Procurement's argument fails to distinguish between *claims* ***[*64]*** in a pleading and *evidentiary* allegations contained in that pleading. A party seeking summary judgment is not required to submit affidavits or other materials disputing each and every evidentiary allegation contained in the non-moving party's pleadings. The summary judgment submissions, rather, must establish a basis to find in the movant's favor on each and every essential element of the claim or defense upon which summary judgment is sought. See, e.g., *Mott v. Wal-Mart Stores East, LP, 139 Conn.App. 618, 626-27, 57 A.3d 391 (2012)* (defendant failed to establish lack of notice of premises defect). Here, defendants have submitted summary judgment materials which, if left unrebutted by Procurement, establish grounds for their *Noerr-Pennington* defense as a matter of law. More specifically, defendants have established that they were engaged in petitioning activity that an objective litigant could conclude was reasonably calculated to elicit a favorable outcome. On the basis of these summary judgment materials, and in the absence of evidence submitted by plaintiff giving rise to a disputed issue of material fact regarding an element of the defense, the court has determined that defendants are entitled to summary judgment as a matter of law under the *Noerr-Pennington* ***[*65]*** doctrine. If Procurement wanted to defeat summary judgment based on any particular facts alleged in its complaint—for example, the allegation that defendants made an admission, through counsel, that would give rise to a triable question as to whether their petitioning activity was supported by probable cause—then Procurement was obligated to submit an affidavit or other evidentiary material providing an evidentiary foundation to demonstrate the existence of a genuine issue of material fact. See, e.g., *Doe v. Town of West Hartford, 328 Conn. 172, 191-97, 177 A.3d 1128 (2018)*. That was not done here.

****

The foregoing findings and conclusions bear upon all counts of the complaint in which plaintiff seeks to impose liability based on defendants' petitioning activity in connection with the First, Second or Third Application. This is so because *Noerr-Pennington*, as it has been developed by the courts, is not limited in application to some causes of action but not others. Its application is not determined by the legal claim being asserted, but by the nature of the underlying activity giving rise to that claim—if the activity is protected by the *first amendment's* Petition Clause, then the *Noerr-Pennington* doctrine applies. As discussed, the doctrine has been applied beyond the antitrust context **[*66]** to claims of vexatious litigation, abuse of process, interference with contractual relations, abuse of process, and CUTPA violations, among others. In other words, *Noerr-Pennington* is a defense to each of plaintiff's claims aimed at petitioning activity.

Based on the foregoing analysis, the court grants summary judgment in defendants' favor on the First, Second, Third, Fourth, Fifth, and Sixth Counts, which are the counts seeking damages arising from the defendants' participation in one or more of the three underlying administrative and/or judicial proceedings described herein. It appears to the court that this ruling covers the entirety of these six counts.[31] Defendants' petitioning activity is protected under *Noerr-Pennington*, and the sham exception is inapplicable here as a matter of law. No common-law or statutory liability may be imposed on defendants for that activity under the circumstances.

2. Non-Petitioning Activity

This leaves what Procurement labels as "non-petitioning activity," which it contends is not entitled to *Noerr-Pennington* immunity. Procurement contends that such conduct was not directed at influencing governmental action, but instead involved false or otherwise tortious **[*67]** communications made by defendants to non-governmental actors—neighbors living near the Project, Procurement's lenders, and Procurement's actual or prospective tenants. See Pl. Br. at 13-15. Plaintiff's briefs do not describe the non-petitioning activity at great length, but it evidently included efforts by defendants to (1) spread false information about the project to neighbors, in an effort to mobilize opposition to the project, Pl. Br. at 17; (2) contact Procurement's "lending institutions with the goal of controlling the debt that secured Procurement's property," *id.* at 14; and (3) contact or interfere with Procurement's current or prospective tenant relationships, *id.* See Affidavit of Nagi Osta dated January 13, 2017, at ¶¶7-9, 19.

To the court's knowledge, neither party has addressed whether the allegations of non-petitioning activity, taken alone, would establish the basis for a viable claim under any of the first six counts of the complaint. See n.31 above. It appears to the court that only the Seventh Count (relating to defendants' activities directed at Procurement's tenants and lenders) purports to state a claim independent of defendants' petitioning activity. *Id.* In the interest **[*68]** of completeness, the following discussion will address all of the non-petitioning activity contained in plaintiff's allegations.

Procurement is incorrect to label as "non-petitioning activity" the efforts by defendants to foment public opposition to the Project among neighbors. The case law makes it clear that *Noerr-Pennington* protection extends beyond a petitioners' direct communications with the government. "A publicity campaign directed at the general public, seeking legislation or executive action, enjoys antitrust immunity [under *Noerr-Pennington*] . . ." *Mercatus Group, LLC v. Lake Forest Hospital, supra, 641 F.3d at 844*, citing *Allied Tube and Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 499-500, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988))*; see, e.g., *Sosa v. DIRECTV, Inc., 437 F.3d 923, 934 (9th Cir. 2006)* (recognizing that "not only petitions sent directly to the court in the course of litigation, but also 'conduct incidental to the prosecution of the suit' is protected by the *Noerr-Pennington* doctrine") (citation omitted); *Brownsville Golden Age Nursing Home, Inc. v. Wells, 839 F.2d 155, 160 (3d Cir. 1988)* ("Thus, we hold that as a matter of law, defendants' actions in calling Brownsville's violations to the attention of state and federal authorities and eliciting public interest [in public informational campaign] cannot serve as the basis of tort liability"); *Rubloff Dev. Grp., Inc. v. SuperValu, Inc., 863 F.Sup.2d 732, 741-42 (N.D.Ill. 2012)*.

[31] There are limited allegations incorporated in the first six counts regarding what plaintiff labels "non-petitioning activity," see below at pp. 53-57, but the court is under the impression that those allegations are intended to establish defendants' motive and intentions underlying the petitioning activity. Only the Seventh Count seeks damages allegedly caused by the non-petitioning activity.

It should not be surprising that efforts to mobilize public opinion in support of petitioning activity warrant *first amendment* protection. With **[*69]** this point in mind, it becomes clear that *Noerr-Pennington* immunity is not avoided or overcome by allegations that defendants "commenced a campaign to delay, thwart and prevent the Project from ever opening," Nagi Affidavit at ¶7, or "distribut[ed] notices to residents in the surrounding area regarding the second [zoning] application with the hope they would attend the public hearings and oppose the application," *id.* at ¶9(a), or "generated a website to oppose the Project, and to distribute fliers to oppose the Project [sic]," *id.* at ¶9(c).

There is one aspect of defendants' alleged publicity campaign that possibly could come within the "fraud" exception to *Noerr-Pennington*. See n.14 and pp. 39-40 above. Procurement alleges that defendants attempted to create neighborhood opposition to the Project in part by initiating and spreading the false rumor "that the Project would involve low-income and *section 8* housing . . ." *Id.* at ¶¶8, 9(b). Procurement submitted an exhibit to its summary judgment opposition demonstrating that this alleged falsehood ultimately made its way into the administrative record before the Board, in the form of email communications from neighbors (not defendants themselves) **[*70]** to Norman Cole, Stamford's Director of Planning and Zoning. See Exhibits 2 and 3 to Pl. Brief. These emails, not exceeding two in number, expressed opposition to the Project based on their respective author's concerns about "low-income housing." Defendants did not submit any rebuttal evidence relating to these emails.

It is uncertain whether these allegations give rise to a triable issue here. The fraud exception to *Noerr-Pennington* requires evidence that defendants intentionally made false statements of material fact to the government. See n.14 and pp. 39-40 above. On the existing record, it is not clear to the court that a jury reasonably could infer that defendants were responsible for promulgating the information about "low-income housing" that filtered into the administrative record. Nor is it clear that the statement about "low-income housing," even if attributable to defendants, is a statement of "fact" that could support a finding of fraud. Although the phrase "low-income housing" may be a term of art with an objective meaning in certain circles, to many members of the public it is a subjective and relative term, which can mean different things to different people. Neither party **[*71]** has briefed the meaning or accuracy of the term as used here. The court is doubtful that defendant's use of that term to describe the Project, even if established, could trigger the *Noerr-Pennington* fraud exception.

Use of the term "*Section 8*" to describe plaintiff's housing is different, because it is a statement of fact describing housing subsidized pursuant to *Section 8 of the Housing Act of 1937*, as amended, *42 U.S.C. §1437f*. One email included in the record, from a neighbor opposing the Project, mentions "section eight housing." Even here, it is questionable if the reference is sufficient to trigger the fraud exception, because it is unclear whether the reference is specific to the Project itself, or, rather, part of the author's broader lament about what he seems to consider the downward trajectory of the City of Stamford more generally: "When is this going to stop! I see the affordable/ *section 8* housing going on everywhere in Stamford. We are becoming Bridgeport!"[32]

As noted, there are numerous obstacles that plaintiff would need to surmount before proceeding to trial on the basis of their alleged activities involving neighbors. Uncertainties include whether the "low-income" statement is a statement of fact capable of triggering **[*72]** the fraud exception, whether the *Section 8* statement made part of the administrative record referred to the Project or was a broader criticism of Stamford, whether either of those statements were "material" within the meaning of the *Noerr-Pennington* fraud exception, and whether the defendants are legally responsible for either of these statements making their way into the administrative record. These issues need not be resolved, however, because plaintiff does not appear to rely on the neighbor-related activity as an independent basis of liability. In other words, no claim has been made that the First through Sixth Counts present triable issues based solely on defendants' alleged statements to neighbors.

Turning to defendants' alleged communications with Procurement's lenders and tenants, actual or prospective, this conduct cannot fairly be considered petitioning activity at all, because the activity was not aimed directly or indirectly at influencing governmental action. The claim is that defendants attempted to purchase plaintiff's secured debt,

---

[32] It also is uncertain whether this particular aspect of defendants' activities caused any harm to Procurement. Neither party has briefed the issue, presumably because defendants did not seek summary judgment on that ground.

presumably to cause plaintiff some kind of commercial difficulty after becoming its mortgagee, and also attempted to lure away actual or prospective **[*73]** tenants. This conduct does not come within the scope of the *Noerr-Pennington* doctrine.[33] See *Weldon v. MTAG Servs., LLC, No. 3:16-CV-783 (JCH), 2017 U.S. Dist. LEXIS 27660, 2017 WL 776648, at *16 (D.Conn. Feb. 28, 2017)* (finding that certain allegation were not covered by *Noerr-Pennington* because they relate "not to defendants' actual institution of lawsuits, but to their allegedly unlawful purchase of liens").

Conclusion

Defendants' motion for summary judgment is granted on the First through Sixth Counts. The motion is denied on the Seventh Count.

It is so ordered.

By the Court

Steven D. Ecker, Judge

---

[33] Whether or not these particular activities were tortious, or otherwise actionable, and whether or not they caused any damages to Procurement, are not issues raised in the pending motion for summary judgment, and the court expresses no opinion on those questions.

LexisNexis® Headnotes

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Complaints, Requirements for Complaint**

Fed. R. Civ. P. 8(a)(2) governs the requirements for pleadings that state a claim for relief, requiring that a pleading contain a short and plain statement of the claim showing that the pleader is entitled to relief. The standard for the adequacy of complaints under *Fed. R. Civ. P. 8(a)(2)* is now a plausibility standard found in Bell Atlantic Corp. v. Twombly, and its progeny. Under this standard, factual allegations must be enough to raise a right to relief above the speculative level on the assumption that all the allegations in the complaint are true even if doubtful in fact. If a pleading only contains labels and conclusions and a formulaic recitation of the elements of a cause of action, the pleading does not meet the standards of *Fed. R. Civ. P. 8(a)(2)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) allows parties to seek dismissal of a party's pleading for failure to state a claim upon which relief may be granted. In deciding a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, a court generally may not go outside the pleadings. However, a court may also rely upon documents incorporated into the complaint by reference and matters of which a court may take judicial notice in deciding a motion to dismiss. Additionally, courts must accept all allegations in a complaint as true. However, courts do not have to accept legal conclusions as facts. Courts considering a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* are only obligated to allow those complaints that are facially plausible under the Iqbal and Twombly standard to survive such a motion. If the complaint does not meet this standard, it can be dismissed for failure to state a claim upon which relief can be granted. Such a dismissal ends the case at the point of minimum expenditure of time and money by the parties and the court.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Governments > Legislation > Statute of Limitations > Time Limitations

Evidence > Burdens of Proof

HN3[] **Motions to Dismiss, Failure to State Claim**

A *Fed. R. Civ. P. 12(b)(6)* motion to dismiss for failure to state a claim is the proper procedural device to raise a statute of limitations defense. A motion to dismiss may be granted on the basis of prescription if the untimeliness appears from the face of the complaint. If a plaintiff's claims are prescribed on the face of the petition, plaintiff has the burden of proving the claims are not prescribed.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN4[] **Deceptive & Unfair Trade Practices, State Regulation**

In the Louisiana Unfair Trade Practices and Consumer Protection Law, the legislature has declared it to be unlawful to engage in unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce. *La. Rev. Stat. Ann. § 51:1405*. Because of the broad sweep of this language, Louisiana courts determine what is a LUTPA violation on a case-by-case basis.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Evidence > Burdens of Proof > Allocation

HN5[] **Deceptive & Unfair Trade Practices, State Regulation**

In order to prove a violation of the Louisiana Unfair Trade Practices and Consumer Protection Law (LUTPA), a person must show: (1) an unfair or deceptive trade practice declared unlawful; (2) that impacts a consumer, business competitor or other person to whom the statute grants a private right of action; (3) which has caused ascertainable loss. In establishing a LUTPA claim, a plaintiff must show that the alleged conduct offends established public policy and is immoral, unethical, oppressive, unscrupulous, or substantially injurious. Consequently, the range of prohibited practices under LUTPA is extremely narrow, as LUTPA prohibits only fraud, misrepresentation, and similar conduct, and not mere negligence. Moreover, conduct that offends established public policy and is unethical is not necessarily a violation under LUTPA. Only egregious actions involving elements of fraud, misrepresentation, deception, or other unethical conduct will be sanctioned based on LUTPA.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN6[] Deceptive & Unfair Trade Practices, State Regulation

The Louisiana Unfair Trade Practices and Consumer Protection Law (LUTPA) statute states that any person who suffers any ascertainable loss as a result of the use or employment by another person of an unlawful unfair or deceptive method, act, or practice may bring an action. *La. Rev. Stat. Ann. § 51:1409*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Governments > Legislation > Statute of Limitations > Time Limitations

HN7[] Deceptive & Unfair Trade Practices, State Regulation

A one-year limitations period applies to private actions brought under Louisiana Unfair Trade Practices and Consumer Protection Law (LUTPA). *La. Rev. Stat. Ann. § 51:1409(E)*. A private action under Louisiana Unfair Trade Practices and Consumer Protection Law shall be prescribed by one year running from the time of the act which gave rise to the right of action. The time for filing a private cause of action under LUTPA is peremptive in nature rather than prescriptive. The limitation period for LUTPA claims is peremptive. Throughout Louisiana courts, peremption means that a claim cannot be suspended or interrupted.

Torts > ... > Statute of Limitations > Begins to Run > Continuing Violations

HN8[] Begins to Run, Continuing Violations

A continuing tort is one where the operating cause of injury is a continuous one and gives rise to successive damages. In other words, the continuing tort doctrine only applies when continuous conduct causes continuing damages. When damaging conduct continues, prescription runs from the date of the last harmful act.

Evidence > Burdens of Proof > Allocation

Governments > Legislation > Statute of Limitations > Time Limitations

HN9[] Burdens of Proof, Allocation

If a plaintiff's claims are prescribed on the face of the petition, plaintiff has the burden of proving the claims are not prescribed.

Evidence > Burdens of Proof > Allocation

Torts > Business Torts > Commercial Interference > Business Relationships

Evidence > Burdens of Proof > Preponderance of Evidence

HN10[] Burdens of Proof, Allocation

Louisiana courts recognize a cause of action for tortious interference with business relations. Nonetheless, Louisiana courts view this cause of action with disfavor. The cause of action for tortious interference with business is derived from *La. Civ. Code Ann. art. 2315* and is based on the principle that the right to influence someone not to enter into business transactions with others is not absolute. In Louisiana, business operators are protected from malicious and wanton interference. However, Louisiana law permits interference designed to protect legitimate interests of the actor. A plaintiff bringing a claim for tortious interference with business must ultimately show by a preponderance of the evidence that the defendant improperly influenced others not to deal with the plaintiff. Significantly, it is not enough to allege that a defendant's actions affected plaintiff's business interests; the plaintiff must allege that the defendant actually prevented the plaintiff from dealing with a third party.

Governments > Legislation > Statute of Limitations > Time Limitations

HN11[] **Statute of Limitations, Time Limitations**

Because a cause of action for tortious interference with business is delictual, the applicable prescriptive period is one year. *La. Civ. Code Ann. art. 3492* provides that delictual actions are subject to a liberative prescription of one year. This prescription commences to run from the day injury or damage is sustained.

Opinion

MEMORANDUM RULING

Before this Court is a Motion to Dismiss (Record Document 17) filed by Defendant, R.J. Reynolds Tobacco Company ("RJR"). RJR seeks dismissal of the state law *Louisiana Unfair Trade Practices Act ("LUTPA")* and tortious interference with business claims lodged against it by Caldwell Wholesale Company, L.L.C. ("Caldwell"). RJR seeks dismissal on the grounds that Caldwell lacks standing to bring a LUTPA claim, both the LUTPA and the tortious interference with business claims are perempted/prescribed, and Caldwell has failed to allege facts that would entitle it to relief as to both claims. Caldwell opposes the Motion to Dismiss, rebutting each of RJR's defenses. See Record Document 21. For the reasons set forth below, the Motion to Dismiss is **GRANTED**.

I. BACKGROUND

Caldwell is a wholesale distributor servicing retail customers in the States of Louisiana, Texas, and Arkansas that has been in business **[*2]** since 1953. See Record Document 5 at ¶ 5, Amended Complaint. Caldwell purchased cigarettes and other tobacco products directly from RJR, for resale to Caldwell's retail customers, from 1959 until December 2004. Id. at ¶ 6. Like other tobacco manufacturers, RJR offers reimbursement payments known as "buydowns" to retailers selling RJR products. Id. at ¶ 13. All "reporting" wholesalers, including Caldwell, report all of their sales of tobacco products to Management Science Associations, Inc. ("MSA"). Id. at ¶ 14. The sales data of wholesalers who are "on direct" with RJR is reported by MSA to RJR. Based on that sales information, RJR then issues buydown reimbursement payments to retailers that have purchased RJR products. Id. at ¶ 15. The eligibility of a wholesaler's invoices to retailers for these buydown payments is critical to a wholesaler's ability to price its products at a competitive level in the market, as the amount of the buydown typically exceeds the profit margin that a wholesaler makes on the sale of tobacco products on a per unit basis. Id. at ¶16.

In January 2003, Smith Wholesale Company, Inc., a Tennessee wholesale distributor, filed suit against RJR in the United States **[*3]** District Court for the Eastern District of Tennessee seeking injunctive relief and asserting violations of ***antitrust law*** based on RJR's allegedly discriminatory pricing policies (the "Smith Litigation"). Id. at ¶ 7. Ten months later, in November 2003, Caldwell joined the Smith Litigation as one of the twenty wholesaler plaintiffs asserting price discrimination and other antitrust claims against RJR. See id. at ¶ 8.

Caldwell alleges that RJR terminated Caldwell's status as a direct purchaser in December 2004 in retaliation for Caldwell's participation in the Smith Litigation. See id. at ¶ 10. To support its theory, Caldwell contends that RJR's decision to terminate Caldwell was based on the misperception that Caldwell's President, Ken Caldwell, played a role in organizing the Smith Litigation and encouraging the participation of other wholesalers. See id. at ¶ 11. This allegation is based on Ken Caldwell serving as President of the American Wholesale Marketers Association ("AWMA"), just prior to the commencement of the Smith Litigation. See id. at ¶ 9. However, Caldwell asserts that Ken Caldwell's tenure as President of the AWMA concluded before the Smith Litigation was instituted, by **[*4]** other wholesalers, and more than a year before Caldwell joined the suit. See id. at ¶ 12.

Once Caldwell lost its direct purchaser status with RJR, RJR refused to sell its products directly to Caldwell. See id. at ¶ 10. Therefore, Caldwell was forced to purchase RJR products from an intermediary to resell them to Caldwell's retailer-customers, who must stock RJR products to satisfy consumer demand. See id. Furthermore, when RJR terminated Caldwell's direct status in December 2004, it also stopped honoring Caldwell invoices for buydown purposes. See id. at ¶ 17. In other words, since December 2004 RJR has declined to pay buydowns to retailers for any RJR products purchased from Caldwell. See id. However, Caldwell contends that a wholesale distributor does not have to be on direct-buying status with RJR to have its invoices honored for buydown purposes. See id. at ¶ 18. Caldwell alleges that although RJR refuses to reimburse anyone for products purchased from Caldwell, RJR issues buydown reimbursements for RJR products sold by many other wholesalers who, like Caldwell, are not on direct-buying status. See id.

From the time RJR terminated its direct buying contract with Caldwell in 2004 **[*5]** until now, several events have taken place in the tobacco industry that have adversely impacted Caldwell's business. In May 2006, RJR's parent company, Reynolds American, Inc., acquired Conwood, the maker of Grizzly brand moist snuff. Id. at ¶ 19. At that time, Grizzly was Caldwell's best-selling brand of moist snuff. Id. at ¶ 20. As a result of the Conwood acquisition, purchases of Grizzly moist snuff, and all other Conwood products, from Caldwell were no longer eligible for buydowns as of May 2006. Id. at ¶ 21.

In order to remedy this negative impact, in February 2011, Caldwell approached RJR to ask whether RJR would consider again honoring Caldwell invoices for buydown purposes, since the loss of business resulting from RJR's refusal to honor Caldwell's invoices for buydowns was beginning to threaten the viability of Caldwell's business. See id. at 22. Caldwell did not ask RJR to restore its direct purchasing status. Id. at ¶ 23. Caldwell's request was only that RJR accept Caldwell invoices for purposes of buydown payments to retailers, as RJR does with respect to other, similarly-situated non-direct wholesalers. See id. Caldwell representatives met with RJR representative, Stan Rogers ("Rogers"), **[*6]** to discuss Caldwell's request. Id. at ¶ 24. After that meeting, in conjunction with RJR's evaluation of the request, Caldwell provided customer sales information requested by RJR. Id. at ¶ 25. Caldwell also authorized MSA to release Caldwell's proprietary sales information to RJR. Id. at ¶ 26. RJR subsequently denied Caldwell's request to honor Caldwell invoices for buydown purposes by letter dated June 7, 2011. Id. at ¶ 27. The only stated reason for RJR's decision was that "distribution of R. J. Reynolds tobacco products would not be improved by putting [Caldwell] on the Data Reporting Program." Id.

Approximately three and a half years later, Caldwell made another essentially identical request, again asking RJR to consider honoring Caldwell invoices for buydown purposes, as it had done for forty-five years until 2004. Id. at 28. On June 18, 2014, Caldwell representatives met with RJR representatives, Kecalf Bailey ("Bailey"), to discuss this second request. Id. at 29. After the meeting, Caldwell again provided RJR with customer sales information requested by RJR and authorized MSA to release Caldwell's sales information to RJR. Id. at ¶ 30. RJR subsequently denied Caldwell's second request to buydown **[*7]** RJR products sold by Caldwell by letter dated October 3, 2014. Id. at ¶ 31. That letter was substantively identical to the 2011 denial letter, stating only that "distribution of R. J. Reynolds tobacco products would not be improved by putting [Caldwell] on the Data Reporting

Program." Id. At that time, Caldwell alleges that nothing was different about Caldwell's ability to distribute RJR products with benefit of the buydown as compared to the forty-five years in which RJR did honor Caldwell's invoices for buydowns. See id.

Further, Caldwell contends that part of the motivation for its second request to RJR was the pending acquisition of Lorillard, Inc. by RJR's parent company, Reynolds American, Inc. See id. at ¶ 32. Reynolds American, Inc.'s acquisition of Lorillard, Inc. was completed in June 2015. Id. at ¶ 33. Lorillard, Inc. was the manufacturer of Newport brand cigarettes and Newport is Caldwell's second best-selling brand of cigarettes, accounting for approximately fifteen percent (15%) of Caldwell's cigarette sales as of June 2015. See id. at ¶ 34. As a result of the Lorillard acquisition, Newport cigarettes, and all other Lorillard products, purchased from Caldwell were no longer **[*8]** eligible for buydowns as of June 2015. See id. at ¶ 35.

In the tobacco industry, for the sake of efficiency and convenience, retailer-customers prefer to purchase the products they sell to consumers from a single wholesaler or as few wholesalers as possible. See id. at ¶ 37. Therefore, RJR's refusal to buydown products sold by Caldwell forces many Caldwell customers to obtain RJR products from another wholesaler since they cannot feasibly forego buydowns at the expense of their profit margins. See id. at ¶ 38. By forcing Caldwell customers to use multiple wholesalers or suffer diminished profit margins, RJR has raised a substantial impediment to Caldwell's ability to retain customers. See id. at ¶ 39. As a result of RJR's conduct, Caldwell alleges that it has lost the entire business of certain customers who have switched to another full-service wholesaler for all of their purchases. See id. at ¶ 40. But for the conduct of RJR, these customers would have remained with Caldwell. See id. at ¶ 41. Furthermore, Caldwell alleges that as a result of RJR's conduct, Caldwell has also lost a portion of the business of certain customers, who now purchase RJR products from other wholesalers. **[*9]** See id. at ¶ 42. But for the conduct of RJR, these customers would purchase RJR products from Caldwell. See id. at ¶ 43. Lastly, Caldwell contends that RJR's conduct has substantially impeded Caldwell's efforts to acquire new customers. See id. at ¶ 44. Customers that would have purchased some or all of their products from Caldwell but for the conduct of RJR have taken their business elsewhere to the substantial detriment of Caldwell. See id. at ¶ 45. These lost sales and business opportunities have continued to occur, on an ongoing basis, since December 2004, when RJR initially took Caldwell off direct and stopped buying down RJR products purchased from Caldwell, to the present, but have reached a point since the Lorillard acquisition that has caused Caldwell to conclude it cannot indefinitely sustain its business as the lost customers and lost business continue to increase. See id. at ¶ 46.

II. LAW AND ANALYSIS

A. Pleading Standards and the *Rule 12(b)(6)* Standard.

HN1[] *Rule 8(a)(2) of the Federal Rules of Civil Procedure* governs the requirements for pleadings that state a claim for relief, requiring that a pleading contain "a short and plain statement of the claim showing that the pleader is entitled to relief." The standard for the adequacy of complaints **[*10]** under *Rule 8(a)(2)* is now a "plausibility" standard found in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, and its progeny. Under this standard, "factual allegations must be enough to raise a right to relief above the speculative level . . . on the assumption that all the allegations in the complaint are true (even if doubtful in fact)." *Id. at 555-556, 127 S. Ct. at 1965*. If a pleading only contains "labels and conclusions" and "a formulaic recitation of the elements of a cause of action," the pleading does not meet the standards of *Rule 8(a)(2)*. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)* (citation omitted).

HN2[] *Federal Rule of Civil Procedure 12(b)(6)* allows parties to seek dismissal of a party's pleading for failure to state a claim upon which relief may be granted. In deciding a *Rule 12(b)(6)* motion to dismiss, a court generally "may not go outside the pleadings." *Colle v. Brazos Cty., Tex., 981 F.2d 237, 243 (5th Cir. 1993)*. However, a court may also rely upon "documents incorporated into the complaint by reference and matters of which a court may take judicial notice" in deciding a motion to dismiss. *Dorsey v. Portfolio Equities, Inc., 540 F.3d 333, 338 (5th Cir. 2008)*.

Additionally, courts must accept all allegations in a complaint as true. See *Iqbal, 556 U.S. at 678, 129 S. Ct. at 1949*. However, courts do not have to accept legal conclusions as facts. See id. Courts considering a motion to dismiss under *Rule 12(b)(6)* are only obligated to allow those complaints that are facially plausible under the Iqbal and Twombly standard to survive such a motion. See **[*11]** *id. at 678-679, 129 S. Ct. at 1949*. If the complaint does not meet this standard, it can be dismissed for failure to state a claim upon which relief can be granted. See id. Such a dismissal ends the case "at the point of minimum expenditure of time and money by the parties and the court." *Twombly, 550 U.S. at 558, 127 S. Ct. at 1966*.

Furthermore, ***HN3***[] a *Rule 12(b)(6)* motion to dismiss for failure to state a claim is the proper procedural device to raise a statute of limitations defense. See *Bowers v. Nicholson, 271 F. App'x 446, 449 (5th Cir. 2008)*. A "motion to dismiss may be granted on the basis of prescription if the untimeliness appears from the face of the complaint." *Potier v. JBS Liberty Sec., Inc., Civil Action No. 6:13-cv-00789, 2014 U.S. Dist. LEXIS 151271, at *6 (W.D. La. Sep. 29, 2014)*. If a "plaintiff's claims are prescribed on the face of the petition, plaintiff has the burden of proving the claims are not prescribed." *Sims v. Am. Ins. Co., 2012-0204 (La. 10/16/12), 101 So. 3d 1, 4*.

B. LUTPA.

Caldwell's second claim is brought under LUTPA. See *La. Rev. Stat. § 51:1409(A)*. Because there are multiple issues to decide as to Caldwell's LUTPA claim, the Court will analyze it first. ***HN4***[] In LUTPA, the legislature declared it to be unlawful to engage in "unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." *La. Rev. Stat. § 51:1405*. "Because of the broad sweep of this language, 'Louisiana courts determine what is a LUTPA violation on a case-by-case **[*12]** basis.'" *Quality Envtl. Processes, Inc. v. I.P. Petroleum Co., Inc., 2013-1582 (La. 5/7/14), 144 So.3d 1011, 1025* (quoting Keith E. Andrews, Comment, Louisiana Unfair Trade Practices Act: Broad Language and Generous Remedies Supplemented by a Confusing Body of Case Law, 41 Loy. L. Rev. 759, 762 (1996)).

HN5[] In order to prove a violation of LUTPA, Caldwell must show: "(1) an unfair or deceptive trade practice declared unlawful; (2) that impacts a consumer, business competitor or other person to whom the statute grants a private right of action; (3) which has caused ascertainable loss." *Rockwell Automation, Inc . v. Montgomery, Civil Action No. 17-415, 2017 U.S. Dist. LEXIS 80820, at *5-6 (W.D. La. May 24, 2017)* (citation omitted). This court has consistently held that in establishing a LUTPA claim, a plaintiff must show that "the alleged conduct offends established public policy and is immoral, unethical, oppressive, unscrupulous, or substantially injurious." *Cheramie Services, Inc. v. Shell Deepwater Prod., 09-1633 (La. 4/23/10), 35 So.3d 1053, 1059*. Consequently, "the range of prohibited practices under LUTPA is extremely narrow," as LUTPA prohibits only fraud, misrepresentation, and similar conduct, and not mere negligence. *35 So.3d at 1059*. Moreover, conduct that offends established public policy and is unethical is not necessarily a violation under LUTPA. See, e.g., *35 So.3d at 1060* ("[O]nly egregious actions involving elements of fraud, misrepresentation, deception, or other unethical conduct will be sanctioned based on LUTPA.").

RJR argues that Caldwell lacks **[*13]** standing because admittedly Caldwell is not a direct consumer or business competitor of RJR, Caldwell's action is time-barred, and Caldwell has failed to allege facts that would entitled it to relief. The Court will first address whether Caldwell has standing to assert a LUTPA claim.

i. Standing.

RJR argues that a private right of action under LUTPA is limited to direct consumers or to business competitors of the defendant. Therefore, RJR contends that because Caldwell is neither a direct consumer nor a business competitor of RJR, Caldwell lacks standing to assert a LUTPA claim. To support this argument, RJR cites to a case decided by this Court. See *Baba Lodging, LLC v. Wyndham Worldwide Operations, Inc., Civil Action No. 10-1750, 2012 U.S. Dist. LEXIS 36891, at *1 (W.D. La. Mar. 19, 2012)*. In Baba, one of the issues before the Court was whether LUTPA provided a private right of action to plaintiffs other than direct consumers and business competitors.

See id. The plaintiff argued that the Louisiana Supreme Court, in *Cheramie Servs., Inc. v. Shell Deepwater Prod., Inc., 2009-1633 (La. 4/23/10), 35 So.3d 1053*, expanded LUTPA to allow any person to bring a claim, not just direct consumers or business competitors. See *id. at *9*. In Cheramie, the Louisiana Supreme Court noted that ***HN6***[] the LUTPA statute states that *"[a]ny person* who suffers any ascertainable loss . . . as a result of the use or employment by another person of an **[*14]** [unlawful] unfair or deceptive method, act, or practice . . . may bring an action." *La. Rev. Stat. § 51:1409* (emphasis added); see *35 So. 3d at 1056*. Thus, the court in Cheramie rejected any holding that limited standing to only direct consumers and business competitors clarifying that the statutory language allows anyone harmed by prohibited unfair or deceptive practices to file a private right of action. See *id. 1058*.

However, this Court correctly noted that Cheramie was non-binding precedent because the portion of the opinion addressing LUTPA had only three out of the seven justices in agreement. *Baba, 2012 U.S. Dist. LEXIS 36891, at *10*. Thus, Cheramie did not represent a holding by the majority of the Louisiana Supreme Court. Rather, it is only a plurality, which does not have a binding effect on Louisiana state courts or this Court. See *id. at *10*. Accordingly, the Court held that in the absence of a majority opinion of the Louisiana Supreme Court definitively interpreting standing under LUTPA, the Court followed the binding Fifth Circuit holding in *Tubos de Acero de Mexico, S.A. v. Am. Int'l Inv. Corp., 292 F.3d 471, 480 (5th Cir. 2002)*, and dismissed the plaintiff's claims under LUTPA for lack of standing. *Id. at *11*.

In the present action, the Court agrees that it is not required to follow *Cheramie*. However, the Court now finds that its previous decision based on pre-Cheramie **[*15]** Fifth Circuit precedent regarding standing ignored the "bedrock principles of *Erie v. Tompkins, 304 U.S. 64, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)*, which require a federal court sitting in diversity to apply the law of the state as declared by its legislature or the state's highest court." *Burgers v. Bickford, Civil Action No. 12-2009, 2014 U.S. Dist. LEXIS 117323, at *7 (E.D. La. Aug. 22, 2014)*. "Thus, for a federal court the proper inquiry is not whether Cheramie is controlling authority in light of its plurality status but rather how the decision factors into the Erie 'guess' that this Court must make when applying state law. In the realm of *Erie*, Cheramie is not irrelevant even if the state's lower courts would consider it non-binding." *Id. at *7*.

Caldwell correctly points out that following Cheramie, Louisiana appellate courts, and a number of federal district courts, have followed the plurality opinion and found that private parties have a right of action under the LUTPA. See *Jones v. Americas Ins. Co., 2016-0904 (La. Ct. App. 1st Cir. 8/16/17), 226 So.3d 537, 544*; *Bogues v. Louisiana Energy Consultants, Inc., 46,434 (La. Ct. App. 2nd Cir. 8/10/11), 71 So.3d 1128, 1132*; *J. A. Davis Properties, LLC v. Martin Operating P'ship, LP, 2017-449 (La. Ct. App. 3rd Cir. 6/21/17), 224 So.3d 39, 43*; *Prime Ins. Co. v. Imperial Fire & Cas. Ins. Co., 2014-0323 (La. Ct. App. 4th Cir. 10/1/14), 151 So.3d 670, 678*; *Hurricane Fence Co., Inc. v. Jensen Metal Products, Inc., 12-956 (La. Ct. App. 5th Cir. 5/23/13), 119 So.3d 683, 688*; *Rockwell Automation, Inc. v. Montgomery, Civil Action No. 17-415, 2017 U.S. Dist. LEXIS 80820, at *7 (W.D. La. May 24, 2017)*; *Swoboda v. Manders, Civil Action No. 14-19-EWD, 2016 U.S. Dist. LEXIS 53377, at *18 (M.D. La. Apr. 21, 2016)*; *Max Access, Inc. v. Gee Cee Co. of LA, Civil Action No. 15-1728, 2016 U.S. Dist. LEXIS 14166, at *13 (E.D. La. Feb. 5, 2016)*. Accordingly, while Cheramie may not be binding **[*16]** upon this Court, it is instructive to the issue of standing. In light of *Cheramie*, as well as the decisions of Louisiana appellate courts and the federal district courts decisions following same, the Court finds that Caldwell has standing to assert a claim under the LUTPA.

ii. Peremption.

HN7[] A one-year limitations period applies to private actions brought under LUTPA. See *La. Rev Stat. § 51:1409(E)* (private action under LUTPA "shall be prescribed by one year running from the time of the . . . act which gave rise to th[e] right of action"). However, the Louisiana Supreme Court has not yet ruled as to whether *La. Rev. Stat. § 51:1409(E)* implicates peremption or prescription. Nonetheless, a court within this district as well as other federal district courts and state appellate courts have determined that the time for filing a private cause of action under LUTPA is peremptive in nature rather than prescriptive. See *Jones v. Herlin, Civil Action No. 12-1978, 2013 U.S. Dist. LEXIS 133037, at *23 (W.D. La. Sep. 17, 2013)*; *Max Access, Inc. v. Gee Cee Co. of LA, Civil Action No.*

*15-1728, 2016 U.S. Dist. LEXIS 14166, at *16 (E.D. La. Feb. 5, 2016)*; *Morris v. Sears, Roebuck & Co., 99-2772 (La. Ct. App. 4th Cir. 05/31/00), 765 So. 2d 419, 422*. Therefore, this Court holds that the limitation period for LUTPA claims is peremptive. Throughout Louisiana courts, peremption means that a claim cannot be suspended or interrupted. See *Glod v. Baker, 2004-1483 (La. Ct. App. 3rd Cir. 3/23/05), 899 So. 2d 642, 649*, writ denied, *2005-1574 (La. 1/13/06), 920 So. 2d 238* ("[T]he third circuit has made a jurisprudential commitment to a strict definition of peremption embodied **[*17]** in the Civil Code and manifested in its consistent decisions barring use of the continuing violation doctrine to suspend peremption."). However, the Fifth Circuit has found that there are certain situations where the presence of a continuing violation of LUTPA extends the time period a party can bring a claim under LUTPA, i.e., a claim under LUTPA can be suspended. See *Tubos de Acero de Mexico, S.A. v. Am. Int'l Inv. Corp., 292 F.3d 471, 482 (5th Cir. 2002)*. The Court need not address whether the continuing tort doctrine applies to suspend the running of peremption because the Court finds that the continuing tort doctrine does not apply in the present case as discussed *infra*.

In the present action, RJR argues that the "act" at issue here is RJR's alleged termination of Caldwell's status as a direct purchaser in December 2004. See Record Document 17-1 at 10, RJR's Memorandum in Support of Motion to Dismiss. As Caldwell did not file this action until January 2017, RJR contends Caldwell's claim is too late and thus must be dismissed. See id. Caldwell argues that RJR's "continuing" and "ongoing" decision to deny buydown reimbursement payments while providing them to competing wholesalers, who lack a direct purchasing relationship with RJR, is the operating cause that injures **[*18]** Caldwell rather than RJR's decision in 2004 to terminate Caldwell's status as a direct purchaser. See Record Document 21 at 6, Caldwell's Memorandum in Opposition to RJR's Motion to Dismiss (emphasis added). By pleading that RJR's decision was "continuing" and "ongoing," Caldwell has invoked the continuing tort doctrine in an attempt to prevent its claims from being time-barred.

HN8[] "[A] continuing tort [is] one 'where the operating cause of injury is a continuous one and gives rise to successive damages.'" *Miller v. ConAgra, Inc., 2008-0021 (La. 9/8/08), 991 So.2d 445, 456* (citation omitted). In other words, "the continuing tort doctrine only applies when continuous conduct causes continuing damages." *Risin v. D.N.C. Investments, L.L.C., 2005-0415 (La. Ct. App. 4th Cir. 12/7/05), 921 So.2d 133, 136*. "When . . . damaging conduct continues, prescription runs from the date of the last harmful act." *S. Cent. Bell Tel. Co. v. Texaco, Inc., 418 So.2d 531, 532 (La.1982)*.

In the present action, the Court finds that RJR's alleged conduct was not continuous. Rather, RJR's actions, without determining whether Caldwell pleaded sufficient facts to establish a LUTPA violation, were separate actions entitled to their own respective time periods. The specific conduct alleged in the complaint was when RJR terminated the direct purchaser contract in 2004, rejected Caldwell's request for **[*19]** buydown status in 2011, and again in 2014. Caldwell requests this Court to consider the time period between 2004 to present in order to survive the present Motion to Dismiss where RJR refused to issue buydown payments. By pleading that RJR's decision was a "continuing" and "ongoing" decision to deny buydown reimbursement payments while providing them to competing wholesalers, who lack a direct purchasing relationship with RJR, Caldwell argues that this "ongoing" and "continuing" decision was the operating cause that injured Caldwell. However, the Court is not persuaded by Caldwell's argument that the continuing tort doctrine applies to the present case. Caldwell has only pleaded certain, separate events, separated by several years, where RJR directly refused to provide buydown reimbursement payments to Caldwell. The October 3, 2014 refusal is significant in that Caldwell pleads no other communication or action between the respective parties after that date. Accordingly, the Court finds the decision by RJR on October 3, 2014 was a separate act that triggered the running of the peremptive period. The fact that Caldwell continued to suffer ill effects because of the October 3, 2014 decision **[*20]** does not bring the continuing tort doctrine into play. Furthermore, the acquisition of Lorillard in 2015 has no effect of the Court's decision and even if it did, this transaction was completed over a year before Caldwell initiated the present action. This lawsuit was filed on January 1, 2017, more than one year from RJR rejecting Caldwell's second request. Additionally, Caldwell has failed to meet its burden of showing that its LUTPA claim is not perempted because Caldwell's Complaint not only is lacking continuous factual allegations of LUTPA violations, but Caldwell also fails to cite any case law that supports its assertion that its LUTPA claim is not perempted. *Sims v. Am. Ins. Co., 2012-0204 (La. 10/16/12), 101 So. 3d 1, 4* ***HN9***[] (If a "plaintiff's claims are prescribed on the face of the petition, plaintiff has the burden of proving the claims are not prescribed."). Accordingly, the Court finds that Caldwell's LUTPA claim is perempted, and the Court **GRANTS** RJR's Motion to Dismiss with respect to this claim.

Because the Court decided Caldwell's LUTPA claim on peremption grounds, the Court need not address the merits of Caldwell's LUTPA claim.

C. Tortious Interference with Business Relations.

HN10[] "Louisiana courts . . . recognize[ ] a cause of action for **[*21]** tortious interference with business relations." *Bogues v. Louisiana Energy Consultants, Inc., 46,434 (La. Ct. App. 2nd Cir. 8/10/11), 71 So.3d 1128, 1134* (citations omitted). Nonetheless, Louisiana courts view this cause of action with disfavor. *Mt. States Pipe & Supply Co. v. City of New Rds., Civil Action No. 12-2146, 2013 U.S. Dist. LEXIS 87446, at *7-8 (E.D. La. June 21, 2013)* ("Louisiana jurisprudence . . . has viewed this cause of action with disfavor."). The cause of action for tortious interference with business is derived from *La. Civ. Code art. 2315* and is based on the principle that the right to influence someone not to enter into business transactions with others is not absolute. See *id. at 1134* (citations omitted). In Louisiana, business operators are protected from "malicious and wanton interference." See id. However, Louisiana law permits interference designed to protect legitimate interests of the actor. See id. "A plaintiff bringing a claim for tortious interference with business must ultimately show 'by a preponderance of the evidence that the defendant improperly influenced others not to deal with the plaintiff.'" *Id. at 1135* (citation omitted). "Significantly, it is not enough to allege that a defendant's actions affected plaintiff's business interests; the plaintiff must allege that the defendant actually prevented the plaintiff from dealing with a third party." *Id. at 1135*.

HN11[] Because a cause of action for **[*22]** tortious interference with business is delictual, the applicable prescriptive period is one year. See *La. Civ. Code art. 3492* ("Delictual actions are subject to a liberative prescription of one year. This prescription commences to run from the day injury or damage is sustained."). The Court adopts the analysis as to Caldwell's LUTPA claim for Caldwell's tortious interference claim. Based on the Court's analysis *supra*, Caldwell's tortious interference with business claim is also time-barred. Accordingly, the Court **GRANTS** RJR's Motion to Dismiss with respect to this claim.

III. CONCLUSION

Based on the foregoing analysis, the Court holds that Caldwell's LUTPA claim is perempted and Caldwell's tortious interference with business claim is prescribed on the face of the pleadings. Accordingly,

IT IS ORDERED that the Motion to Dismiss (Record Document 17) filed by RJR be and is hereby **GRANTED**, and all claims against RJR are **DISMISSED WITH PREJUDICE**.

A Judgment consistent with the terms of the instant Memorandum Riling shall issue herewith.

THUS DONE AND SIGNED, in Shreveport, Louisiana, on this 11th day of May, 2018.

/s/ S. Maurice Hicks, Jr.

S. MAURICE HICKS, JR., CHIEF JUDGE

Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Units

HN1[] **Collective Bargaining & Labor Relations, Bargaining Units**

The Ordinance 124968, an Ordinance Relating to Taxicab, Transportation Network Company, and For-Hire Vehicle Drivers (Ordinance) was the first municipal ordinance of its kind in the United States, and authorizes a collective-bargaining process between "driver coordinators"—like Uber Technologies (Uber), Lyft, Inc. (Lyft), and Eastside for Hire, Inc. (Eastside)—and independent contractors who work as for-hire drivers. The Ordinance permits independent-contractor drivers, represented by an entity denominated an "exclusive driver representative," and driver coordinators to agree on the nature and amount of payments to be made by, or withheld from, the driver coordinator to or by the drivers. Seattle, Wash., Municipal Code § 6.310.735(H)(1).

Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Units

HN2[] **Collective Bargaining & Labor Relations, Bargaining Units**

On December 14, 2015, the Seattle City Council adopted Ordinance 124968, an Ordinance Relating to Taxicab, Transportation Network Company, and For-Hire Vehicle Drivers (Ordinance). The stated purpose of the Ordinance is to allow taxicab, transportation network company, and for-hire vehicle drivers (for-hire drivers) to modify specific agreements collectively with the entities that hire, direct, arrange, or manage their work, in order to better ensure that for-hire drivers can perform their services in a safe, reliable, stable, cost-effective, and economically viable manner. Seattle, Wash., Ordinance 124968, pmbl.

Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Units

HN3[] **Collective Bargaining & Labor Relations, Bargaining Units**

The Ordinance 124968, an Ordinance Relating to Taxicab, Transportation Network Company, and For-Hire Vehicle Drivers (Ordinance) requires "driver coordinators" to bargain collectively with for-hire drivers. Seattle, Wash., Ordinance 124968, *§ 1(I)*. A "driver coordinator" is defined as an entity that hires, contracts with, or partners with for-hire drivers for the purpose of assisting them with, or facilitating them in, providing for-hire services to the public. Seattle, Wash., Municipal Code § 6.310.110. The Ordinance applies only to drivers who contract with a driver coordinator other than in the context of an employer-employee relationship—in other words, the Ordinance applies only to independent contractors. Seattle, Wash., Municipal Code § 6.310.735(D).

Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Units

HN4[] **Collective Bargaining & Labor Relations, Bargaining Units**

The collective-bargaining process begins with the election of a "qualified driver representative," or QDR. Seattle, Wash., Municipal Code §§ 6.310.110, 6.310.735(C). An entity seeking to represent for-hire drivers operating within Seattle first submits a request to the Director of Finance and Administrative Services (the Director) for approval to be a QDR. Seattle, Wash., Municipal Code § 6.310.735(C). Once approved by the City, the QDR must notify the driver coordinator of its intent to represent the driver coordinator's for-hire drivers. Seattle, Wash., Municipal Code § 6.310.735(C)(2).Upon receiving proper notice from the QDR, the driver coordinator must provide the QDR with the names, addresses, email addresses, and phone numbers of all "qualifying drivers." Seattle, Wash., Municipal Code § 6.310.735(D). This disclosure requirement applies only to driver coordinators that have hired, contracted with, partnered with, or maintained a contractual relationship or partnership with, 50 or more for hire drivers in the 30 days prior to the commencement date set by the Director. Seattle, Wash., Municipal Code § 6.310.735(D).

Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Units

HN5[] Collective Bargaining & Labor Relations, Bargaining Units

The qualified driver representative (QDR) contacts qualifying drivers to solicit their interest in being represented by the QDR. Seattle, Wash., Municipal Code § 6.310.735(E). Within 120 days of receiving the qualifying drivers' contact information, the QDR submits to the Director of Finance and Administrative Services (the Director) statements of interest from qualifying drivers indicating that they wish to be represented by the QDR in collective-bargaining negotiations with the driver coordinator. Seattle, Wash., Municipal Code § 6.310.735(F)(1). If a majority of qualifying drivers consent to representation by the QDR, the Director certifies the QDR as the "exclusive driver representative" (EDR) for all for-hire drivers for that particular driver coordinator. Seattle, Wash., Municipal Code § 6.310.735(F)(2).

Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Units

HN6[] Collective Bargaining & Labor Relations, Bargaining Units

Once the Director of Finance and Administrative Services (the Director) certifies the "exclusive driver representative" (EDR), the driver coordinator and the EDR shall meet and negotiate in good faith certain subjects to be specified in rules or regulations promulgated by the Director including, but not limited to, best practices regarding vehicle equipment standards; safe driving practices; the manner in which the driver coordinator will conduct criminal background checks of all prospective drivers; the nature and amount of payments to be made by, or withheld from, the driver coordinator to or by the drivers; minimum hours of work, conditions of work, and applicable rules. Seattle, Wash., Municipal Code § 6.310.735(H)(1).

Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Units

Labor & Employment Law > Collective Bargaining & Labor Relations > Enforcement of Bargaining Agreements

HN7[] Collective Bargaining & Labor Relations, Bargaining Units

If an agreement is reached, the driver coordinator and the "exclusive driver representative" (EDR) submit the written agreement to the Director of Finance and Administrative Services (the Director). Seattle, Wash., Municipal Code § 6.310.735(H)(2). The Director reviews the agreement for compliance with the Ordinance and Chapter 6.310 of the Seattle Municipal Code, which governs taxicabs and for-hire vehicles. Seattle, Wash., Municipal Code § 6.310.735(H)(2). In conducting this review, the Director is to ensure that the substance of the agreement promotes the provision of safe, reliable, and economical for-hire transportation services and otherwise advances the public policy goals set forth in Chapter 6.310 and in the Ordinance. Seattle, Wash., Municipal Code § 6.310.735(H)(2). The Director's review is not limited to the parties' submissions or the terms of the proposed agreement. Seattle, Wash., Municipal Code § 6.310.735(H)(2). Rather, the Director may gather and consider additional evidence, conduct public hearings, and request information from the EDR and the driver coordinator. Seattle, Wash., Municipal Code § 6.310.735(H)(2).

Labor & Employment Law > ... > Labor Arbitration > Arbitrators > Authority

Labor & Employment Law > Collective Bargaining & Labor Relations > Enforcement of Bargaining Agreements

HN8[] Arbitrators, Authority

The agreement becomes final and binding on all parties if the Director of Finance and Administrative Services (the Director) finds the agreement compliant. Seattle, Wash., Municipal Code § 6.310.735(H)(2)(a). The agreement does not take effect until the Director makes such an affirmative determination. Seattle, Wash., Municipal Code § 6.310.735(H)(2)(c). If the Director finds the agreement noncompliant, the Director remands it to the parties with a written explanation of the agreement's failures, and may offer recommendations for remedying the agreement's inadequacies. Seattle, Wash., Municipal Code § 6.310.735(H)(2)(b). If the driver coordinator and the "exclusive driver representative" (EDR) do not reach an agreement, either party must submit to interest arbitration upon the request of the other, in accordance with the procedures and criteria specified in the Ordinance. Seattle, Wash., Municipal Code § 6.310.735(I). The interest arbitrator must propose an agreement compliant with Chapter 6.310 and in line with the City's public policy goals. Seattle, Wash., Municipal Code § 6.310.735(I)(2). The term of an agreement proposed by the interest arbitrator may not exceed two years. Seattle, Wash., Municipal Code § 6.310.735(I)(2).

Labor & Employment Law > ... > Labor Arbitration > Arbitrators > Authority

Labor & Employment Law > Collective Bargaining & Labor Relations > Enforcement of Bargaining Agreements

HN9[] Arbitrators, Authority

The interest arbitrator submits the proposed agreement to the Director of Finance and Administrative Services (the Director), who reviews the agreement for compliance with the Ordinance and Chapter 6.310, in the same manner the Director reviews an agreement proposed by the parties. Seattle, Wash., Municipal Code § 6.310.735(I)(3).The parties may discuss additional terms and propose amendments to an approved agreement. Seattle, Wash., Municipal Code § 6.310.735(J). The parties must submit any proposed amendments to the Director for approval. Seattle, Wash., Municipal Code § 6.310.735(J). The Director has the authority to withdraw approval of an agreement during its term, if the Director finds that the agreement no longer complies with the Ordinance or furthers the City's public policy goals. Seattle, Wash., Municipal Code § 6.310.735(J)(1).

HN10[] Standards of Review, De Novo Review

Appellate courts review the district court's grant of a motion to dismiss de novo.

Antitrust & Trade Law > Sherman Act > Scope

Constitutional Law > Supremacy Clause > Federal Preemption

HN11[] Antitrust & Trade Law, Sherman Act

In determining whether the *Sherman Act* preempts a state or local law pursuant to the *Supremacy Clause*, courts apply the principles of conflict preemption. As in the typical pre-emption case, the inquiry is whether there exists an irreconcilable conflict between the federal and state or local regulatory schemes.

Antitrust & Trade Law > Sherman Act > Scope

Constitutional Law > Supremacy Clause > Federal Preemption

HN12[] **Antitrust & Trade Law, Sherman Act**

A state or local law, when considered in the abstract, may be condemned under the antitrust laws, and thus preempted, only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under *section 1 of the Sherman Act*, *15 U.S.C.S. § 1*, when the conduct contemplated by the statute is in all cases a per se violation. However, if the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract. Unlike the categorical analysis under the per se rule of illegality, analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is facially inconsistent with federal antitrust laws. In short, the ordinance may be preempted facially by federal ***antitrust law*** if it authorizes a per se violation of *section 1 of the Sherman Act*, but not if it must be analyzed under the rule of reason.

