & Territorial Governments > Employees & Officials

HN25[] **Public Enforcement, State Civil Actions**

The plain language of the Cartwright Act belies no statutory authorization for a foreign attorney general to bring a parens patriae suit under California ***antitrust law***. The plain language of the statute only discusses a singular attorney general, i.e., the attorney general. This is different from statutory language that authorizes multiple attorneys general. *15 U.S.C.S. § 15c* (Any attorney general of a State. Thus, only the California Attorney General can bring suit under *section 16760*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN26[] **Deceptive & Unfair Trade Practices, State Regulation**

Like the Cartwright Act, the Unfair Competition Law authorizes damages which shall be assessed and recovered in a civil action brought in the name of the people of the State of California by the Attorney General. *Cal. Bus. & Prof. Code § 17206(a)*; *Cal. Bus. & Prof. Code § 17204*. Actions for relief pursuant to this chapter shall be prosecuted exclusively in a court of competent jurisdiction by the Attorney General in the name of the people of the State of California. For the same reasons as discussed in the Cartwright Act analysis, the Unfair Competition Law does not authorize foreign attorneys general to bring a parens patriae suit.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN27[] **Equitable Relief, Quantum Meruit**

In California, there is not a standalone cause of action for unjust enrichment, which is synonymous with restitution. Rather, California courts describe the theory underlying a claim that a defendant has been unjustly conferred a benefit through mistake, fraud, coercion, or request. A court may construe an unjust enrichment claim as a quasi-contract claim seeking restitution.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN28[] **Equitable Relief, Quantum Meruit**

When no statute authorizes standing to bring an unjust enrichment claim, a plaintiff must demonstrate it meets the prudential standing requirements outlined by the Supreme Court in Snapp. The State must articulate an interest apart from the interests of particular private parties, i.e., the State must be more than a nominal party.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN29[] **Deceptive & Unfair Trade Practices, State Regulation**

The Kansas Restraint of Trade Act, *Kan. Stat. Ann. § 50-101, et seq.*, authorizes the attorney general to bring an action. *Kan. Stat. Ann. § 50-103(a)*. § 50-109. The attorney general shall: (a) Enforce this act throughout the state. The statute does not explicitly authorize a foreign attorney general as evidenced by the use of the term the attorney general rather than an or any attorney general.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Native Americans > Authority & Jurisdiction

Governments > State & Territorial Governments > Employees & Officials

HN30[] **Public Enforcement, State Civil Actions**

Kansas law allows the Kansas attorney general to bring a representative action. *Kan. Stat. Ann. § 50-103*. It also allows private parties to assert a private cause of action. *Kan. Stat. Ann. § 50-148*. It does not follow, however, that a private cause of action allows a foreign attorney general, suing on behalf of a different sovereign, to vindicate the public rights of the Cherokee Nation. A parens patriae action is expressly defined as a means for a state to seek redress for wrongs affecting the public at large, while a class action is generally a means by which individual private rights may be collectively enforced. The Court does not doubt that individual private citizens, residing in Kansas and holding dual Cherokee-Kansan citizenship, could bring an action, but the Court will not bootstrap the statutory language to presume a sovereign entity could bring a public action under the same private provision without express authorization.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

HN31[] **Standing, Burdens of Proof**

In Kansas, unjust enrichment is an equitable doctrine, a modern designation for the older doctrine of quasi-contracts. Because unjust enrichment is not statutory, Snapp applies.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > State & Territorial Governments > Employees & Officials

HN32[] **Public Enforcement, State Civil Actions**

The Arizona Uniform State Antitrust Act, *Ariz. Rev. Stat. § 44-1401, et seq.*, provides that the attorney general may bring an action for appropriate injunctive or other equitable relief and civil penalties in the name of the state for a violation of this article. *Ariz. Rev. Stat. § 44-1407*. The plain language of the statute references the attorney general and authorizes the attorney general to bring suit in the name of the state. Arizona law does not authorize a foreign attorney general to bring a parens patriae action under Arizona law.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > State & Territorial Governments > Employees & Officials

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

HN33[] **Public Enforcement, State Civil Actions**

The Arizona Uniform State Antitrust Act, *Ariz. Rev. Stat. § 44-1408(A)*, allows the state to bring an action for appropriate relief and, as previously discussed, *Ariz. Rev. Stat. § 44-1407* authorizes the Arizona attorney general to bring an action. Thus, the statute provides for public causes of action in *Ariz. Rev. Stat. § 44-1408(A)* and *Ariz. Rev. Stat. § 44-1407* and a private cause of action in *Ariz. Rev. Stat. § 44-1408(B)*. Because the structure distinguishes the causes of action, the Arizona legislature likely did not intend to allow a representative type action in a private cause of action. Or, at least, the Court does not make such a finding without authority saying so. The Arizona Uniform State Antitrust Act provides no authorization for a foreign attorney general to bring a parens patriae suit.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN34[] **Equitable Relief, Quantum Meruit**

In Arizona, unjust enrichment is a form of restitution to enforce contract rights when there exists no valid contract.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Native Americans > Authority & Jurisdiction

Governments > State & Territorial Governments > Employees & Officials

HN35[] **Public Enforcement, State Civil Actions**

Colorado law explicitly authorizes a parens patriae civil action, but only the attorney general may bring such an action. *Colo. Rev. Stat. Ann. § 6-4-111(3)(a)*. As was true with the statutes previously discussed, the reference to the attorney general means the Colorado attorney general, not foreign attorneys general. Contends that Cherokee Nation law authorizes the Cherokee Nation Attorney General to bring an action under Colorado law and the right of the Colorado attorney general should be extended to the Nation's Attorney General. It is not enough that Cherokee

Nation law authorizes the Nation's Attorney General to bring an action under Colorado law; Colorado law must also authorize such a suit. The plain language of the statute does not authorize such an action.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN36[] Equitable Relief, Quantum Meruit

Unjust enrichment is a judicially-created remedy under Colorado law.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN37[] Public Enforcement, State Civil Actions

The New Mexico Antitrust Act, *N.M. Stat. Ann. § 57-1-1*, states the attorney general may bring an action in the name of the state against any person. *N.M. Stat. Ann. § 57-1-8*. Like the statutes previously discussed, the reference to the attorney general means the New Mexico attorney general, not foreign attorneys general. *N.M. Stat. Ann. § 57-1-1.2* includes any governmental or other legal entity with the exception of the state within its definition of a person. Those persons have a cause of action under *N.M. Stat. Ann. § 57-1-3*; the New Mexico attorney general has a cause of action under *N.M. Stat. Ann. § 57-1-8*.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN38[] Equitable Relief, Quantum Meruit

Under New Mexico law, unjust enrichment is a form of restitution cutting across contract and tort law.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > State & Territorial Governments > Employees & Officials

HN39[] Public Enforcement, State Civil Actions

The Consumer Protection Act, *Okla. Stat. Ann. tit. 15, § 756.1(A)*, states the attorney general or a district attorney may bring an action. The reference to the attorney general means the Oklahoma attorney general, not foreign attorneys general.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN40[] Equitable Relief, Quantum Meruit

Oklahoma treats unjust enrichment as an equitable remedy, not based in statute.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN41[] **Public Enforcement, State Civil Actions**

Unlike other states, Florida's Deceptive and Unfair Trade Practices Act, *Fla. Stat. Ann. § 501.207(1)*, does not empower the state attorney general; instead, the Act authorizes the enforcing authority to bring various remedies. The Act defines enforcing authority as either the office of the state attorney or the Department of Legal Affairs depending on the type of violation. § 501.203(2). Neither of these entities is a government entity outside Florida and the law does not reference language indicative of a parens patriae action. The it is availing itself of the section of the Act whereby anyone aggrieved by a violation of this part may bring an action. The Nation's Attorney General is not a person who was aggrieved; the individual and private citizens of the Nation, residing in Florida, are the aggrieved persons.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN42[] **Equitable Relief, Quantum Meruit**

As with other states, Florida treats unjust enrichment as an equitable remedy.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN43[] **Remedies, Injunctions**

Injunctive relief under federal ***antitrust law*** requires a quasi-sovereign interest and an interest apart from the interests of particular private parties.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Supplemental Jurisdiction

HN44[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

28 U.S.C.S. § 1367 allows a federal district court to hear all state law claims as long as there is an independent basis for jurisdiction. Under *section 1367*, a district court shall have supplemental jurisdiction over all other claims that are so related to claims in the action within such original jurisdiction that they form part of the same case or controversy under Article III of the United States Constitution. *§ 1367(a)*. The United States Supreme Court has held that supplemental jurisdiction may be exercised when federal and state claims have a common nucleus of operative fact and would ordinarily be expected to be tried all in one judicial proceeding. However, a Court may decline to exercise supplemental jurisdiction over any state claim if (1) the claim raises a novel or complex issue of State law, (2) the claim substantially predominates over the claim or claims over which the district court has original jurisdiction, (3) the district court has dismissed all claims over which it has original jurisdiction, or (4) in exceptional circumstances, there are other compelling reasons for declining jurisdiction. *28 U.S.C.S. § 1367(c)(1)-(4)*.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Supplemental Jurisdiction

HN45[] **Defenses, Demurrers & Objections, Motions to Dismiss**

In Gibbs, the United States Supreme Court states that if federal claims are dismissed before trial the state claims should be dismissed as well. In Carnegie-Mellon, the court clarifies that this was not a mandatory rule, but rather simply recognizes that in the usual case in which all federal-law claims are eliminated before trial, the balance of factors to be considered under the pendent jurisdiction doctrine-judicial economy, convenience, fairness, and comity-will point toward declining to exercise jurisdiction over the remaining state law claims.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN46[] Amendment of Pleadings, Leave of Court

Pursuant to *Fed. R. Civ. P. 15(a)*, a plaintiff may amend its complaint once as a matter of course within specified time limits. *Fed. R. Civ. P. 15(a)(1)*. In all other cases, a party may amend its pleading only with the opposing party's written consent or the court's leave. The court should freely give leave when justice so requires. *Fed. R. Civ. P. 15 (a)(2)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN47[] Motions to Dismiss, Failure to State Claim

While courts exercise broad discretion in deciding whether to allow amendment, they have generally adopted a liberal policy. Accordingly, leave is generally granted unless the court harbors concerns such as undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, futility of amendment, etc. Amendments seeking to add claims are to be granted more freely than amendments adding parties. Additionally, the party opposing amendment has the burden of showing that amendment is not warranted. Generally a proposed amendment is futile only if no set of facts can be proved under the amendment to the pleadings that would constitute a valid and sufficient claim or defense. Courts ordinarily do not consider the validity of a proposed amended pleading in deciding whether to grant leave to amend, and instead defer consideration of challenges to the merits of a proposed amendment until after leave to amend is granted and the amended pleadings are filed. Arguments concerning the sufficiency of the proposed pleadings, even if meritorious, are better left for briefing on a motion to dismiss.

Judges: Hon. Janis Lynn Sammartino, United States District Judge.

Opinion by: Janis Lynn Sammartino

Opinion

[*1086] ORDER GRANTING MOTION TO DISMISS

(ECF No. 983)

Presently before the Court is Defendants StarKist Co., Dongwon Industries, Co., Bumble Bee Foods LLC, Del Monte Corporation, Tri-Union Seafoods LLC d/b/a Chicken of the Sea International Inc., and Thai Union Group PCL's ("Defendants") Joint Motion to Dismiss, ("MTD," ECF No. 983). Also before the Court are Plaintiff the Cherokee Nation's Opposition to, ("Opp'n," ECF No. 1267), and Defendants' Reply in Support of, ("Reply," ECF No. 1284), the Motion. The Court heard oral argument on July 30, 2018. Having considered the parties' arguments and the law, the Court rules as follows.

BACKGROUND

This case concerns an alleged conspiracy to fix the prices of packaged seafood throughout the United States. Plaintiff the **[**49]** Cherokee Nation is a federally recognized sovereign Indian nation and brings this action in its proprietary capacity and under its *parens patriae* authority against Defendants as part of a broader multi-district litigation ("MDL") currently pending before this Court. (First Am. Compl. ("FAC"), ECF No. 823, ¶¶ 11-12.)[1] This particular aspect of the MDL concerns whether the Court has subject matter jurisdiction over Plaintiff's claims.

In 2015, various plaintiffs across the country brought civil suits concerning defendants StarKist, Chicken of the Sea, and Bumble Bee's conduct. The several civil actions relating to this alleged conspiracy were consolidated in an MDL and the judicial panel on MDLs centralized pretrial proceedings to this Court on December 9, 2015, (*see* Transfer Order, ECF No. 1). The Cherokee Nation was a latecomer to this litigation and filed suit on November 16, 2017, (*see* No. 17-CV-2332, ECF No. 1), which was then consolidated with the MDL. Plaintiff originally requested the Court create a track solely for itself, (ECF No. 751-1, at 3), but later amended its motion to request placement in the indirect End Purchaser Payer ("EPP") track, while also maintaining its own complaint, **[**50]** (ECF No. 798-1, at 2). On February 5, 2018, Plaintiff filed a First Amended Complaint, (ECF No. 823), and on February 23, 2018, the Court granted Plaintiff's amended motion **[*1087]** and assigned Plaintiff to the EPP track, (ECF No. 859).

Plaintiff's amended Complaint sets forth detailed allegations concerning alleged price-fixing schemes in the packaged seafood industry, which has resulted in a Department of Justice investigation into Defendants' activities and guilty pleas by several packaged seafood executives. (FAC ¶¶ 213, 221-28.) Defendants are major producers of packaged seafood. The complaint presents allegations of increased packaged seafood prices resulting from anticompetitive behavior on the part of Defendants. (*See id.* ¶¶ 205, 208-10.) Plaintiff's citizens, members of the Cherokee Nation, are indirect purchasers of packaged tuna. (*Id.* ¶ 10.) Plaintiff alleges that Defendants' anticompetitive behavior has resulted in fixed or higher prices of packaged seafood, that indirect purchasers of packaged seafood have been deprived of free and open competition, and that indirect purchasers paid artificially inflated prices. (*Id.* ¶ 229.)

Plaintiff's amended Complaint brings the following claims. **[**51]** First, Plaintiff asserts a cause of action under *section 1 of the Sherman Act, 15 U.S.C. § 1*, which is Plaintiff's only federal cause of action. Second, Plaintiff asserts causes of action for violation of State law; specifically, California, Kansas, Arizona, Colorado, New Mexico, Oklahoma, and Florida. Third, Plaintiff brings two causes of action under Cherokee Nation law—Unfair and Deceptive Practices Act ("CNUDPA"), 12 CNCA § 21 *et seq.*, and unjust enrichment. (*See generally* FAC.) Defendants have filed the present joint motion to dismiss, (ECF No. 983), challenging this Court's jurisdiction to

[1] The sealed version of The Cherokee Nation's First Amended Complaint is located at ECF No. 825.

hear Plaintiff's claims under *Rule 12(b)(1)* and asserting, in the alternative, that the amended Complaint fails to state a claim under *Rule 12(b)(6)*.

LEGAL STANDARD

I. *Rule 12(b)(1)*

HN1[] A motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(1)* challenges a court's subject matter jurisdiction. Federal district courts are courts of limited jurisdiction that "may not grant relief absent a constitutional or valid statutory grant of jurisdiction" and are "presumed to lack jurisdiction in a particular case unless the contrary affirmatively appears." *A-Z Int'l v. Phillips, 323 F.3d 1141, 1145 (9th Cir. 2003)* (internal quotations and citations omitted). The plaintiff bears the burden of establishing jurisdiction. *Kokkonen v. Guardian Life Ins. Co., 511 U.S. 375, 377, 114 S. Ct. 1673, 128 L. Ed. 2d 391*; *In re Dynamic Random Access Memory (DRAM) Antitrust Litig., 538 F.3d 1107, 1110 (9th Cir. 2008)*.

HN2[] *Rule 12(b)(1)* motions may challenge jurisdiction facially **[**52]** or factually. *Safe Air for Everyone v. Meyer, 373 F.3d 1035, 1039 (9th Cir. 2004)*. "In a facial attack, the challenger asserts that the allegations contained in a complaint are insufficient on their face to invoke federal jurisdiction. By contrast, in a factual attack, the challenger disputes the truth of the allegations that, by themselves, would otherwise invoke federal jurisdiction." *Id.* To adjudicate the factual challenge, the Court may review evidence beyond the complaint without converting the *Rule 12(b)(1)* motion into one for summary judgment. *Savage v. Glendale Union High Sch., Dist. No. 205, Maricopa Cnty., 343 F.3d 1036, 1039 n.2 (9th Cir. 2003)*; *David v. Giurbino, 488 F. Supp. 2d 1048, 1054 (S.D. Cal. 2007)*. Once the moving party makes a factual challenge by bringing evidence before the Court, the opposing party must furnish its own affidavits or other evidence to establish subject matter jurisdiction. *Safe Air, 373 F.3d at 1039*; **[*1088]** *Savage, 343 F.3d at 1039 n.2*. Without assuming the truth of the complaint's factual allegations, the Court nonetheless resolves factual disputes in favor of the non-moving party. *Dreier v. United States, 106 F.3d 844, 847 (9th Cir. 1996)*; *Farrah v. Monterey Transfer & Storage, Inc., 555 F. Supp. 2d 1066, 1067-68 (N.D. Cal. 2008)*.

Alternatively, in a facial challenge, the defendant asserts the insufficiency of the complaint's allegations to invoke federal jurisdiction as a matter of law. *Whisnant v. United States, 400 F.3d 1177, 1179 (9th Cir. 2005)*; *Cross v. Pac. Coast Plaza Invs., L.P., No. 6 CV 2543 JM (RBB), 2007 U.S. Dist. LEXIS 16138, 2007 WL 951772, at *1 (S.D. Cal. Mar. 6, 2007)*. To adjudicate the facial challenge, the Court assumes the truth of the allegations in the complaint and draws all reasonable inferences in favor of the plaintiff. **[**53]** *Whisnant, 400 F.3d at 1177*; *Wolfe v. Strankman, 392 F.3d 358, 362 (9th Cir. 2004)*.

II. *Rule 12(b)(6)*

HN3[] *Federal Rule of Civil Procedure 12(b)(6)* permits a party to raise by motion the defense that the complaint "fail[s] to state a claim upon which relief can be granted," generally referred to as a motion to dismiss. The Court evaluates whether a complaint states a cognizable legal theory and sufficient facts in light of *Federal Rule of Civil Procedure 8(a)*, which requires a "short and plain statement of the claim showing that the pleader is entitled to relief." Although *Rule 8* "does not require 'detailed factual allegations,' . . . it [does] demand more than an unadorned, the-defendant-unlawfully-harmed-me accusation." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. In other words, "a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (citing *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986))*. A complaint will not suffice "if it tenders 'naked assertion[s]' devoid of 'further factual enhancement.'" *Iqbal, 556 U.S. at 677* (citing *Twombly, 550 U.S. at 557*).

HN4[] In order to survive a motion to dismiss, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Id.* (quoting Twombly, 550 U.S. at 570); *see also* Fed. R. Civ. P. 12(b)(6). A claim is facially plausible when the facts pled "allow the court to draw the reasonable **[**54]** inference that the defendant is liable for the misconduct alleged." Iqbal, 556 U.S. at 677 (citing Twombly, 550 U.S. at 556). That is not to say that the claim must be probable, but there must be "more than a sheer possibility that a defendant has acted unlawfully." *Id.* Facts "'merely consistent with' a defendant's liability" fall short of a plausible entitlement to relief. *Id.* (quoting Twombly, 550 U.S. at 557). Further, the Court need not accept as true "legal conclusions" contained in the complaint. *Id.* This review requires context-specific analysis involving the Court's "judicial experience and common sense." Id. at 678 (citation omitted). "[W]here the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged—but it has not 'show[n]'—'that the pleader is entitled to relief.'" *Id.*

Where a complaint does not survive 12(b)(6) analysis, the Court will grant leave to amend unless it determines that no modified contention "consistent with the **[*1089]** challenged pleading . . . [will] cure the deficiency." DeSoto v. Yellow Freight Sys., Inc., 957 F.2d 655, 658 (9th Cir. 1992) (quoting Schreiber Distrib. Co. v. Serv-Well Furniture Co., 806 F.2d 1393, 1401 (9th Cir. 1986)).

ANALYSIS

I. The Cherokee Nation's Standing to Bring a *Parens Patriae* Action

Plaintiff brings its claims as *parens patriae* on behalf of its citizens harmed by Defendants' alleged conduct. Defendants **[**55]** challenge Plaintiff's standing to bring a *parens patriae* civil action. HN5[] Article III of the Constitution vests federal courts with the authority to hear "Cases" and "Controversies." U.S. Const., art. III, § 2. "Standing to sue is a doctrine rooted in the traditional understanding of a case or controversy." Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016), *as revised* (May 24, 2016). "The doctrine limits the category of litigants empowered to maintain a lawsuit in federal court to seek redress for a legal wrong." *Id.* (citations omitted). "[S]tanding jurisprudence contains two strands: Article III standing, which enforces the Constitution's case-or-controversy requirement, and prudential standing,[2] which embodies judicially self-imposed limits on the exercise of federal jurisdiction." Elk Grove Unified Sch. Dist. v. Newdow, 542 U.S. 1, 11, 124 S. Ct. 2301, 159 L. Ed. 2d 98 (2004) (citation omitted), *abrogated on other grounds by* Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014).

HN6[] One particular aspect of the standing doctrine is *parens patriae*[3] standing. States or Indian nations asserting *parens patriae* standing must establish Article III standing and meet the "unique requirements" of the *parens patriae* doctrine. Missouri ex rel. Koster v. Harris, 847 F.3d 646, 651 (9th Cir. 2017) (citing Table Bluff Reservation (Wiyot Tribe) v. Philip Morris, Inc., 256 F.3d 879, 885 (9th Cir. 2001)). Generally, there are two elements to establish standing to bring a *parens patriae* claim. First, "the State must articulate an interest apart from the interests of particular private parties, *i.e.*, the State must be **[**56]** more than a nominal party." Id. (quoting Alfred L. Snapp & Son, Inc. v. Puerto Rico ex rel. Barez, 458 U.S. 592, 607, 102 S. Ct. 3260, 73 L. Ed. 2d 995

---

[2] Prudential standing is not derived from Article III and encompasses at least three broad principles: "the general prohibition on a litigant's raising another person's legal rights, the rule barring adjudication of generalized grievances more appropriately addressed in the representative branches, and the requirement that a plaintiff's complaint fall within the zone of interests protected by the law invoked." Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 134 S. Ct. 1377, 1386, 188 L. Ed. 2d 392 (2014) (quoting Elk Grove Unified Sch. Dist. v. Newdow, 542 U.S. 1, 12, 124 S. Ct. 2301, 159 L. Ed. 2d 98 (2004)).

[3] "*Parens patriae* means literally 'parent of the country.'" Alfred L. Snapp & Son, Inc. v. Puerto Rico, ex rel., Barez, 458 U.S. 592, 600, 102 S. Ct. 3260, 73 L. Ed. 2d 995 (1982) (footnote omitted).

(1982) ("*Snapp*")). Second, "[t]he State must express a quasisovereign interest." *Id.* (alteration in original) (quoting Snapp, 458 U.S. at 607).

A. Parties' Arguments

Defendants advance three arguments why Plaintiff does not have *parens patriae* standing.[4] First, the Cherokee **[*1090]** Nation does not have a quasi-sovereign interest because the alleged price fixing at issue in this case does not have anything to do with the health, safety, or welfare of the Cherokee Nation, nor is there sufficient allegations concerning protecting the Cherokee Nation's economy. (*See* MTD 15-16.)[5] Second, Defendants contend that the Cherokee Nation cannot assert *parens patriae* claims under the law of other states because it cannot bring claims under those states' laws. (*See id.* at 17.) Third, the Cherokee Nation has not alleged injury to a substantial segment of their population. (*See id.* at 17-18.)

Plaintiff contends that it does not need to meet the two requirements—interest apart from private parties and quasi-sovereign interest—for *parens patriae* standing. (Opp'n 17.) Instead, Plaintiff argues that the Cherokee Constitution and Cherokee Code creates **[**57]** the requisite *parens patriae* standing. (*Id.* (citing 51 CNCA § 105.B.14 (2015); 12 CNCA § 13); and *Washington v. Chimei Innolux Corp., 659 F.3d 842, 847 (9th Cir. 2011))*.) Plaintiff also contends that the Clayton Act provides statutory *parens patriae* authority and therefore does not require it to assert "quasi-sovereign or proprietary interests." (*Id.* at 19 (quoting *Pennsylvania v. Mid-Atl. Toyota Distribs., Inc., 704 F.2d 125, 129-30, 132 (4th Cir. 1983))*.) Instead, Plaintiff cites *Burch v. Goodyear Tire & Rubber Co., 554 F.2d 633, 635 (4th Cir. 1977)*, for the proposition that its Attorney General has authority to bring a *parens patriae* claim under federal ***antitrust law*** for non-monetary relief. (Opp'n 18.)

In the alternative, Plaintiff states that it has alleged the requisite harm to its population, as well as expressed a quasi-sovereign interest in the economic well-being of its citizens. (*Id. at 18* (citing FAC ¶¶ 10, 340, 350, 355, 360, 365, 370, 376; and *New York ex rel. Spitzer v. Saint Francis Hosp., 94 F. Supp. 2d 399, 420 (S.D.N.Y. 2000))*.)

In reply, Defendants argue Plaintiff confuses Article III standing with statutory standing. (Reply 5.) Defendants assert that *Snapp*'s *parens patriae* requirements reflect Article III standing requirements, rather than requirements that can be replaced by Congress. (*Id.*) They would distinguish Plaintiff's cases; *Chimei Innolux* required a quasisovereign interest, despite Plaintiff's characterization of *Chimei Innolux* as relieving Plaintiff of such a requirement. (*See id.* at 5-6.) Next, *Burch* only stands for **[**58]** the proposition that state attorneys general have authority to proceed *parens patriae* in suits for injunctive relief under *section 16 of the Clayton Act*, but does not relieve them of the *parens* ***[*1091]*** *patriae* requirements. (*Id.* at 6.) Finally, Defendants contend that *Mid-Atlantic Toyota* is distinguishable solely because it is a 35-year-old out-of-circuit case that is contrary to binding authority. (*Id.*) Defendants reiterate their earlier position that *Snapp* applies and Plaintiff cannot meet the *Snapp* requirements. (*See id.* at 6-7.)

---

[4] Defendants also contend that Plaintiff fails to meet the Article III standing requirements to the extent that the Cherokee Nation purchased tuna in its proprietary capacity. (MTD 18-19.) Plaintiff's Opposition brief does not discuss proprietary standing. (*See generally* Opp'n.) At oral argument, Plaintiff cited paragraphs 339, 344, 354, 364, 369, and 376 of its amended Complaint, which address the purported harm to Cherokee businesses. (*See* ECF No. 1321, at 18.) These paragraphs state the following allegation: "Plaintiff purchased Packaged Tuna within the State of California," (FAC ¶ 339), but change each state in each cause of action, e.g., "Plaintiff purchased Packaged Tuna within the State of Kansas," (id. ¶ 344). These allegations provide no factual detail beyond such conclusory and vague statements. Furthermore, proprietary standing is appropriate when a state itself has proprietary interests, such as "own[ing] land or participat[ing] in a business venture." *Snapp, 458 U.S. at 602*. Plaintiff has not alleged any facts that, for example, the Cherokee Nation itself participated in any business venture harmed by Defendants' conduct. Therefore, Plaintiff's proprietary claims must fail. To the extent Plaintiff's vague allegations constitute proprietary causes of action the Court **GRANTS IN PART** Defendants' motion and **DISMISSES WITHOUT PREJUDICE** those claims.

[5] Pin citations to docketed material refer to the CM/ECF page numbers electronically stamped at the top of each page.

A. Parens Patriae *Standing Under the Antitrust Improvements Act*

The parties differ sharply on whether Plaintiff's *parens patriae* standing requirements are constitutional or prudential. ***HN7***[] If the requirements are prudential then Congress generally can expand standing to reach the full limits of Article III. *See Gladstone, Realtors v. Vill. of Bellwood, 441 U.S. 91, 100, 99 S. Ct. 1601, 60 L. Ed. 2d 66 (1979)* (citing *Warth v. Seldin, 422 U.S. 490, 501, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975))*. Thus, if Congress has modified the standing requirements then Plaintiff would no longer need to meet the *parens patriae* standing test articulated by the Supreme Court in *Snapp*. For reasons discussed in more depth below the line,[6] the Court assumes without deciding that *parens patriae* standing is prudential and not constitutional. The Court makes this assumption because, as will **[**59]** be seen, Plaintiff cannot meet the applicable prudential standing requirements for the various causes of action alleged. Plaintiff argues two sources of authority extend its standing to the fullest extent of Article III: the *Hart-Scott-Rodino Antitrust Improvements Act of 1976* and Cherokee Nation law. The Court discusses each in turn.

In 1976, Congress passed and President Ford signed into law the Hart-Scott-Rodino Antitrust Improvements Act, 90 Stat. 1394, *15 U.S.C. § 15c et seq.* ***HN9***[] The Act created a new right of action for States under existing federal ***antitrust law***. *Mid-Atl. Toyota Distribs., 704 F.2d at 128* (citing *Reiter v. Sonotone Corp., 442 U.S. 330, 344 n.7, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979))*. The Act provides that an "attorney general of a State[7] may bring a

---

[6] ***HN8***[] Article III and prudential standing are distinct concepts; prudential standing is a judicially crafted doctrine and does not derive from Article III. *See Lexmark Int'l, 134 S. Ct. at 1386* (discussing prudential standing doctrine). Some courts have determined that the *parens patriae* standing requirements are prudential and not rooted in Article III. *See Massachusetts v. EPA, 549 U.S. 497, 540 n.1, 127 S. Ct. 1438, 167 L. Ed. 2d 248 (2007)* (Roberts, C.J., dissenting); *In re Elec. Books Antitrust Litig., 14 F. Supp. 3d 525, 535 (S.D.N.Y. 2014)* ("[S]o long as [the States] have shown they have standing under Article III, the standing inquiry is at an end."); *New York v. Microsoft Corp., 209 F. Supp. 2d 132, 149 (D.D.C. 2002)*.

On the other hand, Defendants direct the Court to dicta in *Snapp* where the Supreme Court stated, "[f]ormulated so broadly, the concept [of quasi-sovereign interest] risks being too vague to survive the standing requirements of Art. III: A quasi sovereign interest must be sufficiently concrete to create an actual controversy between the State and the defendant." *458 U.S. at 602*. This might suggest that *parens patriae* is rooted in Article III, but the language does not clearly hold that *parens patriae* is a constitutional consideration. Given the Supreme Court's language and this Court's finding that Plaintiff is not bringing a claim under the statutory *parens patriae* section, *15 U.S.C. § 15c*, it is sufficient to assume without deciding that *parens patriae* standing is prudential, not constitutional in nature.

[7] One issue mentioned in the parties' footnotes is whether the Nation's Attorney General falls within the definition of State attorney general for purposes of *§ 15c*. The definition section, *15 U.S.C. § 15g*, defines "State attorney general" as the "chief legal officer of a State." *§ 15g(1)*. The statute then defines "State" as a "State, the District of Columbia, the Commonwealth of Puerto Rico, and any other territory or possession of the United States." *§ 15g(2)*. The statute does not explicitly mention Indian nations. Plaintiff directs the Court to an unreported district court opinion for the proposition that the United States holds title to the land in trust on behalf of the Cherokee Nation and therefore the Nation should be considered a possession of the United States. (Opp'n 18 n.9 (citing *Buzzard v. Okla. Tax Comm'n, 1992 U.S. Dist. LEXIS 22864, at *7-8 (N.D. Okla. Mar. 3, 1992))*.)

The Court is not persuaded that holding title to land translates to the Cherokee Nation being a possession under the federal antitrust statute. In *Wilson v. Marchington*, the Ninth Circuit discussed two Supreme Court decisions relating to whether Indian nations are territories or possession—the cases have diverging conclusions. *See 127 F.3d 805 (9th Cir. 1997)*. In *United States ex rel. Mackey v. Coxe, 59 U.S. (18 How.) 100, 103-04, 15 L. Ed. 299 (1855)*, the Supreme Court "held the Cherokee nation was a territory as that term was used in a federal letters of administration statute." *Wilson, 127 F.3d at 808*. By contrast, in *New York ex rel. Kopel v. Bingham, 211 U.S. 468, 474-75, 29 S. Ct. 190, 53 L. Ed. 286 (1909)*, the Court cited with approval a district court opinion that held the Cherokee Nation was not a "territory" under the federal extradition statute. *Wilson, 127 F.3d at 808*. In *Wilson*, the Ninth Circuit declined to extend full faith and credit to tribal court decisions because the court construed the term "territory or possession of the United States" in *28 U.S.C. § 1738* to not include Indian tribes. *Id. at 809*. At oral argument, Plaintiff maintained that *Coxe* is on point for the issue whether the Cherokee Nation is a territory or possession. (ECF No. 1321, civil **[*1092]** action in the name of such State, as parens patriae on behalf of natural persons residing in such State, in any district court of the United States having jurisdiction of the defendant, to secure *monetary relief* as provided in this section for injury sustained by such natural persons to their property by reason of any violation of *sections 1 to 7* of this title." *15 U.S.C. § 15c(a)(1)* (emphasis added).

HN10[] Thus, Congress has expressly authorized state attorneys general to bring suit under **[**60]** the Antitrust Improvements Act and Plaintiff need not demonstrate prudential standing, so long as it brings a claim for monetary relief under *§ 15c*. But here is the critical point: Plaintiff does not bring an action under *§ 15c*. Its amended Complaint clearly states that it only seeks injunctive relief under the Sherman Act, (FAC ¶ 252); *§ 15c* only allows monetary relief. To the extent it seeks monetary relief, Plaintiff does so under Cherokee Nation law. (*Id.*, Prayer for Relief, ¶ b.) Logically, Plaintiff cannot rely on *§ 15c* to provide standing when it has no claim under that section.

Nonetheless, the Nation argues that the Antitrust Improvements Act, codified in *§ 15c*, provides standing to bring a non-monetary, i.e., injunctive, relief claim. (*See* Opp'n 18-19.) Plaintiff's reading of the law in incorrect. ***HN11***[] The Antitrust Improvements Act did not amend *section 16 of the Clayton Act*, codified at *15 U.S.C. § 26*, which provides a private cause of action for injunctive relief. The plain language of the *§ 15c* only mentions monetary—not injunctive—relief. *Section 15c* only created a new procedural means—the *parens patriae* civil action—through which a State could enforce already existing rights of recovery under *section 4* of the Clayton Act. *See Ill. Brick v. Illinois, 431 U.S. 720, 733 n.14, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*.

Plaintiff cites dicta **[**61]** in *Burch*, where the Fourth Circuit said that "the congressional intent regarding the Hart-Scott-Rodino Antitrust Improvements Act of 1976 disclosed congressional recognition that state attorneys general suing as parens patriae clearly have standing to seek injunctive relief under *Section 16* of the Clayton Act." *554 F.2d at 635* (citations omitted). The **[*1093]** *Burch* court's statement did not hold that *§ 15c* extends to injunctive relief, but merely recognized that the Supreme Court already allowed *parens patriae* actions for injunctive relief under *section 16*, *id. at 635 n.3* (citing *Georgia v. Pennsylvania R. Co., 324 U.S. 439, 65 S. Ct. 716, 89 L. Ed. 1051 (1945))*, and the Act did not disturb the Supreme Court's holding. Thus, the Antitrust Improvement Act, *15 U.S.C. § 15c*, does not supply the requisite standing for Plaintiff to request injunctive relief.

B. Parens Patriae *Standing Under Cherokee Nation Law*

The Cherokee Nation advances a second ground by which it has standing to assert a *parens patriae* action under both federal and state law without meeting the *Snapp* test. It argues that the Nation's Attorney General has authority to initiate a civil action on behalf of the citizens of the Cherokee Nation under 51 CNCA § 105.B.2[8] and under the Cherokee Constitution, Article VII, § 13, which authorizes the Attorney General to represent the Nation in all civil actions "wherein the Cherokee **[**62]** Nation is named as a party." (Opp'n 17.) Plaintiff also argues the Cherokee Nation Attorney General has standing to bring a *parens patriae* civil action under the laws of other states. (*Id.* at 31.) ***HN12***[] To that end, recently enacted Cherokee Nation law provides that:

---

at 14.) *Coxe*'s applicability to the federal antitrust statute is far from certain, especially in light of the reasoning in *Bingham* and *Wilson*.

The Court notes that should Plaintiff amend its complaint to rely on *15 U.S.C. § 15c* it will likely need to more thoroughly discuss this issue. Because Plaintiff does not explicitly rely on *§ 15c*, the Court will proceed with its analysis, assuming that Plaintiff could eventually demonstrate it has standing under *§ 15c*.

[8] Plaintiff's Opposition brief cites to 12 CNCA § 13 and 51 CNCA § 105.B.14 as providing the requisite statutory standing. These citations to the Cherokee Nation Code do not appear to be correct. For example, 12 CNCA § 13 concerns the tolling of the limitations period for minors or incompetents. 51 CNCA § 105.B.14 provides the Attorney General with authorization to prosecute all civil and criminal actions against or within the jurisdiction of the Cherokee Nation. The Court believes title 51, section 105.B.2 is the appropriate citation, which authorizes the Attorney General to "initiate or appear . . . in any action in which the interests of the Nation or the People of the Nation are at issue." If Plaintiff cites Cherokee Nation Code going forward in this litigation, it should provide a copy of the relevant section, either by reference or judicial notice, for the Court. The Code is not available on the commercial reporters and the Cherokee Nation's website only contains a copy of the Code from 2015.

> The Cherokee Nation Attorney General acting as parens patriae, may bring a civil cause of action in any district court of the United States . . . having jurisdiction over a defendant, to secure monetary or injunctive relief based on any *applicable* federal statute, common law, or the laws of any state.

12 CNCA § 7 (2018) (emphasis added). Similarly, 51 CNCA § 105.B.2 authorizes the Attorney General to "initiate or appear . . . in any action in which the interests of the Nation or the People of the Nation are at issue." Thus, the issue is whether these constitutional and statutory sections allow the Cherokee Nation to displace the general rule articulated in *Snapp*.

The Court reads the foregoing Cherokee Nation provisions as authorizing the Attorney General to bring a suit under *applicable* substantive law, whether federal or state. That is half the equation; the other half is what constitutes "applicable" law. Can the Cherokee Nation Attorney General bring suit **[**63]** as if he is the Kansas attorney general simply because Cherokee Nation law authorizes parens patriae but the Kansas legislature does not explicitly do so? Plaintiff cites no authority for such a proposition. The proper inquiry is whether the Nation's Attorney General is within the scope of the cause of action authorized by Congress or a state legislature. *See D.R. Ward Constr. Co. v. Rohm & Haas Co., 470 F. Supp. 2d 485, 495 (E.D. Pa. 2006)* (noting that ***HN13***[] "the concept of prudential standing in the antitrust context is intertwined with the substantive content of and **[*1094]** intent behind the particular statute authorizing the cause of action").

In sum, it is not enough that Cherokee Nation law authorizes the Attorney General to bring suit; the Nation must also demonstrate that it meets the prudential standing requirements of the state or federal substantive law in question, i.e., that it is within the class of persons who can sue under a statute. The Court will shortly discuss Plaintiff's standing under *section 16* of the Clayton Act, *see infra* section I.C, to request declaratory relief, *see infra* section I.D, and standing under various state substantive law, *see infra* section II.

C. Parens Patriae *Standing Under Section 16 of the Clayton Act*

Plaintiff's amended Complaint seeks injunctive relief **[**64]** for violation of *section 1* of the Sherman Act. (FAC ¶ 252.) ***HN14***[] Injunctive relief is governed by *section 16* of the Clayton Act, which provides "[a]ny person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*.

1. The Parties' Arguments

Defendants state that Plaintiff's only federal claim is for an injunction under the Sherman Act. (MTD 22 (citing FAC Prayer for Relief, ¶ d; *id.* ¶¶ 247-52).) Defendants contend that Plaintiff has failed to state a claim such that the Court does not have subject matter jurisdiction. Defendants also point out that this Court previously dismissed identical claims made by other plaintiffs in this MDL for failing to "plead facts that plausibly establish the continuing risk of threatened injury." (*Id.* (citing *In re Packaged Seafood Prods. Antitrust Litig., No. 15-2670, 2017 U.S. Dist. LEXIS 1279, 2017 WL 35571, at *12 (S.D. Cal. Jan. 3, 2017)*; and *In re Packaged Seafood Prods. Antitrust Litig., 277 F. Supp. 3d 1167, 1176 (S.D. Cal. 2017))*.) They argue that Plaintiff, like the plaintiffs in the previous orders, have pleaded no facts supporting an ongoing conspiracy and to the extent Plaintiff has pleaded facts, the facts are inconsistent with an ongoing conspiracy or any real or immediate threat of harm in the future. (*Id.* at 11-12 (citing **[**65]** FAC ¶¶ 2, 252).) Defendants conclude that Plaintiff's sole federal claim is defective and urge the Court to dismiss the entire complaint for lack of subject matter jurisdiction. (*Id.* at 12.)

HN15[] Plaintiff argues that jurisdictional dismissal is warranted only "where the alleged claim under the Constitution or federal statutes clearly appears to be immaterial and made solely for the purpose of obtaining jurisdiction or where such a claim is wholly insubstantial and frivolous." (Opp'n 12 (quoting *Bell v. Hood, 327 U.S. 678, 682-83, 66 S. Ct. 773, 90 L. Ed. 939 (1946))*.) Plaintiff would apply *Hood* in this case because the Court's prior rulings determined that claims similar to Plaintiff's claims were not frivolous. (*Id. at 13* (citing ECF Nos. 283, 295, 492).) Plaintiff advances a second argument; that injunctive relief is appropriate to eliminate the "lingering effects" of illegal conduct. (*Id.* (quoting *In re Multidistrict Vehicle Air Pollution, 538 F.2d at 234*).) Plaintiff avers that this Court's previous rulings should not apply here because Plaintiff has plausibly alleged lingering effects from which Defendants continue to benefit. (*Id.* (citing FAC ¶¶ 131-33).)

Defendants respond that they only seek dismissal of Plaintiff's injunctive relief claim because the Nation fails to plead facts to support a claim. (Reply 2.) That is, they **[*1095]** do **[**66]** not seek dismissal on jurisdictional grounds; thus *Bell v. Hood* and its progeny are inapplicable. (*Id.*)

2. Parens Patriae *Standing for Injunctive Relief*

Thus far in the analysis, Plaintiff's federal antitrust claim has not cleared the first hurdle—standing. Is *§ 15c* sufficient to confer standing for injunctive relief? The answer is no. Does Cherokee Nation law confer standing: yes, but only if the substantive law in question, state or federal, allows standing by a *parens patriae* plaintiff. This section deals with the question of whether Plaintiff may proceed with a federal antitrust injunctive relief claim under *parens patriae* standing.

HN16[] The Supreme Court's decisions, in particular *Georgia v. Pennsylvania Railroad* and *Snapp*, demonstrate that a *parens patriae* plaintiff must meet the two-part test outlined in *Snapp*. In *Pennsylvania Railroad*, the state of Georgia alleged that twenty railroad companies conspired to fix freight rates in violation of federal antitrust laws. *See 324 U.S. at 443-44*. Georgia brought suit in its capacity as quasi-sovereign, i.e., *parens patriae*, and in its proprietary capacity seeking both damages and injunctive relief. *Id. at 443*. The Supreme Court surveyed the relevant authority to determine **[**67]** whether Georgia could maintain the action under the Court's original jurisdiction. *See id. at 447-50* (citing, e.g., *Pennsylvania v. West Virginia, 262 U.S. 553, 43 S. Ct. 658, 67 L. Ed. 1117, 1 Ohio Law Abs. 627 (1923)*; *Georgia v. Tenn. Copper Co., 206 U.S. 230, 27 S. Ct. 618, 51 L. Ed. 1038 (1907)*; and *Kansas v. Colorado, 206 U.S. 46, 27 S. Ct. 655, 51 L. Ed. 956 (1907))*. The Court held that "Georgia may maintain this suit as parens patriae acting on behalf of her citizens." *Id. at 450*. And, the Court also determined that Georgia stated a claim for injunctive relief under *section 16* of the Clayton Act. *See id. at 460-62*.

More than thirty years later, the Court revisited the requirements for *parens patriae* in *Snapp*. The question presented was whether Puerto Rico could maintain a *parens patriae* action seeking injunctive and declaratory relief based on harm to migrant workers who had been recruited to work an apple harvest in the continental United States. *See Snapp, 458 U.S. at 597-99*. The Court again reviewed the line of cases permitting a *parens patriae* action, focusing on the same authorities discussed in *Pennsylvania Railroad*, as well as the holding of *Pennsylvania Railroad* itself. *See id. at 600-06*. The conclusion is worth quoting:

> ***HN17***[] This summary of the case law involving *parens patriae* actions leads to the following conclusions. In order to maintain such an action, the State must articulate an interest apart from the interests of particular private parties, *i.e.*, the State must be more than a nominal party. **[**68]** The State must express a quasi-sovereign interest.

Id. at 607. The upshot of *Pennsylvania Railroad, Snapp*, and similar cases is clear; where a sovereign seeks to maintain a *parens patriae* action under *section 16* of the Clayton Act, it must meet the requirements outlined in *Snapp*.

This view was implicitly recognized by a district court considering similar issues in *New York v. Microsoft Corp., 209 F. Supp. 2d 132 (D.D.C. 2002)*. There, the United States and several individual States filed suit against Microsoft alleging antitrust violations. *Id. at 136*. Microsoft argued that the States did not meet the standing requirements under *section 16* of the Clayton Act to bring a *parens patriae* action. *Id. at 150*. In making this argument, Microsoft proposed a rule that a **[*1096]** state alleging a *parens patriae* action must establish it is seeking to remedy some state-specific injury and must distinguish the injury to its citizenry from the injury shared in common by all citizens of the United States. *Id. at 151*. The court rejected this proposed rule relying on *Snapp* and *Pennsylvania Railroad. Id.*

Instead, the court found the plaintiff States had standing because they had proven a significant harm to their citizens:

> It cannot, therefore, be said that this is a case where the "primary thrust of an alleged wrong is injury to a **[**69]** narrowly limited class of individuals, and the harm to the economy as a whole is insignificant by comparison." At a minimum, this is a case where "the direct impact of the alleged wrong [is] felt by a substantial majority, though less than all, of the state's citizens, so that the suit can be said to be for the benefit of the public."

Id. at 152 (alteration in original) (quoting *Pennsylvania ex rel. Shapp v. Kleppe, 533 F.2d 668, 675, 174 U.S. App. D.C. 441 (D.C. Cir. 1976))*.

This Court sees no reason to depart from the general rule articulated in *Snapp*. ***HN18***[] Plaintiff must demonstrate the *parens patriae* standing requirements outlined in *Snapp* to bring a *section 16* claim.

3. Applying Snapp's *Framework to Plaintiff's Amended Complaint*

HN19[] Because *section 16* does not explicitly confer Plaintiff standing to bring an injunctive relief claim, Plaintiff must demonstrate it meets the standing requirements outlined by the Supreme Court in *Snapp. See 458 U.S. at 607*. Defendants argue that the Cherokee Nation has not alleged injury to a sufficiently substantial segment of its population. (MTD 17.) Plaintiff argues that it has sufficiently alleged a quasi-sovereign interest in the economic well-being of its citizens and has alleged such harm to its population. (Opp'n 18.)

HN20[] The Court agrees with Defendants. While the Supreme Court "has not attempted **[**70]** to draw any definitive limits on the proportion of the population of the State that must be adversely affected by the challenged behavior," the Court does require that "more must be alleged than injury to an identifiable group of individual residents." *Snapp, 458 U.S. at 607*. Plaintiff's amended Complaint alleges that its citizens, "indirect purchasers of Packaged Tuna, have overpaid for Packaged Tuna as a direct result of Defendants' conspiracy and conduct." (FAC ¶ 10; *see also id.* ¶ 340 ("Defendants unlawfully overcharged end payers, who made purchases of Defendants' Packaged Tuna in California at prices that were more than they would have been but for Defendants' actions); ¶¶ 345, 350, 355, 365, 370, 376 (copying allegation in paragraph 340 and changing the name of the relevant state).) The allegations do not describe in any further depth the proportion or magnitude of the injury to the Cherokee Nation.

One could imagine a case where the line between a significant proportion and an insignificant proportion of a population is a close call. This is not one of those cases. The Court cannot adjudicate whether Plaintiff has alleged injury to a *significant* proportion of its population because Plaintiff has **[**71]** not alleged facts about *any* proportion of its population. Rather, Plaintiff states, in conclusory fashion, that its citizens "have overpaid for Packaged Tuna." (*Id.* ¶ 10.) In an effort to fend off this conclusion, Plaintiff argues that it cannot allege with more specificity the magnitude of the injury or the number of citizens injured because of Defendants' fraudulent concealment of their anticompetitive scheme. (Opp'n 18 n.8 (citing FAC ¶¶ 231-46).) Those fraudulent concealment allegations concern actions by Defendants to conceal their own activities; such activities **[*1097]** do not prevent Plaintiff from gathering and alleging information about its own population. If Plaintiff cannot explain how Defendants have injured a significant portion of the Cherokee Nation then perhaps the proper recourse is for individual consumers to join putative class actions against Defendants or bring their own claims.

By way of comparison, in the *Microsoft* case, the district court found that "millions of citizens of, and hundreds, if not thousands, of enterprises in each of the United States and the District of Columbia utilize PCs running on Microsoft software." *209 F. Supp. 2d at 152* (quoting *United States v. Microsoft Corp., 87 F. Supp. 2d 30, 55 (D.D.C. 2000))*. The court went on to state, "[a]t **[**72]** a minimum, this is a case where 'the direct impact of the alleged wrong [is] felt by a substantial majority, though less than all, of the state's citizens, so that the suit can be said to be for the benefit of the public.'" *Id.* (second alteration in original) (quoting *Kleppe, 533 F.2d at 675*). Here, we do not have similar information that would demonstrate injury to the Cherokee Nation's citizens.

The Court does not determine whether Plaintiff has a quasi-sovereign interest because Plaintiff's amended Complaint fails the first element of the *Snapp* standing test. The Court finds Plaintiff fails to meet its burden to demonstrate it has standing to bring an injunctive relief claim under federal ***antitrust law***.

D*. Parens Patriae *Standing Under the Declaratory Relief Act

Plaintiff also contends that this Court has jurisdiction to hear its claims under the Sherman Act because it seeks declaratory relief. (Opp'n 13 (citing FAC Prayer for Relief ¶ a).) To that end, Plaintiff cites several cases where courts have held that a declaratory relief action under the Sherman Act is sufficient to provide federal question jurisdiction. (*Id.* at 14 (citing, e.g., *S. Side Theatres, Inc. v. United W. Coast Theatres Corp., 178 F.2d 648, 651 (9th Cir. 1949)*).) Plaintiff urges the Court to find subject matter jurisdiction based on **[**73]** its declaratory relief claim.

Defendants respond that a declaratory relief claim must satisfy Article III's standing requirements. (Reply 2 (citing, e.g., *Thomas v. Anchorage Equal Rights Comm'n, 220 F.3d 1134, 1138 (9th Cir. 2000)* (en banc)).) They assert Plaintiff does not meet the requirement because Plaintiff fails to plead an ongoing conspiracy and the cases Plaintiff cites all involved a party to an ongoing agreement. (*Id.* at 2-3.) Defendants also contend that Article III requires ripeness and a declaratory action must raise "a substantial controversy, ... of sufficient immediacy and reality to warrant the issuance of a declaratory judgment." (*Id.* at 3 (emphasis omitted) (quoting *In re Coleman, 560 F.3d 1000, 1005 (9th Cir. 2009)*).) Defendants argue that Plaintiff has not plead immediacy here because the amended Complaint does not plausibly plead an ongoing conspiracy. (*See id.*)

HN21[] A court may grant declaratory relief "[i]n a case of actual controversy within its jurisdiction." *28 U.S.C. § 2201(a)*. Accordingly, a district court must determine at the outset whether the parties have presented an actual case or controversy within the court's jurisdiction. *Principal Life Ins. Co. v. Robinson, 394 F.3d 665, 669 (9th Cir. 2005)*. The Declaratory Judgment Act is a "procedural device only; it does not confer an independent basis of jurisdiction on the federal court." *Guaranty Nat'l Ins. Co. v. Gates, 916 F.2d 508, 511 (9th Cir. 1990)* (citing, e.g., *Skelly Oil Co. v. Phillips Petroleum Co., 339 U.S. 667, 671-72, 70 S. Ct. 876, 94 L. Ed. 1194 (1950)*). "A declaratory judgment action **[**74]** may be entertained in federal court only if **[*1098]** the coercive action that would have been necessary, absent the declaratory judgment procedure, could have been heard in a federal court." *Id.*; *see also Morongo Band of Mission Indians v. Cal. State Bd. of Equalization, 858 F.2d 1376 1382-83 (9th Cir. 1988)* ("The *Declaratory Judgment Act* merely creates a remedy in cases otherwise within the court's jurisdiction; it does not constitute an independent basis for jurisdiction." (citing *Fiedler v. Clark, 714 F.2d 77, 79 (9th Cir. 1983)* (per curiam)).

HN22[] Declaratory relief is a remedy and does not modify standing requirements. In order for Plaintiff to seek declaratory relief, it must still meet the *parens patriae* requirements outlined in *Snapp*. Indeed, the respondent in *Snapp* "sought declaratory relief with respect to the past practices of petitioners" and the Court applied the two-part test to the declaratory relief claim. *458 U.S. at 598-99*. As previously discussed, Plaintiff has not alleged an interest apart from the interest of private parties. *See id. at 607*; *supra* section I.C.3. Thus, Plaintiff does not have standing under the Sherman and Clayton Acts, as currently pled.

The Court finds that Plaintiff does not have standing to seek declaratory relief. Plaintiff has no basis for standing under the Sherman Act. Accordingly, the Court **GRANTS IN PART** Defendants' Motion and **[**75] DISMISSES WITHOUT PREJUDICE** Plaintiff's first cause of action under the Sherman Act.

E*. Parens Patriae *Standing Under Laws of Other States

Plaintiff brings substantive claims not just under *15 U.S.C. § 1*, but also under the laws of several states, including California, Kansas, Arizona, Colorado, New Mexico, Oklahoma, Florida and the Cherokee Nation's own laws. This raises, as previously discussed, the issue of whether the Cherokee Nation's Attorney General needs authorization to bring a *parens patriae* claim under the laws of other states. The Court briefly discusses the relevance of this section; Plaintiff's sole federal question claim has been dismissed. Therefore, the Court must determine whether to exercise supplemental jurisdiction over Plaintiff's remaining State and Indian law claims. Before doing so, the Court analyzes whether Plaintiff can bring any claim under State law.

Defendants argue that California, Oklahoma, Colorado, and Florida law only allow *parens patriae* actions pursuant to statutory grants of authority and the relevant authority in each state only allows that state's attorney general to bring a claim under state law. (MTD 17.) As to the remaining states—Kansas, Arizona, and New **[**76]** Mexico—Defendants cite *California v. Infineon Technologies AG, 531 F. Supp. 2d 1124, 1165-66 (N.D. Cal. 2007)*, for the proposition that courts dismiss claims under state law when the plaintiff cannot supply state authority that "expressly authorizes" a state attorney general to bring a *parens patriae* claim. (MTD 17.) Defendants contend that the Cherokee Nation cannot point to any such authority. (*Id.*)

As discussed, Plaintiff argues that the Cherokee Nation's Attorney General has statutory authority to bring a *parens patriae* action on behalf of all Nation citizens. (Opp'n 19.) It acknowledges that the Nation does not seek to represent its citizens of other states, but the Nation would represent citizens who reside in other states and hold dual citizenship with both the Cherokee Nation and the state in which they reside. (*Id.* at 20.) Plaintiff advances two arguments concerning *Infineon*. ***HN23***[] First, *Infineon* held that if there is legal authority in a state that expressly authorized a *parens patriae* action, then courts presume **[*1099]** the existence of such authority, and, here, the Cherokee Nation Attorney General has such authorization under Cherokee Nation law. (*Id.* (citing *Infineon, 531 F. Supp. 2d at 1165*); *see also id.* at 31 (citing 12 CNCA § 7).) Second, at oral argument, Plaintiff maintained that *Infineon* does not apply because it was **[**77]** generally discussing *California's Cartwright Act*. (ECF No. 1321, at 16.)

Defendants respond by arguing Plaintiff ignores *Infineon*'s reasoning that prohibits foreign attorneys general from bringing claims under the laws of states that limit parens patriae authority to their own attorneys general. (Reply 5 (citing *Infineon, 531 F. Supp. 2d at 1133, 1140)*.)

1. California

Plaintiff's second cause of action is for violation of the California Cartwright Act, which is the State's antitrust statute. (FAC ¶ 254.) ***HN24***[] The Act specifically authorizes the California Attorney General to bring suit on behalf of the people of California. *See* *Cal. Bus. & Prof. Code § 16760(a)(1)* ("The Attorney General may bring a civil action in the name of the people of the State of California, as parens patriae on behalf of natural persons residing in the state, ..."). As the *Infineon* court observed,

> This provision could not be plainer: where the Attorney General is empowered to bring a damages action seeking relief for violation(s) of the Cartwright Act, it is only the *California* Attorney General who is so empowered, and on behalf of *California* residents only. The out-of-state Attorneys General therefore have no parens patriae authority under the Act.

531 F. Supp. 2d at 1133.

HN25[] The Court agrees with the *Infineon* court; **[**78]** the plain language of the Cartwright Act belies no statutory authorization for a foreign attorney general to bring a *parens patriae* suit under California ***antitrust law***. The plain language of the statute only discusses a singular attorney general, i.e., *the* attorney general. This is different from statutory language that authorizes multiple attorneys general. *Cf*. *15 U.S.C. § 15c* ("Any attorney general of a State . . . ."). Thus, only the California Attorney General can bring suit under *section 16760*.

Plaintiff argues that it is not bringing a claim under *California Business and Profession Code § 16760*, but is instead bringing a claim under *§ 16750(a)*, which supplies a cause of action to "any person" who is injured. (Opp'n 30.) Thus, the Cherokee Nation seeks to represent those persons, living in California, but having dual citizenship with the Cherokee Nation, who would have a cause of action under *§ 16750(a)*.

This is an interesting argument considering dicta in the Supreme Court's opinion in *Standard Oil*, states: "Hawaii plainly qualifies as a person under both sections [4 and 16] of the [Clayton Act], whether it sues in its proprietary capacity or as parens patriae." *405 U.S. at 261* (citing *Pa. R.R., 324 U.S. at 447*). The issue then becomes, does this reasoning extend to California law? The *Infineon* court said no. There, the court **[**79]** reasoned that the California legislature provided a *parens patriae* cause of action in *§ 16760*, which only authorized the California attorney general to bring such a claim. *531 F. Supp. 2d at 1132-33*. This Court thinks such reasoning sound. The California legislature clearly provided a *parens patriae* cause of action under *§ 16760*. It would not make sense for it to create the same cause of action, *sub silentio*, in § 16570. Or, at least, the Court cannot assume the legislature did so without **[*1100]** some authority saying as much, which Plaintiff has not provided. Accordingly, the Court finds Plaintiff has no standing to bring a *parens patriae claim* for violation of the California Cartwright Act.

Plaintiff also brings a cause of action under California's Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200, et seq.* (FAC ¶ 260.) ***HN26***[] Like the Cartwright Act, the Unfair Competition Law authorizes damages "which shall be assessed and recovered in a civil action brought in the name of the people of the State of California by the Attorney General." *Cal. Bus. & Prof. Code § 17206(a)*; *see also* *Cal. Bus. & Prof. Code § 17204* ("Actions for relief pursuant to this chapter shall be prosecuted exclusively in a court of competent jurisdiction by the Attorney General . . . in the name of the people of the State of California . . . ."). For the same reasons **[**80]** as discussed in the Cartwright Act analysis, the Unfair Competition Law does not authorize foreign attorneys general to bring a *parens patriae* suit. Thus, the Court finds Plaintiff has no standing to bring a *parens patriae* claim for violation of the California Unfair Competition law.

Finally, Plaintiff brings a cause of action under California law for "unjust enrichment." (*See* FAC ¶¶ 338-42.) ***HN27***[] "[I]n California, there is not a standalone cause of action for 'unjust enrichment,' which is synonymous with 'restitution.'" *Astiana v. Hain Celestial Grp., Inc., 783 F.3d 753, 762 (9th Cir. 2015)* (citing *Durell v. Sharp Healthcare, 183 Cal. App. 4th 1350, 108 Cal. Rptr. 3d 682, 699 (Ct. App. 2010)*; and *Jogani v. Superior Court, 165 Cal. App. 4th 901, 81 Cal. Rptr. 3d 503, 511 (Ct. App. 2008))*. "Rather, [California courts] describe the theory underlying a claim that a defendant has been unjustly conferred a benefit 'through mistake, fraud, coercion, or request.'" *Id.* (citing 55 Cal. Jur. 3d Restitution § 2). A court may construe an unjust enrichment claim as a quasi-contract claim seeking restitution. *Id.* (citing *Rutherford Holdings, LLC v. Plaza Del Rey, 223 Cal. App. 4th 221, 166 Cal. Rptr. 3d 864, 872 (Ct. App. 2014))*.

HN28[] Because no statute authorizes standing to bring an unjust enrichment claim, Plaintiff must demonstrate it meets the prudential standing requirements outlined by the Supreme Court in *Snapp. See* *458 U.S. at 607* ("[T]he State must articulate an interest apart from the interests of particular private parties, *i.e.*, the State must be more than a nominal party."). **[**81]** The Court previously determined Plaintiff fails to do so and reiterates prior finding here. *See supra* section I.C.3. Accordingly, the Court finds Plaintiff does not have standing to bring a *parens patriae* claim for unjust enrichment under California law.

2. Kansas

Plaintiff's fourth cause of action is for violation of the *Kansas Restraint of Trade Act, Kan. Stat. Ann. § 50-101, et seq.* (FAC ¶ 271.) ***HN29***[] The Act authorizes "[t]he attorney general" to bring an action. *Kan. Stat. Ann. § 50-103(a)*; *see also* *§ 50-109* ("The attorney general shall: (a) Enforce this act throughout the state; . . . ."). The statute does not explicitly authorize a foreign attorney general as evidenced by the use of the term "[t]he attorney general" rather than "an" or "any" attorney general. Plaintiff directs the court to a district court opinion that characterizes *section 50-103* as the "functional equivalent of *parens patriae*." *In re Lorazepam & Clorazepate Antitrust Litig., 205 F.R.D. 369, 386 (D.D.C. 2002)*. Even assuming the district court's characterization of the statute was correct, it provides no help to Plaintiff. In that case, the State of Kansas was a party to the litigation and Kansas law conferred authority on the Kansas attorney general **[*1101]** to bring an action—the opinion did not discuss authorizing a foreign attorney general to bring an action under Kansas law. *See* ***[**82]*** *id.* Thus, the Court finds Plaintiff does not have standing to bring a *parens patriae* claim for violation of the Kansas Restraint of Trade Act.

Plaintiff also argues that Cherokee Nation citizens are persons as defined by the Act, (Opp'n 33 (citing Kan. Stat. Ann. § 50-148)), and its Attorney General can bring suit on their behalf, (*id.* (citing Kan. Stat. Ann. § 50-161(b)). Defendants argue that section 50-148 does not explicitly reference attorneys general and a *parens patriae* action must have some sort of affirmative statutory authorization. (Reply 4-5.)

HN30[] The Court agrees with Defendants. Kansas law allows the Kansas attorney general to bring a representative action. Kan. Stat. Ann. § 50-103. It also allows private parties to assert a private cause of action. § 50-148. It does not follow, however, that a private cause of action allows a foreign attorney general, suing on behalf of a different sovereign, to vindicate the public rights of the Cherokee Nation. *See* Infineon, 531 F. Supp. 2d at 1133 ("[A] parens patriae action is expressly defined as a means for a state to seek redress for wrongs affecting the *public* at large, while a class action is generally a means by which individual *private* rights may be collectively enforced." (citing Standard Oil, 405 U.S. at 257-58)).[9] The Court does not doubt that individual private citizens, residing in Kansas **[**83]** and holding dual Cherokee-Kansan citizenship, could bring an action, but the Court will not bootstrap the statutory language to presume a sovereign entity could bring a public action under the same private provision without express authorization.

Finally, Plaintiff points to a harmonization provision in Kansas law that requires the Act to be "construed in harmony with ruling judicial interpretations of federal **antitrust law** by the United States supreme court." Kan. Stat. Ann. § 50-163(b). Plaintiff argues that although Kansas law does not explicitly contain the words "*parens patriae*" it is appropriate, using the harmonization provision, to allow all types of actions permitted by the Sherman Act. (Opp'n 34 (citing 15 U.S.C. § 15c).) This argument is unpersuasive. Section 15c is a statutory provision, not a "judicial interpretation of federal **antitrust law**." Kan. Stat. Ann. § 50-163(b).

Plaintiff's thirteenth cause of action is for unjust enrichment under Kansas law. (FAC ¶¶ 343-47.) **HN31**[] In Kansas, unjust enrichment is an equitable doctrine, a "modern designation for the older doctrine of quasi-contracts." Haz-Mat Response, Inc. v. Certified Waste Servs. Ltd., 259 Kan. 166, 176, 910 P.2d 839 (1996) (citing Peterson v. Midland Nat'l Bank, 242 Kan. 266, 275, 747 P.2d 159 (1987)). Because unjust enrichment is not statutory, Snapp applies. For reasons stated above, *see supra* section I.C.3, the Court **[**84]** finds Plaintiff cannot meet the prudential *parens patriae* standing requirements for a Kansas unjust enrichment claim.

3. Arizona

Plaintiff's fifth cause of action is for violation of the Arizona Uniform State **[*1102]** Antitrust Act. (FAC ¶ 277.) **HN32**[] The Arizona Uniform State Antitrust Act, Ariz. Rev. Stat. § 44-1401, et seq., provides that "[t]he attorney general . . . may bring an action for appropriate injunctive or other equitable relief and civil penalties . . . in the name of the state for a violation of this article." Ariz. Rev. Stat. § 44-1407. The plain language of the statute references *the* attorney general and authorizes the attorney general to bring suit in the name of *the* state. As with other statutes previously discussed, Arizona law does not authorize a foreign attorney general to bring a *parens patriae* action under Arizona law.

Plaintiff also argues that it could bring a cause of action under section 44-1408, which provides a cause of action to any "person threatened with injury or injured" by a violation of the Act. (Opp'n 36 (quoting Ariz. Rev. Stat. § 44-1408(B)).) The Act elsewhere defines person as "an individual, corporation, business trust, partnership, association or any other legal entity." Ariz. Rev. Stat. § 44-1401. Plaintiff is thus arguing that the Attorney General is bringing a *parens patriae* claim **[**85]** on behalf of those persons who were allegedly harmed. The plain language does not authorize such representative actions. The structure of the statute confirms the plain language. **HN33**[] Section 44-1408(A) allows "[t]he state" to bring an action for appropriate relief and, as previously discussed, section 44-

---

[9] Plaintiff argues that *Infineon* does not address Kansas law and, presumably, is inapplicable. (Opp'n 34 n.21.) Simply because the *Infineon* court did not apply Kansas law does not also mean its reasoning is inapplicable. The fundamental issue at the core of all Plaintiff's state law claims is whether a foreign attorney general can bring a *parens patriae* suit under the law of a state other than the one he represents. Infineon dealt directly with that issue and the Court finds its reasoning sound.

1407 authorizes the Arizona attorney general to bring an action. Thus, the statute provides for public causes of action in *sections 44-1408(A)* and *44-1407* and a private cause of action in *section 44-1408(B)*. Because the structure distinguishes the causes of action, the Arizona legislature likely did not intend to allow a representative type action in a private cause of action. Or, at least, the Court does not make such a finding without authority saying so.

Thus, the Arizona Uniform State Antitrust Act provides no authorization for a foreign attorney general to bring a *parens patriae* suit and the Court finds Plaintiff cannot bring a *parens patriae* claim for violation of the Arizona Uniform State Antitrust Act.

Plaintiff also alleges a cause of action for unjust enrichment under Arizona law. (FAC ¶¶ 348-52.) ***HN34***[] In Arizona, unjust enrichment is a form of restitution to enforce contract rights when there exists no valid contract. *See Murdock-Bryant Constr. v. Pearson, 146 Ariz. 48, 52-53, 703 P.2d 1197 (1985)*. For reasons previously discussed, **[**86]** the Court finds Plaintiff has not alleged sufficient facts for *parens patriae* standing, *see supra* section I.C.3.

4. Colorado

Plaintiff's sixth cause of action is for violation of *section 6-4-104* of the Colorado Antitrust Act of 1992. (FAC ¶ 283.) ***HN35***[] Colorado law explicitly authorizes a *parens patriae* civil action, but only "[t]he attorney general may bring" such an action. *Colo. Rev. Stat. Ann. § 6-4-111(3)(a)*. As was true with the statutes previously discussed, the reference to "[t]he attorney general" means the Colorado attorney general, not foreign attorneys general. Plaintiff contends that Cherokee Nation law authorizes the Cherokee Nation Attorney General to bring an action under Colorado law and the right of the Colorado attorney general should be extended to the Nation's Attorney General. (Opp'n 35.) It is not enough that Cherokee Nation law authorizes the Nation's Attorney General to bring an action under Colorado law; Colorado law must also authorize such a suit. The plain language of the statute does not authorize such an action. The Court finds Plaintiff cannot bring a *parens patriae* action under Colorado ***antitrust law***.

[*1103] Plaintiff's fifteenth cause of action is for unjust enrichment under Colorado law. (FAC ¶¶ 353-57.) ***HN36***[] Unjust enrichment **[**87]** is a judicially-created remedy under Colorado law. *Lewis v. Lewis, 189 P.3d 1134, 1141 (Colo. 2008)*, *as modified on denial of reh'g* (Aug. 18, 2008) (citing *Salzman v. Bachrach, 996 P.2d 1263, 1265 (Colo. 2000))*. Thus, the Court finds Plaintiff has not alleged sufficient facts for *parens patriae* standing, *see supra* section I.C.3.

5. New Mexico

Plaintiff's seventh cause of action is for violation of *section 57-1-1 of the New Mexico Antitrust Act*. (FAC ¶ 289.) ***HN37***[] The Act states "[t]he attorney general may bring an action in the name of the state against any person." *N.M. Stat. Ann. § 57-1-8*. Like the statutes previously discussed, the reference to "[t]he attorney general" means the New Mexico attorney general, not foreign attorneys general. Plaintiff also argues that it can bring a claim on behalf of persons threatened with injury under the New Mexico Antitrust Act. (Opp'n 37 (citing *N.M. Stat. Ann. § 57-1-3(A)*).) Further, *section 57-1-1.2* includes "any governmental or other legal entity with the exception of the state" within its definition of a person. Plaintiff contends that it is a governmental or other legal entity and thus the statute can encompass the Nation's Attorney General. (*Id.* at 37-38.)

This is a novel argument based on the unique language in the New Mexico statute; indeed, no other statute examined in this order mentions any governmental entity. However, **[**88]** a critical distinction should not be overlooked. The Nation's Attorney General, who would qualify as the "governmental entity," is not the party who was injured. It is his fellow Cherokee citizens who are injured and are the "persons" as defined by the Act. Those persons have a cause of action under *section 57-1-3*; the New Mexico attorney general has a cause of action under *section 57-1-8*. No provision or authority demonstrates that a foreign attorney general may use either cause of action. Accordingly, the Court finds Plaintiff cannot bring a *parens patriae* action under the New Mexico Antitrust Act.

Plaintiff's sixteenth cause of action is for unjust enrichment under New Mexico law. (FAC ¶¶ 358-62.) **HN38**[] Under New Mexico law, unjust enrichment is a form of restitution cutting across contract and tort law. *See Hydro Conduit Corp. v. Kemble, 1990- NMSC 061, 110 N.M. 173, 178, 793 P.2d 855 (1990)*. Thus, the Court finds Plaintiff has not alleged sufficient facts for *parens patriae* standing, *see supra* section I.C.3.

6. Oklahoma

Plaintiff's ninth cause of action is for violation of the *Oklahoma Consumer Protection Act*. (FAC ¶ 302.) In its Opposition brief, Plaintiff states that it agrees to withdraw its ninth cause of action. (Opp'n 35.) **HN39**[] Even if the Court were to consider, the Consumer Protection Act, it **[**89]** states "[t]he attorney general or a district attorney may bring an action." *Okla. Stat. Ann. tit. 15, § 756.1(A)*. As with the statutes previously discussed, the reference to "[t]he attorney general" means the Oklahoma attorney general, not foreign attorneys general. The Court finds Plaintiff cannot bring a *parens patriae* action under the Oklahoma Consumer Protection Act.

Plaintiff's eighteenth cause of action is for unjust enrichment under Oklahoma law. (FAC ¶¶ 368-73.) **HN40**[] Oklahoma treats unjust enrichment as an equitable remedy, not based in statute. *See French Energy, Inc. v. Alexander, 1991 OK 106, 818 P.2d 1234, 1237 (Ok. 1991)*. For reasons discussed above, the Court finds Plaintiff has not alleged sufficient facts for *parens patriae* standing, *see supra* section I.C.3.

[*1104] *7. Florida*

Plaintiff's tenth cause of action is for violation of the Florida Deceptive and Unfair Trade Practices Act. (FAC ¶ 314.) **HN41**[] Unlike other states, *Florida's Deceptive and Unfair Trade Practices Act* does not empower the state attorney general; instead, the Act authorizes "[t]he enforcing authority" to bring various remedies. *See Fla. Stat. Ann. § 501.207(1)*. The Act defines "enforcing authority" as either the office of the state attorney or the Department of Legal Affairs depending on the type of violation. *§ 501.203(2)*. Neither of these entities is a government entity **[**90]** outside Florida and the law does not reference language indicative of a *parens patriae* action.

Plaintiff argues, however, that it is availing itself of the section of the Act whereby "anyone aggrieved by a violation of this part may bring an action." (Opp'n 33 (quoting *Fla. Stat. Ann. § 501.211(1)*, *(2)*).) The Nation's Attorney General is not a person who was aggrieved; the individual and private citizens of the Nation, residing in Florida, are the aggrieved persons. As is the theme throughout these state law claims, Plaintiff conflates a *public* action—*parens patriae*—with the *private* causes of action created under state law. Accordingly, the Court finds Plaintiff cannot bring a *parens patriae* action under Florida's unfair trade practices law.

Plaintiff's seventeenth cause of action is for unjust enrichment under Florida law. (FAC ¶¶ 363-67.) **HN42**[] As with other states, Florida treats unjust enrichment as an equitable remedy. *See Henry M. Butler, Inc. v. Trizec Props., Inc., 524 So. 2d 710, 711-12 (Fla. Ct. App. 1988)*. Thus, the Court finds Plaintiff has not alleged sufficient facts for *parens patriae* standing, *see supra* section I.C.3.

F. Standing Conclusion

HN43[] In sum, injunctive relief under federal ***antitrust law*** requires a quasi-sovereign interest and an interest apart from the interests of particular private parties. **[**91]** Plaintiff does not meet this requirement and has no standing under federal law. With respect to Plaintiff's state statutory causes of action, no State explicitly authorizes an out-of-state attorney general to bring an action in a federal court pursuant to out-of-state law. This same observation was made by the court in *Infineon* and Judge Hamilton's reasoning is worth noting:

> Not a single source relied on by plaintiffs expressly provides or even implies that a representative action by an Attorney General may be brought pursuant to *another* state's laws, ... [E]ven the most expansive of the general empowerment statutes relied on by plaintiffs, while recognizing the Attorney General's ability to bring actions in out-of-state courts, stops short of actually authorizing the Attorney General to bring actions in out-of-state jurisdictions *pursuant to* out-of-state laws.

531 F. Supp. 2d at 1139. The same reasoning applies here. Plaintiff's Attorney General does not have *parens patriae* standing to bring claims based on the laws of other states. Simply because citizens of the Cherokee Nation live in other states, the Nation's Attorney General cannot borrow other sovereign State's laws. The Court **GRANTS IN PART** Defendants' **[**92]** Motion and **DISMISSES WITH PREJUDICE** Plaintiff's claims to the extent Plaintiff seeks to bring a *parens patriae* claim under other State's statutory law. The Court **DISMISSES WITHOUT PREJUDICE** Plaintiff's unjust enrichment claims because Plaintiff has not demonstrated prudential standing, but perhaps could amend **[*1105]** its complaint to meet the standing requirements.

II. Supplemental Jurisdiction

The only remaining claims are Plaintiff's eighth and eleventh causes of action for a violation of the Cherokee Nation's Unfair and Deceptive Practices Act, 12 CNCA § 21 *et seq.* and its nineteenth cause of action for unjust enrichment under Cherokee Nation law. (*See* FAC ¶¶ 296, 328, 375.) Neither cause of action arises under federal law. Further, Plaintiff has confirmed that it is not bringing a class action and it has not argued this Court's diversity jurisdiction applies. (Opp'n 15 n.4.) Thus, the only remaining basis for jurisdiction is under the Court's supplemental jurisdiction, *28 U.S.C. § 1367*.

Defendants contend that the Court should decline to exercise supplemental jurisdiction over Plaintiff's pendent claims. (MTD 13.) They cite cases where other courts have declined to exercise supplemental jurisdiction in similar factual **[**93]** situations. (*Id.* (citing, e.g., *Bass v. Cty. of San Diego, No. 08-cv-2135-MMA (NLS), 2009 U.S. Dist. LEXIS 136987, 2009 WL 10671992, at * 5 (S.D. Cal. Aug. 25, 2009))*; Reply 3 n.2 (citing, e.g., *Empagran, S.A. v. F. Hoffman-La Roche Ltd., 453 F. Supp. 2d 1, 9, 13 (D.D.C. 2006))*.)

Plaintiff argues that Court should retain supplemental jurisdiction even if it dismisses Plaintiff's Sherman Act claims. (Opp'n 15.) Plaintiff argues that the pendency of this case, the Court's familiarity with the issues, the overlap between Plaintiff's federal and non-federal claims, and judicial economy all weigh in favor of retaining pendent jurisdiction over Plaintiff's non-federal claims. (*See id.* at 16.) According to Plaintiff, if the Court were to dismiss its non-federal claims, then such a dismissal would lead to a duplicative action in state court. (*See id.* at 16-17.)

HN44[] *28 U.S.C. § 1367* allows a federal district court to hear all state law claims as long as there is an independent basis for jurisdiction. Under *section 1367*, a district court "shall have supplemental jurisdiction over all other claims that are so related to claims in the action within such original jurisdiction that they form part of the same case or controversy under Article III of the United States Constitution." *§ 1367(a)*. The Supreme Court has held that supplemental jurisdiction "may be exercised when federal and state claims have a 'common nucleus of operative fact' and would 'ordinarily be expected to **[**94]** [be tried] all in one judicial proceeding.'" *Osborn v. Haley, 549 U.S. 225, 245, 127 S. Ct. 881, 166 L. Ed. 2d 819 (2007)* (alteration in original) (quoting *United Mine Workers of Am. v. Gibbs, 383 U.S. 715, 725, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966))*. However, a Court may decline to exercise supplemental jurisdiction over any state claim if (1) "the claim raises a novel or complex issue of State law," (2) "the claim substantially predominates over the claim or claims over which the district court has original jurisdiction," (3) "the district court has dismissed all claims over which it has original jurisdiction," or (4) "in exceptional circumstances, there are other compelling reasons for declining jurisdiction." *28 U.S.C. § 1367(c)(1)-(4)*.

HN45[] "In *Gibbs*, the [Supreme] Court stated that "if federal claims are dismissed before trial . . . the state claims should be dismissed as well." *Carnegie-Mellon Univ. v. Cohill, 484 U.S. 343, 350 n.7, 108 S. Ct. 614, 98 L. Ed. 2d 720 (1988)* (second alteration in original) (quoting *Gibbs, 383 U.S. at 726*). In *Carnegie-Mellon*, the Court clarified that this was not a mandatory rule, but rather "simply recognizes that in the usual case in which all federal-law claims are eliminated before trial, the balance of factors to be considered **[*1106]** under the pendent jurisdiction doctrine—judicial economy, convenience, fairness, and comity—will point toward declining to exercise jurisdiction over the remaining state law claims." *Id.* This is the most logical approach here for **[**95]** three reasons. First, the federal claims have been dismissed for lack of standing and, thus, *Gibbs*' general proposition applies. Second, Plaintiff's antitrust claim has been dismissed without prejudice and the Court will grant leave to amend. Third, there does not appear to be any reason why individual citizens of the Cherokee Nation could not join in the putative class actions, if a class is certified and, if they are not certified, could bring individual claims.

In light of the foregoing, the Court **DECLINES** to exercise its discretion to retain jurisdiction over the supplemental claims and **DISMISSES WITHOUT PREJUDICE** Plaintiff's eighth, eleventh, and nineteenth causes of action.

III. Leave to Amend

HN46[] Pursuant to *Federal Rule of Civil Procedure 15(a)*, a plaintiff may amend its complaint once as a matter of course within specified time limits. *Fed. R. Civ. P. 15(a)(1)*. "In all other cases, a party may amend its pleading only with the opposing party's written consent or the court's leave. The court should freely give leave when justice so requires." *Fed. R. Civ. P. 15 (a)(2)*.

HN47[] While courts exercise broad discretion in deciding whether to allow amendment, they have generally adopted a liberal policy. *See United States ex rel. Ehmcke Sheet Metal Works v. Wausau Ins. Cos., 755 F. Supp. 906, 908 (E.D. Cal. 1991)* (citing *Jordan v. Cnty. of Los Angeles, 669 F.2d 1311, 1324 (9th Cir.)*, *rev'd on other grounds*, *459 U.S. 810, 103 S. Ct. 35, 74 L. Ed. 2d 48 (1982))*. Accordingly, leave is generally granted unless **[**96]** the court harbors concerns "such as undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, futility of amendment, etc." *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*. "Amendments seeking to add claims are to be granted more freely than amendments adding parties." *Union P. R. Co. v. Nevada Power Co., 950 F.2d 1429, 1432 (9th Cir. 1991)* (citing *Martell v. Trilogy Ltd., 872 F.2d 322, 324 (9th Cir. 1989))*. Additionally, "the party opposing amendment has the burden of showing that amendment is not warranted." *Wizards of the Coast LLC v. Cryptozoic Entm't LLC, 309 F.R.D. 645, 649-50 (W.D. Wash. 2015)* (citing, e.g., *DCD Programs, Ltd. v. Leighton, 833 F.2d 183, 187 (9th Cir. 1987))*.

Here, the Court **GRANTS** Plaintiff leave to amend its federal antitrust causes of action and its state unjust enrichment causes of action. However, the Court finds that Plaintiff cannot amend its complaint with regard to state statutory causes of action—Plaintiff's attorney general does not have authority under foreign state law to assert a *parens patriae* cause of action. This is a legal issue that cannot be cured by additional factual allegations. The only remaining question is whether the Court should permit amendment to Plaintiff's claims based on Cherokee Nation law.

Generally "a proposed amendment is futile only if no set of facts can be proved under the amendment to the pleadings **[**97]** that would constitute a valid and sufficient claim or defense." *Miller v. Rykoff-Sexton, Inc., 845 F.2d 209, 214 (9th Cir. 1988)*. Courts ordinarily do not consider the validity of a proposed amended pleading in deciding whether to grant leave to amend, and instead defer consideration of **[*1107]** challenges to the merits of a proposed amendment until after leave to amend is granted and the amended pleadings are filed. *Netbula, LLC v. Distinct Corp., 212 F.R.D. 534, 539 (N.D. Cal. 2003)* (citation omitted); *accord Green Valley Corp. v. Caldo Oil Co., No. 09cv4028-LHK, 2011 U.S. Dist. LEXIS 44540, 2011 WL 1465883, at *6 (N.D. Cal. Apr. 18, 2011)* (noting "the general preference against denying a motion for leave to amend based on futility"). Arguments concerning the sufficiency of the proposed pleadings, even if meritorious, are better left for briefing on a motion to dismiss. *Lillis v. Apria Healthcare, No. 12cv52-IEG (KSC), 2012 U.S. Dist. LEXIS 144775, 2012 WL 4760908, at * 1 (S.D. Cal. Oct. 5, 2012)*.

Here, the Court acknowledges that Defendants raise challenges to the retroactivity and legislative jurisdiction of Cherokee Nation law. At this stage, it is not clear that the Cherokee Nation Code causes of action are futile such that no set of facts could constitute a valid cause of action. Because the Court will allow amendment of the

Cherokee Nation's complaint, the factual allegations regarding the Cherokee Nation Code may shift and is better suited to a briefing on a future motion to dismiss. **[**98]** Accordingly, the Court **GRANTS** leave to amend the Cherokee Nation causes of action.

CONCLUSION

In light of the foregoing, the Court **GRANTS** Defendants' Motion, (ECF No. 983), and **DISMISSES WITHOUT PREJUDICE** Plaintiff's First Amended Complaint, except to the extent that Plaintiff seeks to bring *parens patriae* claims under state law, such claims are **DISMISSED WITH PREJUDICE**. The Court **GRANTS LEAVE TO AMEND** Plaintiff's Complaint; Plaintiff **MAY FILE** an amended Complaint within thirty (30) days of the date on which this Order is electronically docketed**.**

IT IS SO ORDERED.

For CESAR CASTILLO, INC., individually and on behalf of all those similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Linda Phyllis Nussbaum, LEAD ATTORNEY, PRO HAC VICE, Nussbaum Law Group P. C., New York, NY; Jayne Arnold Goldstein, PRO HAC VICE, Shepherd, Finkelman, Miller & Shah, LLP (FL-NC), Fort Lauderdale, FL; Kip Andrew Harbison, Glasser & Glasser PLC, Norfolk, VA; Marc Christian Greco, Glasser & Glasser PLC, Norfolk, VA; Michael Andrew Glasser, Glasser & Glasser PLC, Norfolk, VA; Richard Steven Glasser, Glasser & Glasser PLC, Norfolk, VA; William Hanes Monroe, Jr., Glasser & Glasser PLC, Norfolk, VA.

For Rochester Drug Cooperative, Inc., on behalf of itself and all others similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Barry Steven Taus, LEAD **[*3]** ATTORNEY, PRO HAC VICE, Taus, Cebulash & Landau LLP, New York, NY; David Francis Sorensen, LEAD ATTORNEY, PRO HAC VICE, Berger & Montague, PC <pA-NA>, Philadelphia, PA; Peter Russell Kohn, LEAD ATTORNEY, PRO HAC VICE, Faruqi & Faruqi, LLP (PA-NA), Jenkintown, PA; William Hanes Monroe, Jr., LEAD ATTORNEY, Glasser & Glasser PLC, Norfolk, VA; Archana Tamoshunas, PRO HAC VICE, Taus, Cebulash & Landau LLP, New York, NY; Bradley Joseph Demuth, PRO HAC VICE, Faruqi & Faruqi, LLP (NA-NY), New York, NY; Joseph Thomas Lukens, PRO HAC VICE, Faruqi & Faruqi, LLP (PA-NA), Jenkintown, PA; Karissa Joelle Sauder, PRO HAC VICE, Berger Montague, PC (PA-NA), Philadelphia, PA; Kevin Landau, PRO HAC VICE, Taus, Cebulash & Landau LLP, New York, NY; Kip Andrew Harbison, Glasser & Glasser PLC, Norfolk, VA; Marc Christian Greco, Glasser & Glasser PLC, Norfolk, VA; Michael Andrew Glasser, Glasser & Glasser PLC, Norfolk, VA; Nicholas Urban, PRO HAC VICE, Berger Montague, PC (PA-NA), Philadelphia, PA; Richard Steven Glasser, Glasser & Glasser PLC, Norfolk, VA; Zachary David Caplan, PRO HAC VICE, Berger & Montague, PC <pA-NA>, Philadelphia, PA.

For Sergeants Benevolent Association Health & Welfare Fund, on behalf **[*4]** of itself and all others similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Christine A. Williams, LEAD ATTORNEY, DurretteCrump PLC, Richmond, VA; Kevin Jermone Funk, LEAD ATTORNEY, Durrette Arkema Gerson & Gill PC, Richmond, VA; Wyatt B. Durrette, Jr., LEAD ATTORNEY, Durrette Arkema Gerson & Gill PC, Richmond, VA; Adam Eric Polk, PRO HAC VICE, Girard Sharp LLP, San Francisco, CA; Christina Hildegard Connolly Sharp, PRO HAC VICE, Girard Gibbs LLP, San Francisco, CA; James Arthur Cales, III, Furniss Davis Rashkind & Saunders PC, Norfolk, VA.

For UFCW Local 1500 Welfare Fund, on behalf of itself and all others similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Susan Rebbeca Podolsky, LEAD ATTORNEY, The Law Offices of Susan R Podolsky, Alexandria, VA; Gregory Scott Asciolla, PRO HAC VICE, Labaton Sucharow LLP, New York, NY; Robin Ann van der Meulen, PRO HAC VICE, Labaton Sucharow LLP, New York, NY; James Arthur Cales, III, Furniss Davis Rashkind & Saunders PC, Norfolk, VA.

For Philadelphia Federation of Teachers Health and Welfare Fund, Plaintiff (2:18-md-02836-RBS-DEM): Joshua Heath Grabar, PRO HAC VICE, Grabar Law Office, Philadelphia, PA; Marc Howard Edelson, PRO HAC VICE, Edelson **[*5]** & Associates LLC, Newtown, PA; Susan Rebbeca Podolsky, The Law Offices of Susan R Podolsky, Alexandria, VA; Wyatt B. Durrette, Jr., Durrette Arkema Gerson & Gill PC, Richmond, VA; James Arthur Cales, III, Furniss Davis Rashkind & Saunders PC, Norfolk, VA.

For Self Insured Schools of California on behalf of itself and all others similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Conrad Moss Shumadine, Willcox & Savage PC, Norfolk, VA; Joseph R Saveri, PRO HAC VICE, Joseph Saveri Law Firm, San Francisco, CA; Kyla Gibboney, PRO HAC VICE, Joseph Saveri Law Firm, San Francisco, CA; Steven Noel Williams, PRO HAC VICE, Joseph Saveri Law Firm, San Francisco, CA; James Arthur Cales, III, Furniss Davis Rashkind & Saunders PC, Norfolk, VA.

For City of Providence, Rhode Island on its own behalf and on behalf of all others similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Alan Brody Rashkind, Furniss Davis Rashkind & Saunders PC, Norfolk, VA; Erin C Durba, PRO HAC VICE, Motley Rice LLC (NY-NA), New York, NY; James Arthur Cales, III, Furniss Davis Rashkind &

Saunders PC, Norfolk, VA; Michael M. Buchman, PRO HAC VICE, Motley Rice, LLC, New York, NY; Michelle C Clerkin, PRO HAC VICE, Motley **[*6]** Rice LLC (NY-NA), New York, NY.

For Law Enforcement Health Benefits Inc., Plaintiff (2:18-md-02836-RBS-DEM): Wyatt B. Durrette, Jr., Durrette Arkema Gerson & Gill PC, Richmond, VA.

For Painters District Council No. 30 Health and Welfare Fund, on behalf of itself and all others similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Alan Brody Rashkind, LEAD ATTORNEY, Furniss Davis Rashkind & Saunders PC, Norfolk, VA; James Arthur Cales, III, LEAD ATTORNEY, Furniss Davis Rashkind & Saunders PC, Norfolk, VA; Lori Ann Fanning, PRO HAC VICE, Miller Law LLC, Chicago, IL; Marvin Alan Miller, PRO HAC VICE, Miller Law LLC, Chicago, IL.

For International Union of Operating Engineers Local 49 Health and Welfare Fund on behalf of itself and all others similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Christine A. Williams, LEAD ATTORNEY, DurretteCrump PLC, Richmond, VA; Kevin Jermone Funk, LEAD ATTORNEY, Durrette Arkema Gerson & Gill PC, Richmond, VA; Wyatt B. Durrette, Jr., LEAD ATTORNEY, Durrette Arkema Gerson & Gill PC, Richmond, VA; Anna Marie Horning Nygren, PRO HAC VICE, Lockridge Grindal Nauen PLLP (MN-NA), Minneapolis, MN; Devona Lynn Wells, PRO HAC VICE, Lockridge Grindal Nauen PLLP **[*7]** (MN-NA), Minneapolis, MN; Heidi Marie Silton, PRO HAC VICE, Lockridge Grindal Nauen PLLP (MN-NA), Minneapolis, MN; Karen Hanson Riebel, PRO HAC VICE, Lockridge Grindal Nauen PLLP (MN-NA), Minneapolis, MN; James Arthur Cales, III, Furniss Davis Rashkind & Saunders PC, Norfolk, VA.

For Wisconsin Masons' Health Care Fund, on behalf of itself and all others similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Christopher Van Le, LEAD ATTORNEY, Straus & Boies LLP (FFX), Fairfax, VA; Justin Boley, PRO HAC VICE, Wexler Wallace LLP, Chicago, IL; Kara A Elgersma, PRO HAC VICE, Wexler Wallace LLP, Chicago, IL; Kenneth Alan Wexler, PRO HAC VICE, Wexler Wallace LLP, Chicago, IL; Michelle J Looby, PRO HAC VICE, Gustafson Gluek PLLC, Minneapolis, MN; Wyatt B. Durrette, Jr., Durrette Arkema Gerson & Gill PC, Richmond, VA.

For ST. PAUL ELECTRICAL WORKERS' HEALTH PLAN, individually and on behalf of all those similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Christine A. Williams, LEAD ATTORNEY, DurretteCrump PLC, Richmond, VA; Kevin Jermone Funk, LEAD ATTORNEY, Durrette Arkema Gerson & Gill PC, Richmond, VA; Wyatt B. Durrette, Jr., LEAD ATTORNEY, Durrette Arkema Gerson & Gill PC, Richmond, VA; **[*8]** Jessica Noel Servais, PRO HAC VICE, Heins Mills & Olson, P.L.C., Minneapolis, MN; Renae Diane Steiner, PRO HAC VICE, Heins Mills & Olson, P.L.C., Minneapolis, MN.

For Walgreen Co., The Kroger Co., Albertsons Companies, Inc., HEB Grocery Company L.P., Plaintiffs (2:18-md-02836-RBS-DEM): Craig Crandall Reilly, LEAD ATTORNEY, Law Office of Craig C. Reilly, Alexandria, VA; Adam Michael Carroll, Wolcott Rivers Gates P. C., Virginia Beach, VA; Anna Theresa Neill, PRO HAC VICE, Kenny Nachwalter, P. A., Miami, FL; Joshua Barton Gray, PRO HAC VICE, Kenny Nachwalter, P. A. (DC-NA), Washington, DC; Lauren Carol Ravkind, PRO HAC VICE, Kenny Nachwalter, P. A., Miami, FL; Richard Alan Arnold, PRO HAC VICE, Kenny Nachwalter, P. A., Miami, FL; Scott Eliot Perwin, PRO HAC VICE, Kenny Nachwalter, P. A., Miami, FL.

For Turlock Irrigation District, individually and on behalf of all those similarly situated, Plaintiff (2:18-md-02836-RBS-DEM): Ashley Marie Bond, LEAD ATTORNEY, Duncan & Allen, Washington, DC; Jason Scott Hartley, PRO HAC VICE, Hartley LLP, San Diego, CA; John Peter Coyle, PRO HAC VICE, Duncan & Allen, Washington, DC; Jon Robert Stickman, PRO HAC VICE, Duncan & Allen, Washington, DC; Kenneth **[*9]** Matthew Holmboe, PRO HAC VICE, Duncan & Allen, Washington, DC; Wyatt B. Durrette, Jr., Durrette Arkema Gerson & Gill PC, Richmond, VA.

For The Uniformed Firefighters' Association of Greater New York Security Benefit Fund, The Retired Firefighters' Security Benefit Fund of the Uniformed Firefighters' Association, on behalf of themselves and all others similarly situated, Plaintiffs (2:18-md-02836-RBS-DEM): James Arthur Cales, III, LEAD ATTORNEY, Furniss Davis Rashkind & Saunders PC, Norfolk, VA; Alan Brody Rashkind, Furniss Davis Rashkind & Saunders PC, Norfolk, VA; Brian Murray, PRO HAC VICE, Glancy Prongay & Murray LLP, New York, NY; Gregory Linkh, PRO HAC VICE, Glancy Prongay & Murray LLP, New York, NY; Lee Albert, PRO HAC VICE, Glancy Prongay & Murray LLP, New York, NY.

For Rite Aid Corporation, Rite Aid Hdqtrs. Corp., Plaintiffs (2:18-md-02836-RBS-DEM): Craig Crandall Reilly, LEAD ATTORNEY, Law Office of Craig C. Reilly, Alexandria, VA; Adam Michael Carroll, Wolcott Rivers Gates P. C., Virginia Beach, VA; Alexander John Egervary, PRO HAC VICE, Hangley Aronchick Segal Pudlin & Schiller, Philadelphia, PA; Barry Lee Refsin, PRO HAC VICE, Hangley Aronchick Segal Pudlin & Schiller, Philadelphia, **[*10]** PA; Eric Lawrence Bloom, PRO HAC VICE, Hangley Aronchick Segal Pudlin & Schiller, Harrisburg, PA; Maureen Smith Lawrence, PRO HAC VICE, Hangley Aronchick Segal Pudlin & Schiller, Philadelphia, PA; Monica Louise Kiley, PRO HAC VICE, Hangley Aronchick Segal Pudlin & Schiller, Harrisburg, PA.

For CVS Pharmacy, Inc., Plaintiff (2:18-md-02836-RBS-DEM): Craig Crandall Reilly, LEAD ATTORNEY, Law Office of Craig C. Reilly, Alexandria, VA; Adam Michael Carroll, Wolcott Rivers Gates P. C., Virginia Beach, VA.

For All End Payer Plaintiffs, Plaintiff (2:18-md-02836-RBS-DEM): James Arthur Cales, III, Furniss Davis Rashkind & Saunders PC, Norfolk, VA.

For Merck & Co., Inc., Merck Sharp & Dohme Corp., Schering-Plough Corp., Schering Corp., MSP Singapore Co. LLC, Defendants (2:18-md-02836-RBS-DEM): Stephen Edward Noona, LEAD ATTORNEY, Kaufman & Canoles, P.C., Norfolk, VA; Christopher Dean Dusseault, PRO HAC VICE, Gibson Dunn & Crutcher LLP (CA-NA), Los Angeles, CA; Eric Jonathan Stock, PRO HAC VICE, Gibson Dunn & Crutcher LLP (NY-NA), New York, NY; Jennifer Laura Greenblatt, PRO HAC VICE, Goldman Ismail Tomaselli Breenan & Baum LLP, Chicago, IL; Michael Minshen Lee, PRO HAC VICE, Gibson, Dunn & Crutcher **[*11]** LLP (CA-NA), Los Angeles, CA; Samuel Grant Liversidge, PRO HAC VICE, Gibson, Dunn & Crutcher LLP (CA-NA), Los Angeles, CA; Tarek Ismail, PRO HAC VICE, Goldman Ismail Tomaselli Breenan & Baum LLP, Chicago, IL; Veronica Smith Lewis, PRO HAC VICE, Gibson Dunn & Crutcher LLP (TX-NA), Dallas, TX.

For Glenmark Pharmaceuticals, Ltd., Glenmark Generics Inc., USA, Defendants (2:18-md-02836-RBS-DEM): James Kevin Fee, LEAD ATTORNEY, Morgan Lewis Bockius LLP (DC), Washington, DC; Jessica Johnston Taticchi, PRO HAC VICE, Morgan Lewis & Bockius LLP (PA-NA), Philadelphia, PA; Melina Rose DiMattio, PRO HAC VICE, Morgan Lewis & Bockius LLP (PA-NA), Philadelphia, PA; Richard Brendan Fee, PRO HAC VICE, Morgan Lewis & Bockius LLP (PA-NA), Philadelphia, PA; Stacey Anne Mahoney, PRO HAC VICE, Morgan Lewis & Bockius LLP (NY-NA), New York, NY; Steven Andrew Reed, PRO HAC VICE, Morgan Lewis & Bockius LLP (PA-NA), Philadelphia, PA; Teri Josie Diaz, Morgan Lewis Bockius LLP (DC), Washington, DC; Zachary Mills Johns, PRO HAC VICE, Morgan Lewis & Bockius LLP (PA-NA), Philadelphia, PA.

For Par Pharmaceutical, Inc., Defendant (2:18-md-02836-RBS-DEM): Kathryn Jordan Mims, LEAD ATTORNEY, White & Case LLP, New York, **[*12]** NY; Amanda Lee Czocher, PRO HAC VICE, White & Case LLP, Washington, DC; Eric Grannon, PRO HAC VICE, White & Case LLP, Washington, DC.

Judges: DOUGLAS E. MILLER, UNITED STATES MAGISTRATE JUDGE.

Opinion by: DOUGLAS E. MILLER

Opinion

REPORT AND RECOMMENDATION

In this antitrust action Plaintiffs' claims arise from Defendant Merck's alleged efforts to delay generic competition for its cholesterol drug Zetia. Merck has moved to compel certain Plaintiffs to arbitrate the claims under the terms of a written Distributorship Agreement. The arbitration clause in the agreement does not unambiguously delegate preliminary questions of enforceability to the arbitrator. It also contains a clear, prospective waiver of certain statutory remedies, including Plaintiffs' claims for treble damages and attorney's fees under Section Four of the Clayton Act. *15 U.S.C. § 15(a)*. Because federal law directs the court to determine this preliminary issue, and the waivers render the clause unenforceable as to Plaintiffs' antitrust claims, this report recommends that the court deny Merck's Motion to Compel Arbitration. **[*20]**

I. FACTUAL AND PROCEDURAL HISTORY

The three named Plaintiffs presently before the court, FWK Holdings, LLC, Cesar Castillo, Inc., and Rochester Drug Cooperative, Inc., are drug wholesalers which directly purchased Zetia from Merck[1] during the period 2006 to 2016

[1] The complaints name five related Merck entities, collectively referred to in this Report as Merck.

("Direct Purchasers" or "Plaintiffs"). Zetia, generically known as ezetimibe, is a cholesterol-lowering medication formerly subject to patent protection. For purposes of the present motion, it is sufficient to summarize Plaintiffs' 90-page Complaint as alleging a scheme by Merck to extend patent protection for Zetia by obtaining a reissued patent, Patent No. RE 37,721 ("RE '721 patent") for compounds which were "inherent metabolites" of compounds disclosed in earlier patents. Compl. ¶ 153 (ECF No. 1 at 43-44).[2] Plaintiffs allege this inherency rendered the RE '721 patent invalid as anticipated by the earlier patents. Id. They also allege Merck withheld references during the reissue prosecution, amounting to inequitable conduct which would also void the RE '721 patent. Compl. ¶¶ 156-58 (ECF No. 1 at 45-47).

Co-Defendant Glenmark, a generic drug maker, challenged the reissued patent and first filed an Abbreviated New Drug Application (ANDA) **[*21]** asserting rights to market a generic version of the drug in 2006. Compl. ¶ 144 (ECF No. 1 at 41). Merck sued Glenmark, alleging infringement of the RE '721 patent, and Glenmark counterclaimed alleging the patent was invalid under several theories. Plaintiffs allege that Glenmark's challenges to the RE '721 patent's validity for inequitable conduct and, as anticipated by Merck's prior patents, were clearly meritorious. Compl. ¶ 176 (ECF No. 1 at 50). But instead of pursuing them to finally obtain a declaration of invalidity, Glenmark settled with Merck, agreeing to drop its claims in exchange for Merck's promise not to compete with Glenmark, by refraining from producing its own authorized generic version of the drug during Glenmark's 180-day period of exclusivity after it entered the market. Compl. ¶ 181 (ECF No. 1 at 51). Plaintiffs allege this *quid pro quo* agreement not to compete amounted to an improper reverse payment to delay generic entry of the type proscribed under federal ***antitrust law*** as interpreted by the Supreme Court. *F.T.C. v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*.

The three named Direct Purchasers before the court on these motions each brought putative class action complaints seeking to recover from Merck and Glenmark for overcharges they **[*22]** claim to have paid during the delay in generic competition and during the period after Glenmark entered the market when Merck agreed not to compete with its own generic version of the drug. All three complaints were subject to a Transfer Order by the Judicial Panel on Multidistrict Litigation (JPML) consolidating these cases for all pretrial purposes in this MDL proceeding. Transfer Order, MDL No. 2836 (ECF No. 123). In addition to these Plaintiffs, the MDL includes putative class action claims by End Payor Plaintiffs as well as individual claims filed by various large Retailer Plaintiffs, including Walgreens, Rite Aid and CVS. All of the consolidated claims allege antitrust or anticompetitive injuries arising from the same course of conduct and all name Merck and Glenmark as Defendants.[3]

The Merck Defendants filed motions to dismiss, or in the alternative to stay the cases filed by the Direct Purchasers pending arbitration. Merck alleges that all three named Direct Purchasers, as well as the other putative Direct Purchaser class members, were parties to Merck's Authorized Distributorship (MAD) Agreement governing the terms of their relationship. The MAD Agreements for the three named **[*23]** Direct Purchaser parties are nearly identical and define the parties' obligations with respect to the purchase of Merck products. For example, the MAD Agreements require that distributors purchase Merck products only from Merck; not resell Merck products in foreign markets; and abide by certain credit and charge-back policies. Decl. of Jennifer L. Greenblatt, Ex. A ("MAD Agmt.") (ECF No. 96-1). The MAD Agreements contain no pricing or product information, nor do they obligate any party to purchase or sell any particular quantity of Merck product. Instead, they specify certain terms under which such sales would, and apparently did, take place. Id.

---

[2] ECF numbers referenced in this Report and Recommendation correspond to case number 2:18cv23, FWK Holdings, LLC v. Merck & Co., Inc. et al. Merck filed substantially identical motions prior to consolidation of the direct purchaser actions in MDL No. 2836. See Mots., Case Nos. 2:18cv23 (ECF No. 92); 2:18cv39 (ECF No. 69); and 2:18cv71 (ECF No. 80). As stated in this court's August 15, 2018 order, the motions and responsive briefing are construed to apply to the forthcoming Direct Purchasers' consolidated complaint in Case No. 2:18md2836, presently due no later than September 13, 2018. Pretrial Order No. 4, at 2 n.1 (ECF No. 141 at 2).

[3] The MDL presently consists of 18 cases, including five cases transferred here from three other jurisdictions.

Executed in 2012, the MAD Agreements presently before the court contain identical language reflecting the parties' agreement to arbitrate.[4] The relevant paragraph provides:

> Arbitration. Any controversy, claim or dispute ("Dispute") that may arise out of or be related to the performance, construction, interpretation or enforcement of this Agreement (including disputes as to the scope, applicability and meaning of this arbitration clause) shall be submitted to mandatory, binding, confidential arbitration pursuant to the Federal Arbitration Act, **[*24]** *9 U.S.C. § 1 et seq.*, under the auspices and Commercial Rules of the American Arbitration Association.
>
> . . .
>
> The arbitrator(s) is empowered to award equitable relief but not empowered to award damages in excess of compensatory damages and each Party hereby irrevocably waives any right to recover such damages with respect to any dispute within the scope of this clause. Each party shall pay for all attorney's fees and costs it incurs in connection with the arbitration.

Id. ¶ 7(A) (ECF No. 96-1 at 4-5).

Merck argues that the clause requires all the Direct Purchasers to arbitrate their claims. Its motion seeks to dismiss the Direct Purchasers' claims, or alternatively to stay them until the arbitration proceedings are concluded. Plaintiffs disagree, and assert several challenges to arbitrability. Specifically, Plaintiffs claim the clause does not apply to their antitrust claims because those claims do not relate to the performance or enforcement of the MAD Agreements. They note that the Agreements impose no obligation on either party to buy or sell Merck products, and that the antitrust damages they allege flow, not from any contractual duty, but from a market allocation scheme that increased prices by keeping **[*25]** competitors — including Glenmark and various non-parties — from selling generic ezetimibe. The Direct Purchasers also raise administrative challenges to the clause, noting that only one of the Merck entities is a signatory and that the arbitration language appeared in the Agreements only in 2012, two years after the conduct underlying the antitrust claims occurred. Finally, the Plaintiffs claim the clause is invalid as it contains prospective waivers of statutory antitrust remedies which Congress deemed nonwaivable.

Merck contends that all of these arbitrability challenges are reserved to the arbitrator to decide under the language of the parties' agreement. However, to the extent the court undertakes to decide them, Merck argues that none are sufficient to preclude arbitration.

For the reasons set forth in greater detail below, the undersigned agrees with the Direct Purchasers that the prospective waiver of statutory remedies contained in the arbitration clause renders it unenforceable. Because the parties' agreement did not delegate this preliminary question of arbitrability to the arbitrator to decide, the court retains jurisdiction to resolve it. Accordingly, this report recommends **[*26]** that the court deny Merck's Motions to Dismiss or Compel Arbitration (2:18cv23, ECF No. 92; 2:18cv39, ECF No. 69; 2:18cv71, ECF No. 80).

II. ANALYSIS

The *Federal Arbitration Act* (FAA) reflects the "overarching principle that arbitration is a matter of contract." *Am. Express Co. v. Italian Colors Rest., 570 U.S. 228, 232, 133 S. Ct. 2304, 186 L. Ed. 2d 417 (2013)*. It is a congressional command that courts "vigorously enforce" arbitration agreements, including those which may require arbitration of claims arising under federal law. *In re Cotton Yarn Antitrust Litigation, 505 F.3d 274, 282 (4th Cir.*

[4] The operative agreements for two named Plaintiffs were signed in 2012. Earlier agreements covering the same subject matter did not contain arbitration clauses. The Plaintiffs have argued that the 2012 agreements do not have retroactive effect, as the events giving rise to their claims occurred almost entirely before 2012. In light of the recommendation set forth in this report, the undersigned does not reach the issue of whether the arbitration language is sufficiently broad to be given retroactive effect. See *Wachovia Bank, Nat'l Ass'n v. Schmidt, 445 F.3d 762, 767 (4th Cir. 2006)* (observing that arbitration clause encompassing claims relating to "any aspect of the relationship between the parties" is far broader than one encompassing those relating to the agreement itself).

2007). The FAA explicitly provides that arbitration agreements are "valid, irrevocable, and enforceable, save upon such grounds as exists at law or in equity for the revocation of any contract." 9 U.S.C. § 2. State law contract defenses which do not "rely on the uniqueness of an agreement to arbitrate" may still prevent enforcement of the agreement to arbitrate. Dillon v. BMO Harris Bank, N.A., 856 F.3d 330, 334 (4th Cir. 2017) (quoting AT&T Mobility LLC v. Concepcion, 563 U.S. 333, 341, 131 S. Ct. 1740, 179 L. Ed. 2d 742 (2011)).

Among these contract defenses, an arbitration agreement may be invalid as against public policy where it contains a "prospective waiver of a party's right to pursue statutory remedies." Id. (quoting Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 637 n.19, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)). Thus, even when an arbitration clause is sufficiently broad to encompass antitrust claims, "arbitration of the claim will not be compelled if the prospective litigant cannot effectively vindicate statutory rights **[*27]** in the arbitral form." Cotton Yarn, 505 F.3d at 282 (citing Green Tree Fin. Corp.-Ala. v. Randolph, 531 U.S. 79, 90, 121 S. Ct. 513, 148 L. Ed. 2d 373 (2000)).

The Plaintiffs raise a number of challenges to Merck's claim that this dispute is subject to arbitration under the arbitration clause in the MAD Agreements. Such "question[s] of arbitrability" are in the normal course "undeniably an issue for judicial determination." Hayes v. Delbert Servs. Corp., 811 F.3d 666, 671 (4th Cir. 2016) (quoting Peabody Holding Co. v. United Mine Workers of Am., Int'l Union, 665 F.3d 96, 102 (4th Cir. 2012)). The parties may, however, agree to assign questions of arbitrability to the arbitrator to decide. Because such delegation would depart from the norm, a court must find the assignment in "clear and unmistakable" evidence of the parties' agreement. Rent-A-Center, W., Inc. v. Jackson, 561 U.S. 63, 69 n.1, 130 S. Ct. 2772, 177 L. Ed. 2d 403 (2010).

This court's contract interpretation function encompasses the initial inquiry into whether the parties agreed to arbitrate the particular arbitrability questions raised. See Peabody Holding Co., 665 F.3d at 101. The interpretative rule, which presumes that the parties intended for such gateway questions of arbitrability to be decided by the court, does not apply to every type of objection to arbitration which might be raised. Howsam v. Dean Witter Reynolds, Inc., 537 U.S. 79, 83-84, 123 S. Ct. 588, 154 L. Ed. 2d 491 (2002). Instead the presumption applies to certain gateway matters, such as whether the parties have a valid arbitration agreement at all, or whether a concededly binding arbitration clause applies to a certain type of controversy. **[*28]** Green Tree Fin. Corp. v. Bazzle, 539 U.S. 444, 452, 123 S. Ct. 2402, 156 L. Ed. 2d 414 (2003). Other arbitrability challenges are not subject to the presumption of judicial resolution, as they involve questions of arbitration procedure better left to the arbitrator to decide. Howsam, 537 U.S. at 84. And consistent with its contractual nature, an arbitration agreement may expressly assign responsibility for resolving gateway arbitrability challenges. Simply Wireless, Inc. v. T-Mobile US, Inc., 877 F.3d 522, 526 (4th Cir. 2017).

Thus, the question of which decisionmaker — court or arbitrator — resolves a particular challenge to arbitrability depends upon the nature of the challenge presented, whether the interpretive rule presuming judicial resolution applies, and finally whether the parties have obviated the need for an interpretive rule by clearly and unmistakably delegating authority to decide the preliminary question to the arbitrator. See Kristian v. Comcast Corp., 446 F.3d 25, 39-48 (1st Cir. 2006) (applying a "trilogy" of Supreme Court precedent to assess whether the court or an arbitrator should decide enforceability of an arbitration clause containing a prospective waiver of antitrust remedies). Applying that analysis to the Direct Purchasers' claims, the undersigned concludes that the MAD Agreement did not clearly and unmistakably delegate to the arbitrator resolution of all preliminary questions of arbitrability. Under established **[*29]** Fourth Circuit precedent, questions regarding the enforceability of clauses purporting to limit Plaintiffs' claims to vindicate statutory protections are for the court to determine. Finally, because the clause in this case contains an unenforceable prospective waiver of important antitrust safeguards, the court should deny Merck's Motion to Compel Arbitration.

A. The enforceability challenge raised by the Arbitration Agreement's prospective waiver of statutory rights should be decided by this court.

Merck's first argument is that all matters related to the arbitrability of the Direct Purchasers' claims must be decided in the first instance by the arbitrator. The company points to parenthetical language delegating certain jurisdictional questions to the arbitrator, and to the Agreement's incorporation of the Commercial Rules of the American Arbitration Association. It contends these terms comprise the parties' agreement to delegate all questions of arbitrability to the arbitrator.

But as the Direct Purchasers point out, the word "arbitrability" does not appear in the parenthetical language Merck relies upon. The word also did not appear in the Commercial Rules until 2012, after two of **[*30]** the operative MAD Agreements in this case were executed. And the language the parties did use in the MAD Agreement's delegation clause does not clearly and unmistakably encompass the type of challenge to arbitrability posed by the prospective waiver of statutory rights.

As noted, under the FAA, certain preliminary questions of arbitrability are ordinarily for the court to determine, absent "clear and unmistakable" evidence that the parties intended for an arbitrator to resolve them. *Simply Wireless, Inc., 877 F.3d at 526*. "The 'clear and unmistakable' standard is exacting, and the presence of an expansive arbitration clause, without more, will not suffice." *Peabody Holding Co., 665 F.3d at 102*. As a result, the language of the MAD Agreement vesting the arbitrator with the power to resolve disputes "related to the performance, construction, interpretation or enforcement of [the] Agreement" is insufficient to delegate arbitrability questions to the arbitrator. See id.; *Carson v. Giant Food, Inc., 175 F.3d 325, 330 (4th Cir. 1999)*.

Recognizing this, Merck mainly relies on the much narrower parenthetical language in the clause, identifying a subset of disputes also reserved to the arbitrator. The MAD Agreement describes this as "including disputes as to the scope, applicability and meaning of this arbitration clause." MAD **[*31]** Agmt. ¶ 7(A) (ECF No. 96-1). This parenthetical delegation, Merck argues, is sufficient to meet the clear and unmistakable evidence standard and requires that this court defer to the arbitrator resolution of all the Direct Purchasers' preliminary challenges.

The Direct Purchasers attack the parenthetical delegation clause on multiple fronts. They first argue that the parenthetical, which begins with the word "including," indicates that the clause is nothing more than a subset of the broad arbitration language rejected as an insufficient delegation under Carson and Peabody. But such a reading would render the parenthetical clause meaningless, which the Pennsylvania law of contract construction seeks to avoid. *Friestad v. Travelers Indemnity Co., 260 Pa. Super. 178, 393 A.2d 1212, 1217 (Pa. Super. Ct. 1978)*.[5]

Plaintiffs next argue that, considering the parenthetical language as a separate delegation of gateway questions to the arbitrator, it is clear the delegation does not encompass every arbitrability challenge the Direct Purchasers raise. They note that the word "arbitrability" does not appear in the clause. Instead, the delegation is limited to questions regarding the "scope, applicability and meaning" of the arbitration language. MAD Agmt. ¶ 7(A) (ECF No. 96-1 at 4). While the **[*32]** use of the exact word "arbitrability" is not required to delegate preliminary questions to the arbitrator, the language used in the parenthetical delegation is significantly narrower than Merck claims.

Some of the challenges raised by the present motion likely fall within this delegation and would be for the arbitrator to decide. For example, Direct Purchasers' arguments regarding whether the antitrust claims alleged are sufficiently related to the performance or enforcement of the MAD Agreement relate to the scope and applicability of the arbitration clause. These would be for the arbitrator to determine under the parties' agreement.

But the delegation clause does not encompass Plaintiffs' claim that prospective waivers of certain statutory remedies render the clause invalid or unenforceable. This is especially so given the presumption that such questions are for the court to resolve, and the unambiguous nature of the statutory rights waiver in the clause.

The Fourth Circuit has twice examined similar waivers and concluded that the enforceability questions they presented required judicial resolution. See *Dillon, 856 F.3d at 334-35*; *Hayes, 811 F.3d at 671* n.l. Both cases involved choice of law provisions which purported to limit or **[*33]** prohibit the enforcement of federal statutory protections. In refusing to compel arbitration of the disputes, the court noted that where there is uncertainty regarding the terms of the agreement and whether those terms would preclude enforcement of statutory claims, the

---

[5] The MAD Agreement provides that it is to be construed under Pennsylvania law. MAD Agmt. ¶ 7(Q) (ECF No. 96-1 at 8).

arbitrator should determine in the first instance whether those terms would deprive a party of those remedies. *Dillon, 856 F.3d at 334*. But where clear language takes the "plainly forbidden step" of prospectively waiving federal rights, the court may conclude that it is unenforceable as a matter of law. *Hayes, 811 F.3d at 675*.

Both *Hayes* and *Dillon* are consistent with the United States Supreme Court's view. In *PacifiCare Health Systems, Inc. v. Book, 538 U.S. 401, 123 S. Ct. 1531, 155 L. Ed. 2d 578 (2003)*, the Court considered an arbitration provision with "too much legal ambiguity" for the court to determine whether the challenge presented a question of arbitrability for the court to decide. See *Kristian, 446 F.3d at 40* (citing *PacifiCare, 538 U.S. at 407*). Because the Court did "not know how the arbitrator [would] construe the remedial limitations, the question whether they rendered the parties' agreements unenforceable and whether it [was] for courts or arbitrators to decide in the first instance [were] unusually abstract." *PacifiCare, 538 U.S. at 407*. As a result, the Court directed arbitration to resolve those ambiguities, and **[*34]** answer "the preliminary question whether the remedial limitations at issue [] prohibit an award of RICO treble damages." *Id. at 407 n.2*.

Merck argues that PacifiCare is directly analogous to matters pending in this court and that this court should likewise defer the enforceability challenge posed by the waiver to the arbitrator to decide. But as the First Circuit has noted, in an even more closely analogous case, where the statutory waivers are clear, the questions posed by the enforceability challenge are for the court to resolve. See *Kristian, 446 F.3d at 46*. In that case, the court also interpreted an arbitration clause purporting to bar antitrust remedies, including treble damages. In deciding the preliminary question of whether the court or an arbitrator should address such claims, the court conducted a detailed analysis of Supreme Court precedent and concluded that PacifiCare teaches such matters are for the court to decide, absent ambiguous language. Summarizing its conclusion, the court wrote:

> Implicit in the PacifiCare analysis is the proposition that if the remedies limitation in the arbitration agreement posed a clear conflict with the remedies available in the RICO statute, that clear conflict would pose a question **[*35]** of arbitrability. In other words, in the face of a vindication of statutory rights claim based on such a clear conflict, the court would decide the question of the enforceability of the arbitration clause in the first instance.

Id. at 46.

Thus, at a minimum, this court must examine the prospective waiver to determine whether it is ambiguous, or whether it clearly takes the "plainly forbidden" step of precluding substantive remedies. *Hayes, 811 F.3d at 675*.

Nothing in the MAD Agreement's parenthetical delegation suggests the parties agreed to modify this presumptive rule. Certain preliminary questions of arbitrability - namely scope questions related to the applicability of the clause - were delegated to the arbitrator under the language of the parties' contract. But that language says nothing about challenges to the validity or enforceability of the arbitration clause. This omission is particularly significant in light of the broader language concerning the types of contract disputes subject to arbitration under the clause. It is also significant that the arbitration clause expressly incorporates the FAA, under which such enforceability challenges are decided by the court. See *Simply Wireless, 877 F.3d at 530* (Floyd, J., dissenting) (noting arbitration **[*36]** agreement's incorporation of FAA, which contemplates judicial resolution of arbitrability disputes).

Likewise, the clause's incorporation of the AAA Commercial Rules does not clearly and unmistakably demonstrate that the parties intended for the arbitrator to resolve the enforceability challenge posed by the prospective waiver. This is primarily because the delegation clause in the parenthetical specifically addresses a narrower set of gateway questions than the Commercial Rules purport to address. When two provisions of a contract purport to address the same subject matter, the more specific language controls. *Trombetta v. Raymond James Fin. Servs., Inc., 2006 PA Super 229, 907 A.2d 550, 560 (Pa. Super. Ct. 2006)* ("[t]he specific controls the general when interpreting a contract."). Moreover, the Commercial Rules in effect at the time the 2012 MAD Agreements were executed did not use the term "arbitrability," and even after that word was added in 2013, the provision merely confers power on the arbitrator to resolve such disputes, but does not expressly direct that she do so. See Commercial Arbitration Rules and Mediation Procedures R.7 (Am. Arbitration Ass'n 2013) (adding arbitrability language to 2009 rules, available at www.adr.org/ArchiveRules).

In *Simply Wireless*, the Fourth Circuit **[*37]** ruled that incorporation of the JAMS Comprehensive Rules and Procedures in the parties' arbitration clause was sufficient to delegate preliminary questions of arbitrability to the arbitrator. *877 F.3d at 528*. The case is distinguishable on two fronts. First, the arbitration agreement in *Simply Wireless* did not contain a more specific and limited delegation of preliminary questions. *Id. at 525*. Second, the JAMS Rules then in effect phrased the delegation in mandatory terms, specifically providing that "jurisdictional and arbitrability disputes ... shall be submitted to and ruled on by the Arbitrator." JAMS Comprehensive Arbitration Rules and Procedures R. 11(b) (July 2014) (emphasis added). By contrast, the MAD Agreement contains an express delegation of only a subset of arbitrability challenges to the arbitrator. And *Rule 7* of the AAA Commercial Rules incorporated in the MAD Agreements is permissive, not mandatory, providing "the arbitrator shall have the power to rule on his or her own jurisdiction, including any objections to the existence, scope, or validity of the arbitration agreement." Commercial Rules, supra. Although the jurisdictional clause in the Commercial Rules was extended to disputes regarding "the arbitrability of any claim **[*38]** or counterclaim" in 2014, the language of *Rule 7* is still permissive, conferring jurisdiction on the arbitrator, but not requiring submission of such disputes by the parties. Id. As a result, even considering the incorporation of the Commercial Rules, the parties' explicit language delegating only scope and meaning questions to the arbitrator is not superseded by their incorporation. Therefore, the court should enforce the parties' express delegation, and defer arbitrability challenges involving the scope of the clause, but examine the Direct Purchasers' enforceability challenge based on the prospective waiver of statutory rights.

B. The unambiguous prospective waiver of statutory rights in the Arbitration Agreement would prevent Direct Purchasers from effectively vindicating their claims in the arbitral forum.

The FAA requires the court enforce an agreement to arbitrate "save upon such grounds as exist at law or in equity for the revocation of any contract." *9 U.S.C. § 2*. A court will not compel arbitration "if the prospective litigant cannot effectively vindicate his statutory rights in the arbitral forum." *Cotton Yarn, 505 F.3d at 282*. This so-called "effective vindication" exception can arise where an arbitration agreement is **[*39]** alleged to "operate[] . . . as a prospective waiver of a party's right to pursue statutory remedies." *Mitsubishi Motors Corp., 473 U.S. at 637 n.19*. The Supreme Court has acknowledged that restrictive arbitration provisions could trigger this exception. See *Italian Colors, 570 U.S. at 236* (stating the exception "would certainly cover a provision in an arbitration agreement forbidding the assertion of certain statutory rights").

Because the text of the antitrust laws speaks in mandatory terms, the Supreme Court has implied, and the lower courts have routinely held, that the prescribed statutory remedies are nonwaivable. See, e.g., *Mitsubishi Motors Corp., 473 U.S. at 637 n.19*; *Kristian, 446 F.3d at 48*. Therefore, if an arbitration agreement operates to preclude assertion of those remedies, courts will refuse to enforce it as against public policy.[6] See, e.g., *Dillon, 856 F.3d at 334*; *Hayes, 811 F.3d at 674-75*; *Gaines v. Carrollton Tobacco Bd. of Trade, Inc., 386 F.2d 757, 759 (3d Cir. 1967)* ("[I]t seems clear as a matter of law that such an agreement, if executed in a fashion calculated to waive damages arising from future violations of the antitrust laws, would be invalid on public policy grounds."). For present purposes, this means that if the arbitration provisions of the MAD Agreement operate as a prospective waiver of the right to assert an antitrust claim for treble damages and/or attorney's fees in the arbitral forum, those provisions may not be **[*40]** enforced.

The operative language of the arbitration provision states:

> The arbitrator(s) is empowered to award equitable relief but not empowered to award damages in excess of compensatory damages and each Party hereby irrevocably waives any right to recover such damages with respect to any dispute within the scope of this clause. Each party shall pay for all attorney fees it incurs in

---

[6] In his Italian Colors opinion for the majority, Justice Scalia characterized the effective vindication exception as a "judge-made exception to the FAA." *570 U.S. at 235*. Though judges undoubtedly apply the exception, it should fairly be noted that it exists solely to vindicate those explicit policies which Congress saw fit to place beyond the reach of private contract. The Court itself has emphasized the importance of Congress's chosen remedies in the antitrust laws. See, e.g., *Hawaii v. Standard Oil Co. of Cal., 405 U.S. 251, 262, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*.

connection with the arbitration. The costs of the arbitration proceeding shall be shared equally between the Parties.

MAD Agmt. ¶ 7(A) (ECF No. 96-1 at 4-5.). Thus, the first issue is whether antitrust treble damages under *15 U.S.C. § 15(a)* constitute damages "in excess of compensatory damages." Merck argues that they may not, and urges the court to defer to the arbitrator to resolve this preliminary question. The undersigned concludes that treble damages are unambiguously "in excess of compensatory damages" and that by requiring the Direct Purchasers to "irrevocably waive any right to recover such damages" the arbitration provision would operate to preclude such an award. Furthermore, the MAD Agreement precludes a recovery of attorney's fees, another mandatory remedy under *§ 15(a)*, by a successful plaintiff **[*41]** seeking antitrust damages. Those provisions therefore constitute unenforceable prospective waivers of statutory rights.

The Supreme Court has not been perfectly clear as to the exact nature of statutory treble damages, but its cases at minimum demonstrate that such damages are something "in excess of" compensatory damages. In *Texas Industries, Inc. v. Radcliff Materials, Inc., 451 U.S. 630, 639, 101 S. Ct. 2061, 68 L. Ed. 2d 500 (1981)*, the Court noted that "[t]he very idea of treble damages reveals an intent to punish past, and to deter future, unlawful conduct." In *Vermont Agency of Natural Resources v. United States ex rel. Stevens, 529 U.S. 765, 784, 120 S. Ct. 1858, 146 L. Ed. 2d 836 (2000)*, the Court described the treble damages provision in the False Claims Act as "essentially punitive in nature." Regardless of the intent for which a statute prescribes them, "it is important to realize that treble damages have a compensatory side . . . in addition to punitive objectives." *Cook County, Ill. v. United States ex rel. Chandler, 538 U.S. 119, 130, 123 S. Ct. 1239, 155 L. Ed. 2d 247 (2003)*; see also *Comm'r v. Glenshaw Glass Co., 348 U.S. 426, 427, 75 S. Ct. 473, 99 L. Ed. 483, 1955-1 C.B. 207 (1955)* (recognizing "the punitive two-thirds portion of a treble-damage antitrust recovery"). Thus, while the Clayton Act's treble damages provision may indeed serve a partially remedial function, there is no doubt the provision's full measure of damages is "in excess of compensatory damages." See, e.g., *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 300 (3d Cir. 2012)* ("[I]n the antitrust context, a damages award not only benefits the plaintiff, it also fosters competition and furthers the interests of **[*42]** the public by imposing a severe penalty (treble damages) for violation of the antitrust laws.").

Despite this authority, Merck claims that an arbitrator might construe the term "compensatory damages" as used in the MAD Agreement as co-extensive with treble damages under the Clayton Act. But the plain language of *§ 15(a)* mandates recovery by a successful plaintiff of "threefold the damages by him sustained." Using the ordinary definition of compensatory damages, the damages provision in *§ 15(a)* could be translated as "three times compensatory damages." See Compensatory Damages, Black's Law Dictionary (10th ed. 2014) ("Damages sufficient in amount to indemnify the injured person for the loss suffered."). However, if "compensatory damages" might also *include* treble damages, as Merck contends, then *§ 15(a)* would seemingly permit trebling a second time. Continually substituting the ordinary meaning of compensatory damages with that offered by Merck would result in successive threefold multipliers *ad infinitum*. A common sense reading of *§ 15*, whereby a plaintiff establishes its damages and then recovers three times that fixed amount, avoids this problem.

Merck primarily relies on *PacifiCare, 538 U.S. 401, 123 S. Ct. 1531, 155 L. Ed. 2d 578*, which refused to invalidate arbitration **[*43]** agreements that imposed a limitation on damages in the context of alleged violations of the RICO statute. It bears mention that the Supreme Court did not determine that the arbitration clause in PacifiCare was enforceable. Instead it remanded for the arbitrator to determine questions of arbitrability which were "unusually abstract." *Id. at 407*. Moreover, the contract provisions considered in *PacifiCare* are distinguishable. The four agreements under review in that case variously prohibited an arbitrator from awarding "punitive," "exemplary," or "extra contractual damages."[7] *Id. at 405*. The lower courts had refused to compel arbitration, holding that the damages restriction precluded an award of treble damages under RICO. *Id. at 403*. The Supreme Court reversed, citing uncertainty about whether an arbitrator would in fact construe the various contracts to preclude a treble

[7] Only one of the four agreements used the term "extra-contractual damages," and the context in which it was used suggests it may have been interpreted to exclude only punitive, exemplary or mental-anguish damages. See *PacifiCare, 538 U.S. at 407 n.2*.

damages award. *Id. at 406-07*. That uncertainty made it "premature" for the Court to address the question of enforceability, and therefore "the proper course [was] to compel arbitration" under the contract. *Id. at 404, 407*.

No such uncertainty exists in this case. The MAD Agreement does not *exclude* a specific type of damages. Rather, it permits only one type of damages, and **[*44]** prevents Direct Purchasers from even asserting their rights under federal law. In so doing it prevents the arbitrator from awarding *any* damages *except* compensatory damages.[8] MAD Agmt. ¶ 7(A) (ECF No. 96-1 at 4.). Invalidating the contract in PacifiCare would have required finding that statutory treble damages *are* punitive damages; by contrast, invalidating the provision here requires finding only that such damages *are not* purely compensatory.[9] No ambiguity prevents the latter conclusion. See *Kristian, 446 F.3d at 44-47* (concluding that PacifiCare impliedly recognized that a clear conflict between an arbitration provision and a statutory remedy would raise a question of arbitrability for the court).

The attorney fees prohibition in the arbitration agreement is plainer still. If the court enforced this provision and compelled arbitration, the Direct Purchasers would be precluded from recovering attorney's fees even if they succeeded on their antitrust claims, contravening a key purpose of *§ 15*. See *Alyeska Pipeline Serv. Co. v. Wilderness Soc'y, 421 U.S. 240, 263, 95 S. Ct. 1612, 44 L. Ed. 2d 141 (1975)* (offering ***antitrust law*** as a "prime example" of Congress's policy of incentivizing private enforcement by means of fee-shifting). Merck suggests that the provision, on its face, simply prohibits fee shifting **[*45]** "in connection with the arbitration," MAD Agmt. ¶ 7(A) (ECF No. 96-1 at 5), and therefore does not interfere with a litigant's "right to pursue statutory remedies" in the courts. See *Italian Colors, 570 U.S. at 235*. But Merck may not avoid the question of the arbitration provision's enforceability by pointing to the remedies that would be available if the provision was not enforced. Nor will the court read any saving exception into the parties' contract language. See *Whitman v. Legal Helpers Debt Resolution, LLC, No. 4:12-cv-00144-RBH, 2012 U.S. Dist. LEXIS 176480, 2012 WL 6210591, at *4 (D.S.C. Dec. 13, 2012)* (refusing to interpret a contract provision prohibiting fee-shifting by an arbitrator as including an exception for statutory claims providing for an award of fees).

Having concluded that the remedy limitations in the MAD Agreement arbitration provisions are unenforceable, the court must decide "whether severance of the [limiting] provisions, rather than invalidation of the arbitration agreements, would be the appropriate remedy." *Cotton Yarn, 505 F.3d at 292*. Because the challenged provisions are central elements of the arbitration agreement as a whole, and because the MAD Agreement itself does not provide for severability, the undersigned recommends invalidation of the entire arbitration agreement.

"[W]hether an **[*46]** enforceable arbitration agreement exists . . . is a matter of contract interpretation governed by state law." *Rota-McLarty v. Santander Consumer USA, Inc., 700 F.3d 690, 699 (4th Cir. 2012)*. The MAD Agreement contains a choice-of-law clause dictating that Pennsylvania law shall apply, MAD Agmt. ¶ 7(Q) (ECF No. 96-1 at 8), to which Virginia law gives effect, *Colgan Air, Inc. v. Raytheon Aircraft Co., 507 F.3d 270, 275 (4th Cir. 2007)*. Unlawful contract provisions may not be severed if the provision is "central or essential to the parties' agreement." *Dillon, 856 F.3d at 336*; see also *Huber v. Huber, 323 Pa. Super. 530, 470 A.2d 1385, 1389 (Pa. Super. Ct. 1984)* (reciting same principle).

In Hayes, the court refused to sever choice-of-law provisions in an agreement that would have entirely displaced the application of state and federal law to a dispute over a payday loan, concluding that they went "to the core of the arbitration agreement." *811 F.3d at 675-76*. In a subsequent case examining nearly identical provisions, the

[8] In light of the above discussion, it is clear that the MAD Agreement must permit recovery of antitrust treble damages to be enforceable. It is perhaps telling, then, that counsel for Merck was reluctant to concede at argument that the Direct Purchasers would be entitled to treble damages if successful, regardless of the forum.

[9] PacifiCare uses the terms "remedial" and "compensatory" somewhat interchangeably, but never suggests that statutory treble damages are purely either. See *538 U.S. at 405-06*. Suffice it to say that the Court's treatment of these terms permits a conclusion that treble damages could be entirely remedial but only partially compensatory, a conclusion that would still run aground of the MAD Agreement's arbitration provision.

court again rejected a proposal to sever the offending provisions and allow arbitration under other contract language. See *Dillon, 856 F.3d at 336*.

Although the arbitration provisions in the MAD Agreement are not as extreme as those in *Hayes* and *Dillon*, their limitations represent central components of the overall arbitration scheme. The provisions purport to completely immunize Merck from the majority of any potential liability under the antitrust laws and **[*47]** numerous other federal statutes which impose penalties for noncompliance, or damages beyond those actually incurred by the injured party.[10] In this way, the arbitration agreement, as applied to Plaintiffs' antitrust claims, resembles "an attempt by [Merck] to achieve through arbitration what Congress has expressly forbidden." *Graham Oil Co. v. ARCO Prods. Co., 43 F.3d 1244, 1249 (9th Cir. 1994)*. As Hayes and Dillon make clear, an arbitration agreement's "central" or "essential" terms can encompass more than simply the agreement to arbitrate itself. Moreover, consistently severing unenforceable provisions while leaving the base agreement intact "creates an incentive to get away with as many 'bad' arbitration provisions as possible, knowing that the worst case scenario is a court sending the case to arbitration with some of them stripped out." *Winston v. Academi Training Ctr., Inc., No. 1:12-cv-767, 2013 U.S. Dist. LEXIS 34850, 2013 WL 989999, at *3 (E.D. Va. Mar. 13, 2013)*; see also *Murray v. UFCW Int'l, Local 400, 289 F.3d 297, 304 (4th Cir. 2002)* (refusing to allow union to rewrite arbitration clause "on a case-by-case basis in order to claim that it is an acceptable one").

The structure of the MAD Agreement reinforces the conclusion that severability is not the appropriate remedy in this case. The arbitration agreement falls under a single heading and contains just six sentences, **[*48]** half of which would be excised by Merck's proposed severance. See *Carll v. Terminix Int'l Co., 2002 PA Super 44, 793 A.2d 921, 925-26 (Pa. Super. Ct. 2002)* (refusing to sever damages limitation from an arbitration provision, because "[t]he same contractual provision that directs arbitration limits the authority of the individual conducting that arbitration"; cf. *Fellerman v. PECO Energy Co., 2017 PA Super 86, 159 A.3d 22, 29 (Pa. Super. Ct. 2017)* (distinguishing Carll and allowing severance of a damage limitation in part because it was "separate and distinct" from arbitration clause, "both location-wise and functionally"). In addition, the MAD Agreement lacks a severability clause and contains an express integration clause. See MAD Agmt. (ECF No. 96-1.); cf. *Kristian, 446 F.3d at 53* (relying on savings clause in contract to sever limitation on recovery of attorney's fees in arbitration agreement). Because the offending provisions are central to the arbitration agreement, and because the MAD Agreement itself does not suggest severance is appropriate, the undersigned recommends the court invalidate the entire arbitration agreement and deny Merck's motion.

III. RECOMMENDATION

For the foregoing reasons the undersigned recommends that Merck's Motions to Dismiss or Compel Arbitration (2:18cv23, ECF No. 92; 2:18cv39, ECF No. 69; 2:18cv71, ECF No. 80) be DENIED.

IV. REVIEW PROCEDURE

By copy **[*49]** of this report and recommendation, the parties are notified that pursuant to *28 U.S.C. § 636(b) (1)(C)*:

1. Any party may serve upon the other party and file with the Clerk written objections to the foregoing findings and recommendations within fourteen (14) days from the date of mailing of this report to the objecting party, see *28 U.S.C. § 636(b) (1)*, computed pursuant to *Rule 6(a) of the Federal Rules of Civil Procedure*. *Rule 6(d) of the Federal Rules of Civil Procedure* permits an extra three (3) days, if service occurs by mail. A party may respond to

---

[10] See, e.g., *15 U.S.C. § 1117* (statutory and treble damages provisions of *Lanham Act*); *15 U.S.C. § 1681n* (punitive damages provision of Fair Credit Reporting Act); *18 U.S.C. § 1964(c)* (treble damages provision of RICO statute); *35 U.S.C. § 284* (treble damages provision of Patent Act); *31 U.S.C. § 3729(a)(1)* (civil penalty provision of False Claims Act).

any other party's objections within fourteen (14) days after being served with a copy thereof. See *Fed. R. Civ. P. 72(b) (2)* (also computed pursuant to *Rule 6(a)* and *(d) of the Federal Rules of Civil Procedure*).

2. A district judge shall make a de novo determination of those portions of this report or specified findings or recommendations to which objection is made.

The parties are further notified that failure to file timely objections to the findings and recommendations set forth above will result in a waiver of appeal from a judgment of this Court based on such findings and recommendations. *Thomas v. Arn, 474 U.S. 140, 106 S. Ct. 466, 88 L. Ed. 2d 435 (1985)*; *Carr v. Hutto, 737 F.2d 433 (4th Cir. 1984)*; *United States v. Schronce, 727 F.2d 91 (4th Cir. 1984)*.

SUPREME AUTO TRANSPORT, LLC, et al., Plaintiffs-Appellants, v. ARCELOR MITTAL USA, INC., et al., Defendants-Appellees.

Prior History: [1]** Appeal from the United States District Court for the Northern District of Illinois, Eastern Division. No. 08 C 5468—Manish S. Shah, Judge.

Supreme Auto Transp. LLC v. Mittal, 238 F. Supp. 3d 1032, 2017 U.S. Dist. LEXIS 30762 (N.D. Ill., Mar. 3, 2017)

Core Terms

steel, steel products, amended complaint, products, percent, original complaint, antitrust, direct-purchaser, plaintiffs', consumer, output, proximate causation, district court, manufactured, domestic, injuries, prices, sheets, raw, purchasers, producers, tubing, suits, cuts, anti trust law, allegations, conspiracy, words

LexisNexis® Headnotes

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Relation Back

HN1[] **Amendment of Pleadings, Relation Back**

An amended pleading relates back to the original if the amendment asserts a claim or defense that arose out of the conduct, transaction, or occurrence set out—or attempted to be set out—in the original pleading. *Fed. R. Civ. P. 15(c)(1)(B)*. The central inquiry under *Rule 15(c)* is whether the original complaint gave the defendant enough notice of the nature and scope of the plaintiff's claim that he shouldn't have been surprised by the amplification of the allegations of the original complaint in the amended one. Even significant changes to a complaint or to a class definition can relate back so long as the defendant had fair notice of the substance of the new allegations from the outset.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Relation Back

HN2[] **Amendment of Pleadings, Relation Back**

Regarding the issue of relation back of an amended complaint, the purpose of illustrative lists is to indicate that a definition includes only those objects that are similar to the objects in the list. Under the interpretative canon ejusdem generis, where general words follow specific words in an enumeration, the general words are limited to the shared characteristics of the specific words, even though the general words may ordinarily have a much broader meaning.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Class Actions

HN3[] **Class Actions, Certification of Classes**

Upon denial of certification, a putative class member may not commence a new class action beyond the time allowed by the applicable statute of limitations.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Torts > ... > Elements > Causation > Proximate Cause

HN4[] **Standing, Requirements**

Proximate causation is an essential element that plaintiffs must prove in order to succeed on antitrust or tort law claims. The purpose of the proximate causation requirement—in both antitrust and tort law—is to avoid speculative recovery by requiring a direct relation between the plaintiff's injury and the defendant's behavior. In the antitrust context, the proximate causation requirement in the past has been termed "antitrust standing," even though it has nothing to do with a plaintiff's standing to sue under U.S. Const. art. III (which requires only but-for causation, an injury-in-fact, and redressability). In the context of the *Lanham Act*, the considerations often referred under the rubric of "prudential standing" are nothing more or less than substantive questions about the coverage of a statute.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN5[] **Purchasers, Direct Purchasers**

In states that have enacted statutes that do not incorporate Illinois Brick's strict direct-purchaser requirement, downstream purchasers who pay inflated prices for consumer goods are not automatically barred from bringing antitrust suits against upstream price fixers.

Opinion by: WOOD

Opinion

[*737] WOOD, *Chief Judge*. This putative class action rests on allegations of a massive antitrust conspiracy within the domestic steel industry. Plaintiffs, indirect purchasers of steel, assert that **[**3]** eight U.S. steel producers colluded to slash output in an effort to drive up the price of steel nationwide. Years after their initial complaint, however, the plaintiffs transformed their theory of liability. The original complaint, filed in 2008, charged that plaintiffs overpaid for steel sheets, rods, and tubing manufactured by the defendants at their steel mills. Eight years later, the plaintiffs amended their complaint, asserting instead that they overpaid for end-use consumer goods, such as vehicles, washing machines, and refrigerators, that were manufactured by third parties using steel. This new product definition greatly expanded the potential scope of the class.

The district court dismissed the suit for two reasons. First, it determined that plaintiffs' amended complaint is time-barred because it redefines "steel products" in a way that gives rise to an entirely different, and exponentially larger, universe of plaintiffs. Second, in the alternative, the court held that the amended complaint does not plausibly plead a causal connection between the alleged antitrust conspiracy and plaintiffs' own injuries. **[*738]** Plaintiffs now appeal both rulings. We affirm.

I

According to the allegations **[**4]** in plaintiffs' amended complaint, which we accept as true for the purposes of this appeal, defendant Arcelor Mittal is the largest integrated producer of steel in the United States, controlling 20-25 percent of total domestic raw steel capacity. Defendant U.S. Steel is the second largest integrated producer, controlling about 16 percent of total domestic raw steel capacity. Defendant Nuncor is the nation's largest mini-mill producer, controlling 21 percent of total domestic raw steel capacity. Other major domestic steel producers include defendants Gerdau Ameristeel (10 percent), AK Steel (5 percent), Steel Dynamics (4 percent), IPSCO (2.5 percent), and Commercial Metals (2 percent). The remaining 15-20 percent of the steel market is controlled by firms that are not named defendants and are not alleged to have engaged in any anticompetitive behavior.

It can be difficult to organize and maintain a price-fixing cartel in a market with many competitors—including firms that are not party to the conspiracy—but that is what plaintiffs allege happened here. They theorize that sometime in early 2005, Arcelor Mittal organized a scheme to "improve industry discipline" by cutting raw steel output **[**5]** in order to drive up prices and reap supracompetitive profits. They point to a statement by a Mittal executive at an industry meeting in March 2005 criticizing the industry's traditional business model on the grounds that it "ensured that most producers would cut price before reducing volume." The executive then called on his competitors to coordinate supply cuts: he asked them directly to "respond to market fluctuations" by cutting production at "marginal facilities" to avoid a "race to the bottom" in steel prices. A series of industry meetings followed in early-to-mid 2005; at those meetings, multiple defendants allegedly cautioned the industry against oversupplying the market and urged everyone to "adjust ... operating levels" to preserve high prices.

According to plaintiffs, the result of all this "urging" and "cautioning" was a series of major production cuts in mid-2005. Arcelor Mittal closed five of its twelve U.S. integrated blast furnaces and reduced production at U.S. mills to 55 per-cent of total capacity. U.S. Steel reduced output from 90 percent capacity in the first quarter of 2005 to 75 percent capacity in the second quarter, and closed at least two of its twelve domestic **[**6]** blast furnaces. Nuncor similarly reduced its output from 96 percent of capacity in 2004 to 79 percent capacity in the second quarter of 2005. The smaller defendants took comparable measures. After these cuts took effect, the price of a steel sheet increased by about 25 percent. The supply cuts allegedly remained in effect until mid-to-late 2007.

Plaintiffs insist that there is no procompetitive explanation for this huge reduction in output. They allege that from early 2005 to late 2007, "annual domestic demand for steel far exceeded the United States production capacity of Defendants and other domestic producers," and that as a result, "there was a shortage of steel in the United States market" throughout the relevant period. (We can assume that there was such a shortage. We observe, however, that neither the original nor amended complaint discusses input or energy costs, or what effect these costs might have had on steel prices. This is a troubling omission, especially given the fact that a separate section of plaintiffs' complaint admits that the cost of energy, inputs, and many other commodities—including "aluminum, copper, precious metals, resins, ... plastic, ... zinc and nickel"—increased **[**7]** substantially during the class period. The rising **[*739]** cost of inputs would provide an obvious innocent explanation for the increase in steel prices*. Cf.* *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. We will not address this possibility because the defendants did not raise it on appeal. Nor will we address the impact of steel imports on the market—an issue that also has not been discussed by the parties and that would take us down a deep rabbit-hole.)