Antitrust & Trade Law > Sherman Act > Scope

HN13[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. *15 U.S.C.S. § 1*. Chief among such illegal arrangements are price-fixing agreements: Under the *Sherman Act* a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal per se. Price-fixing agreements between two or more competitors, otherwise known as horizontal price-fixing agreements, fall into the category of arrangements that are per se unlawful. Put simply, "collusion" among competitors is the supreme evil of antitrust.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN14[] **Exemptions & Immunities, Parker State Action Doctrine**

The state-action immunity doctrine derives from Parker v. Brown. Because nothing in the language of the *Sherman Act* or in its history suggested that Congress intended to restrict the sovereign capacity of the States to regulate their economies, the Act should not be read to bar States from imposing market restraints as an act of government. Under certain circumstances, immunity has been extended from federal antitrust laws to nonstate actors carrying out the State's regulatory program.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN15[] **Parker State Action Doctrine, Local Governments & Private Parties**

State-action immunity is the exception rather than the rule. Indeed, the Supreme Court has stressed that it is "disfavored": Given the fundamental national values of free enterprise and economic competition that are embodied in the federal antitrust laws, state-action immunity is disfavored, much as are repeals by implication. In line with its "preference" against stateaction immunity, the Supreme Court recognizes stateaction immunity only when it is clear that the challenged anticompetitive conduct is undertaken pursuant to a regulatory scheme that is the State's own. The Supreme Court's narrow take on state-action immunity is all the more exacting when a non-state actor invokes the protective umbrella of Parker immunity: Closer analysis is required when the activity at issue is not directly that of' the State itself, but rather is carried out by others pursuant to state authorization.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN16[] **Parker State Action Doctrine, Local Governments & Private Parties**

There is a two-part test to determine whether the anticompetitive acts of private parties are entitled to immunity. First, the challenged restraint must be one clearly articulated and affirmatively expressed as state policy, and second, the policy must be actively supervised by the State. Because municipalities and other political subdivisions are not themselves sovereign, state-action immunity under Parker does not apply to them directly. As such, immunity will only attach to the activities of local governmental entities if they are undertaken pursuant to a clearly articulated and affirmatively expressed state policy to displace competition. Local governmental entities, unlike private parties, are not subject to the 'active state supervision requirement' because they have less of an incentive to pursue their own selfinterest under the guise of implementing state policies. Where state or municipal regulation by a private party is involved, however, active state supervision must be shown, even where a clearly articulated state policy exists.

Antitrust & Trade Law > Sherman Act > Scope

HN17[] **Antitrust & Trade Law, Sherman Act**

The clear-articulation test is met if the anticompetitive effect was the foreseeable result of what the State authorized. To pass the "clear articulation" test, a state legislature need not expressly state in a statute or its legislative history that the legislature intends for the delegated action to have anticompetitive effects. A court's inquiry with respect to the clear-articulation test is a precise one. The relevant question is whether the regulatory structure which has been adopted by the state has specifically authorized the conduct alleged to violate the *Sherman Act*. The state's authorization must be plain and clear: The relevant statutory provisions must plainly show that the state legislature contemplated the sort of activity that is challenged, which occurs where they confer express authority to take action that foreseeably will result in anticompetitive effects. The state, in its sovereign capacity, must clearly intend to displace competition in a particular field with a regulatory structure in the relevant market.

Antitrust & Trade Law > Sherman Act > Scope

HN18[] **Antitrust & Trade Law, Sherman Act**

Once a court determines that there is express state authorization, the court then turns to the concept of foreseeability, which is to be used in deciding the reach of antitrust immunity that stems from an already authorized monopoly, price regulation, or other disruption in economic competition. A foreseeable result cannot circumvent the requirement that there be express authorization in the first place: A foreseeable result cannot create state authorization itself, but must itself stem from express authorization, which is the necessary predicate for the foreseeability test. Courts must be careful not to apply the concept of foreseeability from the clear-articulation test too loosely.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN19[] Parker State Action Doctrine, Local Governments & Private Parties

A State may not confer antitrust immunity on private persons by fiat, and a State may not validate a municipality's anticompetitive conduct simply by declaring it to be lawful. Rather, it must first meet the requirements that a state may displace competition with active state supervision only if the displacement is both intended by the State and implemented in its specific details. Courts may not defer to private pricefixing arrangements under the general auspices of state law, but instead must ensure that the preconditions for immunity from federal law, such as actual state involvement, are met. After all, immunity is conferred out of respect for ongoing regulation by the State, not out of respect for the economics of price restraint.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Sherman Act > Scope

HN20[] Parker State Action Doctrine, Local Governments & Private Parties

The plain language of the statute centers on the provision of privately operated for hire transportation services, *Wash. Rev. Code § 46.72.001*, not the contractual payment arrangements between for-hire drivers and driver coordinators for use of the latter's smartphone apps or ridereferral services. Although driver coordinators like Uber and Lyft contract with providers of transportation services, they do not fulfill the requests for transportation services—the drivers do. Nothing in the statute evinces a clearly articulated state policy to displace competition in the market for ride-referral service fees charged by companies like Uber, Lyft, and Eastside. In other words, although the statute addresses the provision of transportation services, it is silent on the issue of compensation contracts between forhire drivers and driver coordinators. To read into the plain text of the statute implicit state authorization and intent to displace competition with respect to for-hire drivers' compensation would be to apply the clear-articulation test "too loosely."

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN21[] Parker State Action Doctrine, Local Governments & Private Parties

Wash. Rev. Code § 46.72.160, which focuses on the regulation of for-hire vehicle services, provides that cities may license, control, and regulate all for hire vehicles operating within their respective jurisdictions. *Wash. Rev. Code § 46.72.160*. Each enumerated example of regulatory power in *Wash. Rev. Code § 46.72.160* plainly indicates legislative concern with the provision of vehicular services: The power to regulate includes:(1) Regulating entry into the business of providing for hire vehicle transportation services; (2) Requiring a license to be purchased as a condition of operating a for hire vehicle and the right to revoke, cancel, or refuse to reissue a license for failure to comply with regulatory requirements; (3) Controlling the rates charged for providing for hire vehicle transportation service and the manner in which rates are calculated and collected; (4) Regulating the routes and operations of for hire vehicles, including restricting access to airports; (5) Establishing safety and equipment requirements; and (6) Any other requirements adopted to ensure safe and reliable for hire vehicle transportation service. *Wash. Rev. Code § 46.72.160*.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN22[] Parker State Action Doctrine, Local Governments & Private Parties

The enumerated powers refer specifically to for-hire vehicles, which by definition are vehicles used for the transportation of passengers for compensation. *Wash. Rev. Code § 46.72.010(1)*. None of the powers confer upon the City the authority to regulate the fees Uber, Lyft, and Eastside charge in exchange for use of their smartphone apps or ride-referral services. Even the power to regulate the rates charged for providing for hire vehicle transportation service—the closest analog to the challenged Ordinance provision—speaks to rates charged to passengers in exchange for the provision of transportation services, not the fees Uber and Lyft charge to drivers for use of their apps. And the sixth enumerated power—a residual power—addresses for hire vehicle transportation services, not ride-referral service fees.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN23[] Exemptions & Immunities, Parker State Action Doctrine

Regulation of an industry, and even the authorization of discrete forms of anticompetitive conduct pursuant to a regulatory structure, does not establish that the State has affirmatively contemplated other forms of anticompetitive conduct that are only tangentially related.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN24[] Exemptions & Immunities, Parker State Action Doctrine

The active supervision requirement demands that state officials have and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy. Because entities purporting to act under state authority might diverge from the State's considered definition of the public good and the resulting asymmetry between a state policy and its implementation can invite private self-dealing, the active-supervision requirement seeks to avoid this harm by requiring the State to review and approve interstitial policies made by the entity claiming immunity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN25[] Parker State Action Doctrine, Local Governments & Private Parties

Active state supervision is not a prerequisite to exemption from the antitrust laws where the actor is a municipality rather than a private party. However, where state or municipal regulation by a private party is involved, active state supervision must be shown, even where a clearly articulated state policy exists.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN26[] Parker State Action Doctrine, Local Governments & Private Parties

The distinction between states and municipalities is of crucial importance for purposes of state-action immunity, and the two entities cannot be treated interchangeably.

Labor & Employment Law > Collective Bargaining & Labor Relations > Federal Preemption

HN27[] **Collective Bargaining & Labor Relations, Federal Preemption**

Machinists preemption forbids both the National Labor Relations Board (NLRB) and States to regulate conduct that Congress intended be unregulated because left to be controlled by the free play of economic forces. Machinists preemption stems from the premise that Congress struck a balance of protection, prohibition, and laissez-faire in respect to union organization, collective bargaining, and labor disputes.

Labor & Employment Law > Collective Bargaining & Labor Relations > Federal Preemption

HN28[] **Collective Bargaining & Labor Relations, Federal Preemption**

Garmon preemption is intended to preclude state interference with the National Labor Relations Board's interpretation and active enforcement of the integrated scheme of regulation established by the *National Labor Relations Act (NLRA)*, *29 U.S.C.S. §§ 151-169*. To this end, Garmon pre-emption forbids States to regulate activity that the *NLRA* protects, prohibits, or arguably protects or prohibits.

Labor & Employment Law > Collective Bargaining & Labor Relations > Federal Preemption

HN29[] **Collective Bargaining & Labor Relations, Federal Preemption**

It is a precondition for Garmon pre-emption that the conduct at issue be arguably protected or prohibited. This precondition is not satisfied by a conclusory assertion of pre-emption. If the word arguably is to mean anything, it must mean that the party claiming pre-emption is required to demonstrate that his case is one that the National Labor Relations Board could legally decide in his favor. In other words, a party asserting pre-emption must advance an interpretation of the *National Labor Relations Act (NLRA)*, *29 U.S.C.S. §§ 151-169*, that is not plainly contrary to its language and that has not been authoritatively rejected' by the courts or the Board. Next, the party must put forth enough evidence to enable the court to find that the Board reasonably could uphold a claim based on such an interpretation. In short, a party asserting pre-emption must put forth enough evidence to enable a court to conclude that the activity is arguably subject to the Act.

Syllabus

SUMMARY[**]

Antitrust / Labor Law

The panel affirmed in part and reversed in part the district court's dismissal of an action challenging, on federal antitrust and labor law grounds, a Seattle ordinance authorizing a collective-bargaining process between "driver

[**] This summary constitutes no part of the opinion of the court. It has been prepared by court staff for the convenience of the reader.

coordinators"—like Uber Technologies; Lyft, Inc.; and Eastside for Hire, Inc. —and independent contractors who work as for-hire drivers.

The ordinance permits independent-contractor drivers, represented by an entity denominated an "exclusive driver representative," and driver coordinators to agree on the "nature and amount of payments to be made by, or withheld from, the driver coordinator to or by the drivers."

The panel reversed the district court's dismissal of claims that the ordinance violates, and is preempted by, *§ 1* of the Sherman Antitrust Act because the ordinance sanctions price-fixing of ride-referral service fees by private cartels of independent-contractor drivers. The panel held that the state-action immunity doctrine did not exempt the ordinance from preemption by the **[**2]** *Sherman Act* because the State of Washington had not clearly articulated and affirmatively expressed a state policy authorizing private parties to price-fix the fees that for-hire drivers pay to companies like Uber or Lyft in exchange for ride-referral services. In addition, the active-supervision requirement for state-action immunity applied, and was not met.

The panel affirmed the district court's dismissal of claims that the ordinance was preempted by the *National Labor Relations Act* under either *Machinists* or *Garmon* preemption.

The panel remanded the case for further proceedings.

Opinion by: Milan D. Smith

Opinion

[*775] M. SMITH, Circuit Judge:

On December 14, 2015, the Seattle City Council enacted into law Ordinance 124968, an Ordinance Relating to Taxicab, Transportation Network Company, and For-Hire Vehicle Drivers (Ordinance).[1] ***HN1***[] The Ordinance was the first municipal ordinance of its kind in the United States, and authorizes a collective-bargaining process between "driver coordinators"—like Uber Technologies (Uber), Lyft, Inc. (Lyft), and Eastside for Hire, Inc. (Eastside)—and independent contractors who work as for-hire drivers. The Ordinance permits independent-contractor drivers, represented by an entity denominated an "exclusive driver representative," and driver coordinators to agree on the "nature and amount of payments to be made by, or withheld from, the driver coordinator to or by the drivers." Seattle, Wash., Municipal Code *§ 6.310.735(H)(1)*. This provision of the Ordinance is the crux of this case.

Acting on behalf of its members Uber, Lyft, and Eastside, Plaintiff-Appellant the Chamber of Commerce of **[**7]** the United States of America, together with Plaintiff-Appellant Rasier, LLC, a subsidiary of Uber (collectively, the Chamber), sued Defendants-Appellees the City of Seattle, the Seattle Department of Finance and Administrative Services (the Department), and the Department's Director, Fred Podesta (collectively, the City), challenging the Ordinance on federal antitrust and labor law grounds. First, the Chamber asserts that the Ordinance violates, and is preempted by, *section 1 of the Sherman Antitrust Act*, *15 U.S.C. § 1*, because the Ordinance sanctions price-fixing

---

[*] The Honorable Eduardo C. Robreno, Senior United States District Judge for the Eastern District of Pennsylvania, sitting by designation.

[1] The Ordinance amended *section 6.310.110* of the Seattle Municipal Code, and added *section 6.310.735* to the Code. *See* Seattle, Wash., Municipal Code *§§ 6.310.110*, *6.310.735*.

of ride-referral service fees by private cartels of independent-contractor drivers. Second, the Chamber claims that the Ordinance is **[*776]** preempted by the *National Labor Relations Act (NLRA), 29 U.S.C. §§ 151-169*, under *Machinists* and *Garmon* preemption.

The district court dismissed the case, holding that the state-action immunity doctrine exempts the Ordinance from preemption by the *Sherman Act*, and that the *NLRA* does not preempt the Ordinance. The Chamber appealed both holdings.

We have jurisdiction over this appeal pursuant to *28 U.S.C. § 1291*. We reverse the district court's dismissal of the Chamber's federal antitrust claims, and remand the federal antitrust claims to the district **[**8]** court for further proceedings. We also affirm the district court's dismissal of the Chamber's *NLRA* preemption claims.

FACTUAL AND PROCEDURAL BACKGROUND

A. Ride-Referral Companies

Eastside is the largest dispatcher of taxicab and for-hire vehicles in the Pacific Northwest. Eastside provides licensed taxicab and for-hire vehicle drivers with dispatch, advertising, payment processing, and other administrative services, in exchange for a weekly fee, payable by drivers to Eastside. Relying on advertising and a preexisting client base, Eastside generates transportation requests from passengers, who call, text-message, or email Eastside to request a ride. Eastside then refers ride requests to drivers through a mobile data terminal. If a passenger uses a credit card to pay a driver, Eastside processes the transaction and remits the payment to the driver. The drivers who pay for Eastside's services are independent contractors—Eastside does not dictate how the drivers operate their transportation businesses. For example, some drivers own licensed vehicles, whereas others lease them.

Uber and Lyft, founded in 2009 and 2012, respectively, have ushered ride-referral services into the digital age. Uber **[**9]** and Lyft have developed proprietary smartphone applications (apps) that enable an online platform, or digital marketplace, for ride-referral services, often referred to as "ridesharing" services. After downloading the Uber or Lyft app onto their smartphones, riders request rides through the app, which transmits ride requests to available drivers nearby. Drivers are free to accept or ignore a ride request. If a driver accepts a ride request, he or she is matched electronically with the rider, and then proceeds to the rider's location and fulfills the ride request. If a driver ignores a ride request, the digital platform transmits the request to another nearby driver. Drivers may cancel a ride request, even after initially accepting it, at any point prior to the commencement of the ride. Riders, too, may decide whether or not to accept a ride from any of the drivers contacted through the app. After a ride is completed, riders pay drivers via the Uber or Lyft app, using a payment method, such as a credit card, placed on file with Uber or Lyft.

Uber and Lyft's business models have facilitated the rise of the so-called "gig economy." In order to receive ride requests through the apps, drivers **[**10]** contract with, and pay a technology licensing fee to, Uber or Lyft. These licensing fees are a percentage of riders' paid fares: Uber and Lyft subtract their technology licensing fees from riders' payments, and remit the remainder to drivers. Drivers' contractual agreements with either Uber or Lyft are not exclusive—in fact, many drivers use several ridesharing apps and even operate multiple apps simultaneously. Drivers may use the Uber and Lyft apps for however long and whenever they wish, if they wish to use them at all.

[*777] B. The Ordinance

HN2[] On December 14, 2015, the Seattle City Council adopted Ordinance 124968. The stated purpose of the Ordinance is to "allow[] taxicab, transportation network company, and for-hire vehicle drivers ('for-hire drivers') to modify specific agreements collectively with the entities that hire, direct, arrange, or manage their work," in order to "better ensure that [for-hire drivers] can perform their services in a safe, reliable, stable, cost-effective, and economically viable manner." Seattle, Wash., Ordinance 124968, pmbl.

HN3[] The Ordinance requires "driver coordinators" to bargain collectively with for-hire drivers. *Id.* § 1(I). A "driver coordinator" is defined as **[**11]** "an entity that hires, contracts with, or partners with for-hire drivers for the purpose of assisting them with, or facilitating them in, providing for-hire services to the public." Seattle, Wash., Municipal Code *§ 6.310.110*. The Ordinance applies only to drivers who contract with a driver coordinator "other than in the context of an employer-employee relationship"—in other words, the Ordinance applies only to independent contractors. *Id.* *§ 6.310.735(D)*.

HN4[] The collective-bargaining process begins with the election of a "qualified driver representative," or QDR. *Id.* *§§ 6.310.110*, *6.310.735(C)*. An entity seeking to represent for-hire drivers operating within Seattle first submits a request to the Director of Finance and Administrative Services (the Director) for approval to be a QDR. *Id.* *§ 6.310.735(C)*. Once approved by the City, the QDR must notify the driver coordinator of its intent to represent the driver coordinator's for-hire drivers. *Id.* *§ 6.310.735(C)(2)*.

Upon receiving proper notice from the QDR, the driver coordinator must provide the QDR with the names, addresses, email addresses, and phone numbers of all "qualifying drivers."[2] *Id.* *§ 6.310.735(D)*. This disclosure requirement applies only to driver coordinators that have "hired, contracted with, partnered with, or maintained a **[**12]** contractual relationship or partnership with, 50 or more forhire drivers in the 30 days prior to the commencement date" set by the Director. *Id.*

HN5[] The QDR then contacts the qualifying drivers to solicit their interest in being represented by the QDR. *Id.* *§ 6.310.735(E)*. Within 120 days of receiving the qualifying drivers' contact information, the QDR submits to the Director statements of interest from qualifying drivers indicating that they wish to be represented by the QDR in collective-bargaining negotiations with the driver coordinator. *Id.* *§ 6.310.735(F)(1)*. If a majority of qualifying drivers consent to representation by the QDR, the Director certifies the QDR as the "exclusive driver representative" (EDR) for all for-hire drivers for that particular driver coordinator.[3] *Id.* *§ 6.310.735(F)(2)*.

HN6[] Once the Director certifies the EDR,

> the driver coordinator and the EDR shall meet and negotiate in good faith certain subjects to be specified in rules or regulations promulgated by the Director **[*778]** including, but not limited to, best practices regarding vehicle equipment standards; safe driving practices; the manner in which the driver coordinator will conduct criminal background checks of all prospective drivers; *the nature and amount of payments to* ***[**13]*** *be made by, or withheld from, the driver coordinator to or by the drivers*; minimum hours of work, conditions of work, and applicable rules.

Id. *§ 6.310.735(H)(1)* (emphasis added).

HN7[] If an agreement is reached, the driver coordinator and the EDR submit the written agreement to the Director. *Id.* *§ 6.310.735(H)(2)*. The Director reviews the agreement for compliance with the Ordinance and *Chapter 6.310 of the Seattle Municipal Code*, which governs taxicabs and for-hire vehicles. *Id.* In conducting this review, the Director is to "ensure that the substance of the agreement promotes the provision of safe, reliable, and economical for-hire transportation services and otherwise advance[s] the public policy goals set forth in Chapter 6.310 and in the [Ordinance]." *Id.*

---

[2] To be a qualifying driver, a for-hire driver must have "dr[iven] at least 52 trips originating or ending within the Seattle city limits for a particular Driver Coordinator during any three-month period in the 12 months preceding the commencement date." Seattle, Wash., Qualifying Driver and Lists of Qualifying Drivers, Rule FHDR-1.

[3] If more than one QDR is able to demonstrate that a majority of qualifying drivers wish to be represented by that QDR, the Director will designate the QDR with the largest number of statements of interest to be the EDR. *Seattle, Wash., Municipal Code § 6.310.735(F)(2)*.

The Director's review is not limited to the parties' submissions or the terms of the proposed agreement. *Id.* Rather, the Director may gather and consider additional evidence, conduct public hearings, and request information from the EDR and the driver coordinator. *Id.*

HN8[] The agreement becomes final and binding on all parties if the Director finds the agreement compliant. *Id. § 6.310.735(H)(2)(a)*. The agreement does not take effect until the Director makes such an affirmative determination. ***[**14]*** *Id. § 6.310.735(H)(2)(c)*. If the Director finds the agreement noncompliant, the Director remands it to the parties with a written explanation of the agreement's failures, and may offer recommendations for remedying the agreement's inadequacies. *Id. § 6.310.735(H)(2)(b)*.

If the driver coordinator and the EDR do not reach an agreement, "either party must submit to interest arbitration upon the request of the other," in accordance with the procedures and criteria specified in the Ordinance. *Id. § 6.310.735(I)*. The interest arbitrator must propose an agreement compliant with Chapter 6.310 and in line with the City's public policy goals. *Id. § 6.310.735(I)(2)*. The term of an agreement proposed by the interest arbitrator may not exceed two years. *Id.*

HN9[] The interest arbitrator submits the proposed agreement to the Director, who reviews the agreement for compliance with the Ordinance and Chapter 6.310, in the same manner the Director reviews an agreement proposed by the parties. *Id. § 6.310.735(I)(3)*.

The parties may discuss additional terms and propose amendments to an approved agreement. *Id. § 6.310.735(J)*. The parties must submit any proposed amendments to the Director for approval. *Id.* The Director has the authority to withdraw approval of an agreement during its term, if the Director finds **[**15]** that the agreement no longer complies with the Ordinance or furthers the City's public policy goals. *Id. § 6.310.735(J)(1)*.

C. Procedural History

The Ordinance took effect on January 22, 2016.

The Chamber first filed suit challenging the Ordinance as preempted by the *Sherman Act* and the *NLRA* on March 3, 2016, but its suit was dismissed as unripe, because no entity had yet applied for QDR certification. *See Chamber of Commerce of the U.S. v. City of Seattle, No. C16-0322RSL, 2016 U.S. Dist. LEXIS 122723, 2016 WL 4595981, at *2, *4 (W.D. Wash. Aug. 9, 2016)*.

[*779] Subsequently, the Director designated Teamsters Local 117 (Local 117) as a QDR on March 3, 2017. On March 7, 2017, Local 117 notified Uber, Lyft, Eastside, and nine other driver coordinators of its intent to serve as the EDR of all qualifying drivers who contract with those companies, and requested the qualifying drivers' contact information.

On March 9, 2017, the Chamber filed suit again, seeking a declaration that the Ordinance is unenforceable and a preliminary injunction enjoining the City from enforcing the Ordinance.[4] Relevant to the present appeal,[5] the Chamber asserted two federal antitrust claims—a violation claim and a preemption claim. Specifically, the Chamber claimed that the City violated *section 1* of the Sherman Act by enacting **[**16]** and enforcing the Ordinance, and that the Ordinance conflicts with, and is preempted by, the *Sherman Act*. The Chamber also asserted two federal

---

[4] The Chamber filed an Amended Complaint adding Rasier as a coplaintiff on April 11, 2017. The Amended Complaint, which is otherwise largely identical in substance to the original Complaint, is the operative complaint in this case.

[5] The Chamber also asserted claims for violation of its members' federal rights under *42 U.S.C. § 1983*, municipal action unauthorized by Washington law, violation of the *Washington Consumer Protection Act*, and violation of the *Washington Public Records Act*. These claims are not addressed on appeal, because the Chamber did not raise them in its opening brief. *See Tsao v. Desert Palace, Inc., 698 F.3d 1128, 1137 n.13 (9th Cir. 2012)* (stating that issues not raised in an opening brief are waived).

labor preemption claims, challenging the Ordinance as preempted by the *NLRA* under *Machinists* and *Garmon* preemption.

On March 21, 2017, the City filed a motion to dismiss. On April 4, 2017, before ruling on the City's motion to dismiss, the district court granted the Chamber's motion for a preliminary injunction.[6]

Although the district court granted the Chamber's motion for a preliminary injunction, it also granted the City's motion to dismiss on August 1, 2017, concluding that the state-action immunity doctrine exempted the Ordinance from preemption by the *Sherman Act*,[7] and that the Ordinance was not preempted by the *NLRA*. The district court entered judgment on August 4, 2017. The Chamber timely appealed on August 9, 2017.

On August 28, 2017, the Chamber filed an emergency motion for an injunction pending appeal in this court. The City opposed the motion. On September 8, 2017, we granted the Chamber's emergency motion and enjoined enforcement of the Ordinance pending this appeal.

STANDARD OF REVIEW

HN10[] We review the district court's grant of a motion **[**17]** to dismiss de novo. *Shames v. Cal. Travel & Tourism Comm'n, 626 F.3d 1079, 1082 (9th Cir. 2010)*.

ANALYSIS

I. State-Action Immunity Does Not Protect the Ordinance from Preemption by *Section 1* of the Sherman Act.

We turn first to the Chamber's federal antitrust claims, and hold that the **[*780]** Ordinance does not meet the requirements for state-action immunity.[8]

A. Preemption

HN11[] In determining whether the *Sherman Act* preempts a state or local law pursuant to the *Supremacy Clause*, we apply the principles of conflict preemption. "As in the typical pre-emption case, the inquiry is whether there exists an irreconcilable conflict between the federal and state [or local] regulatory schemes." *Rice v. Norman Williams Co., 458 U.S. 654, 659, 102 S. Ct. 3294, 73 L. Ed. 2d 1042 (1982)*.

HN12[] A state or local law, "when considered in the abstract, may be condemned under the antitrust laws," and thus preempted, "only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply

---

[6] The City appealed from the district court's order granting the Chamber's motion for a preliminary injunction in Case No. 17-35371. The City's appeal was voluntarily dismissed on September 6, 2017.

[7] The district court dismissed both of the Chamber's federal antitrust claims on the basis of state-action immunity. Because the district court did not rule on the merits of the Chamber's antitrust violation claim, we do not address the merits of that claim here.

[8] Ordinarily, we would discuss first the threshold question of whether the Ordinance, which regulates labor relations between for-hire drivers and driver coordinators, is preempted wholly by federal labor law.

However, for purposes of this opinion, we discuss the Chamber's labor preemption claims last. The Chamber's *NLRA* preemption claims, in contrast to the Chamber's challenge to the district court's holding regarding state-action immunity, lack merit, and do not warrant reversal of the district court's order. As is evident from the Chamber's briefing and presentation at oral argument, the Chamber's federal antitrust claims, rather than its federal labor law claims, are the core of its appeal.

with the statute." *Id. at 661*. "Such condemnation will follow under *[section] 1* of the Sherman Act when the conduct contemplated by the statute is in all cases a *per se* violation." *Id.* However, "[i]f the activity addressed by the statute does not fall into that category, and therefore must be analyzed **[**18]** under the rule of reason, the statute cannot be condemned in the abstract." *Id.* Unlike the categorical analysis under the per se rule of illegality, "[a]nalysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is facially inconsistent with federal antitrust laws." *Id.* In short, the Ordinance may be preempted facially by federal ***antitrust law*** if it authorizes a per se violation of *section 1* of the Sherman Act, but not if it must be analyzed under the rule of reason.

HN13[] *Section 1* of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. Chief among such illegal arrangements are price-fixing agreements: "Under the *Sherman Act* a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal per se." *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*. "Price-fixing agreements between two or more competitors, otherwise known as horizontal price-fixing agreements, fall into the category of arrangements that are *per se* unlawful." **[**19]** *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*; *see* *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 986 (9th Cir. 2000)* ("Foremost in the category of per se violations is horizontal price-fixing among competitors."). Put simply, "collusion" among competitors is "the supreme evil of antitrust." *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*.

Here, the district court assumed, without deciding, "that collusion between independent **[*781]** economic actors to set the prices they will accept for their services in the market is a per se antitrust violation." On appeal, the City acknowledges that it "did not challenge the Chamber's contention that collective negotiations regarding topics such as payments to drivers could, absent *Parker* immunity, constitute per se antitrust violations." Because the district court dismissed the Chamber's federal antitrust claims solely on the basis of state-action immunity, we limit our analysis to that issue. We accept, without reaching the merits of the question, that the Ordinance authorizes a per se antitrust violation. The parties may address on remand which mode of antitrust analysis—the per se rule of illegality or the rule of reason—applies.

B. The Requirements for State-Action Immunity

HN14[] The state-action immunity doctrine derives from *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. In *Parker*, the Supreme Court held that "because 'nothing in the language of the *Sherman Act* **[**20]** . . . or in its history' suggested that Congress intended to restrict the sovereign capacity of the States to regulate their economies, the Act should not be read to bar States from imposing market restraints 'as an act of government.'" *FTC v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 224, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013)* (quoting *Parker, 317 U.S. at 350, 352)*. Following *Parker*, the Supreme Court has, "under certain circumstances," extended immunity from federal antitrust laws to "nonstate actors carrying out the State's regulatory program." *Id. at 224-25*.[9]

HN15[] State-action immunity is the exception rather than the rule. Indeed, the Supreme Court has stressed that it is "disfavored": "[G]iven the fundamental national values of free enterprise and economic competition that are embodied in the federal antitrust laws, 'state-action immunity is disfavored, much as are repeals by implication.'" *Id. at 225* (quoting *FTC v. Ticor Title Ins. Co., 504 U.S. 621, 636, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992))*; *see* *id. at 236* (reiterating "the principle that 'stateaction immunity is disfavored'" (quoting *Ticor Title, 504 U.S. at 636*)). In line with its "preference" against stateaction immunity, the Supreme Court "recognize[s] stateaction immunity only when

[9] The City's argument that the presumption against preemption applies here is misplaced. State-action immunity is a defense to preemption. *See, e.g.,* *Phoebe Putney, 568 U.S. at 235* (referring to *Parker* immunity as a "state-action defense to price-fixing claims"). The City did not argue below that the Ordinance does not authorize a per se violation of *section 1* of the Sherman Act. Accordingly, there is no challenge regarding the issue of whether preemption should or could apply. The only question is whether the *defense* to preemption applies.

it is clear that the challenged anticompetitive conduct is undertaken pursuant to a regulatory scheme that 'is the State's own.'" *Id. at 225* (quoting *Ticor Title, 504 U.S. at 635*). The Supreme Court's narrow take on state-action **[**21]** immunity is all the more exacting when a non-state actor invokes the protective umbrella of *Parker* immunity: "'[C]loser analysis is required when the activity at issue is not directly that of' the State itself, but rather 'is carried out by others pursuant to state authorization.'" *Id.* (quoting *Hoover v. Ronwin, 466 U.S. 558, 568, 104 S. Ct. 1989, 80 L. Ed. 2d 590 (1984))*.

HN16[] The Supreme Court uses a two-part test, sometimes referred to as the *Midcal* test, to "determin[e] whether the anticompetitive acts of private parties are entitled **[*782]** to immunity." *Id.* First, "the challenged restraint [must] be one clearly articulated and affirmatively expressed as state policy," and second, "the policy [must] be actively supervised by the State." *Id.* (quoting *Cal. Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980))*.

"Because municipalities and other political subdivisions are not themselves sovereign, state-action immunity under *Parker* does not apply to them directly." *Id.* As such, "immunity will only attach to the activities of local governmental entities if they are undertaken pursuant to a 'clearly articulated and affirmatively expressed' state policy to displace competition." *Id. at 226* (quoting *Cmty. Commc'ns Co. v. Boulder, 455 U.S. 40, 52, 102 S. Ct. 835, 70 L. Ed. 2d 810 (1982))*. Local governmental entities, "unlike private parties, . . . are not subject to the 'active state supervision requirement' because they have less **[**22]** of an incentive to pursue their own selfinterest under the guise of implementing state policies." *Id.* (quoting *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 46-47, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985))*. "Where state or municipal regulation by a private party is involved, however, active state supervision must be shown, even where a clearly articulated state policy exists." *Hallie, 471 U.S. at 46 n.10*.

i. The Clear-Articulation Test

We conclude that the anticompetitive restraint challenged in this case fails the first prong of the *Midcal* test. The State of Washington has not "clearly articulated and affirmatively expressed" a state policy authorizing private parties to price-fix the fees for-hire drivers pay to companies like Uber or Lyft in exchange for ride-referral services.

HN17[] The clear-articulation test is met "if the anticompetitive effect was the 'foreseeable result' of what the State authorized." *Phoebe Putney, 568 U.S. at 226-27* (quoting *Hallie, 471 U.S. at 42*). "'[T]o pass the "clear articulation" test,' a state legislature need not 'expressly state in a statute or its legislative history that the legislature intends for the delegated action to have anticompetitive effects.'" *Id. at 226* (alteration in original) (quoting *Hallie, 471 U.S. at 43*). To illustrate, the Supreme Court concluded in *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*, that "the clear-articulation test was satisfied because the suppression of competition in **[**23]** the billboard market was the foreseeable result of a state statute authorizing municipalities to adopt zoning ordinances regulating the construction of buildings and other structures." *Phoebe Putney, 568 U.S. at 227*.

Our inquiry with respect to the clear-articulation test is a precise one. "[T]he relevant question is whether the regulatory structure which has been adopted by the state has *specifically authorized the conduct* alleged to violate the *Sherman Act*." *Cost Mgmt. Servs., Inc. v. Wash. Nat. Gas Co., 99 F.3d 937, 942 (9th Cir. 1996)* (emphasis added). The state's authorization must be plain and clear: The relevant statutory provisions must "'plainly show' that the [state] legislature *contemplated* the sort of activity that is challenged," which occurs where they "confer 'express authority to take action that *foreseeably* will result in anticompetitive effects.'" *Hass v. Or. State Bar, 883 F.2d 1453, 1457 (9th Cir. 1989)* (first emphasis added) (quoting *Hallie, 471 U.S. at 43-44*). The state, in its sovereign capacity, must "clearly intend[] to displace **[*783]** competition in a particular field with a regulatory structure . . . in the relevant market." *S. Motor Carriers Rate Conference, Inc. v. United States, 471 U.S. 48, 64, 105 S. Ct. 1721, 85 L. Ed. 2d 36 (1985)*.

HN18[] Once we determine that there is express state authorization, we then turn to the concept of foreseeability, which "is to be used in deciding the *reach* of antitrust immunity that stems from an *already authorized* monopoly, price regulation, **[**24]** or other disruption in economic competition." *Shames, 626 F.3d at 1084* (second emphasis added). A foreseeable result cannot circumvent the requirement that there be express authorization in the first place: "[A] foreseeable result cannot *create* state authorization itself," but must itself stem from express authorization, which is "the necessary predicate for the Supreme Court's foreseeability test." *Id.* (quoting *Columbia Steel Casting Co. v. Portland Gen. Elec. Co., 111 F.3d 1427, 1444 (9th Cir. 1997))*. We must be careful not to "appl[y] the concept of 'foreseeability' from [the] clear-articulation test too loosely." *Phoebe Putney, 568 U.S. at 229*.

Applying these principles to the Ordinance, we conclude that the clear-articulation requirement has not been satisfied. The state statutes relied upon by the City Council in enacting the Ordinance—*Revised Code of Washington sections 46.72.001*, *46.72.160*, *81.72.200*, and *81.72.210*—do not "plainly show" that the Washington legislature "contemplated" allowing for-hire drivers to price-fix their compensation. Nor is such an anticompetitive result foreseeable.

We examine the state statutes in turn. First, *Revised Code of Washington section 46.72.001* provides:

> The legislature finds and declares that privately operated for hire transportation service is a vital part of the transportation system within the state. Consequently, the safety, reliability, and stability of privately operated for hire transportation **[**25]** services are matters of statewide importance. The regulation of privately operated for hire transportation services is thus an essential governmental function. Therefore, it is the intent of the legislature to permit political subdivisions of the state to regulate for hire transportation services without liability under federal antitrust laws.

Id.[10]

That the Washington state legislature "inten[ded] . . . to permit political subdivisions of the state to regulate for hire transportation services without liability under federal antitrust laws," *id.*, is insufficient to bring the Ordinance within the protective ambit of state-action immunity. We are mindful of the Supreme Court's instruction that ***HN19***[🡅] "a State may not confer antitrust immunity on private persons by fiat," *Ticor Title, 504 U.S. at 633*, and that a "State may not validate a municipality's anticompetitive conduct simply by declaring it to be lawful," *Hallie, 471 U.S. at 39*. Rather, it must first meet the *Midcal* requirements: A state "may displace competition with active state supervision [only] if the displacement is both intended by the State and implemented in its specific details."[11] **[*784]** *Ticor Title, 504 U.S. at 633*. We may not "defer[]to private pricefixing arrangements under the general auspices of state law," **[**26]** but instead must ensure that the "precondition[s] for immunity from federal law," such as "[a]ctual state involvement," are met. *Id.* After all, "[i]mmunity is conferred out of respect for ongoing regulation by the State, not out of respect for the economics of price restraint." *Id.*

HN20[🡅] The plain language of the statute centers on the provision of "privately operated for hire transportation services," *Wash. Rev. Code § 46.72.001*, not the contractual payment arrangements between for-hire drivers and driver coordinators for use of the latter's smartphone apps or ridereferral services. Although driver coordinators like Uber and Lyft contract with providers of transportation services, they do not fulfill the requests for transportation services—the drivers do. Nothing in the statute evinces a clearly articulated state policy to displace competition in the market for ride-referral service fees charged by companies like Uber, Lyft, and Eastside. In other words,

---

10 We will not separately analyze *Revised Code of Washington section 81.72.200*, which uses substantially similar language as *section 46.72.001*.

11 The City cites *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*, for the proposition that "a specific, detailed legislative authorization" is not required. *Id. at 415* (plurality opinion). However, in the same decision, the Supreme Court stated that "an adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found 'from the authority given a governmental entity to operate *in a particular area*, that the legislature *contemplated the kind of action complained of*.'" *Id.* (emphases added) (quoting *City of Lafayette v. La. Power & Light Co., 532 F.2d 431, 434 (5th Cir. 1976))*. As explained above, the City has not shown that the Washington legislature contemplated the kind of anticompetitive restraint established by the Ordinance.

although the statute addresses the provision of transportation services, it is silent on the issue of compensation contracts between forhire drivers and driver coordinators. To read into the plain **[**27]** text of the statute *implicit* state authorization and intent to displace competition with respect to for-hire drivers' compensation would be to apply the clear-articulation test "too loosely." *Phoebe Putney, 568 U.S. at 229*.

HN21[] *Revised Code of Washington section 46.72.160* also lends no support to the City's position. The statute, which focuses on the regulation of for-hire vehicle services, provides that "[c]ities . . . may license, control, and regulate all for hire *vehicles* operating within their respective jurisdictions." *Wash. Rev. Code § 46.72.160* (emphasis added). Each enumerated example of regulatory power in *section 46.72.160* plainly indicates legislative concern with the provision of vehicular services:

The power to regulate includes:

(1) Regulating entry into the business of providing for hire vehicle transportation services;

(2) Requiring a license to be purchased as a condition of *operating a for hire vehicle* and the right to revoke, cancel, or refuse to reissue a license for failure to comply with regulatory requirements;

(3) Controlling the rates charged for *providing for hire vehicle transportation service* and the manner in which rates are calculated and collected;

(4) Regulating the *routes and operations of for hire vehicles*, including restricting access to airports;

(5) Establishing safety **[**28]** and equipment requirements; and

(6) Any other requirements adopted to ensure safe and reliable *for hire vehicle transportation service*.

Id. (emphases added).[12] ***HN22***[] These enumerated powers refer specifically to for-hire vehicles, which by definition are "vehicles used for the transportation of passengers for **[*785]** compensation." *Wash. Rev. Code § 46.72.010(1)*. None of the powers confer upon the City the authority to regulate the fees Uber, Lyft, and Eastside charge in exchange for use of their smartphone apps or ride-referral services. Even the power to regulate "the rates charged for providing for hire vehicle transportation service"—the closest analog to the challenged Ordinance provision—speaks to rates charged to passengers in exchange for the *provision* of transportation services, not the fees Uber and Lyft charge to drivers for use of their apps. And the sixth enumerated power—a residual power—addresses "for hire vehicle transportation service[s]," not ride-referral service fees.

Our case law also forecloses the City's broad reading of the Washington statutes. In *Medic Air Corp. v. Air Ambulance Authority*, we distinguished between the market for air ambulance *services* and the market for *dispatching* air ambulances in the course **[**29]** of applying the clear-articulation test. *843 F.2d 1187, 1189-90 (9th Cir. 1988)*. We held that "a county board of health had clearly intended to displace competition by establishing a monopoly in the market of dispatching air ambulances in the county, and that state action immunity therefore shielded this monopoly." *Shames, 626 F.3d at 1084* (citing *Medic Air, 843 F.2d at 1189*). However, we declined to extend the scope of that immunity, holding that "this immunity did *not* reach anticompetitive conduct in the ambulance *service* market, because this was 'not a "necessary or reasonable consequence" of the decision to establish an exclusive *dispatcher*.'" *Id.* (quoting *Medic Air, 843 F.2d at 1189*). Here, too, there is a critical distinction between transportation services by for-hire drivers and ride-referral services by companies like Uber and Lyft. We cannot collapse the market for ride-referral services into the market for transportation services without colliding with our case law.

Furthermore, the Supreme Court has discouraged extending state-action immunity indiscriminately, in line with the "principle that 'state-action immunity is disfavored.'" *Phoebe Putney, 568 U.S. at 236* (quoting *Ticor Title, 504 U.S. at 636*). ***HN23***[] "[R]egulation of an industry, and even the authorization of discrete forms of anticompetitive

---

[12] We will not separately analyze *Revised Code of Washington section 81.72.210*, which uses substantially similar language as *section 46.72.160*.

conduct pursuant to a regulatory structure, does **[**30]** not establish that the State has affirmatively contemplated other forms of anticompetitive conduct that are only tangentially related." *Id. at 235*. To illustrate, the Supreme Court held in *Phoebe Putney* that a state law vesting a local governmental entity with general corporate powers and allowing it to acquire hospitals "d[id] not clearly articulate and affirmatively express a state policy empowering the [entity] to make acquisitions of existing hospitals that w[ould] substantially lessen competition." *Id. at 228*.

The Supreme Court has consistently demonstrated reluctance to careen beyond the bounds of state authorization in its application of the clear-articulation test. We must follow suit. In *Goldfarb v. Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*, the Supreme Court "rejected a state-action defense to price-fixing claims where a state bar adopted a compulsory minimum fee schedule. Although the State heavily regulated the practice of law, [the Supreme Court] found no evidence that it had adopted a policy to displace price competition among lawyers." *Phoebe Putney, 568 U.S. at 235* (citing *Goldfarb, 421 U.S. at 788-92*). Here, although the State of Washington authorized municipalities to regulate the for-hire transportation services industry at large, the statutes do **[*786]** not indicate that the state adopted a policy authorizing **[**31]** for-hire drivers to fix the rates Uber and Lyft charge for use of their ride-referral apps.

Similarly, in *Cantor v. Detroit Edison Co., 428 U.S. 579, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976)*, the Supreme Court "concluded that a state commission's regulation of rates for electricity charged by a public utility did not confer state-action immunity for a claim that the utility's free distribution of light bulbs restrained trade in the light-bulb market." *Phoebe Putney, 568 U.S. at 235* (citing *Cantor, 428 U.S. at 596*); *see* *Cantor, 428 U.S. at 584* (observing that "[t]he statute creating the Commission contains no direct reference to light bulbs"). The regulation of rates in one area—i.e., the regulation of rates charged to passengers for transportation services—does not confer the shield of state-action immunity onto anticompetitive conduct in a related market—i.e., price-fixing the fees for-hire drivers pay to Uber and Lyft in order to use their digital platforms.

In cases in which the Supreme Court found the clear-articulation test to be satisfied, the initial state authorization clearly contemplated and plainly encompassed the challenged anticompetitive conduct.[13] For example, in *Omni*, "where the respondents alleged that the city had used its zoning power to protect an incumbent billboard provider against competition, [the Supreme Court] found **[**32]** that the clear-articulation test was easily satisfied," as the suppression of competition in the billboard market stemmed clearly and directly from state statutes delegating authority to cities to adopt zoning ordinances regulating buildings and other structures. *Phoebe Putney, 568 U.S. at 230*. Indeed, the Court explained that "'[t]he very purpose of zoning regulation is to displace unfettered business freedom in a manner that regularly has the effect of preventing normal acts of competition' and that a zoning ordinance regulating the size, location, and spacing of billboards 'necessarily protects existing billboards against some competition from newcomers.'" *Id.* (alteration in original) (quoting *Omni, 499 U.S. at 373*). Unlike the zoning statutes in *Omni*, which authorized the regulation of buildings and structures, the Washington statutes in this case authorize regulation of the provision of transportation services to passengers—they do not encompass regulation of the payment contracts between for-hire drivers and ride-referral services.

---

[13] The City's selective reading of the Supreme Court's decision in *N.C. State Bd. of Dental Exam'rs v. FTC, 135 S. Ct. 1101, 191 L. Ed. 2d 35 (2015)*, does not buttress its position. The Supreme Court observed only that the clear-articulation test, on its own, is insufficient to justify state-action immunity:

> The two requirements set forth in *Midcal* provide a proper analytical framework to resolve the ultimate question whether an anticompetitive policy is indeed the policy of a State. The first requirement—clear **[**33]** articulation—rarely will achieve that goal by itself, for a policy may satisfy this test yet still be defined at so high a level of generality as to leave open critical questions about how and to what extent the market should be regulated.

Id. at 1112. In so stating, the Supreme Court made a noncontroversial point: The fact that a state may have clearly articulated a policy, and thus satisfied the first *Midcal* requirement, does not answer key questions about the implementation of the policy—questions which are addressed by the second *Midcal* requirement of active state supervision.

Similarly, in *Southern Motor Carriers*, the Supreme Court concluded that the clear-articulation test was readily satisfied where four state public service commissions decided to permit collective ratemaking **[*787]** by common carriers for intrastate transportation of general commodities. *471 U.S. at 62-66*. Three of the four states had "statutes that explicitly permit collective ratemaking by common carriers," the exact anticompetitive conduct in the precise market at issue. *Id. at 63*. Mississippi, the fourth state, had a statute authorizing the state public service commission not only to regulate common carriers, but also to "prescribe 'just and reasonable' rates for the intrastate transportation of general commodities." *Id.* (quoting *Miss. Code § 77-7-221*). Although Mississippi's statute did not flesh out "[t]he details of the inherently anticompetitive rate-setting process," the statute expressly indicated the state's intention to displace market competition in rate-setting for intrastate transportation **[**34]** of general commodities, the very market at issue. *Id. at 64*. The present case is clearly distinguishable from *Southern Motor Carriers*. Here, there is no state statute expressly authorizing private parties to price-fix the fees forhire drivers pay for use of Uber, Lyft, and Eastside's ridereferral services.

Tellingly, Uber and Lyft did not exist when the Washington statutes were enacted.[14] The very concept of digital ridesharing services was probably well beyond the imaginations of lawmakers two to three decades ago, much less foreseeable. But the fact that technology has advanced leaps and bounds beyond the contemplation of the state legislature is not, on its own, the dispositive factor in our holding today. Digital platforms like Uber and Lyft have become "highly interconnected with modern economic and social life," *Fields v. Twitter, Inc., 881 F.3d 739, 749 (9th Cir. 2018)*, and present novel challenges and contexts for regulation. Nevertheless, it is not our role to make policy judgments properly left to the Washington state legislature. Instead, we must tread carefully in the area of state-action immunity, lest "a broad interpretation of the doctrine . . . inadvertently extend immunity to anticompetitive activity which the states did not intend to **[**35]** sanction," or "a broad application of the doctrine . . . impede states' freedom by threatening to hold them accountable for private activity they do not condone 'whenever they enter the realm of economic regulation.'" *Cost Mgmt. Servs., 99 F.3d at 941* (quoting *Ticor Title, 504 U.S. at 635-36*).

Applying governing law, we hold that the clear-articulation requirement for state-action immunity is not satisfied in this case.

ii. The Active-Supervision Requirement

We next hold that the Ordinance does not meet the active-supervision requirement for *Parker* immunity.

HN24[] "The active supervision requirement demands . . . 'that state officials have and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy.'" *N.C. State Bd. of Dental Examiners v. FTC, 135 S. Ct. 1101, 1112, 191 L. Ed. 2d 35 (2015)* (quoting *Patrick v. Burget, 486 U.S. 94, 101, 108 S. Ct. 1658, 100 L. Ed. 2d 83 (1988))*. Because "[e]ntities purporting to act under state authority might diverge from the State's considered definition of the public good" and "[t]he resulting asymmetry between a state policy and its **[*788]** implementation can invite private self-dealing," the active-supervision requirement "seeks to avoid this harm by requiring the State to review and approve interstitial policies made by the entity claiming immunity." *Id.*

As a threshold matter, we first clarify that the active-supervision **[**36]** requirement applies to this case. It is settled law that***HN25***[] "active state supervision is not a prerequisite to exemption from the antitrust laws where the actor is a municipality rather than a private party." *Hallie, 471 U.S. at 47*. However, where, as here, "state or municipal regulation by a private party is involved, . . . active state supervision must be shown, even where a clearly articulated state policy exists." *Id. at 46 n.10* (citing *S. Motor Carriers, 471 U.S. at 62*).

Southern Motor Carriers is illustrative. That case involved a collective ratemaking scenario similar to the one authorized by the Ordinance in the present case. In *Southern Motor Carriers*, four states permitted private rate

---

[14] *Revised Code of Washington sections 46.72.001* and *46.72.160* were enacted in 1996. *Revised Code of Washington sections 81.72.200* and *81.72.210* were enacted in 1984.

bureaus, composed of common carriers, to submit rate proposals to their respective state public service commissions for approval or rejection. *See* 471 U.S. at 50-52. The states authorized, but did not compel, the common carriers to agree on the rate proposals prior to submission to the state agency. *See id.* A proposed rate could become effective in two circumstances—if the state agency took no action within a specified period of time, or, if a hearing was scheduled, only after affirmative agency approval. *See id.* Although the state public service commissions "ha[d] and exercise[d] **[**37]** ultimate authority and control over all intrastate rates," *id. at 51*, the requirement of active state supervision still applied, due to the involvement of the private rate bureaus and common carriers in the ratemaking process, *see* *id. at 66*.[15] Likewise here, private parties—for-hire drivers and driver coordinators—are permitted to set rates collectively and submit them to the Director for approval. Accordingly, the active-supervision requirement applies.

The involvement of private parties in municipal regulation renders this case ineligible for the municipality exception outlined in *Hallie*: "*Hallie* explained that '[w]here the actor is a municipality, there is little or no danger that it is involved in a private price-fixing arrangement. The only real danger is that it will seek to further purely parochial public interests at the expense of more overriding state goals.'" *Dental Examiners, 135 S. Ct. at 1112* (alteration in original) (quoting *Hallie, 471 U.S. at 47*); *see* *Phoebe Putney, 568 U.S. at 226* (noting that the municipality exception is designed to "preserve[] to the States their freedom . . . to use their municipalities to administer state regulatory policies free of the inhibitions of the federal antitrust laws without at the same time permitting purely parochial interests to **[**38]** disrupt the Nation's free-market goals" (quoting *City of Lafayette v. La. Power & Light Co., 435 U.S. 389, 415-16, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)* (plurality opinion)). In contrast, this case presents a scenario in which the City authorizes collective price-fixing by private parties, which the Director evaluates and ratifies. The amount of discretion **[*789]** the Ordinance confers upon private actors is far from trivial.[16]

Having decided that the active-supervision requirement applies to this case, we turn to examine whether it is met. Clearly, it is not. It is undisputed that the State of Washington plays no role in supervising or enforcing the terms of the City's Ordinance.

The City cites no controlling authority to support its argument that the Supreme Court uses the word "State" simply "as shorthand for the State and all its agents, including municipalities." The Supreme Court has stated repeatedly that active supervision must be "by the State itself." *Midcal, 445 U.S. at 105*; *see* *Dental Examiners, 135 S. Ct. at 1110* (stating that the policy must be "actively supervised by the State" (quoting *Phoebe Putney, 568 U.S. at 224*)), *1112* (explaining that active-supervision "requir[es] the State to review and approve interstitial policies made by the entity claiming immunity"); *Ticor Title, 504 U.S. at 633* ("[T]he policy must be actively supervised by the State itself." (quoting *Midcal, 445 U.S. at 105*)); *Patrick, 486 U.S. at 101* ("[T]he **[**39]** active supervision requirement mandates that the State exercise ultimate control over the challenged anticompetitive conduct.").

We take it as a given that the Supreme Court means what it states. In *Hallie*, the Supreme Court stated that "[w]here state or municipal regulation by a private party is involved, however, active state supervision must be

---

[15] The Supreme Court found that "[t]he second prong of the *Midcal* test [was] met, for the Government ha[d] conceded that the relevant States, through their agencies, actively supervise[d] the conduct of private parties." *S. Motor Carriers, 471 U.S. at 66*.