In the end, the 2005 production cuts and subsequent increases in steel price led to two major antitrust class actions. The first suit, which we call the "direct-purchaser" suit, was filed in early September 2008, with Standard Iron Works as the lead plaintiff. Standard Iron filed that suit on behalf of a putative class. See Complaint at 1, 6, *Standard Iron Works v. Arcelor Mittal*, No. 08-cv-5214 (N.D. Ill. Sept. 12, 2008), ECF No. 1. The complaint defined class members as those who purchased "steel products" directly from the defendants. In turn, it defined "steel products" as:

> [A]ll products derived from raw steel ... including, but not limited to, steel sheet and coil products; galvanized sheet and other galvanized and/or coated steel products; tin mill products; steel slabs and plates; **[**8]** steel beams, blooms, rails, and other structural shapes; steel billets, bars, and rods; steel pipe and other tubular products; and all other products derived from raw steel.

Id. at 6.

The second suit, which we call the "indirect-purchaser" suit, is the one that gave rise to this appeal. It was brought by Supreme Auto in late September 2008, just weeks after the direct-purchaser action. The original complaint did not include a formal class definition. It simply alleged that Supreme Auto was injured when it "purchased several items of steel tubing [at an inflated price] indirectly from one or more of the defendants ... for end use" and indicated that Supreme Auto was bringing suit on behalf of "all others similarly situated." Supreme Auto's original complaint included a definition of the types of steel products at issue. Its description mirrored the language from the direct-purchaser suit:

> "Steel products" means any consumer steel product including but not limited to produced flat steel sheets and coils; galvanized steel products; tin mill products; steel plates; steel beams, rails and other structural shapes; steel bars and rods; steel wire and wire rod; steel pipes and other tubular products; **[**9]** and a variety of other products derived from raw steel.

Supreme Auto stated that it was seeking relief under federal ***antitrust law***, as well as under the antitrust, consumer protection, and unjust enrichment laws of 28 states. The district court deferred proceedings on class certification in the indirect-purchaser suit until the court in the direct-purchaser suit decided whether to certify a class.

After several years of delay, in September 2015 the district court certified a class in the direct-purchaser case for the sole purpose of determining whether defendants engaged in a conspiracy in violation of federal antitrust laws. See *Standard Iron Works, 2015 U.S. Dist. LEXIS 119652, 2015 WL 5304629, at *12 (Sept. 9, 2015)*. The court denied certification on the issues of impact and damages, holding that common questions there would not predominate over individual ones. *Id.* The direct-purchaser suit was settled shortly thereafter.

In March 2016, defendants moved to dismiss the indirect-purchaser complaint. They argued that Supreme Auto failed to allege any injuries outside of its home state (Michigan), that it failed to allege that the steel it purchased was manufactured by any one of the named defendants, **[*740]** and that Supreme Auto's complaint therefore failed to state a plausible **[**10]** claim for relief.

Supreme Auto did not respond to defendants' motion to dismiss. Instead, Supreme Auto—which was, at the time, the only named plaintiff—filed an amended complaint adding 15 new plaintiffs from 11 states[1] who purchased "one or more steel products containing steel purchased from one or more of the Defendants during the Class period." Relying on jurisdiction pursuant to the *Class Action Fairness Act*, *28 U.S.C. § 1332(d)(2)*, which requires only minimal diversity and an amount in excess of $5 million (both satisfied here), the amended complaint dropped the federal antitrust claims and alleged only state-law antitrust injuries in 21 states,[2] consumer-protection injuries in 19 states,[3] and unjust enrichment injuries in 48 states and the District of Columbia. It also changed the definition of "steel products" from the definition that appeared in the original complaint to the following:

> "Steel products" means any consumer steel product for end use and not for resale, including clothes washers, clothes dryers, refrigerators, freezers, dishwashers, microwave ovens[,] regular ovens, automobiles, semi-tractor trailers, farm and construction equipment, room air conditioner units, hot water heaters, snow blowers, **[**11]** barbeque grills, lawn mowers, and reinforcing bars used in patios, driveways, swimming pools and sidewalks.

Supreme Auto further announced that it was abandoning claims related to its initial injury, which arose out of its purchase of $171 worth of steel tubing. Going forward, the firm proclaimed, it would be claiming injury solely based on its purchase of two semi-truck trailers, each priced at over $115,000.

Defendants again moved to dismiss the complaint, repeating their earlier argument that plaintiffs' injuries were too remote to establish a right to recover under either federal or state antitrust laws. They also argued that the claims set forth in the amended complaint were time-barred because they alleged a new set of injuries. The district court agreed with defendants in both respects and granted the motion to dismiss with prejudice. Plaintiffs then appealed.

---

[1] Arizona, California, Florida, Iowa, Kansas, Michigan, Montana, New York, North Carolina, South Dakota, and Tennessee.

[2] Arizona, California, District of Columbia, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Mexico, New York, North Carolina, North Dakota, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin.

[3] Alaska, Arkansas, California, Colorado, Delaware, District of Columbia, Florida, Idaho, Maine, Massachusetts, Michigan, Montana, Nebraska, Nevada, New Hampshire, New York, North Carolina, Vermont, and Wisconsin.

We begin by addressing the statute of limitations. Plaintiffs concede that their amended complaint, filed in April 2016, falls outside all relevant limitations periods. The longest period for any of plaintiffs' claims is six years, meaning that their claims expired, at the latest, sometime in the late summer of 2014—six **[**12]** years after the alleged conspiracy ended, and a year and a half before plaintiffs filed their amended complaint. Thus, the amended complaint is untimely unless the plaintiffs can show that their claims were tolled or that the amendments to their new complaint relate back to the original one.

[*741] ***HN1***[] An amended pleading relates back to the original if "the amendment asserts a claim or defense that arose out of the conduct, transaction, or occurrence set out—or attempted to be set out—in the original pleading." *Fed. R. Civ. P. 15(c)(1)(B)*. The central inquiry under *Rule 15(c)* is whether the original complaint "gave the defendant enough notice of the nature and scope of the plaintiff's claim that he shouldn't have been surprised by the amplification of the allegations of the original complaint in the amended one." *Santamarina v. Sears, Roebuck & Co., 466 F.3d 570, 573 (7th Cir. 2006)* (citing *Tiller v. Atlantic Coast Line R.R. Co., 323 U.S. 574, 581, 65 S. Ct. 421, 89 L. Ed. 465 (1945))*. Even "significant" changes to a complaint or to a class definition can relate back so long as the defendant had fair notice of the substance of the new allegations from the outset. See *Knudsen v. Liberty Mut. Ins. Co., 411 F.3d 805, 806 (7th Cir. 2005)*.

The district court held that the plaintiffs' amended complaint did not satisfy the fair-notice standard, because the transactions at issue in the first complaint (the indirect purchase of steel pipes, tubing, and sheets) were **[**13]** wholly distinct from the transactions at issue in the amended complaint (the purchase of washing machines, cars, swimming pools, and the like). We agree. The original complaint defined "steel products" by illustrating the meaning of that term through a list of examples, such as steel sheets, rods, and tubing. All of the examples listed in plaintiffs' definition are mill output—that is to say, they are steel products manufactured at steel plants. No reasonable defendant, upon reading the original definition, would have imagined that plaintiffs were in fact suing over the thousands of end-use household and commercial goods manufactured by third parties—a reading so broad that it would transform nearly every person in the country into a potential class member.

Plaintiffs fight this conclusion by emphasizing that the original definition of steel products included "any" product "derived from raw steel." They also insist that the list was in-tended to be "illustrative, not exhaustive." These points do not save the day. The word "derived," as used in the context of product manufacturing, is susceptible to multiple interpretations. To say that a product is derived from steel could mean simply **[**14]** that the product has some steel ingredients. It could just as easily mean that the product is "formed" in its entirety out of steel. See OXFORD ENGLISH DICTIONARY ONLINE, http://www.oed.com/view/Entry/50613?redirectedFrom=derive#eid (last visited Sept. 5, 2018). And while we do not doubt that the list in the original complaint was intended to be illustrative rather than exhaustive, we must ask ourselves what general category the list was designed to illustrate. Here, the items that appeared in the original complaint—steel sheets, tubes, pipes, and rods—illustrate a category along the lines of "steel products manufactured at steel mills." It cannot fairly be read as illustrating the much broader category of "all consumer goods that include any steel component." As the Supreme Court often reminds us, ***HN2***[] the purpose of illustrative lists is to indicate that a definition includes only those objects that are similar to the objects in the list. See *Begay v. United States, 553 U.S. 137, 142, 128 S. Ct. 1581, 170 L. Ed. 2d 490 (2015)*. No object in Supreme Auto's original list bore any resemblance to the end-use consumer goods listed in the amended complaint. If the original definition of steel products was intended to be all-encompassing, as plaintiffs now argue, then "it is **[**15]** hard to see why [the complaint] would have needed to include the examples at all." *Id.; cf. Circuit City Stores, Inc. v. Adams, 532 U.S. 105, 114, 121 S. Ct. 1302, 149 L. Ed. 2d 234 (2001)* (explaining that, under the interpretative **[*742]** canon *ejusdem generis*, where general words follow specific words in an enumeration, the general words are limited to the shared characteristics of the specific words, even though the general words may ordinarily have a much broader meaning).

What's more, Supreme Auto gave no indication during the first seven years of litigation that its suit included any products other than mill output. Not only did its complaint and other filings refer only to mill output, but the definition of "steel products" in plaintiffs' complaint appears to be lifted in large part from the complaint in the direct-purchasers' suit, which had been filed less than a month earlier. All parties knew that the direct-purchaser litigation was exclusively about mill output, and so the definitional similarity between the two complaints further buttressed the already-intuitive inference that Supreme Auto's suit was also about products made by the defendants at their steel mills.

The first hint of a shift in Supreme Auto's litigation strategy did not come until late 2015, when Supreme Auto **[**16]** sent subpoenas to third-party retailers such as Whirlpool and John Deere asking about their use of steel in washing machines and lawnmowers. Defendants complained about this expansive discovery tactic when they moved to dismiss the original complaint. They protested that plaintiffs' suit now purported to encompass "not only tubes but 'any consumer steel product,' from refrigerators to washing machines to other consumer products made of steel among other constituent materials." On appeal, plaintiffs assert that this statement—which defendants wrote in 2016—constitutes an "admission" that defendants knew *all along* that the suit was really about this vast array of products with some steel in their makeup. We are not persuaded. Our review of the record, as well as our interrogation of both parties during oral argument, reveals no indication that defendants had notice of plaintiffs' new claims at any time before the expiration of the limitations period. Because the original complaint did not give defendants fair notice of the nature and scope of the claims set out in the amended complaint, the amendments do not relate back under *Rule 15(c)*.

We also see no basis for tolling the statute of limitations. **[**17]** Tolling is not available under *American Pipe & Construction Co. v. Utah, 414 U.S. 538, 94 S. Ct. 756, 38 L. Ed. 2d 713 (1974)*, which suspends the applicable statute of limitations in class action suits to all members of the purported class, because the plaintiffs named in the amended complaint were not "asserted members of the class" defined in the original complaint and their claims were not encompassed by the original suit. See *id. at 553*. If there were any doubt about this (and we have none), the Supreme Court's recent decision in *China Agritech, Inc. v. Resh, 138 S. Ct. 1800, 201 L. Ed. 2d 123 (2018)*—to the effect that ***HN3***[] upon denial of certification, a putative class member may not commence a new class action beyond the time allowed by the applicable statute of limitations—also supports our reasoning. The substantial prejudice to defendants—who had no reason to think in 2008 that they should preserve evidence relating to the gargantuan number of consumer products now at issue—further counsels against applying any form of equitable tolling.

III

Given that plaintiffs' amended complaint is time-barred, we could end our analysis now without reaching the proximate causation issue. But since the district court ruled in the alternative, and we recognize that we do not necessarily have the last word, we think it prudent also to say a **[*743]** word about this basis for the **[**18]** district court's decision.

HN4[] Proximate causation is an essential element that plaintiffs must prove in order to succeed on any of their claims. The purpose of the proximate causation requirement—in both antitrust and tort law—is to avoid speculative recovery by requiring a direct relation between the plaintiff's injury and the defendant's behavior. *Holmes v. Sec. Inv'r Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)*.

In the antitrust context, the proximate causation requirement in the past has been termed "antitrust standing," even though it has nothing to do with a plaintiff's standing to sue under Article III of the U.S. Constitution (which requires only but-for causation, an injury-in-fact, and redressability). *Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 395 & n.7 (7th Cir. 1993)*; see also *Associated Gen. Contractors of Cal. Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535-43, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (providing a six-factor test for determining whether the requirements of proximate causation are satisfied in an antitrust case). The Supreme Court clarified in *Lexmark International, Inc. v. Static Control Components, Inc., 572 U.S. 118, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*, in the context of the *Lanham Act*, that the considerations often referred under the rubric of "prudential standing" are nothing more or less than substantive questions about the coverage of a statute. *Id. at 127-28*. We will thus similarly eschew the term "antitrust standing" and speak only of the requirements to bring a case under the particular statutes involved.

Along with the ordinary requirement of proximate causation, **[**19]** federal ***antitrust law*** imposes additional limits on recovery in suits for treble damages under the *Clayton Act*, *15 U.S.C. § 15*. One of the most significant is the direct-purchaser requirement announced in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 729-30, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, which held that only direct purchasers of a product can sue the supplier for damages. Allowing private suits by purchasers further down the supply chain, the Court held, would risk duplicative awards.

But Supreme Auto and its co-plaintiffs are not suing under the *Clayton Act* or any other federal statute (at least, not any more); rather, they are suing under the antitrust laws of nearly two dozen states. While most states model their antitrust statutes and jurisprudence on federal law, they are under no obligation to do so. *California v. ARC Am. Corp., 490 U.S. 93, 102, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*. Relevant to this appeal, ***HN5***[] 21 of the states where plaintiffs claim injuries have enacted statutes that do not incorporate *Illinois Brick*'s strict direct-purchaser requirement.[4] In these states, downstream purchasers who pay inflated prices for consumer goods are not automatically barred from bringing antitrust suits against upstream price fixers.

And there's more, plaintiffs say. They argue that the so-called "*Illinois-Brick* repealer states" have replaced one *per se* **[*744]** rule with **[**20]** another and now allow *all* indirect-purchaser suits to go forward, no matter how far removed the purchasers are from the production process and no matter how speculative the damages award would be. We do not read these state laws so expansively. It is one thing to say that a state is willing to allow someone other than a direct purchaser to have the opportunity to shoulder the burden of showing proximate causation; it is quite another thing to say that the state has thrown both the direct-purchaser rule *and* proximate causation out the window.

There are many suits that satisfy ordinary principles of proximate causation but nevertheless would be barred under federal law by *Illinois Brick*'s direct-purchaser requirement. This very case provides an example: many if not all *Illinois-Brick* repealer states would have allowed Supreme Auto's *original* complaint to go forward. That first complaint alleged injury based on the purchase of steel rods and similar items from distributors who, in turn, had purchased those same items from the defendants. The original complaint involves an indirect purchase (and so would be barred by *Illinois Brick* at the federal level) where the alleged injury is still **[**21]** fairly traceable to the defendant steel manufacturers.

The amended complaint is a different story. It alleges that plaintiffs purchased steel only insofar as it was one among many components of other more complex products, all of which have gone through numerous manufacturing alterations and lines of distribution. In many of these products, steel is not even a primary or necessary ingredient. We cannot imagine—and plaintiffs have not told us—how one might tackle the task of tracing the effect of an alleged overcharge on steel through the complex supply and production chains that gave rise to the consumer products at issue here. The district court thus appropriately ruled that the claims asserted here were too remote to support a claim under the different state laws plaintiffs invoked.

IV

We express no opinion here on the ultimate question whether these defendants violated the federal antitrust laws. Plaintiffs cite many statements by steel-industry executives that sound suspiciously like invitations to fix prices and out-puts. Price-fixing agreements are *per se* illegal under the *Sher-man Act*. Both direct purchasers and the federal government are authorized to sue when they believe they **[**22]** have found such an agreement. See, *e.g.*, *15 U.S.C. §§ 4* (government civil suits), 15 (private treble damage actions). But, to repeat, we do not have a federal

---

[4] See *Ariz. Rev. Stat. Ann. §§ 44-1401*, *-1408*; *Cal. Bus. & Prof. Code § 16750(a)*; *D.C. Code Ann. § 28-4509*; *Iowa Code §§ 553.12*, *.4*; *Kan. Stat. Ann. § 50-161(b)*; *Me. Rev. Stat. Ann. 10 § 1104(1)*; *Mich. Compiled Laws § 445.778(2)*; *Minn. Stat. § 325D.57*; *Miss. Code Ann. § 75-21-9*; *Neb. Rev. Stat. Ann § 59-821*; *Nev. Rev. Stat. Ann. § 598A.210*; *N.M. Stat. Ann. § 57-1-3(A)*, *(C)*; *New York Gen. Bus. Law § 340(6)*; *N.C. Gen. Stat. § 75-16*; *N.D. Cent. Code § 51-08.1-08(3)*; *S.D. Codified Laws Ann. §§ 37-1-14.3*, *-33*; *Tenn. Code Ann. § 47-25-106*; *Utah Code Ann. § 76-10-3109(1)(a)*; *Vt. Stat. Ann. tit. 9 § 2465(b)*; *W. Va. Code R. § 142-9-2*; *Wis. Stat. § 133.18(1)(a)*.

case before us. Plaintiffs have pared their action down to a case asserting violations of state laws, and we have concluded that the district court correctly decided that they have not shown how their alleged injury could be traced to defendants' conduct—a requirement that is just as essential under the state laws as it is under federal law. Also, and more straightforwardly, they failed to raise their current claims within the relevant limitations periods. For both these reasons, we AFFIRM the judgment of the district court.

Githieya v. Tel

United States District Court for the Northern District of Georgia, Atlanta Division

September 7, 2018, Decided; September 7, 2018, Filed

CIVIL ACTION NO. 1:15-CV-986-AT

Reporter

Opinion by: Amy Totenberg

Opinion

ORDER

This matter is before the Court on Defendant Global Tel*Link Corporation's ("GTL") Motion to Dismiss Plaintiffs' Second Amended Complaint [Doc. 79]. This is a proposed class action suit. GTL is a communications company that provides inmate calling services around the United States. Plaintiffs are friends and family members of inmates who set up prepaid accounts with GTL to facilitate telephone communication with their incarcerated loved ones. Plaintiffs specifically challenge GTL's "inactivity policy" (which is described below) and bring state-law claims of breach of contract and unjust enrichment as well as violations of the *Federal Communications Act ("FCA"), 47 U.S.C. § 201 et seq.*

I. PROCEDURAL BACKGROUND

Plaintiff Benson Githieya, the sole plaintiff at the time, filed the initial proposed class action complaint in this case on April 3, 2015. (Doc. 1.) The Court then stayed and administratively closed the case on January 25, 2016 upon granting Defendant's motion to compel arbitration. (Doc. 23.) On March 16, 2017, the case was **[*4]** reopened after the arbitrator found that the case was not subject to mandatory arbitration. (Doc. 28.)

Plaintiffs filed the Second Amended Complaint on October 23, 2017 (Doc. 72), which added three named plaintiffs, and Defendant filed the instant Motion to Dismiss on November 22, 2017. Plaintiffs filed a Motion for Leave to File a Sur-Reply in Opposition to Defendant's Motion to Dismiss [Doc. 102] and a Motion for Leave to Supplement the Record, or, in the Alternative, to Amend Their Complaint [Doc. 105], and both sides have filed related motions to seal. On June 25, 2018, Plaintiffs filed a Motion to Certify Class [Doc. 122].

The Court addresses Defendant's Motion to Dismiss and all related filings in this Order. The Court will address Plaintiffs' Motion to Certify Class in a separate order.

II. FACTUAL BACKGROUND[1]

GTL is a Delaware corporation that, through its wholly owned subsidiaries, provides inmate calling services throughout the United States. (Second Am. Compl., Doc. 72 ¶¶ 17-18.) GTL and its subsidiaries serve over 2,200 correctional facilities in the United States in 48 states. (*Id.* ¶ 19.) Plaintiffs bring this case as a proposed class action based on their calling service **[*5]** accounts with GTL. The Plaintiffs — Benson Githieya, Kate Boccia, Darlene Byers, and Nellie Lockett — are individuals who opened "AdvancePay" accounts with GTL between 2009 and 2014 to facilitate communication with their incarcerated family members and friends. (*Id.* ¶¶ 1-16.)

GTL's AdvancePay Accounts

Plaintiffs allege that they suffered losses when GTL applied its "inactivity policy" to their AdvancePay accounts. (*Id.* ¶¶ 1-16.) GTL's AdvancePay account system allows a customer to deposit funds into a prepaid account for the

[1] The Court derives the factual background herein from Plaintiffs' Second Amended Complaint, which the Court presumes true for purposes of resolving Defendant's Motion to Dismiss. *See Duke v. Cleland*, 5 F.3d, 1399, 1402 (11th Cir. 1993).

purpose of receiving calls from inmates at correctional facilities that contract with GTL. (*Id.* ¶ 36.) GTL then holds the funds in the account in order to pay for calls that a customer receives from an inmate. (*Id.* ¶ 38.) Thus, when an incarcerated individual calls a customer, funds are deducted from the prepaid account.

Each Plaintiff here deposited money into an AdvancePay account by entering his or her credit card information over the phone into the interactive-voice-response ("IVR") system. (*Id.* ¶ 34.) The IVR system is automated and offers customers the option to deposit $25 or $50 into their accounts.[2] (*Id.* ¶ 37.) Plaintiffs allege that the IVR's automated voice **[*6]** "may have referred to 'terms of use,' but did not state the 'terms of use.'" (*Id.* ¶ 40.) The automated system did not require Plaintiffs to affirmatively accept any terms of use prior to establishing an account, either vocally or by pressing a button. (*Id.* ¶¶ 41-42.) During the time Plaintiffs maintained their AdvancePay accounts, GTL was the exclusive provider of inmate calling services for thousands of correctional facilities in the country. (*Id.* ¶ 83.)

GTL's "Inactivity Policy"

If a GTL AdvancePay account does not see any activity for a period of 90 or 180 days,[3] GTL classifies the account as "inactive," reduces any outstanding balance to $0.00, and converts these unused funds to revenue for GTL.[4] (*Id.* ¶¶ 45-46.) Plaintiffs claim that GTL never informed them that it would reduce their account balances to $0.00 after a period of inactivity when they first established AdvancePay accounts. (*Id.* ¶¶ 79, 81.) Further, the published webpage "terms of use" contained no notice that a customer's funds would be reduced to $0.00 after an inactivity period. (*Id.* ¶ 82.) Thus, Plaintiffs allege that this "inactivity policy" constituted a taking of their funds that they were never informed of and never **[*7]** agreed to. (*Id.* ¶¶ 80-81.)

Plaintiffs' Claims

Plaintiffs bring claims for breach of contract (Count I), unjust enrichment (Count II), and violations of the *Federal Communications Act ("FCA"), 47 U.S.C. § 201, et seq.* (Count III).

In their Count I contract claim, Plaintiffs allege that GTL entered into contracts with the them and that these contracts were formed as a result of Plaintiffs' use of GTL's automated IVR system when establishing their AdvancePay accounts. (*Id.* ¶¶ 101-102.) Specifically, Plaintiffs assert that GTL expressly or implicitly agrees to hold a customer's funds until they are needed to pay for a call with an inmate. (*Id.* ¶ 105.) Each Plaintiff opened and funded a prepaid account in exchange for such a service. (*Id.* ¶ 106.) These alleged contracts, between Plaintiffs and GTL, included no express or implicit terms that permit GTL to take a customer's prepaid funds and treat such funds as revenue (a practice Plaintiffs refer to as "breakage") after a 90-or 180-day period of inactivity. (*Id.* ¶ 107.) Plaintiffs further allege that, even if there was a "term" allowing GTL to take prepaid funds, it would be unenforceable as a matter of law as an unlawful penalty. (*Id.* ¶ 108.) Consequently, Plaintiffs allege they suffered damages **[*8]** from GTL's breach of these express or implied contracts. (*Id.* ¶¶ 109-110.)

In the alternative to their contract claim, Plaintiffs bring a claim of unjust enrichment. (*Id.* ¶ 112.) Plaintiffs allege that they conferred a substantial benefit on GTL in the form of prepaid amounts deposited with, and later taken by, GTL. (*Id.* ¶ 113.) Plaintiffs further allege that GTL "deliberately sought to prevent Plaintiffs and the Class members from discovering the policy and practice." (*Id.* ¶ 117.) Plaintiffs seek disgorgement and restitution of amounts wrongfully obtained pursuant to this "unjust policy and practice." (*Id.* ¶ 119.)

---

[2] Account holders can also deposit "additional amounts during certain time periods." (Second Am. Compl., Doc. 72 ¶ 37.)

[3] It is unclear at this stage why GTL would classify an account as inactive at *either* 90 days or 180 days, but this is how Plaintiffs allege GTL applied its inactivity policy in the Second Amended Complaint.

[4] Plaintiffs' allegations are discussed in the present tense, as they allege that GTL's inactivity policy is ongoing. (*Id.* ¶¶ 45, 78, 125.)

Next and finally, Plaintiffs assert a claim for violations of the FCA. Plaintiffs allege that GTL (a common carrier engaged in interstate commerce) violated the FCA's requirement that all "charges, practices, classifications, and regulations" be just and reasonable. (*Id.* ¶¶ 20, 121, 122) (citing *47 U.S.C. § 201(b)*.) Any such "charge, practice, classification or regulation" that is unjust or unreasonable is declared unlawful. (*Id.*) GTL's "inactivity policy," according to Plaintiffs, is unjust and unreasonable — and thus unlawful. (*Id.* ¶ 123.) Noting that the FCA allows an individual to *either* ***[*9]*** make a complaint to the Federal Communications Commission ("FCC") *or* bring suit in district court, Plaintiffs assert that because none of them has made a complaint to the FCC, they have standing to bring an FCA claim in district court. (*Id.* ¶¶ 125-126) (citing *47 U.S.C. § 207*) (emphasis in Complaint.) Plaintiffs ask the Court to permanently enjoin GTL from continuing its "inactivity policy" and to award damages to Plaintiffs for the amounts removed from their accounts, as well as reasonable attorney's fees and further relief deemed necessary. (*Id.* ¶ 129.)

III. STANDARD FOR MOTION TO DISMISS

A complaint should be dismissed under *Rule 12(b)(6)* only where it appears that the facts alleged fail to state a "plausible" claim for relief. *Bell Atlantic v. Twombly, 550 U.S. 544, 555-556 (2007)*; *Fed. R. Civ. P. 12(b)(6)*. The plaintiff need only give the defendant fair notice of the plaintiff's claim and the grounds upon which it rests. *See Erickson v. Pardus, 551 U.S. 89, 93 (2007)* (citing *Bell Atlantic v. Twombly, 550 U.S. 544, 555 (2007)*); *Fed. R. Civ. P. 8(a)*. In ruling on a motion to dismiss, the court must accept the facts alleged in the complaint as true and construe them in the light most favorable to the plaintiff. *See Hill v. White, 321 F.3d 1334, 1335 (11th Cir. 2003)*.

A claim is plausible where the plaintiff alleges factual content that "allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678 (2009)*. A **[*10]** plaintiff is not required to provide "detailed factual allegations" to survive dismissal, but the "obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555*. The plausibility standard requires that a plaintiff allege sufficient facts "to raise a reasonable expectation that discovery will reveal evidence" that supports the plaintiff's claim. *Id. at 556*. A complaint may survive a motion to dismiss for failure to state a claim even if it is "improbable" that a plaintiff would be able to prove those facts and even if the possibility of recovery is extremely "remote and unlikely." *Id.*

IV. ANALYSIS

As an initial matter, Plaintiffs argue that GTL's Motion to Dismiss should be denied as procedurally improper because GTL answered Plaintiffs' First Amended Complaint and because GTL's motion "strays well beyond the pleadings." (Pl. Resp., Doc. 91 at 7-9.) The Court finds that GTL's instant Motion to Dismiss is procedurally proper. As a matter of law, an amended complaint supersedes the former pleadings; the original pleadings are abandoned by the amendment. *Hoefling v. City of Miami, 811 F.3d 1271, 1271 (11th Cir. 2016)*. Here, upon Plaintiffs' **[*11]** filing of their Second Amended Complaint, the First Amended Complaint became a legal nullity, mooting GTL's initial Answer. *Id. at 1277*; *see also SMH Int'l Corp. v. Guangdong Chant Grp., Inc., 2016 WL 4204553 at *4 (N.D. Ga. June 29, 2016)* (finding defendant's motion to dismiss second amended complaint procedurally proper where defendant had filed Answers to complaint and amended complaint).

The Court further notes that both parties have included information in their briefs outside the scope of the pleadings.[5] This reality does not necessarily make GTL's motion improper. At the motion to dismiss stage, the Court will look beyond the pleadings to consider matters of public record, for example. *Trustmark Ins. Co. v. ESLU, Inc., 153 F. Supp. 2d 1322, 1325 (M.D. Fla. 2011)*, *aff'd*, *299 F.3d 1265 (11th Cir. 2002)*. As such, the Court has

[5] Plaintiffs argue that GTL "makes much of its purported (unwritten) refund practice, even though the practice does not appear in the complaint." (Pl. Resp., Doc. 91 at 9.) GTL argues that Plaintiffs rely on extra-pleading materials as their brief is "littered with references to deposition testimony." (Def. Reply, Doc. 101 at 5.)

considered GTL's filed tariffs (Def. Mot. to Dismiss, Doc. 79, Ex. 2) and the FCC's *Second Report and Order and Third Further Notice of Proposed Rulemaking* ("2015 FCC Order," Doc. 91-1, Ex. 1),[6] in making its determination.

As another preliminary matter, the Court addresses Plaintiffs' Motion for Leave to File a Sur-Reply [Doc. 102]. Plaintiffs argue that GTL's Reply brief raises new arguments concerning the validity and contents of the above-referenced 2015 FCC Order, which GTL did not discuss in its Motion to Dismiss. (FCC Order, Doc. 91-1.) In their proposed Sur-Reply, **[*12]** Plaintiffs only address these new arguments related to GTL's interpretation of the 2015 FCC Order. In opposition, Defendant argues that no sur-reply is warranted because GTL raised no new arguments in its Reply; it simply responded to arguments in Plaintiffs' response brief. (Def. Resp. to Mot. for Sur-Reply, Doc. 104 at 2) (citing *Roelle v. Cobb County Sch. Dist., 2014 WL 4457235 at *9 (N.D. Ga. Sept. 10, 2014)*.)

Upon review, the Court **GRANTS** Plaintiffs' Motion to File a Sur-Reply [Doc. 102]. It is true that GTL's Reply raises new arguments regarding the 2015 FCC Order. Plaintiffs should have the opportunity to respond to these new arguments. *Atlanta Fiberglass USA, LLC v. KPI, Co., 911 F. Supp. 2d 1247, 1262 (N.D. Ga. 2012)* (Story, J.) (stating that sur-replies will generally be permitted where a movant raises new arguments or facts in a reply brief). Furthermore, the 2015 FCC Order is much debated between the parties, and its contents and procedural posture are relevant to multiple issues presently before the Court. Allowing the parties to more fully brief the issues involving the 2015 FCC Order only aids the Court's analysis of GTL's Motion to Dismiss. The Court therefore considers Plaintiffs' Sur-Reply in ruling on the Motion to Dismiss.

The Court now turns to the multiple substantive issues of the instant Motion to Dismiss.

A. Plaintiffs' [*13] FCA Claim (Count III)

1. Private Right of Action: Alleging Interstate Communication

Plaintiffs claim that Defendant's inactivity policy violates the FCA because it is unjust and unreasonable.

The relevant portion of the FCA states:

> (a) It shall be the duty of every common carrier *engaged in interstate or foreign communication* by wire or radio to furnish such communication service upon reasonable request therefore . . . .
> (b) All charges, practices, classifications, and regulations for and in connection with such communication service, shall be just and reasonable, and any such charge, practice, classification, or regulation that is unjust or unreasonable is declared to be unlawful . . . .

47 U.S.C. § 201 (emphasis added). In essence, Plaintiffs here challenge a "practice" under *Section 201(b)* that is allegedly connected to "interstate [] communication" as stated under *Section 201(a)*. The practice at issue is GTL "unilaterally taking money" from the prepaid accounts it provides to customers. (Pl. Resp., Doc. 91 at 29.) The "communication" (which that practice is connected to) is any calls that did take place, and would have taken place, between the individual Plaintiffs and inmates based on available funds in the accounts.

Defendant **[*14]** argues that Plaintiffs' FCA claim fails because Plaintiffs do not specifically allege that any calls they received (or could not receive) were "*inter*state, rather than *intra*state, in nature." (Def. Mot. to Dismiss, Doc. 79 at 19.) Because all Plaintiffs reside in Georgia and Plaintiffs "seem to suggest" they were only communicating with inmates housed in Georgia, Defendant argues that the FCA does not apply here. (*Id.* at 20.)

---

[6] *In the Matter of Rates for Interstate Inmate Calling Services, 30 FCC Rcd. 12763, 12775-76, 12838-62* (November 5, 2015), *80 Fed. Reg. 79136-01 (Dec. 18, 2015)*.

In their Response, Plaintiffs argue that they are not required to plead specific interstate calls and that they have sufficiently alleged that a common carrier imposed unjust or unreasonable charges, as required by the statute. Plaintiffs also emphasize that their claims are not about specific calls; rather, they are challenging GTL's practice of taking funds from prepaid accounts that are capable of receiving both interstate and intrastate calls.

The FCA defines "interstate communication" as a "communication or transmission . . . from any State . . . to any other State . . . ." *47 U.S.C. § 153(h)(22)*. The FCA does not govern purely intrastate communications. *47 U.S.C. § 152(b)* ("Nothing in this chapter shall be construed to apply to or to give the Commission jurisdiction with respect to (1) charges, **[*15]** classifications, practices, services, facilities, or regulations for or in connection with intrastate communication service by wire or radio of any carrier."); *see also* *MetroPCS Cal., LLC v. FCC, 644 F.3d 410, 413 (D.C. Cir. 2011)* (holding that the FCA "grants the FCC authority over interstate communications but reserves wholly intrastate matters for the states"); *Global Tel*Link v. FCC, 866 F.3d 397, 415 (D.C. Cir. 2017)* (stating that although the FCC has plenary authority to regulate interstate rates and practices, it does not have authority to regulate intrastate rates and practices); *In the Matter of Vonage Holdings Corp., 19 F.C.C. Rcd. 22404, 22413 ¶ 17 (2004)* ("Section 2(b) of the Act reserves to the states jurisdiction with respect to intrastate communication service . . . of any carrier.") (internal quotations omitted).

Courts (as well as the FCC) have applied an "end-to-end jurisdictional analysis" to determine whether the communication at issue is interstate, as opposed to intrastate, and therefore falls within the FCA's scope. The analysis "focuses on the 'end points' of a telephone call and considers the continuous path of communications beginning with the end point at the inception of a communication to the end point at its completion." *McClure Tel. Co. v. AT & T Commc'ns of Ohio, Inc., 650 F. Supp. 2d 699, 705 (N.D. Ohio 2009)* (citing *Nat'l Assoc. of Regulatory Utility Commissioners v. Federal Comm's Commission, 746 F.2d 1492, 1498-99 (D.C. Cir. 1984)*). Put differently, if a call originates in one state and is ultimately received in another state, the call is considered interstate **[*16]** communication.

Here, only one "end point" is identifiable based on the Second Amended Complaint — the individual Plaintiffs residing in Georgia. The other end point is unknown. The Second Amended Complaint does not specify that Plaintiffs' account money had been used to pay for actual calls to inmates housed outside of Georgia, nor does it specify that Plaintiffs intended to use their account money (before it was withdrawn by GTL) to receive calls from inmates housed outside of Georgia. Without more, the current allegations do not appear to show that Plaintiffs' FCA claim involves "interstate communication."

Plaintiffs emphasize that their FCA claim is about prepaid accounts, not individual calls, and that the accounts are capable of receiving both interstate and intrastate calls. While this is true, *47 U.S.C. § 201* suggests that Plaintiffs must still allege that these prepaid accounts were serviced "in connection with" interstate communication to state a claim. The question is whether Plaintiffs have sufficiently pled that the "calls in question" in this case (i.e., actual or intended calls between the individual Plaintiffs and inmates) include interstate calls. *McClure, 650 F. Supp. 2d at 707*. Several courts assessing this same **[*17]** sort of jurisdictional question have focused the end-to-end analysis on the specifically alleged calls - "to determine whether *particular* traffic is interstate." *Bell Atlantic Telephone Companies v. F.C.C., 206 F.3d 1, 4 (D.C. Cir. 2000)* (emphasis added); *see also* *Norris v. Glob. Tel Link Corp., No. 16-CV-11323-LTS, 2018 WL 1318922, at *2 (D. Mass. Mar. 14, 2018)* ("Norris therefore has no legal basis under the FCA to challenge GTL's rates and fees for calls that Norris made from Massachusetts to persons in Massachusetts. Norris has not alleged any calls to persons outside of Massachusetts."); *Jacobs v. Glob. Tel*Link Corp.*, No. 5:15-CV-5136, 2016 WL 5953128, at *2 (W.D. Ark. May 17, 2016) ("Plaintiffs contend that Defendant has charged them unjust and unreasonable rates for intrastate inmate calling services in violation of the FCA . . . . The Court is persuaded that the plain language of the FCA does not, of its own force, prohibit common carriers from charging exploitative rates to end users of inmate calling services for purely intrastate calls.") Even in the case cited by Plaintiffs, there was no question that the telephone communications at issue were interstate in nature. *National Ass'n of Regulatory Utility Com'rs v. FCC, 746 F.2d 1492, 1500 (D.C. Cir. 1984)* ("[I]t is undisputed that the intrastate WATS connections sought here would be used to terminate communications which originate in other states.") (internal quotations omitted). Put differently, Plaintiffs have alleged that GTL is a common carrier, operating in 48 states to **[*18]** provide inmate calling services, and that GTL is engaged in interstate commerce, but it remains unclear whether Plaintiffs have alleged that the calls (or thwarted calls) in this case involve communication that crossed state lines.

At this point, the Court need not resolve as a matter of law the specific pleading requirements to satisfy the interstate jurisdictional question under the FCA. Rather, the Court simply finds that, based on the current pleadings, Plaintiffs have not alleged sufficient facts showing "interstate communication" to state a claim under the FCA. The Court further notes that Plaintiffs represent in their briefing that they stand ready to allege that "certain Plaintiffs did, in fact, actually receive [(or] intend to receive) interstate calls before their money was taken." (Pl. Resp., Doc. 91 at 31.) The Court has no reason to doubt the veracity of Plaintiffs' representation on this point. Thus, out of an abundance of caution, the Court **DISMISSES WITHOUT PREJUDICE** Plaintiffs' FCA claim and **GRANTS LEAVE TO AMEND** this claim. Specifically, Plaintiffs have leave to add allegations regarding the interstate nature of communications involving Plaintiffs' prepaid accounts. **[*19]** Should Plaintiffs wish to pursue their FCA claim, the Court **DIRECTS** Plaintiffs to amend their Complaint no later than September 28, 2018 in accordance with this Order.[7]

2. Other Issues Affecting a Potential FCA Claim

Though the Court has dismissed without prejudice Plaintiffs' FCA claim at this juncture, the Court suspects that Plaintiffs will be able to remedy this defect based on their above-discussed representations. Therefore, the Court now considers Defendant's additional arguments pertaining to Plaintiffs' FCA claim. The Court does so to head off

---

[7] In addition to briefing this issue, Plaintiffs filed a Motion for Leave to Supplement the Record or, In the Alternative, to Amend Their Complaint [Doc. 105]. In part, Plaintiffs seek to include the deposition of GTL's corporate designee, Christopher McNitt, whose testimony shows the geographic journey a particular GTL call takes when an inmate places a call to an AdvancePay account holder — a journey involving data transmission across state lines, even if the recipient of the call is in the same state as the inmate.

Defendant correctly argues in response that the "end-to-end" analysis under the FCA focuses on the beginning and end point of a call and does not divide communications at intermediate points of switching. *Bell Atlantic Telephone Companies v. F.C.C., 206 F.3d 1, 4 (D.C. Cir. 2000)*; *McClure Tel. Co. v. AT&T Commc'ns of Ohio, Inc., 650 F. Supp. 2d 699, 705-06 (N.D. Ohio 2009)*. Thus, if a call both originates and ends in the same state — regardless of whether the communication traveled across state lines to connect those two end points — the call is considered to be intrastate. The Court therefore finds Plaintiffs' Motion to be extraneous and an incorrect application of the law with respect to Mr. McNitt's testimony about the interstate journey of GTL calls.

However, Plaintiffs also request to amend their pleadings to add allegations that individual Plaintiffs opened GTL prepaid accounts "with the intention to receive interstate calls." (Pl. Mot. to Supp., Doc. 105 at 6.) As discussed in this section, the Court has decided to permit such amendment. The Court also notes that Plaintiffs represent some of them were unable to receive calls from inmates before GTL withdrew the funds from their prepaid accounts under the inactivity policy. Given this situation, the Court understands that individual Plaintiffs may not be able to allege that they actually received interstate calls but that they *intended* to receive interstate calls — based on their particular friend or relative being incarcerated in another state — before their accounts were emptied. Moreover, upon amending the pleadings, Plaintiffs should include particularized information as to the facility location of the incarcerated friend or relative.

Accordingly, Plaintiffs' Motion to Supplement or Amend [Doc. 105] is **GRANTED IN PART** and **DENIED IN PART**.

Additionally, as part of their Motion to Supplement or Amend, Plaintiffs asked the Court to lift the seal on excerpts of Mr. McNitt's deposition testimony referenced in the Motion. Defendant opposed lifting the seal, arguing that Mr. McNitt's testimony contained proprietary and sensitive information and trade secrets. Upon review of the deposition excerpts, the Court finds that Defendant has not sufficiently shown how the information in Mr. McNitt's deposition warrants protection from public view. Mr. McNitt simply discusses how GTL facilitates calls made from inmates (in public facilities) to individuals on the outside. Defendant has not shown how this information reveals trade secrets or particularly sensitive information that is not already known in the industry or accessible to the public. The Court therefore **GRANTS** Plaintiffs' Motion to Lift the Seal [Doc. 106] and **DENIES** Defendant's Motion to File a Response Under Seal [Doc. 110].

unnecessary motion practice in the event that Plaintiffs amend with allegations plausibly indicating that interstate end-to-end calls were indeed received (or intended to be received) by one or more of the Plaintiffs.

a. Primary Jurisdiction Doctrine

The Court turns to GTL's argument that the case should be referred to the FCC under the primary jurisdiction doctrine.[8] This doctrine applies when a claim that originates in the courts requires the resolution of issues which have been placed within the special competence of an administrative agency. *Nader v. Allegheny Airlines, Inc., 426 U.S. 290 (1976)*. Courts have discretion in deciding whether or **[*20]** not to exercise jurisdiction under the doctrine. Indeed, the primary jurisdiction doctrine is "a flexible concept" with the purpose of "integrat[ing] the regulatory functions of agencies into the judicial decision making process . . . ." *Columbia Gas Transmission Corp. v. Allied Chem. Corp. 652 F.2d 503, 519 n. 14 (5th Cir. 1981)*. The doctrine "does not require that all claims within an agency's purview be decided by the agency. Nor is it intended to 'secure expert advice' for the courts from regulatory agencies every time a court is presented with an issue conceivably within the agency's ambit." *Brown v. MCI WorldCom Network Services, Inc., 277 F.3d 1166, 1172 (9th Cir. 2002)*.

Defendant GTL argues that this case should be sent to the FCC because (1) the question of whether the inactivity policy is unreasonable is one for telecommunications regulators and (2) allowing suit instead of referring the case to the FCC raises the danger of inconsistent adjudications.

Plaintiffs, on the other hand, argue against a referral to the FCC because (1) the FCC has already spoken on this issue and outlawed GTL's inactivity policy; (2) the challenged practice does not require the expertise of the FCC; and (3) GTL has substantially delayed in seeking referral.

The Court first addresses the issue of whether the FCC has spoken on this issue. While GTL argues that the FCC has **[*21]** not indicated disapproval of their breakage practice, the Court agrees with Plaintiffs that the 2015 FCC Order says otherwise. The 2015 FCC Order — which specifically pertains to inmate calling services ("ICS") - unequivocally bans all ancillary charges not enumerated in the Order. (FCC Order, Doc. 91-1 ¶¶ 161-63, 173-74.) The Order states in relevant part:

> After careful consideration of the record, including analysis of the Mandatory Data Collection, we conclude that reform is necessary to address ever-increasing fees that are unchecked by competitive forces and unrelated to costs. ICS providers, which typically have exclusive contracts to serve a facility, have the incentive and ability to continue to extract unjust and unreasonable ancillary service charges. As a result, we conclude it is necessary to reform the ancillary service charge structure imposed on consumers by ICS providers, as shown in Table Four below. *All other ancillary service charges not specifically included in Table Four are prohibited*. . . .

Table Four

Permitted Ancillary Service Charges and Taxes	**Monetary Cap Per Use /Instruction**
Applicable taxes and regulatory fees	Provider shall pass these charges through to consumers **[*22]** directly with no markup
Automated payment fees	$3.00
Fees for single-call and related services, e.g., direct bill to mobile phone without	Provider shall directly pass through third-party financial

[8] The Court notes (as did Plaintiffs) the tension in GTL arguing, on one hand, that this case is not within the purview of the FCC because it does not involve interstate communication, and on the other hand, arguing that this case should be sent to the FCC under the primary jurisdiction doctrine.

Permitted Ancillary Service Charges and Taxes	Monetary Cap Per Use /Instruction
setting up an account	transaction fees with no markup, plus adopted, per-minute rate
Live agent fee, i.e., phone payment or account set up	$5.95
Paper bill/statement fees (no charge permitted for electronic bills/statements)	$2.00
Prepaid account funding minimums and maximums	Prohibit prepaid account funding minimums and prohibit prepaid account funding maximums under
Third-party financial transaction fees, e.g., MoneyGram, Western Union, credit card processing fees and transfers from third-party commissary accounts	$50 Provider shall pass this charge through to end user directly, with no markup

(*Id.* ¶¶ 161, 163) (emphasis added.) In effect, this is a "prohibition by omission" ruling; the Order prohibits ancillary charges not otherwise listed in Table Four. The Order further explains that, by limiting ancillary charges in this way, the FCC seeks to "resolve other problems presented in the record" - at which point the Order cites to a comment that raises the very practice that Plaintiffs challenge here. (*Id.* ¶ 174.) The **[*23]** comment states: "In some cases, telecoms are actually taking prepaid moneys from prisoner accounts if for whatever reason the account is 'inactive.'" (*Id.* ¶ 174 n. 627.) Based on this language, the Court finds that the 2015 FCC Order addresses the sort of inactivity policy at issue in this case and prohibits it.[9]

GTL also argues that, because the 2015 FCC Order has been vacated and remanded by the D.C. Circuit, it should have no influence on the Court. *See* *Global Tel*Link v. FCC, 866 F.3d 397 (D.C. Cir. 2017)*. But the D.C. Circuit only vacated and remanded certain portions of the 2015 FCC Order. In relevant part, the D.C. Circuit examined whether the Order's imposition of caps on ancillary fees for inmate calling services was justified. The D.C. Circuit held that the FCC has plenary power to regulate *interstate* rates and practices connected with interstate calls, whereas the FCC does not have such authority over *intrastate* rates and practices. The D.C. Circuit also found that it could not discern from the record "whether ancillary fees can be segregated between interstate and intrastate calls." *Id. at 415*. Thus, the D.C. Circuit remanded to the FCC "to determine whether it can segregate proposed caps on interstate calls (which are permissible) **[*24]** and the proposed caps on intrastate calls (which are impermissible)." *Id. at 402*. In other words, the D.C. Circuit did not disturb the Order's determination that ancillary charges not enumerated in the Order — such as taking prepaid money in inactive accounts — are prohibited.

As noted above, the Court finds that Plaintiffs' Second Amended Complaint does not adequately allege that the challenged practice (with respect to the particular Plaintiffs here) involves interstate communication. However, if Plaintiffs properly amend their FCA claim and make a sufficient showing that some calls were (or would have been) interstate calls, the conduct at issue in this litigation would be covered — and prohibited — by the 2015 FCC order. A referral to the FCC based on primary jurisdiction would be inappropriate under these circumstances. *Fontan-de-Maldonado v. Lineas Aereas Constarricenses, S.A., 936 F.2d 630, 631 (1st Cir. 1991)* ("Of course, if the agency

---

[9] Though GTL highlights the distinction between prisoner accounts and the accounts of their family members (at issue here), the condemned conduct is essentially the same. This distinction is not a meaningful one in light of the 2015 FCC Order's broad language.

GTL also argues that Plaintiffs' citation to a passage in the FCC's Further Notice of Proposed Rulemaking — which specifically raised GTL's inactivity or breakage practices — does not constitute a final rule prohibiting such practices. This may be so. However, the 2015 FCC Order *does* specifically identify the inactivity policy and characterize it as a "problem" that the Order is meant to resolve. (FCC Order, Doc. 91-1 ¶ 174 n. 627.)

has already announced its views, there is no need to apply the [primary jurisdiction] doctrine."); *see also In re Global Tel*Link Corp. ICS Litigation*, No. 5:14-CV-5275-TLB (W.D. Ark. Jan. 29, 2015) (Doc. 29) (finding that a referral to the FCC was unnecessary where the FCC had already made available a good deal of expertise).

Another reason not **[*25]** to send the case to the FCC — should the Court conclude that the challenged conduct involves interstate communication — is that it would result in unnecessary delay. As Plaintiffs argue, courts may weigh the likelihood of delay and the timeliness of the assertion of the primary jurisdiction doctrine in deciding whether to invoke the doctrine. *Mississippi Power & Light Co. v. United Gas Pipeline Co., 532 F.2d 412, 419 (5th Cir. 1976)* (stating that "courts should be reluctant to invoke the doctrine of primary jurisdiction, which often, but not always, results in added expense and delay to the litigants"); *Morsey v. Chevron USA, Inc., 779 F. Supp. 150, 153 (D. Kan. 1991)* (declining to refer the case to the FCC where defendant waited nearly two years from the time it removed the case to assert primary jurisdiction); *In re Global Tel*Link Corp. ICS Litigation*, No. 5:14-CV-5275-TLB (W.D. Ark. Jan. 29, 2015) (Doc. 29) (declining to refer the case to the FCC because a referral risked delaying plaintiffs' day in court for many years longer). Here, the fact that GTL waited more than two years to seek referral to the FCC (after a motion to dismiss, an arbitration, discovery exchange, and depositions) weighs against referral to the FCC.[10]

For the foregoing reasons, the Court likely would not find it appropriate to refer this case to the FCC under the **[*26]** primary jurisdiction doctrine.

b. Requirement of a Prior Determination by the FCC

The Court now turns to GTL's final argument affecting Plaintiffs' potential FCA claim. GTL contends that Plaintiffs' claim further fails because private litigants are not authorized to sue for purported FCA violations without the FCC first determining that the practice in question is unreasonable. As with its argument regarding the primary jurisdiction doctrine, GTL asserts that the FCC has never found GTL's inactivity policy to be unjust or unreasonable and so Plaintiffs cannot challenge it in district court.

Plaintiffs contend that their claims do not require a prior determination by the FCC. Even so, they contend that there has already been such a determination in the 2015 FCC Order. (Pl. Resp., Doc. 91 at 24.)

The plain text of *47 U.S.C. § 207* reads as follows:

> Any person claiming to be damaged by any common carrier subject to the provisions of this chapter may **either** make complaint to the Commission as hereinafter provided for, **or** may bring suit for the recovery of the damages for which such a common carrier may be liable under the provisions of this chapter, in any district court of the United States of competent jurisdiction; **[*27]** but such person **shall not have the right to pursue both** such remedies.

(emphasis added). The statute expressly allows a plaintiff alternative options in how she seeks relief. *Mexiport Inc. v. Frontier Commc'ns Servs., Inc., 253 F.3d 573, 575 (11th Cir. 2001)* ("We . . . find that the language of *47 U.S.C. § 207* is unambiguous. The statute allows a complainant to file a complaint with the FCC *or* in federal district court but not both.") (emphasis in original)[11] ; *Digitel, Inc. v. MCI Worldcom, Inc., 239 F.3d 187, 190 (2d Cir. 2001)*

---

[10] Moreover, the potential for delay upon referral to the FCC is a real one, as the proceedings that led to the issuance of the 2015 FCC Order lasted an incredible twelve years. (FCC Order, Doc. 91-1 ¶ 1.)

[11] The fact pattern in *Mexiport* was slightly different, as the Eleventh Circuit had to determine whether the plaintiff's filing of an informal (as opposed to a formal) complaint with the FCC precluded the plaintiff from filing an action in district court. The Eleventh Circuit reasoned that the FCA does not distinguish between informal and formal complaints, and therefore the plaintiff's decision to file an informal complaint with the FCC still barred filing in district court. Despite the factual differences with the instant case, the Court finds the *Mexiport* decision to be instructive in its analysis of *Section 207*. Notably, the Eleventh Circuit in

("There can be no doubt that § 207 permits an injured party to seek relief either in federal court or before the FCC, but not in both."); Kimber Baldwin Designs, LLC v. Sily Communications, Inc. 225 F. Supp. 3d 670 (S.D. Ohio 2016) (finding that Congressional intent to provide a private right of action was clear, as evidenced by the text of the statute allowing one claiming to be damaged to bring suit in district court).

Despite this seemingly clear language, some courts have held that a prior determination by the FCC is necessary to file a Section 207 claim in district court. *See* Havens v. Mobex Network Servs., LLC, 820 F.3d 80, 89 (3d Cir. 2016); N. Cnty. Commc'ns v. Cal. Catalog & Tech., 594 F.3d 1149, 1160 (9th Cir. 2010). In particular, the Havens court concluded that the "FCC must first determine that a particular type of practice constitutes an 'unjust or unreasonable' practice . . . before a plaintiff may bring a cause of action . . . [based on] that conduct." Havens, 820 F.3d at 90.

The Eleventh Circuit has not directly addressed the "prior determination" ruling in Havens. If anything, the Eleventh **[*28]** Circuit's Mexiport decision seems to point in the other direction. Whether some version of Havens or Mexiport governs, however, there has already been a prior determination regarding the practice at issue: the 2015 FCC Order. As the Court concluded above, the 2015 FCC Order disallows practices and charges by which prison communications carriers take funds from accounts after a period of inactivity. (FCC Order, Doc. 91-1 ¶¶ 161, 173 n. 627.) That other portions of the Order have been vacated or remanded for further review does not change the FCC's disapproval of this particular practice. Thus, the Court's decision here does not run counter to the decision in Havens.

GTL next argues that if the FCC Order did condemn their inactivity policy practice, it should not be applied retroactively to the time before the issuance of the FCC Order on November 5, 2015.

But the Court agrees with Plaintiffs that the FCC Order does apply retroactively, based on the specific situation at hand. *See* Qwest Servs. Corp. v. FCC, 509 F.3d 531, 539-540 (D.C. Cir. 2007) (reversing FCC's decision not to give retroactive application to its interpretation regarding prepaid calling markets, noting the presumption of retroactivity where agency decisions do not substitute new law for old but rather are new **[*29]** applications of existing law, clarifications, and additions); AT&T v. FCC, 454 F.3d 329, 333 (D.C. Cir 2006) (stating that where a regulated entity cannot point to a previously settled rule, retroactivity is the norm; finding that an order on fees applicable to prepaid calling cards had retroactive effect). As AT&T v. FCC further discusses, where a party affected has known of the likelihood of the new policy for many years, "it assumed the risk of an adverse Commission decision." AT&T v. FCC, 454 F.3d at 334. Here, the litigation that culminated in the 2015 FCC Order, banning the breakage practice, lasted for 12 years and involved ICS issues closely related to this case.[12] (*See* FCC Order, Doc. 91-1 ¶ 1). GTL could certainly be tasked, then, with assuming the risk of an adverse decision.

Finally, the Court notes that regardless of the retroactivity of the order, Plaintiffs allege that some of them were subject to GTL's inactivity policy after the issuance of the 2015 FCC Order. (Pl. Mot. for Sur-Reply, Doc. 102 at 3, 10.) In addition, Plaintiffs argue that GTL continues to engage in this practice today. (*Id.*) In light of Plaintiffs' representations and the reasons stated above, the Court would likely find that Defendant's prior determination argument does not dispose of **[*30]** Plaintiffs' potential FCA claim.

B. Plaintiffs' State-Law Claims (Counts I and II)

1. The Filed-Rate Doctrine

Mexiport never mentioned a "prior determination" requirement before the plaintiff could file in district court; the Eleventh Circuit simply stated that a plaintiff could file a complaint with the FCC or in district court.

[12] The case before the FCC began when an individual petitioned the agency for relief from "exorbitant phone rates charged by inmate calling service (ICS) providers, so that she might afford telephone contact with her incarcerated grandson." (FCC Order, Doc. 91-1 ¶ 1.)

The Court next considers GTL's argument that all of Plaintiffs' claims are barred by the filed-rate doctrine.[13] Under the FCA, every common carrier is required to file with the FCC "schedules" (i.e., tariffs) showing all charges and showing the classification, practices, and regulations affecting such charges. *American Tel. & Tel. Co. v. Central Office Telephone, Inc., 524 U.S. 214 (1998)*; *47 U.S.C. § 203(a)*. The filed-rate doctrine "forbids a regulated entity to charge rates for its services other than those properly filed with the appropriate federal [or state] regulatory authority." *Ark. La. Gas Co. v. Hall, 453 U.S. 571, 577 (1981)*.[14] "[T]he rates a carrier charges its customers, once filed with and approved by the FCC, become 'the law' and exclusively govern the rights and liabilities of the carrier to the customer." *Hill v. Bellsouth Telecommunications, Inc., 364 F.3d 1308, 1315 (11th Cir. 2004)*.

The provisions that ground this filed-rate doctrine are modeled after similar provisions of the Interstate Commerce Act ("ICA") and "share its goal of preventing unreasonable and discriminatory charges." *Central Office, 524 U.S. at 222*. Accordingly, this doctrine is based on two core principles: nondiscrimination and nonjusticiability. *Hill, 364 F.3d at 1316*. The nondiscrimination principle stands for the proposition that similarly situated customers should pay the same rates for the same **[*31]** services. *Central Office, 524 U.S. 214 at 223*. The nonjusticiability principle seeks to ensure that regulators, rather than the courts, employ their expertise to determine the reasonableness of proposed rates. *Ark. La. Gas, 453 U.S. at 577*.

It is not disputed that GTL has tariffs on file with the FCC and Georgia's Public Service Commission ("PSC"). The relevant portion of GTL's filed tariffs states:

> The Customer may close the Advance Pay Account at any time. At the written request of the Customer (usually upon release of an inmate from an institution), any remaining balance in the Account will be refunded to the Customer after deducting any call charges, applicable taxes and transaction fees incurred during the billing cycle. **Advance Pay Accounts will be automatically dissolved following three months of zero activity (i.e., no calls placed, no account replenishment, no customer service inquiries)**.

(Def. Mot. to Dismiss, Doc. 79, Ex. 1) (emphasis added.) Essentially, GTL argues that because its inactivity policy practice was disclosed with the proper agencies, the filed-rate doctrine bars Plaintiffs' claims. (Def. Mot. to Dismiss, Doc. 79 at 11-12.)

Plaintiffs provide three reasons why their claims are not barred by the filed-rate doctrine: (1) Plaintiffs **[*32]** are not challenging GTL's rates or the services provided for those rates, but rather they are challenging a practice by GTL; (2) GTL does not actually fully disclose the "inactivity policy" in its tariffs; and (3) the FCC and Georgia's PSC have prohibited GTL's practice.

The Court concludes that Plaintiffs' claims are not barred by the filed-rate doctrine. First, the Court is persuaded that the practice Plaintiffs challenge is neither (1) a filed rate nor (2) a service or privilege provided by GTL in exchange for payment of a rate. What Plaintiffs challenge is "GTL's practice of taking Plaintiffs' money at a point when [] GTL is *not* providing services to Plaintiffs." (Pl. Resp., Doc. 91 at 11.) The filed-rate doctrine does not extend to cover a defendant's conduct that is not related to a particular rate or service associated with a rate. *See Brown v. MCI WorldCom Network Services, Inc., 277 F.3d 1166 (9th Cir. 2002)* (finding that filed-rate doctrine did not apply where plaintiff alleged that defendant created extraneous accounts and charged him unauthorized $10 monthly fee for no services rendered, as opposed to challenging the monthly fee itself as unreasonable or invalid).

GTL argues that the fact that Plaintiffs "challenge the *inactivity policy* or *classification* ***[*33]*** , rather than the rates themselves, is beside the point." (Def. Mot. to Dismiss, Doc. 79 at 13) (emphasis in original.) The Court finds otherwise. It is true that "rates do not exist in isolation," and that the Supreme Court has articulated that "[a]ny claim

---

[13] GTL's argument regarding the filed-rate doctrine is relevant to all three of Plaintiffs' claims. Thus, the discussion herein — pertaining to the filed-rate doctrine — also applies to Plaintiffs' FCA claim should the Court find, upon amendment, that it survives.

[14] Additionally, it is unlawful for a carrier to "employ or enforce any classifications, regulations, or practices affecting such charges, except as specified in such schedule." *47 U.S.C. § 203(c)*.

for excessive rates can be couched as a claim for inadequate services and vice versa. . . . An unreasonable 'discrimination in charges' [] can come in the form of a lower price for an equivalent service or in the form of an enhanced service for an equivalent price." *Central Office, 524 U.S. at 233*. But unlike in *Central Office* or other cases GTL relies upon, Plaintiffs here do not allege that a service was inadequate or that they were excessively charged. Plaintiffs allege that they received no service at all for the funds taken.

The Court's finding is further supported by the principles of nondiscrimination and nonjusticiability underlying the filed-rate doctrine. With respect to nondiscrimination, this is not a situation where GTL is seeking to apply the same rate for the same services provided. Rather, when Plaintiffs' accounts were closed, the amount of funds withdrawn by GTL was arbitrarily dependent upon how much money was in the accounts at the time. GTL did not withdraw **[*34]** any specified "rate" in exchange for a service. *In re Universal Serv. Fund Tel. Billing Practice Litig., 619 F.3d 1188, 1192 (10th Cir. 2010)* (emphasizing congressional intent under the FCA that customers receive uniform rates, terms, and conditions of service). With respect to nonjusticiability, it is not at issue here. Plaintiffs are not asking the Court to weigh in on the appropriate rates for services rendered. *Qwest Commc'ns Co. v. Aventure Commc'ns Tech., 86 F. Supp. 3d 933, 998 (S.D. Iowa 2015)* (finding that filed-rate doctrine did not apply where plaintiff did not ask the court to determine a reasonable value for services rendered).

Turning to Plaintiffs' second argument, even if the inactivity policy which Plaintiffs challenge were to be deemed a "rate" or associated service under the filed-rate doctrine, their claims still would not be barred. The actual practice at issue is not properly disclosed in the filed tariffs. As represented above, GTL's filed tariff states:

> The Customer may close the Advance Pay Account at any time. At the written request of the Customer (usually upon release of an inmate from an institutuion), any remaining balance in the Account will be refunded to the Customer after deducting any call charges, applicable taxes and transaction fees incurred during the billing cycle. **Advance Pay Accounts will be automatically dissolved following [*35] three months of zero activity (i.e., no calls placed, no account replenishment, no customer service inquiries)**.

(Def. Mot. to Dismiss, Doc. 79, Ex. 1) (emphasis added.) Contrary to GTL's assertion that the filed tariff "could not be clearer" about what happens to any remaining money in the accounts, the Court concludes that the text of the tariff does not indicate that a customer's funds will be forfeited and converted to GTL revenue. As Plaintiffs argue, the money could be returned to the customer, could be sent to a third party, could be subject to state law dealing with unclaimed property or, as was done here, could be converted to revenue. Without a more complete disclosure, customers cannot be charged with being on notice of the breakage practice, the regulatory agencies cannot be said to have approved of the practice, and GTL cannot contend that the policy Plaintiffs challenge is a tariffed practice. *Qwest, 86 F. Supp. 3d at 998* (finding that filed-rate doctrine did not apply where plaintiff (long distance phone company) alleged that defendants (local exchange carriers) wrongfully obtained funds for services not tariffed); *In re Blue Cross Blue Shield Antitrust Litig., 238 F. Supp. 3d 1313, 1332 (N.D. Ala. 2017)* (finding that filed-rate doctrine did not bar claims of particular plaintiffs since **[*36]** "no rates were filed with respect to those groups").

GTL's reliance on *Hill v. Bellsouth Telecommunications, Inc.* is also not persuasive. In *Hill*, the plaintiff challenged the particular rate she was charged by Bellsouth. *Hill, 364 F.3d at 1312*. Under the FCA, Bellsouth (like other telecommunications providers) was required to contribute a percentage of its revenue to a "Universal Service Fund" ("USF") designed to provide affordable telecommunications services to rural and low-income areas. *Id.* To comply with this requirement, Bellsouth imposed a separate itemized charge of $0.53 on each customer's monthly bill listed as the "Federal Universal Service Charge" ("FUSC"). *Id.* Both Bellsouth's total required contribution to the USF and the $0.53 amount levied on customers was included and explained in the tariffs Bellsouth filed with the FCC. *Id. at 1311-1312*. The plaintiff argued that Bellsouth misrepresented the amount it was required to contribute to the USF and overcharged customers under the FUSC charge. *Id. at 1315*. The court in *Hill* concluded that the plaintiff's claims were barred by the filed-rate doctrine because the USF and the FUSC charges were in fact filed with the regulatory agency, and allowing the plaintiff to recover would retroactively reduce her rate (as compared **[*37]** to other customers), violating the nondiscrimination principle. *Id. at 1316*.

Here, Plaintiffs challenge a practice of taking consumer funds (for no service) that is not clearly disclosed in the listed tariffs. Plaintiffs further argue that they do not seek a reduction of rates, but the return of funds improperly taken. Simply put, *Hill* is too factually distinct to be persuasive on the issue of the filed-rate doctrine.

Furthermore, as a general matter, the Eleventh Circuit has described the limited scope of the filed-rate doctrine. The Eleventh Circuit notes that this doctrine should "preclude damage claims only where there are validly filed rates." *Fla. Mun. Power Agency v. Fla Power & Light Co., 64 F.3d 614, 616 (11th Cir. 1995)* (citing *Carnation Co. v. Pacific Westbound Conference, 383 U.S. 213, 216 (1966)*).

In *Florida Municipal*, the plaintiff Florida Municipal Power Network alleged that the defendant Florida Power & Light refused to sell it network transmission service, thereby breaching the contract and violating ***antitrust law***. *Fla. Mun., 64 F.3d at 615*.[15] In turn, the defendant argued that the plaintiff's claims were barred by the filed-rate doctrine, and the district court agreed. *Id.* The district court found that the defendant's filed rate for "point-to-point service" applied to bar the plaintiff's claims regarding "network transmission" service. The Eleventh Circuit, **[*38]** however, held that there was a genuine issue of material fact as to whether point-to-point service was distinct from network transmission service. If the "two services are distinct and there is no filed network rate," the Eleventh Circuit reasoned, "then it is clear the doctrine would not confer immunity." *Id. at 616*. In reaching this conclusion, the Eleventh Circuit emphasized that "[t]he characterization of the plaintiff's claim is therefore critical to whether the filed rate doctrine will apply." *Id.* Furthermore, the Eleventh Circuit noted that a carrier cannot rely on the filed-rate doctrine when the filed tariff lacks an "essential element" and thus the carrier "in effect has no rates on file." *Id. at 616* (citing *Security Services v. Kmart Corp., 511 U.S. 431 (1994)* (finding that carrier's filed rate which specified rates to be charged per mile of carriage was "lacking an essential element" when it did not include a list of distances or a map on which a shipper could rely in calculating charges for a given shipment)). The Eleventh Circuit thus vacated and remanded the district court's grant of summary judgment in favor of the defendant. *Id. at 617*.

Here, the filed-rate doctrine does not bar Plaintiffs' claims as characterized in the Second Amended **[*39]** Complaint. Plaintiffs do not challenge, for example, the long-distance rates charged for certain calls and explicitly published in GTL's tariffs. Such a claim would presumably be barred. Rather, Plaintiffs challenge a practice not fully set forth or explained in the tariffs. In this way, the tariffs could be considered to lack an essential element. Like the failure to include a list of distances or a map in *Kmart*, GTL's failure to include that customers' funds would be forfeited and converted to GTL revenue renders the tariff incomplete for the issue at hand. *See* *511 U.S. at 433*.

Finally, revisiting the purpose of the filed-rate doctrine is instructive. Courts explain the doctrine as working "to prevent unreasonable and discriminatory charges," where the "filing requirement render[s] rates definite and certain, and [] prevent[s] discrimination and other abuses." *Brown, 277 F.3d at 1170* (internal quotations omitted). "The Filed Rate Doctrine is not some sort of panacea for any ills [d]efendants may (or may not) have." *In re Blue Cross Blue Shield, 238 F. Supp. 3d 1313, 1332 (N.D. Ala. 2017)*. And further, it does not govern the entirety of the relationship between the common carrier and its customers, and it does not affect whatever duties state law might impose on defendants. *Central Office, 524 U.S. at 230* ("[The filed-rate doctrine] **[*40]** does not serve as a shield against all actions based in state law.") (Rehnquist, J.) (concurring). In light of courts' discussion and application of the doctrine, it becomes apparent that GTL is trying to stretch the filed-rate doctrine beyond its intended purpose. For the reasons discussed above, the Court finds that the filed-rate doctrine does not bar Plaintiffs' claims in this case, at least on the record at this stage of the proceeding.

2. The Voluntary Payment Doctrine

---

[15] While *Florida Municipal* did not involve the FCA, the filed-rate doctrine "is applicable any time a regulated company has a rate for a service on file with the applicable regulatory agency." *Fla. Mun., 64 F.3d at 614*. The analysis of the doctrine is therefore instructive.

The Court next considers GTL's argument that Plaintiffs' contract and unjust enrichment claims are barred by the voluntary payment doctrine. (Def. Mot. to Dismiss, Doc. 79 at 22-23.) The relevant statutory language states:

> Payments of claims made through ignorance of the law or where all the facts are known and there is no misplaced confidence and no artifice, deception, or fraudulent practice used by the other party are deemed voluntary and cannot be recovered unless made under an urgent and immediate necessity therefore or to release person or property from detention or to prevent an immediate seize or person or property...

O.C.G.A. § 13-1-13. GTL argues that because Plaintiffs had constructive knowledge of the inactivity policy (given **[*41]** the filed tariff), and because they don't allege fraud or deception, Counts I and II fail.

The Court determines that GTL's voluntary payment doctrine argument is premature. As an affirmative defense, the voluntary payment doctrine "often entails a fact-based inquiry and is not suited for resolution at the dismissal stage." *Cableview Comm'ns of Jacksonville, Inc. v. Time Warner Cable SE LLC, 2014 WL 1268584 at *20 (M.D. Fla. March 27, 2014)*. The doctrine "can justify a complaint's dismissal under *Rule 12(b)(6) of the Federal Rules of Civil Procedure* only if the complaint shows on its face that the defense applies." *Twin City Fire Insurance Co. v. Hartman, Simons & Wood, LLP, 609 F. App'x 972, 978 (11th Cir. 2015)*.

Plaintiffs argue that GTL's practice involved a taking of deposits — an allegedly *involuntary* payment — and that they did not have constructive knowledge of this practice. At this stage, a court accepts the facts in a plaintiff's complaint as true. *Duke v. Cleland, 5 F.3d 1399, 1402 (11th Cir. 1993)*. As the resolution of this issue requires a more "fact-based inquiry," GTL may renew this issue at the summary judgment stage or at trial. *Cableview, 2014 WL 1268584 at *20*.

3. Plaintiffs' Unjust Enrichment Claim (Count II)

The Court considers GTL's final argument — that Plaintiffs' unjust enrichment claim fails because they already have an adequate available legal remedy in their contract claim. Regardless of whether Count II is pled in the alternative, GTL contends that Plaintiffs' claim cannot stand because both parties admit **[*42]** that a valid contract exists. *Goldstein v. Home Depot USA, Inc., 609 F. Supp. 2d 1340, 1347 (N.D. Ga. 2009)* (holding that a party may plead in the alternative only if one or more of the parties contests the existence of an express contract governing the subject of the dispute).

But Plaintiffs dispute whether GTL has, in fact, admitted to the existence of a contract here. Plaintiffs further argue that they are permitted to proceed to trial on alternate theories of recovery.

The Court agrees with Plaintiffs. At this early stage, it is not clear that GTL has admitted to a contract and, if so, with which Plaintiffs. (*See* GTL's Responses to Plaintiffs' Fourth Set of Interrogatories, Doc. 91-5.) Moreover, the parties appear to dispute the material terms of the agreement, and the knowledge and expectations of the parties regarding the prepaid accounts is also at odds. Under these circumstances, as alleged, a factfinder could determine that there was no "meeting of the minds." *Wingate Land & Dev., LLC v. Robert C. Walker, Inc., 558 S.E.2d 13, 15-16 (Ga. Ct. App. 2001)* (finding that, where a decision maker could conclude that there was no "meeting of the minds," a party should be able to proceed on alternate theories of recovery).

The Court therefore determines that Plaintiffs' unjust enrichment claim may proceed as an alternative to the breach of contract claim. **[*43]** If this case proceeds through discovery, Defendant may once again raise this argument if the evidence shows that a contract did, in fact, exist between individual Plaintiffs and GTL.

V. CONCLUSION

For the foregoing reasons, the Court **DENIES** Defendant's Motion to Dismiss [Doc. 79]. Additionally, the Court **GRANTS** Plaintiffs' Motion for Leave to File a Sur-Reply [Doc. 102]; **GRANTS IN PART** and **DENIES IN PART**

Plaintiffs' Motion to Supplement or Amend [Doc. 105]; and **GRANTS** Plaintiffs' Motion to Lift the Seal [Doc. 106] and **DENIES** Defendant's Motion to File a Response Under Seal [Doc. 110].

IT IS SO ORDERED this 7th day of September, 2018.

Opinion

ORDER GRANTING DEFENDANTS' MOTION FOR SUMMARY JUDGMENT AND DENYING APPLICATIONS TO FILE UNDER SEAL

I. INTRODUCTION

Plaintiffs VBS Distribution, Inc. ("VBS Distribution") and VBS Television, Inc. ("VBS Television") brought this case against Defendants Nutrivita Laboratories, Inc., Nutrivita, Inc., US Doctors' Clinical, Inc., Robinson Pharma, Inc., KVLA, Inc., Tuong Nguyen, Tram Ho, and Jenny Do a/k/a Ngoc Nu. (Dkt. 229 [Third Amended Complaint, hereinafter "TAC"].) The parties' dispute arises out of their competing nutritional supplements and television programs.

Plaintiffs allege the following thirteen causes of action: (1) unfair competition under the Lanham Act, (*id.* ¶¶ 119-23), (2) false advertising under the *Lanham Act*, (*id.* ¶¶ 124-28), (3) unfair competition, false advertising, and deceptive trade practices **[*3]** under California common law and false advertising under *California Business & Professions Code §§ 17500*, (*id.* ¶¶ 129-30), (4) theft of trade secrets under the federal Defend Trade Secrets Act, (*id.* ¶¶ 131-32), (5) theft of trade secrets under the California Uniform Trade Secrets Act, (*id.* ¶¶ 133-35), (6) trade dress infringement under the Lanham Act, (*id.* ¶¶ 136-37), (7) trade dress infringement under California common law, (*id.* ¶¶ 138-41), (8) antitrust under *sections 1* and *2* of the Sherman Act, (*id.* ¶¶ 142-43), (9) antitrust under the California Cartwright Act, (*id.* ¶¶ 144-45), (10) interference with contractual relationships under California law, (*id.* ¶¶ 146-47), (11) interference with prospective economic advantage under California law, (*id.* ¶¶ 148-49), (12) civil conspiracy under California law, (*id.* ¶¶ 150-51), and (13) breach of fiduciary duties under California law, (*id.* ¶¶ 152-53).

Now before the Court is Defendants' motion for judgment on the pleadings, (Dkt. 239), and Defendants' motion for summary judgment, (Dkt. 240). For the following reasons, the motion for judgment on the pleadings is converted to a motion for summary judgment, and that converted motion as well as Defendants' motion for summary judgment are **GRANTED**.

II. FACTUAL [*4] ALLEGATIONS

Plaintiffs VBS Distribution and VBS Television are two corporations with the same Chief Executive Officer and Chairman, Joseph Nguyen. (TAC ¶ 25.) Plaintiffs generally allege that Defendants are engaged in two unlawful schemes. The first scheme involves the false advertising of a dietary supplement. Defendants Nutrivita Laboratories, Inc., US Doctors' Clinical, Inc., Robinson Pharma, Inc., Tuong Nguyen, and Jenny Do (collectively, "Supplement Defendants") manufacture and sell "Arthro-7," a dietary supplement for joint relief. (*Id.* ¶ 22.) Plaintiff VBS Distribution manufactures and sells a competing dietary supplement called JN-7 Best. (*Id.*) Plaintiffs allege that "[t]he general marketplace for the parties' products is the elderly population in the United States," along with persons of Vietnamese descent living in the United States. (*Id.*) Plaintiffs allege that Arthro-7 has 60% of the market and JN-7 Best has 10% of the market. (*Id.*)

Plaintiffs allege that Supplement Defendants have committed several wrongful acts "solely or primarily" to drive JN-7 Best out of the market. (*Id.*) Supplement Defendants purportedly make a number of false statements in advertising Arthro-7. (***[*5]*** *Id.* ¶ 44.) For example, Supplement Defendants claim that Arthro-7 is "100% natural herbal," that over 8 million bottles have been sold, and that Arthro-7 has been "clinically tested" and is "Doctor Recommended." (*Id.* ¶¶ 44-51.) Plaintiffs claim that all of these statements are false. (*Id.*) Plaintiffs also claim that Supplement Defendants wrongfully filed a lawsuit against Plaintiff VBS Distribution in 2013, alleging various causes of action regarding the sale of JN-7 Best, including copyright and trademark infringement. (*Id.* ¶¶ 88-103.) The lawsuit settled in 2015, and Plaintiffs now claim that it was a baseless lawsuit brought to drive JN-7 Best out of the market. (*Id.*)

The second general scheme at issue involves the parties' respective television shows. Plaintiff VBS Television is a television broadcast company "primarily aimed at the Vietnamese community and is broadcast primarily in the Vietnamese language." (*Id.* ¶ 24.) VBS Television produces a show named "DAU GIA TREN TRUYEN HINH" ("Fight Price on Television"). (*Id.* ¶ 27.) The show is a live auction program which primarily auctions diamonds. (*Id.*) The show was created in 2011, and in April 2012, Defendant Tram Ho became a host **[*6]** of the show. (*Id.* ¶ 60.) When she was hired by VBS Television, Ho allegedly signed a confidentiality agreement agreeing "to preserve and protect the confidentiality of [VBS Television's] proprietary information." (*Id.* ¶ 62.) Ho also allegedly signed an employment agreement agreeing to be exclusively employed by VBS Television. (*Id.* ¶ 64.)

Plaintiffs allege that in the spring of 2016, they discovered that Ho was appearing on a rival television show called "Diamond at a Surprise Low Price," which is produced by Defendant KVLA, a rival television station. (*Id.* ¶ 67.) Plaintiffs also allege that at that time, Ho was still an employee of VBS Television. (*Id.*) Defendants KVLA and Jenny Do (with Tram Ho collectively, "Show Defendants") produce the show, and Plaintiffs claim it is essentially identical to VBS Television's show. (*Id.* ¶ 71.) For example, Plaintiffs claim that the two shows have the same hostess, some of the same vendors, the same technician, the same time slot of 5:00 p.m. to 7:00 p.m., "the least to most expensive format," "the same auctioning of approximately 30 items each show," and the same product price range from $300 to $3,000. (*Id.* ¶ 72.) Plaintiffs also claim that Show **[*7]** Defendants, through Tram Ho, have stolen VBS Television's employees, customer information, and other trade secrets. (*Id.* ¶¶ 77-84.)

III. MOTION FOR SUMMARY JUDGMENT

Defendants move for summary judgment on Plaintiffs' claims for trade dress infringement, trade secret misappropriation, interference with contractual relationships, interference with prospective economic advantage, antitrust, false advertising, and unfair competition. (Dkt. 240.)

The Court may grant summary judgment on "each claim or defense—or the part of each claim or defense—on which summary judgment is sought." *Fed. R. Civ. P. 56(a)*. Summary judgment is proper where the pleadings, the discovery and disclosure materials on file, and any affidavits show that "there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Id.; see also Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. The party seeking summary judgment bears the initial burden of demonstrating the absence of a genuine issue of material fact. *Celotex Corp., 477 U.S. at 325*. A factual issue is "genuine" when there is sufficient evidence such that a reasonable trier of fact could resolve the issue in the nonmovant's favor. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A fact is "material" when its resolution might affect the outcome of the suit under **[*8]** the governing law, and is determined by looking to the substantive law. *Id.* "Factual disputes that are irrelevant or unnecessary will not be counted." *Id. at 249*.

Where the movant will bear the burden of proof on an issue at trial, the movant "must affirmatively demonstrate that no reasonable trier of fact could find other than for the moving party." *Soremekun v. Thrifty Payless, Inc., 509 F.3d 978, 984 (9th Cir. 2007)*. In contrast, where the nonmovant will have the burden of proof on an issue at trial, the moving party may discharge its burden of production by either (1) negating an essential element of the opposing party's claim or defense, *Adickes v. S.H. Kress & Co., 398 U.S. 144, 158-60, 90 S. Ct. 1598, 26 L. Ed. 2d 142 (1970)*, or (2) showing that there is an absence of evidence to support the nonmoving party's case, *Celotex Corp., 477 U.S. at 325*. Once this burden is met, the party resisting the motion must set forth, by affidavit, or as otherwise provided under *Rule 56*, "specific facts showing that there is a genuine issue for trial." *Anderson, 477 U.S. at 256*. The court must examine all the evidence in the light most favorable to the nonmoving party, and draw all justifiable inferences in its favor. *Id.; United States v. Diebold, Inc., 369 U.S. 654, 655, 82 S. Ct. 993, 8 L. Ed. 2d 176 (1962)*; *T.W. Elec. Serv., Inc. v. Pac. Elec. Contractors Ass'n, 809 F.2d 626, 630-31 (9th Cir. 1987)*. The court does not make credibility determinations, nor does it weigh conflicting evidence. *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 456, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. But conclusory and speculative testimony in affidavits and moving papers is insufficient to raise triable **[*9]** issues of fact and defeat summary judgment. *Thornhill Pub. Co., Inc. v. GTE Corp., 594 F.2d 730, 738 (9th Cir. 1979)*.

A. Trade Dress Infringement

Plaintiffs bring two claims for trade dress infringement: claim 6 for trade dress infringement under the *Lanham Act*, (TAC ¶¶ 136-37), and claim 7 for trade dress infringement under California common law, (*id.* ¶¶ 138-41). Plaintiffs allege that the trade dress of the "Fight Price on Television" Show is comprised of:

> a) the unique style and format of the show, b) its time slot and date selection, each week on alternate weekdays, from 5 to 7 p.m., on Tuesdays and Thursdays, c) the price range for its auctioned items, ranging from about $300 to $3000, d) its "least to most expensive" format in which the least expensive items are sold first, ascending to the most expensive items at the end of the show, e) the length of the show, 2 hours, f) its focus on live TV auctions of jewelry, particularly diamonds, g) its carefully selected vendors, who appear on the show with the show's host, h) unique and proprietary camera angle and special lighting techniques developed by Plaintiffs using an Apple ipad tablet, i) the number and selection of items sold, usually about 30 items.

(*Id.* ¶ 27.)

"Trade dress refers generally to the total **[*10]** image, design, and appearance of a product and may include features such as size, shape, color, color combinations, texture or graphics." *Clicks Billiards, Inc. v. Sixshooters, Inc., 251 F.3d 1252, 1257 (9th Cir. 2001)* (citation and quotations omitted). To prove a trade dress claim, the plaintiff must show "(1) that its claimed dress is nonfunctional; (2) that its claimed dress serves a source-identifying role either because it is inherently distinctive or has acquired secondary meaning; and (3) that the defendant's product or service creates a likelihood of consumer confusion." *Id. at 1258*. "[A] product feature is functional . . . if exclusive use of the feature would put competitors at a significant non-reputation-related disadvantage." *Qualitex Co. v. Jacobson Prods. Co., 514 U.S. 159, 165, 115 S. Ct. 1300, 131 L. Ed. 2d 248 (1995)*. If features of a claimed trade dress are all functional, the plaintiff must show that the features are combined together in a nonfunctional way to avoid a finding of functionality. *HWE, Inc. v. JB Research, Inc., 993 F.2d 694, 696 (9th Cir. 1993)*. Although functionality is a question of fact, summary judgment is appropriate if the plaintiff "ma[kes] no showing that its [product] had non-functional features or a non-functional arrangement." *Id.* (affirming the district court's finding that the plaintiff's product, a massage table, was functional and granting summary judgment in the defendant's favor). **[*11]**

Here, Plaintiffs make no showing that the alleged trade dress has nonfunctional features or a nonfunctional arrangement. The elements of the claimed trade dress, individually and in combination, are functional. As Joseph Nguyen, Plaintiffs' own CEO and Chairman, explained in his deposition, the lighting techniques and camera angles function to make the diamonds on the television show "sparkle" and appear brighter. (*See* Dkt. 243-9 [Deposition of Joseph Nguyen, hereinafter "Nguyen Depo."] at 133:2-22.) Nguyen also explained that the lighting techniques are common in jewelry stores, which demonstrates that the techniques are intrinsic to the sale of jewelry. (*Id.* at 133:9-15.) With respect to the time and date of the show, Nguyen testified that they were chosen as times that would maximize viewership and auction purchases. (*Id.* at 116:13-117:7.) Specifically, Nguyen chose the time slot between 5 p.m. and 7 p.m. because it is the time when most people are with their family and can watch the show together. (*Id.* at 119:1-10, 121:16-122:3.) Nguyen also testified that the show sells thirty products per episode because it is the optimal amount to sell during a two-hour long show, and the products **[*12]** are priced between $300 to $3000 because the range is what the average target consumer can afford. (*Id.* at 122:5-124:6.) Finally, Nguyen testified that the products are shown in the order of lowest price to highest price to maximize the likelihood that the products will be sold, because more viewers tune in towards the end of the show. (*Id.* at 124:7-20.) In sum, Plaintiffs' CEO's own explanations regarding each element of the alleged trade dress indicate that the elements are functional. They serve to maximize the number of viewers and the likelihood that the viewers will purchase the auction items. To find that these elements are nonfunctional would "put competitors at a significant non-reputation-related disadvantage." *Qualitex Co., 514 U.S. at 165*.

Importantly, Plaintiffs submit no evidence indicating that the elements of its claimed trade dress, individually or taken as a whole, operate in any nonfunctional manner. Plaintiffs submit no survey indicating that consumers associate the alleged trade dress with Plaintiffs. Plaintiffs do submit a declaration from one of VBS Television's vendors, Aleksei Lam, who states that Plaintiffs' show "is unique and source identifying, with an unusual, arbitrary format and **[*13]** screen appearance which is strongly and uniquely associated by customers, viewers, and those in the industry, with VBS." (Dkt. 270 ¶ 16.) Lam further states that "the VBS show has a unique format and overall appearance, a 'look and feel,' including how the screens on the Show appear, its time slot, duration, and many other features which are not dictated by the nature of the products shown on the Show." (*Id.*) However, this declaration is not evidence that Plaintiffs' trade dress is nonfunctional. While Lam repeatedly refers to the show as "unique," Lam fails to describe what exactly is unique about the show, the visual impression she gets from the show, or any nonfunctional aspect of the show. In other words, Lam draws a conclusion that the show is nonfunctional, but provides no support for that conclusion.

Surprisingly, Plaintiffs did not even provide the Court with a copy or clip of their television show to demonstrate that it is nonfunctional. Plaintiffs only submitted the following three snapshots, which are still images from their television show:

(Dkt. 268 Ex. 10.) These snapshots do not show how Plaintiffs' alleged trade dress, comprising of elements like the lighting technique, **[*14]** the time and date the show airs, the length of the show, and the prices of the products, operate together in some nonfunctional manner. These snapshots cannot even demonstrate how things like the length and the time of the show operate in a way that renders the purported trade dress unique.[1]

Because Plaintiffs fail to provide any evidence of the nonfunctionality of their trade dress, summary judgment in favor of Defendants on Plaintiffs' claims for trade dress infringement is appropriate.

B. False Advertising

Plaintiffs assert a claim for false advertising in violation of the federal *Lanham Act*, *15 U.S.C. § 1125*. (TAC ¶¶ 124-28.) The elements of a Lanham Act false advertising claim are:

> (1) a false statement of fact by the defendant in a commercial advertisement about its own or another's product; (2) the statement actually deceived or has the tendency to deceive a substantial segment of its audience; (3) the deception is material, in that it is likely to influence the purchasing decision; (4) the defendant caused its false statement to enter interstate commerce; and (5) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself **[*15]** to defendant or by a lessening of the goodwill associated with its products.

Southland Sod Farms v. Stover Seed Co., 108 F.3d 1134, 1139 (9th Cir. 1997).

In support of their claim, Plaintiffs allege Defendants make the following false statements regarding Arthro-7: (1) "100% natural herbal," (TAC ¶¶ 44-45), (2) "Over 8 Million Bottles Sold!" (*id.* ¶ 46), (3) the product is endorsed by a doctor and "Doctor Recommended," (*id.* ¶¶ 47-49), and (4) the product is clinically tested and "[p]ositive results utilizing Arthro-7 have been supported by a UCLA researcher," (*id.* ¶¶ 48, 56). Plaintiffs also complain that Defendants fail to disclose that individuals who "use or handle" Arthro-7 are exposed to lead and other dangerous materials. (*Id.* ¶ 55.) The Court considers each alleged false statement in turn.

1. "100% natural herbal"

Plaintiffs allege it is false to advertise Arthro-7 as "100% natural herbal" because the product contains animal products. (TAC ¶ 44.) Plaintiffs refer specifically to an advertisement that Defendants ran in a newspaper in 2013, which contains the following phrase in Vietnamese: "100% tu duoc thao thien nhien." (*Id.* Ex. 3.) Plaintiffs claim that this phrase translates to "100% natural herbal." (TAC ¶ 44.)

Defendants argue that Plaintiffs' translation **[*16]** of the phrase is incorrect. Defendants argue that "duoc thao," means "dietary supplement," not "herbal." (Dkt. 240-2 at 22.) In support, Defendants provide the deposition testimony of Joseph Nguyen, who testified that "duoc thao" means "dietary supplement." (Nguyen Depo. at 241:11-23.) However, Nguyen has also submitted a declaration stating that the full phrase, "100% tu duoc thao thien nhien" means "100% from natural herb." (Dkt. 268 Ex. 29 ¶ 51.) There is therefore a disputed issue of fact as to the translation of Defendants' advertisement, and whether it is false.

Nevertheless, summary judgment for Defendants is still appropriate because there is no evidence that Plaintiffs were in any way harmed by this limited advertisement. Plaintiffs "ordinarily must show economic or reputational

---

[1] Plaintiffs argue that the Ninth Circuit has held that the "overall combination" of Plaintiffs' trade dress is non-functional. (Dkt. 249 at 20.) Plaintiffs refer to an order from the Ninth Circuit issued on September 15, 2017, which reversed and remanded the Court's order denying Plaintiffs' motion for a preliminary injunction. (Dkt. 83.) Plaintiffs' argument is without merit, and overstates the Ninth Circuit's ruling. The Ninth Circuit did not hold that Plaintiffs' television show was nonfunctional, but rather clarified that Plaintiffs *may* have a protectable trade dress in the overall "look and feel" of the show, even if the individual elements of the show are functional. (*Id.* at 2.)

injury flowing directly from the deception wrought by [Defendants'] advertising; and that that occurs when deception of consumers causes them to withhold trade from [Plaintiffs]." *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 133, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*. Here, there is no evidence that Plaintiffs suffered any economic or reputational injury from the "100% natural herbal" advertisement. In fact, Defendants present evidence that Plaintiffs suffered no lost profits between **[*17]** 2013 and 2014, when the advertisement ran in the newspaper, because Plaintiffs' sales of JN-7 Best actually increased in that time period. Specifically, Defendants submit Plaintiffs' detailed sales records of JN-7 Best from April 2012 to March 2017. (Dkts. 243-19-243-23.)

Plaintiffs do not dispute the authenticity or accuracy of these sales records. Moreover, Plaintiffs provide no other evidence from which any reasonable trier of fact could conclude Plaintiffs were injured or likely to be injured in any way by Defendants' advertisement. Plaintiffs only submit a statement from an expert indicating that "various statements on the Arthro-7 package are misleading and have a positive impact on a consumer's likelihood of purchasing Arthro-7." (*See* Dkt. 249-1 [Pls.' Response to Defs.' Statement of Undisputed Facts, hereinafter "SUF"] ¶ 93.) This expert opinion goes to whether the advertisement is misleading, but does not explain how Plaintiffs have been injured or are likely to be injured from any of the purportedly misleading statements.

2. "Over 8 Million Bottles Sold!"

Defendants' advertisement indicating that they have sold over 8 million bottles of Arthro-7 is not false. Defendants submit **[*18]** a summary chart of all the sales of Arthro-7 beginning in 1998 and ending in 2017. (Dkt. 160-25.) This chart shows that 8,842,335 bottles of Arthro-7 were sold in that time period. (*Id.*) Alberto Miranda, an employee of Defendant US Doctors' Clinical who manages the database of sales for Arthro-7, testified in his deposition that Defendants produced in discovery over 40,000 pages of detailed sales records beginning in 1998 to show how many bottles have been sold. (Dkt. 241-28 [Deposition of Alberto Miranda] at 12:10-19, 48:3-14.) Miranda confirmed that the database reflected total sales of 8,842,335 bottles from July 7, 1998 to October 10, 2017. (*Id.* at 70:23-71:22.)

Plaintiffs argue that Defendants' sales records are unreliable because Defendants' employees have testified that they do not know how many bottles of Arthro-7 have been sold. For example, Plaintiffs point to deposition testimony from Defendant Tuong Nguyen, the owner of Nutrivita Laboratories. (Dkt. 268 Ex. 14 at 57:22-58:17.)[2] When Tuong Nguyen was asked how many bottles of Arthro-7 have been sold, he said that he did not remember and could not provide an estimate. (*Id.*) This testimony does not create a disputed issue of **[*19]** fact as to whether 8 million bottles of Arthro-7 have been sold. Tuong Nguyen's testimony does not contradict the 40,000 pages of sales records provided by Miranda, the custodian of those records, which show over 8 million bottles have been sold. Tuong Nguyen only testified that he did not know how many bottles had been sold—he did not testify that less than 8 million bottles had been sold.

3 & 4. "Doctor Recommended" and tested by a "UCLA Researcher"

Plaintiffs claim that Arthro-7's packaging contains several false statements. The package states that Arthro-7 is "clinically tested" and "Doctor Recommended," and that "Positive results utilizing Arthro-7 have been supported by a UCLA researcher." (TAC Ex. 5.) The packaging also has a picture of a man in a doctor's coat, identified as "Dr. John E. Hahn, Board certified foot surgeon." (*Id.*) Plaintiffs argue that the picture and description of Dr. Hahn is misleading because Dr. Hahn is a Doctor of Podiatric Medicine, and not a Medical Doctor.

Defendants submit evidence showing that each of the statements on the package are true. Defendants submit a March 27, 2013, article published in a journal called Nutrition and Dietary Supplements. (Dkt. **[*20]** 240-8.) The article publishes the results of a 12-week clinical study conducted in Shanghai, China. (*Id.*) Four of the ten authors of the article are from the Department of Pathology and Laboratory Medicine at the David Geffen School of

[2] This deposition was taken in the prior case between the parties, which was filed in 2013.

Medicine at the University of California at Los Angeles. (*Id.*) The article provides evidence that Arthro-7 is clinically tested, and positive results from Arthro-7 are supported by the research of researchers at UCLA. (*Id.*) Plaintiffs nevertheless argue that the statements that Arthro-7 is "clinically tested" and "supported by a UCLA researcher" are false or misleading, because the studies took place in China. (Dkt. 249 at 13.) Plaintiffs' argument is without merit. Nothing on the Arthro-7 package denies that the studies took place in China.

The parties do not dispute that Dr. Hahn is a Board-certified podiatrist. Plaintiffs claim that describing him as a "doctor" is false, however, because Dr. Hahn's podiatry license has expired and he is not a medical doctor. But a podiatrist is a doctor of podiatric medicine who is qualified by education and training to diagnose and treat conditions affecting the foot, ankle, and related structures of the leg. Plaintiffs **[*21]** provide no admissible evidence showing that "doctor" necessarily means one who is currently licensed or one who has a medical degree. Plaintiffs instead simply refer to hearsay opinions, including the opinion of the "Attorney General of the state of California that podiatrists are not physicians," and a segment from the television show, *Seinfeld*, for the proposition that "people do not think podiatrists are doctors." (SUF ¶ 88.) This evidence is clearly inadmissible hearsay and insufficient to defeat summary judgment.

5. Exposed to Lead and Other Statements

Plaintiffs also complain about a number of other statements claiming that Arthro-7 is safe. Plaintiffs claim that Defendants fail to disclose, for example, that there are "toxic lead levels" in Arthro-7. Plaintiffs also claim that Defendants falsely represent that Arthro-7 contains no heavy metals and is "GMP Compliant." (Dkt. 249 at 13-14.) As an initial matter, Defendants did not address these alleged false advertisements because most of them are not included in the Plaintiffs' TAC. In any event, Plaintiffs offer no admissible evidence that these alleged false advertisements are in fact false or misleading. Plaintiffs only cite **[*22]** to allegations in other lawsuits involving Arthro-7. (Dkt. 249 at 13 n.13, 14 n.15.) These allegations are not evidence—they are merely inadmissible hearsay allegations. Without more, Plaintiffs have failed to present any evidence to support their claim that these advertisements are false.

C. Trade Secrets Misappropriation

Plaintiffs bring two claims for trade secrets misappropriation: claim 4 for theft of trade secrets under the federal *Defend Trade Secrets Act*, (TAC ¶¶ 131-32), and claim 5 for theft of trade secrets under the *California Uniform Trade Secrets Act*, (*id.* ¶¶ 133-35). Plaintiffs identify four categories of purported trade secrets: Plaintiffs' customer lists, employee information, vendor information, and "jewelry photographic technique." (SUF ¶ 36.)

To prevail on their trade secrets misappropriation claims, Plaintiffs must show they have a legally protectable trade secret that has been misappropriated by Defendants. *See* *Cal. Civ. Code § 3426.1(b)*; *18 U.S.C. § 1832*. To prove that information constitutes a legally protectable trade secret, Plaintiffs must first demonstrate that they took reasonable steps to keep the information confidential. *See* *Cal. Civ. Code § 3426.1(d)*; *18 U.S.C. § 1839(3)*. To prove misappropriation of that trade secret, Plaintiffs must show **[*23]** that Defendants acquired the trade secret by improper means, or disclosed or used the trade secret without consent. *See* *Cal. Civ. Code § 3426.1(b)*; *18 U.S.C. § 1839(5)*.

Plaintiffs have failed to show that Defendants misappropriated the four alleged trade secrets. First, Plaintiffs offer no evidence that their customer lists were kept confidential. VBS Television's CEO, Joseph Nguyen, admitted and Defendant Tram Ho confirmed that VBS Television provided its customer lists to its vendors, who then delivered products to the Show's customers. (Nguyen Depo. 184:19-185:13; Dkt. 256 Ex. 170 [Deposition of Tram Ho, hereinafter "Ho Depo."] at 180:24-181:2.) For this claim, Plaintiffs rely on the conclusory declaration of Aleksei Lam, with whom Plaintiffs had a vendor agreement. (SUF ¶ 3 [citing Dkt. 256 Ex. 160].) Lam states that VBS Television has "always" had a contractual understanding, whether written or oral, with its vendors to "protect the confidentiality . . . of VBS' customers' [sic] lists and customer information." (Dkt. 256 Ex. 160 ¶¶ 6-7.) However, Lam's declaration is hearsay with respect to his statements about agreements between VBS Television and other vendors, and his own vendor agreement contains no confidentiality agreement. **[*24]** (*See* Dkt. 256 Ex. 162 at 17.) The other vendor agreements cited by Plaintiffs likewise contain no confidentiality provisions. (Dkt. 256 Ex. 162 at 33-69.) Because Plaintiffs have failed to show that the customer lists were kept secret, the customer lists cannot constitute a protectable trade secret. *See* *Ruckelshaus v. Monsanto Co., 467 U.S. 986, 1002, 104 S. Ct. 2862, 81 L. Ed. 2d 815 (1984)* (stating that "[i]f an individual discloses his trade secret to others who are under no obligation to protect the confidentiality of the information, or otherwise publicly discloses the secret, his property right is extinguished") (internal citations omitted).

As for VBS Television's employee information, Plaintiffs have failed to show what specific employee information was confidential or how it was allegedly misappropriated. Plaintiffs argue that Defendant Tram Ho was "[a]rmed with VBS' confidential employee information," which she used to "poach[]" VBS employees through promises of higher compensation. (Dkt. 249 at 25-26.) In response to this claim, Show Defendants produced their database of employee files so that Plaintiffs could cross-check the information with Plaintiffs' own employee database. (SUF ¶ 51.) However, Plaintiffs have still made no showing that Show Defendants possess **[*25]** any information on Plaintiffs' employees, much less confidential information. Employees are allowed to share their salary with competitors and negotiate better compensation packages. Plaintiffs have failed to show that their employee compensation information is a legally protectable trade secret, let alone that Defendants acquired any information through improper means.

Plaintiffs have also failed to show that Defendants misappropriated any confidential vendor information. Plaintiffs allege that vendor information such as "vendor names, personal contact information such as email address[es] and cell phone numbers, and individual contacts at vendor companies," among other things, constitute trade secrets. (*Id.* ¶ 36.) However, anyone watching the Fight Price Show can see the vendor's name and find its contact information. (*See* Dkt. 268 Ex. 10.) Plaintiffs also cite a series of documents that Defendant Tram Ho produced to Plaintiffs that contain vendors' ad revenue, advertising contracts, and sales reports. (Dkt. 249 at 26 [citing Dkt. 256 Exs. 161-66].) However, Plaintiffs fail to show that these documents were kept secret, or that Defendants disclosed the documents or acquired them through **[*26]** improper means. Three of the cited documents are spreadsheets of vendor sales and revenue from 2014 to 2015. (*See* Dkt. 256 Exs. 161, 164, 165.) Tram Ho testified that she was required to take daily notes on vendor sales and revenue while working at VBS. (Ho. Depo. 253:21-254:20.) On a monthly basis, she would then type those notes into a single spreadsheet and throw the handwritten notes away. (*See id.*) Plaintiffs fail to present any evidence of how Tram Ho acquired this information, the product of her daily notes at VBS, through improper means. Nor do Plaintiffs show that Defendants or Tram Ho used or disclosed this information. Tram Ho produced the information in response to Plaintiffs' requests because it was already on her computer. (*See id.*) No evidence was presented that she improperly took the information home with her when she left VBS to misappropriate it. The other vendor document found in Tram Ho's possession was a sales commission report for December 2014 to July 2015, (Dkt. 256 Ex. 163), which Tram Ho testified was given to her by a VBS employee so she could "calculate her pay amount," (Ho Depo. 251:20-252:7). The last vendor document Plaintiffs cite is a series of VBS **[*27]** advertising contracts from 2014. (Dkt. 256 Ex. 162.) Although these documents were created by VBS, Plaintiffs fail to show how they were kept confidential. Plaintiffs also fail to present any evidence that Tram Ho used the documents or acquired them through improper means. Plaintiffs' conclusory and unsupported allegation that the contracts were "acquired through improper means," (Dkt. 249 at 26), is not evidence of trade secrets misappropriation.[3]

---

[3] Given the weakness of their trade secrets misappropriation claims, Plaintiffs resort to unsubstantiated character attacks on Defendant Tram Ho. (*See* Dkt. 249 at 25 ["Tram Ho is a proven pathological liar" whose "lies do not provide a basis for summary adjudication."].) Plaintiffs cite to Tram Ho's purported "admission" of "getting caught in lie after lie" when, in her deposition, she acknowledged she might have made a mistake in entering information on her LinkedIn profile. (Dkt. 250 Ex. 170 at 65-68.) Plaintiffs then cite to Tram Ho's "deposition in full" as evidence of her "lies." (Dkt. 249 at 25.) The Court does not make credibility determinations, nor weigh conflicting evidence at the summary judgment stage. *Eastman Kodak Co., 504 U.S. at 456*. Further, such conclusory and speculative allegations in moving papers are insufficient to defeat summary judgment. *See* *Thornhill, 594 F.2d at 738*.

Finally, Plaintiffs fail to show that their "jewelry photographic technique" constitutes a protectable trade secret. (*See* TAC ¶ 36.) As evidence of VBS' "unique technique to display and photograph the jewelry," Plaintiffs cite Aleksei Lam's declaration. (SUF ¶ 56 [citing Dkt. 256 Ex. 160 ¶ 16].) However, the Lam declaration does not mention lighting technique or camera angles. (*See* Dkt. 256 Ex. 160 ¶ 16.) Plaintiffs also cite deposition testimony of Joseph Nguyen in which he states that the "technique when you use [sic] iPad or iPhone and you light it up and then shoot it into the diamond, they will make into [sic] different light." (SUF ¶ 56 [citing Nguyen Depo. 133:2-8].) However, Nguyen admits, moments later, that if "you go to the **[*28]** jewelry store, they have the same concept. They have the light, you know, shining down on the diamond." (Nguyen Depo. 133:9-15.) In other words, the Show Defendants employ conventional lighting techniques used across the industry and in jewelry stores. The lighting technique is not a secret, and the Plaintiffs have failed to show they took any steps to keep it confidential.

D. Interference with Contractual Relationships & Economic Advantage

Plaintiffs bring two interference claims: claim 10 for interference with contractual relationships under California law, (TAC ¶¶ 146-47), and claim 11 for interference with prospective economic advantage under California law, (*id.* ¶¶ 148-49). In support of claim 10, Plaintiffs allege that Defendant KVLA lured Tram Ho from the Fight Price on Television Show to host the Diamond Show in breach of her contract. (*Id.* ¶¶ 67, 147.) For claims 10 and 11, Plaintiffs further allege that Show Defendants interfered with Plaintiffs' relationships with certain employees and their vendor, Kim Cuong Jewelry. (*Id.* ¶¶ 147, 149.)

To prove a claim of intentional interference with contractual relationships, a plaintiff must show (1) a valid contract between plaintiff and **[*29]** a third party, (2) defendant's knowledge of this contract, (3) defendant's intentional acts designed to induce breach or disruption of the contractual relationship, (4) actual breach or disruption of that relationship, and (5) damages. *Pac. Gas & Elec. Co. v. Bear Stearns & Co., 50 Cal. 3d 1118, 1126, 270 Cal. Rptr. 1, 791 P.2d 587 (1990)*.

Plaintiffs have failed to show that Defendant KVLA interfered with Tram Ho's contractual relationship with VBS Television. The parties do dispute whether Tram Ho was under an employment contract at the time she left VBS Television in March 2016. (SUF ¶¶ 57-58, 60.) Defendants cite deposition testimony of Thu Thi Nguyen, the president of VBS Television, in which he states that Tram Ho's contract with the company ended on March 31, 2016. (Dkt. 241 Ex. 3 at 83:18-25; 89:13-22.) Plaintiffs cite a signed agreement between VBS Television and Tram Ho dated July 15, 2015 that provides for a one-year employment term ending on July 30, 2016. (TAC Ex. 13.) However, Plaintiffs also allege in their TAC that at some point in 2016, "VBS agreed to re-negotiate Tram's compensation package after a review period of six months. But when that time came, Tram just walked away" from VBS Television. (TAC ¶ 66.)

Regardless of whether Tram Ho's employment contract was still in **[*30]** effect when she left in March 2016, Plaintiffs' interference claim with respect to Tram Ho nevertheless fails because Plaintiffs have offered no evidence that Defendants intentionally induced breach of any purported contract between Tram Ho and Plaintiffs. Tram Ho did not quit (and allegedly breach her contract) because Defendant KVLA "poached" her or otherwise interfered with her relationship with Plaintiffs. (*See* FAC ¶ 147.) Tram Ho testified in her deposition that she left VBS Television because she was being sexually harassed by Joseph Nguyen, the Chief Executive Officer and Chairman of VBS and then-Catholic priest. Tram Ho said that Nguyen "grabbed [her] boobs, put his hands on [her] butt and then put his hands into [her] groin area." (Ho Depo. at 71:17-21.) Because she "could not stand" his offensive and illicit conduct, she "had to quit" her position at VBS Television. (*See id.*) Indeed, Nguyen admitted in his deposition that he was forced to leave his parish and the priesthood because of this conduct. (Nguyen Depo. 19:20-21:25.) Plaintiffs submit no evidence showing that Defendant KVLA induced Tram Ho to leave VBS. The only evidence before the Court indicates that she left of **[*31]** her own volition to escape sexual harassment at the hands of VBS' Chief Executive Officer and Chairman, Joseph Nguyen.

Plaintiffs have also failed to present any evidence that Show Defendants interfered with other employee contracts. Plaintiffs allege that Show Defendants interfered with contractual relationships with other VBS Television employees, including Cuong Nguyen, Thang Nguyen, and Tran Van Chi. (SUF ¶ 65.) However, Plaintiffs have provided no evidence of employment contracts with these individuals. Nguyen even testified that some of these individuals were contractors and not employees. (Nguyen Depo. 407:11-12.) Without employment contracts, the employees who left VBS Television were at will and could leave whenever they chose. Even if there were any verbal contracts with these employees, which Plaintiffs have not shown, there is no evidence that Show Defendants had knowledge of them or induced their breach. (SUF ¶ 67.) Further, Nguyen testified that Cuong Nguyen left VBS Television to return to Vietnam, (Nguyen Depo. 382:10-14), Thang Nguyen left because he asked for a raise but was turned down, (*id.* 384:9-15), and Tran Van Chi left to help his son open an office in San Francisco, **[*32]** (*id.* 390:16-20). Plaintiffs have failed to show that they had contracts with these employees, let alone that Show Defendants interfered with those contracts and lured the employees away.

Finally, Plaintiffs have not offered evidence that Show Defendants interfered with a contractual relationship with Plaintiffs' vendor, Kim Cuong Jewelry. Nguyen admitted that VBS Television did not have any exclusive agreement with Kim Cuong Jewelry under which Kim Cuong Jewelry would supply jewelry only to VBS Television. (Nguyen 410:20-411:2.) Although Kim Cuong Jewelry entered into advertising agreements with Plaintiffs, it was free to provide its merchandise to other shows. (*See id*; Dkt. 250 Ex. 38 [advertising agreements].) In contracting with Kim Cuong Jewelry, Show Defendants did not interfere with or induce a breach of any agreement between Kim Cuong Jewelry and Plaintiffs. Plaintiffs presented no evidence to suggest otherwise.

Plaintiffs also allege that Show Defendants interfered with their economic advantage by disrupting Plaintiffs' relationships with certain employees and their vendor, Kim Cuong Jewelry. (*Id.* ¶¶ 147, 149.) In order to prevail on a claim for intentional interference with **[*33]** prospective economic advantage, a plaintiff must prove (1) an economic relationship between the plaintiff and some third party with the probability of future economic benefit, (2) defendant's knowledge of the relationship, (3) intentional acts, apart from the interference itself, by defendant designed to disrupt the relationship, (4) actual disruption of the relationship, and (5) economic harm to the plaintiff. *CRST Van Expedited, Inc. v. Werner Enters., 479 F.3d 1099, 1108 (9th Cir. 2007)*. In California, the primary difference between a claim for interference with contractual relationships and a claim for interference with economic advantage is that under the latter, a plaintiff must also "allege an act that is wrongful independent of the interference itself." *Id. at 1108*. An act is independently wrongful if it is unlawful under "some constitutional, statutory, regulatory, common law, or other determinable legal standard." *Id. at 1109*.

Plaintiffs have failed to show that Show Defendants engaged in any independently unlawful acts to disrupt Plaintiffs' relationships with its vendors or employees. To prevail on this claim, Plaintiffs must prove that the Defendants committed "intentional acts, *apart from the interference itself*." *See id. at 1108* (emphasis added). However, Plaintiffs have failed **[*34]** to allege that Defendants committed any illegal acts other than Plaintiffs' conclusory and unsubstantiated claims that Defendants stole trade secret information. (Dkt. 249 at 29.) Since Plaintiffs failed to present any evidence of trade secrets misappropriation under California and federal law, any claims for interference with prospective economic advantage based on trade secrets misappropriation likewise fail. *See First Advantage Background Servs. Corp. v. Private Eyes, Inc., 569 F. Supp. 2d 929, 936 (N.D. Cal. 2008)*.

E. Antitrust

Plaintiffs bring two antitrust claims: claim 8 for antitrust violations under *sections 1* and *2 of the Sherman Act*, (TAC ¶¶ 142-43), and claim 9 for antitrust violations under the California Cartwright Act, (*id.* ¶¶ 144-45). In support of these claims, Plaintiffs allege that Defendants conspired to take away VBS' employees, illegally restrain trade in the Vietnamese and general market place by attempting to eliminate JN-7 Best as a competitor to Anthro-7, file a "sham litigation" against VBS in this Court, and unlawfully promote Anthro-7 through deceptive false advertising and price-fixing. (*Id.* ¶¶ 4-12.)

To prevail on a claim for a *Sherman Act section 1* violation, a plaintiff must show that (1) there was an agreement, conspiracy, or combination between two or more entities, (2) the **[*35]** agreement was an unreasonable restraint of trade, and (3) the restraint affected interstate commerce. *Am. Ad Mgmt., Inc. v. GTE Corp., 92 F.3d 781, 784 (9th Cir. 1996)*. To establish a Sherman Act *section 2* violation for attempted monopolization, a plaintiff must demonstrate (1) specific intent to control prices or destroy competition, (2) predatory or anticompetitive conduct directed at accomplishing that purpose, (3) a dangerous probability of achieving "monopoly power," and (4) causal antitrust injury. *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 (9th Cir. 1988)*. The California Cartwright Act is the primary state ***antitrust law*** and mirrors the Sherman Act. *See* *Marin County Bd. of Realtors, Inc. v. Palsson, 16 Cal. 3d 920, 925, 130 Cal. Rptr. 1, 549 P.2d 833 (1976)* ("A long line of California cases has concluded that the Cartwright Act is patterned after the Sherman Act," and "federal cases interpreting the Sherman Act are applicable to problems arising under the Cartwright Act.").

To the extent that Plaintiffs' antitrust claims are based on Defendants' alleged trade secrets misappropriation, trade dress infringement, and false advertising, the antitrust claim fails for the same reasons stated above. This leaves Plaintiffs' assertion that the Defendants' prior lawsuit was a "sham litigation" intended to put VBS out of business. (TAC ¶¶ 5, 22, 88-103.) In the prior lawsuit, Defendant Nutrivita Laboratories alleged that **[*36]** the JN-7 dietary supplement infringed the Anthro-7's trade dress and other intellectual property. *Nutrivita Labs., Inc. v. VBS Distribution, Inc., et al., 160 F. Supp. 3d 1184 (C.D. Cal. 2016)*. However, this Court already expressly rejected VBS' claim that the litigation was baseless. (*See* Dkt. 136-2 at 14:6-7 ["[T]here is no reason to believe that the lawsuit was frivolous or the filings improper."].) On appeal, the Ninth Circuit affirmed this Court's finding, noting "there was no evidence in the record to support a finding of bad faith, and Nutrivita's complaint as a whole was meritorious." (Dkt. 136-3 at 3.) Plaintiffs have already attempted this argument and failed. It does not resurrect their antitrust claims here.

F. Unfair Competition

Plaintiffs bring two unfair competition claims: claim 1 for unfair competition under the Lanham Act, (TAC ¶¶ 119-23), and claim 3 for unfair competition under California common law, (*id.* ¶¶ 129-30.) Plaintiffs do not allege any separate facts in support of these claims. They appear to be catch-all claims dependent on Plaintiffs' claims for trade dress infringement. These claims fail for the same reasons Plaintiffs' others claims fail.

G. Breach of Fiduciary Duty

Plaintiffs assert a claim for breach of fiduciary duty under California law against **[*37]** Defendant Tram Ho. (TAC ¶¶ 152-53.) Specifically, Plaintiffs allege that Tram Ho breached her "fiduciary duty of trust, confidence, and loyalty owed to Plaintiffs." (*Id.*) Defendants did not move for summary judgment on this claim or on the claim for civil conspiracy, discussed below. Instead, Defendants moved for judgment on the pleadings pursuant to *Federal Rule of Civil Procedure 12(c)*. (Dkt. 239.)

On a motion for judgment on the pleadings, the Court is limited to material included in the pleadings. *See Yakima Valley Mem. Hosp. v. Wash. State Dep't of Health, 654 F.3d 919, 925 n.6 (9th Cir. 2011)*. Where the Court exercises its discretion to consider material outside of the pleadings, it must convert the motion for judgment on the pleadings to a motion for summary judgment. *Fed. R. Civ. P. 12(d)* ("If, on a motion under *Rule 12(b)(6)* or *(12)(c)*, matters outside the pleadings are presented to and not excluded by the court, the motion must be treated as one for summary judgment."). Plaintiffs' claims for breach of fiduciary duty and civil conspiracy are entirely premised on the conduct alleged in Plaintiffs' claims for trade secrets misappropriation and interference with contractual relationships. The parties have had multiple opportunities to brief and develop the evidentiary record regarding the conduct underlying those claims. The Court exercises its **[*38]** discretion to consider that evidence here, and converts Defendants' motion for judgment on the pleadings into a motion for summary judgment.[4]

[4] *Rule 12(d)* requires that the parties have "a reasonable opportunity to present all the material that is pertinent" to the converted motion for summary judgment. *Fed. R. Civ. P. 12(d)*. The material pertinent to the converted motion for summary judgment on the breach of fiduciary duty and civil conspiracy claims is the material allegedly underlying Plaintiffs' misappropriation and interference claims. In light of the three rounds of briefing and hundreds of exhibits submitted on motions for summary judgment

To prove a claim for breach of fiduciary duty under California law, a plaintiff must show (1) existence of a fiduciary duty, (2) breach of the duty, and (3) resulting damages. *Pellegrini v. Weiss, 165 Cal. App. 4th 515, 524, 81 Cal. Rptr. 3d 387 (2008)*; *Mattel, Inc. v. MGA Entm't, Inc., 782 F. Supp. 2d 911, 988 (C.D. Cal. 2011)*. "While breach of fiduciary duty is a question of fact, the existence of [a] legal duty in the first instance and its scope are questions of law." *Kirschner Brothers Oil, Inc. v. Natomas Co., 185 Cal. App. 3d 784, 790, 229 Cal. Rptr. 899 (1986)* (internal citation omitted). "[B]efore a person can be charged with a fiduciary obligation, he must either knowingly undertake to act on behalf and for the benefit of another, or must enter into a relationship which imposes that undertaking as a matter of law." *City of Hope Nat'l Med. Ctr. v. Genentech, Inc., 43 Cal. 4th 375, 386, 75 Cal. Rptr. 3d 333, 181 P.3d 142 (2008)*.

The Court takes pause before addressing whether Tram Ho, the victim of sexual harassment at the hands of VBS' CEO and Chairman, owed VBS any fiduciary duties of "trust, confidence, and loyalty" in return. (*See* TAC ¶¶ 152-53.) Plaintiffs claim that Tram Ho's employment contract purportedly in effect when she left VBS Television showed that she was "not a mere employee," but rather a manager of VBS Television. (Dkt. 245 at 17 [citing TAC ¶ 64, Ex. 13 ¶ 3].) The cited **[*39]** portion of the employment agreement describes Tram Ho's five duties as (1) "[p]romoter and coordinator of diamond and jewelry auction programs broadcasting on Tuesdays and Thursdays each week," (2) "[s]olicitor of advertisements and sponsorship from businesses," (3) "[a]nchorwoman for news broadcasting when needed," (4) "[p]roducer of 'Hue Thuong' show," and (5) "[a]ssisting to produce the ads when needed." (*Id.* ¶ 3.)[5]

Plaintiffs have failed to show that Tram Ho had a fiduciary relationship with Plaintiffs as a matter of law. Relationships imposing a fiduciary duty as a matter of law are those between principal and agent, joint venturers, attorney and client, and corporate officers and their corporation. *Blatty v. Warner Bros., 2011 U.S. Dist. LEXIS 164838, 2011 WL 13217379, at *8 (Apr. 21, 2011)* (quoting *Oakland Raiders v. Nat'l Football League, 131 Cal. App. 4th 621, 632, 32 Cal. Rptr. 3d 266 (2005))*. Plaintiffs rely on one California state appellate case for the assertion that an employee also owes its employer a fiduciary duty where the employee "participat[es] in management." (Dkt. 245 at 16 [citing *Gab Bus. Servs. v. Lindsey & Newsom Claim Servs., 83 Cal. App. 4th 409, 422, 99 Cal. Rptr. 2d 665 (2000)]*.) However, Plaintiffs at no point show that Tram Ho managed VBS Television. Tram Ho's detailed employment agreement, even if it was in effect at the time she left VBS Television, described Tram Ho as an "employee," not a director, manager, or officer. (TAC Ex. 13.) Tram **[*40]** Ho's specifically outlined duties, such as soliciting advertisements and promoting jewelry auction programs, do not include high-level management of the company. (*See id.*) Tram Ho did not have a fiduciary relationship with VBS Television as a matter of law.

Plaintiffs next argue that the confidentiality provisions in Tram Ho's employment agreement, which required her to "retain the confidentiality of, and not disclose, valuable trade secret information," effectively imposed a fiduciary duty. (TAC ¶ 61.) However, receipt of confidential information, without more, does not compel the imposition of a fiduciary duty. *City of Hope, 43 Cal. 4th at 391-94*; *see Goodworth Holdings Inc. v. Suh, 239 F. Supp. 2d 947, 960 (N.D. Cal. 2002)* ("A confidentiality agreement does not give rise to a fiduciary relationship unless it does so expressly."). Plaintiffs also allege that "VBS gave Tram Ho discretion in how she exercised her job duties" and relied on her "to competently perform her duties." (TAC ¶ 65.) Plaintiffs argue that because VBS "placed great trust and confidence" in Tram Ho, Tram Ho owed them a fiduciary duty of trust and confidence in return. (Dkt. 245 at 16-17; *see* TAC ¶ 61.) Plaintiffs fail to explain how these vague allegations show that Tram Ho owed a fiduciary duty to Plaintiffs. If granting **[*41]** an employee discretion to do a job and relying on the employee to competently perform that job were sufficient, every employee would owe their employer a fiduciary duty. *See Goodworth Holdings Inc. v. Suh, 239 F. Supp. 2d 947, 960 (N.D. Cal. 2002)* ("A fiduciary relationship . . . does not arise simply because parties repose trust and confidence in each other."); *Worldvision Enters., Inc. v. Am. Broadcasting Cos., 142 Cal. App. 3d*

---

on those other claims, (Dkts. 174, 216, 249), Plaintiffs have been given ample opportunity to present evidence on the conduct underlying the breach of fiduciary duty and civil conspiracy claims.

[5] Plaintiffs also argue in their opposition to Defendants' motion for judgment on the pleadings that Tram Ho was the "Vice President of Marketing (an officer) at VBS." (Dkt. 245 at17.) However, Plaintiffs never made that allegation in the operative TAC or exhibits attached thereto, and they fail to cite any other evidence in their opposition. Further, Tram Ho's employment contract explicitly characterizes Tram Ho as an "employee," not a director, officer, or executive of VBS Television. (*See* TAC Ex. 13.)

589, 595, 191 Cal. Rptr. 148 (1983). Because Plaintiffs fail to show the existence of a fiduciary duty in the first instance, they cannot prevail on a claim for breach of fiduciary duty.

But putting aside the issue of whether Tram Ho owed Plaintiffs a fiduciary duty as an employee of VBS Television, Plaintiffs' breach of fiduciary duty claim nevertheless fails because Plaintiffs have not shown that Tram Ho engaged in any conduct that would constitute a breach of any duty. Plaintiffs' claim for breach of fiduciary duty rests entirely on the misconduct alleged in Plaintiffs' claims for misappropriation of trade secrets and interference with contractual relationships. Plaintiffs have had multiple opportunities to present evidence and brief the purported misconduct that forms the basis of those claims. Yet Plaintiffs failed to present any evidence of trade secrets misappropriation or interference with contractual relationships.[6] Accordingly, **[*42]** Plaintiffs' derivative claim for breach of fiduciary duty must also fail.

H. Civil Conspiracy

Plaintiffs assert a claim for civil conspiracy under California law. (TAC ¶ 151.) Civil conspiracy is not an independent cause of action, but rather a theory of vicarious liability under which certain defendants may be held liable for torts committed by others. *Lauter v. Anoufrieva, 642 F. Supp. 2d 1060, 1097 (C.D. Cal. 2009)*. In order to invoke vicarious liability, a plaintiff must allege the formation of a conspiracy to commit wrongful acts, the commission of the wrong acts, and the damage resulting from such acts. *Id.* (citing *State ex rel. Metz v. CCC Info. Servs., Inc., 149 Cal. App. 4th 402, 419, 57 Cal. Rptr. 3d 156 (2007))*. Because all of Plaintiffs' independent causes of action fail, the vicarious claim for civil conspiracy also fails.

IV. CONCLUSION

Simply put, Plaintiffs' opposition is one complete failure of proof. It is nothing more than conclusory and unsupported allegations of wrongdoing on Defendants' part. That is not enough to raise a genuine issue of material fact. Accordingly, Defendants' motion and converted motion for summary judgment are **GRANTED**.[7]

DATED: September 10, 2018

UNITED STATES DISTRICT JUDGE

End of Document

---

[6] Further, to the extent that Plaintiffs' breach of fiduciary duty claim turns on Plaintiffs' trade secrets misappropriation allegations, the claim is preempted by the California Uniform Trade Secrets Act. *See* First Advantage, 569 F. Supp. 2d at 936 (citing cases holding that common law claims based on misappropriation of trade secrets are preempted by the California Uniform Trade Secrets Act).

[7] Both parties filed applications to file under seal certain documents in relation to Defendants' motion for summary judgment. (Dkts. 242, 248, 265.) The only reason cited by the parties to justify their applications to seal is the parties' protective order. As the Court has already explained in length, a mere citation to the protective order is not sufficient to warrant sealing documents from the public docket. (Dkt. 227 at 6-7.) The parties' applications are therefore **DENIED**.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

In considering a motion to dismiss for failure to state a claim upon which relief can be granted pursuant to *Fed. R. Civ. P. 12(b)(6)*, the appellate court will dismiss a pleading that fails to allege plausible claims. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. This standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully. A claim must contain sufficient factual matter that, accepted as true, would allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

There is no special pleading requirement for motions to dismiss in the context of an antitrust action. Nevertheless, it is not enough merely to allege an antitrust violation in conclusory terms. Instead, the complaint must make out the rudiments of a valid claim. Therefore, when the requisite elements are lacking, the costs of modern federal antitrust litigation and the increasing caseload of the federal courts counsel against sending the parties into discovery when there is no reasonable likelihood that the plaintiffs can construct a claim from the events related in the complaint. With that said, a complaint should be dismissed only if it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

Business & Corporate Compliance > ... > Electric Power Industry > Federal Power Act > Federal Rate Regulation

Business & Corporate Compliance > ... > Electric Power Industry > State Regulation > Rate Setting & Tariffs

HN3[] **Federal Power Act, Federal Rate Regulation**

The Federal Power Act (FPA), *16 U.S.C.S. § 791a et seq.*, authorizes FERC to regulate the transmission of electric energy in interstate commerce and the sale of electric energy at wholesale in interstate commerce, *16 U.S.C.S. § 824(b)(1)*. In particular, the FPA obligates FERC to oversee all prices for those interstate transactions and all rules and practices affecting such prices. However, FPA places beyond FERC's 's power, leaving to the states alone, the regulation of any other electricity sale, including the retail sale of electricity.

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > Filed Rate Doctrine

HN4[] **Electric Power Rates, Filed Rate Doctrine**

The filed rate doctrine revolves around the notion that under statutes like the Federal Power Act, utility filings with a federal agency prevail over other claims seeking different rates or terms than those reflected in the filings with the agency. It has its origins in Supreme Court cases interpreting the Interstate Commerce Act and has been extended across the spectrum of regulated utilities. The filed rate doctrine is a form of deference and preemption, which precludes interference with the rate setting authority of an administrative agency. Accordingly, strict application of the rule is necessary to promote the congressional policy of preventing unjust discrimination in rates.

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > Filed Rate Doctrine

HN5[] **Electric Power Rates, Filed Rate Doctrine**

Under the filed rate doctrine, where FERC determines that a rate is just and reasonable, courts cannot approve a departure from that rate. Moreover, the filed rate doctrine applies even where, FERC determines that certain wholesale rates are to be set by market forces. Accordingly, courts are not the forum to adjudicate claims based on the propriety of regulated rates. Accordingly, courts are not the forum to adjudicate claims based on the propriety of regulated rates. Due to the preclusive effect of the filed rate doctrine, federal and state antitrust claims, as well as state tort actions, that require courts to set aside or second guess rates approved by FERC must fail as a matter of law. The question, then whether Plaintiffs can establish a pertinent limitation on or exception to the filed rate doctrine.

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > Filed Rate Doctrine

HN6[] Electric Power Rates, Filed Rate Doctrine

The U.S. Supreme Court has recognized a limited exception to the filed rate doctrine for injunctive relief.

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > Filed Rate Doctrine

HN7[] Electric Power Rates, Filed Rate Doctrine

The focus for determining whether the filed rate doctrine applies is the impact the court's decision will have on agency procedures and rate determines.

Energy & Utilities Law > Electric Power Industry > Electric Power Rates > Filed Rate Doctrine

HN8[] Electric Power Rates, Filed Rate Doctrine

Although it is true that retail consumers do not have standing to file complaints with FERC, courts have consistently held that lack of a remedy does not create an exception to the filed rate doctrine.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN9[] Standing, Elements

Federal courts are constitutionally limited to deciding cases or controversies. Accordingly, a plaintiff must establish that it has standing in federal court by demonstrating that her complaint alleges a case or controversy recognized under Article III of the Constitution. To do so, a plaintiff must establish injury, causation, and redressability. At the pleading stage, an antitrust plaintiff must show both constitutional standing and antitrust standing. To determine whether a plaintiff has standing to bring an antitrust cause of action, the court conducts an analysis of prudential considerations aimed at preserving the effective enforcement of the antitrust laws. The Court considers: (1) the causal connection between the alleged antitrust violation and harm to the plaintiff; (2) an improper motive; (3) the nature of the plaintiff's alleged injury and whether the injury was of a type that Congress sought to redress with the antitrust laws; (4) the directness with which the alleged market restraint caused the asserted injury; (5) the speculative nature of the damages; and (6) the risk of duplicative recovery or complex apportionment of damages. Although courts weigh each of the six factors, lack of injury, in particular, will generally defeat standing.

Antitrust & Trade Law > Procedural Matters

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN10[] Antitrust & Trade Law, Procedural Matters

The U.S. Supreme Court has defined antitrust injury as an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. To establish antitrust injury, a proper plaintiff must prove more than injury causally linked to an illegal presence in the market. The First Circuit has explained that competitors and consumers in the market where trade is allegedly restrained are presumptively the proper plaintiffs to allege antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN11[] **Actual Monopolization, Claims**

Section 2 of the Sherman Act makes it illegal to monopolize, or attempt to monopolize any part of the trade or commerce among several states, 15 U.S.C.S. § 2. To prove a violation of this statute, a plaintiff must demonstrate (1) that the defendant possesses monopoly power in the relevant market and (2) that the defendant has acquired or maintained that power by improper means. To prove attempted monopolization, a plaintiff must demonstrate (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN12[] **Actual Monopolization, Claims**

The plaintiff carries the burden of describing a well-defined relevant market, both geographically and by product, which the defendants monopolized. Although the question of market definition is usually one of fact for the jury, a plaintiff must present sufficient evidence from which a reasonable jury could find the existence of the proposed relevant market. The relevant geographic market consists of the geographic area in which the defendant faces competition and to which consumers can practically turn for alternative sources of the product.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > Actual Monopolization

HN13[] **Monopolies & Monopolization, Actual Monopolization**

Courts define monopoly power as the power to raise prices and exclude competition. Market power can be shown through two types of proof, either through direct evidence of market power, such as actual supracompetitive prices and restricted output, or circumstantial evidence of market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN14[] **Actual Monopolization, Monopoly Power**

At bottom, a claim for monopolization requires that Plaintiffs allege facts sufficient to establish that Defendants separately possessed monopoly power in the relevant market. Accordingly, courts in the First Circuit and elsewhere have rejected monopolization claims based on a shared monopoly theory of liability.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN15[] **Deceptive & Unfair Trade Practices, State Regulation**

State consumer protection and unfair competition statutes each require allegations regarding (1) an unfair or deceptive act or practice on the part of the defendant; (2) an injury or loss suffered by the consumer; and (3) a causal connection between the wrongful conduct and the consumer's injury.

Opinion

[*437] **MEMORANDUM AND ORDER**

CASPER, J.

I. Introduction

A putative class of retail electricity consumers residing in New England (collectively, "Plaintiffs") have filed this lawsuit against Eversource Energy ("Eversource") and Avangrid, Inc. ("Avangrid") (collectively, "Defendants"), alleging violations of the *Sherman Act*, *15 U.S.C. § 2*, and various state consumer protection and antitrust laws. D. 33. Plaintiffs assert that Defendants restricted New England's supply of natural gas, a key component in the generation of over half the electricity in New England, and, as a result, caused New Englanders to pay nearly $3.6 billion dollars more for retail electricity. D. 33 ¶¶ 1-2. Plaintiffs seek damages and injunctive relief, including under the *Clayton Act*, *15 U.S.C. § 26*. Defendants have moved to dismiss the amended complaint. D. 41; D. 42. For the reasons set forth below, **[**3]** the Court ALLOWS Defendants' motions to dismiss.

II. Standard of Review

HN1[] In considering a motion to dismiss for failure to state a claim upon which relief **[*438]** can be granted pursuant to *Fed. R. Civ. P. 12(b)(6)*, the Court will dismiss a pleading that fails to allege plausible claims. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. "This standard is 'not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully.'" *Saldivar v. Racine, 818 F.3d 14, 18 (1st Cir. 2016)* (quoting *Iqbal, 556 U.S. at 678*). A claim must contain sufficient factual matter that, accepted as true, would allow the Court "to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 557*).

HN2[] There is no special pleading requirement for motions to dismiss in the context of an antitrust action. *In re Carbon Black Antitrust Litig., No. CIV.A.03-10191-DPW, 2005 U.S. Dist. LEXIS 660, 2005 WL 102966, at *5 (D. Mass. Jan. 18, 2005)*. Nevertheless, "it is not enough merely to allege a[n] [antitrust] violation in conclusory terms." *E. Food Servs., Inc. v. Pontifical Catholic Univ. Servs. Ass'n, Inc., 357 F.3d 1, 9 (1st Cir. 2004)*. Instead, the "complaint must make out the rudiments of a valid claim." Id. Therefore, "[w]hen the requisite elements are lacking, the costs **[**4]** of modern federal antitrust litigation and the increasing caseload of the federal courts counsel against sending the parties into discovery when there is no reasonable likelihood that the plaintiffs can construct a claim from the events related in the complaint." *In re Carbon Black Antitrust Litig., 2005 U.S. Dist. LEXIS 660, 2005 WL 102966, at *5* (quoting *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1106 (7th Cir. 1984))*. "With that said, a complaint should be dismissed only if it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." Id. (internal quotation marks and citations omitted).

III. Factual Background

Unless otherwise noted, the following facts are drawn from the amended complaint, D. 33, and are accepted as true for the consideration of the Defendants' motions to dismiss.

A. Regulatory Framework for the Interstate Transmission and Sale of Natural Gas and Electricity

1. FERC's Authority to Regulate the Transmission and Price of Natural Gas

Between the 1950s through the 1970s, the Federal Power Commission ("FPC") strictly regulated both the wellhead price[1] of natural gas and the interstate transmission of natural gas pursuant to the *Natural Gas Act*. D. 33 ¶ 72; see *E. & J. Gallo Winery v. EnCana Corp., 503 F.3d 1027, 1036 (9th Cir. 2007)* ("Gallo II"). Beginning in 1978, however, Congress enacted legislation to reduce regulatory **[**5]** oversight of the price of natural gas. Id. ¶ 74. Congress further deregulated the price of natural gas through the enactment of the Natural Gas Wellhead Decontrol Act of 1989, which prohibited FPC's successor, the Federal Energy Regulatory Commission ("FERC"), from imposing any price regulations on "first sales" of natural gas at the **[*439]** wellhead. Id. ¶¶ 74-75. "First sales" include sales by a natural gas producer to a pipeline or a direct purchaser. Id. ¶ 75. In 1992, FERC issued Order No. 636, which permanently severed the sale of natural gas as a commodity from the sale of natural gas transmission as a service. Id. ¶ 76. Following Order 636, FERC allowed "natural-gas companies subject to [its] jurisdiction to charge rates for gas determined by market demand." *Gallo II, 503 F.3d at 1038*. In short, FERC replaced regulated rates for natural gas with market-based rates. *Id. at 1039*.

[1] The "wellhead" price is simply the price that gas producers charge for natural gas at the wellhead. Id. ¶ 72. Previously, the FPC imposed a "cost-plus" ratemaking system that allowed gas producers to factor the cost of natural gas production and a "fair" profit into the wellhead price. Id. The FPC determined what was considered "fair." Id.

FERC still retained authority to oversee rates charged for the transmission of natural gas. Id. ¶¶ 77, 80, 85. Because natural gas transmission is often a "natural monopoly," (*i.e.*, where a single pipeline infrastructure is the only source of natural gas transportation in a given area), FERC is charged with ensuring that the transmission **[**6]** monopoly is not abused and that prices are "just and reasonable." Id. ¶¶ 80, 85. FERC does not regulate the local, retail sale of natural gas after it leaves interstate pipelines. See id. ¶ 54.

1. FERC's Authority to Regulate the Transmission and Price of Electricity

HN3[] The *Federal Power Act ("FPA"), 16 U.S.C. § 791a et seq.*, authorizes FERC to regulate the "transmission of electric energy in interstate commerce" and the "sale of electric energy at wholesale in interstate commerce." Id. ¶ 49 (quoting *16 U.S.C. § 824(b)(1)*). In particular, the FPA obligates FERC to "oversee all prices for those interstate transactions and all rules and practices affecting such prices." *F.E.R.C. v. Elec. Power Supply Ass'n, U.S. , 136 S. Ct. 760, 782, 193 L. Ed. 2d 661 (2016)*. However, FPA places beyond FERC's power, leaving to the states alone, the regulation of any other electricity sale, including the retail sale of electricity. D. 33 ¶ 49 (citing *Elec. Power Supply Ass'n., 136 S. Ct. at 768*).

B. Natural Gas and Electricity Markets

Plaintiffs allege that Defendants' anticompetitive conduct in the natural gas transmission market artificially inflated the commodity market price of natural gas and the wholesale price of electricity, resulting in higher retail electricity prices for New Englanders. See, e.g., D. 33 ¶ 165. Defendants' conduct in the upstream natural gas transmission market **[**7]** allegedly impacted downstream retail electricity prices due to the relationship and connection between the markets at issue in this litigation. For example, Plaintiffs assert that the price of natural gas is the most significant factor in determining the price of wholesale electricity because natural gas-fired power plants are the primary generators of electricity in New England. Id. ¶ 68. An increase in the price of natural gas due to a shortage in natural gas supply, therefore, will directly impact the price of wholesale electricity. Id. ¶ 121. In that same vein, artificially inflated wholesale electricity prices result in artificially inflated retail electricity prices. Id. ¶ 63. Accordingly, where, as alleged here, Defendants restricted the natural gas supply to New England, Defendants allegedly caused the market price of natural gas to increase, resulting in an increase in wholesale and retail electricity prices. Id.

With the regulatory framework and Plaintiffs' allegations in mind, the Court now turns to the New England energy markets at issue in this litigation: (1) the commodity market for natural gas, (2) the natural gas transmission market, (3) the wholesale electricity market **[**8]** and (4) the retail electricity market.

[*440] *1. Natural Gas Commodity Market*

The natural gas market encompasses two transactions: (1) the purchase of natural gas; and (2) the transmission of natural gas from seller to purchaser. Id. ¶ 76. With respect to sales of the commodity itself, natural gas is sold to consumers either directly from gas producers via contracts called "gas futures" or through the "spot market." Id. ¶ 86. Futures contracts allow gas producers to sell a specific quantify of gas at some predetermined future time. Id. ¶ 87. Purchasers with a steady natural gas demand, such as load distribution companies ("LDCs"), which distribute gas to retail customers, typically utilize futures contracts. Id. ¶¶ 84, 87. By contrast, entities with variable or less predictable natural gas demand, including natural gas-fired electricity generators, purchase gas on the "spot" market. Id. ¶ 88. The spot market allows LDCs and other direct purchasers to resell excess amounts of natural gas to which they hold title. Id. ¶ 89. According to Plaintiffs, the spot market price of natural gas is not regulated by FERC and is, instead, determined by supply and demand. Id. ¶ 90. Accordingly, the spot market **[**9]** price of natural gas increases when the amount of available natural gas decreases. Id.

2. Natural Gas Transmission Market

In addition to purchasing natural gas directly from gas producers or indirectly via the spot market, gas purchasers must also pay for the transmission (or transportation) of natural gas to its final destination. Id. ¶ 78. In New England, a network of pipelines facilitates the transmission of natural gas from the wellhead to the purchaser (or a destination determined by the purchaser). Id. As mentioned, as compared to the price of the commodity itself, which is determined by contract or by the market, FERC oversees the rates charged for transmission capacity. Id. ¶ 79.

The process for reserving pipeline transmission capacity in New England differs depending on the purchaser. See id. ¶ 99. LDCs have the option to enter "no-notice" contracts, which give them the power to reserve transmission capacity on a pipeline for a given day and time, and to adjust that reservation "upward or downward" at any time without penalty. Id. By contrast, other purchasers may be penalized if they do not use the full capacity reserved on a given day or if they have to reserve additional transmission **[**10]** capacity. Id.

Transmission capacity reservations play an important role in determining the supply of natural gas available to gas purchasers in New England because there is a fixed amount of pipeline capacity on any given day. Id. ¶ 107. In other words, the transmission capacity reserved by one purchaser limits how much capacity is available for other purchasers' natural gas needs. Id. Even when LDCs adjust their capacity reservations downward or cancel a reservation, that capacity is not automatically released for others to use. Id. ¶ 108. For example, assume an LDC called Firm X reserved enough capacity on a pipeline to move a total of 2400 cubic feet of natural gas through a pipeline at a steady rate over the course of a 24-hour period (*i.e.*, 100 cubic feet per hour). Id. ¶ 109. If Firm X cancelled 20 hours of that reservation and did not affirmatively release the excess capacity it reserved, then the pipeline would, for 20 hours out of the day, flow at 100 cubic feet per hour under capacity. Id. In that example, other purchasers would not be able to take advantage of the excess units of natural gas capacity caused by Firm X's downward adjustment of its capacity reservation. Id.

***[**11]** 3. Wholesale Electricity Market*

Wholesale electricity is typically sold by electricity generators or power plants to load serving entities ("LSEs"), which then **[*441]** deliver electricity to retail consumers. Id. ¶ 52. Some wholesale electricity is purchased via contracts pursuant to which LSEs agree to purchase a certain amount of electricity at a certain rate over a certain period of time. Id. ¶ 53. These fixed-rate, bilateral contracts are regulated by FERC, which may review the agreed-upon rate for reasonableness. Id. More often, however, wholesale electricity is purchased through auctions between electricity generators and LSEs. Id. ¶ 54. The auctions are administered and overseen by intermediaries called Independent System Operators ("ISOs") or Regional Transmission Organizations ("RTOs"), which are independent non-profit organizations that FERC has charged with facilitating an efficient market for wholesale electricity while also ensuring reliability for electricity consumers. Id. As part of their auction-related responsibilities, ISOs and RTOs must file with FERC a tariff that describes in detail the procedures for a given auction. Id. FERC may review or approve the auction procedures. **[**12]** Id. In New England, auctions are conducted in accordance with the ISO New England Inc. Transmission, Markets, and Services Tariff ("ISO-NE Tariff"), which was approved by FERC and describes the rules that govern ISO-NE's facilitation of auctions for wholesale electricity in the region. Id. ¶ 61 (citing ISO-NE, Day-Ahead and Real-Time Energy Markets, https://www.iso-ne.com/marketsoperations/markets/da-rt-energy-markets (last visited Sept. 10, 2018)).

There are two types of auctions: (1) "same-day" auctions for immediate delivery of wholesale electricity to LSEs experiencing a spike in demand for retail electricity, and (2) "next-day" auctions to satisfy expected demand the following day. Id. ¶ 54. In both instances, the auction process is as follows. First, an ISO (or RTO) obtains orders from LSEs indicating how much electric energy is needed over a given period of time. Id. ¶ 55. Second, the ISO obtains bids from electricity generators specifying how much electricity can be produced during the relevant time period and how much they propose to charge for it. Id. Finally, the ISO accepts the generators' bids in order of price (from lowest to highest) until the total LSE demand is satisfied. **[**13]** Id. The price of the last unit of electricity purchased is then paid to all generators whose bids were accepted, even if their offer was lower. Id.

For example, suppose that LSEs inform their ISO that they require 275 units of electricity for the day. Id. ¶ 56. Also assume the ISO receives the following bids from electricity generators: Generator A offers 100 units of electricity for

$10/unit; Generator B offers 100 units of electricity for $20/unit; Generator C offers 100 units of electricity for $30/unit; and Generator D offers 100 units of electricity for $40/unit. Id. The ISO will accept Generator A's $10/unit bid (and all 100 units offered); then Generator B's $20/unit bid (and all 100 units offered); and then Generator C's $30/unit bid (but only the first 75 units offered). Id. Given that the wholesale demand from the LSEs was satisfied after the ISO accepted part of Generator C's bid, Generators A, B, and C will all be paid at a rate of $30/unit. Id. The total cost of the 275 units of electricity will be split proportionally amongst the LSEs, according to the units of electricity ordered by each. Id.

4. Retail Electricity Market

The wholesale electricity prices paid by LSEs are **[**14]** passed on to retail customers. Id. ¶ 63. Accordingly, the price of wholesale electricity influences the cost of retail electricity. Id. ¶ 60.

C. Alleged Anticompetitive Conduct

1. Defendants' Alleged Market Power

Plaintiffs allege a monopolization scheme in which Eversource and Avangrid **[*442]** each allegedly abused their power over the retail electricity market in New England through anticompetitive conduct in the upstream natural gas transmission market. Id. ¶¶ 5-8; D. 48 at 39. Plaintiffs contend that Defendants possess the power to raise the price of electricity in New England because they can restrict the amount of natural gas flowing into the region and, therefore, the amount of natural gas available to fuel natural-gas-fired electricity generators. D. 33 ¶ 94. Plaintiffs point to several aspects of Defendants' energy businesses to suggest that Defendants controlled New England's natural gas supply and, therefore, the price of retail electricity. For example, New England's principal natural gas pipeline, the Algonquin Gas Transmission Pipeline, is owned, in part, by Defendant Eversource. Id. ¶ 95. Both Eversource and Avangrid also own and operate, through their subsidiaries, substantial **[**15]** "natural gas utilities" known as LDCs—which purchase natural gas directly from gas producers and, in turn, distribute natural gas to retail consumers. Id. ¶ 97. Of the eight largest LDCs in New England, half are owned by Eversource or Avangrid.[2] Id. As a result of their LDC operations, Eversource and Avangrid possess a large number of "no-notice" contracts for natural gas transmission capacity along the Algonquin Pipeline.[3] Id. ¶ 99. As mentioned, no-notice contracts allow LDCs to adjust their transmission capacity reservations upward or downward at any time and without penalty. Id.