[16] "A regulation is a unilateral restraint when '[n]o further action is necessary by the private parties because the anticompetitive nature of [the] restraint is complete upon enactment.'" ***Yakima Valley Mem'l Hosp. v. Wash. State Dep't of Health, 654 F.3d 919, 927 (9th Cir. 2011)*** (alterations in original) (quoting ***Costco Wholesale Corp. v. Maleng, 522 F.3d 874, 890 (9th Cir. 2008))***. There, "no degree of discretion [is] delegated to private actors." *Id.* (quoting ***Costco, 522 F.3d at 890***). In contrast, "[t]he 'hallmark' of a hybrid restraint is the '*delegation* of discretion to private actors.'" *Id.* (quoting ***Costco, 522 F.3d at 898 n.20***). "The key distinction is that the regulation leaves a gap in the restraint of trade for private parties to fill at their discretion." *Id.*

Here, the anticompetitive restraint turns on the discretion of private actors, as the EDR and the driver coordinator agree on set prices, which they subsequently submit to the Director for review. We have held a similar anticompetitive restraint was a hybrid restraint: Where "the regulation[] . . . ha[d] the effect of delegating to private parties the discretion to set the posted price to be held," it was "an anticompetitive arrangement they could not achieve legally by explicit agreement." ***Id. at 930***.

shown."[17] *471 U.S. at 46 n.10*. In the first clause, the Supreme Court used "state or municipal," thus drawing a disjunctive difference between the two words. In the second clause, it used only "state." It is highly improbable that the Supreme Court chose to distinguish between states and municipalities in the beginning of the sentence, only to conflate the two in the latter part of the sentence.

Moreover, the City's interpretation of the Supreme Court's use of "State" collapses the specific distinction the Supreme Court has drawn between cities, which are not sovereign entities, and states, which are. Sovereign capacity matters. Indeed, the very origins of *Parker* immunity stem from respect for the states' sovereign capacity to regulate their economies. *Phoebe Putney, 568 U.S. at 224*; **[*790]** *see Dental Examiners, 135 S. Ct. at 1112* (noting that the active-supervision requirement serves to "determin[e] whether anticompetitive **[**40]** policies and conduct are indeed the action of a State in its sovereign capacity"). A "substate governmental entity" is simply not equivalent to a state: "Because municipalities and other political subdivisions are not themselves sovereign, state-action immunity under *Parker* does not apply to them directly." *Phoebe Putney, 568 U.S. at 225*. Unlike a state, a municipality may invoke the protective cloak of *Parker* immunity under "the narrow exception *Hallie* identified" not because it is sovereign, but because there is "little or no danger that it is involved in a private price-fixing arrangement"; the fact that "municipalities are electorally accountable and lack the kind of private incentives characteristic of active participants in the market"; and the "substantially reduc[ed] . . . risk that [a municipality] would pursue private interests while regulating any single field." *Dental Examiners, 135 S. Ct. at 1112-13* (quoting *Hallie, 471 U.S. at 47*). All of the reasons justifying the *Hallie* exception are eviscerated by the involvement of private parties in this case.

In concluding that the active-supervision requirement is not satisfied in this case, we do not disturb *Hallie*'s well-settled rule that municipal actors need not meet the active-supervision requirement. *See Hallie, 471 U.S. at 47*. Rather, **[**41]** following *Hallie*, we hold that in this case, in which private actors exercise substantial discretion in setting the terms of municipal regulation, "active state supervision must be shown." *Id. at 46 n.10*. Because ***HN26***[] the distinction between states and municipalities is of crucial importance for purposes of state-action immunity, we reject the City's invitation to treat the two entities interchangeably.[18]

II. The Ordinance Is Not Preempted by the *National Labor Relations Act*.

We next hold that the Ordinance is not preempted by the *NLRA* under either *Machinists* or *Garmon* preemption.

"Although the *NLRA* itself contains no express pre-emption provision, [the Supreme Court] ha[s] held that Congress implicitly mandated two types of pre-emption as necessary to implement federal labor policy." *Chamber of Commerce of the U.S. v. Brown, 554 U.S. 60, 65, 128 S. Ct. 2408, 171 L. Ed. 2d 264 (2008)*. Both are forms of implied preemption: The first is *Machinists* preemption, named after the Court's decision in *Lodge 76, International Ass'n of Machinists & Aerospace Workers v. Wisconsin Employment Relations Commission, 427 U.S. 132, 96 S. Ct. 2548, 49 L. Ed. 2d 396 (1976)*. ***HN27***[] *Machinists* preemption "forbids both the National Labor Relations Board (NLRB) and States to regulate conduct that Congress intended 'be unregulated because left "to be controlled by the free play of economic forces."'" *Chamber of Commerce, 554 U.S. at 65* (quoting *Machinists, 427 U.S. at 140*). *Machinists* preemption stems from "the premise that '"Congress struck a balance of **[**42]** protection, prohibition, and laissez-faire in respect to union organization, collective bargaining, and labor disputes."'" *Id.* (quoting *Machinists, 427 U.S. at 140 n.4*).

---

[17] The City's citation to *Tom Hudson & Associates, Inc. v. City of Chula Vista, 746 F.2d 1370 (9th Cir. 1984)*, does not persuade us otherwise. The case pre-dates *Hallie*, and the question of whether municipal supervision could satisfy the active-supervision requirement was not at issue. *See id. at 1374*.

[18] Because we conclude that the State of Washington, rather than the City, must carry out the active-supervision requirement, we do not reach the Chamber's alternative argument that even if municipal supervision could satisfy the active-supervision requirement, the supervision is "insufficiently active."

The second is *Garmon* preemption, named after the Court's decision in **[*791]** *San Diego Building Trades Council v. Garmon, 359 U.S. 236, 79 S. Ct. 773, 3 L. Ed. 2d 775 (1959)*. ***HN28***[] *Garmon* preemption "is intended to preclude state interference with the National Labor Relations Board's interpretation and active enforcement of the 'integrated scheme of regulation' established by the *NLRA*." *Chamber of Commerce, 554 U.S. at 65* (quoting *Golden State Transit Corp. v. City of Los Angeles, 475 U.S. 608, 613, 106 S. Ct. 1395, 89 L. Ed. 2d 616 (1986))*. "To this end, *Garmon* pre-emption forbids States to 'regulate activity that the *NLRA* protects, prohibits, or arguably protects or prohibits.'" *Id.* (quoting *Wis. Dep't. of Indus., Labor & Human Relations v. Gould Inc., 475 U.S. 282, 286, 106 S. Ct. 1057, 89 L. Ed. 2d 223 (1986))*.

A. *Machinists* Preemption

The Chamber first contends that the Ordinance is preempted by the *NLRA* under a theory of *Machinists* preemption because the Ordinance regulates economic activity that Congress intended to remain unregulated and left to the forces of the free market. The Chamber argues that Congress's choice to exclude independent contractors from the *NLRA's* definition of "employee" in *29 U.S.C. § 152(3)* implicitly preempts local labor regulation of independent contractors. We disagree.

We begin by recounting briefly the history of the *NLRA's* definition of "employee." In 1935, Congress defined "employee" in the *NLRA* as follows: **[**43]**

> The term "employee" shall include any employee, and shall not be limited to the employees of a particular employer, unless this subchapter explicitly states otherwise, and shall include any individual whose work has ceased as a consequence of, or in connection with, any current labor dispute or because of any unfair labor practice, and who has not obtained any other regular and substantially equivalent employment, but shall not include any individual employed as an agricultural laborer, or in the domestic service of any family or person at his home, or any individual employed by his parent or spouse.

National Labor Relations Act, Pub. L. No. 198, § 2, 49 Stat. 449, 450 (1935) (amended 1947).

About a decade later, the Supreme Court decided *NLRB v. Hearst Publications, 322 U.S. 111, 64 S. Ct. 851, 88 L. Ed. 1170 (1944)*, in which it held that "[w]hether . . . the term 'employee' includes [particular] workers . . . must be answered primarily from the history, terms and purposes of the legislation." *NLRB v. United Ins. Co. of Am., 390 U.S. 254, 256, 88 S. Ct. 988, 19 L. Ed. 2d 1083 (1968)* (second alteration in original) (quoting *Hearst, 322 U.S. at 124*). In effect, the *Hearst* Court held that "the standard" for determining whether a particular worker was an employee within meaning of the *NLRA* was not one based exclusively on common-law agency principles, but rather "was one of economic and policy considerations within the labor **[**44]** field." *Id.* Applying this new standard, the Supreme Court concluded that although newsboys were independent contractors, they were employees within the meaning of the *NLRA*. *See* *Hearst, 322 U.S. at 131-32*.

The Supreme Court's ruling in *Hearst* triggered swift congressional condemnation. *See* *United Ins., 390 U.S. at 256*. In 1947, Congress enacted the *Labor Management Relations Act*, also known as the *Taft-Hartley Act*. Relevant to this case, the *Taft-Hartley Act* amended the definition of "employee" in the *NLRA* by specifically excluding independent contractors, as well as supervisors and individuals subject to the *Railway Labor Act*. *See Labor-Management Relations Act, ch. 120, sec. 101, § 2(3), 61 Stat. 136, 137-38 (1947)*. **[*792]** The new definition of "employee," which is still operative today, provides:

> The term "employee" shall include any employee, and shall not be limited to the employees of a particular employer, unless this subchapter explicitly states otherwise, and shall include any individual whose work has ceased as a consequence of, or in connection with, any current labor dispute or because of any unfair labor practice, and who has not obtained any other regular and substantially equivalent employment, but shall not include any individual employed as an agricultural laborer, or in **[**45]** the domestic service of any family or person at his home, or any individual employed by his parent or spouse, *or any individual having the status of an independent contractor, or any individual employed as a supervisor, or any individual employed by an*

> *employer subject to the Railway Labor Act, as amended from time to time, or by any other person who is not an employer as herein defined*.

Id. (emphasis added); *see* 29 U.S.C. § 152(3).

As the Supreme Court subsequently observed: "The obvious purpose of this amendment was to have the Board and the courts apply general agency principles in distinguishing between employees and independent contractors under the Act." *United Ins., 390 U.S. at 256*. The legislative history of the amendment corroborates this observation. The House Report for the amendment explained:

> An "employee," according to all standard dictionaries, according to the law as the courts have stated it, and according to the understanding of almost everyone, with the exception of members of the National Labor Relations Board, means someone who works for another for hire. But in the case of [*NLRB v. Hearst Publications, 322 U.S. 111, 64 S. Ct. 851, 88 L. Ed. 1170 (1944)*], the Board expanded the definition of the term "employee" beyond anything that it ever had included before, and the Supreme Court, relying **[**46]** upon the theoretic "expertness" of the Board, upheld the Board. In this case the Board held independent merchants who bought newspapers from the publisher and hired people to sell them to be "employees". [sic] The people the merchants hired to sell the papers were "employees" of the merchants, but holding the merchants to be "employees" of the publisher of the papers was most far reaching. It must be presumed that when Congress passed the Labor Act, it intended words it used to have the meanings that they had when Congress passed the act, not new meanings that, 9 years later, the Labor Board might think up. In the law, there always has been a difference, and a big difference, between "employees" and "independent contractors". [sic] "Employees" work for wages or salaries under direct supervision. "Independent contractors" undertake to do a job for a price, decide how the work will be done, usually hire others to do the work, and depend for their income not upon wages, but upon the difference between what they pay for goods, materials, and labor and what they receive for the end result, that is, upon profits. It is inconceivable that Congress, when it passed the act, authorized the Board **[**47]** to give to every word in the act whatever meaning it wished. On the contrary, Congress intended then, and it intends now, that the Board give to words not far-fetched meanings but ordinary meanings. To correct what the Board has done, and what the Supreme Court, putting misplaced reliance upon the Board's expertness, has approved, **[*793]** the bill excludes "independent contractors" from the definition of "employee". [sic]

H.R. Rep. No. 80-245, at 18 (1947).

Citing the House Report, the Chamber asserts that Congress excluded independent contractors from the *NLRA's* definition of "employee" in order to leave independent-contractor arrangements to the free play of economic forces, rather than subject to collective bargaining, federal or local. However, the portion of the House Report the Chamber relies upon actually refers to *supervisors*, not independent contractors. *See id.* at 16-17 (noting that *supervisors* have "abandoned the 'collective security' of the rank and file voluntarily, because they believed the opportunities thus opened to them to be more valuable to them than such 'security'").

The House Report's discussion of the exclusion of independent contractors shows that Congress intended to effect a return **[**48]** to the status quo, rather than preempt state or local regulation of independent contractors. Congress added the exclusion in order to reject the Supreme Court's erroneous "new" construction of "employee" and to return to the common-law definition of "employee" that was in place nine years earlier, before *Hearst. Id.* at 18. While the Chamber makes much of Congress's exclusion of independent contractors from the definition of "employee," the legislative history does not support the Chamber's claim.

Furthermore, the fact that a group of workers is excluded from the definition of "employee" in *§ 152(3)*, without more, does not compel a finding of *Machinists* preemption. As the Chamber acknowledges, *§ 152(2)-(3)* excludes agricultural laborers, domestic workers, and public employees, all of which have been subject to state regulation. *E.g., Davenport v. Wash. Educ. Ass'n, 551 U.S. 177, 181, 127 S. Ct. 2372, 168 L. Ed. 2d 71 (2007)* ("The *National Labor Relations Act* leaves States free to regulate their labor relationships with their public employees."); *Greene v. Dayton, 806 F.3d 1146, 1149 (8th Cir. 2015)* ("Although Congress exempted domestic service workers from the

NLRA, Congress did not demonstrate an intent to shield these workers from all regulation."). Indeed, we concluded with respect to the exclusion of agricultural laborers from § 152(3):

> [W]here, as here, Congress has **[**49]** chosen not to create a national labor policy in a particular field, the states remain free to legislate as they see fit, and may apply their own views of proper public policy to the collective bargaining process insofar as it is subject to their jurisdiction. We find nothing in the National Labor Relations Act to suggest that Congress intended to preempt such state action by legislating for the entire field. Indeed, we draw precisely the opposite inference from Congress's exclusion of agricultural employees from the Act.

United Farm Workers of Am. v. Ariz. Agric. Emp't Relations Bd., 669 F.2d 1249, 1257 (9th Cir. 1982). We find no reason to treat independent contractors differently than these other excluded categories of workers.

Finally, the Chamber's reliance on Beasley v. Food Fair of North Carolina, Inc., 416 U.S. 653, 94 S. Ct. 2023, 40 L. Ed. 2d 443 (1974), is misplaced. In *Beasley*, the Supreme Court considered whether the exclusion of supervisors from the NLRA's definition of "employee," which "freed employers to discharge supervisors without violating the [NLRA's] restraints against discharges on account of labor union membership," "also freed the employer from liability in damages to the discharged supervisors" under a state law "that provide[d] such an action for employees discharged **[*794]** for union membership." Id. at 654-55. The Supreme Court held that section 14(a) of the NLRA contained an express statement **[**50]** of preemption that precluded employers from treating supervisors as employees.[19] Id. at 657-62. In so holding, the Supreme Court did not rely on any theory of implicit preemption. Needless to say, there is no analogous express statement of preemption like section 14(a) for independent contractors.

The Supreme Court also concluded in *Beasley* that the legislative history behind the supervisor exclusion "compels the conclusion that Congress' dominant purpose in amending [NLRA sections] 2(3) and 2(11), and enacting [NLRA section] 14(a) was to redress a perceived imbalance in labor-management relationships that was found to arise from putting supervisors in the position of serving two masters with opposed interests." Id. at 661-62. These legislative concerns do not apply to independent contractors. In sum, Beasley is inapposite and lends no support for the Chamber's claim.

Neither case law nor legislative history supports the **[**51]** Chamber's argument that Congress's choice to exclude supervisors from the definition of "employee" in § 152(3), on its own, has implicit preemptive effect. We thus reject the Chamber's claim that the Ordinance is preempted under a theory of *Machinists* preemption.

B. *Garmon* Preemption

Lastly, the Chamber argues that the Ordinance is preempted by the NLRA under a theory of *Garmon* preemption because the Ordinance "requires local officials and state courts to decide whether for-hire drivers are employees under the NLRA," a determination which the Chamber contends is within the exclusive jurisdiction of the NLRB. We find this argument unpersuasive.

To start, the Ordinance expressly disclaims any such determination:

---

[19] Section 14(a) of the NLRA, 29 U.S.C. § 164(a), contains an express statement of preemption:

> Nothing herein shall prohibit any individual employed as a supervisor from becoming or remaining a member of a labor organization, but no employer subject to this subchapter shall be compelled to deem individuals defined herein as supervisors as employees for the purpose of any law, either national or local, relating to collective bargaining.

Id.

> No provision of this ordinance shall be construed as . . . providing any determination regarding the legal status of taxicab, transportation network company, and for-hire vehicle drivers as employees or independent contractors. The provisions of this ordinance do not apply to drivers who are employees under *29 U.S.C. § 152(3)*.

Seattle, Wash., Ordinance 124968 § 6.

Moreover, the Chamber fails to meet the threshold requirement for a *Garmon* preemption claim. ***HN29***[] It is a "precondition for [*Garmon*] pre-emption[] that the **[**52]** conduct [at issue] be 'arguably' protected or prohibited." *Int'l Longshoremen's Ass'n v. Davis, 476 U.S. 380, 394, 106 S. Ct. 1904, 90 L. Ed. 2d 389 (1986)*. This precondition "is not satisfied by a conclusory assertion of pre-emption." *Id.* "If the word 'arguably' is to mean anything, it must mean that the party claiming pre-emption is required to demonstrate that his case is one that the Board could legally decide in his favor." *Id. at 395*. In other words, "a party asserting pre-emption must advance an interpretation of the Act that is not plainly contrary to its language and that has not been 'authoritatively rejected' **[*795]** by the courts or the Board." *Id.* (quoting *Marine Eng'rs Beneficial Ass'n v. Interlake S.S. Co., 370 U.S. 173, 184, 82 S. Ct. 1237, 8 L. Ed. 2d 418 (1962))*. Next, the party must "put forth enough evidence to enable the court to find that the Board reasonably could uphold a claim based on such an interpretation." *Id.* In short, "a party asserting pre-emption must put forth enough evidence to enable a court to conclude that the activity is arguably subject to the Act." *Id. at 398*.

The facts of *Davis* are illustrative. In *Davis*, there was a dispute over whether an individual was a supervisor—in which case there would be no preemption—or an employee—in which case there would be preemption, and the NLRB, rather than the state court, would have proper jurisdiction over the matter. *Id. at 394*. The union in that **[**53]** case "point[ed] to no evidence in support of its assertion that [the individual] was arguably an employee." *Id. at 398*. "Its sole submission [was] that [the individual] was arguably an employee because the Board ha[d] not decided that he was a supervisor." *Id. at 396*. This was insufficient to meet the union's "burden of showing at least an arguable case before the jurisdiction of a state court w[ould] be ousted." *Id.*

Like the union in *Davis*, the Chamber, without citing any authority, asserts that "there is no need for the Chamber to take a position on the employment status of for-hire drivers, and there is no need for the Chamber to provide any supporting evidence." Instead, the Chamber lists, without elaboration, ongoing matters pending before the NLRB on the question of whether drivers who use ride-referral services are employees. As the party asserting preemption, the Chamber has not met its burden to show at least an arguable case that the drivers at issue are covered by the *NLRA*. Practically speaking, the question of whether drivers who contract with Uber and Lyft are employees or independent contractors may well be a "live issue" in other judicial and administrative proceedings involving different **[**54]** parties, claims, and law. But that does not absolve the Chamber from complying with our case law regarding *Garmon* preemption.

The Chamber asserts the alternative argument that, "[a]t a minimum, the Ordinance is preempted under *Garmon* until the NLRB conclusively determines whether the for-hire drivers who use Uber, Lyft, and Eastside are employees or independent contractors." This argument, too, is futile. As the Supreme Court stated in *Davis*, "Nothing in *Garmon* suggests that an arguable case for pre-emption is made out simply because the Board has not decided the general issue one way or the other." *Id. at 397*.

The Chamber has not made any showing or set forth any evidence showing that the for-hire drivers covered by the Ordinance are arguably employees subject to the *NLRA*. We thus hold that the Ordinance is not preempted under the Chamber's theory of *Garmon* preemption.

CONCLUSION

For the foregoing reasons, we reverse the district court's dismissal of the Chamber's federal antitrust claims, and remand the federal antitrust claims to the district court for further proceedings. We also affirm the district court's dismissal of the Chamber's *NLRA* preemption claims.

The parties shall bear their own costs **[**55]** on appeal.

AFFIRMED IN PART, REVERSED IN PART, REMANDED.

Reibstein v. Rmd Group Llc E-File

Superior Court of California, County of San Diego

May 11, 2018, Decided

Reibstein v. RMD Group LLC [E-File]

Core Terms

cause of action, gratuity, tips, suggestions, contends, servers, unfair, demurrer, prong, alleged violation, business practice, restitution, customer, alleges

Counsel: **[*1]** ROBERT G LOEWY, counsel, present for Plaintiff(s).

Christopher S. Morris, specially appearing for counsel Jacob A. Gillick, present for Defendant(s).

Judges: John S. Meyer.

Opinion by: John S. Meyer

Opinion

MINUTE ORDER

The Court hears oral argument and confirms the tentative ruling as follows:

Defendant RMD Group, LLC brings this demurrer to plaintiff's complaint.

In ruling on a demurrer, the Court assumes that the complaint's properly pleaded material factual allegations are true and will give the complaint a reasonable interpretation by reading it as a whole and all its parts in their context. The Court does not, however, assume the truth of contentions, deductions, or conclusions of fact or law. *Evans v. City of Berkeley (2006) 38 Cal.4th 1, 6*; *Moore v. Regents of University of California (1990) 51 Cal.3d 120, 125*.

Defendant makes a number of challenges that extend to many, if not all, causes of action.

The alleged business practice is defendant including miscalculated gratuity suggestions on bills presented for split checks. Defendant contends this is not a "business practice," but rather a mistake or accident.

A practice generally means "the 'habitual doing of certain things, the doing of an act more than once' ... [or] '[r]epeated or customary action, habitual performance; a succession of acts of similar kind; habit, custom ...'" **[*2]** *Wilson v. Stearns (1954) 123 Cal.App.2d 472, 479*. Based on the allegations in the complaint, this was a practice.

Defendant contends that tips are gifts from the customer to the server. "A tip is not intended for the proprietor of a restaurant. It is a gratuity, i.e., 'a free gift, a present.'" *Herbert's Laurel-Ventura v. Laurel Ventura Holding Corp. (1943) 58 Cal.App.2d 684, 694*.

On the other hand, "a tip is connected directly with the service and its quality. He who tips thereby expresses not his own self-conceit, but his gratification with the service by compensating the servant over and above the regular remuneration for the service." *Roberts v. C.I.R. (9th Cir. 1949) 176 F.2d 221, 224*.

The essential characteristic of a gift is the absence of consideration. *Id., at 223*. Arguably, consideration is present when a tip is given: consideration for the services provided by the server.

Defendant contends that the tips belong to the employee, thus defendant has not benefited from the overtipping.

Plaintiff contends that "this scheme has unquestionably benefitted the company. In effect, it allows RMD to pay its staff an extra $20-$40 per shift, without raising menu prices and without cutting into the company's profits. It also provides RMD a strategic advantage over its competitors, allowing it to attract the best serving talent, while ostensibly keeping menu prices low." [Oppo., 2:5-10] **[*3]**

This appears to be a factual dispute that cannot be resolved on demurrer.

Defendant asserts that plaintiff is seeking restitution from the wrong defendant. "Plaintiff is seeking restitution from the wrong defendant In reality, restaurant received no benefit from gratuity..." [Moving, 9:26-28] Defendant suggests that the server is the only one who can provide restitution.

Restitution is defined as "compelling a UCL defendant to return money obtained through an unfair business practice to thow persons in interest from whom the property was taken, that is, to persons who had ownership interest in the property or those claiming through that person." *Korea Supply co. v. Lockheed Martin Corp. (2003) 29 Cal.4th 1134, 1144-45*.

Plaintiff likens the facts here with *Matoff v. Brinker Restaurant Corp. (C.D. Cal. 2006) 439 F.Supp.2d 1035*, where the restaurant required servers to share tips with bartenders. Here, plaintiff is claiming that defendant caused the overcharge and then gave the excess money to the servers. These are credit card transactions, so the money from the credit card would go the defendant, who in turn would pay the servers. "If Defendant unlawfully misappropriated Plaintiff's tips, Plaintiff may seek restitution even if Defendant directed the misappropriated funds to the bartenders." *Id., at 1038*.

Defendant contends that the complaint **[*4]** acknowledges that defendant has stopped the practice of putting suggested gratuities on their bills, thus there is nothing to enjoin. However, the complaint actually alleges that there has only been a representation that the practice has stopped.

The first cause of action alleges violation of *Bus. &Prof. §17500*, false/misleading statements in advertising.

B&P §17500 makes it unlawful for any person with intent to dispose of property or to perform services to make any statement concerning that property or those services which is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading.

Defendant contends that plaintiff has not alleged a connection between the intent to dispose of property or to perform services and the gratuity suggestions.

At the time the alleged statement was made (the suggested gratuities on the bill), food and drink had already been consumed and services performed. There is no allegation that defendant provided the suggested gratuities with the intent to dispose of property or to perform services. There are insufficient facts alleged to constitute this cause of action.

The second cause of action alleges violation of the CLRA. **[*5]** It prohibits "unfair or deceptive acts or practices undertaken by any person in a transaction intended to result or that results in the sale or lease of goods or services to any consumer" in certain manners. Civ.C. *§1770(a)*

The alleged business practice is including miscalculated gratuity suggestions on bills presented for split checks. Although that practice may have resulted in the overpayment of tips, it did not result or intend to result in the sale of goods or services. There are insufficient facts alleged to constitute this cause of action.

The third cause of action alleges violation of the unlawful prong of *Bus.&Prof. §17200*. This cause of action is dependent on the first two causes of action. Thus, it fails to state sufficient facts to constitute a cause of action.

The fourth cause of action alleges violation of the unfair prong of Bus.&Prof. §17200.

To show a business practice is unfair, the plaintiff must show "the conduct is tethered to any underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***." *Graham v. Bank of America, N.A. (2014) 226 Cal.App.4th 594, 613*.

Plaintiff alleges that it was unfair to fail to correct the miscalculations or to **[*6]** conceal the fact that the gratuity suggestions were false. This is insufficient to support the "unfair" allegation.

In opposition, plaintiff contends that the alleged practice violates the spirit of the antitrust laws, giving defendant an unfair advantage over competitors in recruitment and retention of servers, and by allowing defendant to keep menu prices lower. This is not, however, alleged in the complaint.

The fifth cause of action alleges violation of the fraudulent prong of *Bus.&Prof. §17200*.

"The fraud prong of the UCL may be shown if members of the public are ""likely to be deceived."" (*Buller v. Sutter Health (2008) 160 Cal.App.4th 981, 986, 74 Cal.Rptr.3d 47*.) However, "'[a]bsent a duty to disclose, the failure to do so does not support a claim under the fraudulent prong of the UCL.'" (*Id. at p. 987, 74 Cal.Rptr.3d 47*.) Additionally, the UCL "imposes an actual reliance requirement on plaintiffs prosecuting a private enforcement action under the UCL's fraud prong." (*In re Tobacco II Cases (2009) 46 Cal.4th 298, 326, 93 Cal.Rptr.3d 559, 207 P.3d 20*.) In other words, the plaintiff "must allege he or she was motivated to act or refrain from action based on the truth or falsity of a defendant's statement, not merely on the fact it was made." (*Kwikset Corp. v. Superior Court (2011) 51 Cal.4th 310, 327, fn. 10, 120 Cal.Rptr.3d 741, 246 P.3d 877*.). *Graham v. Bank of America, N.A. (2014) 226 Cal.App.4th 594, 613-614*

There are sufficient facts alleged to constitute this cause of action. The alleged fraudulent practice is including miscalculated gratuity **[*7]** suggestions on the bill. It is alleged that the purpose of including the suggestions are for the benefit of customers, so they do not have to take out their calculators or figure out the math. Whether a reasonable customer would notice the suggestions were excessive is a factual issue. It may not be unreasonable for a customer to assume those figures are correct, especially if the rest of the bill is correct. Plaintiff alleges she relied on the suggested gratuity calculations and was deceived into paying more than she intended.

The sixth cause of action is for breach of the implied covenant of good faith and fair dealing. Plaintiff advises in a footnote that plaintiff is not proceeding on this cause of action.

The seventh cause of action is for reformation of contract.

"When, through fraud or a mutual mistake of the parties, or a mistake of one party, which the other at the time knew or suspected, a written contract does not truly express the intention of the parties, it may be revised on the application of a party aggrieved, so as to express that intention, so far as it can be done without prejudice to rights acquired by third persons, in good faith and for value." Civ.C. §3399.

The contract **[*8]** is not identified in the complaint, thus there are insufficient facts alleged to constitute the cause of action.

THEREFORE, the demurrer to the first, second, third, fourth and seventh causes of action is **SUSTAINED WITH LEAVE TO AMEND**. The demurrer to the fifth cause of action is **OVERRULED**. The demurrer to the sixth cause of action is **SUSTAINED WITHOUT LEAVE TO AMEND**.

Plaintiff shall file and serve her First Amended Complaint no later than May 25, 2018.

IT IS SO ORDERED.

Opinion by: Anthony P. Patti

Opinion

REPORT AND RECOMMENDATION TO GRANT: (1) PATRICK McPHARLIN'S MOTION TO DISMISS (DE 43), (2) THE INSURANCE DEFENDANTS' JOINT MOTION TO DISMISS (DE 45), AND (3) DEFENDANT PROGRESSIVE CASUALTY INSURANCE COMPANY'S MOTION TO DISMISS (DE 46)

I. RECOMMENDATION: The Court should grant Patrick McPharlin's, the Joint Insurance Defendants', and Progressive Casualty Insurance Company's motions to dismiss (DEs 43, 45, 46) and dismiss this action with prejudice as to Plaintiffs Ray Smith and Barret Kish and without prejudice as to putative Plaintiffs Ferzell Archie, Rush Holmes and Americans for Reform.

II. REPORT

A. Plaintiffs' Complaint

On October 17, 2017, Plaintiffs Ray Smith, Barret Kish, Americans for Reform, Ferzell Archie, and Rush Holmes purportedly filed the instant lawsuit. (DE 1.) However, the complaint was only signed by Ray Smith and Barret Kish, both proceeding *in pro per*, and Smith and Kish are the only plaintiffs who have appeared in this matter. (*Id.*)[1] Plaintiffs' complaint alleges generally that automobile **[*3]** insurance rates under Michigan's No-Fault Act are unfair and discriminatory. Specifically, Plaintiffs allege that the use of "non driving factors to determine no fault auto insurance rates and premiums" violates their right to due process, equal protection under the *Fourteenth Amendment to the United States Constitution*, and federal ***antitrust law***. (DE 1 at 5.) Plaintiffs seek "injunctive relief, declaratory relief, and punitive damages in the amount of $810,000,000.00 dollars in back payments to policy holders[.]" (*Id.* at 6.) In sum, these four individual plaintiffs (only two of whom have ever signed a pleading or appeared in Court) and a loose, non-corporate entity — none of whom or which are lawyers — purport to represent a class of auto policy holders.

---

[1] Plaintiffs' Complaint (DE 1 at Pg ID 1-7, 28-30) attaches a document Plaintiffs title their "Civil Action Brief." (DE 1 at Pg ID 8-27.) The Court entered an Order on March 20, 2018 striking the "Civil Action Brief" addendum for the reasons stated on the record during the March 15, 2018 hearing, including that the "brief" does not conform to the requirements of a pleading and/or motion as required by *Fed. R. Civ. P. 7* and *8*, and *E.D. Mich. LR 7.1*. (DE 83 at 7.) As the Court further discussed in its March 20, 2018 Order (DE 83), neither Archie nor Holmes signed the complaint, or any other document filed in this case, and neither appeared at the March 15, 2018 status conference and motion hearing, although Plaintiff Ray Smith stated he informed both individuals of the hearing and the Court had ordered them to appear, albeit with service problems discussed *infra*. Plaintiffs Ray Smith and Barret Kish are not licensed attorneys and are appearing *in pro per*, and thus, as discussed more fully *infra*, neither plaintiff can represent Archie, Holmes, or "Americans for Reform."

B. The Instant Motions to Dismiss

1. Defendants' Motions to Dismiss

a. Defendant McPharlin's motion (DE 43)

Defendant Patrick McPharlin, the Director of the Department of Insurance and Financial Services (DIFS), filed his motion to dismiss on December 15, 2017. (DE 43.) Director McPharlin asserts that Plaintiffs' claims against him, whether in his official or personal capacities, are barred by *Eleventh Amendment* or qualified immunity. He further argues that Plaintiffs do not have standing to pursue **[*4]** their claims, and that they cannot bring a claim on behalf of Americans for Reform. He also asserts that Plaintiffs have failed to show that he violated the *Equal Protection Clause* or the *Due Process Clause*, and that their *Commerce Clause* claim based on the business of insurance is barred by the *McCarran-Ferguson Act*. Finally, Director McPharlin argues that Plaintiffs' antitrust claim is barred pursuant to *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*.

b. The Insurance Defendants' joint motion (DE 45)

The Insurance Defendants[2] filed their joint motion to dismiss on December 15, 2017. (DE 45.) The Insurance Defendants argue that Plaintiffs lack standing to bring any claims asserted in the complaint. They further assert that Plaintiffs' claims fail because none of the Insurance Defendants is a state actor as required for Plaintiffs' constitutional claims. Finally, the Insurance Defendants contend that Plaintiffs' purported antitrust claim is barred by the McCarran-Ferguson Act, the filed-rate doctrine, Plaintiffs' failure to exhaust their administrative remedies, and for failure to state a claim.

c. Defendant Progressive Casualty's motion (DE 46)

Defendant Progressive Casualty Insurance Company ("Progressive Casualty") also filed a separate motion to dismiss. (DE 46.) Progressive Casualty **[*5]** argues that Plaintiffs' complaint fails to state a claim upon which relief can be granted because Progressive Casualty does not write personal automobile insurance in the State of Michigan, and that it therefore could not have engaged in any of the challenged practices or caused any of Plaintiffs' alleged injuries.

2. Plaintiffs' Joint Response Brief (DE 69)

On February 8, 2018, Plaintiffs Smith and Kish filed a response brief opposing Defendants' motions to dismiss. (DE 69.) Plaintiffs argue that they "have standing to bring their constitutional claims in Federal District Court on grounds that they were denied due process and equal protection under the law when defendants failed to provide them with an affordable method to purchase nofault auto insurance essential to operating a motor vehicle." (*Id.* at 5.) They assert that the Defendants all use the same rate-making scheme to set excessive, discriminatory no-fault insurance rates "for Detroit residents who are predominantly African American[s] living in poverty." (*Id.* at 2.) Plaintiffs argue that they "and other Detroit motorists are unable to register their motor vehicles required by law to drive to work, hospital visits and take care of daily needs **[*6]** due to the excessive discriminatory insurance rates." (*Id.*) They

[2] Defendants state that the "Insurance Defendants" include: The American Insurance Company, American Automobile Insurance Company, The Hanover Insurance Company, Progressive Casualty Insurance Company, American Alternative Insurance Corporation, Farm Bureau Mutual Insurance Company of Michigan, State Farm Mutual Automobile Insurance Company, Auto-Owners Insurance Company, Liberty Mutual Insurance Company, and USAA Casualty Insurance Company. (DE 45 at 4.)

contend that Defendants' failure to offer Plaintiffs an alternative method to purchase fair, equitable and affordable liability-only insurance policies violates the Due Process and *Equal Protection Clauses*. They further claim that their due process rights are violated by the seizure of vehicles during traffic stops for not providing proof of no-fault insurance, although it is unclear how any of the named defendants are liable for making traffic stops or seizure of vehicles.

Plaintiffs argue that Director McPharlin is not entitled to qualified immunity because his actions gave "insurance companies the approval to execute discriminatory rate-setting practices absent free market participation" and he "knew before approving the 7-day insurance policy rate-setting scheme, [that it] was unconstitutional." Relying on *Shavers v. Attorney General of Michigan, 402 Mich. 554, 267 N.W.2d 72 (1978)* ("*Shavers I*") and *Jackson v. Metropolitan Edison Co., 419 U.S. 345, 95 S. Ct. 449, 42 L. Ed. 2d 477 (1984)*, Plaintiffs also contend that the Insurance Defendants can be deemed "state actors" for purposes of their constitutional claims because they are regulated by the Director to conduct the business of insurance and are working together with government officials to implement the no-fault insurance requirements.. Plaintiffs **[*7]** further argue that because insurers collect premiums, which include a provision for assessments the insurers pay to the Michigan Catastrophic Claims Association (MCCA), they are state actors. Finally, Plaintiffs assert that their antitrust claim is not barred by the McCarran-Ferguson Act because they are not making a claim for Congress to regulate the business of insurance, but rather a claim that the Director's action to license only one insurance company (L.A. Insurance) to issue a 7-day insurance policy is a "pure monopoly." Plaintiffs did not respond to Progressive Casualty's motion to dismiss.

3. Defendants' Reply Briefs

a. Director McPharlin's reply (DE 70)

On February 21, 2018, Director McPharlin filed a reply brief in support of his motion to dismiss. (DE 70.) Director McPharlin argues that Plaintiffs' response suffers from several procedural defects, including that it was more than three weeks late, it remains unclear who the Plaintiffs are, and that Plaintiffs raise many new issues in their response (i.e., a *§1983* claim) that were not asserted in their complaint. Director McPharlin further argues that Plaintiffs have failed to meet their burden to show that he is not entitled to **[*8]** qualified immunity, and that their response misstates both antitrust and insurance law. He asserts that "[u]ltimately, Plaintiffs complain of policy issues and their remedy lies with the legislative rather than the judicial branch of our government."

b. Insurance Defendants' reply (DE 72)

On February 22, 2018, the Insurance Defendants filed their reply brief in support of their motion to dismiss. (DE 72.) The Insurance Defendants argue that Plaintiffs continue to fail to demonstrate standing to pursue their claims because their pleadings do not state whether they are purchasers of no-fault insurance policies. They also contend that Plaintiffs' constitutional claims fail because they cannot establish that the Insurance Defendants are state actors. The Insurance Defendants rely upon *American Manufacturers Mutual Insurance Company v. Sullivan, 526 U.S. 40, 119 S. Ct. 977, 143 L. Ed. 2d 130 (1999)*, for the principle that "[a]ction taken by private entities with the mere approval or acquiescence of the State is not state action," and argue that Plaintiffs offer no support for their other contentions. Finally, the Insurance Defendants reiterate that Plaintiffs failed to properly plead a *Sherman Act* antitrust claim and that even if that claim had been properly pleaded, it would be barred by the McCarran-Ferguson **[*9]** Act, the filed-rate doctrine, and Plaintiffs' failure to exhaust administrative remedies.

C. March 15, 2018 Motion Hearing and Status Conference

On February 6, 2018, the Court entered a notice of motion hearing, scheduling Defendants' motions to dismiss and Plaintiffs' two then-pending motions to amend the complaint (see DEs 51, 63, after which a third was filed as DE 74) for hearing on March 15, 2018 at 10:00 am. (DE 67.) The Court also entered a notice to appear for a status conference for the same date and time. (DE 68.) In a March 2, 2018 Order denying Plaintiffs Smith and Kish's motions to adjourn the status conference and hearing, the Court stated: "**The parties are reminded that all named plaintiffs are required to appear in person at the March 15th status conference, as none of them have counsel**." (DE 78 at 5 (emphasis in original).) The Court also stayed the case pending the March 15, 2018 hearing and status conference. (DE 78 at 3-5.)

On March 15, 2018, Plaintiffs Ray Smith and Barret Kish and counsel for Defendants, Lori McAllister, Aaron Levin, Mary Elizabeth Lippett, Adam Fadly, Amy Lynn Piccola, Kaveh Kashef, Matthew P. Kennison, Gregory L. Curtner, Michael K. Farrell, and **[*10]** John Yeager, appeared. The Court held a status conference on the record with the parties regarding Plaintiffs' complaint, the identity and status of the Plaintiffs, and ruled from the bench on Plaintiffs' motions for leave to amend the complaint. The Court also entertained oral argument on Defendants' motions to dismiss, which the Court then took under advisement. The Court subsequently entered an Order: (1) directing Plaintiffs Smith and Kish to provide proper contact information for putative plaintiffs; (2) striking the "civil action brief" attached to Plaintiffs' complaint; (3) denying Plaintiffs' motions to amend the complaint without prejudice; (4) voluntarily dismissing Defendant Transamerica without prejudice; and (5) otherwise staying the case pending final decision on Defendants' motions to dismiss. (DE 83.)

D. Standards

Defendants' motions are brought pursuant to *Fed. R. Civ. P. 12(b)(1)* and *(b)(6)*.

1. *Rule 12(b)(1)*

"When subject matter jurisdiction is challenged under *Rule 12(b)(1)*, the plaintiff has the burden of proving jurisdiction in order to survive the motion." *Madison-Hughes v. Shalala, 80 F.3d 1121, 1130 (6th Cir. 1996)*. In reviewing a motion under *Rule 12(b)(1)*, the "court may consider evidence outside the pleadings to resolve factual disputes concerning jurisdiction, and both parties are free **[*11]** to supplement the record by affidavits." *Nichols v. Muskingum Coll., 318 F.3d 674, 677 (6th Cir. 2003)*. When faced with a challenge to subject matter jurisdiction, "a court must address that issue before all others." *Cain v. Redbox Automated Retail, LLC, 981 F.Supp.2d 674, 681 (E.D. Mich. 2013)* (collecting cases).

Motions under *Rule 12(b)(1)* fall into two categories: "facial attacks and factual attacks." *United States v. Ritchie, 15 F.3d 592, 598 (6th Cir. 1994)*. A facial attack challenges "the sufficiency of the pleading itself," and the "court must take the material allegations of the petition as true and construed in the light most favorable to the nonmoving party." *Id.* (citing *Scheuer v. Rhodes, 416 U.S. 232, 235-37, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974))*. A factual attack does not challenge the sufficiency of the allegations, but is a "challenge to the factual existence of subject matter jurisdiction," to which "no presumptive truthfulness applies to the factual allegations, and the court is free to weigh the evidence and satisfy itself as to the existence of its power to hear a case." *Id.* (internal citation omitted).

2. *Rule 12(b)(6)*

When deciding a motion to dismiss under *Rule 12(b)(6)*, the Court must "construe the complaint in the light most favorable to plaintiff and accept all allegations as true." *Keys v. Humana, Inc., 684 F.3d 605, 608 (6th Cir. 2012)*. "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (internal quotation omitted); **[*12]** *see also* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (concluding that a plausible claim need not contain "detailed factual allegations," but it must contain more than "labels and conclusions" or "a formulaic recitation of the elements of a cause of action"). Facial plausibility is established "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. "The plausibility of an inference depends on a host of considerations, including common sense and the strength of competing explanations for the defendant's conduct." *16630 Southfield Ltd., P'Ship v. Flagstar Bank, F.S.B., 727 F.3d 502, 503 (6th Cir. 2013)*.

3. *Pro Se* Pleadings

The Court holds *pro se* complaints to "less stringent standards than formal pleadings drafted by lawyers." *Haines v. Kerner, 404 U.S. 519, 520, 92 S. Ct. 594, 30 L. Ed. 2d 652 (1972)*. However, even in pleadings drafted by *pro se* parties, "'courts should not have to guess at the nature of the claim asserted.'" *Frengler v. Gen. Motors, 482 F. App'x 975, 976-77 (6th Cir. 2012)* (quoting *Wells v. Brown, 891 F.2d 591, 594 (6th Cir. 1989)*). Moreover, "courts may not rewrite a complaint to include claims that were never presented . . . nor may courts construct the Plaintiff's legal arguments for him. Neither may the Court 'conjure up unpled allegations[.]'" *Rogers v. Detroit Police Dep't, 595 F. Supp. 2d 757, 766 (E.D. Mich. 2009)* (Ludington, J., adopting report and recommendation of Binder, M.J.).[3]

E. Discussion

1. The purported claims of Plaintiffs Rush [*13] Holmes, Ferzell Archie and Americans for Reform should be dismissed without prejudice

Only Plaintiffs Smith and Kish signed the complaint in this action, as *pro se* litigants, in an attempt to bring this case on behalf of putative plaintiffs Ferzell Archie, Rush Holmes and an entity named "Americans for Reform" (hereinafter AFR) (DE 1 at 6, 25), as well as "other potential plaintiffs" and "those who may want to get involved in the suit." (DE 88 at 28-29.) Similarly, only Smith and Kish signed Plaintiffs' response to Defendants' motions to dismiss, again purportedly "on behalf of the plaintiffs," including Ferzell Archie, Rush Holmes and AFR. (DE 69 at 26, 28.) And, only Smith and Kish appeared at the March 15, 2018 motion hearing and status conference, although all named plaintiffs were required to appear in person, and Smith acknowledged in Court that both Archie and Holmes had notice of the hearing, were informed that they were ordered to appear, and indicated they were going to appear at the hearing; but they did not. (DE 88 at 6-7.)[4]

At the March 15, 2018 hearing, Smith and Kish independently confirmed that they are not licensed attorneys and that they are **[*14]** the only Plaintiffs who have signed the complaint (or any other pleading or document filed in this matter). (DE 88 at 6, 27-28.) Smith further explained at the hearing that AFR is not a corporation, partnership, limited partnership, professional corporation, limited liability company, or any other type of entity, and it does not have officers, directors or members, but instead described it as a "collection of individuals," an "activist group," a "discussion forum," "an idea," "a work in progress," and as a "collective idea," and acknowledged that he

---

[3] *See also, Evans v. Mercedes Benz Fin. Servs., LLC, No. 11-11450, 2011 U.S. Dist. LEXIS 79404, 2011 WL 2936198, at *2 (E.D. Mich. July 21, 2011)* (Cohn, J.) ("Even excusing plaintiff's failure to follow *Rules 8(a)(2)* and *10(b)*, a *pro se* plaintiff must comply with basic pleading requirements, including *Rule 12(b)(6)*.").

[4] Further, there have been significant issues with service on the putative Plaintiffs at the address(es) they have provided. The orders, notices, and certificates of service sent to putative Plaintiffs AFR, Archie and Holmes, and even Kish, have been repeatedly "returned as undeliverable." (*See, e.g.*, DEs 9-12, 22, 49, 50, 52, 54, 55, 59-62, 66, 73.) Smith explained at the status conference that the address listed on the docket for putative Plaintiffs AFR, Kish, Archie and Holmes was *his* "office address"—so that all mailing would go *through him*—but that these Plaintiffs did not reside at that address. (DE 88 at 10-12.) Plaintiffs Smith and Kish were then ordered by the Court to file a notice providing the correct: (1) addresses; (2) phone numbers; and (3) email addresses for putative Plaintiffs Ferzell Archie and Rush Holmes. (DE 83.) Plaintiff Smith initially filed a document titled "motion for change of address," seeking to change the address "for *all* plaintiffs[,]" yet again, to one address—19638 Fenelon Street, Detroit, MI 48234. (DE 82 (emphasis added).) The Court explained that this "motion" does not satisfy the Court's order, and Plaintiff Smith subsequently filed a document listing the requested contact information for himself, Kish, and Archie, and only a telephone number, but no mailing address, for Holmes. (DE 83 at 7; DE 87.)

owned/administered the website for AFR, americansforreform.org. (*Id.* at 15-19, 22-23.) As Smith further explained at the hearing:

> Americans for Reform was set up as an idea to bring people together. There is what I would call a work in progress. At some point in time, we would look to organize it as an entity to actually have enrolled members and move forward. At this point in time, it was just an idea to collectively bring people together to stand up for injustices anywhere and everywhere.

(*Id.* at 22-23.)

Parties in federal court "may plead and conduct their own cases personally or by counsel...." *28 U.S.C. § 1654*. The statute "does not permit plaintiffs to appear *pro se* where interests **[*15]** other than their own are at stake." *Shepherd v. Wellman, 313 F.3d 963, 970 (6th Cir. 2002)*. *Federal Rule of Civil Procedure 11* provides that "[e]very pleading . . . must be signed . . . by a party personally if the party is unrepresented." *Fed. R. Civ. P. 11(a)*; *see also* *Arnold v. Heyns, No. 13-CV-14137, 2014 U.S. Dist. LEXIS 173243, 2014 WL 7184546, at *5 (E.D. Mich. Dec. 16, 2014)* (warning the *pro se* plaintiffs that filing a pleading without each plaintiffs' personal signature "would be a violation of *Rule 11* and could result in sanctions, including monetary sanctions, an unfavorable ruling on the motion or pleading at issue, or even dismissal of their claims."). The reason for such prohibition is to "'protect[] the rights of those before the court' by preventing ill-equipped laypersons from squandering the rights of the party he purports to represent." *Zanecki v. Health All. Plan of Detroit, 576 F. App'x 594, 595 (6th Cir 2014)* (quoting *Myers v. Loudon Cnty. Pub. Sch., 418 F.3d 395, 400 (4th Cir. 2005))*. Further, "[i]t has been the law for the better part of two centuries ... that a corporation may appear in federal courts only through licensed counsel." *Rowland v. California Men's Colony, Unit II Men's Advisory Council, 506 U.S. 194, 202, 113 S. Ct. 716, 121 L. Ed. 2d 656 (1993)* (citations omitted); *see also* *United States v. 9.19 Acres of Land, More or Less, in Marquette Cty., Mich., 416 F.2d 1244, 1245 (6th Cir. 1969)* ("[A] corporation cannot appear otherwise than through an attorney."). This rationale applies not only to corporations, but to all artificial entities. *Rowland, 506 U.S. at 202* (all artificial entities, such as corporations, partnerships, *or associations*, may only appear in federal court through a licensed attorney); *see also* *T.C. Bible Inst. v. City of Westland, No. 04-60224, 2005 U.S. Dist. LEXIS 51290, 2005 WL 2417634, at *3 (E.D. Mich. Sept. 30, 2005)* ("It is well settled law that a non-natural **[*16]** person, i.e., an 'artificial entity,' may not appear in the courts of the United States other than through an attorney.").

Accordingly, it was improper for Plaintiffs Smith and Kish, without counsel, to bring this action on behalf of Archie, Holmes and AFR, or any other person or entity. As explained above, neither Archie nor Holmes have signed the complaint or any other pleading in this matter and neither individual appeared before the Court, and neither Archie, Holmes nor AFR are represented by counsel. Accordingly, Ferzell Archie, Rush Holmes and Americans for Reform should be dismissed without prejudice as parties to this litigation.

2. Plaintiffs have failed to demonstrate that they have standing to pursue their claims

All Defendants argue that Plaintiffs' complaint should be dismissed because they have failed to allege facts demonstrating their standing to bring any of their claims. (DE 43 at 25-27; DE 45 at 20-23.) Defendants state that there is no allegation of any injury to these Plaintiffs, much less an actual or concrete injury. Plaintiffs respond that they have standing because they "have suffered an injury that requires them to purchase a no-fault auto insurance policy from **[*17]** the defendants but the defendants failed to procure them with an alternative method to a fair, equitable, affordable and reasonable no-fault policy." (DE 69 at 5.)

The requirements for standing are derived from Article III of the United States Constitution, which limits the jurisdiction of federal courts to justiciable cases and controversies. *Hollingsworth v. Perry, 570 U.S. 693, 704, 133 S. Ct. 2652, 186 L. Ed. 2d 768 (2013)* (citing *U.S. Const. art. III, § 2*); *Simon v. E. Ky. Welfare Rights Org., 426 U.S. 26, 37, 96 S. Ct. 1917, 48 L. Ed. 2d 450 (1976)* ("No principle is more fundamental to the judiciary's proper role in our system of government than the constitutional limitation of federal-court jurisdiction to actual cases or controversies."). An essential feature of this requirement "is that any person invoking the power of a federal court must demonstrate standing to do so." *Hollingsworth, 570 U.S. at 704*. The doctrine of standing ensures that a federal court's exercise of power is not "gratuitous" or "inconsistent" with the limitations imposed by Article III. *See*

Simon, 426 U.S. at 38. "The presence of a disagreement, however sharp and acrimonious it may be, is insufficient by itself to meet Art. III's requirements." *Diamond v. Charles, 476 U.S. 54, 62, 106 S. Ct. 1697, 90 L. Ed. 2d 48 (1986)*. Plaintiffs bear the burden of establishing standing. *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*.

A plaintiff must satisfy three requirements to establish Article III standing: "The plaintiff must have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, **[*18]** and (3) that is likely to be redressed by a favorable judicial decision." *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)*. As this case is at the pleading stage, Plaintiffs "must clearly allege facts demonstrating each element." *Id.*

An injury in fact for purposes of Article III standing is defined as "an invasion of a legally protected interest" that is "concrete and particularized" and "actual or imminent, not conjectural or hypothetical." *Spokeo, 136 S. Ct. at 1548*. The particularization component is necessary to establish an injury in fact and requires that the plaintiff be affected "in a *personal* and *individual* way." *Id.* (emphasis added, collecting cases). The injury must also be concrete, i.e. "de facto," meaning that it actually exists. *Id.*

Plaintiffs broadly assert in their response brief that they "have standing to bring their constitutional claims in Federal District Court" because they "have suffered an injury that requires them to purchase a no-fault auto insurance policy from the defendants but the defendants failed to procure them with an alternative method to a fair, equitable, affordable and reasonable no-fault policy." (DE 69 at 5.)

Here, Plaintiffs' complaint does not clearly allege facts that Plaintiffs Smith and Kish suffered any particularized **[*19]** and concrete injuries as a result of the no-fault insurance policies offered by insurance companies, such that they were affected "in a personal and individual way." *See* *Spokeo, 136 S. Ct. at 1548*. There is no allegation in the complaint that Plaintiffs Smith and Kish are policy holders of nofault policies issued by the Defendants, that they were overcharged for any no-fault policies issued by the Defendants, or even that they are drivers in Michigan. Instead, as the Insurance Defendants state, "Plaintiffs merely plead a *philosophical* stance that insurance rates in Michigan," and in particular for Detroit residents, are too high. (DE 45 at 22.) But Plaintiffs Smith and Kish fail to allege facts that they themselves suffered any concrete injury as a result of the allegedly wrongful conduct in this case.

Plaintiffs' vague and generalized assertions of possible injuries are simply insufficient under *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 194 L. Ed. 2d 635 (2016)*, to meet their burden to demonstrate standing to bring this lawsuit. Defendants' motions to dismiss should be granted, and Plaintiffs' complaint should be dismissed in its entirety for lack of standing.

3. The Insurance Defendants are not "state actors" subject to constitutional claims

The Insurance Defendants also argue **[*20]** that, in addition to lacking standing, Plaintiffs' constitutional claims against them for alleged violations of due process and equal protection fail because the Insurance Defendants are not "state actors." (DE 45 at 23-25.)[5] Plaintiffs contend in response that the Insurance Defendants are state actors because they are "subjected to heavy state regulation to issue fair, equitable and affordable rates" and that there is "a sufficiently close nexus" between the State and the Insurance Defendants in setting rates that the actions of the Defendants may be treated as that of the State itself. (DE 69 at 12-15.)