In addition to their natural gas businesses, Defendants Eversource and Avangrid, through their respective subsidiaries, operate retail electric utilities or LSEs, which provide electricity to millions of residential, commercial and industrial customers in New England. Id. ¶ 101. The price of electricity sold by Defendants' retail utilities is driven, in large part, by the market-wide wholesale price of electricity established within the ISO-NE market. Id. ¶ 104. When the price of wholesale electricity established within the ISO-NE market increases the price of electricity sold by Eversource and Avangrid **[**16]** to their respective retail customers similarly increases. Id.

Eversource and Avangrid also own and operate renewable electricity resources such as hydroelectric, wind and solar generating facilities. Id. ¶ 105. Plaintiffs allege that these facilities have low variable operating costs and, as a result, are more competitive than natural gas-fired electricity generators when the price of natural gas increases. Id.

---

[2] Eversource owns NSTAR Gas Co. and Yankee Gas Co. and Avangrid owns Connecticut Natural Gas Co. and Southern Connecticut Gas Co. Id. ¶ 97.

[3] As previously explained, the sale of natural gas is separate from the sale of transmission capacity. Id. ¶ 77. Transmission capacity is necessary to transport natural gas from seller to purchaser via a pipeline.

2. Defendants' Alleged Monopolization Scheme

As previously explained, the New England electricity market sets a single price for wholesale electricity sold in a given auction. Id. ¶ 165. That price is determined by the highest accepted bid in the auction. Id. Plaintiffs allege that Defendants, by artificially restricting natural gas supply, raised wholesale natural gas prices on the spot market, which (in turn) raised the bids in electricity auctions, including the highest accepted bid. Id. Higher overall accepted bids resulted in an increase in the cost of wholesale electricity. And, finally, since increases in wholesale electricity prices are passed on to retail electricity consumers, Defendants' conduct caused the retail price of electricity to increase throughout New England. **[**17]** Id.

[*443] Defendants' purported systematic abuse of no-notice contracts for natural gas transmission capacity provided the catalyst for the alleged scheme. See, e.g., id. ¶ 107. No-notice contracts allow LDCs to reserve natural gas transmission capacity on the Algonquin Pipeline and to adjust such reservations at any time without penalty. Id. ¶ 99. Because there is a fixed amount of pipeline capacity on a given day, the volume reserved by LDCs, including those owned by Defendants, affects the transmission capacity available to meet the needs of other consumers, including natural gas-fired electricity generators. Id. ¶ 107. Moreover, to the extent Defendants adjust their capacity reservations downward "at the last minute," that capacity is not automatically released for use by other actors in the natural gas market. Id. ¶ 108. Accordingly, the nature and timing of Defendants' adjustments to their capacity reservations may prevent their previously reserved supply of natural gas from being released and used by others to satisfy demand in the natural gas market. Id. ¶ 110.

Plaintiffs assert that Defendants' conduct was unique. Id. ¶¶ 122-126. For example, industry research shows that, as compared **[**18]** to the utility company with the next highest "last-minute" cancellations, Eversource and Avangrid cancelled their natural gas capacity on approximately 40 and 184 more occasions, respectively. Id. ¶ 122. In addition, Defendants' "clear pattern of large downward adjustments at the very end of the gas day . . . is very different than the pattern" of their top competitors. Id. ¶ 125. Defendants also failed to take advantage of the "capacity release" mechanism authorized by FERC. Id. ¶ 128. The "capacity release" mechanism allows holders of no-notice contracts to release excess capacity directly to the relevant pipeline, which then sells that capacity. Id. ¶ 145. Capacity release can occur on a seasonal, monthly and even intra-day basis. Id. ¶ 141. Accordingly, Defendants could have—but did not—release their excess capacity to be sold to other actors in the market. Id. ¶ 147.

3. Market Advantages Stemming from Defendants' Alleged Anticompetitive Conduct

Plaintiffs allege that Defendants benefitted from artificially inflating natural gas and electricity prices in at least two ways. First, by increasing the spot market price for natural gas and/or restricting available natural gas supplies, **[**19]** Defendants artificially increased demand for value attributed to and prices paid to non-natural gas-fired power plants, including power plants owned by Defendants. Id. ¶¶ 152, 156-60. Second, as a result of the artificially depressed natural gas supply and inflated electricity prices caused by Defendants, Defendants were able to advocate for the construction of "other multi-billion-dollar energy infrastructure." Id. ¶¶ 161-63.

4. Plaintiffs' Alleged Injury

Plaintiffs allege that Eversource and Avangrid consistently cancelled substantial volumes of transmission capacity in the last three hours of the day every day during the class period.[4] Id. ¶ 119. In so doing, they reduced the Algonquin Pipeline's daily effective capacity by 14% on average. Id. ¶ 118. The reduced gas supply caused by Defendants resulted in natural gas prices on the spot market that were, on average, 38% higher than they would

[4] The class period began no later than August 1, 2013, continued through at least July 31, 2016 and ended or will end on the date the effects of the Defendants' anticompetitive conduct end. Id. ¶ 15.

otherwise have been. Id. ¶ 120. The increase in spot market natural gas prices impacted the wholesale price of electricity and, in turn, increased retail electricity **[*444]** prices by 20%. Id. ¶ 121. Plaintiffs estimate that over the course of at least three years, Defendants allegedly caused New Englanders **[**20]** to overpay for retail electricity by at least $3.6 billion. Id. ¶ 121.

D. Class Definitions

Plaintiffs assert state and federal law claims on behalf of themselves and similarly situated classes of persons pursuant to *Fed. R. Civ. P. 23*. Id. ¶ 194.

1. Eversource Unified State Law Class

Plaintiffs assert claims for damages and other relief under Massachusetts law against Eversource, on behalf of themselves and a class of similarly situated electricity consumers throughout New England (the "Unified State Law Class"). Id. ¶ 195. The Unified State Law Class is defined as "all consumers who purchased electricity during the class period, for their own use and not for resale, in the six-state ISO-NE market territory of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont." Id. ¶¶ 195, 197-203.

2. Eversource Separate State Law Classes

To the extent the Court does not apply Massachusetts law to the state law claims of all members of the Unified State Law Class, regardless of where they reside, Plaintiffs alternatively bring state law claims against Eversource on behalf of themselves and state-specific subclasses, under the relevant laws of Connecticut, Maine, Massachusetts, New Hampshire and **[**21]** Vermont ("Eversource Separate State Law Classes"). Id. ¶¶ 196-203.

3. Avangrid State Law Classes

Plaintiffs bring claims for damages and other relief against Avangrid, on behalf of themselves and state-specific subclasses, under the relevant laws of Connecticut, Maine, Massachusetts, New Hampshire, and Vermont ("Avangrid Separate State Law Classes"). Id. ¶¶ 204-11.

4. Eversource and Avangrid Federal Law Classes

Eversource Plaintiffs and Avangrid Plaintiffs separately bring claims for damages and other relief under federal ***antitrust law*** against Eversource and Avangrid, respectively, on behalf of themselves and a class of similarly situated electricity consumers in New England ("Eversource Federal Law Class" and "Avangrid Federal Law Class," respectively). Id. ¶¶ 212-27.

The Eversource Federal Law Class is defined as "all consumers who purchased electricity in the ISO-NE market territory from Eversource and/or its subsidiaries or affiliates, during the class period, for their own use and not for resale." Id. ¶ 212.

The Avangrid Federal Law Class is defined as "all consumers who purchased electricity in the ISO-NE market territory from Avangrid and/or its subsidiaries or affiliates, during **[**22]** the class period, for their own use and not for resale." Id. ¶ 220.

5. Federal Law Injunctive Relief Class

Plaintiffs bring claims for injunctive relief under federal ***antitrust law*** against defendants, on behalf of themselves and a class of all electricity consumers in New England ("Federal Law Injunctive Class"). The Federal Law Injunctive Class is defined as "all consumers who purchased electricity in the ISO-NE market territory of New England, during the class period, for their own use and not for resale." Id. ¶ 228.

IV. Procedural History

On November 16, 2017, named Plaintiffs instituted this action against Defendants. D. 1. Shortly thereafter, a related class action complaint was filed against Defendants on February 6, 2018 and assigned to this Court. D. 32 at 2. On February 21, 2018, the Court consolidated the actions. D. 32 at 3. Plaintiffs subsequently filed a **[*445]** consolidated amended complaint. D. 33. Defendants have now moved to dismiss. D. 41; D. 42. The Court heard the parties on the pending motions on August 1, 2018 and took these matters under advisement. D. 57.

V. Discussion

A. The Filed Rate Doctrine Bars Plaintiffs Here from Seeking Damages for Purported Violations of Federal [**23] and State Law

Defendants contend that Plaintiffs' federal and state law claims are foreclosed by the filed rate doctrine. ***HN4***[] The filed rate doctrine "revolve[s] around the notion that under statutes like the *Federal Power Act*, utility filings with [a federal agency] prevail over . . . other claims seeking different rates or terms than those reflected in the filings with the agency." *Town of Norwood, Mass. v. F.E.R.C., 217 F.3d 24, 28 (1st Cir. 2000)*. It "has its origins in [Supreme Court cases] interpreting the Interstate Commerce Act . . . and has been extended across the spectrum of regulated utilities." *Ark. La. Gas Co. v. Hall, 453 U.S. 571, 577, 101 S. Ct. 2925, 69 L. Ed. 2d 856 (1981)* ("Arkla") (internal citations omitted). The filed rate doctrine is a "form of deference and preemption, which precludes interference with the rate setting authority of an administrative agency." *Wah Chang v. Duke Energy Trading & Mktg., LLC, 507 F.3d 1222, 1225 (9th Cir. 2007)*. Accordingly, "strict application of the rule is necessary to promote the congressional policy of preventing unjust discrimination in rates." *Town of Norwood v. New England Power Co., 23 F. Supp. 2d 109, 115-16 (D. Mass. 1998)*, aff'd in part, remanded in part sub nom., *Town of Norwood, Mass. v. New England Power Co., 202 F.3d 408 (1st Cir. 2000)* (internal quotation marks and citation omitted).

HN5[] Under the filed rate doctrine, where FERC determines that a rate is "just and reasonable," courts cannot approve a departure from that rate. See *id. at 116* (indicating that "FERC's authority to determine whether wholesale rates filed by **[**24]** utilities are just and reasonable is exclusive") (internal quotation marks omitted); see also *Arkla, 453 U.S. at 577-78* (stating that "[n]o court may substitute its own judgment on reasonableness for the judgment of [FERC]" nor can courts "impose a different rate than the one approved by [FERC]"). Moreover, the filed rate doctrine applies even where, as here, FERC determines that certain wholesale rates are to be set by market forces. *Town of Norwood, 202 F.3d at 419* (holding that the filed rate doctrine barred antitrust claims challenging wholesale electricity rates and rejecting the argument that the "filed rate doctrine should not apply where the 'regulated' rates have been left to the free market"). Accordingly, courts are not the forum to adjudicate claims based on the propriety of regulated rates. See, e.g., *Arkla, 453 U.S. at 584* (explaining that "[p]ermitting the state court to award what amounts to a retroactive right to collect a rate in excess of the filed rate 'only accentuates the danger of conflict'"). Due to the preclusive effect of the filed rate doctrine, federal and state antitrust claims, as well as state tort actions, that require courts to set aside or second guess rates approved by FERC must fail as a matter of law. *Wah Chang, 507 F.3d at 1225* (citation omitted); **[**25]** *Town of Norwood, 202 F.3d at 418*. "The question, then, is whether [Plaintiffs] can establish a pertinent limitation on or exception to the filed rate doctrine." *Town of Norwood, 202 F.3d at 418*.

1. The Filed Rate Doctrine Prohibits the Court from Determining the Reasonableness of Rates or Tariffs Approved by FERC

Plaintiffs first argue that the filed rate doctrine does not apply to their claims **[*446]** because they do not seek to alter the terms of tariffs or rates approved by FERC. D. 48 at 25-32. Instead, Plaintiffs allegedly seek relief in accord with FERC's tariffs and only challenge Defendants' purported manipulation of retail natural gas and electricity rates outside of FERC's jurisdiction. Id. Defendants, on the other hand, assert that the filed rate doctrine applies because Plaintiffs cannot escape the fact that their claims challenge the propriety of wholesale electricity rates approved by FERC and that Plaintiffs' requested relief requires the Court to set such rates aside. D. 43 at 19; D. 52 at 7; D. 55 at 6. Thus, the threshold question before this Court is whether Plaintiffs' claims depend upon the Court's determination that tariffs or rates approved by FERC are unjust or unreasonable. See *Arkla, 453 U.S. at 577-78*.

Here, Plaintiffs allege that Defendants restricted **[**26]** New England's natural gas supply and artificially inflated wholesale natural gas prices, which increased the price of wholesale and retail electricity in New England. See, e.g., D. 33 ¶ 165. Although the parties disagree as to whether FERC regulates sales of natural gas on the spot market, there is no dispute that (pursuant to the ISO-NE Tariff) FERC exclusively regulates the region's wholesale electricity market, including ISO-NE's wholesale electricity auctions and the resulting prices.[5] Id. ¶¶ 49-51, 54; see D. 43 at 10; D. 52 at 3; D. 55 at 1. The parties also agree that the "price of natural gas is the single most significant factor in determining wholesale electricity prices," D. 33 ¶ 68 and, in turn, the price of wholesale electricity is the "largest factor in determining the overall electricity price paid by consumers throughout the ISO-NE regional electricity market," id. ¶ 66. Given the relationship between the markets at issue in this case, the Court cannot determine Defendants' liability for alleged retail electricity market manipulation without first deciding the reasonableness of wholesale electricity rates approved by FERC as part of the ISO-NE Tariff and auction process. **[**27]** [6]

In cases spawned by the California energy crisis between 2000 and 2001, the Ninth Circuit dismissed claims requiring the court to evaluate the reasonableness of rates squarely within FERC's jurisdiction. See, e.g., *Pub. Util. Dist. No. 1 of Snohomish Cnty. v. Dynegy Power Mktg., Inc., 384 F.3d 756, 761 (9th Cir. 2004)* ("Snohomish"). In Snohomish, for example, the Ninth Circuit considered whether the filed rate doctrine barred state antitrust and consumer protection claims alleging that actors in the wholesale electricity market "manipulated the market and restricted **[*447]** electricity supplies in order to cause artificially high prices." *Id. at 758*. Similar to Plaintiffs here, Snohomish alleged that "the defendants withheld supply, waited until . . . prices rose, and then offered their supply at the higher prices." *Id. at 759*. The plaintiff there also argued that the defendants' anticompetitive conduct in the wholesale electricity market "caused [the plaintiff] to pay prices for electricity in excess of rates that would have been achieved in a competitive market." Id. (internal quotation marks omitted). According to the Ninth Circuit, the plaintiff's requested relief would require the court to determine a "fair price" for wholesale electricity **[**28]** absent the defendants' conduct. *Id. at 761*. The Ninth Circuit, therefore, held that the filed rate doctrine barred Snohomish's claims to the extent they would require the court to "interfere with FERC's exclusive jurisdiction to set wholesale rates." Id. A few years later, in Gallo II, the Ninth Circuit applied similar reasoning in dismissing claims challenging

---

[5] In Town of Norwood, the First Circuit held that the filed rate doctrine applied with equal force to market-based wholesale electricity rates. *Town of Norwood, 202 F.3d at 419* (explaining that "FERC is still responsible for ensuring 'just and reasonable' rates and, to that end, wholesale power rates continue to be filed and subject to agency review, *16 U.S.C. § 824d*"). As a result, the Court does not distinguish between market-based rates and rates formally filed with FERC for the purpose of determining whether the filed rate doctrine bars Plaintiffs' claims.

[6] In support of the argument that Plaintiffs only challenge conduct outside of FERC's jurisdiction, Plaintiffs rely on cases that are inapposite here, including *F.E.R.C. v. Elec. Power Supply Ass'n, __ U.S. __, 136 S. Ct. 760, 193 L. Ed. 2d 661 (2016)*, as revised (Jan. 28, 2016) ("E.P.S.A."). See, e.g., D. 48 at 28. In E.P.S.A., the Supreme Court did not consider whether the filed rate doctrine bars claims challenging retail rates that would require courts to determine the reasonableness of wholesale rates filed with FERC. Rather, the court held that that FERC may regulate "what takes place on the wholesale market," even if such regulations influence retail rates. *E.P.S.A., __ U.S. __, 136 S. Ct. at 776*.

the propriety of wholesale natural gas rates approved by FERC. *Gallo II, 503 F.3d at 1039 n.11*. In that case, the Ninth Circuit determined that the filed rate doctrine prohibits courts from considering whether "FERC-authorized rates are just and reasonable." Id. "Rather, under the principles of the [f]iled [r]ate [d]octrine, they are just and reasonable as a matter of law," even where the rates at issue are "market-based." Id. Most recently, the Ninth Circuit considered whether the filed rate doctrine barred a retail electricity consumer's antitrust claims alleging that local electricity utilities "artificially increased" the price of wholesale electricity "through their anticompetitive and fraudulent manipulation of the wholesale markets." *Wah Chang, 507 F.3d at 1224*. There, the Ninth Circuit held that the filed rate doctrine barred any claims that require "the courts [to] determine what rates **[**29]** [utility companies] should have charged instead of the rates they did charge." *Id. at 1226*. As was the case in the aforementioned disputes, Plaintiffs' theory of liability requires the Court to determine the reasonableness of wholesale electricity prices exclusively regulated by FERC.[7]

Moreover, to award monetary relief to retail electricity consumers, the Court would be required to determine the difference between wholesale electricity rates during the class period and hypothetical rates that would have been charged but for Defendants' purported anticompetitive conduct. This is exactly the analysis the filed rate doctrine prohibits. See *Wah Chang, 507 F.3d at 1226* (holding that the filed rate doctrine "turns away attempts [like plaintiff's] . . . which necessarily hinge on a claim that the FERC approved rate was too high and would, therefore, undermine FERC's tariff authority through the medium of direct court actions"); see also *Transmission Agency of N. Cal. v. Sierra Pac. Power Co., 295 F.3d 918, 930 (9th Cir. 2002)* (noting that courts may not "assum[e] a hypothetical rate different from that actually set by FERC"); *Cnty. of Stanislaus v. Pac. Gas & Elec.* ***[*448]*** *Co., 114 F.3d 858, 863 (9th Cir. 1997)* (quoting *Cost Mgmt. Servs. V. Wash. Natural Gas Co., 99 F.3d 937, 944 (9th Cir. 1996)* (explaining that an antitrust "claim for damages based on a filed rate would be too speculative, because it: 'would require a showing that a hypothetical lower rate should **[**30]** and would have been adopted by [FERC],'" which is a question "best left to the agency itself, rather than the courts")).

HN6[] The Supreme Court has recognized a limited exception to the filed rate doctrine for injunctive relief. See *State of Georgia v. Pa. Ry. Co., 324 U.S. 439, 454-62, 65 S. Ct. 716, 89 L. Ed. 1051 (1945)* (holding that plaintiff could bring antitrust action to enjoin alleged "coercive and collusive influences" in rate-marking); *Square D Co. v. Niagara Frontier Tariff Bureau, Inc., 476 U.S. 409, 422 n. 28, 106 S. Ct. 1922, 90 L. Ed. 2d 413 (1922)* (explaining that the filed rate doctrine does not preclude injunctive antitrust actions). In Town of Norwood, for example, the First Circuit considered whether Georgia and Square D Co. required the court to allow the plaintiff's claims seeking injunctive relief where the court had dismissed similar claims for damages. *Town of Norwood, 202 F.3d at 419-20*. In affirming the district court's dismissal of the antitrust claims at issue, the First Circuit cautioned that the filed rate doctrine prohibits an injunction where "any meaningful relief . . . would require the *alteration* of tariffs." *Town of Norwood, 202 F.3d at 420* (emphasis in the original).[8] Although the amended complaint in the instant dispute does not specify what exactly Plaintiffs seek to enjoin Defendants from doing, the Court concludes that any meaningful relief would, at a minimum, require the Court to enjoin conduct authorized by the tariff **[**31]** governing Defendants' no-notice contracts. Specifically, Plaintiffs assert that Defendants' anticompetitive conduct began in the upstream natural gas transmission market pursuant to which Defendants allegedly manipulated or abused provisions of no-notice contracts that allow their subsidiaries to adjust natural gas capacity reservations along the Algonquin Pipeline

---

[7] Plaintiffs rely on *Verizon Del., Inc. v. Covad Commc'ns Co., 377 F.3d 1081 (9th Cir. 2004)* for the proposition that the filed rate doctrine does not bar claims that "seek[] repayment in accord with the criteria in the filed rate[]" doctrine. *Verizon, 377 F.3d at 1090*; see D. 48 at 25. That case is inapplicable. There, the court determined that the plaintiff was entitled to recoup funds the defendant would have owed the plaintiff pursuant to filed rates but for defendant's alleged anticompetitive scheme to reduce its service costs. See *Verizon, 377 F.3d at 1090* (stating that the plaintiff may "recoup overpayments . . . to enforce the filed rates"). Where, as here, the plaintiff also sought damages in excess of filed rates, the Ninth Circuit concluded that the filed rate doctrine bars such recovery. Id. (explaining that the plaintiff may not, however collect overpayments that "would be in addition to the filed rate").

[8] By contrast to the relief sought in Town of Norwood, "Georgia and Square D Co. . . . concerned . . . possible price-fixing conspiracies that conceivably could have been enjoined without tampering with the tariffed rates themselves." *Town of Norwood, 202 F.3d at 419-20*.

at any time without penalty. D. 33 ¶ 8. Plaintiffs concede that FERC maintains authority to regulate the interstate transmission of natural gas, id. ¶ 77, and approved the no-notice contracts at issue. D. 48 at 34. In addition, Plaintiffs cannot dispute that the filed rate doctrine protects not only agency authority over tariffed rates but also "ancillary conditions and terms included in the tariff," including, for example, no-notice contracts and relevant provisions allowing LDCs to cancel capacity reservations at any time without penalty. *Town Norwood, 202 F.3d at 416*; see D. 48 at 16 (acknowledging that FERC granted LDCs authority to enter no-notice contracts and adjust capacity reservations pursuant to a tariff governing interstate transportation of natural gas along the Algonquin Pipeline). Accordingly, to the extent Plaintiffs seek to enjoin Defendants **[**32]** from exercising rights pursuant to contracts subject to a filed tariff, Plaintiffs ask the Court do exactly what the First Circuit has declared it cannot, *i.e.*, to alter the terms of tariffs approved by FERC. See *Town of Norwood, 202 F.3d at 420*.

2. *Plaintiffs Have Not Established an Applicable Exception to the Filed Rate Doctrine*

Alternatively, Plaintiffs argue that, "even if the filed rate doctrine could be assumed to apply here as a general matter, **[*449]** courts have consistently carved out an exception to the filed rate doctrine where plaintiffs challenge conduct not required by the regulations." D. 48 at 32. Plaintiffs contend that such an exception is appropriate here because Plaintiffs are not challenging tariffs or rates filed with FERC; rather, they are only challenging Defendants' "business choices" with respect to no-notice contracts. Id. Even if this argument was not rendered moot by the Court's conclusion that Plaintiffs' requested damages and injunctive relief run afoul of the filed rate doctrine, the Court nonetheless concludes that any such exception is inapplicable here.

Plaintiffs claim that Defendants' artificial restriction of natural gas through the alleged abuse of **[**33]** no-notice contracts constitutes an improper business decision that "will not be 'immunized from antitrust liability.'" Id. at 35 (quoting *City of Mishawaka, Ind. v. Ind. & Mich. Elec. Co., 560 F.2d 1314, 1320 (7th Cir. 1977))*. For support, Plaintiffs primarily rely upon *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*, *Brown v. Ticor Title Ins. Co., 982 F.2d 386 (9th Cir. 1992)* and *Composite Co., Inc. v. Am. Int'l Grp., Inc., 988 F. Supp. 2d 61 (D. Mass. 2013)*. Having reviewed these cases, the Court concludes that they are readily distinguishable from the instant case.

First, Otter Tail neither concerns the filed rate doctrine's preclusive effect on antitrust challenges to tariffed rates or ancillary matters exclusively governed by a federal regulatory agency nor supports the purported exception to the filed rate doctrine that Plaintiffs suggest is applicable in this case. See *Otter Tail, 410 U.S. at 373-77*. Otter Tail involved an electric company's refusal to wheel electric power over its transmissions lines to municipal consumers as part of an alleged monopolization scheme. *Id. at 373*. In Otter Tail, the government brought an action to enjoin the electric company's anticompetitive conduct, and the Supreme Court concluded that Congress did not displace the applicability of federal ***antitrust law*** to the conduct at issue so there was no conflict between ***antitrust law*** and the FPC's "limited authority" to order interconnection of transmission lines. *Otter Tail, 410 U.S. at 373-77*. As other courts have recognized, however, there is **[**34]** a critical distinction between Otter Tail and cases concerning anticompetitive conduct in markets that Congress entrusted exclusively to FERC. See *In re Enron Corp., 326 B.R. 257, 264 (Bankr. S.D.N.Y. 2005)* (distinguishing Otter Tail in holding that the filed rate doctrine precluded federal and state antitrust claims alleging that wholesale energy suppliers manipulated energy markets and overcharged for energy through anticompetitive acts during California's energy crisis); see also *California ex rel. Lockyer v. Dynegy, Inc., 375 F. 3d 831, 852 (9th Cir. 2004)* (noting FERC's exclusive authority "both to enforce and to seek remedy" regarding violation of tariff provisions); *AEP Tex. N. Co. v. Tex. Indus. Energy Consumers, 473 F.3d 581, 585 (5th Cir. 2006)* (FERC "is the appropriate arbiter of any disputes involving a tariff's interpretation"); *Town of Norwood, 202 F.3d at 420* (explaining that "the rationale for the filed rate doctrine is to protect the exclusive authority of the agency to accept or challenge [its] tariffs") (citing *Arkla, 453 U.S. at 571, 577 78)*.

Second, *Brown* is an outlier case that various courts, including the First Circuit, have declined to extend to cases concerning the filed rate doctrine's protection of rates and tariffs approved by federal agencies. See, e.g., *McCray v. Fid. Nat'l Title Ins. Co., 636 F. Supp. 2d 322, 329 (D. Del. 2009)* (explaining that "[o]ther than the Ninth Circuit in Brown, no other court has taken such a narrow view of the applicability **[*450]** of the filed rate doctrine"). In Brown, the Ninth Circuit **[**35]** held that the filed rate doctrine did not apply to title insurance rates submitted to state insurance agencies that were not subjected to "meaningful review by the state." *Brown, 982 F.2d at 394*. However, the Supreme Court "has never indicated that the filed rate doctrine requires a certain type of agency approval or level of regulatory review" to preclude challenges to filed rates or tariffs. *McCray v. Fid. Nat. Title Ins. Co., 682 F.3d 229, 238 (3d Cir. 2012)*. In Square D Co., the Supreme Court held that the filed rate doctrine applied to rates that were filed with but never "investigated and approved by the ICC." *Square D. Co., 476 U.S. at 417 n.19*. The First Circuit has similarly rejected the notion that rates or tariffs approved by FERC must receive a "meaningful review" before the filed rate doctrine can apply. See *Town of Norwood, 202 F. 3d at 419* (holding that "[i]t is the *filing* of the tariffs, and not any affirmative approval or scrutiny by the agency, that triggers the filed rate doctrine") (emphasis in the original). Moreover, even the Ninth Circuit has acknowledged that Brown does not make "meaningful review a *sine qua non* for the applicability of the filed rate doctrine." *Carlin v. DairyAmerica, Inc., 705 F.3d 856, 871-72 (9th Cir. 2013)* (noting the filed rate doctrine applies to FERC-approved rates); see *Wah Chang, 507 F.3d at 1227* (stating that although "Wah Chang ululates about FERC's lax oversight . . . laxness **[**36]** does not indicate, much less establish, that Wah Chang can turn directly to the courts for rate relief").

Finally, Plaintiffs' reliance on Composite Co. to carve out an exception to the filed rate doctrine is also inapposite because, as the court makes clear, that decision did not concern a filed rate. *Composite Co., 988 F. Supp. 2d at 77* (holding that the filed rate doctrine did not apply because "the experience-modifier at issue in this case is not a filed rate"). ***HN7***[] The court explained that the "focus for determining whether the filed rate doctrine applies is the impact the court's decision will have on agency procedures and rate determines." *Id. at 78* (quoting *H.J., Inc. v. Northwestern Bell Tel. Co., 954 F.2d 485, 489 (8th Cir. 1992))* (internal quotation marks omitted). Pursuant to this reasoning, the court in Composite Co. held that the filed rate doctrine did not bar plaintiff's claims because a "decision in favor of plaintiff would not discredit any decision of an administrative agency." Id. The same cannot be said for Plaintiffs' requested relief which, even when packaged as a request to enjoin or award damages for anticompetitive business choices, requires the Court to determine the reasonableness of rates and tariffs approved by FERC.[9]

In sum, the cases Plaintiffs cite in support of **[**37]** the purported exception to the filed rate doctrine for alleged anticompetitive business decisions are inapplicable here. In lieu of an applicable exception, Plaintiffs cannot escape the fact that FERC authorized the business choices that allegedly caused Plaintiffs' injury. See D. 33 ¶ 99 (explaining that "no-notice contracts, which are only available to LDCs, give them power to reserve space, or transmission capacity on the pipeline for a given day and time, then adjust that reservation upward or downward at the last minute without **[*451]** penalty"); see id. ¶ 110 (noting that "capacity cancellations under no-notice contracts do not allow the pipeline to release that capacity to other buyers and sellers wishing to fulfill demand in the market"). Because Plaintiffs' requested relief would require the Court to determine the reasonableness of rates and tariffs approved by FERC and because Plaintiffs have failed to "establish a pertinent limitation on or exception to the filed rate doctrine," the Court holds that the doctrine bars the federal and state law claims in the amended complaint.[10]

---

[9] Plaintiffs' reliance on *City of Kirkwood v. Union Elec. Co., 671 F.2d 1173 (8th Cir. 1982)* and *Mishawaka v. Ind. & Mich. Elec. Co., 560 F.2d 1314 (7th Cir. 1977)* to carve out an exception to the filed rate doctrine is similarly unpersuasive. See, e.g., D. 48 at 30. The holdings of these cases turn on the analysis of price squeeze claims that are irrelevant here. Moreover, in the context of price squeeze claims, the First Circuit has declined to follow the reasoning in these cases. See *Town of Concord, Mass. v. Boston Edison Co., 915 F.2d 17, 28-29 (1st Cir. 1990)*.

[10] Plaintiffs also allege that if they cannot pursue their claims in this Court, they lack an adequate remedy. D. 59 at 50-51. ***HN8***[] Although it is true that retail consumers do not have standing to file complaints with FERC, id., courts have consistently held that lack of a remedy does not create an exception to the filed rate doctrine. D. 44 at 26 (citing *Maislin Indus., U.S., Inc. v. Primary Steel, Inc., 497 U.S. 116, 128, 110 S. Ct. 2759, 111 L. Ed. 2d 94 (1990)* (explaining that "[d]espite the harsh effects of the filed rate doctrine, we have consistently adhered to it")); see *Wah Chang, 507 F.3d at 1226-27* (observing that Plaintiff "will not have a separate right of action for damages if it does not have this one, but lack of a damage remedy is not determinative"); *Marcus v. AT&T Corp., 138 F.3d 46, 58 (2d Cir. 1998)* (concluding that "[a]pplication of the filed rate doctrine in any particular case is not determined by . . . the possibility of inequitable results")). Nonetheless, even if Plaintiffs' claims were not barred by the filed rate doctrine, they would still fail for the reasons mentioned herein.

B. Plaintiffs Have Not Stated a Cognizable Antitrust Claim

Even if the filed rate doctrine did not bar **[**38]** Plaintiffs' antitrust claims, those claims would not survive Defendants' motions to dismiss because Plaintiffs lack standing to bring their claims and for the additional reason that Plaintiffs have failed to state a cognizable antitrust monopolization claim.

1. Plaintiffs Lack Antitrust Standing

As an initial matter, Defendants contend that Plaintiffs do not have standing to bring their antitrust claims. D. 43 at 27; D. 44 at 28. ***HN9***[] Federal courts are constitutionally limited to deciding cases or controversies. *Merrimon v. Unum Life Ins. Co. of Am., 758 F.3d 46, 52 (1st Cir. 2014)*. Accordingly, a plaintiff must establish that it has standing in federal court by demonstrating that her complaint alleges a case or controversy recognized under Article III of the Constitution. See *Katz v. Pershing, LLC, 672 F.3d 64, 71 (1st Cir. 2012)*. To do so, "a plaintiff must establish . . . injury, causation, and redressability." *Id.* (citing *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992))*. At the pleading stage, "[a]n antitrust plaintiff must show both constitutional standing and antitrust standing." *In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 157 (2d Cir. 2016)*. To determine whether a plaintiff has standing to bring an antitrust cause of action, the Court conducts "an analysis of prudential considerations aimed at preserving the effective enforcement of the antitrust laws." *RSA Media, Inc. v. AK Media Grp., Inc., 260 F.3d 10, 13 (1st Cir. 2001)* (quoting *Serpa Corp. v. McWane, Inc., 199 F.3d 6, 9-10 (1st Cir. 1999))* (internal quotation marks omitted). The Court considers:

> (1) the causal connection **[**39]** between the alleged antitrust violation and harm to the plaintiff; (2) an improper motive; (3) the nature of the plaintiff's alleged injury and whether the injury was of a type that Congress sought to redress with the antitrust laws . . . ; (4) the directness with which the alleged market restraint caused the asserted injury; (5) the speculative nature of the damages; and (6) **[*452]** the risk of duplicative recovery or complex apportionment of damages.

Id. at 14 (citation omitted). Although courts weigh each of the six factors, lack of injury, in particular, will generally defeat standing. See *Sterling Merch., Inc. v. Nestlé, S.A., 656 F.3d 112, 121 (1st Cir. 2011)*. The Court will, therefore, address Defendants' arguments with respect to antitrust injury first.

HN10[] "The Supreme Court has defined 'antitrust injury' as an 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Serpa Corp.,199 F.3d at10* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. To establish antitrust injury, a "proper plaintiff 'must prove more than injury causally linked to an illegal presence in the market.'" *Serpa, 199 F.3d at 10* (quoting *Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 125, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. The First Circuit has explained that "[c]ompetitors and consumers in the market where trade is allegedly restrained are presumptively the proper plaintiffs to allege antitrust **[**40]** injury." *Serpa, 199 F.3d at 10-11*.

Defendants assert that Plaintiffs, who are retail electricity consumers, cannot establish "antitrust injury" because they are not competitors or customers in the natural gas transmission market allegedly restrained by Defendants' anticompetitive conduct. D. 43 at 28-20; D. 44 at 28 30. Specifically, Defendants argue that Plaintiffs have alleged that market manipulation occurred in the natural gas transmission market through Defendants' alleged suppression of New England's natural gas supply, while Plaintiffs' alleged injury occurred in the retail electricity market. According to Defendants, it is not enough that Plaintiffs participated in the retail electricity market, which was indirectly affected by Defendants' antitrust conduct; rather, Plaintiffs must have directly participated in the market in which Defendants' alleged anticompetitive conduct occurred to have standing. D. 44 at 29. Defendants cite Aluminum Warehousing for the proposition that a "putative plaintiff must be a participant in the very market that is directly restrained" to suffer antitrust injury. *Aluminum Warehousing, 833 F.3d at 161*. In Aluminum Warehousing, aluminum purchasers alleged that futures traders and aluminum warehouse owners conspired **[**41]** to artificially inflate the price of storing aluminum in London Metal Exchange ("LME") Warehouses. *Id. at 155*. The plaintiffs in that case were not participants in any of the markets in which the defendants operated, however, they alleged that they suffered antitrust injury because their role in the physical aluminum market was "inextricably intertwined" with the defendants' alleged anticompetitive scheme in the aluminum storage market. *Id. at 162*. The plaintiffs in Aluminum Warehousing asserted that the increase in storage costs caused by the defendants' anticompetitive conduct also increased the price the plaintiffs' paid for aluminum. *Id. at 156*. The Second Circuit nevertheless held there was no cognizable antitrust injury because "the injury [the plaintiffs] claim was suffered down the distribution chain of a separate market, and was a purely incidental byproduct of the alleged scheme." *Id. at 162*. Consistent with the Second Circuit's decision in Aluminum Warehousing, Defendants here urge the Court to dismiss Plaintiffs' claims because they similarly do not participate in the market in which Defendants' alleged unlawful conduct occurred. D. 44 at 29.

By contrast to the plaintiffs in *Aluminum Warehousing*, Plaintiffs do **[**42]** not affirmatively allege that they are "proper" **[*453]** plaintiffs for the purpose of establishing antitrust injury. D. 48 at 42-44. Instead, Plaintiffs argue that standing is appropriate where, as here, there is "no one else 'with the incentive or ability to sue.'" D. 48 at 42 (quoting *SAS of P.R., Inc. v. P.R. Tel. Co., 48 F.3d 39, 45 (1st Cir. 1995))*. In SAS, the First Circuit explained that "[t]he most obvious reason for conferring standing on a second-best plaintiff is that, in some general category of cases, there may be no first best with the incentive or ability to sue." *SAS, 48 F.3d at 45* (denying standing where actors directly threatened by the market had "ample incentive and ability" to challenge antitrust violations); cf. *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 542, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (concluding that the "existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement diminishes the justification for allowing a more remote party" to exercise standing). In the instant litigation, Plaintiffs assert that actors in the natural gas transmission market, including Defendants' subsidiaries and competitors, are unlikely to bring suit given that they benefited from Defendants' anticompetitive conduct in the form of inflated prices for natural gas **[**43]** on the spot market. However, Plaintiffs' pleadings undermine the persuasiveness of their argument. The amended complaint alleges that Defendants, through their manipulation of no-notice contracts, did not release their excess natural gas capacity so that other actors in the market could use that capacity. D. 33 ¶ 147. If Defendants had released excess capacity, other companies—such as generators looking to jump into the real-time auction at the last minute—could have purchased it. Id. Surely, at least one gas seller or purchaser that was consistently deprived the benefits of excess natural gas transmission capacity due to Defendants' alleged anticompetitive conduct possessed the requisite incentive or ability to sue Defendants for direct injury in the natural gas transmission market.[11]

Plaintiffs also attempt to invoke the Supreme Court's decision in *Blue Shield of Va. v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*, which allowed antitrust claims to proceed where the plaintiff's injury was "inextricably intertwined" with the injury the defendant's conduct sought to inflict upon the relevant market or participants. D. 44 at 21. In McCready, the Supreme Court considered whether a plaintiff, who received health care coverage under a Blue Shield of **[**44]** Virginia ("Blue Shield") health plan, could sue under antitrust laws for an alleged conspiracy between Blue Shield and Virginia psychiatrists to exclude psychologists from the market by refusing to reimburse health plan subscribers like the plaintiff for their services. *McCready, 457 U.S. at 467-68*. Although the plaintiff in McCready was not a psychologist (and therefore not the immediate target of the alleged conspiracy), the Supreme Court allowed the plaintiff's claims to proceed because her injury "was inextricably **[*454]** intertwined with the injury the conspirators sought to inflict on psychologists and the psychotherapy market." *Id. at 484*. The court explained further that McCready's injury was a "necessary step in effecting the ends of the alleged illegal conspiracy" and "the very means by which it is alleged that [the defendants] sought to achieve its

---

[11] Plaintiffs' argument that Defendants' competitors in the natural gas transmission market have no incentive to sue Defendants does not require the Court to reach a different result. D. 48 at 42. Plaintiffs rely on a paragraph of their amended complaint regarding the wholesale and retail electricity markets in New England. D. 33 ¶ 164. In addition, Plaintiffs have not alleged that every competitor and customer in the natural gas transmission market benefited from Defendants' alleged anticompetitive conduct such that there is not a direct market actor with the incentive or capacity to sue Defendants, as required to satisfy the exceptional circumstances under which courts confer standing on a "second-best plaintiff." See *SAS, 48 F.3d at 45*.

illegal ends." Id. at 479. The First Circuit has explained that McCready "may be an instance in which standing was extended to a plaintiff who was only derivatively injured" or it "can also be read as a case in which the plaintiff was a purchaser in the very market directly distorted by the antitrust violation." SAS, 48 F.3d at 45-46. The First Circuit also cast doubt on whether "this [inextricably intertwined] **[**45]** language—if taken as physical image—was ever intended as a legal test of standing." Id. at 46. Accordingly, employing a narrow reading of McCready based on the facts at issue in that case, the Court concludes that Plaintiffs have not established antitrust standing. See Winters v. Ocean Spray Cranberries, Inc., 296 F. Supp. 3d 311, 320 (D. Mass. 2017), reconsideration denied, motion to certify appeal granted, No. CV 12-12016-RWZ, 2018 U.S. Dist. LEXIS 63036, 2018 WL 1627442 (D. Mass. Jan. 2, 2018) (applying McCready to antitrust claims in view of the First Circuit's analysis in SAS). The objective of the alleged anticompetitive scheme in McCready was to exclude psychologists from Virginia's market for psychotherapy, and the mechanism by which that scheme was accomplished required plaintiff and others similarly situated to pay out of pocket for psychologists' services, which were not reimbursable under the Blue Shield plan at issue. McCready, 457 U.S. at 467-68. As such, the plaintiff's injury was integral to the injury the conspirators sought to inflict upon psychologists. Id. at 484. Plaintiffs here allege that Defendants sought to increase the profits of their natural-gas generated electricity plants and the value of their non-natural gas electricity generating assets by suppressing natural gas supply and, in turn, artificially inflating the wholesale price of electricity paid to **[**46]** power generators in New England. D. 33 ¶¶ 150-163. By contrast to the plaintiffs in McCready, the increased cost of retail electricity borne by Plaintiffs here was merely incidental even to Defendants' scheme, as alleged by Plaintiffs. That is, Plaintiffs' injury was not the "very means" by which Defendants sought to achieve their "illegal ends." McCready, 457 U.S. at 479. The Court, therefore, concludes that Plaintiffs have not suffered an antitrust injury. See SAS, 48 F.3d at 43 (explaining that "even where a violation exists and a plaintiff has been damaged by it, the courts—for reasons of prudence—have sought to limit the right of private parties to sue for damages or injunctions").

Assuming *arguendo* that Plaintiffs did in fact suffer an antitrust injury, the Court would still have to determine whether Plaintiffs' injury is sufficiently connected to Defendants' alleged anticompetitive conduct. See Winters, 296 F. Supp. 3d at 322. This task is guided by the first and fourth factors of the standing analysis, which require examination of the "causal connection between the alleged antitrust violation and harm to the plaintiff" and "the directness with which the alleged market restraint caused the asserted injury." RSA, 260 F.3d at 14 (citation omitted). The causal **[**47]** connection between Defendants' alleged suppression of the supply of natural gas and Plaintiffs' injury as retail electricity consumers is attenuated at best. Plaintiffs' injury allegedly stems from Defendants' anticompetitive conduct in the natural gas transmission market, which is at least three markets removed from the retail electricity market. See, e.g., D. 33 ¶ 8. Accordingly, for Plaintiffs to suffer **[*455]** any injury, the anticompetitive effect of Defendants' conduct must pass through the natural gas supply transmission market, to the spot market for consumers with "variable and less predictable" natural gas needs, id. ¶ 88, to the wholesale electricity auction, which involves a complicated bidding process designed to discourage competitors from offering prices well above the competition, id. ¶ 57, and finally to retail electricity consumers. In addition, the lack of directness between the alleged restraint and injury counsels in favor of dismissal because Plaintiffs' injury was merely an offshoot of the injuries suffered by buyers in the spot market for natural gas and the wholesale electricity market. See Associated Gen., 459 U.S. at 540-41 (concluding that the plaintiff lacked antitrust standing where "the chain **[**48]** of causation between [the plaintiff's] injury and the alleged restraint . . . contains several somewhat vaguely defined links" and where "[i]t is obvious that any such injuries were only an indirect result of whatever harm may have been suffered" by more immediate victims); see also Sullivan v. Tagliabue, 828 F. Supp. 114, 118 (D. Mass. 1993), aff'd, 25 F.3d 43 (1st Cir. 1994) (dismissing one plaintiff's antitrust claims for lack of standing where "[i]t is obvious that any injury suffered . . . was only an indirect result of the alleged injury inflicted" upon another plaintiff). For similar reasons, a district court in this Circuit dismissed antitrust claims involving an alleged restraint in one market that impacted prices in a second market. Winters, 296 F. Supp. 3d at 322 (dismissing antitrust claims where "the harm [plaintiffs'] allege is indirect" given that defendant Ocean Spray "first influences independent handlers, who in turn, lower the prices they pay independent growers"). The Court concludes that Plaintiffs' injury is indirect and only remotely connected to Defendants' alleged anticompetitive conduct.

Further, even as alleged, the nature of any damages is attenuated and the risk of duplicative recovery is real. As Defendant Eversource indicates, determining damages in this case would require **[**49]** speculation. D. 43 at 29. For example, for each day during the class period, the factfinder would first be required to determine whether

Defendants adjusted their natural gas capacity reservations. Then, the factfinder would have to distinguish between the anticompetitive suppression of natural gas supply and Defendants' legitimate need to adjust reservation capacity for the benefit of natural gas customers. Subsequently, the factfinder would need to determine whether Defendants' alleged suppression of New England's natural gas supply impacted the market price of natural gas in the spot market that day, whether the clearing price for wholesale electricity was artificially inflated because of the price of natural gas that same day and, finally, the extent to which the resulting artificial inflation of wholesale electricity prices was passed on to retail electricity consumers. In other words, to determine Plaintiffs' damages based upon Plaintiffs' allegations, the factfinder would be required to engage in an analysis of how multiple markets functioned on a given day, including evaluation of the inputs and outputs for each market, factors that influenced prices offered and accepted by **[**50]** actors in each market and the effectiveness of an auction process regulated by FERC. There is a risk that resulting damages calculations (if they could be fairly determined) would be speculative and would present significant concerns regarding apportionment of damages and the risk of duplicative recovery. Any damages award would need to be correctly apportioned amongst hundreds of thousands of retail electricity customers of Avangrid and Eversource's subsidiaries. In addition, allowing the Plaintiffs, as retail electricity consumers, **[*456]** to move forward with their claims, opens the door for duplicative recovery in contravention of well settled ***antitrust law*** since Plaintiffs' injuries are the indirect result of harm allegedly suffered by actors in the spot market for natural gas or the wholesale electricity market. See *Associated Gen., 459 U.S. at 545* (reversing lower court's holding in favor of antitrust plaintiffs where "the [d]istrict [c]ourt would face problems of identifying damages and apportioning them among directly victimized . . . and indirectly affected . . . entities"); *Ill. Brick Co. v. State of Illinois, 431 U.S. 720, 737, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)* (stating that "[p]ermitting the use of pass-on theories . . . would transform treble-damages actions into massive efforts to apportion the **[**51]** recovery among all potential plaintiffs that could have absorbed part of the overcharge from direct purchasers to middlemen to ultimate consumers").

Although Plaintiffs allege that Defendants maintained an improper motive for artificially restricting New England's natural gas supply, the Court concludes that Plaintiffs' allegations are insufficient as a matter of law. The remaining factors for antitrust standing—including the nature of Plaintiffs' injury, the tenuous and speculative character of the relationship between the alleged antitrust violation and Plaintiffs' injury and the potential for duplicative recovery or complex apportionment of damages—weigh heavily against judicial enforcement of Plaintiffs' antitrust claims.

2. Plaintiffs Have Not Sufficiently Alleged Monopoly Power

Even if Plaintiffs' federal antitrust claims were not barred by the filed rate doctrine or foreclosed by Plaintiffs' lack of antitrust standing, the Court would conclude that they do not state plausible antitrust claims. ***HN11***[] *Section 2 of the Sherman Act* makes it illegal to "monopolize, or attempt to monopolize . . . any part of the trade or commerce" among several states. *Díaz Aviation Corp. v. Airport Aviation Servs., 716 F.3d 256, 265 (1st Cir. 2013)* (quoting *15 U.S.C. § 2*) (internal quotation marks omitted). **[**52]** "To prove a violation of this statute, a plaintiff must demonstrate (1) that the defendant possesses 'monopoly power in the relevant market' and (2) that the defendant has acquired or maintained that power by improper means." *Town of Concord, Mass. v. Bos. Edison Co., 915 F.2d 17, 21 (1st Cir. 1990)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*. To prove attempted monopolization, a plaintiff must demonstrate "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*.

The thrust of Defendants' arguments on the plausibility of Plaintiffs' claims concern the first prong of the monopolization analysis, *i.e.*, whether Defendants possess monopoly power in the relevant market. As an initial matter, Defendant Avangrid contends that Plaintiffs have failed to allege a relevant geographic market. See *Coastal Fuels of P.R., Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 197 (1st Cir. 1996)* (explaining that "[b]efore determining market share, however, the relevant geographic market must be defined"). ***HN12***[] "The plaintiff carries the burden of describing a well-defined relevant market, both geographically and by product, which the defendants monopolized." Id. (quoting *H.J., Inc. v. Int'l Tel. & Tel. Corp., 867 F.2d 1531, 1537 (8th Cir. 1989))*.

Although the question of market definition is usually one of fact for the jury, "a plaintiff must present sufficient **[**53]** evidence from **[*457]** which a reasonable jury could find the existence of the proposed relevant market." *Coastal Fuels, 79 F.3d at 197*. Defendant Avangrid alleges that "New England" is not a plausible relevant geographic market because Plaintiffs have not "pled facts to support the notion that a residential retail electricity consumer in one town, county, city or state in New England can turn to supplies in any other town, county, city or state." D. 44 at 33. This is not the test for determining whether a relevant geographic market has been defined. To the contrary, the First Circuit has determined that the relevant geographic market consists of "the geographic area in which the defendant faces competition and to which consumers can practically turn for alternative sources of the product." *Coastal Fuels, 79 F.3d at 196*. Plaintiffs have sufficiently alleged that the six states that constitute New England are organized into a single electricity market in which Defendants participate, D. 33 ¶¶ 59, 102-3, and alternatives to Defendants' retail electricity companies exist in that geographic market.

Defendants also contend that the amended complaint fails to establish either through direct or circumstantial evidence that their respective shares of the retail **[**54]** electricity market are substantial enough to infer market power for a monopolization claim. ***HN13***[] Courts define "[m]onopoly power . . . as 'the power to raise prices and exclude competition.'" *Hewlett-Packard Co. v. Bos. Sci. Corp., 77 F. Supp. 2d 189, 195 (D. Mass. 1999)* (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*. "Market power can be shown through two types of proof," either through "direct evidence of market power," such as "actual supracompetitive prices and restricted output," or "circumstantial evidence of market power." *Coastal Fuels, 79 F.3d at 196-97*. The amended complaint asserts that Eversource, through subsidiaries that provide retail electricity to residents in Massachusetts, Connecticut and New Hampshire, services more than 3.1 million electricity customers in 500 New England communities. D. 33 ¶ 102. Avangrid also owns subsidiaries that provide retail electricity to more than 950,000 electricity customers located in Connecticut and Maine. D. 33 ¶ 103. The amended complaint does not, however, provide details regarding Eversource's or Avangrid's alleged share of the retail electricity market. Defendants claim this omission is fatal to Plaintiffs' complaint. See D. 43 at 31 n.19. Moreover, Defendant Avangrid argues that even assuming that only Eversource and Avangrid provide retail electricity in New England, Plaintiffs' **[**55]** allegations indicate that Avangrid has 23% share of the market, which is insufficient to support a monopolization claim. D. 44 at 31-32. By comparison, courts in the First Circuit determined that "[f]or pleading purposes, an allegation of market share of 70 percent has been held to be an adequate basis for an inference of power in a relevant market." *Cal. Ass'n of Realtors, Inc. v. PDFfiller, Inc., No. CV 16-11021-IT, 2018 U.S. Dist. LEXIS 45482, 2018 WL 1403330, at *10 (D. Mass. Mar. 2, 2018)*, report and recommendation adopted, *No. 16-CV-11021-IT, 2018 U.S. Dist. LEXIS 44674, 2018 WL 1399296 (D. Mass. Mar. 19, 2018)* (quoting *Hewlett-Packard, 77 F.2d at 195-96*).

In response, Plaintiffs contend that they have sufficiently alleged direct evidence of monopoly power by pointing to Defendants' collective control over other markets, other than the retail electricity market, that allegedly determine retail electricity prices. See, e.g., D. 33 ¶ 94, 99, 113, 118; see also D. 48 at 39. Specifically, Plaintiffs allege that Defendant Eversource partially owns New England's principal natural gas pipeline. D. 33 ¶ 95. Both Eversource and Avangrid own and operate multiple LDCs. Id. ¶ 97. Of the **[*458]** eight largest LDCs in New England, half are owned by Eversource or Avangrid. Id. As a result of their LDC operations, Eversource and Avangrid possess a large number of "no-notice" contracts **[**56]** for natural gas transmission capacity, which allow Defendants' LDCs to reserve large quantities of natural gas transmission capacity. Id. ¶ 127. In addition, LDCs can adjust their transmission capacity reservations upward or downward at any time and without penalty and, as a result, LDCs control the supply of natural gas transmitted to New England. Id. ¶ 99. Finally, Defendants' combined ability to suppress natural gas supply grants them control over the price of wholesale electricity, which, in turn, impacts the price of retail electricity for the reasons previously explained. Nonetheless, as Defendants correctly note, Plaintiffs have failed to allege any facts indicating that Avangrid and Eversource each separately have the power to control or raise prices of any product in any market. ***HN14***[] At bottom, a claim for monopolization requires that Plaintiffs allege facts sufficient to establish that Defendants separately possessed monopoly power in the relevant market. Accordingly, courts in the First Circuit and elsewhere have rejected monopolization claims based on a "shared monopoly" theory of liability. See *PSW, Inc. v. VISA U.S.A., Inc., No. C.A. 04-347T, 2006 U.S. Dist. LEXIS 12157, 2006 WL 519670, at *11 (D.R.I. Feb. 28, 2006)* (explaining that "to state any **[**57]** claim under Section Two's actual or attempted monopoly clauses, a claimant is required to assert that the *individual* market power of a defendant is sufficient to constitute a monopoly, in this analysis, the combined monopoly power of competitors is irrelevant and insufficient") (emphasis in the original); see also *RxUSA Wholesale, Inc. v. Alcon Labs., Inc., 661 F. Supp. 2d 218, 235 (E.D.N.Y. 2009)*, aff'd sub nom. *RxUSA Wholesale Inc. v. Alcon Labs., 391 F. App'x 59 (2d Cir. 2010)* (explaining that courts in the Second Circuit "have uniformly held or approved the view that allegations of a 'shared monopoly' do not state a claim under *section 2 of the Sherman Act*") (internal citations and quotation marks omitted); *Sun Dun, Inc. of Wash. v. Coca-Cola Co., 740 F. Supp. 381, 391 (D. Md. 1990)* (dismissing monopolization and attempted monopolization claims alleging a shared monopoly theory of liability). Where the allegations here do not allege Defendants' individual capacity to control the retail electricity market, the Plaintiffs have not met their burden under the elements of either monopolization or attempted monopolization. Accordingly, the Plaintiffs have not stated cognizable antitrust claims.[12]

C. State Law Claims

Plaintiffs bring claims for damages and injunctive relief under various state antitrust, consumer protection and unfair trade statutes. Although the filed rate doctrine applies with equal force to Plaintiffs' **[**58]** state law claims, see *Snohomish, 384 F.3d at 761* (explaining that the filed rate doctrine preempted antitrust and unfair competition claims grounded in state law where such claims required the court to determine rates that "would have been achieved in a competitive market") (internal quotation marks omitted), the Court concludes that Plaintiffs' state law claims also fail for the reasons stated below.

[*459] First, Plaintiffs' inability to demonstrate antirust standing, as discussed above, forecloses Plaintiffs' state antitrust claims under Maine's antitrust laws, *10 Me. Rev. Stat. Ann. §§ 1101 et seq.* See *Knowles v. Visa U.S.A. Inc., No. CIV.A. CV-03-707, 2004 Me. Super. LEXIS 227, 2004 WL 2475284, at *3-9 (Me. Super. Oct. 20, 2004)* (applying the factors for determining federal antitrust standing in evaluating claims brought under Maine's antitrust statute). Second, Plaintiffs fail to state a claim under ***HN15***[] state consumer protection and unfair competition statutes, which each require allegations regarding (1) an unfair or deceptive act or practice on the part of the defendant; (2) an injury or loss suffered by the consumer; and (3) a causal connection between the wrongful conduct and the consumer's injury. See *Shaulis v. Nordstrom, Inc., 865 F.3d 1, 6 (1st Cir. 2017)* (explaining that "[t]o state a viable claim [under the *Massachusetts Consumer Protection Act*], the plaintiff must allege **[**59]** that she has suffered an 'identifiable harm' caused by the unfair or deceptive act that is separate from the violation itself") (quoting *Tyler v. Michaels Stores, Inc., 464 Mass. 492, 503, 984 N.E.2d 737 (2013))*; *Edwards v. N. Am. Power & Gas, LLC, 120 F. Supp. 3d 132, 141 (D. Conn. 2015)* (outlining requirements for violation of Conn. Gen. Stat. § 42-110 *et seq.*); *McKinnon v. Honeywell Int'l, Inc., 2009 ME 69, 977 A.2d 420, 427 (Me. 2009)* (explaining that establishing a violation of *Maine's Unfair Trade Practices Act* requires, at a minimum, that plaintiff show a loss of money or property and substantial injury caused by the alleged deceptive or unfair practice); *State v. Moran, 151 N.H. 450, 452, 861 A.2d 763 (2004)* (explaining that courts should consider whether defendant's conduct caused "substantial injury to consumers" in determining whether such conduct constitutes a violation of the *New Hampshire Consumer Protection Act*); *Carter v. Gugliuzzi, 168 Vt. 48, 716 A.2d 17, 21 (Vt. 1998)* (explaining that the *Vermont Consumer Fraud Act* "provides a remedy for any consumer who contracts for goods or services and, in reliance upon false or fraudulent representations or promises, sustains damages or injury" caused by the defendant).

For the reasons previously stated, *supra* at 31-32, the Court concludes that Plaintiffs' injury is too remote to satisfy the causation prongs of the various state law claims. See, e.g., *Empire Today, LLC v. Nat'l Floors Direct, Inc., 788 F. Supp. 2d 7, 30 (D. Mass. 2011)* (explaining that the relationship between defendant's allegedly unlawful conduct and plaintiff's injury "only proves a correlation, not a causation"); *In re Hannaford Bros. Co. Customer Data Sec.*

---

[12] Because Plaintiffs have not stated cognizable antitrust claims for monopolization, the Court does not reach Defendant Avangrid's argument that Plaintiffs' antitrust claims are grounded in a "refusal to deal" theory of antitrust liability that runs afoul of well-settled Supreme Court precedent. D. 43 at 25 (citing *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)* and *Verizon Commc'ns v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004))*.

Breach Litig., 660 F. Supp. 2d 94, 100 (D. Me. 2009) (explaining **[**60]** that under Maine law it is well settled that "a plaintiff may not recover damages if the causal relation between a defendant's tortious act . . . and the harm suffered is 'too attenuated'") (quoting *Stubbs v. Bartlett, 478 A.2d 690, 693 (Me. 1984))*; *Vacco v. Microsoft Corp., 260 Conn. 59, 793 A.2d 1048, 1050 (Conn. 2002)* (concluding that "plaintiff's claimed injuries are too indirect and remote with respect to the defendant's allegedly anticompetitive conduct for the plaintiff to recover under *CUTPA*"). Nevertheless, the Court, for the reasons previously mentioned, has dismissed all of Plaintiffs' federal claims and declines to exercise jurisdiction over the remaining state law claims. See *United Mine Workers of Am. v. Gibbs, 383 U.S. 715, 726-27, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966)* (explaining that if the "federal claims are dismissed before trial . . . the state claims should be dismissed as well" and "if it appears that the state issues substantially predominate . . . the state claims may be dismissed . . . and left for resolution to state tribunals").

[*460] VI. Conclusion

For the foregoing reasons, the Court ALLOWS Defendants' motions to dismiss, D. 41; D. 42.

So Ordered.

/s/ Denise J. Casper

LexisNexis® Headnotes

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > Judicial Review

HN1[] **US Federal Trade Commission Actions, Judicial Review**

An administrative law judge's ruling on the legality of a proposed transaction is reviewable by the Commissioners of the Federal Trade Commission, and a federal appeals court may in turn review the agency's final decision.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

HN2[] **Remedial Powers, Federal Trade Commission Act**

Clayton Act § 7 (*15 U.S.C.S. § 18*) prohibits acquisitions the effect of which may be substantially to lessen competition, or to tend to create a monopoly in any line of commerce or in any activity affecting commerce in any section of the country. If the Federal Trade Commission has reason to believe that a corporation is violating, or is about to violate, § 7, it may seek a preliminary injunction to prevent a merger pending the Commission's administrative adjudication of the merger's legality. Federal Trade Commission Act § 13(b) (*15 U.S.C.S. § 53(b)*) authorizes district courts to grant a preliminary injunction where such action would be in the public interest—as determined by a weighing of the equities and a consideration of the Commission's likelihood of success on the merits.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

HN3[] **Remedial Powers, Federal Trade Commission Act**

For relief under Federal Trade Commission Act § 13(b) (*15 U.S.C.S. § 53(b)*), the Federal Trade Commission (FTC) must establish that there is a reasonable probability that the challenged transaction will substantially impair competition. Congress intended this standard to depart from what it regarded as the then-traditional equity standard, which it characterized as requiring the plaintiff to show: (1) irreparable damage, (2) probability of success on the merits and (3) a balance of equities favoring the plaintiff. The FTC is not held to the high thresholds applicable where private parties seek interim restraining orders, and § 13(b) instead creates a unique public interest standard rather than the more stringent, traditional equity standard for injunctive relief.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

HN4[] **Remedial Powers, Federal Trade Commission Act**

The public interest standard under Federal Trade Commission Act § 13(b) (*15 U.S.C.S. § 53(b)*) requires courts to measure the probability that, after an administrative hearing on the merits, the Federal Trade Commission (FTC) will succeed in proving that the effect of the proposed transaction may be substantially to lessen competition in violation of the Clayton Act. The Commission meets this standard if it has raised questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the court of appeals.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

HN5[] **Remedial Powers, Federal Trade Commission Act**

To determine the likelihood of success on the merits in a Federal Trade Commission (FTC) action challenging a merger, a court applies a burden-shifting framework. First, the FTC must show that the merger will lead to undue concentration in the market for a particular product in a particular geographic area. The Commission thus bears the initial burden of (1) defining the appropriate product market, (2) defining the appropriate geographic market, and (3) showing that the merger will lead to undue concentration in the relevant product and geographic market. Such a showing establishes a presumption that the merger will substantially lessen competition. The defendants can rebut this presumption by showing that the Commission's prima facie case inaccurately predicts the merger's probable effect on future competition. If the defendants make this showing, the burden of producing further evidence of anticompetitive effects shifts back to the government. The ultimate burden of persuasion remains with the government at all times. In evaluating either party's evidence, antitrust theory and speculation cannot trump facts.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

HN6[] **Remedial Powers, Federal Trade Commission Act**

In addition to evaluating the prima facie case made by the Federal Trade Commission (FTC) and any rebuttal evidence proffered by the defendant, a court must also weigh the equities involved. The public interest in effective enforcement of the antitrust laws is of primary importance, and a showing of likely success on the merits will presumptively warrant an injunction. If, on the other hand, the FTC cannot show a likelihood of success on the merits, equities alone will not justify an injunction.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN7[] **Relevant Market, Product Market Definition**

A market's outer boundaries are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. Within this market, however, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes. The appropriate submarket can be identified by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. Evidence of industry or public recognition of the submarket as a separate economic unit matters because courts assume that economic actors usually have accurate perceptions of economic realities.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN8[] **Relevant Market, Product Market Definition**

The mere fact that the prices of two goods move upward or downward together need not mean that they are substitutes. Rather than high cross-elasticity of demand, correlated price movements might reflect the similar responses of different markets to similar changes, as when all prices move up in response to changes in common costs.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN9[] **Relevant Market, Product Market Definition**

For antitrust purposes, the relevant market analysis is based on the narrowest market principle. This principle holds that, because a relevant market cannot meaningfully encompass an infinite range of products, it must be drawn narrowly to exclude any other product to which, within reasonable variations in price, only a limited number of buyers will turn.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN10[] Relevant Market, Product Market Definition

Whatever the market urged by the Federal Trade Commission, the other party can usually contend plausibly that something relevant was left out, that too much was included, or that dividing lines between inclusion and exclusion were arbitrary. There is some artificiality in any boundaries, but such fuzziness is inherent in bounding any market. Isolated examples of potential substitutability do not outweigh consistent testimony and representations of industry participants or empirical evidence.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN11[] Relevant Market, Geographic Market Definition

Like the product market, the relevant geographic market must correspond to the commercial realities of the industry and be economically significant. It encompasses the area to which consumers can practically turn for alternative sources of the product and in which the antitrust defendants face competition.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN12[] Relevant Market, Geographic Market Definition

The hypothetical monopolist test seeks to determine whether a hypothetical company that is the only seller of the relevant product to customers in the relevant geography could profitably impose a small but significant and non-transitory increase in price (SSNIP). If this hypothetical monopolist can profit from imposing a SSNIP without losing a critical mass of customers, then a relevant antitrust market has been defined. If, on the other hand, customers can defeat the price increase by substitution away from the relevant product or by arbitrage, the market definition must be broadened.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN13[] Relevant Market, Geographic Market Definition

When a hypothetical monopolist could discriminate based on customer location, the Federal Trade Commission may define geographic markets based on the locations of targeted customers. Geographic markets of this type encompass the region into which sales are made.

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

HN14[] Antitrust, Horizontal Mergers

The Horizontal Merger Guidelines issued by the U.S. Department of Justice and the Federal Trade Commission have been repeatedly relied on by the courts. The Merger Guidelines are not binding, but the court of appeals and other courts have looked to them for guidance in merger cases.

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

HN15[] **Antitrust, Horizontal Mergers**

Market concentration is often one useful indicator of likely competitive effects of a merger. The Herfindahl-Hirschman Index (HHI) is a common economic measure of such concentration. The HHI is calculated by squaring the market share of each firm in the market and adding up these squares. Squaring the individual market shares allocates proportionately greater weight to firms with larger shares, reflecting the larger threat to competitive behavior they pose. For antitrust purposes, the Federal Trade Commission and the U.S. Department of Justice generally classify markets as unconcentrated, moderately concentrated, and highly concentrated. An unconcentrated market features an HHI of below 1,500. A moderately concentrated market has an HHI of between 1,500 and 2,500, while a highly concentrated market has an HHI that is greater than 2,500.

Evidence > Inferences & Presumptions > Presumptions > Particular Presumptions

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

HN16[] **Presumptions, Particular Presumptions**

Economists calculate the Herfindahl-Hirschman Index (HHI) score of an industry before and after the proposed merger. Transactions that result in an HHI increase of fewer than 100 points are unlikely to have adverse competitive effects. In moderately concentrated markets, a transaction that increases the HHI by more than 100 points potentially raises significant competitive concerns and often warrants scrutiny. Mergers resulting in highly concentrated markets that involve an increase in the HHI of more than 200 points will be presumed to be likely to enhance market power. This presumption of anticompetitive effects may be rebutted by persuasive evidence showing that the merger is unlikely to enhance market power.

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

HN17[] **Antitrust, Horizontal Mergers**

There is nothing improper about a firm making independent production decisions to maximize profits. But a core purpose of ***antitrust law*** is to scrutinize mergers that may make it easier for firms to collectively reduce output, and indeed, to prevent mergers that are likely to do so. Merger law rests upon the theory that, where rivals are few, firms will be able to coordinate their behavior, either by overt collusion or implicit understanding, in order to restrict output and achieve profits above competitive levels. Antitrust theory teaches that an acquisition which reduces the number of significant sellers in a market already highly concentrated and prone to collusion by reason of its history and circumstances is unlawful in the absence of special circumstances.

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > Judicial Review

HN18[] **US Federal Trade Commission Actions, Judicial Review**

A reviewing court need not decisively sift through various models and theories. Courts hesitate to rely on an expert's precise calculations where such calculations are subject to valid criticism. The question is whether the Federal Trade Commission (FTC) has raised questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the court of appeals.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

HN19[] **Antitrust Statutes, Clayton Act**

Defendants in a Federal Trade Commission (FTC) action challenging a merger can rebut the presumption that their merger will substantially lessen competition either by discrediting the data underlying the initial presumption in the government's favor or by affirmatively showing why the deal is unlikely to substantially lessen competition. Generally, the more compelling the FTC's prima facie case, the more evidence the defendants must present to rebut it successfully.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN20[] **Market Definition, Relevant Market**

Entry or expansion into the relevant market by new competitors can mitigate the expected anticompetitive effects of a proposed transaction. This is because, in the absence of significant barriers, a company probably cannot maintain supracompetitive pricing for any length of time. Companies that are not current producers in a relevant market, but that would very likely provide rapid supply responses with direct competitive impact in the event of a small but significant and non-transitory increase in price, without incurring significant sunk costs, are also considered market participants. Sunk costs include the entry or exit costs that cannot be recovered outside the relevant market.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Mergers & Acquisitions Law > Antitrust > Remedies

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

HN21[] **Remedial Powers, Federal Trade Commission Act**

When a court finds high market concentration levels, defendants must present proof of extraordinary efficiencies to rebut the government's prima facie case. Courts have rarely, if ever, denied a preliminary injunction solely based on the likely efficiencies. To be able to offset a merger's likely anticompetitive effects, purported synergies and efficiencies must represent more than mere speculation and promises about post-merger behavior. They must be merger-specific, meaning that they cannot be achieved by either company alone. And they must be reasonably verifiable by an independent party.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Mergers & Acquisitions Law > Antitrust > Remedies

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

HN22[] **Remedial Powers, Federal Trade Commission Act**

Where the showing made by the Federal Trade Commission (FTC) creates a presumption in favor of a preliminary injunction, the court must still weigh the equities to determine whether this relief would be in the public interest. *15 U.S.C.S. § 53(b)*. The court must consider the interests of the public, either in having the merger go through or in preventing the merger, and the private equities, which include the corporate interests of the defendants.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Mergers & Acquisitions Law > Antitrust > Remedies

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

HN23[] **Remedial Powers, Federal Trade Commission Act**

Where the Federal Trade Commission (FTC) has shown a likelihood that the proposed transaction will substantially lessen competition, the public interest in effective enforcement of the ***antitrust law*** weighs in favor of granting an injunction. There is a strong public interest in the effective enforcement of the antitrust laws that weighs heavily in favor of an injunction in such a case. Also supporting an injunction is the public interest in ensuring that the FTC has the ability to order effective relief if it succeeds at the merits trial.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Mergers & Acquisitions Law > Antitrust > Remedies

Antitrust & Trade Law > Federal Trade Commission Act > Remedies

HN24[] **Remedial Powers, Federal Trade Commission Act**

Federal Trade Commission Act § 13(b) (*15 U.S.C.S. § 53(b)*) embodies congressional recognition of the fact that divestiture is an inadequate and unsatisfactory remedy in a merger case. Divestitures may not succeed at restoring competition to the post-merger market. For instance, it may be particularly difficult to restore the pre-merger state of competition if the merging parties have commingled, sold, or closed assets; integrated or dismissed employees or shared confidential information.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN25[] **Injunctions, Preliminary & Temporary Injunctions**

Preliminary injunctions are equitable remedies to be used sparingly and in exigent circumstances. The issuance of a preliminary injunction prior to a full trial on the merits is an extraordinary and drastic remedy.

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > Actual Controversy

HN26[] Case & Controversy Requirements, Actual Controversy

Federal courts may adjudicate only actual, ongoing cases or controversies.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Mergers & Acquisitions Law > Antitrust > Remedies

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

HN27[] Remedial Powers, Federal Trade Commission Act

The harm to defendants from putative delays caused by the Federal Trade Commission (FTC) is at least somewhat mitigated when any injunctive relief imposed would be brief compared with a typical Federal Trade Commission Act § 13(b) (*15 U.S.C.S. § 53(b)*) action. In the ordinary case, an injunction means a merger cannot be consummated until the Commission completes its investigative and adjudicative activities. Where the FTC has already scrutinized the deal and held an administrative trial, the harm to the defendants from a preliminary injunction is lower than in the typical case, in which the administrative process would not yet have begun.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

HN28[] Remedial Powers, Federal Trade Commission Act

There are strong public interests in ensuring the effective enforcement of antitrust laws and in equipping the Federal Trade Commission with the ability to order appropriate remedies.

Opinion

[*193] MEMORANDUM OPINION*

Last year, two of the world's largest titanium dioxide ("TiO2") producers announced their intent to merge. Tronox Limited agreed to acquire the National Titanium Dioxide Company's TiO2 business, known as "Cristal," for $1.67 billion in cash and a 24% equity stake in the combined firm. Believing that the acquisition would likely violate federal antitrust laws, the Federal Trade Commission issued an administrative complaint challenging the deal.

TiO2 is a pigment used to add whiteness, brightness, and opacity to products like paints, plastics, and paper. It is manufactured by subjecting raw titanium ores to either a chloride or a sulfate production **[**3]** process. Chloride-process TiO2 comprises nearly all the pigment sold in the United States and Canada. The FTC believes that the Tronox-Cristal merger will significantly reduce competition for chloride TiO2 in these two countries, a combined market referred to herein and by the parties as "North America."

[*194] Following discovery and briefing by the parties, the FTC's Administrative Law Judge ("ALJ") held a month-long trial to determine the legality of the proposed transaction. The trial recently concluded, and the ALJ will soon issue an initial decision. ***HN1***[] That ruling is reviewable by the FTC's Commissioners, and a federal appeals court may in turn review the agency's final decision.

The transaction has now received conditional or final approval from the FTC's counterparts in the European Union, China, Saudi Arabia, and elsewhere. The Commission therefore seeks a preliminary injunction under *Section 13(b) of the Federal Trade Commission Act* to prevent Tronox and Cristal from consummating the merger until the agency's review process and any later judicial proceedings have concluded.

The Court finds that the FTC has met its burden under *Section 13(b)*. It has shown a likelihood that the proposed transaction will substantially **[**4]** lessen competition for chloride-process TiO2 in North America, and it has shown that issuing a preliminary injunction is in the public interest. The Court will therefore grant the Commission's motion for preliminary injunctive relief.

I. BACKGROUND

A. The Titanium Dioxide Industry

Titanium dioxide is commercially available in two crystalline structures: anatase and rutile. Anatase is used in textiles, cosmetics, pharmaceuticals, and food, while rutile is typically used in architectural and industrial paints and

* The Memorandum Opinion was issued under seal on September 5, 2018. This version contains redactions of confidential and competitively sensitive information. The Court has also made minor modifications, citing to publicly available, rather than confidential, information where appropriate.

plastics. PX5000-013.[1] Cristal estimates that roughly 60% of all titanium dioxide produced worldwide is used in paints and coatings, while the rest is used in plastics, paper, and various other applications. *Id.* at 018. Rutile is thus the predominant form of TiO2; anatase accounts for only 10% of global production. *Id.* at 013.

The sulfate production process can create either anatase or rutile TiO2. PX5000-016. It involves dissolving naturally occurring titanium ores (the "feedstock") into sulfuric acid to separate the titanium from other impurities in the ore. *Id.* The sulfate process relies on simpler technology than the chloride process, requires less skilled labor, and, because it produces TiO2 in **[**5]** batches, does not require an uninterrupted power supply. *Id.* Roughly half of all TiO2 made globally is produced using the sulfate process. PX5000-017. China accounts for the largest single-nation share of sulfate-process TiO2, producing 1.67 million metric tons in 2016. *Id.*

The chloride production process can only create rutile TiO2, and it involves using chlorine gas to produce titanium tetrachloride, which is then oxidized to produce TiO2. PX5000-015. The chloride process is continuous, so it requires an uninterrupted power supply. PX3011-013. Compared to sulfate, chloride tends to produce a higher grade TiO2 pigment, features lower conversion and labor costs, and results in less waste. *Id.* The process requires a highly skilled labor force, and its "superior technology" is "closely guarded by Western producers." PX3011-019. In 2016, 99% of the TiO2 produced in the United States and Canada was made using the chloride process. PX5000-016. By contrast, in Europe, only 39% of all TiO2 manufactured was produced using chloride. *Id.*

Customers and suppliers generally agree that there are noticeable differences between chloride- and sulfate-process **[*195]** TiO2. A 2015 Tronox presentation notes, for **[**6]** example, that the chloride pigment is "bluer in tone than sulfate pigment," which has a "more yellow tone of white." PX1322-003. Dr. Paul Malichky, the Director of Raw Material Sourcing at PPG, a major multinational paints and coatings company, explained that while "both would appear white if you physically looked at them," in a final product (like a can of white paint) with "two colors, one with a chloride and one with a sulfate, the color would be different." Hr'g Tr. 100:6-13. *See also* PX7020-013 (George Young, a senior executive at Sherwin-Williams, another major paint company, stating that "sulfate grade is not as bright a white as a chloride. It doesn't deliver the same physical performance as a chloride.").

Chloride TiO2 can also be more durable than its sulfate counterpart. Sulfate has "impurities that come as part of the process; most specifically, iron . . . [which] decreases the durability." Hr'g Tr. 100:14-19. Chloride-process TiO2 products feature "better durability, scrubability, and various other performance characteristics." Hr'g Tr. 169:19. And, because of "the [consumer] preference for whiteness and durability, sulfate grades are not widely preferred for applications **[**7]** that have prolonged outdoor exposure." PX8005-002.

Titanium dioxide is generally sold to customers in two formulations: "dry" and "slurry." PX5000-017. Dry TiO2 is sold in a powdered form typically packaged in bags; slurry TiO2 is dry titanium dioxide combined with an aqueous solution. *Id.* While most TiO2 sold globally is dry, large North American paint companies prefer slurry. PX0001-030.

B. The Competitive Landscape

The titanium dioxide market has been described as an "oligopoly," as TiO2 is a "commodity-like product with no substitutes, the market is dominated by a handful of firms, and there are substantial barriers to entry." *Valspar Corp. v. E.I. Du Pont De Nemours and Co., 873 F.3d 185, 190 (3d Cir. 2017)*. Jeffry Quinn, the CEO of Tronox, explained that there are "dozens and dozens of competitors worldwide, but there are really six companies that often are referred to as sort of the global TiO2 producers or the global companies." Hr'g Tr. 585:9-11. These firms are Chemours, Tronox, Cristal, Kronos, Venator, and Lomon Billions. *Id.* at 585:13-586:2.

Of the six, the first five dominate the production of chloride TiO2. PX1532-051. In 2016, roughly 2.77 million metric tons of the pigment was produced globally. *Id.* Chemours, the world's largest TiO2 firm, accounted **[**8]** for about 37% of 2016 chloride production capacity. PX5000-021. With Chemours, Cristal (21%), Tronox (15%), Kronos

---

[1] The FTC's exhibits are identified by a "PX" followed by the exhibit number and a page number. The Defendants' exhibits use "RX" followed by the exhibit and page numbers.

(13%), and Venator (7%), together accounted for 93% of total chloride production capacity. *Id.* Based on this data, the proposed transaction would result in two firms, Chemours and the Tronox-Cristal entity, that control nearly three-quarters of the global chloride TiO2 supply.

Chinese manufacturers control around 51% of global sulfate production capacity. *Id.* Sulfate production is more dispersed than chloride. Lomon Billions is China's largest TiO2 firm, and in 2016 it accounted for 13% of global supply. *Id.* A smattering of other Chinese firms had roughly 38%, while domestically, Venator (12%) and Kronos (4%) are also significant producers of sulfate TiO2. *Id.*

The paint and coatings industry is the largest overall consumer of titanium dioxide, and PPG, Sherwin-Williams, RPM, and Masco (Behr) are among the largest paint producers. *See* PX9020-009; PX5000 at 18, 044-045. Representatives from these firms, other paint and plastics manufacturers, and Chemours, Tronox, Cristal, Kronos, **[*196]** and Venator provided testimonial and documentary evidence about the TiO2 market during the administrative **[**9]** proceedings before the Commission. Additionally, Dr. Malichky (PPG), Mr. Christian (Kronos), Mr. Quinn (Tronox), and the parties' economic experts (Dr. Nicholas Hill for the Commission and Dr. Ramsey Shehadeh for the Defendants) testified about the market and the proposed merger during a three-day evidentiary hearing here.

C. History of Proceedings in This Case

On December 5, 2017, the Commissioners of the FTC voted 2-0 to authorize the filing of an administrative complaint to block the Tronox-Cristal transaction, as they found reason to believe that it would violate *Section 7 of the Clayton Act, 15 U.S.C. § 18*. The Commissioners' vote also authorized the FTC to seek a temporary restraining order ("TRO") and preliminary injunction against the merger in federal district court.

After several months of discovery, the ALJ held an administrative trial from May 18 to June 22, 2018. The parties filed post-trial briefs, proposed findings of fact, and proposed conclusions of law with the ALJ last month. They will offer closing statements to him once briefing has concluded. His resulting decision may be reviewed by the Commission and potentially, an appellate court.

On July 10, 2018, the FTC petitioned this Court for **[**10]** a TRO and a preliminary injunction to halt a potential closing of the deal. The Commission explained that "[a]bsent such provisional relief, Tronox and Cristal . . . will likely be free to consummate the merger as soon as July 16, 2018, the earliest date it appears the European Commission ("EC") is likely to complete its [antitrust regulatory review] process by approving" remedies to mitigate the deal's anticompetitive effects in Europe. Compl. 2. Approval from the EC was "the only remaining hurdle preventing Defendants from consummating the Acquisition." *Id.*

Three days later, the Court held a hearing on the Commission's TRO motion. Following that hearing, the parties stipulated that Tronox and Cristal would not seek to consummate the proposed transaction until four business days after the Court decided the Commission's request for a preliminary injunction. *See* Ex. A (Agreement Not to Close Transaction) 2, ECF No. 44-1.

On August 7, 2018, the Court began a three-day evidentiary hearing on the FTC's motion for injunctive relief. The Commission proposed that the hearing proceed with oral arguments based solely on the closed evidentiary record before the ALJ. *See* Pl.'s Proposed Hr'g Schedule **[**11]** 2, ECF No. 45. The Defendants objected, ultimately proposing that each side be allowed to present live testimony from two expert witnesses and a fact witness. *See* Defs.' Proposed Hr'g Schedule 4, ECF No. 47. The Court allowed each side to present live testimony from three witnesses of their choosing, and to present opening and closing arguments.[2] The parties also submitted briefs outlining their positions and the complete administrative record before the ALJ.

---

[2] The Defendants ultimately elected to call only two witnesses, as they were running low on time under the parties' agreed-upon "chess clock" system. *See* Hr'g Tr. 581:3-9.

II. LEGAL STANDARDS

HN2[] *Section 7* of the Clayton Act prohibits acquisitions "the effect of [which] may be substantially to lessen competition, or to tend to create a monopoly" in "any line of commerce or in any activity affecting commerce in any section of the country." *15 U.S.C. § 18*. If the FTC has **[*197]** reason to believe "that a corporation is violating, or is about to violate, *Section 7* of the Clayton Act, [it] may seek a preliminary injunction to prevent a merger pending the Commission's administrative adjudication of the merger's legality." *F.T.C. v. H.J. Heinz Co., 246 F.3d 708, 714, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)*. *Section 13(b)* of the Federal Trade Commission Act authorizes district courts to grant a preliminary injunction where "such action would be in the public interest—as determined by a weighing of the equities and a consideration of the Commission's **[**12]** likelihood of success on the merits." *Id.*; *see* *15 U.S.C. § 53(b)*.

HN3[] For relief under *Section 13(b)*, the Commission must establish that "there is a reasonable probability that the challenged transaction will substantially impair competition." *F.T.C. v. Staples Inc., 190 F. Supp. 3d 100, 114 (D.D.C. 2016)*. Congress "intended this standard to depart from what it regarded as the then-traditional equity standard, which it characterized as requiring the plaintiff to show: (1) irreparable damage, (2) probability of success on the merits and (3) a balance of equities favoring the plaintiff." *Heinz, 246 F.3d at 714*. The FTC is "not held to the high thresholds applicable where private parties seek interim restraining orders," and *Section 13(b)* instead creates a "unique public interest standard . . . rather than the more stringent, traditional equity standard for injunctive relief." *Id.* (cleaned up).

HN4[] The public interest standard requires courts to "measure the probability that, after an administrative hearing on the merits, the Commission will succeed in proving that the effect of the [proposed transaction] may be substantially to lessen competition" in violation of the Clayton Act. *F.T.C. v. Sysco Corp., 113 F. Supp. 3d 1, 22 (D.D.C. 2015)*. The Commission meets this standard if it "has raised questions going to the merits so serious, substantial, difficult and doubtful as to make **[**13]** them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals." *Id. at 23* (citing *Heinz, 246 F.3d at 714-15*).

HN5[] To determine the Commission's likelihood of success on the merits, the Court applies the burden-shifting framework established by *United States v. Baker Hughes, Inc., 908 F.2d 981, 982-83, 285 U.S. App. D.C. 222 (D.C. Cir. 1990)*. First, the FTC must show that the Tronox-Cristal merger will lead to "undue concentration in the market for a particular product in a particular geographic area." *Id. at 982*. The Commission thus bears the initial burden of (1) defining the appropriate product market, (2) defining the appropriate geographic market, and (3) showing that the merger will lead to undue concentration in the relevant product and geographic market. *See* *F.T.C. v. Arch Coal, Inc., 329 F. Supp. 2d 109, 117 (D.D.C. 2004)*. Such a showing establishes a presumption that the merger will substantially lessen competition. *Baker Hughes, 908 F.2d at 982*.

The Defendants can rebut this presumption by showing that the Commission's "prima facie case inaccurately predicts the [merger's] probable effect on future competition." *Id. at 991*. If the Defendants make this showing, the burden of producing further evidence of anticompetitive effects shifts back to the government. *Id. at 983*. The "ultimate burden of persuasion . . . remains with the government **[**14]** at all times." *Id.* In evaluating either party's evidence, "antitrust theory and speculation cannot trump facts." *Arch Coal, 329 F. Supp. 2d at 116*.

HN6[] In addition to evaluating the Commission's prima facie case and any rebuttal evidence proffered by the Defendants, the Court must also weigh the equities **[*198]** involved. The "public interest in effective enforcement of the antitrust laws is of primary importance," and "a showing of likely success on the merits will presumptively warrant an injunction." *Arch Coal, 329 F. Supp. 2d at 116*. If, on the other hand, the FTC cannot show a likelihood of success on the merits, "equities alone will not justify an injunction." *Id.*

III. ANALYSIS

A. The FTC has Established a Presumption of Anticompetitive Effects

The Commission has shown a likelihood that Tronox's acquisition of Cristal's titanium dioxide business will substantially impair market competition. It has demonstrated that the relevant market should be defined as the chloride-process TiO2 sold in North America. The FTC's evidence credibly suggests that the merger will greatly increase concentration in an already concentrated market, and that it will create incentives for the remaining industry participants to engage in strategic withholding of TiO2 supplies to maintain **[**15]** higher prices.

1. Chloride-Process Titanium Dioxide is the Relevant Product Market

HN7[] A market's "outer boundaries" are determined by the "reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. Within this market, however, "well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes." *Id.* The appropriate submarket can be identified "by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Id.* "[E]vidence of industry or public recognition of the submarket as a separate economic unit matters because we assume that economic actors usually have accurate perceptions of economic realities." *United States v. H & R Block, Inc., 833 F. Supp. 2d 36, 53 (D.D.C. 2011)*.

The Defendants contend that the market, properly defined, includes both chloride- and sulfate-process TiO2, but the Commission believes the correct market includes only the former. Both the economic realities of the industry, as described by TiO2 producers and consumers, **[**16]** and the evidence presented by the expert economists show that the FTC has carried its burden.

a. Producers and Consumers View Chloride TiO2 as a Separate Product, and the Expert Evidence Supports this View

Manufacturers of titanium dioxide consistently recognize the existence of a chloride TiO2 submarket in North America. In 2014, for example, Tronox's Content Communications Manager emailed then-CEO Tom Casey talking points ahead of a town hall meeting. PX1427. The talking points convey that, unlike sulfate, "[c]hloride process uses higher-quality feedstocks and makes better-quality TiO2" and that "[s]ubstitution in US/Europe not likely." *Id* at 003. A 2015 Tronox presentation notes that the "North American market is ~90% chloride. There is no sulfate production (except a small plant in Canada, Kronos). Limited imports." PX1322-003. At the evidentiary hearing, Tronox CEO Jeffry **[*199]** Quinn[3] conceded that "the way things have developed here in the U.S. is as a chloride market." Hr'g Tr. 641:17-19. He added that chloride TiO2 uses a different manufacturing process, is "viewed as more environmentally friendly, and it has — so I think it's a different product." Hr'g Tr. 648:18-21.

Mr. Christian,[4] from the **[**17]** Defendants' competitor Kronos, similarly testified that chloride TiO2's "brighter, more reflective white" and its "better durability, scrubability, and various other performance characteristics" when

[3] Mr. Quinn's testimony was credible, and he gave candid responses even when they were not necessarily helpful to the Defendants. Though he has been on Tronox's board of directors for several years, Mr. Quinn only became Tronox's CEO in December 2017. Because he was not actively involved in the daily management of Tronox before then, his capacity to offer insights into the TiO2 industry was somewhat limited.

[4] During the evidentiary hearing, Mr. Christian provided testimony on Kronos's TiO2 production and on his views about the TiO2 industry and competitive landscape. The Court credited his testimony; he gave thoughtful answers and did not appear to have a preferred outcome about the proposed transaction. He provided good perspectives and insights into an industry supplier's viewpoint, although his understanding of the customers' perspective was necessarily limited.

compared to sulfate TiO2 make it a "higher-quality product that [is] preferred, all things being equal, by the customers." Hr'g Tr. 169:10-20. Kronos's chloride TiO2 products "are more environmentally friendly . . . have a lower cost structure, and . . . command higher prices in the marketplace." Hr'g Tr. 174:18-21. Consistent with this view, other TiO2 suppliers distinguish between their chloride- and sulfate-process TiO2 products.[5]

Like suppliers, customers recognize a submarket for chloride-process TiO2, reflecting the product's particular traits and uses. Dr. Malichky[6] testified that chloride and sulfate TiO2 are "not substitutable on a color basis" and that if "you don't want [a paint product] to degrade or fade" the product would "require chloride." Hr'g Tr. 100:12-19. Masco, maker of Behr paints, adds that the "ultra pure white feature" of its paints is "[e]xtremely important" for the firm's brand, and that "to achieve that [feature], we need to use TiO2 produced based on **[**18]** the chloride process." Admin. Trial Tr. 972:16-973:20.[7]

In fact, customers do not substitute away from chloride TiO2 even when prices are "very high" or when sulfate prices have "been as much as [TEXT REDACTED BY THE COURT] cheaper than chloride TiO2." *See* PX8001-002; PX8003-003. [TEXT REDACTED BY THE COURT] reported that, "[e]xcept for our traffic marking paint, we have not used sulfate TiO2 in our products **[*200]** in North America even though sulfate grades generally are less expensive than chloride grades." PX8003-003. Switching from chloride to sulfate TiO2 involves "[t]housands of hours" of labor due to the complexities associated with color-matching and product reformulation (*i.e.*, ensuring that paint colors made with chloride TiO2 are not visibly different from the colors as made with sulfate TiO2). Hr'g Tr. 104:14-105:6.

The Defendants suggest that the market is not so black and white. "Chloride-process TiO2 *can* be used interchangeably with sulfate-process TiO2 in the vast majority of end-use applications," they argue, and consumers "regularly *try* to leverage sulfate-process TiO2 prices in negotiations with suppliers about chloride-process TiO2." Defs.' Redacted Opp. to Prelim. **[**19]** Inj. 11, ECF No. 70 (emphasis added). But the relevant question concerns not just the hypothetical possibility of substitution, but whether customers do in fact exhibit a willingness to substitute chloride- and sulfate-process TiO2. *See* *Arch Coal, 329 F. Supp. 2d at 119*.

Compare the market perspectives discussed above with those offered by the consumers in *Arch Coal*. There, the court considered how much utilities companies substitute between two types of coal — 8800 Btu and 8400 Btu. It found that "virtually all the utilities acknowledged that they can and do purchase and consume both 8800 and 8400 Btu coal, and that they actively solicit and consider both in their coal bidding procedures." *Id. at 121*. Customers testified that their facilities "were designed to burn, and have burned" both types of coal, that they "purchased both 8400 and 8800 coal in the past five years" and that managers "purchase 8400 to 8800 Btu coal depending on which coal has the best evaluated price." *Id. at 121-22*. The court thus concluded that the "evidence of significant interchangeability" between 8800 and 8400 Btu coal, combined with a "reluctance of [the FTC's] own expert to conclude that 8800 Btu coal is a separate relevant market," meant that the Commission **[**20]** failed to carry its burden of establishing its proffered product market. *Id. at 122-23*.

---

[5] *See, e.g.*, PX5000-043 (describing a Cristal email stating that "[w]hat we really would like to avoid is to accept that T595 [a chloride pigment] could be compared to a low sulphate [sic] quality product."); PX9121 at 007 (Chemours 2017 10-K) ("Our portfolio of premium performance TiO2 pigment grades provides end-users with benefits beyond opacity, such as longer-lasting performance, brighter colors, and the brilliant whites achievable only through chloride-manufactured pigment.").

[6] During the evidentiary hearing, counsel for Tronox advised that the Court should be "wary of self-serving statements by customers." Hr'g Tr. 64:10-16. When Dr. Malichky made statements revealing self-serving interests, the Court weighed his assertions in that context. Generally, the Court credited Dr. Malichky's statements if they appeared to track the perspectives offered by other TiO2 consumers and industry participants, as evidenced by documents in the record.

[7] *See also* PX8001-002 (statement from [TEXT REDACTED BY THE COURT] noting that the firm "only uses chloride grade titanium dioxide. [TEXT REDACTED BY THE COURT]"); PX5000-045 (collecting similar statements from customers like [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT]).

Here, the Commission has sufficiently shown a relevant product market. The evidence from customers and suppliers suggests a lack of significant interchangeability between chloride and sulfate TiO2. And the report and testimony of the Commission's expert economist, Dr. Hill, bolster this evidence.[8]

Using producer invoices and data published by the International Trade Commission and the United Nations, Dr. Hill evaluated price trends for chloride and sulfate TiO2. He found that, from 2012 to 2017, "chloride titanium dioxide was on average $532 per ton, or 21 percent, more expensive than sulfate titanium dioxide." PX5000-046. Yet, despite this price premium for chloride TiO2, "the proportion of sales accounted for by chloride titanium dioxide has held steady [in North America]." *Id.* The existence of distinct prices and a consistent market share for chloride **[*201]** TiO2 are "not what one would expect if North American customers were willing and able to substitute one type of titanium dioxide for another in response to a change in their relative prices." *Id.*

b. The Defendants' Product Market Counterarguments are Unavailing

[21]** Dr. Shehadeh, the Defendants' expert, attacked Dr. Hill's findings, countering that "[e]conomically significant co-movement between prices for chloride-produced TiO2 and prices for sulfate-produced TiO2 establishes a single market" for the two products. RX0170.0143.[9] Using data from Cristal, Venator, and Kronos, Dr. Shehadeh showed "the correlation between and co-integration of monthly chloride and sulfate TiO2 prices for" the three firms from 2010 to 2017. *Id.* at 0144-46. This price correlation, according to Dr. Shehadeh, suggests that chloride and sulfate TiO2 are substitutable.

But ***HN8***[] the mere fact that the prices of two goods move upward or downward together need not mean that they are substitutes. As Dr. Hill explained during the evidentiary hearing, "If you think about the sale of hamburger buns and hot dog buns, their prices will be highly correlated. Their demands are both seasonal—high in the summer, low in other seasons—and they're made with the same ingredients. So their prices will be highly correlated. But they're not close substitutes for each other." Hr'g Tr. 407:24-408:4.

Price correlation between the two types of TiO2 may reflect changes in feedstock prices, or a correlation in the demand for different types of paints (like low-end traffic marking paint, which tends to use sulfate TiO2, and high-end exterior home paint, which uses the chloride pigment). In other words, "rather **[**22]** than high cross-elasticity of demand, correlated price movements might reflect the similar responses of different markets to similar changes, as when all prices move up in response to changes in common costs." 2B Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 534c (4th ed. 2014) ("Areeda & Hovenkamp").[10]

The Defendants raise two additional arguments. *First*, they note that "[a]pproximately 80% of TiO2 end-use products can be made with either sulfate- or chloride-process TiO2 [and] only 10% of products are more compatible

[8] Dr. Hill has a doctorate in economics from Johns Hopkins University, and serves as a partner at Bates White, an economic consulting firm. As one of the FTC's three witnesses during the evidentiary hearing, Dr. Hill provided his own analysis and opinions. He also served as a summary witness of sorts, enabling the Commission to highlight relevant aspects of the extensive administrative record. The Court found his testimony and report to be credible. But his models and the conclusions they suggest are susceptible to some valid critiques. So while the Court found them ultimately consistent with the other evidence presented, his analysis was not dispositive on either the relevant market or the likelihood that the merger will increase market concentration.

[9] Dr. Shehadeh has a PhD in economics from Cornell and is a managing director at NERA, an economic consulting firm. He too both summarized his modeling and synthesized his side's key evidence during the evidentiary hearing. The Court found Dr. Shehadeh's testimony and analysis to be entitled to some weight but ultimately unconvincing on several key points.

[10] Reflecting their limitations as an approach to defining markets, Dr. Jonathan Baker, a former director of the FTC's Bureau of Economics and Chief Economist at the Federal Communications Commission concluded that "price correlation tests contain little or no information relevant to the issue of antitrust market definition." Jonathan B. Baker, *Why Price Correlations Do Not Define Antitrust Markets* 7, Fed. Trade Comm'n Working Paper No. 149 (1987). *See also* Gregory J. Werden and Luke Froeb, *Correlation, Causality, and All that Jazz: The Inherent Shortcomings of Price Tests for Antitrust Market Delineation*, 8 Rev. of Indus. Org. 329, 332-338 (1993) (highlighting some problems with using price correlation to define antitrust markets).

with one process or the other." Defs.' Redacted Opp. To Prelim. Inj. 12. But ***HN9***[] for antitrust purposes, the "[r]elevant market analysis is based on the narrowest market principle." *Arch Coal, 329 F. Supp. 2d at 120*. This principle holds that, because "a relevant market cannot meaningfully encompass an infinite range of products," it must be "drawn narrowly to exclude any other **[*202]** product to which, within reasonable variations in price, only a limited number of buyers will turn." *Sysco, 113 F. Supp. 3d at 26*.

So, even if only 10% of the products that use **[**23]** titanium dioxide are more compatible with chloride-process TiO2 than the sulfate alternative, the firms manufacturing that 10% can constitute a relevant antitrust submarket. And here, the evidence suggests a much larger percentage of firms—at least in the relevant geographic market—cannot easily switch from chloride to sulfate. *See, e.g.*, PX5000 at 044-045 (collecting statements from many customers, who suggest, for instance, that for "over 90 percent [of applications] in the U.S., we can't switch between chloride and sulfate" and "[u]sing sulfate TiO2 would compromise our end products in North America, which is something we are not willing to do.").

Second, the Defendants identify two examples of individual chloride-process TiO2 products competing with sulfate-process products. *See* Defs.' Unredacted Opp. to Prelim. Inj. 13, ECF No. 68-3. They note that "[o]ne of Tronox's leading chloride-process grades, CR-828, competes directly with R-996, a sulfate-process grade of TiO2 manufactured by Chinese producer Lomon Billions," and that another Tronox product, "[TEXT REDACTED BY THE COURT], has lost business to sulfate-process TiO2 from Chinese producers." *Id.* These statements, however, provide **[**24]** no indication of sales volumes or the context or extent to which the two chloride-process products have competed with their sulfate alternatives.

HN10[] "Whatever the market urged by the [FTC], the other party can usually contend plausibly that something relevant was left out, that too much was included, or that dividing lines between inclusion and exclusion were arbitrary." Areeda & Hovenkamp at ¶ 530d. "The Supreme Court has wisely recognized there is 'some artificiality' in any boundaries, but that 'such fuzziness' is inherent in bounding any market." *Id.* (citing *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 359 n.36 & 360 n.37, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*). Isolated examples of potential substitutability simply do not outweigh the consistent testimony and representations of industry participants or the empirical evidence provided by Dr. Hill. Thus, for the purposes of a preliminary injunction, the FTC has shown that the relevant product market is limited to chloride-process titanium dioxide.

2. "North America" is the Relevant Geographic Market

a. Industry Participants Believe that Distinct Regional Markets Exist

HN11[] Like the product market, the relevant geographic market must "correspond to the commercial realities of the industry and be economically significant." *Brown Shoe Co., 370 U.S. at 336*. It encompasses the **[**25]** "area to which consumers can practically turn for alternative sources of the product and in which the antitrust defendants face competition." *F.T.C. v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 49 (D.D.C. 1998)*. Recall that in defining a market for antitrust purposes, the narrowest market principle applies.[11] While the Defendants believe that the relevant market is global, the Commission contends that it should be limited to the United States and Canada.

Here too, the statements of titanium dioxide suppliers are instructive. On a **[*203]** 2014 earnings call, then-Tronox CEO Tom Casey asked, "are there different prices in the regional markets in which we do business? The answer to that question is yes. The European and Asian market prices and the Latin American market prices are relatively closely bunched, with the North American price being somewhat higher." PX9008-008. On another earnings call in 2016, Mr. Casey expressed Tronox's view "that prices in Europe and in Asia were lower than prices in the United States and in other North American — the other North American markets." PX9001-007. Ian Mouland, Tronox's vice president of sales for the Americas, suggested in an internal email that a customer "need[s] to stop being

---

[11] The Defendants have not suggested that the relevant market should be any narrower than the FTC's proposal.

concerned about regional price differences **[**26]** and accept that regions are different . . . unless he is telling you that [he] sell[s] a can of paint in Mexico for the same price as in Germany?!" PX1085-001. Tronox acknowledged that TiO2 pricing "depends upon the region . . . [TEXT REDACTED BY THE COURT]." PX7001-032.

Like Tronox, the other major producers segment their customers by location. Kronos has "a European region . . . [a]nd then we have North America, which represents the United States and Canada. And then we have [LatAm], which is Latin America, Central America, the Caribbean, and South America. And then the export market, which is for us rest of world." Hr'g Tr. 167:22-168:7. [TEXT REDACTED BY THE COURT] "separates customer locations into five different regions: North America (United States and Canada); Europe, the Middle East, and Africa; Asia-Pacific excluding China; China; and Latin America (including Mexico)." PX8004-002. [TEXT REDACTED BY THE COURT] explained that "customers in the North American region generally have different requirements than in other regions." *Id. See also* PX5000-062 (featuring similar statements from Cristal representatives).

Titanium dioxide customers also acknowledge the existence of a distinct **[**27]** North American TiO2 markets. Sherwin-Williams paints "have different pallets in different regions of the world," and customer demands require that the company has "different performance standards around the world as well." PX7020-014. The firm has thus found that "sulfate has not been suitable for our formulations in North America [but in] other regions of the world with different quality standards, there has [sic] been levels of suitability." Admin Trial Tr. 642:25-643:3. Dr. Malichky testified that "[i]n PPG jargon, we would call [the North American market] USCA, U.S. and Canada, and Mexico is different. The suppliers consider Mexico different, as well." Hr'g Tr. 97:17-19. He added that, for the North American market, "[t]he vast majority [of TiO2 PPG uses] is chloride," but that "in Europe, we use more sulfate." Hr'g Tr. 101:16-18; 103:17-20.

b. Quantitative Evidence and the Hypothetical Monopolist Test Further Support Treating North America as a Separate Market

The available quantitative evidence also supports the existence of regional TiO2 markets. In a single, global market, sustained regional price variances are unlikely, as customers would engage in arbitrage—like importing TiO2 **[**28]** or purchasing it indirectly from other customers—that equalizes prices over time. *See* U.S. Dep't of Justice & F.T.C. Horizontal Merger Guidelines § 4.2.2 (2010) ("Merger Guidelines"). But by evaluating data from Tronox and Cristal, Dr. Hill showed that, from 2012 to 2017, the average difference in TiO2 prices between North America and the rest of the world ranged from $250 - $525 per metric ton. PX5000 at 063-064.

A recent TiO2 supply restriction in Europe provides more proof of regionalized markets. In January 2017, a fire at a large **[*204]** TiO2 plant in Pori, Finland, decreased the available titanium dioxide in Europe and caused a rapid and significant price increase. PX5004-039. Producer invoice data suggest that, before the fire, North American TiO2 prices were roughly $200 - $250 per metric ton higher than European prices. After the fire, however, European prices significantly exceeded those in North America. From January to October 2017, Cristal's and Tronox's European prices each rose by [TEXT REDACTED BY THE COURT] (compared to [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT] increases in North America respectively). *Id.* The Pori fire thus shows a dramatic relative increase in **[**29]** European prices not "disciplined by customer arbitrage." *Id.*

Dr. Hill also conducted several iterations of the "hypothetical monopolist test" to prove that the relevant market consists of North American sales of chloride-process TiO2. ***HN12***[] The test seeks to determine whether a hypothetical company that is the only seller of the relevant product to customers in the relevant geography could profitably impose a "small but significant and non-transitory increase in price" ("SSNIP"). *See* Merger Guidelines §§ 4.1.1; 4.2.2. If this hypothetical monopolist can profit from imposing a SSNIP without losing a critical mass of customers, then a relevant antitrust market has been defined. If, on the other hand, customers can defeat the price increase "by substitution away from the relevant product or by arbitrage," the market definition must be broadened. *Id. See also* *Sysco, 113 F. Supp. 3d at 33-34*.

To run the test, Dr. Hill conducted a "critical loss analysis." PX5000-049. He began by calculating the "critical loss," which is the percentage of "lost unit sales that would leave profits unchanged" if a hypothetical monopolist imposed a SSNIP. Merger Guidelines § 4.1.3. Dr. Hill determined that, with an SSNIP of 10%, a hypothetical monopolist could lose up to 15.4% of its **[**30]** sales and still break even. PX5000-051. The critical loss threshold is thus 15.4%.

Next, Dr. Hill estimated the "predicted loss" that would be observed in the event of a SSNIP of 10%. If the predicted loss is less than the critical loss, imposing a SSNIP would be profitable for the hypothetical monopolist, and the relevant antitrust market has been correctly defined. Dr. Hill used three methods to calculate the predicted loss: the "price elasticity of demand" method, a "substitution components" method, and a "documentary evidence" method. Each showed that a hypothetical monopolist could profitably raise North American chloride TiO2 prices by 10%. *See* PX5000 at 051-057.

Price elasticity of demand measures the responsiveness of a product's sales to a 1% change in the product's price. PX5000-051. Demand for a product is "elastic" if a 1% price increase decreases demand by more than 1%. It is "inelastic" if a 1% price increase decreases demand by less than 1%. The more inelastic a product's demand, the less likely it is that the product has adequate substitutes. Dr. Hill found that the price elasticity of North American chloride TiO2 is -0.45% (*i.e.*, a 1% increase in price reduces sales **[**31]** by 0.45%). He multiplied this number and a 10% SSNIP to show that the predicted loss of sales, 4.5%, would be considerably lower than the critical loss of 15.4%. PX5000-052. In other words, estimates of price elasticity show that a hypothetical monopolist could profitably increase North American chloride TiO2 prices by 10%.

Dr. Hill's "substitution components method" used the Defendants' data to estimate the expected increase of TiO2 imports in response to a 10% SSNIP. The TiO2 that firms acquire from imports or from other producers repatriating their exports represents lost sales for a hypothetical **[*205]** monopolist. Dr. Hill found that a 10% SSNIP would lead to roughly 75,000 more metric tons of TiO2 being imported or repatriated, and another 3% decrease in the monopolist's sales of rutile TiO2. PX5000-054. Together, this represents roughly 12.6% of total North American chloride TiO2 sales. *Id.* As a 12.6% loss is lower than the critical loss threshold of 15.4%, the substitution components method predicts that the hypothetical monopolist could profitably raise prices.

Finally, Dr. Hill used data from Tronox documents. At some future point, Tronox contends, "Chinese sulfate could take up to **[**32]** 15 percent of [all TiO2] applications" in North America, thus "reducing the share of chloride titanium dioxide by at most five percent." PX5000-055. Dr. Hill assumed that such sulfate substitution would occur in response to a 10% SSNIP. He and calculated that the resulting loss of sales to the hypothetical monopolist would be about 8.7%, which again is lower than the critical loss threshold. PX5000-056. Based on these calculations and his other analyses, Dr. Hill concluded that the relevant market for evaluating the merger's potential anticompetitive effects consists of North American chloride TiO2 sales.

c. The Defendants Define the Market Too Broadly

The Defendants argue that the Commission's geographic market definition is impermissibly narrow, and they challenge many of Dr. Hill's calculations. The FTC's "claim that the relevant geographic market is limited to North America," they contend, "ignores that TiO2 is a globally-traded commodity." Defs.' Unredacted Opp. to Prelim. Inj. 8. If Dr. Hill's hypothetical monopolist "were to attempt to implement a SSNIP post-merger, the significant volume of TiO2 'on the water' that would be diverted to North America . . . would exceed the critical **[**33]** loss . . . within the FTC's candidate market." RX0170.0015. This is because global trade in TiO2 is "highly elastic." *Id.*

True, global trade flows of TiO2 are substantial. In 2016, 46% of the chloride TiO2 produced in North America was exported. PX5000-037. The largest producers of the chloride pigment in North America—Chemours, Tronox, and Cristal—are also its largest exporters. *Id.* at 38. Upon a price increase in North America, these producers could conceivably repatriate some of this exported TiO2 to increase their profit margins.

The Commission, however, provided plausible explanations for why sizeable repatriation of titanium dioxide would not occur. First, there has been no evidence of this behavior in the past. As mentioned earlier, Dr. Hill's analysis suggests a persistent variance in prices between North America and other regions. Regional price differences show that profiting from export repatriation is possible. But the persistence of these differences shows that nontrivial repatriation does not happen in practice.

One offered reason is that, in the TiO2 industry, "customer relationships" and "security of supply" are essential. Hr'g Tr. 399:15-22. TiO2 producers have large customers **[**34]** in export markets, and "alienating a customer base" could result in the long-term loss of business. *Id.* As revenues depend on both sales volume and product price, "making a large change invoking the ire of your customers for a short period is probably not worth it." Hr'g Tr. 399:25-400:2. *See also* PX8005-004 (Venator explaining that "[o]ur European business is stable, and our primary focus is on serving the established relationships we have built over time with large customers in Europe. Given the cost of shipping and duties, we are generally better off selling in Europe than exporting to North America. We have **[*206]** not seen a sustained gap between North American prices and European prices large enough over a long enough period that it would make sense for us to export more to North America.").

The North American preference for slurry rather than dry TiO2 presents another reason to question the extent to which export repatriation might defeat a price hike imposed by the hypothetical monopolist. The "North American market is almost exclusively slurry," and customers in this region have "some of the most strict" quality of product and service demands. Hr'g Tr. 177:21-22; 178:5-11. While all **[**35]** titanium dioxide trading is subject to logistical challenges, import duties, and shipping costs, slurry TiO2 requires at least some additional capital expenditure (such as physical locations at which the dry TiO2 is mixed with an aqueous solution and repackaged). These costs may make export repatriation even more unlikely absent a large and sustained regional price disparity. Together, the persistence of regionalized pricing, the lack of evidence of prior export repatriation, the incentives for maintaining customer relationships and supply security, and the domestic preference for slurry raise significant questions about whether customers could import enough TiO2 to offset a SSNIP.

Aside from ignoring global trade flows, the Defendants contend that the Commission's market definition is wrong because of the "flawed method with which" Dr. Hill implemented the hypothetical monopolist test. RX0170.0129. According to them, Dr. Hill wrongly "gives the hypothetical monopolist control over supply both inside and outside his hypothesized relevant market." *Id.* at 0130. This modeling decision means that "customers in North America could not get additional supply" from plants and producers in Europe or other **[**36]** regions. *Id.*

But an assumption that North American customers will not be able to secure meaningful increases in TiO2 from foreign sources appears to comport with the industry's economic realities as described above. Moreover, the Merger Guidelines suggest that ***HN13***[] "[w]hen the hypothetical monopolist could discriminate based on customer location, [the Commission] may define geographic markets based on the locations of targeted customers . . . . Geographic markets of this type encompass the region into which sales are made." Merger Guidelines § 4.2.2. Persistent regional pricing shows that TiO2 producers can discriminate based on customers' locations. And, as Dr. Shehadeh testified, the Merger Guidelines are "an excellent summary of a very broad set of tools that are used by economists" to engage in antitrust analysis. Hr'g Tr. 478:6-8. ***HN14***[] They have also been repeatedly relied on by the courts. *See, e.g., Sysco, 113 F. Supp. 3d at 38* ("The Merger Guidelines are not binding, but the Court of Appeals and other courts have looked to them for guidance in previous merger cases.") (citing *Heinz, 246 F.3d at 716*; *H & R Block, 833 F. Supp. 2d at 52 n. 10*). Thus, Dr. Hill's modeling assumptions seem reasonable given the nature of the TiO2 industry.

In summary, though the TiO2 market is characterized **[**37]** by considerable global trade, the Commission has credibly suggested that North American customers could not overcome a 10% SSNIP by increasing imports from foreign sources. It has also shown that customers cannot substitute away from chloride by using sulfate TiO2 in their coatings, paints, and plastics. The Court finds that the FTC has carried its burden, and that the market for chloride-process TiO2 in North America is the relevant market in which to assess the potential anticompetitive effects of Tronox's acquisition of Cristal.

[*207] 3. The Chloride-Process TiO2 Market in North America is Concentrated, and the Proposed Transaction Would Substantially Increase Concentration

Chemours, Cristal, Tronox, Kronos, and Venator dominate the market for chloride-process TiO2 in the United States and Canada. From producer invoices, customer data, and third-party cost studies, Dr. Hill estimates that roughly 831,000 metric tons of chloride TiO2 was sold in North America in 2016. Of this volume, Chemours accounted for [TEXT REDACTED BY THE COURT] of sales. Together, Tronox and Cristal accounted for [TEXT REDACTED BY THE COURT]. PX5000-068. Kronos accounted for [TEXT REDACTED BY THE COURT], and Venator **[**38]** for [TEXT REDACTED BY THE COURT], of 2016 sales. *Id.* Together, the five firms sold nearly 99.5% of total chloride TiO2 in 2016, and the proposed merger would create a market in which the top two companies control around 73% of total production capacity.

The Merger Guidelines explain that ***HN15***[] "[m]arket concentration is often one useful indicator of likely competitive effects of a merger," and that the Herfindahl-Hirschman Index ("HHI") is a common economic measure of such concentration. Merger Guidelines § 5.3. Courts agree. *See, e.g., Heinz, 246 F.3d at 716*.

The HHI is calculated by squaring the market share of each firm in the market and adding up these squares (so, if there are three firms with market shares of 50%, 30%, and 20%, the HHI would be $50^2 + 30^2 + 20^2 = 3{,}800$). Squaring the individual market shares allocates proportionately greater weight to firms with larger shares, reflecting the larger threat to competitive behavior they pose. *See* Merger Guidelines § 5.3. For antitrust purposes, the FTC and the U.S. Department of Justice generally classify markets as "unconcentrated," "moderately concentrated," and "highly concentrated." An unconcentrated market features an HHI of below 1,500. A moderately concentrated **[**39]** market has an HHI of between 1,500 and 2,500, while a highly concentrated market has an HHI that is greater than 2,500. *Id.*

HN16[] Economists calculate the HHI score of an industry before and after the proposed merger. Transactions that result in an HHI increase of fewer than 100 points "are unlikely to have adverse competitive effects." *Id.* In moderately concentrated markets, a transaction that increases the HHI by more than 100 points "potentially raise[s] significant competitive concerns and often warrant[s] scrutiny." *Id.* Mergers "resulting in highly concentrated markets that involve an increase in the HHI of more than 200 points will be presumed to be likely to enhance market power." *Id.* This presumption of anticompetitive effects "may be rebutted by persuasive evidence showing that the merger is unlikely to enhance market power." *Id.*

The Defendants did not attack Dr. Hill's HHI analysis. He determined that the present-day North American chloride TiO2 market features an HHI score of 2,320, which suggests that the market is moderately concentrated. PX5000-068. Should Tronox and Cristal merge, the new four-firm market would feature an HHI of 3,046. The merger would thus increase the HHI **[**40]** by 726 points, resulting in a highly concentrated market. Because it would increase the HHI score by well over 200 points, and because it would result in a highly concentrated market, the proposed transaction is presumptively anticompetitive under the Merger Guidelines. *See also Heinz, 246 F.3d at 716* (noting that the proposed merger would "increase the HHI by 510," and that this "creates, by a wide margin, a presumption that the merger will lessen competition" in the relevant market).

[*208] 4. Post-Merger Strategic Output Withholding is Likely

Beyond its market-share analysis, the Commission's evidence suggests a reasonable probability that the proposed transaction will lead to anticompetitive behavior among the industry's remaining players. Although the Defendants offer nontrivial critiques of Dr. Hill's theoretical models suggesting this behavior, they cannot overcome the real-world proof of meaningful market incentives to manage prices by withholding TiO2 supply.

a. The Documentary and Testimonial Evidence Points to Incentives for and a History of Strategic Output Withholding

Statements from Tronox executives evince an understanding that TiO2 producers recognize the benefits of strategically withholding supply **[**41]** from consumers to maintain higher prices. In 2012, the firm's Chief Commercial Officer advised against aggressive competition with producers, as this would cause "price to deteriorate further and [Tronox does] not want to facilitate or fuel that process." PX5000-077. He instead suggested the company "slow down production so that we minimize or eliminate the inventory build that will occur if we continue running at the existing rates." *Id.* On a 2015 earnings call, Mr. Casey noted that Tronox was "addressing when the prices turn" by "managing our production so that inventories get reduced to normal or below normal levels. And when that happens, prices will rise." PX9005-010. On a 2016 earnings call, Mr. Casey explained that "a very disciplined approach to production, to managing supply relative to demand, is what has facilitated the recovery in our markets, and we intend to continue to be disciplined about that." PX9003-010. And on the February 2017 earnings call to announce and discuss the proposed merger with Cristal, Mr. Casey said, "we have tried to be economically rational over these last several years. If there was surplus supply in the market we slow down our production." PX9000-012. **[**42]**

Tronox documents suggest the firm has withheld TiO2 supply to shore up prices in the past and that avoiding price competition with fellow suppliers can be beneficial. In 2016, Arjen Duvekot, then a managing director, told a distributer that "to stop the price erosion in the market we reduced the production output in our pigment plants mid 2015 by 15%," adding that this withholding "presents a great opportunity to turn around the price trend of the last 4 years and improve the prices for Tronox TiO2 pigment in the market." PX5002-009. Similarly, in 2015, Mr. Duvekot told a colleague that offering a consumer a lower price "will cause a reaction from the competition, at this account or elsewhere in the market, which will just lead to more price erosion in the market. Tronox does not want to play this game (anymore)." PX1432-001.

Other TiO2 firms also acknowledge the benefits of strategic output withholding. *See* PX2022, PX2116, and PX2083 (statements in Cristal documents about idling production to raise prices); PX3000 at 003-004 ([TEXT REDACTED BY THE COURT] noting that "capacity rationalization" and an "increasingly structured and consolidated market (Tronox / Cristal)" mean that the "[s]ignificant **[**43]** recovery in TiO2 prices [is] expected to continue through 2017 and 2018"); PX5000-079 (describing plans by Chemours to "dial back production" at some plants in response to adding production capacity at a facility in Mexico).

HN17[↑] There is, of course, nothing improper about a firm making independent production decisions to maximize profits. But a core purpose of ***antitrust law*** is to scrutinize mergers that may make it easier **[*209]** for firms to collectively reduce output, and indeed, to prevent mergers that are likely to do so. *See* *Heinz, 345 U.S. App. D.C. at 371* ("Merger law rests upon the theory that, where rivals are few, firms will be able to coordinate their behavior, either by overt collusion or implicit understanding, in order to restrict output and achieve profits above competitive levels."); *F.T.C. v. Elders Grain, Inc., 868 F.2d 901, 906 (7th Cir. 1989)* (Posner, J.) (noting that antitrust theory "teaches that an acquisition which reduces the number of significant sellers in a market already highly concentrated and prone to collusion by reason of its history and circumstances is unlawful in the absence of special circumstances.").

A Tronox-Cristal merger will make TiO2 supply reductions easier to coordinate through implicit understanding and sheer market power, in a market where producers **[**44]** have already shown an awareness that implicit coordination would be beneficial.[12] The post-merger market would feature two firms that control roughly three quarters of all chloride TiO2 production — Chemours and the Tronox-Cristal entity. These firms could more easily "stop the price erosion in the market" and "slow down production" across the industry, as customers will often be left with no meaningful alternative sources of supply.

---

[12] The Commission alleges a history of overt collusion in the TiO2 industry, pointing to recent price-fixing allegations and litigation. *See* *Valspar Corp. v. E.I. Du Pont De Nemours and Co., 873 F.3d 185 (3d Cir. 2017)*; *In re Titanium Dioxide Antitrust Litig., 959 F. Supp. 2d 799 (D. Md. 2013)*; Pl.'s Mem. in Supp. of Pl.'s Mot. for Prelim. Inj. 3, ECF. No. 6 ("the TiO2 industry in North America has a long history of price-fixing litigation and subsequent court decisions outline pervasive anticompetitive conduct."). The Defendants vigorously contest these assertions. *See* Defs.' Redacted Opp. to Prelim. Inj. 28-29. That said, the Court need not decide the merits of these claims, as the proposed merger will increase the likelihood of collective output withholding without explicit agreements or attempted price-fixing.

Consider two examples. First, [TEXT REDACTED BY THE COURT] "spends about [TEXT REDACTED BY THE COURT] annually to buy a specialty chloride grade of titanium dioxide from Tronox." PX8001-001. [TEXT REDACTED BY THE COURT] While the firm "prefers to use Tronox's . . . titanium dioxide, it has purchased . . . from [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT] in the past, and is willing to purchase it [from these Tronox rivals] in the future," based on product pricing and availability. *Id.*

Recently, Tronox offered [TEXT REDACTED BY THE COURT] a new "one-year contract at a significant price increase, about [TEXT REDACTED BY THE COURT] above" the firm's current contract price. *Id.* at 002. The company "reached out to [TEXT REDACTED BY THE COURT] and **[**45]** [TEXT REDACTED BY THE COURT], its two previous titanium dioxide suppliers," but "[TEXT REDACTED BY THE COURT] responded that they do not have supply to offer, and [TEXT REDACTED BY THE COURT] failed to respond at all." *Id.* Seeking to avoid paying Tronox's higher price, the company "anticipate[s] reaching out to Cristal in the near future" to see if Cristal would be willing to offer a supply proposal. *Id.*

Second, [TEXT REDACTED BY THE COURT] has a supply agreement with Tronox that [TEXT REDACTED BY THE COURT]. Seeking to test the TiO2 market for a better deal, [TEXT REDACTED BY THE COURT] "approached [TEXT REDACTED BY THE COURT], and they said [they have] no volume for 2018. They had none available to sell [TEXT REDACTED BY THE COURT]." Hr'g Tr. 276:16-17. When [TEXT REDACTED BY THE COURT] "first approached [TEXT REDACTED BY THE COURT], they gave us the same answer. [TEXT REDACTED BY THE COURT]" Hr'g Tr. 276:18-22. Thus, "if Tronox raised prices, by, say, 10 percent" under present market circumstances, "Cristal would be [the] one person [TEXT REDACTED BY THE COURT] could approach." Hr'g Tr. 277:2-5.

The experiences of [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT] suggest **[**46]** that chloride TiO2 consumers in North America today face challenging but surmountable hurdles in their **[*210]** efforts to negotiate prices and ensure a consistent source of supply. In at least some cases, the threat of switching between Tronox and Cristal is the only leverage available to industry customers. In North America, for instance, [TEXT REDACTED BY THE COURT] purchases roughly [TEXT REDACTED BY THE COURT] of its TiO2 and [TEXT REDACTED BY THE COURT] of its slurry TiO2 from either Tronox or Cristal. Hr'g Tr. 282:18-21. More broadly, Chemours and the Tronox-Cristal entity would often be able to maintain price discipline and control supply in a post-merger market simply by competing less vigorously against each other for major accounts. As Mr. Christian testified, "more consolidation . . . leads to more power for the producers . . . [the proposed merger] gives us increased . . . bargaining power as an industry." Hr'g Tr. 270:5-10.

The available real-world evidence thus suggests that (1) to counter declining prices, chloride TiO2 producers have incentives and the means to withhold supply, and (2) the proposed transaction, which would create two firms with nearly three-quarters of the total **[**47]** market share, will likely increase these incentives and make implicit price coordination easier. The evidence, in other words, strengthens the Commission's assertion that the Tronox-Cristal merger raises serious and substantial questions about likely anticompetitive effects.

b. Dr. Hill's Capacity Closure and Cournot Models are Subject to Valid Critiques, but Their Conclusions Track Business Realities

Dr. Hill used two economic models to prove that the merger will increase incentives to withhold TiO2 supply. He first presented findings from a new analysis he calls the "Capacity Closure" model. PX5000-085. It seeks to quantify the costs and benefits to the Tronox-Cristal entity associated with output reductions. Generally, the cost of reducing production is the lost profit on each unit of TiO2 that is withheld, while the benefit is the higher profit margin, attributable to a higher market price, of each unit that is sold. *Id.* at 086. The model allows "imports of chloride titanium dioxide to be affected by changes in the price," but it does not "allow for an increase in North American domestic production of chloride titanium dioxide because of the current high operating rates in North America." **[**48]** *Id.* at 087.

The Capacity Closure model predicts that, "under current market conditions, the merged firm would have an incentive to withhold output by idling two production lines at [Tronox's] Hamilton plant [in Mississippi]." *Id.* at 087. Specifically, the "most profitable output withholding strategy is predicted to lead to a price increase of 23% and cause harm of $419 million per year." The model outlines many profitable withholding strategies that would result in price increases to consumers ranging from 8 - 38%. *Id.*

The Defendants present two criticisms of the Capacity Closure model that limit the persuasiveness of its conclusions. Dr. Shehadeh contends that the model is invalid as it "predicts that Chemours should supply less to North America under current competitive conditions than Chemours is actually supplying." RX0170.0038. Because the model's predictions are unreliable for "Chemours' actual conduct today," he argues, they are unreliable as they pertain to future conduct by the merged entity. *Id.*

Dr. Hill's rebuttal report does not respond directly to this allegation. *See* PX5004 at 041-045. During the evidentiary hearing, he explained that he did not try to address the issue, as he did not apply **[**49]** his model to Chemours. Hr'g Tr. 447:2-448:1. Instead, he claimed that he was unwilling to "rely on the data" used by Dr. Shehadeh, **[*211]** because "Chemours has a different production process than its rivals," and this makes "margin information" on the firm unreliable. *See id.* Dr. Hill did use this data, however, in conducting some of his hypothetical monopolist testing, as there he "was able to mitigate the concerns about the data." Hr'g Tr. 448:5-7. While it is true that data fit for one purpose may not be fit for another, Dr. Hill's response does not fully allay the concerns raised by Dr. Shehadeh, and there is reason to question the model's predictive power.

Dr. Shehadeh also questions the justification for the assumption that the "current high operating rates in North America" mean that producers cannot increase capacity at all. After all, high operating rates do not prevent firms from "engaging in [the type of] expansions that have been so evident in the industry." RX0170.0039. Dr. Hill's rebuttal focuses on statements made by Venator and Chemours executives, who predict sustained capacity constraints and suggest that the industry's high utilization rate is unlikely to change over the **[**50]** next few years. *See* PX5004 at 043-44. But these statements assume that the status quo will continue, and not that a new Tronox-Cristal entity will increase its output withholding. It therefore seems reasonable to expect *some* efforts by rivals to increase capacity if such efforts could be profitable.

Unlike the Capacity Closure model, the Cournot model is a "fundamental economic" tool used to analyze oligopolies. PX5000-090. Its "key insight is that firms in oligopoly markets will recognize their mutual interdependence and restrict output—thereby increasing the market price above the competitive level." *Id.* And unlike the Capacity Closure method, the Cournot model allows firms to adjust output, so that each firm can expand capacity if it so chooses. *Id.* Dr. Hill's Cournot analysis suggests that "the merger would lead to a higher chloride titanium dioxide price unless the merger were to generate a more than 74% reduction in the merged firm's marginal cost as compared to those of the stand-alone firms." *Id.* Unless the cost savings from the acquisition are so great as to reduce the price of producing a unit of TiO_2 pigment by 74%, the Cournot model suggests that the merged entity would **[**51]** gain more from raising prices than increasing supply.

Dr. Shehadeh contends that, in some circumstances, use of the Cournot model is not appropriate and leads to results that are inconsistent with market realities. RX0170.0044. Here, for instance, the Cournot model "significantly" understates the existing marginal costs of production. *Id.* at 0045. Chemours' marginal cost of producing TiO_2 is, according to the model, "more than [TEXT REDACTED BY THE COURT]" lower than the "actual" marginal cost as measured by Dr. Hill. *Id.* Because of this "glaring inconsistency with basic industry facts," the Cournot model cannot yield reliable conclusions about the market. *Id.*

The Defendants also highlight, and Dr. Hill confirms, that his "Cournot model predicts that in the North American chloride TiO_2 market the merger will be unprofitable with respect to variable costs." Hr'g Tr. 450:21-24. He added that he did not use the Cournot model to analyze the overall profitability of the merger, but that a "merger that generates significant fixed cost savings" would still be profitable on an overall basis. Hr'g Tr. 452:18-453:14.

Dr. Hill rejects the contention that these findings make the Cournot model inconsistent with **[**52]** market realities. He counters that Dr. Shehadeh "confused the total cost of production," which is used in the Capacity Closure model, with "the concept of marginal cost of production." PX5004-046. Using a corrected, apples-to-apples comparison, **[*212]** the data offers "striking support for the Cournot model's validity." *Id.* Dr. Hill also suggests that the purpose of the Cournot model is not to analyze merger profitability, but rather to test the effects of output withholding. Hr'g Tr. 467:15-24.

The Court finds that Dr. Hill's overall conclusions are more consistent with the business realities of the TiO2 industry than those proffered by Dr. Shehadeh, even if the Cournot and Capacity Closure models are subject to valid criticisms. Dr. Hill buttresses his modeling with several producer statements that support his findings. TiO2 producers are aware, for example, of their interdependence and the downsides of expanding output. *See* PX5000-093 (collecting Tronox executives' statements like, "we have not gained market share by trying to reduce price [and we] don't think that's the appropriate strategy going forward," and [TEXT REDACTED BY THE COURT]. These statements lend credibility to the models' **[**53]** conclusions, as they suggest that firms are generally unwilling to take actions that will lower industry-wide prices.

Ultimately, ***HN18***[] this Court need not decisively sift through various models and theories. *See* *Sysco, 113 F. Supp. 3d at 36-37* (noting that the court "hesitates to rely on" an expert's precise calculations where such calculations are subject to valid criticism, and concluding that "when evaluated against the record as a whole, [the expert's] conclusions are more consistent with the business realities" of the relevant market). Rather, the question here is whether the FTC "has raised questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals." *Heinz, 246 F.3d at 714-15* (internal quotation omitted).

The FTC clears this bar. It has established its prima facie case by proving that the Tronox-Cristal merger will likely result in undue concentration in the North American chloride-process TiO2 market. It has strengthened this case by showing that the merger will increase already prevalent incentives to engage in strategic output withholding. The Commission **[**54]** has therefore established a presumption that the proposed transaction will have anticompetitive effects in violation of the Clayton Act.

B. The Defendants' Rebuttal Evidence Does Not Overcome the Presumption of Anticompetitive Effects

HN19[] The Defendants can rebut the presumption that their merger will substantially lessen competition either by "discrediting the data underlying the initial presumption in the government's favor," or by "affirmatively showing why [the deal] is unlikely to substantially lessen competition." *Baker Hughes, 908 F.2d at 991*. Generally, "[t]he more compelling the [FTC's] prima facie case, the more evidence [the Defendants] must present to rebut it successfully." *Id.* As discussed above, the Defendants have not sufficiently discredited the Commission's data and evidence.

They marshal two additional arguments suggesting that the market will remain competitive post-acquisition. First, they contend that the current market is "fiercely competitive," and that the Defendants face increased pressure from "the rise of Chinese market entrants who are disrupting competition globally." Defs.' Unredacted Opp. to Prelim. Inj. 24, 29. Second, they assert that consumers will benefit from the transaction's output-enhancing **[**55]** synergies and efficiencies. Neither argument, alone nor in tandem, can overcome the Commission's strong presumption of anticompetitive effects.

[*213] 1. Chinese Producers are Not Yet Positioned to Replace the Competition That Would be Lost by a Tronox-Cristal Merger

HN20[] Entry or expansion into the relevant market by new competitors can mitigate the expected anticompetitive effects of a proposed transaction. *H & R Block, 833 F. Supp. 2d at 73*. This is because, "[i]n the absence of significant barriers, a company probably cannot maintain supracompetitive pricing for any length of time." *Baker Hughes, 908 F.2d at 987*. The Merger Guidelines thus suggest that companies that are "not current producers in a relevant market, but that would very likely provide rapid supply responses with direct competitive impact in the event of a SSNIP, without incurring significant sunk costs, are also considered market participants." Merger

Guidelines § 5.1. Sunk costs include the "entry or exit costs that cannot be recovered outside the relevant market." *Id.*

The Defendants contend that, in defining the market and assessing the deal's likely harm, the Commission "wrongly dismisses the importance of Chinese TiO2 producers, particularly Lomon Billions, the fourth largest TiO2 supplier **[**56]** in the world by capacity." Defs.' Unredacted Opp. to Prelim. Inj. 30. Lomon Billions "plans to expand its chloride capacity . . . by adding 200,000 tons per year during the year 2019 . . . and 300,000 tons per year sometime in the mid-2020s." *Id.* at 30-31. Based on 2016 data, this expansion would make Lomon Billions almost twice as large as the current market leader in chloride-process production (Chemours, with roughly 290,000 tons), and would expand the overall chloride market by nearly 60%. *See* PX5000-068. Lomon's bold growth plan is feasible, "real and unspeculative," the Defendants warn, because the firm "benefit[s] from low capital costs, support from the Chinese government, and from inherited intellectual property." Defs.' Unredacted Opp. to Prelim. Inj. 30-31.

It is no doubt possible, and perhaps inevitable, that competition from Lomon Billions and other Chinese TiO2 producers will someday redefine the North American market. But the pertinent question here is whether the emergence of Lomon Billions can be "rapid enough to make unprofitable overall the [predicted] actions" that otherwise lead to the Commission's concerns about anticompetitive effects. Merger Guidelines § 9.1. The evidence suggests **[**57]** that it cannot.

Currently, neither Lomon Billions nor any supplier other than Chemours, Tronox, Cristal, Kronos, or Venator account for even 1% of North American chloride-process TiO2 supply. PX5000-068. Lomon Billions, like other Chinese firms, is "predominantly" a sulfate-process TiO2 producer. Hr'g Tr. 184:9-11. Tronox documents from 2016 suggest that "China has built multiple chloride plants but struggles to commission them," and that "almost no commercial grade [chloride] pigment is produced today." PX5000-113.

Major TiO2 manufacturers do not appear to be worried about the prospect of a near-term increase in Chinese chloride production. In a 2015 email, then-Tronox CEO Mr. Casey said, "I think it is a very remote prospect that China will be producing chloride capacity of any magnitude in the next 3-5 years. The only facility is a 30,000 ton plant being built by Billions, which they cannot get to work." PX1065-001.

Similarly, from Kronos's perspective, Lomon Billions is "just not a material threat today . . . . We've been thinking [about] this for a while, [and] we just don't see a lots [sic] of Chinese [chloride-process] products in the markets in which we compete." Hr'g Tr. 183:24-184:8. **[**58]** Kronos **[*214]** does not see its "customers . . . switching from our [chloride-process] products to Lomon Billions." Hr'g Tr. 184:16-17. As Mr. Christian persuasively explained, Chinese companies' typical advantages are low labor costs and a relaxed environmental regulatory regime. Hr'g Tr. 186:11-25. These advantages are of little help in the chloride-process business. *Id.*

Indeed, the experiences of Chinese TiO2 manufacturers confirm the existence of two substantial barriers rendering rapid entry into the North American market unlikely: capital costs and technology constraints. Tronox estimates that "on average, the greenfield cost per ton of TiO2 is between $5,000-$6,000 for chloride pigment plants." PX003-013. The construction of a new 200,000-ton plant would therefore cost between $1-$1.2 billion. *See also* PX5000-110 (noting similar estimates from Cristal and Kronos).

In addition to high entry costs, chloride-process TiO2 requires advanced technology and intellectual property that is "closely guarded by Western producers." PX3011-019. Lomon Billions has "struggled with the technology. They don't produce utilization rates anywhere near their . . . nameplate capacity [and] they've had to lower **[**59]** the nameplate capacity of their plant." Hr'g Tr. 184:23-185:3. *See also* PX5000-113 ("[TEXT REDACTED BY THE COURT] deemed efforts by the largest Chinese producer, Lomon Billions, to produce chloride titanium dioxide a 'technology failure."); PX1000-018 (Tronox presentation noting that the "[l]egitimacy of [Chinese] base technology [is] questionable," and that Chinese firms have "[n]o know-how/experience of running CP plant").

Customers, like TiO2 producers, believe that technology and quality constraints preclude Chinese manufacturers from meaningful participation in the chloride market. [TEXT REDACTED BY THE COURT] has tested Lomon

Billions' chloride TiO2 but found it lacking. PX5000-114. [TEXT REDACTED BY THE COURT] has an established supply relationship with Lomon Billions, but they "weren't able to deliver the material that we ordered when we wanted it." [TEXT REDACTED BY THE COURT] *See also* Admin. Trial Tr. 1094:21-1095:9 (North American customer noting that buying "titanium dioxide from China" would "really be a last resort for us.").

Finally, even if Chinese producers can radically increase their chloride TiO2 production over the next few years, recent trends show that much of **[**60]** this supply may be consumed by their domestic demand. China is currently a net importer of chloride TiO2. PX5000-115. As its economy grows and per capita incomes increase, demand for household paints and other products using TiO2 is expected to rise. An industry study, for example, estimates that China's share of TiO2 demand will "expand[] from 4% of global demand in 2005 to an anticipated share of 27% in 2020." PX5000-115. [TEXT REDACTED BY THE COURT] *See also* PX3032 at 001 ("Chinese TiO2 growth is primarily feeding local and Asian demand."). Reflecting these trends, Mr. Casey estimated that China's "first production [of chloride TiO2] will go into the domestic market so the export market impact will be quite a while." PX1065-001.

The limited presence of Lomon Billions in the North American chloride market today, the substantial barriers to entry, and China's internal TiO2 demand trends do not paint a picture of rapid entrants ready to replace the loss of Cristal as a source of competition. Rather, the emerging threat from Chinese producers here is like the prospective competition from Amazon that the court considered in *Staples, 190 F. Supp. 3d at 133-136*. Evaluating a proposed merger between Staples and Office Depot, **[**61]** the court there found that the Commission had established its prima facie **[*215]** case. *See id. at 131*. The *Staples* defendants responded by suggesting that competition from "Amazon Business" would nullify any suggested anticompetitive effects. *Id. at 133*. They asserted that Amazon "wants to take over the office supply industry," and that the firm would "eventually transform the [business-to-business] office supply space." *Id.*

The court was unconvinced. It found "significant institutional and structural challenges" that prevented Amazon from being "in a position to restore [lost] competition." *Id. at 134*. The court found that "customers still do not view Amazon Business as a viable alternative," and that Amazon had "yet to successfully bid to be a large [business-to-business] customer's primary vendor." *Id.* Amazon, in other words, would "not be in a position to compete" in the relevant market "with the proposed merged entity within three years." *Id. at 136*. So too here. Lomon Billions is not yet positioned to compete meaningfully with the producers that would remain in a post-merger North American chloride TiO2 market.

2. The Transaction's Purported Synergies and Efficiencies do not Rebut the Commission's Prima Facie Case

HN21[] When a court **[**62]** "finds high market concentration levels, defendants must present proof of extraordinary efficiencies to rebut the government's prima facie case." *Sysco, 113 F. Supp. 3d at 81*. Courts have "rarely, if ever, denied a preliminary injunction solely based on the likely efficiencies." *Id. at 82* (quoting *F.T.C. v. CCC Holdings, Inc., 605 F. Supp. 2d. 26, 72 (D.D.C. 2009))*. To be able to offset a merger's likely anticompetitive effects, purported synergies and efficiencies must "represent more than mere speculation and promises about post-merger behavior." *Heinz, 246 F.3d at 721*. They must be "merger-specific," meaning that they "cannot be achieved by either company alone." *Id. at 721-722*. And they must be "reasonably verifiable by an independent party." *H & R Block, 833 F. Supp. 2d at 89*. The Defendants have identified several merger-specific, but ultimately unverifiable, synergies and efficiencies.

The Tronox-Cristal merger, they argue, will increase global production of TiO2 for three reasons. First, "Tronox produces more TiO2 feedstock than its TiO2 pigment plants can consume, while Cristal's TiO2 production exceeds its feedstock production." Defs.' Unredacted Opp. to Prelim. Inj. 24. The merger would thus allow "greater vertical integration" leading to expanded TiO2 output. *Id.* Second, Tronox believes that Cristal is not producing as much TiO2 as it could, **[**63]** in part because of the "extremely subpar" performance of its titanium dioxide plant in Yanbu, Saudi Arabia. *Id.* at 27. Kerr McGee, Tronox's predecessor firm, "built Yanbu with its *own* technology," and

Tronox believes it has a "unique skill set" and expertise that will allow it to boost production at the plant. *Id.* (emphasis in original). Third, Tronox believes that it can "repair and restart" the "Jazan slagger," a currently non-operational feedstock-producing facility in Saudi Arabia that is owned by Cristal. *Id.* Such repairs would increase the available feedstock for TiO2, thereby increasing the pigment's production. And an increase in global TiO2 production will, all else equal, benefit consumers by lowering prices.

Although the Court does not doubt their desire to operationalize these efficiency-improving plans, the Defendants have not shown that the merger will necessarily increase overall output. As discussed above, the titanium dioxide industry features significant incentives, depending on **[*216]** prices, to withhold or manage output to maximize profits. The Defendants contend that the "great opportunity costs" associated with reducing TiO2 production mean that "TiO2 manufacturers, when they **[**64]** have their facility, they run it flat out, they run it all out, they try to gain . . . 100 percent realization." Hr'g Tr. 40:25-41:3. But this assertion is belied by the observable economic reality of the industry: to prevent falling prices, firms can and do find it profitable to reduce output.

Still more, the success of Tronox's planned improvements to the Yanbu plant and Jazan slagger cannot be reasonably verified before such improvements occur. TiO2 plants, Tronox CEO Jeffry Quinn explained, are "like living organisms. You make mistakes. You do things, and sometimes it doesn't work." Hr'g Tr. 603:13-15. He added that the Jazan slagger has "had several failed start-ups in the past." Hr'g Tr. 618:21.

Reflecting this uncertainty, Tronox signed an Option Agreement with Cristal related to the slagger. The Option Agreement "obligated [Tronox] to make financial investments to help fix the Jazan facility," and "if certain performance metrics are met," Tronox is "obligated to purchase [the slagger] in the future." Hr'g Tr. 619:8-19. But if these performance metrics are not met, then "the $120 million that we are advancing, gets converted to a loan, either we get paid back or that we get it **[**65]** paid back in terms of a reduced price for buying feedstocks to come out of the furnace." Hr'g Tr. 620:5-12. Tronox, in other words, has taken understandable precautions in case the planned output-enhancing improvements cannot be actualized.

The Defendants also suggest that the merger will result in "sizeable cost savings synergies" stemming from the "reduction in personnel" and "supply chain synergies, including volume purchase discounts." Defs.' Unredacted Opp. to Prelim. Inj. 28-29. The Defendants hired KPMG, a professional services company, "to verify the synergy estimates." *Id.* at 29. After "performing [an] extensive review of the Tronox and Cristal transaction, with access to the 'entire data room' in this matter," KPMG submitted a report showing that they "had assessed and validated" the deal's cost savings. *Id.*

Again, while the Court credits the intent to achieve these cost savings, it is difficult to independently verify the scale or likely success of the deal's synergies. In measuring the general administrative cost savings of the deal, for instance, KPMG's "synergy tracking model" relied in part on revised estimates of operational synergies "that the business had identified." PX7045-013. **[**66]** KPMG's conclusions on cost savings were thus partially based on estimates and assumptions made by the Defendants' internal business teams.

Nor did Defendants hire KPMG to identify "merger-specific" cost savings for antitrust purposes, but to "provide consulting support" for the "sign-to-close period" of the deal. *Id.* at 012. It is thus difficult to evaluate and compare the deal's synergies to the dollar amount of cost savings that may have been achievable by either Tronox or Cristal absent a merger. *See* *Sysco, 113 F. Supp. 3d at 83* ("Sysco did not hire McKinsey to identify merger-specific savings for antitrust purposes . . . . McKinsey was not given instructions on identifying merger-specific savings." As a result, "Defendants have not shown that [the cost savings] could not be achieved independently of the merger.")

In sum, neither emerging competition from Chinese producers nor the transaction's purported synergies and efficiencies sufficiently prove that the Tronox-Cristal merger will in fact be pro-competitive. The Court finds that the FTC has met its **[*217]** burden by raising "questions going to the merits so serious, substantial, difficult and doubtful" as to warrant further proceedings by the FTC and, potentially, the Court **[**67]** of Appeals. *Heinz, 246 F.3d at 714-715*.

C. The Equities Favor Granting the Commission a Preliminary Injunction

HN22[] Although the FTC's showing creates a presumption in favor of a preliminary injunction, the Court must still weigh the equities to determine whether this relief would be in the public interest. *15 U.S.C. § 53(b)*. The Court must consider the interests of the public, "either in having the merger go through or in preventing the merger," and the private equities, which "include the corporate interests" of the Defendants. *F.T.C. v. Swedish Match, 131 F. Supp. 2d 151, 172 (D.D.C. 2000)*. Here, effective enforcement of federal antitrust laws and the need to preserve the Commission's capacity to order meaningful relief require granting the FTC the injunction it seeks.

1. The Public Equities Support Injunctive Relief

HN23[] As the FTC has shown a likelihood that the proposed transaction will substantially lessen competition, the "public interest in effective enforcement of the ***antitrust law***" weighs in favor of granting an injunction. *Heinz, 246 F.3d at 726*. *See also* *Swedish Match, 131 F. Supp. 2d at 173* ("There is a strong public interest in the effective enforcement of the antitrust laws that weighs heavily in favor of an injunction in this case.").

Also supporting an injunction is the "public interest in ensuring that the FTC has the ability to order effective **[**68]** relief if it succeeds at the merits trial." *Sysco, 113 F. Supp. 3d at 86*. The Defendants contend that a post-merger divesture of two Cristal plants in Ashtabula, Ohio, would sufficiently alleviate any anticompetitive concerns the Commission has. Defs.' Unredacted Opp. to Prelim. Inj. 40. They are incorrect. ***HN24***[] "*Section 13(b)* [of the FTC Act] itself embodies congressional recognition of the fact that divestiture is an inadequate and unsatisfactory remedy in a merger case." *Heinz, 246 F.3d at 726*. *See also* *F.T.C. v. Dean Foods Co., 384 U.S. 597, 606 n. 5, 86 S. Ct. 1738, 16 L. Ed. 2d 802 (1966)* ("Administrative experience shows that the Commission's inability to unscramble merged assets frequently prevents entry of an effective order of divestiture."). The FTC explained that "divestitures are really hard to do, particularly post-consummation divestitures" and that they can take up to "seven years to sort out." Hr'g Tr. 770:10-21.

Divestitures may not succeed at restoring competition to the post-merger market. A recent FTC study, for instance, notes that "[i]t may be particularly difficult to restore the pre-merger state of competition if the merging parties have commingled, sold, or closed assets; integrated or dismissed employees . . . or shared confidential information." Fed. Trade Comm'n, *The FTC's Merger Remedies 2006-2012* 18 (2017). **[**69]** In fact, for consummated mergers from 2006 - 2012, only about 25% of the remedies that the Commission ordered were considered "a success." *Id.* Thus, the public interest in ensuring the FTC can order a practicable remedy to preserve market competition supports granting a preliminary injunction.

Pointing to *F.T.C. v. Weyerhaeuser Corp., 665 F.2d 1072, 214 U.S. App. D.C. 254 (D.C. Cir. 1981)*, the Defendants suggest that "[i]f strong equities favor consummation of the transaction, a hold separate order [rather than an injunction] will check interim competitive harm, and such an order will permit adequate **[*218]** ultimate relief." Hr'g Tr. 826:5-8. In *Weyerhaeuser*, the district court permitted a proposed merger to proceed, but it required the defendants "to hold separate a portion of the assets" during the FTC proceedings. *665 F.2d at 1074*. Tronox asks the Court to issue a similar order here.

Putting aside the fact that this 1981 case appears to be the last time the D.C. Circuit blessed such an arrangement, the proposed merger is different in several crucial respects to the *Weyerhaeuser* merger. There, the FTC challenged only part of the deal, the firm being acquired was "a privately held family corporation with about ninety shareholders," and the court found that the merger would result in an "almost **[**70]** certain" increase in product supply. *Id. at 1074-75*. The court also determined that a post-merger divesture of the asset in question, a corrugating medium mill, would be a "feasible remedy." *Id. at 1075*. Cristal is not a small, privately held family corporation, it is possible that the proposed transaction will create incentives to decrease—rather than increase—

TiO2 supply, and the Ashtabula plants are not small assets that can be summarily divested.[13] Thus, a hold-separate order will not suffice.

2. The Private Equities do not Outweigh the Public Equities

The Defendants strenuously argue that the Commission has proceeded in bad faith. They contend that "[t]he FTC has unreasonably delayed its request for a preliminary injunction." Defs.' Unredacted Opp. to Prelim. Inj. 34-35. The Commission, they allege, used "its regulatory processes to increase the costs and burdens of moving forward with the transaction instead of seeking a fair and expeditious resolution of the legal issues." *Id.* at 38. To keep the deal alive, Tronox has "had to agree to more than $130 million in additional consideration that **[**71]** it would not have had to pay if the FTC had promptly sought injunctive relief months ago." *Id.* at 39.

To be sure, the posture of this case is unique as, typically, the FTC seeks injunctive relief before an administrative trial has occurred. *See* Admin. Trial Hr'g Tr. 11:25-12:4, ECF No. 70-6 (ALJ noting that "this is the first case I'm aware of, in a nonconsummated merger, where we're in this position, going to trial, where the Government has not moved for a preliminary injunction. It's never happened as far as I know."). Thus, the Defendants have borne additional costs by presenting their arguments both here and before the Commission's ALJ, and they have devoted additional time and resources to the proposed transaction. This is unfortunate.

The Court is not, however, persuaded by the Defendants' gloss on the FTC's motives. ***HN25***[] Preliminary injunctions are equitable remedies to be used sparingly and in exigent circumstances. *See Sysco, 113 F. Supp. 3d at 23* ("The issuance of a preliminary injunction prior to a full trial on the merits is an extraordinary and drastic remedy.") (cleaned up). Until foreign regulators approved the proposed merger, there was no imminent threat to competition, so a request for injunctive relief would **[**72]** have likely been unripe. *See Lewis v. Continental Bank Corp., 494 U.S. 472, 477, 110 S. Ct. 1249, 108 L. Ed. 2d 400 (1990)* (***HN26***[] "[F]ederal courts may adjudicate **[*219]** only actual, ongoing cases or controversies.").

And it is far from clear that, but for the injunction request, the Defendants would have consummated the merger without having to negotiate an extended closing deadline. The Defendants went through a lengthy regulatory review process in the European Union. European regulators conditioned their approval of the merger upon a partial divestiture of assets from a Tronox facility in the Netherlands (the "Botlek plant"). Mr. Quinn claimed that Tronox "could have any point just agreed to sell the Botlek plant and, you know, been assured of a resolution in Europe." Hr'g Tr. 609:2-4. Selling the plant would have removed this roadblock, forcing the FTC to file an injunction sooner. Indeed, the FTC filed this action because approval from European regulators was "the only remaining hurdle preventing Defendants from consummating the Acquisition." Compl. 2.

But Tronox did not sell the Botlek plant to hasten resolution of the regulatory process, as the firm believed that "a divestiture of a whole plant . . . was completely disproportionate to any theories of harm that the EU was asserting." **[**73]** Hr'g Tr. 640:6-8. Thus, the Defendants had discussions with the European Commission "for a number of months," presented evidence at a formal hearing process, and negotiated approval based on a narrower divestiture. Hr'g Tr. 609:11-610:15. While the Defendants had every right to press their case with the EC, they—not the FTC—painted themselves into this corner. The EC announced its approval of the merger on July 4, 2018,[14] and the FTC filed its Motion for Preliminary Injunction less than a week later.

Finally, ***HN27***[] the harm to the Defendants from putative delays caused by the FTC is at least somewhat mitigated by the fact that any injunctive relief imposed here would be brief compared with a typical *Section 13(b)*

[13] *See Tronox Submits Definitive Agreement to the European Commission Required for Approval of Cristal Acquisition, available at* https://www.tronox.com/tronox-submits-definitive-agreement-to-the-european-commission-required-for-approval-of-cristal-acquisition/ (last accessed August 28, 2018) (valuing the Ashtabula plants at between $900 million and $1.1 billion).

[14] *See Commission Approves Tronox's Acquisition of Cristal, Subject to Conditions, available at* http://europa.eu/rapid/press-release_IP-18-4361_en.htm (last accessed August 28, 2018).

action. In the ordinary case, an injunction means a merger cannot be consummated until the Commission completes its investigative and adjudicative activities. Here, the FTC has already scrutinized the deal and held an administrative trial. The ALJ will likely issue his initial decision before the end of the year, allowing the parties to obtain a decision on the merits within a matter of months. Thus, the **[**74]** harm to the Defendants from a preliminary injunction is lower than in the typical case, in which the administrative process would not yet have begun.

The equities weigh in favor of granting the Commission a preliminary injunction. ***HN28***[] There are strong public interests in ensuring the effective enforcement of antitrust laws and in equipping the FTC with the ability to order appropriate remedies. These interests cannot be overcome by the private equities proffered by the Defendants.

IV. CONCLUSION

The Commission has successfully shown that, in evaluating the proposed merger between Tronox and Cristal, the relevant antitrust market comprises sales of chloride-process titanium dioxide in the United States and Canada. It has raised serious, substantial, and difficult questions about the merger's possible anticompetitive effects. It has presented credible evidence that the merger will create a highly concentrated market in which producers face greater incentives to engage in strategic output withholding. Because of these showings, and because the equities favor injunctive **[*220]** relief, the Court will grant the FTC's Motion for Preliminary Injunction. A separate order will issue.

Dated: September 12, 2018 **[**75]**

/s/ Trevor N. McFadden

TREVOR N. MCFADDEN, U.S.D.J.

ORDER

Upon consideration of the Plaintiff's Motion for Preliminary Injunction, the pleadings, relevant law, evidence, administrative record, and related legal memoranda and oral arguments in opposition and in support, for the reasons set forth in the accompanying Memorandum Opinion, the Court finds as follows:

1. The Court has jurisdiction over the parties and subject matter of this case, and venue and service of process are proper;
2. The Commission has made a sufficient showing of its likelihood of success on the merits to warrant preliminarily enjoining the proposed merger between the Defendants; and
3. Weighing the equities, issuing an injunction is in the public interest. Therefore, it is hereby

ORDERED that the Plaintiff's Motion for Preliminary Injunction is GRANTED; and it is further

ORDERED that the Defendants are hereby enjoined, pursuant to *Section 13(b) of the Federal Trade Commission Act, 15 U.S.C. §53(b)*, from consummating the proposed merger, or otherwise effecting any combination of Tronox Limited and the National Titanium Dioxide Company Limited, the National Industrialization Company, or Cristal USA, Incorporated, until the Commission's administrative **[**76]** complaint is dismissed by the Commission, set aside by an appeals court on review, or the Commission has issued a final order pursuant to *15 U.S.C. §45*; and it is further

ORDERED that the Defendants shall take all necessary steps to prevent any of their officers, directors, domestic or foreign agents, divisions, subsidiaries, affiliates, partnerships, or joint ventures from consummating, directly or indirectly, any such merger, or otherwise effecting any combination between the Defendants; and it is further

ORDERED that the Defendants shall maintain the status quo until a further order from this Court, or until the Commission's administrative complaint is dismissed by the Commission, set aside by an appeals court on review, or the Commission has issued a final order pursuant to *15 U.S.C. §45*.

The Memorandum Opinion has been docketed under seal at this time due to the amount of sealed information it contains. The Court will issue a separate, redacted version of the Memorandum Opinion on the public docket shortly.

SO ORDERED.

This is a final, appealable Order.

Dated: September 5, 2018

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Judgments > Pretrial Judgments > Judgment on Pleadings

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(c) permits a party to dismiss a suit after the pleadings are closed but early enough not to delay trial. A Rule 12(c) motion for judgment on the pleadings is treated like a motion to dismiss under Rule 12(b)(6). Under either rule, the court must accept all well-pleaded factual allegations in the complaint as true and draw all reasonable inferences in favor of the nonmoving party. For a complaint to survive dismissal, it must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. As such, a complaint should not be dismissed unless it appears beyond doubt that the facts alleged in the complaint, even if true, fail to support the claim.

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction

HN2[] **Jurisdiction & Review, Subject Matter Jurisdiction**

Federal patent law preempts state law claims to the extent that state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress in enacting the patent laws. Notably, district courts shall have original jurisdiction of any civil action arising under any Act of Congress relating to patents, plant variety protection, copyrights and trademarks. No state court shall have jurisdiction over any claim for relief arising under any Act of Congress relating to patents, plant variety protection, or copyrights. *28 U.S.C.S. § 1338(a)*. Under *§ 1338(a)*, then, jurisdiction extends only to those cases in which a well-pleaded complaint establishes either that federal patent law creates the cause of action or that the plaintiff's right to relief necessarily depends on resolution of a substantial question of federal patent law, in that patent law is a necessary element of one of the well-pleaded claims. As such, the court is tasked with determining whether the plaintiff's claims "arise under" patent law. If on the face of a well-pleaded complaint there are reasons completely unrelated to the provisions and purposes of the patent laws why the plaintiff may or may not be entitled to the relief it seeks, then the claims do not "arise under" patent law.

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction

HN3[] **Jurisdiction & Review, Subject Matter Jurisdiction**

Although a resolution of a substantial question of federal patent law is necessary for a fraudulent patent claim, that alone is not sufficient to establish that the United States Court of Appeals for the Federal Circuit has jurisdiction. Unless every theory of the claim requires resolution of a substantial question of federal law, it does not "arise under" federal patent law. The United States Court of Appeals for the Third Circuit interpreted "arises under" to mean that every theory of the claim requires the resolution of a substantial question of federal law, if it does not, federal patent law will not preempt.

Patent Law > Remedies

HN4[] **Patent Law, Remedies**

Federal patent law does not preempt a state law claim in which a patent law issue is implicated if the state law cause of action (i) includes additional elements not found in the federal patent law cause of action and (ii) is not an impermissible attempt to offer patent-like protection to subject matter addressed by federal law.

Patent Law > Remedies

HN5[] **Patent Law, Remedies**

There are three objectives for patent law: (1) to provide an incentive to invent; (2) to promote the full disclosure of inventions; and (3) to ensure that which is in the public domain cannot be removed therefrom by action of the states. When the state law cause of action includes additional elements not found in the federal patent law and state law is not an obstacle to the objectives of federal patent law, it is not preempted even if patent law is implicated.

Patent Law > Remedies

HN6[] **Patent Law, Remedies**

Even if a state court must adjudicate a question of federal patent law, it is not preempted if it includes additional elements not part of a federal cause of action.

Governments > Legislation > Statute of Limitations > Time Limitations

HN7[] **Statute of Limitations, Time Limitations**

Under the continuing-violation doctrine, when a defendant's conduct is part of a continuing practice, an action is timely so long as the last act evidencing the continuing practice falls within the limitations period.

Antitrust & Trade Law > Procedural Matters

Governments > Legislation > Statute of Limitations > Time Limitations

HN8[] **Antitrust & Trade Law, Procedural Matters**

Antitrust law provides that, in the case of a "continuing violation," say a price fixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, each overt act that is part of the violation and that injures the plaintiff, e.g., each sale to the plaintiff, starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times. As such, to the extent plaintiffs continue to purchase a good at a supracompetitive price, it constitutes a continuing violation. In fact, almost every court to have considered this issue in the pay-for-delay context has held that a new cause of action accrues to purchasers upon each overpriced sale of the drug.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN9[] **Deceptive & Unfair Trade Practices, State Regulation**

The statutory notice requirement of *Mass. Gen. Laws ch. 93A, § 9(3)* is not merely a procedural nicety, but, rather, a prerequisite to suit.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN10[] **Deceptive & Unfair Trade Practices, State Regulation**

The West Virginia Consumer Credit Protection Act provides consumers who are victims to unfair, deceptive, and fraudulent business practices with a cause of action. *W. Va. Code § 46A-6-106(a)*. However, prior to initiating suit, a consumer must first inform the seller, in writing, of the alleged violation. *§ 46A-6-106(b)*. Courts have interpreted this statute as a mandatory prerequisite to commencing a consumer protection claim under the act.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN11[] **Deceptive & Unfair Trade Practices, State Regulation**

While Maine's Unfair Trade Practices Act does include a pre-filing notice provision, the Maine Supreme Court has held that the notice requirements of *Me. Rev. Stat. Ann. tit. 5, § 213(1-A)* are not jurisdictional. Therefore, courts have permitted plaintiffs to maintain their Maine Unfair Trade Practices Act claims, despite failing to send an adequate pre-litigation demand letter.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN12[] **Federal & State Interrelationships, Erie Doctrine**

Federal courts sitting in diversity jurisdiction must utilize federal procedural law and state substantive law. However, there is no bright line between procedural and substantive law and, thus, the distinction is difficult to determine, especially since these two categories are not mutually exclusive.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN13[] **Federal & State Interrelationships, Erie Doctrine**

In interpreting Erie, the United States Supreme Court explained that a federal law will only be procedural and, thus, applicable, if the case's outcome would be the same in both federal and state courts. This is consistent with Erie's twin aims to avoid forum shopping and the inequitable administration of law. The Supreme Court further elaborated that before a court can consider Erie's outcome determinative test, it must first determine whether there is a direct conflict between the federal and state laws in question. If there is a conflict, the federal law must be used, unless it is deemed unconstitutional or outside the scope of the Rules Enabling Act, *28 U.S.C.S. § 2072(b)*, which prohibits the use of federal laws if they abridge, enlarge, or modify any state substantive right. If there is not a conflict, the outcome determinative test is utilized to determine the whether to apply state or federal law. This test has been refined as an inquiry into whether the scope of the federal rule is sufficiently broad to control the issue before the court. Only if the federal law is sufficiently broad, will the court then continue with the Hanna analysis.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN14[] **Federal & State Interrelationships, Erie Doctrine**

Courts presented with the issue of whether state laws are procedural or substantive have framed the inquiry as whether the state statute provides a procedure that is so bound up with the state-created right or remedy that it defines the scope of that substantive right or remedy. If the answer is in the affirmative, the federal rule must yield to the state law, since it would effectively abridge, enlarge, or modify a state-created right or remedy.

Civil Procedure > Special Proceedings > Class Actions

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN15[] **Special Proceedings, Class Actions**

U.S. Const. art. III standing is a threshold inquiry in every case and one in which the party invoking federal jurisdiction bears the burden of proof. To establish Article III standing, a plaintiff must demonstrate: (1) an injury in fact, (2) a sufficient causal connection between the injury and the conduct complained of, and (3) a likelihood that the injury will be redressed by a favorable decision. In a putative class action, standing must be analyzed on a claim-by claim basis, with the plaintiff bearing the burden of demonstrating standing for each claim he seeks to prove, the court does not exercise jurisdiction over one claim simply because it arose from the same nucleus of operative fact as another claim.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Governments > Legislation > Effect & Operation > Prospective Operation

Governments > Legislation > Effect & Operation > Retrospective Operation

HN16[] **Deceptive & Unfair Trade Practices, State Regulation**

Under Rhode Island law, statutes cannot be applied retroactively, unless clearly stated. The Rhode Island Supreme Court has held that statutes and their amendments are construed to operate prospectively unless a specific contrary intent is expressed by the legislature, or retroactivity must necessarily be inferred from the language employed by the law makers. Additionally, courts have consistently held that *R.I. Gen. Laws § 6-36-7(d)* applies prospectively.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN17[] **Deceptive & Unfair Trade Practices, State Regulation**

The majority of courts that have been presented with *Utah Code Ann. § 76-10-3109(1)(a)* require that at least one Utah citizen or resident be a named plaintiff.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN18[] **Deceptive & Unfair Trade Practices, State Regulation**

The Kansas Monopolies and Unfair Trade Act proscribes all arrangements, contracts, agreements, trusts, or combinations between persons made with a view or which tend to prevent full and free competition and those designed or which tend to advance, reduce or control the price or the cost to the producer or to the consumer of any such products or articles. *Kan. Stat. Ann. § 50-112*. The Act defines a "trust" as a "combination of capital, skill, or acts, by two or more persons" and prohibits conspiracy or combination with any other persons for the purpose of monopolizing any line of business. *Kan. Stat. Ann. §§ 50-101*, *50-132*. While there is scant case law interpreting the Kansas Monopolies and Unfair Trade Act, the Kansas Court of Appeals has held that since the act emphasizes agreements between two or more individuals, the legislature intended for the Act to require more than unilateral conduct.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN19[] **Deceptive & Unfair Trade Practices, State Regulation**

In New York, an antitrust claim under the Donnelly Act must allege both concerted action by two or more entities and a consequent restraint of trade within an identified relevant product market. However, the United States District Court for the Northern District of New York has held that allegations of monopolistic activities, based on conspiring with other individuals, suffices to state a claim under the Donnelly Act.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN20[] **Deceptive & Unfair Trade Practices, State Regulation**

The Tennessee Trade Practices Act proscribes all arrangements, contracts, agreements, trusts, or combinations between persons or corporations made with a view to lessen, or which tend to lessen, full and free competition and all arrangements, contracts, agreements, trusts, or combinations between persons or corporations designed, or which tend, to advance, reduce, or control the price or the cost to the producer or the consumer. *Tenn. Code Ann. § 47-25-101*. Despite limited case law interpreting the statute, several district courts have held that the absence of an arrangement or conspiracy between two actors is a bar to a claim under the Tennessee statute.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN21[] **Deceptive & Unfair Trade Practices, State Regulation**

The case law as well as the plain language of the Kansas, New York, and Tennessee antitrust statutes require concerted action between two parties.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN22[] **Deceptive & Unfair Trade Practices, State Regulation**

The Unfair Competition Law proscribes any unlawful, unfair or fraudulent business act or practice. *Cal. Bus. & Prof Code § 17200*. As such, courts have understood *§ 17200* to provide relief for three varieties of unfair competition: practices which are unlawful, unfair, or fraudulent. However, reliance is only required when an Unfair Competition Law claim is premised on allegations that the defendants engaged in fraudulent business practices.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN23[] **Deceptive & Unfair Trade Practices, State Regulation**

The Illinois state legislature did not intend for the Illinois Consumer Fraud and Deceptive Business Practices Act to serve as an additional antitrust enforcement mechanism. As such, if the plaintiff fails to plead an antitrust claim under the Illinois Antitrust Act, those same allegations of anticompetitive conduct cannot give rise to a claim under the Illinois Consumer Fraud and Deceptive Business Practices Act.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN24[] **Deceptive & Unfair Trade Practices, State Regulation**

Plaintiffs may not assert what are essentially antitrust claims in the guise of a claim under the Illinois Consumer Protection Act.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN25[] **Deceptive & Unfair Trade Practices, State Regulation**

The Maine Unfair Trade Practices Act proscribes unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce. *Me. Rev. Stat. tit. 5, § 207*. A business practice is "unfair" if the injury it produces is (1) substantial, (2) not outweighed by any countervailing benefits to consumers or competition that the practice produces, and (3) not reasonably avoidable by consumers. In pricing cases, the allegedly unfair practice must also induce the consumer to acquire something that he or she would not otherwise have purchased.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN26[] **Deceptive & Unfair Trade Practices, State Regulation**

Any person who is a victim of a deceptive trade practice as defined in the Nevada Deceptive Trade Practices Act may bring an action thereunder. *Nev. Rev. Stat. § 41.600*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN27[] **Deceptive & Unfair Trade Practices, State Regulation**

Under *Nev. Rev. Stat. § 598.0923(3)*, the Nevada Deceptive Trade Practices Act does not require the plaintiff to plead reliance.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN28[] **Deceptive & Unfair Trade Practices, State Regulation**

Anticompetitive conduct is considered prohibited acts under *Nev. Rev. Stat. § 598A.060(a)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Governments > Legislation > Interpretation

HN29[] **Deceptive & Unfair Trade Practices, State Regulation**

The New Mexico Unfair Practices Act prohibits unfair, deceptive, and unconscionable trade practices. N.M. Rev. Stat. § 57-12-2. Given the remedial nature of the act, courts construe its provisions broadly to facilitate this purpose.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN30[] **Deceptive & Unfair Trade Practices, State Regulation**

Federal courts generally permit New Mexico Unfair Practices Act actions in price-fixing cases provided that the plaintiff alleges a gross disparity between the price paid for a product and the value received.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN31[] **Deceptive & Unfair Trade Practices, State Regulation**

N.Y. Gen. Bus. Law § 349 is directed at wrongs against the consuming public. In order to state a claim under *§ 349*, the plaintiff must prove three elements: (1) the challenged act or practice was consumer-oriented; (2) it was misleading in a material way; and (3) the plaintiff suffered injury as a result of the deceptive act. To satisfy the consumer-oriented prong, plaintiffs need only allege consumer-oriented conduct that implicates the public interest in New York.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices

HN32[] Consumer Protection, Deceptive & Unfair Trade Practices

Courts routinely treat antitrust violations as deceptive acts.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN33[] Deceptive & Unfair Trade Practices, State Regulation

N.C. Gen. Stat. §§ 75-1.1, part of the North Carolina Unfair and Deceptive Trade Practices Act, proscribes unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce and provides any person or business of any person, firm or corporation the right to sue for injuries arising from unfair business practices *N.C. Gen. Stat. §§ 75-1.1*; 75-1.16. Federal courts interpreting the North Carolina Unfair and Deceptive Trade Practices Act have allowed claims asserted by businesses against one another as long as the challenged practices affect commerce or the marketplace.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN34[] Deceptive & Unfair Trade Practices, State Regulation

The Rhode Island Unfair Trade Practices and Consumer Protection Act proscribes unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce. *R.I. Gen. Laws § 6-13.1-2*. The act goes on to list twenty acts or practices that are considered unfair or deceptive competition. *R.I. Gen. Laws § 6-13.1-1(6)(i)-(xx)*. In determining whether a practice is "unfair" under the act, courts must consider: (1) whether the practice affronts public policy, as delineated by the common law, statutes, and other established concepts of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; and (3) whether it causes substantial injury to consumers (or competitors or other businessmen). The majority of courts that have been presented with this issue have held that the three-prong Ames standard encompasses price-fixing injuries, and therefore consumers subject to collusive pricing possess a cognizable claim under the act.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN35[] Deceptive & Unfair Trade Practices, State Regulation

The Rhode Island Unfair Trade Practices and Consumer Protection Act limits claims to any person who purchases or leases goods or services primarily for personal, family, or household purposes. *R.I. Gen. Laws § 6-13.1-5.2(a)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN36[] Deceptive & Unfair Trade Practices, State Regulation

The Rhode Island Supreme Court has construed the Rhode Island Unfair Trade Practices and Consumer Protection Act to require that only natural persons are permitted to bring private rights of actions under the statute. However, there may be unusual circumstances under which a business entity may be able to allege that its purchases were primarily for personal, family or household purposes.

Opinion by: PETER G. SHERIDAN

Opinion

[*374] MEMORANDUM AND ORDER

SHERIDAN, U.S.D.J.

Presently before the Court is Defendants Wyeth Inc., Wyeth Manufacturing Limited, Wyeth Ireland Pharmaceutical Products (collectively, "Wyeth"), Teva Pharmaceuticals USA, Inc. and Teva Pharmaceuticals Industries Limited's (collectively, "Teva") Motion for Judgment on the Pleadings pursuant *Federal Rule of Civil Procedure 12(c)*, regarding End-Payer Plaintiffs' Third Amended Consolidated Complaint. (ECF No. 165). **[**4]** [1] This case arises from allegations that two drug companies, Wyeth and Teva, engaged in an anticompetitive scheme that prevented the generic drug of Effexor XR from entering the market. Plaintiffs are end-payor purchasers (hereinafter "EPP") who claim to have paid inflated costs for the brand-named drug, Effexor XR, due to, among other things, a delayed entry provision included in Wyeth and Teva's settlement agreement. Unlike the Direct Purchaser Plaintiffs, who assert claims under the *Sherman Act*, the EPPs base their claims on their respective state's antitrust and consumer protection acts.

BACKGROUND

I. Parties

Plaintiffs are a collection of organizations including insurance carriers, Taft-Hartley funds, municipalities, and individuals, who have been indirectly affected by Defendants' alleged schemes. For example, jointly administered Taft-Hartley fund and employee welfare benefit plaintiffs include: A.F.L.-A.G.C. Building Trades Welfare Plan and IBEW-NECA 505 Health & Welfare Plan, both of which are self-insured health and welfare benefit plans in Alabama and Florida, and Alabama, respectively (*Id.* at ¶¶ 20-21); Painters District Council No. 30 Health and Welfare Fund, a self-insured **[**5]** health and welfare benefit plan located in Illinois (*Id.* at ¶ 24); New Mexico United Food and Commercial Workers Union's and Employers' Health and Welfare Trust Fund and Plumbers and Pipefitters Local 572 Health and Welfare Fund, Taft-Hartley funds from New Mexico and Tennessee, respectively (*Id.* at ¶¶ 23, 25); Sergeants Benevolent Association Health and Welfare Fund, a New York health and welfare fund (*Id.* at ¶ 27). Health insurance carrier plaintiffs include Louisiana Health Services Indemnity Company d/b/a Bluecross/Blueshield of Louisiana, a corporation licensed to conduct business in Louisiana that provides health benefits to covered members. (*Id.* at ¶ 22). Municipality plaintiffs include the **[*375]** City of Providence, Rhode Island, a municipal corporation that operates a self-insured health and welfare benefit plan. (*Id.* at ¶ 26). Finally, there is one named individual Plaintiff, Patricia Sutter, who is a Maine citizen. (*Id.* at ¶ 28). All Plaintiffs purchased, paid, and/or provided reimbursement for Effexor XR or its generic equivalent. (*Id.* at ¶¶ 20-28). Plaintiffs contend that they were all injured as a result of Defendants' anticompetitive schemes, since they paid a premium for **[**6]** the medication. (*Id.*).

Defendants in this case are Wyeth and Teva. (*Id.* at ¶¶ 29-38). Wyeth Inc., Wyeth Pharmaceuticals, Inc., Wyeth-Whitehall, and Wyeth Pharmaceuticals Company are referred to collectively as Wyeth. (*Id.* at ¶ 33). Wyeth is a wholly owned subsidiary of Pfizer with its principal place of business in New Jersey. (*Id.* at ¶ 29). Wyeth wholly owns Wyeth Pharmaceuticals, Inc., which is located in Pennsylvania. (*Id.* at ¶ 30). Wyeth-Whitehall Pharmaceuticals and Wyeth Pharmaceuticals Company are Puerto Rican corporations that are subsidiaries of Wyeth. (*Id.* at ¶¶ 31-32). The Complaint also identifies "Wyeth applicants," who are inventors and prosecuting

[1] Initially, Defendants also sought dismissal of opt-out indirect purchaser plaintiffs' complaint. However, being that both opt-out plaintiffs have since voluntarily dismissed their actions, these arguments are not considered. *See* Docket No. 1 l-cv-5590 (ECF Nos. 148, 158).

attorneys that were responsible for purportedly fraudulently obtaining patents. (*Id.* at ¶ 34). Teva Pharmaceutical Industries Limited and Teva Pharmaceuticals USA, Inc. are referred to collectively as Teva. (*Id.* at ¶ 37). Teva Limited is an Israeli corporation that develops, manufactures, markets, and distributes pharmaceutical goods. (*Id.* at ¶ 36). Teva USA is a wholly owned subsidiary of Teva Limited that is located in Pennsylvania, which focuses its efforts primarily on the generic pharmaceuticals business. (*Id.*).

II. Facts [7]**

In the Complaint, EPPs identify several anticompetitive schemes that purportedly give rise to the present lawsuit. Specifically, Plaintiffs allege that Defendants fraudulently obtained three separate, but related patents, from the United States Patent and Trademark Office (PTO); listed these patents in the book of Approved Drug Products with Therapeutic Equivalence Evaluations (the "Orange Book"); engaged in sham litigation relating to these patents; entered into an unlawful reverse payment agreement with Teva; and manipulated the 180 day first-to-file period[2] to sustain Wyeth's and Teva's exclusivity and collectively prevent other generic companies from entering the market. The Court discusses each allegation in turn.

1. Walker Process and Fraudulent Procurement

EPPs first present a *Walker Process*[3] claim against Wyeth, based on Wyeth's fraudulent procurement and enforcement of three separate patents. By way of background, in 1985, Wyeth -- then operating as American Home Products -- acquired a patent for the compound venlafaxine hydrochloride (venlafaxine), commonly referred to as the Husbands patent. (*Id.* at ¶ 70). Five years later, December 1993, Wyeth received FDA approval of its New **[**8]** Drug Application for Effexor, an antidepressant drug whose active pharmaceutical ingredient is venlafaxine. (*Id.* at ¶ 71). This initial patent was for an "instant release" formulation; that is, the tablet "dissolves rapidly, resulting in a rapid increase in blood plasma levels of venlafaxine shortly after administration." (*Id.*). According to the Complaint, the Husbands patent protected any type of venlafaxine-based product **[*376]** that Wyeth created from generic competition before June 13, 2008.[4] (*Id.* at ¶ 72). As such, Wyeth had market exclusivity for venlafaxine products for 14 1/2 years. (*Id.* at ¶ 73).

However, Effexor's instant release formulation had several significant drawbacks. First, the spike of venlafaxine into the patient's blood plasma levels could cause nausea and vomiting. (*Id.* at ¶ 75). Second, because the drug was rapidly absorbed into the body, patients were required to take the medication several times a day. (*Id.*). In response, Wyeth sought to develop an extended release formulation of Effexor to address these drawbacks. (*Id.*). According to the Complaint, "[b]y the early 1990s, methods for achieving sustained or extended release of the active ingredient in pharmaceuticals **[**9]** were well known in the drug industry." (*Id.* at ¶ 77). To create an extended release form of venlafaxine, Wyeth took two approaches: (1) they worked in-house and (2) entered into a business venture agreement with ALZA Corporation, a pharmaceutical formulation company that specialized in extended release technology. (*Id. at 179*).

Wyeth's in-house development team used a coated spheroid approach to create its extended release version of Effexor, which had been previously utilized in another patented drug, Inderal LA. (*Id.* at ¶ 80). The coated spheroid approach used in Inderal LA was previously patented in the late 1970s and received Patent No. 7,138,475 ('475 Patent). (*Id.* at ¶ 82). As a result, Plaintiffs contend that Wyeth's approach to extending the release of Effexor was

---

[2] *21 U.S.C. § 355(j)(5)(B)(iv)*.

[3] *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*.

[4] According to the Complaint, "[t]he patent would have expired much earlier than 2008, but Wyeth received a significant extension to reflect the time it took the FDA to approve its NDA for Effexor." (*Id.*).

already considered a prior art, despite their subsequent effort to seek additional patent protections of the same. (*Id.* at ¶ 82).

Meanwhile, ALZA used its osmotic-controlled release oral delivery system (hereinafter, "OROS") to create an extended release version of Effexor. (*Id.* at ¶¶ 86-88). As such, by 1993, Wyeth had two formulations of extended release venlafaxine and ultimately chose to focus on developing its own encapsulated spheroid version of Effexor. **[**10]** (*Id.* at ¶¶ 89-90). According to the Complaint, clinical studies "failed to establish any statistically significant improvement of the extended release over the instant release with respect to side effects such as nausea." (*Id.* at ¶ 90). As such, Plaintiffs aver that "Wyeth could not truthfully claim there was any valid scientific basis for claiming that the extended release version reduced side effects when compared to the instant release." (*Id.*).

In any event, in June 1993, Wyeth made its first attempt to receive additional patent protections for venlafaxine. (*Id.* at 191). The 1993 application sought a method-of-use patent for using venlafaxine for various medical conditions, including obesity, anxiety, and post-traumatic stress disorder, just to name a few. (*Id.*). However, this application did not specify any particular venlafaxine formulation and was later abandoned. (*Id.* at ¶¶ 91-92). Less than two years later, January 1995, Wyeth sought another method-of-use patent for using venlafaxine to treat hypothalamic menopause in non-depressed women. (*Id.* at ¶ 94). Again, they did not identify a particular formulation for approval, but did mention a sustained release composition. (*Id.* at ¶¶ 94-95). **[**11]** The following year, April 1996, Wyeth received FDA approval of this composition and Patent No. 5,506,270 ('270 Patent). (*Id.*).

[*377] As previously mentioned, ALZA had also developed an extended release formulation for venlafaxine, using its OROS technology; as such, in May 1993, ALZA also sought to secure patent protection for its formulation, which received FDA approval in August 2002 as Patent No. 6,440,457. (*Id.* at ¶ 96). In addition, the World Intellectual Property Organization published a patent application ('589 PCT application) that was assigned to ALZA in 1994, which claims priority to ALZA's patent application. (*Id.* at ¶ 97). The '589 patent specifies the extended release osmotic formulation that ALZA developed and explained that an extended release formulation in general reduces negative side effects because these side effects result from spikes in blood plasma levels that occur when taking medication multiple times a day. (*Id.* at ¶¶ 98, 101).

According to the Complaint, beginning in 1996, Wyeth made several attempts to receive additional patent protections for Effexor XR. (*Id.* at ¶ 103). By this time, Wyeth had already obtained a method-of-use patent for using venlafaxine to treat hypothalamic menopause in non-depressed women and ALZA's '589 patent had **[**12]** been published. (*Id.*). This being said, according to the Complaint, "Wyeth submitted six sequential applications that led to three patents, the '171, '958, and '120 patents, each of which contained ostensibly independent method-of-use claims." (*Id.* at ¶ 104). Plaintiffs aver that Wyeth defrauded the PTO in obtaining these patents and, as a result, prevented generic extended release venlafaxine formulations from entering the market until June 2008. (*Id.*).

In March 1996, Wyeth applied for a provisional utility patent[5] ('006 application) for extended release venlafaxine. The '006 application described the proposed patent as "an extended release (ER), encapsulated formulation containing venlafaxine hydrochloride." (*Id.* at ¶ 120). According to Plaintiffs, the phrase "encapsulated extended release formulation" had two very distinct interpretations. One interpretation could indicate that '006 application concerned the coated spheroid formulation that Wyeth had previously developed, which would limit the patent protection to only this specific formulation design — thereby enabling competing companies to enter the market utilizing a different design that would not violate Wyeth's patent. (*Id.* at ¶ 123). (*Id.*). Alternatively, **[**13]** the phrase could be understood to encompass every formulation of venlafaxine; however, such an overly broad interpretation would render the patent invalid and unenforceable, since it was already disclosed in the '270 Patent and the '589 application submitted by ALZA. (*Id.* at ¶ 124).

---

[5] A utility patent application seeks to protect a new, useful, or nonobvious process or composition and a provisional application only requires a brief written description of the subject matter that is sought to be protected. Essentially, a provisional application "allows an inventor to establish a date of invention one full year before the inventor actually submits evidence of [the] invention's patentability." (*Id.* at ¶ 108).

The following year, March 1997, Wyeth filed a non-provisional application (the '137 application) that was almost identical to the '006 application. (*Id.* at ¶ 108). In its application, Wyeth did not disclose the existence of the '270 Patent or the '589 PCT Application. (*Id.*). However, the PTO Examiner discovered both and informed Wyeth that its claims about nausea and the spikes in blood plasma were not patentable as independent claims. (*Id.* at ¶ 136). Moreover, the Examiner noted that the '137 application could only be enforceable if Wyeth narrowed the description of the invention to the specific formulation **[*378]** that it created. (*Id.*). Eventually, Wyeth abandoned the '137 application and, in November 1997, filed a continuation-in-part application (the '328 application), which included additional information not mentioned in the '006 and '137 applications. (*Id.* at ¶¶ 109-10). Plaintiffs contend the '328 application was identical **[**14]** to the '137 application; however, despite having an obligation to disclose the claims that were previously rejected, Wyeth failed to do so in hopes that another PTO Examiner would overlook the ambiguous language. (*Id.* at ¶¶ 143, 147). This being said, Wyeth eventually abandoned this application as well. (*Id.* at ¶ 152).

Shortly after abandoning the '328 application, Wyeth filed another continuation-in-part application (the '629 application), which claimed priority over all three previous applications. (*Id.* at ¶ 111). The '629 application eventually led to the issuance of Patent No. 6,274,171 (the '171 Patent) in August 2001. (*Id.* at ¶ 112). The '171 Patent was comprised of 25 claims, which included the extended release encapsulated spheroid version of venlafaxine. (*Id.* at ¶ 112). It also claimed to reduce the drug's concentration in patient's blood plasma and incidents of nausea and vomiting. (*Id.*). Again, Plaintiffs contend Defendants did not disclose the rejection of the similar claims in the '137 application examined by the PTO Examiner. (*Id.* at ¶ 157). By failing to disclose the PTO's prior rejection and explain the meaning of the '270 Patent, Plaintiffs aver that Wyeth committed fraud on the PTO in obtaining the '171 Patent. (*Id.* at ¶¶ 157-58).

Two **[**15]** months before the '171 Patent was issued, Wyeth filed a divisional application in June 2001 (the '412 application), which sought another method-of-use patent based on reducing incidents of nausea and vomiting, the drug's concentrations in the patient's blood plasma, and daily drug use. (*Id.* at ¶ 165). According to Plaintiffs, "[t]he specifications and claims of the '412 application were identical to those in the '629 application." (*Id.* ¶ 161). However, unlike the other applications, the '412 referred to the formulation as "an extended release formulation" rather than "an encapsulated extended release formulation" as in the previous applications. (*Id.* at ¶¶ 161-62). Defendants again did not disclose that the '270 Patent "identified the existence of an extended release formulation of venlafaxine hydrochloride that rendered their method-of-use claims unpatentable." (*Id.* at ¶ 162). By failing to provide this information to the PTO Examiner, the '412 application eventually resulted in the issuance of the Patent No. 6,419,958 (the '958 Patent) in July 2002. (*Id.* at ¶ 164). However, as noted above, the '270 Patent previously procured included a once a day venlafaxine formulation that spread its dosage over time, so Wyeth filed a provisional application, including **[**16]** claims for nausea and vomiting, to avoid being precluded by the '270 Patent. (*Id.* at If 117-18).

Finally, in September 2001, Wyeth filed the '965 application, another continuation in part application, that contained similar claims as the '412 application. (*Id.* at ¶ 166-67). By not disclosing the rejection of the prior applications, the '965 application resulted in the issuance of Patent No. 6,403,120 in June 2002 (the '120 Patent). (*Id.* at ¶ 170).

According to the Complaint, "Wyeth's repeated pattern of nondisclosure and withholding highly material information in serial patent applications for virtually identical claims" evinces its intent to deceive the PTO. (*Id.* at ¶ 184). As such, "[b]ut for this fraud on the PTO," Plaintiffs aver that the '171, '120, and '958 Patents would never have been issued. (*Id.* at If 185).

[*379] *2. Wrongful Orange Book Listing and Sham Litigation*

After procuring the '171, '120, and '958 Patents, Wyeth then listed all three in the Orange Book; all three patents expired on March 20, 2017. (*Id.* at ¶¶ 14, 112, 114 116). Thereafter, Plaintiffs claim that Wyeth engaged in sham litigation against seventeen generic manufacturers. (*Id.* at ¶ 262). Plaintiffs claim that at least seventeen generic manufacturers sent Wyeth certifications informing it that they **[**17]** intended to manufacture generic versions of Effexor XR, which would not infringe Wyeth's patents. (*Id.* at ¶ 265). In response, Wyeth sued each generic for infringing on the '171, '120, and '958 Patents. (*Id.* at ¶ 266). According to the Complaint, Wyeth was aware that its method-of-use patents were invalid or unenforceable; yet, nevertheless chose to seek its enforceability against generic manufacturers. (*Id.* at 11267). The purposes of these "sham patent suits was to prevent, delay, and/or minimize the success of the entry of generic competitors, which would have sold generic equivalents of Effexor XR in the United States at prices significantly below Wyeth's prices ... and therefore would have taken most of Wyeth's market share." (*Id.* at ¶ 270). As such, by blocking the market entry of generic Effexor XR, Wyeth prevented the average market price of its brand name drug from declining dramatically. (*Id.*).

3. Reverse Settlement Allegations

Finally, Plaintiffs challenge the validity of a reverse settlement agreement made between Wyeth and Teva, after Wyeth initially sued Teva for patent infringement of its three patents. (*Id.* at ¶¶ 272-304). On March 24, 2003, Wyeth sued Teva for infringing on its '171, '120, and '958 patent in the District **[**18]** of New Jersey. (*Id.* at ¶ 275). One of the key issues before the court was whether the term "extended release formulation" was to be construed broadly or limited to the spheroid formulation developed by Wyeth, which — as discussed above — would enable generic manufactures to design a different formulation that would not infringe on Wyeth's patents. (*Id.* at '11276). At the *Markman* hearing, the court ultimately interpreted the phrase to mean the latter, explaining that "one of ordinary skill in the art would construe [extended release formulation] to include specific ingredients." (*Id.*). According to the Complaint, such a finding was fatal to Wyeth's case; as such, Wyeth sought to settle the matter with Teva and, as a result, avoid other generic companies challenging Wyeth's patent. (*Id.*).

On November 2, 2005, the two signed a joint settlement and release agreement. (*Id.* at ¶ 279). As part of the settlement, the parties agreed that the district court's prior *Markman* ruling would be vacated, thereby requiring other generic companies to relitigate the "extended release formulation" issue that the court had previously found in Teva's favor. (*Id.* at ¶ 280). As it pertained to instant release **[**19]** Effexor, Wyeth allowed Teva to sell its generic version prior to the expiration of the patent in June 2008; in addition, Wyeth agreed not to compete with Teva by releasing its own authorized generic during that same period. (*Id.* at ¶ 281). As a result, Teva had at least a year and a half market exclusivity of generic instant release Effexor. (*Id.* at ¶ 283). The agreement also included a delayed entry provision, wherein Teva agreed to delay market entry for its generic extended release Effexor until as late as July 2010. (*Id.* at ¶ 284). In return, "Wyeth promised Teva that Wyeth would not market an authorized generic version of extended release venlafaxine during at least Teva's six-month 'exclusivity' and possibly longer." (*Id.*). According to the Complaint, by effectively **[*380]** blocking any other competing generic manufactures from entering the market, "the Wyeth-Teva agreement worked a huge, and devastating, impact on competition in the market for extended release venlafaxine." (*Id.* at ¶ 286).

Plaintiffs bring this case on behalf of themselves and all End-Payor class members to recover damages, calculated by the increased price they had to pay due to Wyeth's conduct in delaying the market **[**20]** entry of generic Effexor XR. (*Id.* at ¶ 411). The class contains individuals or entities who purchased or paid for Effexor XR and/or its generic version for consumption by themselves, their families, or members, employees, insureds, participants, or beneficiaries in Arizona, California, Florida, Illinois, Kansas, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Montana, Nevada, New Hampshire, New Mexico, New York, North Carolina, Oregon, Rhode Island, South Dakota, Tennessee, Utah, West Virginia, Wisconsin, and the District of Columbia. The Class sues for overage damages occurred from June 14, 2008 until the effects of Defendants' conduct cease. (*Id.*).

The Complaint outlines four different claims for relief in the class action. The first is for monopolization under state law against Wyeth. (*Id.* atilt 421). The conduct giving rise to this claim is the fraudulent obtainment of the '171, '958, and '120 Patents, its listing in the Orange Book, its sham litigation, and the unlawful reverse settlement agreement with Teva. (*Id.* at ¶ 424). The same factual allegations and theories asserted in Count I 'are again alleged in Count II against all Defendants. (*Id.* at ¶ 439). In Count III, Plaintiffs allege conspiracy **[**21]** to restrain of trade against all Defendants. (*Id.* at ¶¶ 448). Finally, Plaintiffs allege a claim unfair or deceptive trade practices against all Defendants. (*Id.* at 11456). Plaintiffs contend that as a result of Wyeth's anticompetitive acts or practices, Plaintiffs and the Class were deprived of the opportunity to obtain a less expensive, generic equivalent to Effexor XR. As such, Plaintiffs seek compensation from Defendants in the form of damages.

LEGAL STANDARD

HN1[] Federal Rule of Civil Procedure 12(c) permits a party to dismiss a suit "[a]fter the pleadings are closed ... but early enough not to delay trial." Fed. R. Civ. P. 12(c). "A Rule 12(c) motion for judgment on the pleadings is treated like a motion to dismiss under Rule 12(b)(6)." Syncsort Inc. v. Sequential Software, Inc., 50 F. Supp. 2d 318, 324 (D.N.J. 1999). Under either rule, the Court must accept all well-pleaded factual allegations in the complaint as true and draw all reasonable inferences in favor of the nonmoving party. *Id.* For a complaint to survive dismissal, it "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" Wireless Media Innovations, LLC v. Maher Terminals, LLC, 100 F. Supp. 3d 405, 407 (D.N.J. 2015) (quoting Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)). As such, "[a] complaint should not be dismissed unless it appears beyond doubt that 'the facts alleged in the complaint, even if true, fail to support the claim.'" Syncsort Inc., 50 F. Supp. 2d at 325.

ANALYSIS

Defendants presently challenge **[**22]** EPPs' Complaint on five separate bases. First, Defendants contend that EPPs' Complaint should be dismissed in its entirety based on federal preemption principles. Second, Defendants argue that several state law claims are time-barred. Third, Defendants contend that certain states require pre-filing notices, which Plaintiffs failed to comply with, and proscribe class actions **[*381]** under their respective consumer protection statutes. Fourth, Defendants aver that EPPs' state antitrust claims fail because they lack standing and fail to plead a concerted act. Finally, Defendants challenge EPPs' consumer protection claims for failing to comply with various state consumer protection law requirements. The Court addresses each challenge in turn.

I. Federal Law Preemption

Defendants first seek dismissal of Plaintiffs' state law claims in its entirety, since their state law claims are preempted by federal law. Plaintiffs respond, contending that because their claims are based on antitrust and consumer fraud theories, preemption is inapplicable.

HN2[] "Federal patent law preempts state law claims to the extent that state law 'stands as an obstacle to the accomplishment and execution of the full purposes and **[**23]** objectives of Congress' in enacting the patent laws." Wawrzynski v. H.J. Heinz Co., 574 Fed. Appx. 99, 102 (3d Cir. 2014) (quoting Aronson v. Quick Point Pencil Co., 440 U.S. 257, 262, 99 S. Ct. 1096, 59 L. Ed. 2d 296 (1979)). Notably, "district courts shall have original jurisdiction of any civil action arising under any Act of Congress relating to patents, plant variety protection, copyrights and trademarks. No State court shall have jurisdiction over any claim for relief arising under any Act of Congress relating to patents, plant variety protection, or copyrights." 28 U.S.C. § 1338(a). "Under § 1338(a), then, jurisdiction extends 'only to those cases in which a well-pleaded complaint establishes either that federal patent law creates the cause of action or that the plaintiff's right to relief necessarily depends on resolution of a substantial question of federal patent law, in that patent law is a necessary element of one of the well-pleaded claims.'" In re Lipitor Antitrust Litig., 855 F.3d 126, 143 (3d Cir. 2017) (quoting Christianson v. Colt Industr. Operating Corp., 486 U.S. 800, 809, 108 S. Ct. 2166, 100 L. Ed. 2d 811 (1986)). As such, the Court is tasked with determining whether the plaintiff's claims "arise under" patent law. Id. at 144. "[I]f on the face of a well-pleaded complaint there are reasons completely unrelated to the provisions and purposes of the patent laws why the plaintiff may or may not be entitled to the relief it seeks," then the claims do not "arise under" patent law. *Id.* (internal quotation marks and citations omitted). **[**24]**

Defendants present two theories supporting their position that Plaintiffs' state law claims are preempted. First, because Plaintiffs' claims are based on the purportedly fraudulent procurement and enforcement of the '171, '958, and '120 Patents, they must demonstrate that the patent is invalid or unenforceable, which is preempted under federal patent law. Second, to the extent that Plaintiffs' antitrust claims are based on the reverse settlement agreement, they are preempted since they must demonstrate the validity of the generic patents, which necessarily implicates patent law.

1. Fraudulent Patent Procurement and Enforcement

Turning first to Defendants' federal patent preemption argument, Defendants argue that Plaintiffs' state law claims require them to plead and prove that the patent is invalid or unenforceable under federal patent law. According to Defendants, the allegations in Plaintiffs' complaint that trigger federal patent law include: (1) the fraudulent procurement of the '171, '958, and '120 Patents; (2) the fraudulent patent listing of the '171, '958, and '120 Patents in the FDA's Orange Book; and (3) the "sham" litigation against seventeen generic manufacturers, **[*382]** seeking to enforce the '171, '958, and '120 Patents. Defendants contend that these allegations **[**25]** require first knowing whether the patent at issue is invalid or unenforceable. If the patent was valid, then the obtainment and enforcement of same would be lawful. As such, Defendants argue that because federal patent law is necessary to support these theories, they are preempted by federal law.

However, Defendants' arguments are in direct contravention with the Third Circuit's recent holding in *Lipitor, 855 F.3d at 126*. In *Lipitor*, the Third Circuit explicitly held that the present matter does not "arise under" federal patent law. The Third Circuit held that ***HN3***[] although a resolution of a substantial question of federal patent law is necessary for a fraudulent patent claim, that alone is not sufficient to establish that the Federal Circuit has jurisdiction. *Id. at 143*. The court explained that unless every theory of the claim requires resolution of a substantial question of federal law, it does not "arise under" federal patent law and, therefore, the Third Circuit has jurisdiction. *Id.* The court interpreted "arises under" to mean that every theory of the claim requires the resolution of a substantial question of federal law, if it does not, federal patent law will not preempt. *Id.* Here, even if the allegations in the **[**26]** Complaint present substantial questions of patent law, because the antitrust allegations and litigation do not, this case does not arise under federal patent law for purposes of federal patent preemption. *Id.* (quoting *Christianson, 486 U.S. at 812*).

Moreover, ***HN4***[] federal patent law does not preempt a state law claim in which a patent law issue is implicated if "the state law cause of action [i.] includes additional elements not found in the federal patent law cause of action and [ii.] is not an impermissible attempt to offer patent-like protection to subject matter addressed by federal law." *Dow Chem. Co. v. Exxon Corp., 139 F.3d 1470, 1473 (Fed. Cir. 1998)*. In *Dow*, the defendant was issued a patent that disclosed certain wire and cable devices manufactured using a particular insulating polymer. *Id. at 1471*. At about the same time, the plaintiff introduced its own line of polymer products and filed a complaint contending that its polymer did not infringe on the defendants' patent since the defendants' patent was invalid and unenforceable. *Id. at 1471-72*. In addition, the plaintiff asserted a state-law unfair competition claim, alleging that the defendant obtained its patent through inequitable conduct before the PTO. *Id.*

Finding patent preemption inapplicable, the Federal Circuit explained that ***HN5***[] there are **[**27]** three objectives for patent law: (1) to provide an incentive to invent; (2) to promote the full disclosure of inventions; and (3) to ensure "that which is in the public domain cannot be removed therefrom by action of the states." *Id. at 1474* (quoting *Kewanee Oil Co. v. Bicron Corp., 416 U.S. 470, 480-81, 94 S. Ct. 1879, 40 L. Ed. 2d 315 (1974))*. With these objectives in mind, the *Dow* court held that when the state law cause of action includes additional elements not found in the federal patent law and state law is not an obstacle to the objectives of federal patent law, it is not preempted even if patent law is implicated. *Id. at 1473*. As such, the Federal Circuit held that because the state law unfair competition claim included additional elements not found in federal patent law and did not otherwise conflict with the objectives of federal patent law, its claims were not preempted. *Id. at 1478-79*.

Here, as in *Dow*, the EPPs state antitrust and consumer protection claims require proof of elements not found in a patent cause of action. As discussed earlier, the purpose for patent protection is to **[*383]** provide an incentive to invent, to promote the full disclosure of inventions and to ensure "that which is in the public domain cannot be removed therefrom by action of the states." Antitrust and consumer protection law protect **[**28]** consumers from being overcharged for products, which is a wholly different goal than patent law.

This is also consistent with the Court's decision in *In re Thalomid and Revlimid Antitrust Litig., No. 14-6997, 2015 U.S. Dist. LEXIS 177541 (D.N.J. Oct. 29, 2015)*, where the court held that **HN6**[] even if a state court must adjudicate a question of federal patent law, it is not preempted if it includes additional elements not part of a federal cause of action. *Id. at *61-63*. In *Thalomid*, the plaintiffs, who were indirect purchasers, alleged that the defendants created an antitrust scheme by obtaining patents through fraud on the PTO and bringing sham lawsuits to delay generic brands from entering the market. *Id. at *4-5*. As is the case here, the defendants argued that the plaintiffs' antitrust claims should be preempted by federal patent law since they alleged that they obtained the patents through unjust conduct with the PTO. *Id. at *61-62*. Relying on *Dow*, the court held that even if a question of federal patent law must be adjudicated, the state law claim is not preempted, as long as it contains additional elements not part of a federal patent cause of action. *Id.* Finding the allegations were also premised on bad faith in the marketplace (an element not required in patent law) the Court reasoned that federal patent preemption was not warranted. **[**29]**

Here, similar to *Thalomid*, the EPPs allege that the patents were obtained through fraud on the PTO, Wyeth improperly listed the '171, '958, and '120 Patents in the Orange Book, the generic drug was delayed entry because of sham litigation, and a reverse payment settlement agreement was negotiated to prolong a monopoly. As such, because EPPs claims are predicated on claims wholly separate from the federal patent law, they are not preempted.

2. Antitrust Allegations

Defendants next argue that because Plaintiffs' antitrust claims arise from the reverse settlement agreement, it implicates federal patent law and, therefore, must be preempted. Defendants rely principally on the Third Circuit's decision in *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132 (3d Cir. 2017)* for support. In *Wellbutrin*, the Third Circuit held that in order to allege an antitrust injury, based on the reverse settlement agreement between pharmaceutical companies, it is the plaintiffs' burden to demonstrate that "but for" this agreement, the generic drug would have entered the market sooner. *Id. at 164-65*. As such, if a regulatory scheme or patent law would otherwise prevent the generic drug from market entry, there can be no antitrust injury. *Id.* Here, Defendants argue that because Plaintiffs must demonstrate that **[**30]** the generic patents would have entered the market, but for the settlement, this necessarily implicates patent law.

In *Wellbutrin* the defendant obtained FDA approval for bupropion-hydrochloride, which was marketed as "Wellbutrin." *Id. at 145*. Between September 2004 and May 2005, four generic manufacturers filed ANDAs, requesting authorization to market generic versions of Wellbutrin. *Id.* On February 9, 2007, the parties entered into a settlement agreement, which included a pay-for-delay scheme, wherein the defendants agreed to not launch their own authorized generic version of the drug for **[*384]** 180 days and, in return, the generic manufacturer would not launch a low dosage generic version of the drug until an agreed triggering event. *Id. at 146, 162*. In May 2008, the plaintiffs filed suit, alleging that the defendants conspired with generic manufacturers to prevent a generic version of the drug from entering the market. *Id. at 146*. The Third Circuit held that because there was a patent blocking the generic versions' launch, the settlement agreement did not cause the injury. *Id. at 165*. Put differently, the Third Circuit explained that the plaintiffs were unable to prove that "but for" the defendants' settlement agreement, the generic **[**31]** drug would have entered the market, since a patent blocking the generic versions would have nevertheless created the same effect. *Id.*

The Court rejects Defendants' expansive reading of *Wellbutrin* to hold that antitrust claims, based on reverse settlement agreements, are preempted by federal patent law. *Wellbutrin* simply sets forth considerations to be made when presented with an issue of antitrust standing, based on reverse settlement agreements. At no point in its decision did the Third Circuit mention that such an issue would trigger federal patent preemption. *See Wellbutrin, 868 F.3d at 163-70*. As such, while an antitrust claim may relate to patent issues, it is not always the case that it is necessary to explore its validity. Secondly, as noted above in *Lipitor*, the Third Circuit has already held that this case was not preempted by federal law, since Plaintiffs' claims are predicated on theories of antitrust, not patent law. *Lipitor, 855 F.3d at 146*. As such, because Plaintiffs' antitrust claims do not implicate federal patent law, the Court will not dismiss these claims based on preemption. Finally, *Wellbutrin* was decided at summary judgment, where the district court had before it a full and complete record and was, therefore, capable **[**32]** of making determinations not presently available at the pleading stage. For these reasons, the Court finds Defendants' arguments, relying on *Wellbutrin*, premature.

In sum, the Court denies Defendants' motion for judgment based on preemption principles.

II. Statute of Limitations

Defendants argue that EPPs' antitrust claims in Kansas, Mississippi, Montana, and Tennessee, and consumer protection claims in Illinois, New York, and Tennessee should be dismissed since these statutes impose a statute of limitations of four years or less. Relying on the continuing-violation doctrine, EPPs contend that their claims are timely. The Court agrees.

HN7[] "Under the continuing-violation doctrine, 'when a defendant's conduct is part of a continuing practice, an action is timely so long as the last act evidencing the continuing practice falls within the limitations period.'" *In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 746 (E.D. Pa. 2014)* (quoting *Cowell v. Palmer Twp., 263 F.3d 286, 292 (3d Cir. 2001))*. Indeed, the Supreme Court has considered this doctrine in the antitrust context:

> ***HN8***[] ***Antitrust law*** provides that, in the case of a "continuing violation," say a price fixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, each overt act that is part of the violation and that injures the **[**33]** plaintiff, e.g., each sale to the plaintiff, starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times.

Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997) (internal quotation marks and citations omitted). As such, to the extent Plaintiffs continue to purchase a good "at a supracompetitive **[*385]** price [it] constitute[s] a continuing violation." *Niaspan, 42 F. Supp. 3d at 746*. In fact, almost "[e]very court to have considered this issue in the pay-for-delay context has held that a new cause of action accrues to purchasers upon each overpriced sale of the drug." *Id. at 746-47*; *see* *In re Nexium (Esomeprazole) Antitrust Litig., 777 F.3d 9, 27 (1st Cir. 2015)*; *In re Epipen Epinephrine Injection, No. 17-2785, 336 F. Supp. 3d 1256, 2018 U.S. Dist. LEXIS 140323, at *152-61 (D. Kan. Aug. 20, 2018)*; *In re Aggrenox Antitrust Litig. ("Aggrenox I")*, *94 F. Supp. 3d 224, 248 (D. Conn. 2015)*; *In re K-Dur Antitrust Litig., 338 F. Supp. 2d 517, 551 (D.N.J. 2004)*. As such, consistent with the majority of federal courts to consider this issue, the Court finds the continuing-violation doctrine applicable.

Here, Plaintiffs claim to have been overcharged for Effexor XR, as a result of Defendants' settlement agreement. Specifically, from June 2008 through July 2010, Defendants blocked generic extended release venlafaxine from entering the market, which forced consumers to pay a premium for the brand-named drug; thereby, constituting a continuing violation through July 2010. *See* *Niaspan, 42 F. Supp. 3d at 746*. As such, because EPPs filed their complaints the following year, September **[**34]** 2011, the Court finds EPPs' claims are timely, under the continuing-violation doctrine, and, therefore, denies Defendants' motion as it pertains to these claims.

III. Notice Challenges and Permissibility of Pursuing Class Claims

Defendants next make several challenges to EPPs' state antitrust and consumer protection claims. First, Defendants contend that EPPs failed to satisfy the pre-filing notice requirements mandated in states that require same. Second, Defendants argue that Illinois and Tennessee consumer protection statutes explicitly prohibit the use of class actions to enforce the rights created therein. The Court discusses each challenge in turn.

1. Pre-Filing Notice Requirements

Because the Arizona, Nevada, and Utah antitrust laws have notice requirements, Defendants contend that EPPs' antitrust claims in these states must be dismissed since EPPs failed to give proper notice. Defendants' argument is based on the language of the respective state statutes, requiring any antitrust plaintiff to serve that state attorney general a copy of the complaint. *See* *Ariz. Rev. Stat. § 44-1415*; *Nev. Rev. Stat. Ann. § 598A.210(3)*; *Utah Code Ann. § 76-10-3109(9)*. Similarly, because the consumer protection statutes in Maine, Massachusetts, and West Virginia contain pre-notice provisions, **[**35]** Defendants contend these claims fail as well, since Plaintiffs failed to comply.

The *Arizona Uniform Antitrust Act* states that "[a] person filing a complaint, counterclaim or answer for any violation of the provisions of this article shall simultaneously with the filing of the pleading in the superior court or, in the case of pendent state law claims in the federal court, serve a copy of the complaint, counterclaim or answer on the attorney general. Proof of service on the attorney general shall be filed with the court." *Ariz. Rev. Stat. § 44-1415(A)*. Similarly, *Nevada's Unfair Trade Practices Act* states "[a]ny person commencing an action for any violation of the provisions of this chapter shall, simultaneously with the filing of the complaint with the court, mail a copy of the complaint to the Attorney General." *Nev. Rev. Stat. Ann. § 598A.210(3)*. Lastly, the Utah Antitrust Act also requires notice be made to its attorney general. Specifically, the Act states, "[t]he attorney general shall be notified by the plaintiff about the filing of any class action involving antitrust violations that includes plaintiffs from this **[*386]** state. The attorney general shall receive a copy of each filing from each plaintiff. The attorney general may, in his or her discretion, **[**36]** intervene or file amicus briefs in the case, and may be heard on the question of the fairness or appropriateness of any proposed settlement agreement." *Utah Code Ann. § 76-10-3109(9)*.

Finally, Maine, Massachusetts, and West Virginia's consumer protection statutes all include pre-fling notice provisions. Specifically, the *Massachusetts Consumer Protection Act* requires that "[a]t least thirty days prior to the filing of any such action, a written demand for relief, identifying the claimant and reasonably describing the unfair or deceptive act or practice relied upon and the injury suffered, shall be mailed or delivered to any prospective respondent." *Mass. Gen. Laws. Ch. 93A, § 9(3)*. Courts have recognized that ***HN9***[] "[t]he statutory notice requirement is not merely a procedural nicety, but, rather, 'a prerequisite to suit.'" *Rodi v. S. New Eng. Sch. of Law, 389 F.3d 5, 19 (1st Cir. 2004)* (quoting *Entrialgo v. Twin City Dodge, Inc., 368 Mass. 812, 333 N.E.2d 202, 204 (Mass. 1975))*. Similarly, ***HN10***[] the *West Virginia Consumer Credit Protection Act* provides consumers who are victims to unfair, deceptive, and fraudulent business practices with a cause of action. *W. Va. Code § 46A-6-106(a)*. However, prior to initiating suit, a consumer must first inform the seller, in writing, of the alleged violation. *W. Va. Code § 46A-6-106(b)*. Like the Massachusetts statute, courts have interpreted this statute as a "mandatory prerequisite[]" to commencing a consumer protection **[**37]** claim under the Act. *Harrison v. Porsche Cars N. Am., Inc., No. 15-0381, 2016 W. Va. LEXIS 245, at *5 (W.Va. 2016)*; *see also* *Stanley v. Huntington Nat'l Bank, No.11-54, 2012 U.S. Dist. LEXIS 9448, at *20-21 (N.D.W.Va. Jan. 27, 2012)*.

Unlike Massachusetts and West Virginia, ***HN11***[] while *Maine's Unfair Trade Practices Act* does include a pre-filing notice provision, the Maine Supreme Court has held that "the notice requirements of *section 213(1-A)* are not jurisdictional." *Oceanside at Pine Point Condominium Owners Ass'n v. Peachtree Doors, 659 A.2d 267, 273 (Me. 1995)* (citing *Me. Rev. Stat. Ann. tit. 5, § 213(1-A)*). Therefore, courts have permitted plaintiffs to maintain their Maine Unfair Trade Practices Act claims, despite failing to "send an adequate pre-litigation demand letter." *Chavez v. Wal-Mart Stores, Inc., No. 13-6429, 2014 U.S. Dist. LEXIS 194351, at *8 (C.D. Cal. June 2, 2014)* (distinguishing Massachusetts' and West Virginia's notice requirements from Maine's). As such, because failure to comply with Maine's pre-filing notice does not preclude a plaintiff from perusing his or her claims under the Act, to the extent Defendants seek judgment under this statute, it is denied.

2. State Consumer Protection Class Bar

Defendants next contend that EPPs' Tennessee[6] consumer fraud claims must be dismissed, since Tennessee prohibits class actions. Tennessee's Consumer Protection Act states, "[a]ny person who suffers an ascertainable loss . . . as a result of . . . an unfair or deceptive act or practice . . . may bring an action individually to recover actual damages." Tenn. Code Ann. § 47-18-109(a)(1). Here, EPPs do not contest **[*387]** the meaning of the above-mentioned statutory provisions; **[**38]** instead, relying on Shady Grove Orthopedic Associates, P.A. v. Allstate Ins. Co., 559 U.S. 393, 408, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010), EPPs contend these statutory provisions are preempted by Federal Rule of Civil Procedure 23, since "federal procedural rules control over conflicting state rules."

3. The Shady Grove Decision

To properly analyze Defendants' motion, the Court must determine whether the discussed notice requirements and class action bars are procedural or substantive. It is blackletter law that that **HN12**[] federal courts sitting in diversity jurisdiction must utilize federal procedural law and state substantive law. *See* Erie R.R. v. Tompkins, 304 U.S. 64, 78, 58 S. Ct. 817, 82 L. Ed. 1188 (1938). Therefore, if these states' notice requirements and class action bars are substantive in nature, they apply and must be followed in federal court. *See* Shady Grove, 559 U.S. at 410. However, there is no bright line between procedural and substantive law and, thus, the distinction is difficult to determine, especially since these two categories are not mutually exclusive. Godin v. Schencks, 629 F.3d 79, 86 (1st Cir. 2010).

HN13[] In interpreting *Erie*, the Supreme Court explained that a federal law will only be procedural and, thus, applicable, if the case's outcome would be the same in both federal and state courts. Guaranty Trust Co. v. York, 326 U.S. 99, 109, 65 S. Ct. 1464, 89 L. Ed. 2079 (1945). This is consistent with *Erie*'s "twin aims" to avoid forum shopping and the inequitable administration of law. Id. at 111-12. The Supreme Court further elaborated that before a court can consider **[**39]** *Erie*'s outcome determinative test, it must first determine whether there is a direct conflict between the federal and state laws in question. *See* Hanna v. Plumer, 380 U.S. 460, 470-74, 85 S. Ct. 1136, 14 L. Ed. 2d 8 (1965). If there is a conflict, the federal law must be used, unless it is deemed unconstitutional or outside the scope of the Rules Enabling Act, 28 U.S.C. § 2072(b), which prohibits the use of federal laws if they "abridge, enlarge, or modify any [state] substantive right." *Id.* If there is not a conflict, the outcome determinative test is utilized to determine the whether to apply state or federal law. *Id.* This test has been refined as an inquiry into "whether the scope of the Federal Rule . . . is sufficiently broad to control the issue before the court." Walker v. Armco Steel Corp., 446 U.S. 740, 749-50, 100 S. Ct. 1978, 64 L. Ed. 2d 659 (1980). Only if the federal law is sufficiently broad, will the court then continue with the *Hanna* analysis.

Most recently, the Supreme Court was presented with a similar issue that is before the Court. In *Shady Grove*, the Supreme Court was tasked with determining whether Federal Rule of Civil Procedure 23 or a New York law controlled if a class action may proceed in federal court. 559 U.S. at 396. The New York law at issue prohibited the use of class actions to recover a "penalty" or statutory minimum damages. N.Y. Civ. Prac. Law Ann. (CPLR) § 901(b). In *Shady Grove*, the **[**40]** class members met the prerequisites of Rule 23, but sued under Section 901(b) to recover unpaid interest from Allstate, which was classified as a "penalty" and, therefore, not permitted under the New York law. Id. at 397. In determining which of the two rules applied, the Supreme Court had to answer two related questions: first, whether the New York rule and Rule 23 addressed the same issue; and, if so, whether Rule 23 was within its statutory authority under the Rules Enabling Act. Id. at 398 (citing Burlington N R. Co. v. **[*388]** Woods, 480 U.S. 1, 4-5, 107 S. Ct. 967, 94 L. Ed. 2d 1 (1987); Hanna, 380 U.S. at 463-64). In doing so, a majority of the Court concluded that Rule 23's conflict with the New York law was "unavoidable" and could not fairly be read to not "control the issue." Id. at 406 n.8. As such, because the New York rule attempted to answer the same question, the Court held "it cannot apply in diversity suits unless Rule 23 is ultra vires." Id. at 398-99. Turning to the

[6] Defendants also make a similar argument for Plaintiff's Illinois consumer protection claims; however, being that the Illinois Consumer Fraud & Deceptive Business Practice Act does not explicitly bar class actions, the Court finds it more appropriate to consider the substantive arguments Defendants present later.

second inquiry, however, no majority was able to come to an agreed standard. Writing for three justices, Justice Scalia explained that "it is not the substantive or procedural nature of the affected state law that matters, but the substantive or procedural nature of the Federal Rule." *Id. at 410*. As such, the validity of a Federal Rule turns on whether it regulates procedure, if it does, it is lawfully authorized by the **[**41]** Rules Enabling Act. *Id.*

However, in his concurring opinion, Justice Stevens criticized the plurality's categorical approach, at step two, that any federal rule that "really regulates procedure" is a sufficient basis for preempting a conflicting state law. *Id. at 421-29* (Stevens, J., concurring in part and concurring in judgment). Instead, in Justice Stevens' view, the inquiry should "not necessarily turn on whether the state law at issue takes the form of what is traditionally described as substantive or procedural. Rather, it turns on whether the state law actually is part of a State's framework of substantive rights or remedies." *Id. at 419*. This is because there may be state procedural rules that "become so bound up with the state-created right or remedy that it defines the scope of that substantive right or remedy" and, therefore, "make it significantly more difficult to bring or to prove a claim, thus serving to limit the scope of that claim." *Id. at 420*.

Although the Third Circuit has yet to decide whether Justice Stevens' concurrence controls, the Court is persuaded by the majority of district and circuit courts that have done so.[7] *Greene v. Gerber Prods. Co., 262 F. Supp. 3d 38, 60 (E.D.N.Y. 2017)* (collecting cases). In doing so, ***HN14***[] courts presented with the same issue presently **[**42]** before the Court have framed the inquiry as whether the state statute "provides a procedure that is 'so bound up with the state-created right or remedy that it defines the scope of that substantive right or remedy." *In re Digital Music Antitrust Litig., 812 F. Supp. 2d 390, 416 (S.D.N.Y. 2011)* (quoting *Shady Grove, 559 U.S. at 420* (Stevens, J. concurring in part and concurring in judgment)); *In re Nexium (Esomeprazole) Antitrust Litig., 968 F. Supp. 2d 367, 409 (D. Mass. 2013)*. If the answer is in the affirmative, the federal rule must yield to the state law, since it would "effectively abridge[], enlarge[], or modif[y] a state-created right or remedy." *Shady Grove, 559 U.S. at 422* (Stevens, J. concurring in part and concurring in judgment).

4. Application

Against this legal backdrop, the Court finds that *Rule 23* is not "sufficiently broad" to cover the state statutory notice provisions. First, the conflicting rules do not attempt to answer the same question or subject. *See Shady Grove, 559 U.S. at 399*. Here, the state laws in question address notice provisions for antitrust and consumer protection-related lawsuits; *Rule 23*, on the other hand, **[*389]** is a general federal procedural rule governing class actions. Second, contrary to *Erie*'s twin aims, to decline to apply state statutory notice provisions "in federal court would encourage forum shopping and the inequitable administration of laws." *In re Asacol Antitrust Litig., No. 15-12730, 2016 U.S. Dist. LEXIS 94605, at *48 (D. Mass. July 20, 2016)*. This is also consistent with the majority of district **[**43]** courts that have been presented with the same issue, and have concluded that state statutory notice provisions control in federal court. *See Asacol, 2016 U.S. Dist. LEXIS 94605, at *48* (statutory notice provisions in Arizona, Hawaii, Nevada, and Utah apply in federal court); *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d 1133, 1158 (N.D. Cal. 2009)*; *see also Chavez, 2014 U.S. Dist. LEXIS 194351, at *8* (dismissing Massachusetts and West Virginia consumer protection claims for failing to comply with pre-litigation demand requirements). Accordingly, because EPPs failed to comply with the notice provisions under Arizona's Uniform Antitrust Act, Nevada's Unfair Trade Practices Act, and Utah's Antitrust Act, as well as Massachusetts's Consumer Protection Act and West Virginia's Consumer Credit Protection Act, EPPs' class claims under these statutes are dismissed without prejudice. However, as noted above, because Maine's pre-filing notice requirement is not jurisdictional in nature, Defendants' motion for judgment as to this statute is denied.

---

[7] From the Court's perspective, in agreement with Justice Stevens, the state statutes at issue focus on various forms of deceptive practices. *Rule 23* is more generic and applies to all class actions. As such, the narrower and more focused approach of the state should apply.

For these same reasons, the Court also finds that the class action bar incorporated in Tennessee's consumer protection law is not preempted by *Rule 23*. Here, EPPs deviate from the majority of district and circuits, which have followed Justice Steven's concurrence in *Shady Grove*, and, instead, endorse the approach **[**44]** taken in *Lisk v. Lumber One Wood Preserving, LLC, 792 F.3d 1331, 1335 (11th Cir. 2015)*. In *Lisk*, the Eleventh Circuit held that there was "no relevant, meaningful distinction between" the New York law in *Shady Grove* and the Alabama Deceptive Trade Practices Act, which also bars class actions. In doing so, the court, echoing Justice Scalia's plurality decision, explained, "the question whether a federal rule abridges, enlarges, or modifies a substantive right turns on matters of substance—not on the placement of a statute within a state code." *Id. at 1336*. However, "[t]he decision in *Lisk* has not been widely followed outside of the Eleventh Circuit." *Delgado v. Ocwen Loan Servicing, LLC, No. 13-4427, 2017 U.S. Dist. LEXIS 186408, at *23 (E.D.N.Y. Nov. 8, 2017)*. Instead, "most courts outside of that circuit implicitly or explicitly disagree[] with its interpretation of *Shady Grove* and its determination that there was no 'meaningful distinction' between the New York law in *Shady Grove* and the Alabama class action bar. *Id.* (collecting cases). As such, consistent with the courts to have considered this issue, the Court finds that the class action bar in Tennessee controls in federal court. *Id. at *23-24*. Moreover, in *Delgado*, the court explained, "the specific inclusion of the class action bar within the Alabama, Tennessee, and Georgia consumer protection statutes. . . evinces a desire by the state **[**45]** legislature to limit not only the form of the action but also the remedies available, placing those bars squarely within Justice Stevens' concurrence." *Id.*;[8] *Fejzulai v. Sam's **[*390]** West, Inc., 205 F. Supp. 3d 723, 728-29 (D.S.C. 2016)*. That same reasoning holds here.

In sum, the Court finds that the three notice provisions under Arizona, Nevada, and Utah antitrust laws are applicable here and Plaintiffs failed to comply. Likewise, the notice provisions under Massachusetts and West Virginia's consumer protection laws control. As such, EPPs' claims under these five statutes are dismissed without prejudice; Plaintiffs may file an amended complaint that specifically pleads compliance with each state's notice requirement. Similarly, EPPs' class claims under Tennessee's consumer protection statute are dismissed without prejudice; Plaintiffs may amend their complaint to include only claims in their *individual* capacities. Lastly, because the failure to provide pre-file notice under Maine's Unfair Trade Practices Act does not bar pursuing a claim under the Act, Defendants' motion for judgment as it relates to this statute is denied.

IV. State Antitrust Claims

1. Article III Standing

Defendants first challenge EPPs' antitrust claims under the laws of the District of Columbia, **[**46]** since they lack Article **III** standing. Plaintiffs do not dispute the fact that the Complaint does not name a plaintiff that resides in the District of Columbia or that any named plaintiff made a purchase or reimbursement for Effexor XR; instead, they contend that since named plaintiffs have Article **III** standing to pursue their own antitrust claims, they have Article III standing to assert claims under the laws of the District of Columbia. The Court disagrees.

HN15[] Article III standing is a threshold inquiry in every case and one in which "[t]he party invoking federal jurisdiction bears the burden of [proof]." *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. To establish Article **III** standing, a plaintiff must demonstrate: "(1) an 'injury in fact,' (2) a sufficient 'causal connection between the injury and the conduct complained of,' and (3) a 'likel[ihood]' that the injury 'will be redressed by a favorable decision." *Neale v. Volvo Cars of N Am., LLC, 794 F.3d 353, 359 (3d Cir. 2015)* (quoting *Susan B. Anthony List v. Driehaus, 573 U.S. 149, 134 S. Ct. 2334, 2341, 189 L. Ed. 2d 246 (2014))*. In a putative class action, standing must be analyzed on a claim-by claim basis, with the plaintiff bearing the burden of

[8] Both Alabama and Georgia's consumer protection statutes contain similar language to Tennessee, which prohibit the use of class actions to enforce the rights created therein. *Ala. Code Ann. § 8-19-10(f)* ("A consumer or other person bringing an action under this chapter may not bring an action on behalf of a class"); *Ga. Code Ann. § 10-1-399(a)* ("Any person who suffers injury or damages . . . as a result of consumer acts or practices in violation of this part . . . may bring an action individually, but not in a representative capacity").

demonstrating standing for each claim he seeks to prove, "we do not exercise jurisdiction over one claim simply because it arose 'from the same 'nucleus of operative fact' as another claim." **[**47]** *Id.* (quoting *DaimlerChrysler Corp. v. Cuno, 547 U.S. 332, 352, 126 S. Ct. 1854, 164 L. Ed. 2d 589 (2015))*. Put differently, "the named plaintiffs may bring suit only under the laws of states in which they reside or in which they either purchased or made reimbursements for [brand-named drug]." *Niaspan, 42 F. Supp. 3d at 758* (citing *In re Flonase Antitrust Litig., 692 F. Supp. 2d 524, 533 (E.D. Pa. 2010))*.

Here, EPPs Complaint fails to allege that any named plaintiff either resides in or made purchases and/or reimbursement for Effexor XR in the District of Columbia. Moreover, the Court is unpersuaded by EPPs' proposition that because they have Article III standing in some **[*391]** states, they can assert claims in any state; since this would effectively render the Article III inquiry obsolete. As such, because EPPs lack Article III standing to assert claims in the District of Columbia, the Court grants Defendants' motion as it pertains to this claim without prejudice. *See Niaspan, 42 F. Supp. 3d at 758*; *Wellbutrin XL, 260 F.R.D. at 157-58*.

2. Illinois Brick Challenges

Defendants next seek dismissal of EPP's Illinois, Rhode Island, and Utah state antitrust claims, since these states lack standing under *Illinois Brick Co. v. Illinois, 431 U.S. 720, 746-47, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. In *Illinois Brick*, the Supreme Court held that indirect purchasers lacked Article III standing to assert federal antitrust claims against manufacturers since their injury was likely only a small portion of the injury caused by the defendants' alleged **[**48]** conduct. *Id. at 725-26*.

a. Illinois Antitrust Act

Relying on *Illinois Brick*, Defendants contend that EPPs' Illinois antitrust claim fails, since they lack standing. The plain language of the *Illinois Antitrust Act* ("IAA") states "no person shall be authorized to maintain a class action in any court of this State for indirect purchasers asserting claims under this Act, with the sole exception of this State's Attorney General, who may maintain an action parens patriae." *740 Ill. Comp. Stat. § 10/7(2)*. EPPs respond, contending that under *Shady Grove*, the Court should treat the Illinois Antitrust Act as a procedural law and, therefore, follow *Rule 23*.

District courts are divided on whether the Illinois Antitrust Act precludes indirect purchasers from filing class actions. However, a majority of courts have held that the Act is distinguishable from the New York law in *Shady Grove* and that it prohibits indirect purchaser class actions. *See, e.g., In re Opana Er Antritrust Litig., 162 F. Supp. 3d 704, 723 (N.D. Ill. 2016)*; *United Food & Commer. Workers Local 1776 & Participating Employers Health & Welfare Fund v. Teikoku Pharma USA, Inc., 74 F. Supp. 3d 1052, 1083-84 (N.D. Cal. 2014)*; *Digital Music, 812 F. Supp. 2d at 415-16*; *Wellbutrin XL, 756 F. Supp. 2d at 677*. As discussed above, the New York law at issue in *Shady Grove* involved a general procedural rule that conflicted with *Rule 23*; here, however, **[**49]** the limitation prescribed in the IAA is "in the same paragraph of the same statute that creates the underlying substantive right." *Digital Music, 812 F. Supp. 2d at 416*; *see also Wellbutrin XL, 756 F. Supp. 2d at 677*. Further, the restrictions in the Illinois Antitrust Act appear to reflect a policy decision regarding the feasibility of duplicative recovery, which is explicitly entrusted to the attorney general, not indirect purchasers. *Wellbutrin XL, 756 F. Supp. 2d at 677* (citing *Illinois ex rel. Burris v. Panhandle E. Pipe Line Co., 935 F. 2d 1469, 1480 (7th Cir. 1991))*. In finding that the Act bars indirect purchaser antitrust class actions, courts have explained "[t]he Illinois restrictions on indirect purchaser actions are intertwined with Illinois substantive rights and remedies . . . [such that] application of *Rule 23* would 'abridge, enlarge or modify' Illinois' substantive rights, and therefore Illinois' restrictions on indirect purchaser actions must be applied in federal court." *Id.; see also Nexium, 968 F. Supp. 2d at 408-09*; *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-2503, 2015 U.S. Dist. LEXIS 125999, at *66 (D. Mass. Aug. 14, 2015)* (holding that it would be inconsistent with *Shady Grove* to conclude that *Rule 23* **[*392]** preempts the ban on class actions contained within Illinois ***Antitrust Law***).

Several district courts have taken a less restrictive interpretation of the Illinois Antitrust Act and have allowed indirect purchasers to bring class actions under the Act. *See, e.g., In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772, 817-18 (N.D. Ill. 2017)*; *In re Propranolol Antitrust Litig., 249 F. Supp. 3d 712, 729 (S.D.N.Y 2017)*; *In re Aggrenox Antitrust Litig. (Aggrenox II), No. 14-2516, 2016 U.S. Dist. LEXIS 104647, at *23-28 (D. Conn. Aug. 9, 2016)*. In *Broiler Chicken*, the Northern District of Illinois **[**50]** held that *Rule 23* applies in federal court, despite the state law's requirement that the attorney general bring class actions, since the Act does not hinder the class's substantive rights. *Broiler Chicken, 290 F. Supp. 3d at 818*. This is "because any indirect purchaser procedurally blocked from participation in a class action would still have the same remedy in an individual action." *Aggrenox II, 2016 U.S. Dist. LEXIS 104647, at *28*. As such, these courts view the Illinois Antitrust Act as a procedural conflict with *Rule 23*, rather than substantive, and, therefore, apply *Rule 23* to permit indirect purchasers to file class actions under the Act, so long as they satisfy its prerequisites. *See, e.g., Propranolol., 249 F. Supp. 3d at 728*.

Although district courts have taken different approaches in interpreting the Illinois Antitrust Act, the Court finds the rationale of *Digital Music* persuasive. The language of the Act presents a substantive conflict with *Rule 23*; as such, since the Illinois Antitrust Act controls, the Court finds that EPPs lack standing to assert claims under the Act and, therefore, dismisses this claim with prejudice.

b. Rhode Island Antitrust Act

Defendants next move for dismissal of EPPs Rhode Island antitrust claims since they, too, lack standing to bring an antitrust claim under *Illinois Brick*. Since the Supreme Court's **[**51]** decision, multiple states have enacted *Illinois Brick* repealer statutes that allow indirect purchasers to recover under their state law. On July 15, 2013, Rhode Island passed such a repealer, which states "[t]he fact that a person or public body has not dealt directly with the defendant shall not bar or otherwise limit recovery." *R.I. Gen. Laws § 6-36-7(d)*. As such, Plaintiffs argue the statute should be applied retroactively and, even if it cannot be applied retroactively, they nevertheless fall within the repealer's protection since Plaintiffs suffered damages past July 15, 2013.

Here, Defendants argue that the activity alleged in this claim predated July 15, 2013, since the alleged anticompetitive conduct that prevented the generic brands from entering the market occurred prior to July 2010. As such, since the conduct giving rise to the present cause of action occurred prior to the passing of Rhode Island's repealer, Defendants contend it does not apply and, under *Illinois Brick*, must be dismissed. In addition, Defendants aver that the statute cannot be applied retroactively.

HN16[] Under Rhode Island law, it is well established that statutes cannot be applied retroactively, unless clearly stated. The Rhode Island **[**52]** Supreme Court has held that, "statutes and their amendments are construed to operate prospectively unless a specific contrary intent is expressed by the Legislature, or retroactivity must necessarily be inferred from the language employed by the law makers." *State v. Jennings, 944 A.2d 171, 173 (R.I. 2008)*; *see also Rodrigues v. State, 985 A.2d 311, 318 (R.I. 2009)*; *Wilkinson v. State Crime Lab.* ***[*393]*** *Comm'n, 788 A.2d 1129, 1140-41 (R.I. 2002)*; *Hydro-Manufacturing v. Kayser-Roth Corp., 640 A.2d 950, 954-55 (R.I. 1994)*. Additionally, courts have consistently held that the Rhode Island repealer applies prospectively. *See, e.g., Aggrenox I, 94 F. Supp. 3d at 252-53*; *In re Cast Iron Soil Pipe & Fittings Antitrust Litig., No. 14-2508, 2015 U.S. Dist. LEXIS 121620, at *63, (E.D. Tenn. July 24, 2015)*; *Niaspan, 42 F. Supp. 3d at 759*. Finally, Plaintiffs' contention that Defendants' conduct has continued past July 15, 2013, thereby placing it within the repealer's protection, is belied by the explicit allegations set forth in their Complaint, which focus solely on Defendants' actions made prior to July 2010. As such, because Rhode Island's repealer does not apply retroactively and none of the activity giving rise to their claims occurred after the date of enactment (July 15, 2013), EPPs' Rhode Island antitrust claims are dismissed with prejudice.

c. Utah Antitrust Act

Lastly, in addition to failing to provide notice, Defendants contend that EPPs' Utah antitrust claims fail, since none of the named Plaintiffs are Utah residents, as required under Utah law. As such, Defendants contend that EPPs lack standing to assert claims under the **[**53]** Utah Antitrust Act. *See* Niaspan, 42 F. Supp. 3d at 759-60. Plaintiffs respond that dismissal is not warranted, since only a member of a putative class must be from Utah. *See* In re Liquid Aluminum Sulfate Antitrust Litig., No. 16-2687, 2017 U.S. Dist. Lexis 115294, at *112-13 (D.N.J. July 20, 2017).

Under the Utah Antitrust Act, "[a] person who is a *citizen* of this state or a *resident* of this state" can bring a claim. Utah Code Ann. § 76-10-3109(1)(a) (emphasis added). ***HN17***[] The majority of courts that have been presented with this statute require at least one Utah citizen or resident be a named plaintiff *See* Opana Er, 162 F. Supp. 3d at 725; Aggrenox I., 94 F. Supp. 3d at 251-52; Niaspan, 42 F. Supp. 3d at 759-60; Nexium, 968 F. Supp. 2d at 410; In Re Magnesium Oxide Antitrust Litig., No. 10-5943, 2011 U.S. Dist. LEXIS 121373, at *30 n.10 (D.N.J. Oct. 20, 2011). Here, neither party disputes that none of the named Plaintiffs are Utah residents or citizens. As such, guided by the majority of courts to address this issue, because there must be at least one named plaintiff who is a Utah citizen or resident in order to establish standing for the putative class, EPPs' claims under the Utah Antitrust Act are dismissed without prejudice.

In sum, EPPs' antitrust claims under Illinois and Rhode Island are dismissed and there is no right to amend due to futility. Under Utah, the claim is dismissed without prejudice; but Plaintiff may amend to name such plaintiff within thirty days.

3. States Requiring Concerted Action

Defendants next seek dismissal of Count I of EPPs' Kansas, New York, and Tennessee antitrust claims, which asserts **[**54]** a single claim of monopolization against Wyeth, based on committing fraud before the PTO and commencing baseless patent litigation. (TAC ¶¶ 420-37). Specifically, Defendants argue that because Kansas, New York, and Tennessee require unlawful behavior between two or more individuals, Count I must be dismissed since it alleges unilateral conduct by Wyeth.

It is clear from the Complaint that the allegations concerning Wyeth's conduct before the PTO, as well as its sham litigation, are unilateral. As such, since these allegations describe unilateral conduct, Defendants contend that Count I fails in Kansas, New York and Tennessee. *See* Kan. Stat. Ann. §§ 50-101, **[*394]** -112, -132; N.Y. Gen. Bus. Law § 340(1); Tenn. Code Ann. §§ 47-25-101, -102.

HN18[] The Kansas Monopolies and Unfair Trade Act proscribes "all arrangements, contracts, agreements, trusts, or combinations between persons made with a view or which tend to prevent full and free competition" and those "designed or which tend to advance, reduce or control the price or the cost to the producer or to the consumer of any such products or articles." Kan. Stat. Ann. § 50-112. The Act defines a "trust" as a "combination of capital, skill, or acts, by two or more persons" and prohibits conspiracy or combination "with any other persons. . . for the purpose **[**55]** of monopolizing any line of business." Kan. Stat. Ann. §§ 50-101, -132. While there is scant case law interpreting the Kansas Monopolies and Unfair Trade Act, the Kansas Court of Appeals has held that since the Act emphasizes agreements between two or more individuals, the legislature intended for the Act to require more than unilateral conduct. Smith v. Philip Morris Cos., 50 Kan. App. 2d 535, 335 P.3d 644, 662-67 (Kan. Ct. App. 2014); *see also* In re Relafen Antitrust Litig., 221 F.R.D. 260, 283 (D. Mass. 2004).

Like Kansas, the New York Donnelly Act defines an antitrust violation as "every contract, agreement, arrangement, or combination whereby a monopoly in the conduct of any business, trade, or commerce . . . may be established or maintained, or whereby competition or the free exercise of any activity in the conduct of any business, trade, or commerce . . . is or may be restrained." N.Y. Gen. Bus. Law § 340(1). As such, ***HN19***[] in New York "[a]n antitrust claim under the Donnelly Act...must allege both concerted action by two or more entities and a consequent restraint of trade within an identified relevant product market." Global Reins. Corp.-US. Branch v. Equitas Ltd, 18 N.Y.3d 722, 969 N.E. 2d 187, 192, 946 N.Y.S.2d 71 (N.Y. 2012); *see also* In re Aluminum Warehousing Antitrust Litig. No. 13-2481, 2014 U.S. Dist. LEXIS 140765, at *23 (S.D.N.Y. Sept. 14, 2014). However, the Northern District of New

York has held that allegations of monopolistic activities, based on conspiring with other individuals, suffices to state a claim under the Donnelly Act. *See* N. Cnty. Communs. Corp. v. Verizon N.Y. Inc., 233 F. Supp. 2d 381, 385 (N.D.N.Y. 2002). **[**56]**

Finally, like Kansas and New York, **HN20**[] the Tennessee Trade Practices Act proscribes "[a]ll arrangements, contracts, agreements, trusts, or combinations between persons or corporations made with a view to lessen, or which tend to lessen, full and free competition . . . and all arrangements, contracts, agreements, trusts, or combinations between persons or corporations designed, or which tend, to advance, reduce, or control the price or the cost to the producer or the consumer." *Tenn. Code Ann. § 47-25-101*. Despite limited case law interpreting the statute, several district courts have held that "the absence of an arrangement or conspiracy between two actors is a bar" to a claim under the Tennessee statute. *Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, 737 F. Supp. 2d 380, 445-46 (E.D. Pa. 2010)*; *see also* In re Ditropan XL Antitrust Litig., 529 F. Supp. 2d 1098, 1108-09 (N.D. Cal. 2007); Relafen, 221 F.R.D. at 284.

As established above, **HN21**[] the case law as well as the plain language of the Kansas, New York, and Tennessee antitrust statutes require concerted action between two parties. As such, allegations relating to Wyeth's unilateral conduct fails to state a claim under these statutes. The Court is not persuaded by Plaintiffs' argument **[*395]** that all alleged conduct falls within a single cause of action. Therefore, Defendants' motion as it relates to Kansas, New York, and **[**57]** Tennessee are granted in part and denied in part. To the extent Count I is based on Wyeth committing fraud before the PTO and commencing baseless patent litigation, Defendants' motion is granted, since the conduct is unilateral. However, the Court denies Defendants' motion to the extent that they seek dismissal of Count I based on the reverse settlement agreement with Teva.

V. State Law Consumer Protection Claims

Defendants next challenge the sufficiency of EPPs' state consumer protection claims. The Court discusses each state individually.[9]

1 California

Defendants first seek dismissal of EPPs' claims under the California Unfair Competition Law, since EPPs failed to plead reliance. **HN22**[] The Unfair Competition Law proscribes "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof Code § 17200*. As such, courts have understood *Section 17200* to provide relief for three varieties of unfair competition: "practices which are unlawful, unfair, or fraudulent." *Ditropan XL, 529 F. Supp. 2d at 1105*. However, contrary to Defendants' assertion, reliance is only required "when a[n] [Unfair Competition Law] claim is premised on allegations that the Defendants engaged in fraudulent business practices." *Id. at 1106*. Here, EPPs claims are predicated on unlawful and unfair **[**58]** business practices engaged by defendants. Specifically, Plaintiffs challenge, among other things, Defendants' sham litigation, fraudulent procurement of the PTO, and reverse settlement agreement. As such, "at the very least, [EPPs] allege a claim premised on the unfair prong." *Id.; see also* Wellbutrin, 260 F.R.D. at 160. Therefore, because EPPs allege sufficient facts to sustain an Unfair Competition Law claim based on unfair business practices, Defendants' motion for judgment on the pleadings with respect to this claim is denied.[10]

2. Illinois

---

[9] Because the Court has already dismissed EPPs' claims under Massachusetts, Tennessee and West Virginia's consumer protection statutes, it does not address the remaining arguments pertaining to these states.

[10] Moreover, it should be noted that, at the pleading stage it is difficult to determine whether Plaintiff's claims under California law are even based on fraudulent conduct; as such, the Court also finds Defendants' motion to be premature.

Defendants next seek dismissal of EPPs' claims under the Illinois Consumer Fraud and Deceptive Business Practices Act since: (1) the Act does not provide additional relief beyond antitrust claims; (2) EPPs failed to plead deception or reliance; and (3) EPPs fail to demonstrate that the alleged conduct was consumer-oriented or had a consumer nexus. The Illinois Consumer Fraud and Deceptive Business Practices Act states that "[u]nfair methods of competition and unfair or deceptive acts or practices . . . in the conduct of any trade or commerce are hereby declared unlawful whether any person has in fact been misled, deceived or damaged thereby." *815 Ill. Comp. Stat. Ann. 505/2*. However, ***HN23***[] the state legislature **[**59]** did not intend for the Act to serve as an "additional antitrust enforcement mechanism." *Laughlin v. Evanston Hosp., 133 Ill. 2d 374, 550 N.E.2d 986, 993, 140 Ill. Dec. 861 (Ill. 1990)* (consumer fraud statutes cannot be used when conduct is not actionable **[*396]** under the state ***antitrust law***); *Siegel v. Shell Oil Co., 480 F. Supp. 2d 1034, 1046-48 (N.D. Ill. 2007)* (consumers can bring a consumer fraud claim when conduct is actionable under the Illinois Antitrust Act). As such, if the plaintiff fails to plead an antitrust claim under the Illinois Antitrust Act, those same allegations of anticompetitive conduct cannot give rise to a claim under the Illinois Consumer Fraud and Deceptive Business Practices Act. *Id.; Siegel, 480 F. Supp. 2d at 1034*; *Wellbutrin XL, 260 F.R.D. at 162*.

As discussed above, the Illinois Antitrust Act prohibits indirect purchaser class actions. Moreover, when reviewing the Complaint, EPPs' claims are primarily focused on anticompetitive conduct and its "allegations of consumer fraud overlap entirely with the allegations of anticompetitive conduct." *Wellbutrin XL, 260 F.R.D. at 162* (quoting *Gaebler v. New Mexico Potash Corp., 285 Ill. App. 3d 542, 676 N.E.2d 228, 230, 221 Ill. Dec. 707 (Ill. App. Ct. 1996))*. Simply put, ***HN24***[] "plaintiffs may not assert what are essentially antitrust claims in the guise of a claim under [the Illinois Consumer Protection Act]." *Id.* Since any amendment would be futile, judgment on the pleadings is granted without leave to amend.

3. Maine

Defendants next seek dismissal of EPPs' claims under the Maine Unfair Trade Practices **[**60]** Act, since EPPs failed to allege deception and, alternatively, EPPs are not considered "consumers" under the Act. ***HN25***[] The Act proscribes "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." *Me. Rev. Stat. tit. 5 § 207*. "A business practice is 'unfair' if the injury it produces is (1) 'substantial,' (2) not 'outweighed by any countervailing benefits to consumers or competition that the practice produces,' and (3) not reasonably avoidable by consumers." *In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d 538, 584 (M.D. Pa. 2009)* (quoting *Tungate v. MacLean-Stevens Studios, Inc., 1998 ME 162, 714 A.2d 792, 797 (Me. 1998))*. "In pricing cases, the allegedly unfair practice must also induce the consumer to acquire something that he or she would not otherwise have purchased." *Id.* However, whereas here, the purported conduct resulted in higher prices, the Maine Unfair Trade Practices Act provides no such relief, since higher prices do not induce a consumer to make purchases. *In re Graphics Processing Units (GPU) Antitrust Litig., 527 F. Supp. 2d 1011, 1031 (N.D. Cal. 2007)*. As such, since any amendment to EPPs' claims under the Maine Consumer Protection Act would be futile, judgment on the pleadings is granted without leave to amend. *See Chocolate Confectionary, 602 F. Supp. 2d at 585*.

It is worth briefly noting that the court is unpersuaded by Plaintiff's reliance on *In re Motor Vehicles Canadian Exp. Antitrust Litig., 350 F. Supp. 2d 160 (D. Me. 2004)*, which held that deception or reliance only applies to "unfair or deceptive acts," not "unfair **[**61]** methods of competition." *Id. at 186-87*. First, federal courts have criticized the rationale in *In re Motor Vehicles*, concluding that its "crabbed reading of *Tungate*" is incongruent with the Maine Supreme Court's holding since "[t]he Maine Supreme Court [did] not qualify its pronouncement as applicable to only 'unfair or deceptive acts.'" *In re Polyurethane Foam Antitrust Litig., 799 F. Supp. 2d 777, 787 (N.D. Ohio 2011)* (quoting *Flash Memory, 643 F. Supp. 2d at 1159*); *see also Chocolate Confectionary, 602 F. Supp. 2d at 584-85*; *In re TFT-LCD Ant trust Litig., 586 F. Supp. 2d 1109, 1126-27 (N.D. Cal. 2008)*. Second, the allegations in that case concerned group boycotts, not price fixing or reverse settlements, which **[*397]** the *In re Motor Vehicles* court reasoned would nevertheless support an unfair method of competition claim.

4. Nevada

Defendants argue that EPPs claims under the Nevada Deceptive Trade Practices Act should be dismissed, since EPPs failed to allege consumer reliance. Under *Section 41.600 of Nevada's Revised Statutes*, ***HN26***[] "any person who is a victim of . . . [a] deceptive trade practice as defined in [the Nevada Deceptive Trade Practices Act]" may a bring an action thereunder. *Nev. Rev. Stat. § 41.600*. Some courts have held that when a plaintiff seeks relief based on prohibited acts listed under *Section 598.0915*, the plaintiff is required to demonstrate deception or reliance. *See, e.g., Picus v. Wal-Mart Stores, Inc., 256 F.R.D. 651, 657 (D. Nev. 2009)*; *Sheet Metal Workers, 737 F. Supp. 2d at 417*. However, contrary to Defendants' contention, EPPs' claims do not arise under *Section 598.0915*; instead, EPPs' claims appear **[**62]** to be predicated on *Section 598.0923(3)*, which states that "[a] person engages in a 'deceptive trade practice' when in the course of his or her business or occupation he or she knowingly . . . violates state or federal statute or regulation relating to the sale or lease of goods or service." *Nev. Rev. Stat. § 598.0923(3)*.

HN27[] Under *Section 598.0923(3)*, the Nevada Deceptive Trade Practices Act does not require the plaintiff to plead reliance, nor do Defendants identify any case-law that would otherwise support this contention. *See In re Pharm. Indus. Average Wholesale Price Litig., 252 F.R.D. 83, 98 (D. Mass. 2008)* (parties agreeing that the Nevada Deceptive Trade Practices Act does not require proof of reliance); *see also In re Packaged Seafood Prods. Antitrust Litig., 242 F. Supp. 3d 1033, 1080-81 (S.D. Cal. 2017)* (rejecting the defendant's motion to dismiss the end purchaser plaintiff's Nevada Deceptive Trade Practices Act claims, arising from an alleged antitrust conspiracy regarding packaged seafood products). As such, since EPPs' claims are predicated on allegations of ***HN28***[] anticompetitive conduct, which are considered prohibited acts under *Nev. Rev. Stat. § 598A.060(a)*, the Court denies Defendants' motion for judgment on the pleadings.

6. New Mexico

Defendants next challenge EPPs' claims under the New Mexico Unfair Practices Act, since the Act does not provide relief for price fixing and, in any event, they fail to plead unconscionable conduct. ***HN29***[] The New Mexico **[**63]** Unfair Practices Act prohibits unfair, deceptive, and unconscionable trade practices. *N.M. Rev. Stat. § 57-12-2*. Given the remedial nature of the Act, "courts construe its provisions broadly to facilitate this purpose." *Chocolate Confectionary, 602 F. Supp. 2d at 585* (citing *State ex rel. Stratton v. Gurley Motor Co., 1987- NMCA 063, 105 N.M. 803, 737 P.2d 1180, 1185 (N.M. 1987))*. The Act defines "unconscionable trade practice" as "an act or practice in connection with the sale . . . of any goods or services . . . that to a person's detriment: (1) takes advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree; or (2) results in a gross disparity between the value received by a person and the price paid." *N.M. Stat. Ann. § 57-12-2(E)*.

HN30[] "Federal courts generally permit [New Mexico Unfair Practices Act] actions in price-fixing cases provided that the plaintiff alleges a 'gross disparity' between the price paid for a product and the value received." *Chocolate Confectionary, 602 F. Supp. 2d at 585* (collecting cases); *see also Flash Memory, 643 F. Supp. 2d at 1159-60*; *Liquid Aluminum Sulfate,* ***[*398]*** *2017 U.S. Dist. LEXIS 115294, at *108-09*; *In re Aftermarket Filters Antitrust Litig., No. 08-4883, 2009 U.S. Dist. LEXIS 104114, at *37 (N.D. Ill. Nov. 5, 2009)*. Unlike *GPU, 527 F. Supp. 2d at 1029-30*, where the court dismissed the plaintiffs' New Mexico Unfair Practices Act for failing to plead unequal bargaining power, the Court is satisfied that, at this juncture, that EPPs have sufficiently pled enough facts to state a claim under the New Mexico statute. EPPs Complaint is replete with allegations of price fixing and anticompetitive **[**64]** schemes, and it is beyond cavil that these schemes resulted in consumers paying a substantial premium for goods beyond what they would have otherwise paid. *See TFT-LCD, 586 F. Supp. 2d at 1127* (allegations of price fixing and "gross disparity" between the value of products received and amount paid sufficient to state a claim under the New Mexico Unfair Practices Act). As such, the Court denies Defendants' motion for judgment on the pleadings as to EPPs' New Mexico Unfair Practices Act claims.

7. New York

Defendants next challenge EPPs' claims under the New York Consumer Protection from Deceptive Acts and Practices Act, since EPPs fail to allege particular conduct directed specifically at them and, in the alternative, fail to allege consumer reliance. *Section 349 of New York's Business Law* states, "[d]eceptive acts or practices in the conduct of any business, trade or commerce or in the furnishing of any service in this state are hereby declared unlawful." *N.Y. Gen. Bus. Law § 349(a)*. ***HN31***[] "*[S]ection 349* is directed at wrongs against the consuming public." *In re Rezulin Prods. Liab. Litig., 392 F. Supp. 2d 597, 613 (S.D.N.Y. 2005)* (quoting *Oswego Laborers' Local 214 Pension Fund v. Marine Midland Bank, N.A., 85 N.Y.2d 20, 647 N.E.2d 741, 744, 623 N.Y.S.2d 529 (N.Y. 1995))*. In order to state a claim under *Section 349*, the plaintiff must prove three elements: (1) "the challenged act or practice was consumer-oriented;" (2) "it was misleading in a material way;" and (3) "the plaintiff suffered injury as **[**65]** a result of the deceptive act." *Flash Memory, 643 F. Supp. 2d at 1160* (quoting *Stutman v. Chem. Bank, 95 N.Y.2d 24, 731 N.E.2d 608, 611, 709 N.Y.S.2d 892 (N.Y. 2000))*. "To satisfy the consumer-oriented prong, plaintiffs need only allege consumer-oriented conduct that implicates the public interest in New York." *In re Dynamic Random Access Memory Antitrust (DRAM II) Litig., 536 F. Supp. 2d 1129, 1144-45 (N.D. Cal. 2008))*.

Here, contrary to Defendants' assertion, the Court is satisfied that EPPs have alleged sufficient facts to sustain a claim under *Section 349*. As discussed above, EPPs' claims focus on the anticompetitive conduct of Defendants, which prevented the earlier market entry of generic Effexor XR and, as a result, caused individuals to pay a premium. *See MacQuarie Grp. Ltd. v. Pac. Corporate Grp., LLC, No. 08-cv-2113, 2009 U.S. Dist. LEXIS 16554, at *23-25 (S.D. Cal. Mar. 2, 2009)* (recognizing that ***HN32***[] "courts routinely treat[] antitrust violations as deceptive acts"); *see also* *New York v. Feldman, 210 F. Supp. 2d 294, 302 (S.D.N.Y. 2002))*. In fact, similar allegations were made in both *TFT-LCD, 586 F. Supp. 2d at 1128-29*, and *DRAM II, 536 F. Supp. 2d at 1143-44*, where the district courts denied the defendants' motions to dismiss, finding the plaintiffs alleged sufficient facts to state a claim. As such, for these reasons, the Court denies Defendants' motion as to EPPs' *Section 349* claims.

8. North Carolina

Defendants next contend that EPPs lack standing to assert claims under **[*399]** North Carolina's Unfair and Deceptive Trade Practices Act, since Plaintiffs are neither competitors nor in commercial dealings with Defendants. ***HN33***[] *Section 75-1.1* of **[**66]** the Act proscribes "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce" and provides "any person" or "business of any person, firm or corporation" the right to sue for injuries arising from unfair business practices. *N.C. Gen. Stat. §§ 75-1.1*; -16. "Federal courts interpreting the [North Carolina's Unfair and Deceptive Trade Practices Act] have allowed claims asserted by businesses against one another as long as the challenged practices affect commerce or the marketplace." *Sheet Metal Workers, 737 F. Supp. 2d at 419*. Here, as discussed, EPPs claim that Defendants engaged in anticompetitive schemes, which ultimately resulted in consumers purchasing Effexor XR at inflated prices. This suffices, under the Act, to confer EPPs with standing; as such, Defendants' motion for judgment on the pleadings is denied. *See id.* The Court only adds that Defendants' reliance on *Food Lion, Inc. v. Capital Cities/ABC, Inc., 194 F.3d 505, 519-20 (4th Cir. 1999)* is of no moment. In *Food Lion*, the Fourth Circuit held that the plaintiffs could not bring a claim against the defendant under the Act, despite engaging in deceptive conduct, since the conduct "did not harm the consuming public." *Id. at 520*. Here, unlike *Food Lion*, EPPs' allegations that Defendants' anticompetitive scheme resulted **[**67]** in consumers paying inflated costs for Effexor XR demonstrates a harm to the "consuming public."

9. Rhode Island

Finally, Defendants challenge EPPs' claims under the Rhode Island Unfair Trade Practices and Consumer Protection Act, since: (1) the misconduct alleged in the Complaint is not prohibited under the Act and (2) EPPs are not "consumers" as defined under the Act. ***HN34***[] The Rhode Island Unfair Trade Practices and Consumer Protection Act proscribes "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." *R.I. Gen. Laws § 6-13.1-2*. The Act goes on to list twenty "acts or practices" that are considered unfair or deceptive competition. *R.I. Gen. Laws § 6-13.1-1(6)(i)-(xx)*. In determining whether a practice is "unfair" under the Act, courts must consider: "(1) whether the practice affronts public policy, as delineated by the common law, statutes, and 'other established concept[s] of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; [and] (3) whether it causes substantial injury to consumers (or competitors or other businessmen).'" *Chocolate Confectionary, 602 F. Supp. 2d at 587* (quoting *Ames v. Oceanside Welding and Towing Co., Inc., 767 A.2d 677, 681 (R.I. 2001))*.

The Court finds Defendants' first argument unconvincing. The majority of courts that have been presented with this issue **[**68]** have held that the three prong *Ames* standard "encompass price-fixing injuries, and [therefore] consumers subject to collusive pricing possess a cognizable claim under the [Act]." *Chocolate Confectionary, 602 F. Supp. 2d at 587*; *TFT-LCD, 586 F. Supp. 2d at 1129-30*; *DRAM II, 536 F. Supp. 2d at 1144-45*. As such, since EPPs allege anticompetitive conduct, which resulted in consumers purchasing Effexor XR at a premium rate, EPPs have sufficiently alleged unfair conduct under the Rhode Island Unfair Trade Practices and Consumer Protection Act. *See* *DRAM II, 536 F. Supp. 2d at 1145* (allegations that the defendants engaged price fixing "offend[s] public policy as has been established by statute and/or common law").

[*400] Alternatively, Defendants seek dismissal of EPPs' Rhode Island Unfair Trade Practices and Consumer Protection Act claims since they are not "consumers" within the meaning of the Act. ***HN35***[] The Act limits claims to "[a]ny person who purchases or leases goods or services primarily for personal, family, or household purposes." *R.I. Gen. Laws § 6-13.1-5.2(a)*. Citing no supporting case law, EPPs contend that the Act defines "person" to include entities such as corporations, trusts, and associations. However, contrary to EPPs' assertion, ***HN36***[] "the Rhode Island Supreme Court has construed the [Rhode Island Unfair Trade Practices and Consumer Protection Act]to require that only **[**69]** natural persons are permitted to bring private rights of actions under the statute." *In re Dynamic Random Access Memory (DRAM I) Antitrust Litig., 516 F. Supp. 2d 1072, 1117 (N.D. Cal. 2007)* (citing *ERI Max Entm't, Inc. v. Streisand, 690 A.2d 1351, 1354 (R.I. 1997))*; *see also* *TFT-LCD, 586 F. Supp. 2d at 1130* (same); *Sheet Metal Workers, 737 F. Supp. 2d at 423* (same). As such, Defendants' motion for judgment on the pleadings is granted. "However, because there may be unusual circumstances under which a business entity may be able to allege that its purchases were primarily for personal, family or household purposes, the Court will not preclude plaintiffs from amending the complaint to allege such a claim on behalf of business entities." *TFT-LCD, 586 F. Supp. 2d at 1130*.

To sum up, the Court declines to grant judgment as to EPPs' consumer protection claims in California, Nebraska, New Mexico, New York, and North Carolina. However, the Court grants Defendants' motion, without leave to amend as to EPPs' Illinois and Maine consumer protection claims; and *with* leave to amend with regards to EPPs' Rhode Island consumer protection claims.

ORDER

IT IS on this 18th day of September, 2018,

ORDERED that Defendants' Motion for Judgment on the Pleadings (ECF No. 755) is **GRANTED IN PART** and **DENIED IN PART** as follows:

- Defendants' Motion for Judgment on the Pleadings based on preemption principles is **DENIED**;

- Defendants' Motion for Judgment on the Pleadings based on statute **[**70]** of limitations is **DENIED**;

- Defendants' Motion for Judgment on the Pleadings as to EPPs' state consumer protection claims in California, Nevada, New Mexico, New York, and North Carolina is **DENIED**.

- Defendants' Motion for Judgment on the Pleadings as it pertains to EPPs' Arizona, Nevada, and Utah antitrust claims is **GRANTED WITHOUT PREJUDICE**; EPPs are granted leave to amend their Complaint to plead compliance with these notice provisions and, with regards to Utah, include a named plaintiff from Utah;

• Defendants' Motion for Judgment on the Pleadings as it pertains to EPPs' antitrust claims under the laws of the District of Columbia is **GRANTED WITHOUT PREJUDICE**;

• Defendants' Motion for Judgment on the Pleadings as it pertains to EPPs' Massachusetts, West Virginia, Rhode Island, and Tennessee consumer protection claims is **GRANTED WITHOUT PREJUDICE**; EPPs are granted leave to amend their Complaint to plead compliance with Massachusetts and West Virginia's notice provisions, individual claims in Tennessee, **[*401]** and consumer claims under Rhode Island;

• Defendants' Motion for Judgment on the Pleadings as it pertains to EPPs' Illinois and Rhode Island antitrust claims, and EPPs' Illinois and Maine **[**71]** consumer protection claims is **GRANTED WITH PREJUDICE**;

• Defendants' Motion for Judgment on the Pleadings as to Count I of EPPs' Complaint under Kansas, New York, and Tennessee is **GRANTED** to the extent these claims are predicated on unilateral activity by Wyeth.

• EPPs have thirty (30) days from the filing of this Memorandum and Order to file an Amended Complaint, consistent with this Memorandum.

/s/ Peter G. Sheridan

PETER G. SHERIDAN, U.S.D.J.

Beyer v. Symantec Corp.

United States District Court for the Northern District of California

September 21, 2018, Decided; September 21, 2018, Filed

Case No. 18-cv-02006-EMC

Reporter

333 F. Supp. 3d 966 *; 2018 U.S. Dist. LEXIS 162166 **

MONTGOMERY BEYER, Plaintiff, v. SYMANTEC CORPORATION, Defendant.

Subsequent History: Dismissed without prejudice by *Beyer v. Symantec Corp., 2019 U.S. Dist. LEXIS 30625 (N.D. Cal., Feb. 26, 2019)*

Core Terms

Software, products, alleges, consumer, defects, misleading, prong, AntiVirus, omission, misrepresentations, fraudulent, puffery, Engine, argues, unfair, unjust enrichment, representations, vulnerabilities, Enterprise, laptops, source code, advertising, purchasers, disclose, safety hazard, Decomposer, survive, files, taxi, motion to dismiss

LexisNexis® Headnotes

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN1[] **Standing, Elements**

To satisfy U.S. Const. art. III's case or controversy requirement, a plaintiff must demonstrate that he or she has suffered an injury in fact, that the injury is traceable to the defendant's conduct, and that the injury can be redressed by a favorable decision.

Constitutional Law > The Judiciary > Case or Controversy > Standing

HN2[] **Case or Controversy, Standing**

For purposes of U.S. Const. art. III standing, a plaintiff may proceed on class claims against unpurchased products if they are substantially similar to products he has purchased.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN3[] **Trade Practices & Unfair Competition, State Regulation**

The False Advertising Law (FAL), *Cal. Bus. & Prof. Code §§ 17500, et seq.*, prohibits businesses from disseminating statements that are untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading. *Cal. Bus. & Prof. Code § 17500*. The Consumer Legal Remedies Act (CLRA), *Cal. Civ. Code §§ 1750, et seq.* prohibits unfair methods of competition and unfair or deceptive acts or practices in transactions for the sale or lease of goods to consumers. *Cal. Civ. Code. § 1770(a)*. The standards for determining whether a representation is misleading under the FAL apply equally to claims under the CLRA. The Unfair Competition Law (UCL),*Cal. Bus. & Prof. Code §§ 17200, et seq.* prohibits any fraudulent business act or practice, as well as any unfair, deceptive, untrue or misleading advertising or any violation of the FAL. *Cal. Bus. & Prof. Code § 17200*.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN4[] **Heightened Pleading Requirements, Fraud Claims**

Under *Fed. R. Civ. P. 9(b)*, the plaintiff must plead the who, what, when, where, and how of the alleged misconduct. This requires the plaintiff to allege an account of the time, place, and specific content of the false or misleading statements. In addition, the plaintiff must set forth what is false or misleading about a statement, and why.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN5[] **False Advertising, State Regulation**

A misrepresentation must be a specific and measurable claim, capable of being proved false or of being reasonably interpreted as a statement of objective fact. Generalized, vague, and unspecified assertions constitute mere puffery upon which a reasonable consumer cannot rely, and hence are not actionable. Ultimately, the difference between a statement of fact and mere puffery rests in the specificity or generality of the claim. Thus, a statement that is quantifiable, that makes a claim as to the specific or absolute characteristics of a product, may be an actionable statement of fact while a general, subjective claim about a product is non-actionable puffery.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN6[] **Deceptive & Unfair Trade Practices, State Regulation**

An omission is actionable if the omitted fact is (1) contrary to a material representation actually made by the defendant or (2) is a fact the defendant was obliged to disclose. The omitted fact must also be material. A statement is material if a reasonable consumer would deem it important in determining how to act in the transaction at issue. Materiality usually is a question of fact that should be left to the jury unless the statement at issue is obviously unimportant.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN7[] **Deceptive & Unfair Trade Practices, State Regulation**

The second prong of omission to be actionable regards the duty to disclose even in the absence of a particular representation. Traditionally under California law, to state a claim for failing to disclose a defect, a party must allege (1) the existence of a design defect; (2) the existence of an unreasonable safety hazard; (3) a causal connection between the alleged defect and the alleged safety hazard; and that the manufacturer knew of the defect at the time a sale was made.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN8[] **Deceptive & Unfair Trade Practices, State Regulation**

The liability for non-disclosure extends beyond safety hazards by sanctioning a Unfair Competition Law (UCL) omission claim when the plaintiff alleges that the omission was material; second, the plaintiff must plead that the defect was central to the product's function; and third, the plaintiff must allege one of the four LiMandri factors. The LiMandri factors are: (1) when the defendant is in a fiduciary relationship with the plaintiff; (2) when the defendant had exclusive knowledge of material facts not known to the plaintiff; (3) when the defendant actively conceals a material fact from the plaintiff; and (4) when the defendant makes partial representations but also suppresses some material facts. Importantly, the defect must not only be central to the product's function; it must also be physical.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN9[] **Deceptive & Unfair Trade Practices, State Regulation**

In the context of a Unfair Competition Law (UCL) claim, computer software may be characterized as tangible property because the software is recorded in a physical form which has physical existence, takes up space on the tape, disc, or hard drive, makes physical things happen, and can be perceived by the senses. Software is a certain arrangement of matter, which is physically recorded on some tangible medium and constitutes a corporeal body.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Constitutional Law > The Judiciary > Case or Controversy > Standing

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN10[] **Deceptive & Unfair Trade Practices, State Regulation**

Reliance is required to achieve standing under the Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code §§ 17200, et seq.*, False Advertising Law (FAL), *Cal. Bus. & Prof. Code §§ 17500, et seq.*, and Consumer Legal Remedies Act (CLRA), *Cal. Civ. Code §§ 1750, et seq. Cal. Bus. & Prof. Code §§ 17204 (UCL)*, *17535 (FAL)*; *Cal. Civ. Code. § 1780(a)* (CLRA). Reliance is alleged where the misrepresentation or nondisclosure was an immediate cause of the plaintiff's injury-producing conduct, such as where the plaintiff in all reasonable probability would not have engaged in that conduct in the absence of the fraud. A presumption, or at least an inference, of reliance arises where there is a showing that a misrepresentation was material.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN11[] **Deceptive & Unfair Trade Practices, State Regulation**

Knowledge of an undisclosed defect is required for a claim of misrepresentation to lie under the Consumer Legal Remedies Act (CLRA), *Cal. Civ. Code §§ 1750, et seq.* A claim under the False Advertising Law (FAL), *Cal. Bus. & Prof. Code §§ 17500, et seq.*, requires that the defendant have known or reasonably should have known that the statement in question was misleading. *Cal. Bus. & Prof. Code § 17500*. However, knowledge is not required under the Unfair Competition Law (UCL's) fraudulent prong. A claim under the UCL's fraudulent prong, in order to fulfill its purpose of protecting the public, does not require that the deception be known to be false to the perpetrator.

Commercial Law (UCC) > ... > Contract Provisions > Warranties > Implied Warranty of Merchantability

HN12[] **Warranties, Implied Warranty of Merchantability**

Under the Song-Beverly Act, every sale of consumer goods that are sold at retail in this state shall be accompanied by the manufacturer's and retail seller's implied warranty that the goods are merchantable, unless such warranty is properly disclaimed. *Cal. Civ. Code § 1792*. Consumer goods are those that are primarily for personal, family, or household purposes, except for clothing and consumables. *Cal. Civ. Code § 1791(a)*. The warranty means that the goods: (1) Pass without objection in the trade under the contract description; (2) Are fit for the ordinary purposes for which such goods are used; (3) Are adequately contained, packaged, and labeled; (4) Conform to the promises or affirmations of fact made on the container or label. *Cal. Civ. Code § 1791.1(a)*.

Business & Corporate Compliance > ... > Sales of Goods > Title, Creditors & Good Faith Purchasers > Passing of Titles

HN13[] **Title, Creditors & Good Faith Purchasers, Passing of Titles**

Under California law, title passes at the time and place that the seller completes his performance with reference to the physical delivery of the goods. *Cal. Comm. Code § 2401(2)*. Where the contract does not require the seller to deliver the goods to the buyer, title passes to the buyer at the time and place of shipment. *Cal. Comm. Code § 2401(2)(a)*.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Restitution

HN14[] **Types of Contracts, Quasi Contracts**

Courts may construe an unjust enrichment claim as a quasi-contract claim seeking restitution. The doctrine of unjust enrichment applies where plaintiffs, while having no enforceable contract, nonetheless have conferred a benefit on defendant which defendant has knowingly accepted under circumstances that make it inequitable for the defendant to retain the benefit without paying for its value.

Counsel: **[**1]** For Montgomery Beyer, Individually and on behalf of All Others Similarly Situated, Plaintiff: Cassidy Kim, Noah M. Schubert, Robert C. Schubert, Willem F. Jonckheer, LEAD ATTORNEYS, Schubert Jonckheer & Kolbe LLP, San Francisco, CA.

For Symantec Corporation, Defendant: Laurence F. Pulgram, LEAD ATTORNEY, Ciara Nicole McHale, Tyler Griffin Newby, Fenwick & West LLP, San Francisco, CA; Molly Roberta Melcher, Fenwick and West LLP, Mountain View, CA.

Judges: EDWARD M. CHEN, United States District Judge.

Opinion

[*970] ORDER GRANTING IN PART AND DENYING IN PART DEFENDANT'S MOTION TO DISMISS

Docket No. 17

[*971] I. INTRODUCTION

Plaintiff Montgomery Beyer (hereafter "Beyer") brings the instant action alleging that certain network security software products sold by Defendant Symantec Corporation (hereafter "Symantec"), specifically network security software products sold or licensed to consumers under the Norton brand ("Norton Products") and to businesses under the Symantec brand ("Enterprise Products," and together with the Norton Products, the "Affected Products"), contained critical defects. *See* Docket No. 1 ("Compl.") ¶¶ 1-2. Beyer's allegations arise out of a report by Google Inc.'s team of expert cybersecurity **[**2]** analysts, Project Zero, which detail alleged vulnerabilities in a component of Symantec's software, the AntiVirus Decomposer Engine. *Id.* ¶¶ 2, 25. Beyer argues that Symantec advertises that the Affected Products "protects against the latest online threats" or "protects against viruses, spyware, hackers, rootkits, identity theft, phishing scams, and fraudulent Web sites" while knowing that its products suffered from a core decomposer engine defect that exposed entire computer operating systems to various security vulnerabilities. *Id.* ¶¶ 20-24. Beyer further argues that Symantec failed to disclose that it did not implement patches for third-party source code that it used throughout its product line, and various Symantec misrepresentations and omissions form the basis for his causes of action. *Id.*

Beyer asserts five causes of action, namely (i) a California Consumer Legal Remedies Act ("CLRA") claim, *Cal. Civ. Code §§ 1750, et seq.*, (ii) a California Song-Beverly Consumer Warranty Act claim, *Cal. Civ. Code §§ 1790, et seq.*, (iii) a California False Advertising Law ("FAL") claim, *Cal. Bus. & Prof. Code §§ 17500, et seq.*, (iv) a California Unfair Competition Law ("UCL") claim, *Cal. Bus. & Prof. Code §§ 17200, et seq.*, and (v) a claim for "Quasi-Contract/Unjust Enrichment." *Id.* ¶¶ 51-96. Beyer purports to represent a nationwide class **[**3]** combining persons who purchased and/or licensed an Affected Product between December 21, 2005 and September 19, 2016. *Id.* ¶¶ 1, 42-50. Beyer further asserts a consumer subclass for purposes of the claims under the CLRA and the Song-Beverly Act. *Id.* ¶ 43.

Symantec has moved to dismiss for (i) failure to plead the facts and circumstances of the alleged fraud with particularity under *Fed. R. Civ. P. 9(b)*, (ii) failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*, and (iii) lack of Article III standing under *Fed. R. Civ. P. 12(b)(1)*. For the following reasons, the Court **DISMISSES** without prejudice the CLRA, FAL, UCL, and unjust enrichment claims as to the Third Software. The Court also **DISMISSES** Beyer's Song-Beverly Act claim without prejudice. The Court otherwise **DENIES** the motion to dismiss. The motion to strike is also **DENIED**.

II. FACTUAL AND PROCEDURAL BACKGROUND

The complaint alleges the following:

Symantec produces and sells security software under the Symantec and Norton brands. Both the Symantec and Norton products contain a key component called the AntiVirus Decomposer Engine. This component unpacks compressed executable files so that they can be scanned for malicious code. *Id.* ¶ 2. On June 28, 2016, Google's Project Zero team released a report on alleged **[**4]** vulnerabilities in the AntiVirus Decomposer Engine. *Id.* ¶¶ 2, 25. **[*972]** Beyer alleges that Project Zero discovered that the AntiVirus Decomposer Engine was defectively designed so that it unpacked files in the computer operating system's privileged core, which lies at the core of the computing environment and has unrestricted access to and writing permissions for the computer's files ("High Privilege Defect"). *Id.* ¶ 25. Specifically, Beyer alleges this Engine scanned for malicious files by unpacking and examining compressed executable files within the kernel or the root, which resulted from Symantec unnecessarily assigning the highest privilege levels to the file scanning and analysis function. *Id.* The exposure of potentially malicious files in this high-privilege environment opened the operating systems up to corruption. *Id.* ¶ 3. As such, Beyer suggests that Symantec violated a key cybersecurity best practice, the principle of least privilege, which states that software should operate using the least amount of privilege necessary to complete the task. *Id.* ¶ 26; *see also id.* ¶ 35-36 (it appears that Symantec also prescribes the best practice of "run[ning] the principle of least privilege **[**5]** where possible to limit the impact of exploit by threats" as far back as 2007.). Beyer further alleges that Symantec exposed users' computers to a "critical vulnerability" by failing to implement industry-standard security measures such as "sandboxing," *i.e.*, opening files in an isolated virtual environment separate from critical processes and programs. *Id.* ¶ 27. Beyer also alleges that Symantec relied on third party open source code to design this Engine but had failed to update the open source code for at least seven years, resulting in vulnerabilities that caused "total information disclosure" and "total compromise of system integrity" ("Outdated Source Code Defect"). *Id.* ¶¶ 29-30. As a result, Beyer alleges that Symantec sold software that did not conform to cybersecurity best practices, did not reasonably protect users' computer systems against online threats, and made users' computer systems more susceptible to cyberattacks than they would have otherwise been without the software. *Id.* ¶ 7.

Beyer alleges he purchased five Norton Products containing these defects. *See* Compl. ¶¶ 10, 20-24. He seeks recovery for the second and third purchases only. *See* Docket No. 22 ("Opp"), at 8 **[**6]** n.3. Beyer made his second purchase "in March 2009," when he bought Norton 360 Premier, v. 2.0 ("Second Software"). *Id.* ¶ 21. Beyer alleges that prior to making his purchase he reviewed the product page on Symantec's website, which represented that Norton 360 Premier, v. 2.0, "'defends you against a broad range of online threats' through key technologies, including antivirus, antispyware, rootkit detection, and automatic updates," and "provides 'enhanced protection' through 'industry leading virus, spyware and firewall protection.'" *Id.* He does not expressly allege that he relied on any of these statements. *Id.*

"That same year," Beyer purchased another Norton 360 Premier, v. 2.0, from Best Buy ("Third Software"). *Id.* ¶ 22. Prior to doing so, he "reviewed the relevant product page on Best Buy's website" and "relied on similar representations that the Third Software '[p]rotects against viruses, spyware, rootkits, identity theft, phishing scams, and fraudulent Web sites.'" *Id.* Beyer does not allege that Symantec was responsible for the publication of these representations as opposed to, *e.g.*, Best Buy. However, he does allege that, "[t]o the best of his knowledge, Mr. Beyer also reviewed **[**7]** and relied upon the various comparable representations and statements on the software's packaging and box in connection with the purchase." *Id.* Plaintiff also generally alleges that "Plaintiff and the Consumer Subclass relied to their detriment on Defendant's misrepresentations **[*973]** and omissions in purchasing and licensing the Norton Products." Compl. ¶ 62.

III. DISCUSSION

A. Article III Standing as to the Enterprise Products

HN1[↑] To satisfy Article III's case or controversy requirement, a plaintiff must demonstrate that he or she has suffered an injury in fact, that the injury is traceable to the defendant's conduct, and that the injury can be redressed by a favorable decision. *See Fortyune v. Am. Multi-Cinema, Inc., 364 F.3d 1075, 1081 (9th Cir. 2004)*. Here, Beyer purchased Norton Products and brings a putative class comprising anyone who purchased a Norton or Enterprise Product that contained critical defects. *See* Compl. ¶¶ 1-2, 42. Beyer alleges that both Norton Products and Enterprise Products incorporate the AntiVirus Decomposer Engine and were affected by the alleged security flaws. *Id.* ¶ 3. Symantec submits that Enterprise Products differ in that they permit the user to centrally manage the security and data on multiple machines. *See* Docket No. 17 ("Mot.") **[**8]** at 31 (citing Pulgram Decl., Ex. D). Symantec thus contends that there is no similarity in the potential injury, the essential element of the inquiry for Article III standing. *See id.*

However, this does not necessary deprive Beyer of standing to bring class allegations for purchasers of the Enterprise Products. The ability to centrally manage security data does not gainsay the fundamental defect in the way the Symantec products were designed. The same alleged defects exist in both lines of products. Compl. ¶ 3.

This Court, like others in the Northern District, has held that **HN2**[] a plaintiff may proceed on class claims against unpurchased products if they are "substantially similar" to products he has purchased. Swearingen v. Late July Snacks LLC, No. 13-cv-4324-EMC, 2017 U.S. Dist. LEXIS 170928, 2017 WL 4641896, at *5 (N.D. Cal. Oct. 16, 2017) (quoting Astiana v. Dreyer's Grand Ice Cream, Inc., No. C-11-2901 EMC, 2012 U.S. Dist. LEXIS 101371, 2012 WL 2990766 (N.D. Cal. July 20, 2012)).

In *Astiana*, the plaintiffs challenged food labels on Dreyer's ice cream products, some of which they had not purchased. In that case,

> Plaintiffs are challenging the same kind of food products (*i.e.*, ice cream) as well as the same labels for all of the products—*i.e.*, "All Natural Flavors" for the Dreyer's/Edy's products and "All Natural Ice Cream" for the Haagen-Dazs products. **[**9]** That the different ice creams may ultimately have different ingredients is not dispositive as Plaintiffs are challenging the same basic mislabeling practice across different product flavors. Indeed, many of the ingredients are the same . . . .

Astiana, 2012 U.S. Dist. LEXIS 101371, 2012 WL 2990766, at *13. As a result, the Court held that the plaintiffs had alleged sufficiently similarity to survive the pleading stage and that "material differences are better addressed at the class certification stage." *Id.*

Similarly, this Court held in *Swearingen* that the plaintiff had pleaded sufficient similarity between purchased and non-purchased cracker and snack chips, because "the non-purchased products are different flavors of the same Multigrain Snack Chips product purchased by Plaintiffs." Swearingen, 2017 U.S. Dist. LEXIS 170928, 2017 WL 4641896, at *5. "In addition, Plaintiffs have identified a common mislabeling practice across all products." *Id.* *Swearingen* distinguished Kane v. Chobani, No. 12-cv-2425-LHK, 2013 U.S. Dist. LEXIS 134385, 2013 WL 5289253 (N.D. Cal. Sept. 19, 2013), which Defendant in this case also raises. *See* Mot. at 32-33. The *Kane* plaintiffs brought claims regarding Chobani yogurts, some of which they had not purchased. The court there denied standing for the nonpurchased **[*974]** yogurts. But as noted in *Swearingen*, "the court did not hold that the different yogurt products were **[**10]** not substantially similar. Rather, the court found that plaintiffs' complaint contained insufficient information for it 'to discern . . . which products [p]laintiffs are contending contained each representation and for which products these representations were false.'" Swearingen, 2017 U.S. Dist. LEXIS 170928, 2017 WL 4641896, at *6 (quoting Kane, 2013 U.S. Dist. LEXIS 134385, 2013 WL 5289253, at *11).

This case is analogous to Astiana and Swearingen. As in *Astiana*, where the same kind of food product (ice cream) was at issue, the same kind of software product is in dispute here, namely antivirus software. And as in *Astiana*, where the different ingredients did not preclude standing because the plaintiff challenged "the same basic mislabeling practice," the fact that Enterprise Products have central management features does not preclude standing, because Plaintiff alleges the same security defects in the enterprise and consumer products.

Kane is distinguishable for the same reasons discussed in *Swearingen*: The *Kane* complaint failed to specify which products contained the flawed labels, while Plaintiff here has alleged that the AntiVirus Decomposer Engine is in both consumer and enterprise products. *See* Compl. ¶ 1. Defendant's citation of Romero v. HP, Inc., No. 16-cv-5415-LHK, 2017 U.S. Dist. LEXIS 11859, 2017 WL 386237 (N.D. Cal. Jan. 27, 2017), is distinguishable for the same **[**11]** reason. *See* Mot. at 23 (citing *Romero* for its holding that "plaintiff lacked standing for printers she did not purchaser where plaintiff did not plead facts that indicated what misrepresentations were made to each printer, and whether the misrepresentations were false").

Defendant raises a number of dissimilarities between the two product lines, *i.e.*, different purchasers (sophisticated business purchasers compared to lay consumer purchasers), different sales materials, and different marketing channels. *See* Mot. at 31. To Defendant, these dissimilarities would result in dissimilar injuries (though it does not explain how). *See id.* Such arguments can be addressed at a later stage. *See* Astiana, 2012 U.S. Dist. LEXIS 101371, 2012 WL 2990766, at *13. For purposes of the motion to dismiss for standing (not, *e.g.*, class certification), Plaintiff has alleged sufficient similarity between the enterprise and consumer products to proceed. The Court therefore **DENIES** Defendant's 12(b)(1) motion. For the same reasons, the class allegations are not "immaterial" or "impertinent," and the Court **DENIES** Defendant's 12(f) motion to strike those allegations. *See* Mot. at 33-34.

B. Beyer's Fraud Claims Under the UCL, FAL, and CLRA

Beyer alleges that Symantec's statements **[**12]** constitute misrepresentations about its products in violation of the CLRA, the FLA, and the UCL's fraudulent prong. Beyer also alleges that Symantec's failure to disclose the defects was an omission in violation of the same statutes.

HN3[] The FAL prohibits businesses from disseminating statements that are "untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading." *Cal. Bus. & Prof. Code § 17500*. The CLRA prohibits "'unfair methods of competition and unfair or deceptive acts or practices' in transactions for the sale or lease of goods to consumers." *Daugherty v. Am. Honda Motor Co., 144 Cal. App. 4th 824, 833, 51 Cal. Rptr. 3d 118 (2006)* (quoting *Cal. Civ. Code. § 1770(a)*). "The standards for determining whether a representation is misleading under the False Advertising Law apply equally to claims under the CLRA." **[*975]** *Colgan v. Leatherman Tool Grp., Inc., 135 Cal. App. 4th 663, 680, 38 Cal. Rptr. 3d 36 (2006)*. The UCL prohibits "any fraudulent business act or practice," as well as any "unfair, deceptive, untrue or misleading advertising" or any violation of the FAL. *Id. § 17200*. Beyer also alleges that the CLRA and FLA violations violated the UCL's unlawful prong.

Because Beyer's claims sound in fraud, the heightened pleading requirements of *Rule 9(b)* apply. *HN4*[] Under *Rule 9(b)*, the plaintiff must plead the "who, what, when, where, and how" of the alleged misconduct. *Kearns v. Ford Motor Co., 567 F.3d 1120, 1124-25 (9th Cir. 2009)*. This requires the plaintiff **[**13]** to allege "an account of the time, place, and specific content" of the false or misleading statements. *Swartz v. KPMG LLP, 476 F.3d 756, 759, 764 (9th Cir. 2007)* (per curiam) (internal quotation marks and citation omitted). In addition, the "plaintiff must set forth what is false or misleading about a statement, and why." *Vess v. Ciba-Geigy Corp. USA, 317 F. 3d 1097, 1106 (9th Cir. 2003)*.

1. Misrepresentation or Omission

Symantec contends that Beyer's claims must be dismissed because Symantec's statements about Norton 360, v. 2.0, are mere puffery and would therefore not mislead a "reasonable consumer," as required by the statutes at issue. *Consumer Advocates v. Echostar Satellite Corp., 113 Cal. App. 4th 1351, 1360, 8 Cal. Rptr. 3d 22 (2003)*; *Elias, 903 F. Supp. 2d at 854*. Furthermore, Symantec argues that even if the statements were not mere puffery, Beyer has failed to "set forth what is false or misleading about a statement, and why" as required under *Rule 9(b)*. *See Coleman-Anacleto v. Samsung Elecs. Am., Inc., No. 16-cv-02941-LHK, 2016 U.S. Dist. LEXIS 123455, 2016 WL 4729302, at *14 (N.D. Cal. Sept. 12, 2016)*.

a. Affirmative Statements

For the purposes of this motion, the Court only needs to consider whether the following representations are actionable[1] :

- The Second Software "defends you against a broad range of online threats through key technologies, including antivirus, antispyware, rootkit detection, and automatic updates." *See* Compl. ¶ 21.

- The Second Software provides "enhanced protection" through "industry leading virus, **[**14]** spyware and firewall protection." *Id.*

- The statement on Best Buy's website that the Third Software "[p]rotects against viruses, spyware, hackers, rootkits, identity theft, phishing scams, and fraudulent Web sites." *Id.* ¶ 22; *see* Docket No. 23-1.

- The "comparable statements and representations" on the Third Software's packaging and box. *Id.*

---

[1] Representations cited in paragraph 18 and 19 in the Complaint are not actionable as they are all after Beyer's dates of purchase. *See* Compl. ¶¶ 18-19. Beyer's citation of these materials in his opposition to Symantec's motion to dismiss are thus irrelevant. *See* Docket No. 22, at 16-17.

As an initial matter, the statements regarding the Third Software cannot support Beyer's claims. The statement that the software protects against various digital maladies was on Best Buy's website; the FAC does not allege that this statement is attributable to Symantec. In the absence of allegations to the contrary, absent allegations that the statement is attributable to Symantec and not just Best Buy, no claim against Symantec is stated.

In contrast, the "comparable statements and representations" on the packaging and box, *id.*, are attributable to Symantec. However, that allegation runs afoul *Rule 9(b)*, which requires Beyer to identify the statements at issue with particularity. The mere allegation that the statements **[*976]** are "comparable" to those on Best Buy's website are insufficient.

The above claims regarding the Third Software are therefore **DISMISSED [**15]** . Because Beyer may be able to make additional allegations to cure these defects, the dismissal is without prejudice.

That leaves the statements regarding the Second Software. Symantec argues that these statements are puffery.

HN5[] A misrepresentation must be a "specific and measurable claim, capable of being proved false or of being reasonably interpreted as a statement of objective fact." *Rasmussen, 27 F. Supp. 3d at 1039-40* (citing *Coastal Abstract Serv., Inc. v. First Am. Title Ins. Co., 173 F.3d 725, 731 (9th Cir. 1999))*. "Generalized, vague, and unspecified assertions constitute 'mere puffery' upon which a reasonable consumer cannot rely, and hence are not actionable." *Annunziato v. eMachines, Inc., 402 F. Supp. 2d 1133, 1139 (C.D. Cal. 2005)* (citing *Glen Hollywood Entm't, Inc. v. Tektronix, Inc., 343 F.3d 1000, 1005 (9th Cir. 2003))*; *accord* *Consumer Advocates, 113 Cal. App. 4th at 1361 n.3*. "Ultimately, the difference between a statement of fact and mere puffery rests in the specificity or generality of the claim. . . . Thus, a statement that is quantifiable, that makes a claim as to the specific or absolute characteristics of a product, may be an actionable statement of fact while a general, subjective claim about a product is non-actionable puffery." *Demetriades v. Yelp, Inc., 228 Cal. App. 4th 294, 311, 175 Cal. Rptr. 3d 131 (2014)* (quoting *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1053 (9th Cir. 2008))*.

For example, in *Consumer Advocates*, the plaintiffs brought a putative class action against a satellite television company under the UCL, FAL, and CLRA for false or misleading ads. The statements were that the service would provide **[**16]** "crystal clear digital video," "CD-quality" audio, an on-screen program guide showing the schedule "up to 7 days in advance," and 50 channels of content. *Consumer Advocates, 113 Cal. App. 4th at 1353*. The court held that the first two statements were "mere puffing," *id. at 1361 n.3*, and "all-but-meaningless superlatives," as opposed to "factual representations that a given standard is met." *Id. at 1361*. In contrast, the claims regarding 50 channels and 7 days were factual representations. *Id. at 1361-62*.

In *Elias*, a consumer brought a putative class action against Hewlett-Packard. He had purchased a laptop from the manufacturer, and he had selected a customization option for a graphics card that, unbeknownst to him, required a higher power supply than the laptop supplied. This allegedly causes computers to overheat, freeze, crash, and even catch fire. As a result, the plaintiff's laptop malfunctioned and was damaged beyond repair. The plaintiff brought, *inter alia*, claims under the CLRA, FAL, and the fraudulent prong of the UCL for the manufacturer's alleged misrepresentations in the laptop's capabilities. In purchasing the laptop, the plaintiff had relied on statements on the manufacturer's website advertising that the computers at issue had "ultra-reliable performance," **[**17]** "full power and performance," "versatile, reliable system[s]," and were "packed with power" and "delivers the power you need." *Elias, 903 F. Supp. 2d at 854*. The court held that these were "[g]eneralized advertisements" that "say nothing about the specific characteristics or components of the computer." *Id. at 855*. *See also* *Annunziato, 402 F. Supp. 2d at 1140* (statements that a line of laptops has the "latest technology" and "outstanding quality, reliability, and performance" are non-actionable puffery, where plaintiff alleged **[*977]** that the laptops contained a defect that caused them to overheat).

In *L.A. Taxi Cooperative, Inc. v. Uber Techs., Inc., 114 F. Supp. 3d 852, 861 (N.D. Cal. 2015)*, the court determined that some statements made by Uber were puffery while others were sufficiently specific to be actionable. The complaint alleged that Uber's advertising made false or misleading statements about the safety of its service compared to taxis. Of those statements, the court found that "GOING THE DISTANCE TO PUT PEOPLE FIRST" and "BACKGROUND CHECKS YOU CAN TRUST" were generalized, unmeasurable, and subjective claims amounting to puffery. *Id.* However, other statements were actionable non-puffery:

> For example, Uber claims that it is "setting the strictest safety standards possible," that its safety is "already best in class," and that its "three-step **[**18]** screening" background check procedure, which includes "county, federal and multi-state checks," adheres to a "comprehensive and new industry standard." Uber has historically described its background check procedures as "industry-leading." Uber's statements also explicitly compare the safety of its services with those offered by taxi cab companies. For example, a statement on Uber's blog describing its "rigorous" background check procedures reads, "Unlike the taxi industry, our background checking process and standards are consistent across the United States and often more rigorous than what is required to become a taxi driver."

Id. The court concluded that "[a] reasonable consumer reading these statements in the context of Uber's advertising campaign could conclude that an Uber ride is objectively and measurably safer than a ride provided by a taxi or other competitor service, i.e., it is statistically most likely to keep riders from harm." *Id.*

Symantec's statements about the Second Software while somewhat general are sufficiently specific so as to not constitute mere puffery at the pleading stage. This case is similar to *L.A. Taxi*, in which Uber's description of its background checks **[**19]** as "industry-leading" contributed to an actionable impression that an Uber ride is objectively safer. *See id.* Here, while the statement in this case does not contain something akin to the more explicit comparison to competitors, as in *L.A. Taxi*, Symantec's statement that its software is "industry leading" could lead a reasonable consumer to believe that Symantec software would adhere to industry best practices. That is a reasonable inference for purposes of the motion to dismiss. *Cf. L.A. Taxi* ("industry-leading" background checks implied degree of safety). Best practices may be sufficiently concrete to be provable. For instance, Symantec had best-practice guidelines which were violated by the High Privilege Defect and Outdated Source Code Defect. Compl. ¶ 35.

In contrast, Symantec's alleged statement that the software "defends you against a broad range of online threats through key technologies, including antivirus, antispyware, rootkit detection, and automatic updates," Compl. ¶ 21, is similar to the claims in *Elias* that the laptops have "ultra-reliable performance" and "full power and performance," *Elias, 903 F. Supp. 2d at 854*, and the claims in *Annunziato* that the laptops there had "outstanding quality, reliability, **[**20]** and performance." *Annunziato, 402 F. Supp. 2d at 1140*. Those general descriptions are non-actionable puffery.

As for the "industry leading" claim, its misleading nature is dependent on Symantec's failure to disclose the two Defects. The Court therefore turns to California law on misleading omissions.