A plaintiff alleging the violation of a right secured by the federal Constitution or laws must show that the deprivation was committed by a person acting under color of state law. *West v. Atkins, 487 U.S. 42, 48, 108 S. Ct. 2250, 101 L.*

---

[5] The Insurance Defendants and Director McPharlin also discuss a *Commerce Clause* claim in their motions. (DE 43 at 31; DE 45 at 9.) However, Plaintiffs' Complaint (DE 1 at Pg ID 1-7, 28-30) does not contain any allegation regarding the *Commerce Clause*. Allegations regarding the *Commerce Clause* only appeared in Plaintiffs' "civil action brief" attached to their complaint, which has been stricken. (DE 83 at 7.)

Ed. 2d 40 (1988). In order for a private party's conduct to be under color of state law, it must be "fairly attributable to the State." *Lugar v. Edmondson Oil Co., 457 U.S. 922, 937, 102 S. Ct. 2744, 73 L. Ed. 2d 482 (1982)*. There must be "a sufficiently close nexus between the State and the challenged action of [the defendant] so that the action of the latter may be fairly treated as that of the State itself." *Skelton v. Pri-Cor, Inc., 963 F.2d 100, 102 (6th Cir. 1991)* (citing *Jackson v. Metro. Edison Co., 419 U.S. 345, 351, 95 S. Ct. 449, 42 L. Ed. 2d 477 (1974))*.

The Insurance Defendants here are private insurance companies, and Plaintiffs allege no **[*21]** facts that would demonstrate that their conduct in offering no-fault insurance policies in the State of Michigan should be deemed to be state action. Plaintiffs contend that the State's regulation of the no-fault insurance providers renders them state actors, relying on *Shavers I , supra*, and *Jackson v. Metropolitan Edison Co., 419 U.S. 345, 349-51, 95 S. Ct. 449, 42 L. Ed. 2d 477 (1974)*. The constitutionality of the *Michigan No-Fault Act* was originally challenged in *Shavers I*, where the Court found that the mechanism for determining rates was constitutionally deficient, but could be cured through legislation or administrative rules defining when a rate is "excessive, inadequate or unfairly discriminatory." *Shavers I, 402 Mich. at 602-03*. The Michigan Legislature subsequently adopted the *Essential Insurance Act*, which, in turn, cured this deficiency and created the current regulatory scheme governing ratemaking for auto and home insurance. *MCL §§ 500.2101-.2138*. The Michigan Supreme Court then approved this legislative response in *Shavers v. Attorney General of Michigan, 412 Mich. 1105, 315 N.W.2d 130 (1982)* (*Shavers II*), noting that there were no further constitutional challenges pending.

Although the Michigan Supreme Court in *Shavers I* found the insurance companies in that case to be state actors under the Michigan and United States Constitutions because "insurance companies are the instruments through which the Legislature **[*22]** carries out a scheme of general welfare," *Shavers I, 402 Mich. at 597*, the United States Supreme Court has afterward "consistently held that '[t]he mere fact that a business is subject to state regulation does not by itself convert its action into that of the State for purposes of the *Fourteenth Amendment*.'" *American Mfrs. Mut. Ins. Co. v. Sullivan, 526 U.S. 40, 52, 119 S. Ct. 977, 143 L. Ed. 2d 130 (1999)* (quoting *Jackson, 419 U.S. at 350*); *see also* *Rendell-Baker v. Kohn, 457 U.S. 830, 102 S. Ct. 2764, 73 L. Ed. 2d 418, (1982)* (holding private school's personnel decisions not attributable to the state, despite "extensive regulation of the school generally"); *Blum v. Yaretsky, 457 U.S. 991, 102 S. Ct. 2777, 73 L. Ed. 2d 534 (1982)* (refusing to hold New York State responsible for nursing home's patient transfer decision, "although it is apparent that nursing homes in New York are extensively regulated"); *Adams v. Vandemark, 855 F.2d 312 (6th Cir. 1988)* (holding private not-for-profit corporation was not a state actor, even though subject to state and federal regulation). Further, in *Jackson v. Metropolitan Edison Co., 419 U.S. 345, 358, 95 S. Ct. 449, 42 L. Ed. 2d 477 (1974)*, upon which Plaintiffs expressly rely, the Supreme Court refused to find state action in the electric company's decision to terminate service, notwithstanding that it was "a heavily regulated utility with at least something of a governmentally protected monopoly," because that "is not sufficient to connect the State ... with respondent's action so as to make the latter's conduct attributable to the State for purposes of the *Fourteenth Amendment*." The Sixth Circuit has explained that **[*23]** "it is now well-established that state regulation, even when extensive, is not sufficient to justify a finding of a close nexus between the state and the regulated entity." *Lansing v. City of Memphis, 202 F.3d 821, 830 (6th Cir. 2000)* (citations omitted).

Thus, the Insurance Defendants "will not be held to constitutional standards unless 'there is a sufficiently close nexus between the State and the challenged action of the regulated entity so that the action of the latter may be fairly treated as that of the State itself.'" *Sullivan, 526 U.S. at 52* (quoting *Jackson, 419 U.S. at 350*). "Whether such a 'close nexus' exists ... depends on whether the State 'has exercised coercive power or has provided such significant encouragement, either overt or covert, that the choice must in law be deemed to be that of the State.'" *Id.* (citations omitted). Plaintiffs here have failed to make this showing. While the Insurance Defendants are regulated by the State, such regulation alone is not enough to turn them into state actors, and Plaintiffs have failed to plead or otherwise show that the Insurance Defendants' provision of no-fault insurance and setting of rates has been significantly encouraged or coerced by the State or that the Insurance Defendants' actions are ones traditionally reserved to the State **[*24]** such that their actions should be attributed to the State. As the Supreme Court explained in *Sullivan*, "[a]ction taken by private entities with the mere approval or acquiescence of the State is not state action." *Id.* (citations omitted).[6] The Insurance Defendants also cite to settled case law consistently holding that private insurers are not state actors, even though subject to state regulation. (DE 45 at 25-25, citing *State Farm Mut. Auto. Ins. Co. v. Physiomatrix, Inc., No. 12-11500, 2013 U.S. Dist. LEXIS 18501, 2013 WL 509284, at *20-21 (E.D. Mich. Feb. 12, 2013)* (dismissing federal civil rights claims, holding State Farm was not state actor because it adjudicated some claims assigned to it through Michigan's No Fault statutory mechanism); *Guinn v. Farmers Ins. Co., 563 F. App'x 653, 654-55 (10th Cir. 2014)* (dismissing constitutional claims against Farmers Insurance, holding it was not state actor simply because it provided auto insurance in a state requiring drivers to carry such insurance); *Williams v. Progressive Ins. Co., No. 4:16-CV-01214 JAR, 2017 U.S. Dist. LEXIS 44938, 2017 WL 1155894, at *2 (E.D. Mo. Mar. 28, 2017)* (dismissing constitutional claims because "it is well established that private insurers are not state actors for purposes of a *Section 1983* claim."); *Anderson v. State Farm Fire & Cas., 2010 U.S. Dist. LEXIS 25712, 2010 WL 1009740, at *3 (S.D. Ala. Feb. 19, 2010)* (dismissing *§ 1983* claims because, "[i]n general, private insurers . . . are not state actors and are not subject to suit under *§ 1983*.").) *See also* *Jackson v. IDS Prop. & Cas. Ins. Co., No. 1:14-cv-524, 2014 U.S. Dist. LEXIS 81375, 2014 WL 2711973 (W.D. Mich. June 16, 2014)* ("Plaintiff's complaint contains **[*25]** no allegation of facts that would remotely suggest that the defendant insurance company acted under color of state law when it denied her no-fault benefits."); *Hayes v. Allstate Ins. Co., 95 F.Supp.2d 832, 836 (W.D. Tenn. 2000)* ("It is clear that Allstate is not acting under color of state law, and that it cannot be considered a government actor merely because it does business in a heavily regulated industry.").

Because Plaintiffs' complaint fails to allege any facts which would justify treating the Insurance Defendants as state actors, all constitutional claims alleged against these defendants should be dismissed with prejudice.

4. Plaintiffs' constitutional claims against Director McPharlin are barred by sovereign immunity and/or qualified immunity

a. *Eleventh Amendment* immunity

Director McPharlin argues that Plaintiffs' claims against him in his official capacity are barred by the *Eleventh Amendment*. Plaintiffs do not address this argument in their response.

The *Eleventh Amendment* bars suits in federal court against state officers acting in their official capacity. *Will v. Mich. Dep't of State Police, 491 U.S. 58, 71, 109 S. Ct. 2304, 105 L. Ed. 2d 45 (1989)*. This is because a suit against a state employee in his official capacity is tantamount to a suit against the state itself and must be dismissed based on *Eleventh Amendment* immunity. *See* *U.S. ex rel. Diop v. Wayne Cty. Cmty. Coll. Dist., 242 F. Supp.2d 497, 515 (E.D. Mich. 2003)* (citing *Kentucky v. Graham, 473 U.S. 159, 165-66, 105 S. Ct. 3099, 87 L. Ed. 2d 114 (1985))*.

Initially, as Director McPharlin accurately states in his **[*26]** motion, he is not named anywhere in the Complaint except the caption, and there are no specific allegations levied against him. Accordingly Plaintiffs' complaint against Director McPharlin should be dismissed on this basis because "[w]here a complaint alleges no specific act or conduct on the part of the defendant and the complaint is silent as to the defendant except for his name appearing in the caption, the complaint is properly dismissed, even under the liberal construction to be given pro se complaints." *Potter v. Clark, 497 F.2d 1206, 1207 (7th Cir. 1974)* (citation omitted); *Webb v. Caruso, No. 1:06-cv-3, 2006 U.S. Dist. LEXIS 8658, 2006 WL 416261, at *4 (W.D. Mich. Feb. 22, 2006)* (same).

---

[6] Further, Plaintiffs offer no factual support for the contention raised in their response brief (but not in their complaint) that the Insurance Defendants' payment into the Michigan Catastrophic Claims Association (MCCA) constitutes state action. The MCCA is a nonprofit association of private insurers that, by statute, is required to assess premiums on its member insurers to fund its reimbursement obligations and operating expenses for claims which exceed a designated amount. *MCL § 500.3104(7)(d)*. The Michigan Supreme Court has recognized that the MCCA is not a state agency, *see* *League Gen. Ins. Co. v. Michigan Catastrophic Claims Ass'n, 435 Mich. 338, 458 N.W.2d 632, 638 (Mich. 1990)*, and Plaintiffs have failed to show how Defendants' payment into this fund renders them state actors.

To the extent Director McPharlin is arguably included as one of "the defendants," as stated in the complaint, and Plaintiffs seek to assert a claim against him solely because he is the Director of the DIFS, presumably in his role regulating the rates set by insurance companies, such claims would necessarily involve Director McPharlin acting within the scope of his duties and would be shielded by sovereign immunity. *See* Will, 491 U.S. at 71. Accordingly, Plaintiffs' claims against Director McPharlin — all of which would appear to be alleged against him in his official capacity (if any) — should be dismissed with prejudice.

b. Qualified immunity [*27]

Director McPharlin also argues that to the extent Plaintiffs' claims are asserted against him in his personal capacity, they are barred by qualified immunity. (DE 43 at 21-24.) Plaintiffs respond that the Director knowingly allowed non-party L.A. Insurance to have a monopoly on 7-day insurance policies, which "clearly violates the no-fault act statutory requirements," and thus he is not entitled to qualified immunity. (DE 69 at 17-18.)

"The doctrine of qualified immunity protects government officials from liability for civil damages insofar as their conduct does not violate clearly established statutory or constitutional rights of which a reasonable person would have known." Pearson v. Callahan, 555 U.S. 223, 231, 129 S. Ct. 808, 172 L. Ed. 2d 565 (2009) (internal citation and quotation omitted). The Court conducts a two-step analysis in assessing qualified immunity. First, the Court determines whether "the violation of a constitutional right has occurred" and second, whether the "constitutional right at issue was clearly established at the time of defendant's alleged misconduct." Grawey v. Drury, 567 F.3d 302, 309 (6th Cir. 2009). While the better approach in resolving cases in which qualified immunity is raised is to "determine first whether the plaintiff has alleged a deprivation of a constitutional right at **[*28]** all," before moving onto step two, this order of analysis is not mandatory. County of Sacramento v. Lewis, 523 U.S. 833, 842 n.5, 118 S. Ct. 1708, 140 L. Ed. 2d 1043 (1998); Pearson, 555 U.S. at 236 (holding that courts analyzing claims of qualified immunity are not required to first determine whether the facts shown by plaintiff demonstrate a constitutional violation before determining whether the right was clearly established). A constitutional violation is clearly established where there is "on-point, controlling authority or a 'robust consensus of cases of persuasive authority.'" Ortega v. U.S. Immigration & Customs Enforcement, 737 F.3d 435, 439 (6th Cir. 2013) (quoting Ashcroft v. al-Kidd, 563 U.S. 731, 131 S. Ct. 2074, 179 L. Ed. 2d 1149 (2011)).

Plaintiffs' complaint is devoid of any allegations that Director McPharlin violated their constitutional rights, and it should be dismissed on that basis. At best, the Complaint generally alleges "violation of federal rights of a protected class of citizens," who are seemingly no-fault insurance policy holders, but Plaintiffs fail to allege to which protected class they belong or provide any facts supporting their assertion that "the punishment for not having no-fault insurance violates due process of law." (*See* DE 1 at 6.) Further, Plaintiffs have failed to meet their burden to show that Director McPharlin violated a "clearly established right" when enforcing the No-Fault Insurance Act. As he **[*29]** states in his motion, he is following the Insurance Code, as required, and Plaintiffs have failed to show otherwise. Soon after the passage of the No-Fault Act, the Michigan Supreme Court issued an order determining that no-fault insurance is constitutional, *see* Shavers II, 412 Mich. at 1105 , and it has subsequently held that it is not unfairly discriminatory for insurers to base insurance rates on credit scores, age, income, territory, and other factors, provided the rating plan "'reflects reasonably anticipated reductions in losses and expenses' and is uniformly applied to all of the insurer's insureds." Insurance Inst. of Mich. v. Comm'r, Fin. & Ins. Servs., Dep't of Labor & Econ. Growth, 486 Mich. 370, 400-01, 785 N.W.2d 67 (2010).

Plaintiffs' unsupported assertion, raised for the first time in their response brief, that Director McPharlin somehow allows non-party L.A. Insurance to have a monopoly on a 7-day insurance policy, fails to defeat Director McPharlin's qualified immunity defense. Plaintiffs have not alleged that any other insurer has sought but been denied the ability to offer similar 7-day policies, or that L.A Insurance Company's 7-day policy is the only available alternative to no-fault insurance policy obtained through "ordinary methods," and fails to demonstrate how this violates a clearly established right.

Accordingly, **[*30]** Director McPharlin is protected by qualified immunity and Plaintiffs' claims against him in his personal capacity, if any, should be dismissed with prejudice.

5. Plaintiffs' antitrust claims should be dismissed

First, although not argued by the parties, the Court notes that the complaint fails to identify the "antitrust laws" Plaintiffs allege to have been violated, and thus fails to comply with *Fed. R. Civ. P. 8(a)(2)*, which requires a "short and plain statement of the claim showing that the pleader is entitled to relief[.]" Defendants nevertheless make a reasonable assumption and address this claim as an alleged violation of the Sherman Act, and in Plaintiffs' response brief, they also broadly refer to *Section 1 of the Sherman Act*. To the extent Plaintiffs assert a claim under that section, it fails for the reasons set forth below.

a. Plaintiffs' antitrust claims against Director McPharlin are barred by *Parker v. Brown*

Director McPharlin argues that Plaintiffs' vague allegations that he engaged in price fixing, price discrimination and monopolization in violation of the "Antitrust Act," in his role as Director of the Department of Insurance and Financial Services, should be dismissed because such claims against the **[*31]** State are barred by *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315* (1943.) Plaintiffs fail to specifically respond to these arguments, but instead contend that the State, through Director McPharlin, somehow allows L.A. Insurance to have a monopoly on 7-day insurance policies. (DE 69 at 18-20.)

The Sherman Act *Section 1* makes illegal "[e]very contract, combination ... or conspiracy in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. *Section 2* makes it illegal to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States." *15 U.S.C. § 2*. However, as the Supreme Court recognized in *Parker v. Brown, 317 U.S. 341, 351, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, "[t]he Sherman Act makes no mention of the state as such, and gives no hint that it was intended to restrain state action or official action directed by the state. The Act is applicable to 'persons' including corporations[.]" The "state action" doctrine described in *Parker* was explained further in *Hoover v. Ronwin, 466 U.S. 558, 567-69, 104 S. Ct. 1989, 80 L. Ed. 2d 590 (1984)*, where the Court explained that "[t]hus, under the Court's rationale in *Parker*, when a state legislature adopts legislation, its actions constitute those of the State, ... and *ipso facto* are exempt from the operation of the antitrust laws."

Because Director McPharlin is **[*32]** directed by the Michigan Legislature, through the Insurance Code, to regulate the business of insurance in Michigan, he is exempt from liability under the Sherman Act pursuant to *Parker. See Michigan Paytel Joint Venture v. City of Detroit, 287 F.3d 527, 534 (6th Cir. 2002)* (explaining that the Supreme Court held in *Parker* that states as sovereigns are exempt from antitrust liability under the Sherman Act). As cited by the Director, the Michigan Legislature has determined that "an insurer may use factors ... for insurance if the plan ... reflects reasonably anticipated reductions or increases in losses or expenses." *MCL 500.2110a*; *see also MCL 500.2403(1)(c)*; *MCL 500.2603(1)(c)* ("[R]ating plans may measure any differences among risks that may have a probable effect upon losses or expenses...."); *Insurance Inst. of Michigan, 486 Mich. at 400* (holding the Insurance Code allows insurers to consider credit scores when determining premium discounts). Accordingly, Plaintiffs' antitrust claims against Director McPharlin should be dismissed.

b. Plaintiffs' claims against the Insurance Defendants are pre-empted by the McCarran-Ferguson Act

The Insurance Defendants argue that the *McCarran-Ferguson Act, 15 U.S.C. § 1011 et seq.*, expressly bars a federal action against them under the antitrust statutes where the activity at issue is part of the "business of insurance" and does not constitute **[*33]** an act of boycott, coercion or intimidation. (DE 45 at 25-29, citing *15 U.S.C. § 1012(b)*). Defendants contend that because auto insurance is extensively regulated by the State of Michigan, and because setting auto insurance rates clearly constitutes the "business of insurance," the McCarran-

Ferguson Act bars Plaintiffs' federal antitrust claims. Plaintiffs respond that their antitrust claim is not a claim for Congress to regulate the business of insurance, but instead it suggests that the Insurance Defendants are attempting to monopolize 7-day nofault insurance policies and restraining competition. (DE 69 at 18-20.)

In *Group Life & Health Insurance Co. v. Royal Drug Co., 440 U.S. 205, 99 S. Ct. 1067, 59 L. Ed. 2d 261 (1979)*, the Supreme Court noted that in enacting the McCarran-Ferguson Act, "the primary concern of both representatives of the insurance industry and the Congress was that cooperative ratemaking efforts be exempt from the antitrust laws." *Id. at 221*. The Supreme Court has developed a three-part test for determining whether particular conduct constitutes the "business of insurance" within the meaning of McCarran-Ferguson:

1. whether the practice has the effect of transferring or spreading a policyholder's risk;

2. whether the practice is an integral part of the policy relationship between the insurer and **[*34]** the insured; and

3. whether the practice is limited to entities within the insurance industry.

Union Labor Life Ins. Co. v. Pireno, 458 U.S. 119, 129, 102 S. Ct. 3002, 73 L. Ed. 2d 647 (1982) (citing *Group Life & Health Ins. v. Royal Drug Co., 440 U.S. 205, 99 S. Ct. 1067, 59 L. Ed. 2d 261 (1979))*. Plaintiffs' contention in their complaint — that the use of "non-driving factors" to determine auto insurance rates and premiums violates federal law and causes excessive rates — thus easily satisfies these criteria. *See* *SEC v. National Sec., Inc., 393 U.S. 453, 460, 89 S. Ct. 564, 21 L. Ed. 2d 668 (1969)* ("Certainly the fixing of rates is part of [the business of insurance]."). As the Sixth Circuit has concluded, rate-making is a key part of insurance regulation and cooperative rate-making is therefore exempt from antitrust laws. *See* *Katz v. Fid. Nat'l Title Ins. Co., 685 F.3d 588, 593-94 (6th Cir. 2002)* ("Because title-insurance rate-setting spreads some risk, and is a foundational piece of the policy relationship between the insurer and the insured, and has no application outside the context of insurance, it is clearly part of the business of insurance, within the meaning of *Pireno*."). Other federal courts have similarly concluded that rate-setting for insurance constitutes the "business of insurance" for purposes of the McCarran-Ferguson Act. *See, e.g.,* *Slagle v. ITT Hartford, 102 F.3d 494, 498 (11th Cir. 1996)* ("conclud[ing] that appellees' alleged rate-fixing conduct is the 'business of insurance'"); *Royal Drug Co., 440 U.S. at 224, n.32* ("It is clear from the legislative history [of the McCarran-Ferguson Act] that the **[*35]** fixing of rates is the 'business of insurance.'"); *Ocean State Physicians Health Plan v. Blue Cross & Blue Shield, 883 F.2d 1101, 1108 (1st Cir. 1990)* (the marketing and pricing of insurance policies is the business of insurance).

Plaintiffs' allegation, raised for the first time in their response brief, that the State is attempting to monopolize the 7-day no-fault insurance policies and restraining competition by only granting non-party L.A. Insurance Company a license to issue a 7-day insurance policy, does not involve the Insurance Defendants and thus fails to assert a claim against them. But, in any event, such a claim would also be barred by the McCarran-Ferguson Act. *See* *SEC v. National Sec., Inc., 393 U.S. 453, 460, 89 S. Ct. 564, 21 L. Ed. 2d 668 (1969)* (noting "[t]he selling and advertising of policies" are part of the "business of insurance" under the McCarran-Ferguson Act); *Ocean State Physicians, 883 F.2d at 1108* ("The exemption offered to state-regulated insurance activities by the McCarran-Ferguson Act would be thin indeed if it were deemed to cover the content of policies, but not the marketing and pricing activities which necessarily accompany these policies.").

"In short, the McCarran-Ferguson act, which restores to the states the exclusive power to regulate the insurance industry except where Congress specifically acts to supplant that authority, bars the Plaintiffs from challenging the **[*36]** alleged conduct as a violation of the federal antitrust laws." *Bristol Hotel Mgmt. Corp. v. Aetna Cas. & Sur. Co., 20 F.Supp.2d 1345, 1349 (S.D. Fla. 1998)*. Accordingly, Plaintiffs' antitrust claims against the Insurance Defendants should be dismissed.

c. Plaintiffs' complaint fails to state a claim for violation of the Sherman Act

The Insurance Defendants also argue that Plaintiffs' complaint fails to state the basic elements of an antitrust violation, because they have not alleged an injury, and have not pleaded facts sufficient to show an agreement between the Insurance Defendants or any kind of monopoly. (DE 45 at 29-32.) Plaintiffs suggest that "discovery will reveal evidence of an agreement with the director and the defendants to place restraints on commerce by monopolizing a 7-day price-fixing no-fault insurance scheme marketed to motorist [sic] without any competition in the market place who are unable to secure no-fault insurance through ordinary methods." (DE 69 at 18.)

In order to state a cause of action under *Section 1* of the Sherman Act, "the plaintiff must establish that the defendants contracted, combined or conspired among each other, that the combination or conspiracy produced adverse, anticompetitive effects within relevant product and geographic markets, that the objects **[*37]** of and conduct pursuant to that contract or conspiracy were illegal and that the plaintiff was injured as a proximate result...." *Crane & Shovel Sales Corp. v. Bucyrus-Erie Co., 854 F.2d 802, 805 (6th Cir. 1988)*; *see also* *White and White, Inc. v. American Hosp. Supply Corp., 723 F.2d 495, 504 (6th Cir. 1983)* (explaining that the essential elements of a violation of *Section 1* of the Sherman Act are: (1) a contract, combination or conspiracy; (2) affecting interstate commerce; (3) which imposes an "unreasonable" restraint of trade). *Section 2* of the Sherman Act has two elements: "(1) possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *Re/Max Intern. Inc. v. Realty One, Inc., 173 F.3d 995, 1016 (6th Cir. 1999)*. Monopoly power is "'the power to control prices or exclude competition,'" which may ordinarily "be inferred from the predominant share of the market." *Grinnell, 384 U.S. at 571* (noting that cases in which the Court previously found monopoly power involved defendants possessing over two-thirds, 80%, or 90% of the relevant market).

Plaintiffs' complaint lacks any allegations of a contract, combination or conspiracy, or any other agreement among and between the Defendants within the meaning of *Section 1* of the Sherman Act, which resulted in an unreasonable restraint on trade. Plaintiffs **[*38]** only broadly and conclusorily claim that "[t]he defendants['] actions to fix no-fault auto insurance rates using price fixing restraints, price discrimination and monopolization violates [the] antitrust act." (DE 1 at 5.) However, Plaintiffs assert no allegations identifying which of the Defendants allegedly conspired, how they did so, or any other facts in support of an agreement violative of the Sherman Act. The Supreme Court has made it clear that "an allegation of parallel conduct and a bare assertion of conspiracy will not suffice." *See* *Twombly, 550 U.S. at 556* ("Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement."). There can be no liability under *Section 1* of the Sherman Act in the absence of a conspiracy, agreement, or other concerted action by separate entities to restrain trade. *See* *Total Benefits Planning Agency Inc. v. Anthem Blue Cross & Blue Shield, 630 F.Supp.2d 842, 851 (S.D. Ohio 2007)* (finding plaintiffs' allegations that "the Anthem Defendants and the other Defendants had agreement and common understanding regarding price to be charged" insufficient to survive a motion to dismiss). In addition, the allegations asserted **[*39]** for the first time in Plaintiffs' response brief, regarding non-party L.A. Insurance and 7-day insurance policies, fails to state a claim for Sherman Act violations by the Insurance Defendants.

Further absent from the complaint are facts or allegations sufficient to support a claim under *Section 2* of the Sherman Act, to the extent Plaintiffs seek to assert one. Other than the conclusory use of the term "monopolization," Plaintiffs have not alleged any facts showing a predominant market share by any of the defendants, fail to define the relevant market adequately, and thus have failed to state a claim under *Section 2* of the Sherman Act. *See* *Grinnell, 384 U.S. at 571*.

Both the United States Supreme Court and the Sixth Circuit have stressed the importance of insisting on specificity in antitrust pleadings to avoid exposing defendants to potentially massive factual discovery costs. *See* *Twombly, 550 U.S. at 558* ("[I]t is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive"); *Foundation for Interior Design Educ. Research v. Savannah Coll. of Art & Design, 244 F.3d 521, 530 (6th Cir. 2001)* ("While the pleading standard under the federal rules is very liberal ... 'the price of entry [into the federal courts on a private antitrust claim], even to discovery, **[*40]** is for the plaintiff to allege a factual predicate concrete enough to warrant further proceedings, which may be costly and burdensome.'") (quoting *DM Research, Inc. v. Coll. of Am. Pathologists, 170 F.3d 53, 55*

(1st Cir. 1999)). Plaintiffs' allegations in their complaint are wholly insufficient to plead a claim for a Sherman Act violation and that claim should be dismissed.[7]

6. Defendant Progressive Casualty should be dismissed

Defendant Progressive Casualty filed a separate motion to dismiss in which it asserts that Plaintiffs' claims against it fail for a separate reason: it has not written personal automobile insurance policies in Michigan in at least fifteen years and thus cannot be liable for the allegations in Plaintiffs' complaint. (DE 46.) Plaintiffs wholly failed to respond to this motion in their response brief.

The Court takes judicial notice of Michigan's DIFS publication of "Companies that are Licensed and Filed to Insure Personal Automobiles and/or Miscellaneous Vehicles in Michigan 4-17-18," http://www.michigan.gov/documents/cis_ofis_apa_list_25522_7.pdf, and notes that Progressive Casualty is not identified as a company licensed to write personal automobile insurance in Michigan. *See* *Fed. R. Evid. 201(b)(2)* (court may take judicial notice of facts that "can be accurately **[*41]** and readily determined from sources whose accuracy cannot reasonably be questioned"); *New England Health Care Employees Pension Fund v. Ernst & Young, LLP, 336 F.3d 495, 501 (6th Cir. 2003)* ("A court that is ruling on a *Rule 12(b)(6)* motion may consider materials in addition to the complaint if such materials are public records or are otherwise appropriate for the taking of judicial notice."); *Hebshi v. United States, 12 F.Supp.3d 1036, 1043 (E.D. Mich. 2014)* ("In ruling on a motion to dismiss, the Court may consider the complaint as well as (1) documents that are referenced in the plaintiff's complaint or that are central to plaintiff's claims, (2) matters of which a court may take judicial notice, and (3) documents that are a matter of public record."); *Overall v. Ascension, 23 F.Supp.3d 816, 824-25 (E.D. Mich. 2014)* ("The Court may take judicial notice of public documents and government documents because their sources 'cannot reasonably be questioned.'"). Because Plaintiffs' complaint challenges Michigan no-fault automobile insurance policies, and Defendant Progressive Casualty's unopposed motion states that Progressive Casualty has not been involved in writing personal automobile insurance policies in Michigan for at least fifteen years, Plaintiffs' claims against Progressive Casualty fail, and their claims against Progressive Casualty should be dismissed for this reason as well.

F. Conclusion

For the reasons set forth above, **[*42]** the Court should grant Defendants' respective motions to dismiss (DEs 43, 45, 46) and **DISMISS** putative Plaintiffs Ferzell Archie, Rush Holmes and Americans for Reform **without prejudice**, and **DISMISS** Plaintiffs Ray Smith's and Barret Kish's claims in this matter **with prejudice**.

III. PROCEDURE ON OBJECTIONS

The parties to this action may object to and seek review of this Report and Recommendation, but are required to file any objections within 14 days of service, as provided for in *Federal Rule of Civil Procedure 72(b)(2)* and *Local Rule 72.1(d)*. Failure to file specific objections constitutes a waiver of any further right of appeal. *Thomas v. Arn, 474 U.S. 140, 106 S. Ct. 466, 88 L. Ed. 2d 435 (1985)*; *Howard v. Secretary of HHS, 932 F.2d 505 (6th Cir. 1981)*. Filing objections that raise some issues but fail to raise others with specificity will not preserve all the objections a party might have to this Report and Recommendation. *Willis v. Sullivan, 931 F.2d 390, 401 (6th Cir. 1991)*; *Smith v.*

---

[7] The Insurance Defendants also present compelling arguments that Plaintiffs' antitrust claims are barred by the filed-rate doctrine and should be dismissed for failure to exhaust available administrative remedies. (DE 45 at 25-29, 32-36.) However, because I conclude that Plaintiffs have failed to demonstrate they have standing to pursue their claims, their antitrust claims are barred by the McCarran-Ferguson Act, and that their complaint fails to state an antitrust claim, the Court need not address these additional arguments.

Detroit Federation of Teachers, Local 231, etc., 829 F.2d 1370, 1373 (6th Cir. 1987). Pursuant to *Local Rule 72.1(d)(2)*, any objections must be served on this Magistrate Judge.

Any objections must be labeled as "Objection No. 1," and "Objection No. 2," *etc.* Any objection must recite precisely the provision of this Report and Recommendation to which it pertains. Not later than 14 days after service of an objection, the opposing party may file a concise response proportionate to the objections in length and complexity. *Fed. R. Civ. P. 72(b)(2)*; E.D. Mich *LR 72.1(d)*. The response **[*43]** must specifically address each issue raised in the objections, in the same order, and labeled as "Response to Objection No. 1," "Response to Objection No. 2," *etc.* If the Court determines that any objections are without merit, it may rule without awaiting the response.

Dated: May 11, 2018

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* challenges the viability of a complaint by arguing that it fails to state a claim upon which relief may be granted. Under *Fed. R. Civ. P. 8(a)(2)*, a complaint must include a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)(2)*. To survive a

Rule 12(b)(6) challenge, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Courts accept all well-pleaded facts as true and draw reasonable inferences in the plaintiff's favor. After excising the allegations not entitled to the presumption of truth, courts determine whether the remaining factual allegations plausibly suggest an entitlement to relief.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Motion Practice > Opposing Memoranda

HN2[] Motions to Dismiss, Failure to State Claim

In addition to well-pleaded facts, a court ruling on a motion to dismiss can rely on the complaint itself, documents attached to the complaint, documents that are critical to the complaint and referred to in it, and information that is subject to proper judicial notice. Further, although a complaint may not be amended by the briefs in opposition to a motion to dismiss, courts may consider additional facts set forth in a brief opposing dismissal so long as those facts are consistent with the pleadings. Materials or elaborations in appellants' brief opposing dismissal may be considered, so long as those materials or elaborations are consistent with the pleadings. A court may consider additional facts set forth in the plaintiff's brief opposing dismissal, so long as those additional facts are consistent with the pleadings. To the extent that an exhibit attached to or referenced by the complaint contradicts the complaint's allegations, the exhibit takes precedence.

Antitrust & Trade Law > Sherman Act > Defenses

HN3[] Sherman Act, Defenses

A plaintiff's wrongdoing is not a defense to an antitrust suit. The in pari delicto doctrine, a common-law defense that curbs or bars recovery where the claimant is also at fault for his or her injury, is not to be recognized as a defense to an antitrust action. Proof of the plaintiff's unrelated unlawful conduct is not a valid in pari delicto defense to an antitrust charge. The common-law form of the in pari delicto defense is not available to defendants in antitrust lawsuits.

Antitrust & Trade Law > Sherman Act > Defenses

HN4[] Sherman Act, Defenses

A wrongful act committed against one who violates the antitrust laws must not become a shield in the violator's hands against operation of the antitrust laws. This is particularly true when the defendant has other remedies available to him or her.

Antitrust & Trade Law > Sherman Act > Scope

HN5[] Antitrust & Trade Law, Sherman Act

Section 1 of the Sherman Act declares illegal every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States. 15 U.S.C.S. § 1.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Types of Evidence > Circumstantial Evidence

HN6[] Sherman Act, Claims

To state a Section 1 of the Sherman Act, 15 U.S.C.S. § 1, claim, a plaintiff must plead facts plausibly suggesting: (1) a contract, combination, or conspiracy (meaning, an agreement), (2) a resulting unreasonable restraint of trade in a relevant market, and (3) an accompanying injury. Plausibly pleading the first element, an agreement, requires enough factual matter (taken as true) to suggest that an agreement was made, that is, enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement. Plaintiffs can do this in one of two ways, by pleading either direct or circumstantial evidence of an illegal agreement. Direct evidence of an agreement is explicit and requires no inferences to establish the proposition or conclusion being asserted. Simply, direct evidence constitutes a "smoking gun." Circumstantial evidence, in contrast, is facts from which the existence of such an agreement can be inferred. Mere allegations of "parallel conduct," without more, do not tend to exclude the possibility of independent action, and are therefore insufficient.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN7[] Sherman Act, Claims

The second element of a Section 1 of the Sherman Act, 15 U.S.C.S. § 1, claim, an unreasonable restraint, hinges on whether the alleged violation is per se unreasonable or is, instead, subject to the rule of reason. Per se violations, those with which courts have "considerable experience" and inevitably result in a finding of anticompetitive effect, are presumed to be unreasonable restraints on trade. An unreasonable restrain is conclusively presumed once the first element is proved in per se cases. Rule-of-reason violations, however, require that a plaintiff plead "anticompetitive effects," and that the injury complained of be of a type that the antitrust laws were designed to guard against, and further that the antitrust violation be the direct cause of the plaintiff's injury. Rule of reason ultimately requires the factfinder to weigh all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. The rule-of-reason inquiry requires, at the motion to dismiss stage, that the plaintiff identify the relevant market affected by the challenged conduct and allege an actual adverse effect on competition in the identified market.

Antitrust & Trade Law > Sherman Act > Claims

HN8[] Sherman Act, Claims

Alleging the third element of a Section 1 of the Sherman Act, 15 U.S.C.S. § 1, claim, antitrust injury, requires pleading an injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Types of Evidence > Circumstantial Evidence

HN9[] **Conspiracy to Monopolize, Elements**

Admissions by employees of the conspirators are textbook examples of adequate direct-evidence allegations. An admission by an insider constitutes direct evidence of agreement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN10[] **Per Se Rule & Rule of Reason, Per Se Violations**

Joint efforts by a firm or firms to disadvantage competitors by either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle merit per se treatment.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN11[] **Motions to Dismiss, Failure to State Claim**

A court ruling on a motion may not properly dismiss a complaint that states a plausible version of the events merely because the court finds a different version more plausible. Instead, the court abdicates probability weighing, assumes that all the well-pleaded allegations in the complaint are true (even if doubtful in fact), and decides whether the totality of those allegations "suggest that an agreement was made.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

HN12[] **Sherman Act, Claims**

A plaintiff must present evidence showing that defendants had a rational economic motive to conspire and evidence that tends to exclude the possibility of independent conduct to survive summary judgment. However, the bars are not set at the pleading stage. Courts must be careful not to import the summary-judgment standard into the motion-to-dismiss stage. Although articulation of the pleading standard for *Section 1* of the Sherman Act, *15 U.S.C.S. § 1*, cases draws from summary judgment jurisprudence, the standards applicable to *Fed. R. Civ. P. 12(b)(6)* and *56* motions remain distinct.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints

HN13[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

A competitor cannot recover for a conspiracy to impose nonprice restraints that have the effect of either raising market price or limiting output. Such restrictions, though harmful to competition, actually benefit competitors by making supracompetitive pricing more attractive.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN14[] **Price Fixing & Restraints of Trade, Horizontal Market Allocation**

When a horizontal merger, price fixing, market division, or similar collaboration among competitors substantially reduces competition, consumers suffer while existing rivals benefit.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN15[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

An exclusive dealing contract obliges a firm to obtain its inputs from a single source. The objection to exclusive-dealing agreements is that they deny outlets to a competitor during the term of the agreement. Courts, however, often approve of exclusive dealing because of its "procompetitive benefits." These benefits include increasing allocative efficiency, reducing adverse selection and moral hazard barriers to deals, and preventing free-riding. Because of those recognized procompetitive effects, exclusive dealing must be analyzed under the Rule of Reason. Under that standard, exclusive dealing arrangements violate antitrust laws only when they foreclose competition in a substantial share of the line of commerce at issue. The plaintiff must prove that the arrangement is likely to keep at least one significant competitor of the defendant from doing business in a relevant market, and he or she must prove that the probable (not certain) effect of the exclusion will be to raise prices above and therefore reduce output below.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN16[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

Courts "routinely rely" on Section 3 of the Clayton Act cases in assessing exclusive dealing under *Section 1* of the Sherman Act, *15 U.S.C.S. § 15*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN17[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

When a purchaser requires only a single product, it makes no sense to label as an exclusive dealing agreement the decision to purchase that product from one supplier rather than another.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN18[] **Motions to Dismiss, Failure to State Claim**

When presented with a motion to dismiss, the non-moving party must proffer some legal basis to support his or her cause of action. It is not the court's role to make the parties' arguments for them.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN19[] **Sherman Act, Claims**

The question of whether the alleged exclusive dealing arrangements foreclosed a substantial share of the line of commerce is a merits question not proper for the pleading stage.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN20[] **Market Definition, Relevant Market**

Courts should dismiss antitrust claims based on a market argument only when it is certain that the alleged relevant market clearly does not encompass all interchangeable substitute products.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN21[] **Reviewability of Lower Court Decisions, Preservation for Review**

Perfunctory and undeveloped legal arguments are waived, as are arguments unsupported by legal authority.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN22[] **Tying Arrangements, Sherman Act Violations**

A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. Such an arrangement also violates *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, if the seller has appreciable economic power in the tying product market and if the arrangement affects a substantial volume of commerce in the tied market. Tying can violate *Section 1* when the seller has 'market power' in the market for the tying product. The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN23[] **Tying Arrangements, Sherman Act Violations**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, also forbids "negative" ties. Although courts rarely encounter such claims, a negative tie occurs when the customer promises not to take the tied product from the defendant's competitor. Negative ties are arrangements conditioning the sale of one product on an agreement not to purchase a second product from competing suppliers. Although "rarely encountered," a tying arrangement is fully satisfied when the defendant's customer promises not to take the tied product from the defendant's rival.

Antitrust & Trade Law > Sherman Act > Scope

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

HN24[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act is aimed at substance rather than form. Formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***. The court has preferred to resolve antitrust claims on a case-by-case basis, focusing on the particular facts disclosed by the record. ***Antitrust law*** consistently prioritizes substance over form. When it comes to tying, ***antitrust law***'s substantive and "core concern" is that the practice prevents goods from competing directly for consumer choice on their merits. In other words, tying presents a risk of anticompetitive "leverage," the "special ability" of a supplier with market power to force a purchaser to do something that he would not do in a competitive market.

Antitrust & Trade Law > Sherman Act > Claims

HN25[] **Sherman Act, Claims**

To plead such a claim under Section 2 of the Sherman Act for monopolization, a plaintiff must allege (1) that the defendant "possessed monopoly power" in an antitrust market, and (2) that the defendant willfully acquired or maintained that power by means other than the quality of its product, its business acumen, or historical accident.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN26[] **Market Definition, Relevant Market**

In rare circumstances, a single brand of a product or service can constitute a relevant market for antitrust purposes.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN27[] **Market Definition, Relevant Market**

In a market for complex durable goods, customers may face significant information and switching costs in attempting to change equipment manufacturers, and "lifecycle pricing" is difficult for consumers to calculate when initially purchasing equipment.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN28[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Firms with market power cannot deal in complimentary products in ways that take advantage of customers' sunken costs by moving to claim all of the repair work for itself.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN29[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The law permits an antitrust claimant to restrict the relevant market to a single brand of the product at issue, but the law prohibits an antitrust claimant from resting on market power that arises solely from contractual rights that consumers knowingly and voluntarily gave to the defendant.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN30[] **Actual Monopolization, Anticompetitive & Predatory Practices**

An "aftermarket policy change" is not the sine qua non of a claim. Rather, there are more general concerns about customers that unknowingly and involuntarily sign on for the defendant's aftermarket power. Included in that group are those unable to undertake lifecycle-cost analyses (at least at some, reasonable level) before purchasing the primary product because the requisite information is difficult, some of it impossible, to acquire at the time of purchase. Competition among manufacturers fully protects buyers who accurately calculate life-cycle costs, but where customers cannot do so, a supplier-defendant can charge supracompetitive prices in the aftermarket.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN31[] **Market Definition, Relevant Market**

Market imperfections can keep economic theories about how consumers will act from mirroring reality.

Antitrust & Trade Law > Sherman Act > Scope

HN32[] **Antitrust & Trade Law, Sherman Act**

Where a defendant has engaged in unlawful restraint of trade that would independently violate *Section 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, it also violates Section 2 if it acquires or maintains a monopoly by means of that restraint of trade.

Antitrust & Trade Law > Sherman Act > Remedies

HN33[] **Sherman Act, Remedies**

In no event will there be an enforced duty to deal. If the alleged agreement violates the Sherman Act, the proper remedy is to set the offending agreement aside. If the alleged ties (if later pleaded plausibly) do the same, the proper remedy would be to enjoin the tie.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Forum & Place

HN34[] Choice of Law, Forum & Place

In an MDL, a court must apply the choice-of-law rules of the transferor forum.

Torts > ... > Contracts > Intentional Interference > Elements

HN35[] Intentional Interference, Elements

Under Wisconsin law, tortious interference with contractual relations has five elements: (1) the plaintiff had a contract or prospective contractual relationship with a third party, (2) the defendant interfered with the relationship, (3) the interference was intentional, (4) a causal connection exists between the interference and the damages, and (5) the defendant was not justified or privileged to interfere.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Torts > ... > Contracts > Intentional Interference > Defenses

HN36[] Motions to Dismiss, Failure to State Claim

A party may be justified or privileged to interfere if it is asserting "in good faith a legally protected interest. That exception does not extend to otherwise illegal acts. Conduct specifically in violation of statutory provisions or contrary to established public policy may for that reason make an inference that the defendant acted without inappropriate motive improper. This may be true, for example, of conduct that is in violation of antitrust provisions or is in restraint of trade. The issue is a factual one inappropriate for resolution on a motion to dismiss.

Judges: Hon. Amy J. St. Eve, United States District Judge.

Opinion by: AMY J. ST. EVE

Opinion

[*937] **MEMORANDUM [**9] OPINION AND ORDER**

AMY J. ST. EVE, District Court Judge:

Plaintiff Authenticom, Inc., a data-integration firm, sued Defendants CDK Global, LLC and The Reynolds and Reynolds Company, the premier purveyors of dealer management systems, for violating *Sections 1* and *2 of the Sherman Act* and committing tortious interference. Both Defendants filed respective motions to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. (R. 53, R. 56.) For the reasons explained below, the Court grants in part and denies in part Defendants' motions.

PROCEDURAL HISTORY

Authenticom filed this lawsuit on May 1, 2017, in the Western District of Wisconsin. With its Complaint, Authenticom filed an emergency motion for a preliminary injunction. The motion sought to enjoin Defendants' allegedly anticompetitive practices which, as explained below, allegedly prevented Authenticom from accessing Defendants' respective dealer management systems ("DMS"), a necessary part of Authenticom's data-integration business. Authenticom claimed that those practices effectively excluded it from the market and, as a result, were "on the verge of putting [it] out of business." (Case No. 18-cv-868, R. 5.) Over the next three months, the parties submitted voluminous exhibits and **[**10]** declarations, and the district court held a two-and-a-half-day hearing in early July 2017.

On July 14, 2017, the district court granted Authenticom's motion for a preliminary injunction. It ruled that Authenticom had demonstrated a "moderate" likelihood of success on its *Section 1* claims (it did not address the *Section 2* claims), and that Authenticom had no adequate remedy at law as evidence suggested Defendants' conduct could force it to shutter its business. *See* *Authenticom, Inc. v. CDK Glob., LLC, No. 17-CV-318-JDP, 2017 U.S. Dist. LEXIS 109409, 2017 WL 3017048 (W.D. Wis. July 14, 2017)*, *vacated*, *874 F.3d 1019 (7th Cir. 2017)*. Weighing the harms, the court granted Authenticom's motion, and after some further briefing, entered a preliminary injunction against each Defendant on July 28, 2017. *See also* *Authenticom, Inc. v. CDK Glob., LLC, No. 17-CV-318-JDP, 2017 U.S. Dist. LEXIS 185566, 2017 WL 3206943 (W.D. Wis. July 28, 2017)*, *vacated*, *874 F.3d 1019 (7th Cir. 2017)*. Those preliminary injunctions forced, among other things, Defendants to allow Authenticom access to their DMSs.

Defendants appealed, and the Seventh Circuit vacated the preliminary injunctions and remanded the case. The Seventh Circuit held that whatever the merits of Authenticom's *Section 1* claims, the injunctions' forced sharing of Defendants' DMSs ran afoul of the bedrock principle that firms generally have no duty to deal with competitors. *Authenticom, Inc. v. CDK Glob., LLC, 874 F.3d 1019, 1021 (7th Cir. 2017)* (citing **[**11]** *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, *Pacific Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009))*. It reasoned that "[t]he proper remedy for a *section 1* violation based on an agreement to restrain trade is to set the offending agreement aside," not force the alleged violators to deal with the complainant. *Id. at 1026*. The Seventh Circuit, however, "urge[d]" the district court to do what it could to expedite resolution of the matter based on Authenticom's representations of financial distress. *Id. at 1021*.

By the time the Seventh Circuit issued its decision, software vendors and automobile dealers had filed a handful of potential **[*938]** tag-along lawsuits across the country against Defendants. The day after the Seventh Circuit's decision, Defendants filed a motion for transfer and consolidation of those cases (and ones later filed) with the Judicial Panel on Multidistrict Litigation ("JPML"). The JPML granted that motion and transferred the cases to this Court for consolidated pretrial proceedings. (R. 1.) Meanwhile, the district court presiding over *Authenticom* had granted Defendants' motion for a partial stay of discovery given the pending MDL.

In the midst of the preliminary-injunction and appellate proceedings, the parties briefed Defendants' *Rule 12(b)(6)* motions to dismiss. Those motions are now before **[**12]** the Court.

LEGAL STANDARDS

I. Rule 12(b)(6) and the Plausibility Standard

HN1[] "A motion to dismiss pursuant to Federal Rule of Civil Procedure 12(b)(6) challenges the viability of a complaint by arguing that it fails to state a claim upon which relief may be granted." Camasta v. Jos. A. Bank Clothiers, Inc., 761 F.3d 732, 736 (7th Cir. 2014); *see also* Hill v. Serv. Emp. Int'l Union, 850 F.3d 861, 863 (7th Cir. 2017). Under Rule 8(a)(2), a complaint must include "a short and plain statement of the claim showing that the pleader is entitled to relief." Fed. R. Civ. P. 8(a)(2). To survive a Rule 12(b)(6) challenge, a "complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quoting Bell Atlantic v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Mann v. Vogel, 707 F.3d 872, 877 (7th Cir. 2013). Courts, of course, accept all well-pleaded facts as true and draw reasonable inferences in the plaintiff's favor. *See, e.g.,* Forgue v. City of Chicago, 873 F.3d 962, 966 (7th Cir. 2017). After "excising the allegations not entitled to the presumption" of truth, courts "determine whether the remaining factual allegations plausibly suggest an entitlement to relief." McCauley v. City of Chicago, 671 F.3d 611, 616 (7th Cir. 2011).

II. The Materials Upon Which the Court Relies on a Rule 12(b)(6) Motion

HN2[] In addition to well-pleaded facts, "a court ruling on a motion to dismiss can rely on the complaint itself, documents attached **[**13]** to the complaint, documents that are critical to the complaint and referred to in it, and information that is subject to proper judicial notice." Olson v. Bemis Co., 800 F.3d 296, 305 (7th Cir. 2015); *see also, e.g.,* Geinosky v. City of Chicago, 675 F.3d 743, 745 n. 1 (7th Cir. 2012). Further, although a "complaint may not be amended by the briefs in opposition to a motion to dismiss," Agnew v. Nat'l Collegiate Athletic Ass'n, 683 F.3d 328, 348 (7th Cir. 2012), courts may "consider additional facts set forth in" a brief opposing dismissal "so long as those facts are consistent with the pleadings," Phillips v. Prudential Ins. Co. of Am., 714 F.3d 1017, 1019-20 (7th Cir. 2013) (quoting Geinosky, 675 F.3d at 745 n. 1); *see also, e.g.,* Jones v. Sparta Cmty. Hosp., 716 F. App'x 547 (7th Cir. 2018) ("because [plaintiff-appellant] now elaborates on the factual allegations in his amended complaint, and his elaborations are consistent with the pleadings, we consider that information in our review"); Heng v. Heavner, Beyers & Mihlar, LLC, 849 F.3d 348, 354 (7th Cir. 2017) ("Materials **[*939]** or elaborations in appellants' brief opposing dismissal may be considered, so long as those materials or elaborations are consistent with the pleadings."); Martin v. Cook Cnty., Ill., No. 17 C 2330, 2018 U.S. Dist. LEXIS 69360, 2018 WL 1942654, at *1 (N.D. Ill. Apr. 25, 2018) (a court may consider "additional facts set forth in [plaintiff's] brief opposing dismissal, so long as those additional facts are consistent with the pleadings."). "To the extent that an exhibit attached to or referenced by the complaint contradicts the complaint's allegations, the exhibit takes precedence." Phillips, 714 F.3d at 1020.

BACKGROUND

I. DMSs, Data Integration, and Auto Dealers

This case concerns the **[**14]** data services and businesses upon which auto dealers rely in conducting their operations.[1] Two purported markets in that space are of principal relevance here: the DMS market and the data-integration market.

---

[1] In its opposition, Authenticom cites many facts adduced by the parties at the preliminary-injunction hearing. The Court generally finds that those facts do not add anything material to the Complaint, but credits them *only* to the extent that they are relevant and actually consistent with the Complaint's allegations. *See* Phillips, 714 F.3d at 1020; *see also, e.g.,* Sorrentino v. Godinez, No. 12 C 6757, 2013 U.S. Dist. LEXIS 142962, 2013 WL 5497244, at *4 (N.D. Ill. Oct. 3, 2013), *aff'd as modified*, 777

A. The DMS Market

DMS software is the "central nervous system" of a dealership. (Compl. ¶ 28.) It is essentially enterprise software designed specifically for dealers, and a DMS manages "virtually every aspect of a dealer's business." (*Id.*) Specifically, DMS software handles information regarding sales, financing, part and vehicle inventory, repair and service, accounting, payroll, human resources, marketing, and still more. In addition to some management functionalities, a DMS is a database in which dealers effectively house this critical information and data. A dealer has only one DMS provider at a time; it would be "functionally impossible" for a dealer to try to use more than one. A DMS provider licenses its software to a dealer through a written contract generally lasting between five to seven years. The Complaint defines the DMS market as providers that sell DMS software to dealers in the United States. (*Id.* ¶ 32.)

CDK and Reynolds **[**15]** "dominate" the DMS market. (*Id.* ¶ 33.) Viewed by dealer-customers, they together control approximately 75 percent of the market. CDK has approximately 45 percent of it, and Reynolds has approximately 30 percent. Viewed by the number of vehicles sold, their collective control increases to approximately 90 percent.

As alleged duopolists, CDK and Reynolds enjoy a profitable business. They each, for example, earn approximately 40 percent profit margin. Their customers, the dealers, are also unable to freely switch between DMS providers. In addition to the contract lengths, "it is enormously difficult and disruptive for a dealer to switch DMS" given the costs of transferring data, retraining employees, and reconfiguring systems. (*Id.* ¶ 40.) Adding to those "logistical nightmares," the Complaint claims that CDK and Reynolds "punish" dealers that try to change DMS **[*940]** providers through lawsuits and by restricting third-party access to the dealers' DMS-stored data. In part for those reasons, the average DMS-dealer relationship lasts more than 20 years. (*Id.* ¶ 44.)