[*978] b. Omissions

HN6[] An omission is actionable "if the omitted fact is (1) contrary to a [material] representation actually made by the defendant or (2) is a fact the defendant was obliged to disclose." *Gutierrez v. Carmax Auto Superstores Cal., 19 Cal. App. 5th 1234, 1258, 228 Cal. Rptr. 3d 699 (2018)* (alteration in original) (internal quotation marks omitted) (quoting *Daugherty, 144 Cal. App. 4th at 835*); *accord* *Hodsdon, 891 F.3d at 861*. The omitted fact must also be material. *See* *id. at 1256*. As for the first prong, the Defects' existence is contrary to Symantec's representation that its products are "industry leading," as discussed above. The question for the first prong, then, is whether that representation and the omitted fact are material. *See* *id. at 1256, 1258*. A statement is material "if a reasonable consumer would deem it important in determining how to act in the transaction at issue." *Gutierrez, 19 Cal. App. 5th at 1258*. "[M]ateriality usually is a question of fact" that should be left to the jury unless the statement at issue is "obviously unimportant." *Id. at 1262*. Symantec's representation that its products provide "enhanced protection" through **[**21]** "industry leading virus, spyware and firewall protection" is not obviously unimportant. Compl. ¶ 21. The question of materiality survives the motion to dismiss.

The Defects are also material. The complaint alleges that the High Privilege Defect opened up affected machines to "a wide variety of cyberattacks," some of which qualify as "critical" vulnerabilities and require "[v]ery little knowledge or skill" to exploit, according to a standard vulnerability scoring system. *Id.* ¶ 28 (alteration in original). Likewise, the Outdated Source Code Defect allegedly exposed affected machines to "[d]ozens of public vulnerabilities," including some that were publicly known. *Id.* ¶ 29. These vulnerabilities were also rated "critical" and required little knowledge to exploit. *Id.* ¶ 30. Symantec argues that there is no indication that the Defects were ever actually exploited and so they cannot be material. It is true that the complaint lacks any allegations of such exploits. However, Symantec's argument is factual in nature and is premature on a motion to dismiss. At the pleading stage, the court draws reasonable inferences in the plaintiff's favor. Given the allegations described above, it is reasonable **[**22]** to infer that the Defects are important and material, because they affect the effectiveness and function of Affected Products.

HN7[] The second prong of omission under *Gutierrez* regards the duty to disclose even in the absence of a particular representation. Traditionally under California law, "[t]o state a claim for failing to disclose a defect, a party must allege '(1) the existence of a design defect; (2) the existence of an unreasonable safety hazard; (3) a causal connection between the alleged defect and the alleged safety hazard; and that the manufacturer knew of the defect at the time a sale was made.'" *Williams v. Yamaha Motor Co. Ltd., 851 F.3d 1015, 1025 (9th Cir. 2017)* (quoting *Apodaca v. Whirlpool Corp., No. 13-0725 JVS (ANx), 2013 U.S. Dist. LEXIS 176363, 2013 WL 6477821, at *9 (C.D. Cal. Nov. 8, 2013))*.

The requirement in *Williams* that there be a safety hazard has been cast into doubt by recent California Court of Appeal opinions. *See* *Collins v. eMachines, Inc., 202 Cal. App. 4th 249, 134 Cal. Rptr. 3d 588 (2011)*; *Rutledge v. Hewlett-Packard-Co., 238 Cal. App. 4th 1164, 190 Cal. Rptr. 3d 411 (2015)*. These recent appellate decisions extend ***HN8***[] liability for non-disclosure to beyond safety hazards by "sanction[ing] a UCL omission claim when: the plaintiff alleges that the omission was material; **[*979]** second, the plaintiff must plead that the defect was central to the product's function; and third, the plaintiff must allege one of the four *LiMandri* factors." *Hodsdon v. Mars, Inc., 891 F.3d 857, 863 (9th Cir. 2018)* (citing *Collins, 134 Cal. Rptr. 3d at 593-95*). The *LiMandri* factors **[**23]** are: "(1) when the defendant is in a fiduciary relationship with the plaintiff; (2) when the defendant had exclusive knowledge of material facts not known to the plaintiff; (3) when the defendant actively conceals a material fact from the plaintiff; and (4) when the defendant makes partial representations but also suppresses some material facts." *LiMandri v. Judkins, 52 Cal. App. 4th 326, 336, 60 Cal. Rptr. 2d 539 (1997)* (quoting *Heliotis v. Schuman, 181 Cal. App. 3d 646, 651, 226 Cal. Rptr. 509 (1986))*. Importantly, the defect must not only be central to the product's function; it must also be physical. *See* *Hodsdon, 891 F.3d at 864* (*Collins* and *Rutledge* require a "*physical* defect" and the alleged existence of slave labor in chocolate supply chain "is not a physical defect at all, much less one related to the chocolate's function as chocolate").

Although the *Williams* test was employed by the Ninth Circuit in *Wilson v. Hewlett-Packard Co., 668 F.3d 1136 (9th Cir. 2012)*, the California Court of Appeal's decision in *Rutledge* post-dated *Wilson*. And the Ninth Circuit's decision in *Hodsdon* considered whether *Collins* and *Rutledge* effectively overruled *Wilson*'s safety-hazard requirement. In that case, Hodsdon had sued the Mars chocolate manufacturer for failing to disclose that its suppliers used forced and child labor. The district court had dismissed under *12(b)(6)*, and the Ninth Circuit affirmed. In doing so, the court **[**24]** did not decide which of the two standards applied because the court found that the complaint would fail under either standard. *See* *Hodsdon, 891 F.3d at 864*. Nevertheless, it suggested that a non-disclosure claim may lie under either of the standards:

> The recent California cases show that *Wilson*'s safety hazard pleading requirement is not necessary in *all* omission cases, but that the requirement may remain applicable in some circumstances. In other words, *Collins* and *Rutledge* are not necessarily irreconcilable with *Wilson* because, where the challenged omission does not concern a central functional defect, the plaintiff may still have to plead a safety hazard to establish that the defendant had a duty to disclose. For example, . . . *Wilson* may still apply where the defect in question does not go to the central functionality of the product, but still creates a safety hazard.

Id. (footnote omitted).

Because the complaint in the instant case does not allege a safety hazard, the issue under Collins and Rutledge is whether the High Privilege Defect and Outdated Source Code Defect constitute "physical" defects that were "central" to the Affected Products' function.

These Defects may be considered "physical." As the California **[**25]** appellate court has noted in the very context, "**HN9**[] computer software . . . may be characterized as tangible property" because the software is "'recorded in a physical form which has physical existence, takes up space on the tape, disc, or hard drive, makes physical things happen, and can be perceived by the senses.'" *Microsoft Corp. v. Franchise Tax Bd., 212 Cal. App. 4th 78, 87, 150 Cal. Rptr. 3d 770 (2012)* (quoting *South Cent. Bell Tel. Co. v. Barthelemy, 643 So.2d 1240, 1246 (La. 1994))*. Software is "a certain arrangement of matter," which is "physically recorded on some tangible medium[] [and] constitutes a corporeal body." *Id.* (quoting *Barthelemy, 643 So.2d at 1246*). This is unlike the use of child **[*980]** labor in the production of a chocolate bar in *Hodson*, which is non-physical. *See* *Hodsdon, 891 F.3d at 864*.

The next question is whether under *Collins* and *Rutledge* these High Privilege Defect and Outdated Source Code Defect are central to the Affected Products' function. In *Collins* plaintiffs had complained that a computer chip in eMachine computers caused "critical data corruption" of the hard drive. *Id. at 862*. In *Rutledge*, the plaintiffs alleged that defective inverters in Hewlett Packard's laptops caused the screens to darken. These defects are "central to the product's function" because they "render[] those products incapable of use by any consumer." *Id. at 864* (emphasis omitted). In contrast, the *Hodsdon* plaintiff's **[**26]** opposition to the use of slave labor in producing chocolate is "based on subjective preferences" which some consumers do not share. *Id.*

Here, the complaint sufficiently alleges the Defects are central to the function of the Affected Products of safeguarding computers against online threats, virus, spyware, etc. The Defects allegedly open up the operating systems to corruption, create a "critical vulnerability" to online threats, and make computers more susceptible to cyberattacks than they would have otherwise been without the software. Compl. ¶¶ 3, 7, 29-30. Although the complaint does not identify specific instances of resulting damage to computers loaded with the Affected Products, *cf.* *Williams v. Yamaha Motor Co., Ltd., 851 F.3d 1015, 1028-29 (9th Cir. 2017)* (alleged risk of fire in defective motors was speculative where the complaint failed to allege that any customer experienced such a fire), that is not dispositive to a motion to dismiss where all reasonable inferences must be drawn in Plaintiff's favor.[2]

2. Reliance

HN10[] Reliance is required to achieve standing under the UCL, FAL, and CLRA. *See* Cal. Bus. & Prof. Code §§ 17204 (UCL), 17535 (FAL); *Cal. Civ. Code. § 1780(a)* (CLRA); *In re Tobacco II Cases, 46 Cal. 4th 298, 328, 93 Cal. Rptr. 3d 559, 207 P.3d 20 (2009)*. Reliance is alleged where the "misrepresentation or nondisclosure was 'an immediate cause' of the plaintiff's injury-producing conduct," **[**27]** such as where "the plaintiff 'in all reasonable probability' would not have engaged in [that] conduct" in the absence of the fraud. *Id. at 326* (quoting *Mirkin v. Wasserman, 5 Cal. 4th 1082, 1110-11, 23 Cal. Rptr. 2d 101, 858 P.2d 568 (1993)* (Kennard, J., concurring in part and dissenting in part)). "[A] presumption, or at least an inference, of reliance arises where there is a showing that a misrepresentation was material." *Id. at 327*. Materiality is sufficiently alleged, as discussed above.

Symantec argues, however, that Beyer's vague allegations of reliance fall short under Rule 9(b) because he fails to allege he actually read or relied on any representation. *See* Mot. at 18. It is true that Beyer only alleges that he "reviewed the product page" for the Second Software and does not explicitly allege that he saw the statement that the software was "industry leading." Compl. ¶ 21. Nevertheless, it is reasonable to infer for purposes of the motion to dismiss from the fact that he reviewed the product page that he saw the "industry leading" statement on the page.[3]

---

[2] This conclusion is without prejudice to future motions, *e.g.*, for summary judgment or adjudication which take into accord the factual record of, *inter alia*, the frequency of harm suffered as a result of the defects.

[3] Again, this ruling is without prejudice to any future motions or adjudication should the factual record establish Plaintiff cannot meet his burden of proving, *e.g.*, that he saw and read the product statement.

[*981] 3. Knowledge of the Purported Defects at the Time of Sale

Symantec also argues that Beyer fails to sufficiently allege that it knew of the Defects at the time of sale. As an initial matter, Symantec fails to note differences amongst the three **[**28]** statutes as to the knowledge requirement. ***HN11***[] Knowledge of an undisclosed defect is required for a claim of misrepresentation to lie under the CLRA. *See Coleman-Anacleto v. Samsung Elecs. Am., Inc., No. 16-cv-2941-LHK, 2017 U.S. Dist. LEXIS 4314, 2017 WL 86033 (N.D. Cal. Jan. 10, 2017)* (citing *Wilson v. Hewlett-Packard Co., 668 F.3d 1136, 1145 (9th Cir. 2012))*. A claim under the FAL requires that the defendant have known or reasonably should have known that the statement in question was misleading. *See Cal. Bus. & Prof. Code § 17500*. However, knowledge is not required under the UCL's fraudulent prong. *See In re Tobacco II Cases, 46 Cal. 4th at 312* (holding that a claim under the UCL's fraudulent prong, in order to fulfil its purpose of protecting the public, does not require that the deception be "known to be false to the perpetrator" (quoting *Day v. AT&T Corp., 63 Cal. App. 4th 325, 332, 74 Cal. Rptr. 2d 55 (1998))*. The UCL claim therefore survives irrespective of knowledge of falsity.

As for the other claims, Symantec argues that the complaint does not allege that it knew of the defects. It points out that the earliest specific allegation of knowledge is when Project Zero revealed the defects in 2016, seven years after Beyer's 2009 purchase of the Second Software. The allegations that it knew of the defects at the time of sale, Symantec argues, are conclusory. Symantec singles out ¶ 40 of the complaint, which alleges:

> As the proprietary owner and licensor of the Affected **[**29]** Products, Symantec knew, or was otherwise reckless or willfully blind in not knowing, that its AntiVirus Decomposer Engine suffered from extremely serious defects, i.e., the High Privilege Defect and the Outdated Source Code Defect. Furthermore, Symantec knew, or was otherwise reckless or willfully blind in not knowing, that its security practices diverged significantly from its own best practices recommendations.

Beyer's Opposition merely parrots this paragraph. *See* Docket No. 22 ("Opp.") at 16. Despite this, the complaint sufficiently alleges knowledge, because it alleges that Symantec designed and produced the software in question. It plausibly follows from this fact that Symantec knew how the Second Software functioned, including that the software unpacked potentially malicious files in a high-privilege environment. It also plausibly follows that Symantec knew it had used third-party code and knew it did not patch that code when updates were released by the third parties. Furthermore, as early as 2007, Symantec published best-practice guidelines advising readers to the principle of least privilege and to keep third-party code updated. *See* Compl. ¶ 21. Together, this suffices to **[**30]** establish knowledge, which need only be plead generally. *See Fed. R. Civ. P. 9(b)* ("Malice, intent, knowledge, and other conditions of a person's mind may be plead generally."). But the allegations suffice at the pleading stage. The CLRA and FAL claims therefore survive.

In sum, the Court **DISMISSES** without prejudice Beyer's fraud claims as to the Third Software. The motion is otherwise **DENIED**.

4. Song-Beverly Act Claim

HN12[] Under the Song-Beverly Act, "every sale of consumer goods that are sold at retail in this state shall be accompanied by the manufacturer's and retail seller's implied warranty that the goods are merchantable," **[*982]** unless such warranty is properly disclaimed. *Cal. Civ. Code § 1792*. Consumer goods are those that are "primarily for personal, family, or household purposes, except for clothing and consumables." *Id. § 1791(a)*. The warranty means that the goods:

> (1) Pass without objection in the trade under the contract description.
> (2) Are fit for the ordinary purposes for which such goods are used.
> (3) Are adequately contained, packaged, and labeled.
> (4) Conform to the promises or affirmations of fact made on the container or label.

Id. § 1791.1(a). Beyer alleges that Symantec's Second Software violated each of these four warranties. Compl. ¶ **[**31]** 72; *see* Opp. at 21.

Symantec argues that the Song-Beverly claim fails because Beyer failed to allege that the Second Software was "sold at retail in this state." It notes that Beyer is a resident of Michigan and that Beyer alleges only that he "purchased an upgrade to Norton 360 Premier, v. 2.0." Compl. ¶ 21. Beyer's responds that the Second Software's end user license agreement selects California law in its choice of law provision. *See id.* ¶ 11. And ***HN13***[] under California law, title passes at the time and place that "the seller completes his performance with reference to the physical delivery of the goods." *Cal. Comm. Code § 2401(2)*. Where the contract does not require the seller to deliver the goods to the buyer, "title passes to the buyer at the time and place of shipment." *Id.* *§ 2401(2)(a)*. Beyer states in his brief that he bought the Second Software on Symantec's website, and that Symantec "shipped" the product to him from California by electronic delivery, so that titled passed—and thus was "sold at retail"—in California. However, as Symantec correctly points out, these facts are missing from Beyer's complaint. Neither does he allege that the product was electronically delivered to him from California.[4] The Song-Beverly claim is **[**32]** therefore **DISMISSED** with leave to amend.

5. UCL Claim

Apart from the fraudulent and unlawful prongs of the UCL, Beyer also asserts claims under the unfair prong:

> 90. Defendant's actions as alleged in this Complaint constitute an "unfair" practice, because they offend established public policy and are immoral, unethical, oppressive, unscrupulous, and substantially injurious to Defendant's customers. The harm caused by Defendant's wrongful conduct outweighs any utility of such conduct and has caused substantial injury to Plaintiff and the Nationwide Class. Defendant could and should have chosen one of many reasonably available alternatives, including not selling antivirus products that contained fundamental defects with the core engine, disclosing the defects to prospective purchasers, and/or not representing that its products were suitable for ordinary consumer or business use. Additionally, Defendant's conduct was "unfair," because it violated the legislatively declared policies reflected by California's strong consumer protection and false advertising laws, including the CLRA, **[*983]** *CAL. CIV. CODE §§ 1750 et seq.* and the FAL, *CAL. BUS. & PROF. CODE §§ 17500 et seq.*

See Compl. ¶ 90.

As an initial matter, the Court **[**33]** agrees with Symantec that the "unfair" claim relies on the same factual allegations as those underlying the "unlawful" and "fraudulent" claims, meaning it sounds in fraud and *Rule 9(b)* applies. *See* *Kearns v. Ford Motor Co., 567 F.3d 1120, 1127 (9th Cir. 2009)*. Because the allegations regarding the Third Software are lacking under *Rule 9(b)* as discussed above, those claims under the unfairness prong are **DISMISSED** without prejudice. However, the allegations regarding the Second Software are sufficient in this regard.[5]

Symantec also argues that Beyer's unfairness claim fails the applicable substantive standard. Since *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*, the California Court of Appeal has been split on the appropriate standard to apply in a consumer action under the unfair prong of the UCL. In *Graham v. Bank of America, N.A., 226 Cal. App. 4th 594, 172 Cal. Rptr. 3d 218 (2014)*, the court described the three lines of cases on the issue post-*Cel-Tech*. While *Graham* endorsed a line of cases with a "more rigorous test" under which "a plaintiff . . . must show the 'defendant's conduct is tethered to an[] underlying constitutional, statutory, or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***.'" *Id. at 613* (quoting *Wilson v. Hynek, 207 Cal. App.*

---

[4] Symantec also argues that the cases Beyer cites are inapposite because they pertain to conventional purchases not conducted online. *See* Docket No 24 (Reply) at 11. However, California case law supports Beyer's position that *§ 2401(2)(a)* applies to online purchases. *See* *Cal. State Elecs. Ass'n v. Zeos Int'l Ltd., 49 Cal. Rptr. 2d 127, 41 Cal. App. 4th 1270, 1275-77 (1996)*; *see also* *In re Seagate Tech. LLC Litig., No. 16-cv-0523-JCS, 2017 U.S. Dist. LEXIS 137270, 2017 WL 3670779, at *16 (N.D. Cal. Aug. 25, 2017)*.

[5] Symantec also argues that the unfairness claim should fail, because its factual basis overlaps entirely with the fraudulent and unlawful claims, which fail. Because the fraudulent and unlawful claims survive, this argument in inapposite.

4th 999, 1008, 144 Cal. Rptr. 3d 4 (2012)), it acknowledged other courts have applied a broader balancing test of unfairness, *e.g.* weighing **[**34]** the utility of the defendant's conduct against the gravity of the harm to the victim. *Id. at 612-613*.

Under either test, the complaint survives. Under the more rigorous test, Beyer has sufficiently identified a California public policy against misleading marketing statements, as embodied in the CLRA, FAL, and the UCL's fraudulent prong. Because Symantec's statements regarding the Second Software, as alleged, contravene this public policy, Beyer has made out a claim as to that product. *Cf. In re Carrier IQ, Inc., 78 F. Supp. 3d 1051, 1116, 1117 (N.D. Cal. 2015)*.

6. Quasi-Contract/Unjust Enrichment Claim

That leaves Beyer's claim for unjust enrichment. California courts have stated that***HN14***[] courts may construe an unjust enrichment claim "as a quasi-contract claim seeking restitution." *Rutherford Holdings, LLC v. Plaza Del Rey, 223 Cal. App. 4th 221, 231, 166 Cal. Rptr. 3d 864 (2014)*. "The doctrine (of unjust enrichment) applies where plaintiffs, while having no enforceable contract, nonetheless have conferred a benefit on defendant which defendant has knowingly accepted under circumstances that make it inequitable for the defendant to retain the benefit without paying for its value." *Hernandez v. Lopez, 180 Cal. App. 4th 932, 938, 103 Cal. Rptr. 3d 376 (2009)*. Symantec's only argument against the unjust enrichment claim is that it fails because Beyer's other claims fail. Because Beyer's other claims do survive as to the Second Software, the unjust **[**35]** enrichment claim also survives as to that software. The motion is **DENIED** to that extent. But because the claims as to the Third Software do not survive for lack of specificity under *Rule 9(b)*, the unjust **[*984]** enrichment claim is **DISMISSED** without prejudice as to the Third Software.

IV. CONCLUSION

For the foregoing reasons, the Court **DISMISSES** without prejudice the CLRA, FAL, UCL, and unjust enrichment claims as to the Third Software. The Court otherwise **DENIES** the motion to dismiss. The motion to strike is also **DENIED**.

This order disposes of Docket No. 17.

IT IS SO ORDERED.

Opinion

ORDER

ANALISA TORRES, District Judge:

On July **[*2]** 25, 2017, Plaintiffs, Laboratoires Majorelle SAS and Majorelle International SARL (d/b/a Majorelle Luxembourg) (collectively, "Majorelle"), brought this action against Defendants, Apricus Biosciences, Inc. andNexMed (U.S.A.), Inc. (collectively, "Apricus") and Fening International Center S.A. ("Fening"), in Supreme Court, New York County. Conipl., ECF No. 1-1. Plaintiffs allege violations of United States, French, and European Union antitrust laws, illegal restraint on trade, breach of contract, fraud, and unjust enrichment. Defendants removed the case to this Court on August 30, 2017. ECF No. 1. On October 16, 2017, Plaintiffs filed an amended complaint (the "complaint"). ECF No. 40. Defendants move to dismiss the complaint for failure to state a claim pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, ECF Nos. 55, 58, and move in the alternative to strike Plaintiffs' request for pimitive relief, ECF Nos. 56, 58.[1] For the reasons stated below, the motions to dismiss are GRANTED in pari, and the motions to strike are DENIED as moot.

BACKGROUND

The following facts are taken from Plaintiffs' complaint, which the Court accepts as true for purposes of this motion. *See Nielsen v. Rabin, 746 F.3d 58, 62 (2d Cir. 2014)*. Plaintiffs are French and Luxembourgian companies that **[*3]** develop and market pharmaceutical products in France. Am. Compl. ¶¶ 5-6, 11. Defendant Apricus is a San Diego-based pharmaceutical company that develops products in the areas of urology and rheumatology. *Id.* ¶¶ 7, 13. Plaintiffs' claims relate to a pharmaceutical product called Vitaros, a topically applied cream formulation of alprostadil that was developed by Apricus for the treatment of erectile dysfunction. *Id.* ¶¶ 14, 30, 40.

In November 2013, Plaintiffs entered into a License Agreement with Apricus which granted Plaintiffs exclusive rights to Vitaros patents and trademarks in France, Monaco, and French-speaking Africa. *Id.* ¶ 17. The License Agreement contains a non-compete clause in Section 6.1 that prohibits Plaintiffs, during the term of the License Agreement and for a period of three years thereafter, from "(i) Commercializ[ing] any product containing alprostadil in combination with DDAIP.HCL (other than the Licensed Product), (ii) Commercializ[ing] any product that is intended for use in the Field (other than the Licensed Product) or (iii) Commercializ[ing] any generic version of the Licensed Product." *Id.* ¶ 18. The License Agreement defines "Field" as "the treatment of human, male erectile **[*4]** dysfunction for authorized use only." *Id.* In September 2014, Plaintiffs and Apricus entered into a Manufacturing and Supply Agreement, which provided that Apricus and contract manufacturers would supply Vitaros product to Plaintiffs. *Id.* ¶ 22.

Plaintiffs allege that in the first quarter of 2017, they and Apricus reached an agreement in principle to modify the non-compete clause to allow Plaintiffs to sell generic erectile dysfunction pharmaceutical products in France. *Id.* ¶ 28. Pursuant to a contract executed in March 2017 (the "Purchase Agreement"), Apricus sold to Defendant Ferring its non-U.S. assets and rights related to the development and commercialization of Vitaros. *Id.* ¶ 30-31. Pursuant to the Purchase Agreement, Apricus assigned to Ferring its License Agreement with Plaintiffs. *Id.* Plaintiffs allege that, during the second quarter of 2017, they expressed to Ferring their desire to modify the non-compete clause of the License Agreement, but Ferring declined to do so. *Id.* ¶ 32. Instead, Ferring "threatened that Majorelle would be held in breach of the License Agreement if it sold generic erectile dysfunction pharmaceutical products in France during the term of the Agreement." **[*5]** *Id.*

DISCUSSION

I. Legal Standard

To survive a *Rule 12(b)(6)* motion to dismiss, a plaintiff must plead sufficient factual allegations in the complaint that, accepted as true, "state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167*

[1] Separate from Apricus. Ferring submits a motion to dismiss and motion to strike, but "[t]o avoid duplicative briefing . incorporates by reference" Apricus's memoranda of law in support of its motions. Ferr. Mem. at 1. ECF No. 61. The Court, therefore, adjudicates these motions together.

L. Ed. 2d 929 (2007)). A plaintiff is not required to provide "detailed factual allegations" in the complaint, but must assert "more than labels and conclusions[] and a formulaic recitation of the elements of a cause of action." Twombly, 550 U.S. at 555. Ultimately, the facts pleaded in the complaint "must be enough to raise a right to relief above the speculative level." *Id.* On a Rule 12(b)(6) motion, the court may consider only the complaint, documents attached to the complaint, matters of which a court can take judicial notice, or documents that the plaintiff knew about and relied upon. *See* Chambers v. Time Warner, Inc., 282 F.3d 147, 153 (2d Cir. 2002). The court must accept the allegations in the pleadings as true and draw all reasonable inferences in favor of the non-movant. *See* ATSI Commc'ns, Inc. v. Shaar Fund, Ltd., 493 F.3d 87, 98 (2d Cir. 2007).

II. Analysis

A. Antitrust Violations

1. Sherman Act

First, Defendants argue that Plaintiffs' antitrust claims under the Sherman Act must be dismissed because Plaintiffs do not establish antitrust standing or a violation of federal ***antitrust law***. Defs. Mem. at 9, ECF No. 66.

a. Antitrust Injury

An antitrust **[*6]** plaintiff must show antitrust standing, which is a "threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement [a court] must dismiss it as a matter of law." Gatt Commc'ns, Inc. v. PMC Assocs. LLC, 711 F.3d 68, 75 (2d Cir. 2013) (affirming district court's dismissal of complaint for lack of antitrust standing pursuant to Rule 12(b)(6)). In order to demonstrate antitrust standing, a plaintiff must allege, among other things, that it suffered an antitrust injury. Id. at 76. In order to establish antitrust injury, "the plaintiff must demonstrate that its injury is of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 157 (2d Cir. 2016) (internal quotation marks and citation omitted).

Plaintiffs contend that their antitrust injury arises from the scope of the relevant non-compete provisions in the License Agreement, which they argue result in an "unreasonable restraint of trade or commerce." Am. Compl. ¶ 50. Plaintiffs allege that they want to "sell generic erectile dysfunction pharmaceutical products in France," but that Defendants refuse to allow them to do so. *Id.* ¶ 32. "[F]oreign injuries that occur[] in foreign markets," however, are "not the type of injury Congress intended to prevent **[*7]** through . . . the Sherman Act." In re Intel Microprocessor Litig., 452 F. Supp. 2d 555, 563 (D. Del. 2006). Plaintiffs do not argue that they currently participate, or have ever participated, in the U.S. market, Pls. Opp. at 8-15, ECF No. 77, alleging only that the non-compete clauses "prevent[] Plaintiffs from selling products in the [Generic Tablet Market and Generic Vitaros Market] in the United States." Am. Compl. ¶¶ 53, 58. Although a competitor "that has not yet entered a market may also suffer antitrust injury if it was illegally prevented from doing so," the "would-be competitor must demonstrate its 'intention and preparedness' to enter the relevant market." Biocad, JSC v. F. Hoffman-La-Roche, Ltd., No. 16 Civ. 4226, 2017 U.S. Dist. LEXIS 162398, 2017 WL 4402564, at *4 (S.D.N.Y. Sept. 30, 2017) (quoting Reaemco, Inc. v. Allegheny Airlines, 496 F. Supp. 546, 553 (S.D.N.Y. 1980)); *see also* Am. Banana Co. v. United Fruit Co., 166 F. 261, 264 (2d Cir. 1908) ("[I]t is necessary to state facts showing an intention and preparedness to engage in business.").

"In the context of claims involving entrance into the U.S. pharmaceutical market—a highly regulated industry—Plaintiffs alleging intention and preparedness must demonstrate a likelihood of FDA approval of the would-be competitive drug, since such approval is a prerequisite for any drug to enter the U.S. pharmaceutical market." Biocad, 2017 U.S. Dist. LEXIS 162398, 2017 WL 4402564, at *4. Courts, therefore, require plaintiffs to allege that FDA approval of the drug is at least "probable." *Id.; see also* In re Ciprofloxacin Hydrochloride Antitrust Litig., 261 F. Supp. 2d 188, 207 (E.D.N.Y. 2003) (finding no antitrust standing **[*8]** where the complaint "[did] not allege that [plaintiffs] filed an [Abbreviated New Drug Application] or that FDA approval was probable"). Plaintiffs alleging intent and preparedness to enter a pharmaceutical market "typically include facts regarding the stage of the FDA-approval process their product has reached or the steps the plaintiff has taken (or plans to take) to secure approval." Biocad, 2017 U.S. Dist. LEXIS 162398, 2017 WL 4402564, at *4.

Here, Plaintiffs have not merely failed to allege that they filed an Abbreviated New Drug Application or for FDA approval—they have failed to supply any facts whatsoever regarding the FDA approval process for its biosimilars. Plaintiffs vaguely allege that "[p]roducts in the Generic Tablet Market are expected to become commercially available in the United States in the future" and that "[t]here is no cream-based, transdermal medication for the treatment of human erectile dysfunction commercially available in the United States." Am. Compl. ¶¶ 39, 41. Similar to *Biocad*, Plaintiffs here

> provide[] no information about the expected timeline for approval, what clinical trials would be required, whether it has begun conducting clinical trials, its expected FDA application date, whether it has begun preparing **[*9]** an application, whether it has contacted the FDA, whether it has ever obtained approval for other biosimilar drugs from the FDA, or whether its contemplated approval would require a New Drug Application or an Abbreviated New Drug Application.

*2017 U.S. Dist. LEXIS 162398, 2017 WL 4402564, at *4*. Plaintiffs' only allegation regarding intent and preparedness is that they have "the future ability to directly or indirectly sell [generic erectile dysfunction products] in the United States such that the injury is not speculative." Am. Compl. ¶ 63. Plaintiffs, in short, have provided little information from which the Court "may assess the likelihood of approval of its biosimilars, and [have] thus failed to allege more than 'a hope or expectation' of engaging in the U.S. pharmaceutical market." *Biocad, 2017 U.S. Dist. LEXIS 162398, 2017 WL 4402564, at *4* (quoting *Reaemco, Inc., 496 F. Supp. at 554*). Plaintiffs do not dispute this point, arguing only that the fact that they have "not alleged imminent preparedness to enter the relevant market in the United States is irrelevant" because "[t]he locus of imminent harm is France."[2] Pls. Opp. at 14. Indeed, Plaintiffs' factual allegations relate exclusively to their harm in France, not efforts to enter the U.S. market, and "in fact underscore [their] lack of background and experience in the **[*10]** U.S. pharmaceutical market and the absence of contracts to enter the business of selling its biosimilars in the United States." *Biocad, 2017 U.S. Dist. LEXIS 162398, 2017 WL 4402564, at *4*.

For these reasons, the Court finds that Plaintiffs have failed to set forth facts demonstrating its intention and preparedness to engage the U.S. pharmaceutical market, and thus have failed to allege that they have suffered an antitrust injury.

b. Unreasonable Restraint of Trade

Even assuming, *arguendo*, that Plaintiffs allege antitrust injury, they fail to allege the elements of an unreasonable restraint of trade. *Section 1 of the Sherman Act* prohibits "only unreasonable restraints of trade." *In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 61 (2d Cir. 2012)*. Exclusive dealing arrangements, like the one Plaintiffs allege, "must be evaluated under the so-called 'rule of reason.'" *Mazda v. Carfax, Inc., No. 13 Civ. 2680, 2016 U.S. Dist. LEXIS 171418, 2016 WL 7231941, at *4 (S.D.N.Y. Dec. 9, 2016)* (quoting *MacDermid Printing Sols. LLC v. Cortron Corp., 833 F.3d 172, 181-82 (2d Cir. 2016))*. Under the rule of reason, a restraint is unreasonable if its "anticompetitive effects outweigh its procompetitive effects." *E & L Consulting, Ltd. v. Doman Indus. Ltd., 472 F.3d 23, 29 (2d Cir. 2006)* (quoting *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))*. To reach that conclusion, courts engage in a three-step inquiry: first, "the plaintiffs bear an initial burden to demonstrate the defendants' challenged behavior had an actual adverse effect on competition as a whole in the

---

[2] To the extent the complaint can be read to allege injuries in France, those injuries do not give rise to an antitrust injury for the reasons set forth in Part II.A.1.c of this opinion. *See, e.g., Biocad, 2017 U.S. Dist. LEXIS 162398, 2017 WL 4402564, at *4 n.5*; *Turicentro, S.A. v. Am. Airlines Inc., 303 F.3d 293, 307 (3d Cir. 2002)* ("Plaintiffs' injuries occurred exclusively in foreign markets. They are not of the type Congress intended to prevent through . . . the Sherman Act."). It does not matter that—as Plaintiffs argue—"the parties have contractually agreed that the License Agreement is to be governed by and construed in accordance with the laws of New York, including the Sherman Act, *regardless of where the harm occurs*." Pls. Opp. at 9 (emphasis in original). "The subject matter jurisdiction of the federal district courts is limited," *DiNapoli v. DiNapoli, No. 95 Civ. 7872, 1995 U.S. Dist. LEXIS 13522, 1995 WL 555740, at *1 (S.D.N.Y. Sept. 19, 1995)*, and "[a] forum selection clause . . . is not sufficient to confer subject matter jurisdiction on this Court." *Velasquez v. Parmalat SpA, No. 99 Civ. 9038, 2000 U.S. Dist. LEXIS 3376, 2000 WL 294840, at *2 (S.D.N.Y. Mar. 21, 2000)*; *see also* *Cable Television Ass'n v. Finneran, 954 F.2d 91, 94 (2d Cir. 1992)* ("[P]arties may not confer subject matter jurisdiction on the court by consent.").

relevant market." *Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 386 F.3d 485, 506-07 (2d Cir. 2004)* (internal quotation **[*11]** marks, emphasis, and citation omitted). Second, "[i]f the plaintiffs satisfy their initial burden, the burden shifts to the defendants to offer evidence of the pro-competitive effects of their agreement." *Id. at 507*. And third, "[a]ssuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means." *Id.*

At the first step of this analysis, a plaintiff must first allege a relevant, plausible product market that bears a "rational relation to the methodology courts prescribe to define a market for antitrust purposes—analysis of the interchangeability of use or the cross-elasticity of demand." *Todd v. Exxon Corp., 275 F.3d 191, 200 (2d Cir. 2001)* (internal quotation marks omitted). The relevant market must include all products that are "'reasonably interchangeable by consumers for the same purposes,' because the ability of consumers to switch to a substitute restrains a firm's ability to raise prices above the competitive level." *City of New York v. Grp. Health Inc., 649 F.3d 151, 155 (2d Cir. 2011)* (citation omitted). "Absent an adequate market definition, it is impossible for a court to assess the anticompetitive effect of challenged practices." *Re-Alco Indus., Inc. v. Nat'l Ctr. for Health Educ., Inc., 812 F. Supp. 387, 392 (S.D.N.Y. 1993))*. A failure to include reasonably **[*12]** interchangeable products or to assess the cross-elasticity of demand, therefore, renders the market definition legally insufficient and is grounds for granting a motion to dismiss. *See* *Chapman v. N.Y. State Div. for Youth, 546 F.3d 230, 238 (2d Cir. 2008)*.

Plaintiffs allege that Section 6.1(ii) of the License Agreement restrains it in the "Generic Tablet Market," which it defines as "generic oral tablet medications used for the treatment of human, male erectile dysfunction." Am. Compl. ¶¶ 36-39. In describing the relevant market, Plaintiffs allege only that "[p]roducts in the Generic Tablet Market are generally not interchangeable with Vitaros®, and products in the Generic Tablet Market have a low cross-elasticity of demand with Vitaros®." *Id.* ¶ 42; *see also id.* ¶ 52 ("Section 6.1(ii) is unreasonably broad in scope because it prevents Plaintiffs from selling products in the Generic Tablet Market, which are not interchangeable with Vitaros®."). Plaintiffs argue that these facts are sufficient to establish a relevant market for "generic tablet erectile dysfunction medications," and that this market is "separate and distinct from the market for cream-based, topically applied" medications like Vitaros. Pls. Opp. at 12-13. Defendants contend that these allegations are insufficient because **[*13]** (1) they do not explain "why customers would not treat generic tablets, Vitaros, or any other erectile dysfunction treatment as interchangeable substitutes"; (2) they do not explain the product market with well-pled facts including those "regarding cross-elasticity of demand and interchangeable substitutes," and (3) they do not include allegations "about the size of the proposed market, the participants, their market shares, or any other information." Defs. Mem. at 13. The Court agrees.

Although Plaintiffs allege a broad "Generic Tablet Market," they offer no facts "regarding the size of this proposed market, market participants, market shares, or any other information to guide the Court in assessing its validity." *Planetarium Travel, Inc. v. Altour Int'l, Inc., 97 F. Supp. 3d 424, 430 (S.D.N.Y. 2015)*. Plaintiffs argue that *Planetarium* "did not hold that every sufficiently-pled antitrust claim must allege the size of the proposed market, market participants, and market shares," Pls. Opp. at 12, but even so, Plaintiffs still need to allege facts that allow the Court to perform an "analysis of the interchangeability of use or the cross-elasticity of demand for potential substitute products." *Gianna Enters. v. Miss World (Jersey) Ltd., 551 F. Supp. 1348, 1354 (S.D.N.Y. 1982)*. Here, Plaintiffs' allegations as to the relevant product market are limited, **[*14]** vague, and conclusory.[3] *See, e.g.,* *Am. Sales Co. v. AstraZeneca AB, No. 10 Civ. 6062, 2011 U.S. Dist. LEXIS 41182, 2011 WL 1465786, at *3 (S.D.N.Y. Apr. 14, 2011)* (holding that plaintiff's allegations did not plausibly allege a relevant market consisting solely of Prilosec OTC and its generic counterpart where he "failed to allege any product characteristics or evidence of

---

[3] To the extent that Plaintiffs' brief in opposition attempts to defend the complaint's market definition, it sets forth factual representations beyond the four corners of the complaint. *See* Pls. Opp. at 12 n.4 (explaining that the market for Vitaros is distinct because "Vitaros is prescribed by doctors only as a second-line treatment, whereas Cialis® and Viagra® are first-line drugs," and unlike these two products, "Vitaros has virtually no delay and does not require sexual stimulation"). "[A] party is not entitled to amend its complaint through statements made in motion papers." *Wright v. Ernst & Young LLP, 152 F.3d 169, 178 (2d Cir. 1998)*. The Court, therefore, does not consider these assertions because "[n]ew facts and allegations, first raised in a Plaintiff's opposition papers, may not be considered in deciding a motion to dismiss." *Univ. Trading & Inv. Co., Inc. v. Tymoshenko, No. 11 Civ. 7877, 2012 U.S. Dist. LEXIS 176214, 2012 WL 6186471, at *1 (S.D.N.Y. Dec. 12, 2012)*.

consumer buying patterns that limit Prilosec OTC's interchangeability of use or the cross-elasticity of demand," including failure to allege "why a consumer would not view any other number of products as adequate substitutes for treatment of frequent heartburn"); *Gianna Enters., 551 F. Supp. at 1354* ("The Court cannot accept the market boundaries offered by plaintiff without at least a theoretically rational explanation for excluding [potential substitutes]."). The Generic Tablet Market, therefore, is legally insufficient under the Sherman Act. *See Bayer Schering Pharma AG v. Sandoz, Inc., 813 F. Supp. 2d 569, 578 (S.D.N.Y. 2011)* (dismissing *Section 1* claims where plaintiff did not "allege sufficient facts about other [drug] treatments to make its proposed product market plausible").

Plaintiffs also allege that Section 6(iii) of the License Agreement restrains them in the "Generic Vitaros Market," defined as "any generic version of Vitaros®." Am. Compl. ¶ 55. This market, however, is also legally insufficient, as Plaintiffs fail to allege any facts explaining why generic Vitaros **[*15]** is its own product market. *See generally id.* ¶¶ 55-59. Single-brand markets "sidestep[] the need to allege cross-elasticity of demand or any reasonably interchangeable substitutes." *Mooney v. AXA Advisors, LLC, 19 F. Supp. 3d 486, 500 (S.D.N.Y. 2014)*. The Supreme Court has also expressed skepticism for single-brand markets because "this power that . . . manufacturers have over their trademarked products is not the power that makes an illegal monopoly. Illegal power must be appraised in terms of the competitive market for the product." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 392-93, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. Courts, therefore, routinely reject markets defined by a single product or brand. *See, e.g., Planetarium Travel, 97 F. Supp. 3d at 429*; *Integrated Sys. & Power, Inc. v. Honeywell Int'l, Inc., 713 F. Supp. 2d 286, 298 (S.D.N.Y. 2010)* (collecting cases). Without alleging all reasonably interchangeable substitutes for generic Vitaros or a plausible explanation for why the Court should regard competition for generic Vitaros as a market unto itself, Plaintiffs have failed to adequately allege a relevant market, which is an essential element to stating a claim under the Sherman Act.

c. Other Deficiencies

Plaintiffs' antitrust claims under the Sherman Act are also deficient because, in order to state an antitrust claim under the rule of reason, Plaintiffs must allege that the alleged restraint "harmed competition in [the] proposed market." *Mooney, 19 F. Supp. 3d at 503*. Plaintiffs can satisfy **[*16]** this requirement by alleging facts that show "that the alleged restraint had 'an actual adverse effect on competition, such as reduced output,' or by demonstrating an adverse effect 'indirectly by establishing that [Defendants] had sufficient market power to cause an adverse effect on competition.'" *Id.* (quoting *Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 96 (2d Cir. 1998))*. The complaint does not allege that the market has been adversely affected as a result of the non-compete clauses; it alleges only that "[r]estriction of potential sellers of products in such markets has the effect of restricting supply and distribution, ultimately resulting in higher end prices for consumers." Am. Compl. ¶ 60. This is insufficient, however, to allege how either the Generic Tablet Market or the Generic Vitaros Market adversely affects competition or consumers—"*i.e.*, that it causes harm to competition, not just harm to [Plaintiffs]." Defs. Mem. at 14. Without more, this alleged injury does not constitute actionable harm, because "consumers' inability to buy the same product from a different seller only harms that seller, and does no cognizable harm to competition as a whole." *Bookhouse of Stuyvesant Plaza, Inc. v. Amazon.com, Inc., 985 F. Supp. 2d 612, 620 (S.D.N.Y. 2013)*.

Moreover, as Defendants' argue, the *Foreign Trade Antitrust Improvements Act* ("FTAIA") **[*17]** bars Plaintiffs from relying on foreign conduct and injury to prove its Sherman Act claim. *15 U.S.C. § 6a*. Under the FTAIA, only two types of foreign commerce are subject to the Sherman Act: conduct involving import trade or import commerce, and "conduct involving nonimport trade or nonimport commerce when that conduct (1) has a direct, substantial, and foreseeable effect on import trade or import commerce, and (2) the Sherman Act claim arises out of that effect." *Biocad, 2017 U.S. Dist. LEXIS 162398, 2017 WL 4402564, at *7* (internal quotation marks and citation omitted). Courts refer to the first category as the "import exception" and the second as the "domestic effects exception." *Id.*

The allegations plainly do not fall within the first type of foreign commerce, as Plaintiffs do not allege any foreign anticompetitive conduct "with an immediate impact on U.S. markets."[4] *Maricultura Del Norte v. World Bus. Capital, Inc., 159 F. Supp. 3d 368, 383 (S.D.N.Y. 2015)*. Plaintiffs' claims similarly do not fall within the domestic effects exception. This exception requires two distinct inquiries: "one asking whether the defendants' foreign conduct caused a cognizable domestic effect, and the other asking whether that effect caused the plaintiff's injury." *Lotes Co. v. Hon Hai Precision Indus. Co., 753 F.3d 395, 414 (2d Cir. 2014)*. In *Biocad*—a factually similar case—the plaintiff alleged that the defendants' foreign conduct prevented **[*18]** him from entering the U.S. market, which would have the "eventual domestic effect of driving up the price of the [d]rugs in the United States." *2017 U.S. Dist. LEXIS 162398, 2017 WL 4402564, at *10*. The *Biocad* Court held that this "attenuated chain of causation [was] insufficient to establish a 'direct, substantial, and reasonably foreseeable effect' under the FTAIA." *Id.* Here, Plaintiffs' allegation that "[r]estriction of potential sellers of products in such markets . . . ultimately result[s] in higher end prices for consumers" leads the Court to similarly conclude that Plaintiffs have not demonstrated either a direct, substantial, or reasonably foreseeable effect on U.S. commerce. Am. Compl. ¶ 60. Nor do Plaintiffs sufficiently allege that any such effect gives rise to a claim under the Sherman Act, instead alleging facts that suggest the opposite—that neither generic tablets nor generic Vitaros are currently available or FDA-approved in the United States—and thus that there is no effect. *Id.* ¶¶ 39, 41.

With respect to the injury suffered, Plaintiffs allege that the non-compete clauses prevent them from selling products in the Generic Tablet and Generic Vitaros Markets in the United States. *Id.* ¶¶ 53, 58. Plaintiffs allege, however, **[*19]** that while they are "ready to sell generic erectile dysfunction products in France," they only "[have] the future ability to directly or indirectly sell in the United States." *Id.* ¶ 63. Any alleged harm suffered by Plaintiffs, therefore, has been directly caused by the foreign effects of Defendants' alleged conduct, namely lost foreign sales in France. The FTAIA, however, requires a plaintiff to allege that its claims were directly caused by the *domestic effects* and not the foreign effects. *Compare* *In re Vitamin C Antitrust Litig., 904 F. Supp. 2d 310, 319 (E.D.N.Y. 2012)* (finding that domestic effects exception applied where defendants' agreement to restrain production and fix vitamin C prices increased prices of vitamin C to be delivered to the United States), *with In re Dynamic Random Access Memory (DRAM) Antitrust Litig., 546 F.3d 981, 989 (9th Cir. 2009)* (domestic effects exception not satisfied where plaintiff was "a foreign consumer that made its purchases entirely outside of the United States"). Here, Plaintiffs' alleged injuries flow from Defendants' allegedly anticompetitive foreign conduct, not the domestic effects of that conduct. They are, therefore, the type of "independently caused foreign injur[ies]" that fall outside the reach of the domestic effects exception.[5] *Lotes, 753 F.3d at 414*.

Accordingly, Defendants' motion to dismiss Plaintiffs' antitrust **[*20]** claim under the *Sherman Act* (First Cause of Action) is GRANTED.

2. Foreign Laws

Plaintiffs also bring their antitrust claim against Defendants under French and European Union antitrust laws. Am. Compl. ¶¶ 35-66. Defendants argue that, upon dismissal of Plaintiffs' antitrust claim based on U.S. law, the Court should decline to exercise supplemental jurisdiction over those based on foreign law. Defs. Mem. at 19. The Court agrees that supplemental jurisdiction would not be properly exercised as to Plaintiffs' antitrust claims based on foreign law. Under *28 U.S.C. § 1367(c)(3)*, "district courts may decline to exercise supplemental jurisdiction over a

---

[4] Indeed, Plaintiffs allege no facts suggesting any impact on U.S. markets, stating only that: (1) Plaintiffs are "ready to sell generic erectile dysfunction products in France"; (2) Plaintiffs have the "future ability to directly or indirectly sell same in the United States"; and (3) "[r]estriction of potential sellers of products in such markets has the effect of restricting supply and distribution, ultimately resulting in higher end prices for consumers." Am. Compl. ¶¶ 60, 63.

[5] Plaintiffs' failure to address this argument in their opposition brief, moreover, provides an independent basis to dismiss this claim. Pls. Opp. at 8-15. *See* *M.M. ex rel. J.M. v. New York City Dep't of Educ., No. 09 Civ. 5236, 2010 U.S. Dist. LEXIS 75127, 2010 WL 2985477, at *6 (S.D.N.Y. July 27, 2010)* (holding that plaintiffs' failure to respond to defendant's arguments constitutes an abandonment because "[b]y standing mute in the face of the [defendant's] jurisdictional challenge, Plaintiffs effectively concede that they cannot carry their burden and that the Court lacks subject matter jurisdiction over the claims against [defendant]").

claim . . . if . . . the district court has dismissed all claims over which it has original jurisdiction." The factors relevant to this discretionary determination favor declining to exercise supplemental jurisdiction here, as antitrust is a novel, developing area of law, and the Court has no familiarity with France's or the European Union's antitrust laws. *See, e.g., Info. Res., Inc. v. Dun & Bradstreet Corp., 127 F. Supp. 2d 411, 418 (S.D.N.Y. 2000)* (declining to exercise supplemental jurisdiction because the antitrust claims "present[ed] sufficiently novel and complex issues of foreign law").

Accordingly, Plaintiffs' antitrust claim under foreign **[*21]** law (First Cause of Action) is DISMISSED without prejudice to renewal in state court.

B. State Law Claims

Plaintiffs also assert common law claims for illegal restraint on trade, breach of contract, unjust enrichment, and fraud. Am. Compl. ¶ 67-105. Having dismissed Plaintiffs' federal law claim, the Court declines to exercise supplemental jurisdiction over these state law claims pursuant to *28 U.S.C. § 1367(c)*. *See* *Pension Benefit Guar. Corp. ex rel. Saint Vincent Catholic Med. Ctrs. Ret. Plan v. Morgan Stanley Inv. Mgmt. Inc., 712 F.3d 705, 727 (2d Cir. 2013)* ("[I]n the usual case in which all federal-law claims are eliminated before trial, the balance of factors to be considered under the pendent jurisdiction doctrine—judicial economy, convenience, fairness, and comity—will point toward declining to exercise jurisdiction over the remaining state-law claims.").

Accordingly, Plaintiffs' common law antitrust, breach of contract, unjust enrichment, and fraud claims (Second, Third, Fourth, and Fifth Causes of Action) are DISMISSED without prejudice to renewal in state court.

C. Motions to Strike

Defendants also move to strike Plaintiffs' request for punitive damages. ECF Nos. 56, 58. In light of the foregoing, these motions are moot.

CONCLUSION

For the reasons stated above, Defendants' motions to dismiss are GRANTED with respect to Plaintiffs' Sherman **[*22]** Act claim. Because the Court declines to exercise supplemental jurisdiction over Plaintiffs' foreign and state law claims, those claims are DISMISSED without prejudice to renewal in state court. Defendants' motions to strike Plaintiffs' request for punitive relief are DENIED as moot.

The Clerk of Court is directed to terminate the motions at ECF Nos. 55, 56, and 58, and to close the case.

SO ORDERED.

Opinion

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS

Re: Dkt. No. 22

Now before the Court is the motion to dismiss filed by Defendants Uber Technologies, Inc., Uber USA, LLC, RASIER, LLC, and RASIER-CA, LLC **[*2]** (collectively, "Defendants" or "Uber"). The Court has considered the parties' papers, relevant legal authority, and the record in this case, and it HEREBY GRANTS IN PART and DENIES IN PART Defendants' motion to dismiss, but affords Plaintiff leave to amend.

BACKGROUND

Prior to July 2012, there were three types of private, for-hire ground transportation in San Francisco: (i) passenger stage corporations ("PSCs"), which are shuttles driven by commercially-licensed drivers; (ii) charter-party carriers ("TCPs"), which are limousines and luxury sedans driven by commercially-licensed drivers; and (iii) taxicabs or taxis, which are driven by specially-permitted drivers. (Dkt. No. 1 (Complaint) ¶ 17.) PSCs provide shuttle transportation service to the general public on fixed routes or otherwise scheduled service. (*Id.* ¶ 18.) Customers hire TCPs on a prearranged basis through a TCP-permitted company for the exclusive use of an individual or group. (*Id.*) The California Public Utilities Commission ("CPUC") regulates and licenses PSCs and TCPs. (*Id.*) There is no cap on the number of PSCs or TCPs that may operate in San Francisco and no cap on fees that PSCs or TCPs may charge passengers. (*Id.*)

The **[*3]** San Francisco Municipal Transportation Agency ("SFMTA") regulates and permits taxis. (*Id.* ¶ 19.) The taxi industry provides ride-hail ground transportation services originating in the City and County of San Francisco through smartphone applications, telephone dispatch, and street hails. (*Id.*) The SFMTA sets fare rates for taxis. (*Id.* ¶ 69.)

I. Uber's Business Model.

Plaintiff DeSoto Cab Company, Inc. d/b/a Flywheel Taxi ("Flywheel") is a San Francisco-based taxicab company that has been operating in the San Francisco "ride-hail" market since the 1930s. (*Id.* ¶¶ 2, 20.)

Uber currently operates in the San Francisco "ride-hail" market by allowing users/customers to use a smartphone application to request rides. (*Id.* ¶ 22.) Uber formed in 2009 with approximately $200,000 in seed funding. (*Id.* ¶ 33.) Since that time, Uber has raised more than $15 billion in private venture capital funding. (*Id.*) Uber has yet to turn a profit. (*Id.* ¶ 46.) Flywheel alleges that Uber's internal business policies, driver incentives, and its purportedly predatory pricing behavior in the market is designed to eliminate competition and result in an eventual monopoly. (*Id.* ¶¶ 46, 71, 72, 75.)

Uber generates revenue **[*4]** by taking a percentage of the money passengers pay for rides booked through the Uber smartphone application. (*Id.* ¶ 34.) At the end of each trip, Uber charges the passenger's credit card based on the time and distance of the trip, withholds its percentage as a commission, and deposits the remainder into each driver's bank account on a weekly basis. (*Id.* ¶¶ 34, 35.) As of the time of the writing of the Complaint, Uber's standard commission was twenty-five percent, but historically the commission has ranged from zero to thirty percent. (*Id.* ¶ 35.) In October 2011, Uber introduced "surge pricing," a system where ride price increases during increased demand. (*Id.* ¶ 36.)

Uber drivers provide their own personal vehicles (that comport with Uber's make-and-model requirements) and pay for their own personal liability insurance. (*Id.* ¶ 39.) Other costs that Uber drivers assume are maintenance, cleaning, and vehicle depreciation, as well as data usage for streaming music, ten dollars a week for use of an Uber iPhone containing the Uber application, toll charges, and tickets and citations. (*Id.* ¶¶ 41, 42.)

II. Uber Services and Pricing.

In the summer of 2010, Uber began operations as "UberCab," a **[*5]** service that dispatched TCP-licensed vehicles and commercially-licensed drivers. (*Id.* ¶ 26.) Sometime thereafter, Uber dropped the "Cab" from the company moniker and began providing its services as "UberBlack." (*Id.* ¶ 28.) On July 4, 2012, Uber introduced a service called "UberX," which Uber marketed as a lower cost alternative to UberBlack. (*Id.* ¶¶ 22, 29.) UberX dispatched transportation in the form of non-TCP-licensed vehicles and directly competed with taxi companies. (*Id.*) UberX rates were initially higher than taxi rates, but lower than UberBlack rates. (*Id.* ¶ 29.)

The same day that Uber rolled out UberX, it introduced UberSUV. (*Id.* ¶ 30.) UberSUV services were provided by commercially-licensed drivers in TCP-licensed luxury vehicles. (*Id.*) UberSUV rates were higher than UberBlack rates. (*Id.*) On October 17, 2012, Uber introduced UberTaxi, which allowed customers to request a traditional taxi through the Uber smartphone application. (*Id.* ¶ 31.) Uber charged taxi rates for this service, plus a nominal booking fee and a twenty percent gratuity. (*Id.*)

Finally, on May 12, 2014, Uber introduced "UberXL." (*Id.* ¶ 32.) UberXL drivers were not commercially-licensed, and UberXL vehicles **[*6]** were not TCP-licensed. (*Id.*) UberXL's rates were about half as expensive as UberSUV. (*Id.*)

Flywheel's predatory pricing allegations center upon UberX (non-TCP-licensed vehicles) and UberXL (non-commercially-licensed drivers and non-TCP-licensed vehicles) services. Flywheel alleges that Uber, beginning in June of 2013, began lowering its prices at semi-regular intervals, periodically making false claims about its prices relative to taxi prices, and ultimately lowering its prices so much that Uber lost money on each ride and was forced to subsidize driver income due to depressed fares.

Between July of 2012 (when UberX was launched) and June 2013, Uber increased the base rate, per-mile rate, and per-minute-idle-time rate for UberX services in San Francisco. (*Id.* ¶¶ 48, 49.) Then, in June of 2013, Uber significantly lowered its UberX rates. (*Id.* ¶ 51.) Though Uber advertised these new prices as "10 percent lower than taxi prices" and promoted UberX as offering "cheaper-than-taxi" pricing, UberX's June 2013 prices were similar to contemporary taxi rates. (*Id.* ¶¶ 50, 51.)

In January of 2014, Uber cut UberX rates again and claimed its fares were twenty-six percent cheaper than taxi fares. (***[*7]*** *Id.* ¶¶ 53, 54.) At the same time, Uber reduced its own commission on UberX rides by seventy-five percent (from twenty percent to five percent), which (at least partially) offset the drivers' income losses from the reduced fares. (*Id.* ¶ 55.)

In April of 2014, Uber restored its commission to twenty percent. (*Id.* ¶ 57.) Uber claimed the January 2014 rate cuts were temporary, but, as of the writing of the Complaint, UberX prices had not returned to pre-January 2014 levels. (*Id.*) In June of 2014, Uber reduced UberX rates again. (*Id.* ¶¶ 59, 63.) Uber emailed its San Francisco users that these new fares were "45 percent cheaper than a taxi" and that UberX was "the most affordable ride on the road." (*Id.*)

Uber subsidized UberX drivers' incomes to offset this latest price cut, paying drivers more than Uber was charging passengers. (*Id.* ¶ 61.) In January of 2016, UberX lowered its prices yet again. (*Id.* ¶ 64.) After this latest cut, UberX's rates were approximately a third of what they had been in June of 2013. Flywheel alleges UberX lost money on every UberX ride after June 2013. (*Id.* ¶ 52, 56, 64.) Likewise, Flywheel alleges that Uber lost money on each UberXL ride from May 2014 onward. (*Id.* **[*8]** ¶¶ 58, 65.)

In August of 2016, Uber instituted "Uber Plus." (*Id.* ¶ 66.) Uber Plus passengers in San Francisco pay thirty dollars per month in return for forty UberX rides per month. (*Id.*) Uber subsidized drivers' earnings on this flat rate, so that drivers receive the income they would on a normally-priced ride. (*Id.* ¶ 67.) Flywheel alleges that UberTaxi allows users to hail taxis at rates higher than the prevailing SFMTA-regulated taxi rate. (*Id.* ¶ 69.) Flywheel further alleges that UberTaxi "improperly inflated" taxi fares, further enabling Uber to undercut taxi pricing. (*Id.*)

Flywheel alleges that Uber's below-cost pricing for UberX, UberXL, and Uber Plus, subsidized by venture capital, is designed to drive taxi companies out of business. (*Id.* ¶¶ 71, 75.) Once taxi companies have been pushed out of the market, Flywheel alleges, Uber will recoup its losses by raising prices. (*Id.*)

Flywheel alleges that Uber's intent to monopolize is clear from the company's pricing behavior, advertising strategy, and the CEO's statements that he wishes to "destroy" competition using below-cost pricing. (*Id.* ¶¶ 72-74.) Flywheel alleges that Uber has captured more than seventy percent of what it calls **[*9]** the San Francisco Ride-Hail Market (ride-hail ground transportation service provided by private vehicles not licensed as "TCP" or "PSC," providing service in the City and County of San Francisco and the San Francisco International Airport). (*Id.* ¶¶ 15, 75.) Flywheel also alleges that from July of 2012 through the writing of the Complaint, taxi companies have experienced a sixty-five percent drop in ridership. (*Id.* ¶ 24.)

III. Uber Drivers.

Flywheel contends that Uber made multiple misrepresentations to its prospective and current UberX and UberXL drivers. Flywheel avers that, at each UberX price-cutting juncture (June 2013, January 2014, and June 2014), Uber represented to current and prospective UberX drivers that they would earn more money per hour due to Uber's price cuts. (*Id.* ¶¶ 76-78.) Flywheel alleges, however, that, despite working more, UberX drivers earned less each time Uber cut fares. (*Id.* ¶ 79.)

Flywheel also alleges that, beginning in May of 2014 and up through the present date, Uber misrepresented statistics regarding median driver earnings to current and prospective UberX drivers. (*Id.* ¶¶ 81, 82.) Flywheel further alleges that Uber misrepresented to current and potential **[*10]** UberX and UberXL drivers that they would keep eighty percent of their collected fares and that Uber would provide free smartphones. (*Id.* ¶¶ 84, 85.) Flywheel also alleges that Uber made misrepresentations to UberX and UberXL drivers about taxi drivers' income and costs. (*Id.* ¶¶ 87, 88.) Flywheel contends these misrepresentations lured drivers into working as UberX and UberXL drivers and away from driving taxis. (*Id.* ¶¶ 80, 83, 86, 89, 90.)

Flywheel alleges that Uber's vehicle-access programs trap its drivers into relationships with Uber. In November of 2013, Uber introduced the "Vehicles Solutions Program," a program that offered financing from subprime lenders to Uber drivers to facilitate the purchase of an Uber-approved vehicle. (*Id.* ¶ 43.) The Vehicle Solutions Program requires an initial cash deposit of approximately $2,000, and, once a driver is enrolled, Uber automatically deducts the driver's car payments from his or her weekly earnings until the loan is paid. (*Id.* ¶ 44.)

In July of 2015, Uber introduced "Xchange Leasing." (*Id.* ¶ 45.) Under this program, Uber offers subprime automobile leases to Uber drivers with low credit scores. (*Id.*) As with the Vehicle Solutions Program, **[*11]** Uber deducts lease payments from enrolled drivers' weekly earnings. (*Id.*) Flywheel has alleged that Uber's aim in offering both of these programs is to make it difficult for Uber drivers to stop driving for Uber. (*Id.* ¶¶ 44, 45.) Flywheel also contends that these programs have effectively deterred Uber drivers from working as taxi drivers. (*Id.* ¶¶ 80, 83, 86, 89, 90.)

Flywheel contends that from July of 2012 through the writing of the Complaint, taxi companies have lost more than thirty percent of their drivers. (*Id.* ¶ 24.)

IV. The Public.

Flywheel claims that Uber made multiple misrepresentations to prospective and current customers. Flywheel alleges that in June of 2013, January of 2014, and June of 2014, Uber made false representations to the public regarding UberX prices relative to the cost of taxi prices. (*Id.* ¶¶ 91-94.) Flywheel contends that, from June of 2013 through the writing of the Complaint, Uber occasionally charged UberX customers "surge" prices above advertised UberX prices. (*Id.* ¶¶95-100.) Flywheel further alleges that, beginning in November of 2011 and continuing through April of 2016, Uber misrepresented that fares charged through the smartphone application for UberX **[*12]** and UberXL services included tips. (*Id.* ¶¶ 101, 102.)

Flywheel further contends that Uber misrepresented the accuracy and reliability of its application feature that allows passengers to track UberX and UberXL vehicles. (*Id.* ¶¶ 104, 105.) Flywheel alleges that Uber misrepresented the quality of the background checks it conducted on its drivers relative to the background checks taxi companies conduct of taxi drivers. (*Id.* ¶¶ 107, 108.)

V. Violations of Federal, California, and Municipal Laws and Regulations.

Finally, Flywheel contends that Uber's policies and practices violate a host of federal, California, and municipal laws and regulations. Flywheel alleges that UBER discriminates against individuals with disabilities and non-white passengers by failing to comply with federal and California regulations. (*Id.* ¶¶ 110, 111.) Flywheel alleges that UBER violates California law by requiring drivers to maintain their own insurance policies, preventing drivers from registering UberX and UberXL vehicles as commercial vehicles, and failing to provide a driver training program for UberX and UberXL drivers. (*Id.* ¶¶ 112-114.) Flywheel alleges that Uber violates San Francisco municipal laws by failing **[*13]** to comply with laws regulating taxis, refusing to register applicable vehicles with San Francisco International Airport, failing to carry appropriate liability insurance, refusing to participate in the Paratransit program, charging more than SFMTA-approved meter rates during surge pricing, and charging drivers more than the daily lease fee authorized by the Transportation Code, among other things. (*Id.* ¶¶ 115-124.)

Flywheel brings seven causes of action against Uber: (i) monopolization and (ii) attempted monopolization under the Sherman Antitrust Act, (iii) violations of California's unfair practices act for sales below cost and (iv) loss leader practices, (v) violation of the federal Lanham Act, (vi) intentional interference with prospective economic advantage, and (vii) violation of California's unfair competition law.

ANALYSIS

I. Appropriate Legal Standard.

A complaint must contain a "short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. "[D]etailed factual allegations are not required" to survive a motion to dismiss if the complaint contains sufficient factual allegations to "state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Bell Atl. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "Labels **[*14]** and conclusions[] and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 50 U.S. at 555*.

When evaluating a *Rule 12(b)(6)* motion to dismiss, a district court accepts as true all material facts alleged in the complaint and draws all reasonable inferences in favor of the plaintiff. *Faulkner v. ADT Servs., Inc., 706 F.3d 1017, 1019 (9th Cir. 2013)*. A district court should grant leave to amend unless the court determines the pleading could not "possibly be cured by the allegation of other facts." *Lopez v. Smith, 203 F.3d 1122, 1130 (9th Cir. 2000)*.

II. Sherman Act.

Protecting competition, not individual competitors, is at the heart of antitrust regulation. *See Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. Accordingly, antitrust laws target only behavior that tends to reduce (or actually reduces) competition. *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*; *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 109-10, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* ("[I]t is inimical to the antitrust laws to award damages for losses stemming from continued competition." (citation and quotation omitted)).

To successfully plead monopolization under the *Sherman Act*, a plaintiff must allege: (i) a market participant has monopoly power in the relevant market and (ii) is willfully acquiring or maintaining monopoly power. *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 480-81, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. "[G]rowth or development as a consequence of a superior product, business acumen, or historic accident" is not prohibited behavior. *Id. at 481*. A private plaintiff must also plead the defendant's anticompetitive **[*15]** behavior has injured it. *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995)*.

To successfully plead *attempted* monopolization under the Sherman Act, a private plaintiff must allege: (i) predatory or anticompetitive conduct (ii) pursued with the specific intent to control prices or destroy competition; (iii) a dangerous probability the defendant will achieve a monopoly or monopoly power; and (iv) injury stemming from the complained-of anticompetitive behavior. *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1202 (9th Cir. 1997)* (citations omitted).

Uber argues that Flywheel's monopolization and attempted monopolization claims are deficient for the same reasons.

A. Flywheel Sufficiently Alleges Relevant Market.

Uber first argues that Flywheel has incorrectly defined the appropriate product market.[1] In order to state a valid claim for monopolization or attempted monopolization, a plaintiff must allege that a "relevant market" exists and that the defendant has power within that market. *Newcal Indus., Inc. v. Ikon Office Sol., 513 F.3d 1038, 1044 (9th Cir. 2008)*.[2] The sufficiency of allegations concerning the "relevant market" is a factual, rather than legal, question; therefore, a Sherman Act claim survives a *Rule 12(b)(6)* motion to dismiss unless the alleged market suffers from a fatal legal defect. *Id. at 1045*; *see High Tech. Careers v. San Jose Mercury News, 996 F.2d 987, 990 (9th Cir. 1993)* (market definition depends on "a factual inquiry into the 'commercial realities' faced by **[*16]** consumers") (citation omitted).

To avoid a fatal legal defect, the relevant market must be a "product market," rather than a market whose boundaries are delineated by consumers. *Id.* (citations omitted). A market must also encompass all economic substitutes for the product at issue. *Id.* The relevant market must include the group of service providers "who have [the] actual or potential ability to deprive each other of significant levels of business." *Thurman Indus., Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1374 (9th Cir. 1989)*.

A degree of fungibility demarcates the outer boundaries of a product market: the court must look to whether the market, as the plaintiff defined it, includes all reasonably interchangeable products and whether there is cross-elasticity of demand between the product and its substitutes. *Olin Corp. v. FTC, 986 F.2d 1295, 1298-99 (9th Cir. 1993)* (citation omitted). Practically, cross-elasticity means that if the price of one good increases, demand for the purportedly equivalent good will increase, as consumers substitute the equivalent good for their initial, now relatively expensive, choice: "[i]f consumers view the products as substitutes, the products are part of the same market." *Rebel Oil Co., 51 F.3d at 1435*.

Defining the appropriate product market is unquestionably one of the thorniest questions of anti-trust law. Flywheel **[*17]** defines the relevant product market as "ride-hail ground transportation service provided in private vehicles that are not licensed as 'TCP' or 'PSC.'" (Complaint ¶ 15.)[3] Uber contends this definition is improperly narrow, first, because it excludes TCPs and PSCs and, second, because it excludes public transportation, bicycling, private automobiles, car-sharing, pedicabs, and walking. The Court disagrees.

---

[1] Uber does not argue that Flywheel's definition of the geographic market is deficient.

[2] This element of an antitrust claim need not be pled with specificity. *See Cost Mgmt. Servs., Inc. v. Washington Nat. Gas Co., 99 F.3d 937, 950 (9th Cir. 1996)* (complaint "need only allege sufficient facts from which the court can discern the elements of an injury resulting from an act forbidden by the antitrust laws") (citation and quotation omitted).

[3] Flywheel also alleges that Uber controls approximately seventy percent of this market. (*Id.* ¶ 16.)

Flywheel's chosen product market includes ride-hail transportation but explicitly excludes two types of other for-hire modes of transportation: PSCs and TCPs. Based on the Complaint, PSC and TCP services are not reasonably interchangeable with ride-hail transportation.[4]

PSCs provide shuttle transportation service on "fixed routes" or through "scheduled service," and TCPs are hired on a "prearranged basis" for the "exclusive use of an individual or a group." (Complaint ¶ 18.) If ride-hailing services that UberX or UberXL offered became too expensive, consumers would turn (and have turned) to other, *more similar* services, either to "traditional" taxi services or services such as Lyft. A shuttle (sharing the majority of a journey with other passengers, with a shared proximate or actual **[*18]** destination that departs at assigned times) or a luxury vehicle (a prearranged booking with the supplemental features of optics and comfort) are not logical substitutes for ride-hailing services on-demand. These services lack the fundamental characteristics of a ride-hail service, which are non-premium accommodations (ordinary vehicles) and customizable pick-up and drop off points. Using common sense, and drawing inferences from the Complaint in Flywheel's favor, it is apparent that there is little cross-elasticity of demand between ride-hail services and services excluded from Flywheel's definition of the relevant product market; shuttles and luxury vehicles do not have the ability to deprive ride-hail services of "significant levels of business."[5]

Flywheel's chosen product market also excludes other discrete modes of transportation Uber contends should be included. Some of Uber's selected examples (such as Chariot) are more similar to TCPs and PSCs than to ride-hailing services and, therefore, are properly excluded from the relevant product market for the same reasons discussed immediately above. Uber's other examples (bike sharing, pedicabs, walking, personal vehicle use) **[*19]** are also properly excluded from the defined product market.

Consumers engage in multiple considerations when evaluating whether to substitute a bicycle, pedicab, public transportation, a personal vehicle, or their own two feet for a ride-hail service: efficiency of arrival at one's destination, exposure to the elements, cost and location of temporary storage (parking garages, risk of bicycle theft), the need to arrive at one's destination in a state of order, and novelty. In contrast, when considering which ride-hail service to utilize, a consumer will largely be focused on cost and reliability. *Paladin Assocs., Inc. v. Montana Power Co., 328 F.3d 1145, 1163 (9th Cir. 2003)* ("For antitrust purposes, a market is composed of products that have reasonable interchangeability for the purposes for which they are produced—price, use[,] and qualities considered.") (citation and quotations omitted). Bicycles, pedicabs, walking, and personal vehicle use are not capable of depriving ride-hailing services of "significant levels of business."[6]

As alleged, the relevant product market suffers no facial legal defect. Even if it did, the relevant product market meets the requirements for a submarket. *See* *Brown Shoe, 370 U.S. at 325* ("well-defined submarkets may exist which, in themselves, **[*20]** constitute product markets for antitrust purposes.").[7]

---

[4] According to the Complaint, UberX and UberXL exist in the marketplace as direct competitors to taxis—not as direct competitors to commercially licensed transportation services. (*Id.* ¶¶ 22, 23, 37, 38, 50, 59, 60.)

[5] The Court disagrees with Uber's argument that the allegations in the Complaint are contradictory. (*See* Complaint ¶ 17.) The Complaint only describes three broad categories of private, for-hire transportation in San Francisco in the pre-2012 economy. The Complaint does not suggest that these three "types" of transportation were fungible or "reasonably interchangeable." Rather, the Complaint suggests that the three "types" of transportation served distinct market needs. (*See id.* ¶¶ 18-19.)

[6] The cases Uber cites in order to argue these methods of transportation are "interchangeable" are distinguishable. Two of these cases occur in the context of constitutional challenges to municipal ordinances, not in the context of analyzing a "relevant market" under the Sherman Act. *See* *Ill. Transp. Trade Assn. v. City of Chicago, 839 F.3d 594 (7th Cir. 2016)*; *Joe Sanfelippo Cabs, Inc. v. City of Milwaukee, 839 F.3d 613 (7th Cir. 2016)*. In a third case, *Lala v. Frampton, No. 07-cv-2144-MSK-CBS, 2008 U.S. Dist. LEXIS 66003, 2008 WL 4059874, at *4 (D. Colo. Aug. 28, 2008)*, the plaintiff provided only a perfunctory and "conclusory" market definition, and the complaint "did not plead facts that would explain why [alternate] services should not be considered part of the relevant market." Those deficits are not present here.

B. Flywheel Does Not Sufficiently Allege Barriers to Entry.

Having determined Flywheel adequately alleges a relevant market, the Court must next determine whether Flywheel has sufficiently alleged Uber's power to "control prices or exclude competition." *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. In evaluating whether an entity has monopoly power, "it is not market share that counts, but [an entity's] ability to *maintain* market share." *United States v. Syufy Enter., 903 F.2d 659, 666 (9th Cir. 1990)* (emphasis in original). A plaintiff must, therefore, show that new competitors are "barred from entering the market and show that existing competitors lack the capacity to expand their output to challenge the predator's high price." *Rebel Oil Co., 51 F.3d at 1439* (citation omitted). If such barriers do not exist, nothing prevents a newcomer (or an existing competitor) from effectively challenging an emerging monopoly, thereby undercutting the would-be monopolist's ability to domineer the market and hinder competition. *See Syufy Enter., 903 F.2d at 664* (without barriers to entry, defendant with 100% share of market lacks market power: "any attempt to raise prices above competitive level will lure into the market new competitors . . .").

Here, the parties' primary disagreement on this subject is whether **[*21]** barriers to entry exist. Flywheel argues that Uber's $15 billion venture capital war chest constitutes a barrier to entry and that Uber's own history[8] illustrates the difficulty of breaking into the relevant market. Uber counters that its capital backing does not constitute a barrier to entry. Uber has the better argument.

A barrier to entry is either an "additional" long-run cost that incumbent firms did not incur, but "must" be incurred by new entrants, or a factor or factors in the market that deter entry "while permitting incumbent firms to earn monopoly returns." *Los Angeles Land Co. v. Brunswick Corp., 6 F.3d 1422, 1427-28 (9th Cir. 1993)* (need for financing not barrier to entry because no evidence more difficult for new entrants to obtain financing) (citation omitted). Barriers to entry may include: (i) legal license requirements, (ii) control of an essential or superior resource, (iii) entrenched buyer preferences for established brands, (iv) capital market evaluations imposing higher capital costs on new entrants, and, occasionally, (v) economies of scale. *Rebel Oil Co., 51 F.3d at 1439* (citation omitted). The fact that entering a market requires a large capital investment, without more, does not constitute a barrier to entry: "a new [market] entrant is disadvantaged only to the **[*22]** extent that he must pay *more* to attract those funds *than would an established firm*." Areeda & Hovenkamp, ***Antitrust Law*** ¶ 409e at 303 (1992 Supp.) (emphasis added).

In *Los Angeles Land*, the plaintiff (a bowling center developer) argued that lenders' hesitancy to finance bowling equipment purchases constituted a barrier to entry because the difficulty of borrowing money to start a bowling alley made it difficult for would-be competitors to enter the market. *6 F.3d at 1427-28*. In an opinion reversing a hefty trial judgment, the Ninth Circuit disagreed, opining there was no evidence that lenders who *were* willing to finance bowling equipment imposed higher financing costs on new market participants than on firms already established. *Id.* This, the Ninth Circuit concluded, signified that difficulty obtaining financing, without more, was not a barrier to entry.

Uber's large venture capital backing is similarly not a barrier to entry.[9] First, the Complaint lacks allegations that enable the Court to infer that competitors are precluded from entering the market *unless* they obtain similar capital

---

[7] In order to establish a submarket, a plaintiff must be able to show that the submarket is economically distinct from the general product market. *Newcal Indus., 513 F.3d at 1045*. "[I]ndustry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors" all are "practical indicia" of an economically distinct submarket. *Brown Shoe, 370 U.S. at 325*.

[8] According to the Complaint, Uber was founded in 2009 with $200,000 in "initial seed money," but started UberX and UberXL in 2012 and 2014, respectively. (Complaint ¶ 33.)

[9] Flywheel cites to *Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919 (9th Cir. 1980)* for the proposition that an allegation of a specific market share is sufficient to withstand a motion to dismiss. There, the Ninth Circuit stated that it *could not*

backing. *See DocMagic, Inc. v. Ellie Mae, Inc., 745 F. Supp. 2d 1119, 1137 (N.D. Cal. 2010)* (barriers to entry sufficiently pled where difficult for customers to switch providers); *Catch Curve, Inc. v. Venali, Inc., 519 F. Supp. 2d 1028, 1035 (C.D. Cal. 2007)* (barriers to entry **[*23]** sufficiently pled where competitors' licensing strategy created additional capital costs for new market entrants).[10]

Further, Flywheel argues that Uber's taking several years to break into the relevant market underscores the difficulty of breaking into it. Flywheel's argument, however, presupposes that Uber's intention from the beginning (in 2009) was to break into the ride-hail market, but that it was unable to do so. Flywheel's allegations contradict this: Flywheel alleges that Uber initially marketed itself as a purveyor of luxury and luxury-adjacent ground transport. (*See, e.g.*, Complaint ¶¶ 17, 21.) There are no allegations that allow the Court to infer that Uber intended, but was unable, to compete in the relevant market before 2012.

The Complaint does not contain allegations sufficient to allow the Court to infer that the relevant market "requires onerous front-end investments" that might deter competition from all but the "hardiest and most financially secure investors;" is dependent upon a "scare commodity;" or is rife with "exclusive contracts or distribution arrangements designed to lock out potential competitors." *Syufy Enterp., 903 F.2d at 667*. "[E]fficient, **[*24]** aggressive competition," which Flywheel *does* allege, is not in itself a structural barrier to entry. *Id.*

C. Flywheel Alleges Below-Cost Pricing, But Not "Dangerous Probability" of Recoupment.

The parties next disagree over whether Flywheel has sufficiently alleged Uber's behavior constitutes predatory pricing. Price reductions that constitute a "legitimate, competitive response" to market conditions are, of course, "entirely proper." *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014, 1031 (9th Cir. 1981)*. In fact, lowering prices to attract sales is the "essence" of healthy competition. *Solyndra Residual Tr. v. Suntech Power Holdings Co., Ltd., 62 F. Supp. 3d 1027, 1041 (N.D. Cal. 2014)* (citation omitted). Accordingly, the circumstances under which a plaintiff may bring a predatory pricing claim are limited. To state such a claim under the Sherman Act, a plaintiff must allege that (i) the complained-of prices are below an appropriate measure of defendant's costs and (ii) there is a "dangerous probability" the defendant will recoup its losses for below-cost pricing by raising prices after the defendant achieves monopoly power. *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (citations omitted).

Uber argues, first, that Flywheel has not adequately alleged below-cost pricing and, second, that Flywheel has not sufficiently alleged a dangerous probability of recouping losses because Flywheel does not sufficiently **[*25]** allege barriers to entry. Flywheel argues that its allegations that Uber lost money on each and every UberX and UberXL ride (in certain described timeframes) are sufficient.

As a preliminary matter, there appears to be some disagreement within the Ninth Circuit as to the appropriate measure of cost for predatory pricing claims. *See, e.g., Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 909-10 (9th Cir. 2008)* (the appropriate measure of cost is an "open question" in the Ninth Circuit); *Vesta Corp. v. Amdocs Mgmt. Ltd., 129 F. Supp. 3d 1012, 1030-31 (D. Or. 2015)* ("Neither the Supreme Court nor this Circuit has concluded what is the appropriate measure of cost in a predatory pricing case. However, it is generally agreed that the relation between the cost of producing a product and the price charged for it is the criterion for determining whether the price is predatory." (citation and quotation omitted)); *William Inglis, 668 F.2d at 1062 n.1* (recognizing

---

say that allegations of a sixty-five percent market share (that was increasing) *could not* "under any market conditions" provide a basis for inferring the requisite market power. *Id. at 925*. This statement, of course, is not the same as declaring that an allegation of a certain threshold of market share is sufficient to plead monopolization. *Hunt-Wesson*, moreover, makes no mention of potential barriers to entry or the importance of such analysis, which innumerable, more recent cases have suggested is crucial. For these reasons, *Hunt-Wesson* is distinguishable.

[10] Given venture capital's known proclivity for funding subsequent iterations of a successful business model, Uber's market success (as alleged in the Complaint) very likely makes it easier, not harder, for newcomers to the relevant product market to procure capital backing.

acceptability of average variable cost as metric: "marginal cost is often impossible to determine"). Thankfully, the Court need not resolve this ambiguity.

In addition to alleging UberX and UberXL prices and relating those prices to taxi prices, Flywheel has alleged Uber "lost money on each and every" UberX and UberXL ride in the identified time frames. At the pleading stage, this level of detail is sufficient. *Compare* ***[*26]*** *Solyndra, 62 F. Supp. 3d at 1043* ("At [motion to dismiss stage], Plaintiff's allegation that Defendants priced their product below cost is sufficient to avoid dismissal."), *with* *Eastman v. Quest Diagnostics Inc., 108 F. Supp. 3d 827, 835 (N.D. Cal. 2015)* (dismissing predatory pricing Sherman Act claim where plaintiffs alleged only that defendant charged "monopoly prices" or "above-competitive prices" but did not allege defendant's prices or how those prices compared to competitors' prices).

Courts in the Ninth Circuit routinely hold that levels of detail similar to that provided in the Complaint sufficiently allege below-cost pricing. *See, e.g.,* *Momento, Inc. v. Seccion Amarilla USA, No. 09-cv-1223-SBA, 2009 U.S. Dist. LEXIS 85295, 2009 WL 10696217, at *5 (N.D. Cal. Sept. 17, 2009)* (allegations sufficient where plaintiff pled only that competitor sold product substantially below cost and identified the specific cost of the product, but not the market price); *Jensen Enters., Inc. v. Oldcastle, Inc., No. 06-cv-00247 SI, 2006 U.S. Dist. LEXIS 68262, 2006 WL 2583681, at *7 (N.D. Cal. Sept. 7, 2006)* (below-cost pricing sufficiently alleged where plaintiff alleged only that defendant charged "uneconomically low" prices); *Origami Owl LLC v. Mayo, No. 15-cv-00110-PHX-DGC, 2015 U.S. Dist. LEXIS 103755, 2015 WL 4747101, at *5-6 (D. Ariz. Aug. 7, 2015)* (below-cost pricing sufficiently alleged where plaintiff alleged eighty percent reduction from wholesale pricing). The Court has located, and Uber has provided, no case that stands for the proposition that **[*27]** allegations of below-cost pricing must be more detailed than what Flywheel has provided. *See* *Momento, 2009 U.S. Dist. LEXIS 85295, 2009 WL 10696217, at *1* (motions to dismiss disfavored in fact-intensive antitrust cases).[11]

However, Flywheel has not sufficiently alleged a dangerous probability of recoupment because, as discussed above, it has not sufficiently alleged that barriers to entry will prevent competitors from entering the market. *See* *In re Air Passenger Computer Reservations Sys. Antitrust Litig., 694 F. Supp. 1443, 1470 n.20 (C.D. Cal. 1988)* ("Predatory pricing can only be effective when there are significant barriers to entry which enable a monopolist to recoup short term losses through monopoly profits reaped after exclusion of a competitor from the market.")

For the reasons discussed above, Flywheel's Sherman Acts claims are dismissed.

III. California Unfair Practice Act.

Uber next argues that Flywheel failed to plead its *California Unfair Practices Act ("UPA")* claims. Under the UPA, it is unlawful to sell any article or product at below-cost "for the purpose of injuring competitors or destroying competition." *Cal. Bus. & Prof. Code §§ 17043*, *17044*; *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 171-72, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (Cal. 1999)*.

California Business and Professions Code section 17024 carves out two exemptions to the UPA. The *UPA* does not apply:

> (1) To any service, article or product for which rates *are established* under the jurisdiction of the Public Utilities Commission of this State and sold or furnished by **[*28]** any public utility corporation, or installation and repair services rendered in connection with any services, articles or products.

---

[11] The Court is not persuaded that Flywheel's surge pricing allegations undermine or contradict its allegations regarding below-cost pricing. Drawing all reasonable inferences from the Complaint, for example, it is reasonable to conclude that incidents of surge pricing occurred less frequently than incidents of below-cost pricing and in such margins and multiples as to only partially offset below-cost pricing. As such, it is entirely possible that the additional income generated by surge pricing was insufficient to overtake the losses incurred by the below-cost pricing.

(2) To any service, article or product sold or furnished by a publicly owned public utility and upon which the rates *would have been established under the jurisdiction* of the Public Utilities Commission of this State if such service, article or product had been sold or furnished by a public utility corporation, or installation and repair services rendered in connection with any services, articles or products.

Cal. Bus. & Prof. Code § 17024 (emphasis added).

Despite the plain language of *section 17024(1)*, California courts have determined that the *section 17024(1)* exception also applies where the CPUC has the jurisdiction to establish a utility's rates. *Hladek v. City of Merced, 69 Cal. App. 3d 585, 138 Cal. Rptr. 194 (Cal. Ct. App. 1977)*; (Dkt. No. 61). The section (1) exception, therefore, applies if Uber is a public utility. Flywheel is judicially estopped from arguing that Uber is not a public utility because Flywheel has conceded as much in prior judicial proceedings. *See Milton H. Greene Archives, Inc. v. Marilyn Monroe LLC, 692 F.3d 983, 1000 (9th Cir. 2012)*. Therefore, the *section 17024(1)* exception precludes Flywheel from bring a UPA claim against Uber. Flywheel's UPA claims are dismissed.

IV. Lanham Act.

Flywheel's Lanham Act allegations concern allegedly false or misleading statements Uber made **[*29]** to drivers or to customers. Uber argues that Flywheel's allegations concerning these statements lack the requisite specificity, do not concern "material" deception of a "substantial segment" of the public, fail to show the statements were false when made, constitute non-actionable puffery, and/or are time-barred.

A. Flywheel's Allegations Meet Heightened Pleading Requirement.

Federal Rule of Civil Procedure 9(b) requires, when alleging fraud or mistake, that a party "state with particularity the circumstances constituting fraud or mistake." The Ninth Circuit has not definitively weighed in on whether *Rule 9(b)* applies to all Lanham Act claims, but many district courts in the Ninth Circuit have applied heightened pleading standards to Lanham Act claims grounded in misrepresentation. *See Kilopass Tech. Inc. v. Sidense Corp., No. 10-cv-02066 SI, 2010 U.S. Dist. LEXIS 136345, 2010 WL 5141843, at *7 (N.D. Cal. Dec. 13, 2010)* (collecting cases). To satisfy this heightened pleading standard, a plaintiff must include "the who, what, when, where, and how" of the misrepresentation. *TransFresh Corp. v. Ganzerla & Assoc., Inc., 862 F. Supp. 2d 1009, 1017 (N.D. Cal. 2012)* (citation omitted).

Flywheel alleges the statements' content[12] that Uber made each of the statements, and when Uber made the statements. Flywheel further alleges that Uber made each of the statements through its website and explains which statements **[*30]** were directed to taxi drivers and which statements were directed to the public (consumers). Finally, the Complaint alleges that each of the statements at issue were "in reality" untrue and explains the specific ways in which the statements were false. *See Newcal, 513 F.3d at 1053* (court limited to contents of complaint at motion to dismiss because question of statement's falsity is factual). To the extent a heightened pleading standard is required for *Lanham Act* claims, these allegations are sufficient to plead "the who, what, when, where, and how" of the misrepresentation.[13] *See Kilopass, 2010 U.S. Dist. LEXIS 136345, 2010 WL 5141843, at *7*.

---

[12] Flywheel does not provide direct quotes of the statements in their entirety, but Uber has pointed to no case that stands for the proposition that Flywheel must do so.

[13] Flywheel is not required, even under a heightened pleading standard, to present the "context" of the purportedly misleading statements. The cases Uber cites for its argument are distinguishable. *Southland Sod Farms v. Stover Seed Co.* stands for the proposition that that the context of a statement may transform a statement from true or not "literally false" to false "by necessary implication." *108 F.3d 1134, 1137-39 (9th Cir. 1997)*. Meanwhile, *XYZ Two Way Radio Service, Inc. v. Uber Techs., Inc.* suggests that additional contextual information is necessary when such information could redeem the statements in the complaint. *214 F. Supp. 3d 179, 184 (E.D.N.Y. 2016)*. It is unclear to the Court, drawing all reasonable inferences in favor of the

Flywheel has also sufficiently alleged that the statements deceived their intended audience and that Flywheel was injured: Flywheel alleges that it lost customers and drivers due in part to the fact that customers and drivers relied upon Uber's respective statements directed to each group. The Court further concludes that the deceptions, which concerned pricing, efficiency, income, and safety were material: representations about each of these topics are likely to influence the purchasing decision of consumers.

B. Some Allegedly Misleading Statements [*31] Regarding Safety Constitute Non-Actionable Puffery.

A statement is considered puffery "if the claim is extremely unlikely to induce customer reliance." *Newcal, 513 F.3d at 1053*. Ultimately the difference between actionable statements and puffery is specificity, the idea being that general assertions are less likely to induce consumer reliance. *Id.* A general, subjective statement about a product is non-actionable puffing because such a statement would not contain "specific characteristics . . . that could be tested." *Autodesk, Inc. v. Dassault Systemes Solidworks Corp., No. 08-cv-4397-WHA, 2008 U.S. Dist. LEXIS 109800, 2008 WL 6742224, at *3 (N.D. Cal. Dec. 18, 2008)*.

In *L.A. Taxi Cooperative, Inc. v. Uber Techs., Inc.*, this Court found that specific statements comparing Uber's safety standards directly to taxi companies and describing its background check process as a "comprehensive and new industry standard" and "industry-leading" were actionable. *114 F. Supp. 3d 852, 861 (N.D. Cal. 2015)*. Here, Uber's statement that it conducted "rigorous" background checks that "set a new standard" to ensure passenger safety is nearly identical to the statement deemed actionable in *L.A. Taxi*.

Uber's statement that its drivers "provide[d] the safest ride on the road" and were the "gold standard" of safety practices is a different story. In *XYZ* ***[*32]*** *Two Way Radio Service*, the court observed that similar statements, though they concerned the service's safety, were "vague" and "hyperbolic:" "the challenged statements cannot reasonably be understood as specific representations of objective facts." *214 F. Supp. 3d at 184*. Here, what constitutes a "gold standard" and/or "the safest ride on the road" is in the eye of the beholder. It is unclear to the Court whether these statements pertain to the quality of background checks alone or whether they pertain, for example, to driver behavior on the road or the safety rating of the type of cars Uber accepts as part of its fleet. Without more, these statements are not specific enough to create consumer reliance and constitute non-actionable puffery.

C. Dismissing Lanham Act Claim As Time-Barred Is Premature.

When a federal statute, such as the Lanham Act, lacks a statute of limitations, courts presume that Congress intended to "borrow" the limitations period from the most "closely analogous" state law action. *Jarrow Formulas, Inc. v. Nutrition Now, Inc., 304 F.3d 829, 836-37 (9th Cir. 2002)* (citation omitted). Consistently, federal courts import the statute of limitations for a state's fraud action onto Lanham Act claims. *See, e.g., Au-Tomotive Gold Inc. v. Volkswagen of Am., Inc., 603 F.3d 1133, 1140 (9th Cir. 2010)* (applying three-year statute of limitations for Arizona fraud **[*33]** law to Lanham Act claim). California's statute of limitations for fraud is three years; therefore, the applicable statute of limitations for Flywheel's Lanham Act claims is three years. *See Karl Storz Endoscopy Am., Inc. v. Surgical Techs., Inc., 285 F.3d 848, 857 (9th Cir. 2002)* (applying three-year statute of limitations to Lanham Act claim) (citations omitted).

The clock on the limitations period for a Lanham Act claim begins when the plaintiff knew or should have known of the wrong. *See General Bedding Corp. v. Echevarria, 947 F.2d 1395, 1397 (9th Cir.1991)*. Generally, therefore, whether a claim is barred by the statute of limitations is a factual issue. *Akkerman v. Mecta Corp., 72 F. App'x 652, 654 (9th Cir. 2003)*; *Ranch Realty, Inc. v. DC Ranch Realty, LLC, 614 F. Supp. 2d 983, 989-90 (D. Ariz. 2007)* (". . . [T]he date on which a cause of action accrued is a factual question inappropriate to determine based on the

---

Complaint, that additional contextual information contained elsewhere on the website would or could redeem the statements featured in the Complaint.

pleadings."). Where the applicability of a statute of limitations concerns a factual dispute, including the timing of the discovery of the wrong, it is inappropriate to resolve a statute of limitations issue at the motion to dismiss stage. *Id.*

In *ThermoLife Int'l, LLC v. Gaspari Nutrition, Inc.*, the court denied a motion to dismiss a Lanham Act claim based on the argument that the claim was time-barred. *871 F. Supp. 2d 905, 911 (D. Ariz. 2012)*. The court reasoned that, though the plaintiffs alleged the defendant made misrepresentations five years earlier (and therefore outside the three-year statute of limitations), **[*34]** there was nothing in the pleadings to suggest that the plaintiffs discovered the statements were false *at the same time* the statements were made. *Id.* "Rather," the court observed, "a plausible inference is that [the plaintiff] did not know of the falsity of [the defendant's] statements until [the defendant's] products began being recalled . . . and [the plaintiff] independently conducted tests of [the products] to determine whether the . . . advertising was false . . . ." *Id.*

Here, even assuming Flywheel discovered the statements the instant Uber posted them on its website, a plausible inference from the Complaint is that Flywheel did not adduce evidence to suggest the statements were untrue until it conducted some investigation. It is entirely possible that Uber will adduce evidence in discovery that demonstrates Flywheel knew or should have known that Uber's statements were misleading earlier than the Complaint suggests than Flywheel did. In that event, Uber may move for summary judgment on Flywheel's Lanham Act claim. However, at this juncture, given the allegations and drawing all reasonable inferences in favor of the Complaint, dismissal of the Lanham Act claims as time-barred **[*35]** is premature. *See Jablon v. Dean Witter & Co., 614 F.2d 677, 682 (9th Cir.1980)* ("When a motion to dismiss is based on the running of the statute of limitations, it can be granted only if the assertions of the complaint, read with the required liberality, would not permit the plaintiff to prove that the statute was tolled.").

Accordingly, Flywheel's Lanham Act claims is dismissed only to the extent it included non-actionable puffery.

V. Intentional Interference with Prospective Economic Advantage.

Flywheel's intentional interference claim is premised on Uber's purported disruption of Flywheel's relationships with its drivers. Uber argues that Flywheel has not alleged independently wrongful acts, actual disruption to driver relationships, or that Uber acted with the requisite intent.

To successfully bring a claim for intentional interference with prospective economic advantage under California law, Flywheel must allege: (i) an economic relationship between itself and a third party, with the probability of future economic benefit to Flywheel; (ii) Uber's knowledge of the relationship; (iii) intentional acts by Uber designed to disrupt the relationship; (iv) actual disruption of the relationship; and (v) economic harm to Flywheel proximately caused **[*36]** by Uber's acts. *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1153, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (Cal. 2003)* (citation omitted). The interfering conduct must be "wrongful by some legal measure other than the fact of the interference itself." *Id.* (citation omitted). An act is not independently wrongful merely because a defendant acts with an improper motive; rather, an act is independently wrongful if it is unlawful, "if it is proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard." *Id. at 1158-59*. Moreover, "[t]he independently wrongful act must *be* the act of interference itself." *Crown Imports, LLC v. Superior Court, 223 Cal. App. 4th 1395, 1404, 168 Cal. Rptr. 3d 228 (Cal. Ct. App. 2014)* (emphasis added); *see Korea Supply, 29 Cal. 4th at 1159* (illegal acts of bribery and sexual favors interfered with plaintiff's efforts to obtain government contract).

To the extent Flywheel's intentional interference claim is based upon the "independently wrongful acts" of its Sherman Act or Unfair Practices Act claims, its claim for intentional interference is dismissed for the reasons discussed above. (*See* Complaint ¶ 185.) To the extent Flywheel's intentional interference claim is based upon the "independently wrongful acts" described in its Lanham Act claims, its interference claim is also dismissed, but only to the extent the claim included non-actionable puffery. (*See id.* ¶¶ 186, 187.) **[*37]**

With respect to the surviving portion of Flywheel's Lanham Act claim[14] the Court holds that Flywheel has sufficiently alleged the nexus between Uber's purported misrepresentations and a disruption in the relationship between Flywheel and its drivers. Flywheel has alleged that Uber misrepresented to drivers that they would earn more per hour and per year driving for Uber than for taxi companies. Flywheel further alleged that, "in reliance" upon these representations, taxi drivers opted instead to drive for Uber. This is sufficient to allege a nexus.

Flywheel also alleges a rather lengthy list of wrongful and unlawful conduct under federal, California, and municipal laws. (See *id.* ¶¶ 110-124.) Yet, Flywheel does not allege, beyond conclusory statements, how these myriad federal, state, and municipal infractions worked to disrupt the relationship between it and its drivers. As a matter of common sense, it is unclear to the Court how some of these violations *could* lure drivers away from Flywheel or otherwise meaningfully disrupt the relationship.[15] Therefore, Flywheel has failed to sufficiently allege the nexus between these independently wrongful acts and disruption in the relationship between **[*38]** Flywheel and its drivers.

The Court next considers, with respect to the wrongful acts for which Flywheel sufficiently alleged a nexus, whether Flywheel sufficiently alleged actual disruption in the relationships between Flywheel and drivers. For disruption to occur, the "relationship" that forms the basis of an intentional interference claim must have existed at the time of the allegedly tortious conduct. *O'Connor v. Uber Techs., Inc., 58 F. Supp. 3d 989, 997-98 (N.D. Cal. 2014)* (collecting California state cases); *see* *Westside Ctr. Assocs v. Safeway Stores 23, Inc., 42 Cal.App.4th 507, 524, 49 Cal. Rptr. 2d 793 (1996)* (intentional interference with economic advantage tort protects "the expectation that the relationship will yield the desired benefit, not necessarily the more speculative expectation that a potentially beneficial relationship will eventually arise.") To the extent, then, that Flywheel alleges that Uber's actions lured away drivers that were already driving for Flywheel, Flywheel has sufficiently alleged a disruption. *See* *Silicon Labs Integration, Inc. v. Melman, No. 08-cv-04030-RMW, 2010 U.S. Dist. LEXIS 20385, 2010 WL 890140, at *2 (N.D. Cal. Mar. 8, 2010)* (previous, discrete transaction sufficient to establish "existing" relationship; ongoing transaction not necessary).[16] To the extent, however, Flywheel alleges that Uber's actions prevented it from recruiting new drivers, Flywheel's intentional interference claim fails. **[*39]** (*See, e.g.*, Complaint ¶ 80: "In reliance on Uber's misrepresentations, thousands of *former and potential* San Francisco taxicab drivers have quit or foregone driving taxicabs . . . ." (emphasis added).)

Finally, Flywheel pleads only conclusory allegations that Uber intended to disrupt Flywheel's economic relationships with its drivers. *See* *Korea Supply, 29 Cal. 4th at 1154-57*. Flywheel suggests in its opposition brief that it is "aware" of numerous instances where Uber deliberately targeted Flywheel drivers, but that specificity does not appear in the Complaint. Accordingly, Flywheel did not sufficiently plead intent.

For the foregoing reasons, Flywheel's intentional interference claim is dismissed.

VI. Unfair Competition.

---

[14] At this juncture, the Court declines to address whether Flywheel has sufficiently alleged a nexus between the wrongful conduct alleged in the Sherman Act or UPA claims as each have been substantively dismissed.

[15] In its opposition, Flywheel argues that each of these transgressions results in a "less regulated" driver experience, which makes Uber more attractive than Flywheel to drivers. This allegation, however, does not appear in the Complaint, and the Court is unable to infer as much from the allegations themselves. Further, many of the unlawful activities of which Uber stands accused, seem demonstrably unattractive to drivers: forcing them to carry their own insurance and refusing to allow drivers to register their vehicles as commercial vehicles, to name but two examples.

[16] The cases Uber cites do not stand for the proposition that Flywheel is required to allege the specific identities of individual drivers. Indeed, based on the Complaint, listing each individual driver of the "thousands" who departed Flywheel for Uber would be prohibitive. (*See, e.g.*, Complaint ¶ 80.)

Uber next argues that Flywheel's Unfair Competition Law ("UCL") claim should be dismissed solely because it is wholly derivative of Flywheel's Sherman Act, UPA, and Lanham Act claims. To the extent Flywheel's UCL claim is based upon Flywheel's Sherman Act, UPA claim, and non-actionable puffery, its UCL claim is dismissed for the reasons described above. To the extent Flywheel bases its UCL claim on the surviving portions of the Lanham Act claim or the allegations in Paragraphs 110-124, however, **[*40]** the UCL claim survives.

While it is indeed puzzling to the Court that Flywheel does not explicitly reference the litany of Uber's alleged violations of federal, state, and municipal law in its UCL claim, Paragraph 13 of the Complaint incorporates "into each clause of action" "[a]ll of the allegations in this Complaint" "to the extent necessary or useful to clarify and complete each stated cause of action." This is sufficient to "state a claim to relief that is plausible on its face." *Ashcroft, 556 U.S. at 678*.

The Court declines to address Uber's standing argument, because it was raised for the first time in Uber's reply brief. *Zamani v. Carnes, 491 F.3d 990, 997 (9th Cir. 2007)* (court need not consider arguments raised for the first time in reply brief) (citations omitted); *MJG Enters. v. Cloyd, No. 10-cv-0086-PHX-MHM, 2010 U.S. Dist. LEXIS 102579, 2010 WL 3842222, at *6 n.1 (D. Ariz. Sept. 27, 2010)* (declining to consider standing argument when raised for first time in reply brief).

Flywheel's UCL claim, therefore, partially survives Uber's motion to dismiss.

VII. Collective Allegations.

Finally, Uber argues that Flywheel's allegations against the four Uber-related entities are deficient because the Complaint refers to these entities collectively as "Uber" and does not allege facts specific to any of the distinct entities.

To satisfy *Federal Rule of Civil Procedure 8(a)*, a complaint **[*41]** must "give the defendant fair notice of what the claim is and the grounds upon which it rests." *Twombly, 550 U.S. at 555* (citation omitted). A complaint may fail to provide such "fair notice," however, where it does not differentiate between defendants. *See* *Corazon v. Aurora Loan Servs., LLC, No. 11-cv-00542-SC, 2011 U.S. Dist. LEXIS 52712, 2011 WL 1740099, at *4 (N.D. Cal. May 5, 2011)* ("In the few allegations where [plaintiff] alleges misconduct by a singular defendant, [plaintiff] fails to specify which one." (citations omitted)). Yet, so-called "group pleading" is not fatal as long as the complaint gives defendants fair notice of the claims against them. *See* *Frazier v. US Bank Nat'l Ass'n, No. 11-cv-8775, 2013 U.S. Dist. LEXIS 45330, 2013 WL 1337263 at *2-3 (N.D. Ill. Mar. 29, 2013)* (holding group pleading did not render complaint infirm where complaint provided fair notice of claims); *see also* *Sprint Solutions, Inc. v. Fils-Amie, 44 F. Supp. 3d 1224, 2014 WL 4494146, at *2 (S.D. Fla. 2014)* (rejecting defendants' contention that Sprint's use of the term "Defendants" in the amended complaint requires dismissal).

Flywheel refers collectively to the four target entities as Uber. (Complaint ¶ 7.) Flywheel alleges that the four entities acted in concert with and on behalf of each other. (*Id.* ¶ 9.) Flywheel also brings all of its causes of action against each **of** the four Uber-related entities. These facts **[*42]** are almost identical to those in *Tivoli LLC v. Targetti Sankey S. P. A., No. 14-cv-1285-DOC-JCG, 2015 U.S. Dist. LEXIS 189660, 2015 WL 12683801, at *3-4 (C.D. Cal. Feb. 3, 2015)*.

In *Tivoli*, the complaint referred collectively to four "target entities" and accused each of the four defendants of participating in the alleged wrongful conduct. *Id.* The plaintiff further alleged that the entities were corporate affiliates and agents/employees of each other. *Id.* The court deemed the complaint sufficient, observing that while "collective references" could cause confusion when a "large and diverse" group of defendants was at issue and "obscure[] which defendant is alleged to have committed which act," a small number of defendants presented no such risk. *Id.* Here, as in *Tivoli*, the Complaint fairly claims that each of the four Uber-related entities participated in the alleged wrongful conduct, even if the allegations are accomplished through group pleading.

CONCLUSION

For the foregoing reasons, and as described above, Uber's motion to dismiss is GRANED in part and DENIED in part, but Flywheel shall have leave to amend the deficient portions of the Complaint. The only portion of the Complaint dismissed without leave to amend are Flywheel's UPA claims. Flywheel shall file an amended complaint, if it chooses **[*43]** to do so, by November 21, 2018.

IT IS SO ORDERED.

GREGG HANSEN, Plaintiff, v. MARIN GENERAL HOSPITAL, et al., Defendants.

Prior History: Hansen v. Marin Gen. Hosp., 2017 U.S. Dist. LEXIS 211171 (N.D. Cal., Dec. 21, 2017)

Core Terms

dialysis, allegations, motion to dismiss, dog, dismissal with prejudice, transplant, breached, monopoly, kidney, medical malpractice claim, medical malpractice, leave to amend, antitrust, harassed, notice, breach of contract claim, declaration, complains, exhibits, malpractice claim, defendants', contracts, pleadings, rights, statute of limitations, kidney transplant, medical treatment, malpractice, asserting, default

Counsel: **[*1]** Gregg Hansen, Plaintiff, Pro se, Kentfield, CA.

For Marin General Hospital, Defendant: Michael J. Garvin, LEAD ATTORNEY, Sheuerman, Martini, Tabari, Zenere & Garvin, A Professional corporation, San Jose, CA.

For Sutter Health, Defendant: Warren Richmond Webster, LEAD ATTORNEY, Robert Stewart Willoughby, Hassard Bonnington LLP, San Francisco, CA.

For Medicare, Correct name: U.S. Centers for Medicare and Medicaid Services ("Medicare"), Defendant: Robin Michael Wall, U.S. Attorney's Office, Northern District of California, San Francisco, CA.

For Levy, Dr., Estillo, Dr., Marin Neuphreology, Defendants: Karen A. Braje, Reed Smith LLP, San Francisco, CA.

For Antheim Blue Cross, Defendant: Karen A. Braje, LEAD ATTORNEY, Reed Smith LLP, San Francisco, CA.

For Swedish Medical Center, Defendant: Matthew M. Grigg, Pamela Chung, LEAD ATTORNEYS, Law Offices of Matthew M. Grigg, Walnut Creek, CA.

Judges: William H. Orrick, United States District Judge.

Opinion by: William H. Orrick

Opinion

ORDER GRANTING IN PART AND DENYING IN PART MOTIONS TO DISMISS AND DENYING MOTIONS FOR ENTRY OF DEFAULT JUDGMENT AND FOR IN HOME DIALYSIS.

Re: Dkt. Nos. 90, 92, 93, 94, 95, 96, 97, 99, 114.

Plaintiff Gregg Hansen brings a host of claims against defendants **[*2]** Dr. Lawrence Levy, Dr. Genevieve Estilo, Marin Nephrology, Marin General Hospital ("MGH"), Anthem Blue Cross Life and Health Insurance Co. ("Anthem"), Sutter Health, Satellite Dialysis ("Satellite"), Centers for Medicare and Medicaid Services ("CMS"), and Swedish Medical Center ("Swedish"). These claims center on Hansen's need for dialysis and the mistreatment that he has allegedly suffered while trying to secure access to a workable dialysis option. His Third Amended Complaint ("TAC") represents his fourth attempt to bring a claim on which relief can be granted. Dkt. No. 89.

Hansen's motion for entry of default against Satellite is denied and Satellite's motion to dismiss for failure to timely serve is granted, but Hansen is given leave to personally serve Satellite. As to remaining motions to dismiss, at this juncture Hansen has adequately pleaded his claim for medical negligence against Drs. Levy and Estilo and MGH, but only for acts occurring on or after April 4, 2016. Hansen may be able to allege acts of medical malpractice against Satellite and Marin Nephrology, but again, only for acts that occurred on or after April 4, 2016. Hansen is giving one more attempt to amend his breach **[*3]** of contract claim against some of the defendants, so that he can identify the applicable contracts.

Hansen also appears to allege a claim for "discrimination" under the Americans with Disabilities Act, with respect to his attempts to seek medical treatment at MGH with his service dog, but the defendants against whom that claim may lie (namely MGH and Dr. Levy) have not had notice of it because of the confusing manner in which it was alleged; they will be given another chance to respond to it. However, Hansen's monopoly claim, as well as all claims asserted against Swedish and CMS must be dismissed with prejudice.

Finally, Hansen's motion for in home dialysis is DENIED, because it seeks relief without any identified authority for it. I will, instead, treat Hansen's request for in home dialysis as a ground for relief related to his surviving (for now) medical malpractice and breach of contract claims.

BACKGROUND

I. FACTUAL BACKGROUND

I accept Hansen's allegations as true. Hansen was hospitalized from April 2011 to January 2013 following a serious car accident. TAC ¶ 6. During that time, he received a liver and pancreas transplant at UCLA, and was put on dialysis until he could receive a kidney **[*4]** transplant. *Id.* ¶ 7. In January 2013, Hansen began dialysis treatments at defendant Satellite Dialysis, receiving dialysis 3 times a week, 3 hours per session. *Id.* ¶ 8. By 2014, Satellite Dialysis, under the direction of Dr. Levy and Dr. Estilo, increased the amount of dialysis to 3.5 hours per session, which was unbearable for Hansen and caused him to suffer side effects including insomnia and the shakes. *Id.* ¶ 11. Hansen complains that the dialysis he received at Satellite was not "customized" to fit his situation and was not sanitary because they reused filters. *Id.* ¶¶ 9, 12.

In 2014, he asked Dr. Levy to recommend an out-of-state transplant for him because the wait to get a transplant in California was between 8 and 9 years at that point, whereas Seattle, Washington only had a 2.5 year waiting list. *Id.* ¶ 14. Hansen had already been waiting for 2.5 years, so Dr. Levy recommended him for an out-of-state transplant. *Id.*

On July 22, 2014, Hansen went to defendant Swedish in Seattle with a caregiver for what was supposed to be a one-day meeting, with Hansen expecting Swedish to approve him for a kidney transplant if he passed some tests. *Id.* ¶ 15. Dr. Reddy at Swedish explained that **[*5]** he did not believe that Hansen would pass the tests, but would allow Hansen to attempt to do so because of Dr. Reddy's relationship with Dr. Levy. *Id.* Eight months later, in April 2015 Hansen passed all the medical tests and was told that he could receive a kidney as early as the following week. *Id.* ¶¶ 16-17.

After he passed the tests, a social worker then asked Hansen questions regarding who would care for him after the transplant and about his being repeatedly late to dialysis 9 months before. *Id.* ¶ 18. Hansen explained that the ambulance company he used for transport had been late due to circumstances out of his control. *Id.* The social worker requested to speak with Dr. Levy. *Id.* Hansen subsequently received a letter from Swedish that said he was "not compliant with UCLA," which meant he could not receive the transplant. *Id.* ¶¶ 18-19. Swedish claimed that it received information regarding Hansen's alleged non-compliance from Dr. Levy. *Id.* ¶ 19.

While trying to resolve the compliance issues, Hansen established that Dr. Levy was lying about Hansen's non-compliance; UCLA said that Hansen was 100% compliant. *Id.* ¶¶ 19-20. A social worker at Satellite Dialysis also confirmed Hansen's compliance. **[*6]** *Id.* ¶ 20. After Hansen proved that Dr. Levy lied regarding his compliance with UCLA, Dr. Levy decided to drop him as a patient and gave him 60 days to find a new doctor for dialysis but had "blackballed" Hansen, so Hansen could not secure dialysis from any provider in Marin County. *Id.* ¶ 21. All of the doctors on the referral list provided by Satellite refused to take Hansen as a patient. *Id.* ¶ 22. That left Hansen with one option, to receive dialysis on an emergency basis at the emergency room. *Id.*

Hansen contacted Anthem, his PPO, to find a doctor, but Anthem did not help because it viewed Medicare as Hansen's primary insurance and Anthem as secondary. *Id.* ¶ 23. Further, his primary doctor at Sutter Health would only refer him to Dr. Levy. *Id.*¶ 24.

Hansen ended up going to defendant MGH for emergency dialysis and was checked into MGH for 17 days. *Id.* ¶ 24. However, Dr. Levy runs the dialysis at MGH, which has led to Hansen being harassed at the hospital and being "turned away" and told to come back later because only Dr. Levy could decide when he received treatment. *Id.* ¶¶ 24-25. Hansen alleges that Dr. Levy had a conflict of interest after turning him away from Satellite and then **[*7]** regulating his receipt of dialysis at MGH. *Id.* ¶ 26. He complained about his mistreatment through his advocate at MGH and to the CEO of Satellite. *Id.* ¶ 27.

Hansen's ability to receive dialysis at MGH only on an emergency basis and often being turned away or accused by MGH personnel of "faking" his condition has led to a lack of adequate treatment and serious medical complications, including heart damage. *Id.* ¶¶ 28-30. He complains that Dr. Levy's lies about his status have prevented him from receiving a kidney transplant and prevented his recovery. *Id.* ¶ 33.

Hansen also alleges instances of harassment on the part of MGH related to his service dog. Specifically, the security guards harass him when he attempts to bring his service dog into the hospital during emergencies. The guards told Levy he needed to leave his dog in the car, but then the guards called the Humane Society to report the dog in the car. *Id.* ¶ 34. Hansen points to three specific visits. In June 2017, he left his service dog in his car with a water dish; the security guards called the Humane Society, which resulted in Hansen being harassed by the police and the Humane Society, as well as his car being towed. *Id.* ¶ 35. **[*8]** In July 2017, after giving his keys to security in order to move his car to covered parking, the security guards instead "smashed up" Hansen's car and again called the Humane Society to remove the dog. *Id.* ¶ 36. To get his dog back, Hansen had to sign a contract with the Humane Society that he would no longer leave the service dog in his car. *Id.*

The last incident that Hansen points to in his TAC occurred on September 9, 2017. After waking up with chest pains, Hansen drove himself to MGH, where he showed the security guards the contract with Humane Society. *Id.* ¶ 37. The security guard called the police, who, upon arrival, told Hansen that he must either, "1. Leave without getting medical attention. 2. Put the dog in the car. [or] 3. Get arrested and get medical." *Id.* A doctor informed the police officer that Hansen was too sick to go to jail and needed dialysis. *Id.* ¶ 38. After he received dialysis, Hansen was arrested and taken to jail; he was released because of his medical condition. *Id.* Hansen was transported back to MGH, where he underwent a psychological evaluation. *Id.* ¶ 39. Hansen was subsequently discharged and drove himself home. *Id.*

II. PROCEDURAL BACKGROUND

Hansen filed this **[*9]** action in the Superior Court of California, County of Marin on April 4, 2017, asserting five causes of action: (1) violation of California's Unfair Competition Law ("UCL"); (2) malpractice; (3) discrimination; (4) breach of contract; and (5) monopoly. Notice of Removal, Ex. A at 1 (Dkt. No. 1-1). In June 2017, the case was removed to this Court. After three sets of defendants filed motions to dismiss, Hansen filed a First Amended Complaint ("FAC") on July 5, 2017, asserting the same claims. Dkt. No. 17. The defendants subsequently moved to dismiss the FAC. At the hearing on these motions, Hansen informed me that he had filed a Second Amended Complaint ("SAC") the previous day. Given this, I granted the defendants' motion to dismiss, confirmed that Hansen knew of the assistance provided by the Court's Legal Help Center, and gave defendants 20 days to respond to the newly filed SAC. In October 2017, defendants moved to dismiss the claims contained in the SAC. After holding a hearing on the motions to dismiss in December 2017, I granted the motions and dismissed the SAC in its entirety. December Order, Dkt. No. 85.

I addressed each claim in turn and explained in detail what was either **[*10]** missing from Hansen's allegations or why the claims could not otherwise proceed. Concerning his malpractice claim, I explained that Hansen's SAC: (i) did not specifically identify how each of the defendants' had a duty to him that was breached by their conduct; (ii) Hansen needed to allege dates for each of the alleged acts of malpractice in order to fall within the applicable statute of limitations;[1] and (iii) with respect to CMS, he would need demonstrate the filing of an administrative tort claim of medical malpractice before a claim against CMS could go forward.

Regarding his discrimination claim, I noted that, from his allegations, I could not readily ascertain a plausible theory of discrimination. I explained that Hansen needed to allege that he received different treatment from the defendants on the basis of a protected classification (*e.g.*, race, disability status, gender). As to his breach of contract claim, I informed Hansen that a successful claim would need to allege the existence of a specific contract that each defendant had with him and how he, she, or it breached it.[2] For his monopoly claim, I explained that given the numerous antitrust laws, it was unclear what type of **[*11]** monopoly claim that Hansen sought to bring, but explained what he would need to allege in order to state a monopolization claim under the Sherman Act. Finally, regarding Hansen's UCL claim, I explained that Hansen did not "clearly identify an unlawful, unfair, or fraudulent business practice or act performed by any defendant" or allege sufficient facts that he suffered an economic loss caused by any of the defendants.

I granted Hansen leave to amend all of his claims, with the exception of the UCL and the breach of contract claims against CMS. Hanen subsequently filed his TAC, asserting the same five claims. Six groups of defendants again move to dismiss all claims against them for failure to state a claim (Dkt. Nos. 92, 93, 94, 95, 96, 97) and Satellite separately moves to dismiss for failure to timely serve. Dkt. No. 99.

III. ADDITIONAL PLEADINGS AND ALLEGATIONS

Since the motions to dismiss were filed, Hansen and the parties have submitted additional pleadings and notices. On April 5, 2018, Hansen filed a "motion for in home dialysis," arguing that he was entitled to less expensive and less painful in home dialysis, as opposed to the emergency dialysis he had been receiving for the **[*12]** past two years. Dkt. No. 114. Defendants generally oppose that "motion," pointing out that Hansen has not identified any legal requirement that would mandate in home dialysis, his existing claims do not seek and do not provide for this type of relief, and — for CMS — that Hansen has not exhausted the required administrative proceedings required under the Medicare Act. Dkt. Nos. 118 (Anthem), 119 (MGH), 120 (CMS), 121 (Levy, Estilo, Marin Nephrology), 122 (Swedish). In response, Hansen filed a number of declarations explaining his belief that in home dialysis would be cheaper and safer. Dkt. Nos. 123, 125. On June 11, 2018, Hansen filed a declaration in support of his oppositions, claiming he had been attacked by Dr. Levy while receiving dialysis at MGH, which is another reason he believes he should receive in home dialysis. Dkt. No. 126. On July 5, 2018, Hansen filed a declaration claiming that defendants are retaliating against him, including by refusing to prescribe his dialysis medications. Dkt. No. 127. In that same

---

[1] I noted that the statute of limitations for medical malpractice is three years after the date of the injury or one year after the plaintiff discovers, or using reasonable diligence should have discovered, the injury. Cal. Code of Civ. Proc. § 340.5.

[2] I dismissed the breach of contract claim against CMS, as being within the exclusive jurisdiction of the United States Court of Federal Claims under the *Tucker Act, 28 U.S.C. § 1491(a)(1)*.

filing, Hansen filed a "motion" asking the Court to commit him to jail for two weeks, based on his belief that he would be able to secure better and more efficient **[*13]** dialysis if he were in jail. *Id.*

On May 15, 2018, defendants filed a notice of pendency of other action, identifying a case Hansen filed in Marin County Superior Court against defendants Levy, Estilo, Marin Nephrology, and MGH (as well as the Marin Sheriff's Department and towing companies) regarding Hansen's claims of "harassment," abuse of his service dog, and towing of his car when Hansen attempts to secure dialysis from MGH. Dkt. No. 124. In his pleadings here, Hansen complains about defendants' conduct in those state court cases, including defendants alleged failure to provide him notice of court hearings, failure to appear in state court, and defendants' efforts to have the state court declare Hansen a vexatious litigation. *See* Dkt. No. 127 at ECF pgs. 7-18.

On July 30, 2018, defendants filed a second notice of pendency of other action, noting that on June 25, 2018 Hansen had filed another lawsuit in Marin Superior Court against Levy, Estilo, Marin Nephrology, and MGH complaining about the care he was receiving at MGH and that Levy had improperly communicated with plaintiff directly, instead of having defense counsel communicate with Hansen. Dkt. No. 128.

On August 6, 2018, Hansen **[*14]** filed an opposition to defendants' notices of pendency, complaining again about the harassment of Hansen and his dog and the substandard care at MGH. Dkt. No. 129. On August 23, 2018, Hansen filed a declaration, asserting that defendants were unsuccessful in their attempts to get Hansen declared a vexatious litigant, and complained of more harassment and physical abuse of himself and his dog at MGH. Dkt. No. 131. On August 28, 2018, Hansen filed a declaration asking again for default to be entered against Satellite and for in home dialysis. Dkt. No. 132.

LEGAL STANDARD

Under *Rule 8(a)*, "[a] pleading that states a claim for relief must contain: (1) a short and plain statement of the grounds for the court's jurisdiction . . .; (2) a short and plain statement of the claim showing that the pleader is entitled to relief; and (3) a demand for the relief sought, which may include relief in the alternative or different types of relief." The short and plain statement requirement is not a heavy one, plaintiffs are not required to set out the facts supporting their claim in detail, but just a statement of the claim "'that will give the defendant fair notice of what the plaintiff's claim is and the grounds **[*15]** upon which it rests.'" *Lee v. City of Los Angeles, 250 F.3d 668, 679 (9th Cir. 2001)*.

That said, under *Federal Rule of Civil Procedure 12(b)(6)*, a district court must dismiss a complaint if it fails to state a claim upon which relief can be granted. To survive a *Rule 12(b)(6)* motion to dismiss, the plaintiff must allege "enough facts to state a claim to relief that is plausible on its face." *See* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is facially plausible when the plaintiff pleads facts that "allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *See* *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citation omitted). There must be "more than a sheer possibility that a defendant has acted unlawfully." *Id.* While courts do not require "heightened fact pleading of specifics," a plaintiff must allege facts sufficient to "raise a right to relief above the speculative level." *See* *Twombly, 550 U.S. at 555, 570*.

In deciding whether the plaintiff has stated a claim upon which relief can be granted, the Court accepts the plaintiff's allegations as true and draws all reasonable inferences in favor of the plaintiff. *See* *Usher v. City of Los Angeles, 828 F.2d 556, 561 (9th Cir. 1987)*. However, the court is not required to accept as true "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *See* *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)*.

Pro se pleadings must be held to a less stringent standard than those drafted by lawyers. **[*16]** *Haines v. Kerner, 404 U.S. 519, 520-21, 92 S. Ct. 594, 30 L. Ed. 2d 652 (1972)*. Nevertheless, a complaint, or portion thereof, should be dismissed if it fails to set forth "enough facts to state a claim to relief that is plausible on its face." *Twombly, 550 U.S. at 554*. "[A] district court should not dismiss a pro se complaint without leave to amend unless it is absolutely clear that the deficiencies of the complaint could not be cured by amendment." *Akhtar v. Mesa, 698 F.3d 1202, 1212 (9th Cir. 2012)* (quotations omitted).

DISCUSSION

I. HANSEN'S MOTION FOR DEFAULT AND SATELITTE'S MOTION TO DISMISS

As noted, on February 28, 2018, Hansen filed a motion for "default judgment" against Satellite, arguing that default judgment should be entered against Satellite because it did not respond to this case. Dkt. No. 90. Satellite separately moves to dismiss for failure to timely serve. Dkt. No. 99.

Entry of default judgment is not appropriate because Satellite has appeared, specifically to contest service. Even assuming that Satellite was properly served (which it was not, as addressed below) and assuming that Satellite did not respond within the appropriate time, default judgment will not be entered because default judgments "are generally disfavored" and "[w]henever it is reasonably possible, cases should be decided upon their merits." *Pena v. Seguros La Comercial, S.A., 770 F.2d 811, 814 (9th Cir. 1985)*. Hansen's **[*17]** motion for entry of default judgment is DENIED.

Satellite moves to dismiss because Hansen did not properly serve the initial complaint while the case was pending in Marin Superior Court; Hansen only attempted service by sending a copy by certified mail to the agent for service of process for Satellite Healthcare, Inc. Declaration of Susan Del Bene (Dkt. No. 100, ECF pgs. 7-8) ¶ 2. After the case was removed to this Court, Hansen filed the FAC which did not name Satellite Health, but instead named Satellite Dialysis as a defendant. Hansen sent a copy of the FAC by mail to Satellite Healthcare's San Jose corporate office, but Hansen never personally served a copy of the FAC on Satellite. *Id.* ¶¶ 3-5. Satellite informed Hansen by mail on August 27, 2017 and by follow up emails through February 2018 that Satellite's position is that it has not been properly served and that it does not consent to the jurisdiction of this Court. Dkt. No. 100 at ECF pgs. 17, 19-21, 28.

Hansen never served his SAC or his TAC on Satellite — either Satellite Healthcare, Inc. in San Jose or Satellite Dialysis in Greenbrae, California by any means. *See* Del Bene Decl. ¶¶ 3-5; Declaration of Nilda Flores (Dkt. No. **[*18]** 100 at ECF pgs. 23-23) ¶ 3.[3] Satellite argues that service by mail, without personal service, is not sufficient under *Federal Rule of Civil Procedure 4* or under California Code of Civil Procedure 416.10. Satellite also argues that, by the time it filed its motion to dismiss on March 14, 2018, the 90 day period for service provided by *Rule 4(m)* had passed and that this case be dismissed as to it because of the failure to timely serve. Dkt. No. 99.

Satellite is correct — both that service was not effective and that service was not timely — but its objections get it only so far. As for service, forcing a pro se litigant to go through the expense of personal service, in lieu of agreeing to accept service by mail and waiver, serves little obvious purpose except to force this case to continue. But that is Satellite's choice to make. Dismissal for failure to timely serve is not mandatory, and courts may grant additional time for service in their discretion. *Mann v. Am. Airlines, 324 F.3d 1088, 1091 (9th Cir. 2003)*. Additional time for service is appropriate in this case, especially because Satellite had actual notice of the lawsuit, there is no prejudice to Satellite, the delay by Hansen has not been excessive (because Hansen plausibly believed as a pro se litigant that service was accomplished), **[*19]** and not giving Hansen additional time to serve may result in statute of limitations issues for Hansen's claims against Satellite. *See* *Efaw v. Williams, 473 F.3d 1038, 1041 (9th Cir. 2007)*.

---

[3] Hansen does not dispute this other than saying that he had Dr. Levy personally served at Satellite Dialysis in Greenbrae and "served" Satellite Healthcare via their agent for service of process. Dkt. No. 111. But the evidence Hansen submits shows that the original complaint was served on Satellite/Del Bene by certified mail and by personal service on Drs. Levy, Estilo and Marin Nephrology. Dkt. No. 112 at ECF pgs. 9-13.

Satellite's motion to dismiss for failure to personally serve process in this case is GRANTED. However, Hansen is given 60 days from the date of this Order to personally serve Satellite Dialysis. Hansen shall personally serve, meaning any person over the age of 18 hand deliver, a copy of his Third Amended Complaint along with a summons to Satellite Dialysis at 565 Sir Francis Drake Boulevard, Greenbrae, California.[4] That service, if accomplished, shall constitute valid service on defendant Satellite and allow this case to proceed against Satellite.

II. MERITS OF MOTIONS TO DISMISS

Turning to the merits of the other defendants' motions to dismiss, I address each claim in turn.

A. Malpractice

In order to sufficiently plead medical malpractice, a plaintiff must allege: "(1) the duty of the professional to use such skill, prudence, and diligence as other members of his profession commonly possess and exercise; (2) a breach of that duty; (3) a proximate causal connection between the negligent conduct and the resulting injury; and (4) actual loss or damage resulting from the professional's **[*20]** negligence." *Jackson v. Johnson, 5 Cal. App. 4th 1350, 1355, 7 Cal. Rptr. 2d 482 (1992)*. For purposes of establishing breach of duty in a medical malpractice case, a plaintiff must show that the physician's performance fell before the "care ordinarily possessed and exercised by members of the medical profession under similar circumstances." *Avivi v. Centro Medico Urgente Med. Cntr., 159 Cal. App. 4th 463, 470, 71 Cal. Rptr. 3d 707 (2008)*.

1. Levy, Estilo, and MGH

Hansen alleges that Levy, Estilo, and MGH have not given him the medical attention that he needs. TAC ¶ 46. Specifically, he asserts that Levy refused to treat him and prevented his treatment by others while sabotaging Hansen's ability to get a transplant. Further, he contends that Levy decides when he receives dialysis at MGH. Concerning MGH, Hansen states that he was denied treatment on multiple occasions, resulting in heart damage. TAC ¶¶ 28-30, 37-38.[5]

As an initial matter, Hansen has a statute of limitations problem with respect to alleged acts of medical malpractice by the doctors or MGH. Any known alleged acts of malpractice related to his dialysis treatments (or refusal thereof) that occurred **prior to April 4, 2016** are barred.[6] However, as pleaded in his TAC, there are allegations with respect to Dr. Levy and MGH of incidents of deficient medical treatment occurring *after* April 4, 2016. TAC **[*21]** ¶¶ 21, 28-30.

There are very few mentions of what Dr. Estilo may have done with respect to Hansen and his treatment at either Satellite or MGH in the TAC. Specifically, Hansen alleges that Dr. Estilo, along with Dr. Levy, increased Hansen's dialysis time in 2014, causing Hansen to suffer. TAC ¶ 11. But that claim is barred by the statute of limitations.

---

4 To the extent there is any ambiguity over whether Hansen intends to sue Satellite Dialysis, located in Greenbrae, California or the apparent corporate parent, Satellite Healthcare, Inc., any such ambiguity shall be resolved in Hansen's favor. "Satellite Dialysis" is listed in the TAC, has specially appeared in this action through counsel, and because Satellite Dialysis does not argue it is not the correct defendant (if properly served), I will consider Satellite Dialysis the appropriate defendant for Hansen's claims.

5 MGH contends that these allegations do not amount to specific allegations regarding a breach of the standard of care by any medical provider. MGH Mot. at 12. But Hansen alleges that on April 17, 2017 and September 4, 2017, healthcare providers at MGH turned him away without allowing him to receive dialysis, resulting in health complications and specific harms. Similarly, the allegations that Dr. Levy allegedly decides when Hansen receives dialysis and restricts his dialysis at MGH, construed broadly, also support a malpractice claim against Dr. Levy.

6 This case was filed in Marin County Superior Court on April 4, 2017. Dkt. No. 1 (Notice of Removal).

Hansen also generally alleges that Dr. Estilo, along with Dr. Levy and MGH, have not given him the medical attention he needs from 2013 through the present. *Id.* ¶ 46. That conclusory statement is too general keep Dr. Estilo in this case. Hansen needs to plead *facts* showing that Dr. Estilo has provided or supervised or otherwise impacted Hansen's access to or receipt of dialysis at some point on or after April 4, 2016. However, Dr. Estilo is mentioned in some of the summaries attached to Hansen's TAC as exhibits. *See, e.g.*, Dkt. No. 89 at ECF pg. 34 (detailing complaints made to Dr. Estilo by Hansen in October 2016 and Dr. Estilo's responses); ECF pg. 66 (detailing interaction with Dr. Estilo). Therefore, it appears that Hansen has (or at least intends to) complain of acts taken by Dr. Estilo with respect to his treatment at MGH. While **[*22]** a court is not required to plod through hundreds of pages of exhibits to ascertain whether a claim has been raised, the exhibits in this case do provide some clarity to support Hansen's medical malpractice claim against Dr. Estilo.

Reading the TAC generously, and as informed by the exhibits, Hansen has adequately alleged medical malpractice claims against Drs. Levy and Estilo and against MGH — but those claims are **limited** to events occurring **on or after April 4, 2016**. That means that Hansen cannot continue to pursue claims based on denials of treatment that occurred *prior* to April 4, 2016 because those claims are barred by the one year statute of limitations.

Dr. Levy, Dr. Estilo, and MGH's motion to dismiss the medical malpractice claim is DENIED with respect to claims arising on or after April 4, 2016.

2. Satellite and Marin Nephrology

Hansen alleges that Satellite did not give him customized dialysis, reused filters putting him in danger, and "blackballed" him from receiving treatment elsewhere. As an initial matter, it remains unclear when each of these acts occurred. It would appear that many, if not all of the actions by Satellite, fall outside the one year statute of limitations **[*23]** for medical malpractice claims because they occurred in 2014 and 2015. TAC ¶¶ 11-12. Hansen complains that he was receiving services from Satellite (as the "Dialysis center") as late as July 2016. TAC ¶¶ 21, 22, 28. But it is unclear why Hansen claims that Satellite breached its duty of care to him in terms of the medical services he was being provided by Satellite on or after April 4, 2016, or whether the only claim he has against Satellite is based on its refusal to treat him after July 2016. Hansen needs to allege specific facts about Satellite's acts on or after April 4, 2016 in order to maintain a medical malpractice claims against Satellite.

While Marin Nephrology is named as a defendant under each cause of action, Hansen alleges no facts about it. I cannot tell who that entity is or how it is related to the claims he alleges against the other defendants. Hansen's TAC sometimes refers to "The Dialysis Center." TAC ¶ 26. It is unclear which entity Hansen is referring to when he uses the phrase "The Dialysis Center," either Satellite or Marin Nephrology. If Hansen wants to proceed with claims against Marin Nephrology, he must identify facts explaining who Marin Nephrology is and **[*24]** what the entity or its employees did to him to make it liable for his claims.

This claim is DISMISSED with leave to amend as to Satellite and Marin Nephrology.

3. Swedish

Hansen alleges that Dr. Reddy at Swedish first believed Dr. Levy's information about Hansen's noncompliance in 2014, and then ignored his e-mails discrediting Dr. Levy's statements about Hansen's noncompliance, presumably because he was applying to work for Dr. Levy. *Id.* ¶ 48. The last mention of anything done by anyone at Swedish in Hansen's complaint was in July 2015; in the Exhibits to TAC, Hansen includes a March 17, 2016 letter from Swedish explaining that he was declined for a transfer because of certain criteria. ECF pg. 96. Even more significantly, Hansen's allegations establish that he knew the alleged reason why Swedish declined the transplant (Levy's lies and Reddy's connections to Levy) as far back as 2015 and that he had his social worker inform Swedish and its board of the same in February 2016. *Id.* ECF pg. 101; *see also id*. at ECF pg. 72 (plaintiff know of his theory prior to March 2016). Therefore, Hansen knew he would not receive a kidney back in 2015 and knew of the cause of any potential medical malpractice **[*25]** claim against Swedish no later than February or March 2016. Any malpractice claim against Swedish is barred by the one year statute of limitations.

This claim is DISMISED WITH PREJUDICE against Swedish.

4. Sutter Health & Anthem

The only specific allegations against Sutter Health and Anthem are that they would not refer him to any other doctors, presumably after he was cut off by Dr. Levy in July 2016. TAC ¶¶ 23-24, 44, 47. In his opposition brief regarding Sutter (Dkt. Nos. 105), Hansen complains about Sutter's failure of their duty to "provide a level of healthcare" by providing him with referrals. Dkt. No. 105.

Hansen's claim against Anthem is undermined by the allegation at paragraph 23 of the TAC that Anthem *did*, in fact, provide him with a list of 80 referrals. TAC ¶ 80. The larger problem for Hansen, however, is that there are no allegations in the TAC that a Sutter or Anthem doctor or other employee provided Hansen with inadequate medical *treatment*. A claim for medical malpractice depends upon the existence of a "physician/patient relationship" that creates a duty of care between the medical provider and the patient. *See, e.g.,* *Felton v. Schaeffer, 229 Cal. App. 3d 229, 234, 279 Cal. Rptr. 713 (1991)*. In none of Hansen's complaints or exhibits to date **[*26]** is there any indication that his claims are based on inadequate treatment provided by a Sutter or Anthem employee. Absent those types of allegations, and absent any case law providing that an insurer (as opposed to a medical practitioner employed by that insurer) can be liable for "medical malpractice," this claim is DISMISSED WITH PREJUDICE against Sutter and Anthem.

5. CMS

Hansen's only allegations regarding CMS are that CMS's regulations result in under-staffing at "dialysis centers" and that it has created a system where patients stay in dialysis instead of receiving transplants. TAC ¶ 49. He does not assert that any defendant accused of committing malpractice is a CMS employee. Absent evidence that an employee breached a duty of care in provision of medical services to Hansen, Hansen cannot state a medical malpractice claim against CMS.[7] In addition, even if he could amend to allege deficient medical treatment by an employee of CMS, Hansen has not alleged that he has exhausted his administrative remedies under the Federal Tort Claims Act ("FTCA"). As I explained in my prior Order, to seek damages against federal entity CMS for a malpractice claim, Hansen must have filed a claim under **[*27]** the FTCA. December Order at 5. Despite my directions, Hansen has not alleged he has filed a FTCA claim or otherwise exhausted his administrative remedies against CMS.

The malpractice claim against CMS is DISMISSED with prejudice.

6. Summary

Hansen's claims for medical malpractice may proceed against Dr. Levy, Dr. Estilo, and MGH, but those claims may only be based on acts that occurred on or after April 4, 2016. If Hansen can allege facts that a medical practitioner employed by Satellite or Marin Nephrology provided him deficient treatment on or after April 4, 2016, he is given leave to amend attempt to plead those facts in a Fourth Amended Complaint.

The medical malpractice claims against Swedish, Sutter, Anthem, and CMS are DISMISED WITH PREJUDICE.

---

[7] As to CMS, Hansen alleges only that CMS has imposed regulations that encourage hospitals to fail to adequately treat patients. *Id.* ¶¶ 49, 50.

B. Discrimination

1. Generally

In my prior Order, I found that Hansen's allegations of "discrimination" were too vague to ascertain his theory of discrimination. December Order at 5. I advised him that one way in which he could state a claim for discrimination was to allege that he received different treatment from the defendants on an improper basis, such as his race, disability status, religion, or gender or some other qualifying reason, **[*28]** and how he was damaged by it. *Id.* In the TAC, Hansen adds some allegations, regarding the denial of the kidney transplant and being blackballed from medical treatment, but his amendments do not cure the deficiencies I identified for this type of discrimination claim. He does not claim and does not plead facts suggesting that he was discriminated against by any defendant, or provided unequal treatment by any defendant, based on a protected classification like race, religion, gender, etc. Therefore, his general allegations — that: (i) defendants denied him the medical attention he needed, and Dr. Levy blackballed him to deny him treatment; (ii) Dr. Levy and Dr. Reddy at Swedish denied him the transplant he needed; (iii) Dr. Levy, Satellite, and other dialysis centers discriminated against him and other patients, presumably by denying access to transplants, to make money; and (iv) Medicare failed to stand up to Dr. Levy — do not support a claim for "discrimination" under federal "civil rights" statutes. *See* TAC ¶¶ 52-59.[8]

2. ADA and Civil Rights

However, as added and somewhat clarified in the TAC, Hansen argues that he was discriminated against under the Americans with Disabilities Act because **[*29]** MGH barred his service dog and then harassed him and his dog by forcing him to leave his service dog in his car, leading to his inability to secure the medical treatment he needed and, in at least one set of events, his arrest. This conduct, according to Levy, violated the Americans with Disabilities Act ("ADA") and his "civil rights." *Id.* ¶¶ 34, 57.

Neither Dr. Levy nor MGH responded to the ADA and related discrimination allegations, in particular the allegations regarding Hansen's allegations regarding his apparent inability to bring his service dog with him for treatments. That failure, however, is due in part to the somewhat unclear nature of the allegations in the TAC and its reference to this claim as "discrimination" instead of a violation of the ADA. The defendants whose actions are implicated by Hansen's ADA/civil rights claim related to his service dog — namely Dr. Levy and MGH — will be given another attempt to respond to this claim now that it has been more clearly identified.

3. Dr. Estilo, Marin Nephrology, Satellite Dialysis, Anthem, Sutter, Swedish and CMS

As discussed above Hansen has not, despite being expressly advised to do so, alleged any facts suggesting that he **[*30]** was discriminated against based on a protected classification by any defendant. His remaining and now-clarified ADA/civil rights violation claims is related to his medical care at MGH and treatment of his service dog and is properly asserted only against MGH and by extension Dr. Levy through his work and "control" of dialysis at MGH.

Hansen's "discrimination" or ADA/civil rights claim, therefore, is DISMISSED WITH PREJUDICE against Dr. Estilo, Marin Nephrology, Satellite, Anthem, Sutter, Swedish, and CMS.

Because MGH and Dr. Levy have not had the opportunity to move to dismiss the ADA/civil rights claim related to Hansen's assertions that he was denied treatment with his service dog or retaliated against and harassed because of his service dog, they may separately challenge and move to dismiss this claim as discussed below.

---

[8] The alleged fact that defendants "make more money" by providing dialysis rather than securing transplants for patients cannot, on its face and standing alone, support a discrimination or civil rights claim. TAC ¶¶ 54, 56.

C. Breach of Contract

As explained in my December Order, in order to plead a breach of contract, a plaintiff must allege: (1) the existence of a contract; (2) plaintiff's performance or excused non-performance; (3) defendant's breach; and (4) resulting harm to plaintiff. *Acoustics, Inc. v. Trepte Construction Co., 14 Cal. App. 3d 887, 913, 92 Cal. Rptr. 723 (1971)*. I explained to Hansen that in order to state his claim for breach of contract, he needed "to allege **[*31]** the contract that each defendant had with him and how he, she or it breached it." December Order at 6. Presumably in response to this, Hansen adds an allegation that he "entered into wri[t]ten agreements that change yearly due to their requirements." TAC ¶ 60. He does not identify which defendants he entered into these yearly contracts with, although he explains that their breaches "have cost me a kidney transplan[t], good health, and millions in lost wages, and pain and suffering to be proven." *Id.* He explains that "all" were "contracted to work together" to help him get a kidney while getting "quality health care" and they all fell short, and Hansen seeks a kidney as a form of relief. *Id.*, ¶¶ 61-62.

As to allegations regarding the kidney transplant, there are none showing that Swedish was bound by written contract to provide Hansen a kidney, and the exhibits Hansen includes in his TAC show that there was no written agreement to provide him a kidney. *See, e.g.*, TAC and exhibits at ECF pgs. 96, 101. This claim cannot proceed against Swedish.

More generally, Hansen has not alleged the existence of specific written contracts that would make any other defendant liable for failure to get **[*32]** him a kidney transplant. No facts in any of his complaints plausibly suggest that such a contract existed.

Nor are there are plausible allegations that either Dr. Levy and Dr. Estilo entered into a written contract with Hansen to provide him a kidney or a contract to provide medical services, much less how those particular contracts were breached. There is no allegation or plausible inference that Satellite, Marin Nephrology, or MGH entered into a contract with Hansen (as opposed to a contract with Hansen's insurance providers or Medicare) to provide him a kidney or medical services, much less how the specific contracts were breached.

Hansen does allege that he had secured insurance coverage through Sutter and Anthem. The existence of written contracts governing the provision of insurance benefits by those defendants to plaintiff are, therefore, plausibly suggested. But Hansen's theory of how Sutter or Anthem breached those plausible insurance contracts is not clear. If his theory is that they failed to provide him a kidney, that theory is simply not plausible. If his theory is that they failed to provide adequate access to health care under their insurance contracts, that, plausibly, **[*33]** might support a breach of contract claim.

Swedish and CMS are dismissed from this claim WITH PREJUDICE,[9] and the breach of contract claim is DISMISSED WITH LEAVE TO AMEND regarding the other parties. Hansen is given **one more chance** to identify the specific written contracts that he alleges have been breached with the following defendants: Dr. Levy, Dr. Estilo, Marin Nephrology, Satellite, Anthem and Sutter. Hansen must identify each contract with each defendant by name or subject matter, and then explain his theory as to why each defendant breached each identified contract.

D. Monopoly

In the December Order, I noted that it was unclear what type of monopoly claim and under what ***antitrust law*** Hansen was attempting to bring. December Order at 6. In the TAC, Hansen states that he is bringing his monopoly claim pursuant to *section 4 of the Clayton Act* as well as *sections 1* and *2 of the Sherman Act*. TAC ¶ 71. Even though Hansen has identified these particular laws, his claims are still deficient.

[9] In his TAC, Hansen realleges his breach of contract claim against CMS. This cause of action was dismissed with prejudice in the December Order.

To state a claim under both *section 1* (monopolization) and *section 2* (attempted monopolization) of the Sherman Act as well as *section 4* of the Clayton Act, a plaintiff must allege an antitrust injury. *See Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995)* ("causal antitrust injury, is an element **[*34]** of all antitrust suits brought by private parties seeking damages under *Section 4 of the Clayton Act*"); *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 (9th Cir.1988)* (noting that both *sections 1* and *2 of the Sherman Act* requires allegation of antitrust injury).[10] For purposes of establishing "a causal antitrust injury," a plaintiff must demonstrate unlawful conduct that causes injury to the plaintiff and that the injury is the type of injury the law was intended to prevent and is the very reason the conduct is unlawful. *Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013)*. "The alleged violation must cause injury to competition beyond the impact on the claimant under *section 1*, and must destroy competition and cause antitrust injury under *section 2*." *McGlinchy, 845 F.2d at 811*.

Hansen fails to demonstrate how his alleged injuries—loss of a kidney, loss of income, and a longer and healthier life— are antitrust injuries. Nothing in the facts alleged show that Hansen's alleged injury flows from any anti-competitive behavior that restrained competition in the dialysis market in Marin County or more broadly (or sought to restrain competition). Nor does he allege any facts showing an injury from the alleged agreement to restrict his dialysis treatment impacted anyone other than himself, as required to bring a monopoly claim. Given this, Hansen has not alleged a **[*35]** monopoly or attempted monopoly claim and cannot amend to plausibly do so. This claim is DISMISSED WITH PREJUDICE.[11]

E. California's Unfair Competition Law

Although Hansen's UCL claim is his first cause of action, I address it last because he must allege an unlawful, unfair, or fraudulent business act or practice. *Lippitt v. Raymond James Fin. Servs., Inc., 340 F.3d 1033, 1043 (9th Cir.2003)*. Unlawful, unfair, and fraudulent are three separate prongs of the UCL. *Cel—Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. "Unlawful" practices are any practices forbidden by law. *People v. McKale, 25 Cal.3d 626, 632, 159 Cal. Rptr. 811, 602 P.2d 731 (1979)*. "Unfair" simply means any practice whose harm to the victim outweighs its benefits. *Motors, Inc. v. Times Mirror Co. 102 Cal. App. 3d 735, 740, 162 Cal. Rptr. 543 (1980)*. "Fraudulent," as used in the statute, does not refer to the common law tort of fraud but only requires a showing members of the public "are likely to be deceived." *Bank of the West v. Superior Court, 2 Cal. 4th 1254, 1267, 10 Cal. Rptr. 2d 538, 833 P.2d 545 (1992)*.

As discussed, other than the medical malpractice claim against Dr. Levy, Dr. Estilo, and MGH, none of Hansen's other claims have been adequately alleged.[12] I am granting limited leave to amend with respect to the malpractice claim (against Marin Nephrology and Satellite), as well as the breach of contract claim (against Dr. Levy, Dr. Estilo, Marin Nephrology, Satellite, Anthem and Sutter). Accordingly, I will address whether Hansen has alleged enough to state a UCL claim against those defendants when **[*36]** considering his Fourth Amended Complaint.

---

[10] In general: "To establish a *section 1* violation under the Sherman Act, a plaintiff must demonstrate three elements: (1) an agreement, conspiracy, or combination among two or more persons or distinct business entities; (2) which is intended to harm or unreasonably restrain competition; and (3) which actually causes injury to competition, beyond the impact on the claimant, within a field of commerce in which the claimant is engaged (i.e., 'antitrust injury')." *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 (9th Cir. 1988)*. "To establish a *section 2* violation for an attempt to monopolize, a plaintiff must demonstrate four elements: (1) specific intent to control prices or destroy competition; (2) predatory or anti-competitive conduct directed toward accomplishing that purpose; (3) a dangerous probability of success; and (4) causal antitrust injury." *Id.*

[11] I also note that Hansen fails to allege facts to plausibly support that defendants had an agreement to monopolize the dialysis market (or kidney transplant market) in Marin County or more broadly. Other than the specific allegations that he was blackballed by Dr. Levy from receiving dialysis (which cannot support antitrust injury and are contradicted by Hansen's own allegations that others can receive dialysis at Kaiser facilities, TAC ¶ 69) his other allegations (that defendants conspired to require more expensive dialysis instead of transplants for patients) are far too general to plausibly support this claim.

[12] As noted, I am not deciding at this time whether Hansen has adequately alleged or can allege his ADA/civil rights claim against Dr. Levy or MGH, and instead allowing those defendants to challenge that claim in a further motion to dismiss.

All claims against Swedish have been dismissed with prejudice. There are no separate or additional facts alleged against Swedish which could support a UCL claim against it. The UCL claim is likewise DISMISSED WITH PREJUDICE as to Swedish.[13]

III. MOTION FOR IN HOME DIALYSIS

Finally, Hansen's motion for in home dialysis is DENIED. In his motion, Hansen identifies no authority establishing his right to in home dialysis. However, I will treat Hansen's motion as a request for specific relief related to his surviving claims (for now, medical malpractice, ADA/civil rights, breach of contract, and UCL). I am not determining at this juncture whether that form of relief would be appropriate for any of the currently remaining causes of action.

CONCLUSION

For the reasons discussed above, Hansen's motion for entry of default judgment against Satellite is DENIED. Satellite's motion to dismiss for failure to personally serve process in this case is GRANTED. However, Hansen is given 60 days from the date of this Order to personally serve Satellite Dialysis with a summons and a copy of the most current complaint.

Defendants' motions to dismiss are GRANTED in part and **[*37]** DENIED in part.

All of the claims against CMS and Swedish are GRANTED WITH PREJUDICE. Those defendants are no longer in this case.

The medical malpractice claims against Swedish, Sutter, Anthem, and CMS are DISMISSED WITH PREJUDICE. The malpractice claims against Satellite and Marin Nephrology are DISMISSED WITH LEAVE TO AMEND. The malpractice claims arising on or after April 4, 2016 against Dr. Levy, Dr. Estilo, and MGH may proceed.

The ADA/discrimination claim is DISMISSED WITH PREJUDICE as to Dr. Estilo, Marin Nephrology, Satellite, Anthem, Sutter, Swedish, and CMS. Hansen's ADA/discrimination claim against Dr. Levy and MGH, as clarified, is allowed to proceed but those defendants may move to dismiss that claim after Hansen files his Fourth Amended Complaint, or if Hansen does not choose to file a Fourth Amended Complaint, within forty (40) days of the date of this Order.

The breach of contract claim is DISMISSED WITH LEAVE TO AMEND as to Dr. Levy, Dr. Estilo, Marin Nephrology, Satellite, Anthem and Sutter. It is DISMISSED WITH PREJUDICE as to Swedish.

The monopoly claim is DISMISSED WITH PREJUDICE as to all defendants.

The UCL claim is DISMISSED WITH PREJUDICE as to Swedish, but DISMISSED **[*38]** WITH LEAVE TO AMEND against Dr. Levy, Dr. Estilo, Marin Nephrology, Satellite, Anthem and Sutter.

If Hansen wishes to attempt to amend as allowed, his Fourth Amended Complaint must be filed within twenty one (21) days of the date of this Order.

IT IS SO ORDERED.

Dated: September 24, 2018

/s/ William H. Orrick

William H. Orrick

Judges: HONORABLE Barbara Jacobs Rothstein, United States District Judge.

Opinion by: Barbara Jacobs Rothstein

Opinion

ORDER ON MOTION TO DISMISS THIRD AMENDED COMPLAINT AND MOTION TO STRIKE

I. INTRODUCTION

This matter comes before the Court on the Motion to Dismiss Plaintiffs' Third Amended Complaint ("TAC") filed by Defendant Sheet Metal Workers International Association, Local 66 ("Local 66"). (Def's Mot. Dismiss, ECF No. 131). Local 66 seeks dismissal of the Second, Third, Fourth, and Fifth Claims for relief in the TAC. Local 66 also raises a constitutional challenge to the First Claim for Relief. The motion is opposed by Plaintiffs Northshore Sheet Metal, Inc. ("Northshore") and its President, Jeffrey D. Meyer ("Meyer").[1] Northshore combined its response with a motion to strike both the Declaration of Paul More and certain pages of Local 66's motion over the **[*2]** Court's 15-

[1] The Court refers to Plaintiffs Northshore and Meyer collectively as "Northshore" in this decision.

page limit. (Resp., ECF No. 141). Having considered the pleadings filed in support and in opposition to the motions, the Court rules as follows.

II. BACKGROUND

A. Preliminary Motion to Strike

Northshore requests that the Court strike the Declaration of Paul More and related attachments as an improper reference to material outside of the pleadings. (Resp. 2-3, ECF No. 141). Northshore also requests that the Court strike page 16 of the motion and the incorporation by reference of certain pages of a prior motion to dismiss as in violation of the Court's page limit requirement. (*Id.* at 3).

The court's determination of the sufficiency of a complaint under *Rule 12(b)(6)* is ordinarily limited to the complaint itself without reference to any evidence outside of the pleadings. *Cervantes v. City of San Diego, 5 F.3d 1273, 1274 (9th Cir. 1993)*. The court may not rely on materials outside of the pleadings or take judicial notice of disputed factual matters. *Lee v. City of Los Angeles, 250 F.3d 668, 689 (9th Cir. 2001)*. Despite the general rule, a court may consider materials properly attached to the complaint or matters of judicial notice. *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*.

Local 66 argues that the Court should consider the More Declaration and attached discovery requests because the authenticity of these documents is not in dispute. (Reply 3:17-19, ECF No. 143). **[*3]** This argument is unavailing. The purpose of a *Rule 12(b)(6)* motion is to test the sufficiency of a complaint, not to determine if the plaintiff has received enough discovery. Although the Court is not required to ignore the procedural posture of the case, whether Northshore has received some specific quantum of discovery is not relevant given the Court's legal conclusions as to the sufficiency of the claims in the TAC. It is not appropriate for the Court to consider the Declaration since it is not part of the TAC. The Court grants the motion to strike the More Declaration and the attached documents.

Although the Court will not consider the More Declaration, it will consider the additional text over the 15-page limit imposed by the Court's Standing Order for Civil Cases. (ECF No. 81). Northshore's own response totals some 38 pages. To Northshore's credit, it did request leave to file an overlength brief based on the "extraordinary complexity" of the issues presented in this case. (Mtn. for Leave, ECF No. 138). Ideally, Local 66 should have made a similar request prior to filing the motion to dismiss. In order to reach the merits of the motion and to avoid any unfairness in striking the last page **[*4]** of Local 66's motion while allowing some 23-pages of Northshore's response, the Court denies the request to strike the additional pages.

B. Factual Background

Local 66 is a labor union representing workers located in Western Washington. (TAC 2:17-21, ECF No. 128). Northshore is an Architectural Sheet Metal ("ASM") contractor doing business in Western Washington with Plaintiff Meyer serving as its president. (*Id.* at 2:9-16). Northshore provides fabrication and assembly of ASM on major construction and building products throughout Western Washington.[2] (*Id.* 3:3-7). To obtain work, Northshore bids on contracts offered by general contractors in the region and is in competition with a number of companies that currently have Collective Bargaining Agreements ("CBAs") with Local 66. (*Id.* at 8-9).

From June 1, 2009 through May 31, 2012, Local 66 had a CBA with Northshore. After the CBA expired, the parties sought to resolve issues arising from the expired CBA through settlement negotiations. (*Id.* 9:6-10). Northshore and Local 66 reached a settlement agreement on January 12, 2015. (*Id.* 9:11-14). The settlement agreement contained a binding arbitration clause and was intended to resolve the issues among Northshore, **[*5]** Local 66, and a trust fund associated with the union that administered a market recovery program ("Equity Fund"), which Northshore's employees had participated in previously. (*Id.* 9:18-22).

---

[2] The TAC defines a "major construction and building project" as any job that is $250,000 or greater.

Following execution of the settlement agreement, Northshore and Local 66 became embroiled in a new dispute involving fringe benefits allegedly owed to Northshore's employees. (TAC 11:1-4, ECF No. 128). The TAC alleges that Local 66 and its members began picketing Northshore at various job sites where Northshore held contracts to perform work. Northshore alleges that the picketing was part of a campaign by Local 66 designed to force general contractors and owners of various projects to cease doing business with Northshore. (*Id.* 11:5-8). As the dispute grew, Northshore sought and obtained a temporary restraining order to prevent a strike of its workers called for by Local 66 related to the fringe benefits. (TRO, ECF No. 21). The restraining order did not cover other conduct, such as picketing.

On October 26, 2016, Northshore's employees voted to decertify Local 66 as their bargaining representative. Northshore subsequently entered into a CBA with the Pacific Northwest Regional Council of Carpenters **[*6]** ("Carpenters") and this new association currently represents Northshore's employees as well as those of other ASM companies in the region. (TAC 15:4-6, ECF No. 128).

As a result of the fringe benefit dispute and eventual decertification, Northshore alleges that Local 66 is attempting to drive it and other Carpenters' signatories from the ASM market through threats of picketing and economic boycotts conveyed to general contractors and owners of construction projects. (*Id.* 12:15-25). Northshore further avers that Local 66 conspired with certain Northshore competitors that were Local 66 signatories to share bid information on various jobs in order to prevent Northshore and other Carpenters' signatories from successfully obtaining ASM work. (*Id.* 17:9-15). In furtherance of this conspiracy, Northshore additionally alleges that Local 66 used its influence over a union Equity Fund to direct targeted job money designed to help Local 66 members compete against non-union labor in a manner designed to harm Northshore and in breach of the 2015 settlement agreement resolving issues between Northshore and the Equity Fund. (*Id.* 16:8-14). Based on the allegations, the TAC claims that Local 66's conduct **[*7]** violates *§ 303* of the *Labor Management Relations Act ("LMRA")*[3], *§§ 1* and *2* of the *Sherman Antitrust Act*[4], and that Local 66's actions constitute the torts of interference with a business relation and civil conspiracy under Washington State law.

III. Legal Standard

Local 66 requests dismissal of Northshore's Second, Third, Fourth, and Fifth Claims for relief with prejudice on the basis that Northshore has failed to state a claim upon which the court can grant relief pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. Local 66 also raises a constitutional challenge to the First Claim but does not specifically argue for dismissal for failure to state a claim. For the following reasons, the Court grants in part and denies in part the motion to dismiss.

A motion to dismiss for failure to state a claim may be granted only when there is no cognizable legal theory to support the claim or when the complaint lacks sufficient factual allegations to state a facially plausible claim for relief. *Shroyer v. New Cingular Wireless Servs., Inc., 622 F.3d 1035, 1041 (9th Cir. 2010)*. The complaint will survive a motion to dismiss if it contains "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S.Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is facially plausible if the plaintiff "pleads factual content that allows the court to draw the reasonable inference **[*8]** that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S.Ct. 1937, 173 L. Ed. 2d 868 (2009)* (internal quotation omitted).

When deciding a motion to dismiss, the court must accept the factual allegations in the complaint as true and construe the pleadings in the light most favorable to the non-moving party. *Wilson v. Hewlett-Packard Co., 668 F.3d*

---

[3] *29 U.S.C. § 187*

[4] *15 U.S.C. §§ 1* & *2*

1136, 1140 (9th Cir. 2012). In the context of conspiracy claims under the Sherman Act, a complaint relying on parallel conduct must allege more than "conspiracy," as this is the ultimate legal conclusion, and must provide some additional factual assertions of an illegal agreement to plausibly state a claim. *See* Twombly, 550 U.S. at 566. Though not subject to a heightened pleading standard, courts must remain cognizant of the significant legal expense accompanying an antitrust lawsuit. Twombly, 550 U.S. at 558.

IV. Discussion

A. Claims under § 1 of the Sherman Act for Group Boycott and Kickback Conspiracy.

Claims Two and Three of the TAC focus on violations of § 1 of the Sherman Act. The Sherman Act prohibits "any contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." 15 U.S.C. § 1. To state a claim under **[*9]** § 1, the complaint must allege sufficient facts to plausibly suggest "(1) an agreement or conspiracy among two or more persons or distinct business entities, (2) by which the persons intend to harm or restrain competition, and (3) which actually injures competition." *Les Schockley Racing, Inc. v. Nat'l Hot Rod Ass'n, 884 F.2d 504, 507 (9th Cir. 1989)* (internal quotation omitted). Some agreements are subject to *per se* liability because they are "so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." *Nat'l Soc. of Prf'l Eng'rs v. United States, 435 U.S. 679, 692 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. In other circumstances, the court must evaluate a claim under the rule of reason, which requires a more searching analysis, with the court weighing "the anticompetitive effects and the procompetitive effects or business justification advanced for the challenged restraint to determine whether it is unreasonable." Les Schockley Racing, 884 F.2d at 507.

1. The Group Boycott Claim.

In large part, Local 66 focuses on perceived deficiencies in the claim based on its visualization of a "hub-and spoke" conspiracy because the TAC fails to allege coordinated efforts between parallel actors in order to form a "rim" to the conspiratorial wheel. *See In re Musical Instruments and Equip. Antitrust Litig., 798 F.3d 1186, 1192 (9th Cir. 2015)* (traditional hub-and-spoke conspiracy requires a hub, spokes, and a rim). Vertical agreements that restrain trade are evaluated **[*10]** under the rule of reason analysis while horizontal agreements are considered *per se* violations. *Id. at 1192 n. 3*. It is therefore favorable to a plaintiff to allege a *per se* restraint to avoid the more searching analysis and economic impact requirements of the rule of reason standard. The Court finds that the TAC meets the standard for a *per se* violation of the Sherman Act.

In the TAC, each "spoke" represents an agreement between Local 66 and one of the project owners or general contractors to not hire Northshore or to remove Northshore from jobs it had already bid on. The spokes are also comprised of direct competitors of Northshore. According to Local 66, even if the TAC contains sufficient allegations of vertical agreements, it fails to allege the necessary horizontal agreements in order to state a claim. The Court is not convinced.

Local 66's hyper-technical reading of the necessary elements of a § 1 claim based on *Musical Instruments* is not supported by the case law or by the *Musical Instruments* case itself. The Ninth Circuit Court of Appeals in *Musical Instruments* affirmed dismissal where a complaint failed to plausibly state that parallel action between certain manufacturers was anything more than **[*11]** similar responses to the same market pressure. *Musical Instruments, 798 F.3d at 1196*. The Ninth Circuit did not reject the whole notion of an antitrust violation based on a need to show a complete hub-and-spoke arrangement. To the contrary, the Ninth Circuit cautioned that "homespun metaphors for complex economic activities go only so far. Section 1 prohibits agreements that unreasonably restrain trade, no matter the configuration they take or the labels we give them." *Id. at 1192*. Even if an agreement is purely a collection of vertical agreements, that may result in a violation of the Sherman Act. *Musical Instruments, 798 F.3d at 1192 n. 3* (citing *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 898-99, 127 S.Ct. 2705, 168 L. Ed. 2d 623 (2007)*). Where the complaint relies solely on circumstantial evidence, the plaintiff must provide enough additional information to exclude the possibility that the defendant acted independently of the other alleged co-conspirators through conduct that is merely permissible competitive conduct. To show conspiracy through circumstantial evidence, the complaint must allege "plus factors" such as "price parallelism, product uniformity, exchange of price information, and opportunity to meet to form anti-competitive policies." Wilcox v. First Interstate Bank of Oregon, 815 F.2d 522, 525-26 (9th Cir. 1987). Bid rigging is a *per se* violation of the Sherman Act. United States v. Rose, 449 F.3d 627, 630 (5th Cir. 2006).

i. The TAC plausibly alleges a violation of the Sherman Act.

The TAC **[*12]** alleges that both prior to, and following termination of Local 66 as the exclusive collective bargaining representative for Northshore's employees, Local 66 engaged in a series of concerted actions designed to eliminate Northshore from the competitive market. In support of the conspiracy claim, the TAC includes various allegations that certain representatives of Local 66 conveyed threats to the City of Seattle, the Seattle Building and Trades Council ("Seattle BTC"), and a number of general contractors that employ or could employ Northshore on large regional projects. The TAC alleges that the goal of these threats was to further Local 66's attempts to eliminate the Northshore from the market. Local 66 posits that the complaint fails to allege a cognizable claim because any parallel action by the various owners and general contractors is "the rational business conduct of seeking to avoid a labor dispute on their jobsites . . . ." (Mtn. to Dismiss 5:23-24, ECF no. 131). The Court disagrees that this is sufficient to avoid the plausible allegations of a conspiracy to exclude Northshore in the TAC.

Although the TAC fails to allege any specific horizontal agreement between the owners or **[*13]** general contractors to exclude Northshore from the market, it does include sufficient allegations for the Court to conclude that a group of direct competitors comprising at least 70% of the ASM market worked with Local 66 and certain general contractors to exclude Northshore and other Carpenters' signatories from ASM jobs. For instance, the TAC alleges that Northshore was removed from the Pier 66 project after Local 66 and Seattle BTC worked together to pressure the Port of Seattle and its general contractor, Turner, to remove Northshore from the project and replace it with a direct competitor associated with Local 66. (TAC 22:8-21, ECF No. 128). Removal of Northshore would not provide an economic benefit for the general contractor because the new ASM contractor would not offer a better price under the project labor agreement. (*Id.* 22:1-7). The TAC also alleges that certain general contractors have refused to even provide Northshore and other Carpenters' signatories with bid opportunities, despite using these entities for work in the past. (TAC 24:4-9, ECF No. 128). Finally, the TAC includes numerous instances where Local 66 contacted general contractors (or used a Northshore competitor **[*14]** to make contact) demanding removal of Northshore from projects. Although the TAC does not indicate that the general contractors specifically understood that all of them were to exclude Northshore, it does plausibly allege that a considerable number of general contractors understood and agreed to not allow Northshore to compete.

Although most of the allegations focus on vertical agreements between Local 66 and individual general contractors to exclude Northshore from projects, the TAC also includes sufficient facts for the Court to determine that a horizontal agreement between Northshore's ASM competitors existed and that the owners and general contractors were used as part of the overall conspiracy. Even if the owners of general contractors participated unwillingly, or for different reasons than Local 66, that does not insulate the conduct from antitrust scrutiny and does not mean the plaintiff fails to state a claim if the complaint successfully alleges acquiescence in a scheme with the effect of restraining trade. *See* Dickson v. Microsoft Corp., 309 F.3d 193, 205 (4th Cir. 2002). The TAC plausibly alleges, through identity of parties, project, and date, that Northshore competitiors McKinstry, Architectural Sheet Metal, PSF Mechanical, Kenco **[*15]** Construction, and MD Exteriors, had knowledge of and jointly participated in Local 66's efforts coordinate project bids. On at least one occasion, Northshore's competitors did in fact coordinate bids for a project (Interlake High School Classroom Addition). (TAC 17:20-22, ECF No. 128).

Taken together, the TAC states a claim under § 1 of the Sherman Act based on the attempted exclusion of Northshore from the relevant market. Contrary to Local 66's assertion, the TAC plausibly states a claim by identifying the who, what, where and when of the conspiracy. In addition to the factual allegations related to the general contractors and competitors, the TAC further alleges that two of Local 66's employees, Tim Carter and Aaron Bailey, are also trustees of the Organizational Trust that operates or has control over the Equity Fund and is alleged to have the ability to direct job targeting funds to certain projects. (*Id.* 16:11-13). The TAC also plausibly alleges that Local 66 had the opportunity to meet at various times to form the anti-competitive behavior, such as the meeting on or about October 27, 2016, the day after Local 66 was decertified by Northshore's employees as their bargaining representative. **[*16]**

Given the plausible allegations of concerted action to exclude Northshore and other Carpenter signatories from the relevant market, it is incumbent on Local 66 to point to some plausible pro-competitive reason for the parallel actions. All the motion to dismiss points to is that the owners and general contractors may have acted rationally in attempting to avoid the labor disputes threated by the Local 66. This is not the sort of legitimate business concern that could undercut other circumstantial evidence of an antitrust violation. *See* *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212, 79 S.Ct. 705, 3 L. Ed. 2d 741 (1959)* ("Group boycotts, or concerted refusals by traders to deal with other traders . . . have not been saved by allegation that they were reasonable in the specific circumstances"). "[E]ven purportedly involuntary participation in a conspiracy to boycott can still be viewed as an illegal boycott, since coerced but knowing acquiescence in an illegal scheme is still generally viewed as actionable participation." William Holmes and Melissa Mangiaracina, ***Antitrust Law*** Handbook, Group Boycotts Generally § 2:16 (2017). Local 66's position is untenable, essentially claiming that where it is successful in pressuring a job owner or general contractor to exclude a competitor **[*17]** from the market no antitrust action may stand. If the Court were to adopt this approach it would undercut antitrust liability just by virtue of the effectiveness of the threat even if the threat has no legitimate labor purpose.

ii. Local 66's alleged conduct is not exempt from antitrust liability.

As a secondary argument, Local 66 contends that even if it did exert illegal pressure against the various owners and general contractors to exclude Northshore from the market, the threatened conduct is exempt from antitrust liability based on the *Clayton* and *Norris-LaGuardia Acts*. *15 U.S.C. § 17*; *29 U.S.C. §§ 101 et seq.* The Court does not agree.

In general, an organized labor union may engage in those actions that otherwise might violate ***antitrust law*** based on either a statutory or nonstatutory exemption. *Granddad Bread, Inc. v. Cont'l Baking Co., 612 F.2d 1105, 1109 (9th Cir. 1979)*. The statutory exemption is subject to an important limitation—the organized labor union must not combine with nonlabor groups. *Phoenix Elec. Co. v. National Elec. Contractors Ass'n, 81 F.3d 858, 860 (9th Cir. 1996)*. The TAC is replete with plausible allegations that Local 66 combined or attempted to combine with nonlabor entities in order to accomplish its alleged goal of eliminating Northshore from the relevant market. Therefore, the statutory exemption does not apply.

The more difficult question is whether Local **[*18]** 66's conduct is covered by the nonstatutory exemption from antitrust liability. The nonstatutory exemption applies to an agreement to restrain trade when: "(1) the restraint primarily affects the parties to the agreement and no one else, (2) the agreement concerns wages, hours, or conditions of employment that are mandatory subject of collective bargaining, and (3) the agreement is produced from bona fide, arm's length collective bargaining." *Phoenix Elec. Co., 81 F.3d at 861* (citing *Continental Maritime of San Francisco v. Pacific Coast Metal Trades Dist. Council, 817 F.2d 1391 (9th Cir. 1987))*. The purpose of this exemption is to facilitate the ultimate goal of "meaningful collective bargaining" without subjecting those actions to antitrust scrutiny and thereby allow judicial use of ***antitrust law*** to resolve labor disputes. *California ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1125 (9th Cir. 2011)*. The *Safeway* panel engaged in a thorough discussion of the history and evolution of the nonstatutory exemption, which makes clear that the further an alleged restraint ventures from operating primarily in the labor market to instead impact the business market, the less likely it is that the nonstatutory exemption should insulate the conduct. *Safeway, 651 F.3d at 1129-1131*.

In this case, Local 66's alleged conduct impacted more than just Local 66 and Northshore. The allegations include conduct of multiple direct competitors, owners, general **[*19]** contractors, and alleged harms against not just Northshore, but other Carpenters' signatories as well. Some of this conduct occurred long after Local 66 was decertified as the bargaining representative for Northshore. The end result is a plausible allegation that the Local 66 was not in the throes of a legitimate labor dispute, but instead was engaging in actions designed to go outside of the traditional confines of a labor dispute to fix the market against Northshore and the Carpenters' signatories. This is anything but the narrow two-party labor dispute envisioned by the non-statutory exemption. The "agreement" at issue here was not part of a collective bargaining effort but is alleged to consist of the concerted effort of Local 66 to force or obtain the participation of project owners, general contractors, and other direct competitors to exclude Northshore from jobs and essentially eliminate competition from the ASM market. As alleged in the TAC, the agreement has nothing to do with collective bargaining, but instead involved a scheme of retribution, utilizing actions inherently antithetical to competitiveness, such as bid rigging.

Local 66 attempts to narrowly define its conduct **[*20]** as merely protected incidental secondary picketing of a few employers. First, the scope of the threats plausibly alleged by the TAC appear to violate the prohibition on secondary picketing. *See NLRB v. Retail Store Emp. Union, Local 1001, 447 U.S. 607, 616, 100 S.Ct. 2372, 65 L. Ed. 2d 377 (1980)*. Second, the primary thrust of the allegations is a concerted effort to manipulate the market to harm Northshore. The core allegations of the TAC involve a concerted effort between direct competitors and Local 66 to outright exclude Northshore from working in Western Washington, and, where unable to do so by direct threats, to rig bidding on projects in a manner that would prevent Northshore from obtaining work. The bid rigging was combined with threats of picketing and economic boycotts designed to remove Northshore from present jobs where it was the winning bid, and to embroil would be employers in Local 66's plan to exclude Northshore with threats made both to the potential direct employers and the ultimate customers.

Local 66's conduct is not subject to any exemption from antitrust scrutiny and therefore the TAC states a claim for violation of the Sherman Act *§ 1* based on the attempted exclusion of Northshore and other Carpenters' signatories from the market.

*2. The TAC states a claim under **[*21]** § 1 of the Sherman Act for a "Kickback Conspiracy" related to use of the Equity Fund*.

The second *§ 1* claim in the TAC is based on Local 66's effort, with the assistance of the Organizational Trust, to use the Equity Fund in furtherance of the conspiracy by focusing Equity Fund monies to Northshore's competitors.

In general, job targeting or other similar union subsidy programs are not subject to antitrust claims because such programs are designed to increase the competitiveness of the union in areas of stiff competition with non-union labor. *See Phoenix Elec. Co., 81 F.3d at 862-63*. The fact that a job targeting program as a whole does not violate ***antitrust law*** does not mean that the program and its funds cannot, under certain circumstances, become the subject of antitrust liability. *See American Steel Erectors, Inc. v. Local Union No. 7, Intern. Ass'n of Bridge, Structural, Ornamental & Reinforcing Iron Workers, 815 F.3d 43, 69 n. 6 (1st Cir. 2016)*.

Job targeting or market recovery projects almost always involve a union and a non-labor group. Therefore, the statutory exemption to antitrust liability often does not apply, as is the case here. *See American Steel Erectors, Inc. v. Local Union No. 7, Intern. Ass'n of Bridge, Structural, Ornamental & Reinforcing Iron Workers, 536 F.3d 68, 78 (1st Cir. 2008)* (describing function of job targeting or market recovery programs). The nonstatutory exemption may cover the job targeting program, at least as it relates to conduct between the union and the employer receiving the funds. *See Phoenix Elec. Co., 81 F.3d at 862*. A more difficult **[*22]** question arises, though, when the allegations are not merely that of a union attempting to increase its members' competitiveness against non-union labor, but instead involve additional allegations of a wider conspiracy. *See American Steel Erectors, 536 F.3d at 80-81*. In these instances it is possible that the nonstatutory exemption will not apply. *Id. at 80*.

Local 66 points to *Phoenix Elec. Co.* as determinative of this matter. *Phoenix Elec. Co.* addressed whether a job targeting program could qualify for the nonstatutory exemption if it was designed to compete with non-union labor. *Phoenix Elec. Co., 81 F.3d at 863*. The panel in *Phoenix Elec. Co.* concluded that the supra-competitive effect of union members voluntarily giving up a portion of their wages to compete with lower cost non-union labor did not take the agreement out of the protection from Sherman Act liability. *Id. at 862*. In this case, the TAC indicates a different harm. Specifically, that the job targeting funds held by the Equity Fund are being diverted in a manner that furthers the conspiracy to exclude Northshore from the market. The allegation here is that by using the fund as an alter-ego, Local 66 has both wrongfully ceased payments owed to Northshore by the Equity Fund while simultaneously propping up the bids **[*23]** of direct competitors, primarily on those contracts where Northshore submits a bid.

Although Local 66 may generally have the ability to direct funds to its own union employers while remaining within the nonstatutory exemption, the protection offered is not unlimited. *See* *Phoenix Elec. Co., 81 F.3d at 862-63*. If Northshore is the low bidder by virtue of some economic advantage, the fact that a direct competitor is able to match or undercut the bid is typically the sort of supracompetitive activity recognized as appropriate by the Ninth Circuit. Nevertheless, it is possible that a job targeting fund could be used in a manner that would violate the Sherman Act, and the TAC contains sufficient allegations of such a violation. As discussed *supra*, the TAC plausibly alleges a scheme to exclude Northshore from the relevant market and prevent it and other Carpenters' signatories from even submitting bids in some instances. To the extent that Local 66's employees used their authority over the Equity Fund to further the conspiracy, that conduct is not protected by the nonstatutory exemption.

Local 66 argues that Northshore's ASM competitors must share bid information with the Organization Trust in order to receive Equity Fund money. **[*24]** Assuming this is true, Local 66 offers no logical explanation for why those competitors would share that information with each other or allow the Organization Fund to do so unless a short term agreement was in place to expand market share since these entities all compete for jobs. The TAC plausibly alleges that the Equity Fund, at the direction of Local 66's employees, diverted targeted fund money in a manner not guided by a goal of lowering prices to compete, but instead with the aim of eliminating ordinary market competition. This is the kind of harm that the Sherman Act is designed to prevent, especially where Local 66 combines with direct competitors to stifle the natural competition represented by the process of competitors bidding on jobs. The Court will not dismiss Claim Three.

B. Claim under *§ 2* of the Sherman Act for Conspiracy to Monopolize.

The Fourth Claim alleges that Local 66, in combination with Local 66 signatory employers, acted in a conspiracy to monopolize the ASM market in Western Washington. The Sherman Act *§ 2* makes it illegal for any person to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the **[*25]** trade or commerce among the several States . . . ." *15 U.S.C. § 2*. To state a claim under *§ 2* of the Sherman Act for conspiracy to monopolize, a complaint must allege sufficient plausible facts to show: "(1) the existence of a combination or conspiracy to monopolize; (2) an overt act in furtherance of the conspiracy; (3) the specific intent to monopolize; and (4) causal antitrust injury." *Paladin Assocs., Inc. v. Montana Power Co., 328 F.3d 1145, 1158 (9th Cir. 2003)*. A complaint may also state a claim for an attempt to monopolize with plausible allegations of (a) specific intent to control prices or destroy competition, (b) predatory or anticompetitive behavior directed at accomplishing the goal, (c) a dangerous probability of achieving monopoly power, and (d) causal antitrust injury. *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995)*. The requisite "specific intent" may be inferred from "conduct forming the basis for a substantial claim of restraint of trade or conduct that is clearly threatening to competition or clearly exclusionary, but the focus must be on proof of unfair or predatory conduct." *Arminak & Assocs., Inc. v. Saint-Gobain Calmar, Inc., 789 F.Supp.2d 1201, 1205 (C.D. Cal. 2011)* (internal citations omitted).

Critical to any *§ 2* claim is that a single economic entity exist that may control the market. *Terminalift LLC v. Int'l Longshore and Warehouse Union Local 29, 11-CV-1999, 2013 U.S. Dist. LEXIS 70545, 2013 WL 2154793, at *3 (S.D. Cal. May 17, 2013)*. "The very phrase 'shared monopoly' is **[*26]** paradoxical; when a small number of large sellers dominates a market, this typically is described as an oligopoly." *Id.* (quoting *Oxbow Carbon & Minerals LLC v. Union Pac. R. Co., 926 F.Supp.2d 36, 46 (D.D.C. 2013))*.

The motion to dismiss does not dispute that Northshore has properly identified the relevant market as Western Washington, and fails to identify why the Court should not accept Northshore's claim that collectively Local 66 and Local 66 signatories control at least 70% of the market. The Court has already determined as discussed *supra* that the TAC contains sufficient plausible allegations of a conspiracy. The remaining question is whether such conspiracy has the potential to actually create an injury to competition within the meaning of *§ 2*.

One of the key issues for Northshore is that the "monopoly" here would actually be composed of multiple ASM companies, all of whom apparently compete against each other. The antitrust laws serve to protect competition generally, not any individual competitor. The TAC simply falls short of stating a plausible claim where the attempted "monopoly" would leave a group of ASM competitors competing against themselves for bids. This is not a monopoly within the meaning of *§ 2* of the Sherman Act. *International Longshore and Warehouse Union v. ICTSI Oregon, Inc., 15 F.Supp.3d 1075, 1096 (D. Or. 2014)*; **[*27]** *NorthBay Healthcare Group, Inc. v. Kaiser Foundation Health Plan, Inc., 17-cv-05005-LB, 2017 U.S. Dist. LEXIS 206663, 2017 WL 6059299, at *5 (N.D. Cal. Dec. 7, 2017)*; *Oxbow Carbon & Minerals LLC, 926 F.Supp.2d at 46*. Northshore cannot state a claim for conspiracy to monopolize by an entire group of competitors, thus the Court will dismiss Claim Four with prejudice.

C. State Claims for Tortious Interference with Business Relations and Civil Conspiracy.

The final claim in the TAC, Claim Five, is based on an injury to both Northshore and Northshore's President, Jeffrey Meyer. According to the TAC, Local 66's actions have resulted in harm to Northshore and Meyer by damaging goodwill with customers through intentional interference with business relations and future business expectancy. Local 66 argues that the state law claims are preempted by *§ 303 of the LMRA* because the claims overlap with those raised in Claim One of the TAC.

Section 303 of the LMRA prohibits union activities designed to force a neutral employer to stop doing business with an employer with whom the union has a dispute. *Ahearn v. Int'l Longshore & Warehouse Union, Locals 21 & 4, 721 F.3d 1122, 1128 (9th Cir. 2013)*. Commonly referred to as "secondary boycott" activities, a union is specifically prohibited from threatening, coercing, or otherwise pressuring a neutral employer to cease doing business with an entity that the union is involved **[*28]** in a dispute with. A union that engages in secondary boycott activities violates *§ 8(b)(4) of the NLRA*, which is a violation of *§ 303 of the LMRA*.

The broad statutory wording of the LMRA has convinced courts that *§ 303 of the LMRA* completely preempts state law causes of action based on the same conduct. *See* *Point Ruston, LLC v. Pac. Nw. Re'l Council of Carpenters, 658 F.Supp.2d 1266, 1277 (W.D. Wash. 2009)*; *JTS, Inc. v. City of Seattle, C13-663RAJ, 2013 U.S. Dist. LEXIS 157902, 2013 WL 5913229, at *3 (W.D. Wash. Nov. 4, 2013)* (collecting cases). The Ninth Circuit, however, rejected a complete preemption approach for *§ 303* claims after undertaking an extensive analysis of the various preemption doctrines. *See* *Retail Property Trust v. United Brotherhood of Carpenters and Joiners of America, 768 F.3d 938, 948-49 (9th Cir. 2014)*. The *Retail Property* court discussed at length the history of labor law and the numerous instances where courts, including the United States Supreme Court, have attempted to define its contours in relation to state causes of action. The ultimate conclusion by the panel in *Retail Property* is that *§ 303* does not evince congressional intent to occupy the field but where a state is not regulating activity trending toward public safety, such as trespass laws, it is likely that the state cause of action conflicts with federal labor law. *See* *Retail Property Trust, 768 F.3d at 959* (collecting cases). Therefore, the court must determine whether Claim Five of the TAC conflicts with federal law because the relief would frustrate effective implementation of *§ 303*. *Id.*

In **[*29]** this case, the TAC alleges a state law claim for tortious interference with business relations and civil conspiracy and specifically points out that Claim Five is not based on any allegation used to support the *§ 303* claim. However, the TAC focuses on the use of union pressure tactics against neutral employers, such as the threats of picketing and economic boycotts, to make the claim that Local 66 interfered with Northshore's business relations. This is also the focus of *§ 303 of the LMRA*. Unlike in *Retail Property Trust*, the TAC does not focus on state laws of general applicability designed for public safety. Instead, the TAC focuses on economic harms stemming from union conduct in a heated dispute between Northshore and Local 66. Although Northshore may claim to use a different set of facts for Claim Five, that is not the standard. Instead, it is whether the same nucleus of conduct that gave rise to the *§ 303* secondary boycott claim also forms the basis for the state claim and, if so, whether the state regulation conflicts with federal labor law or is it instead a public safety concern. In this case, the state causes of action conflict with *§ 303 of the LMRA* and its remedies.

Washington State recognizes a cause of action for tortious interference with business expectancy **[*30]** where: (1) there is a valid contractual relationship or business expectancy, (2) the defendant has knowledge of the relationship, (3) there is an intentional interference inducing or causing a breach of termination of the relationship or expectancy, (4) defendant's interference is for an improper purpose or used improper means, and (5) there is resulting damage. *Leingang v. Pierce County Med. Bur., Inc., 131 Wn.2d 133, 157, 930 P.2d 288 (Wash. 1997)*. Washington also recognizes a claim for civil conspiracy, which is defined as a "combination of two or more persons agreeing to commit a criminal or unlawful act, or to commit a lawful act by criminal or unlawful means, or as a combination of two or more persons by concerted action to accomplish an unlawful purpose, or some purpose not in itself unlawful by unlawful means." *Couie v. Local Union No. 1849 United Broth. of Carpenters and Joiners of America, 51 Wash.2d 108, 116, 316 P.2d 473 (Wash. 1957)*. Unlike the LMRA, Washington State allows for injunctive relief and therefore state law conflicts with the federal scheme. *See* *JTS, Inc., 2013 U.S. Dist. LEXIS 157902, 2013 WL 5913229, at *4* (citing *San Antonio Cmt. Hosp. v. S. Cal. Fist. Council of Carpenters, 125 F.3d 1230, 1235 (9th Cir. 1997))*.

Although the TAC is not particularly detailed in regard to how the various allegations meet the elements of the two state law claims, it is evident that the basis for relief is Local 66's attempts to have Northshore excluded or removed from various jobs through unlawful secondary boycott activity. These claims are covered **[*31]** by the broad definitions of prohibited conduct covered by *§ 303 of the LMRA* and additionally fall subject to regulation under federal ***antitrust law***. The fact that Meyer may have suffered emotional distress does not change the result. If the resulting damage were the standard for preemption it would totally eviscerate the preemption analysis applicable to these cases. The LMRA covers any "individual" harmed by the unlawful secondary boycott activity, which includes Meyer. To allow a state cause of action here would place state law squarely between two bodies of federal law carefully designed to weigh competing rights in the same economic sphere. State regulation in this instance is simply incompatible with the requirements of federal law. Claim Five is preempted and the Court will dismiss it with prejudice.

D. Constitutional challenge to *§ 303 of the LMRA*.

Though Local 66 does not specifically request dismissal of the First Claim in the TAC, it does devote time in the motion to arguing that *§ 303 of the LMRA* is an unconstitutional restraint on *First Amendment* rights because *§ (8)(b)(4)(ii)(B)* of the NLRA—the basis for the *§ 303* violation—is a restriction on speech. Citing *Reed v. Town of Gilbert, --U.S.--, 135 S.Ct. 2218, 192 L. Ed. 2d 236 (2015)*, Local 66 argues that *§ (8)(b)(4)(ii)(B)* is a facially content, **[*32]** viewpoint, and speaker based restriction on speech. Essentially, Local 66 argues that the Supreme Court in *Reed* implicitly overruled its prior precedent upholding the constitutionality of *§ 8 of the NLRA* despite never mentioning the cases on point. *See* *IBEW, Local 501 v. NLRB, 341 U.S. 694, 705, 71 S. Ct. 954, 95 L. Ed. 1299 (1951)*; *NLRB v. Retail Store Employees Union, Local 1001, 447 U.S. 607, 614, 100 S. Ct. 2372, 65 L. Ed. 2d 377 (1980)*. The Court declines to hold that *§ 8(b)(4) of the NLRA* constitutes an unconstitutional restriction on Local 66's free speech in light of controlling precedent.

The Supreme Court has clarified that where it has issued a prior decision that directly controls the outcome of a case, but whose viability appears in doubt based on subsequent decisions, "'the [lower court] should follow the case which directly controls, leaving to this Court the prerogative of overruling its own decisions.'" *Agostini v. Felton, 521 U.S. 203, 237, 117 S. Ct. 1997, 138 L. Ed. 2d 391 (1997)* (quoting *Rodriguez de Quijas v. Shearson/American Express, Inc., 490 U.S. 477, 485, 109 S. Ct. 1917, 104 L. Ed. 2d 526 (1989))*. Given that the Supreme Court has not overruled the prior decisional authority that controls this case, this Court does not find the statute unconstitutional.[5]

V. CONCLUSION

---

[5] The Court also questions the viability of arguing for an expansive reading of *Reed v. Town of Gilbert. See* *NLRB v. International Association of Bridge, Structural, Ornamental and Reinforcing Ironworkers Union, Local 433, 891 F.3d 1182 (9th Cir. 2018)*.

For the foregoing reasons, the Court hereby ORDERS as follows:

1. Northshore's motion to strike [141] is **GRANTED IN PART** and the Court will strike the Declaration of Paul More and related attachments, the remainder of the motion is **DENIED**;

2. Local 66's motion to dismiss [131] is **GRANTED [*33]** as to the claims based on conspiracy to monopolize under *§ 2* of the Sherman Act (Claim Four) and for tortious interference and civil conspiracy under Washington State law (Claim Five);

3. Claims Four and Five are **DISMISSED WITH PREJUDICE**.

4. Local 66's motion to dismiss is **DENIED** as to the claims under *§ 1* of the Sherman Act based on a contractor exclusion boycott (Claim Two) and kickback conspiracy (Claim Three).

IT IS SO ORDERED.

Signed this 24th day of September, 2018.

/s/ Barbara Jacobs Rothstein

Opinion

[*941] ORDER ON MOTIONS FOR SUMMARY JUDGMENT, DAUBERT MOTIONS, MOTIONS TO STRIKE AND EXCLUDE - REDACTED

Re: Dkt. Nos. 328, 329, 330, 335, 336, 337

INTRODUCTION

Plaintiffs Huawei Technologies Co., Ltd., Huawei Device USA, Inc. and Huawei Technologies USA, Inc. (collectively, "Huawei") and defendants Samsung Electronics Co., Ltd., Samsung Electronics America, Inc., and Samsung Research America, Inc. (collectively, "Samsung") are major players in the world of wireless telecommunications—a world governed by cellular technology standards, such as the 3G UMTS and 4G LTE standards developed **[**16]** by the Third Generation Partnership Project ("3GPP") and promulgated by standard setting organizations like the European Telecommunications Standards Institute ("ETSI").[1] Both Huawei and Samsung **[*942]** have agreed to license their declared standard essential patents ("SEPs") on fair, reasonable, and non-discriminatory ("FRAND") terms and conditions under ETSI's Intellectual Property Rights ("IPR") Policy. Compl. ¶ 63 (Dkt. No. 1[redacted], Dkt. No. 3-4[under seal]); *see also* Samsung's Answer and Am. Counterclaims ¶¶ 29, 54 (Dkt. No. 91[redacted]; Dkt. No. 90-2[under seal]). But they have been unable to agree on the terms of a cross-license to their patent portfolios or on a process that would result in a global resolution of these issues. Instead, they have chosen combat in piecemeal litigation around the globe.

This case is one of the pieces. My order here addresses each party's motion for summary judgment concerning the patents at issue, Huawei's *Daubert* motion and motion to preclude Samsung's FRAND experts, and Samsung's two motions to strike or exclude Huawei's expert reports. Because the parties are intimately **[**17]** familiar with the background in this case, I will only repeat what is necessary to resolve the issues presented by these motions.

PROCEDURAL HISTORY

On May 24, 2016, Huawei filed this action asserting claims for breach of contract, declaratory judgment of FRAND terms and conditions for a cross-license, and patent infringement of U.S. Patent No. 8,369,278, U.S. Patent No. 8,416,892, U.S. Patent No. 8,483,166, U.S. Patent No. 8,812,848, U.S. Patent No. 8,644,239, U.S. Patent No. 8,885,587, U.S. Patent No. 8,885,583, U.S. Patent No. 8,639,246, U.S. Patent No. 8,412,197, U.S. Patent No. 8,996,003, U.S. Patent No. 8,724,613. Compl. (Dkt. No. 1[redacted], Dkt. No. 59[unredacted]).

Samsung answered on August 22, 2016, and amended on October 16, 2016, asserting counterclaims for breach of contract, antitrust monopolization in violation of *Section 2 of the Sherman Act*, *15 U.S.C. § 2*, patent infringement of United States Patent Nos. 8,228,827 ("the '827 patent"), 8,315,195 ("the '195 patent"), RE44,105 ("the RE'105

[1] Standard Setting Organizations "establish technical specifications to ensure that products from different manufacturers are compatible with each other." *Microsoft Corp. v. Motorola, Inc., 696 F.3d 872, 875 (9th Cir. 2012)*("Microsoft II")(citing Mark A. Lemley, *Intellectual Property Rights and Standard—Setting Organizations*, *90 Calif. L.Rev. 1889 (2002)*). Many courts have expounded on the benefits of standards in various industries. *See, e.g.,* *Microsoft Corp. v. Motorola, Inc., 795 F.3d 1024, 1030 (9th Cir. 2015)*("*Microsoft IV*"); *Apple, Inc. v. Motorola Mobility, Inc., 2011 U.S. Dist. LEXIS 72745, 2011 WL 7324582, at *1 (W.D. Wis. June 7, 2011)*.

patent"), 8,457,588 ("the '588 patent"), 8,509,350 ("the '350 patent"), 9,113,419 ("the '419 patent"), 8,619,726 ("the '726 patent"), 8,761,130 ("the '130 patent"), 9,288,825 ("the '825 patent"), 7,706,348 ("the '348 patent"), and 8,995,924 ("the '924 patent"), and declaratory judgment of noninfringement and invalidity of Huawei's patents-in-suit. Answer and Am. Counterclaims (Dkt. No. 91[redacted], Dkt. No. 90-2[sealed]).

At the initial case management conference, the parties disputed whether bifurcating the case would be the most efficient way to manage it. 9/13/16 Minute Entry (Dkt. No. 75); *see* Joint Case Management St. (Dkt. No. 67). Huawei expressed **[**18]** its view that this case should be bifurcated to address the FRAND-related issues prior to the patent infringement issues, but Samsung insisted that Huawei was "asking the court to put the remedy before liability, put the cart before the horse, and that [would] not streamline things." 9/13/16 Hr'g Tr. at 20:9-12 (Dkt. No. 82). Given that the parties could not agree, I denied the request.

On November 21, 2016, I denied Samsung's motion to dismiss two of Huawei's patents (the '892 patent and the '239 patent) on grounds that they fail to claim patent eligible subject matter under *35 U.S.C. § 101*. Order Denying Samsung's MTD (Dkt. No. 103).

On April 27, 2017, I granted Samsung leave to amend its infringement contentions to include additional infringing instrumentalities **[*943]** and change the conception dates for its '827 patent and '105 patent. Order Granting Samsung Leave to Am. Inf. Contentions (Dkt. No. 130). I also directed the parties to submit joint or competing case proposals to assist in managing the scope of this case.

On June 2, 2017, I issued a case management order adopting the case narrowing procedures implemented by the Hon. Lucy Koh in *Apple Inc. v. Samsung Electronics Co., Ltd. et al.*, 5:12-cv-630-LHK (Dkt. Nos. 394, 471). The order directed **[**19]** the parties to limit their infringement contentions to 5 patents, 10 asserted claims, and 15 accused products per side.[2]

On August 31, 2017, I issued the claim construction order for the five most significant terms selected by each side. Claim Construction Order (Dkt. No. 168).[3]

On March 26, 2018, I granted Huawei's request to stay infringement claims for Samsung's '588 patent pending inter partes review before the Patent Trial and Appeal Board (PTAB). Order Granting Stay of Infringement Claim for '588 Patent Pending Inter Partes Review (Dkt. No. 267).[4] Under different circumstances, I granted a similar request from Samsung to stay certain infringement claims for Huawei's '197 patent and '166 patent pending inter partes review. Order Granting Stay of Infringement Claim for '197 and '166 Patents (Dkt. No. 307).

On April 13, 2018, I granted Samsung's motion for an antisuit injunction enjoining Huawei from enforcing the injunction orders issued by the Intermediate People's Court of Shenzhen, which had found that Samsung is

---

[2] In accordance with the order, the parties narrowed their asserted patents, claims, and products on September 11, 2017 (Dkt. Nos. 172, 173), March 16, 2018 (Dkt. Nos. 255, 256), and June 26, 2018 (Dkt. Nos. 318-3, 319). At present, Huawei has narrowed its asserted claims to the following: U.S. Patent 8,416,892, claims 1, 10; U.S. Patent 8,644,239, claims 7, 18; U.S. Patent 8,885,587, claims 3, 9; and U.S. Patent 8,724,613, claims 1, 5 (Dkt. No. 318-3[redacted]). And Samsung has narrowed its claims to the following: U.S. Patent No. RE44,105, claims 28, 29, and 32; U.S. Patent No. 8,509,350, claim 1; U.S. Patent No. 8,619,726, claims 11 and 13; U.S. Patent No. 8,761,130, claims 13 and 16; and U.S. Patent No. 9,288,825, claims 1 and 4 (Dkt. No. 319).

[3] On March 1, 2018, I granted Huawei's motion for clarification or reconsideration for one of the constructions, the term "first P-temporary Mobile Station Identity (P-TMSI) in an access message," appearing in Huawei's '166 Patent, and assigned it its plain and ordinary meaning. Order on Huawei's Mot. for Clarification, or in the alternative, Reconsideration of Claim Construction Order (Dkt. No. 247).

[4] Since Samsung had selected these claims as part of its case narrowing process, it was permitted to amend its election of asserted claims and patents. Order Regarding Substitution of Patent and Claims (Dkt. No. 268); Samsung's Am. Case Narrowing St. (Dkt. No. 275).

infringing two of Huawei's Chinese SEPs, Order Granting Samsung's Mot. for Antisuit Injunction (Dkt. No. 280[redacted]). I denied Huawei's motion to alter, amend, or reconsider that order on June 19, 2018. (Dkt. No. 310).

On July 17, **[**20]** 2018, the parties stipulated to dismissal, without prejudice, of Huawei's cause of action for declaratory judgment of FRAND terms and conditions for a cross-license (count II). Stipulation (Dkt. No. 354); Order (Dkt. No. 361).

On July 3, 2018, Huawei filed its motion for summary judgment ("Huawei's MSJ") (Dkt. No. 328[redacted], Dkt. No. 327-8[under seal]), motion to preclude Samsung's FRAND experts from offering improper legal opinions ("Huawei's FRAND-related Mot. to Strike") (Dkt. No. 329[redacted], Dkt. No. 327-6[under seal]), and **[*944]** *Daubert* motion on technical issues ("Huawei's *Daubert* Mot.") (Dkt. No. 330[redacted], Dkt. No. 327-4[redacted]).

The next day, Samsung filed its motion for summary judgment ("Samsung's MSJ") (Dkt. No. 336[redacted], Dkt. No. 333-2[under seal]), motion to strike report and testimony of Huawei's experts Padilla, Lasinski, Jackson, deLisle, and Ding ("Samsung's *Daubert* Mot.") (Dkt. No. 335[redacted], Dkt. No. 334-2[under seal]), and motion to strike portions of expert reports, largely based on inadequate disclosures ("Samsung's Mot. to Strike") (Dkt. No. 337[redacted], Dkt. No. 334-2[under seal]).

On August 15, 2018, I heard argument from the parties. This **[**21]** order addresses those motions. The numerous administrative motions filed in conjunction with these substantive motions will be addressed separately.

LEGAL STANDARD

I. SUMMARY JUDGMENT

A party is entitled to summary judgment where it "shows that there is no genuine dispute as to any material fact and [it] is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A dispute is genuine if it could reasonably be resolved in favor of the nonmoving party. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A fact is material where it could affect the outcome of the case. *Id.*

The moving party has the initial burden of informing the court of the basis for its motion and identifying those portions of the record that demonstrate the absence of a genuine dispute of material fact. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 323-24, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. Once the movant has made this showing, the burden shifts to the nonmoving party to identify specific evidence showing that a material factual issue remains for trial. *Id.* The nonmoving party may not rest on mere allegations or denials from its pleadings, but must "cit[e] to particular parts of materials in the record" demonstrating the presence of a material factual dispute. *Fed. R. Civ. P. 56(c)(1)(A)*; *see also* *Liberty Lobby, 477 U.S. at 248*. The nonmoving party need not show that the issue will be conclusively resolved in its favor. **[**22]** *Id. at 248-49*. All that is required is the identification of sufficient evidence to create a genuine dispute of material fact, thereby "requir[ing] a jury or judge to resolve the parties' differing versions of the truth at trial." *Id.* (internal quotation marks omitted). If the nonmoving party cannot produce such evidence, the movant "is entitled to ... judgment as a matter of law because the nonmoving party has failed to make a sufficient showing on an essential element of her case." *Celotex, 477 U.S. at 323*.

On summary judgment, the court draws all reasonable factual inferences in favor of the nonmoving party. *Liberty Lobby, 477 U.S. at 255*. "Credibility determinations, the weighing of the evidence, and the drawing of legitimate inferences from the facts are jury functions, not those of a judge." *Id.* However, conclusory and speculative testimony does not raise a genuine factual dispute and is insufficient to defeat summary judgment. *See* *Thornhill Publ'g Co., Inc. v. GTE Corp., 594 F.2d 730, 738-39 (9th Cir. 1979)*.

II. SUMMARY JUDGMENT ON NONINFRINGEMENT

Summary judgment of noninfringement requires a two-step analysis. "First, the claims of the patent must be construed to determine their scope. Second, a determination must be made as to whether the properly construed claims read on the accused device." *Pitney Bowes, Inc. v. Hewlett—Packard Co., 182 F.3d 1298, 1304 (Fed. Cir. 1999)* **[**23]** (internal **[*945]** citations omitted). "The determination of infringement, both literal and under the doctrine of equivalents, is a question of fact." *Lockheed Martin Corp. v. Space Sys./Loral, Inc., 324 F.3d 1308, 1318 (Fed. Cir. 2003)*; *see also* *Kilopass Tech. Inc. v. Sidense Corp., No. 10-cv-02066-SI, 2012 U.S. Dist. LEXIS 115974, 2012 WL 3545286, at *4 (N.D. Cal. Aug. 16, 2012)*. Because the ultimate burden of proving infringement rests with the patentee, an accused infringer may show that summary judgment of noninfringement is proper either by producing evidence that would preclude a finding of infringement, or by showing that the evidence on file fails to create a material factual dispute as to any essential element of the patentee's case. *See* *Novartis Corp. v. Ben Venue Labs., Inc., 271 F.3d 1043, 1046 (Fed. Cir. 2001)*. "Summary judgment of noninfringement may only be granted if, after viewing the alleged facts in the light most favorable to the nonmovant and drawing all justifiable inferences in the nonmovant's favor, there is no genuine issue whether the accused device is encompassed by the patent claims." *Id.*

Direct infringement may be proven either by literal infringement or under the doctrine of equivalents. "Literal infringement requires the patentee to prove that the accused device contains each limitation of the asserted clai[m]." *Bayer AG v. Elan Pharm. Research Corp., 212 F.3d 1241, 1247 (Fed. Cir. 2000)*. "If any claim limitation is absent from the accused device, there is no literal infringement **[**24]** as a matter of law." *Id.* "The doctrine of equivalents holds that even if an accused product does not literally infringe the asserted claims of a patent, the product may infringe if the differences between the element of the accused product at issue and the claim limitation at issue are insubstantial." *Kilopass, 2012 U.S. Dist. LEXIS 115974, 2012 WL 3545286, at *7*. To defeat a defendant's motion for summary judgment of noninfringement under the doctrine of equivalents, the plaintiff must provide "particularized testimony and linking argument on a limitation-by-limitation basis that create[s] a genuine issue of material fact as to equivalents." *AquaTex Indus., Inc. v. Techniche Solutions, 479 F.3d 1320, 1328-29 (Fed. Cir. 2007)*. "Whether equivalency exists may be determined based on the 'insubstantial differences' test or based on the 'triple identity' test, namely, whether the element of the accused device performs substantially the same function in substantially the same way to obtain the same result." *TIP Sys., LLC v. Phillips & Brooks/Gladwin, Inc., 529 F.3d 1364, 1376 (Fed. Cir. 2008)*. "Whether a claim is infringed under the doctrine of equivalents may be decided on summary judgment if no reasonable jury could determine that the limitation and the element at issue are equivalent." *Zelinski v. Brunswick Corp., 185 F.3d 1311, 1317 (Fed. Cir. 1999)*.

III. MOTIONS TO STRIKE

A. Patent Local Rules

"*Patent Local Rule 3* requires patent disclosures early in a case and streamlines discovery by replacing **[**25]** the series of interrogatories that parties would likely have propounded without it." *ASUS Computer Int'l v. Round Rock Research, LLC, No. 12-CV-02099-JST, 2014 U.S. Dist. LEXIS 50728, 2014 WL 1463609, at *1 (N.D. Cal. Apr. 11, 2014)* (internal quotation marks and modifications omitted). The disclosure requirements of *Rule 3* are designed "to require parties to crystallize their theories of the case early in the litigation and to adhere to those theories once they have been disclosed." *Nova Measuring Instruments Ltd. v. Nanometrics, Inc., 417 F. Supp. 2d 1121, 1123 (N.D. Cal. 2006)*. "They are also designed to provide structure to discovery and to enable the parties to move efficiently toward claim construction and the eventual resolution of their dispute." **[*946]** *Golden Bridge Tech. Inc. v. Apple, Inc., No. 12-cv-04882-PSG, 2014 U.S. Dist. LEXIS 67238, 2014 WL 1928977, at *3 (N.D. Cal. May 14, 2014)* (internal quotation marks omitted); *see also* *O2 Micro Int'l Ltd. v. Monolithic Power Sys., Inc., 467 F.3d 1355, 1365-66 (Fed. Cir. 2006)* ("The local patent rules in the Northern District of California [require] both the plaintiff and the defendant in patent cases to provide early notice of their infringement and invalidity contentions, and to proceed with diligence in amending those contentions when new information comes to light in the course of discovery. The rules thus seek to balance the right to develop new information in discovery with the need for certainty as to the legal theories.").

Patent Local Rule 3-1 requires that a party claiming patent infringement **[**26]** serve a "Disclosure of Asserted Claims and Infringement Contentions" no more than fourteen days after the initial case management conference. This disclosure must include "[e]ach claim of each patent in suit that is allegedly infringed by each opposing party, including for each claim the applicable statutory subsections of *35 U.S.C. § 271* asserted." *Patent L.R. 3-1(a)*. The party must also identify "where each limitation of each asserted claim is found within each Accused Instrumentality," and "[w]hether each limitation of each asserted claim is alleged to be literally present or present under the doctrine of equivalents." *Patent L.R. 3-1(e)*. "The Patent Local Rules require a limitation-by-limitation analysis, not a boilerplate reservation." *Rambus Inc. v. Hynix Semiconductor Inc., No. C-05-00334 RMW, 2008 U.S. Dist. LEXIS 123187, 2008 WL 5411564, at *3 (N.D. Cal. Dec. 29, 2008)*.

Patent Local Rule 3-3 requires parties accused of infringement to serve invalidity contentions. The invalidity contentions must identify "each item of prior art that allegedly anticipates each asserted claim or renders it obvious." *Patent L.R. 3-3(a)*. If obviousness is alleged, the invalidity contentions must contain "an explanation of why the prior art renders the asserted claim obvious, including an identification of any combinations of prior art showing **[**27]** obviousness." *Patent L.R. 3-3(b)*.

"Given the purpose behind [these] disclosure requirements, a party may not use an expert report to introduce new infringement theories, new infringing instrumentalities, new invalidity theories, or new prior art references not disclosed in the parties' infringement contentions or invalidity contentions." *Verinata Health, Inc. v. Sequenom, Inc., No. 12-cv-00865-SI, 2014 U.S. Dist. LEXIS 116382, 2014 WL 4100638, at *3 (N.D. Cal. Aug. 20, 2014)* (internal quotation marks omitted); *see also* *Golden Bridge Tech. Inc. v. Apple, Inc., No. 12-cv-04882-PSG, 2014 U.S. Dist. LEXIS 67238, 2014 WL 1928977, at *3 (N.D. Cal. May 14, 2014)* ("Expert reports may not introduce theories not set forth in contentions."). "Any invalidity theories not disclosed pursuant to *Local Rule 3-3* are barred ... from presentation at trial (whether through expert opinion testimony or otherwise)." *MediaTek Inc. v. Freescale Semiconductor, Inc., No. 11-cv-05341-YGR, 2014 U.S. Dist. LEXIS 22442, 2014 WL 690161, at *1 (N.D. Cal. Feb. 21, 2014)*. In determining whether to strike some or all of an expert report for failure to comply with the patent local rules, courts in this district have asked, "[W]ill striking the report result in not just a trial, but an overall litigation, that is more fair, or less?" *Apple Inc. v. Samsung Electronics Co., No. 11-cv-01846-PSG, 2012 U.S. Dist. LEXIS 190470, 2012 WL 2499929, at *1 (N.D. Cal. June 27, 2012)*; *Verinata Health, 2014 U.S. Dist. LEXIS 116382, 2014 WL 4100638, at *3*.

B. Federal Rules

Under *Federal Rule of Civil Procedure 12(f)*, "[t]he court may strike from a pleading an insufficient defense or any **[**28]** redundant, immaterial, impertinent, or scandalous matter." *Fed. R. Civ. P. 12*.

[*947] *Federal Rule of Evidence 702* allows a qualified expert to testify "in the form of an opinion or otherwise" where:

> (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue;
> (b) the testimony is based on sufficient facts or data;
> (c) the testimony is the product of reliable principles and methods; and
> (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed. R. Evid. 702.

Expert testimony is admissible under *Rule 702* "if it is both relevant and reliable." *Cooper v. Brown, 510 F.3d 870, 942 (9th Cir. 2007)*. "[R]elevance means that the evidence will assist the trier of fact to understand or determine a fact in issue." *Id.* Under the reliability requirement, expert testimony must "relate to scientific, technical, or other specialized knowledge, which does not include unsubstantiated speculation and subjective beliefs." *Id.* "Importantly, there must be a recognized body of knowledge, learning, or expertise upon which the witness relies. Where there is no field of expertise, nobody will qualify as an expert witness on the subject." *Perez v. Seafood Peddler of San*

Rafael, Inc., No. 12-cv-00116-WHO, 2014 U.S. Dist. LEXIS 84575, 2014 WL 2810144, at *2 (N.D. Cal. June 20, 2014) (internal **[**29]** quotation marks omitted). The burden is on the proponent of the expert testimony to show, by a preponderance of the evidence, that the admissibility requirements are satisfied. Fed. R. Evid. 702 advisory committee notes.

"Trial courts must exercise reasonable discretion in evaluating and in determining how to evaluate the relevance and reliability of expert opinion testimony." United States v. Sandoval-Mendoza, 472 F.3d 645, 655 (9th Cir. 2006). A district courts serves as "a gatekeeper, not a factfinder." Id. at 654.

DISCUSSION

I. PRELIMINARY ISSUE — CLAIM CONSTRUCTION ARGUMENTS

Before addressing the merits of any motions, I must address the glaring issue that pervades the parties' motions for summary judgment and *Daubert* motions. Each side raises issues related to construing terms that were not selected by the parties for construction during the claim construction process. During that process, I addressed ten terms total as dictated by the Local Rules, allowing each side to identify its five most significant claim terms. Claim Construction Order (Dkt. No. 168).[5] Now both sides present arguments untethered to the Claim Construction Order, which gives rise to two related issues—whether these arguments are properly raised at this stage at all, and, if so, whether they may provide **[**30]** a valid basis for challenging an expert via a *Daubert* motion.

Parties have done this before in my cases. *See, e.g.,* Fujifilm Corp. v. Motorola Mobility LLC, No. 12-CV-03587-WHO, Dkt Nos. 196, 255, 2015 U.S. Dist. LEXIS 35235; Finjan, Inc. v. Sophos, Inc., No. 14-CV-01197-WHO, Dkt. Nos. 262, 2016 U.S. Dist. LEXIS 189272. There, I followed the approach used by Judge Koh in *Apple, Inc. v. Samsung Elecs. Co.*, No. 12-CV-00630-LHK. She found claim constructions presented at the summary judgment stage "untimely." 2014 U.S. Dist. LEXIS 8157, ***[*948]*** 2014 WL 252045, at *3 (N.D. Cal. Jan. 21, 2014). She noted, "[i]f the parties wanted to tee up summary judgment positions based on particular constructions, they 'could (and should) have sought ... construction[s] to [those] effect[s].'" *Id.* (quoting ePlus, Inc. v. Lawson Software, Inc., 700 F.3d 509, 520 (Fed. Cir. 2012)). She recognized the courts' "duty to resolve fundamental disputes regarding claim scope[,]" but found that it "fulfilled that duty when it provided a thorough claim construction opinion earlier in these proceedings." *Id.* (citing O2 Micro Int'l Ltd. v. Beyond Innovation Tech. Co., 521 F.3d 1351 (Fed. Cir. 2008)); *see* O2 Micro, 521 F.3d at 1362 ("[D]istrict courts are not (and should not be) required to construe *every* limitation present in a patent's asserted claims.").

Apple v. Samsung was "not a case like *O2 Micro*, where the district court erred when it declined to resolve a dispute over claim scope raised during claim construction." **[**31]** 2014 U.S. Dist. LEXIS 8157, 2014 WL 252045, at *3. Judge Koh left many of the terms that were not selected for construction to their plain and ordinary meaning, and she explained the "[s]ound practical reasons" for a court to decline to address claim construction arguments raised for the first time during summary judgment:

> The Northern District of California's local rules require the parties to narrow the number of disputed terms to 10 as part of their joint claim construction statement. *See* Patent L.R. 4-3(c). In accordance with those rules, the parties made their selections at claim construction as to "the terms whose construction will be most significant to the resolution of the case." *Id.* This requirement forces parties to identify potential case-dispositive terms at an early stage and also forces parties to help manage the scope of patent cases. The Court painstakingly adjudged the parties' claim construction disputes during the claim construction phase based on their in-depth technology tutorials and voluminous submissions of intrinsic and extrinsic evidence. The local rules and this

[5] In the Joint Claim Construction and Prehearing Statement, the parties collectively identified a total of 102 terms for the 20 asserted patents that required construction (Dkt. No. 124). *See* Terms from Huawei's Patents (Joint St., Ex. B; Dkt. No. 124-2); Terms from Samsung's Patent (Joint St., Ex. C, Dkt. No. 124-3).

> Court did not set out a particular process for resolving claim construction disputes only to let the parties make additional arguments at the summary judgment **[**32]** phase untethered to those carefully structured rules.

2014 U.S. Dist. LEXIS 8157, [WL] at *4. She concluded that she would "carefully consider" disputes over claim scope, even at the summary judgment stage, but only "as part of the infringement analysis, not part of the claim construction." *Id.* (quoting Thorner v. Sony Computer Entm't Am. LLC, 669 F.3d 1362, 1369 (Fed. Cir. 2012)); *see* Thorner, 669 F.3d at 1369 (noting that issues related to the scope of claim language that are not limited by the claims or specification are "part of the infringement analysis, not part of the claim construction").

I will follow the same procedure here, and "view the parties' disputes through the lens of whether a reasonable jury, armed with the Court's claim construction as to certain terms and an instruction that the plain and ordinary meaning controls as to others, could or would necessarily conclude that the asserted claim reads on an accused device (or that a prior art reference reads on an asserted claim)." 2014 U.S. Dist. LEXIS 8157, 2014 WL 252045, at *5. In determining the plain and ordinary meaning, I will look to "[t]he written description and other parts of the specification" for "contextual light[.]" Aventis Pharm. Inc. v. Amino Chemicals Ltd., 715 F.3d 1363, 1373 (Fed. Cir. 2013). As Judge Koh noted, "the goal at this stage is not to complete the Sisyphean task of providing definitive guidance as to a term's plain and ordinary meaning[;]" rather, "the Court **[**33]** must determine whether a jury, 'free to rely on the plain and ordinary meaning of the term[s],' may or must conclude that the accused devices (or prior art references) infringe (or anticipate) **[*949]** the asserted claims." 2014 U.S. Dist. LEXIS 8157, 2014 WL 252045, at *5 (citation omitted).

As for whether claim construction arguments may provide a proper basis for striking or excluding an expert's opinion, it depends whether an expert witness has opined on a claim's scope beyond the plain and ordinary meaning of a term. Because claim construction is a matter of law to be decided by the court, Markman v. Westview Instruments, Inc., 517 U.S. 370, 387, 116 S. Ct. 1384, 134 L. Ed. 2d 577 (1996), expert witnesses are not permitted to argue claim constructions to the jury. Nationwide Transp. Fin. v. Cass Info. Sys., Inc., 523 F.3d 1051, 1058 (9th Cir. 2008); *see also* Cordis Corp. v. Boston Sci. Corp., 561 F.3d 1319, 1337 (Fed. Cir. 2009) ("[I]t is improper to argue claim construction to the jury because the 'risk of confusing the jury is high when experts opine on claim construction.'").

Judge Koh repeated the edict in *Apple v. Samsung* that terms not construed by the court would be given their plain and ordinary meaning to a person of ordinary skill in the art. 2014 U.S. Dist. LEXIS 22938, 2014 WL 660857, at *3 (N.D. Cal. Feb. 20, 2014). From this premise, she concluded that "parties may 'introduce evidence as to the plain and ordinary meaning of terms not construed by the Court to one skilled in the art,' so long as the evidence **[**34]** does not amount to 'arguing claim construction to the jury[.]" *Id.* (citations and alterations omitted); *see also* MediaTek Inc. v. Freescale Semiconductor, Inc., No. 11-CV-5341 YGR, 2014 U.S. Dist. LEXIS 31461, 2014 WL 971765, at *4-5 (N.D. Cal. Mar. 5, 2014)(following same framework and noting that experts whose opinions on claim language depend on extrinsic evidence "reveal[] an intention to argue claim construction.").

As I analyze the claim construction issues presented in the parties' *Daubert* motions, I must determine whether an expert's opinion "delve[s] too deeply into claim construction to be presented to the jury[,]" or, whether a party contends that the opinion (or argument) is wrong as a matter of law. Fujifilm, 2015 U.S. Dist. LEXIS 35235, 2015 WL 1265009, at *6. If it is the former, the opinions may properly be stricken or excluded, but if it is the latter, the issues should have been presented in a motion for summary judgment or addressed during the claim construction phase. *See id.* ("Motorola's request to strike Haeberli's testimony for applying 'incorrect constructions' of claim terms amounts to a second summary judgment motion. This alone justifies denying the request."); *see also* Finjan, 2016 U.S. Dist. LEXIS 189272, 2016 WL 4560071, at *14 (denying *Daubert* motion in part "because it amounts to an improper second summary judgment motion"). The problem, of course, is that **[**35]** there is no clear line distinguishing the two because a party that disagrees with an expert's claim construction is likely to label it wrong as a matter of law. For this reason, my analysis will focus less on the technicalities of whether the arguments are more appropriately suited for a summary judgment motion or a *Daubert* motion, and more on the rule that "it is improper to argue claim construction to the jury... ." *Cordis, 561 F.3d at 1337*.[6]

II. HUAWEI'S MOTION FOR SUMMARY JUDGMENT

A. Samsung's Antitrust Claim

1. Background

Samsung's antitrust claim is premised on its contention that Huawei never had any intention of licensing its declared SEPs on FRAND terms and conditions, **[*950]** but nonetheless induced ETSI into including Huawei's technology in the standards to exclude alternative mobile technologies, and then filed the Chinese injunction actions to coerce Samsung into accepting Huawei's demand for excessive royalties. Am. Counterclaims ¶¶ 260-536. It seeks treble damages under *section 2* and an order enjoining Huawei from seeking injunctive relief related to its SEPs.

Huawei attacks Samsung's claim on several grounds. It insists that Samsung's expert, Dr. Jerry Hausman, focused exclusively on the effects of the Chinese injunction **[**36]** actions and did not analyze how Huawei allegedly obtained monopoly power in the relevant markets (through its promises to ETSI). From this premise, it argues that Samsung has not demonstrated disputed facts establishing that Huawei has engaged in exclusionary or anticompetitive conduct forbidden by the *Sherman Act*. Huawei's MSJ at 3. It further contends that Samsung has not demonstrated harm to competition, as opposed to any alleged harm to Samsung itself. *Id.* It also urges that Samsung's claim is barred by the "act of state doctrine" which prohibits United States courts from assessing the legitimacy of the acts of a foreign sovereign. *Id.*

Dr. Hausman identified the relevant "technology market" for the SEPs for which Huawei sought an injunction as the patent, its counterparts in other jurisdictions, and alternative technology that can implement the same functionality. Hausman Report ¶¶ 41-53 (Stake Decl. ISO Opp'n to Huawei's MSJ ¶ 7 ("Stake Decl."); *id.*, Ex. 6, Dkt. No. 357-15[under seal]).[7] He defined the geographic scope for the technology markets as worldwide and found that "Huawei is a monopolist with market power in each of the technology markets." *Id.* ¶¶ 54-55. He opined that "Huawei, by seeking an injunction **[**37]** ... gained a 'bargaining chip' that changed the threat point in the negotiations with Samsung[,]" and is thereby "seeking to exploit its market power and obtain higher royalties[,]" which "are equivalent to higher prices than would have occurred in the absence of the injunction and are thus a violation of *Section 2*." *Id.* ¶ 56; *see also id.* ¶ 18.[8] He explained that "[f]iling for injunctions also should not be permitted because they confer a 'dangerous probability of success' for the SEP owner to exercise monopoly power beyond what is permitted under

---

[6] The separate, but related, question of whether these arguments are more suitable for motions in limine was not presented by the parties and is not addressed here.

[7] In Samsung's declaration in support of sealing portions of Huawei's motion for summary judgment and exhibits thereto, it noted that it does not maintain a claim of confidentiality over the Hausman Report or his deposition testimony, but it did not file an unredacted version of the Report. *See* Malmberg Decl. ISO Huawei's Admin. Mot. to File Under Seal Portions of Huawei's Summ. J. and Daubert Mots. ¶¶ 5, 7, 9 (Dkt. No. 344).

[8] To support this position, Huawei also cites to Huawei executive Jason Ding's statement regarding the injunction actions:

> Perhaps judges are quite reluctant to hear injunction cases because of its staggering impact on the market. . . Even if injunction order were to be enforced, does Huawei really want to kick Samsung out of China? Is it possible? Of course not. . . . At the **[**38]** end of the day, **your purpose is to get the royalties in return**, while using legal action as a **bargaining chip**.

Dkt. No. 235-7; *see also* Song Dep. at 23:10-19 (Stake Decl. ¶ 6; *id.*, Ex. 5).

its FRAND obligations[,]" and "[t]he dangerous probability of success arises from the probability that a court will grant the requested injunction." *Id.* ¶ 58; *id.* n.50. And he posited that, "[a]t a minimum, Samsung's injury from the antitrust violation is comprised of the cost of multiple litigations, attorneys' fees, and the experts' fees paid to me and my team, and associated costs." *Id.* ¶ 60.

[*951] Samsung also cites to the negotiation history to emphasize that Huawei demanded a 1.5 percent royalty for a license to its SEPs, even though no one has ever paid that rate, which is over [TEXT REDACTED BY THE COURT], and would amount to Samsung making net payments totaling over [TEXT REDACTED BY THE COURT] for a license covering a twelve-year period. Ding Dep. at 208:19-22 (Stake Decl. ¶ 2; *id.*, Ex. 1, Dkt. No. 357-6[under seal]); Hausman Report ¶¶ 23-29; Cheng Dep. at 137:12-15 (Stake Decl. ¶ 3; *id.*, Ex. 2, Dkt. No. 357-8[under seal]); Hausman Rebuttal Report ¶ 8 (citing Lasinski Report) (Stake Decl. ¶ 10; *id.*, Ex. 9, Dkt. No. 357-20[under seal]). According to Samsung, even Huawei's own expert Dr. Lasinski, acknowledged that a FRAND rate for the 4G SEPs would be [TEXT REDACTED BY THE COURT] the amount demanded by Huawei. Lasinski Report ¶ 100 (Stake Decl. ¶ 4; *id.*, Ex. 3, Dkt. No. 357-10).

2. Legal Framework

Section 2 of the Sherman Act makes it a felony for any person to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize **[**39]** any part of the trade or commerce... ." *15 U.S.C. § 2*.

"To prevail on this claim, [claimant] must prove that [defendant] (1) possessed monopoly power in the relevant market, (2) willfully acquired or maintained that power through exclusionary conduct and (3) caused antitrust injury." *MetroNet Servs. Corp. v. Qwest Corp., 383 F.3d 1124, 1130 (9th Cir. 2004)*. The Supreme Court in *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, analyzed the type of activities that would constitute anticompetitive or exclusionary conduct. It began from the premise, "as a general matter," that there is no duty to deal with competitors. *Id. at 407-08*; *see also* *MetroNet, 383 F.3d at 1131* ("The Court in *Verizon* stated that as a general matter 'there is no duty to aid competitors.'"). It then analyzed the "few existing exceptions" to this general proposition and found that the present circumstances did not justify adding another exception to the rule. *540 U.S. at 411*. In short, the possession of monopoly power and the charging of monopoly prices are not unlawful in themselves; rather, "the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive *conduct*." *Id. at 407* (emphasis in original).

3. Analysis

a. Samsung Has Not Offered Evidence of Exclusionary Conduct

i. Refusal to Deal

As an initial matter, Samsung emphasizes its position that its claim is **[**40]** based on Huawei's refusal to deal and is not limited to Huawei's opening rate; rather, it contends that Huawei has maintained the same rate throughout negotiations, which it insists constitutes evidence of exclusionary conduct. Huawei counters that the refusal to deal doctrine of antitrust is wholly inapplicable in the standards arena. On the former point, I must view the evidence in the light most favorable to Samsung. On the latter point, I agree with Huawei,[9] but I will nonetheless assess the evidence in the realm of a refusal to deal claim since Samsung relies on it. Even accepting Samsung's perspective

[9] As discussed below, the irrelevance of the doctrine is clear; Huawei admits that it is a monopolist in the market because ETSI has accepted its declared SEPs.

of the negotiating history, it has not established that Huawei's negotiating conduct and pursuit of injunctive relief constitutes exclusionary conduct **[*952]** necessary to prove its monopolization claim.

Samsung relies on *Federal Trade Commission v. Qualcomm Inc., No. 17-CV-00220-LHK, 2017 U.S. Dist. LEXIS 98632, 2017 WL 2774406 (N.D. Cal. June 26, 2017)* to insist that Huawei's conduct violates the "antitrust duty to deal."[10] In *FTC v. Qualcomm*, Judge Koh summarized *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*, *Verizon Comm's, Inc. v. Law Offices of Curtis V. Trinko, 540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, and *MetroNet Services Corp. v. Qwest Corp., 383 F.3d 1124 (9th Cir. 2004)*, and found "that a plaintiff alleges an antitrust duty to deal where the plaintiff alleges '[a] decision to alter a [voluntary] course of dealing together with evidence of anticompetitive malice,' **[**41]** and where the recognition of an antitrust duty to deal will not present significant judicial administrability concerns." *2017 U.S. Dist. LEXIS 98632, 2017 WL 2774406, at *20* (quoting *SmithKline Beecham Corp. v. Abbott Labs., 2014 U.S. Dist. LEXIS 164367, 2014 WL 6664226, at *4 (N.D. Cal. Nov. 24, 2014)*); *see also* *Safeway Inc. v. Abbott Labs., 2010 U.S. Dist. LEXIS 2145, 2010 WL 147988, at *6 (N.D. Cal. Jan. 12, 2010)* ("Taken together, *Aspen Skiing* and [*Verizon*] demonstrate that liability under *§ 2* can arise when a defendant voluntarily alters a course of dealing and 'anticompetitive malice' motivates the defendant's conduct.").

Judge Koh concluded that the FTC had adequately alleged a violation of the antitrust duty to deal under the *Metronet* factors because Qualcomm had voluntarily agreed to license its SEPs in accordance with FRAND and later refused to do so, its "no license-no chips" policy demonstrated that its refusal to license was motivated by anticompetitive malice, and "recognizing a duty to deal in this case would not require courts to play a larger role in setting the terms of dealing than the role that courts *already* play in determining appropriate royalties in patent cases." *2017 U.S. Dist. LEXIS 98632, 2017 WL 2774406, at *20-22*. She also determined, as the Third Circuit recognized in *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 316 (3d Cir. 2007)*, that the lack of "a regulatory structure designed to deter and remedy anticompetitive harm[,]" *Verizon, 540 U.S. at 412*, supports finding an antitrust duty to deal in the context of FRAND commitments and SSOs, which involve private entities **[**42]** and organizations. *2017 U.S. Dist. LEXIS 98632, 2017 WL 2774406, at *23*; *see* *Broadcom, 501 F.3d at 317* ("No such regulatory framework [as in *Verizon*] exists here.").

Huawei does not dispute that the first and third *MetroNet* factors are met here—it altered a voluntary and profitable course of dealing given its commitments to ETSI and there are no judicial administrability concerns. Rather, Huawei contends that Samsung has not offered any evidence of Huawei's anticompetitive malice, nor has it otherwise demonstrated that Huawei obtained its monopoly power in the relevant markets by exclusionary conduct. Huawei MSJ at 6.

Unlike the circumstances in *Qualcomm*, Samsung does not allege that Huawei refused to license its declared SEPs *on any terms. See* *2017 U.S. Dist. LEXIS 98632, 2017 WL 2774406, at *19-23* (relying on Qualcomm's outright refusal to license FRAND-encumbered SEPs to competing chip manufacturers). Rather, Samsung's claim depends on its contention that Huawei's offers to license its SEPs were not on FRAND terms, and Huawei proceeded to pursue injunctive relief. *See* **[*953]** Hausman Dep. at 203:12-17 (testifying to his opinion that Huawei acquired monopoly power, not by exclusionary conduct, but "when the SSO adopted it [Huawei's technology], and they [Huawei] said they would not exercise it because they agree to FRAND."). It relies **[**43]** on *Aspen Skiing* for the proposition that exorbitant offers constitute a refusal to deal, and it argues that the determination of whether Huawei's offers were exorbitant is a fact question. *See also* *MetroNet, 383 F.3d at 1132* ("An offer to deal with a competitor only on unreasonable terms and conditions can amount to a practical refusal to deal."); *Safeway Inc. v. Abbott Labs., No. C 07-05470 CW, 2010 U.S. Dist. LEXIS 2145, 2010 WL 147988, at *7 (N.D. Cal. Jan. 12, 2010)* ("By setting such unattractive terms, Abbott essentially refused to deal with its competitors.").

---

[10] It is worth noting that the order addressed a motion to dismiss, not a motion for summary judgment, as I am presented with here. *See* *Qualcomm, 2017 U.S. Dist. LEXIS 98632, 2017 WL 2774406, at *22* ("FTC's allegations are sufficient, at this stage of the proceedings, to allege that Qualcomm's refusal to deal is motivated by 'anticompetitive malice.'").

But the refusal to deal cases are inapplicable to the standards setting world. The parties do not dispute that Huawei acquired its monopoly power in the relevant markets through its declarations to ETSI, not through its alleged refusal to deal with Samsung. As discussed below, Samsung seeks to claim antitrust injury as a consumer in the relevant market. It cannot turn around and attempt to show exclusionary conduct based on its status as a competitor. In other words, Samsung has not proven that Huawei "acquired or maintained" its monopoly power through exclusionary conduct. *See* MetroNet, 383 F.3d at 1130.

Moreover, it is well settled that *Aspen Skiing*, "the leading case for § 2 liability based on refusal to cooperate with a rival," "is at or near the outer boundary **[**44]** of § 2 liability." *Trinko, 540 U.S. at 409*. "As the Supreme Court has repeatedly emphasized, there is 'no duty to deal under the terms and conditions preferred by [a competitor's] rivals[.]'" *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1184 (9th Cir. 2016)*(quoting *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 457, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009))*; *see also* *Townshend v. Rockwell Int'l Corp., No. C99-0400SBA, 2000 U.S. Dist. LEXIS 5070, 2000 WL 433505, at *8 (N.D. Cal. Mar. 28, 2000)* (dismissing antitrust claim in part because "[a] patent owner's pursuit of optimum royalty income is not an act in restraint of trade which violates the antitrust laws."). Because Samsung has offered no evidence that Huawei has outright refused to deal with Samsung, "*Aspen Skiing* offers no relief here." *Aerotec, 836 F.3d at 1184*.

ii. Broadcom Claim[11]

While Samsung's antitrust claim has morphed into a refusal to deal claim, Huawei notes that the claim as alleged is actually premised on the *Broadcom* case. *E.g.*, Am. Counterclaims ¶ 263 ("Huawei's promises to license its allegedly essential patents on FRAND terms and conditions were intentionally false."); *id.* ¶ 266 ("Huawei's actions show it has never intended to comply with its promises to license its allegedly essential patents on FRAND terms and conditions."). In *Broadcom*, the Third Circuit analyzed "whether Broadcom ha[d] stated actionable anticompetitive conduct with allegations that Qualcomm deceived relevant SDOs **[**45]** [standards-determining organizations] into adopting the UMTS [Universal Mobile Telecommunications System] standard by committing to license its WCDMA technology on FRAND terms and, later, after lock-in occurred, demanding non-FRAND royalties." *501 F.3d at 313*. The court held that

> **[*954]** (1) in a consensus-oriented private standard-setting environment, (2) a patent holder's intentionally false promise to license essential proprietary technology on FRAND terms, (3) coupled with an SDO's reliance on that promise when including the technology in a standard, and (4) the patent holder's subsequent breach of that promise, is actionable anticompetitive conduct.

Id. at 314; *see also* *Apple Inc. v. Samsung Elecs. Co., No. 11-CV-01846-LHK, 2011 U.S. Dist. LEXIS 120416, 2011 WL 4948567, at *4 (N.D. Cal. Oct. 18, 2011)* ("[I]ntentionally false promises to SSOs regarding licenses with FRAND terms can give rise to actionable claims under *Section 2* of the Sherman Act.").

Samsung points to Huawei's initial SEP licensing proposal to Samsung in 2008, which Samsung contends was not FRAND, simultaneous with its patent disclosures to ETSI, and its pursuit of injunction-only relief in China, to substantiate its claim that Huawei "did not intend to license its proprietary technology at FRAND rates at the time it promised ETSI that **[**46]** it would do so." Opp'n to Huawei MSJ at 4-5. And it emphasizes that "the issue of intent is nearly always 'a fact question.'" *Id.* at 6. The latter point gains it little ground: "Until recently, summary judgment was disfavored in antitrust cases, but any presumption against the granting of summary judgment in complex antitrust cases has now disappeared[.]" *In re Online DVD-Rental Antitrust Litig., 779 F.3d 914, 921 (9th Cir. 2015)* (internal quotation marks, citations, and alterations omitted). Accordingly, Samsung cannot merely rely on the factual nature of the inquiry into intent to survive Huawei's motion.

---

[11] It is also worth noting that Samsung has not presented (and Huawei is not aware of) any cases in which a plaintiff has prevailed at trial asserting an antitrust claim premised on *Broadcom*.

Its former point does not support its claim that Huawei made intentionally false promises to ETSI. As an initial matter, Samsung cannot (and does not even attempt to) explain the fact that Huawei has licensed its SEPs to other entities as part of its commitments to ETSI. Moreover, Huawei underscores (and Samsung acknowledges) that Huawei had publicly announced as early as 2008 that it expected to seek a royalty for its LTE portfolio of up to 1.5 percent, which would be "negotiable in bilateral negotiations." *See* Stasik Expert Report Regarding ETSI and Standards Setting Matters at ¶ 66, submitted in *Apple Inc. v. Samsung Electronics Co., Ltd. et. al.*, Case No. 11-cv-01846-LHK **[**47]** (N.D. Cal. Mar. 16, 2012) (including Huawei's public statement) (McBride Decl. ISO Reply ¶ 2; *id.*, Ex. 44; Dkt. No. 371-9 [under seal]); J. Ding Dep. at 208:13-25 (noting Huawei's public announcement) (Stake Decl. ¶ 2; *id.*, Ex. 1; Dkt. No. 357-6 [under seal]). Samsung has previously acknowledged that there is nothing wrong with beginning negotiations at a "headline" rate. Chang Dep. at 32-34 (McBride Decl. ISO Reply ¶ 3; *id.*, Ex. 45; Dkt. No. 371-10 [under seal]) (acknowledging Stasik's view that Samsung's [TEXT REDACTED BY THE COURT] percent royalty offer was FRAND and would be an appropriate headline rate to open negotiations); *see also* Leonard Dep. at 70:15-71:6 (McBride Decl. ISO Huawei's Reply ISO MSJ ¶ 4, *id.*, Ex. 46)(testifying that starting negotiations at an opening rate of 1.5 percent would not by itself, be problematic). As Huawei puts it, "[t]he fact that [it] opened negotiations at its previously stated public rate, and maintained that opening offer for a time in the absence of any responsive counter-proposal from Samsung, would not permit a reasonably jury to conclude that Huawei never intended to abide by its FRAND commitments." Reply ISO Huawei MSJ at 4. And the fact **[**48]** that the headline rate was public knowledge certainly undermines any claim that it unlawfully obtained its monopoly power through its representations to ETSI.

As previously mentioned, Samsung insists that its claim is not limited to Huawei's **[*955]** opening rate; it is based on Huawei maintaining that rate throughout the course of negotiations. It also cites to Huawei's subsequent pursuit of injunctive-only relief in China to substantiate its claim that Huawei had no intention of licensing its SEPs on FRAND terms. On the other hand, Huawei identifies several facts negating any possible inference that it never intended to abide by its FRAND obligations: it has repeatedly offered to submit this dispute to binding arbitration, it initially sought to bifurcate the issues in this case so that the FRAND-related issues could be addressed on an expedited basis before delving into the patent issues, and it is and has been willing to withdraw the Chinese injunction actions so long as Samsung agrees to a binding process to determine the FRAND terms of a cross-license between the parties. Reply at 4-5. Huawei's eagerness to resolve the FRAND issue is not indicative of a party who refuses to deal.

At the **[**49]** hearing, Samsung insisted that *Broadcom* is irrelevant to a refusal to deal claim, and that intent is not required under section 2. Samsung's arguments are unpersuasive. While section 2 does not explicitly reference the "intent" of the accused, the case law makes clear that a certain mental state is an explicit element of both a refusal to deal claim of the type Samsung wishes to pursue here and a *Broadcom* claim of the type it actually pursues. *See* Qualcomm, 2017 U.S. Dist. LEXIS 98632, 2017 WL 2774406, at *20 (requiring evidence of anticompetitive malice); Broadcom, 501 F.3d at 314 (requiring an intentionally false promise).

It further insisted that Huawei is wrong to contend that Samsung cannot prove bad intent with conduct occurring after the patents were declared essential. But courts have explicitly declined to expand *Broadcom* "to reach violations of FRAND commitments occurring after the standard's adoption." *E.g.,* Godo Kaisha IP Bridge 1 v. TCL Commc'n Tech. Holdings Ltd., No. CV 15-634-SLR-SRF, 2017 U.S. Dist. LEXIS 26824, 2017 WL 750700, at *7 (D. Del. Feb. 27, 2017).[12]

Samsung has not offered any evidence of Huawei's fraudulent intent, but even if it had, it would still be insufficient to establish unlawful exclusionary conduct. *See* Rambus Inc. v. F.T.C., 522 F.3d 456, 466, 380 U.S. App. D.C. 431 (D.C. Cir. 2008) ("[A]n otherwise lawful monopolist's end-run around price constraints, even when deceptive or fraudulent, does not alone present a **[**50]** harm to competition in the monopolized market."). *Compare* Aerotec, 836 F.3d at 1184, 1189 (affirming summary judgment on refusal to deal claim where plaintiff "simply did not like the

[12] The report and recommendation was subsequently adopted by the district court. 2017 U.S. Dist. LEXIS 39950, 2017 WL 1055958 (D. Del. Mar. 20, 2017).

business terms" offered by the alleged monopolist), *with* Hynix Semiconductor Inc. v. Rambus, Inc., 527 F. Supp. 2d 1084, 1098 (N.D. Cal. 2007)(finding sufficient allegations of anticompetitive conduct where "[t]he Manufacturers have alleged that Rambus participated in a standards-setting organization, understood its intellectual property disclosure policy, withheld information about its patent applications, waited until the industry was irreversibly 'locked in' to the standard, and then began a litigation campaign to extract royalties.").

That failure defeats Samsung's antitrust claim as a matter of law. But the claim also fails because Samsung has not offered any evidence of antitrust injury.

4. Samsung Has Not Demonstrated Antitrust Injury

"The antitrust laws ... were enacted for 'the protection of competition not **[*956]** competitors[.]'" Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977). As a result, an antitrust claimant "must demonstrate injury to competition in the market as a whole, not merely injury to itself as a competitor." Gorlick Distribution Centers, LLC v. Car Sound Exhaust Sys., Inc., 723 F.3d 1019, 1024-25 (9th Cir. 2013).

The only "injury" to Samsung disclosed in Dr. Hausman's Report is Samsung's litigation costs, which Dr. Hausman conceded were "harms to Samsung," **[**51]** not "harms to consumers." Hausman Report ¶ 60; *see also* Hausman Dep. at 214:6-9 (Ex. 7). While litigation costs may constitute antitrust injury in some cases, Samsung has not established those circumstances here. *See* Apple, Inc. v. Motorola Mobility, Inc., 886 F. Supp. 2d 1061, 1076 (W.D. Wis. 2012) (finding no antitrust injury where antitrust claimant refused to pay the allegedly excessive royalty rate and the only purported injury was the attorney fees and costs incurred in response to patent litigation). *Compare* supra section I.A.3 (finding no evidence of anticompetitive conduct), *with* Hynix, 527 F. Supp. 2d at 1098 ("Because Rambus' alleged conduct at JEDEC can independently qualify as an anticompetitive harm under section 2, the court finds that Rambus' current patent litigation is 'causally connected' to that behavior and therefore properly included in an 'anticompetitive scheme' allegation.").

In opposition, Samsung points to Huawei's purported market power in the relevant markets, *see* Opp'n at 9 (citing Hausman Report ¶¶ 55-56), and urges that it is harmed as a purchaser of Huawei's SEPs in the relevant markets identified by Dr. Hausman (which Huawei has not challenged here), so its injury arises as a customer, not a competitor. But Huawei's market power alone does not establish any antitrust injury. **[**52]** *See* Opp'n at 9 (arguing that "it will pay overcharges and/or incur losses as a result of Huawei's monopolization."). And Samsung's potential harm likewise does not "demonstrate injury to competition in the market as a whole," rather than "injury to [Samsung] as a competitor." Gorlick, 723 F.3d at 1024-25. Samsung has not demonstrated the requisite injury to competition.[13]

To the extent that Samsung intends to rely on the potential harm to consumers in the event the Chinese injunctions are enforced, Opp'n at 9 n.8, that speculative harm would at most substantiate a claim of attempted monopolization.[14] Samsung has not alleged or pursued such a claim.

---

[13] Samsung footnotes that the antitrust injury is "less demanding" when an antitrust claimant seeks injunctive relief. *See* Opp'n at 9 n.9 (citing ***Palmyra Park Hosp. Inc. v. Phoebe Putney Mem'l Hosp., 604 F.3d 1291, 1299 (11th Cir. 2010))***. The *Palmyra* court noted that "[t]he antitrust standing injury under § 16 of the Clayton Act [allowing injunctive relief] is less demanding than under § 4 [allowing recovery for treble damages]." ***604 F.3d at 1299***. It explained that "a plaintiff seeking relief under § 16 must still allege an antitrust injury, just as the plaintiff would under § 4[,]" but in the context of injunctive relief "we are less concerned about whether the party would be the most efficient enforcer[.]" *Id. at 1299-1300*. The court concluded that "[t]he takeaway ... is that 'if a plaintiff has standing to bring an antitrust action under section 4, he will also have standing under section 16.'" *Id. at 1300*. *Palmyra*, therefore, does not help Samsung here.

In sum, Samsung has not shown disputed facts establishing Huawei's anticompetitive **[*957]** conduct or any antitrust injury. Huawei's motion for summary judgment as to Samsung's counterclaim for antitrust violation is GRANTED.[15]

B. Noninfringement as to the '350 Patent

Asserted claim 1 of the '350 Patent requires "receiving a cell-specific parameter (P_B) signaled by one or more higher layers from the base station; and determining a cell-specific ratio (p_B/p_A)... ." '350 patent at 14:31-35. Huawei insists that it is entitled to summary judgment of noninfringement, both literal and under the doctrine **[**53]** of equivalents (DOE), because the undisputed evidence shows that the quantization coefficients used to determine the ratio are different for different phones within a cell, Samsung has offered no evidence that Huawei's UE's "determine" the cell-specific ratio, and Samsung's DOE theory relies on inadequate boilerplate recitations. Huawei MSJ at 12-13. Samsung counters with evidence that Huawei's accused products "determine a cell-specific ratio" by selecting values called quantization coefficients that correspond to the same cell-specific ratios required under the LTE standard. Opp'n at 17-18; *see* Huawei Technical Document produced as SAMSUNG-HNDCA-000614275-614370 (Stake Decl. ¶ 12; *id.*, Ex. 11); Huawei Technical Document produced as SAMSUNG-HNDCA-000614371-614439 (Stake Decl. ¶ 13; *id.*, Ex. 12).

One of Samsung's technical experts, Dr. Paul Prucnal, provided a technical analysis of documents, testimony, and source code to show that Huawei's accused products determine a cell-specific ratio as required under the LTE standard by selecting a value called a quantization coefficient that corresponds to a cell-specific ratio. Prucnal Expert Report ¶¶ 557-570 (Stake Decl. ¶ 15; *id.*, Ex. 14; Dkt. No. 357-29 [under **[**54]** seal]); *see also* Prucnal Dep. at 89:23-90:9 (explaining his demonstrative showing that the accused products use the same cell-specific ratios) (Stake Decl. ¶ 17; *id.*, Ex. 16; Dkt. No. 357-33 [under seal]); Prucnal Demonstrative (showing the same cell-specific ratios) (Stake Decl. ¶ 18; id., Ex. 17; Dkt. No. 357-35 [under seal]). Samsung also highlights Huawei's admission that the accused products practice the applicable 3GPP standard. Huawei's March 9, 2018 Supplemental Responses to Samsung's Interrogatories at 21-23 (Stake Decl. ¶ 16; *id.*, Ex. 15; Dkt. No. 357-13 [under seal]).

Huawei wishes to limit the meaning of "determining" to "calculating"; similar to Samsung's attempts to limit "obtaining" and "allocating" with respect to the '239 patent. *See infra* section V.A.3. Huawei did not select "determining" for claim construction, and the term will be given the full range of its plain and ordinary meaning. Viewing this evidence in the light most favorable to Samsung, it has identified disputed evidence that Huawei's accused products literally infringe the '350 patent, claim 1 by "determin[ing] a cell-specific ratio" when the UEs select quantization coefficients that correspond to the cell-specific ratio.

[55]** Even if I did not find disputed evidence that the accused products literally infringe, they would at least infringe under a DOE theory since Huawei's arguments against infringement largely rely on whether the UE's act of selecting a quantization coefficient is equivalent to determining a cell-specific ratio. *See* Reply ISO Huawei MSJ at 8 (noting that the Prucnal Report fails **[*958]** to show the calculation of any ratios). Dr. Prucnal's opinions, which link the accused devices to a particular claim limitation, Prucnal Report ¶ 590 (explaining DOE theory for the '350 patent, claim 1), are not the type of boilerplate DOE assertions rejected by courts. *E.g.,* *PersonalWeb Techs. LLC v. Int'l Bus. Machines Corp., No. 16-CV-01266-EJD, 2017 U.S. Dist. LEXIS 76162, 2017 WL 2180980, at *16 (N.D. Cal. May 18, 2017)* ("[E]ven if the Court were to look past PersonalWeb's failure to comply with the patent local rules, summary judgment is appropriate because PersonalWeb has failed to provide sufficient evidence to create a triable issue of fact that there is infringement under the doctrine of equivalents."); *OptimumPath, LLC v. Belkin Int'l,*

---

[14] A claim for attempted monopolization requires "proof of a dangerous probability that they would monopolize a particular market and specific intent to monopolize." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. Given the explicit requirement related to intent, an attempted monopolization claim would fare no better.

[15] Given this conclusion, I need not determine whether the act of state doctrine bars Samsung's antitrust claim.

*Inc., No. C 09-01398 CW, 2011 U.S. Dist. LEXIS 41634, 2011 WL 1399257, at *8 (N.D. Cal. Apr. 12, 2011)* ("OptimumPath also relies on a blanket statement, asserting substantial similarities as to the instrumentalities, but failing to link those similarities to particular claims or limitations within the '281 patent.").

To the extent that Huawei wishes to rely on the inadequacy of Samsung's disclosures in its infringement contentions, that alone does not justify granting its motion for summary judgment. "While the Rules are thereby intended to hasten resolution on the merits, they are *not* ... a mechanism for resolving the *merits* of the parties' dispute." *FusionArc, Inc. v. Solidus Networks, Inc., No. C 06-06760RMW(RS), 2007 U.S. Dist. LEXIS 28970, 2007 WL 1052900, at *2 (N.D. Cal. Apr. 5, 2007)*; *see also* *PersonalWeb, 2017 U.S. Dist. LEXIS 76162, 2017 WL 2180980, at *16* ("Courts in this district have cited deficient infringement contentions as additional bases for granting summary judgment of noninfringement with respect to doctrine of equivalents. However, what ultimately governs the summary judgment determination is the standard under *Fed. R. Civ. P. 56(c)*." (citations omitted)).

Huawei's motion for summary judgment of noninfringement of **[**56]** claim 1 of the '350 patent is DENIED.

C. Noninfringement as to the '130 Patent

Independent claim 13 recites the following "method for transmitting a signal in a slot of a sub-frame in a wireless communication system... :

> mapping a reference signal to a middle symbol in the slot;
> mapping the data information to remaining symbols in the slot that are not used to map the reference signal;
> mapping the acknowledgement information to first symbols among the remaining symbols in the slot, the first symbols not being used to map reference signals and the first symbols being directly adjacent to the middle symbol; and
> ...

'130 Patent, claim 13 at 8:30-37 (Dkt. No. 328-34). Huawei contends that this method claim, and dependent claim 16, recite a series of active steps that must be performed in a precise order, and Samsung's expert failed to offer any evidence that Huawei's products perform the accused functionality in the order claimed[,]" and "the undisputed evidence shows that Huawei products do not perform the function in the order claimed. Huawei's MSJ at 17 (citing Bambos Inf. Report ¶¶ 550-632); *see also* Bambos Inf. Report ¶ 468; Mahon Decl. ¶¶ 32-35.

Samsung counters that Huawei's argument depends on injecting its proposed construction that "[t]he **[**57]** second and third steps must be performed after the first." Joint Claim Construction St. at 3 (Dkt. No. 124-3). But, according to Samsung, Huawei elected not to include this claim term in those terms subject to claim construction, thereby waiving its opportunity to have **[*959]** the claim construed and relegating the claim term to its plain and ordinary meaning.[16]

The Federal Circuit has explained, "[a]s a general rule, 'unless the steps of a method claim actually recite an order, the steps are not ordinarily construed to require one.'" *Mformation Techs., Inc. v. Research in Motion Ltd., 764 F.3d 1392, 1398 (Fed. Cir. 2014)* (alterations omitted) (quoting *Interactive Gift Express, Inc. v. Compuserve Inc., 256 F.3d 1323, 1342 (Fed. Cir. 2001))*. "However, a claim 'requires an ordering of steps when the claim language, as a matter of logic or grammar, requires that the steps be performed in the order written, or the specification directly or implicitly requires' an order of steps." *Id.*

In Samsung's view, "[a]nalyzing the word 'remaining' in context, as required, reveals that the plain and ordinary meaning refers *only* to a spatial location for (1) mapping the reference signal and (2) mapping the data and acknowledgement information (as opposed to a temporal order in which those steps need to occur)." Opp'n to Huawei's MSJ at 16 (emphasis in original) (citing Ex. 20 ¶¶ 174-77).[17] Samsung's attempts to limit **[**58]** the plain

---

[16] Huawei points out that Samsung proposed "no construction necessary" for each of the terms at issue for the '130, '105, and '825 patents. *See* Joint Claim Construction St. (Dkt. No. 124-3).

and ordinary meaning of "remaining" to a spatial location rather than a temporal order are unpersuasive. Samsung wishes to have the middle symbol "reserved" for the reference signal without first mapping it. But the claim does not dictate *reserving* the middle symbol in the slot for the reference symbol. To the contrary, the claims disclose *mapping* the reference symbol. As Huawei explains, the "remaining symbols in the slot that are not used to map the reference signal" do not exist until the reference signal is mapped to the middle symbol in the slot. Huawei MSJ at 17. The plain language of the claim terms requires an "ordering of steps" because no symbols are "remaining" until the reference symbol is first mapped to the middle symbol in the slots. *See* *Mformation Techs., 764 F.3d at 1398*.

Assuming an order inherent in the claim language, Huawei contends that Samsung failed to offer evidence that Huawei's products perform the claimed "mapping" in the order required. Samsung does not appear to explicitly contest this assertion, but offers the opinion of its expert, Dr. Nicholas Bambos, that Huawei's products map a reference signal to a middle symbol in the slot, data to the remaining symbols in the slot, and acknowledgement **[**59]** information to first symbols among the remaining symbols... ." Bambos Expert Report ¶¶ 530-49 (Stake Decl. ¶ 21; *id.*, Ex. 20; Dkt. No. 357-40 [under seal]); *id.* ¶¶ 550-94, 595-632 (McBride Decl. ¶ 37; *id.*, Ex. 36; Dkt. No. 327-51 [under seal]). Dr. Bambos offered his "opinion that the difference between each of the Accused Instrumentalities and the claim elements in claims 13 and claims 16 are insubstantial" because the accused products are "performing substantially the same function (i.e., PUSCH signal transmission) in substantially the same way (placing ACK/NAK information in the symbols directly adjacent to the DM RS along with data and transmitting the DM RS, ACK/NAK, and data, which is mapped to every symbol except for the symbols containing the DM RS and is multiplexed with CQI) to get substantially the same result (i.e., transmitting a signal with minimal distortion of the underlying information)." Bambos Expert **[*960]** Report ¶ 792. Dr. Bambos concluded that the order of the steps "is an insubstantial part" of the asserted claims. *Id.* ¶ 793.

Huawei argues that Dr. Bambos's DOE analysis involves several legal errors, and is insufficient to counter its motion for summary judgment. First, **[**60]** he analyzes the function/way/result of the entire claim, *see id.* ¶¶ 792-93, rather than the limitation asserted to be met by an equivalent. Second, his analysis "vitiate[s] these claim terms" because it "eliminate[s] the requirement to map to 'remaining symbols.'" Huawei MSJ at 20.

Samsung never directly addresses the first argument. It simply reiterates Dr. Bambos's opinion that order is irrelevant. "[T]he all limitations rule requires that equivalence be assessed on a limitation-by-limitation basis, as opposed to from the perspective of the invention as a whole." *Freedman Seating Co. v. Am. Seating Co., 420 F.3d 1350, 1358 (Fed. Cir. 2005)*. But when the "limitation" at issue is the implication that the steps of the claim must be performed in order, it seems appropriate to assess equivalence from the perspective of the invention as a whole.

As to the second argument, Samsung counters that "[v]itiation is not an exception or threshold determination that forecloses resort to the doctrine of equivalents, but is instead a legal conclusion of a lack of equivalence based on the evidence presented and the theory of equivalence asserted." *Cadence Pharms. Inc. v. Exela PharmSci Inc., 780 F.3d 1364, 1371 (Fed. Cir. 2015)*. In *Cadence*, the Federal Circuit affirmed the district court's rejection of defendant's vitiation argument and saw no clear error in the district **[**61]** court's finding of infringement under the doctrine of equivalents when it relied on expert testimony indicating that the timing of steps was "an insubstantial difference." *Id. at 1370-71*.

As in *Cadence*, Samsung highlights its expert's opinion that the order of steps is an "insubstantial difference." It has offered evidence that Huawei's products infringe claims 13 and 16 of the '130 patent under a DOE theory but not under direct infringement. Huawei's motion for summary judgment of noninfringement of the '130 patent is GRANTED IN PART AND DENIED IN PART.

D. Noninfringement as to the '105 Patent

---

[17] During the hearing, Samsung explained this interpretation that the word "remaining" refers to "where" the data information is mapped, not "when" it is mapped.

Asserted claims 28, 29, and 32 require "modulating data information to generate non-FT precoded modulation data symbols" and then "Fourier Transform (FT) pre-coding the non-FT precoded modulation data symbols to generate FT pre-coded symbols." Huawei contends that its products cannot infringe as a matter of law because Samsung's expert testified that the "FT precoded symbols" comprise the physical uplink shared channel (PUSCH), which contains both control information and data information. Prucnal Report ¶¶ 362-77, 392-412; *see also* Prucnal Dep. 46:25-47:4, 64:22-65:5, 68:24-69:18 (testifying that control quality indicators (CQI) are FT pre-coded **[**62]** control information on the PUSCH); 68:24-18 (testifying that demodulation reference signals (DMRS) and sounding reference signals (SRS) are control signals on the PUSCH)(Ex. 26); *see also* Mahon Decl. ¶ 4-6.

Samsung attacks Huawei's arguments by relying on claim construction principles.[18] According to Samsung, the plain and ordinary meaning of "FT pre-coded symbols" is simply "symbols that contain **[*961]** information that have been FT pre-coded." Opp'n at 19. But, as explained above, in determining whether a reasonable juror could find that the plain and ordinary meaning of each disputed term reads onto the accused devices, I may consider the written description and other parts of the specification. *Aventis, 715 F.3d at 1373*. Samsung acknowledges that Dr. Prucnal's analysis identifies PUSCH symbols, which contain both data and control information. Opp'n at 20. But it insists that the claim term uses "comprising" and therefore does not foreclose the possibility that "FT pre-coded symbols" could contain control information.

Samsung also points out that construing the term as precluding control data excludes an embodiment depicted in figure 8. '105 patent at fig. 8; *see id.* at 9:14-17 ("In this embodiment, Size M FFT block 810 pre-codes **[**63]** not only the user data, but also FFT pre-codes some of the control and signaling information."). And it emphasizes that the claim term "FT pre-coded symbols" must be distinguished from "FT pre-coded data symbols" and "FT pre-coded control symbols."

Samsung's arguments are unpersuasive. The surrounding claim language makes it clear that the "*FT pre-coded symbols*" are generated by "*Fourier Transform (FT) pre-coding the non-FT pre-coded modulation data symbols*," which are generated by "modulating data information to generate non-FT precoded modulation data symbols." '105 Patent at 13:49-51. Accordingly, the FT pre-coded symbols are generated using data symbols.

The specification confirms that the term "FT pre-coded symbols" means "modulated data symbols that do not contain signaling or control information and have been put through a Fourier transform operation." *E.g.*, '105 Patent, Fig. 3 (distinguishing between "data" input and "signaling & control" input); 3:56-60 (describing figure 3); 6:65-67 ("In FIG. 3, the signaling and control information, such as pilot signals, are directly mapped to the OFDM subcarriers without FFT precoding."); claim 28 at 13:45-51 ("modulating data information to generate non-FT precoded **[**64]** modulation data symbols; modulating control information to generate non-FT precoded modulation control symbols; Fourier Transform (FT) pre-coding the non-FT pre-coded modulation data symbols to generate FT pre-coded symbols... .").

As for figure 8, Huawei explains that the claim language discloses FT pre-coding using data information and therefore does not cover figure 8. "It is true that constructions that exclude the preferred embodiment are disfavored." *Pacing Techs., LLC v. Garmin Int'l, Inc., 778 F.3d 1021, 1026 (Fed. Cir. 2015)*. "However, in a case such as this, where the patent describes multiple embodiments, every claim does not need to cover every embodiment." *Id.* "This is particularly true where the plain language of a limitation of the claim does not appear to cover that embodiment." *Id.* Such is the case here.

"Comprising is not a weasel word with which to abrogate claim limitations." *Spectrum Int'l, Inc. v. Sterilite Corp., 164 F.3d 1372, 1380 (Fed. Cir. 1998)*. "The presumption raised by the term 'comprising' does not reach into each of the six steps to render every word and phrase therein open-ended—especially where, as here, the patentee has narrowly defined the claim term it now seeks to have broadened." *Dippin' Dots, Inc. v. Mosey, 476 F.3d 1337, 1343 (Fed. Cir. 2007)*; *see also* *Power Mosfet Techs., L.L.C. v. Siemens AG, 378 F.3d 1396, 1409 (Fed. Cir. 2004)*

---

[18] As discussed below, it also moves to strike Huawei's argument because it argues that it was not timely disclosed. *See* discussion infra VII.

("'Comprising,' while permitting additional elements not required by a claim, does not remove the limitations **[**65]** that are present."). The claim clearly recites that "FT pre-coded **[*962]** symbols" contain data information, not control information.

Samsung next highlights Dr. Prucnal's testimony that "every symbol in the PUSCH does not necessarily include control information." Prucnal Dep. at 64:22-65:5, 65:22-66:6 (Ex. 16). It underscores Huawei's expert's testimony that there are times when there is only data transmitted in the PUSCH. Mahon Dep. at 238:2-13, 239:5-13, 239:14-240:11, 241:20-242:7, 242:19-244:19 (Ex. 23). Huawei takes issue with this "eleventh-hour attempt" and emphasizes that Dr. Prucnal never offered the opinion that the accused products only infringe some of the time nor did its interrogatory answers rely on such an infringement theory, and its damages expert assumes that the' 105 patent is infringed at all times. Mot. Ex. 27 ¶ 362-77, 393-412; Reply Ex. 51 at 161-215; Stake FRAND Decl. Ex. 8 ¶¶ 76-79. And even if I ignored these oversights, Huawei urges that Samsung has still not met its burden to demonstrate a disputed issue because "[a] theoretical possibility that PUSCH symbols lack control data does not mean it happens." Reply at 13.

But I must view the evidence in the light most favorable to **[**66]** Samsung. It has pointed to Dr. Prucnal's testimony that not every PUSCH symbol contains control information, meaning that some contain data and no control information. Even accepting Huawei's claim interpretation, Samsung has demonstrated disputed evidence of infringement. Its motion on this point is DENIED.

E. Noninfringement of the '825 Patent

The '825 patent provides a method for a user equipment to communicate with a base station (Node B) on a shared channel (SCH), which is a channel used by multiple UEs communicating with the same base station. '825 patent, Abstract; *id.* at 1:53-56 (Dkt. No. 140-1 at 47). The Node B must be able to differentiate UEs to ensure that data packets are sent to their intended recipient. The '825 patent discloses a method for UEs to select a temporary ID from a pool when initiating communications with a base station. Sometimes, two UEs may select the same short ID at the same time and a "collision" occurs. *Id.* at 2:14-39; *id.* at 6:47-49. The '825 patent addresses this potential problem by developing a monitoring technique in which a UE waits a "predetermined delay duration" prior to monitoring for a downlink signal, so that a first UE has time to receive its short ID before a second UE may intercept it. *Id.* ***[**67]*** at 3:33-45; *id.* at 6:34-39; *id.* at 6:65-7:7.

Asserted claims 1 (method) and 4 (apparatus) both disclose "receiving system information indicating a group of identification (ID)s." '825 Patent at 11:43-44, 12:3-4. Huawei contends that "indicating" means "including," whereas Samsung insists that "indicating" means "point out or index."[19] Huawei highlights portions of the specification, which repeatedly notes that the system information *includes* information. The description of figure 3, "a message flow diagram illustrating conventional operation for acquiring a short ID after a UE moves to a new cell," includes the following: "The system information is common information to be provided up to a cell boundary through known cell-by-cell channels, and includes information to be detected by the UE **305** for initiating communications in the cell." '825 Patent at 2:54-56, 59-63; *see also id.* at 5:32-33, figure 4 description (noting that the UE "acquires system information" and "[t]he system information includes the temporary ID pool **[*963]** of the cell A."); *id.* at 7:52-57, figure 8 description ("[t]he controller **835**, for example, manages a temporary ID pool and T and P values acquired from system information of a current cell, **[**68]** selects a temporary ID from the temporary ID pool, and delivers the selected temporary ID to the control message generator **805**."); *id.* at 8:51-52, figure 9 description (noting that the UE "acquires system information," and "[t]he system information includes a temporary ID pool of the cell A, a delay duration T, and a valid period P.").

Huawei underscores that Samsung's expert, Dr. Matthew Valenti, admitted that this description means that the T and P values are what is being transmitted. Valenti Dep. at 95-96 (McBride Decl. ¶ 41; *id.*, Ex. 40; Dkt. No. 327-

[19] In the Joint Claim Construction Statement, Huawei proposed its preferred construction, but Samsung contended that the term needed no construction. Dkt. No. 124-3 at 58.

54[under seal]). It contends that Samsung has offered no evidence that the Huawei accused products receive system information including the group of IDs. *See* Valenti Report ¶¶ 371-74, 382, 396 (Ex. 41). And its expert, Dr. La Porta, opines that "[n]othing within this source code, or elsewhere, suggest that the Huawei/HiSilicon accused devices receive system information 'including a group of identification(ID)s.'" La Porta Rebuttal Report ¶¶ 121, 132 (Ex. 42; Dkt. No. 327-56[under seal]). Dr. La Porta also contends that, even accepting Samsung's proposed construction, the claims would not read on the accused products because "the system **[**69]** information only provides data for the UE to determine the size of PreambleGroupA and PreambleGroupB[,]" but "the base station does not provide *any* information to show which preamble group to use." *Id.* ¶ 122.

Samsung begins its counterattack by insisting that "indicating" must be given its plain and ordinary meaning, since it was not selected for claim construction, and the plain and ordinary meaning of the word can mean "to point out or point to." Dkt. No. 328-41. It also emphasizes that all of the embodiments that Huawei highlights are "exemplary embodiments" and nowhere does the patentee use limiting language in reference to these embodiments. As evidence of infringement, it cites to Dr. Valenti's opinion that "[t]he received system information determines the available groups of random access preambles (including whether preamble group B exist or not), the number of preambles in the available groups, and the size of each of those preamble groups." Valenti Report ¶¶ 372, 624 (Dkt. No. 357-46[under seal]). According to Samsung, since the system information includes the number of preambles in a group, it necessarily includes the range of preamble indexes, i.e., an ID within a group **[**70]** of IDs, thereby accomplishing the claim limitation of "receiving system information indicating a group of identification (ID)s." *See* '825 Patent at 11:43-44, 12:3-4.

Even though I must look to the specification for guidance in interpreting the plain and ordinary meaning of claim terms, "it is improper to read limitations from a preferred embodiment described in the specification—even if it is the only embodiment—into the claims absent a clear indication in the intrinsic record that the patentee intended the claims to be so limited." *Epos Techs. Ltd. v. Pegasus Techs. Ltd., 766 F.3d 1338, 1341 (Fed. Cir. 2014)* (quoting another source). I cannot say that there is such a "clear indication" here. Samsung cites to several references that do not state that the system information "includes" the temporary ID pool. *E.g.*, '825 patent at 7:11-20 (referring to figure 7 and noting that the "UE acquires the temporary ID pool..."); *id.* at 9:56-65 (referring to figure 11 and noting the same).

Since "includes" must be given the "full range" of its plain and ordinary meaning, including "to point out," and Samsung has provided evidence that the accused devices **[*964]** practice this limitation, Huawei's motion for summary judgment on this point is DENIED.

Even if I did not find a genuine dispute of material fact **[**71]** as to literal infringement, I would deny the motion under a DOE theory. Dr. Valenti also opined that "any alleged differences are insubstantial[,]" so the limitation is at least practiced under DOE. Valenti Report ¶ 399; *see id.* (explaining that the accused devices perform substantially the same function, receiving information indicating a group of identifiers, in substantially the same way, receiving the system information from the base station, to get substantially the same result, obtaining a group of identifications from which the UE can select). Viewing the evidence in the light most favorable to Samsung, it has demonstrated a disputed issue as to whether the accused products infringe under a DOE theory.

III. HUAWEI'S MOTION TO STRIKE PORTIONS OF SAMSUNG'S EXPERT REPORTS RELATED TO FRAND

Huawei objects to the opinions of two of Samsung's experts related to the propriety of an SEP holder seeking injunctive relief because it insists these opinions amount to improper legal conclusions. Mot. to Preclude at 2 (Dkt. No. 327-4[under seal]; Dkt. No. 329[redacted]).

Expert Michael Davies opines that "[i]f a patent holder holds patents of the type where there were a number of credible alternative **[**72]** implementations prior to a single implementation being selected for incorporation into the standard, the patent holder would be in violation of antitrust regulations by asking for an injunction." Davies Report ¶ 27 (Peterson Decl., Ex. 1); *see also id.* ("A holder should not be granted an injunction on a patent ex-post if the patent was only one of a number of equally plausible alternatives ex-ante."). And expert Dr. Jerry Hausman noted his "view" that "companies with SEPs should not be able to seek an injunction (or an exclusion order from the U.S. International Trade Commission) except under exceptional circumstances" because "they permit the SEP patent owner to exercise monopoly power beyond what is permitted under its FRAND obligations." Hausman Report ¶ 57; *see also id.* ¶ 32 ("My review of the negotiations between the parties leads me to the conclusion that, to the extent there are any exceptions to the general rule that a SEP owner cannot pursue injunctive relief, those exceptions do not apply here."), ¶ 56 ("Thus, by seeking an injunction Huawei is seeking to exploit its market power and obtain higher royalties. These higher royalties are equivalent to higher prices than would **[**73]** have occurred in the absence of the injunction and are thus a violation of *Section 2*."), ¶ 58 ("Filing for injunctions also should not be permitted because they confer a 'dangerous probability of success' for the SEP owner to exercise monopoly power beyond what is permitted under its FRAND obligations."); Hausman Rebuttal Report ¶ 14.

Huawei cites several reasons for striking these paragraphs. As to the Davies Report, Huawei contends that (1) his opinions on the legal standard for an antitrust violation and the propriety of injunctive relief are pure issues of law, (2) he did not rely on these statements as legal assumptions provided by counsel and he admits he is not qualified to opine as an expert in ***antitrust law*** or economics, and (3) he misstates the law because there is no per se rule against injunctions on SEPs and the appropriate antitrust laws will be set forth in the jury instructions. Mot. at 2-4. And with respect to Dr. Hausman, Huawei asserts that (1) his personal "view" constitutes a legal conclusion and will be of no use to the jury, (2) he acknowledges that his personal views do not align with prevailing legal standards, (3) his conclusion **[*965]** in paragraph 56 amounts to an improper **[**74]** and unfounded legal conclusion, and (4) "his opinions run afoul of the act of state doctrine, for the reasons set forth in Huawei's motion for summary judgment." *Id.* at 4-5.

Samsung responds that none of the paragraphs should be stricken because "an expert may offer his opinions within the legal terminology of the legal framework pertinent to his opinions." Opp'n at 2. The Ninth Circuit has noted that "a witness may refer to the law in expressing an opinion without that reference rendering the testimony inadmissible. Indeed, a witness may properly be called upon to aid the jury in understanding the facts in evidence even though reference to those facts is couched in legal terms." *Hangarter v. Provident Life & Acc. Ins. Co., 373 F.3d 998, 1017 (9th Cir. 2004)* (quoting another source); *see also* *Fid. Nat. Fin., Inc. v. Nat'l Union Fire Ins. Co. of Pittsburg, PA, 2014 U.S. Dist. LEXIS 47041, 2014 WL 1286392, at *9 (S.D. Cal. Mar. 28, 2014)* (allowing expert opinions "couched ... in legal terms" but noting that the court may revisit the issue in the context of specific testimony via a motion in limine); *Advanced Thermal Scis. Corp v. Applied Materials Inc., 2009 U.S. Dist. LEXIS 140818, 2009 WL 10673194, at *1 (C.D. Cal. Oct. 28, 2009)* ("The analysis of complex facts, albeit within a legal framework, is a proper role for an expert.").

But Samsung overlooks the portions of the reports that go beyond providing a legal framework and offer opinions on legal conclusions. *See* Davies Report ¶ 27 ("the patent holder would be in violation of antitrust regulations"); **[**75]** Hausman Report ¶ 32 ("to the extent there are any exceptions to the general rule that a SEP owner cannot pursue injunctive relief, those exceptions do not apply here."), ¶ 56 ("These higher royalties are equivalent to higher prices than would have occurred in the absence of the injunction and are thus a violation of *Section 2*."), ¶ 57 ("companies with SEPs should not be able to seek an injunction ... because they permit the SEP patent owner to exercise monopoly power beyond what is permitted under its FRAND obligations."), ¶ 58 ("Filing for injunctions also should not be permitted because they confer a 'dangerous probability of success' for the SEP owner to exercise monopoly power beyond what is permitted under its FRAND obligations."). These sentences will be struck.[20] *See* *Hangarter, 373 F.3d at 1016* ("[A]n expert witness cannot give an opinion as to her *legal conclusion*, i.e., an opinion on an ultimate issue of law." (quoting another source) (emphasis in original)).

I do not, however, see any need to strike paragraphs 21 through 26 of the Davies Report, paragraph 14 of Hausman's Rebuttal Report, or the remaining portions of the paragraphs noted above.[21]

---

[20] This ruling is not inconsistent with any rulings on Samsung's motion to exclude portions of Huawei's experts' reports because "the outcome depends upon how the expert expresses his opinion." *Fid. Nat. Fin., Inc. v. Nat'l Union Fire Ins. Co. of Pittsburg, PA, No. 09-CV-140-GPCKSC, 2014 U.S. Dist. LEXIS 47041, 2014 WL 1286392, at *8 (S.D. Cal. Mar. 28, 2014)*.

IV. HUAWEI'S *DAUBERT* MOTION ON TECHNICAL ISSUES[22]

Huawei contends that Samsung's experts offer opinions based on improper **[*966]** constructions of terms in Huawei patents 8,724,613 ("'613 patent"), 8,885,587 ("'587 patent"), 8,644,239 ("'239 patent"), and 8,416,892 ("'892 patent"), and Samsung patents RE44,105 ("'105 patent"), 8,761,130 ("'130 patent"), 9,288,825 ("'825 patent"), and 8,619,726 ("'726 patent"). Huawei *Daubert* Mot. (Dkt. No. 327-4[under seal]; Dkt. No. 330[redacted]). Huawei contends that Samsung's expert witnesses offer opinions based on improper construction of claims not included in the Claim Construction Order. And it underscores that in many instances Samsung did not raise these issues in the Joint Claim Construction Statement (Dkt. No. 124). *See* supra note 5.

A. Huawei's '613 Patent

1. Background

The '613 patent enables mobile devices to know when and where to locate a service when a base station transmits it within a specific transmission unit, a fixed block of time called a radio frame. '613 at 5:10-51 (Dkt. No. 330-4). Each frame consists of 10 subframes. *Id.*, figure 4.

Claim 1 provides,

> A method for communicating, comprising:
>
> > receiving, by a user equipment (UE), a service sent by a base station, the service being sent in one or more subframes that are designated as specific subframes, the specific subframes being selected **[**77]** from one or more radio frames that are designated as specific radio frames, the specific radio frames being selected from a time unit, wherein the time unit comprises *2M* radio frames, each of the radio frames containing a number R of subframes that can be allocated to carry the service, where R is a natural number, and M is a nonnegative integer; and
> > receiving, by the UE, position information of the specific radio frames in the time unit and position information of the specific subframes in the specific radio frame on a transport channel, wherein the transport channel is mapped to a physical shared data channel;
> > wherein the position information of the specific radio frames in the time unit is represented by the number of the specific radio frames in the time unit; or the position information of the specific radio frames in the time unit is represented by an interval between two specific radio frames in the time unit,
> >
> > wherein the interval is *2m*, and OsmsM, or wherein the interval is the total number of the radio frames in the time unit divided by the number of the specific radio frames in the time unit.

'613 Patent at 18:24 - 49; *see also id.* at 18:60 - 19:18 (apparatus claim 5).

During the claim construction **[**78]** process, the parties selected only one of the '613 patent terms for construction—"receiving by a user equipment (UE), a service sent by a base station"/"receive a service sent by a

---

[21] To the extent that any of these opinions are based on incorrect legal assumptions or propose views that diverge from the actual law, as Huawei asserts, those opinions may be excluded via motions *in **[**76]** limine. See* *Villalpando v. Exel Direct Inc., 161 F. Supp. 3d 873, 895 (N.D. Cal. 2016)*(addressing motions in limine and noting that "an expert's reliance on *incorrect* legal assumptions would warrant exclusion[.]").

[22] Samsung moves to strike a number of Huawei's noninfringement theories and noninfringement alternatives on the basis that they were not timely disclosed, and some of those arguments are implicated here. As discussed below, *see* discussion *infra* section VII, I am denying that motion.

base station" ('613 Patent, claims 1 and 5). I decided that no construction was necessary. Claim Construction Order at 9-11.

Samsung's expert, Dr. David Lyon, submitted a rebuttal report on noninfringement of the '613 patent in which he offered his opinion of noninfringement. Lyon '613 Noninfringement Rebuttal Report (Ex. 2, Dkt. No. 327-10[under seal]; **[*967]** Ex. A, Dkt. No. 355-7[under seal]). Huawei argues that Lyon's opinions are based on three new claim constructions not raised during the claim construction phase:

(1) the "position information" of claims 1 and 5 must be the "position information for the specific frames and subframes that contain the service[,]" rather than position information for frames and subframes that are "reserved" to carry the service (Lyon '613 Noninfringement Report ¶ 82)

(2) claims 1 and 5 "do not provide a mechanism for representing the position of the first specific frame in the time unit to be anywhere other than the first frame of the time unit—a non-zero offset. In other words, the asserted claims do not allow **[**79]** there to be an 'offset' of frames in addition to the regular spacing of the specific frames within the time unit." (Lyon '613 Noninfringement Report ¶ 171), and

(3) "[t]he majority of the claimed limitations require performance in the network, not the UE" (Lyon '613 Noninfringement Report ¶ 188), and "Dr. Akl needed to show that Samsung controlled the network to perform these limitations to such a degree that their actions could be imputed to Samsung" (Lyon '613 Noninfringement Report ¶ 190).

2. Analysis

As an initial matter, Samsung misconstrues Huawei's arguments. Huawei is not arguing that Dr. Lyon is "applying a different plain and ordinary meaning of claim terms than Huawei's experts[.]" Opp'n at 2. Rather, Huawei contends that Dr. Lyon's opinions "exceed the bounds" of the plain and ordinary meaning of the claim terms, *Apple, 2014 U.S. Dist. LEXIS 22938, 2014 WL 660857, at *6*, thereby "delv[ing] too deeply into claim construction to be presented to the jury[.]" *Fujifilm, 2015 U.S. Dist. LEXIS 35235, 2015 WL 1265009, at *6*. Under these circumstances, expert opinions are properly excluded and need not be included in a summary judgment motion. *E.g., Media Tek, 2014 U.S. Dist. LEXIS 31461, 2014 WL 971765, at *5* (rejecting argument that expert was "merely offering testimony within the purview of the plain and ordinary meaning of the patent claim terms" when the **[**80]** expert "relies heavily on the prosecution history, specifications, and even provisional applications to explain and expound upon a specific meaning and/or requirements of the terms identified.").

a. "Position Information"

The parties dispute whether the plain and ordinary meaning of "position information" allows for an interpretation limiting it to the "specific radio frames" that contain "specific subframes" that *actually* contain the "service" sent by the base station, as opposed to whether the "position information" can refer to all "specific radio frames" and "specific subframes" that are reserved for the service, but may not necessarily contain it. Huawei contends that Dr. Lyon's opinions based on "position information" find no support in the intrinsic evidence and should be stricken. *See* Huawei's *Daubert* Mot. at 5 (seeking to strike paragraphs 28, 59, 64, 67, 71, 81-82, 120-21, 141-43, 153, 159, and 161). Samsung insists that Dr. Lyon does not provide any claim construction analysis of the term "position information," he merely relies on his understanding of the plain and ordinary meaning of the term. Opp'n at 3; *see* Lyon '613 Rebuttal Report ¶¶ 35-36.

But Dr. Lyon's bare assertion **[**81]** that he "applied the plain and ordinary meaning" does not make it so. And he need not include paragraphs "delv[ing] deeply" into construction for his opinions to be improperly based on claim construction arguments. A brief examination of the claims and his opinions proves the point.

Part of claim 1 requires, "the service being sent in one or more subframes that are designated as specific subframes, the specific subframes being selected from one or more radio frames that are designated **[*968]** as specific radio frames," '166 Patent at 18:28-29, and another part mandates that the UE receive "position information of the specific radio frames in the time unit and position information of the specific subframes in the specific radio frame on a transport channel," *id.* at 18:35-37. A proper reading of these claim elements requires that the UE receive a "service" that is "sent in one or more" designated "specific subframes," which are selected from designated "specific radio frames," and the UE receives "position information" for those designated "specific radio frames."

Huawei frames this as an issue over the construction of "position information," and (in reply) argues that "[t]he plain meaning of 'position information' **[**82]** is information relating to its position." Reply at 2. But it appears that the parties actually dispute the meaning of the "specific radio frames" and "specific subframes," and whether those "specific" frames/subframes must contain the service. The claims do not require this limitation. The service is "sent in" "one or more ... specific subframes" that are "selected from one or more ... specific radio frames... ." The "one or more" language suggests that not all of the "specific" frames/subframes have to carry the service.[23] As Huawei frames it, contrary to Dr. Lyon's opinion, "[n]othing in the plain language of the claims requires that all of the 'designated' frames and subframes actually contain the service, such that there is an exact one-to-one correspondence between the designated frames/subframes and the frames/subframes that actually contain the service[.]" Huawei's *Daubert* Mot. at 3.

Portions of the targeted paragraphs of Dr. Lyon's report depend on his interpretation that the claims dictate *limiting* the "position information" to those "specific frames and subframes that contain the claimed service." Lyon Report ¶¶ 59, 64, 67, 81-82, 120, 141-42, 159, 161; *see also id.* ¶¶ 28, 71, **[**83]** 153 (implying the same). The take-away is that his opinions seek to *narrow* the plain and ordinary meaning of the claim language.[24] But claim terms are given their full scope absent disavowal by the patentee or a clear intent to act as his own lexicographer. *Thorner v. Sony Computer Entm't Am. LLC, 669 F.3d 1362, 1365 (Fed. Cir. 2012); see also 3M Innovative Properties Co. v. Tredegar Corp., 725 F.3d 1315, 1329 (Fed. Cir. 2013)*("[O]ur cases do not support prescribing a more particularized meaning unless a narrower construction is required by the specification or prosecution history."). Because claim construction is a matter of law to be decided by the court, and, by implication, experts are not permitted to argue claim construction to the jury, an expert's opinion that seeks to limit the full scope of a term's plain and ordinary meaning must be stricken.

[*969] Samsung underscores the undisputed purpose of the '613 patent, which is to "save electric energy of the user equipment[,]" '613 patent at 3:53-54, to argue that "it would not make any sense for the UE to read frames and subframes that only might carry the service[.]" Opp'n at 5. But directing the UE to read certain reserved subframes as opposed to all subframes would still accomplish this purpose. Moreover, the argument is irrelevant to whether Dr. Lyon's opinions limit the plain and **[**84]** ordinary meaning of the claim terms.

During the hearing, Samsung argued that Huawei's request to strike certain paragraphs was overly broad because it included portions that did not run afoul of claim construction tenets. It provided a copy of the report with highlighted portions involving Dr. Lyon's opinion that "position information" is limited to position information of the specific radio frames and specific subframes that actually contain the service. Highlighted Lyon Report (Ducca Decl., Ex. A, Dkt. No. 396-5[under seal]); *see* Notice Re: Tentative Rulings (Dkt. No. 396-3[under seal]). The

---

[23] This conclusion is confirmed by the specification, which notes that the invention discloses "[a] method for transmitting service [that] includes: selecting a part or all of radio frames in one time unit as specific radio frames; selecting a part of all of subframes in the specific radio frames as specific subframes for sending a specific service; sending the service according to the above time division multiplexing mode; and sending position information of the specific radio frames and/or position information of the specific subframes." '613 Patent at 2:63-3:3.

[24] The "exceed the bounds" language of *Apple*, see *2014 U.S. Dist. LEXIS 22938, 2014 WL 660857, at *6*, may cause confusion because one could interpret a more narrow interpretation as *falling within the bounds* of plain and ordinary, rather than "exceed[ing]" them. But, as explained, an improperly narrow construction technically falling within the bounds of a plain and ordinary meaning would still inappropriately delve too deep into claim construction.

highlighted sentences of the targeted paragraphs (last sentences of paragraph 64, 67, 71, 81, 82, 141, 159) will be struck. The remaining technical information is not tied to an improper limitation of the claim language and may remain.

3. "Non-Zero Offset"

Huawei seeks to strike paragraphs 171 through 175 of Dr. Lyon's report because he explicitly opines that "[t]he claims do not provide a mechanism for representing the position of the first specific frame in the time unit to be anywhere other than the first frame of the time unit—a non-zero offset." Lyon Report ¶ 171; *see also* ¶¶ 173-175 (detailing **[**85]** "an example where a non-zero offset would not infringe the asserted claims..."). But, according to Huawei, nothing in the claim language requires a specific starting position, let alone a "non-zero" starting position. Huawei's *Daubert* Mot. at 6. It also cites numerous locations in the specification that dictate the permissive instruction that "the starting position *may* be appointed as 0[.]" *E.g.*, '613 patent at 13:57, *id.* at 14:14-15, *id.* at 14:22 (emphasis added); *see also id.* at 14:26 ("the position may be a first radio frame in the sub-time unit."). And it emphasizes that the specification's use of a variable (g0) rather than a constant to represent the starting position reinforces that it need not always be 0.

Samsung counters that every embodiment of the specification uses a starting position of zero. Opp'n at 6. This is true, but it does not justify limiting a claim's plain and ordinary meaning absent disavowal or a clear intent to define. *See* *Electro Med. Sys., S.A. v. Cooper Life Scis., Inc., 34 F.3d 1048, 1054 (Fed. Cir. 1994)* ("[A]lthough the specifications may well indicate that certain embodiments are preferred, particular embodiments appearing in a specification will not be read into the claims when the claim language is broader than such embodiments."). That is what **[**86]** Dr. Lyon does when he opines, "The claims do not provide a mechanism for representing the position of the first specific frame in the time unit to be anywhere other than the first frame of the time unit—a non-zero offset." Lyon Report ¶ 171. This sentence, and the sentences before and after it, must be struck.

I do not, however, see a need to strike the remaining portions of this paragraph, nor the other paragraphs Huawei seeks to strike. Those paragraphs explain Dr. Lyon's opinion that "[w]hen there is a non-zero offset, the Accused Products do not infringe the asserted claims." Lyon Report ¶ 171. He can opine on this issue, but he cannot argue that *the claims require* a non-zero offset.

[*970] 4. Divided Infringement

Dr. Lyon opined that "network components are necessary to infringe claims 1 [method] and 5 [product]" of the '613 patent, including that "the majority of the claimed limitations require performance in the network, not the UE[,]" and in order to show infringement, Huawei needed to demonstrate that "Samsung controlled the network to perform these limitations to such a degree that their actions could be imputed to Samsung." Lyon Report ¶¶ 188-190. Huawei argues that Dr. Lyon's divided infringement **[**87]** theory "fails as a matter of law."

Dr. Lyon's opinions here do not rely on improper claim constructions, but they depend on incorrect statements of the law and are therefore excludable under *Rule 702* because they will not help the trier of fact understand the evidence. *See* *Fed. R. Evid. 702*; *see also* *Uniloc USA, Inc. v. Microsoft Corp., 632 F.3d 1292, 1306 (Fed. Cir. 2011)* ("Under *Daubert*, the district court must exercise its 'gatekeeper' function in ensuring that scientific testimony is relevant and reliable.") (citing *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999))*. Both claims 1 and 5 are directed to the "user equipment." *See* '613 patent, claim 1 at ("A method for communicating, comprising: receiving, by a user equipment (UE)... receiving, by the UE, ..."); *id.*, claim 5 at ("A user equipment, comprising ... .").

As an initial matter, his divided infringement theory does not apply to product or apparatus claims, such as claim 5 of the '613 patent, so it fails as a matter of law. *See* *Georgetown Rail Equip. Co. v. Holland L.P., No. 6:13-CV-366, 2016 U.S. Dist. LEXIS 78365, 2016 WL 3346084, at *15 (E.D. Tex. June 16, 2016)*, *aff'd*, *867 F.3d 1229 (Fed. Cir. 2017)* ("Holland's position was wrong as a matter of law, because the asserted claim 16 is a *system* claim and the law of divided infringement that Holland relied on applies only to *method* claims." (citing Akamai Techs., Inc v. Limelight Networks, Inc., 786 F.3d 899, 910 (Fed. Cir. 2015) (panel decision) ("[O]nly method claims can raise an issue of divided infringement") *vacated* Akamai Techs., Inc v. Limelight Networks, Inc., 786 F.3d 899, 910 (Fed. Cir. Aug. 13, 2015) (en banc)); **[**88]** *see also* Arcelormittal & Arcelormittal Atlantique Et Lorraine v. AK Steel Corp., No. CV 13-685-SLR, 2017 U.S. Dist. LEXIS 7199, 2017 WL 239344, at *4 (D. Del. Jan. 19, 2017) ("Plaintiffs' request for discovery is unnecessary given that divided infringement applies to method claims in particular circumstances, not to the product by process claims at bar." (citing Akamai Techs., Inc v. Limelight Networks, Inc., 797 F.3d 1020, 1022 (Fed. Cir. 2015)). Since divided infringement only applies to method claims, Dr. Lyon's divided infringement opinion with respect to apparatus claim 5 is irrelevant to the issue of infringement of that claim.

But as for method claim 1, I cannot say that Dr. Lyon's divided infringement theory fails as a matter of law. The claim is undeniably directed towards the "user equipment." "[A] patentee can usually structure a claim to capture infringement by a single party, by focusing on one entity." Uniloc USA, 632 F.3d at 1309 (internal quotation marks and alterations omitted); *see also* Tech. Patents LLC v. T-Mobile (UK) Ltd., 700 F.3d 482, 501 (Fed. Cir. 2012) (finding divided infringement theory inapplicable because the claim "require[d] action only by the originating user," and "do not require performance by multiple actors."). The patentee elected to direct the claims of the '613 patent towards the "user equipment." But claim 1 also requires other actors in the network, such as a "service sent by a base station." *E.g.*, '613 patent at 18:25-26. **[**89]**

As the *Uniloc* court noted, "[t]hat other parties are necessary to complete **[*971]** the environment in which the claimed element functions does not *necessarily* divide the infringement between the necessary parties." 632 F.3d at 1309 (emphasis added). But this claim explicitly requires action by a third party, not implicitly as in the example provided by Uniloc. *See id.* (noting that a claim that provides "'[a]n algorithm incorporating means for receiving e-mails' may require two parties to function, but could nevertheless be infringed by the single party who uses an algorithm that receives e-mails."). Under these circumstances, I am not prepared to strike Dr. Lyon's divided infringement opinion related to claim 1 of the '613 patent. If it is determined pre-trial that divided infringement is not an applicable theory of infringement for this claim, then Huawei may move to exclude these opinions via a motion *in limine*.[25]

B. Huawei's '587 Patent

Huawei attacks paragraphs 134 through 136, which pertain to the '587 patent, because they present the same type of divided infringement opinions as discussed above with respect to the '613 patent. *See* Lyon Report re: Noninfringement of '587 Patent ¶ 134 ("the majority of the claimed limitations [in claims 3 and 9 of the '587 patent] require **[**90]** performance in the network, not the UE.") (McBride Decl. ISO Huawei's *Daubert* Mot. ¶ 9; *id.*, Ex. 8, Dkt. No. 327-12); *id.* ¶ 136 ("Dr. Akl [Huawei's technical expert] needed to show that Samsung controlled the network to perform these limitations to such a degree that their actions could be imputed to Samsung.").

It presents the same arguments—that Samsung has not shown that a divided infringement theory applies to apparatus/product claims (as in claim 9 of the '587 patent), and, regardless, the claims are written from the perspective of the UE, so divided infringement is inapplicable. *See* Huawei's *Daubert* Mot. at 9-10.

As with the '613 patent, the portions of these opinions that reference claim 9 will be stricken, because divided infringement does not apply as a matter of law to product/apparatus claims. But the remaining portions of the paragraphs can remain, unless and until it is determined that divided infringement does not apply to the method claims at issue in this case. *See* discussion above re: '613 patent.

---

[25] This conclusion is reinforced by the conditional language in Dr. Lyon's report. *See* Lyon Report ¶ 190 ("[T]o the extent there is a determination that the asserted claims require multiple actors to infringe the claims, Dr. Akl and Huawei have not set forth evidence to show that Samsung had any control over the third party network entities, and therefore, the Accused Products would not infringe the asserted claims.").

C. Samsung's '105 Patent

The '105 patent provides "a mechanism for FFT [Fast Fourier Transform] pre-coding of data to reduce peak-to-average power ration (PAPR) in a multi-carrier wireless network[,]" '105 patent at 1:38-40 (Dkt. No. 328-47), **[**91]** subject to certain protocol, such as "orthogonal frequency division multiplexing (OFDM)," or "orthogonal frequency division multiple access (OFDMA)[,]" *id.* at 1:43, 50-51. Asserted claim 28 requires, "mapping the FT pre-coded symbols to a first set of subcarriers[,]" and "mapping the non-FT pre-coded modulation control symbols to a second set of subcarriers[.]" *Id.* at 13:52-55. And, "performing an inverse Fourier Transform (IFT) operation on at least one of (i) the FT pre-coded symbols based on the first set of subcarriers and (ii) the non-FT pre-coded modulation control symbols based on the second set of subcarriers to generate an output signal... ." *Id.* at 13:56-60.

[*972] Huawei points to figure 3 of the patent to argue that "the OFDM/OFDMA transmitter according to the '105 Patent performs Fourier transform (FFT or FT) precoding on only the data symbols before the symbols are converted into the time domain signals via IFFT (or IFT)." Huawei *Daubert* Mot. at 10 (citing Min Expert Report ¶ 157). Dr. Prucnal opines that the "first set of subcarriers" corresponds to the physical uplink shared channel (PUSCH) and the "second set of subcarriers" corresponds to the physical uplink control channel (PUCCH). **[**92]** Prucnal Report ¶¶ 416, 432 (Ex. 11, Dkt. No. 327-14[under seal]). From this premise, Huawei argues that Dr. Prucnal's opinion "contradicts the claim and should be excluded" because it does not allow for both sets of subcarriers to be available for the same IFT operation (the operation that creates the transmission symbols), which it contends is required by the claims. Huawei *Daubert* Mot. at 11; *see* Mahon Decl. ¶ 4 ("In the LTE standard, the Physical Uplink Shared Channel (PUSCH) and Physical Uplink Control Channel (PUCCH) are allocated to separate subcarriers and are never transmitted at the same time.") (citing LTE standard, TS 36.211 v.8.7.0, p. 16, attached as Ex. A)(Dkt. No. 328-44).