B. The Data-Integration Market

Critical as it is, a dealer's DMS is not the only data service upon which it relies. Many dealers use third-party **[**16]** application providers—or vendors—for service and management applications. These applications help a dealership, for example, track vehicle inventory, customer information, service and repair appointments, and recalls. Most dealerships have ten or more vendors.

To make their applications, vendors require access to dealerships' data—which is stored on DMSs. A vendor that provides an application organizing vehicle registration and titling must be able to obtain purchaser, vehicle, and financing information from a dealer's DMS. Some vendors, further, must be able to input data into a DMS. For example, an application that handles customer information must be able to "push" sales information into the DMS when a dealership sells a car from the lot. The Complaint does not estimate how many vendors exist, but it asserts that both CDK and Reynolds offer application services. CDK and Reynolds both, for example, offer relationship-management applications, and they jointly operate a provider of electronic-vehicle registration and titling.

Vendors, however, do not access the DMSs directly. Instead, data integrators—like Authenticom—provide this service to vendors. Data integrators "specialize in extracting **[**17]** dealers' data from DMS databases, aggregating that data and putting it into a standard format, and then delivering to vendors the specific data required for their applications." (*Id.* ¶ 54.) To pull the needed data from the DMS, data integrators generally receive authorization from dealerships. In many cases, including Authenticom's, dealers set up separate login credentials for the integrators so that they can access the DMSs. Once in, data integrators "data scrape" or "screen scrape" the DMS, an automatic process that pulls relevant data. Although dealers generally choose whether to authorize integrators'

F.3d 410 (7th Cir. 2015) (not crediting "new facts" that were inconsistent with pleadings); *Jones v. Chicago Bd. of Educ., No. 11 C 8326, 2013 U.S. Dist. LEXIS 51321, 2013 WL 1499001, at *2 (N.D. Ill. Apr. 10, 2013)* (not crediting "new allegations" that formed new bases for proposed relief). The Court also considers the CDK-Reynolds agreements at issue, as they are central to the Complaint. *See, e.g.*, *Brownmark Films, LLC v. Comedy Partners, 682 F.3d 687, 690 (7th Cir. 2012)*.

access to the DMSs, they do not directly pay integrators. Vendors, as the customers receiving the integrators' data output, make the payments.

Dealers "own" their data in the DMSs. The Complaint quotes a Reynolds spokesperson as having stated, "The data belongs to the dealers. We all agree on that." (*Id.* ¶ 65.) CDK, likewise, has stated publicly that it "has always understood that dealerships own their data and enjoy having choices on how best to share and utilize the data with others." (*Id.* ¶ 66.) Both CDK's and Reynolds's websites make similar claims. Similarly, the Complaint cites **[**18]** a number of statements by CDK representatives (though not Reynolds representatives) making clear that dealers can permit third-party access to their DMS-stored data, at least before 2015. To take just one example, Matt Parsons, CDK's vice president of sales, stated in 2007, "We're not going to limit the ability of a dealer to give an ID to someone else to, in essence, dial into their system. That is the dealer's right. We have no right to tell them they can't do that." (*Id.* ¶ 70.)

The Complaint defines the data-integration market as comprised of providers of integration services in the United States. According to the Complaint, there used to be "numerous" data integrators. Today, only CDK, Reynolds, and Authenticom remain.

Steve Cottrell founded Authenticom in 2002. Authenticom's feature product is **[*941]** DealerVault, which gives dealerships "state-of-the-art control over how their data is pulled and shared." (*Id.* ¶ 78.) In addition to pulling data from DMSs, Authenticom has begun, in limited fashion, "pushing" data as well, which benefits vendors and dealers in that it expands the services provided. Before accessing a dealer's DMS, Authenticom secures the dealer's—though not the DMS provider's—express **[**19]** authorization. The Complaint also highlights that Authenticom has never incurred a data breach and that its tools and practices are secure. As to pricing, Authenticom generally charges approximately $25 for a first data set, and $50 for two or more. The average price Authenticom charges a vendor is between $30 and 40 per month for one dealership.

CDK and Reynolds also offer integration services. CDK, for its part, owns the two largest data integrators in the market—Digital Motorworks and IntegraLink. It also offers a product that permits direct access to CDK DMSs, called the 3PA program. Digital Motorworks and IntegraLink function like Authenticom; they obtain login credentials for a DMS from the dealer, then extract and format the data. Indeed, Digital Motorworks and IntegraLink formerly pulled data from Reynolds DMS for vendors. Reynolds did not begin to block CDK "and others" from doing so until 2009. (*See id.* ¶ 91.) After Reynolds began to block Digital Motorworks and IntegraLink—that is, prevent them from accessing Reynolds DMSs—CDK devised the "SMART-R" solution, which permitted its integrators to continue to access Reynolds DMSs. As a result, CDK (through Digital Motorworks and **[**20]** IntegraLink) continued to access Reynolds DMSs on behalf of its vendor clients, again at least until 2015.

Unlike Digital Motorworks and IntegraLink, 3PA, also known as "Third Party Access," allows access to CDK DMSs only. CDK's 3PA formerly offered three "levels": one supplied vendors with login credentials for the dealership's system, another allowed third parties "subscriber access" that the dealer controlled, and a third permitted real-time access to CDK DMSs. That, too, changed after the alleged anticompetitive agreements of 2015, when CDK revised 3PA to prohibit dealer control over third-party access to CDK DMSs. CDK represented that the change was the result of its "SecurityFirst" initiative, which ended up increasing charges to vendors to approximately $250 to $300 per connection—almost triple what it charged before the 2015 revision, and far more than the $25 to $50 per connection that Authenticom charges. Today, CDK has taken the position that 3PA is the "only approved method for accessing" CDK DMSs. (*Id.* ¶ 101.) CDK considers all other access "unauthorized," and it forbids vendors from obtaining data on a CDK DMS from any integrator other than 3PA.

Reynolds does not offer **[**21]** integration services to access other providers' DMS software, but it does offer the Reynolds Certified Interface Program ("RCI"). RCI is an "equivalent" to CDK's 3PA, and it is the only Reynolds-authorized method by which vendors can access Reynolds DMSs. (*Id.* ¶¶ 102-103.) Like with CDK and 3PA, Reynolds contractually restricts both dealers and vendors from using integrators other than RCI to access Reynolds DMSs. Reynolds's RCI pricing is not publicly available, but the Complaint represents that it is "even steeper" than CDK's 3PA pricing. (*Id.* ¶ 104.)

The Complaint describes other integrators that, though once successful, have been forced out of business as a result of Reynolds's prohibition and CDK's more-recent prohibition on third-party access to their respective DMSs. Those prohibitions, **[*942]** while having the purported effect of excluding data integrators from the data-integration market generally, also allow CDK and Reynolds (through 3PA and RCI, respectively) to dominate their single-brand aftermarkets. The Complaint alleges that such aftermarkets are cognizable in this case, because when dealers purchase a DMS, they are "locked in" to that purchase through high switching and information **[**22]** costs. (*Id.* ¶ 112.) A vendor who wants to work with both CDK and Reynolds dealers must purchase both 3PA and RCI services. In turn, Defendants can, and do, charge supracompetitive pricing for their respective integration services.

C. CDK and Reynolds Pre-2015 Treatment of Data Integrators and Third-Party Access

Initially, and for over a decade, all DMS providers—CDK and Reynolds included—permitted dealers the right to authorize third-party access to the DMSs. That industry-wide agreement began to erode in 2007, when Reynolds announced that it would start blocking data integrators from Reynolds DMSs. Since then, Reynolds has considered third-party, unauthorized scraping of its DMSs as "hostile access." As a result of this policy change, Reynolds began disabling Authenticom's credentials in 2009 by imposing "challenge questions" and "captcha" (entry requests to enter random or blurred text), which identify non-human users. In 2013, Reynolds began disabling Authenticom's credentials en masse.

CDK, on the other hand, countenanced third-party access for far longer. Indeed, CDK touted its open architecture. Its CEO, for example, publicly stated, "We're not going to prohibit" integrators' access **[**23]** "or get in the way of that. . . I think we've stated pretty emphatically, we really believe the dealer owns the data. I don't know how you can ever make the opinion that the data is yours to govern and to preclude others from having access to it." (*Id.* ¶ 6.) In 2015, however, CDK came to echo Reynolds's disapproval of third-party access.

II. CDK and Reynolds's Alleged Conspiracies

The Complaint alleges that in February 2015, CDK and Reynolds "entered into an agreement to eliminate competition in the Dealer Data-integration market and the single-brand after markets." (*Id.* ¶ 117.) Essentially, these agreements took two forms—written agreements, signed in early 2015, and a general understanding. The alleged purpose of Defendants' agreements was twofold: first, to protect vendors from siphoning any part of their DMS market duopoly by offering services that could compete with DMS software, and second, to protect CDK and Reynold's data-integration businesses and aftermarket single-brand monopolies.

A. The February 2015 Agreements

Effective February 18, 2015, CDK and Reynolds entered into a Data Exchange Agreement (the "DEA").[2] The DEA purportedly served as a wind-down arrangement, in which CDK **[**24]** agreed to eventually restrict (during a term that could last up to five years) its integrators—Digital Motorworks and IntegraLink—from accessing Reynolds DMSs. (*See* R. 54, Ex. 1 § 4.0.) As a part of that wind-down arrangement, CDK agreed to "cooperate" in efforts to have Digital Motorworks's and **[*943]** IntegraLink's vendor-clients join RCI. (*Id.* § 4.1.) The wind-down arrangement also featured Section 4.5, titled a "Prohibition on Knowledge Transfer and DMS Access," which stated:

> Each of Reynolds and CDK further covenants and agrees not to sell, transfer, or assign to any affiliate or third party any technology, business process, or other such knowledge regarding integration with the other party's DMS or take any other step to assist any person that it reasonably believes to have plans to access or integrate with the other party's DMS without the other party's written consent. For the avoidance of doubt, this Section 4.5 is not intended as a "covenant not to compete," but rather as a contractual restriction of access and

---

[2] The Complaint misattributes several quotes to and provisions of the DEA. The Court reviews and credits what the agreement actually says, [Phillips, 714 F.3d at 1020](), as do both parties in their briefs.

attempted access intended to protect the operational data security integrity of Reynolds DMS and CDK DMS and protection of intellectual property.

(*Id.* § 4.5.) According to Authenticom, this arrangement constituted **[**25]** an agreement to divide the market: Reynolds would not access, or aid the access of, CDK DMSs without CDK's permission,[3] and CDK would not access, or aid the access of, Reynolds DMSs without Reynolds's permission. Section 4.5's terms do not expire. (*Id; id.* § 6.1.) The parties also entered into two, contemporaneously executed, reciprocal agreements.

In the "3PA Agreement," Reynolds's vendor applications received five years' of free data integration using 3PA to access CDK DMSs. (*See* 54, Ex. 2; R. 54 at 8; 56 at 11.) In the "Reynolds Interface Agreement" (collectively, with the DEA and 3PA Agreement, the "2015 Agreements"), CDK agreed to enlist seven of its vendor applications in the RCI program to access Reynolds DMSs. (*See* 54, Ex. 3; R. 54 at 8; R. 56 at 11.) By way of both agreements, Defendants, in their capacity as application providers (though only for seven of CDK's applications[4]), agreed not to use other integrators when extracting data from the other's DMSs. Specifically, Reynolds agreed that it would not "otherwise access, retrieve, license, or otherwise transfer any data from or to a CDK System (including, without limitation, pursuant to any 'hostile interface') for itself or any other entity," **[**26]** nor contract with a third-party to access CDK DMSs. (R. 54, Ex. 2 § 1(e).) CDK likewise agreed to a provision titled "Non-Approved Access," which prohibited it from obtaining "[a]ny direct or indirect access of the Reynolds System for the benefit" of the applications "by CDK or an agent acting on behalf of CDK other than with Reynolds' prior written consent." (R. 54, Ex. 3 § 1.8.)

B. The General Agreement to Oust Authenticom

In addition to a market-division agreement, the Complaint alleges that Defendants reached a broader agreement to expel Authenticom and other third parties from the data-integration market. Defendants have allegedly conveyed this agreement to Authenticom. On April 3, 2016, Dan McCray, CDK's Vice President of Product Management, approached Mr. Cottrell at an industry convention. Mr. McCray led Mr. Cottrell off the convention floor and to a secluded area. There, he told Mr. Cottrell that CDK and Reynolds had agreed to "lock you and the other third **[*944]** parties out." (Compl. ¶ 180.) Regarding an offer CDK had made to acquire Authenticom's business for approximately $15 million, Mr. McCray asserted that the offer was relatively low because Authenticom's "book of Reynolds business **[**27]** is worthless to us because of the agreement between CDK and Reynolds." (*Id.*) Mr. McCray then threatened: "I wanted to look you in the eye and let you know man to man, I have been mandated by our new CEO to seek you out and destroy your business on our systems." (*Id.*) Regarding CDK-dealer contracts prohibiting third-party access, Mr. McCray stated further, "we will enforce our contract with the dealers and sue them if needed to keep you out of our systems." He concluded, "For god's sake . . . you have built a great little business, get something for it before it is destroyed otherwise I will f***ing destroy it." (*Id.*) Steve French, CDK's Senior Director of Client and Data Services and former Reynolds employee, delivered a similar (albeit more tempered) explanation of the supposed CDK-Reynolds agreement to a vendor. In attempting to move a vendor over to the 3PA program, Mr. French stated that he was working with Reynolds to lock out third-party integrators like Authenticom. (*Id.* ¶ 183.)

Reynolds's executives have delivered the same message to Authenticom. In May 2015, Robert Schaefer, Reynolds's Director of Data Services and the person in charge of the RCI program, told Mr. Cottrell **[**28]** during a phone conversation that CDK and Reynolds had an agreement to support each other's 3PA and RCI programs, and therefore block integration competitors like Authenticom. Mr. Schaefer shared with Mr. Cottrell that Bob Brockman, Reynolds's Owner, Chairman, and CEO, was "adamant" about blocking independent data integrators. (*Id.* ¶ 181.)

---

[3] There are no allegations (or facts cited) that such access was possible at the time, however, as Reynolds was not engaged in integration of other providers' DMSs.

[4] CDK makes much of this point (*e.g.*, R. 54 at 8), but does not assert, nor provide judicially noticeable facts showing, what portion of CDK's application business these seven applications constituted.

The Complaint cites examples of Defendants carrying out these shared threats. Reynolds unsuccessfully proposed a wind-down agreement with Authenticom, and CDK began blocking Authenticom from their DMSs. In August 2016, for example, CDK disabled Authenticom's credentials at thousands of dealerships. After doing so, CDK sent a letter to all dealers whose vendors use Authenticom. The message said that the dealers must join the 3PA program to avoid business "disruption." (*Id.* ¶ 201.) Reynolds has delivered similar messages. (*Id.* ¶ 202.)

III. CDK and Reynolds's Alleged Vertical Restraints

In addition to those agreements between competitors, the Complaint claims that Defendants have entered into anticompetitive agreements with their vendors and dealers.[5]

A. Vendor Agreements

CDK requires that any vendor using 3PA for any of its dealer-customers on a CDK DMS **[**29]** must agree to use 3PA exclusively for all of its of its dealer-customers on CDK DMSs. The penalty for failing to comply with this exclusive arrangement is termination of the agreement (and thus access to dealer data stored on CDK DMSs). The terms of these exclusivity clauses purportedly "last forever," according to the Complaint. Reynolds has similar terms in its vendor contracts. Likewise, in its RCI contracts, Reynolds requires that **[*945]** the vendor agree not to use any "Non-Approved Access" to Reynolds DMSs. These terms last as long as the agreement is in effect, which generally constitutes three years plus any one-year renewals.

CDK and Reynolds also both include "price secrecy" provisions in their vendor contracts. These provisions prevent vendors from sharing with dealers information about how much Defendants charge for data access. The CDK 3PA contract, for example, states that vendors "shall not include any interface fee, DMS access fee or any other similar fee related to the use of the CDK Interface System in any of its invoices to its customers or otherwise include any direct or indirect indication to its customer (in its invoices or otherwise) of the fees charged by CDK hereunder." **[**30]** (*Id.* ¶ 167.) Reynolds's RCI contracts contain a similar provision binding the vendors from sharing pricing information with their customers, the dealers.

B. Dealer Agreements

As for the contracts with dealers, both Defendants purportedly require that dealers agree that they will not provide access to the DMS to anyone other than the DMS provider for data-integration purposes. CDK's standard DMS contract, for example, contains a clause stating: "Client is not authorized to cause or permit any third party software to access the CDK Dealer Management System," and "Client shall not allow access to [the CDK DMS] by any third parties except parties otherwise permitted," which includes the dealer's "employees and agents." (*Id.* ¶ 151.) According to the Complaint, CDK used to take the position that its contracts permitted integrators to access CDK DMSs—as demonstrated by its self-touted open architecture—but it now takes the opposite stance. CDK's contract provisions last for the contract's five-year duration. Reynolds has similar provisions in its standard DMS contracts. Those contracts bar dealers from "provid[ing] access to the [Reynolds DMS] . . . to any third party." (*Id.* ¶ 152.) Reynolds's **[**31]** restriction clauses, too, last for the contract's duration, which is generally five to seven years.

CDK and Reynolds, respectively, enforce these contract provisions by disabling thirdparty user credentials (like those upon which Authenticom relies) to access their DMSs. When one dealer complained to CDK, CDK cited in response the authorization provisions of its standard contract. Reynolds, further, has filed lawsuits against data

---

[5] The Complaint is unclear as to whether these agreements were horizontal as well as vertical; that is, it is unclear whether Defendants allegedly agreed with one another to have exclusive-dealing and tying arrangements with their respective vendors and dealers. Authenticom's opposition brief clarifies that it pursues these theories as vertical in nature. (*See* R. 59 at 14-15, 26-34.)

integrators for tortiously interfering with their dealer contracts by accessing (presumably with dealer authorization) Reynolds DMSs.

IV. Alleged Competitive Harm

The Complaint claims that Defendants' conduct has harmed the markets in essentially two ways: one, it has allowed Defendants to increase the prices they charge for their integration services, and two, it has reduced consumer choice and output.

A. Price Increase

As noted, Authenticom generally charges $25 for one data feed and $50 for two to seven. As such, Authenticom customers generally pay between $30 to $40 dollars for services per month. Authenticom also charges $75 dollars for "bi-directional access" to dealer data. These prices are comparable to those charged by most other data integrators. One, **[**32]** for example, charges $40 per connection and $70 per connection for bi-directional access. CDK and Reynolds, on the other hand, charge much higher prices for integration. One vendor used to pay an integrator a rate of $45 to $55 per month; it now pays Reynolds and CDK between $300 to $866 per month. CDK used to charge $70 per **[*946]** connection, for example, but since 2015, now charges upwards of $300. Likewise, post-2015, Reynolds continues to raise prices for integration services. Defendants, moreover, charge substantial upfront fees. It costs "at least" $30,000 to join the 3PA and RCI programs, and the setup fees for such services are approximately $300.

B. Reduced Consumer Choice and Output

Defendants' conduct has also reduced output in the data-integration market and downstream markets, the Complaint claims. Dealerships and vendors prefer Authenticom because of its higher-quality services and better prices, but Defendants' contracts with dealers and vendors—and the general exclusion of Authenticom and other integrators from the market—effectively require both to use (indirectly and directly) Defendants' integration products. Defendants' higher prices also hinder the third-party application **[**33]** market. One vendor, for example, closed one of its application products because of Reynolds's high integration fees. Another expressed concerns about going out of business because it could not afford Defendants' integration costs.

ANALYSIS[6]

Authenticom brings five counts—four based on alleged violations of the Sherman Act, one based on state tort law. Defendants have moved to dismiss all counts. The Court addresses them in turn.

I. Antitrust Claims (Counts One Through Four)

Counts One through Four of the Complaint entail claims under both *Sections 1* and *2* of the Sherman Act, based on several anticompetition theories. Defendants challenge each of those claims as insufficiently pleaded, but also argue that Authenticom's claims fail for threshold reasons concerning antitrust defenses and injury.

---

[6] The Court is presently ruling only on the motions to dismiss the as-filed, as-briefed *Authenticom* Complaint. To the extent later-filed complaints entail varying allegations and theories, later decisions will account for them. Further, the Court notes that the preliminary injunction opinion does not dictate the conclusions of this motion to dismiss ruling, as the *Authenticom* district court indicated. (*See* Case No. 18-cv-868, R. 209.)

A. The Computer Fraud and Abuse Act and Other Cyber-Security Laws

Defendants argue that Authenticom's Sherman Act claims fail at the start because they seek to vindicate an illegal trade through an antitrust lawsuit. Defendants contend, specifically, that the Complaint affirmatively pleads Authenticom's violations of the *Computer Fraud and Abuse Act ("CFAA"), 18 U.S.C. § 1030 et seq.*, the *Wisconsin Cyber Crimes Act ("WCCA"), Wis. Stat. § 943.70* **[**34]** , and other cyber-security laws. The CFAA, for example, imposes criminal liability on anyone who "intentionally accesses a computer without authorization or exceeds authorized access, and thereby obtains . . . information from any protected computer." *18 U.S.C. § 1030(a)(2)(C)*. Defendants argue that the Complaint makes clear that Authenticom did just that by accessing DMSs (protected computers) and pulling data without authorization (from Defendants). Having admitted as much, Defendants submit, Authenticom cannot now seek refuge under the Sherman Act. The Court disagrees.

Courts have generally held that ***HN3***[] a plaintiff's wrongdoing is not a defense to an antitrust suit. The Supreme Court decided in *Perma Life Mufflers, Inc. v. Int'l* ***[*947]*** *Parts Corp., 392 U.S. 134, 140, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)* (plurality), that the in pari delicto doctrine—a common-law defense that curbs or bars recovery where the claimant is also at fault for her injury—"is not to be recognized as a defense to an antitrust action." As the Seventh Circuit later put it, "[p]roof of the plaintiff's unrelated unlawful conduct is not a valid in pari delicto defense to an antitrust charge." *Pinto Trucking Serv., Inc. v. Motor Dispatch, Inc., 649 F.2d 530, 534 n. 5 (7th Cir. 1981)*; *see also* *Gen. Leaseways, Inc. v. Nat'l Truck Leasing Ass'n, 830 F.2d 716, 720 (7th Cir. 1987)* ("Strictly speaking, the common-law form of the [in pari delicto] defense is not available to defendants in antitrust lawsuits."); **[**35]** *see also* Phillip E. Areeda, Herbert Hovenkamp, ***ANTITRUST LAW***: AN ANALYSIS OF ANTITRUST PRINCIPLES AND THEIR APPLICATION ¶ 361 (3rd and 4th eds. 2010-2017). *Memorex Corp. v. Int'l Bus. Machs. Corp., 555 F.2d 1379 (9th Cir. 1977)*, is also illustrative. In that case, the Ninth Circuit held that a plaintiff's alleged theft of a defendant's trade secrets did not prevent that plaintiff from bringing an antitrust suit. The plaintiff, Memorex Corporation, had sued the defendant, IBM, for violating the antitrust laws. *Memorex, 555 F.2d at 1380*. IBM responded by asserting that the only reason Memorex even existed in the relevant market was because it had stolen IBM's trade secrets. *Id.* The district court struck that defense, and the Ninth Circuit affirmed. It held: ***HN4***[] "A wrongful act committed against one who violates the antitrust laws must not become a shield in the violator's hands against operation of the antitrust laws. This is particularly true when the defendant has other remedies available to him." *Id. at 1382*.

Under that law, Authenticom's purported wrongdoing is of no matter at this stage. Defendants may have claims against Authenticom under the CFAA and related state laws—indeed, *Authenticom*'s docket and defense counsel's representations in court suggest that they may bring such claims—but **[**36]** those claims do not foreclose Authenticom's Sherman Act claims. *See id.* Both things can be true: Defendants may be able to state valid cyber-security claims against Authenticom *and* Authenticom may be able to state valid antitrust claims against Defendants.

Defendants, however, contend that Authenticom's purported wrongdoing does not provide a defense for Defendants inasmuch as it deprives Authenticom of a claim, and more specifically, of antitrust injury. That overstates the law. Defendants rely heavily on, for example, *Maltz v. Sax, 134 F.2d 2, 5 (7th Cir. 1943)*. In that case, Seventh Circuit held that the manufacturer of gambling "punchboards" could not bring an antitrust suit because gambling was illegal under federal law. *Maltz, 134 F.2d at 5*. As the court summarized: "He had no legal rights to protect. Therefore defendants could not invade them." *Id.* Likewise, in *In re Canadian Imp. Antitrust Litig., 470 F.3d 785, 791 (8th Cir. 2006)*, the Eighth Circuit held that consumers could not bring an antitrust claim based on drug manufacturers' restrictions on importing prescription drugs from Canada because doing so would violate federal law. "The absence of competition from Canadian sources in the domestic prescription drug market . . . is caused by the federal statutory and regulatory scheme adopted by the United States **[**37]** government, not by the conduct of the defendants," the court reasoned in holding that consumers lacked antitrust injury. *Canadian Imp., 470 F.3d at 791*. Defendants' other cases stand for the same proposition—that a plaintiff whose desired trade is illegal independent of the defendants' complained-of conduct lacks antitrust injury. *See* *Bubis v. Blanton, 885 F.2d 317, 320* ***[*948]*** *(6th Cir. 1989)* (plaintiff lacked standing to challenge alleged collusion in denial of a liquor license because the plaintiff's "interest in [the store] at the time of the attempted transfer of the liquor license was unlawful"); [Realnetworks, Inc. v. DVD Copy Control Ass'n, Inc., No. C 08-4548 MHP, 2010 U.S. Dist. LEXIS 1433, 2010 WL 145098, at *6 (N.D. Cal. Jan. 8, 2010)] (plaintiff lacked antitrust injury because its product manufacturing had "almost certainly" violated the law); [Modesto Irrigation Dist. v. Pac. Gas & Elec. Co., 309 F. Supp. 2d 1156, 1170 (N.D. Cal. 2004)] (plaintiff lacked antitrust injury because its conduct was "unlawful by its own terms"); [Pearl Music Co. v. Recording Indus. Ass'n of Am., Inc., 460 F. Supp. 1060, 1068 (C.D. Cal. 1978)] (because plaintiff's business was "totally illegal" in 49 states, it lacked "standing or capacity" to bring antitrust suit).

In this case, unlike in those cases, Authenticom's as-alleged practices are not illegal independent of Defendants' challenged conduct. *Accord* *Linea Internacional de Credito, S.A. v. W. Union Fin. Servs., Inc., No. 03 C 6736, 2004 U.S. Dist. LEXIS 10854, 2004 WL 1336302, at *3 (N.D. Ill. June 14, 2004)* (distinguishing *Maltz*, stating "[i]t is not clear from the complaint that plaintiff's business **[**38]** is inseparably connected with gambling or that its services could only be used in furtherance of gambling"); *Monarch Marking Sys., Inc. v. Duncan Parking Meter Maint. Co., No. 82 C 2599, 1988 U.S. Dist. LEXIS 2041, 1988 WL 23830, at *1 (N.D. Ill. Mar. 8, 1988)* (granting reconsideration of dismissal of antitrust claim because there was some "*possibility*" that part of claimant's business was legal and therefore it could establish cognizable injury) (emphasis in original). The Complaint alleges that Defendants' anticompetitive conduct blocked or foreclosed Authenticom from the data-integration market. That is, the Complaint claims that Authenticom lacks authorization or access to Defendants' DMSs (which is necessary to compete in the data-integration market, given Defendants' upstream duopoly) *because of* Defendants' anticompetitive conduct—and it is that conduct which Authenticom challenges as illegal.[7]

Defendants argue that simply because user authorization—or rather the lack thereof—is what makes Authenticom's conduct a potential crime does not distinguish this from cases like *Maltz* and *Canadian Import*. They submit that many property crimes turn on owner approval. While that may be true, it is beside the point. Even assuming, without deciding, that the CFAA prohibits Authenticom from accessing DMSs without Defendants' authorization, **[**39]** Defendants are not free to withhold such approval pursuant to illegal arrangements. *See, e.g.,* *Primetime 24 Joint Venture v. Nat'l Broad., Co., 219 F.3d 92, 99, 103 (2d Cir. 2000)* (although a law permitted networks and stations to withhold their licenses, plaintiff adequately stated a *Section 1* claim by alleging that they had colluded to do so); *see also* *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 19, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)* ("the copyright laws confer no rights on copyright owners to fix prices among themselves or otherwise to violate the antitrust laws"); *accord* *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 608 n. 38, 105 S. Ct. 2847, 86* ***[*949]*** *L. Ed. 2d 467 (1985)* ("In considering the competitive effect of [a firm's] refusal to deal or cooperate . . . it is not irrelevant to note that similar conduct carried out by the concerted action of three independent rivals with a similar share of the market would constitute a *per se* violation of *§ 1* of the Sherman Act.").

In any event, Defendants also overstate the extent to which the Complaint demonstrates Authenticom's lack of "authorization." According to the Complaint, CDK had long permitted, indeed encouraged, third-party integration on its DMS. *See Facebook, Inc. v. Power Ventures, Inc., 844 F.3d 1058, 1069 (9th Cir. 2016)*, *cert. denied*, *138 S. Ct. 313, 199 L. Ed. 2d 206 (2017)* ("Because Power had *implied* authorization to access Facebook's computers, it did not, at first, violate the statute.") (emphasis added). In light of that well-pleaded history, the Court cannot determine as a matter of law that Authenticom **[**40]** lacked authorization to access CDK DMSs before 2015. Although Reynolds presents a different case, "authorization" here is "a factual matter" and "not properly before the Court based on the pleadings alone, and thus a precise delineation of whether the events in question may or may not be covered under the statute is premature." *Weingand v. Harland Fin. Sols., Inc., No. C-11-3109 EMC, 2012 U.S. Dist. LEXIS 123160, 2012 WL 3763640, at *2 (N.D. Cal. Aug. 29, 2012)*. Authenticom has therefore not pleaded itself out of antitrust injury at this stage.

---

[7] None of this comes close to saying that CDK and Reynolds, respectively, have independent antitrust duties to allow Authenticom and other integrators authorization and access. Rather, the question of this case is whether Defendants' refusal to grant such authorization and access, and more specifically their attendant blocking, was the result not of a unilateral refusal to deal, but of illegal conspiracies and anticompetitive arrangements (like tying or exclusive dealing) recognized by the antitrust laws.

B. Authenticom's *Section 1* Claims

Turning to Authenticom's *Section 1* claims, the Complaint alleges both horizontal agreements (between Defendants) and vertical agreements (between each Defendant and its dealers and vendors). *Section 1* ***HN5***[] of the Sherman Act declares illegal "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States . . ." *15 U.S.C. § 1*. ***HN6***[] To state a *Section 1* claim, a plaintiff must plead facts plausibly suggesting: (1) a contract, combination, or conspiracy (meaning, an agreement); (2) a resulting unreasonable restraint of trade in a relevant market; and (3) an accompanying injury. *Agnew, 683 F.3d at 335*.

Plausibly pleading the first element, an agreement, **[**41]** requires "enough factual matter (taken as true) to suggest that an agreement was made"—that is, "enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Twombly, 550 U.S. at 556*. Plaintiffs can do this in one of two ways, by pleading either direct or circumstantial evidence of an illegal agreement. *E.g., In re Text Messaging Antitrust Litig., 630 F.3d 622, 629 (7th Cir. 2010)*. Direct evidence of an agreement "is explicit and requires no inferences to establish the proposition or conclusion being asserted." *In re Dairy Farmers of Am., Inc., Cheese Antitrust Litig., 60 F. Supp. 3d 914, 950 (N.D. Ill. 2014)* (quoting *In re Baby Food Antitrust Litig., 166 F.3d 112, 118 (3d Cir. 1999)*). Simply, direct evidence constitutes a "smoking gun." *Omnicare, Inc. v. UnitedHealth Grp., Inc., 629 F.3d 697, 706 (7th Cir. 2011)*; *accord In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 654 (7th Cir. 2002)* ("an admission by the defendants that they agreed to fix their prices is all the proof a plaintiff needs"). Circumstantial evidence, in contrast, is facts "from which the existence of such an agreement can be inferred." *High Fructose Corn Syrup, 295 F.3d at 654*. Mere allegations of "parallel conduct," without more, do not "tend[ ] to exclude the possibility of independent action," and are therefore insufficient. *Twombly, 550 U.S. at 554*.

[*950] ***HN7***[] The second element, an unreasonable restraint, hinges on whether the alleged violation is per se unreasonable or is, instead, subject to the rule of reason.[8] *See In re Sulfuric Acid Antitrust Litig., 743 F. Supp. 2d 827, 864 (N.D. Ill. 2010)* (citing *Denny's Marina v. Renfro Prods., Inc., 8 F.3d 1217, 1220 (7th Cir. 1993)*). Per se violations—those with which courts have "considerable experience" and "inevitably result[ ] in a finding **[**42]** of anticompetitive effect"—are presumed to be unreasonable restraints on trade. *Phil Tolkan Datsun, Inc. v. Greater Milwaukee Datsun Dealers' Adver. Ass'n. Inc., 672 F.2d 1280, 1284 (7th Cir. 1982)*; *see also, e.g., Omnicare, 629 F.3d at 706* (an unreasonable restrain is "conclusively presumed once the first [element] is proved" in per se cases). Rule-of-reason violations, however, require that a plaintiff plead "anticompetitive effects," and "that the injury complained of be of a type that the antitrust laws were designed to guard against, and further that the antitrust violation be the direct cause of plaintiff's injury." *Havoco of Am., Ltd. v. Shell Oil Co., 626 F.2d 549, 556 (7th Cir. 1980)*; *see also Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (rule of reason ultimately requires "the factfinder [to] weigh[ ] all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition"); *see also, e.g., Watkins v. Smith, No. 12 CIV. 4635 DLC, 2012 U.S. Dist. LEXIS 165762, 2012 WL 5868395, at *7 (S.D.N.Y. Nov. 19, 2012)* ("The rule-of-reason inquiry requires, at the motion to dismiss stage, that the plaintiff identify the relevant market affected by the challenged conduct and allege an actual adverse effect on competition in the identified market.").

HN8[] Alleging the third element, antitrust injury, requires pleading an "injury of the type the antitrust laws were intended to prevent and that flows **[**43]** from that which makes the defendants' acts unlawful." *Southwest Suburban Bd. of Realtors, Inc. v. Beverly Area Planning Ass'n, 830 F.2d 1374, 1377 (7th Cir. 1987)*; *accord United States ex rel. Blaum v. Triad Isotopes, Inc., 104 F. Supp. 3d 901, 924 (N.D. Ill. 2015)*.

1. Horizontal Conspiracy Between Defendants (Count One)

---

[8] Neither party suggests that the quick-look analysis is applicable to any of Authenticom's claims at this stage.

Count One of the Complaint claims a conspiracy between CDK and Reynolds, competitors in both the DMS market and the data-integration market. Two related agreements, essentially, comprise the alleged conspiracy: first, the Complaint alleges that Defendants agreed to drive Authenticom and other third-party integrators out of the data-integration market by blocking access to the dealers' DMS-stored data, and second, the Complaint claims that Defendants agreed to allocate their respective DMS single-brand aftermarkets through the 2015 Agreements.

a. The Alleged Agreement to Block Authenticom's Access to Dealer Data

The Complaint adequately alleges an agreement to drive Authenticom out of the market. It claims that in May 2015, just three months after CDK and Reynolds executed the 2015 Agreements, a Reynolds executive referenced those agreements on a phone call with Mr. Cottrell. He told Mr. Cottrell that CDK and Reynolds had agreed to "support each other's" integration programs and "therefore **[*951]** block competitors" like Authenticom from "pulling dealer data." (Compl. ¶ 181.) **[**44]** The Reynolds executive also told Mr. Cottrell that he was "in communications" with other DMS providers to join "in the agreement to block independent data integrators," like Authenticom. (*Id.*) A CDK executive allegedly repeated that message to Mr. Cottrell a year later, in April 2016. At an industry convention that month, CDK's Vice President of Product Management told Mr. Cottrell that CDK and Reynolds had agreed to "lock you and the other parties out." (*Id.* ¶ 180.) In the same conversation, he then told Mr. Cottrell that he planned to "destroy" Authenticom's "great little business," according to the Complaint.[9]

These allegations straightforwardly suffice. They are, for one, direct-evidence allegations of the agreement: Taken as true, the fact that two of Defendants' executives admitted an agreement to block Authenticom and other integrators from accessing dealer data shows directly the existence of such an agreement. No further inference is required. *See, e.g.,* Baby Food, 166 F.3d at 118. Indeed, such **HN9**[] "admission[s] by [ ] employee[s] . . . of the conspirators" are textbook examples of adequate direct-evidence allegations. *Text Messaging, 630 F.3d at 628*; *see also* W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 100 (3d Cir. 2010) (defendant's alleged admission of an "agreement" to do harm to plaintiff constituted **[**45]** direct-evidence allegations); *cf.* *In re Plasma-Derivative Protein Therapies Antitrust Litig., 764 F. Supp. 2d 991, 998 (N.D. Ill. 2011)* ("an admission by an insider" constitutes "direct evidence of agreement"). Even if it were otherwise, and as Defendants assert, there was some ambiguity in the admissions, they are at a minimum "highly suggestive of the existence" agreement to block Authenticom from accessing dealer data and thus out of the market. *High Fructose Corn Syrup, 295 F.3d at 662*.

The potential impact of the 2015 Agreements, and Section 4.5 of the DEA specifically, further support the existence of the alleged agreement. Defendants correctly point out that the 2015 Agreements do not require them to preclude third-party integration on their own DMSs. They do, however, effectively require that CDK stop hostile access of Reynolds DMSs (for a period, at least) and, more importantly, expressly prohibit Defendants from assisting in the hostile access of one another's DMSs. Such a partial ceasefire and mutual forbearance between two rivals would make sense if—as the executives allegedly admitted—Defendants sought to "support" one another's integration services to the exclusion of third-party integrators from the competition. Defendants also contend that there are legitimate explanations for the 2015 Agreements, such as resolving CDK's hostile **[**46]** access and addressing security concerns. But at this stage, it is reasonably inferable that such agreements were a part of the broader and admitted agreement to block third-party integrators.

That broader agreement is, moreover, anticompetitive. Under established law, **HN10**[] "joint efforts by a firm or firms to disadvantage competitors by either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle" merit per se treatment. *Toys "R" Us, Inc. v. F.T.C., 221 F.3d 928, 936 (7th Cir. 2000)* (quoting *Nw. Wholesale Stationers, Inc. v. Pac. Stationery &* **[*952]** *Printing Co., 472 U.S. 284, 294, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985))*; *see also* *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*. In this case, the Complaint in essence claims that Defendants conspired to block integrators from accessing necessary data from the dealers—meaning,

---

[9] Authenticom also cites Mr. Cottrell's preliminary-injunction testimony, which is consistent with these factual allegations.

"relationships" integrators "need"—by (among other things) withholding authorization and disabling third-party credentials, so that Defendants, ultimately, could charge more for their integration services.

Defendants do not contest that an agreement to block integrators from the market is plausibly anticompetitive.[10] They do, however, argue that the Court should disregard the Complaint's direct-evidence (or at a minimum, highly probative) allegations of the agreement's existence. CDK, for example, contends that the **[**47]** alleged confessions are "nonsensical" because Reynolds had decided long before 2015 to block Authenticom's access. Accepting that argument, though, requires the Court to ignore well-pleaded allegations of fact (that the executives admitted the agreement), and then credit an inference in Defendants' favor (that the agreement did not exist because Reynolds had already engaged in integrator blocking) over a contrary one in Authenticom's favor (that Reynolds agreed, for example, to escalate or enhance its blocking, or agreed not to go after CDK for its hostile access, in exchange for CDK's commitment to begin blocking). The Court cannot do that at this stage. *Accord Forgue, 873 F.3d at 966*. CDK further submits that the executive's comment to Mr. Cottrell—that "Reynolds and CDK had agreed to 'lock [Authenticom] and the other third parties out'"—does not "tend to exclude independent conduct." (R. 54 at 14.) Again, the allegation is that Defendants admittedly "*agreed*" to block third parties.

Reynolds's similar arguments are equally misplaced. It identifies innocent explanations for and interpretations of the executives' comments, and then attempts to persuade the Court that those exculpatory **[**48]** explanations are "more plausible" than Authenticom's inculpatory ones. That is not the inquiry at this stage. ***HN11***[] "A court ruling on [ ] a motion may not properly dismiss a complaint that states a plausible version of the events merely because the court finds a different version more plausible." *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 185 (2d Cir. 2012)*; *see also Lormand v. US Unwired, Inc., 565 F.3d 228, 267 (5th Cir. 2009)* ("we are not authorized or required to determine whether the plaintiff's plausible inference . . . is equally or more plausible than other competing inferences"); *Pennsylvania Chiropractic Ass'n v. Blue Cross Blue Shield Ass'n, No. 09C5619, 2010 U.S. Dist. LEXIS 49151, 2010 WL 1979569, at *6 (N.D. Ill. May 17, 2010)* (rejecting the argument that courts should assess under *Twombly* which parties' version is the "more plausible" one); *see also* **[*953]** *Evergreen Partnering Grp., Inc. v. Pactiv Corp., 720 F.3d 33, 45 (1st Cir. 2013)* ("At these early stages in the litigation, the court has no substantiated basis in the record to credit a defendant's counterallegations."). Instead, under *Twombly*, the Court abdicates probability weighing, assumes that all the well-pleaded "allegations in the complaint are true (even if doubtful in fact)," and decides whether the totality of those allegations "suggest that an agreement was made." *Twombly, 550 U.S. at 556*. Reynolds may ultimately have it right—the agreement identified by Defendants' executives may have referred to legitimate business arrangements, or it may not have even happened as alleged—but the Court **[**49]** cannot credit those alternatives at this stage.

Defendants also insist that the alleged confessions do not refer to a broader agreement to block integrators but only the 2015 Agreements, which are facially legitimate. That is a bad argument. For one, it requires an inference in Defendants' favor and Authenticom's disfavor. It also backfires. The executives allegedly confessed to an agreement to "block" third-party integrators; Defendants' position that the agreement referenced was in fact the 2015 Agreements suggests that Defendants (or at least their executives) thought that the 2015 Agreements aimed to "block" third-party integrators—precisely as the Complaint claims.

Defendants' other argument, that there is no plausibly pleaded agreement to block integrator access to dealer data because Defendants could have done so independently, fails for similar reasons. In making that argument, both

---

[10] Defendants do argue that an alleged "group boycott" is a "factual mismatch" to this case because they do not deal with Authenticom directly and because both Defendants could have unilaterally blocked Authenticom based on their service contracts. As Authenticom correctly responds, the first argument misunderstands a group boycott under *Klor's*, and the second fails at this stage because it ignores an inferable reason Defendants would conspire—to prevent unhappy dealers from, for example, turning to another DMS provider, as discussed further below. None of this, however, is to say that the per se test will ultimately apply to Authenticom's *Section 1* conspiracy claim. *See, e.g., In re High-Tech Employee Antitrust Litig., 856 F. Supp. 2d 1103, 1122 (N.D. Cal. 2012)* (determining that that plaintiff had alleged "a *per se* violation of the Sherman Act for purposes of surviving a 12(b)(6) motion" but that the ultimate decision of which test applies "is more appropriate on a motion for summary judgment").

Defendants rely on the Supreme Court's decision in *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 596, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*, that ***HN12***[] a plaintiff must present evidence showing that defendants had a "rational economic motive to conspire" and evidence "that tends to exclude the possibility" of independent conduct to survive summary judgment. Courts, however, have correctly **[**50]** held that the bars described in *Matsushita* are not set at the pleading stage. *See, e.g., SD3, LLC v. Black & Decker (U.S.) Inc., 801 F.3d 412, 425 (4th Cir. 2015)* (considering *Twombly* and *Matsushita*, and noting "courts must be careful not to import the summary-judgment standard into the motion-to-dismiss stage"); *Evergreen Partnering, 720 F.3d at 46* (post-*Twombly* "[p]leading requirements are thus starkly distinguished from what would be required at later litigation stages under *Matsushita*"); *Erie Cty., Ohio v. Morton Salt, Inc., 702 F.3d 860, 869 (6th Cir. 2012)* ("there is no authority cited . . . for extending the [*Matsushita*] standard to the pleading stage"); *Jung v. Ass'n of Am. Med. Colleges, 300 F. Supp. 2d 119, 159 (D.D.C. 2004)* ("The Court concludes that application of the *Matsushita* rule simply is not appropriate in the context of a motion to dismiss."); *see also In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 323 (3d Cir. 2010)* ("Although *Twombly*'s articulation of the pleading standard for *§ 1* cases draws from summary judgment jurisprudence, the standards applicable to *Rule 12(b)(6)* and *Rule 56* motions remain distinct.").

Even applying *Matsushita*, however, the Complaint raises a reasonable inference of Defendants' motive to conspire. Specifically, the Complaint alleges facts showing that many dealers preferred open architecture; when CDK began blocking, for example, several dealers loudly complained. In light of those claims, it is inferable that—as is true of most antitrust conspiracies—Defendants (which **[**51]** together control the DMS market) desired the luxury of taking an action profitable for them but disadvantageous to their customers (by excluding a cheaper rival in the downstream data-integration **[*954]** market) without fearing that their customers would respond by, for example, turning to another provider.[11] Making that inference, as the Court must, Defendants' argument fails. Reynolds or CDK could indeed have continued or began to block integrator access independently, like any oligopolist could, say, continue or decide to raise prices independently. But the former fact does not mean Defendants' lacked a motive to conspire to do so, like the latter fact does not mean that oligopolists lack motive to fix prices.

The Complaint plausibly pleads an anticompetitive conspiracy to block third-party integrators' access to DMSs and dealer data.[12] The Court, accordingly, denies Defendants' motions to dismiss with respect to this part of Count One.

b. The Alleged Market-Allocation Agreement

The Complaint also claims that Defendants agreed to divide the data-integration market, in which Authenticom, CDK, and Reynolds allegedly compete for vendors' business. Authenticom bases this theory on the 2015 Agreements' **[**52]** terms. (R. 59 at 23.) Specifically, it alleges that the DEA plainly evidences an agreement in which CDK would forebear from providing integration services on Reynolds DMSs, in exchange for Reynolds's forbearance from providing integration services on CDK DMSs. The point of Defendants' alleged conspiracy, according to Authenticom, is to reap monopoly rents for Defendants' data-integration services. (*E.g.*, Compl. ¶¶ 217.)

Whether or not the market-division agreement is plausible, and insofar as it is distinct from the alleged agreement to block third-party integrators, Authenticom lacks the antitrust injury (if not injury-in-fact) required to challenge that agreement. It is well-established that ***HN13***[] a competitor "cannot recover for a conspiracy to impose nonprice restraints that have the effect of either raising market price or limiting output. Such restrictions, though harmful to competition, actually *benefit* competitors by making supracompetitive pricing more attractive." *Matsushita, 475 U.S. at 583* (emphasis in original); *see also, e.g., JTC Petroleum Co. v. Piasa Motor Fuels, Inc., 190 F.3d 775, 778 (7th Cir. 1999)* (holding that there was no injury and stating, "You *want* your competitors to charge high prices."); *O.K.*

---

11 Indeed, consistent with the Complaint, Authenticom has asserted and submitted evidence that Reynolds's DMS market share began to decline after it implemented closed architecture. As the Seventh Circuit recognized during oral argument on the preliminary injunction, such a fact makes Defendants' repeated declarations of facial "implausibility" dubious.

12 Defendants, correctly, do not argue that Authenticom lacks antitrust injury stemming from this agreement.

Sand & Gravel, Inc. v. Martin Marietta Techs., Inc., 36 F.3d 565, 572 (7th Cir. 1994) ("to the extent that [claimant] was also a seller in the market, increased **[**53]** prices caused it no injury, let alone antitrust injury."); Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1418 (7th Cir. 1989) (competitor lacked injury based on *Matsushita*'s principle). Put differently, as Professors Areeda and Hovenkamp have: **HN14**[] "When a horizontal merger, price fixing, market division, or similar collaboration among competitors substantially reduces competition, consumers suffer while existing rivals benefit." Areeda & Hovenkamp, ***Antitrust Law*** ¶ 348b. That is the case here. As CDK puts it, the alleged market allocation Authenticom complains of "would have *helped* Authenticom" by eliminating its alleged competitors and, after they raised prices, allowing it to undercut them. (R. 54 at 11.) As such, the Complaint **[*955]** fails to plead plausibly injury caused by the alleged market allocation. *See, e.g.,* GSI Tech. v. United Memories, Inc., No. 5:13-CV-01081-PSG, 2014 U.S. Dist. LEXIS 54371, 2014 WL 1572358, at *4 (N.D. Cal. Apr. 18, 2014) ("to the extent that [a firm] claims an antitrust injury from an alleged market allocation agreement between [its competitors], [the firm] does not have standing because it is a competitor in the marketplace, rather than a consumer."); Banxcorp v. Bankrate Inc., No. CIV.A. 07-3398 ES, 2012 U.S. Dist. LEXIS 129098, 2012 WL 3988182, at *2 (D.N.J. Sept. 11, 2012) (same).

The Complaint alleges that it has suffered injury in **[**54]** that "Defendants' written market division agreement caused many vendors to leave Authenticom for Digital Motorworks (i.e., CDK) during the 'wind-down period' because those vendors knew they would not be blocked [from CDK] during that period." (Compl. ¶ 232.) That injury, however, stems from the alleged agreement (discussed earlier) to block Authenticom and other third-party integrators from accessing dealer data, not from the alleged agreement to divide the market and raise prices. In other words, the Complaint alleges that Authenticom's customers headed for the exits in 2015 and 2016 because Authenticom began to lose large-scale access to dealer data, not because competing integrators had divided the market and raised prices. The Court therefore grants Defendants' motions to dismiss with respect to the Complaint's market-division claims without prejudice.

2. Vertical Agreements with Vendors and Dealers

Counts Two and Three also assert *Section 1* violations. Count Two claims that Defendants engage in anticompetitive exclusive dealing, and Count Three claims that Defendants practice illegal tying arrangements. These claims, in essence, take issue with how Defendants have operated their DMSs, and **[**55]** specifically which companies they have permitted—and more importantly restricted—to use and access their DMSs. Defendants challenge both of Authenticom's vertical *Section 1* theories and argue that the Complaint's allegations do not meet the legal requirements for such claims. Before addressing those arguments, the Court addresses another threshold concern: the effect of *Trinko* and *Linkline* on the Complaint's claims.

a. *Trinko* and *Linkline*

The driving animus behind many of Defendants' *Section 1* arguments is that Authenticom essentially challenges Defendants' refusals to deal. The law, as Defendants note, generally permits unilateral refusals to deal by monopolists under *Section 2*, and so certainly permits such unilateral refusals by non-monopolists under *Section 1*.[13] Defendants specifically, and naturally, point to *Trinko* aned *Linkline*. In *Trinko*, the Supreme Court held that a monopolist exchange carrier, Verizon, had no duty to share access to system services it owned and competitors needed to operate their business effectively. *Trinko, 540 U.S. at 410*. The Supreme Court explained that "[c]ompelling such firms to share the source of their advantage is in some tension with the underlying purpose of ***antitrust law***, since it may lessen the incentive **[**56]** for the monopolist, the rival, or both to invest in those economically beneficial facilities." *Id. at 407-08*. A few years later, in *Linkline*, the Court repeated the principle. It held that another telecommunications monopolist, AT&T, had no antitrust duty to deal—let alone a duty to deal on favorable terms—in selling services to its competitors in the retail market. *Linkline, 555 U.S. at 450*. The Supreme

---

[13] Defendants' related *Section 2* arguments are addressed further below.

Court **[*956]** said, as was true in *Trinko*, a monopolist can generally wield its upstream power "to prevent rival firms from competing effectively" in a downstream market. *Id.*

In this case, Defendants submit that Authenticom's *Section 1* claims are "end-run[s]" to *Trinko* and *Linkline*—brought against companies that are not even monopolists. Indeed, the Seventh Circuit, in hearing Defendants' preliminary-injunction appeal, expressed somewhat similar concerns both at oral argument and in its opinion. *See* *Authenticom, 874 F.3d at 1026* ("We are dubious in the extreme that [Authenticom's claims] amount to tying, rather than simply participation at two levels of the market, as in *Linkline*.").

Defendants may ultimately have it right, but the Court cannot adjudicate that issue at this stage. *Trinko* and *Linkline* did not involve exclusive-dealing or tying claims, nor did they abrogate **[**57]** long-standing jurisprudence in those areas. *Accord* *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1072 (10th Cir. 2013)* (distinguishing unilateral refusals to deal from other recognized forms of anticompetitive conduct, like exclusive dealing and tying); *Z-TEL Commc'ns, Inc. v. SBC Commc'ns, Inc., 331 F. Supp. 2d 513, 547 (E.D. Tex. 2004)* ("The Court declines to read *Trinko* so as to lessen antitrust liability in contexts," like tying, which were not "addressed in that opinion"). The Complaint provides well-pleaded allegations regarding the purported markets and, to some extent, Defendants' conduct. Taken as true—as the Court must—those allegations plausibly suggest at least one *Section 1* violation (and a *Section 2* violation, as discussed in that section below). Discovery may reveal otherwise, and show that Authenticom's gripe is confined to Defendants' unilateral refusals to deal. But at this stage, the Court's only role is to determine whether the Complaint states a claim for the causes of actions it advances.

b. Exclusive Dealing (Count Two)

The Complaint claims that Defendants engaged in exclusive dealing with both dealers and vendors via their respective contractual arrangements. Defendants' DMS licenses require a dealer to agree that it will not provide anyone other than Defendants access to the dealer's data on the DMS. Likewise, Defendants' integration-services **[**58]** contracts require a vendor to agree that it will exclusively use Defendants' respective integration services (3PA and RCI) to access data on Defendants' respective DMSs.

HN15[] "An exclusive dealing contract obliges a firm to obtain its inputs from a single source." *Paddock Publ'ns, Inc. v. Chicago Tribune Co., 103 F.3d 42, 46 (7th Cir. 1996)*; *see also* Areeda & Hovenkap, ***ANTITRUST LAW*** ¶ 1800a. "The objection to exclusive-dealing agreements is that they deny outlets to a competitor during the term of the agreement." *Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 393 (7th Cir. 1984)*. Courts, however, "'often approve' of exclusive dealing because of its 'procompetitive benefits.'" *Viamedia, Inc. v. Comcast Corp., 218 F. Supp. 3d 674, 696 (N.D. Ill. 2016)* (quoting *Republic Tobacco Co. v. N. Atl. Trading Co., 381 F.3d 717, 736 (7th Cir. 2004))*. These benefits include "increasing allocative efficiency, reducing adverse selection and moral hazard barriers to deals, and preventing free-riding." *VBR Tours, LLC v. Nat'l R.R. Passenger Corp., No. 14-CV-00804, 2015 U.S. Dist. LEXIS 130455, 2015 WL 5693735, at *12 (N.D. Ill. Sept. 28, 2015)* (citing *Republic Tobacco, 381 F.3d at 736*); *see also* *Methodist Health Servs. Corp. v. OSF Healthcare Sys., 859 F.3d 408, 410 (7th Cir. 2017)*. Because of those recognized procompetitive effects, exclusive dealing "must be analyzed under the Rule of Reason." *Dos Santos v. Columbus-Cuneo-Cabrini **[*957]** Med. Ctr., 684 F.2d 1346, 1352 (7th Cir. 1982)* (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961))*.[14] Under that standard, "[e]xclusive dealing arrangements violate antitrust laws only when they foreclose competition in a substantial share of the line of commerce at issue." *Republic Tobacco, 381 F.3d at 736*; *cf.* *Roland Mach., 749 F.2d at 394* (plaintiff "must prove that [the arrangement] is likely to keep at least one significant competitor of the defendant from doing business in a relevant market . . . [and] he **[**59]** must prove that the probable (not certain) effect of the exclusion will be to raise prices above (and therefore reduce output below)").[15]

---

[14] ***HN16***[] Courts "routinely rely" on *Section 3 of the Clayton Act* cases in assessing exclusive dealing under *Section 1* of the Sherman Act. *Collins v. Associated Pathologists, Ltd., 844 F.2d 473, 478 n. 4 (7th Cir. 1988)*.

[15] Defendants do not contend that the alleged exclusive dealings do not constitute agreements, or that injury is lacking.

Defendants' DMS licenses with dealers are not plausible exclusive dealing. The only thing the Complaint alleges that Defendants sell to dealers through those licenses are DMSs, and there is no allegation (or argument) that Defendants require dealers to purchase and use their respective DMSs exclusively. There is therefore "no exclusivity." *VBR Tours, 2015 U.S. Dist. LEXIS 130455, 2015 WL 5693735, at *12*; *see also* *Gumwood HP Shopping Partners, L.P. v. Simon Prop. Grp., Inc., No. 3:11-CV-268 JD, 2013 U.S. Dist. LEXIS 92133, 2013 WL 3214983, at *8 (N.D. Ind. Mar. 13, 2013)* (***HN17***[] "when a purchaser . . . requires only a single product, it makes no sense to label as an exclusive dealing agreement the decision to purchase that product from one supplier rather than another"). Despite Defendants raising this very point, Authenticom offers no defense of its theory. *See* *Cnty. of McHenry v. Ins. Co. of the West, 438 F.3d 813, 819 (7th Cir. 2006)* (***HN18***[] "When presented with a motion to dismiss, the non-moving party must proffer some legal basis to support his cause of action."); *Fonza v. Chicago Pub. Sch. Dist. #299, No. 17-CV-3571, 2018 U.S. Dist. LEXIS 3888, 2018 WL 337811, at *6 (N.D. Ill. Jan. 9, 2018)* ("it is not the court's role to make the parties' arguments for them") (citing *United States v. McLee, 436 F.3d 751, 760 (7th Cir. 2006))*.

The allegations regarding Defendants' integration-services **[**60]** contracts with vendors are a different story. The Complaint alleges that these contracts require a vendor that uses the 3PA or RCI programs for one dealer to use those programs to obtain data for any and all of its dealer-customers that use CDK or Reynolds DMSs, respectively. In other words, they require the vendor to obtain its integration-services exclusively from Defendants when obtaining data from their DMSs. *See* *Paddock, 103 F.3d at 46*.

The Complaint also has pleaded sufficient facts indicating that these exclusive-dealing contracts could foreclose a substantial portion of the data-integration market. It pleads that each Defendant accounts for at least 30 percent of the DMS market, or a collective 90 percent if judged by cars sold. CDK is right that Defendants' respective share of the *DMS* market is not the operative measure, but the Complaint further alleges that vendors rely on data integrators to access customer-dealers' data on the DMSs that Defendants' dominate. As a result, "[t]here are few, if any, [vendors] that could survive without serving CDK and Reynolds dealers." (Compl. ¶ 175). The Complaint also plausibly suggests that the enforcement of the exclusive-dealing arrangements—which again preclude **[**61]** vendors from working with **[*958]** other integrators on Defendants' DMSs—has likely forced integrators (including Authenticom to an extent) from the market, and that Defendants have been effective at hiking integration costs. *See* *Roland Mach., 749 F.2d at 394*. CDK's exclusive-dealing provisions, moreover, purport to last forever, while Reynolds's last the length of the contract (three years). *Cf.* *Paddock, 103 F.3d at 47*. These allegations raise a reasonable inference that, if enforced, Defendants' exclusive-dealing provisions with vendors could foreclose a substantial portion of the data-integration market and reduce output. *Accord, e.g.,* *In re EpiPen (Epinephrine Injection, USP) Mktg., Sales Practices & Antitrust Litig., No. 17-MD-2785-DDC-TJJ, 2017 U.S. Dist. LEXIS 209710, 2017 WL 6524839, at *10 (D. Kan. Dec. 21, 2017)* ("recognizing that *Tampa Electric* provides a number of other factors which may be relevant to a rule of reason analysis in an exclusive dealing claim . . . [we] refuse[ ] to decide at the pleading stage that plaintiff had failed to plead adequate foreclosure levels to state an exclusive dealing claim"); *In re Ductile Iron Pipe Fitting Direct Purchaser Antitrust Litig., No. 12-711, 2013 U.S. Dist. LEXIS 29865, 2013 WL 812143, at *19 (D.N.J. Mar. 5, 2013)* (***HN19***[] "The question of whether the alleged exclusive dealing arrangements foreclosed a substantial share of the line of commerce is a merits question not proper for the pleading stage.").

Defendants' contrary arguments **[**62]** are, again, ill-timed for this stage of the case. CDK primarily argues that 3PA (like, presumably, RCI) is not a data integrator that competes with Authenticom; it is instead interface software that permits vendors direct access to the DMS. The Court appreciates the distinction, but the Complaint plausibly suggests that it matters little to vendors which rely on either for the primary purpose of obtaining dealers' data. *See* *Ploss v. Kraft Foods Grp., Inc., 197 F. Supp. 3d 1037, 1070 (N.D. Ill. 2016)* (***HN20***[] "Courts should dismiss antitrust claims based on a market argument only when it is certain that the alleged relevant market clearly does not encompass all interchangeable substitute products"); *accord* *Avnet, Inc. v. Motio, Inc., No. 12 C 2100, 2015 U.S. Dist. LEXIS 120449, 2015 WL 5307515, at *4 (N.D. Ill. Sept. 9, 2015)* ("because market definition is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant product market") (quoting *Todd v. Exxon Corp., 275 F.3d 191, 199-200 (2d Cir. 2001))*.

Reynolds argues that the Complaint does not allege substantial foreclosure with respect to Reynolds's conduct, as Authenticom can still work with vendors that service non-Reynolds dealers. But based on Reynolds's allegedly correlated power in the DMS market, and in light of the other foreclosure allegations discussed earlier, the Complaint raises a reasonable inference that Reynolds's exclusive dealing **[**63]** caused substantial foreclosure.[16] Reynolds, like CDK, also cites the procompetitive upsides of exclusive dealing. Those may exist, and they may prevail on the ultimate rule-of-reason balancing, but at this stage Authenticom need only plead facts creating a reasonable inference of substantial foreclosure. *See, e.g.,* *Viamedia, 218 **[*959]** F. Supp. 3d at 696-97*; *accord* *Pecover v. Elecs. Arts Inc., 633 F. Supp. 2d 976, 983 (N.D. Cal. 2009)* ("The rule of reason analysis requires a factual analysis of the line of commerce, the market area and the affected share of the relevant market. Such a factual inquiry is improper at this stage in the proceedings.").

The Court, accordingly, grants Defendants' motions to dismiss as to Count Two's exclusive-dealing claim based on Defendants' DMS licenses with dealers without prejudice, but denies them as to Count Two's exclusive-dealing claim based on Defendants' contracts with vendors.

c. Tying (Count Three)

Regarding the tying claim, the Complaint alleges Defendants' respective DMS licenses with dealers prohibit the dealers from using integrations services other than Defendants' respective ones. As Authenticom puts it, the "contracts with dealers condition the purchase of DMS software (the tying product) on the dealers' agreement to use **[**64]** only Defendants' integration services (the tied product)." (R. 59 at 35.)

HN22[] "A tying arrangement is 'an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier.'" *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 461-62, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (quoting *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5-6, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958))*. "Such an arrangement [also] violates *§ 1* of the Sherman Act if the seller has appreciable economic power in the tying product market and if the arrangement affects a substantial volume of commerce in the tied market." *Batson v. Live Nation Entm't, Inc., 746 F.3d 827, 832 (7th Cir. 2014)* (quoting *Eastman Kodak, 504 U.S. at 462*); *see also* *Sheridan v. Marathon Petroleum Co. LLC, 530 F.3d 590, 594 (7th Cir. 2008)* (tying can violate *Section 1* when "the seller has 'market power' in the market for the tying product"). The Supreme Court has emphasized that the "essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Jefferson Parish, 466 U.S. at 12*.

The Complaint attempts to allege an untraditional tying claim. Authenticom's depiction notwithstanding, the Complaint does not actually plead that Defendants condition the purchase of DMSs on the purchase **[**65]** of integration services. Rather, it claims that Defendants effectively condition the purchase of a DMS on an agreement not to use another company's integration services.

This arrangement is called a "negative tie." *See* *Data Gen. Corp. v. Grumman Sys. Support Corp., 36 F.3d 1147, 1178 (1st Cir. 1994)* (***HN23***[] "*Section 1* also forbids 'negative' ties"), *abrogated on other grounds by* *Reed Elsevier, Inc. v. Muchnick, 559 U.S. 154, 130 S. Ct. 1237, 176 L. Ed. 2d 18 (2010)*. Although "courts rarely encounter" such claims, a "negative tie occurs when the customer promises not to take the tied product from the defendant's competitor." *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1178 (9th Cir. 2016)* (citation,

[16] Reynolds cites no law for the implied proposition that courts should not examine foreclosure in the aggregate among defendants. *See, e.g., See* *Schaefer v. Universal Scaffolding & Equip., LLC, 839 F.3d 599, 607 (7th Cir. 2016)* (***HN21***[] "Perfunctory and undeveloped legal arguments are waived, as are arguments unsupported by legal authority."). In any event, the Court need not address the proposition for the reasons just explained. *But see* *Paddock Publ'ns, Inc. v. Chicago Tribune Co., No. 93 C 7493, 1994 U.S. Dist. LEXIS 13696, 1995 WL 632031, at *5 (N.D. Ill. Oct. 25, 1995)*, *aff'd*, *103 F.3d 42 (7th Cir. 1996)* (addressing when aggregation of exclusive deal's anticompetitive effects is appropriate).

quotations, and modifications omitted); *see also* Grumman Sys., 36 F.3d at 1178 (negative ties are "arrangements conditioning the sale of one product on an agreement *not* to purchase a second product from competing suppliers"); **[*960]** Areeda & Hokenkamp, ***ANTITRUST LAW*** ¶ 1752c (although "rarely encountered," a tying arrangement "is fully satisfied when the defendant's customer promises not to take the tied product from the defendant's rival"). The Supreme Court recognized the arrangement (though not in name) in *Eastman Kodak* when it held that there was an issue of fact regarding whether a firm's sale of its parts premised on an agreement that the purchaser would not use a competitor's servicers was an illegal tie. 504 U.S. at 463; *see also* id. at 462 (defining tying as "at least [an] agree[ment] **[**66]** that [a purchaser] *will not purchase that product* from any other supplier'") (emphasis added); *accord* RealPage, Inc. v. Yardi Sys., Inc., 852 F. Supp. 2d 1215, 1223 (C.D. Cal. 2012) (holding that in light of *Eastman Kodak*, plaintiff had pleaded a negative tying claim); In2 Networks, Inc. v. Honeywell Int'l, No. 2:11-CV-6-TC, 2011 U.S. Dist. LEXIS 117589, 2011 WL 4842557, at *8 (D. Utah Oct. 12, 2011) ("[Plaintiff] alleges that [defendant] conditioned the sale of its products on the third-party *not buying* [plaintiff's] products. This type of 'negative tie' can be the basis of a tying claim") (citing Eastman Kodak, 504 U.S. at 461). That is the sort of sales conditioning that the Complaint attempts to allege.

Defendants, however, take issue with a second atypical feature of the alleged tie—dealers buy the tying product (DMS) but not the tied product (integration services). *See, e.g.,* Jefferson Parish, 466 U.S. at 12; *see also, e.g.,* Live Nation, 746 F.3d at 832. Authenticom does not contend that a cognizable tying arrangement can include two (or more) levels of purchasers, but they do claim that dealers are the "relevant targets" of the arrangement.

The Supreme Court has emphasized that **HN24**[] the Sherman Act "is aimed at substance rather than form." Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 760, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984); *see also* Eastman Kodak, 504 U.S. at 466-67 ("[F]ormalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***. This Court has preferred to resolve antitrust claims on a case-by-case **[**67]** basis, focusing on the particular facts disclosed by the record.") (internal quotations and citation omitted); In re Loestrin 24 Fe Antitrust Litig., 814 F.3d 538, 550 (1st Cir. 2016) (***antitrust law*** "consistently prioritize[s] substance over form"). When it comes to tying, ***antitrust law***'s substantive and "core concern" is that the practice "prevents goods from competing directly for consumer choice on their merits." United States v. Microsoft Corp., 253 F.3d 34, 87, 346 U.S. App. D.C. 330 (D.C. Cir. 2001) (citing Jefferson Parish, 466 U.S. at 13). In other words, tying presents a risk of anticompetitive "leverage"—the "special ability" of a supplier with market power "to force a purchaser to do something that he would not do in a competitive market." Jefferson Parish, 466 U.S. at 13-14 & n.20; *see also* Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶ 1700d; *accord* Sheridan, 530 F.3d at 592.

In this case, the Complaint does not plausibly plead that dealers are the purchasers whose "consumer choice" is improperly constrained by the alleged tie. *See* Microsoft, 253 F.3d at 87. To the contrary, the Complaint asserts that vendors engage and pay integrators for their services. The Complaint does claim that dealers have historically "had the right to grant data access to the integrator of their choice" and that "it is the dealer's choice to evaluate the security protections of data, and select one that meets their standards." (Compl. ¶¶ 5, 16.) Those allegations, **[**68]** however, are conclusory, and they are inconsistent **[*961]** with the other claims that vendors select integrators. (*Id.* ¶ 115 ("If CDK and Reynolds' integration products were reasonable substitutes, *application providers* would choose between them") (emphasis added), ¶ 18 (bringing suit "so that vendors (and dealers) can select a data integrator of their choice"), ¶ 5 ("When dealers and vendors had a choice of which integrator to use, the integration market flourished").) The Complaint also alleges that vendors "pass most if not all" of Defendants' increased data-integration fees on to dealers. (Compl. ¶ 224.) That generalized allegation, however, does not plausibly suggest that dealers, not vendors, make the economic choice about which integrator to use and suffer the consequences of those decisions. *Cf.* Dos Santos, 684 F.2d at 1354 (in dicta, stating that a hospital, rather than a patient, may be the "real purchaser" for antitrust purposes because the patient does not make the "significant economic decision[s]" about which anesthesia services to use); *see also* Aerotec, 836 F.3d at 1179 (holding that there was no "de facto" or "implied" tie because there was no evidence of conditioning on the consumer).

No alleged facts plausibly suggest that—despite **[**69]** vendors engaging, paying, and receiving directly integrators' services—dealers are the effective and actual purchasers of those services. The Complaint therefore does not state a tying claim, and the Court grants Defendants' motions to dismiss with respect to Count Three without prejudice.

C. Authenticom's *Section 2* Claim (Count Four)

The Complaint also includes a claim under *Section 2* of the Sherman Act for monopolization. ***HN25***[] To plead such a claim, a plaintiff must allege (1) that the defendant "possessed monopoly power" in an antitrust market, and (2) that the defendant "willfully acquired or maintained that power by means other than the quality of its product, its business acumen, or historical accident." *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 854 (7th Cir. 2011)*; *see also* *Comcast Corp. v. Behrend, 569 U.S. 27, 43, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*. The Complaint, however, does not plead that either CDK or Reynolds are monopolists in the DMS or data-integration markets. It claims instead that Defendants have monopolized the purported data-integration aftermarkets for their respective DMSs. Defendants, in response, argue that the Complaint fails to plead the narrow sort of aftermarket claim the Supreme Court blessed in *Eastman Kodak* and that it fails to allege the acquisition of power through unlawful conduct. The Court disagrees.

1. [**70] The Single-Brand Aftermarket

HN26[] "In rare circumstances, a single brand of a product or service can constitute a relevant market for antitrust purposes." *PSKS, Inc. v. Leegin Creative Leather Prods., Inc., 615 F.3d 412, 418 (5th Cir. 2010)*. *Eastman Kodak* is the principal authority describing such circumstances. In that case, independent-service operators of photocopiers and micrographic equipment sued Kodak for, among other things, monopolizing the sale of services for Kodak machines. *504 U.S. at 459*. After doing well selling equipment, Kodak moved to control the repairs of its equipment. It specifically implemented a new policy of selling replacement parts only to owners that used Kodak's services or repair their own machines. As part of the same policy, manufacturers agreed not to sell replacement parts to anyone but Kodak, and Kodak "pressured" owners and distributors not to sell replacement parts to independent service providers. *Id.*

[*962] Kodak first argued that it could not exercise power in the markets for its parts and services because there was bona fide competition in the upstream market for equipment, and therefore customers could check supracompetitive pricing for parts and services by turning to Kodak's manufacturer-competitors. The Supreme Court disagreed. It held that ***HN27***[] in a "market **[**71]** for complex durable goods," like the one at issue, customers may face "significant information and switching costs" in attempting to change equipment manufacturers, and "[l]ifecycle pricing" is difficult for consumers to calculate when initially purchasing equipment. *Id. at 473*. The Supreme Court, moreover, found it important that Kodak had "locked in" many customers before changing its policy to dominate the parts and services aftermarkets. *Id. at 475*. The Supreme Court thus held that a factual question existed as to "whether information costs and switching costs foil the simple assumption that the equipment and service markets act as pure complements to one another." *Id. at 477*. Kodak later argued "that, as a matter of law, a single brand of a product or service can never be a relevant market under the Sherman Act." *Id. at 481*. The Supreme Court again disagreed. It reasoned that the relevant antitrust market was "determined by the choices available for Kodak equipment owners." *Id. at 482* (citing *Jefferson Parish, 466 U.S. at 19*). Because Kodak's parts are not interchangeable with other manufacturers', the Supreme Court concluded that the relevant market from the "owner's perspective is composed of only those companies that service Kodak machines." *Id. at 482*.

The Seventh **[**72]** Circuit has since elucidated *Eastman Kodak*'s holding. In *Digital Equip. Corp. v. Uniq Digital Techs., Inc., 73 F.3d 756, 762 (7th Cir. 1996)*, the court explained that the *Eastman Kodak* Court "conceded that customers who had anticipated the change of policy could not be exploited." Indeed, "[c]ompetition among manufacturers fully protects buyers who accurately calculate life-cycle costs"—but for customers who did or could not have that anticipation, "Kodak had some ability to extract additional money by raising prices." *Digital Equip., 73 F.3d at 762*. It went on:

> The Court did not doubt in *Kodak* that if spare parts had been bundled with Kodak's copiers from the outset, or Kodak had informed customers about its policies before they bought its machines, purchasers could have shopped around for competitive life-cycle prices. The material dispute that called for a trial was whether the change in policy enabled Kodak to extract supra-competitive prices from customers who had already purchased its machines.

Id. at 763. In *Schor v. Abbott Labs., 457 F.3d 608, 614 (7th Cir. 2006)*, the court explained further: "What the Supreme Court held in [*Eastman Kodak*] is not that firms with market power are forbidden to deal in complimentary products, but that **HN28**[] they can't do this in ways that take advantage of customers' sunken costs" by, in *Kodak*'s case, "mov[ing] to claim all of **[**73]** the repair work for itself." *See also* *PSI Repair Servs., Inc. v. Honeywell, Inc., 104 F.3d 811, 819 (6th Cir. 1997)* ("Both the First and the Seventh Circuits have interpreted Kodak to be limited to situations in which the seller's policy was not generally known.") (citing *Digital Equip., 73 F.3d at 763*, *Lee v. Life Ins. Co. of North America, 23 F.3d 14, 20 (1st Cir. 1994)*, *cert. denied*, *513 U.S. 964, 115 S. Ct. 427, 130 L. Ed. 2d 340 (1994))*.

Other circuits have echoed that an *Eastman Kodak* claim depends on the consumer's **[*963]** unawareness of the supplier's aftermarket power and its terms when it purchased the primary-market product. *See, e.g.,* *id. at 820* ("the change in policy in Kodak was the crucial factor in the Court's decision"); *Avaya Inc., RP v. Telecom Labs, Inc., 838 F.3d 354, 405 (3d Cir. 2016)* ("no antitrust liability for a *Kodak*-style attempted monopolization claim could lie after May 2008 when customers were put on clear notice that purchasing [defendant's] precluded use of [third-party] maintenance"); *DSM Desotech Inc. v. 3D Sys. Corp., 749 F.3d 1332, 1346 (Fed. Cir. 2014)* (stating, "[c]rucial to the *Kodak* decision . . . was the fact that customers had already purchased their equipment before learning about Kodak's policies on aftermarket parts and services[,]" and holding, "[c]ustomers who learn about the RFID lock before buying the equipment cannot be exploited in the same way as the 'locked-in' customers because they can shop around for competitive life-cycle prices."); *see also, e.g.,* *Collins Inkjet Corp. v. Eastman Kodak Co., 781 F.3d 264, 278 (6th Cir. 2015)* (holding that plaintiff sufficiently **[**74]** stated an *Eastman Kodak* claim in large part because "there is no indication that . . . customers had any reason to expect sharp variations in aftermarket prices" although they were sophisticated purchasers). The Ninth Circuit aptly summarized the post-*Eastman Kodak* world this way: **HN29**[] "[T]he law permits an antitrust claimant to restrict the relevant market to a single brand of the product at issue (as in *Eastman Kodak*)," but "the law prohibits an antitrust claimant from resting on market *power* that arises solely from contractual rights that consumers *knowingly and voluntarily* gave to the defendant." *Newcal Indus., Inc. v. Ikon Office Sol., 513 F.3d 1038, 1048 (9th Cir. 2008)* (second emphases added).[17]

Taking the aftermarket case against CDK first, the Complaint plausibly pleads a claim. The Complaint alleges facts suggesting that consumers are "locked in" after purchasing CDK DMSs, given the initial investments required, the contract length, and the resources required to change DMSs. It also alleges that CDK changed from open architecture to closed architecture as a matter of policy in 2015, which resulted in hefty integration-service fees. CDK contends that because its DMS licenses with dealers expressly prohibit DMS access to anyone other than the dealers' **[**75]** "employees and agents," dealers knew what they were signing up for. The Complaint is replete with detailed allegations, however, showing that, before 2015, CDK publicly and loudly took the position that it permitted third-party integrator access. It is thus inferable that dealers did not in fact "knowingly and voluntarily" agree to third-party blocking when they purchased DMSs. *See id.* That the licenses permit "agents" to access the DMS adds to the conclusion that CDK may have duped dealers by closing its architecture post-sale, even if CDK is correct that integrators do not actually constitute agents under state law.

In addition to the 2015 switch in policy, the Complaint alleges that CDK's contracts with vendors prohibit the vendors from informing dealers of how much CDK's integration services cost, or even telling dealers any part of its charges from vendors are "in any [ ] way associated with" CDK's costs. From that, it is reasonably inferable that dealers cannot price shop for "lifecycle"—a fact that the *Eastman Kodak* court found critical. *504 U.S.* **[*964]** *at*

---

[17] Defendants do not challenge whether the alleged aftermarkets are insufficient for failing to exclude reasonable alternatives (*see* R. 54 at 20-23, R. 57 at 29-38)—a question best left for summary judgment anyway.

473-75. CDK's counter argument—that the Complaint pleads that some dealers complained about the costs, and thus the allegations about price-secrecy **[**76]** are not well-pleaded—is a stretch. A contract can prohibit vendors from sharing pricing information and a few vendors can do so anyway. Altogether, as was true in *Eastman Kodak*, "[t]he proper market definition in this case can be determined only after a factual inquiry into the 'commercial realities' faced by consumers." 504 U.S. at 482.

The aftermarket case against Reynolds is thinner, but nevertheless sufficient at this stage. Reynolds points out that the Complaint affirmatively pleads its long-standing opposition to thirdparty integration, which started in 2009 at the latest. It pleads further that Reynolds's has made this stance publicly known, and that its contracts expressly ban "provid[ing] access to . . . any third party." The Complaint, therefore, affirmatively pleads that Reynolds's closed architecture was generally known to customers before they purchased the product (during whatever can be considered the relevant period, at least).[18]

But a change in aftermarket practices is not the sole worry of *Eastman Kodak* and its progeny. *See* Harrison Aire, Inc. v. Aerostar Int'l, Inc., 423 F.3d 374, 384 (3d Cir. 2005) (**HN30**[] "an 'aftermarket policy change' is not the *sine qua non* of a *Kodak* claim"). Rather, as explained, the Supreme Court expressed more general concerns about customers **[**77]** that unknowingly and involuntarily sign on for the defendant's aftermarket power. *See* Eastman Kodak, 504 U.S. at 473-75. Included in that group, according to the Supreme Court, are those unable to undertake lifecycle-cost analyses (at least at some, reasonable level) before purchasing the primary product because the requisite "information is difficult—some of it impossible—to acquire at the time of purchase." Id. at 473-74. Indeed, the Seventh Circuit recognized as much in explaining that "[c]ompetition among manufacturers fully protects buyers who *accurately* calculate life-cycle costs," but where customers cannot do so, a supplier-defendant (*i.e.*, Kodak, in the court's description) can charge supracompetitive prices in the aftermarket. Digital Equip., 73 F.3d at 762 (emphasis added). Like CDK, the Complaint pleads that Reynolds employs contracts that prohibit vendors from sharing with dealers Reynolds's integration fees, which are allegedly subject to varying, significant, and frequent increases. Taken as true, those alleged "market imperfections" suggest that dealers may be unable to assess lifecycle costs like the Eastman Kodak owners. Newcal, 513 F.3d at 1050; Image Tech. Serv., Inc. v. Eastman Kodak Co., 903 F.2d 612, 617 (9th Cir. 1990), *aff'd sub nom.* Eastman Kodak, 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (**HN31**[] "market imperfections can keep economic theories about how consumers will act from mirroring reality") **[**78]** (citing Jefferson Parish, 466 U.S. at 15 n. 24)); *see also* Areeda & Hovenkamp, ***ANTITRUST LAW*** ¶¶ 1740, 1740a. Despite Authenticom making this point, Reynolds ignores it altogether.

Ultimately, Authenticom "must produce hard evidence dissociating the competitive situation in the aftermarket from activities occurring in the primary market." Avaya, 838 F.3d at 402. At this stage, however, the Complaint adequately pleads an aftermarket claim against Reynolds.

[*965] 2. Acquisition of Power by Anticompetitive Means

That leaves the question of whether the Complaint has adequately alleged that Defendants have monopolized their respective aftermarkets through anticompetitive means. **HN32**[] "Where defendant has engaged in unlawful restraint of trade that would independently violate Section 1 of the Sherman Antitrust Act, it is well established that it also violates Section 2 if it acquires or maintains a monopoly by means of that restraint of trade." Gumwood HP, 2013 U.S. Dist. LEXIS 92133, 2013 WL 3214983, at *7 (citing United States v. Griffith, 334 U.S. 100, 106, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)). As already determined, the Complaint adequately pleads that Defendants have engaged in a conspiracy to block Authenticom and exclusive dealing. Defendants do not argue that such conduct is insufficiently anticompetitive for Section 2's purposes.

Defendants do, however, fall back on *Trinko* and the CFAA. Those positions are unpersuasive mostly **[**79]** for reasons already explained. *Accord* Viamedia, 218 F. Supp. 3d 674 (denying a motion to dismiss with respect to Section 2 tying and exclusive dealing claims, but granting it with respect to Section 2 refusal-to-deal claim).

[18] Authenticom's attempt to walk back that pleading by calling Reynolds's initial blocking as "tepid" is unpersuasive.

Defendants emphasize, for example, that Authenticom has no right to access the DMSs, and that its *Section 2* claim is really an attempt to "enforce[ ] sharing" of Defendants' DMSs. That concern is both premature and misplaced. As the Seventh Circuit has made clear, ***HN33***[] in no event will there be an enforced duty to deal. *Authenticom, 874 F.3d at 1025-26*. If the alleged agreement violates the Sherman Act, the proper remedy is to "set the offending agreement aside." *Id. at 1026*. If the alleged ties (if later pleaded plausibly) do the same, "the proper remedy would be to enjoin the tie." *Id.* As for the cyber-security laws, Defendants argue that their right to deny third parties access to their computers is not "override[n]" by the Sherman Act. True, but so is the inverse—cyber-security laws do not give Defendants an antitrust defense.

The Court therefore denies Defendants' motions to dismiss with respect to Count Four.

II. Tortious Interference (Count Five)

Finally, the Complaint alleges that Defendants tortuously interfered with Authenticom's business by engaging in the **[**80]** conduct that forms the bases of the antitrust claims as well as by spreading "falsehoods" about Authenticom's security. ***HN34***[] "In an MDL, a court must apply the choice-of-law rules of the transferor forum." *Chang v. Baxter Healthcare Corp., 599 F.3d 728, 732 (7th Cir. 2010)*; *see also Dairy Farmers*, 2015 WL 3988488, at *22. ***HN35***[] Under Wisconsin law, tortious interference with contractual relations has five elements: "(1) the plaintiff had a contract or prospective contractual relationship with a third party; (2) the defendant interfered with the relationship; (3) the interference was intentional; (4) a causal connection exists between the interference and the damages; and (5) the defendant was not justified or privileged to interfere." *Comsys Inc. v. City of Kenosha, 2017 U.S. Dist. LEXIS 70518, 2017 WL 1906750, at *22 (E.D. Wis. May 9, 2017)* (quoting *Burbank Grease Servs., LLC v. Sokolowski, 2006 WI 103, 294 Wis. 2d 274, 717 N.W.2d 781, 796 (Wis. 2006))*. Wisconsin courts also appear to follow the Restatement (Second) of Torts' approach to tortious interference. *See* *Magnum Radio, Inc. v. Brieske, 217 Wis. 2d 130, 577 N.W.2d 377, 379 (Wis. Ct. App. 1998)*.

Defendants argue that the Complaint fails to plead the first and fifth elements. They contend that Authenticom's vendor contracts are invalid and unenforceable in that they are illegal under **[*966]** the cyber-security laws. The Complaint, however, does not plead that assertion. Further, as already noted, the question of "authorization" is fact-intensive and its resolution on these pleadings is inappropriate. *See, e.g.,* *Weingand, 2012 U.S. Dist. LEXIS 123160, 2012 WL 3763640, at *2*. Defendants point to no case **[**81]** in which a court has dismissed claims based on the notion that the Complaint affirmatively pleaded a violation of cyber-security laws. Defendants also contend that *Section 773 of the Restatement (Second) of Torts*, which says that ***HN36***[] a party may be "justified or privileged to interfere" if it is asserting "in good faith a legally protected interest," protects their conduct. As Authenticom correctly notes, however, that exception does not extend to otherwise illegal acts. *See* *Restatement (Second) of Torts § 767 cmt. c* (1979) ("Conduct specifically in violation of statutory provisions or contrary to established public policy may for that reason make an inference [that the defendant acted without inappropriate motive] improper. This may be true, for example, of conduct that is in violation of antitrust provisions or is in restraint of trade"). Moreover, courts recognize that the issue is a factual one inappropriate for resolution on a motion to dismiss. *See* *Metso Minerals Indus., Inc. v. FLSmidth-Excel LLC, No. 07-CV-926, 2010 U.S. Dist. LEXIS 483, 2010 WL 55845, at *3 (E.D. Wis. Jan. 5, 2010)*. The Court, accordingly, denies Defendants' motions to dismiss Count Five.

CONCLUSION

For the foregoing reasons, the Court grants in part and denies in part Defendants' motions to dismiss. If Authenticom wishes to replead any claims that the Court has dismissed without prejudice, it has until June 4, 2018, to do so.

Opinion

MEMORANDUM OPINION

I. INTRODUCTION AND PROCEDURAL HISTORY

This opinion addresses a second round of motions to dismiss after Plaintiffs' Amended Complaint was dismissed **[*2]** with leave to amend on October 18, 2017. Doc. 68. Plaintiff filed a Second Amended Complaint ("SAC") on November 21, 2018. Doc. 71. All three Defendants moved to dismiss the SAC. Docs. 77, 79, 81. While Plaintiffs added certain new allegations in the SAC, the core of Plaintiffs' complaint remained the same Comcast, which once employed Plaintiffs as cable installation subcontractors, terminated Plaintiffs and many others in an effort to reduce its costs and streamline its subcontractor operations. Doc. 71 ¶¶ 40, 41. As a result, Plaintiffs lost the business of a lucrative client, while Defendants Decisive and Vitel, who were also Comcast's subcontractors, were able to retain Comcast's business. Id. ¶ 42.

The Court assumes the parties' familiarity with the facts, given the parties' extensive briefing on the matter and this Court's previous motion to dismiss opinion. Doc. 67. Thus, this memorandum will primarily address the new and relevant allegations from the SAC. For reasons stated below, the Court reaffirms the legal principles and its analyses found in its previous opinion. The SAC will be dismissed with prejudice because Plaintiffs failed to cure the defects specified in this Court's **[*3]** previous opinion.

II. FACTUAL ALLEGATIONS

Plaintiffs are cable installation companies that were former subcontractors of Comcast Cable Communications of Pennsylvania, Inc. ("Comcast"). Plaintiffs brought suit against Comcast and two other cable installation subcontractors, Vitel and Decisive, for alleged violations under the *Sherman Act* and state antitrust laws, as well as an employment claim against Comcast for reverse discrimination. Doc. 71. Comcast is a cable television company and an internet service provider, which "offer[s] broadband, cable- based Internet access" to individual consumers. *Id.* ¶¶ 11, 16. In order to service its customers, Comcast subcontracts with certain cable installation companies such as Plaintiffs and Vitel and Decisive, to install fiber optic cables and hardware. *Id.* ¶¶ 16, 29. In 2009, Comcast subcontracted with approximately 176 regional cable installation companies. Id. ¶ 41. In their previous complaint, which was dismissed by this Court, Plaintiffs alleged that they "competed successfully in a 2010 Request For Proposal [RFP] process." Doc. 41 ¶ 16. However, the SAC changed the allegation to "Plaintiffs mistakenly believed they competed successfully in **[*4]** [the RFP] process because they were told to 'ramp up' in certain Divisions [by Comcast]." Doc. 71 ¶ 30. The SAC alleges that operating under this mistaken assumption, "Plaintiffs 'ramped up' their operations, costing them hundreds of thousands of dollars to more likely over a million dollars." *Id.* ¶ 38. However, "Comcast never awarded any contracts pursuant to the RFP." *Id.* ¶ 39. Instead, Comcast initiated a "national subcontractor reduction plan" that called for a reduction of Comcast's cable installation subcontractors to 39 firms, which resulted in the termination of its relationship with Plaintiffs in 2012, while Decisive and Vitel were among the firms that were kept on by Comcast. *Id.* ¶¶ 42, 58. Plaintiffs allege that Comcast conspired with Vitel and Decisive to transition Plaintiffs' cable installation responsibilities to them and "helped develop a monopoly for Vitel and Decisive in the Regions that the Plaintiffs worked." *Id.* ¶¶ 170-174. Due to the loss of Comcast's business, Plaintiffs were forced to close down their business. *Id.* ¶¶ 82-84. The SAC further alleges that by hiring only a few regional cable installation companies, "Comcast controlled the price and pushed down **[*5]** the price of cable installation," with "the only benefit [going] to Comcast, Decisive, and Vitel," while installation workers' "wages decreased and the amount of hours employees had to perform increased." *Id.* ¶¶ 99-102. In support, the SAC cites certain newspaper articles from 2016, which purportedly reported poor working conditions for cable installation employees. *Id.* ¶¶ 90-96. Plaintiffs also allege, for the first time, that Comcast had bought up other cable providers, i.e. its competitors, "[i]n the very late 1990's...into the early 2000's" and that Comcast "used a non- compete agreement to block the sale of [Plaintiff]" to Comcast's competitor, Exelon, "in the early 2000's." *Id.* ¶¶ 10, 15, 24, 78.

Additionally, Plaintiffs rehashed their previous allegations that Decisive and Vitel were retained by Comcast was because they were able to underbill Comcast and manipulate performance metrics, thereby "saving Comcast hundreds of millions up to a billion dollars." *Id.* ¶¶ 43-57. Plaintiffs also allege that Vitel "misappropriated and resold hundreds of thousands of dollars of Comcast equipment." *Id.* ¶ 165. Yet, despite these practices, Comcast continued to retain Decisive and Vitel because **[*6]** "it benefitted them with their shareholders, rising stock prices, and a higher profitability." *Id.* ¶ 139.

Finally, the SAC restates Plaintiffs' reverse employment discrimination claim, largely relying on allegations from the Amended Complaint. The Court previously dismissed this claim for failing to raise an inference that Plaintiffs' termination was motivated by their owners' race, as opposed to other factors abundantly pleaded in their Amended Complaint. Doc. 67 at 26-29. The only new, substantive allegations in the SAC relating to employment discrimination are that Vitel was chosen over Plaintiffs even though both had "over 100 trucks" and "Plaintiffs performed as well, or better, as Defendant Vitel at installing cable." Doc. 71 ¶¶ 181, 195.

III. STANDARD OF REVIEW

A complaint must be dismissed under *Federal Rule of Civil Procedure 12(b)(6)* if it does not allege "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)*.

"While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual **[*7]** allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (internal citations, alterations, and quotations marks omitted). A court "take[s] as true all the factual allegations in the Complaint and the reasonable inferences that can be drawn from those facts, but . . . disregard[s] legal conclusions and threadbare recitals of the elements of a cause of action, supported by mere conclusory statements." *Ethypharm S.A. France v. Abbott Labs., 707 F.3d 223, 231 n.14 (3d Cir. 2013)* (internal citation, alteration, and quotation marks omitted). Thus, "the presumption of truth attaches only to those allegations for which there is sufficient 'factual matter' to render them 'plausible on [their] face." *Schuchardt v. President of the U.S., 839 F.3d 336, 347 (3d Cir. 2016)* (alteration in original) (quoting *Iqbal, 556 U.S. at 679*). "Conclusory assertions of fact and legal conclusions are not entitled to the same presumption." *Id.*

"Although the plausibility standard 'does not impose a probability requirement,' it does require a pleading to show 'more than a sheer possibility that a defendant has acted unlawfully." *Connelly v. Lane Constr. Corp., 809 F.3d 780, 786 (3d Cir. 2016)* (internal citation omitted) (first quoting *Twombly, 550 U.S. at 556*; then quoting *Iqbal, 556 U.S. at 678*). "The plausibility determination **[*8]** is 'a context-specific task that requires the reviewing court to draw on its judicial experience and common sense.'" *Id. at 786-87* (quoting *Iqbal, 556 U.S. at 679*).

IV. ANALYSIS

A. Plaintiffs Continue to Fail to Allege Antitrust Injury, Conspiracy, and Anticompetitive Effects in the Relevant Market

The essence of Plaintiffs' allegations is that Comcast, in order to reduce costs and streamline operations, dramatically decreased its number of cable installation subcontractors through a "national subcontractor reduction plan." Doc. 71 ¶¶ 40, 41. As a consequence, Plaintiffs, who were two of Comcast's installation subcontractors, lost the business they had previously enjoyed with Comcast, while Defendants Decisive and Vitel, who were also Comcast's subcontractors, were chosen by Comcast to continue to retain its business. *Id.* ¶ 42. In its previous opinion, this Court held that the Amended Complaint did not state an antitrust action because Plaintiffs (1) failed to plead antitrust injury because they only alleged injury as to themselves, not to competition in the marketplace, (2) failed to plead a conspiracy among Defendants, but instead, consistently alleged unilateral decision- making by

Comcast, and (3) failed to **[*9]** allege anticompetitive effects as required by the "rule of reason" analysis. Doc. 67. Because the SAC fails to adequately cure any of deficiencies enumerated by this Court, Plaintiffs continue to fail to state a claim under the Sherman Act.

First, Plaintiffs' injury does not flow from anticompetitive behavior, but rather, from the termination by a single client, Comcast. This Court noted in its previous opinion that to plead an antitrust claim, Plaintiffs must first allege the threshold element of antitrust injury, that is, "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S.Ct. 690, 50 L.Ed.2d 701 (1977)*. This requirement ensures that antitrust laws are enforced "for the protection of competition, not competitors." *Id. at 488*. After all, *Section 1 of the Sherman Act* does not prohibit all agreements among market participants, but only those aimed to create "*unreasonable* restraints of trade." *West Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 99 (3d Cir. 2010)* (citing *Standard Oil Co. v. United States, 221 U.S. 1, 58, 31 S.Ct. 502, 55 L.Ed. 619 (1911))* (emphasis in original).

As the Third Circuit recently held, "[c]ompetition is at the heart of the antitrust laws; it is only anticompetitive conduct, or 'a competition-reducing aspect or effect of the defendant's behavior,' that **[*10]** antitrust laws seek to curtail." *Philadelphia Taxi Ass'n, Inc v. Uber Techs., Inc., 886 F.3d 332, 338 (3d Cir. 2018)* (quoting *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S.Ct. 1884, 109 L.Ed.2d 333 (1990))*. In *Philadelphia Taxi Ass'n*, the Court noted that Appellants, Philadelphia taxi drivers, cannot plead antitrust injury by simply alleging that their own business was harmed when a powerful competitor, Uber, entered the market:

> [a]llegations of purportedly anticompetitive conduct are meritless if those acts would cause no deleterious effect on competition. This is where the SAC falters: Appellants set forth a litany of ways in which Uber's entry into the market has harmed Appellants' business and their investment in medallions; yet none of the allegations demonstrate a harmful effect on competition.

Id. at 339. *See also* *Eichorn v. AT&T Corp., 248 F.3d 131, 140 (3d Cir. 2001)* (noting that the Third Circuit has "consistently held an individual plaintiff personally aggrieved by an alleged anti-competitive agreement has not suffered an antitrust injury unless the activity has a wider impact on the competitive market."). An antitrust injury must "result from a lessening of competition," even if "there may be an agreement which is harming others in the marketplace." *City of Pittsburgh v. West Penn Power Co., 147 F.3d 256, 266 (3d Cir. 1998)*.

Despite having three chances to plead antitrust injury, the SAC still falls short of pleading negative impact beyond Plaintiffs' own injury. The SAC **[*11]** offers no new substantive allegations as to whether there are any buyers for Plaintiffs' cable installation services aside from Comcast, whether Plaintiffs attempted to obtain their business after being terminated by Comcast, or whether Defendants' actions led to more barriers to entry for cable installation companies. *See, e.g.*, Doc. 71 ¶ 82 (declaring that "if Comcast was not using your cable installation company, there was no work," without alleging that Plaintiffs actually tried to find business elsewhere after losing Comcast as a client, or that companies similar to Plaintiffs tried and failed to find business after being terminated by Comcast).

In addition, there is no indication that there was an overall decrease in demand for cable installation services. While Plaintiffs allege that a single buyer, Comcast, decreased its demand for cable installation services *as to Plaintiffs*, they have not alleged that Comcast decreased its demand for such services overall, nor that other buyers of installation services besides Comcast decreased their demand for such services. In other words, the SAC fails to allege that the overall demand for cable installation services suffered. *Cf.* *Philadelphia Taxi Ass'n, 886 F.3d at 342* (holding **[*12]** that Appellants failed to allege attempted monopolization claim when they only argued that Uber "pushed numerous competitors out of the market" but did not "allege anticompetitive practices by Uber" or "mention Uber's market share; [the complaint] merely suggests that Uber and medallion taxicabs had similar numbers of vehicles operating in Philadelphia....This allegation falls short of indicating Uber's market share in the context of all the competitors in the Philadelphia taxicab market, such as other [Transportation Network Companies].")

In fact, the SAC blithely alleges that "there was no longer the same demand for the amount of services by different companies since all the services were being channeled into Vitel and Decisive." *Id.* ¶ 80. This only reveals Plaintiffs' confusion over what constitutes antitrust injury, as they appear to concede that Comcast continued to have a healthy demand for installation services, only it chose to channel its demand to Plaintiffs' competitors, as opposed to Plaintiffs. Once again, a plaintiffs "own injury, namely, financial hardship," without more, cannot be used to in place of pleading "an antitrust injury, such as a negative impact on consumers **[*13]** or to competition in general, [or] any link between this impact and the harms Appellants have suffered." *Philadelphia Taxi Ass'n, 886 F.3d at 344*. But "harm to [Plaintiffs'] business does not equal harm to competition." *Id.* "Conduct that merely harms competitors...while not harming the competitive process itself, is not anticompetitive." *Id.* (quoting *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 308 (3d Cir. 2007))*.

As the Court's previous opinion found, Plaintiffs' injury flows from their loss of "a single—albeit lucrative—client." Doc. 67 at 13. This type of injury does not amount to a decline in *competition* in the overall cable installation market. If anything, Comcast's subcontractor reduction plan, which the SAC alleges was the result of Comcast's effort to select subcontractors with the lowest prices, is exactly the type of competition that antitrust laws are meant to foster. In fact, the SAC repeatedly alleges that Comcast chose its subcontractors by "determin[ing] the lowest amount that Comcast could pay Plaintiffs and other cable installation companies" and by measuring the quality of its subcontractors through the use of performance metrics. *Id.* ¶¶ 27,125, 130-31. In particular, the SAC alleges that "Comcast chose to work with Decisive and Vitel t o . . . drive down labor costs" **[*14]** and that Decisive and Vitel were chosen because they could "absorb those losses in order to be allocated a larger share of the market." *Id.* ¶ 172. These allegations, if true, would only give rise to an inference that Comcast tried to reduce its costs, which may benefit its ultimate consumers. In sum, the SAC complains of the fact that Decisive and Vitel were able to reduce their rates to seem more attractive to Comcast, and were rewarded with a larger volume of Comcast's business over Plaintiffs—this is precisely the type of competitive behavior that antitrust laws are meant to foster, not deter. Even if Decisive and Vitel's competitive rates led to the byproduct of pushing other competitors, such as Plaintiffs, out of the market, it cannot be labeled as "anticompetitive" behavior because "[c]utting prices in order to increase business often is the very essence of competition." *Philadelphia Taxi Ass'n, 886 F.3d at 340* (quoting *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 592, 106 S.Ct. 1348, 89 L. Ed. 2d 538 (1986)*).

For the same reasons, the SAC's allegations that Comcast "helped develop a monopoly for Vitel and Decisive in the Regions that the Plaintiffs worked" and that "Vitel and Decisive are able to enjoy monopoly power in these markets because they were the only company[ies] able to have **[*15]** better rates" are without merit. Doc. 71 ¶¶ 157-58,174. First, Vitel and Decisive cannot both be monopolies in the same regions. A "monopoly exists when *one firm* controls all or the bulk of a product's output, and no other firm can enter the market or expand output at comparable costs." *Carpet Grp. Int'l v. Oriental Rug Importers Ass'n, Inc., 256 F. Supp. 2d 249, 284 (D.N.J. 2003)* (quoting 2 PHILLIP AREEDA, JOHN SOLOW, AND HERBERT HOVENKAMP, ***ANTITRUST LAW***, ¶ 403 at 7 (2d ed. 2002) (emphasis in original). Second, and more importantly, the SAC concedes that Vitel and Decisive were able to obtain a large share of Comcast's business *because* they offered the most competitive rates. The natural result of competition, without allegations of reduced output or barriers to entry, does not raise an inference of a monopoly.

Plaintiffs also continue to allege that Vitel and Decisive were able to charge lower rates by underbilling Comcast and manipulating their performance metrics in Comcast's system, and that Comcast was aware of this behavior, but did not terminate Decisive and Vitel because it "lowered Comcast's bottom line, pleasing shareholders and increased stock prices." Doc. 71 ¶¶ 44-57, 172. However, as the Court stated in its previous opinion, the allegations of fraudulent underbilling **[*16]** by Decisive and Vitel, even if true, "may form the basis for consumer fraud, unjust enrichment, or misrepresentation claims," but "violations of common law or state law do not give rise to antitrust injury." Doc. 67 at 24. This principle was recently reaffirmed by the Third Circuit in *Philadelphia Taxi Ass'n*, which stated that illegal conduct cannot serve as a basis for antitrust injury:

> Even if Uber were able to cut costs by allegedly violating [Philadelphia Parking Authority] regulations, Appellants cannot use the antitrust laws to hold Uber liable for these violations absent proof of anticompetitive conduct. Even unlawful conduct is 'of no concern to the antitrust laws' unless it produces an anticompetitive effect....
>
> [Appellants] attempt to circumvent the antitrust injury requirement by focusing on how Uber's purportedly illegal operation enabled it to cut costs and increase its market share. But again, the Supreme Court has squarely rejected illegal conduct as a basis for antitrust injury. A competitor's illegal presence in a market is not a per se antitrust violation, and any resulting injury is alone insufficient for a private plaintiff to state an antitrust injury.

886 F.3d at 340, 345 (citing Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S.Ct. 1884, 109 L.Ed.2d 333 (1990)). **[*17]** *See also* Alberta Gas Chems. Ltd. v. E.I. du Pont de Nemours and Co., 826 F.2d 1235, 1240 (3d Cir. 1987) (explaining that to establish antitrust injury, "plaintiffs must prove more than harm causally linked to an illegal presence in the market"). Thus, while Vitel and Decisive's alleged business tactics may be unsavory or fraudulent, they do not morph Plaintiffs' allegations into an antitrust cause of action. Because Plaintiffs continue to confuse harm to their own welfare as harm to the entire market, they have yet again failed to plead antitrust injury.

Second, even if Plaintiffs had adequately pleaded antitrust injury, their claims would nonetheless fail because they have failed to plead an illegal agreement to lessen competition among the Defendants. "An agreement exists when there is a unity of purpose, a common design and understanding, a meeting of the minds, or a conscious commitment to a common scheme." West Penn, 627 F.3d at 99 (citing Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 771, 104 S.Ct. 2731, 81 L.Ed.2d 628 (1984)). In its previous opinion, this Court found Plaintiffs' allegations did not give rise to an inference of conspiracy, but rather, suggested that Comcast unilaterally decided to reduce its number of subcontractors, while Decisive and Vitel were merely informed of Comcast's decision. Doc. 67 at 16. The SAC does not cure this shortcoming. Instead, it continues to **[*18]** assert that "Defendants Vitel and Decisive *subsequently* became aware of Comcast's strategy." Doc. 71 ¶ 123. It also continues to suggest that all actions that led to Plaintiffs' harm were made by Comcast and Comcast alone. For example, the SAC alleges that in 2009 to 2010, "Comcast placed a Request for Proposal (RFP) seeking proposals from all of the cable installation companies that were working for Comcast at the time," and "Plaintiffs mistakenly believed they competed successfully in a 2010 Request For Proposal ("RFP") process because they were told to 'ramp up' in certain Divisions." *Id.* ¶¶ 27-30. Plaintiffs then invested "hundreds of thousands of dollars to more likely over a million dollars" in their operations, by purchasing new warehouse facilities, vehicles, real estate, and office space, as well as hiring and training new employees. Id. ¶¶ 36-38. However, to Plaintiffs' misfortune, "Comcast never awarded any contracts pursuant to the RFP." *Id.* ¶ 39.

The SAC also alleges that in 2009, "*Comcast* launched a national subcontractor reduction plan from its Philadelphia corporate headquarters," which "called for a reduction in the number of regional cable installation firms working **[*19]** with Comcast from 176 in 2009 to 39 in 2012," and that "*Comcast* had no intention of working with Plaintiffs or many other of the subcontractor/business partners for the long haul." *Id.* ¶¶ 40-42 (emphasis added). The SAC then alleges that in 2012, "*Comcast* sent a letter to Plaintiffs stating that their long-term relationships would be terminated." *Id.* ¶¶ 58 (emphasis added). It is also alleged that "*Comcast* chose to work with Vitel and Decisive" because they offered lower labor costs and manipulated their performance metrics. *Id.* ¶ 172. *See also id*. ¶¶ 130-31 (alleging that "*Comcast* developed a proprietary customer database, Cable Data, to track its subcontractor metrics" and that "*Comcast* would tally metrics data and identify the highest and lowest scoring subcontractors.") (emphasis added). Notably absent in these allegations is any indication that Decisive and Vitel had any influence over Comcast's unilateral decision to reduce its number of subcontractors and work only with those that offered the lowest rates.[1] Thus, by Plaintiffs' own allegations, their injury arises solely from unilateral decisions made by Comcast.