Huawei seeks to exclude Dr. Prucnal's opinion related to these two claim limitations because it contends that they depend on an incorrect interpretation of the claim that "allow[s] separate IFT operations on the alleged control information and alleged data information, even when the IFT operations are separated in time." Huawei Daubert Mot. at 11-12 (citing Prucnal Report ¶¶ 446-463). But Samsung counters that nothing in the plain language of the claims requires that IFT is performed on *both sets* of **[**93]** subcarriers. Samsung is correct. The claim recites "at least one" of the subcarriers, and the patent discloses embodiments in which two sets can undergo different IFT operations at different times.[26] *See* '105 patent at figures 9 and 10.

Huawei's attempts to limit the claims to require both sets be available at the same time reads out certain embodiments and impermissibly narrows the plain and ordinary meaning of the claims. Its arguments do not provide a valid basis for striking portions of Dr. Prucnal's report.

D. Samsung's '130 Patent

1. "Mapping data information to remaining symbols"

Huawei seeks to exclude certain opinions of Samsung's expert, Dr. Nicholas Bambos, because they purportedly "rel[y] on an improper construction of the phrase 'mapping data information to remaining symbols.'" Huawei *Daubert* Mot. at 13 (seeking to strike paragraphs 550 to 594). Huawei insists that "the claim language is unequivocal that the 'data information' goes into each and every symbol that does not hold the reference signal." *Id.* at 12 (citing '130 patent at figure 10). It then attacks Dr. Bambos's opinion that the physical uplink shared channel (PUSCH) satisfies this element of the claim because some of the symbols in the PUSCH carry a sounding **[**94]** reference signal

[26] In Reply, Huawei argues that "at least one of' includes both, as well as either." Reply at 9. So, in its estimation, since "[t]he claim recites only one IFT operation," both sets must be available at the same time. *Id.* This argument does not alter the conclusion that Huawei's theory depends on a limited interpretation of the claims.

(SRS) and no data information, and therefore, the PUSCH cannot satisfy this element. *See* Mahon Decl. ¶ 37 (citing LTE standard, TS 36.211, section 5.3.4).

But Dr. Bambos explains that "a majority (if not overwhelming majority) of the subframes have no SRS in them," Bambos Report ¶ 558, which, according to Samsung, **[*973]** "result[s] in each of these subframes having mapped data information in each of the symbols in the slow except for the middle symbol containing the DM RS." Opp'n at 17. Huawei points out that Dr. Bambos admitted at his deposition that as many as half of the subframes can carry SRS. Bambos Dep. at 52:5-53:8 (McBride Decl. ISO Reply to Daubert, Ex. 38). And it underscores that Dr. Bambos never opined that the accused products infringe only some of the time. Reply at 14.

Huawei's challenge to Dr. Bambos's opinion is not based on an improper claim construction argument. It simply questions the soundness of his conclusions; these attacks can be presented at trial. *See* *Apple Inc. v. Motorola, Inc., 757 F.3d 1286, 1313 (Fed. Cir. 2014)* ("In *Daubert*, . . . the focus 'must be solely on principles and methodology, not on the conclusions that they generate.'"); *Daubert v. Merrell Dow Pharms., Inc., 43 F.3d 1311, 1318 (9th Cir. 1995)* ("[T]he test under *Daubert* is not the correctness of the expert's conclusions, but the **[**95]** soundness of his methodology.").

2. "CQI Information Being Multiplexed with the Data Information"

Claim 13 includes the following limitation,

> transmitting the signal including the mapped data information, the mapped acknowledgement information, and the mapped reference signal,
>
> wherein some of the data information is mapped to the first symbols which are directly adjacent to the middle symbol, and
>
> wherein CQI information is multiplexed with the data information.

'130 patent at 8:38-45.

Huawei claims that Dr. Bambos's report asserts that every non-reference symbol in LTE contains CQI. Huawei's *Daubert* Mot. at 13 (citing Bambos Report ¶ 564, in which he opines on LTE standard, TS 36.211, section 5.3.4). And it argues that "[h]e is wrong[,]" and Dr. Prucnal, another one of Samsung's experts, even testified that Dr. Bambos was wrong. *Id.* (quoting Prucnal Dep. at 61:19-62:8).

Samsung contends that "Dr. Bambos never said any such thing[,]" and it cites Bambos's declaration submitted in support of Samsung's opposition to Huawei's motion for summary judgment in which Bambos explains that he was referring to a "generic example," but there is a specific case where no CQI is sent. Bambos Decl. ISO Opp'n to Huawei MSJ ¶ 16. And **[**96]** it cites to Huawei's own expert, Dr. Mark Mahon, who conceded during his deposition that there are situations where CQI may not appear in a particular slot. Mahon Dep. at 150:19-151:1; *id.* at 238:2-13.

Huawei has not provided a valid basis for excluding these portions of Bambos's report. To the extent Bambos's opinions are inconsistent with other evidence, Huawei may attack his credibility. *See, e.g., Alaska Rent-A-Car, Inc. v. Avis Budget Grp., Inc., 738 F.3d 960, 969 (9th Cir. 2013)* ("All of Avis's challenges to Alaska Rent-A-Car's expert are colorable, but none go to admissibility. They amount to impeachment.").

E. Huawei's '239 Patent

1. "Obtaining ... a group number k of a sequence group allocated by the system"

Asserted claim 6 provides "[a] method for processing sequences in a communication system, comprising: obtaining, by a cell or a base station or a user equipment, a group number k of a sequence group allocated by the system... ." '239 patent at 25:1-5. Huawei selected the term "a group number k of a sequence group allocated by the system" for construction by the court. In the Claim Construction Order, I noted that the surrounding language and specification made **[*974]** it "clear that 'a group number k' is 'obtain[ed]' by being 'allocated by the system.'" Claim Construction Order at 9. **[**97]** I construed the term as "a group number k allocated by the system, where the group number k identifies a sequence group and where the value k is the same throughout the claim." *Id.*

Samsung's expert, Dr. Vijay Madisetti, opined that "[t]he Accused Products do not practice this limitation" because "a person of ordinary skill in the art would understand that this claim limitation requires a mobile device *to actually receive* the group number k from the system (*i.e.*, from the base station or eNB) that allocates the group number to the mobile device." Madisetti Report ¶ 65 (emphasis added) (Ex. 15, Dkt. No. 327-17 [under seal]). In opposition, Samsung reiterates this position. *See* Opp'n at 11 ("When the Court's construction is read in combination with 'obtaining' from the asserted claims, a person of ordinary skill in the art would have understood that the group number k must itself be received from the system that allocated it."); *id.* at 12 ("In order to obtain what the system allocates, the UE would have to receive the group number k from the system.").

Huawei argues that Dr. Madisetti's opinion seeks to narrow the definition of "obtain" to require the UE to "actually receive" the group number k **[**98]** from the system, rather than calculating the group number k from information received from the system. Huawei *Daubert* Mot. at 15. It highlights the specification, which provides that "[t]he transmitter and the receiver may obtain the data through calculation in this way rather than store the data." '239 patent at 13:13-15; *id.* at 21:47-48. Samsung argues that these portions of the specification relate to the generated sequences that are computed using the group number k, not the claimed group number k itself. Opp'n at 12. Huawei obliquely acknowledges this, but insists that it provides an example of how the claims intend to use the word "obtain." *See* Reply at 5 ("This contradicts Dr. Madisetti's read of 'obtaining' as excluding 'calculating,' even if it is describing processing different data.").

I agree with Huawei. Nothing in the claims requires that "obtaining" a "group number k" that is "allocated by the system" means that the UE actually receives the group number k from the system. Because Dr. Madisetti's opinions rely on a construction of "obtaining" that is narrower than its plain and ordinary meaning in light of the specification, his opinions on the matter (paragraphs 64 and 65) must **[**99]** be excluded.[27]

2. Claimed "sequence"

Claim 7 provides, "[t]he method of claim 6, wherein the sequences correspond to at least one of: Zadoff-Chu sequences and Gauss sequences." '239 patent at 25:24-26; *see also id.* at 26:34-36, claim 18 ("The sequence processing apparatus of claim **17**, wherein the sequences correspond to at least one of: Zadoff Chu sequences and Gauss sequences.").

Dr. Madisetti's noninfringement opinions for these claims depend on his assertion that the sequences must be Zadoff-Chu or Gauss sequences. *See* Madisetti Report ¶¶ 92, 95. In other words, he interprets the claim language "correspond to" as requiring that the sequences "***actually be***" either Zadoff-Chu or Gauss sequences, not just a portion of one with additional numbers appended, as Samsung explains. **[*975]** Opp'n at 12-13. Huawei argues that this interpretation improperly limits the claim language and it seeks to have paragraphs 91 through 95 of his report stricken. Huawei *Daubert* Mot. at 16.

Samsung relies on the dictionary definition of "correspond" to argue that "[t]his definition makes clear that "correspond" involves more than just being "related to" a Zadoff-Chu sequence; rather, it must be a Zadoff-Chu sequence because correspondence **[**100]** denotes an equivalence or sameness." Opp'n at 13. It also contorts excerpts from the specification to support its position. *Id.* Contrary to Samsung's position, however, the specification is careful to never describe those "desired sequences" that resulted from cyclic extension as "Zadoff-Chu sequences" precisely because the "desired sequences" do not have to be ZC sequences. *See* '239 patent at 11:41-

[27] The same result follows even if the dispute is framed around the "allocated by the system" language, as Samsung contends. As Huawei notes, "[t]he system could easily allocate the 'group number k' and then send data allowing the mobile to calculate it." Reply at 5.

46 ("The sequences with a length of the maximum prime number less than the quantity of sub-carriers, namely, the Zadoff-Chu sequences corresponding to the lengths 31, 47 and 59, are selected, and the desired sequences are obtained through cyclic extension of such sequences.").

Huawei explains that "correspond to" can describe a "connection" between two things, as is the case here, where "the generated sequences contain a ZC sequence plus the repetition of as much of that sequence as is necessary to complete the sequence." Reply at 6; *see* Mathematics Definition of "Correspondence" (including definition of correspondence as a function) (McBride Decl. ISO Reply, Ex. 34, Dkt. No. 374-5). Samsung's (and Dr. Madisetti's) interpretation improperly reads out the "correspond to" language. *See, e.g., 3M Innovative Properties Co. v. Tredegar Corp., 725 F.3d 1315, 1325 (Fed. Cir. 2013)* (agreeing **[**101]** with patentee that "the plain and ordinary meaning of the claim term supports a broad claim scope."); *TI Grp. Auto. Sys. (N. Am.), Inc. v. VDO N. Am., L.L.C., 375 F.3d 1126, 1138 (Fed. Cir. 2004)* (explaining patentee "is entitled to the full breadth of claim scope supported by the words of the claims and the written description."). Accordingly, paragraphs 92 through 95 will be struck.

3. "Selecting ... n sequences"

Claims 6 and 17 also include the limitation "selecting ... n sequences from a candidate sequence collection... ." '239 patent at 25:6-7; *id.* at 26:19. Dr. Madisetti opines that the claim refers to " 'sequences' (plural) so this would require the selection of more than one sequence per sub-group." Madisetti Report ¶ 76; *see id.* ("One of ordinary skill in the art reading the claim language and the specification would understand that the selection of a *single* sequence (v=0 or v=1) would not meet this limitation.") (emphasis in original).

Huawei argues that this interpretation is contrary to law, the surrounding claim language, and the specification. The Federal Circuit has "recognized that, in context, the plural can describe a universe ranging from one to some higher number, rather than requiring more than one item." *Versa Corp. v. Ag-Bag Int'l Ltd., 392 F.3d 1325, 1330 (Fed. Cir. 2004)* (citing *Dayco Products, Inc. v. Total Containment, Inc., 258 F.3d 1317, 1328 (Fed. Cir. 2001))*. Huawei points to an embodiment in the specification, **[**102]** in which "n is 1" to highlight that the specification provides the "context" necessary to find that the plural can include one. *See* '239 patent at 9:9; *see also id.* at 19:26-34 (describing another embodiment where, "[p]referably, n is 1... .").[28]

[*976] Samsung unconvincingly attempts to distinguish *Versa* and separate the portions of the specification relied on by Huawei. But Dr. Madisetti cannot narrow the claim language when the specification supports a broader interpretation, and binding precedent dictates the same. Paragraphs 76 and 77 will be struck.

F. Huawei's '892 Patent

The '892 patent, titled "Method and Apparatus of Transmitting a Random Access Preamble," reduces signal interference by cyclically shifting a RAP sequence with a particular "Zero Correlation Zone (ZCZ) length." '892 Patent at 9:28-12:24.

Claim 1 provides,

> A method of facilitating communication in a mobile communication system, the method comprising:
> selecting, by a user equipment (UE), a random access preamble from a set of random access preambles; and
>
> transmitting, by a UE, the selected random access preamble, wherein the set of random access preambles is provided with Zero Correlation Zones of length N CS-1, where NCS is a cyclic shift increment selected from a predefined **[**103]** set of cyclic shift increments, the pre-defined set including all of the following cyclic shift increments of 0, 13, 15, 18, 22, 26, 32, 38, 46, 59, 76, 93, 119, 167, 279, 419.

---

[28] In Reply, it also highlights dependent claim 8, which provides "[t]he method of claim 6, wherein n is a value from the group of values consisting of: one... ." '239 patent at 25:27-28.

Id. at 9:29-41.

1. Ncs in the Claims

Dr. Madisetti opines that "[t]he accused products do not select a cyclic shift increment 'from a pre-defined set of cyclic shift increments'" because "it is ***the base station*** that signals the cyclic shift increment to the UE in the *NCS* configuration value." Madisetti Report ¶ 127 (emphasis in original). According to Huawei, "the claim does not require the UE select NCS and can also cover the situation where the base station selects the NCS value and sends it to the UE." Huawei *Daubert* Mot. at 19. It seeks to strike paragraphs 116-121 of Dr. Madisetti's report. *Id.*

Samsung's and Dr. Madisetti's interpretation of the claims once again reads in a limitation not present in the claim language. The claims do not require that "[t]his selection of the NCS value connects back to the UE 'select[ing] a random access preamble.'"

Dr. Madissetti opines that "the accused products do not 'select[] ... a random access preamble'" because the mobile device receives certain parameters from the base **[**104]** station, including the cyclic shift NCS . Madisetti Report ¶ 116; *see also id.* ¶¶ 117-121. The portions of his opinions that depend on this overly narrow interpretation are struck (paragraph 116, second to last sentence; paragraph 127, last sentence; and any other portions).

2. "A set of Random Access Preambles"

[TEXT REDACTED BY THE COURT] Madisetti Report ¶ 122. Huawei argues that the plain and ordinary meaning of "'selecting ... a random access preamble from a set of random access preambles' does not require storing the set of random access preambles on the UE." Huawei Daubert Mot. at 19.

While I agree with Huawei, I am not certain that this provides a valid basis for striking the opinions in this instance. Dr. Madisetti is free to argue his perspective that the "set of random access preambles" is not stored anywhere, and Huawei can argue that the claims do not require the "set of random access preambles" to be stored anywhere.

G. Samsung's '825 Patent

The '825 patent provides a method for a user equipment to communicate with a base station (Node B) on a shared channel **[*977]** (SCH), which is a channel used by multiple UEs communicating with the same base station. '825 patent, Abstract; *id.* at 1:53-56 (Dkt. No. 140-1 at 47). **[**105]**

Claim 1 provides,

> A method for performing random access in a user equipment (UE) of a mobile communication system, the method comprising:
> receiving system information indicating a group of identification (ID)s;
> selecting an [sic] first ID from among the group of the IDs;
> transmitting a first uplink signal corresponding to the selected first ID for random access to a Node B;
>
> after the transmitting of the first uplink signal, <u>waiting for a predetermined delay duration without checking a downlink channel</u>;
>
> <u>after the waiting for the predetermined delay duration, checking the downlink channel during a valid period</u>;
> determining whether a downlink signal responding to the first uplink signal is received in the valid period, the downlink signal comprising a second ID and an UE-ID; and
> transmitting a second uplink signal using the UE-ID, if the downlink signal is received during the valid period and the second ID is equal to the first ID, wherein the valid period starts when the predetermined delay duration starting from transmission of the first uplink signal has terminated.

'825 patent at 11:39-62 (emphasis added to claim term).

Huawei contends that Dr. Valenti's infringement opinions depend on construing "without **[**106]** checking a downlink channel" as "without checking a downlink channel <u>for a specific message</u>[.]" Huawei *Daubert* Mot. at 20-21 (citing Valenti ¶¶ 470, 483 and Valenti Dep. at 85: 23-86:3; *id.* at 90:6-24). It insists that Valenti's infringement theories are based on the accused products not monitoring for a specific message, rather than not monitoring at all, and, therefore, seek to "broaden the scope of the claim by rewriting a negative claim limitation to disclaim only one specific example... ." Huawei *Daubert* Mot. at 21. Huawei also insists that this theory was not previously disclosed.

But Huawei acknowledges that Valenti's opinion only "implicitly construes" the claim language. Huawei's *Daubert* Mot. at 20; *see also id.* at 21 ("Dr. Valenti's implicit construction impermissibly broadens the scope of the asserted claims beyond to encompass UEs that check a downlink channel for only some, but not all, messages during the 'predetermined delay duration.'"). Because he does not explicitly opine on an improper claim construction, I see no basis for striking his opinions. Samsung may argue that the claim limitations are not satisfied because the UEs do not monitor for a particular message, and Huawei **[**107]** can counter that the claims do not require checking the downlink channel for any particular message.

H. Huawei's '726 Patent

The '726 patent relates to a technique for providing Voice over Internet Protocol (VoIP), where a person's voice is converted into small data packets that are transmitted over the network using persistent resource allocation. '726 patent at 1:38-42 (Dkt. No. 140-1 at 23).

Claims 11 and 13 require "associating a HARQ process with the calculated HARQ process ID... ." According to Huawei, the "associating" element must have meaning and "requires some affirmative act of deterministically relating the calculated value with a HARQ process." Huawei Daubert Mot. at 24-25. Huawei insists that Dr. Bambos's opinions "read[] out this claim element" and should be stricken. *Id.* at 23 (citing Bambos Report ¶¶ 837, 847, 855). **[*978]** Huawei's argument depends on construing "associating" in a particular way that is not explicitly required by the claim language. This portion of its motion is DENIED.

V. SAMSUNG'S MOTION FOR SUMMARY JUDGMENT

Samsung's motion for summary judgment attacks the validity and infringement of Huawei's '239 patent and '613 patent, and it seeks to preclude a prior art reference and a finding of inequitable conduct for its own '105 patent. ***[**108]*** *See generally* Samsung's MSJ (Dkt. No. 336[redacted]; Dkt. No. 333-2[under seal]). Huawei represents that it is not pursuing an inequitable conduct defense to Samsung's '105 patent, so that is no longer at issue in this case.

A. '239 Patent, Independent Claims 6 and 17, Dependent Claims 7 and 18

The '239 Patent, titled "Method and Apparatus for Allocating and Processing Sequences in Communication System," aims to reduce cell interference. *Id.* Its claims focus on interference between cells, and creating sub-groups of highly correlated sequences, thereby preventing these sequences from appearing in other sequence groups, resulting in low correlation and low interference between subgroups. '239 Patent. Huawei's expert, Dr. Venugopal V. Veeravalli, opined that the Accused Samsung Products infringe the '239 patent by "grouping sequences that have certain common mathematical characteristics" so as to "take[] into account the interferences between sequences of different lengths." Veeravalli Report ¶¶ 52, 78 (Mack Decl., Ex. B, Dkt. No. 333-9[under seal]). He also asserted infringement under the doctrine of equivalents.[29] *Id.* ¶ 254.

---

[29] Samsung has moved to strike assertions based on a DOE theory of infringement because Huawei did not disclose it in its Infringement Contentions. *See infra* section VII.E.

Huawei asserts claims 6, 7, 17, and 18 of the '239 patent. I previously discussed independent claims 6 and 17 in the context **[**109]** of Huawei's *Daubert* Motion. *See supra* section IV.E. As relevant here, they recite "obtain[ing] ... a group number k of a sequence group allocated by [a/the] system." '239 patent at 25:3-5, *id.* at 26:17-18. During claim construction, I construed "a group number k..." to mean "a group number k allocated by the system, where the group number k identifies a sequence group and where the value k is the same throughout the claim." Claim Construction Order at 7-9.

Claim 7 depends on independent claim 6 (method claims), and claim 18 depends on independent claim 17 (apparatus claims). Claim 7 provides, "[t]he method of claim 6, wherein the sequences correspond to at least one of: Zadoff-Chu sequences and Gauss sequences." '239 patent at 25:24-26; *see also* 26:34-36 ("The sequence processing apparatus of claim 17, wherein the sequences correspond to at least one of: Zadoff-Chu sequences and Gauss sequences.").

1. Ineligible Subject Matter Under *35 U.S.C. § 101*

With the benefit of discovery, Samsung repeats its argument from nearly two years ago that the claims are invalid because they claim ineligible subject matter.[30] Samsung's MSJ at 9-14. Under *Section 101 of the Patent Act*, "Whoever invents or discovers any new and useful **[*979]** process, machine, manufacture, or composition **[**110]** of matter, or any new and useful improvement thereof, may obtain a patent therefor... ." *35 U.S.C. § 101*. The Supreme Court "has long held that this provision contains an important implicit exception: Laws of nature, natural phenomena, and abstract ideas are not patentable." *Alice Corp. Pty. v. CLS Bank Int'l, 573 U.S. 208, 134 S. Ct. 2347, 2354, 82 L. Ed. 2d 296, 189 L. Ed. 2d 296 (2014)* (citing another source).

The *Alice* court applied the two-step framework articulated in *Mayo Collaborative Services v. Prometheus Laboratories, Inc., 566 U.S. 66, 132 S. Ct. 1289, 182 L. Ed. 2d 321 (2012)*, to determine whether claims are patent eligible. *134 S. Ct. at 2355*. The court first ascertains whether the claims are directed to a patent-ineligible concept, and if so, the court searches for an "inventive concept" to "transform the nature of the claim" into patent-eligible subject matter. *Id.*

In the Order Denying Samsung's MTD ("Prior Order) (Dkt. No. 103), I accepted Samsung's argument that the asserted claims of the '239 patent were directed to an abstract idea akin to allocating or sorting, but found that they provided the requisite inventive concept because they were tied to the concrete structure of mobile devices. *See id.* at 17-18. Samsung now reiterates that the claims are directed to "the abstract idea of creating groups of numeric sequences that are not highly correlated with each other[,]" Samsung's MSJ at 11, and it insists that the patent contains no inventive step. *Id.* at 12.

Samsung's analysis **[**111]** does not provide clear and convincing evidence that the patent claims ineligible subject matter. First, its "directed to" inquiry minimizes elements of the claims tying the claimed innovations to the telecommunications systems that it purports to improve on the grounds that those elements are "generic" and "high-level." Samsung MSJ at 13. But "whether a claim element or combination is well-understood, routine, and conventional ... falls under step two in the *§ 101* framework, in which we 'consider the elements of each claim both individually and as an ordered combination to determine whether the additional elements transform the nature of the claim into a patent eligible application.'" *Aatrix Software, Inc. v. Green Shades Software, Inc., 890 F.3d 1354, 1359 (Fed. Cir. 2018)* (internal quotation marks omitted). Next, the inquiry must look at the claim as a whole, not as isolated elements, and determine whether it is directed to a patent-ineligible concept, "it is not enough to merely identify a patent-ineligible concept underlying the claims[.]" *Rapid Litig. Mgmt. Ltd. v. CellzDirect, Inc., 827 F.3d 1042, 1050 (Fed. Cir. 2016)*.

---

[30] At the hearing on Samsung's motion to dismiss these patents because they claim ineligible subject matter, Huawei argued that the court should have experts explaining the technology and "that there could be an appropriate time" to decide the issue down the road. 10/26/16 Hr'g Tr. at 10-11 (Dkt. No. 96).

In Reply, Samsung cites the Prior Order as "holding" that the '239 patent is directed to an abstract idea under step one in an attempt to undermine Huawei's arguments. That was not the holding of the Prior Order. To the contrary, I "accept[ed]" Samsung's argument **[**112]** that the claims were directed to an abstract idea, in part because Huawei had offered no rebuttal, and proceeded to step two, where I concluded that "the claims contain[ed] enough of an inventive concept to be patent eligible, at least based on the allegations in the Complaint." Prior Order at 17-18. The Prior Order does not bind me to finding that the patent is directed to an abstract idea; it is Samsung's burden to prove that it is by clear and convincing evidence in order to move on to the second step.

But even if I accepted Samsung's assertion that the patent is directed to an abstract idea, the claims contain an inventive step. Samsung relies on inventor Bingy Qu's testimony that he did not invent the **[*980]** generation of reference signal sequences, Qu Dep. at 104:9-11, and Dr. Madisetti's opinion that all of the non-mathematical equation elements of the asserted claims are disclosed by the prior art, Madisetti Report ¶ 142. But Samsung missteps in removing the mathematical equation elements of the asserted claims. *See* *Diamond v. Diehr, 450 U.S. 175, 188, 101 S. Ct. 1048, 67 L. Ed. 2d 155 (1981)* ("It is inappropriate to dissect the claims into old and new elements and then to ignore the presence of the old elements in the analysis."). The *Diehr* court rejected **[**113]** petitioner's argument that *Parker v. Flook, 437 U.S. 584, 98 S. Ct. 2522, 57 L. Ed. 2d 451 (1978)* (which Samsung relies on here), mandated that a "mathematical algorithm must be assumed to be within the 'prior art'" and removed from the analysis in determining whether patent eligible subject matter is claimed. *450 U.S. at 189 n.12*. The *Diehr* court concluded, "when a claim containing a mathematical formula implements or applies that formula in a structure or process which, when considered as a whole, is performing a function which the patent laws were designed to protect (*e. g.*, transforming or reducing an article to a different state or thing), then the claim satisfies the requirements of *§ 101*." *Id. at 1059-60*.

Samsung does not address this misstep in reply. *See* Reply at 7-8 (discussing *Diehr* and *Flook*). Instead, it repeats the mistake. *See id.* at 8 ("As explained in the Motion, only a couple of limitations at the end of those claims are not related to the claimed mathematical formula."). But "[t]he mere fact that something is disclosed in a piece of prior art, for example, does not mean it was well-understood, routine, and conventional." *Berkheimer v. HP Inc., 881 F.3d 1360, 1369 (Fed. Cir. 2018)*.

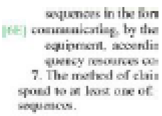
Huawei insists that the claims are directed towards an improvement to telecommunication networks. Samsung never addresses this point, but Huawei provides evidence **[**114]** in support of it. *E.g.*, Veeravelli Report ¶ 11 ("The '239 Patent allows UEs to transmit reference signals to the cell tower with reduced interference between the reference signals transmitted by different UEs connected to different cells. This reduced interference improves the cellular network by allowing the UEs to transmit reference signals that the base station is better able to distinguish as intended for it, as opposed to intended for nearby cells.") (Mack Decl. ISO Samsung's MSJ ¶ 4; *id.*, Ex. B, Dkt. No. 333-9). Samsung's analysis fails to address the claims as a whole and ignores the patent's disclosure of providing an improvement to telecommunication systems. *See* *Aatrix Software, Inc. v. Green Shades Software, Inc., 882 F.3d 1121, 1127 (Fed. Cir. 2018)* ("We have repeatedly held that inventions which are directed to improvements in the functioning and operation of the computer are patent eligible."). It has not met its burden to demonstrate that the patent claims ineligible subject matter.

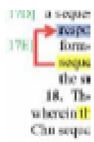
2. Invalidity Under *35 U.SC. § 112*

Samsung contends that the dependent claims' reference to "the sequences" is ambiguous because the claims recite more than one set of sequences and it is impossible to know "the sequences" claimed, rendering the dependent claims indefinite under *35 U.S.C. § 112*, ¶ 2. Samsung's MSJ at 4.

"[A] patent is invalid **[**115]** for indefiniteness if its claims [under *§ 112*, ¶ 2] read in light of the specification delineating the patent, and the prosecution history, fail to inform, with reasonable certainty, those skilled in the art about the scope of the invention." *Nautilus, Inc. v. Biosig Instruments, Inc., 572 U.S. 898, 134 S. Ct. 2120, 2124, 189 L. Ed. 2d 37 (2014)*. "Some modicum of uncertainty" is allowed, but "a patent must be precise enough to afford clear notice of what is claimed, thereby **[*981]** 'appris[ing] the public of what is still open to them.'" *Id. at 2128-29* (internal quotation marks omitted). "Otherwise there would be '[a] zone of uncertainty which enterprise and experimentation may enter only at the risk of infringement claims.'" *Id. at 2129*.

Samsung insists that such a "zone of uncertainty" exists here, given the independent claims' multiple references to "sequences." Samsung MSJ at 5. According to Samsung, "[t]he plain language of claim 6 therefore requires at least three claimed sequences: the selected sequences, the formed sequences, and the generated, corresponding sequences." *Id.* It emphasizes Dr. Veeravelli's admission that there are "three" sequences recited in the claim. *See* Veeravalli Rebuttal Report ¶ 94 (Mack Decl., Ex. D). But Huawei counters that a POSITA would understand that "the sequences" in the dependent claims refers back **[**116]** to the antecedent "corresponding sequences" in the independent claims. Huawei adds annotations and highlights to the claims to prove the point:





I agree with Huawei. The dependent claims use of "the sequences" refers back to the immediately preceding use of "the sequences" in the independent claims (elements 6E and 17E in the figures), which in turn refers back to the immediately preceding use of "corresponding sequences" in elements 6D and 17D. This conclusion is bolstered by the fact that the claims only use "the sequences" three times in each, once in the dependent claims, once in the last element of the independent claims (6E and 17E), and once in the second to last element (6D and 17D). *See Fin Control Sytems Pty, Ltd. v. OAM, Inc., 265 F.3d 1311, 1318 (Fed. Cir. 2001)* ("[T]he same terms appearing in different portions of the claims should be given the same meaning unless it is clear from the specification and prosecution history that the terms have different meanings at different portions of the claims."). And "the sequences" refers to the immediately preceding "generated, corresponding sequences" of Samsung's list.[31] The other references to sequences, which Samsung labels "selected sequences" and "formed sequences" do not use "the" to describe them, and are **[**117]** separated from "the sequences" by the "generated, corresponding sequences." Samsung has not demonstrated by clear and convincing evidence that the structure of the claims provides the "reasonable certainty" necessary for a POSITA to understand their scope. *See Nautilus, 134 S. Ct. at 2129*.

[*982] 3. Noninfringement

a. The Sequences of the Dependent Claims

Samsung argues that even if the claims are not indefinite because their reference to "the sequences" is ambiguous, it is entitled to summary judgment of noninfringement because "Huawei and its expert have not advanced any evidence that the alleged 'corresponding' sequences in the accused products 'correspond to at least one of: Zadoff-Chu sequences and Gauss sequences,' as required by asserted claims 7 and 18." Samsung MSJ at 8.

But, as explained above in the discussion on Huawei's *Daubert* motion, *see* section IV.E, Samsung's argument depends on its misunderstanding that "the sequences" of the dependent claims *are actually* Zadoff-Chu sequences. *See id.* at 9 ("This extension is critical because Huawei's expert has provided ***no evidence*** that these extended sequences—which correspond to the claimed 'corresponding' sequences that are then 'communicated' according to the claims—are themselves Zadoff-Chu **[**118]** sequences as required by asserted claims 7 and 18 (assuming the Court chooses to resolve the inherent ambiguity noted above)."). Huawei does not offer evidence that "the

---

[31] In Reply, Samsung focuses on the reference to "the sequences" in 6D and 17D, which Huawei ignores, to argue that "[t]his is just the type of confusion that shows indefiniteness inherent in the asserted claims." Reply at 3. But "the sequences" in 6D and 17D describe the "generated, corresponding sequences." In other words, the reference does not detract from Huawei's interpretation.

sequences" are actually ZC sequences because nothing in the claims or specification dictates this limitation. Samsung's interpretation reads out the "correspond to" language of the claim, or at least narrowly interprets it to require equivalence as opposed to some other relationship, and must be rejected.

Huawei has at least offered disputed evidence that "the sequences" of the dependent claims "correspond to" Zadoff-Chu sequences. *See* Veeravalli Report ¶ 240 (explaining how the "reference signal sequence" is "defined by a cyclic shift..."). Samsung's motion on this point is DENIED.

b. Group number k

Samsung also argues that it is entitled to a judgment of noninfringement because Dr. Veeravalli admitted that he used the value "u" for the claimed "group number k" in the "obtaining" step and "u +1" for the "basic sequence ri" limitation, in contravention of the court's construction of the term "group number k," which dictates that the "value k is the same throughout the claim." Samsung's MSJ at 3. Huawei counters that it and its expert have **[**119]** "consistently mapped the value 'u +1' in the LTE standard to the claimed 'group number k.'" Opp'n at 2; *see* HW 239 Inf. Cont. at 5 ("The following terms in the claim are met as indicated by the LTE standard: . . . 'Group number k of a sequence group' = u+1.")(Szczepanik Decl., Ex. 1); Veeravelli Report ¶ 253 ("In the LTE standard, the 'group number k of a sequence group' is 'u+1,' where u is determined as explained in the previous paragraph. The processing required by the LTE standard uses the same value of k, that is 'u+1,' throughout the processing that corresponds to this claim."); Veeravalli Dep. at 136:10-14 (testifying that he only provided analysis where k equals u plus 1).

Huawei contends that Samsung's argument is based on its misreading of paragraph 252 of the Veeravalli report, which explains how the Samsung products "obtain" a value for "u." Opp'n at 2-3; *see* Veeravalli Report ¶ 252 ("The Infringing Samsung Products perform steps required by the LTE standard to obtain a value for 'u,' which is allocated by the system... .") (citing the LTE standard to explain how "u" is allocated by the system). Huawei's opposition is careful to repeatedly use the word "acquire," as opposed **[**120]** to "obtain," even though Veeravalli used "obtain" in his report. This exposes the source of the confusion—the claims explicitly require "obtain[ing] ... a group number k... ." Samsung **[*983]** seizes on Veeravalli's use of "obtain" in connection with "u" to urge that Huawei's infringement analysis depends on using both "u" and "u + 1" for "a group number k." But this result is unnecessary.

Dr. Veeravalli never asserts that the value "u" represents the claimed "group number k." As discussed above in the discussion on Huawei's *Daubert* motion, *see supra* section IV.E, the plain and ordinary meaning of "obtain" will not be limited to "receive"; rather, "obtain" may mean "calculate" in the context of these claims. But this does not entirely settle the issue. The claim construction dictates "a group number k allocated by the system, where the group number k identifies a sequence group and where the value k is the same throughout the claim." Claim Construction Order at 7-9. Samsung's *real* issue centers around the "allocated by the system" limitation. Dr. Veeravalli opined that the value "u" is "allocated by the system," which explains Samsung's attempt to assign "u" to "a group number k." *See* Reply **[**121]** at 1 ("Because the only values 'allocated' by the system cited by Dr. Veeravalli are the values used to compute the 'sequence-group number u,' the value 'u' must be the claimed 'group number k' that is obtained by the UE.").

What Samsung should have argued in its motion, but only developed in reply, is that Huawei has not offered evidence that "a group number k" is "allocated by the system," and therefore has not demonstrated disputed facts that the claim limitations are met by the accused products. *See* Reply at 2 ("Huawei presents no evidence that 'u +1' is a value 'allocated by the system' that the UE obtains.") (citing Veeravalli Report). Samsung insists that Huawei cannot present such evidence. *See, e.g.*, Marisetti Report ¶ 18 ("The UE never 'obtains' the value 'u+1' at any point in time when generating reference signals; nor is the value 'u+1' ever 'allocated' by the system, as required by the Court's construction.").

As with the "obtaining" limitation, Huawei contends that "allocated by the system" does not prohibit receiving precursors to the group number k from the system (i.e., the value "u"), and subsequently calculating the group number k ("u+1") from the precursor. It cites **[**122]** to the dictionary definition of "allocate" (which the parties apparently agree on) to support its position. Dictionary Definition of "allocate" (Mack Decl. ISO Samsung's Opp'n to Huawei's Daubert Mot. ¶ 5; *id.*, Ex. D, Dkt. No. 356-1)("to set apart for a particular purpose; assign or allot"). I agree with Huawei that "allocated" should not be limited to "receiving" in the same way that "obtaining" is not limited to "receiving." *See supra* discussion IV.E. In other words, Huawei can prove infringement by showing that the "group number k" is allocated by the system because "u" is sent by the system, a necessary prerequisite to "allocating" "u+1." As Huawei put it during the hearing, Samsung concedes that "u" is "allocated by the system," but insists that "u+1" is not allocated. I cannot say, that "no reasonable jury could determine two elements to be equivalent[.]" Warner-Jenkinson Co. v. Hilton Davis Chem. Co., 520 U.S. 17, 39 n.8, 117 S. Ct. 1040, 137 L. Ed. 2d 146 (1997).

To answer Samsung's charge that Huawei's DOE theory was not adequately disclosed, Huawei contends that Dr. Veeravalli's DOE opinion was provided in response to Samsung's "cryptic" disclosure on the last day of discovery that "Huawei impermissibly redefines the group number 'k' to be 'u+1' in the standard—but of course 'u+1 **[**123]** is not the group number." Samsung March 9, 2018 Suppl. Resps. To Huawei Interrog. at 243 (Yang Decl., Ex. 3). That interrogatory response never disclosed Samsung's current assertion that **[*984]** "obtaining" cannot include calculating. Since the claim language will not be interpreted to limit "obtaining" to "receiving," *see supra* section IV.E, I question whether the DOE theory remains relevant. But, as discussed below, I am not striking these paragraphs as untimely. *See infra* section VII.E.

Samsung also argues that the DOE theory fails on the merits. Dr. Veeravalli opined that the accused products infringe under the DOE because the "differences between using 'u' or 'u+1' for the group number k are insubstantial" because "the group number k corresponds to 'u+1." Veeravalli Report ¶ 254. But Samsung counters that the difference between the value "u" and the value "u+1" is substantial because "[u]sing the value 'u' as the group number (as required by the LTE standard) would result in a functioning UE that will be able to communicate with the base stated (or eNB)[,]" whereas "[u]sing 'u+1' as the group number (as suggested by Dr. Veeravalli) would result in an invalid uplink reference signal and **[**124]** incoherent signal demodulation at the base station." Madisetti Report ¶ 19; *see also id.* ¶¶ 15-19. The parties have presented competing experts opining whether DOE provides a valid theory of infringement. Viewing the evidence in the light most favorable to Huawei, I cannot rule as a matter of law that there is a substantial difference between the value "u" and the value "u+1"—that will be up to the jury to decide.

B. Noninfringement of '613 Patent claims 1 and 5

Claim 1 of the '613 patent requires "receiving, by a user equipment (UE), a service by a base station... ." '613 patent at 18:25-26; *see also id.*, claim 5 at 18:61 - 62 ("receive a service sent by a base station"). Huawei's expert, Dr. Robert Akl, opined that Samsung's accused devices meet this limitation, and "[t]he service is, for example, the eMBMS service."[32] Akl Report ¶ 77 (Mack Ex., Ex. I, Dkt. No. 333-21[under seal]). But Samsung contends that the accused devices [TEXT REDACTED BY THE COURT] Samsung MSJ at 15 (citing experts Kim, Song, and Nam).

In response, Huawei highlights evidence that "Samsung witnesses deposed in this matter [TEXT REDACTED BY THE COURT] Akl Decl. ¶ 4a; *see* Song Dep. at 8:2-4, 21:10-22:2 (testifying that "[TEXT REDACTED BY THE COURT]); Kim Dep. at **[**125]** 21:24-22:7 ("With regards to eMBMS service, I know just approximately what that is, and [TEXT REDACTED BY THE COURT]."). According to Huawei, "[v]erifying the feature by testing in the actual network requires receiving a service sent by a base station." Akl Decl. ¶ 4a; *see also* Song Dep. at 35:25-36:4 ("[TEXT REDACTED BY THE COURT]"); *id.* at 36:5-13 (testifying that [TEXT REDACTED BY THE COURT]).

Huawei also highlights testing documents from official testing organizations certifying that [TEXT REDACTED BY THE COURT]. *See* Akl Decl. ¶ 4c. Samsung attacks this evidence because the test results [TEXT REDACTED BY THE COURT] Reply at 9; *see id.* at 10 ("These test results [TEXT REDACTED BY THE COURT] "receiving, by a user equipment (UE), a service sent by a base station, the service being sent in one or more subframes that are designated as specific subframes, the specific subframes being selected from one or more radio frames that are

[32] eMBMS is Evolved Multimedia Broadcast Multicast Service. Akl Report ¶ 68.

designated as specific radio frames, the specific radio frames being selected from a time unit."). Samsung challenges Huawei's other evidence on various grounds, but none of them expunge the evidence relied on by Huawei. Huawei's evidence demonstrates a disputed fact **[**126]** of whether the accused devices receive the eMBMS service.

Huawei also points out, with respect to apparatus claim 5, that the user equipment need only be "configured to receive a service **[*985]** sent by a base station." Samsung counters that the devices require middleware and user applications to meet this claim element. According to Samsung, Huawei has not offered any evidence that the accused products [TEXT REDACTED BY THE COURT] "it just assumes that these requirements are present to perform testing." Reply at 12. But, as discussed above, the evidence is sufficient to demonstrate a genuine issue as to whether the accused products are configured to receive the service. *See* *Texas Advanced Optoelectronic Sols., Inc. v. Renesas Elecs. Am., Inc., 895 F.3d 1304, 1327 (Fed. Cir. 2018)*("Although infringement of the apparatus claims requires that Intersil's products have the ability to perform in Mode 3, infringement does not require actual use of Intersil's products in Mode 3."); *Carucel Invs., L.P. v. Novatel Wireless, Inc., Case No.: 16-cv-118-H-KSC, 2017 U.S. Dist. LEXIS 222002, 2017 WL 1394068, at *4 (S.D. Cal. Mar. 2, 2017)* (denying motion for summary judgment of noninfringement of claims with "configured to" language, based in part on evidence that "designing and testing was undertaken to ensure that the accused products" could satisfy the claim element).

C. The '105 Patent

1. Prior Art

Huawei **[**127]** and its expert, Dr. Mark Mahon, rely on an "earlier internal draft of 3GPP submission R1-050245" by Motorola ("the Motorola Draft") to argue that Samsung's '105 patent is invalidated by prior art.

To invalidate a patent based on prior art under *35 U.S.C. § 102(g)*(pre-AIA), "on a motion for summary judgment, a challenger of a patent must prove by clear and convincing evidence that the invention was made in this country by another inventor." *Fox Grp., Inc. v. Cree, Inc., 700 F.3d 1300, 1304 (Fed. Cir. 2012)* (internal quotation marks omitted). "Then, the burden shifts to the patentee to produce evidence sufficient to create a genuine issue of material fact as to whether the prior inventor has suppressed or concealed the invention." *Id.* (internal quotation marks omitted). "Finally, the burden shifts again to the challenger who must rebut any alleged suppression or concealment with clear and convincing evidence to the contrary." *Id.* (internal quotation marks omitted).

"A challenger ... has two ways to prove that it was the prior inventor: (1) it reduced its invention to practice first ... or (2) it was the first party to conceive of the invention and then exercised reasonable diligence in reducing that invention to practice." *Id.* (quoting another source)(alterations omitted). Dr. Mahon relies **[**128]** on the Motorola Draft as evidence of prior conception by Motorola, and he relies on the filing of U.S. Provisional Patent App. No. 60/759,683 ("the '683 Provisional") by Motorola as evidence of alleged reduction to practice. Mahon Invalidity Report at 46-51 (Ex. R).

Samsung argues that Huawei's evidence of reduction to practice fails as a matter of law because the '683 Provisional was abandoned, by statute, 12 months after it was filed.[33] *See* *35 U.S.C. § 111(b)(5)*. "It has long been settled, and we continue to approve the rule, that an abandoned application, with which no subsequent application was copending, cannot be considered a constructive reduction to practice." *In re Costello, 717 F.2d 1346, 1350 (Fed. Cir. 1983)*. In response, however, Huawei does not rely on the '683 Provisional.

Instead, it cites to evidence of Motorola's computer simulations as proof of reduction to practice of the Motorola Draft. *See* Mahon Decl. ¶¶ 5-7; *see also* Ghosh **[*986]** Dep. at 54:2-56:2, 74:22-75:7 (Szczepanik Decl., Ex. 11); Motorola Draft R1-050245 at 9-10 (Szczepanik Decl., Ex. 12). Dr. Ghosh, the creator of the Motorola Draft, testified

---

[33] Samsung does not contest Motorola's conception of the Motorola Draft.

that his team at Motorola "ran simulations using the software for each of the three options, OFDM, DFTS[-]OFDM, and IFDMA prior to giving this **[**129]** presentation [R1-050245]." Szczepanik Decl. Ex. 11, Ghosh Dep. 55:18-24. The simulations "show[ed] the bit error rate versus SNR for all these modulations and also these PAPR cubic metric comparison[s]" and "entail[ed] replicating these block diagrams [illustrated in Motorola Draft R1-050245], the transmitter and also the receiver, and running random bits through the simulation and through the channel to see what is the link performance." *Id.* at 54:19-21, 55:6-9. The simulations were custom-designed by Motorola engineers and used the computer languages C, C++, and MATLAB. *Id.* at 55:10-17. The results of these simulations were illustrated in the bar charts in Motorola Draft R1-050245. Szczepanik Decl. Ex. 11, Ghosh Dep. 55:25-56:2; Ex. 12, Motorola Draft R1-050245 at 9-10. Ghosh testified that it was Motorola's practice to "prove" the idea before submitting a patent application. Ghosh Dep. at 74:22-75:7.

Courts have found computer simulation sufficient evidence of reduction to practice. *Mosaid Techs. Inc. v. Samsung Elecs. Co., 362 F. Supp. 2d 526, 547-48 (D.N.J. 2005)* ("But surely, in this technologically advanced society of ours, there are areas of science where a successfully run simulation represents the end of the inventive process and the construction of the **[**130]** physical embodiment is but a matter of mere routine and mechanical application. In that case, and only in that case, it seems appropriate that a simulation should be a valid reduction to practice."). In reply, Samsung emphasizes that this computer simulation theory is new and was not disclosed in Huawei's invalidity contentions or expert reports. Reply at 13; *see* Exhibit C-9 to Huawei's First Supplemental Invalidity Contentions (Ex. D); Mahon Rebuttal Report ¶¶ 111-16 (Dkt. No. 333-38). It underscores Mahon's deposition testimony that he cited to the '683 Provisional to show reduction to practice. Mahon Dep. at 198:7-10 (Ex. E). But it omits the portion when he testified that he is "relying on the testimony of Dr. Ghosh as cited previously towards the development of that technology and the submission of the provisional application." *Id.* at 199:10-18.

Huawei has provided sufficient evidence that the Motorola Draft R1-050245 was adequately reduced to practice and constitutes prior art.

2. Inequitable Conduct

In response to Samsung's motion, Huawei acknowledges that "the record facts do not support a pleading of inequitable conduct defense with the required particularity." It states that **[**131]** it will not be proceeding with this defense on the '105 patent. Accordingly, Samsung is entitled to judgment that the '105 patent is not invalid based on its inequitable conduct.

VI. SAMSUNG'S MOTION TO PARTIALLY EXCLUDE HUAWEI'S EXPERTS

Samsung moves to partially exclude the reports and testimony of Jorge Padilla, Michael J. Lasinki, and Charles Jackson, on the grounds that they use unreliable methodologies and offer opinions beyond their qualifications. Samsung's Mot. to Exclude (Dkt. No. 335[redacted]; Dkt. No. 331-2[under seal]). Samsung also moves to strike certain rebuttal opinions offered by Jacques deLisle and Zhi Ding because they offer improper expert rebuttal testimony under *Federal Rule of Civil Procedure 26(a)(2)(D)(ii)*. *Id.*

[*987] A. Whether Portions of Lasinski's Report Are Unreliable

1. Exclusion of [TEXT REDACTED BY THE COURT] Agreement from Comparable License Analysis

Samsung argues that Lasinski's opinions are unreliable because he unjustifiably excludes [TEXT REDACTED BY THE COURT]" (Stake Decl. ¶ 20, *id.*, Ex. 19; Dkt. No. 331-37[under seal])("[TEXT REDACTED BY THE COURT] Agreement") from his comparable license analysis. Mot. at 5.

The parties do not dispute that the [TEXT REDACTED BY THE COURT] Agreement does not explicitly address rights to **[**132]** non-SEPs. It defines Licensed Essential Patents as "any and all Essential Patents" that a party owns or controls. Ex. 19, § 1.1. [TEXT REDACTED BY THE COURT] acquires rights to Huawei's Licensed Essential Patents in Section 2.1 and Huawei acquired rights to [TEXT REDACTED BY THE COURT] Licensed Essential Patents in Section 3.1. *Id.*, §§ 2.1, 3.1.1 Section 3.4 entitled "No Other Rights; Complete License" provides that "All rights not expressly granted by [TEXT REDACTED BY THE COURT] hereunder are reserved by [TEXT REDACTED BY THE COURT]" and Section 2.4 contains a corresponding provision for Huawei. *Id.*, §§ 2.4, 3.4. The agreement also contains a merger clause, Section 12.1 entitled "Entire Agreement," which provides that the agreement "sets forth the entire understanding of the Parties with respect to the subject matter hereof, and replaces any prior oral or written communications, discussions or agreements between them with respect to such subject matter." *Id.*, § 12.1. Section 12.4, entitled "Amendment and Waiver" provides that the agreement "cannot be modified, terminated or amended in any respect orally or by conduct of the Parties. . . ." *Id.*, § 12.4. The agreement also contains a choice of law provision, stating that the agreement is to be governed by New York law. *Id.* at § 11.1.

Despite **[**133]** the undisputed fact that the face of the [TEXT REDACTED BY THE COURT] Agreement is limited to the parties' SEP portfolios, Lasinski elected not to include it (along with other agreements) in his comparable license analysis. He explained that he chose not to include the [TEXT REDACTED BY THE COURT] Agreement because, "in addition to obtaining cash consideration and a cross-license to [TEXT REDACTED BY THE COURT] ... I understand that Huawei believed it would achieve — as it has — general patent peace from [TEXT REDACTED BY THE COURT] commitment." Lasinski Report ¶ 28 (Stake Decl. ¶ 2, *id.*, Ex. 1; Dkt. No. 331-6[under seal]). He noted that "[t]he inclusion of even modest value attributable to patent peace in the analysis of this agreement would result in a one-way effective rate received by Huawei for its 4G SEPs that is significantly higher when compared to the other indicators." *Id.* And that it was therefore inappropriate to include the [TEXT REDACTED BY THE COURT] Agreement in his analysis of the FRAND dispute in this case. *Id.*

Samsung challenges the reliability of Lasinski's opinions since the purported basis for excluding the [TEXT REDACTED BY THE COURT] Agreement from his analysis **[**134]** is not included anywhere within the four corners of the agreement. Even Lasinski acknowledged that the expectation of patent peace is not included within the four corners of the agreement. Lasinski Dep. at 201:2-13 (Stake Decl., Ex. 7). According to Samsung, because the terms of the agreement are unambiguous and the contract contains a merger clause, New York law forbids courts from considering extrinsic evidence. *See Schron v. Troutman Sanders LLP, 20 N.Y.3d 430, 436, 986 N.E.2d 430, 963 N.Y.S.2d 613 (2013)* ("Parol evidence—evidence outside the four corners of the document—is admissible only if a court finds an ambiguity in the contract. As a general rule, extrinsic evidence is inadmissible to alter or add a provision to a written agreement."). It therefore concludes that Lasinski's opinions are unreliable and should be stricken.

[*988] Huawei points out that Samsung does not challenge Lasinski's opinion that the agreement would be incomparable if it did include patent peace; rather, it criticizes Lasinski's basis for asserting the agreement included an expectation of patent peace. But Huawei provides evidence supporting the reliability of Lasinski's conclusion that the [TEXT REDACTED BY THE COURT] relationship included general "patent peace" in addition to the SEP licensing component. **[**135]** *See* Opp'n at 5 (citing deposition and other testimony of Huawei's lead negotiator Mr. Xuxin Cheng, deposition testimony of Ms. Nanfen Yu, one of Huawei's 30(b)(6) witnesses, and the fact that [TEXT REDACTED BY THE COURT] has not litigated its non-SEPs against Huawei in light of [TEXT REDACTED BY THE COURT]).[34] Huawei also underscores that Lasinski's reliance on this sort of information is within the scope of what other qualified experts typically consider under these circumstances. It specifically cites the testimony of Samsung's own licensing witnesses that many factors, including the relationship between the parties, may influence the ultimate decision of what constitutes FRAND for SEPs in any given case, even though those factors may not be

[34] The parties bicker over the inferences to be drawn from Ms. Yu's testimony. *See* Opp'n at 5; Reply at 4. Samsung insists that Ms. Yu admitted that the agreement omits any reference to patent peace because the parties were unable to agree on the "scope and mechanism to include nonessential patents." Yu Dep. at 91:25-92:5 (Stake Decl., Ex. 20). But the disagreement is irrelevant to whether portions of Lasinski's opinions should be stricken.

apparent on the face of an agreement. Chang Dep. at 169-170 (Peterson Decl., Ex. 3; Dkt. No. 347-14[under seal]); Hong Dep. at 83-85, 167-170 (Peterson Decl., Ex. 4; Dkt. No. 347-14[under seal]).

In analyzing the propriety of expert witness testimony and reports, district courts are to act as "gatekeeper[s], not fact finder[s]." *Sandoval-Mendoza, 472 F.3d at 655*. "[A]n expert may be allowed to state an opinion on the actual matter in controversy where the opinion clearly identifies **[**136]** what is *assumed* versus what is opinion." *Biotechnology Value Fund, L.P. v. Celera Corp., No. C 13-03248 WHA, 2015 U.S. Dist. LEXIS 3914, 2015 WL 138168, at *3 (N.D. Cal. Jan. 9, 2015)*. Samsung is not challenging Lasinski's opinions because they are based on an unreliable methodology; rather, it contends that his analysis is unreliable because it includes a faulty assumption. "Shaky but admissible evidence is to be attacked by cross examination, contrary evidence, and attention to the burden of proof, not exclusion." *Primiano v. Cook, 598 F.3d 558, 564 (9th Cir. 2010)*.

Lasinski explained the reasons for excluding the [TEXT REDACTED BY THE COURT], as well as other agreements, from his analysis of a comparable licensing rate. And Huawei has provided substantial evidence supporting the reasonableness of Lasinski's assumption. I see no basis to strike any portion of Lasinski's report on this ground; Samsung can attack this assumption through cross-examination. *See, e.g.*, *Interwoven, Inc. v. Vertical Computer Sys., No. CV 10-04645 RS, 2013 U.S. Dist. LEXIS 100790, 2013 WL 3786633, at *11 (N.D. Cal. July 18, 2013)* ("Any concern as to the degree of comparability between an existing and hypothetical license may be addressed through cross-examination.").

2. Portfolio Strength Indicators

Samsung also challenges Lasinski's opinions assessing the strength of the parties' portfolios, calculating appropriate FRAND rates **[**137]** (and ultimately determining whether the parties' offers were FRAND) because the two indicators he used—the number of "Global Deemed SEP Families" and "the number of submissions made by each SEP holder to 3GPP that were adopted into the standard," which Lasinski labels "Approved Contributions." Lasinski **[*989]** Report ¶¶ 21, 23; *see also id.* ¶¶ 82-92; *id.*, Ex. D.

a. Approved Contributions

Samsung attacks Lasinski use of this indicator because (1) he does not offer empirical or quantitative analyses linking Approved Contributions to the economic value of a company's SEP portfolio, (2) it is inappropriate (and redundant) to consider this sort of "proxy" data when actual data on the underling patents is available via Jackson's Essentiality Database, (3) it is self-serving because Huawei is an active participant in the standard setting process, and (4) Huawei's own expert, Dr. Padilla, testified that "we don't know how strong the correlation is" between Approved Contributions and portfolio value. Padilla Dep. at 35:1-36:13.

Huawei counters with evidence that use of the Approved Contributions indicator is reliable. It cites academic literature and empirical analysis to support its contention that there **[**138]** is "a strong logical and intuitive connection between the number of a firm's technical contributions approved for incorporation into a standard and its number of SEPs[.]" Opp'n at 18 (citing Exs. 17, 18, and 19).[35] It also underscores the generally accepted practice that many industry firms—including Samsung—have used Approved Contributions to assess portfolio strength in licensing negotiations. Lasinski Report ¶¶ 89-90.

Samsung's arguments are unconvincing. Lasinski accounts for expired patents and uses a weighted calculation to combine deemed essential patent counts with Approved Contributions, so a firm with a robust SEP portfolio but no contributions would still be assigned a significant patent value. *See* Opp'n at 19-20. Further, the use of the indicator is not duplicative of the database because the deemed essential patents are extrapolations given the number of

---

[35] But Samsung responds that Lasinski did not cite these studies in his report.

patents involved, and the indicator simply provides another factor to consider in analyzing the portfolio strength, which yields more reliable results. And Huawei responds with a fuller recitation of Padilla's deposition testimony:

> Q. And can SEP contributions be used as a proxy for value of a patent portfolio?
>
> A. I think as **[**139]** a profession, as economists, we are struggling to understand or to develop good proxies for value. We have over the years developed some measures, forward citations with — this case is one of them. There is some unsatisfaction about the usefulness of forward citations or patent counting and so we are all looking for different ways in which we could proximate the value. Contributions is one of the notions that has been put forward, and, you know, it has has [sic] its pros and its cons and its problems as well.
> And people are trying to come with new ideas as to how to proxy value, because it's a difficult exercise, and so, you know, I think that my view on contributions is set out in my report, is just one additional proxy that you may want to consider. And my view at this stage is that since there is no perfect proxy, all of these are useful and potentially informative, but all of them should be taken with a pinch of salt.

Padilla Dep. at 34:4-23 (Peterson Decl., Ex. 9; Dkt. No. 347-13[redacted], Dkt. No. 347-14[under seal]). In his Rebuttal Expert Report, he explains that "in certain cases contributions may not be directly tied to SEPs," but "contribution counting has been considered **[**140]** by several authors and companies to be a useful tool to assess the relative strength of patent portfolios—particular as between companies that are active in the SSO—because companies typically file patents based on inventions related **[*990]** to their contributions and as such, it may be closely tied to the value of the portfolio." 5/25/18 Padilla Report ¶ 4.2(c) (Stake Decl., Ex. 3; Dkt. No. 331-10[under seal]); *see also* ¶ 4.5 ("[R]esearch has shown that several of these different approaches can be used simultaneously and in combination to more effectively measure patent value. I understand Mr. Lasinksi has done so in his opening report by combining the essentiality study of Dr. Jackson with the contributions data.")(footnote omitted).

Samsung cites *TCL v. Ericsson* to support its view that Lasinski's reliance on the Approved Contributions indicator is unreliable. In *TCL*, the court noted "two major flaws with contribution counting"—" the absence of any evidence that it corresponds to actual intellectual property rights, and its inability to account for transferred or expired patents." *2017 U.S. Dist. LEXIS 214003, 2017 WL 6611635, at *41 (C.D. Cal. Dec. 21, 2017)*. But Huawei underscores that Lasinski addressed each of these "flaws" in his report: his blended index produces **[**141]** results consistent with the parties' historical license agreements, Lasinski Report ¶¶ 88-91, the effect of transfers are accounted for in Jackson's database, and Lasinski explicitly accounts for expirations, *id.* ¶ 91 n.213.

Samsung has not established that Lasinksi's use of the Approved Contributions indicator is so unreliable that his report should be excluded. He should have cited the studies cited by Padilla in his Rebuttal Report, ¶ 4.5 n.22 and Huawei in opposition, Opp'n at 18-19, but this oversight, and the absence of a published, peer-reviewed study supporting Lasinski's specific approach do not dictate that his findings are unreliable.

b. "Global Deemed SEPs"

The second portfolio strength indicator relied upon by Mr. Lasinski is the "number of SEP families with at least one issued member in the [United States], Europe, and China deemed to be actually essential in a recent patent census and essentiality study conducted by Dr. Charles Jackson." Lasinski Report ¶ 21. Samsung attacks this litigation-motivated indicator largely on grounds that it is "obviously biased... ." Mot. at 20.

But Lasinski explained that additional information could be gleaned by looking at the number of patent **[**142]** families in the portfolio with active members in the United States, Europe, and China because most of a portfolio's value is driven by a relatively small number of inventions and one way to identify the most valuable inventions is to ascertain the ones for which the inventor has sought patent protection in multiple jurisdictions. Lasinski Report ¶ 86. Huawei points out that Samsung's own expert, Dr. Leonard, recognizes these points. *See* Leonard Report ¶188 (noting that "[t]he top 10 percent of patents ... make up approximately 65 percent of total value" and "[t]he next 10 percent of patents ... make up approximately 14.6 percent of the value"); *id.* ¶ 180 ("Large, multinational companies have a strong incentive to file for patents in multiple jurisdictions, particularly in the US, given the strong intellectual property protection and large market share."); *id.* ¶ 180 n.233 ("For example, it has been found that patents applied in both EP and USPTO or at the USPTO alone are more valuable that those applied in EP alone."); *id.* ¶ 180 ("Additionally, filing patents in multiple jurisdictions involves additional costs and risk of rejections; it therefore makes economic sense for the patent **[**143]** owner to apply in multiple jurisdictions only for its more valuable patents.").

Moreover, Lasinski used "Global Deemed SEPs" as an indicator of relative portfolio value, so it is not true, as Samsung asserted, that "Lasinski's proposed 'value indicator considers worthless any **[*991]** patents without corresponding family members in the U.S., Europe, and China." Mot. at 19. As Lasinski explained,

> [I]t is important to bear in mind that I have used Global Deemed SEP Families as an indicator of *relative* portfolio value. Such an application does not require the conclusion that all other declared and/or deemed SEPs have no value whatsoever, but simply that a company's share of Global Deemed SEP Families is more indicative of its relative portfolio strength when assessing a global license than its share of declared SEP families and/or deemed SEP families with issued members in any one jurisdiction anywhere in the world would be.

Lasinski Report ¶ 87. And he expounded on the basis for choosing these three jurisdictions (U.S., Europe, and China). *Id.* ¶ 83, Figure 32. This figure shows that these three jurisdictions represent the majority of handset revenue between 2011 and 2016 for [TEXT REDACTED BY THE **[**144]** COURT] and over 80 percent for Huawei.[36] *Id.* While Samsung claims that including China is biased in Huawei's favor because it has "many Chinese patents as a Chinese company[,]" the multi-jurisdictional approach reduces this advantage. Huawei also highlights that both parties (like the majority of the industry) manufacture a substantial portion of their smartphones in China, Lasinski Report ¶ 84, Leonard Report, Ex. 6a (" [TEXT REDACTED BY THE COURT])(Dkt. No. 331-20[under seal]).

Samsung's challenges to Lasinski's inclusion of these two indicators are best suited for cross-examination and through introduction of its own experts' divergent methodology. Its arguments do not justify striking the opinions.

B. Whether Lasinski and Padilla Have Inappropriately Opined on French Law

Both parties agree that French law governs the ETSI IPR Policy, and each side has submitted reports from French law experts and taken the respective depositions. Samsung attacks certain portions of the reports of Lasinski and Padilla because they reference the meaning of a "FRAND" commitment, and provide a subjective analysis of whether each party has complied with its FRAND obligations. Mot. at 8-9; *see* Lasinski Report **[**145]** ¶¶ 68-76 (Stake Decl., Ex. 1; Dkt. No. 331-6[under seal]); Padilla Report ¶¶ 1.13, 3.20-3.38, 6.8 (Stake Decl., Ex. 2; Dkt. No. 331-8[under seal]). But Huawei points out that Lasinski merely states his general understanding of the terms "reasonable" and "non-discriminatory," Lasinski Report ¶¶ 69-75, and it contends that Lasinski's understanding of the meaning of the terms aligns with the understanding of Samsung's own experts. *Compare* Lasinski Report ¶¶ 70, 75, *with* Leonard Report ¶ 30 and ¶ 7.[37] Moreover, Lasinski explains the basis for his understanding of the terms "reasonableness" and "non-discriminatory," including references to court opinions, policymakers, and academics. Lasinski Report ¶¶ 68-72; *id.* ¶¶ 75-76.

Samsung also takes issue with portions of Lasinski's and Padilla's reports that recite the parties' negotiation history. Mot. at 9. Both experts admitted that they had no personal knowledge of the history, but based their opinions on information relayed to them by others. Huawei counters that the details are largely undisputed, and Samsung's own experts likewise include **[*992]** similar chronologies in their reports. It also acknowledges that Dr. Padilla's report

---

[36] Samsung [TEXT REDACTED BY THE COURT] Reply at 14 (citing Lasinski Report, Figure 32).

[37] It further contends that Samsung's French law expert admits that French law does not define these terms, but the cited testimony does not reference the terms at all. Samsung pointed out this omission in reply, but did not offer affirmative evidence that French law does in fact define these terms.

includes his conclusion **[**146]** that Samsung's conduct is consistent with patent hold-out and with it being an unwilling licensee and licensor, whereas Huawei's conduct is not consistent with patent hold-up (as Samsung's experts claim), and is consistent with it being a willing licensor and licensee. Padilla Report ¶¶ 6.9-6.16.

The Federal Rules make clear that "[a]n opinion is not objectionable just because it embraces an ultimate issue." *Fed. R. Evid. 704(a)*. "That said, an expert witness cannot give an opinion as to her *legal conclusion*, i.e., an opinion on an ultimate issue of law. Similarly, instructing the jury as to the applicable law is the distinct and exclusive province of the court." *Nationwide Transp. Fin. v. Cass Info. Sys., Inc., 523 F.3d 1051, 1058 (9th Cir. 2008)* (quoting another source). "It is well accepted that an expert witness may always testify to facts and opinions that, if found, would allow the trier of fact to reach its own conclusion on an ultimate issue of fact." *Microsoft Corp. v. Motorola, Inc., No. C10-1823JLR, 2013 U.S. Dist. LEXIS 109905, 2013 WL 4008822, at *12 (W.D. Wash. Aug. 5, 2013)*.

In *Microsoft*, Judge Robart noted that "[i]t is a more nuanced question whether the expert is permitted to directly express an opinion on that ultimate issue—for example, ... as is relevant here, whether the defendant acted in 'good faith.'" *Id.* "The touchstone of this inquiry is **[**147]** whether the expert's testimony on an ultimate issue of fact will be helpful to the jury." *Id.* "Where the jury is in as good a position as the expert to draw conclusions from the evidence, and is capable of drawing its own inferences, the expert's ultimate issue testimony is not helpful and should be excluded." *Id.* "On the other hand, in a more complicated case or a case dealing with a concept less familiar to ordinary jurors, expert testimony on an ultimate issue may be useful for 'guiding the trier of fact through a complicated morass of obscure terms and concepts.'" *Id.*

Judge Robart concluded that certain statements pertaining to how a patent holder fulfills its FRAND obligation constituted impermissible expert testimony because they were "paradigm legal conclusions[.]" *Id.* He found that the court would inform the jury through its jury instructions as to the rights and obligations of the parties under their RAND commitments, and "expert testimony leaving an impression on the fact-finder concerning the duties and obligations pursuant to the RAND commitment is impermissible." *2013 U.S. Dist. LEXIS 109905, [WL] at *14*. But he did not strike certain statements reciting factual background and "the testimony of an expert in the **[**148]** SEP industry about whether such offer letters were in fact sent in good faith and about Microsoft's response to those letters[.]" *2013 U.S. Dist. LEXIS 109905, [WL] at *17*. He noted that "[t]his is a complicated case and the jury will be asked to hear, among other things, evidence regarding offer letters of patent portfolios, industry royalty rates and ranges determined by analysis of those patent portfolios, and the legal framework surrounding RAND licensing both domestic and abroad." *2013 U.S. Dist. LEXIS 109905, [WL] at *19*. And he determined that Holleman's opinions on Motorola's good faith would be helpful to the jury. *Id.*

The challenged portions of Dr. Padilla's report provide factual context and relay Padilla's conclusion that Huawei has acted as a willing licensor and Samsung has not. *See* Padilla Report ¶¶ 6.9-6.16. As an initial matter, the factual background provides necessary context to the challenged conclusions. Samsung has not challenged the accuracy of those statements, only the propriety of the expert witnesses opining on matters for which they lack personal knowledge. But Huawei has indicated that it does not intend to substitute expert **[*993]** testimony for that of fact witnesses. I see no reason to strike the factual background paragraphs from the expert **[**149]** reports. If Huawei improperly attempts to introduce this testimony through experts rather than fact witnesses at trial, I will entertain the appropriate objection at that time.

As for Padilla's conclusion, *see* 6.16, although phrased in different terms, it essentially asserts that Huawei has acted in good faith, whereas Samsung has not. Samsung distinguishes this opinion from the "good faith" opinion that Judge Robart found admissible in *Microsoft* by highlighting that Padilla's opinion is based on "his understanding of each party's negotiation conduct," as opposed to whether the terms of an offer were made in good faith. I do not think it is necessary to so narrowly define the scope of admissible "good faith" expert testimony. Padilla's opinions do not explicitly state that one party's actions were "fully consistent with its [F]RAND obligations... ." *Microsoft, 2013 U.S. Dist. LEXIS 109905, 2013 WL 4008822, at *15*. As in *Microsoft*, Padilla's opinions will prove helpful to the jury in determining the ultimate issue of whether either party breached its FRAND obligations.

C. Whether Padilla Improperly Bolsters Lasinski

Samsung next challenges portions of Padilla's Rebuttal Expert Report that it contends are intended to bolster Lasinski's report. Mot. **[**150]** at 10; *see* Padilla Rebuttal Report, ¶¶ 2.4, 2.8, 3.9, 4.5 (Stake Decl., Ex. 3).[38] Huawei argues that Padilla is not vouching for Lasinski, "but rather bringing to bear his economic expertise on Mr. Lasinski's methodologies." Opp'n at 11.

Huawei provides no legal support that such opinions are admissible. Huawei cannot legitimately claim that the challenged paragraphs do not qualify as vouching. *See, e.g.*, 3.9 ("Therefore [Lasinksi's] analysis is better designed to ensure a FRAND rate is derived for Huawei and Samsung's SEP portfolios"). Courts have stricken the testimony of expert witnesses intended to bolster the testimony of another expert. *E.g., K&N Eng'g, Inc. v. Spectre Performance, 2011 U.S. Dist. LEXIS 164981, 2011 WL 13131157, at *10 (C.D. Cal. May 12, 2011)* ("[A] testifying expert can use facts, data, and conclusions of other **[*994]** experts to offer an opinion within the testifying expert's domain of expertise, but the testifying expert cannot vouch for the truth of the other expert's conclusion."); *Estate of Creach v. Spokane Cty., No. CV-11-432-RMP, 2013 U.S. Dist. LEXIS 200049, 2013 WL 12177099, at *3 (E.D. Wash. May 2, 2013)* (noting that an expert may not provide testimony that is "needlessly cumulative or simply bolsters [another witness's] testimony... ."). Because it would be unhelpful, or even confusing, for the jury to hear the testimony of Padilla, an economist, supporting **[**151]** the methodology used by Lasinski, an accountant, those paragraphs will be struck.

D. Whether Jackson's Essentiality Database is Unreliable

Both parties acknowledge that not all patents that are declared essential are actually essential to the particular standard. To determine which patents are actually essential, a qualified technical expert must examine the declared essential patent and compare it to the relevant standard. To aid its case, Huawei tasked Dr. Charles Jackson with providing "oversight and assistance" in the construction of a database of allegedly every potentially essential 3G or 4G patent worldwide. To this end, he produced an "Essentiality Analysis Protocol[,]" which outlines the requisite steps to determine the actual essentiality of declared essential patents. Jackson Report, Appendix C (Stake Decl., Ex. 7). Dr. Jackson and Concur IP, the team in India tasked with working under him, started with a database of over 220,000 patents declared essential, organized them into patent families, and reviewed them for essentiality using a two-step process that Dr. Jackson refers to as "census" and "deeming." Jackson Report, Section 5. The team identified 12,787 actually essential patents. **[**152]** Jackson Report, Table 10. But Samsung contends that he failed to adequately oversee the development of the database in this case because the bulk of the work was done by Concur IP without Dr. Jackson's direct involvement, and much of the data was extracted from the work of Dr.

---

[38] Samsung challenges the following paragraphs: Ex. 3, ¶ 2.4. ("In contrast, Mr. Lasinski's first report is much more in line with the conception of a comparable license analysis that I described in my first report"); *id.* at ¶ 2.8 ("Lastly, in my opinion, using more than one approach, where possible, is likely to lead to more reliable results. This is what Mr. Lasinski has done in his opening report by combining the technical essentiality study of Dr. Jackson with contributions data"); *id.* at ¶ 3.9 ("By contrast, the comparable license analysis conducted in Mr. Lasinski's first report is much more in line with the conception of a comparable license analysis that I described in my first report because he has discussed comparability of the comparable and focal agreement along several criteria, including date of the agreement, the scope of the licensed portfolio, and the nature of the licensee's products. He has considered Huawei's agreements with Ericsson, Nokia, InterDigital Apple, NTT DoCoMo and Qualcomm as well as Samsung's agreements with Ericsson, Nokia, InterDigital, NEC and Qualcomm, has assessed in detail which of those agreements are comparable given the parties, circumstances, and structure of the agreements, and has unpacked those comparable agreements to inform his opinion as to the FRAND rate. As such, Mr. Lasinski appropriately used information from more than one license to guide and check his analysis. Therefore his analysis is better designed to ensure a FRAND rate is derived for Huawei and Samsung's SEP portfolios"); *id.* at ¶ 4.5 ("Moreover, research has shown that several of these different approaches can be used simultaneously and in combination to more effectively measure patent value. I understand Mr. Lasinski has done so in his opening report by combining the essentiality study of Dr. Jackson with the contributions data").

Apostolos Kakaes in unrelated litigation involving TCL and Ericsson. Neither attack provides a sound ground for striking Jackson's opinions.

As an initial matter, the database is not an "opinion," it is data from which Dr. Jackson forms his opinions.[39] The Federal Rules explicitly allow an expert to "base an opinion on facts or data in the case that the expert has been made aware of or personally observed." *Fed. R. Evid. 703*; *see also* *Southland Sod Farms v. Stover Seed Co., 108 F.3d 1134, 1142 (9th Cir. 1997)* ("The fact that Engelke's opinions are based on data collected by others is immaterial; *Federal Rule of Evidence 703* expressly allows such opinion testimony."). Dr. Jackson explained in detail the steps the team took to create the database. Samsung questions the reliability of the database on the grounds that Dr. Jackson contributed to an essentiality decision "in the ballpark of 100" and "spot checked ... in the neighborhood of 20" out of the 158,574 decisions that were made under his purported **[*995]** supervision. Jackson Report 6; **[**153]** *see also* Jackson Dep. at 157:15-22, 160:24-161:4 (Stake Decl., Ex. 11). But it does not appear to challenge the qualifications of the Concur IP team, or the methodology that they followed in developing the database. Rather, it attacks the "minimal quality control" and the undisputed fact that some of the data came from the database developed by Concur IP under the direction of Dr. Kakaes in *TCL Commc'n Tech. Holdings, Ltd. v. Telefonaktiebolaget LM Ericsson*, No. CV 15-2370 JVS(DFMX).

In *TCL*, Judge Selna was "not persuaded that the individuals on the Concur IP team lacked the qualifications to perform this work." *2017 U.S. Dist. LEXIS 214003, 2017 WL 6611635, at *17 (C.D. Cal. Dec. 21, 2017)*. Samsung cites to an earlier decision in *TCL*, in which Judge Selna granted Ericsson permission to depose Concur IP team leaders, even though they would not be testifying at trial, in part because "neither of the testifying experts could fully explain how the teams in India came to their conclusions in the Census and Industry Essentiality Analysis." *2016 U.S. Dist. LEXIS 185159, 2016 WL 6662727, at *4-5 (C.D. Cal. July 7, 2016)*. But he explicitly opted not to strike portions of the reports nor to preclude TCL from offering certain testimony "to buttress the reliability of the factual predicates" of the reports. *See* *2016 U.S. Dist. LEXIS 185159, [WL] at *5*.

As Huawei highlights, Judge Selna **[**154]** rejected several challenges to the methodology and ultimately allowed TCL's experts to testify based on the database. *2017 U.S. Dist. LEXIS 214003, 2017 WL 6611635, at *18 (C.D. Cal. Dec. 21, 2017)* ("Ultimately the Court finds that the flaws are not enough to justify rejecting TCL's experts' calculation of the total number of SEPs entirely."). Because Samsung does not offer legitimate grounds for attacking the reliability of the database, its motion to strike the Jackson Report is DENIED.[40] Its challenges go to the weight to be given to Jackson's opinions, not their admissibility. Samsung can attack his testimony on cross-examination.

E. Objections to Rebuttal Reports

1. Dr. deLisle's "Rebuttal" Report Related to Chinese Legal System

---

[39] Samsung offers an inapposite hypothetical to "demonstrate[] the absurdity of Huawei's position[:] [s]uppose an associate working for Huawei's counsel were tasked with going through the Concur IP database and marking all of Huawei's patents 'essential while demining all other patents 'non-essential.'" Reply at 9 n.7. Under this scenario, Huawei's accounting expert would then take this database and "value the patents of anyone other than Huawei at zero, highly distorting his 'comparable license' and 'top-down' approaches in Huawei's favor." *Id.* But under this hypothetical, Samsung would have ample grounds for challenging the methodology of the associate in generating the data underlying Lasinski's opinions. Here, Samsung is not actually challenging the methodology of any of the individuals involved in developing the database.

[40] In Reply, Samsung focuses more on its contention that Jackson is merely serving as a conduit to introduce the opinions of Dr. Kakaes. *See* Reply at 10. But, regardless of the quantity of Kakaes's work used in compiling the database, Jackson's opinions are clearly his own. As Huawei points out, Samsung could have sought to depose Kakaes or members of the Concur IP team, but it did not.

Under *Federal Rule of Civil Procedure 26*, a party must disclose expert testimony "if the evidence is intended solely to contradict or rebut evidence on the same subject matter identified by another party under *Rule 26(a)(2)(B)* or *(C)*, within 30 days after the other party's disclosure. *Fed. R. Civ. P. 26(a)(2)(D)(ii)*. "Rebuttal testimony cannot be used to advance new arguments or new evidence." *Wadler v. Bio-Rad Labs., Inc., No. 15-CV-02356-JCS, 2016 U.S. Dist. LEXIS 143480, 2016 WL 6070530, at *3 (N.D. Cal. Oct. 17, 2016)* (quoting another source). "The test of whether an expert's opinion constitutes rebuttal or a 'new' opinion, however, is not 'whether a rebuttal expert employs new testing or methodologies' **[**155]** but instead, whether 'a rebuttal attempts to put forward new theories outside the scope of the report it claims to rebut.'" *Id.*

Huawei's "rebuttal" expert Jacque deLisle's opinions relate to "evaluations of Chinese court proceedings and Chinese law[,]" deLisle Dep. at 70:14-15 (Stake Decl., Ex. 16; Dkt. No. 335-17), which Samsung claims do not respond to any of its experts' opinions or arguments. Mot. at 21; *see* deLisle Rebuttal Report (Stake Decl. ISO Samsung's Mot. to Partially Exclude, Ex. **[*996]** 15; Dkt. No. 335-16). But Huawei counters that Dr. deLisle's report directly responds to claims by Samsung's experts that Huawei's pursuit of Chinese injunctions was improper in violation of its FRAND obligations and U.S. ***antitrust law***. Opp'n at 24; *see* Leonard Report § VI (citing Huawei's Chinese injunction actions and "conclud[ing] that Huawei's threat of an injunction in China is likely to lead to hold-up."); *id.* ¶¶ 190-193 (explaining why "an injunction in China is likely to hold-up Samsung worldwide, forcing Samsung' to pay above-FRAND royalty rates for Huawei's SEP portfolio while accepting less-than-proportional rates for its own portfolio") (capitalizations omitted).

"The proper function **[**156]** of rebuttal evidence is to contradict, impeach or defuse the impact of the evidence offered by an adverse party." *Matthew Enter., Inc. v. Chrysler Grp. LLC, No. 13-CV-04236-BLF, 2016 U.S. Dist. LEXIS 108694, 2016 WL 4272430, at *1 (N.D. Cal. Aug. 15, 2016)* (quoting another source). Dr. deLisle's report does not directly "contradict" Leonard's opinions, but it does provide important context intended to "defuse the impact" of a critical inference drawn from Leonard's report—that Huawei improperly sought injunctive relief in China to "hold-up Samsung for above-FRAND royalties." Leonard Report ¶ 190. Moreover, Huawei notes that the parties agreed that Samsung would have the opportunity to submit a supplemental report responding to Dr. deLisle, *see* Email Exchange re: Improper Rebuttal (Peterson Decl., Ex. 13; Dkt. No. 347-14 at 153-54[under seal]), but Samsung elected not to, so it cannot claim prejudice. Opp'n at 25. On this point, Samsung counters that it reserved its rights to object and "could not reasonably submit a report responding to Dr. deLisle within one week of being surprised by his report."

Samsung's motion is GRANTED IN PART.[41] Huawei may use portions of deLisle's opinions properly intended to "diffuse the impact" of Samsung's experts' opinions that seeking **[**157]** injunctions was improper, but it may not introduce his opinions generally related to the integrity of the Chinese legal system.

2. Dr. Ding's Rebuttal Report

Samsung moves to strike paragraphs 115, 127-143, and 150 of Dr. Ding's Rebuttal Expert Report because they do not directly respond to any portion of Dr. Davies' opening report. Mot. at 21. Huawei offered the objected to portions of the rebuttal report of Dr. Zhi Ding because they were intended to rebut the testimony and opinions of Samsung's expert Dr. Leonard, but since Dr. Leonard did not rely on the Unwired Planet patents in his assessment, Huawei agrees that it will not present Dr. Ding's testimony on the subject so long as Dr. Leonard does not introduce the subject. Samsung does not offer further representations in reply, only acknowledging Huawei's concession. Reply at 3. Since Huawei offered no argument against striking these paragraphs from Ding's Report, Samsung's motion is GRANTED.

VII. SAMSUNG'S MOTION TO STRIKE PORTIONS OF EXPERT REPORTS

---

[41] Samsung does not request specific paragraphs to be excluded. To the extent that this direction is unclear, the parties may determine via motions in limine precisely which of Dr. deLisle's opinions are admissible at trial.

Samsung moves to strike portions of Huawei's expert reports because they were not disclosed in accordance with the rules governing pleading and contentions. Mot. to Strike (Dkt. No. 337 **[**158]** [redacted]; Dkt. No. 334-2 [under seal]).

[*997] A. Inequitable Conduct Defense for the '105 Patent

As discussed above, Huawei is no longer pursuing this defense, so I need not address striking these portions of its experts' reports.

B. Huawei's Undisclosed Invalidity Contentions for the '825 Patent

Huawei's First Supplemental Invalidity Contentions, served on September 22, 2017, included assertions that the '825 Patent was invalid under *35 U.S.C. § 112* because certain terms lacked written description and lacked enablement. Ex. C. Huawei's expert, Dr. La Porta, offered several opinions why the '825 patent is invalid that were not disclosed via contentions, including that the terms: (1) "a signal generator configured to: select a first ID from among the group of IDs," (2) "a downlink signal processor configured to: after transmitting the first uplink signal, wait for a predetermined delay duration without checking a downlink channel," and (3) "predetermined delay duration," all lack written description support and/or are not enabled. Ex. D at 173-77. He also opined that the terms "a downlink signal processor configured to: after transmitting the first uplink signal" and "a transceiver configured to: transmit the generated first uplink signal to a NodeB" **[**159]** are indefinite. *Id. at 184-85*.

The patent local rules require a party to disclose any grounds for invalidity that "give[] the other party sufficient notice for it to engage in meaningful discovery and preparation of its case." *MediaTek, 2014 U.S. Dist. LEXIS 22442, 2014 WL 690161, at *6*. Huawei insists that it has met this threshold requirement for each of the issues identified by Samsung.

1. Claim 4's "signal generator," "downlink signal processor," and "transceiver"

Huawei explains that Samsung's interpretation of these claim elements did not become clear until its interrogatory response served on March 9, 2018, the last day of fact discovery. Its expert, Dr. La Porta, therefore concluded that "signal generator" and "downlink signal processor" lacked written description, and "downlink signal processor" and "transceiver" are indefinite when considered together in the context of the claim. La Porta Invalidity Report ¶¶ 479-83 (Yang Decl., Ex. 10). It insists that it provided sufficient notice by timely serving its opening expert reports, Samsung never objected during expert discovery, and Samsung has suffered no prejudice, as demonstrated by Dr. Valenti's rebuttal report which fully addresses Dr. La Porta's opinions on indefiniteness and Samsung's opportunity **[**160]** to depose Dr. La Porta about his opinions. Opp'n at 12. It points to *Medimmune, LLC v. PDL Biopharma, Inc., No. C 08-5590 JF (HRL), 2010 U.S. Dist. LEXIS 145936, 2010 WL 760443 (N.D. Cal. Mar. 4, 2010)*, for support.

In *Medimmune*, the Hon. Jeremy Fogel denied a motion to strike invalidity contentions based on insufficient disclosures because the contentions were asserted with the requisite specificity, and "discovery ha[d] proceeded to the point that PDL ha[d] received MedImmune's extensive expert reports with respect to the subject contentions." *2010 U.S. Dist. LEXIS 145936, [WL] at *3 n.3*. The difference here is that Huawei did not include these indefiniteness challenges in its invalidity contentions and never sought leave to amend. But it did expound on the theory in Dr. La Porta's opening report, which is dated April 27, 2018.

Samsung cites to *BioCell Tech. LLC v. Arthro-7, 2013 U.S. Dist. LEXIS 189647, 2013 WL 12131282 (C.D. Cal. Apr. 16, 2013)* to argue that Huawei's position regarding lack of prejudice "would make it impossible to strike any new argument in an opening expert report, robbing the Patent Local Rules of meaning." Reply at 4. The *BioCell* court found that "Defendants waived and/or [were] estopped from **[*998]** asserting indefiniteness in light of their

Invalidity Contentions and stipulation to claim construction." 2013 U.S. Dist. LEXIS 189647, [WL] at *9. The court compared the circumstances to those in Apple, Inc. v. Samsung Electronics Co., 920 F. Supp. 2d 1079, 2013 WL 412858 (N.D. Cal. 2013) **[**161]** and concluded that "Defendants' present argument is a clear example of 'unfair surprise.'" BioCell, 2013 U.S. Dist. LEXIS 189647, 2013 WL 12131282, at *10. In *Apple*, Judge Koh found that Samsung had not waived its indefiniteness challenge even though it had not selected the term for construction because Samsung had raised the issue in its answer, invalidity contentions, summary judgment briefing, and at trial. 920 F. Supp. 2d 1079, 2013 WL 412858, at *6.

These circumstances fall in between Apple and BioCell. Samsung cannot legitimately claim any "unfair surprise," but Huawei has not asserted these indefiniteness challenges since the inception of this case. But the reason for that is because the theory is directly driven by Samsung's interpretation of the claim terms. In this situation, I am "extremely reluctant" to dispose of substantive invalidity attacks based on procedural defects. *See* Biogenex Labs., Inc. v. Ventana Med. Sys., Inc., No. C 05-860JFPVT, 2006 U.S. Dist. LEXIS 57067, 2006 WL 2228940, at *4 (N.D. Cal. Aug. 3, 2006) ("While it ultimately concludes that Biogenex acted unreasonably with respect to both its shift in infringement position and its failure to respond to relevant discovery requests, the Court is extremely reluctant to dispose of substantive infringement claims based upon procedural defects, particularly given that BioGenex has offered at least articulable reasons for its conduct and that there is no evidence of bad faith.").

2. Predetermined delay duration

Samsung acknowledges that Huawei identified the term in its invalidity contentions, but argues that "there are two distinct deficiencies in [the] disclosure." Mot. at 11. First, it contends that Huawei merely **[**162]** identified an indefiniteness challenge, but did not note a specific challenge based on lack of written description, on which its expert specifically opines. Second, it insists that the disclosure is insufficient because it failed to explain why it contends that the term "predetermined delay duration" is indefinite. It also urges that Huawei has waived the argument because it failed to raise it during claim construction briefing.

But Huawei did address the term during claim construction—it argued that its proposed construction, "delay duration provided by base station," was necessary for the system to work as intended. *See* Huawei's Responsive Claim Construction Br. at 13 ("The '825 patent, however, describes a single way of predetermining the delay duration that is necessary in order for the invention to work."). In the Claim Construction Order, I twice noted Huawei's argument that this is the only way for the invention to work, but opted not to import the limitation that the delay duration be provided by the base station. *See* Claim Construction Order at 23-24. Huawei did not waive this argument.[42]

[*999] As for Huawei's **[**163]** challenge based on written description, it argues that "Samsung was indisputably on notice of the written description issue no later than the Court's claim construction order, if not well before, and cannot credibly claim prejudice." Opp'n at 11. The patent local rules explicitly provide that a party would have good cause to amend its infringement or invalidity contentions after "[a] claim construction by the Court different from that

---

[42] In support of its argument, Samsung cites to out-of-district cases for the proposition that a party waives indefiniteness challenges by not raising them in claim construction briefing. *See* Edgewell Pers. Care Brands, LLC v. Albaad Massuot Yitzhak, Ltd., No. CV 15-1188-RGA, 2017 U.S. Dist. LEXIS 70242, 2017 WL 1900736, at *4 (D. Del. May 9, 2017); Silver State Intellectual Techs., Inc. v. Garmin Int'l, Inc., 32 F. Supp. 3d 1155 (D. Nev. 2014). But neither case stands for the proposition that a challenge must clearly be labeled as one for "indefiniteness." The *Edgewell* court found that the defendants waived a challenge to "truncated" based on their assertion that it would be unclear where the truncation begins, when they failed to raise the argument in their briefing. 2017 U.S. Dist. LEXIS 70242, 2017 WL 1900736, at *4. But the court also noted, "[e]ven assuming it was not waived, one skilled in the art would understand with reasonable certainty where the truncation begins in light of the figures provided the specification." *Id.* And the *Silver State* court denied Garmin's motion to amend its invalidity contentions when it based its challenge on the court's claim construction and waited two months to amend. 32 F. Supp. 3d at 1166. Neither case is helpful here, where Samsung's argument is essentially that Huawei did not label its "will not work" argument as an indefiniteness challenge.

proposed by the party seeking amendment[.]" *Patent L.R. 3-6(a)*. It was Huawei's duty to amend its contentions, not Samsung's responsibility to infer Huawei's arguments based on the Claim Construction Order. But Huawei points to the lack of prejudice to Samsung, as evidenced by Dr. Valenti's rebuttal report, and urges that the court should decline to strike this substantive argument based on a procedural defect. Opp'n at 11 (citing *Biogenex, 2006 U.S. Dist. LEXIS 57067, 2006 WL 2228940, at *4)*. As with the previous issue, I am "extremely reluctant" to dispose of substantive arguments based on procedural defects. *See* *Biogenex Labs., 2006 U.S. Dist. LEXIS 57067, 2006 WL 2228940, at *4*.

I also reject Samsung's contention that Huawei's disclosure in its invalidity contentions was insufficient because it failed to explain why it contends that the term "predetermined delay duration" is indefinite. **[**164]** As evidenced during claim construction arguments, Samsung understood Huawei's position that the term is indefinite if the delay duration is not determined by the base station because the patent provides no other mechanism for determining the delay duration.

Samsung's request to strike paragraphs 478-485, 489, and 499-501 is DENIED.

C. Huawei's Undisclosed Noninfringing Alternatives, Noninfringement Contentions, and Noninfringement Theories

1. For Samsung Asserted Patents

During fact discovery, Samsung served interrogatory no. 14 asking Huawei to identify noninfringing alternatives to the Samsung patents-in-suit. Ex. E at 30-31. Huawei initially indicated that it would "respond to this interrogatory at an appropriate time." Its final response asserted that it would "disclose its experts' opinions in accordance with the expert discovery schedule in this matter," noted that the functionality of its products constituted a "design-around," and identified as responsive the entirety of the "deposition testimony of its technical and source code witnesses deposed in this case."

2. Noninfringing Alternatives

Huawei never supplemented this interrogatory response and did not identify any noninfringing **[**165]** alternatives in its opening reports, but disclosed several in its rebuttal reports. Samsung moves to strike the following portions of Huawei's expert reports: Mahon Rebuttal Report Regarding Noninfringement of the '105 patent ¶ 11 (last sentence), ¶¶ 149-157 (Ex. J); La Porta Rebuttal Report Regarding Noninfringement of the '825 patent ¶¶ 35, 265-270 (Ex. K); Akl Rebuttal Report Regarding Noninfringement of the '350 patent ¶ 20 (last sentence), ¶¶ 263-66 (Ex. L); Mahon Expert Report Regarding Noninfringement of the '130 patent ¶¶ 10, 137-140 (Ex. M); Fuja Expert Report Regarding Noninfringement of the '726 patent ¶¶ 41, 228-230 (Ex. N).

[*1000] Huawei aims to justify this apparent failure by contending that the interrogatory request did not seek the information contained in its experts' reports. Interrogatory no. 14 sought "design-around or alternative technology or method (design-around) that . . . *can* be used as an alternative to the claimed subject matter of the asserted(s) of the Samsung Patents-In-Suit." Ex. E at 30 (emphasis added). The portions of the reports listed above that Samsung seeks to strike include opinions concerning what acceptable alternative technology existed *at the time the 3GPP standard was adopted*. Huawei argues that those **[**166]** alternative technologies *could not* be used as an alternative at the time Samsung served its interrogatory request because the standard had already been adopted, after which there is no way to "design around" a patent that embodies mandatory standards technology. *See* Opp'n at 19 (citing Lasinski Op. Expert Report at 40).

Samsung counters that Huawei's "assertion strains credibility." Reply at 4. I agree with Samsung that the interrogatory was directed towards noninfringing alternatives, but I am not convinced that Huawei's explanation should be so easily brushed aside. The interrogatory sought technology that "can" be used as an alternative, and

Samsung does not directly dispute Huawei's contention that once the standard was adopted, no acceptable alternative technology exists. It does, however, dispute any "temporal limitation" in the interrogatory, and it underscores the language asking "when the alleged design-around was available for use" as support that the request sought "any and all design-arounds at any point in time." Reply at 5.

But Samsung cannot deny that its interrogatory used "can," not "could" as it claims in its motion. Huawei insists that a request for "present-day design-arounds **[**167]** to the asserted patents" is "irrelevant to the issue of whether there were any acceptable alternative technologies at the time of the adoption of the relevant 3GPP standard," which is the subject of its rebuttal reports. Given the plain language of the interrogatory, I agree with Huawei. Samsung can legitimately argue that Huawei should have known what it intended by its request, but that does not change the plain language of the request.

Moreover, this case is different than those relied on by Samsung that place the burden of identifying noninfringing alternatives during the accounting period on the accused infringer. None of those cases dealt with a technology that was declared essential to a standard.

Huawei also emphasizes that it consistently took the position that this subject was properly suited for expert, not fact, discovery, and therefore need not have been disclosed in interrogatories. *See* *Ericsson Inc. v. TCL Commc'n Tech. Holdings, Ltd., 2017 U.S. Dist. LEXIS 183216, 2017 WL 5137401, at *13 (E.D. Tex. Nov. 4, 2017)* ("[E]xpert theories need not be disclosed in response to interrogatories."). To the extent that Samsung disagreed with this contention, it could have moved to compel a further response. Huawei insists that its experts' reports were directly responsive to Samsung's experts' opinions concluding **[**168]** that there were no "viable non-infringing alternative[s]" and criticizing certain alternative technologies available at the time the standard was implemented. *See* Bambos '130 Opening Infr. Report ¶¶ 975-76 (Yang Decl., Ex. 2); Prucnal '105 Opening Inf. Report ¶¶ 706-07 (Yang Decl., Ex. 14); Valenti '825 Opening Infr. Report ¶ 926 (Yang Decl., Ex. 9); Bambos '726 Opening Infr. Report ¶¶ 975, 977 (Yang Decl., Ex. 2); Prucnal '350 Opening Inf. Report ¶¶ 706, 708 (Yang Decl., Ex. 14). Samsung cannot claim any **[*1001]** prejudice since it introduced the issue into its opening expert reports.

3. Noninfringement Theories

Samsung also takes issue with several of Huawei's noninfringement theories that it contends were not disclosed during discovery:

> For the '105 patent: (1) the Accused Instrumentalities do not use "FT pre-coded symbols" because Physical Uplink Shared Channel ("PUSCH") symbols purportedly contain control information in addition to data information (see Ex. J at 29-34); (2) the Accused Instrumentalities do not map PUSCH and Physical Uplink Control Channel ("PUCCH") symbols to two sets of subcarriers such that both sets of subcarriers are available for transformation during the same IFFT operation (id. at 38-46 **[**169]**); and (3) the Accused Instrumentalities do not perform the same IFT operation on the PUSCH and PUCCH (id. at 47-50);
>
> For the '350 patent: (1) performing only the steps in method claim 1 does not result in the determination of "downlink transmit power," which is based on a new claim construction theory that the preamble is limiting (*see* Ex. L at 53-59); (2) the claimed "determining a cell-specific ratio" cannot be met by using a lookup table based on Huawei's proposed construction of "determining" as "calculating" (*id.* at 60-63); (3) the claimed "receiving a cell-specific parameter" is not met by receiving an index value for a lookup table based on Huawei's proposed construction of "cell-specific parameter" as "a parameter representing an RS boosting value" (*id.* at 63-65); and (4) the Accused Instrumentalities do not use a cell-specific ratio because "[t]he same 'ratio' is not used by all user equipment in a cell" and that different manufacturers purportedly use different ratios (*id.* at 69-72).
>
> For the '130 patent: data is not mapped to "remaining" symbols in the slot when a Sounding Reference Signal ("SRS") is sent (*see* Ex. M at 40-41).
> For the'726 patent: Samsung has failed to point to evidence of a claims "HARQ processor" (see Ex. N at 76 - 81)

Huawei responds to **[**170]** Samsung's attack by offering that noninfringement contention interrogatory responses are not required in this district, it nonetheless sought to meet and confer with Samsung regarding mutual supplementation of the parties' noninfringement interrogatories, it provided responses at the same level of detail as Samsung, and certain positions were unforeseeable until Samsung served its opening infringement reports.

Given the uncertainty as to the requisite particularity of the responses and the lack of prejudice, I will not strike these theories on procedural grounds.

4. For Huawei Asserted Patents

Samsung's Interrogatory No. 35 asked Huawei to describe any "design-around alternatives" to Huawei's asserted patents.[43] Ex. O at 2. Three weeks after the close of discovery, Huawei responded:

> there were no alternative proposals that solved the problems solved by Huawei's inventions. Any alternatives either failed to solve the same problems, or failed to provide an efficient solution like Huawei's inventions. Due to their superiority as compared to available alternatives, Huawei's inventions were adopted into the LTE standards.

[*1002] Ex. P at 22. Huawei did not identify any specific design-around alternatives, **[**171]** but referred to its response to Interrogatory No. 20, which mentions alternatives for the '613 and '587 patents. Ex. Q at 18-19, 22-23, 25-26. Samsung argues that Huawei's opening expert reports identify several previously undisclosed purported noninfringing alternatives for each of Huawei's patents-in-suit. But that is not what the reports identify. To the contrary, they opine on why certain technologies could not serve as a feasible alternative to Huawei's patents. *See* Ex. R ¶¶ 537-45 ('239 patent); Ex. S at ¶¶ 481-500 ('892 patent); Ex. T at ¶¶ 296-309 ('587 patent); Ex. U at ¶¶ 279-84 ('613 patent).

Huawei asserts that it could not have known that its responses were inadequate given the parties' agreement, and therefore had no duty to supplement. To the extent that Samsung contends that Huawei's responses were inadequate, it should have moved to compel supplemental responses rather than seeking to strike portions of the expert reports at this stage.

D. Huawei's Omission of Priority Dates for the '587 and '892 patents in its Opening Expert Reports

Huawei's opening expert reports offering opinions on alleged infringement of the '587 and '892 patents failed to mention any priority date for either patent, *see* Ex. S at ii-iii; Ex. T at ii-v, but the rebuttal reports included **[**172]** specific priority dates, *see* Ex. V ¶¶ 62-65; Ex. W ¶¶ 59-77.

Huawei responds that its infringement contentions on October 25, 2016 identified December 3, 2009, the date of the original Chinese application, as the priority date for the '587 patent, and identified April 30, 2007, the date of the original Chinese application, as the priority date for the '892 patent. Given this disclosure, which Samsung does not directly address, I fail to see any basis for concluding that Huawei "needed to include" this evidence in its opening reports, thereby justifying striking its rebuttal expert reports.

E. Huawei's Undisclosed DOE Theory for the '239 patent

Samsung contends that Huawei did not invoke a DOE theory in its infringement contentions served for the '239 patent, and it made no attempt to amend. But Huawei's opening expert report on infringement of the '239 patent includes the opinion that "u+1" is equivalent to the "group number K" from the asserted claims under the DOE. Ex. R at ¶¶ 254, 271, 282, 318, 338, 370. Samsung seeks to strike these opinions.

---

[43] Unlike Samsung's Interrogatory No. 4, this request sought "design-around alternatives" that "could have been utilized" in lieu of Huawei's asserted patents.

Huawei argues that the claims "do not require receiving the 'group number k' directly from the network and can cover receiving precursors and calculating the group number." Opp'n at 4. From this **[**173]** premise, it insists that Samsung ([TEXT REDACTED BY THE COURT]) literally infringes. According to Huawei, Samsung's interrogatory responses on noninfringement of the '239 patent stated that "Huawei impermissibly redefines the group number 'k' to be 'u + 1' in the standard — but of course 'u + 1' is not the group number." Yang Decl., Ex. 3 at 243.[44] But it did not disclose Samsung's current theory that "obtaining" cannot include calculating. This theory was first presented in Dr. Madisetti's rebuttal noninfringement report. Madisetti '239 NonInf. Report ¶¶ 64-68 (Yang Decl., Ex. 4).[45] **[*1003]** It further contends that Samsung has not been prejudiced as evidenced by its full response to the DOE theory in Madisetti's rebuttal report and opportunity to depose Dr. Veeravalli about any statements in his opening report. Samsung counters that Huawei could have sought leave to amend its infringement contentions to include its DOE theory if it was "truly ... blindsided by Samsung's noninfringement argument[,]" and could have brought a motion to strike portions of Madisetti's report if it thought the theory was not adequately disclosed. Reply at 15.

Both sides have failed here. Huawei should have sought leave **[**174]** to amend its infringement contentions when it realized that it would offer evidence under a DOE theory of infringement. On the other hand, its initial infringement contentions inform Samsung of the substance of its DOE argument—that it contends that the group number k equals "u+1[.]" I see no reason to apply an overly formalistic approach to the rules to strike these portions of Dr. Veeravalli's report, given that they are not really "new infringement theories" but simply have a "new" label. *See* *Verinata Health, 2014 U.S. Dist. LEXIS 116382, 2014 WL 4100638, at *3* ("Given the purpose behind [these] disclosure requirements, a party may not use an expert report to introduce new infringement theories... ."). In determining whether to strike portions of expert reports for failure to comply with the patent local rules, I assess whether striking will result in litigation that is more fair, or less. *Apple, 2012 U.S. Dist. LEXIS 190470, 2012 WL 2499929, at *1*. Samsung was aware of the underlying theory of infringement since Huawei's initial contentions (although not labeled as "DOE"), including the particular limitation that the group number k is equal to "u+1" and fully responded to the arguments in Dr. Madisetti's rebuttal report, so I will not strike these paragraphs.

This brings me to Samsung's failure, which is **[**175]** not truly at issue in this motion since Huawei has not separately moved to strike any portion of Dr. Madisetti's report. As Samsung points out, Huawei moved to exclude Dr. Madisetti's opinions on the "obtaining ... a group number k" limitation based on claim construction arguments, but it did not separately move to strike those opinions based on failure to comply with the local rules. This does not absolve Samsung of the same responsibility to abide by the patent local rules. It should have amended its interrogatory response to include its theory that it does not infringe because "obtaining" cannot include calculating.

VIII. MOTIONS TO SEAL

In conjunction with the briefing on these motions, the parties have asked to seal an inordinate amount of information. This is a court of public record and the parties must have a compelling reason to justify concealing information from the public. This case is proceeding to trial and I expect much of the information the parties currently seek to seal will by necessity — given the information's centrality to the parties' arguments — be discussed during trial. I will not seal, or close the courtroom, when information central to the parties' arguments **[**176]** in this case is being discussed before the jury unless the parties demonstrate the most compelling of reasons and show through persons with direct knowledge why significant harm *would* occur if the information became public.

For current purposes, the parties must re-review each of the documents and pieces of information they believe should remain under seal under the compelling justifications standard. They must then submit one, joint chart

---

[44] Huawei notes (without support) that Samsung served these responses at 11 pm on the last day of fact discovery, so it "could not have responded with its equivalents argument before discovery closed." Opp'n at 5.

[45] As discussed above, Huawei has moved to exclude these portions of Dr. Madisetti's report because they apply overly narrow interpretations of claim terms. *See supra* section IV.E.1.

identifying by specific docket and sub-docket number (*e.g.*, ECF Dkt. No. 384-2) and then by page/line **[*1004]** or paragraph number the specific, narrowly tailored information they seek to seal. For each piece of information to be sealed, the chart shall identify the specific portion of a declaration, by docket number and then page/line or paragraph number, where a person with knowledge has demonstrated compelling reasons for sealing that specific piece of information, including the harm that would be caused if the information were publicly disclosed. The joint chart shall also identify — again by ECF Dkt. No. and sub-number — docket numbers that can be wholly unsealed because no party currently believes the information should remain under seal.

This joint chart **[**177]** and any supplemental declarations in support, shall be filed within twenty (20) days of the date of this Order.

When deciding what information the parties believe should remain under seal, they should adhere the following guidance:

Percentages of royalties sought or secured in negotiations or resulting licensing agreements may remain under seal at this juncture, if those terms are not otherwise publicly known. This includes references to the identities of third-parties to those agreements, assuming the existence of the agreement itself is not otherwise publicly known.

No other provisions of proposed or secured licensing agreements shall be sealed, unless a person with knowledge explains why specific provisions are so unique to that agreement that disclosure would cause significant harm.

Descriptions of confidential functions of accused products, including references to the contents of source code are sealable, if those functions or portions of source code are not otherwise obvious, expected, or publicly known.

Expert and percipient witness discussions of how the patents function or the alleged prior art are not sealable.

Information disclosed during open court, in particular during the hearing **[**178]** on these pending motions, shall not be sealed. Likewise, information that is not ultimately redacted from this Order shall not be sealed.

CONCLUSION

The motions are resolved in accordance with the forgoing discussion.

IT IS SO ORDERED.

Judges: KENNETH A. MARRA, United States District Judge.

Opinion by: KENNETH A. MARRA

Opinion

[*1251] **ORDER**

This action arises out of Plaintiff Alejandro Zendejas's purchase of a horse named Vorst from Defendant Eugenie H. Redman. Following a jury trial, the jury unanimously found in favor of Defendants Redman and Colin J. Syquia on all counts. On August 18, 2017, judgment was entered in Defendants' favor and against Plaintiff. (DE 257.) Now pending before the Court is Plaintiff's Motion for Judgment as a Matter of Law and in the Alternative Motion for a New Trial (DE 270). Defendants Eugenie H. Redman and Colin J. **[**2]** Syquia both filed responses (DE 268 & 302), and Plaintiff filed a reply (DE 307). Also pending before the Court are Defendants Redman's and Syquia's respective Motions for Entitlement to Attorney's Fees and Costs ("Motions for Fee Entitlement") (DE 263 & 264). Plaintiff filed responses to the Motions for Fee Entitlement (DE 67 & 268), and Defendants filed replies (DE 277 & 281). The Court has considered the arguments of counsel and is otherwise fully advised in the premises. For the reasons stated below, the Motion for Judgment as a Matter of Law and in the Alternative Motion for a New Trial is denied, and the Motions for Fee Entitlement are granted.

I. DISCUSSION

A. Motion for Judgment as a Matter of Law

Plaintiff argues that he is entitled to judgment in his favor on certain claims and affirmative defenses under *Rule 50(b) of the Federal Rules of Civil Procedure*. The standard for granting a renewed motion for judgment as a matter **[*1252]** of law under *Rule 50(b)* is precisely the same as the standard for granting the pre-submission motion under 50(a). *Chaney v. City of Orlando, 483 F.3d 1221, 1227 (11th Cir. 2007)*. The standard of review for a district court to grant the motion is whether, "when the facts and inferences are viewed in the light most favorable to the opposing party, they 'point so strongly and overwhelmingly **[**3]** in favor of one party the Court believes that reasonable men could not arrive at a contrary verdict.'" *United States v. Vahlco Corp., 720 F.2d 885, 889 (11th Cir. 1983)* (quoting *Boeing Co. v. Shipman, 411 F.2d 365, 374 (5th Cir. 1969))*[1] A court must "affirm the jury verdict unless there is no legal basis upon which the jury could have found for [the plaintiff]." *Telecom Tech. Servs., Inc. v. Rolm Co., 388 F.3d 820, 830 (11th Cir. 2004)*.

Plaintiff contends that he is entitled to judgment as a matter of law on Counts XI and XII of the First Amended Complaint, which allege claims for violations of the Florida Deceptive and Unfair Trade Practices Act, *Fla. Stat. § 501.201 et seq.* ("FDUTPA"), based upon his argument that he established at trial that the bill of sale for the horse violated various provisions of Florida's Administrative Code. Under the Code, only "[a] violation of any provision of Chapter 5H-26, F.A.C., *resulting in actual damages to a person*, shall be considered an unfair and deceptive trade practice pursuant to Chapter 501, Part II, F.S." *Fla. Admin. Code R. 5H-26.003* (emphasis added). Here, the jury found that Plaintiff did not suffer actual damages as a result of the violations. (DE 254.) Hence, the jury's finding that the bill of sale violated Florida's Administrative Code does not mean that Plaintiff is entitled to judgment as a matter of law on the FDUTPA claims.

Alternatively, Plaintiff argues that the jury's finding **[**4]** that Plaintiff did not suffer damages is speculative and unreasonable because Plaintiff's expert opined that the horse was worth only $30,000 on the date of the transaction but Plaintiff paid $250,000. However, contrary to Plaintiff's suggestion otherwise, there was competing evidence presented to the jury that the horse was worth $250,000 (which was the purchase price) on the date of sale. (DE 290, Leone Test., Trial Tr., vol. 4 124: 2-4.) The jury was free to reject Plaintiff's expert's opinion in favor of Peter Leone, Defendants' expert, who opined that the horse was worth $250,000 on the date of purchase. Thus, there was sufficient evidence in the record for a reasonable juror to conclude that Plaintiff suffered no damages and that therefore Plaintiff was not entitled to a jury verdict on the FDUTPA claims in Counts XI and XII of the First Amended Complaint.

Next, Plaintiff argues that he is entitled to judgment in his favor because Syquia provided medical information about the horse but Defendants allegedly did not accurately disclose all information responsive to the inquiry, in violation of FAC *Rule 5H-26.003(12)*. Plaintiff contends that the jury's finding to the contrary did not have a legally **[**5]** sufficient evidentiary basis.

Specifically, Plaintiff argues that the horse's back and gluteal soreness and receipt of pain medicine should have been disclosed because that information would have been responsive to the questions that **[*1253]** Dr. Gomez asked Syquia regarding any "history of recurring lameness" and/or "any other pertinent medical history." Plaintiff posits that when Syquia responded "no" to the questions whether the horse had a "history of recurring lameness" or "any other pertinent medical history," Defendants violated *Rule 5H-26.003(12)* by not giving more information.

---

[1] The decisions of the United States Court of Appeals for the Fifth Circuit, as that court existed on September 30, 1981, handed down by that court prior to the close of business on that date, shall be binding as precedent in the Eleventh Circuit, for this court, the district courts, and the bankruptcy courts in the circuit. *Bonner v. Pritchard, 661 F.2d 1206, 1207 (11th Cir. 1981)* (en banc).

Plaintiff emphasizes that Redman admitted that she failed to disclose certain insurance policy medical exclusions and that Dr. Ted Vlahos testimony's indicates that administration of the drug Bute to the horse demonstrates the horse's lameness.

However, there was also testimony presented at trial, including the testimony of Redman and Syquia, from which a jury could have reasonably concluded that the horse's soreness and the associated medicine were not sufficient to constitute "recurring lameness" or "medical history." (DE 288, Redman Test., Trial Tr., vol. 2 117:4-5 ("[The horse] did not have any ongoing serious problems. He had **[**6]** minor aches and pains."); *id.* 27: 7-9 ("Any horse that's doing that type of jumping is going to have some [gluteal] muscle soreness."); *id.* 23:7-13 ("I use these [chiropractic, acupuncture and laser therapies for the horse] as preventive medicine, because I know that when the animal is competing at a high level physically, that they have muscle soreness, or if they pull a -- they sprain something, or the gluteal muscles hurt or whatever. So if you catch these things before they become really very painful, then you prevent more serious injuries that take longer to heal."); *id.* 37:13-17 ("[H]orses and human athletes, whenever they're performing at a high level, soreness occurs, or strain occurs, and it's temporary, it gets treated, it doesn't cause a problem, and then next year he doesn't have it . . ."); *id.* 39: 17-19 ("And the sore back was not an ongoing thing. It came up here and there, but it did not -- was not anything that presented itself every single time."); *id.* 100:3-6 ("The vets told me it wasn't that important and would not affect the horse in the long-term. This was a temporary situation that was easily taken care of with new shoes and packing."); DE 289, Syquia Test., Trial Tr., vol. **[**7]** 3 249:22-24 ("After certain competitions, after many days in a row, as is customary in our industry, I gave the horse one Bute tablet after competition."); *id.* 84:21-25 ("[A]t times after competition, after maybe the second day, it was customary that all my horses would get one Bute tablet in their feed after large competitions just as a nice way to go to sleep, yeah, after a hard week's of competition, like if you went to the gym and did a hard workout . . . ."); *id.* 14:10-11 ("I never found Vorst to have a sore back that was a concern to me."). It was within the province of the jury to credit the testimony of Redman and Syquia regarding the horse's soreness and the use of medication over the competing evidence.

Lastly, the Court notes that because the jury did not find for Plaintiff on any of the claims, the issue of the sufficiency of the evidence (or alleged lack thereof) supporting Defendants' affirmative defenses is moot. For the reasons stated above, the Court finds that the evidence does not point so strongly and overwhelmingly in favor of Plaintiff that reasonable jurors could not have arrived at a verdict again him, and therefore Plaintiff is not entitled to judgment as a **[**8]** matter of law under *Rule 50 of the Federal Rules of Civil Procedure*.

B. Motion for New Trial

Plaintiff argues that he is entitled to a new trial under *Rule 59 of the Federal Rules of Civil Procedure* because the jury verdict is against the clear weight of the evidence. The law is clear that a **[*1254]** district court may grant a motion for a new trial only if the jury verdict is contrary to the great weight of the evidence. *Ard v. Sw. Forest Indus., 849 F.2d 517, 520 (11th Cir. 1988)*. "This rule does not, however, grant a license to the trial judge merely to substitute his judgment for that of the jury on questions of fact. Consequently, when considering a motion for new trial, the trial judge may weigh the evidence, but it is proper to grant the motion only if the verdict is against the great, not just the greater, weight of the evidence." *Id.*

Plaintiff argues (in a summary fashion) that the jury's findings are against the great weight of the evidence given the alleged evidence that Defendants failed to disclose material health issues about the horse prior to the purchase. Based on the evidence presented at trial, which is discussed in part in Section I.A *supra*, the Court finds that it was reasonable and not against the great weight of the evidence for a jury to conclude that Plaintiff failed to meet his burden and to return a verdict for Defendants. There is no **[**9]** basis to decide that the jury's verdict was contrary to the great weight of the evidence.

Plaintiff also contends that a new trial is warranted based upon the misconduct of opposing counsel in using arguments that eluded to Plaintiff's wealth. According to Plaintiff, defense counsel emphasized that Plaintiff spent millions of dollars acquiring horses in his opening and closing arguments. Although Plaintiff did not press this issue in his reply brief, the Court will consider the issue on the merits.

The Court of Appeals for the Eleventh Circuit has indicated a "reluctan[ce] to set aside a jury verdict because of an argument made by counsel during closing arguments." *Vineyard v. Cty. of Murray, Ga., 990 F.2d 1207, 1214 (11th Cir. 1993)*. "Statements made in oral arguments must be plainly unwarranted and clearly injurious to constitute reversible error." *Peterson v. Willie, 81 F.3d 1033, 1036 (11th Cir. 1996)*.

Based upon this Court's review of the record, including the arguments of counsel, the Court finds that the statements of counsel were far from "plainly unwarranted and clearly injurious" since they were relevant to the issues in the case. Defendants' arguments, which were based upon the evidence, were warranted to advance their theory that Plaintiff was an experienced and knowledgeable purchaser of expensive **[**10]** jumping horses, was not duped when he entered the transaction in question, and knew what to expect in terms of the performance level and limitations of the horse he purchased. Therefore, the Court will not grant Plaintiff's request for a new trial. *See* *BankAtlantic v. Blythe Eastman Paine Webber, Inc., 955 F.2d 1467, 1474 (11th Cir. 1992)* (affirming denial of a new trial in part because the offending remarks were based on record evidence that was relevant to the case).

C. Fee/Cost Entitlement

Defendants seek to recover their attorney's fees pursuant to *section 768.79 of the Florida Statutes.* The Florida offer of judgment statute entitles a defendant to an award of reasonable attorney's fees and costs if the defendant's offer is not accepted and if the judgment ultimately obtained is one of no liability or is at least twenty-five percent less than the offer.[2] *See* § 768.69, Fla. Stat. The record reflects that Defendant Syquia proposed a settlement offer of $500 and Defendant Redman offered $5,000, neither of which Plaintiff **[*1255]** accepted. Later, a judgment of no liability was entered in favor of Defendants after a jury found against Plaintiff on all counts.

The purpose behind the offer of judgment statute is to encourage early settlement and termination of the litigation. *See* *MGR Equip. Corp., Inc. v. Wilson Ice Enterprises, Inc., 731 So. 2d 1262, 1264 (Fla. 1999)*. "If a party is entitled to costs and fees pursuant to the **[**11]** provisions of this section, the court may, in its discretion, determine that an offer was not made in good faith. In such case, the court may disallow an award of costs and attorney's fees." *See* § 768.69, Fla. Stat. The offeree bears the burden of proving the absence of good faith with respect to the offer. *Levine v. Harris, 791 So.2d 1175, 1177 (Fla. 4th DCA 2001)*; *Donohoe v. Starmed Staffing, Inc., 743 So. 2d 623, 624 (Fla. 2d DCA 1999)*.

As explained by the Court of Appeals for the Eleventh Circuit, the good faith requirement under Florida law does not "demand that an offeror necessarily possess, at the time he makes an offer or demand under the statute, the kind or quantum of evidence needed to support a judgment. The obligation of good faith merely insists that the offeror have some reasonable foundation on which to base an offer." *McMahan v. Toto, 311 F.3d 1077, 1083 (11th Cir. 2002)*. The same standard applies where the offer is nominal: "[a] nominal offer is appropriate where the offeror has a reasonable basis to believe that exposure to liability is minimal." *Zachem v. Paradigm Properties Management Team, Inc., 867 So.2d 1263, 1263 (Fla. 1st DCA 2004)*; *see also* *McMahan, 311 F.3d at 1083* ("Although 'nominal offers are suspect where they are not based on any assessment of liability and damages,' *Fox v. McCaw Cellular Communications of Fla., Inc., 745 So.2d 330, 332 (Fla. 4th DCA 1998)*, they can be valid if the offerors have 'a reasonable basis at the time of the offer to conclude that their exposure was nominal.' *Id. at 333*.")).

1. Correct Standard

Plaintiff insists that in cases where a nominal **[**12]** offer is made a reasonable basis exists only where the "undisputed record" strongly indicates that the defendant had "no exposure." Plaintiff cites to language from a First District case, *General Mechanical Corp. v. Williams, 103 So. 3d 974, 976 (Fla. 1st DCA 2012)*, which in turn cites to a Third District case, *Event Services America, Inc. v. Ragusa, 917 So.2d 882, 884 (Fla. 3d DCA 2005)*. However, after the *General Mechanical* opinion was issued, in *Taylor Engingeering Inc. v. Dickerson Florida, Inc., 221 So. 3d 719, 723 (Fla. 1st DCA 2017)*, the First District receded from the "undisputed record"/"no exposure" standard. In *Taylor*, the First District explained that "*Event Services*—the case on which *General Mechanical* relies—appears to

[2] There is no dispute among the parties that in this diversity action, the Court looks to the substantive law of Florida to determine the attorney's fees issue.

be a deviation from the standard generally used in the Third District" and opined "the appropriate standard is whether the offeror had a reasonable basis to conclude that his/her exposure was nominal or minimal." *Id.* Likewise, and as noted in *Taylor*, aside from *Event Services*, the Third District has consistently held that the standard is whether there is a reasonable basis to conclude that a defendant's exposure was nominal. *See, e.g., Isaias v. H.T. Hackney Co., 159 So. 3d 1002, 1004-05 (Fla. 3d DCA 2015)* ("The determination of whether a 'nominal' offer is in good faith requires the trial court to consider whether the offeror had a reasonable basis to conclude, at the time of making the offer, that its exposure was nominal." (footnote omitted)); *Downs v. Coastal Sys. Int'l, Inc., 972 So. 2d 258, 262 (Fla. 3d DCA 2008)* (applying standard **[**13]** requiring a reasonable **[*1256]** conclusion of nominal exposure); *Dep't of Highway Safety & Motor Vehicles, Fla. Highway Patrol v. Weinstein, 747 So. 2d 1019, 1020 (Fla. 3d DCA 1999)* (applying standard requiring reasonable basis to conclude that exposure was nominal).

Moreover, the other Florida District Courts of Appeal consistently apply a standard requiring a reasonable basis to conclude that a defendant's exposure was nominal. *See Gawtrey v. Hayward, 50 So.3d 739, 743 (Fla. 2d DCA 2010)* ("In assessing whether Ms. Gawtrey's nominal offer was made in good faith, the trial court was required to look at whether Ms. Gawtrey had a reasonable basis when the offer was made to conclude that her exposure in the case was nominal."); *Nants v. Griffin, 783 So. 2d 363, 365 (Fla. 5th DCA 2001)* ("[A] minimal offer can be made in good faith if the evidence demonstrates that, at the time it was made, the offeror had a reasonable basis to conclude that its exposure was nominal."). Notably, in *Citizens Property Insurance Corp. v. Perez, 164 So. 3d 1, 3 (Fla. 4th DCA 2014)*, the Fourth District reversed the trial court's denial of attorney's fees based upon the trial court's improper use of the "undisputed record"/"no exposure" standard. The *Citizens* court explained:

> The trial court used the incorrect standard in determining whether Citizens' proposal for settlement was made in good faith. Perez cited to the trial court, and the trial court seems to have relied on, language from a Third District case, *Event Services America, Inc. v. Ragusa, 917 So. 2d 882 (Fla. 3d DCA 2005)*. In *Event **[**14]** Services*, the Third District stated: A reasonable basis for a nominal offer exists only where 'the undisputed record strongly indicate[s] that [the defendant] had no exposure' in the case. *Id. at 884* (quoting *Peoples Gas Sys., Inc. v. Acme Gas Corp., 689 So. 2d 292, 300 (Fla. 3d DCA 1997))* (emphasis added). However, the Fourth District has consistently held that: "The rule is that a minimal offer can be made in good faith if the evidence demonstrates that, at the time it was made, the offeror had a reasonable basis to conclude that its exposure was nominal." *State Farm Mut. Auto. Ins. Co. v. Sharkey, 928 So. 2d 1263, 1264 (Fla. 4th DCA 2006)* (emphasis added) (quoting *Connell v. Floyd, 866 So. 2d 90, 94 (Fla. 1st DCA 2004))*.

164 So. 3d 1 at 3.

Hence, given the state of the law in Florida, the Court cannot agree with Plaintiff that the correct standard to apply where a nominal offer is made is whether the "undisputed record" strongly indicates that the defendant had "no exposure." Rather, the correct standard under Florida law is whether the offerors had "a reasonable basis at the time of the offer to conclude that their exposure was nominal." *McMahan, 311 F.3d at 1083* (citation and internal quotation marks omitted) (applying Florida law).

2. Application of the Standard to the Facts at Bar

Having set forth the correct standard in determining whether Defendants' proposals for settlement were made in the absence of good faith, the Court now turns to the issue **[**15]** of whether Plaintiff has met that burden. As more fully explained below, the Court finds that there was a reasonable basis, at the time of the offers, for Defendants to conclude that their exposure was minimal.

Defendant Syquia's assessment of the fraud and negligent misrepresentation claims lodged against him at the time of the offer of judgment was that it was unlikely that a jury would find liability based upon the facts of the case. The fraud **[*1257]** and misrepresentation claims were premised upon Syquia's failure to advise Plaintiff that the horse allegedly had a lameness issue and a preexisting history and reputation as a "dirty stopper." However, there was credible evidence, which presented at trial, that Syquia, who had trained and competed with the horse for almost two years prior to the sale, did not know or have reason to believe the horse had a history of stopping for no reason in competitions. (*See* DE 289, Syquia Test., Trial Tr., vol. 3 104:6-13 (testifying under oath that the horse only stopped four times in competitions over two years (three of which were on videotape) and that none of those times were attributable to stopping for no reason).) Likewise, there was credible evidence, **[**16]** which was also presented at trial, that Syquia did not know or have reason to believe that the horse had a history of sore back or weak gluteal muscles. (*See* DE 289, Syquia Test., Trial Tr., vol. 3 12:18-20, 13:3-7 (testifying under oath that the horse did not have a sore back or weak gluteal muscles that were a concern to him).) Therefore, the Court finds that Defendant Syquia had a reasonable basis for concluding that Plaintiff would not be able to prove the fraud and misrepresentations claims based upon the horse's alleged history of "dirty stopping" and lameness.

Similarly, Defendant Redman's assessment of the claims lodged against her at the time of the offer of judgment (breach of contract, breach of express warranties, breach of implied warranty of fitness, breach of implied warranty of merchantability, violation of Magnuson Moss Warranty Act, unjust enrichment, respondeat superior, rescission, and Florida's Deceptive and Unfair Trade Practices Act) was that a jury was not likely to find in Plaintiff's favor based upon the facts of the case, among other reasons. Like the claims against Syquia, the claims against Redman were premised upon the horse's undisclosed alleged lameness **[**17]** and refusal to jump at competitions, as well as the alleged use of Simon Nizri as an undisclosed dual agent in the sale. However, according to Defendant Redman's Motion, prior to her offer of judgment Redman conducted extensive legal research, a factual investigation, and a review of document discovery obtained as a result of the litigation. (DE 277, Mot. at 2-4.) Redman based her offer of judgment on the following evidence, among other things: the horse's pre-purchase show record indicating strong recent performances with Syquia, the lack of a pre-purchase history of stopping without cause at competitions, the pre-purchase examination showing that the horse was sound (DE 258-1), the bill of sale (DE 57-2), the post-sale treatment of the horse, the post-sale examination showing lameness (DE 258-8), and Simon Nizri's admissions that he was not a dual agent. Although there was evidence that Redman had an insurance policy for the horse that contained exclusions for back and right hind conditions, it was not unreasonable to conclude that the insurance policy exclusions did not expose Defendants to more than minimal liability given the other evidence and Defendants' own experience and personal **[**18]** knowledge about the horse and the transaction. As a result, the Court finds that Defendant Redman had a reasonable basis for concluding that a jury would not find in favor of Plaintiff on the claims brought against her, which centered upon the horse's alleged history of "dirty stopping" and/or lameness and the use of a dual agent.

Plaintiff's arguments to the contrary are not availing. Plaintiff argues that the $500 and $5,000 offers made by Defendants Syquia and Redman, respectively, were not made in good faith for the following main reasons: (1) the offers were nominal **[*1258]** compared to the potential liability and attorney's fees; (2) there was no likelihood that Plaintiff would accept the offers; (3) no supporting declarations were filed; (4) the offers were premature because discovery had not been propounded at the time of Syquia's offer and had not been completed at the time of Redman's offer; (5) the claims were highly fact-specific and would almost certainly require lengthy litigation and a jury trial; (6) Defendants' motions for summary judgment were denied; and (7) the issues that were litigated were novel and/or complex. The Court considers each argument in turn.

First, Plaintiff's **[**19]** argument that the offers were nominal does not establish bad faith. Plaintiff heavily relies upon the decision by the Fourth District Court of Appeal in *Eagleman v. Eagleman, 673 So. 2d 946, 948 (Fla. 4th DCA 1996)*, which opined that "trial courts should view with considerable skepticism nominal offers . . . ." However, in *Fox v. McCaw Cellular Communications of Florida, Inc., 745 So. 2d 330 (Fla. 4th DCA 1998)*, the Fourth District explained the *Eagleman* decision with the following discussion:

> *Eagleman* merely holds that nominal offers are suspect where they are not based on any assessment of liability and damages. When a nominal offer is not based on an evaluation of potential liability and damages, the offer raises a question as to the intentions of the offeror. In that circumstance, *Eagleman* holds that an issue of good faith arises for resolution by the trial court.

Id. at 332-33.

"[N]ominal offers of judgment are not alone determinative of bad faith." *Id. at 333*. The mere fact a plaintiff seeks a high amount of damages does not undermine a defendant's reasonable belief of minimal exposure. *See McMahan v. Toto, 311 F.3d 1077, 1083 (11th Cir. 2002)* (affirming district court's finding that $100 offer was made in good faith over argument that the nominal offer could not have been made in good faith because lawsuit involved millions of dollars in potential liability).

Here, as explained above, Defendants' offers **[**20]** were based upon a reasonable evaluation of potential liability and damages, and, as indicated in the case law, the nominal nature of the offers is not sufficient to show bad faith. *See* *Fox, 745 So. 2d at 333* (citing *Weesner v. United Services Auto. Ass'n, 711 So. 2d 1192 (Fla. 5th DCA 1998)* (fact that offer is nominal not necessarily determinative of issue of good faith); *State Farm Mut. Auto. Ins. Co. v. Marko, 695 So. 2d 874 (Fla. 2d DCA 1997)* (offer of $1 treated as in good faith); *Peoples Gas System Inc. v. Acme Gas Corp., 689 So. 2d 292 (Fla. 3d DCA 1997)* (offer of $2,500 in case later settled for $3.5 million not determinative of bad faith)).

Second, contrary to Plaintiff's contention otherwise, "a mere belief that a figure offered or demanded will not be accepted does not necessarily suggest an absence of good faith . . . ." *Ryan v. Lobo De Gonzalez, 841 So. 2d 510, 522 (Fla. 4th DCA 2003)* ("A mere belief that the figure offered or demanded will not be accepted does not necessarily suggest an absence of good faith, where the offeror fully intends to conclude a settlement if the offer is accepted as made, and the amount of the offer is not so widely inconsistent with the known facts of the case as to suggest on its face the sole purpose of creating a right to fees if it is not accepted." (quoting *Levine v. Harris, 791 So. 2d 1175, 1178 (Fla. 4th DCA 2001))*. Relatedly, the Florida Supreme Court has opined that "the reasonableness of the rejection is irrelevant to the question of entitlement." *TGI Friday's,* ***[*1259]*** *Inc. v. Dvorak, 663 So. 2d 606, 613 (Fla. 1995)*.

Third, the lack of a supporting declaration attached **[**21]** to the Motions for Fee Entitlement does not automatically defeat Defendants' Motions for Fee Entitlement. The case law requires Defendants to "come forward with a reasonable explanation for [their] offer," which they did in this case. *See* *Allstate Ins. Co. v. Manasse, 715 So. 2d 1079, 1082 (Fla. 4th DCA 1998)* (suggesting that the good faith inquiry is properly made based upon the parties' arguments and a review of the evidence at trial without the need of any additional evidence). Plaintiff cites *Pickett v. R.J. Reynolds Tobacco Co., 948 F. Supp. 2d 1314, 1325 (M.D. Fla. 2013)*, *aff'd*, *564 F. App'x 981 (11th Cir. 2014)*, for the untethered proposition that the Court cannot make a finding as to a subjectively reasonable motivation for the offers of judgment because the Motions for Fee Entitlement were not supported by declarations. While the *Pickett* court noted that the record there did not contain affidavits as to the reason for the offer, nothing in the *Pickett* opinion (or any other Florida case) indicates that the explanation for an offer of judgment must be contained within a sworn affidavit. On the contrary, in deciding whether the offer lacked good faith, the *Pickett* court instructed that a court should "consider the entire record in its analysis." *Id. at 1324*.

In any event, the Court notes that in response to Plaintiff's concern regarding the lack of an affidavit on the **[**22]** issue of good faith, Defendant Syquia filed his own affidavit and the affidavit of his attorney with his reply brief. In the former, Syquia declared under penalty of perjury that he based his proposal for settlement on his "firsthand knowledge of the facts surrounding the transaction." (DE 281-1, Decl. of Syquia ¶ 8.) In the latter, Amanda S. Luby, Esq., who is experienced in the area of equine law, provided the following basis for Syquia's offer of judgment (in relevant part):

> At the time the Proposal was made, Mr. Syquia and I had engaged in several in-depth conversations regarding the background of the case and the transaction at the heart of the lawsuit. It was during these conversations that I learned the facts set forth in my December 17, 2015 correspondence. As part of my fact-finding prior to when the Proposal was made, I also had multiple conversations with counsel for Mrs. Redman and Michael Romm, who was the attorney for Simon Nizri, a defendant who settled with the Plaintiff and was dropped from the case in May 2016.
>
> In addition to these conversations, I was also able to review a number of documents that supported Mr. Syquia's position prior to the time that the Proposal **[**23]** was served. These documents were the Bill of Sale and the Pre-Purchase Examination Report of Vorst ("PPE"), both of which Mr. Zendejas attached to his Complaint, as well as the horse's publicly available show record and text messages between Defendant Simon Nizri and Mr. Zendejas regarding the payment of commission. I also viewed various videos easily accessible on-line of Vorst competing before the Proposal was served.

> As a result, I was aware of many facts in advance of discovery beginning in the case. For example, I was aware that Vorst had been examined by internationally respected equine veterinarian Dr. Jorge Gomez as part of a Pre-Purchase Examination requested and paid for by Mr. Zendejas, and that Dr. Gomez had found Vorst to be in satisfactory condition, with an exception noted by Dr. Gomez in the PPE. I was also aware that it was only after this examination **[*1260]** that Mr. Zendejas made the final decision to purchase Vorst.
> Additionally, I was aware that Vorst had a show record which was inconsistent with Plaintiff's allegations concerning the horse.
>
> I was also aware that the Bill of Sale memorializing the transaction stated that Vorst was being sold "as is" and that the seller had **[**24]** not made any representations or warranties with respect to Vorst, nor were there any representations or warranties that Plaintiff nor his agent, Nizri, ever requested should be in the Bill of Sale.
> The facts known to be by the date of the Proposal undermined Plaintiff's claims both legally and factually.
> In addition to the facts known to me at the time. I had also familiarized myself with the case law that I believed supported Mr. Syquia's position, both with regard to the claims against him and his own affirmative defenses, prior to the Proposal being served. Some, but not all, of this legal research is referenced in my December 17, 2015 correspondence setting forth the basis for Mr. Syquia's Proposal.
> Based on the relevant case law, Mr. Syquia's knowledge of the underling transaction as shared with me, my years of experience in the field of equine law, and my review of the Bill of Sale, PPE, show record, and the Nizri text messages regarding commissions, I was able to assess Mr. Syquia's exposure in the lawsuit at the time the Proposal was made. It was my reasonable and good faith belief at the time the Proposal was made that Mr. Syquia's exposure was minimal.

(DE 281-2.) Based upon **[**25]** the Court's review of Syquia's and Ms. Luby's affidavits, the Court finds that the record contains ample support for the objective and subjective reasonableness of Defendant Syquia's offer of judgment, which, incidentally, also lends support to the reasonableness of Defendant Redman's offer.

Fourth, the Court finds that the timing of the offers does not show the absence of good faith under the circumstances of this case. It is true that discovery had not been propounded at the time of Syquia's offer and had not been completed at the time of Redman's offer. Nevertheless, courts have granted motions for reasonable fees under *section 768.79* in cases where substantial discovery had not been completed at the time of the offers of judgment. *E.g., Ryan, 841 So. 2d at 522-23* (reversing trial court's refusal to award attorney's fees under *section 768.79* because even though substantial discovery had not been completed defendants had a reasonable foundation to believe they had a viable defense at the time the offers were made). For example, in *Land & Sea Petroleum, Inc. v. Bus. Specialists, Inc., 53 So. 3d 348, 354-55 (Fla. 4th DCA 2011)*, a Florida appellate court reversed the trial court's refusal to award attorney's fees under *section 768.79* even though little discovery had been exchanged. *Id.* The court reasoned that "[t]he seller never wavered from its **[**26]** argument that the brokerage commission contract was unenforceable because its contract with the buyer was unenforceable. The seller needed very little, if any, discovery to support that argument because the lack of essential terms in the contract with the buyer was apparent from the face of that contract." *Id.*

Here, as in *Land & Sea Petroleum*, Defendants have been steadfast in their argument that the bill of sale and the pre-purchase examination (both of which were attached to the complaint), the horse's publicly-available show record, and their own knowledge of the horse and the transaction disproved Plaintiff's claims. While **[*1261]** protracted discovery may have been necessary to prepare this case for a jury trial, the record shows that little discovery was needed for Defendants to arrive at a reasonable assessment of liability.

Fifth, because there was a reasonable basis for concluding that their exposure was nominal, Plaintiff's argument that the claims in this case were highly fact-specific and required a jury trial, while true, does not indicate that the offers lacked good faith. *Donovan Marine, Inc. v. Delmonico, 40 So. 3d 69, 71 (Fla. 4th DCA 2010)* ("When the employer made the proposal, it had a reasonable basis for admitting no liability. Although its **[**27]** employee admitted to making the statement, the employer never admitted the statement was defamatory or that it was made in the course and scope of the employee's employment. Rather, the employer maintained the statement was not defamatory because it was true, and further that it failed to cause any resulting damage. The jury verdict confirmed that employer's position."); *see also* *Talbott v. Am. Isuzu Motors, Inc., 934 So. 2d 643, 647 (Fla. 2d DCA 2006)*

("Isuzu made an initial offer of $500 and a subsequent offer of $1500 because it evaluated no liability, a conclusion also reached by the jury."); *Dean v. Vazquez, 786 So.2d 637, 640 (Fla. 4th DCA 2001)* ("[A]s confirmed by the jury verdict the Defendants had a reasonable basis to conclude their exposure was nominal.").

Sixth, and similarly, the fact that Defendants' motions for summary judgment were denied is not a sufficient basis to support a finding of a lack of good faith because the record provided a reasonable basis for their offers. *Isaias v. H.T. Hackney Co., 159 So. 3d 1002, 1005 (Fla. 3d DCA 2015)* ("The fact that a motion for summary judgment had been denied without elaboration does not control the assessment of the proposals for settlement. We therefore conclude that Hackney failed to demonstrate that the settlement proposals by REW Dairy and Toni Gas were not made in good faith, and we reverse that determination in **[**28]** the orders below.").

Seventh, the novelty of the factual situation in this case does not undermine the reasonable basis of Defendants' offers under the circumstances of this case. As an initial matter, Plaintiff's attempt to analogize the factual issues in this case to the novelty of the legal theories at issue in *JES Properties, Inc. v. USA Equestrian, Inc., 432 F. Supp. 2d 1283 (M.D. Fla. 2006)* falls flat. In *JES Properties*, the plaintiffs sought to "recover under antitrust laws based upon the alleged anticompetitive impact of the [d]efendants' adherence to the rules promulgated by the national governing body of equestrian sport in the United States." *Id. at 1290*. In addressing another issue in the case, the court described the novelty of the issues presented in the case as follows: "the facts of this case did not squarely fall within binding case precedent [and] [p]laintiffs attempted to stretch the parameters of existing ***antitrust law*** in bringing their claims." *Id. at 1291*. Hence, the district court there found that the offers of judgment were not made in good faith in part because of "the novelty and difficulty of the issues in th[e] case." *Id. at 1295*.

Here, unlike the case in *JES Properties*, Plaintiff was not attempting to stretch the parameters of existing precedent or make novel legal arguments **[**29]** in bringing his claims, which may have made Defendants' task of assessing liability difficult. The dispute in this case was, at its essence, a factual one; although the case might have involved numerous claims and protracted factual discovery concerning equine performance, the case did not raise any novel legal theories difficult to assess.

[*1262] As to the factual issues in the case, Defendants were personally familiar with the horse in question, the horse's abilities, and the subject of equine performance in general and had ready access to the horse's show record. Moreover, Defendant Syquia's attorney, Amanda S. Luby, Esq., who made the offer, had "handled a significant number of cases in the equine law field throughout [her] career." (DE 281-2, Decl. of Amanda S. Luby, Esq. ¶ 3.) Thus, Defendants were uniquely positioned to make early judgment calls about their exposure in the case.

II. CONCLUSION

For the foregoing reasons, the Court concludes that Plaintiff is not entitled to judgment as a matter of law or a new trial. Further, Defendants have established a reasonable foundation for their offers of judgment and therefore their Motions for Fee Entitlement under *section 768.79 of the Florida Statutes* are granted.[3]

The parties shall **[**30]** confer on Defendants' pending Motions for Reasonable Attorney's Fees and Costs (DE 265, 271, 303, 308) as indicated below.

Accordingly, it is **ORDERED AND ADJUDGED** that Plaintiff's Motion for Judgment as a Matter of Law and in the Alternative Motion for a New Trial (DE 270) is **DENIED**. Defendant Redman's and Syquia's respective Motions for Entitlement to Attorney's Fees and Costs (DE 263 & 264) are **GRANTED**. Plaintiff's motion to stay (DE 286) is **DENIED** as moot.

---

[3] The alternative request for fees under *section 501.2105 of the Florida Statutes* is moot.

In light of the Court's Order herein, the parties shall confer on Defendants' pending Motions for Reasonable Attorney's Fees and Costs (DE 265, 271, 303, 308). After conferring, the parties shall file, within fifteen (15) days of the entry date of this Order, a Joint Notice indicating whether the parties have arrived at a mutual agreement on the remaining fees and costs issues. If the parties cannot reach an agreement, the Court will refer these motions to the assigned United States Magistrate Judge.

DONE AND ORDERED in Chambers at West Palm Beach, Palm Beach County, Florida, this 25th day of September, 2018.

/s/ Kenneth A. Marra

HN1[] **Racketeer Influenced & Corrupt Organizations, Claims**

Section 1964(c) of the Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C.S. §§ 1961-1968*, creates a private right of action for a plaintiff that is injured in his or her business or property as a result of conduct that is proscribed by the statute. In RJR Nabisco, Inc. v. European Community, the Supreme Court determined that, although a litigant may file a civil suit against parties for racketeering activity committed abroad, *§ 1964(c)*'s private right of action is only available to a litigant that can allege and prove a domestic injury to its business or property.

HN2[] **Racketeer Influenced & Corrupt Organizations, Remedies**

The Racketeer Influenced and Corrupt Organizations Act (RICO), 18 U.S.C.S. §§ 1961-1968, creates a private civil cause of action that allows any person injured in his business or property by reason of a violation of section 1962 to sue in federal district court. 18 U.S.C.S. § 1964(c). A successful plaintiff may recover threefold the damages. 18 U.S.C.S. § 1964(c).

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN3[] **Racketeer Influenced & Corrupt Organizations, Claims**

The Racketeer Influenced and Corrupt Organizations Act (RICO), 18 U.S.C.S. §§ 1961-1968, is implicated when defendants have engaged in a pattern of racketeering activity. 18 U.S.C.S. § 1962(c). That pattern consists of certain statutorily defined predicate acts encompassing dozens of state and federal offenses that together demonstrate the existence or threat of continued criminal activity. The statute sets forth four specific prohibitions aimed at different ways in which a pattern of racketeering activity may be used to infiltrate, control, or operate an enterprise's criminal misconduct. Section 1962(c) proscribes participating in the conduct of an interstate enterprise's affairs through a pattern of racketeering activity, which RICO defines as at least two acts of racketeering activity. 18 U.S.C.S. § 1961(5). Section 1962(d) makes it unlawful to conspire to violate subsections (a) through (c).

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN4[] **Racketeer Influenced & Corrupt Organizations, Claims**

To prove a violation under 18 U.S.C.S. §1962(c) of the Racketeer Influenced and Corrupt Organizations Act (RICO), 18 U.S.C.S. §§ 1961-1968, Plaintiffs must show: (1) that two or more persons agreed to conduct or to participate, directly or indirectly, in the conduct of an enterprise's affairs through a pattern of racketeering activity; (2) that the defendant was a party to or member of that agreement; and (3) that the defendant joined the agreement or conspiracy knowing of its objective to conduct or participate, directly or indirectly, in the conduct of an enterprise's affairs through a pattern of racketeering activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

HN5[] **Racketeer Influenced & Corrupt Organizations, Claims**

To establish liability pursuant to 18 U.S.C.S. § 1962(c) of the Racketeer Influenced and Corrupt Organizations Act (RICO), 18 U.S.C.S. §§ 1961-1968, a plaintiff must establish the existence of an enterprise that exists separate and apart from the pattern of activity in which the enterprise engages. RICO defines "enterprise" as any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity. 18 U.S.C.S. § 1961(4). Plaintiffs can show the presence of an enterprise by pointing to a group of persons associated together for a common purpose of engaging in a course of conduct.

HN6[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The relevant inquiry as to whether the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*, applies extraterritorially, that is, to events occurring and injuries suffered outside the United States, involves two separate questions: first, whether RICO's substantive provisions apply to extraterritorial conduct, and second, whether RICO's private right of action affords relief for injuries that are suffered outside the United States.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

Governments > Legislation > Interpretation

Evidence > Inferences & Presumptions > Presumptions > Creation

International Trade Law > Authority to Regulate

Governments > Legislation > Statutory Remedies & Rights

HN7[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Absent clearly expressed congressional intent to the contrary, federal laws will be construed to have only domestic application. This presumption against extraterritoriality avoids the international discord that can result when U.S. law is applied to conduct in foreign countries. It also ensures that Congress—rather than the judiciary—is responsible for navigating the delicate field of international relations. Nevertheless, the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*, can reach extraterritorial conduct. However, *18 U.S.C.S. § 1964(c)* does not allow recovery for injuries suffered in foreign territories. Nothing in *§ 1964(c)* provides a clear indication that Congress intended to create a private right of action for injuries suffered outside of the United States. Thus, although RICO creates a cause of action for misconduct committed abroad, *§ 1964(c)* requires a domestic injury. There is no consensus on what specific factors must be considered when deciding whether an injury is domestic or foreign.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

Governments > Legislation > Statutory Remedies & Rights

International Law > ... > Comity Doctrine > Areas of Law > Commercial Transactions

HN8[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Courts are advised to proceed cautiously when deciding if plaintiffs under the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*, have alleged a sufficient domestic injury to recover under *18 U.S.C.S. § 1964(c)*. Providing a private civil remedy for foreign conduct creates a potential for international friction beyond that presented by merely applying U.S. substantive law to that foreign conduct. The domestic injury requirement promotes comity and avoids international friction because it, inter alia, creates less of an opportunity for litigants in foreign countries to bypass those territories' less generous remedial schemes. Allowing litigants who are abroad to sidestep foreign remedies only to seek those available under domestic law would upset the balance of competing considerations embodied in the laws of foreign countries. The need to enforce the presumption against extraterritoriality is at its apex when extraterritorial application of U.S. law raises the risk of international friction.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN9[] **Racketeer Influenced & Corrupt Organizations, Claims**

When a case does not involve Article III standing, but rather presents an issue of statutory standing, subject matter jurisdiction is not implicated, and the parties incorrectly rely on *Fed. R. Civ. P. 12(b)(1)* to challenge standing. Civil RICO standing is usually viewed as a *Fed. R. Civ. P. 12(b)(6)* question of stating an actionable claim, rather than as a 12(b)(1) question of subject matter jurisdiction. Moreover, given that *Rule 12(b)(6)* provides a plaintiff with significantly more protections, and because an appellate court may affirm on any ground supported by the record and there is no prejudice to appellants in reviewing the district court's dismissal as if it were grounded on *Rule 12(b)(6)*, the appellate court may review a statutory standing matter under *Rule 12(b)(6)*. Accordingly, the appellate court considers only the allegations contained in the complaint, exhibits attached to the complaint and matters of public record. In evaluating whether the complaint adequately pleads the elements of standing, the appellate court accepts as true all material allegations set forth in the complaint and construes those facts in favor of the nonmoving party.