Furthermore, as the Court's previous opinion noted, "a claim **[*20]** of conspiracy predicated on parallel conduct should be dismissed if common economic experience, or the facts alleged in the complaint itself, show that independent self-interest is an obvious alternative explanation for defendants' common behavior." Doc. 67 at 15 (quoting In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 326 (3d Cir. 2010)). Here, the obvious explanation of the events is that Comcast decided to streamline the number of subcontractors it worked with, which resulted in the termination of Plaintiffs in favor of Vitel and Decisive, who in turn hired some of Plaintiffs' personnel and bought their inventory after Plaintiffs' termination. *See* Doc. 71 ¶¶ 71-77. These allegations further undermine the idea that

---

[1] The SAC also alleges, for the first time, that after it terminated Plaintiff Cable Line, Comcast "gave Cable Line a 1 year contract; this was a complete farce to try to cover up the fraudulent activities, because Comcast never gave Cable Line any work in accordance with the contract, nor did Comcast have any intention to give them work." *Id.* ¶ 83. This allegation further undermines Plaintiffs' contention that their termination was the result of an agreement among all three co-defendants, as opposed to an independent decision by Comcast.

competition in the cable installation market suffered, as the SAC appears to acknowledge that Decisive and Vitel, by attracting a larger volume of business from Comcast, were also able to employ more cable installation employees and bolster their operations. *See* [*Philadelphia Taxi Ass'n, 886 F.3d at 341*] ("Appellants acknowledge that the nearly 1200 medallion taxicab drivers that Uber recruited did not remain idle, but rather they drove for Uber. In sum, what Appellants allege does not give rise to an inference of anticompetitive or exclusionary conduct and suggests, if anything, **[*21]** that Uber's ability to attract these drivers was due to its cost efficiency and competitive advantage.").[2]

In fact, Plaintiffs' own brief belies any notion that Comcast would have a plausible motive for conspiring with Decisive and Vitel. The brief describes the conspiracy as one where "Vitel and Decisive would do work at lower than cost rates, Comcast would get rid of all the competition, and Vitel and Decisive would get the majority of installation work and be able to charge higher for the installation work at a later date since virtually all of the competition in the market area would be eliminated." Doc. 90 at 2. Plaintiffs conveniently leave out the fact that these higher charges would presumably be *charged to Comcast*, which would dampen any motive on the part of Comcast to engage in an illegal conspiracy to drive up its own subcontractor costs. Similarly, elsewhere in their brief, Plaintiffs argue that Decisive and Vitel was "able to charge a rate below market in which these Defendants then would be able to recoup such undercharges once the competition was eliminated," and that Comcast "exercise[d] its monopsony power by only contracting with Vitel and Decisive," leading to **[*22]** Vitel and Decisive being "able to make higher than market profits," without explaining why Comcast would agree to a scheme that would lead to an increase in their own subcontractors' rates. *Id.* at 4, 34.

In place of allegations providing a plausible explanation as to why Comcast would enter into a conspiracy contrary to its own interests, the bulk of Plaintiffs' new allegations are vague and conclusory. For example, the SAC alleges that "[b]etween February 28, 2012 and May 27, 2012, Comcast agreed with Defendants Vitel and Decisive to allocate regional cable installation markets" and that "[t]he purpose and effect of Defendants' actions was not just to change Comcast's preferred installation vendors: it was to eliminate competitors to Vitel and Decisive." Doc. 71 ¶¶ 62, 79. These allegations of an agreement are not only conclusory, but they cannot be squared with the SAC's substantive allegations elsewhere that Comcast independently arrived at the decision to work with Vitel and Decisive, because they offered lower costs and better performance metrics (whether fraudulently obtained or otherwise. *See, e.g., id.* ¶¶ 27, 159-161. Likewise, the SAC's allegation that due to the conspiracy, Decisive and **[*23]** Vitel "were subsequently able to charge more for installation services and pass it on to the ultimate consumer," i.e. Comcast, defies logical inference—again, Comcast has no motive to enter into a conspiracy where its own subcontractors would be able to charge higher rates. *Id.* ¶ 105. In fact, the most substantive allegations that may be read as approximating an agreement are Plaintiffs' original allegations that Comcast was aware "of the manipulation of the metric system by Decisive and/or Vitel," and that Decisive and Vitel "subsequently became aware of Comcast's strategy" to eliminate many of its subcontractors through its subcontractor reduction plan. Doc. 71 ¶¶123, 139. But as this Court's previous opinion found, mere awareness of other market participants' actions does not constitute an *a priori* agreement to restrain trade. Doc. 67 at 16-17.

The fundamental flaw of Plaintiffs' complaint was—and remains—that even though Comcast may have an motive to reduce its number of cable installation subcontractors, it has no incentive to conspire with its own subcontractors to *eliminate competition* in the overall market and *increase the prices* for the services it was buying. Absent substantive, **[*24]** plausible allegations justifying such a conspiracy, the SAC fails to adequately allege that Plaintiffs suffered harm from an agreement entered into by Defendants to restrain competition. *Cf.* [*Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 255-56 (3d Cir. 2010)*] (concluding that "simply because each Dealer, on its own, might have been economically motivated to exert efforts to keep [manufacturer's] business and

---

[2] The SAC also claims that working conditions for cable installation employees deteriorated after Comcast reduced its number of installation subcontractors, but offer no explanation, plausible or otherwise, as to why the working conditions of individual workers are relevant to a conspiracy among the Defendants to consolidate the market for cable installation companies. Doc. 71 ¶¶ 99-104, 129. In any event, the allegations of declining working conditions are based upon news articles written in 2016. *Id.* ¶¶ 90-96. Plaintiffs, however, were terminated in 2012. Thus, even assuming that employees' working conditions are relevant to the alleged antitrust conspiracy, it is unclear how these temporally remote articles would be relevant to the core events at issue.

charge the elevated prices [manufacturer] imposed does not give rise to a plausible inference of an agreement among the Dealers themselves... [plaintiff's allegations] do no more than intimate 'merely parallel conduct that could just as well be independent action.'") (quoting *Twombly, 550 U.S. at 566*).

Third, even if the SAC had adequately pleaded antitrust injury and conspiracy, the claim would still fail under a rule of reason analysis. In an antitrust action, the plaintiff carries the "initial burden of showing that the alleged [agreement] produced an adverse, anticompetitive effect within the relevant geographic market." *In re Ins. Brokerage, 618 F.3d at 315* (citing *Gordon v. Lewistown Hosp., 423 F.3d 184, 210 (3d Cir.2005))*. For reasons stated above, Plaintiffs have failed to plead anticompetitive effects beyond their own injury. Furthermore, they continue to fail to define a relevant market. Instead, the SAC makes vague claims that Comcast was "the largest **[*25]** purchaser for cable installation in the United States in the relevant markets," and that "within a specific community where it held the cable franchise, Comcast would be the sole purchaser of cable installation services," even though it is unclear what these "relevant markets" or "specific communit[ies]" are. Doc. 71 ¶¶ 13, 34.

However, the SAC did add some new allegations that may be read as an attempt to define a geographical market by making vague references to the "Northern Division," which purport to include certain parts of Pennsylvania, New Jersey, Ohio, Maryland, Delaware, Washington DC, Virginia, Connecticut, Massachusetts, Vermont, New Hampshire, and Maine. *Id.* ¶ 23. However, the SAC does not provide any justification for defining the market in this manner. In fact, references to the "Northern Division" often include other geographic areas in the same assertions. *See, e.g., id.* ¶ 86 (alleging that "[m]any other cable installation companies in the Northern Division *and in fact other Divisions*...that were terminated by Comcast, all went out of business"); *id.* ¶ 88 (alleging that "Comcast's monolithic actions were *not only done in the Northern Division*, particularly in the Regions **[*26]** in which Plaintiffs performed their work, *but in other Divisions* and Regions across the Country.") (emphasis added). Plaintiffs appear to believe that they may define a market by where *they themselves* operate, even though by their own admission, the same conspiracy has led to the same effect both inside and outside the "Northern Division."

"Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted." *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)*. Plaintiffs have failed to propose a market based on interchangeability of cable installation services or cross-elasticity of demand for such services. In particular, the SAC fails to allege whether other cable providers, aside from Comcast, hired cable installation subcontractors in the "Northern Division"; whether Plaintiffs' installation services are interchangeable with their competitors' services in the "Northern Division"; or whether **[*27]** the "Northern Division" incorporates the entirety of the market's limits, beyond which Plaintiffs' services are no longer interchangeable with those of its competitors. Additionally, Plaintiffs' attempt to confine the relevant market to the "Northern Division" is belied by the rest of the allegations in the SAC, which indicate that Plaintiffs regard the whole of the United States as the relevant market. *See* Doc. 71 ¶ 200 ("Defendant Comcast, who led the conspiracy, has substantial market power as the largest purchaser for cable installation in the United States."); *id.* ¶ 225 (same); *id.* ¶ 212 ("Defendant Comcast, which led the conspiracy, has substantial market power as the largest cable company and Internet Service Provider by revenue in the United States as well as the largest purchaser of cable installation services."); *id.* ¶ 237 (same).

Perhaps recognizing the inadequacies of the SAC's market definition, Plaintiffs attempt to bolster their allegations through their brief, arguing that Comcast has significant market power in the Northern Division according to a website called broadbandnow.com. Doc. 90 at 5. Even if the Court may consider new allegations in a party's briefing, the **[*28]** citation fails to offer support for Plaintiffs' contentions. Upon review, the website appears to be a tool to help *individual consumers* to find cable providers like Comcast by geographic location. This citation reveals that Plaintiffs continue to "mistakenly conflate two distinct markets"—the cable and internet service provider industry, where Comcast is a *seller* of cable content and services to individual consumers, and the cable installation industry, where Comcast is a *buyer* of installation services. Doc. 67 at 21.

The Court is baffled by Plaintiff's persistence in conflating the two markets, even after the Court's extensive discussion in its previous opinion. *See id.* at 21-22. Plaintiffs, as cable installation subcontractors, are not aggrieved

Comcast customers. Yet they insist on relying upon allegations of dissatisfaction among Comcast consumers as evidence of a conspiracy to lessen competition in the cable *installation* market. *See, e.g.*, Doc. 71 ¶¶ 110-112 (alleging that internet providers perform poorly on the "American customer Satisfaction Index" and that cost of cable consumers increased "nationally."). The problem is only confounded by Plaintiffs' opposition brief, which makes unsubstantiated **[*29]** claims to investigations by the FCC, Congress, and the Wall Street Journal regarding Comcast's customer dissatisfaction. *See, e.g.*, Doc. 90 at 33 ("Consumers now pay more, the service is awful, people are being charged for services they did not even receive, and consumers are subjected to service calls by overworked, untrained and unqualified technicians. These are not just Plaintiffs' allegations, but also constitute allegations put forth by the FCC, the United States Congress and Senate, the Wall Street Journal, various cable publications from the Internet and other articles cited in this memorandum of law."). Notwithstanding the fact that these claims do not appear anywhere in the SAC, the Court fails to see how regulatory action or news articles concerning customers' dissatisfaction in the *cable provider* market have any bearing on the competition within the *cable installation* market. As the Court previously found, Comcast's role as a seller in the cable provider market is not relevant to its role as a buyer in the installation market. Plaintiffs' continued conflation of the two, either by willfulness or by ignorance, does not warrant any further discussion from this Court.[3]

Finally, in its previous opinion, the Court noted that Plaintiffs may have been suggesting (though it was not clear from the previous complaint) that Comcast was a monopsony, that is, "[a] firm that has substantial power on the buy side of the market," but cautioned Plaintiffs that without proper allegations of a conspiracy, the mere existence of a monopsony does not constitute an antitrust violation. Doc. 67 at 22 (citing *West Penn, 627 F.3d at 103*). Plaintiffs have taken to use the word at length in their brief, arguing that Comcast engaged in "predatory bidding, as it led Comcast to determine what price it would accept which would be below cost pricing," and that "[t]he other Defendants, the predators, had a strong probability of recouping those losses incurred because Comcast through its monopsony power was able to give Vitel and Decisive all of the work because the competition would be eliminated and not be able to compete." Doc. 90 at 31 (citing *Weyhaeuser Co. v. Ross-Simmons Hardwood Lumber Co. Inc. 549 U.S. 312, 314, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007))*.

Plaintiffs misunderstand the concept of predatory bidding. There, the focus is on Comcast's attempt to drive out its cable provider competitors. In the context of a monopsony engaging in anticompetitive behavior, a powerful buyer such as Comcast may engage **[*31]** in predatory bidding by initially accepting *higher* prices for the services of Plaintiffs, Decisive, and Vitel, even if it meant that Comcast would have to temporarily bear higher subcontractor costs and perhaps even sell its own end-products at a loss. In the second stage of predatory bidding, however, Comcast would have driven other buyers out of the cable installation market, leaving it to be the *only* buyer in the market, and therefore be able to force sellers such as Decisive, Vitel, and Plaintiffs to sell their services to Comcast at unreasonably low prices. There are no allegations resembling such a scheme here. Just as Comcast would have no motive in conspiring with Decisive and Vitel to drive up subcontractor rates, Decisive and Vitel would have no motive in conspiring with Comcast to help it engage in predatory bidding. In essence, predatory bidding is a scheme

---

[3] On the whole, Plaintiffs' brief is heavy in rhetoric and low in substance. In place of legal arguments, the brief is filled with hyperbolic rhetorical questions or melodramatic rants. *See,* ***[*30]*** *e.g.* Doc. 90 at 35 (asserting that Comcast had a practice of lying to government regulators: "This is Comcast's modus operandi: to run over any company, destroy competition and make misrepresentations, believing that it can get away with anything because Comcast has too much money for anyone to be able to go against it"); *id.* at 4 ("Why else would Comcast keep Decisive and Vitel as subcontractors or business partners when they were both involved in the illegal activities, unless they had some sort of deal going on?"); *id.* at 24 ("The Court should look at the agreement or conspiracy as an ordinary prudent person using common sense. Who would partner with two dishonest companies that stole hundreds of thousands of dollars of equipment, manipulated your performance metrics system, and caused you to be fined by the SEC or report the fraudulent representations or misrepresentations to shareholders? No rational company would partner with companies like this unless there were some sort of illegal agreement.").

At best, these dubious "arguments" reveal a deep confusion over the legal basis for Plaintiffs' claims. At worst, they may be a ploy to distract from Plaintiffs' inability to shoulder their burdens of pleading antitrust injury and anticompetitive effects under a rule of reason analysis. In any event, Plaintiffs' counsel would do well to focus their briefing on substantive legal arguments in the future.

engaged in by a single, powerful buyer to drive other buyers out of the market, not a conspiracy between buyers and sellers to drive other sellers from the market. Plaintiffs' arguments that Comcast engaged in predatory bidding as a monopsony are therefore without merit. As this Court noted in its previous opinion, barring **[*32]** allegations that would substantiate an antitrust action, a monopsony "is generally free to bargain aggressively when negotiating the prices it will pay for goods and services." *West Penn, 627 F.3d at 103*.[4] *See also* *LifeWatch Servs., Inc. v. Highmark, Inc., 248 F. Supp. 3d 641, 650 (E.D. Pa. 2017)* (holding that "Defendants' refusal--whether concerted or not—to purchase any telemetry device—whether produced by [Plaintiff] or not—is not an antitrust violation, but rather a legal exercise of Defendants' monopsony power....The alleged fact that Defendants' decisions have caused [Plaintiff's] revenues to drop [ ] dramatically does not render Defendants' behavior illegal under the Sherman Act.") (citing *West Penn, 627 F.3d at 103*).

In sum, the SAC continues to be plagued by Plaintiffs' tunnel vision focus on their own injury without tying their allegations to a conspiracy to harm overall competition. Plaintiffs' plight, which directly arose out of Comcast's decisions favoring Vitel and Decisive over them, may invite sympathy, especially if the allegations of Vitel and Decisive's unsavory business tactics are indeed true. However, these allegations cannot convert Plaintiffs' aggrievement into a Sherman Act claim. Antitrust laws are concerned with market, not any particular players within it. Thus, Plaintiffs' Sherman Act claim **[*33]** must again be dismissed.

Having had three opportunities to adequately plead an antitrust action and the benefit of the Court's guidance on the previous complaint's deficiencies, Plaintiffs have not demonstrated that another opportunity to amend would be able to cure the defects of their antitrust action. *See* *LifeWatch, 248 F. Supp. 3d at 651* (granting motion to dismiss antitrust action with prejudice when "[o]ver the past five years, LifeWatch has amended its complaint three separate times—yet it still has not alleged any colorable antitrust violation and would not be able to do so even if the Court granted leave to amend yet again.").

B. Plaintiffs Failed to Plausibly Allege An Employment Discrimination Claim

Similar to the antitrust claim, the SAC added a few desultory allegations to the employment discrimination claim without curing its fundamental defects. In its previous opinion, this Court provided extensive guidance on how the claim may be adequately pleaded:

> Plaintiffs do not allege, for example, how many of the original 176 cable installation companies hired by Comcast were minority or Caucasian owned, if there are any "diverse" cable installation companies that are comparable to plaintiffs in size, regions served, **[*34]** or types of services provided, and if there are, whether those comparable "diverse" companies were retained by Comcast. Furthermore, it cannot be said that Vitel is a comparable firm to plaintiffs, as the Amended Complaint repeatedly allege[s] that Vitel is a "larger" firm that enjoys the concomitant advantages in gaining Comcast's business. Thus, plaintiffs have not plausibly alleged that they were passed over in favor of Vitel *because of* their race.... Save for the conclusory allegations that Plaintiffs are "owned and operated by Caucasian people" and that "Vitel was tracked as diverse," plaintiffs have failed to plead that they were treated unfavorably because their owners are Caucasian.

Doc. 67 at 29 (internal citations omitted). The only new allegations in the SAC that may plausibly be read as attempting to conform to the Court's guidance above are that "Plaintiffs performed as well, or better, as Defendant Vitel at installing cable"; that "[u]nlike Vitel, Plaintiffs had not been routinely investigated for misappropriating Comcast property"; and that Plaintiffs "were not chosen over Vitel even though Vitel was the only minority company that had over 100 trucks, and both McLaughlin **[*35]** and Cable Line had 100 trucks." Doc. 71 ¶¶ 181, 195, 196.

---

[4] Similarly, the SAC also alleges, for the first time, that Comcast had bought up other cable providers "[i]n the very late 1990's...into the early 2000's" and used a restrictive covenant to block a potential sale of Plaintiff "in the early 2000's." Doc. 71 ¶¶ 10, 15. However, the fact that Comcast is a large cable provider company does not, by itself, suggest that it had any reason to engage in a conspiracy to increase cable installation companies' rates. In any event, the remote events from the early 2000's have little bearing on Plaintiffs' termination in 2012.

These new allegations are conclusory and insufficient to raise an inference that Vitel was chosen over Plaintiffs for racially motivated reasons. Similarly to the dismissed Amended Complaint, the SAC does not include any allegations about other, "non-diverse" firms that were terminated by Comcast, or any allegations about other, "diverse" firms that were kept on by Comcast. Instead, Plaintiffs continue to rely solely on a comparison between Vitel and the Plaintiffs. Such comparisons do not make out a claim for reverse discrimination, especially since elsewhere in the SAC, Plaintiffs maintain that Vitel was selected by Comcast by manipulating performance metrics and underbilling services "to help Comcast improve profit margins and less expenses." Doc. 71 ¶¶ 159-161.

In other words, the SAC itself undermines the discrimination claim by providing alternative reasons for Comcast's choice of Vitel over Plaintiffs. While a plaintiff may put forth inconsistent claims in their pleadings, *see* *Fed. R. Civ. P. 8(d)*, they must still muster sufficient allegations as to *each* claim lodged against a defendant. *See* *Sheinman Provisions, Inc. v. Nat'l Deli, LLC, 2008 U.S. Dist. LEXIS 54357, 2008 WL 2758029, at *4 (E.D. Pa. July 15, 2008)* ("*Rule 8* only allows alternative claims to be ple[d] **[*36]** if all of the claims are sufficient on their own."); *Davis v. Abington Mem'l Hosp., 2012 U.S. Dist. LEXIS 111160, 2012 WL 3206030, at *6 n. 63 (E.D. Pa. Aug. 7, 2012)* (finding that "internal inconsistencies render [Plaintiff's] allegations deficient and prevent the Court from making a [requisite] finding" in an FLSA claim), *aff'd*, *765 F.3d 236 (3d Cir. 2014)*. As with the antitrust claim, Plaintiffs have failed in their third opportunity to adequately plead an employment discrimination claim; thus, the claim will be dismissed with prejudice.

C. The Court Declines to Exercise Jurisdiction Over the Pendent Claims

Having determined that Plaintiffs' federal claims must be dismissed, the Court will decline to exercise supplemental jurisdiction over Plaintiffs' state law claims premised on the same allegations. Doc. 71, Counts II, III, and IV. The decision whether to exercise supplemental jurisdiction under *28 U.S.C. § 1367(a)* is subject to the district court's discretion. *28 U.S.C. § 1367(c)(3)* ("The district courts may decline to exercise supplemental jurisdiction over a claim under *subsection (a)* if ... the district court has dismissed claims over which it has original jurisdiction."). "[W]here the claim over which the district court has original jurisdiction is dismissed before trial, the district court must decline to decide the pendent state claims unless considerations of **[*37]** judicial economy, convenience, and fairness to the parties provide an affirmative justification for doing so." *Borough of W. Mifflin v. Lancaster, 45 F.3d 780, 788 (3d Cir.1995)* (internal citations omitted). In light of the dismissal of the federal claims, the Court will dismiss Counts II, III, and IV without prejudice.

V. Conclusion

For the reasons stated above, as well as the legal principles and analyses espoused in the Court's previous opinion (Doc. 67), Defendants' motions to dismiss the Second Amended Complaint (Doc. 71) will be granted. A separate Order shall issue.

/s/ Robert D. Mariani

Robert D. Mariani

United States District Judge

<u>ORDER</u>

AND NOW, THIS 14th **DAY OF MAY, 2018**, upon consideration of Defendants' Motions to Dismiss Plaintiffs' Amended Complaint (Docs. 77, 79, 81), **IT IS HEREBY ORDERED THAT**:

1. The Defendants' Motions to Dismiss Plaintiffs' Amended Complaint (Docs. 77, 79, 81) are **GRANTED**.

2. Counts I and V of the Amended Complaint (Doc. 71) are **DISMISSED WITH PREJUDICE** for failure to state a claim pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* against Defendants.

3. Counts II, III, and IV are **DISMISSED WITHOUT PREJUDICE** pursuant to *28 U.S.C. § 1367(c)(3)*.

Opinion

ORDER GRANTING MOTIONS TO DISMISS WITHOUT LEAVE TO AMEND AND DISMISSING ACTION WITH PREJUDICE

[Re: ECF 51, 52, 53]

According to Plaintiff Eric Swallow ("Eric"),[1] the disciplinary proceeding initiated by California's Bureau of Gambling Control to revoke his gambling license was part **[*2]** of a larger conspiracy. The players in the alleged conspiracy range from the prosecuting Deputy Attorney General, William Torngren ("Torngren"); to Eric's former business partners, Peter and Jeanine Lunardi (individually, "Peter" and "Jeanine," and collectively, the "Lunardis"); to Eric's estranged wife, Dr. Deborah Swallow ("Deborah"). Torngren, the Lunardis, and Deborah each move to dismiss Eric's First Amended Complaint ("FAC"), ECF 41, which asserts claims for violations of *42 U.S.C. § 1983* and the *Racketeer Influenced and Corrupt Organizations Act ("RICO")* as well as claims for tax fraud. ECF 51, 52, 53. For the reasons discussed below, the motions to dismiss are GRANTED WITHOUT LEAVE TO AMEND and the action is DISMISSED WITH PREJUDICE.

I. BACKGROUND

The centerpiece of this lawsuit is Garden City, Inc. ("Garden City"), a California corporation that has operated the Casino M8trix card room in San Jose, California since 1974. FAC ¶ 1. Facing financial trouble, Garden City filed for bankruptcy around 1998 but continued to run its operation. *Id.* ¶ 54. The Lunardis saw an opportunity: Peter approached Eric in or around 2005 with a proposal to buy Garden City out of bankruptcy. *Id.* Eric agreed, and he **[*3]** and the Lunardis each purchased equal shares of Garden City stock in 2007, with Eric and Peter becoming the sole directors and officers of the company. *Id.* ¶¶ 55-57. For purposes of succession planning, Eric and the Lunardis entered into a 2008 Buy/Sell Agreement, which, among other things, provided reciprocal rights of first refusal with regard to the sale of their respective shares in Garden City. *Id.* ¶ 59.

Important here, Eric and the Lunardis secured gambling licenses to comply with the California Gambling Control Act. *Id.* ¶ 66. Two separate agencies implement the Gambling Control Act's provisions: the California Gambling Control Commission (the "Commission") and the Bureau of Gambling Control (the "Bureau"). The Commission has adjudicatory powers, including the ability to impose a penalty or discipline against an individual owner's license. *See* *Cal. Bus. & Prof. Code §§ 19824-19825*, *19870(a)*, *19871*. The Bureau, which falls under the auspices of the California Attorney General's Division of Law Enforcement, performs investigatory functions and, when appropriate, initiates and prosecutes disciplinary actions against current licensees. *Id.* *§§ 19826-19827*.

Eric asserts that Torngren is a state actor who "used and abused his authority **[*4]** as a Deputy Attorney General by conspiring with the [Lunardis] to . . . cause [Eric] to lose his gambling license and force [him] to sell his interest in [Garden City] at a price far below fair market value." FAC ¶ 34. To pursue that objective, Torngren and the Lunardis allegedly recruited Eric's estranged wife, Deborah, to join the conspiracy and committed multiple acts of mail and wire fraud, bank fraud, extortion, and money laundering. *Id.* ¶¶ 34, 49. In the FAC's characterization, Torngren and the Lunardis "devised a scheme to defraud the [Commission] and commit extortion." *Id.* ¶ 36.

Things kicked off in 2013 when Torngren launched an investigation into Eric, the Lunardis, and Garden City. *Id.* ¶¶ 70, 72. Torngren sought more information about the various affiliated legal entities that Eric and the Lunardis had created to control Garden City. *Id.* ¶¶ 60-66, 72. At the beginning of May 2014, the Bureau served an accusation against Garden City, which sought to revoke or suspend Eric's and the Lunardis' gambling licenses "for repeated violations of, and lack of suitability for, continued licensing under the [Gambling Control Act]." *Id.* ¶ 82. The accusation set forth the facts and specific **[*5]** violations supporting discipline, including that Eric and the Lunardis had provided false information to the Bureau, engaged in self-dealing to siphon off money and reduce reported income, and benefitted from illegal payments. *Id.* ¶ 83, Ex. 4. At the end of May 2014, the Bureau issued an Emergency Order that partially prevented Garden City from making payments to Eric and the Lunardis. *Id.* ¶ 94, Ex. 6. The Bureau amended the Emergency Order in June 2014 to ensure that Garden City could maintain its corporate status. *Id.* ¶ 95, Ex. 7.

[1] The Court means no disrespect to the parties by using their first names. This nomenclature is simply a matter of convenience due to the overlap in last names.

By early February 2015, the Lunardis began negotiating a settlement with the Bureau. *Id.* ¶¶ 108-14. Eric alleges that these settlement communications between Torngren and the Lunardis and between Torngren, the Lunardis, and Eric were acts of mail or wire fraud in furtherance of the conspiracy. For example, Eric pleads an act of mail fraud on March 5, 2015 when the Lunardis sent a letter to Eric offering to purchase his Garden City shares in connection with a global settlement offer proposed by Torngren that obligated Eric to dispose of his shares. *Id.* ¶¶ 115-19, Ex. 10. Similarly, Eric alleges acts of mail and wire fraud based on the Lunardis' March 27, **[*6]** 2015 letter advising Eric that they had settled with the Bureau and their March 30, 2015 email renewing their offer to purchase Eric's shares. *Id.* ¶¶ 120-23.[2] Eric also asserts that Torngren committed wire fraud when he rejected a settlement proposed by Eric's attorney and sent a counterproposal "alleging that the gravity of [Eric] purportedly misrepresenting and omitting requested information alone justified [Eric]'s disqualification from licensure and subjected him to a hefty fine." *Id.* PP 124-25. Eric's attorney responded with confusion as to why the Lunardis were allowed to settle without losing their license while Eric was not. *Id.* ¶ 126.

Because the parties could not reach a settlement, they proceeded to an administrative hearing on the accusation. In August 2015, Administrative Law Judge ("ALJ") Mary-Margaret Anderson presided over a seven-day evidentiary proceeding during which Eric was represented by counsel. *Id.* ¶¶ 18-20, 131, 136. The FAC describes this proceeding as being "plagued with a number of irregularities orchestrated by [Torngren]." *Id.* ¶ 132. The FAC asserts instances in which Torngren promised to assist Eric's information technology contractor, Bryan Roberts ("Roberts"), **[*7]** with claims against Eric in exchange for Roberts's testimony and encouraged Roberts to illegally retrieve confidential information from Eric's server and emails. *Id.* ¶¶ 139-40, 153-54. The FAC further pleads that Torngren acted beyond his prosecutorial function by discussing "whether [Peter] would be able to divert [Eric]'s distributions to himself if [Eric]'s license were revoked," by agreeing with Peter's attorney to "improperly use his influence to divert [Eric]'s distributions to [Peter]," and by directing Deborah to "collect information and evidence . . . through [her] divorce proceedings." *Id.* ¶¶ 135, 166.

In December 2015, the ALJ issued a proposed decision, which revoked Eric's gambling license and denied the request for renewal. *Id.* ¶¶ 136, 142. In particular, the ALJ stated that "[t]he record is more than sufficient to support the removal of [Eric] as a . . . licensee in California" because he has shown "a lack of good character, honesty, and integrity by his violations." *Id.*, Ex. 16 at 26. In February 2016, the Commission rejected the ALJ's proposed decision. *Id.* ¶ 143, Ex. 17. The Commission also requested that the parties submit written argument on a number of specific **[*8]** issues. *Id.*, Ex. 17 at 1-3. After the parties did so, the Commission issued its decision in May 2016. *Id.* ¶ 144. Like the ALJ, the Commission ordered that Eric's license be revoked and that renewal be denied; the Commission also assessed a penalty and costs. *Id.*, Ex. 18 at 62. Eric filed a writ petition in July 2016 in California Superior Court seeking to vacate and set aside the Commission's decision, but that proceeding remains pending. *Id.* ¶ 145.

The revocation of Eric's license had another consequence: he was required by law to sell his shares in Garden City. *See* Cal. Bus. & Prof. Code §§ 19882(a) ("The owner of the security shall sell the security for an amount not greater than fair market value, within 60 calendar days of the . . . revocation."), 19892(b) ("The individual . . . whose license is revoked . . . shall sell his or her interest in an amount not greater than fair market value, within 60 calendar days of the . . . revocation."). In April 2015 and again in February 2016, a third party had offered to purchase Eric's shares. FAC ¶¶ 204, 210. The FAC alleges that Torngren acted outside his prosecutorial role by engaging in numerous acts to "block [the third party]'s offer and interfere[] with [Eric]'s ability **[*9]** to get fair market value for his shares." *Id.* ¶ 212. Meanwhile, Eric commenced two arbitration proceedings against the Lunardis with regard to his right to sell his shares. In the first, an arbitrator concluded that the third party's $55 million offer was a bona fide offer that triggered Eric's contractual obligation under the Buy/Sell Agreement to notify the Lunardis and provide them a right of first refusal to match the third party's price. ECF 18-3, Ex. 1. That award was subsequently confirmed by the California Superior Court. *Id.*, Ex. 2. In the second arbitration, which was also confirmed by the

[2] The Lunardis' settlement was later reviewed and approved by the Commission on May 14, 2015. *Id.* ¶ 127, Ex. 13. As part of the settlement, the Lunardis and Garden City admitted to certain facts and violations, agreed to certain conditions for future operations, and paid a fine of almost $2 million. *Id.*, Ex. 11.

California Superior Court, an arbitrator found that the Lunardis had properly exercised their right to buy Eric's shares, so Eric was ordered to sell his Garden City shares to the Lunardis for $55 million. *Id.*, Ex. 3-5.

After the disciplinary proceeding, Eric initiated this lawsuit in September 2017. ECF 1. He filed the operative FAC in January 2018. ECF 41. The FAC asserts six causes of action: (1) a *§ 1983* claim for conspiracy to commit violations of substantive due process against Torngren, the Lunardis, and Deborah; (2) a *§ 1983* claim for conspiracy to commit violations of equal protection against **[*10]** Torngren, the Lunardis, and Deborah; (3) a RICO claim against Torngren and the Lunardis; (4) a RICO conspiracy claim against Torngren, the Lunardis, and Deborah; (5) a tax fraud claim regarding Garden City's 2015 tax return against the Lunardis; and (6) a tax fraud claim regarding Garden City's 2016 tax return against the Lunardis. FAC ¶¶ 241-72. Torngren, the Lunardis, and Deborah move to dismiss the FAC in its entirety. ECF 51, 52, 53.

II. LEGAL STANDARD

"A motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim upon which relief can be granted 'tests the legal sufficiency of a claim.'" *Conservation Force v. Salazar, 646 F.3d 1240, 1241-42 (9th Cir. 2011)* (quoting *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001))*. When determining whether a claim has been stated, the Court accepts as true all well-pled factual allegations and construes them in the light most favorable to the plaintiff. *Reese v. BP Exploration (Alaska) Inc., 643 F.3d 681, 690 (9th Cir. 2011)*.

However, the Court need not "accept as true allegations that contradict matters properly subject to judicial notice" or "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (quoting *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001))*. While a complaint need not contain detailed factual allegations, it "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" **[*11]** *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A claim is facially plausible when the alleged facts "allow[] the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.*

III. DISCUSSION

A. Judicial Notice

In connection with their motion to dismiss, the Lunardis seek judicial notice of (1) final awards from two arbitration proceedings between Eric and the Lunardis and (2) orders by the California Superior Court confirming those awards. ECF 18-3 at 1-2. Eric does not contest that these documents are properly subject to judicial notice. *See Fed. R. Evid. 201(b)*; *United States v. Black, 482 F.3d 1035, 1041 (9th Cir. 2007)* ("[Courts] may take notice of proceedings in other courts, both within and without the federal judicial system, if those proceedings have a direct relation to matters at issue."). Instead, Eric "objects to [the Lunardis'] request for judicial notice to the extent they invite this Court to adopt another tribunal's factual finding(s)." ECF 65 at 1. Accordingly, the Court takes judicial notice of these documents without taking judicial notice of reasonably disputed facts contained in the documents. *See Lee v. City of Los Angeles, 250 F.3d 668, 690 (9th Cir. 2001)* (explaining that a court may take judicial notice of "*undisputed* matters of public record" but not "*disputed* facts stated in public records"). **[*12]**

B. *§ 1983* and RICO Claims

Eric's first four claims variously assert that Torngren, the Lunardis, and Deborah have violated *§ 1983* and RICO. Specifically, Eric alleges that Torngren, the Lunardis, and Deborah all engaged in conspiracy to commit violations of substantive due process and equal protection under *§ 1983* and conspiracy to commit RICO violations. FAC ¶¶

241-50, 259-64. Eric separately charges Torngren and the Lunardis with RICO violations. *Id.* ¶¶ 251-58. The Court concludes that Torngren's challenged conduct is covered by absolute immunity and that the Lunardis' and Deborah's challenged conduct is petitioning activity protected by the *Noerr-Pennington* doctrine. Although those rulings are sufficient to compel dismissal of Eric's *§ 1983* and RICO claims, the Court also briefly addresses independent bases on which Eric's claims fail.

1. Absolute Immunity

Torngren asserts that he is absolutely immune from suit under *§ 1983* and RICO for his challenged conduct. Claims for monetary damages against prosecutors pursuant to *§ 1983* and RICO may be barred by absolute prosecutorial immunity. *Imbler v. Pachtman, 424 U.S. 409, 430-31, 96 S. Ct. 984, 47 L. Ed. 2d 128 (1976)* (*§ 1983*); *Van Beek v. AG-Credit Bonus Partners, 316 F. App'x 554, 555-56 (9th Cir. 2008)* (RICO). Although absolute immunity originally arose in the context of criminal prosecutions, the Supreme Court has extended immunity to agency officials performing functions analogous to **[*13]** those of a prosecutor in administrative enforcement proceedings. *See Butz v. Economou, 438 U.S. 478, 515, 98 S. Ct. 2894, 57 L. Ed. 2d 895 (1978)*. This immunity is designed to allow officials acting in a prosecutorial role to make important discretionary decisions integral to their office without fear of retaliatory litigation for those decisions, especially where the judicial process itself already acts as a check on prosecutorial actions. *Burns v. Reed, 500 U.S. 478, 492, 111 S. Ct. 1934, 114 L. Ed. 2d 547 (1991)*.

Because absolute immunity serves a limited purpose, it is justified when "any lesser degree of immunity could impair the judicial process itself." *Kalina v. Fletcher, 522 U.S. 118, 127, 118 S. Ct. 502, 139 L. Ed. 2d 471 (1997)* (quoting *Malley v. Briggs, 475 U.S. 335, 342, 106 S. Ct. 1092, 89 L. Ed. 2d 271 (1986))*. Thus, in determining whether immunity attaches, courts examine "the nature of the function performed, not the identity of the actor who performed it." *Forrester v. White, 484 U.S. 219, 229, 108 S. Ct. 538, 98 L. Ed. 2d 555 (1988)*. Immunity applies to conduct "intimately associated with the judicial phase of the criminal process" and protects prosecutors when they perform traditional activities as officers of the court. *Van de Kamp v. Goldstein, 555 U.S. 335, 342-43, 129 S. Ct. 855, 172 L. Ed. 2d 706 (2009)* (quoting *Imbler, 424 U.S. at 430-31*). In contrast, absolute immunity does not extend to a prosecutor's "administrative duties and those investigatory functions that do not relate to an advocate's preparation for the initiation of a prosecution or for judicial proceedings." *Buckley v. Fitzsimmons, 509 U.S. 259, 273, 113 S. Ct. 2606, 125 L. Ed. 2d 209 (1993)*. Thus, entitlement to absolute immunity for particular conduct turns on whether **[*14]** the prosecutor was "functioning as [an] 'advocate[]'" while engaging in that conduct. *Id. at 274*.

As a general matter, Torngren's actions were performed in his capacity as Deputy Attorney General in pursuance of the prosecution of the Bureau's accusation against Eric's license. By statute, "any power or authority of the department described in [the *Gambling Control Act*] may be exercised by the Attorney General or any other person as the Attorney General may delegate." *Cal. Bus. & Prof. Code § 19810*. The department is responsible for "perform[ing] all investigatory functions required by [the Gambling Control Act]," including "investigat[ing] suspected violations of [the Gambling Control Act] or [California laws] relating to gambling" and "initiat[ing], where appropriate, disciplinary actions." *Id. § 19826*; *see also id*. *§ 19827* (spelling out investigatory powers of the department). The FAC and Eric's opposition acknowledge that much of Torngren's conduct may properly be viewed as within his prosecutorial function. *See* ECF 62 at 1.

But the FAC and opposition appear to pinpoint nine acts that allegedly fall outside the prosecutorial umbrella: (1) Torngren attempted to force Eric to sell his Garden City shares to the Lunardis at below-market **[*15]** value; (2) Torngren authorized the Lunardis to send Eric a letter of intent to buy Eric's shares in installment payments; (3) Torngren interfered with a third party's attempt to purchase Eric's shares; (4) Torngren promised to assist Eric's IT contractor, Roberts, with software licensing claims against Eric in exchange for his testimony; (5) Torngren provided an opinion to assist Roberts in litigation efforts against Swallow; and (6) Torngren facilitated and encouraged Roberts to illegally access confidential information from Eric's server and emails; (7) Torngren had discussions with Peter and made an agreement with Peter's attorney regarding diverting Eric's shares to Peter upon revocation; (8) Torngren directed Deborah to collect information and evidence against Eric in her divorce proceedings; and (9) Torngren issued and enforced the Emergency Orders prohibiting Garden City from paying Eric his distributions. *Id.*

at 1-2; FAC ¶¶ 129-30, 135, 166. Contrary to Eric's assertion, Torngren's challenged conduct was intimately related to his advocacy function in the disciplinary proceeding. The Court examines the nine acts in turn.

First, Eric points to the allegation that at a scheduled mediation, **[*16]** Torngren "attempted to compel settlement of the Accusation by forcing [Eric] to sell his shares in [Garden City] and his share of the [land] to the [Lunardis] at below market, fire-sale prices." FAC ¶ 112. That act of proposing a resolution plainly qualifies for absolute immunity because it goes to the heart of what the disciplinary proceeding was designed to achieve. Indeed, in a case involving Nevada's Gaming Control Board, the Ninth Circuit granted absolute immunity where "[t]he Board initiated disciplinary proceedings against [the plaintiff] and entered into settlement negotiations with him, actions that are prosecutorial in nature." *Romano v. Bible, 169 F.3d 1182, 1187 (9th Cir.)*, *cert. denied*, *528 U.S. 816, 120 S. Ct. 55, 145 L. Ed. 2d 48 (1999)*. Here, too, Torngren presented Eric with an opportunity to settle the disciplinary proceeding, but Eric turned the offer down. FAC ¶ 112.

Second, Eric directs the Court's attention to the allegations that the Lunardis sent a letter of intent to purchase Eric's Garden City shares at depressed value in connection with a global settlement proposed by Torngren. *Id.* ¶¶ 115, 117. As a preliminary matter, the FAC mischaracterizes some of the facts: while the FAC says that Torngren dictated the terms of Eric's sale to the Lunardis, *id*. ¶ 117, **[*17]** the Lunardis' letter and accompanying email (which are attached as an exhibit to the FAC) do not support that account. *Id.*, Ex. 10. Rather, Torngren proposed a global settlement under which Eric would give up his shares in Garden City while the Lunardis would pay a small fine and renew their license, and the Lunardis acceded to the settlement. *Id.* P 130. In line with that agreement, the Lunardis sent a letter of intent to purchase Eric's shares with their proposed terms of sale. *Id.*, Ex. 10. Notwithstanding the FAC's inaccurate description, as discussed above, Torngren's settlement negotiations fall within the ambit of his role as an advocate. *See* *Romano, 169 F.3d at 1187*.

Third, Eric identifies Torngren's actions with respect to a third party's $55 million offer to purchase Eric's shares. The FAC pleads without further explanation that Torngren exceeded his prosecutorial function by "(1) causing delay in [the third party]'s application; (2) challenging [the third party]'s offer by claiming it was in excess of Fair Market Value; and (3) interfering with [the third party]'s purchase." FAC ¶ 212. The FAC goes on to say that "the fair market value of [Eric]'s shares was in excess of $100 million." *Id.* The problem for **[*18]** Eric is that revocation of his license triggered a legal obligation for him to sell his shares within 60 days for an amount not greater than fair market value. *Cal. Bus. & Prof. Code §§ 19882(a)*, *19892(b)*. In this way, Torngren's actions were intended to preserve and enforce the Bureau's settlement with the Lunardis and the Commission's final revocation decision; his conduct is therefore tightly tied to the disciplinary proceeding, which remains open in light of Eric's pending writ petition in California Superior Court to vacate and set aside the Commission's decision. *Cf.* *Romano, 169 F.3d at 1187* (concluding that, in "approv[ing] the stipulation entered into by [the defendant] and the Board to resolve his disciplinary proceeding," the "Commission members carried out acts of independent decision-making integral to the functioning of a quasi-judicial process"); *Demery v. Kupperman, 735 F.2d 1139, 1144 (9th Cir. 1984)* (holding that "prosecutors are absolutely immune from civil suits alleging wrongdoing with regard to post-litigation . . . handling of a case").[3] In these circumstances, the Court disagrees with Eric's contention that Torngren's acts were not performed as part of his prosecutorial function.

The fourth and fifth alleged acts are that Torngren "promis[ed] to assist [Roberts] with purported software **[*19]** licensing claims against [Eric]" and "provided an opinion of [Roberts's] contractual rights" in exchange for Roberts's testimony against Eric. FAC ¶¶ 139-40. However, these post-accusation acts of securing witnesses and organizing testimony for trial were part and parcel of Torngren's preparation for the disciplinary proceeding. *See* *Buckley, 509 U.S. at 273* (recognizing "the advocate's role in evaluating evidence and interviewing witnesses as he prepares for trial"); *Genzler v. Longanbach, 410 F.3d 630, 639 (9th Cir. 2005)* ("A prosecutor gathering evidence is more likely to be performing a quasi-judicial advocacy function when the prosecutor is 'organiz[ing], evaluati[ng], and marshaling [that] evidence' in preparation for a pending trial, in contrast to the police-like activity of '*acquiring* evidence which might be used in a prosecution.'" (quoting *Barbera v. Smith, 836 F.2d 96, 100 (2d Cir. 1987)))*. It does not matter if

[3] Additionally, the third party's $55 million offer was a bona fide offer that triggered Eric's obligation under the Buy/Sell Agreement to notify the Lunardis and provide them a right of first refusal, as two arbitrations later confirmed. ECF 18-3, Exs. 1-5.

Torngren's motives were sinister and his promises were in furtherance of a larger conspiracy because "[i]ntent . . . play[s] no role in the immunity analysis." *Ashelman v. Pope, 793 F.2d 1072, 1078 (9th Cir. 1986)* (en banc). Indeed, the Ninth Circuit has observed that "allegations that a conspiracy produced a certain decision should no more pierce the actor's immunity than allegations of bad faith, personal interest or outright malevolence." ***[*20]*** *Id.* Employing that rule, the Ninth Circuit concluded that prosecutorial immunity barred a claim alleging that a prosecutor conspired with a judge to predetermine the outcome of a trial. *Id.* Prosecutorial immunity is likewise justified here.

Sixth, the FAC separately asserts that Torngren "facilitated and encouraged" Roberts to collect evidence by "illegally accessing [Eric]'s server and emails that contain privileged, confidential communications" in violation of federal and state computer trespass laws. FAC PP 153-54. But the supporting document attached to the FAC definitively contradicts those allegations. Specifically, the FAC cites an interview transcript in which San Jose's Division of Gaming Control Administrator asked Roberts to provide non-proprietary access information from a server that Roberts maintained. *Id.*, Ex. 21. Thus, even though the legality of the prosecutor's acts may be indicative or determinative of the scope of immunity, *see* *Lacey v. Maricopa Cty., 693 F.3d 896, 914 (9th Cir. 2012)* (en banc) ("Where the prosecutor has side-stepped the judicial process [by disobeying applicable law], he has forfeited the protections the law offers to those who work within the process."), Torngren's actions here were not outside the bounds **[*21]** of the law. Instead, Torngren was performing his quasi-judicial advocacy function by marshalling evidence for the disciplinary proceeding. *See* *Genzler, 410 F.3d at 639*.

Seventh, Eric cites the allegation that Torngren and Peter "had discussions . . . about whether [Peter] would be able to divert [Eric]'s distributions to himself if [Eric]'s license were revoked." FAC ¶ 135. In a similar vein, before Peter testified, Torngren allegedly reached an agreement with Peter's attorney "that [Torngren] would improperly use his influence to divert [Eric]'s distributions to [Peter]." *Id.* But Torngren is easily entitled to prosecutorial immunity for discussing and preparing Peter's testimony with Peter and his attorney. *See* *Imbler, 424 U.S. at 431 n.32* (concluding that out-of-court "effort[s] to control the presentation of [a] witness' testimony" are "task[s] fairly within [the] function as an advocate").

Eighth, the FAC alleges that Torngren contacted Deborah by phone and directed her to collect evidence through her divorce proceedings in order to build an effective case against Eric. FAC ¶¶ 162, 164-66. Although the FAC contemplates that the phone call between Torngren and Deborah took place before the Bureau served the accusation against Garden **[*22]** City, *id*. ¶ 162 (noting that Torngren learned of the divorce proceedings around November 2013 and called Deborah), it does not appear to suggest that Torngren was acting in an investigatory role by, for example, "searching for . . . clues and corroboration." *Buckley, 509 U.S. at 273*. Rather, the FAC states that Torngren was assembling evidence for trial: he told Deborah to "collect information and evidence [that he] was looking for her to gather and/or develop," and Deborah agreed to "provide information that would assist [Torngren] in his efforts to induce the [Commission] to revoke [Eric]'s gaming license." FAC ¶¶ 166-67. It appears that Torngren's intent was for Deborah to testify at the revocation hearing. *Id.* ¶ 187. Accordingly, Torngren's conduct was "intimately associated with the judicial phase of the criminal process." *Imbler, 424 U.S. at 430*.

Ninth, and finally, Eric argues that Torngren improperly "issued and enforced an Emergency Order that prohibited [Garden City] from paying Swallow his distributions as a 50% shareholder." ECF 62 at 14. It is not certain whether Torngren could be liable for issuance of the Emergency Orders given that they were signed by the Bureau's Chief and issued by the Bureau. FAC, Exs. 6-7. In **[*23]** any event, the department has the legal authority to "issue any emergency orders against an owner licensee . . . that the department deems reasonably necessary for the immediate preservation of the public peace, health, safety, or general welfare." *Cal. Bus. & Prof. Code § 19931(a)*. Here, each Emergency Order "set[s] forth the grounds upon which it is based, including a statement of facts constituting the alleged emergency necessitating the action." *Id.* *§ 19931(b)*; FAC, Exs. 6-7. That conclusion is not altered by the FAC's bare allegation that Garden City's situation did not present an emergency. FAC ¶ 39. The FAC mistakenly assumes that Torngren's admission that emergency orders are typically used to shut down casinos means that emergency orders can never be used to prevent a casino from making certain payments. *Id.* PP 39-40, 90. In fact, the statute says that an "emergency order may suspend, limit, condition, or take other action in relation to the license of one or more persons in an operation." *Cal. Bus. & Prof. Code § 19931(c)*. Indeed, at the hearing before the Commission, the Chief Counsel for the Legal Division of the Commission recognized the Bureau's authority in this regard. FAC ¶ 92 (stating that conditions "could be imposed [immediately] in an emergency order"). **[*24]**

And Torngren had the authority to enforce the Emergency Orders against Garden City. As a general matter, "[t]he emergency order is effective immediately upon issuance and service." *Cal. Bus. & Prof. Code § 19931(c)*. Thus, when Eric's attorney asked Garden City to remit all withheld funds to Eric based on the entry of settlement between the Bureau and the Lunardis, Torngren properly responded that the settlement provided that Garden City must continue to comply with the payment restrictions in the Amended Emergency Order until there was a resolution of the accusation against Eric. *Id.* ¶¶ 129-30, Ex. 14. These enforcement efforts served the important purposes of protecting the Bureau's settlement with the Lunardis and preserving the status quo until the disciplinary proceeding was resolved. *See* *Imbler, 424 U.S. at 431 n.33* (explaining that "the duties of the prosecutor in his role as advocate for the State [can] involve . . . actions apart from the courtroom"). The Court views the enforcement of the Emergency Orders issued in connection with the underlying accusation as closely connected to the judicial phase of the disciplinary proceeding. *See* *Van de Kamp, 555 U.S. at 342-43*.

Because absolute immunity bars Eric's *§ 1983* and RICO claims against Torngren, the Court GRANTS Torngren's motion to **[*25]** dismiss claims one through four. "[W]here prosecutorial immunity bars a plaintiff's claim[s], the deficiencies . . . cannot be cured by amendment." *Inman v. Anderson, No. 17-CV-04470-LHK, 294 F. Supp. 3d 907, 2018 U.S. Dist. LEXIS 32976, 2018 WL 1071158, at *6 (N.D. Cal. Feb. 27, 2018)*. Therefore, the Court dismisses these claims against Torngren without leave to amend.

2. ***Noerr-Pennington*** Doctrine

Torngren's conduct is completely shielded from suit by prosecutorial immunity. The remaining defendants—the Lunardis and Deborah—argue that their conduct is protected petitioning activity under the *Noerr-Pennington* doctrine.[4] *Noerr-Pennington* stands for the proposition that "those who petition any department of the government for redress are generally immune from statutory liability for their petitioning conduct." *Sosa v. DirecTV, Inc., 437 F.3d 923, 929 (9th Cir. 2006)* (citing *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)* ("*Noerr*"), and *United Mine Workers of America v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)* ("*Pennington*")). This doctrine arose in the context of ***antitrust law***, *see, e.g.,* *Noerr, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464*, but the Ninth Circuit has applied its protections to *§ 1983* and RICO actions. *See, e.g., Kearney v. Foley & Lardner, LLP, 590 F.3d 638, 643-48 (9th Cir. 2009)* (applying *Noerr-Pennington* in an action brought under *§ 1983* and RICO).

Protected petitioning activity includes bringing a lawsuit, defending a lawsuit brought by another, and filing papers with a court. *See, e.g.,* *Freeman v. Lasky, Haas & Cohler, 410 F.3d 1180, 1184 (9th Cir. 2005)* (defining petitioning activity as any "communication to the court" and concluding that **[*26]** *Noerr-Pennington* applies to defensive pleadings "because asking a court to deny one's opponent's petition is also a form of petition"). "[C]onduct incidental to a petition is protected by *Noerr-Pennington* if the petition itself is protected." *Id.* (internal quotation marks omitted) (quoting *Theofel v. Farey-Jones, 359 F.3d 1066, 1078 (9th Cir. 2004))*.

Noerr-Pennington's protections are not absolute, however. There exists a "sham litigation" exception to the doctrine. *Id. at 1183-84* ("While *Noerr-Pennington* immunity is broad, it is not so broad as to cover all litigation: 'Sham' petitions don't fall within the protection of the doctrine."). The Ninth Circuit has recognized three circumstances that fit the sham exception: (1) "where the lawsuit is objectively baseless and the defendant's motive in bringing it was unlawful," (2) "where the conduct involves a series of lawsuits 'brought pursuant to a policy of starting legal proceedings without regard to the merits' and for an unlawful purpose," and (3) where "'a party's

---

[4] Torngren also raises *Noerr-Pennington* as a ground for dismissal. Although the Court need not reach the issue because Torngren's conduct was performed as part of his prosecutorial function, the Court notes that the conclusions reached below as to the Lunardis and Deborah would apply equally to Torngren.

knowing fraud upon, or its intentional misrepresentations to, the court deprive the litigation of its legitimacy.'" *Sosa, 437 F.3d at 938* (quoting *Kottle v. Nw. Kidney Ctrs., 146 F.3d 1056, 1060 (9th Cir. 1998))*. Eric does not dispute that the relevant actions of the Lunardis and Deborah fall within the scope of the *Noerr-Pennington* ***[*27]*** doctrine; instead, he invokes the third formulation of the sham exception, arguing that fraud and intentional misrepresentations deprived the disciplinary proceeding of its legitimacy.

The Court finds that this exception is inapplicable because the FAC and supporting exhibits conclusively show that Eric's identified issues did not deprive the disciplinary proceeding of its legitimacy. Starting at the high level, the Court notes that the proceeding lasted seven days before an ALJ during which Eric was permitted to submit evidence and make arguments in support of his case. FAC ¶¶ 131, 136. Afterward, the ALJ issued an extensive proposed decision detailing the reasons for revoking Eric's gambling license and denying his request for renewal. *Id.*, Ex. 16. The ALJ's review was followed by a second-layer review by the Commission. Not completely satisfied some of with the ALJ's findings, the Commission rejected the ALJ's proposed decision and requested that the parties submit written argument on a number of specific issues, *id.*, Ex. 17 at 1-3, which the parties did. In a thorough 62-page decision, the Commission explained its reasons for ordering that Eric's license be revoked, ordering that **[*28]** renewal be denied, and assessing a penalty and costs against Eric. *Id.*, Ex. 18. It is important to note that throughout the entirety of the proceedings before the ALJ and the Commission, Eric was represented by an attorney. *Id.* ¶¶ 18-20. Furthermore, Eric has challenged the Commission's decision in a writ petition that is still pending before the California Superior Court. *Id.* ¶ 145.