HN11[] **Racketeer Influenced & Corrupt Organizations, Claims**

Two schools of thought have emerged regarding the requirement of proof of domestic injury for civil claims under the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*. The locus of effects test looks only to where the plaintiff felt the effects of the alleged injury and not where the injurious acts were allegedly committed. Courts applying this approach have largely focused upon the plaintiffs' place of residency or principal place of business. Other courts are guided by where the alleged misconduct was targeted or directed and focus largely, though not exclusively, on that location.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > International Aspects > International Application of US Law

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN12[] **Racketeer Influenced & Corrupt Organizations, Claims**

There is a general consensus among the courts that have had to apply RJR Nabisco's holding that *18 U.S.C.S. § 1964(c)* of the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*, requires a domestic injury, that the location of a RICO injury depends on where the plaintiff suffered the injury—not where the injurious conduct took place. That may result from the U.S. Supreme Court's framing of the issue: whether RICO's private right of action, contained in *§ 1964(c)*, applies to injuries that are suffered in foreign countries?

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

Antitrust & Trade Law > International Aspects > International Application of US Law

HN13[] **Racketeer Influenced & Corrupt Organizations, Claims**

In the context of claims under *18 U.S.C.S. § 1964(c)* of the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*, for which plaintiffs are required to show a domestic injury, courts grappling with alleged injuries to intangible property have largely tried to trace the location of the effects of the alleged injurious conduct to determine the place of injury. In other words, these courts have aligned themselves with the locus of effects approach and focus on where the plaintiff felt the effects of the injury-inducing predicate acts, no matter where they occurred.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Governments > Legislation > Statutory Remedies & Rights

Antitrust & Trade Law > International Aspects > International Application of US Law

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN14[] **Racketeer Influenced & Corrupt Organizations, Claims**

The analysis of whether a plaintiff has alleged a domestic injury for purposes of a claim under *18 U.S.C.S. § 1964(c)* of the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*, must focus principally on where the plaintiff has suffered the alleged injury. Nothing in *§ 1964(c)* provides a clear indication that Congress intended to create a private right of action for injuries suffered outside of the United States.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

Antitrust & Trade Law > International Aspects > International Application of US Law

HN15[] **Racketeer Influenced & Corrupt Organizations, Claims**

For purposes of a claim under *18 U.S.C.S. § 1964(c)* of the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*, whether an alleged injury to an intangible interest was suffered domestically is a particularly fact-sensitive question requiring consideration of multiple factors. These include, but are not limited to, where the injury itself arose; the location of the plaintiff's residence or principal place of business; where any alleged services were provided; where the plaintiff received or expected to receive the benefits associated with providing such services; where any relevant business agreements were entered into and the laws binding such agreements; and the location of the activities giving rise to the underlying dispute. the applicable factors depend on the plaintiff's allegations; no one factor is presumptively dispositive. A domestic injury under *§ 1964(c)* is found where the relevant factors, appropriately weighed, establish that the alleged harm was suffered in the United States.

Antitrust & Trade Law > International Aspects > International Application of US Law

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN16[] **Racketeer Influenced & Corrupt Organizations, Claims**

While courts have generally noted that a company suffers economic injuries at its principal place of business, few have done so in the context of a claim under *18 U.S.C.S. § 1964(c)* of the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*, that would extend beyond the borders of the United States. Even fewer have done so where the alleged conduct had an effect on intangible property. Although a litigant's residence or principal place of business is obviously a relevant consideration, and perhaps a useful place to begin a *§ 1964(c)* inquiry, it does not necessarily determine the ultimate question of whether there has been a domestic injury. It is merely one factor that informs the court's inquiry.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

Antitrust & Trade Law > International Aspects > International Application of US Law

HN17[] **Racketeer Influenced & Corrupt Organizations, Claims**

It cannot be the case that the mere fact that a loss is economic means that foreign corporations are unable to avail themselves of the protections of civil actions under *18 U.S.C.S. § 1964(c)* of the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*, even in cases where all of the actions causing the injury took place in the United States. There is no evidence that Congress meant to so preclude foreign corporations from the protection offered by *§ 1964(c)*, and doing so conflicts with the Supreme Court's recognition that Congress did not limit RICO to domestic enterprises.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > International Aspects > International Application of US Law

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

Antitrust & Trade Law > Clayton Act > Jurisdiction

Antitrust & Trade Law > Clayton Act > Scope

HN18[] **International Aspects, Foreign Trade Antitrust Improvements Act**

There is good reason not to interpret *18 U.S.C.S. § 1964(c)* of the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, *18 U.S.C.S. §§ 1961-1968*, to cover foreign injuries just because the *Clayton Act*, a federal antitrust statute, does so. First, the *Clayton Act* explicitly authorizes foreign entities to bring suit under the statute. Further, the Foreign Trade Antitrust Improvements Act of 1982 excludes from the reach of antitrust laws most conduct that causes only foreign injury.

Opinion

[*696] McKEE, Circuit Judge

HN1[] *Section 1964(c)* of the *Racketeer Influenced and Corrupt Organizations Act ("RICO")*, *18 U.S.C. §§ 1961-1968*, creates a private right of action for a plaintiff that "is injured in his [or her] business or property" as a result of conduct that is proscribed by the statute. In *RJR Nabisco, Inc. v. European Community*, the Supreme Court determined that, although a litigant may file a civil suit against parties for racketeering activity committed **[**2]** abroad, *§ 1964(c)*'s private right of action is only available to a litigant that can "allege and prove a *domestic* injury to its business or property."[1]

In this case of first impression for this court, we must decide whether Plaintiffs pled sufficient facts to establish that they suffered a domestic injury under *§ 1964(c)*. For the reasons that follow, we will affirm the District Court's judgment that they have not.

I.

A. Factual Background

---

[1] *136 S. Ct. 2090, 2106, 195 L. Ed. 2d 476 (2016)*.

Plaintiffs Peter Humphrey and Yu Yingzeng are co-founders of ChinaWhys, an investigations firm that assists foreign companies doing business in China with American anti-bribery regulations compliance. Although Plaintiffs resided in Beijing during the events alleged in their complaint, much of ChinaWhys' business was conducted with American companies.

Plaintiffs allege that Defendants, GlaxoSmithKline plc ("GSK PLC") and GlaxoSmithKline LLC ("GSK LLC"), engaged in widespread bribery in China in order to obtain improper commercial advantages and that they did so with the approval of Mark Reilly. Reilly was the Chief Executive Officer of GlaxoSmithKline Investment Co., Ltd. ("GSK China"). GlaxoSmithKline is a multinational healthcare company that has offices in England and **[**3]** the United States. Sometime in 2011, a whistleblower who had worked for Defendants sent Chinese regulators correspondence accusing GlaxoSmithKline of bribery. Those allegations of corruption included a claim that GSK China maintained a policy of paying off doctors to **[*697]** increase sales. Thereafter, Defendants tried to uncover the whistleblower's identity.

As part of the ensuing inquiry, Humphrey and Yingzeng met with Reilly and other members of GSK China's senior management in GSK China's Shanghai office to discuss GlaxoSmithKline's internal investigation into the source of the whistleblower reports. According to Plaintiffs, GSK China representatives told ChinaWhys that it believed Vivian Shi, a GSK China employee who had been fired, orchestrated a "smear campaign" against GlaxoSmithKline by falsely accusing the pharmaceutical company of engaging in corrupt practices. ChinaWhys agreed to conduct a background investigation of Shi in what Plaintiffs describe as an attempt to limit the "efficacy of her extortion."[2] The details of that understanding were memorialized in a "Consultancy Agreement."[3] That agreement provided that, among other things, the arrangement was to be governed by Chinese **[**4]** law and that all disputes arising out of, or in connection to, it were subject to arbitration in China.[4]

GlaxoSmithKline later learned of additional whistleblower emails and GSK China asked ChinaWhys to also identify the source of those communications. In addition, GSK China personnel asked ChinaWhys to investigate certain Chinese agencies to find out who was conducting the investigation into GSK China's alleged misconduct.

In July 2013, Plaintiffs were arrested when police raided ChinaWhys' Shanghai office and Plaintiffs' Beijing home. The arrests resulted in Plaintiffs' conviction and imprisonment. They were deported from China upon their release from prison.

Reilly was subsequently convicted of bribing physicians and was also imprisoned and deported from China upon his release. The Chinese government fined GSK PLC $492 million for its bribery practices in the region, and GSK PLC entered a settlement agreement with the United States Securities Exchange Commission.

Plaintiffs brought this suit in the United States District Court, alleging, *inter alia*, RICO claims and pendent state law claims. GSK China was not named as a party.[5] Plaintiffs contend that their business was "destroyed and **[**5]** their prospective business ventures eviscerated" as a result of Defendants' misconduct.[6] They also contended that "GSK officials" knew that the accusations of corruption were true and that the bribery had been carried out at Reilly's direction.

---

[2] Plaintiffs' Br. 13, 16.

[3] Joint App'x A69.

[4] Joint App'x A74.

[5] GSK China was not named a defendant even though it is the arm of GlaxoSmithKline that ChinaWhys entered into the Consultancy Agreement with. Moreover, as the District Court observed, "all of Plaintiffs' contacts were with employees of either GSK China or GSK Pte Ltd., a Singaporean entity, and none were with Defendants. From the complaint, it is apparent that it was GSK China employees and GSK China's CEO who requested that Plaintiffs investigate Shi . . . ." *Humphrey v. GlaxoSmithKline, PLC., No. CV 16-5924, 2017 U.S. Dist. LEXIS 162495, 2017 WL 4347587, at *7 (E.D. Pa. Sept. 29, 2017)*. The decision not to name GSK China as a defendant is likely an attempt to downplay ties to China.

[6] Plaintiffs' Br. 8.

Defendants moved to compel arbitration, or, in the alternative, to dismiss the complaint for lack of subject-matter jurisdiction. They argued that subject-matter jurisdiction was lacking because, even though Plaintiffs may have had numerous clients in the United States, their alleged injuries were foreign because Plaintiffs' **[*698]** business was in China, their only offices were in China, no work was done outside of China, Plaintiffs resided in China, and because any destruction of Plaintiffs' business occurred while Plaintiffs were imprisoned in China by Chinese authorities. The District Court agreed and granted Defendants' motion to dismiss. This timely appeal followed.

B. Legal Background

HN2[] RICO "creates a private civil cause of action that allows '[a]ny person injured in his business or property by reason of a violation of *section 1962* to sue in federal district court . . . ."[7] A successful plaintiff may "recover threefold the damages. . **[**6]** . ."[8]

HN3[] RICO is implicated when defendants have engaged in a "pattern of racketeering activity."[9] That pattern consists of certain statutorily defined predicate acts "encompass[ing] dozens of state and federal offenses" "that together demonstrate the existence or threat of continued criminal activity."[10] The statute "sets forth four specific prohibitions aimed at different ways in which a pattern of racketeering activity may be used to infiltrate, control, or operate a[n] enterprise['s]" criminal misconduct.[11] Plaintiffs allege that Defendants violated two of those prohibitions—*§§ 1962(c)* and *(d)*. *Section 1962(c)* proscribes participating in the conduct of an interstate enterprise's affairs through a "pattern of racketeering activity,"[12] which RICO defines as "at least two acts of racketeering activity."[13] *Section 1962(d)* makes it unlawful to conspire to violate *subsections (a) through (c)*.[14]

---

[7] *RJR Nabisco, Inc. v. European Cmty., 136 S. Ct. 2090, 2097, 195 L. Ed. 2d 476* (citing *18 U.S.C. § 1964(c)*).

[8] *18 U.S.C. § 1964(c)*.

[9] *18 U.S.C. § 1962(c)*.

[10] *RJR Nabisco, 136 S. Ct. at 2096-97*.

[11] *Id. at 2097* (brackets in original) (citation and internal quotation marks omitted).

[12] *18 U.S.C. § 1962(c)*.

[13] *18 U.S.C. § 1961(5)*.

[14] *Id.* (citing *18 U.S.C. § 1962*). *18 U.S.C. § 1962* provides:

> (a) It shall be unlawful for any person who has received any income derived, directly or indirectly, from a pattern of racketeering activity or through collection of an unlawful debt in which such person has participated as a principal within the meaning of *section 2, title 18, United States Code*, to use or invest, directly or indirectly, any part of such income, or the proceeds of such income, in acquisition of any **[**7]** interest in, or the establishment or operation of, any enterprise which is engaged in, or the activities of which affect, interstate or foreign commerce. A purchase of securities on the open market for purposes of investment, and without the intention of controlling or participating in the control of the issuer, or of assisting another to do so, shall not be unlawful under this subsection if the securities of the issuer held by the purchaser, the members of his immediate family, and his or their accomplices in any pattern or racketeering activity or the collection of an unlawful debt after such purchase do not amount in the aggregate to one percent of the outstanding securities of any one class, and do not confer, either in law or in fact, the power to elect one or more directors of the issuer.
>
> (b) It shall be unlawful for any person through a pattern of racketeering activity or through collection of an unlawful debt to acquire or maintain, directly or indirectly, any interest in or control of any enterprise which is engaged in, or the activities of which affect, interstate or foreign commerce.

[*699] ***HN4***[] To prove a violation under *§1962(c)*, Plaintiffs must show:

> (1) that two or more persons agreed to conduct or to participate, directly or indirectly, in the conduct of an enterprise's affairs through a pattern of racketeering activity; (2) that the defendant was a party to or member of that agreement; and (3) that the defendant joined the agreement or conspiracy knowing of its objective to conduct or participate, directly or indirectly, in the conduct of an enterprise's affairs through a pattern of racketeering activity.[15]

HN5[] To establish liability pursuant to *§ 1962(c)*, a plaintiff must establish the existence of an enterprise that exists "separate and apart from the pattern of activity in which [the enterprise] engages."[16] RICO defines "enterprise" as "any individual, partnership, corporation, association, or other legal entity, and any union or group **[**9]** of individuals associated in fact although not a legal entity."[17] Plaintiffs can show the presence of an enterprise by pointing to a "group of persons associated together for a common purpose of engaging in a course of conduct."[18]

The complaint alleges that the enterprise here is an association of, *inter alia*, Defendants, "others convicted of crimes related to GSK activities," "and other countries who accepted bribes and kickbacks from GSK."[19] Plaintiffs further allege that Defendants participated in the following racketeering activity: mail fraud; wire fraud; obstruction of a criminal investigation; tampering with witnesses; retaliating against a witness, victim, or an informant; use of interstate facilities to conduct unlawful activity; and money laundering.[20] Plaintiffs contend they lost their business as a result of these alleged predicate racketeering acts.[21]

In *RJR Nabisco*, the Supreme Court considered ***HN6***[] "whether RICO applies extraterritorially—that is, to events occurring and injuries suffered outside the United States."[22] The relevant inquiry involves two separate questions: first, whether RICO's substantive provisions apply to extraterritorial *conduct*, and second, whether RICO's private right **[**10]** of action affords relief for "*injuries* that are suffered" outside the United States.[23]

The Court explained that ***HN7***[] "[a]bsent clearly expressed congressional intent to the contrary, federal laws will be construed to have only domestic application."[24] This presumption against extraterritoriality "avoid[s] the

[24] *Id.* (citation omitted).

international discord that can result when U.S. law is applied to conduct in foreign countries[.]"[25] It also ensures that Congress—rather than the **[*700]** judiciary—is responsible for navigating the "delicate field of international relations."[26] Nevertheless, the Court concluded that RICO can reach extraterritorial conduct.[27] However, the Court held that *18 U.S.C. § 1964(c)* does not allow recovery for injuries suffered in foreign territories.[28] The Court explained that "[n]othing in *§ 1964(c)* provides a clear indication that Congress intended to create a private right of action for injuries suffered outside of the United States."[29] Thus, although RICO creates a cause of action for misconduct committed abroad, *§ 1964(c)* requires a "domestic injury."

However, since the plaintiffs in *RJR Nabisco* had waived their claims for domestic injuries,[30] the Court did not need to explain how courts should determine whether an alleged injury has been **[**11]** suffered domestically or abroad.[31] Moreover, as the District Court observed here, there is a dearth of case law grappling with the *RJR Nabisco* decision.[32] In addition, those courts that have considered whether an alleged injury was suffered in the United States have applied varying standards.[33] Thus, there is no consensus on what specific factors must be considered when deciding whether an injury is domestic or foreign.

RJR Nabisco did advise ***HN8***[] courts to proceed cautiously when deciding if RICO plaintiffs have alleged a sufficient domestic injury to recover under *§ 1964(c)*. "[P]roviding a private civil remedy for foreign conduct creates a potential for international friction beyond that presented by merely applying U.S. substantive law to that foreign conduct."[34] The Court observed that the domestic injury requirement promotes comity and avoids international friction because it, *inter alia*, creates less of an opportunity for litigants in foreign countries to bypass those territories' "less generous remedial schemes."[35] The Supreme Court also warned that allowing litigants who are abroad to sidestep foreign remedies only to seek those available under domestic law would upset the balance of **[**12]** competing considerations embodied in the laws of foreign countries.[36] The Court cautioned that "the need

to enforce the presumption [against extraterritoriality] is at its apex" when extraterritorial application of U.S. law raises the "risk" of **[*701]** international friction.[37]

II.

HN9[] Because this case does not involve Article III standing, but rather presents an issue of statutory standing, subject matter jurisdiction is not implicated, and the parties incorrectly relied on *Rule 12(b)(1)*. Our precedent makes clear that "[c]ivil RICO standing is usually viewed as a *12(b)(6)* question of stating an actionable claim, rather than as a *12(b)(1)* question of subject matter jurisdiction."[38] Moreover, given that *Rule 12(b)(6)* provides a plaintiff with "significantly more protections,"[39] and because we may affirm on any ground supported by the record and "there is no prejudice to appellants in our reviewing the district court's dismissal as if it were grounded on *Rule 12(b)(6)*,"[40] we will review this matter under *Rule 12(b)(6)*. Accordingly, we "consider only the allegations contained in the complaint, exhibits attached to the complaint and matters of public record."[41] In evaluating whether the complaint adequately pleads the elements of standing, we accept as true **[**13]** all material allegations set forth in the complaint and construe those facts in favor of Plaintiffs, the nonmoving party.[42]

III.

Plaintiffs allege that, as a result of Defendants' racketeering activity, Plaintiffs lost "numerous ongoing contracts and engagements with U.S. law firms and companies"—purportedly destroying "Plaintiffs' business . . . and their prospective business ventures."[43] Plaintiffs thus seek redress under *§ 1964(c)*. However, as we stated above, ***HN10***[] *§ 1964(c)* creates no private cause of action for injuries "suffered outside the United States."[44] Accordingly, Plaintiffs' civil RICO suit can survive a motion to dismiss only if they sufficiently allege domestic injuries.[45] As we will explain, there is no bright-line rule that we can apply in assessing whether the alleged injuries are domestic or foreign. Rather, we must engage in a fact-intensive inquiry that will ordinarily include consideration of multiple factors that vary from case to case.

A. The Domestic Injury Requirement

The District Court recognized that ***HN11***[] two "schools of thought" have emerged regarding proof of domestic injury for civil RICO claims. The "locus of effects" test looks only to where the plaintiff felt the effects of the

[45] *Id.*

alleged **[**14]** injury and not where the injurious acts were allegedly committed.[46] Courts applying this approach have largely focused upon the plaintiffs' place of residency or principal place of business.[47] Other **[*702]** courts are guided by where the alleged misconduct was "targeted" or "directed" and focus largely, though not exclusively, on that location.[48] Although the District Court found the former school of thought more persuasive, it ultimately did not have to adopt either approach because Plaintiffs were unable to prevail under either test.[49]

This case presents an excellent example of why the inquiry required under *§ 1964(c)* must be undertaken in the context of the specific injuries alleged in a given case rather than relying on a one-size-fits-all approach or bright-line rule. Plaintiffs allege injuries to intangible business interests, including reputation and goodwill. Accordingly, relying on such tangible factors as the location of lost funds, damaged property or plaintiff's residence is not only of little use, but it could also be very misleading. Instead, we must consider multiple factors in determining whether the injuries in question **[**15]** were suffered in the United States or abroad.

Nevertheless, ***HN12***[] there is a general consensus among the courts that have had to apply *RJR Nabisco* that the location of a RICO injury depends on where the plaintiff "suffered the injury"—not where the injurious conduct took place.[50] That may result from the Court's framing of the issue in *RJR Nabisco*. The Court specifically framed the question before it as whether: "RICO's private right of action, contained in *§ 1964(c)*, applies to injuries that are suffered in foreign countries?"[51]

The Court of Appeals for the Second Circuit is one of only two federal appellate courts that have grappled with *RJR Nabisco's* domestic injury instruction. In *Bascuñán v. Elsaca*, the court considered whether a Chilean resident suffered a domestic injury although he was not located in the United States during the events in question.[52] The plaintiff there alleged that the defendant had fraudulently caused banks to wire the plaintiff's funds from the plaintiff's U.S. bank accounts to the defendant's accounts.[53] The plaintiff also alleged that the defendant or his agent physically removed bank shares from the plaintiff's New York safety deposit box.[54] The district court held that **[**16]** the plaintiff could not allege a domestic injury because he was a resident of Chile, and the injuries alleged were necessarily suffered at the plaintiff's place of residence.[55] Two questions guided the court's inquiry:

who became poorer as a result of the alleged conduct and where **[*703]** did that individual become poorer?[56] "Its holding set forth, in sum and substance, the following rule: a foreign plaintiff who suffered an 'economic loss' due to a RICO violation cannot, absent extraordinary circumstances, allege a domestic injury."[57]

On appeal, the Court of Appeals for the Second Circuit rejected the district court's "residency-based" approach and held that "a plaintiff who is a foreign resident may [in fact] allege a civil RICO injury that is domestic."[58] It noted that the district court's focus on the plaintiff's place of residence improperly disregards *RJR Nabisco's* attempt "to make plain that its opinion should not be taken to 'mean that foreign plaintiffs may not sue under RICO.'"[59] The Second Circuit opined that the focus of the domestic injury analysis should be the location of the alleged injuries as opposed to the location of the plaintiff's residence or of the defendant's alleged misconduct. **[**17]** The court explained: "[i]n order to determine where the [injuries] alleged by a civil RICO plaintiff are located geographically, courts must examine more closely the specific type of injuries alleged."[60] It then categorized the alleged injury as an injury to tangible property, which "can be fairly said to exist in a precise location."[61] Taking that approach, the court easily concluded that "[w]here the injury is to tangible property . . . absent some extraordinary circumstance, the injury is domestic if the plaintiff's property was located in the United States when it was stolen or harmed, even if the plaintiff himself resides abroad."[62]

Thus, the court held that when a defendant's conduct is alleged to effect tangible property, the location of that property usually constitutes the place of the injury. Since the plaintiff's money and bank shares were in the United States when stolen, the court reasoned that the injury occurred in New York and the plaintiff therefore properly alleged a domestic RICO injury.[63] Several considerations counseled that conclusion. The court reasoned that plaintiffs who are injured as a result of harm done to their domestically located tangible property are entitled **[**18]** to the remedial benefits conferred by a RICO private right of action because such litigants "expect that our laws will protect them in the event of damage to that property."[64] That "expectation [was] entirely justified, especially when we consider that a foreign resident's property located in the United States is otherwise subject to all of the regulations imposed on private property by American state and federal law."[65] The rule thus "ensures that both foreign and domestic plaintiffs can obtain civil RICO's remedy for damage to their property[.]"[66]

Although this approach, which focuses on the location of the property giving rise to the harm, is useful where the alleged injury is to tangible property, it is not helpful where, as here, harm to intangible business interests is alleged.

The location of such injuries simply cannot be identified **[*704]** with the same geographic certainty that is endemic in the very concept of tangible property. Thus, ***HN13***[] courts grappling with alleged injuries to intangible property have largely tried to trace the location of the effects of the alleged injurious conduct to determine the place of injury. In other words, these courts have aligned themselves with the locus **[**19]** of effects approach and focus on where the plaintiff felt the effects of the injury-inducing predicate acts, no matter where they occurred.

For example, in *Cevdet Aksut Ogullari Koll. Sti. v. Cavusoglu*, the district court found that a plaintiff's principal place of business and the location of its operations were merely helpful considerations in determining whether the effects of an alleged injury were domestic or foreign.[67] There, a Turkish corporation "assert[ed] that its domestic business was injured because it had . . . annual sales to customers in the United States prior to transacting with the RICO enterprise."[68] The court held that, even if it were to assume that the plaintiff lost earnings from customers located in the United States, it nonetheless could ascertain no "domestic injury to [the plaintiff's] business because its business [was] entirely located in and operated out of Turkey."[69] The "plaintiff's injury was felt in the only place it had ever been located, in Turkey."[70] Although the *Cevdet* court found the physical location of the plaintiff's corporation to be relevant, it did not announce the same kind of residency-based rule that was rejected by the Court of Appeals in *Bascuñán* ***[**20]*** . Instead, it declared that a foreign corporation with "substantial business operations within the United States" could, hypothetically, assert a RICO domestic injury because the injury could be felt in the United States.[71]

Picking up where *Cevdet* left off, the district court in *Elsevier, Inc. v. Grossman* (*Elsevier II*) held that, in assessing whether a plaintiff has alleged a domestic RICO injury to its intangible business operations, courts should determine where the "substantial negative business consequences occurred."[72] The court suggested that a plaintiff might be able to show a domestic injury by alleging "some effect on Plaintiffs' relationships with actual or prospective U.S. customers."[73] The court, however, found that the plaintiff had made no such allegation. Elsevier, the plaintiff, had sued to recover after it sold academic journals to the defendants at discounted rates because of the defendants' alleged misrepresentations that they were buying the journals for "valid personal use."[74] The plaintiff argued that he suffered a domestic injury simply because the defendants ordered the subscriptions from the United States and paid for them with checks drawn on a U.S. bank account. First, **[**21]** the court held that this was insufficient to show that the plaintiff's injuries occurred in the United States. The trial court noted "that it is possible for fraudulent conduct to take **[*705]** place in one location, but cause injury in another location."[75] While resolving post-trial motions, though, the district court found that, as alleged, "48 of the 51 fraudulent subscriptions were either physically shipped from the United States or were authorized for shipment by an Elsevier employee located in the

[75] *Elsevier II, 199 F. Supp. 3d at 788*.

United States."[76] Accordingly, the district court reversed course and found that the plaintiff "relinquished control of the journals in the United States under false pretenses and thereby suffered the effects of [the defendant's fraudulent] conduct in the States."[77] The court therefore found that the plaintiff's harm constituted a domestic injury "even if [the plaintiff] were a foreign entity."[78]

Despite *Elsevier II*'s earlier indication that, in determining whether an injury is domestic, "court[s] should ask where substantial negative business consequences occurred,"[79] its post-trial opinion was based on its finding that the alleged misappropriation of the plaintiff's property occurred in the United **[**22]** States. That is consistent with the approach taken by the Court of Appeals in *Bascuñán*. Nevertheless, since *Elsevier* involved an alleged injury to tangible property, it is not helpful to our inquiry here.[80]

The court's analysis in *Dandong Old N.-E. Agric. & Animal Husbandry Co. v. Hu* is more analogous to our inquiry.[81] The plaintiff there was a Chinese company that was one of the largest purchasers of soybeans produced in the United States.[82] It alleged, *inter alia*, that the defendant's RICO misconduct caused the plaintiff to lose contracts with soybean suppliers in the United States.[83] The plaintiff claimed the loss of much of its market share and that its business operations slowed as a result of its inability to receive soybeans from U.S. suppliers at the same volume as before the defendant's alleged misconduct.[84] The plaintiff also alleged that it was forced to terminate 90 of its China-based employees.[85] The court disregarded the location of the predicate acts that were alleged and instead focused only on where the plaintiff felt the effects of the alleged injury.[86] That analysis caused the court to conclude that the plaintiff failed to establish a domestic injury. The trial court found **[**23]** that "[a]ny deprivation of [the] [p]laintiff's money was felt in China. And, in sharp contrast to *Elsevier*, [the] Plaintiff was not deprived of its property in the United States[] [because,] indeed, [the] Plaintiff received all of the soybeans for which it contracted with U.S. suppliers."[87]

[*706] The plaintiff's principal place of business was in China, all the terminated employees were fired in China, any expenses resulting from the alleged misconduct were paid from China, and the plaintiff's business operated

only out of China.[88] The court found that the foreign plaintiff's allegation that it lost prospective business opportunities from U.S. suppliers insufficient to establish that the plaintiff experienced a domestic injury because such a claim, without more, "is far too attenuated to suffice as a domestic injury under RICO."[89] For these reasons, the *Dandong* court ultimately held that "[r]egardless of where the conspirators' conduct took place, [the p]laintiff's injury was felt in China, the only place its business had ever been located."[90] Although other courts have reached similar results,[91] *Dandong*'s approach to determining the location of the alleged injury is particularly helpful because **[**24]** it is nuanced and the court considered the totality of the circumstances without relying on any single circumstance.

As we will explain, a focus upon where the alleged injuries were felt best guides our inquiry. However, unlike courts that have taken this "locus of effects" approach, we do not view a plaintiff's residence or principal place of business as detemintive. Although it will almost always be an important factor, allegations in a given case will ususally necessitate consideration of additional factors as well.

B. Merits

With this background as our guide, we must determine if Plaintiffs here have alleged a plausible domestic injury under *§ 1964(c)*. We begin with *RJR Nabisco*'s clear command:***HN14***[] the analysis of whether a plaintiff has alleged a domestic injury must focus principally on where the plaintiff has suffered the alleged injury.[92] "Nothing in *§ 1964(c)* provides a clear indication that Congress intended to create a private right of action for injuries suffered outside of the United States."[93]

As noted above, the Court in *RJR Nabisco* cautioned against applying U.S. law in the absence of a domestic injury for the substantial practical and policy **[**25]** reasons the Court explained. Thus, we must decide if Plaintiffs' alleged domestic injuries justify allowing a civil remedy under RICO. There may well be cases where plaintiffs do, in fact, suffer some injury in the United States and courts must determine whether those domestic injuries are sufficient to justify application of domestic law despite the concerns the Supreme Court has explained. As with any standard that is not susceptible to mechanical application, "few answers will be written in black and **[*707]** white."[94] We therefore appreciate that some cases will be so close that courts may have to split jurisdictional hairs to determine if a domestic injury has been alleged. As we explain, the Plaintiffs here have not really alleged any

91 In *City of Almaty, Kazakhstan v. Ablyazov* for example, the plaintiff alleged that the defendant (who was the former mayor) stole city funds and invested those funds in New York City real estate projects. *226 F. Supp. 3d 272, 275 (S.D.N.Y 2016)*. The court held that even though the mayor and his co-conspirators used the funds in the United States, the plaintiff did not suffer a domestic injury. *Id. at 284*. In other words, because the plaintiff suffered economic harm to its business, the place of injury was "the state of plaintiff's residence, and foreign corporations are recognized to reside either in their principal place of business or their place of incorporation." *Id. at 282* (citation and internal quotations omitted). Unlike Plaintiffs here, the plaintiff in *City of Almaty* alleged no additional contacts with the United States. The case therefore offers limited guidance here.

92 *RJR Nabisco, 136 S. Ct. at 2108*.

93 *Id.*

94 *Kulko v. Superior Court of California, 436 U.S. 84, 92, 98 S. Ct. 1690, 56 L. Ed. 2d 132 (1978)* (internal quotation marks omitted).

domestic injury, so we have no trouble concluding that they have not alleged a sufficient injury to defeat that presumption and justify the extraterritorial application of domestic law.

Given the intangible nature of the alleged injuries here, our inquiry must focus primarily upon where the effects of the predicate acts were experienced. This will better allow for appropriate consideration of the nuanced nature of intangible interests.

HN15[] Whether an alleged injury **[**26]** to an intangible interest was suffered domestically is a particularly fact-sensitive question requiring consideration of multiple factors. These include, but are not limited to, where the injury itself arose; the location of the plaintiff's residence or principal place of business; where any alleged services were provided; where the plaintiff received or expected to receive the benefits associated with providing such services; where any relevant business agreements were entered into and the laws binding such agreements; and the location of the activities giving rise to the underlying dispute.

As we have already explained, the applicable factors depend on the plaintiff's allegations; no one factor is presumptively dispositive.[95] A domestic injury under *§ 1964(c)* is found where the relevant factors, appropriately weighed, establish that the alleged harm was suffered in the United States.[96] Although they have rarely done so explicitly, the courts that have applied *RJR Nabisco*—including the District Court here—have largely engaged in this kind of multi-factor inquiry.[97]

Applying these principles to the allegations here, we have no difficulty concluding that Plaintiffs have not alleged **[**27]** a domestic injury. Rather, it is clear that the alleged injuries were suffered in China. As the District Court noted, at all relevant times, Plaintiffs lived in China; had their principal place of business in China; provided services in China (albeit to some American companies - but even they were operating in China); entered the Consultancy Agreement in China and agreed to have Chinese law govern it;[98] met with Defendants' representatives **[*708]** only in China; and themselves indicated on the civil cover sheet that the underlying incident arose in China.[99] "[C]ompanies came to [ChinaWhys] when they sought to do business in China."[100] Plaintiffs have not alleged that they possess offices, assets, or any other property in the United States. Thus, Plaintiffs have not alleged a domestic injury pursuant to *18 U.S.C. § 1964(c)*, even though they do allege loss of goodwill and some unidentified number of actual and prospective U.S. customers.[101] To the extent that these intangible assets were

---

[95] *See, e.g., Bascuñán, 874 F.3d at 824* (noting that "[a] plaintiff's residence may often be relevant—perhaps even dispositive—in determining whether certain types of business or property injuries constitute a domestic injury"); *Dandong, 2017 U.S. Dist. LEXIS 122471, 2017 WL 3328239, at *13-14* (considering a plethora of factors to determine whether the alleged intangible injuries constitute a domestic injury).

[100] *2017 U.S. Dist. LEXIS 162495, [WL] at *6*.

injured, it is not enough to overcome the Supreme Court's caution against extraterritorial application of domestic law in *RJR Nabisco*. Consequently, the District Court correctly dismissed Plaintiffs' RICO claims.

Dismissal of **[**28]** those claims is consistent with *RJR Nabisco's* policy considerations. As noted earlier, the Supreme Court cautioned against the risks of "international friction" associated with allowing foreign entities to "bypass" potentially "less generous remedial schemes" available in their home jurisdictions and pursue treble damages for injuries suffered abroad through civil RICO actions in the United States.[102] Plaintiffs seek redress here for Defendants' alleged racketeering activity although Plaintiffs were prosecuted and imprisoned in China. "Allowing [Plaintiff's] RICO claims to proceed under these circumstances would be at odds with the Supreme Court's directive that the need to enforce the presumption against extraterritoriality is 'at its apex' when remedies available in United States courts may conflict with those available abroad."[103] Indeed, it would be odd to permit Plaintiffs to seek civil redress for alleged harm arising from the very crimes they were convicted of in China and that arose from China's application of its own criminal laws, absent allegations that would give rise to a domestic injury in the United States.

We realize that the Court of Appeals for the Seventh Circuit rejected **[**29]** the analytical approach that we today adopt, in *Armada (Singapore) PTE Ltd. v. Amcol Int'l Corp.*[104] But we do not find that analysis particularly helpful or persuasive here. There, that court held that "a party experiences or sustains injuries to its intangible property at its residence."[105] The *Armada* plaintiff was a Singapore shipping company that alleged that the Illinois-based defendant violated RICO by thwarting the plaintiff's attempt to recover on its breach of contract claim. The court held, without much discussion, that the plaintiff's "principal place of business [was] in Singapore, so any harm to [the plaintiff's] intangible bundle of litigation rights was suffered in **[*709]** Singapore."[106] It therefore concluded that the "injury [was] not domestic, and [that the plaintiff had] failed to plead a plausible claim under civil RICO."[107]

Although the ease with which such a bright-line rule can be applied gives it some surface appeal, we resist the temptation to adopt it as the law of this circuit. ***HN16***[] While courts have generally noted that a company suffers economic injuries at its principal place of business, few have done so in the context of a RICO claim that would extend beyond the borders **[**30]** of the United States.[108] Even fewer have done so where the alleged conduct had an effect on intangible property. Although a litigant's residence or principal place of business is obviously a relevant consideration, and perhaps a useful place to begin a *§ 1964(c)* inquiry, it does not necessarily determine the ultimate question of whether there has been a domestic injury. It is merely one factor that informs our inquiry.

---

[101] It is unclear whether an allegation of harm to goodwill constitutes a showing of "a concrete financial loss and not mere injury to a valuable intangible property interest." *Maio, 221 F.3d at 483* (citation and internal quotation marks omitted).

[102] *RJR Nabisco, 136 S. Ct. at 2106-07* (citation and internal quotation marks omitted).

[103] *City of Almaty, 226 F. Supp. 3d at 287* (citing *RJR Nabisco, 136 S. Ct. at 2107*).

[104] *885 F.3d 1090 (7th Cir. 2018)*.

[105] *Armada, 885 F.3d at 1094-95* (citing *Kamel v. Hill-Rom Co., Inc., 108 F.3d 799, 805 (7th Cir. 1997)*. Although we reject the analytical framework used in *Armada*, we note that it would not necessarily lead to a different result here because Plaintiffs resided in China when Defendants are alleged to have engaged in the conduct Plaintiffs rely upon for RICO liability.

[106] *Id. at 1095*.

[107] *Id.*

[108] *See, e.g., id.* (collecting cases); *see also* *Global Fin. Corp. v. Triarc Corp., 93 N.Y.2d 525, 715 N.E.2d 482, 485, 693 N.Y.S.2d 479 (N.Y. 1999)* ("When an alleged injury is purely economic, the place of injury usually is where the plaintiff resides and sustains the economic impact of the loss.").

The Supreme Court anticipated that the RICO domestic injury inquiry would not always be susceptible to easy resolution. The Court explained that "[t]he application of [the domestic injury rule] in any given case will not always be self-evident, as disputes may arise as to whether a particular alleged injury is 'foreign' or 'domestic.'"[109] Moreover, we think the *Armada* rule is too inflexible to be useful in resolving cases where the nature of the injured property interest is not "self-evident."[110]

Armada's residency-based rule also effectively precludes all foreign plaintiffs alleging intangible injuries from recovering under *§ 1964(c)* regardless of their alleged connection with the United States. ***HN17***[] "It cannot be the case that the mere fact that a loss is economic means that **[**31]** foreign corporations are unable to avail themselves of the protections of civil RICO, even in cases where all of the actions causing the injury took place in the United States."[111] There is no evidence that Congress meant to so preclude foreign corporations from the protection offered by *§ 1964(c)* and doing so conflicts with the Supreme Court's recognition that "Congress did not limit RICO to domestic enterprises."[112]

We next address Plaintiffs' contention that, notwithstanding factors supporting a finding that the alleged injury was foreign, they have nonetheless alleged a domestic injury because "the alleged underlying RICO conduct plainly was both targeted at, and was intended to have substantial effects in, the United States."[113] We disagree.

As we mentioned at the outset, a minority of courts have suggested that a plaintiff can show that it has suffered a domestic injury by merely pointing to misconduct that occurred in, or was directed to, the United States. However, those cases are also not helpful here and do not establish the domestic injury that Plaintiffs claim. Plaintiffs contend *Akishev v. Kapustin*[114] **[*710]** relied on this so-called "location of the injury-inducing conduct" test.[115] The plaintiffs there **[**32]** were citizens of multiple foreign countries who were fraudulently induced to make online purchases of used cars from the defendant's U.S. dealership.[116] The plaintiffs alleged no other connection to the United States. The court found that the location of the fraudulent conduct was *an* important factor in determining whether there was a "domestic injury," because the case arose in the context of an online sale. The court reasoned that "[i]f [the] plaintiffs [had] traveled to the United States, went to the physical location of [the defendant's] purported car dealerships . . . chose a car, paid for it on the spot, and arranged for the car to be shipped to Eastern Europe, [the] plaintiffs would have suffered from a clear domestic injury when [the defendant] failed to deliver the car and failed to return plaintiffs their money."[117] The case may well be helpful when allegations involve the tenaciously difficult question of where misconduct in cyberspace occurs. However, it is of limited assistance here.

[115] Plaintiffs' Br. 32-33.

[116] *Akishev, 2016 U.S. Dist. LEXIS 169787, 2016 WL 7165714 at *7*.

[117] *Id.*

We do note, however, that "the court [ultimately] appeared to focus on where plaintiffs' injuries were felt—*i.e.*, on defendant's United States-based website and, therefore, in the United States." **[**33]** [118] To this extent, *Akishev's* actual holding relies on the "locus of effects" approach discussed above and does not itself compel the adoption of an approach that places undue emphasis on the location of the alleged injury-inducing misconduct.

Plaintiffs also rely on *Tatung Co., Ltd. v. Shu Tze Hsu*[119] and claim that it emphasizes that the location of a defendant's conduct is important in determining whether a domestic injury has been alleged. Even so viewed, *Tatung* does not support Plaintiffs' contention. The foreign plaintiff maintained a "hub" of business in the United States and extended credit and delivered goods to one of the defendants within the United States.[120] When the defendant defaulted on its credit obligation, the plaintiff was awarded a judgment through arbitration in California.[121] The plaintiff subsequently alleged a RICO conspiracy to siphon funds from the defendant's corporation and render it an empty shell in order to avoid the judgment.[122] The court found that RICO civil liability was appropriate because "the defendants specifically targeted their conduct at California with the aim of thwarting [the plaintiff's] rights in California."[123] The court found **[**34]** a domestic injury because the plaintiff had a domestic judgment entitled to the protection of United States law.[124] The *Tatung* plaintiff also maintained substantial business operations within the United States and contractually availed itself of dispute resolution via arbitration within the United States.[125] Consequently, the plaintiff in that case could plausibly argue that its United States-based business was harmed by the defendants' RICO conduct **[*711]** and that it suffered a domestic injury because it felt the impact of that injury within the United States.

Finally, Plaintiffs rely upon *Union Commercial Services. Ltd. v. FCA International Operations LLC*'s suggestion that a plaintiff could allege a domestic injury under RICO by simply pointing to injurious conduct intended to produce effects in the United States.[126] They contend that "the alleged underlying RICO conduct [here] plainly was both targeted at, and was intended to have substantial effects in, the United States" because "[a] central goal of the alleged racketeering conduct was to avoid detection and further sanctions from U.S. regulators and criminal authorities . . . ."[127] In *Union Commercial*, the court relied upon cases decided in the **[**35]** context of ***antitrust law*** and concluded that courts must ask "whether a defendant's conduct is intended to or has produced 'substantial effects' in the United States."[128][129] The court found that the plaintiff suffered no "domestic injury" because the

Opinion

ORDER GRANTING MOTIONS TO DISMISS AND SETTING CASE MANAGEMENT CONFERENCE

Re: Dkt. Nos. 60, 66

Pending before the Court is Defendant Ally Financial, Inc.'s ("Ally") motion to dismiss Plaintiff Weerachai Chaiwong's ("Plaintiff") second amended complaint ("SAC"), Dkt. No. 60, as well as Ally's motion to dismiss **[*2]** the cross-claims of its co-Defendant Hanlees Fremont, Inc. ("Hanlees"), Dkt. No. 66. Having carefully considered the parties' papers, the Court **GRANTS** both motions for the reasons set forth below.[1]

I. BACKGROUND

The Court dismissed Plaintiff's first amended complaint and Hanlees' cross-claims on September 1, 2017. *See* Dkt. No. 55. The Court granted leave to amend, despite being "skeptical that Plaintiff or Hanlees" would be able to plead additional facts sufficient to survive a second motion to dismiss. *Id.* at 9:19. The Court's skepticism was warranted, as Plaintiff and Hanlees have pled essentially the same facts and still fail to state a claim upon which relief can be granted.

A. Factual Background

For purposes of this motion to dismiss, the Court accepts the following facts as true. Plaintiff leased a Chevrolet Equinox from Fremont Chevrolet on June 22, 2010. SAC, Dkt. No. 57, ¶¶ 29-32. The lease agreement listed the "Scheduled Lease End Date" as September 21, 2013. *Id.* ¶ 34 & Ex. 3 at 4.[2] However, the lease also stated that "[i]f this lease ends on or after the last scheduled payment is due, we will treat the lease as if it ended as scheduled and not as if it ended early" (the "Treat **[*3]** As" clause). *Id.* Ex. 3 at 4. The lease also stated that at lease end Plaintiff would owe "any excess mileage charge, any lease end daily extension charge, and [Ally's] estimated or actual cost of repairing excess wear, plus any tax," but that Plaintiff was free to terminate the lease "anytime" prior to its scheduled end date, though early termination fees would then apply. *Id.*

Prior to Plaintiff's termination of the lease, Ally accepted assignment of the contract. *Id.* ¶ 32. On September 19, 2013, Plaintiff attempted to "trade" the vehicle in to Defendant Hanlees, a third-party dealership, in connection with the lease of a Hyundai Santa Fe, rather than returning the vehicle to Ally directly. *Id.* ¶ 36. Plaintiff claims that Hanlees "represented to Plaintiff that it was authorized to accept the [Equinox] as a trade-in vehicle." *Id.* ¶ 39. Plaintiff also claims that as a result of his alleged "trade-in" of the vehicle, Hanlees became responsible for paying Ally the $17,543.50 to buy out the lease, but Hanlees only issued a check to Ally in the amount of $15,736.00. *Id.* ¶ 44.

While Hanlees initially indicated that it wished to purchase the Equinox, Ally mistakenly repossessed the **[*4]** vehicle in October 2013, causing Hanlees to change its mind, and Ally issued Hanlees a refund of the $15,736.00 check. Dkt. No. 61 ¶¶ 76-81; SAC Ex. 2. Because Plaintiff relinquished the Equinox two days prior to the "Scheduled Lease End Date" listed in the contract, Plaintiff believed he was terminating his lease with Ally early. SAC ¶ 36. However, because Plaintiff had already made the final payment on the lease, Ally treated the lease as if it had ended as scheduled, and charged Plaintiff $9,712.76 for excess wear and mileage and related sales/use taxes. *Id.* ¶ 49.

---

[1] The Court finds this matter appropriate for disposition without oral argument and the matter is deemed submitted. *See* Civil L.R. 7-1(b).

[2] Under the incorporation by reference doctrine, a court may consider a document extrinsic to the complaint in deciding a Rule 12(b)(6) motion if the document's "authenticity is not contested and the plaintiff's complaint necessarily relies on" it. *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)* (citing *Parrino v. FHP, Inc., 146 F.3d 699, 706 (9th Cir. 1998)*); *see also United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)* (document may be incorporated by reference "if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim"). When a document is incorporated by reference, "the district court may treat such a document as part of the complaint, and thus may assume that its contents are true for purposes of a motion to dismiss under Rule 12(b)(6)." *Ritchie, 342 F.3d at 908*. The Court thus deems Exhibits 1-4 to the SAC to be incorporated by reference.

Within a few months of "trading" the vehicle in, "Plaintiff began receiving calls from Defendant Ally stating that he was delinquent on payments for the lease of the Chevrolet." SAC ¶ 45. Plaintiff "notified [] Ally that he had traded in the Chevrolet to [] Hanlees." *Id.* In addition, Plaintiff "immediately" notified Hanlees of the issue and "requested that [] Hanlees fulfill its contractual obligation to pay off any remaining lease balance on the Chevrolet" to Ally. *Id.*

A. Procedural History

Plaintiff filed suit against Ally and Hanlees in the Superior Court of California on May 25, 2016. Dkt. No. 1 Ex. 1. On July 20, 2016, **[*5]** the action was removed to this Court under the *Class Action Fairness Act*. *Id.* at 1. Plaintiff filed a first amended individual and class action complaint on September 1, 2016 ("FAC"). Dkt. No. 19. Hanlees answered the FAC and asserted several cross-claims against Ally. *See* Dkt. No. 25. Ally moved to dismiss both Plaintiff's and Hanlees' claims. *See* Dkt. No. 21, 36. The Court granted Ally's motions on September 1, 2017, but gave Plaintiff and Hanlees leave to amend. Dkt. No. 55.

Plaintiff filed its second amended individual and class action complaint on September 29, 2017. *See* SAC, Dkt. No. 57. The SAC alleges three claims against Ally, including (1) violation of the *Unfair Competition Law ("UCL") Business and Professions Code § 17200* by committing unfair and unlawful acts, *id.* ¶¶ 92-102; (2) violation of the Rosenthal *Fair Debt Collection Practices Act ("FDCPA")*, *id.* ¶¶ 103-20; and (3) declaratory relief, *id.* ¶¶ 121-27. The SAC also asserts claims against Hanlees arising out of Hanlees' alleged misrepresentation to Plaintiff that it would pay off the balance of the Equinox after Plaintiff traded the vehicle in for the Hyundai. *Id.* ¶¶ 66-91.

In its answer to the SAC, Hanlees asserted several cross-claims **[*6]** against Ally, including (1) violation of the UCL *Business and Professions Code § 17200* by committing unlawful, unfair, and deceptive acts, Dkt. No. 61 ¶¶ 95-114; (2) equitable indemnity, *id.* ¶¶ 115-18; and (3) intentional interference with prospective economic advantage, *id.* ¶¶ 119-26.

Ally filed a motion to dismiss Plaintiff's claims, Dkt. No. 60, and a motion to strike or dismiss Hanlees' claims, Dkt. No. 66. Plaintiff responded in opposition, Dkt. No. 63, and Ally replied, Dkt. No. 65. Hanlees responded in opposition, Dkt. No. 69, and Ally replied, Dkt. No. 70.

II. LEGAL STANDARD

Federal Rule of Civil Procedure 8(a) requires that a complaint contain "a short and plain statement of the claim showing that the pleader is entitled to relief[.]" A defendant may move to dismiss a complaint for failing to state a claim upon which relief can be granted under *Federal Rule of Civil Procedure 12(b)(6)*. "Dismissal under *Rule 12(b)(6)* is appropriate only where the complaint lacks a cognizable legal theory or sufficient facts to support a cognizable legal theory." *Mendiondo v. Centinela Hosp. Med. Ctr., 521 F.3d 1097, 1104 (9th Cir. 2008)*. To survive a *Rule 12(b)(6)* motion, a plaintiff must plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is facially plausible when a plaintiff pleads "factual content that allows the court to draw the reasonable inference that the defendant **[*7]** is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

In reviewing the plausibility of a complaint, courts "accept factual allegations in the complaint as true and construe the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. Nonetheless, Courts do not "accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Secs. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)*.

Federal Rule of Civil Procedure 9(b) heightens these pleading requirements for all claims that "sound in fraud" or are "grounded in fraud." *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)* (citation omitted); *Fed. R. Civ. P. 9(b)* ("In alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake."). "[The Ninth Circuit] has interpreted *Rule 9(b)* to require that allegations of fraud are specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Neubronner v. Milken, 6 F.3d 666, 671 (9th Cir. 1993)* (quotation marks and citation omitted).

III. ANALYSIS

B. Ally's Motion to Dismiss the SAC

The Court was skeptical that Plaintiff could plead new facts in its second amended complaint that would change the Court's analysis — and that skepticism was borne out. Plaintiff's second amended **[*8]** complaint contains nearly identical factual allegations to the prior dismissed complaint, with the only notable additions being a longer explanation of the mechanics of car leases and added legal conclusions. *See* SAC ¶¶ 9-28.

Just as before, each of Plaintiff's claims against Ally rests on the same flawed contention: that Plaintiff terminated his lease with Ally early when he "traded" his Equinox in for a Hyundai two days prior to the scheduled lease end date. Despite Plaintiff's protestations that "the VLA excludes multiple or alternative lease end dates," Dkt. No. 63 at 8, such an interpretation is flatly belied by the Code itself. *See* *Cal. Civ. Code § 14(a)* ("the singular number includes the plural, and the plural the singular"). This Court reaffirms its finding that the Treat As clause in the lease established alternative scheduled end dates, such that Plaintiff's September 19, 2013 return of the vehicle did not constitute an early termination. Because Plaintiff ended the Equinox lease on time, rather than early, *Sections 2987(a)* and *(f)(2)* of the *Vehicle Leasing Act ("VLA")* do not apply.

Plaintiff claims that Ally's actions were unlawful or unfair under the UCL. To state a claim based on unlawful business practices under **[*9]** the UCL, a plaintiff must allege that a defendant violated an underlying law. *Finuliar v. BAC Home Loans Serv. Corp, LLP, No. C-11-02629 JCS, 2011 U.S. Dist. LEXIS 107324, 2011 WL 4405659, at *9 (N.D. Cal. Sept. 21, 2011)*. But Ally cannot have violated the VLA as alleged, because the sections of the VLA Plaintiff relies upon apply only to leases that were terminated early.

Nor has Plaintiff adequately alleged that Ally's actions were unfair. Although California courts are split as to the definition of "unfair" under the UCL, because Ally was complying with the express terms of the contract when it treated Plaintiff's return of the vehicle as a scheduled termination, Plaintiff has alleged no facts that could establish that Ally's conduct was unfair.[3] *See* *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1169-1170 (9th Cir. 2012)* (holding that while "the proper definition of 'unfair' conduct against consumers is currently in flux among California courts," the consumer's "fail[ure]to read the terms and conditions before agreeing to them" begged the conclusion that "any harm he suffered was the product of his own behavior, not the advertisements" at issue) (internal quotation omitted).

Just as before, Plaintiff contends that Ally violated the *FDCPA* by making "false representations to Plaintiff of the character, amount, or legal status of the alleged debt **[*10]** of $9,187.76," making "false representations to the Law Offices of Patenaude & Felix of the character, amount, or legal status of the alleged debt," and "[a]ttempt[ing] to collect the alleged debt . . . owed by Plaintiff that was not permitted by the California VLA." SAC ¶ 114. Because the

[3] California Courts have contemplated three tests to determine whether a practice was "unfair" in consumer-filed UCL actions. A practice is considered unfair when (1) "the consumer injury is substantial, is not outweighed by any countervailing benefits to consumers or to competition, and is not an injury the consumers themselves could reasonably have avoided," *Daugherty v. Am. Honda Motor Co., Inc., 144 Cal. App. 4th 824, 839, 51 Cal. Rptr. 3d 118 (2006)*; (2) the practice "offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous, or substantially injurious to consumers," *Smith v. State Farm Mutual Auto. Ins. Co., 93 Cal. App. 4th 700, 719, 113 Cal. Rptr. 2d 399 (2001)* (citations omitted); or (3) "the public policy which is a predicate to the action [is] tethered to specific constitutional, statutory or regulatory provisions," *Scripps Clinic v. Superior Court, 108 Cal. App. 4th 917, 940, 134 Cal. Rptr. 2d 101 (2003)* (internal quotation marks omitted).

Court has already found that Plaintiff terminated the lease on time, his claim that Ally improperly charged and attempted to collect the fees owed to it for excess wear and mileage fails as a matter of law.

Finally, and for the same reasons discussed above, the Court declines to consider Plaintiff's declaratory relief claim, which requests that the Court use its discretion to declare, among other things, that he terminated the lease early, and is not liable for the excess wear and mileage owed under the lease. SAC ¶ 126; *Leadsinger, Inc. v. BMG Music Publ'g, 512 F.3d 522, 533 (9th Cir. 2008)* (citations omitted) ("Federal courts do not have a duty to grant declaratory judgment; therefore, it is within a district court's discretion to dismiss an action for declaratory judgment.").

The Court **GRANTS** Ally's first motion to dismiss in full, without leave to amend.

A. Ally's Motion to Dismiss Hanlees' Cross-Claims

To begin, Hanlees' cross-claims against Ally are untimely. The **[*11]** Court set a deadline of September 30 to amend the cross-complaint, *see* Dkt. No. 55, but Hanlees did not file until October 27, *see* Dkt. No. 61. Hanlees has provided no valid reason for this delay. This Court could exercise its discretion to dismiss Hanlees' cross-claims for failure to comply with the deadline. *See Fed. R. Civ. P. 41(b)*; *Yourish v. California Amplifier, 191 F.3d 983, 986 (9th Cir. 1999)*. However, the late filing is of little consequence, because Hanlees fails to state a claim upon which relief can be granted.

First, Hanlees claims that Ally violated UCL Business and Professions Code § 17200 by committing unlawful, unfair, and deceptive acts, Dkt. No. 61 ¶¶ 95-114. Once again, the Court need not reach the issue of Hanlees' standing to bring a UCL claim, because even assuming that Hanlees has standing, it fails to plead facts sufficient to establish a UCL violation. Hanlees alleges that Ally violated "California laws limiting prohibitions on assignment" because it refused to "honor Plaintiff's right to trade in the" Equinox or to "accept[] Hanlees' full payoff" of the Equinox. *Id.* ¶¶ 98-99, 107. But Hanlees' legal theory is irreconcilable with its allegations that it "paid Ally the entire agreed balance," *id.* ¶ 71, "Ally accepted and cashed the Payoff Check in full satisfaction," *id.* ¶ 74, and **[*12]** "Ally acknowledged to Hanlees that Ally had no right to possession of the [Equinox] at the time of the [repossession]," *id.* ¶ 81. In other words, Hanlees attempts to allege both that Ally illegally prohibited assignment to Hanlees and that Ally acknowledged the validity of the assignment to Hanlees. *See also* SAC Ex. 2.

Nor was Ally's conduct unfair as alleged. To demonstrate unfairness as a competitor in its amended cross-claim, Hanlees would have needed to allege facts that show that Ally's conduct "threaten[ed] an incipient violation of an ***antitrust law***, or . . . violate[d] the policy or spirit of one of those laws because its effects [were] comparable to a violation of the law, or [] otherwise significantly threaten[ed] or harm[ed] competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 183, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. Hanlees alleges that Ally has imposed "mileage and condition penalties" and made "unlawful overage claims" that have damaged Hanlees' business and reputation. Dkt. No. 61 ¶ 106. But Ally was well within its right to collect the excess wear and mileage fees based on the express terms of the contract. Hanlees fails to allege facts sufficient to establish that Ally's attempt to collect fees that were owed to it either violated an ***antitrust* [*13] *law***, violated the spirit of any such law, or "otherwise significantly threaten[ed] or harm[ed] competition." *Cel-Tech Commc'ns, 20 Cal. 4th at 183*.

Finally, in order to establish that Ally's acts were fraudulent under the UCL, Hanlees must plead facts that establish that Ally's conduct was likely to deceive members of the public. *Bank of the West v. Superior Court, 2 Cal. 4th 1254, 1267, 10 Cal. Rptr. 2d 538, 833 P.2d 545 (1992)*. Once again, Hanlees contends that Ally's acts served to "[s]ystematically misrepresent[] to potential customers of Hanlees that they cannot trade in their vehicles leased from Ally without mileage and condition penalties." Dkt. No. 61 ¶ 106. However, because Plaintiff has not adequately alleged that he terminated the lease early and the lease agreement explicitly states that Ally's customers may be charged for excess wear or mileage at lease end, this claim also fails. *See Walker v. Countrywide Home Loans, Inc., 98 Cal. App. 4th 1158, 1178, 121 Cal. Rptr. 2d 79 (2002)* (affirming finding that

Plaintiffs were not "likely to be deceived" under the UCL where "deed of trust contained language sufficient to notify the [plaintiffs] that such fees could be imposed on them").

Just as in its original cross-complaint, Hanlees asserts claims for equitable indemnity and indemnification under the UCL, contending that because Plaintiff's claims "in the [SAC] arise from a series of related transactions **[*14]** in which both Hanlees and Ally are alleged to have been involved, . . . to the extent that Hanlees and Ally may be found to be jointly and severally liable . . . Ally should be determined to be entirely responsible and liable for all damages that Plaintiff may be found to have suffered." Dkt. No. 61 ¶¶ 115-18. Hanlees' claims for indemnification fail because Hanlees does not allege facts sufficient to establish that Ally violated a duty to Plaintiff when it followed the express terms of the lease agreement in treating Plaintiff's September 19, 2013 "trade-in" of the Equinox as a scheduled termination.

Finally, Hanlees brings the exact same claim of intentional interference with prospective economic advantage as it did in its first cross-complaint. Dkt. No. 61 ¶¶ 119-26. Just as before, that claim is time-barred. The statute of limitations for intentional interference claims is two years, but Hanlees waited until May 25, 2016 to file claims arising out of a 2013 alleged violation. *Cal. Code Civ. Proc. § 339*; Dkt. No. 1, Ex. 1; *Ledesma v. Jack Stewart Produce, Inc., 816 F.2d 482, 484 n.1 (9th Cir. 1987)* (holding that a statute of limitations defense may be raised by a motion to dismiss if "the running of the statute is apparent on the face of the complaint").

The Court **GRANTS** Ally's second **[*15]** motion to dismiss in full, without leave to amend.

IV. CONCLUSION

For the foregoing reasons, the Court **GRANTS** both of Ally's motions to dismiss, without leave to amend.

The Court **SETS** a case management conference for October 24, 2018 at 2:00 p.m. Plaintiff and Hanlees shall meet and confer and file a joint case management statement, in compliance with *Civil Local Rule 16-9(a)*, by October 17. In the statement, the parties must include a proposed case schedule for the prompt resolution of what remains of this action.

IT IS SO ORDERED.

For Rachel L. Miller, 5:17-cv-01902, Plaintiff: Christopher M. Burke, Scott Scott LLP, San Diego, CA; Joseph P. Guglielmo, Milberg Weiss Bershad Hynes & Lerach LLP, New York, NY; Walter W. Noss, Scott+Scott LLP, San Diego, CA.

For John William Kiefer, III, 5:17-cv-785, Matthew Mitchell, 5:17-cv-785, Susan Gonzalez-Pender, 5:17-cv-785, Plaintiffs: Adam J. Zapala, LEAD ATTORNEY, Cotchett Pitre & McCarthy LLP, Burlingame, CA; Joyce Chang, LEAD ATTORNEY, Cotchett Pitre McCarthy LLP, Burlingame, CA; Mark Francis Ram, LEAD ATTORNEY, Cotchett Pitre & McCarthy LLP, Burlngame, CA; Steven Noel Williams, LEAD **[**3]** ATTORNEY, Joseph Saveri Law Firm, San Francisco, CA; Joseph W. Cotchett, Cotchett Pitre & McCarthy LLP, Burlingame, CA; Stephanie Biehl, Cotchett Pitre and McCarthy, LLP, Burlingame, CA.

For Terese Russell, 5:17-cv-785, Plaintiff: Adam J. Zapala, LEAD ATTORNEY, Cotchett Pitre & McCarthy LLP, Burlingame, CA; Brian Danitz, LEAD ATTORNEY, Cotchett, Pitre & McCarthy LLP, Burlingame, CA; Gwendolyn R. Giblin, LEAD ATTORNEY, Cotchett Pitre & McCarthy LLP, Burlingame, CA; Joyce Chang, LEAD ATTORNEY, Cotchett Pitre McCarthy LLP, Burlingame, CA; Mark Francis Ram, LEAD ATTORNEY, Cotchett Pitre & McCarthy LLP, Burlngame, CA; Michael A. Montano, LEAD ATTORNEY, Cotchett Pitre McCarthy LLP, Burlingame, CA; Steven Noel Williams, LEAD ATTORNEY, Joseph Saveri Law Firm, San Francisco, CA; Tamarah P. Prevost, LEAD ATTORNEY, Cotchett Pitre McCarthy, Burlingame, CA; Joseph W. Cotchett, Cotchett Pitre & McCarthy LLP, Burlingame, CA; Stephanie Biehl, Cotchett Pitre and McCarthy, LLP, Burlingame, CA.

For Sarah Key, 5:17-cv-442, Plaintiff: Kalpana Srinivasan, LEAD ATTORNEY, Susman Godfrey L.L.P., Los Angeles, CA; Krysta Kauble Pachman, LEAD ATTORNEY, Susman Godfrey LLP, Los Angeles, CA; Amanda K. Bonn, Susman **[**4]** Godfrey L.L.P., Los Angeles, CA; Catriona Lavery, Susman Godfrey L.L.P., Los Angeles, CA; Chelsea Victoria Samuels, Susman Godfrey, Los Angeles, CA; Elise Lyle Miller, PRO HAC VICE, Susman Godfrey LLP, Houston, TX; Floyd G Short, PRO HAC VICE, Susman Godfrey L.L.P., Seattle, WA; Joseph S. Grinstein, PRO HAC VICE, Susman Godfrey LLP, Houston, TX; Katherine Marie Peaslee, Susman Godfrey LLP, Seattle, WA; Marc M. Seltzer, Susman Godfrey LLP, Los Angeles, CA; Oleg Elkhunovich, Susman Godfrey L.L.P., Los Angeles, CA; Robert Travis Korman, PRO HAC VICE, Susman Godfrey, Houston, TX; Steven Gerald Sklaver, Susman Godfrey LLP, Los Angeles, CA.

For Dalia Zatlin, 5:17-cv-938, Plaintiff: Christopher Le, PRO HAC VICE, Straus & Boies, LLP; Daniel Edward Birkhaeuser, Bramson, Plutzik, Mahler & Birkhaeuser, Walnut Creek, CA; Paul F. Novak, PRO HAC VICE, Weitz & Luxenberg, P.C., Detroit, MI; Robert M. Bramson, Bramson, Plutzik, Mahler & Birkhaeuser LLP, Walnut Creek, CA; Timothy D. Battin, PRO HAC VICE, Straus & Boies LLP.

For Beth Crandall, 5:17-cv-938, Clarissa Simon, 5:17-cv-938, Kendall Martin, 5:17-cv-938, Rodrigo Sapla, 5:17-cv-938, Rebecca Davis, 5:17-cv-938, Thomas McManus, 5:17-cv-938, Kimberly **[**5]** Scavone, 5:17-cv-938, Melissa Ju, 5:17-cv-938, Chris Thompson, 5:17-cv-938, Plaintiffs: Christopher Le, Straus & Boies, LLP; Daniel Edward Birkhaeuser, Bramson, Plutzik, Mahler & Birkhaeuser, Walnut Creek, CA; Paul F. Novak, PRO HAC VICE, Weitz & Luxenberg, P.C., Detroit, MI; Robert M. Bramson, Bramson, Plutzik, Mahler & Birkhaeuser LLP, Walnut Creek, CA; Timothy D. Battin, PRO HAC VICE, Straus & Boies LLP.

For Martha Countess, 5:17-cv-440, Karen Hood, 5:17-cv-440, Jaime Martin, 5:17-cv-440, Plaintiffs: Nyran Rose Rasche, Cafferty Clobes Meriwether Sprengel LLP, Chicago, IL.

For Adrian Esteban, 5:17-cv-622, Plaintiff: David E. Azar, Milberg LLP, Santa Monica, CA.

For Jeffrey Davis, 5:17-cv-604, Ericsson Broadbent, 5:17-cv-604, Plaintiffs: Allan Steyer, Steyer Lowenthal Boodrookas Alvarez & Smith LLP, San Francisco, CA; Donald Scott Macrae, Steyer Lowenthal Boodrookas Alvarez & Smith LLP, San Francisco, CA; Jill Michelle Manning, Steyer Lowenthal Boodrookas Alvarez & Smith LLP, San Francisco, CA; Kyle Geoffrey Bates, Schneider Wallace Cottrell Konecky Wotkyns LLP, Emeryville, CA; Todd M. Schneider, Schneider Wallace Cottrell Konecky Wotkyns LLPLLP, Emeryville, CA.

For Paul Scott Ervin, **[**6]** 5:17-cv-713, Dayan Crutcher, 5:17-cv-766, Catherine Schmidlin, 5:17-cv-766, Plaintiffs: Azra Z. Mehdi, The Mehdi Firm PC, San Francisco, CA.

For Caralyn Tada, 5:17-cv-762, Nagore Miles, 5:17-cv-762, Bethany Rising, 5:17-cv-762, Jiying Spencer, 5:17-cv-762, Plaintiffs: Samuel M. Ward, Barrack Rodos & Bacine, San Diego, CA; Stephen R. Basser, Barrack, Rodos & Bacine, San Diego, CA.

For Allison Tripp, 5:17-cv-1080, Lindsay Smith, 5:17-cv-1080, Katie Smith, 5:17-cv-1080, Kirsten Luenz, 5:17-cv-1080, Laurel Vener, 5:17-cv-1080, Stephen Judge, 5:17-cv-1080, Seth Salenger, 5:17-cv-1080, Scott Hansen, 5:17-cv-1080, Joseph Kovacevich, 5:17-cv-1080, Michelle Reynolds, 5:17-cv-1080, George Marut, 5:17-cv-1080, Janet Ackerman, 5:17-cv-1080, Alan Schlaikjer, 5:17-cv-1080, Lori Landes, 5:17-cv-1080, Joyce Grantz, 5:17-cv-1080, Gabrielle Kurdt, 5:17-cv-1080, John Solak, 5:17-cv-1080, Plaintiffs: David Seiyei Wakukawa, Maxwell Law PC4, San Francisco, CA; K.C. Maxwell, Maxwell Law PC, San Francisco, CA.

For Todd Espinosa, 5:17-cv-1112, Plaintiff: Bethany Caracuzzo, Pritzker Levine LLP, Oakland, CA; Elizabeth Cheryl Pritzker, Pritzker Levine LLP, Oakland, CA; Jonathan Krasne Levine, Pritzker Levine, LLP, **[**7]** Oakland, CA.

For Andrew Westley, 5:17-cv-1112, Plaintiff: Brian Danitz, LEAD ATTORNEY, Cotchett, Pitre & McCarthy LLP, Burlingame, CA; Gwendolyn R. Giblin, LEAD ATTORNEY, Cotchett Pitre & McCarthy LLP, Burlingame, CA; Joseph W. Cotchett, Cotchett Pitre & McCarthy LLP, Burlingame, CA; Michael A. Montano, LEAD ATTORNEY, Cotchett Pitre McCarthy LLP, Burlingame, CA; Tamarah P. Prevost, LEAD ATTORNEY, Cotchett Pitre McCarthy, Burlingame, CA; Bethany Caracuzzo, Pritzker Levine LLP, Oakland, CA; Elizabeth Cheryl Pritzker, Pritzker Levine LLP, Oakland, CA; Jonathan Krasne Levine, Pritzker Levine, LLP, Oakland, CA.

For Laura Hallahan, 5:17-cv-1231, Plaintiff: K.C. Maxwell, Maxwell Law PC, San Francisco, CA.

For Mary C McDevitt, 5:17-cv-1244, Padraic J Brennan, 5:17-cv-1244, Plaintiffs: Jeremiah F. Hallisey, Hallisey and Johnson, San Francisco, CA.

For Jason Schwartz, 5:17-cv-02166, Suzanne Block, 5:17-cv-02166, Kevin Calero, 5:17-cv-02166, Carlo Caringal, 5:17-cv-02166, Ian Carson, 5:17-cv-02166, Andre Cruz, 5:17-cv-02166, Lucas Rangel Ferreira, 5:17-cv-02166, Masood Javaherian, 5:17-cv-02166, David Koplovitz, 5:17-cv-02166, Brian Letulle, 5:17-cv-02155, Deirdre McElhaney, 5:17-cv-2166, Carmen **[**8]** Minon, 5:17-cv-02166, Erica Minon, 5:17-cv-02166, Gabriel Minon, 5:17-cv-02166, Betsy Santiago, 5:17-cv-02166, Javier Santiago, 5:17-cv-02166, Peter Yee, 5:17-cv-02166, Plaintiffs: Frederic S. Fox, Kaplan Fox & Kilsheimer, New York, NY; Laurence D. King, Kaplan Fox & Kilsheimer LLP, San Francisco, CA.

For Alicia Hadnett, 5:17-cv-02167, Plaintiff: Robert J. Gralewski, Jr., Kirby McInerney LLP, San Diego, CA.

For Daniel Carroll, 5:17-cv-02168, Debra Grasl, 5:17-cv-02168, Amanda Newsome, 5:17-cv-02168, Armando Herrera, 5:17-cv-02170, Eden Wagner, 5:17-cv-02170, Neil Wagner, 5:17-cv-02170, Plaintiffs: Betsy Carol Manifold, Wolf Haldenstein Adler Freeman & Herz, San Diego, CA; Rachele R. Byrd, Wolf Haldenstein Adler Freeman & Herz LLP, San Diego, CA.

For David Kreuzer, 5:17-cv-02172, Allan Rotman, 5:17-cv-02169, Shari Cole, 5:17-cv-02169, Phillip James Zacharias, 5:17-cv-02169, Mary Beth Cummins, 5:17-cv-02169, Guy Snowdy, 5:17-cv-02169, Cynthia Bambini, 5:17-cv-02169, Grant Hauschild, 5:17-cv-02169, David Floyd, 5:17-cv-02169, Kim Coughlin, 5:17-cv-02169, Brandon Fuller, 5:17-cv-02169, Lisa Patnode, 5:17-cv-02169, Nina Bartoshevich, 5:17-cv-02169, Plaintiffs: Jason S Hartley, Stueve Siegel **[**9]** Hanson, LLP, San Diego, CA.

For All Plaintiffs, Plaintiff: Joseph W. Cotchett, Cotchett Pitre & McCarthy LLP, Burlingame, CA; Krysta Kauble Pachman, LEAD ATTORNEY, Susman Godfrey LLP, Los Angeles, CA; Steven Noel Williams, LEAD ATTORNEY, Joseph Saveri Law Firm, San Francisco, CA; Adam J. Opinion

[*285] ORDER GRANTING PLAINTIFFS' MOTION FOR CLASS CERTIFICATION; DENYING QUALCOMM'S MOTION TO STRIKE THE DECLARATION OF KENNETH FLAMM

Re: Dkt. Nos. 524, 643

Plaintiffs Sarah Key, Terese Russell, Carra Abernathy, Leonidas Miras, and James Clark (collectively, "Plaintiffs") bring a putative class action against Defendant Qualcomm Incorporated ("Qualcomm") alleging antitrust violations. Before the Court are (1) Plaintiffs' motion for class certification; and (2) Qualcomm's motion to strike the declaration of Kenneth Flamm. Having considered the parties' briefing, the relevant law, and the record in this case, the Court GRANTS Plaintiffs' motion for class certification and DENIES Qualcomm's motion to strike the declaration of Kenneth Flamm.

I. BACKGROUND

A. Factual Background

This case requires understanding the complicated interaction between cellular communications standards, standard essential patents ("SEPs"), and the market for baseband processors, **[**17]** or "modem chips." The Court begins by discussing cellular communications standards and modem chips generally. Then, the Court discusses Qualcomm's cellular communications SEPs and Qualcomm's participation in the markets for modem chips. **[*286]** Next, the Court discusses Plaintiffs' allegations that Qualcomm has used its cellular SEPs and its modem chips monopoly to harm competition in certain modem chips markets. Finally, the Court discusses Plaintiffs' allegations that Qualcomm's conduct has caused them harm by raising the prices paid for products containing modem chips.

1. Cellular Technology and the Baseband Processor Industry Generally

i. Cellphone Networks

Cellular communications depend on widely distributed networks that implement cellular communications standards. ECF No. 490 ("FAC") ¶ 33. Cellular communications standards have evolved over four "generations." *Id.* ¶ 35. "First-generation cellular communications standards were developed in the 1980s. These standards support analog transmissions of voice calls." *In re Qualcomm Antitrust Litig., 292 F. Supp. 3d 948, 955 (N.D. Cal. 2017)* (citation omitted).

Second-generation ("2G") cellular communications were developed in the early 1990s. FAC ¶ 36. 2G cellular communications standards support digital transmissions **[**18]** of voice calls. *Id.* The leading 2G standards are the Global System for Mobile Communications standard ("GSM") and second generation Code Division Multiple Access standard ("2G-CDMA"). *Id.* AT&T and T-Mobile chose to operate GSM networks. *Id.* By contrast, Verizon and Sprint operate 2G-CDMA networks. *Id.*

In the late 1990s, third-generation ("3G") cellular communications standards were introduced. *Id.* ¶ 37. The leading 3G standards are the Universal Mobile Telecommunications System ("UMTS") and third-generation CDMA ("3G-CDMA") standards. *Id.* Network operators that deployed 2G GSM networks, such as AT&T and T-Mobile, transitioned to 3G UMTS networks. *Id.* By contrast, network operators that deployed 2G-CDMA networks, such as Verizon and Sprint, transitioned to 3G-CDMA networks. *Id.*

In late 2009, fourth-generation ("4G") cellular communications standards were introduced. *Id.* ¶ 38. These standards support substantially higher data-transmission speeds than 3G standards. *Id.* The leading 4G standard is Long-Term Evolution ("LTE"). *Id.* Most major network operators worldwide have deployed LTE. *Id.*

ii. Standard Essential Patents

Cellular communications standards, such as CDMA and LTE standards, are **[**19]** adopted by standards setting organizations ("SSOs"). *Id.* ¶ 34. SSOs that adopt cellular telecommunications standards include the European Telecommunication Standards Institute ("ETSI"), the Telecommunications Industry Association ("TIA"), and the International Telecommunications Union ("ITU"). *Id.* ¶ 35.

In setting a cellular communications standard, SSOs often include technology in the cellular communications standard that is patented. Patents that cover technology that is incorporated into a standard are known as "standard essential patents" ("SEPs"). *Id.* ¶ 34.

Importantly, before incorporating a technology into a standard, SSOs "require participants to publicly disclose any claimed SEPs and promise to license [SEPs] to anyone who practices the standard on a royalty-free or [fair, reasonable, and non-discriminatory ('FRAND')] basis." *Id.* ¶ 45. "Absent [such] safeguards, SEP holders could abuse the standard-setting process via 'patent hold-up,' which happens 'when the holder of a[n] [SEP] demands excessive royalties after companies are locked into using a standard.'" *Id.* ¶ 43 (citation omitted).

iii. Baseband Processors

In order to communicate with a cellular communications network, a **[**20]** cellphone handset ("handset") must contain a semiconductor device known as a baseband processor, or "modem chip." *Id.* ¶ 33. More specifically, in order to communicate with a *particular* cellphone network, the handset must contain a modem chip that complies with the cellular communications standards that the particular cellphone network supports. *Id.* For example, a handset that contains a modem chip that complies only with UMTS standards cannot communicate with a cellular network that uses 3G-CDMA standards. "Multi-mode" modem **[*287]** chips can comply with more than one cellular communications standard. *Id.*

To be used on a network that deploys LTE—the leading 4G standard used by major cellular network operators—the handset must ordinarily contain a modem chip that complies with LTE standards and is also "backward compatible" with 2G and 3G standards. *Id.* ¶ 41. This is because network operators have "continued to use the prior standards" and "have not yet replaced their 2G and 3G infrastructure with the new 4G infrastructure." *Id.* Accordingly, most manufacturers "must purchase multimode chips in order to make [handsets] that can function on the major U.S. wireless networks." *Id.*

iv. Cellular Handset [21] Tiers and Smartphones**

Cellular handsets are produced by original equipment manufacturers ("OEMs") such as Apple and Samsung. *Id.* ¶¶ 1-2, 39. Since the late 2000s, the market for handsets with advanced computing capability, such as smartphones and tablets, has "grown tremendously." *Id.* ¶¶ 2-3.

Competition in the manufacturing and sale of handsets has developed over time into "tiers": premium, mid, and low. *Id.* ¶ 39. "Premium"-tier smartphones include brands such as Apple's iPhone and Samsung's Galaxy-S. *Id.* Premium smartphones are of particular importance to OEMs because they "tend to have higher prices and margins than lower-tier products and are important for branding." *Id.*

Among the cellular communications standards discussed above, "LTE functionality, including its high data transmission speed, is central to modern [handsets], as consumers increasingly use them to transmit large volumes of data." *Id.* ¶ 40. Specifically, LTE allows for the transmission of large volumes of data, which has grown increasingly more important than cellular voice traffic. *Id.*

2. Qualcomm's Participation in the Modem Chip Market

Qualcomm is the leading supplier of modem chips worldwide. *Id.* ¶ 7. In particular, **[**22]** Qualcomm is dominant in the supply of two types of modem chips: (1) modem chips that comply with CDMA standards ("CDMA modem chips"); and (2) modem chips for use in premium tier handsets, which comply with advanced LTE standards ("premium-LTE modem chips"). *Id.*

i. CDMA Chips

First, Qualcomm has been particularly dominant in the supply of CDMA modem chips. *Id.* ¶¶ 57-58. As set forth above, major carriers such as Verizon and Sprint have deployed CDMA networks. *Id.* ¶ 36. OEMs that wish to manufacture handsets to operate on CDMA networks such as Verizon and Sprint must use modem chips that comply with CDMA standards.

Qualcomm is the dominant supplier of CDMA modem chips. From 2001 through 2015, Qualcomm's worldwide share of CDMA modem chips exceeded 80%. *Id.* ¶ 57. At the time of the FAC, it was also estimated that "Qualcomm's worldwide share of the CDMA [modem] chip market for 2016 [was] likely to exceed or at least meet its historically greater than 80% share of the market." *Id.*

Qualcomm faces "limited competition for the supply of CDMA" modem chips. *Id.* ¶ 58. In the past ten years, "the only supplier of CDMA [modem chips] other than Qualcomm was Via Technologies," a Taiwanese company. *Id.* ***[**23]*** (citation omitted). However, Via Technologies has focused its sales on the lower-tier handset market, rather than the premium market. *Id.* This is partly because Via Technologies has not offered multi-mode modem chips "that combine CDMA functionality with UMTS or LTE functionality." *Id.* (citation omitted). In 2015, Intel Corporation ("Intel") acquired Via Technology's CDMA modem chip business. *Id.* However, Intel "has not yet commercialized a [modem] chip that integrates Via [Technology]'s CDMA technology" with "Intel's [own] multi-mode [modem chip] technologies." *Id.*

Another Taiwanese company, MediaTek Inc. ("MediaTek"), licensed technology from Via Technologies in late 2013 and began to offer CDMA modem chips in 2015. *Id.* However, MediaTek has not offered multi-mode CDMA modem chips that are "suitable for use in flagship handsets." *Id.* (citation omitted). **[*288]** Overall, MediaTek's sale of CDMA modem processors has been small. *Id.*

ii. Premium-LTE Modem Chips

As discussed above, most cellular network operators have deployed LTE networks. *Id.*

¶ 59. This includes major U.S. cellular network operators such as Verizon, AT&T, T-Mobile, and Sprint. *Id.* LTE functionality has continually advanced since **[**24]** the first LTE network was introduced in 2010. *Id.* These advances have allowed for progressively faster data speeds. *Id.* Accordingly, as LTE technology has progressed, "[modem] chip manufacturers have added advanced features." *Id.* For premium tier handsets, OEMs typically require modem chips with "advanced LTE functionality" that support advanced data download and upload speeds, in addition to other functions. *Id.* For an OEM designing and manufacturing a premium tier handset, a modem chip that supports only earlier LTE technology is not a substitute for a modem chip that supports advanced LTE standards. *Id.* Accordingly, just as OEMs produce handsets in "tiers," competition among LTE modem chip manufacturers also occurs in tiers. *Id.* ¶ 60.

Qualcomm has consistently been the dominant supplier of premium LTE modem chips. *Id.* ¶ 61. From 2012 through 2014, Qualcomm's annual worldwide share of premium LTE modem chip sales exceeded 80%. *Id.* Although Qualcomm's worldwide share dipped to 69% in 2015, its worldwide share for 2016 "remained at the dominant levels it [had] since 2012." *Id.*

Qualcomm faces limited competition in the premium LTE modem chip market. *Id.* ¶ 62. Indeed, one of Qualcomm's **[**25]** "only competitor[s] in the LTE modem chip market is Intel." *Id.* Intel has begun to supply a portion of Apple's modem chip requirements for the iPhone 7, *id.* ¶ 109, but for many years "Qualcomm effectively blocked Apple from using Intel as a [modem] chip supplier," *id.* ¶ 62.

3. Qualcomm's Cellular Communications SEPs

In addition to supplying modem chips to OEMs, Qualcomm also has several patents that have been declared essential to cellular communications standards. *Id.* ¶¶ 45, 50.

Qualcomm has participated in the cellular standard setting process through SSOs such as ETSI, TIA, and Alliance for Telecommunications Industry Solutions ("ATIS"). *See id.* ¶ 50. "Qualcomm was a leading developer and proponent of 2G-CDMA standards. Qualcomm has a correspondingly high share of all patents declared essential to 2G-CDMA standards. Qualcomm also participated in 3G standard setting, though to a less significant degree." *In re Qualcomm Antitrust Litig., 292 F. Supp. 3d at 957-58* (citation omitted). Qualcomm "had a smaller share of SEPs related to the UMTS and 3G-CDMA standard than its share of the 2G-CDMA SEPs." FAC ¶ 37. Qualcomm's share of SEPs in LTE standards "is much lower" than Qualcomm's share of CDMA SEPs. *Id.* ¶ 38. Qualcomm's share of LTE SEPs "is **[**26]** roughly equivalent to that of other industry competitors." *Id.* "One study of declared LTE SEPs found that Qualcomm had a 13% share of 'highly novel' essential LTE patents, compared to 19% for Nokia and 12% for both Ericcson and Samsung." *Id.*

Qualcomm has committed "to ETSI, TIA, [ATIS], and other SSOs that it w[ill] license its cellular SEPs" on FRAND terms. *Id.* ¶ 50. "Qualcomm is thus required to license its cellular SEPs on FRAND terms to [handset] OEMs, as well as competing [modem] chip suppliers." *Id.* ¶ 52. In practice, however, Qualcomm licenses its cellular SEPs to OEMs, but Qualcomm "refuses" to license its cellular SEPs to competing modem chip manufacturers. *Id.* ¶ 65.

In licensing its cellular SEPs to OEMs, Qualcomm collects a royalty rate of approximately 5% of the value of the net selling price of the handset. *Id.* ¶ 13. For example, if an OEM sells a handset that is priced at $600, Qualcomm will collect a $30 royalty for each sale. Among SEP holders, Qualcomm garners an outsized share of licensing revenues paid by OEMs, and OEMs pay Qualcomm far more in royalties than OEMs pay other SEP licensors, even those with comparable portfolios of cellular SEPs. *Id.* Indeed, an analysis **[**27]** conducted by Qualcomm in 2015 **[*289]** showed that revenues from Qualcomm's licensing program were "'equivalent in size to the sum of ~12 companies with a form of technology licensing,' including leading cellular SEP licensors such as Ericsson, Nokia, and Interdigital." *Id.* (citation omitted).

4. Qualcomm's Alleged Anticompetitive Conduct

Plaintiffs allege that Qualcomm uses its dominance in the supply of CDMA and premium-LTE modem chips to skew SEP licensing negotiations toward outcomes that benefit Qualcomm and harm Qualcomm's modem chip competitors. *Id.* ¶ 52. Plaintiffs allege that Qualcomm does this through a course of conduct that includes three primary practices: (i) a "no license-no chips" policy; (ii) Qualcomm's refusal to license its cellular SEPs to competing modem chip manufacturers; (iii) Qualcomm's exclusive dealing arrangements with Apple. *Id.* ¶ 53.

i. "No License-No Chips"

As discussed above, Qualcomm's FRAND commitments "require[] [Qualcomm] to license its cellular SEPs on FRAND terms to [handset] OEMs, as well as competing chip suppliers." *Id.* ¶ 52. Nonetheless, Qualcomm refuses to license its cellular SEPs to competing modem chip manufacturers. Thus, competing modem chip manufacturers **[**28]** cannot sell to OEMs modem chips "that convey the rights to Qualcomm's cellular SEPs." *Id.* ¶ 72. Instead, Qualcomm licenses its cellular SEPs to only OEMs who make and sell handsets (or those OEMs' contract manufacturers). *Id.* ¶ 8a. In licensing its cellular SEPs to OEMs, Plaintiffs allege that "Qualcomm conditions OEMs' access to [Qualcomm's modem] chips on [OEMs'] accepting a separate license to Qualcomm's cellular SEPs on Qualcomm's preferred terms." *Id.* ¶ 74. Essentially, unless OEMs agree to take out a separate SEP licensing agreement with Qualcomm on Qualcomm's preferred terms that covers all of the handsets that the OEM sells, Qualcomm will not supply the OEM with any Qualcomm modem chips. *Id.* Plaintiffs call this practice Qualcomm's "no license-no chips" policy. *Id.*

Plaintiffs allege that Qualcomm's conduct is unique among modem chip suppliers and suppliers of other cellular-equipment components. *Id.* ¶ 85. "Other component suppliers rely on component sales to convey their intellectual property rights to OEM customers, rather than selling the components and also entering into a separate intellectual property license." *Id.* When a supplier sells a component, such as a modem chip, **[**29]** to an OEM, that sale, under the doctrine of patent exhaustion, ordinarily terminates any right of the supplier under patent law to control any further use or sale of the component. *Id.* "Thus, a supplier's sale of a component to an OEM would already exhaust their patent rights, obviating the need—and making it unlawful—to require a separate patent license." *Id.*

Plaintiffs further allege that Qualcomm's "no license-no chips" policy stifles the normal process of negotiating the royalty rates of Qualcomm's FRAND-encumbered cellular SEPs. OEMs have a number of grounds to "attack Qualcomm's royalty demands in court as being non-FRAND." *Id.* ¶ 83. For example, OEMs could argue that Qualcomm's royalties "do not reflect the value contributed by its patented inventions," are much higher than those "charged by other SEP licensors with similar technical contributions," constitute "a percentage of the [entire handset's] price," and "do[] not account for the value of any cross-licensed patents." *Id.* However, Plaintiffs allege that OEMs do not challenge Qualcomm's royalty terms because of Qualcomm's "no license-no chips" policy. *Id.* ¶ 96. Losing access to Qualcomm's modem chips would be a substantial **[**30]** loss to OEMs given Qualcomm's "dominance in CDMA and premium LTE [modem] chips." *Id.* ¶ 95.

Thus, "[t]o maintain access to Qualcomm's [modem] chips, OEMs have been coerced into accepting royalty and other license terms that they would not otherwise accept." *Id.* ¶ 96. Specifically, OEMs pay Qualcomm royalties that "do not reflect OEMs' assessment of patent royalties that a court or neutral arbiter would deem reasonable, including in light of Qualcomm's FRAND commitments." *Id.* "Instead, the royalties reflect Qualcomm's dominant position in the [modem] chip markets, and include the added **[*290]** increment that OEMs pay to Qualcomm to avoid disruption of [modem chip] supply." *Id.*

Plaintiffs call this "added increment"—the incremental above-FRAND royalty that OEMs pay Qualcomm—a "surcharge." *Id.* ¶ 82. This "surcharge" raises an OEM's cost of purchasing any *modem chip* because OEMs consider the "all-in" cost of a modem chip as consisting of two components: (i) the nominal price of the modem chip itself, and (ii) "any patent royalties the OEM must pay to use that [modem] chip in a [handset]." *Id.* ¶ 77. Qualcomm's "surcharge" raises the latter component—the patent royalties to use the modem chip in the **[**31]** handset—for every modem chip that an OEM buys, including the modem chips made by Qualcomm's competitors. *Id.* ¶ 78. "By raising OEMs' all-in cost of using competitors' chips, Qualcomm's conduct has diminished OEMs' demand for such processors, reduced competitors' sales and margins, and diminished competitors' ability and incentive to invest and innovate." *Id.* ¶ 138. Moreover, Qualcomm has also "limited competitors' ability to discipline the all-in prices that Qualcomm charges for [modem chips]." *Id.* ¶ 79. "Th[e] inflated supra-FRAND royalty is ultimately passed onto consumers of [handsets] like Plaintiffs." *Id.* ¶ 96.

In addition, Plaintiffs allege that "Qualcomm can discriminate in its royalties" by "offer[ing] OEMs incentive payments to discount Qualcomm's above-FRAND royalties if an OEM uses Qualcomm's chips as opposed to those of a competitor." *Id.* ¶ 81. Qualcomm can do so based on its accumulation of funds from charging the surcharge. *Id.* ¶ 80. In other words, "the surcharge is a means to extract a higher price for Qualcomm's own chips without being undercut by competing chip manufacturers." *Id.* In this way, the revenue that Qualcomm earns from its surcharge "comes back to Qualcomm **[**32]** as a form of profit and maintains Qualcomm's chip monopoly." *Id.*

ii. Qualcomm's Refusal to License its SEPs to Chip Competitors

As discussed briefly above, Plaintiffs allege that Qualcomm refuses to license its FRAND-encumbered cellular SEPs to competing modem chip manufacturers. Rather, Qualcomm licenses its cellular SEPs only to OEMs who manufacture handsets (or those OEMs' contract manufacturers). *Id.* ¶ 8a. Plaintiffs contend that this practice violates Qualcomm's FRAND commitments, which "require[] [Qualcomm] to license its cellular SEPs on FRAND terms to [handset] OEMs, as well as competing chip suppliers." *Id.* ¶ 52. Although several of Qualcomm's competitors, including Intel and Samsung, have requested SEP licenses from Qualcomm, "Qualcomm has simply refused to offer *any* licenses to potential competitor [modem] chip manufacturers." *Id.* ¶ 65.

According to Plaintiffs, if Qualcomm licensed its modem chip competitors—as opposed to only OEMs—Qualcomm would not be able to use the threat of a disruption in supply of its modem chips to induce OEMs to agree to Qualcomm's preferred royalty terms. *Id.* ¶ 78. This is because, unlike OEMs who depend on Qualcomm for modem chip supply, competing **[**33]** modem chip manufacturers do not need modem chips from Qualcomm. *Id.* However, because Qualcomm does not license its competitors, competitors cannot offer competitive pricing and are therefore unable to "discipline the all-in prices that Qualcomm charges for" modem chips. *Id.* ¶ 79. Again, "[t]he revenue from Qualcomm's surcharge comes back to Qualcomm as a form of profit and maintains Qualcomm's chip monopoly." *Id.* ¶ 80.

iii. Qualcomm's Exclusive Deals with Apple

In addition to Qualcomm's "no license-no chips" policy and Qualcomm's refusal to license its cellular SEPs to its competitors, Plaintiffs further allege that Qualcomm has entered exclusive deals with Apple. *Id.* ¶ 106.

"Apple is a particularly important OEM from the perspective of a nascent [modem chip] supplier." *Id.* ¶ 108. Specifically, "Apple sells large volumes of premium handsets that require premium LTE" modem chips which "command higher prices . . . than lower-tier [modem chips]." *Id.* ¶ 108a. Moreover, Apple provides additional benefits to chip suppliers because modem chip suppliers for Apple learn from Apple's engineer teams, achieve "technical validation" by meeting Apple's **[*291]** complicated technical requirements, and "can field-test **[**34]** [their modem chips] through global launches." *Id.* ¶ 108b—d.

Plaintiffs allege that Apple has entered into *de facto* exclusive agreements with Qualcomm to use only Qualcomm's modem chips in Apple's flagship products. *Id.* ¶ 106. Specifically, Apple "repeatedly engaged in negotiations with

Qualcomm concerning the excessive royalties Qualcomm charged such contract manufacturers to license its SEPs." *Id.* ¶ 98. Apple entered into agreements with Qualcomm in 2007, 2009, 2011, and 2013.

In 2007, "Qualcomm agreed to pay to Apple marketing incentives." *Id.* ¶ 100. In return, Apple had to agree not to incorporate a prospective fourth-generation standard that was opposed by Qualcomm but championed by Intel, Qualcomm's competitor. *Id.*

In 2009, Qualcomm and Apple entered into an agreement "address[ing] the process by which Qualcomm supplied chips and associated software to Apple." *Id.* ¶ 101. Under the agreement, "Apple's ability to sue Qualcomm for patent infringement concerning Qualcomm [modem] chips" was restricted. *Id.* Additionally, Qualcomm "capp[ed] its liability for the failure to supply" and "reserv[ed] for itself the ability to terminate its obligation to supply [modem] chips to Apple's contract **[**35]** manufacturers." *Id.*

In 2011, Qualcomm entered into an agreement with Apple through which "Qualcomm agreed to make substantial incentive payments to Apple if Apple agreed to exclusively use Qualcomm [modem] chips in all new iPhone and iPad models." *Id.* ¶ 102. If Apple launched a new handset with a non-Qualcomm modem chip, "Apple would forfeit all of these incentive payments." *Id.* The agreement also provided that "Apple could not initiate any action or litigation against Qualcomm for intellectual property infringement." *Id.*

In 2013, Qualcomm entered into an agreement with Apple that modified and extended the term of the exclusivity arrangement set forth in the companies' 2011 agreement. *Id.* ¶ 103. Under the 2013 agreement, Qualcomm "agreed to make payments to Apple consistent with" the 2007 agreement involving marketing incentives. *Id.* ¶ 104. Qualcomm's agreement to do this was subject to a new condition: "Apple could neither initiate nor induce others to initiate litigation based on Qualcomm's failure to offer licenses on FRAND terms." *Id.* ¶ 103. Further, "Qualcomm also agreed to make separate substantial incentive payments to Apple so long as Apple exclusively sourced [modem] chips from **[**36]** Qualcomm." *Id.* If, during the period of the agreement, Apple launched a new handset with a non-Qualcomm modem chip, Apple would forfeit past and future incentive payments. *Id.*

According to Plaintiffs, "Qualcomm's 2011 and 2013 agreements with Apple were, and were intended by Qualcomm to be, *de facto* exclusive deals that were as effective as express purchase requirements and that essentially foreclosed Qualcomm's competitors from gaining [modem chip] business at Apple." *Id.* ¶ 106. Although Apple had "an interest in developing and working with additional suppliers of [modem chips]," the "large penalties that Apple would face" from Qualcomm if Apple chose to source chips from another supplier "prevented Apple from using alternative suppliers" during the effective exclusivity period under the agreements. *Id.* ¶ 106a—b; *see also id.* ¶ 109 (alleging penalties are sufficiently large that they effectively prevent other modem chip manufacturers from competing with Qualcomm to gain business from Apple).

As a result of Qualcomm's exclusive dealing arrangements with Apple, Apple sourced modem chips exclusively from Qualcomm for all new iPad and iPhone products that Apple launched from October 2011 **[**37]** until September 2016. *Id.* ¶ 107. Qualcomm's exclusive agreements with Apple "excluded competition from other [modem] chip suppliers and harmed competition." *Id.* ¶ 108. These exclusive agreements also "prevented Qualcomm's competitors from attaining the[] benefits" of working with Apple "and foreclosed a substantial share of the market for premium LTE chips." *Id.* ¶ 109.

5. Plaintiffs' Alleged Injury

Plaintiffs assert that Qualcomm's conduct caused them injury. According to Plaintiffs, **[*292]** "Qualcomm used its" practices to "coerce acceptance of [above]-FRAND licensing rates and terms for its SEPs." *Id.* ¶ 143. As noted above, this raises the "all-in" price of every modem chip because OEMs must pay a surcharge to Qualcomm "to ensure continued access to Qualcomm's modem chips supply." *Id.* "The artificially inflated all-in cost for modem chips in turn resulted directly in increases for the price of [handsets] that use those [modem] chips." *Id.*

Plaintiffs further allege that the surcharge was "passed down the distribution chain from the modem chips purchasers to Plaintiffs" who purchase "the [handsets] containing such [modem] chips." *Id.* ¶ 144. In other words, Qualcomm's surcharge was "passed on" **[**38]** to Plaintiffs through OEMs, distributors, and retailers and "can be directly traced through a straightforward distribution chain." *Id.* OEMs, distributors, and retailers cannot "readily absorb the [surcharge] Qualcomm charges for its modem chips" because they are "generally subject to vigorous price competition" and "generally operate on thin margins." *Id.* ¶ 150. "The inflated all-in cost of a modem chip raises the prices consumers pay for [handsets] incorporating modem chips." *Id.* ¶ 126. Qualcomm's royalty rates are generally based on "a percentage of the wholesale price of" the entire handset, rather than the modem chip. *Id.* ¶ 146. Plaintiffs allege that, in this way, Qualcomm "directly distorted and increased the price of the [handsets] paid by Plaintiffs." *Id.* ¶ 145. By "us[ing] a royalty base that is the price of the [handset] as a whole," Qualcomm targeted the effect of its conduct "at the [handsets] as a whole rather than merely their components." *Id.* ¶ 146. Therefore, according to Plaintiffs, "[t]he [handset] product market is inextricably intertwined with the CDMA and premium-LTE [modem] chip markets." *Id.* ¶ 127.

B. Procedural Background

In a separate action initiated in January **[**39]** 2017, the Federal Trade Commission ("FTC") sued Qualcomm in this Court and alleged that Qualcomm engaged in unfair methods of competition in violation of *§ 5 of the Federal Trade Commission Act*. *FTC v. Qualcomm Inc., No. 17-CV-00220-LHK, 2017 U.S. Dist. LEXIS 98632, 2017 WL 2774406, at *7 (N.D. Cal. June 26, 2017)*.

Subsequently, a number of class action lawsuits were filed by consumers against Qualcomm. These lawsuits generally alleged that Qualcomm's conduct violated state and federal antitrust and consumer protection laws. In early 2017, Plaintiffs in several of the class action lawsuits moved to centralize pretrial proceedings in a single judicial district. *28 U.S.C. § 1407(a)* ("When civil actions involving one or more common questions of fact are pending in different districts, such actions may be transferred to any district for coordinated or consolidated pretrial proceedings."). On April 6, 2017, the Judicial Panel on Multidistrict Litigation issued a transfer order selecting the undersigned judge as the transferee court for "coordinated or consolidated pretrial proceedings" in the multidistrict litigation ("MDL") arising out of Qualcomm's allegedly anticompetitive conduct. *See* ECF No. 1 at 1-3.

On July 11, 2017, Plaintiffs in the MDL action filed a Consolidated Class **[**40]** Action Complaint ("CCAC") asserting two federal statutory claims and two state statutory claims: (1) a claim under the *California Cartwright Act*, (2) a claim under *§ 1 of the federal Sherman Act*, (3) a claim under *§ 2* of the federal Sherman Act, and (4) a claim under the California Unfair Competition Law ("UCL"). ECF No. 94.

On August 11, 2017, Qualcomm moved to dismiss all of the claims in the CCAC and to strike Plaintiffs' nationwide class allegations. ECF No. 110. On November 10, 2017, the Court granted Qualcomm's motion in one limited respect but otherwise denied Qualcomm's motion. ECF No. 175 at 45. Specifically, the Court granted with prejudice Qualcomm's motion to dismiss Plaintiffs' federal *Sherman Act § 1* and *§ 2* claims to the extent those claims seek damages, but otherwise denied Qualcomm's motion to dismiss and to strike Plaintiffs' nationwide class allegations. *Id.* Thus, Plaintiffs retain their California Cartwright Act and UCL claims in their entirety and their federal *Sherman Act § 1* and *§ 2* claims to the extent those claims do not seek damages.

[*293] On May 31, 2018, Plaintiffs sent Qualcomm a copy of a proposed amended complaint. ECF No. 489 at 1. On June 12, 2018, Qualcomm consented to the **[**41]** filing of the proposed amended complaint. *Id.* The next day, on June 13, 2018, Plaintiffs filed the First Amended Complaint ("FAC"). *See* FAC. Qualcomm filed an answer on June 27, 2018. ECF No. 495.

On July 5, 2018, Plaintiffs filed the instant motion for class certification. ECF No. 524 ("Mot."). Plaintiffs seek to certify the following class under *Federal Rule of Civil Procedure 23*:

> All natural persons and entities in the United States who purchased, paid for, and/or provided reimbursement for some or all of the purchase price for all UMTS, CDMA (including CDMAone and cdma2000) and/or LTE

> cellular phones ("Relevant Cellular Phones") for their own use and not for resale from February 11, 2011, through the present (the "Class Period") in the United States. This class excludes (a) Defendant, its officers, directors, management, employees, subsidiaries, and affiliates; (b) all federal and state governmental entities; (c) all persons or entities who purchased Relevant Cellular Phones for purposes of resale; and (d) any judges or justices involved in this action and any members of their immediate families or their staff.

Id. at 1. Qualcomm filed an opposition to Plaintiffs' motion for class certification on August 9, 2018, ECF No. **[**42]** 642 ("Opp."), and Plaintiffs filed a reply on September 6, 2018, ECF No. 725 ("Reply").

Qualcomm also filed a motion based on *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*, to strike the declaration of one of Plaintiffs' experts, Dr. Kenneth Flamm, on August 9, 2018. ECF No. 643 ("*Daubert* Mot."). Plaintiffs filed an opposition to Qualcomm's *Daubert* motion on August 30, 2018. ECF No. 709 ("*Daubert* Opp.").

II. LEGAL STANDARD

Class actions are governed by *Rule 23 of the Federal Rules of Civil Procedure*. *Rule 23* does not set forth a mere pleading standard. *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*. To obtain class certification, plaintiffs bear the burden of showing that they have met each of the four requirements of *Rule 23(a)* and at least one subsection of *Rule 23(b)*. *Zinser v. Accufix Research Inst., Inc., 253 F.3d 1180, 1186 (9th Cir. 2001)*. "A party seeking class certification must affirmatively demonstrate . . . compliance with the Rule[.]" *Dukes, 564 U.S. at 350*.

Rule 23(a) provides that a district court may certify a class only if: "(1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class." *Fed. R. Civ. P. 23(a)*. That is, the class must satisfy the requirements of numerosity, commonality, **[**43]** typicality, and adequacy of representation to maintain a class action. *Mazza v. Am. Honda Motor Co., Inc., 666 F.3d 581, 588 (9th Cir. 2012)*.

If all four prerequisites of *Rule 23(a)* are satisfied, the Court must also find that the plaintiffs "satisfy through evidentiary proof" at least one of the three subsections of *Rule 23(b)*. *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*. The Court can certify a *Rule 23(b)(1)* class when plaintiffs make a showing that there would be a risk of substantial prejudice or inconsistent adjudications if there were separate adjudications. *Fed. R. Civ. P. 23(b)(1)*. The Court can certify a *Rule 23(b)(2)* class if "the party opposing the class has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief or corresponding declaratory relief is appropriate respecting the class as a whole." *Fed. R. Civ. P. 23(b)(2)*. Finally, the Court can certify a *Rule 23(b)(3)* class if the Court finds that "questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating **[*294]** the controversy." *Fed. R. Civ. P. 23(b)(3)*.

"[A] court's class-certification analysis must be 'rigorous' and may 'entail some overlap with the merits of the plaintiff's underlying claim[.]'" *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 465-66, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)* (quoting *Dukes, 564 U.S. at 351*); *see also* *Mazza, 666 F.3d at 588* ("'Before certifying a class, the trial court **[**44]** must conduct a 'rigorous analysis' to determine whether the party seeking certification has met the prerequisites of *Rule 23*.'" (quoting *Zinser, 253 F.3d at 1186*)). This "rigorous" analysis applies to both *Rule 23(a)* and *Rule 23(b)*. *Comcast, 569 U.S. at 34* (stating that Congress included "addition[al] . . . procedural safeguards for *(b)(3)* class members beyond those provided for *(b)(1)* or *(b)(2)* class members (e.g., an opportunity to opt out)" and that a court has a "duty to take a '"close look"' at whether common questions predominate over individual ones" (citation omitted)).

Nevertheless, "*Rule 23* grants courts no license to engage in free-ranging merits inquiries at the certification stage." *Amgen, 568 U.S. at 466*. "Merits questions may be considered to the extent—but only to the extent—that they are relevant to determining whether the *Rule 23* prerequisites for class certification are satisfied." *Id.* If a court concludes that the moving party has met its burden of proof, then the court has broad discretion to certify the class. *Zinser, 253 F.3d at 1186*.

III. DISCUSSION

Plaintiffs seek certification of an injunctive relief class under *Rule 23(b)(2)* and a damages class under *Rule 23(b)(3)*. The Court first addresses whether the proposed class meets the requirements of *Rule 23(a)*, then addresses whether the action meets the requirements of either *Rule 23(b)(2)* or **[**45]** *Rule 23(b)(3)*.

A. *Rule 23(a)*

Plaintiffs assert that their class satisfies the elements of *Rule 23(a)*: numerosity, commonality, typicality, and adequacy of representation. Mot. at 4-7; *see Fed. R. Civ. P. 23(a)*. Qualcomm does not contest that Plaintiffs have satisfied all four requirements of *Rule 23(a)*, as evidenced by the fact that Qualcomm does not meaningfully address any of these requirements in its opposition. *See generally* Opp. Nevertheless, the Court briefly addresses each in turn.

First, the Court finds that Plaintiffs have satisfied *Rule 23(a)(1)*'s numerosity requirement. Pursuant to *Rule 23(a)(1)*, Plaintiffs must show that "the class is so numerous that joinder of all members is impracticable." *Fed. R. Civ. P. 23(a)(1)*. Here, Plaintiffs define their class by reference to objective criteria—namely, persons and entities who purchased particular types of cell phones in the United States from February 11, 2011 to the present. The parties agree that the class members number in the hundreds of millions. Mot. at 4; Opp. at 1; *see also* ECF No. 725-1 ¶ 14 ("The claims administrators estimated the size of the class to range from 232.8 million to 250 million."). The Court finds joinder of all members of this proposed class to be impracticable. *See Twegbe v. Pharmaca Integrative Pharm., Inc., 2013 U.S. Dist. LEXIS 100067, 2013 WL 3802807, *3 (N.D. Cal. July 17, 2013)* ("[T]he numerosity requirement is usually satisfied where **[**46]** the class comprises 40 or more members."). Thus, the numerosity requirement is satisfied. *See Fed. R. Civ. P. 23(a)(1)*.

Second, the Court finds that Plaintiffs have satisfied *Rule 23(a)(2)*'s commonality requirement. *Rule 23(a)(2)* requires that "there are questions of law or fact common to the class." *Fed. R. Civ. P. 23(a)(2)*. Nevertheless, "even a single common question will do." *Dukes, 564 U.S. at 359* (internal quotation marks, citation, and alterations omitted). As this Court has previously recognized, "[a]ntitrust liability alone constitutes a common question." *In re High-Tech Employee Antitrust Litig., 985 F. Supp. 2d 1167, 1180 (N.D. Cal. 2013)*. Thus, Plaintiffs here have satisfied *Rule 23(a)(2)*'s commonality requirement by raising the issues whether Qualcomm's business practices are anticompetitive and whether each class member suffered the same injury as a result of Qualcomm's anticompetitive conduct.

[*295] Third, the Court finds that Plaintiffs have satisfied *Rule 23(a)(3)*'s typicality requirement. The "permissive" typicality requirement "requires only that the representative's claims are reasonably co-extensive with those of the absent class members; they need not be substantially identical." *Hanlon v. Chrysler Corp., 150 F.3d 1011, 1029 (9th Cir. 1998)*. Typicality is present "when each class member's claim arises from the same course of events, and each class member makes similar legal arguments to prove the defendants' liability." *Rodriguez v. Hayes, 591 F.3d 1105, 1122 (9th Cir. 2010)* (citations **[**47]** omitted). Thus, "[i]n antitrust cases, 'typicality usually will be established by plaintiffs and all class members alleging the same antitrust violations by defendants.'" *In re High-Tech, 985 F. Supp. 2d at 1181* (internal quotation marks omitted) (quoting *Pecover v. Elec. Arts Inc., No. 08-CV-02820-VRW, 2010 U.S. Dist. LEXIS 140632, 2010 WL 8742757, at *11 (N.D. Cal. Dec. 21, 2010))*. Here, all class members allege the same injury stemming from the same conduct by Qualcomm. Accordingly, the Court finds that Plaintiffs' interests align with the interests of the class, and the typicality requirement of *Rule 23(a)(3)* is met.

Finally, the Court finds that Plaintiffs satisfy *Rule 23(a)(4)*'s adequacy requirement. Legal adequacy of a class representative under *Rule 23(a)(4)* turns on two inquiries: (1) whether named plaintiffs and their counsel have "any conflicts of interest with other class members," and (2) whether named plaintiffs and their counsel will "prosecute the action vigorously on behalf of the class." *Hanlon, 150 F.3d at 1020*. As noted above, Plaintiffs and class members share an interest in proving that Qualcomm's conduct violated the antitrust laws and caused injury to consumers.[1] In addition, Plaintiffs and Class Counsel do not have any conflicts of interest with class members and have demonstrated a commitment to prosecuting this action vigorously. Therefore, **[**48]** Plaintiffs have satisfied *Rule 23(a)(4)*.

Having conducted a "'rigorous analysis' to determine whether the party seeking certification has met the prerequisites of *Rule 23*," *Mazza, 666 F.3d at 588*, the Court finds that Plaintiffs' proposed class satisfies the numerosity, commonality, typicality, and adequacy requirements. Thus, Plaintiffs have satisfied the requirements set forth by *Rule 23(a)*. The Court now turns to *Rule 23(b)*.

B. *Rule 23(b)*

Plaintiffs contend that their proposed class meets the requirements of two subsections of *Rule 23(b)*—namely, *Rule 23(b)(2)* and *Rule 23(b)(3)*. Mot. at 7. The Court first analyzes *Rule 23(b)(3)*, then turns to *Rule 23(b)(2)*.

1. *Rule 23(b)(3)*

Plaintiffs first seek to certify their proposed class for damages and injunctive relief under *Rule 23(b)(3)*. Mot. at 7-8. As noted above, *Rule 23(b)(3)* can be broken into two component pieces: (1) predominance, and (2) superiority. *Hanlon, 150 F.3d at 1022*. The Court analyzes each in turn.

i. Predominance

Under *Rule 23(b)(3)*, plaintiffs must show "that the questions of law or fact common to class members predominate over any questions affecting only individual members." *Fed. R. Civ. P. 23(b)(3)*. The *Rule 23(b)(3)* predominance requirement is "even more demanding" than *Rule 23(a)*'s commonality counterpart. *Comcast, 569 U.S. at 34*. Predominance "tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation." *Amchem Prods. v. Windsor, 521 U.S. 591, 623, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* (citation omitted). The Ninth Circuit has held **[**49]** that "there is clear justification for handling the dispute on a representative rather than an individual basis" if "common **[*296]** questions present a significant aspect of the case and they can be resolved for all members of the class in a single adjudication." *Hanlon, 150 F.3d at 1022* (citation omitted).

Thus, the predominance inquiry "focuses on the relationship between the common and individual issues." *Id.* As the U.S. Supreme Court recently explained, the ultimate predominance question is "whether the common, aggregation-enabling, issues in the case are more prevalent or important than the non-common, aggregation-defeating, individual issues." *Tyson Foods, Inc. v. Bouaphakeo, 136 S. Ct. 1036, 1045, 194 L. Ed. 2d 124 (2016)* (quoting 2 W. Rubenstein, Newberg on Class Actions § 4:49 (5th ed. 2012)). "When 'one or more of the central issues in the action are common to the class and can be said to predominate, the action may be considered proper under *Rule 23(b)(3)* even though other important matters will have to be tried separately, such as damages or some affirmative

---

[1] Qualcomm opens its opposition by discussing the particular circumstances of Plaintiffs and their phone purchases. Opp. at 2-3. For example, some Plaintiffs bought refurbished phones or subsidized phones. *Id.* However, Qualcomm does not challenge either the adequacy or typicality of these Plaintiffs. As Plaintiffs point out, each Plaintiff had at least one phone purchase whose legitimacy Qualcomm does not question. Reply at 15; ECF No. 722-6 ("Flamm Reply Decl."), App'x B. To the extent that Qualcomm challenges particular marketing and pricing strategies, those strategies are discussed in the predominance section below.

defenses peculiar to some individual class members.'" *Id.* (quoting 7AA Charles Alan Wright et al., Federal Practice and Procedure § 1778 (3d ed. 2005)). The U.S. Supreme Court has also observed that the predominance standard is "readily met" in antitrust **[**50]** class actions. *Amchem, 521 U.S. at 625*.

"Considering whether questions of law or fact common to class members predominate begins . . . with the elements of the underlying cause of action." *Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 809, 131 S. Ct. 2179, 180 L. Ed. 2d 24 (2011)* (internal quotation marks omitted). A court must analyze these elements in order to "determine which are subject to common proof and which are subject to individualized proof." *In re TFT—LCD (Flat Panel) Antitrust Litig., 267 F.R.D. 291, 311-13 (N.D. Cal. 2010)*, *abrogated on other grounds by* *In re ATM Fee Antitrust Litig., 686 F.3d 741, 755 n.7 (9th Cir. 2012)*.

In the instant case, Plaintiffs allege that Qualcomm violated *§§ 1* and *2 of the federal Sherman Act*, *15 U.S.C. §§ 1-2*, as well as the California Cartwright Act and UCL, *Cal. Bus. & Prof. Code §§ 16700*, *17200*. FAC ¶¶ 168-210. With regard to Plaintiffs' Cartwright Act claim, "[t]he analysis under California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright Act was modeled after the *Sherman Act*." *Cty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*. Also, Plaintiffs' UCL claim is premised at least in part upon the Sherman and Cartwright Act violations. *See* *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 539-40 (Cal. 1999)* (explaining that the UCL "borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable" (citation omitted)). Neither party identifies any material difference between the federal and state claims warranting separate treatment. Thus, the Court may treat the state **[**51]** law claims together with the federal claims in this case.

To establish a federal antitrust claim, "plaintiffs typically must prove (1) a violation of antitrust laws, (2) an injury they suffered as a result of that violation, and (3) an estimated measure of damages." *In re High-Tech, 985 F. Supp. 2d at 1183* (quoting *In re New Motor Vehicles Canadian Export Antitrust Litig., 522 F.3d 6, 19 n.18 (1st Cir. 2008))*.[2] The Court proceeds through each of these elements and finds that common questions predominate overall and with regard to all three elements—antitrust violation, antitrust impact, and damages.

a. Antitrust Violation

Qualcomm does not seriously dispute that Plaintiffs' asserted antitrust violations are subject to common proof. The Court agrees that Plaintiffs have presented copious common evidence to prove that Qualcomm **[*297]** engaged in three uniform practices—namely, (1) Qualcomm's "no license-no chips" policy, (2) Qualcomm's refusal to license cellular SEPs to competing modem chip manufacturers, and (3) Qualcomm's exclusive dealings with Apple. Plaintiffs' lawsuit centers on whether these practices individually or collectively maintained Qualcomm's monopoly in the premium modem chip market in violation of the antitrust laws. As detailed below, the Court finds Plaintiffs have demonstrated that adjudication of Qualcomm's **[**52]** alleged antitrust violations will overwhelmingly turn on common legal and factual issues.

First, Plaintiffs provide substantial evidence that Qualcomm requires OEMs to accept a separate license to Qualcomm's cellular SEPs in order to gain access to Qualcomm's modem chips. Qualcomm admitted in interrogatory responses that Qualcomm does not sell modem chips to unlicensed OEMs. ECF No. 519-1 at 10. Numerous Qualcomm employees have also confirmed the existence of Qualcomm's uniform "no license-no chips" policy. In fact, the former General Manager of Qualcomm's modem chip division testified in his deposition that Qualcomm's "no license-no chips" policy has been in place since at least 1997. ECF No. 518-3 at 163:16-164:4. Qualcomm's "no license-no chips" policy is embodied in all of Qualcomm's component supply agreements.

---

[2] The antitrust violations are slightly different under *§§ 1* and *2* of the Sherman Act. Whereas *§ 1* prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States," *§ 2* punishes "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States." *15 U.S.C. §§ 1-2*. Neither party identifies any relevant material difference between *§ 1* and *§ 2* for purposes of the instant motion for certification.

Moreover, Qualcomm has entered into cellular SEP licenses with nearly every OEM, and most of the licenses have the same general structure across these OEMs. ECF No. 518-1 at 19.

Plaintiffs' antitrust theory is that Qualcomm's "no license-no chips" policy amounts to an anticompetitive tie that allows Qualcomm to extract an above-FRAND royalty rate across the entire market. **[**53]** In a tying arrangement, a "seller conditions the sale of one product (the tying product) on the buyer's purchase of a second product (the tied product)." *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1178 (9th Cir. 2016)* (quoting *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 912 (9th Cir. 2008))*. In the instant case, Plaintiffs point to common evidence—market share data in particular—to calculate Qualcomm's global market share in CDMA2000 modem chips and premium-LTE modem chips. *See* ECF No. 517-4 ("Flamm Decl.") ¶¶ 38, 54-55; *In re Dynamic Random Access Memory Antitrust Litig., No. M 02-1486 PJH, 2006 U.S. Dist. LEXIS 39841, 2006 WL 1530166, at *9 (N.D. Cal. June 5, 2006)* (certifying a class where expert used market share estimates to analyze monopoly power). Plaintiffs and their experts theorize that Qualcomm was able to leverage that market dominance in the modem chip market to coerce OEMs into entering licenses with above-FRAND royalty rates. ECF No. 517-5 ("Elhauge Decl.") ¶ 5.

Plaintiffs' licensing expert, Michael Lasinski, opined that the overcharge resulting from Qualcomm's above-FRAND royalty rate can be calculated by reference to common evidence. To determine whether Qualcomm's SEP royalty rates were fair and reasonable, Mr. Lasinski would (1) allocate a reasonable aggregate royalty rate for the entire standard to each SEP holder **[**54]** based upon that SEP holder's proportional share of SEP value, and (2) assess comparable agreements. ECF No. 517-6 ("Lasinski Decl.") ¶¶ 14, 107, 126. Mr. Lasinski performed an exemplary calculation based on multiple license agreements and documentary evidence regarding Qualcomm's licensing practices to calculate the total aggregate overcharge for each of the five largest U.S. OEMs. *Id.* ¶ 147. His report found that the incremental overcharge for each of these five OEMs ranged from 1.13% to 3.84% of the total cost of the device. *Id.*; ECF No. 639-4.

The fact that Qualcomm was able to charge an above-FRAND royalty is evidence that there is a market for the tied product, i.e., Qualcomm's cellular SEPs. *See, e.g., F.T.C. v. Ind. Fed'n of Dentists, 476 U.S. 447, 460-61, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)* ("[P]roof of actual detrimental effects . . . can obviate the need for an inquiry into market power, which is but a surrogate for detrimental effects." (internal quotation marks and citation omitted)). As Plaintiffs' expert Professor Einer Elhauge explains, "SEPs are inherently a market where, as is the situation in this case, there is direct evidence of anticompetitive effects." ECF No. 722-1 ("Elhauge Reply Decl.") ¶ 5; *see* ***[*298]*** *also id.* ¶ 6 (providing a basis for concluding that **[**55]** cellular SEPs "intrinsically constitute their own markets" because "the control of SEPs creates a potential to extract supra-competitive rents" and "all four major U.S. cellphone networks operate on the cellular standards at issue"). Professor Elhauge concludes that "the prices of Qualcomm's chipsets and royalties both exceeded their fair market value." *Id.* ¶ 7; *see also* Elhauge Decl. ¶ 66 (explaining that common "actual evidence conflicts with any claim that any change in SEP license royalty rates would be offset by an opposing change in Qualcomm's chipset prices").

Plaintiffs also provide an explanation for why Qualcomm was able to impose these above-FRAND royalty rates across the entire market. In particular, as discussed in more detail below, Plaintiffs have submitted common evidence that Qualcomm has adopted a uniform policy of refusing to offer exhaustive licenses for its cellular SEPs to competing modem chip manufacturers. This policy obstructed competing modem chip manufacturers from selling chips that were not subject to Qualcomm's above-FRAND royalty rate created by the "no license-no chips" tie. Elhauge Decl. ¶¶ 129, 132. Testimony from competing modem chip manufacturers **[**56]** confirms that the inability to obtain an exhaustive license from Qualcomm limited their ability to sell modem chips to OEMs. *See, e.g.*, ECF Nos. 519-8, 520-1. Because the threat of losing access to Qualcomm's dominant chip supply was too great, OEMs accepted the licenses with above-FRAND rates that applied to all handsets that they sold. Elhauge Decl. ¶¶ 40, 58. The above-FRAND payments, in turn, reinforced Qualcomm's dominant market position. *Id.* ¶ 57. Therefore, the common legal and factual issues surrounding Qualcomm's "no license-no chips" policy will predominate over any individual issues.

Second, Plaintiffs set forth significant evidence that Qualcomm has adopted a uniform policy of refusing to offer exhaustive licenses for its cellular SEPs to competing modem chip manufacturers. Plaintiffs rely on evidence that is common to the class, including internal Qualcomm documents, licenses, and licensing negotiations. For example, in a 2016 submission to the FTC, Qualcomm admitted that "Qualcomm does not . . . grant exhaustive licenses to manufacturers of . . . modem chips." ECF No. 517-7 at 1. To be sure, Qualcomm's licenses have evolved over time in response to legal decisions from **[**57]** the U.S. Supreme Court and Federal Circuit regarding the doctrine of patent exhaustion. *See, e.g., Quanta Computer, Inc. v. LG Elecs., Inc., 553 U.S. 617, 638, 128 S. Ct. 2109, 170 L. Ed. 2d 996 (2008)*; *TransCore, LP v. Elec. Transaction Consultants Corp., 563 F.3d 1271, 1274 (Fed. Cir. 2009)*. However, the relevant condition has remained constant: Qualcomm refuses to provide exhaustive licenses to competing manufacturers of modem chips. *See* ECF No. 517-7. Qualcomm has consistently applied this core policy to all modem chip competitors, *id.*, and Qualcomm does not point to any evidence of a deviation from this policy for any specific modem chip manufacturer.

Plaintiffs allege that Qualcomm has violated its FRAND commitments by refusing to license its cellular SEPs to competing modem chip manufacturers. FAC ¶ 52. Plaintiffs further identify common evidence that Qualcomm's refusal to license has had an anticompetitive effect on the market. Notably, Plaintiffs point to evidence that Qualcomm's refusal to provide exhaustive licenses to competing modem chip manufacturers deterred entry into the market and encouraged exit from the market. *See, e.g.*, ECF Nos. 520-4, 520-5. Similarly, there is documentary evidence that Qualcomm itself recognized that its refusal to license competing modem chip manufacturers increased Qualcomm's monopoly power and reduced competing modem chip manufacturers' **[**58]** ability to compete with Qualcomm for sales of modem chips. *See, e.g.*, ECF Nos. 520-8, 520-9, 520-10, 520-11. Thus, like Qualcomm's "no license-no chips" policy, the question whether Qualcomm's licensing practices are anticompetitive is subject to common proof.

Third, and finally, Plaintiffs' allegation that Qualcomm entered into exclusive dealings with Apple depends upon evidence that does not vary from class member to class member. In particular, Plaintiffs cite to two agreements **[*299]** between Qualcomm and Apple—namely, a 2011 agreement and a 2013 agreement (which amended the 2011 agreement). ECF Nos. 519-3 ("2011 Agreement"), 519-4 ("2013 Agreement"). Under the 2011 and 2013 agreements, Apple would lose past and future lump-sum incentive payments from Qualcomm if Apple launched any new products that contained modem chips from a manufacturer other than Qualcomm. 2011 Agreement ¶ 1.5; 2013 Agreement ¶ 5.

Whether the 2011 and 2013 agreements amounted to exclusive dealing arrangements is an issue subject to common proof. As the law instructs, exclusive dealing involves "an 'agreement between a vendor and a buyer that prevents the buyer from purchasing a given good from any other vendor,' and **[**59]** forecloses competition." *Aerotec Int'l, 836 F.3d at 1180* (quoting *Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 996 & n.1 (9th Cir. 2010))*. Thus, one of the key issues here is whether the 2011 and 2013 agreements positively induce Apple to accept a loyalty condition or negatively penalize Apple for noncompliance. One of Plaintiffs' experts, Professor Elhauge, concludes that the 2011 and 2013 agreements operate as penalties by looking to the common evidence of (1) Qualcomm's gross margin on sales of modem chips to Apple and to Qualcomm's other modem chip customers, and (2) Qualcomm's price to Apple during the term of the agreements and after the agreements had expired. Elhauge Decl. ¶¶ 129, 132. Professor Elhauge finds that comparing these pieces of evidence shows that (1) Apple would have paid more than Qualcomm's other modem chip customers if Apple violated the 2011 or 2013 agreement, and (2) Apple paid the same or higher prices with exclusivity than without exclusivity. *Id.* ¶¶ 131, 133. Furthermore, Plaintiffs submit documents from Apple confirming that the conditions in the 2011 and 2013 agreements prevented Apple from pursuing other opportunities. ECF No. 519-7 at 9. More specifically, testimony and documents from both Apple and Intel confirm that, in the absence of Qualcomm's exclusivity **[**60]** payments, Apple likely would have started using Intel modem chips in Apple's devices at an earlier date. ECF Nos. 522-1 at 4, 522-5 at 332:24-333:18.

This substantial evidence presented by Plaintiffs suggests that adjudication of Qualcomm's alleged antitrust violations will turn on legal and factual issues that are common to the proposed class. Accordingly, the Court finds that common questions will predominate with respect to the alleged antitrust violations.

b. Antitrust Impact

Having found that common questions predominate with respect to the first element, antitrust violation, the Court now turns to the second element, antitrust impact. "Antitrust 'impact'—also referred to as antitrust injury—is the 'fact of damage' that results from a violation of the antitrust laws." *In re Dynamic Random Access Memory, 2006 U.S. Dist. LEXIS 39841, 2006 WL 1530166, at *7*. "It is the causal link between the antitrust violation and the damages sought by plaintiffs." *In re New Motor Vehicles, 522 F.3d at 19 n.18* (citing *Sullivan v. Nat'l Football League, 34 F.3d 1091, 1103 (1st Cir. 1994))*. Thus, Plaintiffs here "must be able to establish, predominantly with generalized evidence, that all (or nearly all) members of the class suffered damage as a result of [Qualcomm's] alleged anti-competitive conduct." *In re High-Tech Employee Antitrust Litig., 289 F.R.D. 555, 567 (N.D. Cal. 2013)* (quoting *In re TFT-LCD, 267 F.R.D. at 311*).

Because Plaintiffs are indirect purchasers, "their burden is two-fold." *In re Optical Disk Drive Antitrust Litig., 303 F.R.D. 311, 324 (N.D. Cal. 2014)*. Plaintiffs **[**61]** must demonstrate that "all or nearly all of the original *direct* purchasers . . . bought at inflated prices" and that "those overcharges were passed through all stages of the distribution chain" to Plaintiffs. *Id.*; *see also* *In re Graphics Processing Units Antitrust Litig., 253 F.R.D. 478, 499 (N.D. Cal. 2008)* ("[I]ndirect-purchaser plaintiffs must demonstrate that defendants overcharged their direct purchasers . . . and that those direct purchasers passed on the overcharges to plaintiffs.").

With regard to direct purchasers, Qualcomm raises only one argument: (1) that Plaintiffs cannot show with common evidence **[*300]** that all or nearly all OEMs paid overcharges. Opp. at 8-9. However, Qualcomm's central focus is on Plaintiffs' theory and methodology for showing that the overcharges were passed through the distribution chain to end consumer class members. *See id.* at 1. Qualcomm raises two additional arguments in this regard: (2) that Plaintiffs cannot show with common evidence that overcharges were passed through to consumers at each step of the distribution chain, and (3) that a large portion of the putative class suffered no impact. *Id.* at 7-8, 9-18. Additionally, Qualcomm's *Daubert* motion challenges the opinions of one of Plaintiffs' experts, Dr. Flamm. *See Daubert* Mot. The Court addresses Qualcomm's three **[**62]** arguments in turn, including a discussion of Qualcomm's *Daubert* challenge in the second section examining Plaintiffs' pass-through theory.

(1) Impact to Direct-Purchaser OEMs

As noted above, before demonstrating that the alleged overcharge was passed through to consumers, Plaintiffs must demonstrate that all (or nearly all) direct-purchaser OEMs paid an overcharge. *In re Optical Disk, 303 F.R.D. at 324*. Qualcomm does not seriously dispute that Plaintiffs can use common evidence to prove that at least some OEMs faced an overcharge as a result of Qualcomm's three allegedly anticompetitive practices. Indeed, the Court's previous discussion of the antitrust violation element details Plaintiffs' common evidence that Qualcomm's practices had the effect of excluding competitors from the market and raising prices to OEMs. For example, internal Qualcomm emails and OEM testimony support that Qualcomm's market power and "no license-no chips" policy inflated Qualcomm's royalty rates to above-FRAND levels. *See, e.g.*, ECF Nos. 521-2, 521-4 at 11-12, 521-6 at 331:25-332:8. Similarly, common documentary and testimonial evidence indicates that Qualcomm's refusal to license to competing modem chip manufacturers discouraged competition by **[**63]** limiting competitors' ability to offer modem chips that were not subject to the above-FRAND royalty charge. *See, e.g.*, ECF Nos. 519-8 at 140:11-141:9, 520-1 at 380:3-19, 520-2 at 1. The issue whether these practices, alone and in combination with Qualcomm's alleged exclusivity arrangements with Apple, increased Qualcomm's monopoly power and excluded rivals from the market are also common to the class. *See, e.g.*, 520-4 at 169:4-176:16, 522-1 at 4, 522-5 at 332:24-333:18.

Rather than focusing generally on whether its practices resulted in an overcharge, Qualcomm argues that Plaintiffs cannot show with common methods and evidence that all or nearly all OEMs actually paid an alleged overcharge. Opp. at 8. In particular, Qualcomm notes that the methodology of Plaintiffs' expert, Mr. Lasinski, is OEM-specific. *Id.*[3] Specifically, Mr. Lasinski uses Qualcomm's transaction logs to determine each OEM's "historical weighted

[3] Although Qualcomm also appears to suggest that Mr. Lasinski would need to perform his analysis on a device-by-device basis using different evidence, Opp. at 8-9, Qualcomm relies on a portion of Mr. Lasinski's declaration in which he explains solely that

average running royalty rate." Lasinski Decl. ¶ 77. In his report, Mr. Lasinski performs an exemplary calculation for "the five devices OEMs with the largest U.S. market share, which collectively generated over 90% of U.S. revenues" during the relevant period. *Id.* ¶ 76. To calculate the **[**64]** overcharge, he then compares the historical weighted average running royalty rate to a hypothetical FRAND rate, which he determines based on an assessment of comparable agreements and an allocation of reasonable aggregate rates to the cellular SEPs at issue. *Id.* ¶ 147. Qualcomm does not explain why the use of OEM-specific data defeats predominance. As Mr. Lasinski explains, his methods for calculating the overcharge "could be extended to all other OEMs with U.S. sales." *Id.* ¶ 76. Moreover, Mr. Lasinski performs an exemplary calculation on a large share of the OEM market and concludes that all five of the OEMs that he examined were overcharged by rates of between 1.13% and 3.84%. *Id.* ¶ 147; ECF No. 639-4. Mr. Lasinski's methodology is well-suited to show that all (or nearly all) direct-purchaser OEMs actually paid an overcharge.

[*301] (2) Plaintiffs' Pass-Through Theory

The Court next turns to the parties' contentions regarding impact to indirect purchasers. As a preliminary matter, Plaintiffs argue that California law permits a presumption of class-wide impact. Reply at 6. In particular, Plaintiffs point to the California Court of Appeal's observation that, under California substantive **[**65]** law, courts ordinarily may assume injury to the class "in cases where consumers have purchased products in an anticompetitive market, even if some consumers did not actually have to pay the overcharge because of their individual circumstances." *In re Cipro Cases I & II, 121 Cal. App. 4th 402, 17 Cal. Rptr. 3d 1, 8 (Ct. App. 2004)*. This presumption has been applied "to markets characterized by individually negotiated prices, varying profit margins, and intense competition, as well as to indirect purchasers who buy the product from middlemen in a largely unaltered form." *Id.* However, Plaintiffs "do not rest on the presumption of classwide impact alone," Reply at 6, and they have supplied a reasonable methodology for measuring class-wide impact regardless of whether California law permits an inference that this element is met.

Where, as here, the class is composed of indirect purchasers, "proof of class-wide antitrust impact is made more complex because plaintiffs must offer a model of impact and damages that demonstrates the alleged overcharge was passed through to each successive link in the distribution chain, and ultimately to the plaintiffs." *In re Lithium Ion Batteries Antitrust Litig., No. 13-MD-02420-YGR, 2018 U.S. Dist. LEXIS 35744, 2018 WL 1156797, at *3 (N.D. Cal. Mar. 5, 2018)*. In the instant case, Plaintiffs have proposed a valid theory **[**66]** and methodology for showing, based on common evidence, that Qualcomm's overcharge was passed through to all class members in the form of higher quality-adjusted prices. The Court first presents an overview of Plaintiffs' model, including the three types of common evidence that Plaintiffs' expert, Dr. Flamm, relies upon to show antitrust impact to all class members. The Court then turns to Qualcomm's *Daubert* challenge to Dr. Flamm's opinions. Finally, the Court addresses Qualcomm's challenge that the pass-through theory does not hold at specific links in the distribution chain—namely, (1) OEMs and (2) retailers and wireless carriers. Opp. at 9-18.

(i) Overview of Plaintiffs' Pass-Through Theory

The Court begins with an overview of Plaintiffs' theory and model for showing that Qualcomm's above-FRAND royalty charges were passed through to consumers. Plaintiffs marshal substantial evidence—including documentary evidence and expert reports using statistical modeling, economic theory, and data—to demonstrate that common questions will predominate over individual questions in determining the impact of the antitrust violations. Central to the analysis is the report of one of Plaintiffs' experts, Dr. Flamm. **[**67]**

In order to provide a baseline understanding for Dr. Flamm's report, the Court first briefly discusses the reports of two other experts, Professor Elhauge and Mr. Lasinski. Professor Elhauge explains in his report that Qualcomm's alleged above-FRAND royalty rate operates as an industry-wide tax on OEMs. Elhauge Decl. ¶ 58. In particular,

---

it would "be possible to approximate the overcharge on a more detailed basis," such as a device-by-device basis, Lasinski Decl. ¶ 148 n.263; *see also* ECF No. 641-13 at 108:3-109:5.

under Qualcomm's "no license-no chips" policy, OEMs must agree to a license that covers all handsets that the OEM sells, including handsets that contain non-Qualcomm modem chips. *Id.* In this way, OEMs are subject to an industry-wide tax because they must pay Qualcomm's royalty "for the use of Qualcomm's SEPs on each device, regardless of whose [modem chip] is in the device." *Id.* Mr. Lasinski, in turn, devises a methodology for calculating the amount of the overcharge to OEMs. In his report, Mr. Lasinski first uses Qualcomm's transaction logs to calculate the "historical weighted average running royalty rate" for five major OEMs. Lasinski Decl. ¶ 77. He then uses two approaches to determine an appropriate FRAND rate: (1) taking a reasonable rate appropriate for an entire cellular communications standard and determining the portion of the rate attributable **[**68]** to the share of SEP value, and (2) analyzing comparable agreements and determining an appropriate rate. *Id.* ¶¶ 107, 126-29. At that point, Mr. Lasinski subtracts the calculated FRAND rate from the historical weighted average running royalty rate for each OEM **[*302]** to retrieve each OEM's percentage overcharge. *Id.* ¶ 147. Finally, Mr. Lasinski applies those percentage overcharges to each OEM's revenue to calculate the ultimate overcharge. *Id.* ¶ 148.

That background forms the basis for Dr. Flamm's pass-through theory. Dr. Flamm assumes that Professor Elhauge and Mr. Lasinski have demonstrated that "absent Qualcomm's alleged anticompetitive behavior Qualcomm would have charged [OEMs] a substantially lower FRAND royalty for a license to Qualcomm's portfolio of [cellular SEPs]." Flamm Decl. ¶ 12 & n.6. Dr. Flamm's objective is to show how OEMs' above-FRAND royalty charge is passed through to Plaintiffs. More precisely, Plaintiffs retained Dr. Flamm to provide an analysis of "whether common evidence would be available to show how the overcharge levied by Qualcomm would have affected the price and performance characteristics of mobile devices sold by mobile device hardware OEMs to mobile communications **[**69]** service providers, distributors, and retailers," and "how those price and performance characteristics would in turn be reflected in the price and performance of mobile devices purchased by final consumers." ECF No. 517-4 ("Flamm Decl.") ¶ 13. Dr. Flamm particularly relies on three types of common evidence from which Plaintiffs will be able to argue that all (or nearly all) class members suffered damage as a result of Qualcomm's allegedly anticompetitive conduct.

First, Dr. Flamm describes the economic consensus, confirmed by theoretical and empirical research, that industry-wide taxes—like Qualcomm's here—are passed through to end purchasers as higher prices. Dr. Flamm explains that as a general matter, economics predicts that higher costs of manufacture will be passed on to consumers. *Id.* ¶ 121. Important here, he notes that "academic literature suggests that industry-wide costs are typically more likely to be passed through than OEM specific costs." *Id.* ¶ 122. In fact, one study "find[s] the more widespread a cost change, the higher the pass-through rate in response." *Id.* ¶ 122 n.90. The basic underlying theory is that "while refineries have little ability to pass on idiosyncratic **[**70]** cost shocks, shared cost changes have increasingly larger impacts, culminating in slightly greater than full pass-through for an industry-wide shock." *Id.* (citation omitted).

Moreover, these theoretical conclusions are bolstered by empirical studies, which "generally show that a large share of taxes are passed through to the end consumer." *Id.* For example, Dr. Flamm cites an empirical study finding that a 15% tax on Japanese television sales was passed through to consumers at rates greater than 100%. *Id.* ¶ 140. Dr. Flamm also points to other studies finding similar results for state or local taxes on products, such as gasoline, alcohol, and cigarettes. *Id.* ¶¶ 137-46. Qualcomm's expert, Dr. John Johnson, does not rebut this economic literature but instead admits that he has not found any scholarship "support[ing] the inference that an industry-wide reduction in royalty rates would be unlikely to lead to a reduction in price or an improvement in quality of [handsets]." ECF No. 723-2 at 90:6-13.

Second, Dr. Flamm relies on documentary and testimonial evidence evincing that Qualcomm, OEMs, and wireless carriers treated Qualcomm's royalty as a known component cost and "included the Qualcomm **[**71]** royalty in their calculations of the total costs of cellular phones." Flamm Decl. ¶ 147. For example, Qualcomm's own internal analysis of the average sales price of phones in 2011 and 2013 showed that Qualcomm considered royalties as one component of the cost to OEMs that would be incorporated in the price to retailers and then incorporated into the price to consumers. *Id.* fig.10; ECF No. 522-7. Moreover, Dr. Flamm identifies multiple pieces of testimony in which Qualcomm and other participants in the cellular industry (including OEMs and wireless carriers) stated that Qualcomm's royalty would be an added component to the price of the phone. *See, e.g.*, Flamm Decl. ¶¶ 148-65.

Third, and finally, Dr. Flamm proposes a methodology for measuring class-wide impact in which he analyzes device sales data from each step of the distribution chain. He examines data from six major OEMs, including the five largest OEMs in the U.S. market (Apple, Samsung, Motorola, LG, and HTC). *Id.* ¶ 261. "These OEMs accounted for approximately **[*303]** 90% of total cell phone sales" during the relevant period. *Id.* Dr. Flamm examines data from six of the largest U.S. retailers, including Best Buy, Amazon, Walmart, and Target. **[**72]** *Id.* "These companies represent roughly 84% of the national retailer market." *Id.* Dr. Flamm also examines data from five wireless carriers, comprising the four major U.S. carriers (AT&T, Sprint, T-Mobile, and Verizon) as well as one regional carrier (US Cellular). *Id.* "These [carriers] represent approximately 97% of the market for wireless operators." *Id.* Finally, Dr. Flamm examines data from the largest U.S. distributor and a major contract manufacturer. *Id.*

In order to analyze this data, Dr. Flamm employs hedonic regression, a method commonly used in economics to determine the relative importance of the variables which affect the price of a good. *Id.* ¶ 15; *see also* *In re High-Tech Emple. Antitrust Litig., No. 11-CV-02509-LHK, 2014 U.S. Dist. LEXIS 47181, 2014 WL 1351040, at *14 (N.D. Cal. Apr. 4, 2014)* ("[N]umerous courts have held that regression analysis is generally a reliable method for determining damages in antitrust cases and is 'a mainstream tool in economic study.'" (citation omitted)). Dr. Flamm uses the same ten quality-control characteristics in his model that Qualcomm's own retained experts used in a submission to the FTC. Flamm Decl. ¶ 256. Those ten characteristics are operating system, OEM, data speed, battery storage capacity, storage, design **[**73]** weight, screen size, camera megapixels, MHz speed, and download speed. *Id.* Dr. Flamm's decision to focus on these ten characteristics imposes a constraint on his available data: he has to exclude data that does not contain sufficient information about these ten characteristics. *Id.*

Additionally, Dr. Flamm decides to use "prices and costs from the first period a product is observed." *Id.* ¶ 257. Dr. Flamm describes why he uses this data for different marketplace actors. For OEMs, this data "capture[s] the prices set with carriers as they negotiate the phone configurations to be offered in retail locations." *Id.* "[I]n the case of Apple," this data reflects "the price [Apple] selected for the features it included in phones to be offered in its stores and through other resellers." *Id.* Finally, with regard to retailers and wireless carriers, "using prices and costs from the first period shows the pass-through of their initial procurement costs into initial sales prices." *Id.* After removing the non-probative data, Dr. Flamm performs a regression analysis in which he controls for the ten quality-control characteristics in order to determine what effect, if any, a change in Qualcomm's royalty **[**74]** rate would have on the price of phones to consumers in the "but for" world. *Id.* ¶ 256.

Applying this common statistical model, Dr. Flamm calculates the pass-through rate for each segment of the distribution chain, including OEMs, contract manufacturers, wireless carriers, distributors, and retailers. *Id.* ¶ 262. Dr. Flamm calculates pass-through rates for each individual market participant for which he had data as well as combined segments of the distribution chain (such as all OEMs and all retailers). *Id.* ¶¶ 263-82. Dr. Flamm finds positive pass-through rates for each market participant, indicating that costs were passed through. *Id.* Many of his pass-through rates—especially those for OEMs and retailers—are also exceptionally high, often exceeding 90% or 100%. *Id.* Such high rates indicate that a substantial portion of cost was passed through.

Dr. Flamm acknowledges that "[c]lass products are sold through different sales channels on their way to end users." *Id.* ¶ 283. Accordingly, Dr. Flamm identifies 18 primary sales channels and determines what proportion of the total sales each primary sales channel represented. *Id.* ¶¶ 283, 288. By way of example, the sales directly from OEMs to end **[**75]** users constituted a 5.9% share of total sales, while sales from OEMs to wireless carriers to end users constituted a 42.4% share. *Id.* tbl.21. Dr. Flamm uses the pass-through rates for each segment of the distribution chain to calculate cumulative pass-through rates for each of the 18 sales channels. *Id.* ¶ 289. At the final step of his analysis, Dr. Flamm weights the pass-through rate for each of the 18 sales channels by percentage of total sales to yield a final overall pass-through rate that "estimate[s] damages to end purchasers due to Qualcomm's overcharge." *Id.* ¶ 290.

[*304] Performing these calculations, Dr. Flamm retrieves an overall "channel-weighted pass-through rate [of] 87.4%." *Id.*; *see also* ECF No. 722-6 ("Flamm Reply Decl.") ¶ 161 (updating figure to 87.8%). Put another way, Dr. Flamm ascertains that, on a weighted average basis, each $1.00 of Qualcomm's royalty overcharge was passed through to consumers as an approximately $0.88 increase in the quality-adjusted prices of cell phones. Thus, because Mr. Lasinski calculated an above-FRAND royalty payment of $5.54 billion, Dr. Flamm's estimated lower bound on damages to the indirect purchaser class is $4.84 billion. Flamm Decl. ¶ **[**76]** 291; ECF No. 693 ¶ 1.

The Court finds that Plaintiffs' documentary evidence and expert reports paint a picture of Qualcomm's business practices and the nature of the market that suggests that common proof could be used to demonstrate that Qualcomm's above-FRAND royalty charges are passed through every level of the distribution chain to consumers. In other words, Plaintiffs' proposed theory and methodology strongly appear to satisfy the predominance requirement.

The Court now turns to Qualcomm's specific challenges to Plaintiffs' pass-through theory. The Court first addresses Qualcomm's broadest argument that Dr. Flamm's testimony should be stricken under *Daubert*. The Court then analyzes Qualcomm's more-targeted challenges to the pass-through theory at specific links in the distribution chain—namely, (1) OEMs and (2) retailers and wireless carriers.

(ii) *Daubert* Arguments