Turning to the specifics, the Court concludes that Eric cannot show that any of the alleged irregularities in the proceeding had any influence on the underlying decision. *See* *Rupert v. Bond, 68 F. Supp. 3d 1142, 1159 (N.D. Cal. 2014)*. Eric first pleads that Deputy Attorney General Ronald Diedrich ("Diedrich") made an unexpected appearance on the first day of the hearing. FAC ¶ 132. The ALJ acknowledged Diedrich's presence (in part because the ALJ had previously worked for him) and asked Torngren to explain his role. *Id.* ¶ 134. As reflected in the transcript from the proceeding, Torngren responded: "[Diedrich] and I are coworkers. Because of his wealth of experience in administrative law matters, he's here to provide some assistance today." *Id.*, Ex. 15 at 48. The ALJ also gave Eric's attorney an opportunity to be heard on the issue, but counsel declined. *Id.* Outside **[*29]** of these acknowledgements of Diedrich's presence, *id*. ¶¶ 132-34, the Court has not found or been pointed to any point at which Diedrich played any role in the proceeding. Nor does the ALJ's decision reference Diedrich. Even if the Court were to agree that Diedrich's presence was inappropriate, it had no demonstrated effect on the proceeding or final decision, as required to invoke the pertinent sham exception. *See* *Rupert, 68 F. Supp. 3d at 1159*.

Next, Eric looks to the testimony and evidence submitted with respect to three witnesses—Peter, Roberts, and Deborah—which the Court addresses successively. With respect to Peter, the FAC challenges the veracity of his testimony when he admitted, during the course of that testimony, that he had had discussions with Torngren about whether Peter would profit if Eric's license were revoked. FAC ¶ 135. The FAC describes the ALJ as finding that "[Peter]'s testimony against [Eric] was 'evasive and disingenuous' and that [Peter] was effectively trying to find a way to divert millions of dollars in [Eric]'s distributions to himself." *Id.* ¶ 136. But the fact that Peter's motives were revealed and that the ALJ accordingly discounted his testimony demonstrate that the process was working, **[*30]** not that it was defective. Indeed, the ALJ's decision explicitly noted that "[Peter]'s testimony was accorded less weight because of his self-interest in the proceedings." *Id.*, Ex. 16 at 4. The Commission repeated the same observation about Peter's diminished credibility and relied on his testimony only when "supported by documentary evidence and other witnesses." *Id.*, Ex. 18 at 11-12.

The same is true with respect to Roberts's testimony. The FAC says that Torngren "directly coerced and influenced the testimony of [Roberts]." *Id.* ¶ 146. In particular, the FAC alleges that, in exchange for Roberts's cooperation, the Lunardis promised to pay Roberts for IT work at Garden City and Torngren promised to help Roberts pursue licensing claims against Eric. *Id.* ¶¶ 138-40. But the methods used to acquire Roberts's declaration were raised during the hearing. Accordingly, the ALJ "accorded no weight" to Roberts's declaration based on her finding that "Roberts's statement was essentially purchased by the Bureau with [Peter]'s assistance." *Id.* ¶ 137, Ex. 16 at 4. In deciding not to adopt the ALJ's proposed decision, the Commission specifically asked the parties to address the weight that it should **[*31]** give to Roberts's declaration. *Id.*, Ex. 17 at 3. Based on the parties' responses and the evidence, the Commission disagreed that "Roberts's testimony was coerced or that he was forced to say anything he did not wish to say." *Id.*, Ex. 18 at 11. The Commission therefore considered Roberts's declaration "as part of the record but afforded less weight in making [its] factual findings." *Id.* Again, these circumstances typify the orderly progression of a legitimate process.

Relatedly, the Court rejects Eric's unsupported assertion that Torngren "deliberately withheld [certain] discovery and repeatedly misled the ALJ about its existence." *Id.* ¶ 151. In particular, the FAC states that "[Torngren] withheld hundreds of e-mails between himself and [Roberts] and hundreds of additional e-mails between himself, [Peter], [Roberts], [Peter's attorney] and others acting as [the Lunardis'] agents." *Id.* But as the FAC admits, Torngren's privilege log submitted in the pending writ proceeding in California Superior Court lists these emails and provides the grounds on which the documents were withheld—e.g., attorney work product privilege. *Id.*, Ex. 20. Eric does not particularly challenge any withholding **[*32]** decision or privilege designation. The FAC suggests that these emails would have mattered because they would have served to show that Torngren was responsible for coercing Roberts's testimony. *Id.* PP 148-50.[5] Even putting aside that the supporting evidence does not support that narrative, *see id.*, Ex. 19, Eric does not allege that Roberts said anything untruthful in the disciplinary hearing, and neither the ALJ nor the Commission placed much weight on Roberts's testimony in reaching their decisions.

As to Deborah, Eric alleges that she made untrue statements regarding her participation and interest in a business called Secure Stone, LLC ("Secure Stone"). *Id.* ¶¶ 168-69. Specifically, the FAC states that Deborah falsely testified under oath that Secure Stone was community property, not her sole property; that she never saw or received from Eric checks made out to Secure Stone; and that she never deposited checks made out to Secure Stone. *Id.* ¶ 168. According to the FAC, Deborah later recanted this testimony and refused to testify at the disciplinary hearing. *Id.* ¶¶ 185-87. Although it appears that the ALJ and the Commission may have relied on Deborah's representation that Secure Stone was community **[*33]** property, *see id.*, Ex. 16 at 7, Ex. 18 at 16, the proceeding was not deprived of its legitimacy. For one thing, Eric knew of the alleged errors in her testimony and had an opportunity to bring up any perceived falsities during the disciplinary proceeding. *Alers v. Bank of Am., NA, No. 14-CV-00611-GW, 2014 U.S. Dist. LEXIS 199727, 2014 WL 12787629, at *2 (C.D. Cal. Apr. 24, 2014)*, *aff'd*, *671 F. App'x 425 (9th Cir. 2016)*. Additionally, the ALJ and the Commission both found that "the record [was] replete with credible evidence that Secure Stone was operated and controlled by [Eric], including his testimony that he considered it his company." *Id.*, Ex. 16 at 7, Ex. 18 at 16. Most importantly, however, it is a certainty that there was no ultimate effect on the Commission's decision because the Commission concluded that, as a legal matter, "the charges regarding [Secure Stone] were not proven." *Id.* ¶ 191. Eric's opposition essentially concedes that Deborah's statements about Secure Stone had no bearing on the Commission's decision but urges the Court to "consider her misrepresentations in the context of the entire conspiracy." ECF 64 at 21. However, because the Court has already rejected Eric's other challenges, there is no basis to conclude that the disciplinary proceeding was a sham.

In sum, to the extent **[*34]** that the irregularities identified by Eric were actually irregular, none of them so deprived the disciplinary proceeding of its legitimacy as to render it a sham. In large part, the alleged misrepresentations "were clearly not relied upon by [the decisionmakers]." *Rupert, 68 F. Supp. 3d at 1159*. Additionally, Eric improperly seeks to rehash arguments already addressed by the ALJ and the Commission or to "recast disputed issues from the underlying litigation as 'misrepresentations' by the other party." *Kottle, 146 F.3d at 1063* (citation omitted). These efforts "are therefore insufficient to overcome *Noerr-Pennington* protection." *Id. at 1064* (citation omitted). Accordingly, the Court concludes that the conduct of the Lunardis and Deborah is petitioning activity entitled to immunity under the *Noerr*-*Pennington* doctrine and GRANTS their motions to dismiss claims one through four. Because there does not appear to be any way in which Eric could amend the FAC, consistent with his present allegations, to overcome the *Noerr-Pennington* doctrine, the Court dismisses these claims without leave to amend.

---

[5] The FAC also repeats the allegation that Torngren encouraged Roberts to secure Eric's confidential information by illegal means. *Id.* ¶¶ 148, 153-54. Not only does Eric fail to identify any confidential information that was illegally taken from him or introduced during the proceeding, but his story is contradicted by the interview transcript attached to his FAC. As noted above, Roberts was asked to provide non-proprietary information from a server that Roberts maintained. *Id.*, Ex. 21.

3. Alternative Bases for Dismissal

The Court also briefly addresses other grounds raised by Torngren, the Lunardis, and Deborah, many of which supply legitimate **[*35]** alternative bases on which to dismiss Eric's *§ 1983* and RICO claims.

a. Claim and Issue Preclusion

The Lunardis and Deborah assert that the prior two rounds of arbitration between Eric and the Lunardis bar Eric's *§ 1983* and RICO claims under the doctrines of claim and issue preclusion. Claim and issue preclusion are related doctrines that involve the "effects of former adjudication." 18 Charles Alan Wright et al., Federal Practice and Procedure § 4402 (3d ed. 2018). Claim preclusion "operates as a bar to the maintenance of a second suit between the same parties on the same cause of action." *People v. Barragan, 32 Cal. 4th 236, 9 Cal. Rptr. 3d 76, 83 P.3d 480, 492 (Cal. 2004)*. Issue preclusion "prohibits the relitigation of issues argued and decided in a previous case, even if the second suit raises different causes of action." *DKN Holdings LLC v. Faerber, 61 Cal. 4th 813, 189 Cal. Rptr. 3d 809, 352 P.3d 378, 386 (Cal. 2015)*. The Court examines each of these doctrines in turn.

Claim preclusion has no application in this case. "Claim preclusion arises if a second suit involves: (1) the same cause of action (2) between the same parties (3) after a final judgment on the merits in the first suit." *Id.* Although elements (2) and (3) are satisfied for the Lunardis, element (1) is not. To distinguish between causes of action, California employs the primary rights doctrine, which focuses on the harm suffered. **[*36]** *San Diego Police Officers' Ass'n v. San Diego City Emps.' Ret. Sys., 568 F.3d 725, 734 (9th Cir. 2009)*. While the prior arbitration actions dealt with the Lunardis' right of first refusal under the Buy/Sell Agreement, Eric's present action alleges deprivation of his civil rights under *§ 1983* and violations of RICO. The rights protected by those federal statutes are distinct from the common law right to enforce only agreed-upon contractual terms, the claim presented in arbitration. *See* *Ivanoff v. Bank of Am., N.A., 9 Cal. App. 5th 719, 215 Cal. Rptr. 3d 442, 451 (Ct. App. 2017)* (concluding that a violation of a federal statutory consumer protection statute triggered a different primary right than a contract claim). It is not even clear if these issues could have been raised in arbitration, and claim preclusion extends only to those claims that actually were or could have been litigated previously. *Ass'n of Irritated Residents v. Dep't of Conservation, 11 Cal. App. 5th 1202, 218 Cal. Rptr. 3d 517, 531 n.14 (Ct. App. 2017)*.

In contrast, issue preclusion prevents Eric from relitigating issues regarding the sale of his shares in Garden City. At multiple points, the FAC bleeds into this territory when it asserts that the Lunardis impeded Eric's sale to a third party and required Eric to sell his shares to the Lunardis at below-market prices. *See, e.g.*, FAC ¶¶ 34-36, 59, 79. Those assertions appear to be at odds with the arbitrators' findings that the third party's offer to purchase Eric's Garden City shares **[*37]** for $55 million was a bona fide offer that triggered the Lunardis' right of first refusal to purchase the shares at the same price. ECF 18-3, Exs. 1, 3. And the arbitration decisions became binding when they were confirmed by the Superior Court. *See* *Cal. Civ. Proc. Code §§ 1908(a)(2)*, *1287.4*. Eric cannot reopen these settled issues. Such "successive litigation of an issue of fact or law actually litigated and resolved in a valid court determination essential to the prior judgment" is exactly what issue preclusion is designed to avoid. *Taylor v. Sturgell, 553 U.S. 880, 892, 128 S. Ct. 2161, 171 L. Ed. 2d 155 (2008)* (quoting *New Hampshire v. Maine, 532 U.S. 742, 748-49, 121 S. Ct. 1808, 149 L. Ed. 2d 968 (2001))*. Eric appears to acknowledge this point, as he "agrees that the arbitration decisions are final and dispositive as to whether the Lunardis could exercise their right of first refusal . . . and match [the third party's] $55 million offer and the terms of that specific sale." ECF 63 at 8. Thus, the Court concludes that Eric's claims are barred by issue preclusion to the extent they seek to revisit the arbitrators' determinations about the sale of Eric's Garden City shares.

b. Failure to State a *§ 1983* Claim

Eric cannot state a cognizable claim under *§ 1983* against any of the defendants. *Section 1983* provides a tort remedy against "[e]very person who, under color of [state law], subjects, or causes to be subjected, **[*38]** any citizen of the United States . . . to the deprivation of any rights, privileges, or immunities secured by the Constitution and laws." *42 U.S.C. § 1983*. Eric's two *§ 1983* claims allege that Torngren, the Lunardis, and Deborah conspired to deprive Eric of his constitutional rights to substantive due process and equal protection. FAC ¶¶ 241-50.

Conspiracy under *§ 1983* is typically deployed by plaintiffs as a means to "draw in private parties who would otherwise not be susceptible to a *§ 1983* action because of the state action doctrine." *Lacey, 693 F.3d at 935* (citing *Adickes v. S. H. Kress & Co., 398 U.S. 144, 152, 90 S. Ct. 1598, 26 L. Ed. 2d 142 (1970))*. Private parties may still be liable even if the state actor is shielded from suit by some form of immunity. *See* *Dennis v. Sparks, 449 U.S. 24, 28, 101 S. Ct. 183, 66 L. Ed. 2d 185 (1980)*. Nevertheless, conspiracy is not itself a constitutional tort under *§ 1983*. *Lacey, 693 F.3d at 935*. Thus, the plaintiff must always show "an underlying constitutional violation" to sustain a *§ 1983* claim. *Id.* Eric cannot do that here.[6]

Eric's substantive due process rights have not been violated. The substantive due process guarantee protects against the arbitrary and oppressive wielding of government power. *Cty. of Sacramento v. Lewis, 523 U.S. 833, 846, 118 S. Ct. 1708, 140 L. Ed. 2d 1043 (1998)*. Government conduct violates substantive due process when it is so severe as to "shock[] the conscious." *United States v. Salerno, 481 U.S. 739, 746, 107 S. Ct. 2095, 95 L. Ed. 2d 697 (1987)* (quoting *Rochin v. California, 342 U.S. 165, 172, 72 S. Ct. 205, 96 L. Ed. 183 (1952))*. None of the conduct that Eric challenges can fairly be characterized as rising **[*39]** to that level. Rather, based on Eric's behavior as a gambling establishment owner, Torngren initiated and prosecuted an action to revoke Eric's license. The Lunardis and Deborah participated in that action either by collecting evidence or providing testimony. After a seven-day administrative hearing, the ALJ and the Commission decided that revocation was appropriate. Accordingly, Eric cannot make out a claim for violation of his substantive due process rights.

The same result obtains with respect to Eric's class-of-one equal protection claim. The Supreme Court has held that a "class of one" may sustain an equal protection claim by alleging that he "has been intentionally treated differently from others similarly situated and that there is no rational basis for the difference in treatment." *Vill. of Willowbrook v. Olech, 528 U.S. 562, 564, 120 S. Ct. 1073, 145 L. Ed. 2d 1060 (2000)*. Assuming that Eric can rely on the class-of-one theory, his equal protection claim fails because there is a rational basis for the difference in treatment. In particular, the Bureau's and Commission's various decisions detail Eric's egregious and unlawful conduct that warranted issuing Emergency Orders and revoking his license. FAC, Exs. 4, 6-9, 18. In response, the FAC asserts, with no further **[*40]** elaboration, that Eric was "treated differently than others similarly situated and there is no rational basis for the difference in treatment." *Id.* ¶ 248. The only possible comparator is Peter, but the FAC admits that Torngren and the Commission offered an explanation for his disparate treatment—namely, Peter was an "absentee owner." *Id.* ¶¶ 198-99. As the Commission stated in its decision, "the record established clearly that [Eric] was far more culpable than [Peter] which justifies disparate treatment." *Id.*, Ex. 18 at 58.[7] Therefore, Eric cannot make out a claim for violation of his equal protection rights.

c. Failure to State a RICO Claim

Eric's two RICO claims also fail. Eric brings a RICO claim against Torngren and the Lunardis for violations of *18 U.S.C. § 1962(c)*, which provides that "[i]t shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity." FAC ¶¶

---

[6] Eric relatedly has not shown "the existence of an agreement or meeting of the minds" between Torngren, the Lunardis, and Deborah "to violate constitutional rights." ***Crowe v. County of San Diego, 608 F.3d 406, 440 (9th Cir. 2010)*** (citation omitted).

[7] In his opposition, Eric also suggests that Torngren defied the Commission's decision, which Eric characterizes as "requiring the Lunardis to disburse Plaintiff's income to him as a 50% shareholder in a [sic] 'S' corporation." ECF 62 at 18. But the cited portion of the decision provides only that "[California Business and Professions Code] [s]ection 19882 controls any denial or revocation of license for a shareholder in a corporation. [Peter did] not stand to receive any withheld distributions and [Eric]'s shares would be subject to sale; not automatic transfer to remaining shareholders." FAC, Ex. 18 at 11 n.6.

251-58. Eric's second RICO claim includes Deborah as a defendant in addition to Torngren and the Lunardis. The **[*41]** FAC alleges a *§ 1962(d)* violation for conspiracy to violate *§ 1962(c)*. FAC ¶¶ 259-64.

Eric has not established the contemplated or actual existence of a "pattern of racketeering activity," which is necessary for his two RICO claims. *Religious Tech. Ctr. v. Wollersheim, 971 F.2d 364, 368 n.8 (9th Cir. 1992)* (per curiam). A "pattern of racketeering activity" requires commission of at least two enumerated predicate offenses within a ten-year period. *18 U.S.C. § 1961(1)*, *(5)*. As predicate offenses, Eric has alleged mail and wire fraud, bank fraud, extortion, and money laundering. FAC ¶ 49. The Supreme Court, however, has made clear that in addition to the requisite number of predicate acts, the plaintiff must show that the predicates are related and "amount to or pose a threat of continued criminal activity." *H.J. Inc. v. Nw. Bell Tel. Co., 492 U.S. 229, 239, 109 S. Ct. 2893, 106 L. Ed. 2d 195 (1989)*. The latter concept, "continuity," refers "either to a closed period of repeated conduct, or to past conduct that by its nature projects into the future with a threat of repetition." *Id. at 241*.

Eric obviously cannot demonstrate a future threat because the alleged RICO scheme ceases once the prosecution is complete. *See* *Wollersheim, 971 F.2d at 366* ("Since the only goal . . . was the successful prosecution of the . . . state tort suit, there was no threat of activity continuing beyond the conclusion of that suit."). Nor can Eric establish **[*42]** a closed period of continued criminal activity. The Ninth Circuit has found that a plaintiff fails to allege a "pattern of racketeering activity" when the defendant's "collective conduct is in a sense a single episode having the singular purpose of impoverishing [the sole plaintiff]." *Sever v. Alaska Pulp Corp., 978 F.2d 1529, 1535 (9th Cir. 1992)* (citing *Medallion Television Enters., Inc. v. SelecTV of Cal., Inc., 833 F.2d 1360, 1364 (9th Cir. 1987))*. The instant case fits that bill: the alleged RICO scheme was designed to achieve one "common goal, i.e., to cause [Eric] to lose his gambling license and force [him] to sell his interest in [Garden City] at a price far below fair market value." FAC ¶ 34. Other circuits have reached the same conclusion on similar facts to those here. *See, e.g.,* *Jackson v. BellSouth Telecomms., 372 F.3d 1250, 1267 (11th Cir. 2004)* ("[W]here the RICO allegations concern only a single scheme with a discrete goal, the courts have refused to find a closed-ended pattern of racketeering even when the scheme took place over longer [than ninth months]."); *Edmondson & Gallagher v. Alban Towers Tenants Ass'n, 48 F.3d 1260, 1265, 310 U.S. App. D.C. 409 (D.C. Cir. 1995)* (noting that it is "virtually impossible" to show a pattern of racketeering activity for a "single scheme" with a "single injury" and "few victims"); *SIL-FLO, Inc. v. SFHC, Inc., 917 F.2d 1507, 1516 (10th Cir. 1990)* (holding that multiple predicate acts failed to show a pattern where the acts "constituted a single scheme to accomplish 'one discrete goal,' directed at one individual with no potential **[*43]** to extend to other persons"). Accordingly, Eric's RICO claims are also doomed.

C. Tax Fraud Claims

Eric's final two causes of action charge the Lunardis with willfully filing fraudulent information returns with the Internal Revenue Service for the 2015 and 2016 calendar years. FAC PP 265-72. Specifically, the FAC states that the Lunardis earned more than was reported on Garden City's 2015 and 2016 returns and paid Eric less than the amount reported in the returns (and less than he was entitled). *Id.* ¶¶ 266, 270. Eric invokes *26 U.S.C. § 7434(a)*, which provides that "[i]f any person willfully files a fraudulent information return with respect to payments purported to be made to any other person, such other person may bring a civil action for damages against the person so filing such return."

Eric has sued the wrong "person" under *§ 7434(a)*. That statutory section provides a cause of action against the person who files the allegedly fraudulent return. And under the Internal Revenue Code, the term "person" encompasses companies and corporations. *See* *26 U.S.C. § 7701(a)(1)* ("The term 'person' shall be construed to mean and include an individual, a trust, estate, partnership, association, company or corporation."). Here, as the FAC itself **[*44]** makes plain, Garden City is the "person" who filed the allegedly fraudulent returns. Indeed, the FAC explains that the two causes of action are based on Garden City's submissions of "U.S. Income Tax Return[s] for an S Corporation" for the 2015 and 2016 calendar years. FAC ¶¶ 266, 270. At least one other district court has held that the taxpayer, not the preparers of the return, is liable under *§ 7434(a)*, *see* *Vandenheede v. Vecchio, No. 12-CV-12284-GCS, 2013 U.S. Dist. LEXIS 25845, 2013 WL 692876, at *3 (E.D. Mich. Feb. 26, 2013)*, *aff'd*, *541 Fed. Appx. 577 (6th Cir. 2013)*, and Eric provides no authority to the contrary. Accordingly, because Eric cannot maintain his tax fraud claims under *§ 7434(a)* against the Lunardis as a matter of law, the Court dismisses claims five and six without leave to amend.

IV. ORDER

For the foregoing reasons, IT IS HEREBY ORDERED that Torngren's, the Lunardis', and Deborah's motions to dismiss are GRANTED WITHOUT LEAVE TO AMEND and the action is hereby DISMISSED WITH PREJUDICE.

Dated: May 14, 2018

Opinion

ORDER SETTING SENTENCING GUIDELINES OFFENSE LEVEL FOR DEFENDANTS GIRAUDO AND CULLINANE

Defendants Joseph Giraudo and Kevin Cullinane have pled guilty to criminal violations of the *Sherman Antitrust Act, 15 U.S.C. § 1*. Unlike the other 21 defendants in this and related cases, Giraudo and Cullinane did not enter into plea agreements with the government. Not surprisingly, they contest the government's calculation **[*2]** of the appropriate offense level under the United States Sentencing Guidelines. The offense level determines the recommended length of custodial sentence under the guidelines.

The Court held a hearing on May 7, 2018, to set each defendant's offense level. The government calculated Giraudo's at 18 and Cullinane's at 17. Giraudo argued that his correct offense level was 9, while Cullinane contended that his was 12. The Court sided with the government's calculation with respect to both defendants. Having determined the appropriate offense level, the Court then proceeded to sentence Giraudo and Cullinane on May 8.

Given the complexity of this issue, the Court stated at the May 7 hearing that it would provide its reasoning as to the offense-level calculation in the form of a written order, rather than on the oral record. That reasoning follows. United States District Court Northern District of California

I. BRIEF BACKGROUND

Having described the background of this case in detail in an earlier order, see Order Denying Mot. to Suppress (dkt. 248) at 1-5, the Court discusses it here only briefly. Giraudo and Cullinane are two of 23 defendants scheduled to be sentenced by this Court for their involvement in a conspiracy to rig **[*3]** bids at foreclosure auctions in the counties of San Francisco and San Mateo. According to the government, Giraudo and Cullinane orchestrated the scheme along with Ray Grinsell, Daniel Rosenblatt, and Mohammed Rezaian, a group that other bidders sometimes referred to as the "Big Five." The members of the Big Five allegedly conspired to drive down the prices of properties at foreclosure auctions by agreeing with other individuals and groups to refrain from bidding on certain properties. Giraudo and Cullinane, for their part, dispute the notion that they were involved in orchestrating the scheme, saying their roles were no different than those of the other 18 conspirators.

All of the defendants, including Giraudo and Cullinane, pled guilty to entering into a criminal agreement to restrain trade under the Sherman Antitrust Act, *15 U.S.C. § 1*. Unlike their co-conspirators, however, Giraudo and Cullinane entered open pleas—that is, they did not plead pursuant to agreement with the government. See Applications to Enter Pleas (dkts. 263, 265). Accordingly, while admitting guilt, they dispute some of the facts on which the government bases its calculation under the guidelines, and challenge some of the government's **[*4]** legal arguments regarding guidelines interpretation.

II. LEGAL STANDARD

The Federal Sentencing Guidelines set out a uniform system of sentencing aimed at reducing disparities in sentences. *United States v. Booker, 543 U.S. 220, 250, 253, 125 S. Ct. 738, 160 L. Ed. 2d 621 (2005)* (Breyer, J., delivering op. of Court in part); see also *28 U.S.C. § 991(b)(1)(B)*. To this end, the guidelines establish standards for calculating offenders' culpability in the form of "offense levels" that may be translated into a recommended range of time in custody. These guidelines are advisory, not mandatory. *Booker, 543 U.S. at 259*. Determining the sentence ultimately rests in the discretion of the district court.

Cullinane and Giraudo agree that *§ 2R1.1* of the guidelines, which apply to horizontal agreements in restraint of trade, provides the starting point for the analysis. See *U.S.S.G. § 2R1.1 background* (2017). The base offense level under *§ 2R1.1* is 12. *§ 2R1.1(a)*. The government agrees that Giraudo and Cullinane are entitled to a three-level reduction for accepting responsibility by pleading guilty.

Among other things, the guidelines provide for enhancements based on the magnitude of commerce affected, *§ 2R1.1(b)(2)*, and the defendant's role in the offense, *§ 2R1.1 note 1*. They also provide for a one-point enhancement "[i]f the conduct involved participation in an agreement to submit non-competitive **[*5]** bids." *§ 2R1.1(b)(1)*.

A district court generally "uses a preponderance of the evidence standard when finding facts pertinent to sentencing," though a different standard applies when a sentencing factor has an "extremely disproportionate effect on the sentence relative to the offense of conviction." *United States v. Berger, 587 F.3d 1038, 1047-48 (9th Cir. 2009)* (emphasis omitted); see also *United States v. Andreas, 216 F.3d 645, 678 (7th Cir. 2000)*.

III. DISCUSSION

A. Giraudo

1. Volume-of-commerce enhancements

The Sentencing Guidelines provide for enhancements in antitrust cases based on the "volume of commerce done by [a participant in a conspiracy] or his principal in goods or services that were affected by the violation." *U.S.S.G. § 2R1.1(b)(2)*. "Affected" commerce "includes all sales made within the scope of the conspiracy." *Andreas, 216 F.3d at 676*. The parties disagree on both the proper methodology for calculating the volume of commerce and the factual basis of the calculation.

According to the Sentencing Guidelines, "Tying the offense level to the scale or scope of the offense is important in order to ensure that the sanction is in fact punitive and that there is an incentive to desist from a violation once it has begun." *U.S.S.G. § 2R1.1 background*. However, "[t]he offense levels are not based directly on the damage caused or profit made by the defendant[,] because damages **[*6]** are difficult and time consuming to establish. The volume of commerce is an acceptable and more readily measurable substitute." Id. The guidelines estimate that the average gain from horizontal agreements in restraint of trade is 10 percent of the total volume of commerce, and the offense-level adjustments are based on that assumption. See *§ 2R1.1 note 3*.

The government calculates Giraudo's volume of commerce at $36,663,335.66, exceeding the threshold of $10,000,000 required for a four-level increase in the offense level. Giraudo, meanwhile, maintains that his volume of commerce was essentially negligible, warranting no increase at all.

a. Treatment of Big Five as single entity

First, Giraudo argues that the government improperly attributes the full purchase price of the properties he was involved in rigging to him, even for properties in which he only retained a partial ownership share. He contends that these sales should instead be allocated proportionately to each buyer.

Giraudo is quite right that the guidelines section applicable to violations of *§ 1* of the Sherman Antitrust Act, unlike those for other conspiracies, "counts every sale just once." *United States v. Heffernan, 43 F.3d 1144, 1147 (7th Cir. 1994)* (Posner, J.). In antitrust cases, co-conspirators **[*7]** are not liable for sales made by other co-conspirators solely by virtue of their association. However, the volume-of-commerce calculation does include "commerce done by [a participant] or his principal in goods or services that were affected by the violation." *U.S.S.G. § 2R1.1(b)* (emphasis added). The law treats members of partnerships as agents of the partnership, with the partnership functioning as the principal. 46 Noah J. Gordon, *Am. Jur. 2d Joint Ventures § 36* (2018). So the government's treatment is appropriate.

Giraudo points out that the partnership agreements were not consistent from property to property, sometimes involving a different mix of owners.[1] But this changes nothing: nowhere does *§ 2R1.1* state that a conspirator may

---

[1] In his papers, Giraudo made this point only obliquely. See Giraudo Response (dkt. 319) at 17. He pressed it at oral argument on May 7, however. While the argument is probably waived, the Court considers it on the merits because doing so does not prejudice the government, given the outcome of the analysis.

only be liable for commerce done by a single principal. Such a rule would allow co-conspirators to avoid liability by forming an endless series of joint ventures with each other, frustrating the purpose of the antitrust laws.[2]

But wait, Giraudo says: if the government is treating the Big Five as a joint venture, then there was no Sherman Act violation at all, because a single entity cannot conspire with itself to violate *15 U.S.C. § 1*. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 777, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. True enough. . . . But there were 18 other co-conspirators who were not members **[*8]** of the Big Five. In its volume-of-commerce analysis, the government omits bids on properties on which members of the Big Five did not make an agreement with anyone outside the group. Gov't Sentencing Mem. (dkt. 307) at 8 n.9. In other words, the government did not treat members of the Big Five as co-conspirators with each other. The government's treatment is therefore entirely consistent with Copperweld.

b. Methodological disputes

Giraudo next objects to the government's methodology for calculating his volume of commerce. First, he insists that it is not necessary to calculate the volume of commerce at all, because a reliable measure of the actual gain is close at hand: the amount of the payoffs that co-conspirators accepted in exchange for refraining from submitting bids. Giraudo argues that, for any given property, the payoff will be equal to the difference between the market price (that is, what a property would have gone for had the auction been clean) and the rigged price (what the property actually went for). Indeed, Giraudo and Cullinane argue that, in some cases, the bids were entirely gratuitous, pushing the total payout for the property over the market price.

However, neither **[*9]** Giraudo nor Cullinane have identified any case or treatise supporting the proposition that the harm caused by bid-rigging may be measured solely by the amount of the payment given in exchange for a promise not to bid. Indeed, there is good reason to think that the price the properties would have sold for in a clean market is higher than the combination of the purchase price and payoff—perhaps much higher. For one thing, no rational bidder—and Giraudo had decades of experience in real estate transactions in general, and foreclosure auctions in particular—would choose to make a payoff to another bidder that is equal to the market price minus the purchase price. If the required payoff were that substantial, the bidder would instead simply purchase the property at the market price. There is evidence that this is exactly how members of the conspiracy viewed the auctions. See dkt. 307-7 at 3 ("Fong was not concerned about the payoff agreements as long as the total paid for a property including the payoff was equal to or less than the amount Fong was willing to pay for a property prior to the trustee sale.").[3]

Moreover, bid-rigging may be accomplished without any payoff at all, but rather with **[*10]** an agreement to "rotate" bids—I win this round, you win next round. (Indeed, that is the usual method.). Here, nearly every member of the conspiracy bid sometimes while agreeing to refrain from bidding at others. Accordingly, it is conceivable that the agreements consisted of reciprocal promises not to bid, in addition to monetary payments. See dkt. 307-8 at 5 ("Fung overheard Giraudo advise other people that Giraudo would allow them to buy a property if they agreed not to buy more property for a period of time."); dkt. 307-8 at 6 ("[B]idders at auctions [took] turns buying property in order to keep the price low.") (emphasis added); dkt. 307-11 at 3-4 ("Giraudo told Lipton that since he (Giraudo) let Lipton buy the Thomas Street property, Lipton should not bid against Giraudo for a property Giraudo wanted to buy."). The evidence that payoffs were often offset against other payoffs suggests that they served at least in part as a bookkeeping method to keep track of how many times bidders had agreed not to bid, rather than as compensation for so agreeing. See dkt. 307-9 at 8-9.

Other evidence indicates that the value of the non-compete agreement dwarfed the amount of the payoffs. For **[*11]** instance, there is evidence that the payoffs were much higher when the bidders involved were not repeat

---

[2] Giraudo also raises factual objections to the government's treatment of his involvement with alleged co-venturers on particular transactions. Those objections are addressed below, along with his other factual objections. See infra Part II.A.1.c.

[3] All of the evidence cited in this order comes in the form of summaries of witness interviews prepared by the government. Accordingly, all quotations are of the government's summaries, and do not necessarily reflect the witnesses' actual words.

players. A co-conspirator who pled guilty in a related case, Laith Salma, stated that, in his first encounter with the Big Five—presumably before its members knew whether or not Salma would be a repeat player—Cullinane requested $150,000 in exchange for agreeing not to bid on a property. Dkt. 307-19 at 4-5. The scheme's longevity and the persistence with which Giraudo and other members of the Big Five pursued it, despite clear awareness of the legal risks, also belies the claim that it was not lucrative. See dkt. 307-9 at 5 (Grinsell said he was "scared to death" in the late 1990s when he heard a rumor that investigators were focusing on the foreclosure auctions.); dkt. 307-12 at 6-7 (describing changing tactics once Rezaian began to suspect law enforcement was looking into the bidding schemes).

Indeed, there are equally compelling reasons to believe that the volume-of-commerce analysis understates the profit made by Giraudo and his co-conspirators. Bid-rigging schemes at foreclosure auctions are likely to be more profitable than other price-fixing ventures because (1) the public **[*12]** nature of the bids makes it easier to catch and punish those who cheat on the cartel; (2) the cartel underpay does not reduce output (the same number of homes come to auction whatever the sale price); and (3) banks are relatively price-insensitive sellers (indeed, they were apparently oblivious to the conspiracy, which a number of co-conspirators described as obvious to anyone at the auctions, with participants sometimes paying off criers[4]). See *Heffernan, 43 F.3d at 1149*. Moreover, individuals convicted of price-fixing often participate in cartels on behalf of large corporations, and thus appropriate for themselves only a small percentage of the total profit. See, e.g., *Andreas, 216 F.3d at 649*. Here, in contrast, the bidders acted on behalf of themselves, or as members of small partnerships. They therefore took home a much higher fraction of the gain than in the ordinary case.

But this discussion only highlights a broader point: "[antitrust] damages are difficult and time consuming to establish." *U.S.S.G. § 2R1.1 background*. This is precisely why the guidelines calculate harm based on volume of commerce, rather than more direct measures. Id. And indeed, the volume-of-commerce analysis is the only method the Sentencing Guidelines provide for calculating **[*13]** the harm caused. There may be a case in which in which it is appropriate to fashion an alternative method, but if so, this is not it.

Giraudo's next contention is that the portion of the bid amount below the pre-set minimum selling price should be excluded from the volume-of-commerce analysis because the sellers would have made that amount in any event. In other words, that portion was not "affected" by Giraudo's conduct. This is a weird argument. Giraudo might have contended that the entire purchase price should be excluded because the sellers actually received that amount, and were therefore not harmed up to that amount. In other words, he might have argued that "affected" commerce, as used in *§ 2R1.1(b)(2)*, means the actual loss, measured by the delta between the market price and the purchase price. Of course, this is plainly not what the guidelines mean by volume of commerce, as evidenced by the explanation in the application notes that the harm resulting from horizontal agreements in restraint of trade represents a small fraction of the total "volume of affected commerce." *U.S.S.G. § 2R1.1 note 3*.

Giraudo's actual argument is even more perplexing, however. Under his logic, if the market value of a home is $150,000, **[*14]** the minimum bid is $100,000, and a rigged property is purchased for $100,000, the volume of commerce is $0. Meanwhile, if the purchase price on the same property is $150,000, the volume of commerce is $50,000. In other words, where the actual harm is $50,000, the volume of commerce is $0, and where the actual harm is $0, the volume of commerce is $50,000.

One need not be Judge Posner to know that this makes no sense. It is equivalent to arguing that a consumer is not harmed by a price-fixing scheme so long as he is not forced to buy a product at a price above what he is willing to pay. If that were the case, antitrust laws would be a dead letter: buyers and sellers would never be harmed by price-fixing or bid-rigging. Fortunately for the antitrust bar, this is not how the law sees it: a buyer is harmed by price-fixing whenever he is (1) forced to pay more than the market price or (2) dissuaded from buying at a price above what he is willing to pay[5]—not only when he is somehow coerced into paying more than he would otherwise be willing to. So

---

[4] Dkt. 307-10 at 8.

Giraudo's argument that banks were not harmed because they could have withdrawn the property if they did not receive any bids above the pre-set **[*15]** minimum is unavailing.

Giraudo next likens this case to component-price-fixing cases in which courts calculate the volume of commerce based on the price-fixed component, rather than the end product sold to the consumer. He argues that the auctioned properties should really be separated into two—the portion up to the minimum bid (presumably equal to the amount of the encumbrance), and the portion that exceeds the minimum bid—and that he should only be taxed on the latter for properties he rigged. Some commodities can be separated into components because there are in fact two separate sales: the sale of the component to the manufacturer, and the sale of the entire commodity to the end user. If the component manufacturer engages in a price-fixing scheme on the component, then of course the volume of commerce is calculated with regard to only that component. But that is not the situation here: the homes were not sold piecemeal. Giraudo's argument is unavailing.

Next, Giraudo argues that sales which occurred more than five years prior to the filing of the indictment should not factor into the volume-of-commerce calculation because they are outside the statute of limitations. In support **[*16]** of this point, he cites a securities-fraud case concerning whether a statute of limitations applied to claims for disgorgement. *Kokesh v. S.E.C., U.S. , 137 S. Ct. 1635, 1639, 198 L. Ed. 2d 86 (2017)*. But the question here is not whether the statute of limitations at issue applies, but rather how. And that question has already been answered in the context of agreements in restraint of trade charged under *15 U.S.C. § 1*. Every circuit to rule on this issue has held that "each sale in a price-fixing conspiracy is an overt act that restarts the statute of limitations." *In re Pre-Filled Propane Tank Antitrust Litig., 860 F.3d 1059, 1065 (8th Cir. 2017)*, cert. denied sub nom. *Ferrellgas Partners, L.P. v. Morgan-Larson, LLC, 138 S. Ct. 647, 199 L. Ed. 2d 530 (2018)* (citing cases). So Giraudo's argument fails.

c. Factual disputes

Giraudo next contends that the government has not put forth sufficient evidence that he actually participated in the transactions it uses to calculate his volume of commerce. The government bases its volume-of-commerce calculation on some 206 transactions in which it claims Giraudo was involved. Having reviewed the evidence, and adopting the government's methodology, the Court finds by a preponderance of the evidence that Giraudo's volume of commerce is more than $10,000,000.

In challenging the factual basis of the government's volume-of-commerce calculation, Giraudo has taken a bit of a now-you-see-it, now-you-don't **[*17]** approach. The government represents that it provided the evidence supporting Giraudo's involvement in the listed transactions to his counsel over three years ago, see Gov't Response (dkt. 358) at 2 n.2, and gave his attorneys a list of the transactions cross-referenced to exhibits three months ago, id. at 8. Giraudo did not rebut these representations at oral argument.

Nevertheless, in his sentencing memorandum, Giraudo made only minor objections to the government's list of transactions, noting in footnotes that he had found several "discrepancies" and "factual errors." See Giraudo Sentencing Mem. (dkt. 313) at 20 n.30, n.34. Then, after receiving the government's sentencing memorandum—which included a chart of the allegedly rigged properties and cross-referenced (without actually attaching) supporting evidence—Giraudo responded that "the government has failed to offer a single piece of evidence to the Court to support the 206 property entries listed" as part of his volume of commerce. Giraudo Response (dkt. 319) at 14.

In response to this argument, the government duly served Giraudo and the Court with a thumb drive containing the referenced evidence. Gov't Reply (dkt. 358). After receiving **[*18]** the thumb drive, on the morning of the hearing set for determining the appropriate guidelines range, Giraudo identified 13 additional properties which he contended he had no role in purchasing. Reply (dkt. 363) at 2. Nevertheless, he did not ask for either a continuance or an

---

[5] See *U.S.S.G. 2R1.1 note 3* ("The loss from price-fixing exceeds the gain because, among other things, injury is inflicted upon consumers who are unable or for other reasons do not buy the product at the higher prices.").

evidentiary hearing to allow him further opportunities to contest the government's evidence. Instead, he urged the Court to refuse to consider the government's submission as untimely filed and find that his volume of commerce was $0.

Insofar as Giraudo moves the Court to exclude the evidence on the ground that the Court lacked sufficient time to review it, that motion is denied. Having reviewed the materials, the Court is satisfied that they are reliable and that the government has summarized them accurately. In the absence of specific objections by Giraudo that, if credited, would reduce the volume of commerce below $10,000,000, this is all that is required.[6] See *United States v. Gerald, 71 F. App'x 231, 232 (4th Cir. 2003)*.

Giraudo's contention that the Court should exclude the evidence on the ground that the government failed to give him notice consistent with due process also fails. Giraudo notes that "due process requires . . . that the defendant be given an opportunity **[*19]** to refute . . . . any information presented at sentencing." *United States v. Giltner, 889 F.2d 1004, 1008 (11th Cir. 1989)*. But he does not cite any cases in which a court held that this information must be disclosed to the defendant via the court's filing system, rather than through discovery. He cites a case in which a court excluded evidence of sales used to calculate volume of commerce as untimely where the government submitted the evidence after the court had already determined the volume of commerce. *United States v. SKW Metals & Alloys, Inc., 6 F. App'x 65, 66 (2d Cir. 2001)*. That case is obviously inapposite: here, the government submitted its evidence prior to the hearing at which the Court was to determine the guidelines range.

Even if the Court were to find that Giraudo lacked adequate notice of the evidentiary basis for the government's calculation of the volume of commerce, it would hold that the proper remedy would have been a continuance, not exclusion of the evidence. However, Giraudo's attorney emphatically stated at the May 7 hearing that he was not requesting a continuance. In doing so, he waived any argument that his client was entitled to a court-ordered remedy for the government's alleged delay in providing the evidence. Giraudo wants to have his cake, eat it too, and share it with his friends; but **[*20]** his lawyers, excellent as they may be, are not magicians.

2. Bid-rigging enhancement

Sentencing Guidelines § 2R1.1 provides for a one-point enhancement for defendants who participate "in an agreement to submit non-competitive bids." *§ 2R1.1(b)(1)*. The government argues that this enhancement applies to Giraudo's conduct. Giraudo counters that it only applies where defendants agree to rotate bids without making payoffs to each other. He cites Judge Posner's opinion in Heffernan for this proposition. See *43 F.3d at 1147*.

The panel in Heffernan held that the bid-rigging enhancement in *§ 2R1.1* is meant to capture the scenario in which a defendant agrees not to make a bid, "hence has not made a sale, hence has no volume of commerce." Id.; see also *U.S.S.G. § 2R1.1 note 6*. The panel held that the enhancement did not apply in the circumstances of that case, in which the defendants had agreed to submit matching bids. *Heffernan, 43 F.3d at 1147-50*. Giraudo's case is readily distinguishable: he frequently agreed not to bid. Heffernan made no distinction between cases in which the agreement not to bid involves a payoff, and cases in which it does not—and such a distinction would not make sense. In either case, the party on the other side of the transaction is harmed because the winning bid is artificially high **[*21]** or low; but the volume-of-commerce calculation does not account for this fact with regard to the party who does not bid. And there are other reasons why agreements to submit noncompetitive bids tend to be more harmful than agreements to submit matching bids or offers. See supra Part II.A.1.b.; see also *Heffernan, 43 F.3d at 1149*. Accordingly, to the extent Giraudo contends that the bid-rigging in this case was not particularly harmful compared to bid-rigging that does not involve payoffs, this argument is unavailing.

---

[6] The arguments Giraudo included in his reply to the government's response to his sentencing memorandum regarding specific transactions are waived. Giraudo had the evidence on which the government based its calculation for three years, and had the specific list of transactions the government considered for three months. The government also filed the list as an attachment to its own sentencing memorandum, which Giraudo could have addressed in his response. In any event, even if the Court were to exclude all of the transactions that Giraudo lists in his three briefs, the volume of commerce would still be well over $10,000,000.

In the alternative, Giraudo argues that the payoffs he received for not bidding are reflected in the requirement that he pay restitution, and that he shouldn't be punished further. But the guideline increase only bears on the recommended length of the custodial sentence. There is nothing in the guidelines to indicate that the applicability of the enhancement in *§ 2R1.1(b)(1)* depends on the magnitude of the fine levied on the defendant.

3. Role enhancement

The government argues that Giraudo is deserving of a four-point enhancement for his role as "an organizer or leader of a criminal activity that involved five or more participants or was otherwise extensive." *U.S.S.G. § 3B1.1*; see also *§ 2R1.1 note 1*. The guidelines advise courts to **[*22]** consider the following factors in determining whether this enhancement is warranted: (1) the exercise of decision-making authority, (2) the nature of participation in the commission of the offense, (3) the recruitment of accomplices, (4) the claimed right to a larger share of the fruits of the crime, (5) the degree of participation in planning or organizing the offense, (6) the nature and scope of the illegal activity, and (7) the degree of control and authority exercised over others. *§ 3B1.1 note 4*.

a. Applicability of enhancement

Giraudo first appears to argue that this enhancement is not applicable to white-collar criminals: "The four-level enhancement is intended for sophisticated drug cartels or organized crime syndicates, not octogenarian real estate investors." Sentencing Mem. at 13. But the notes to the guidelines for bid-rigging make express reference to the role-enhancement provision. *U.S.S.G. § 2R1.1 note 1*. So this argument fails.

b. Organization of the cartel

Giraudo next contends that the enhancement does not apply because there was no "organization" to speak of: "This was a disorganized group of people who would show up at auctions and make ad hoc agreements to bid or not bid when an opportunity arose." **[*23]** Sentencing Mem. at 13-14. Cullinane extends this argument in his brief, contending that "[n]o one was empowered to tell another when or how much to bid; each participant made those decisions for his/her self." Cullinane Sentencing Mem. (dkt. 297) at 5. Cullinane continues: "In reality, [the participants] were rivals who agreed on the structure for their rivalry but acted independently within it." Id. Certain bidders may have had more influence or resources than others, but "each participant crafted his or her own strategy and made bids on the basis of self-interest." Id. at 5-7.

Price-fixing cartels need not always have leaders in order to function effectively. Indeed, "some markets are by their structure so conducive to collusion-like behavior that it is to be expected even in the absence of a legal 'agreement' among the parties." 12 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and their Application ¶ 2002a (3d ed. 2012). But it is almost inconceivable that a cartel of the type at issue here could agree to rig bids without a strong management structure. Schemes such as this one require a high degree of organization and coordination. Id. at ¶ 2002f4. **[*24]** While agreeing to charge the same price for commodity products may require only a single agreement, with periodic updates to account for market fluctuations, see, e.g., *Andreas, 216 F.3d 645*, successive bid-rigging requires many (here, hundreds) of successive accords. And each agreement was likely more difficult to reach, given that members were agreeing not just to buy at a particular price, but to entirely forego the benefits of bidding in most transactions. In sum, it is extremely unlikely that cartel members spontaneously agreed when to bid and when not to bid, without any cajoling or assurances of future benefits from cartel leaders.

Controlling cheaters on a large cartel also requires strong management. See Areeda & Hovenkamp, ***Antitrust Law**, supra*, at ¶¶ 2002d, 2002d2, 2002f1 ("[T]he managers of the cartel must be vigilant about detecting cheating and disciplining the cheater."). Cheating on the cartel price becomes more profitable as the group becomes larger, and strong leadership is required because there are more members who need to be kept in line. See id. ¶ 2002d

("[C]artels become less stable as the number of members increases."). It is not in the interest of any individual bidder to try to out-bid a renegade without **[*25]** an understanding that he will be compensated for doing so. See id.; see also *United States v. Romer, 148 F.3d 359 (4th Cir. 1998)*, cert. denied, *525 U.S. 1141, 119 S. Ct. 1032, 143 L. Ed. 2d 41 (1999)*. Strong management solves this collective-action problem.

Guidelines determinations require more than cartel theory, of course: they also need actual evidence. The theory helps, however, to put the evidence into context. Here, the evidence overwhelmingly establishes that the Big Five managed the conspiracy, getting others involved and disciplining those who did not get with the program. According to Michael Navone, "It was known that Rezaian, Grinsell, Giraudo, Rosenbledt, and Cullinane worked together and were known as 'the group' or 'the big five.'" Dkt. 307-13 at 5; see also 307-8 at 6 (testimony of Florence Fung, describing the group as the "Board of Directors"). According to Salma, the Big Five set the rules of the bidding among co-conspirators and determined how much of a share each bidder would get in a given property, often dividing the shares unequally to give themselves a bigger cut of the pie. Dkt. 307-22 at 13. "Giraudo . . . explained to Salma the rule that if you were interested in a property, you had to tell Giraudo or someone else in the Big Five, and the Big Five made the determination **[*26]** as to who got the property." Dkt. 307-22 at 5. According to Grinsell, Giraudo kept a list tracking who had been paid to refrain from bidding on various properties. Dkt. 307-9 at 7. Later, Rezaian took on this role. Dkt. 307-16 at 1-2.

The Big Five also took responsibility for disciplining would-be cheaters on the cartel and threatening those who declined to participate. According to Salma, Giraudo and other members of the Big Five would bid up properties to punish those who did not follow the bid-rigging rules set by the Big Five, or would threaten to do so. Dkt. 307-22 at 5-6. According to Navone, "It was common for a person not associated with the group to have difficulty purchasing property . . . unless [he] agreed to pay the group." Dkt. 307-13 at 5. In sum, the evidence shows that this was a well-organized cartel in which the members of the Big Five played a managerial role.

c. Giraudo's role

Giraudo next argues that the leadership enhancement does not apply because he did not enjoy a leadership role within the Big Five. Rather, he and his four partners "operated as equals." But the evidence shows that Giraudo made the final decision over which co-conspirators could join the partnership; **[*27]** that Giraudo settled disputes within the conspiracy; that Giraudo gave direction to other members of the Big Five; and that other members of the Big Five regarded Giraudo as the leader.

Giraudo's representation to the Court that he only began bidding at the auctions during the financial crisis, apparently joining an already existing conspiracy, is belied by the statements of numerous co-conspirators that he had been bid-rigging much earlier, with a rotating cast. See, e.g., dkt. 307-9 at 4-5 (Grinsell); dkt. 307-6 at 2-3 (Abraham Farag). Rezaian, Rosenbledt and Cullinane only joined Giraudo and Grinsell once the foreclosure crisis was underway in 2009, when more people began attending the auctions. Dkt. 307-10 at 4 (According to Grinsell, the number of attendees more than doubled in 2009, from six to twelve or fifteen.). Grinsell maintained that Giraudo bullied him into joining the conspiracy, and admitted others to the "Big Five" partnership over Grinsell's objections. Dkt. 307-9 at 8-9. The members of the Big Five may have worked collaboratively in certain ways, but when there were disagreements, the other members consistently deferred to Giraudo. According to Rezaian, "Everyone at **[*28]** the auctions looked to Giraudo to make deals." Dkt. 307-16 at 4.

According to Salma, other co-conspirators referred to Giraudo as the "boss," "don," or "king" of the auctions: "From attending the auctions, one learned Giraudo was the boss and his position of being in charge was clear. Those attending the auctions learned that you did not 'fuck' with Giraudo." Dkt. 307-22 at 6. Cullinane would tell other bidders, "Don't make Joe angry." Dkt. 307-22 at 6-7. Giraudo would bully and shame other bidders, calling one the "Bad Indian." Dkt. 307-22 at 5-6. One bidder labeled the Big Five "Joe's Group." Dkt. 307-23 at 5.

Giraudo argues that Rezaian was the real ring-leader, pointing to Rezaian's role as an enforcer and intimidator, and his active direction of co-conspirators. Giraudo Response at 12-13. The evidence clearly indicates that Rezaian played an important part, orchestrating bidders and often threatening them. Grinsell noted that Giraudo decided to partner with Rezaian partly in order to "eliminate a competitor" (meaning Rezaian), a fact which suggests that Rezaian had significant leverage. Dkt. 307-10 at 4. But Grinsell also stated that "Rezaian went along with anything Giraudo said," **[*29]** and that "Rezaian would not have opposed Giraudo as it would have undermined Rezaian wanting to become Giraudo's friend and right hand man." Dkt. 307-10 at 3.

Rezaian may well have qualified for the leadership enhancement, had the government requested it. But "[t]here can, of course, be more than one person who qualifies as a leader or organizer of a criminal association or conspiracy." *U.S.S.G. § 3B1.1 note 4*. That other members also played crucial roles does not establish that Giraudo was not nonetheless a leader, and he has pointed to no evidence indicating that he took orders from anyone.

Giraudo contends that his co-conspirators' statements regarding his involvement are unreliable because they were not subject to cross-examination. But Giraudo does not point to any specific inconsistencies, and "hearsay is admissible at sentencing, so long as it is accompanied by some minimal indicia of reliability." *United States v. Littlesun, 444 F.3d 1196, 1200 (9th Cir. 2006)*. At the May 7 hearing, Giraudo's counsel contended that the government has hung its entire argument on the testimony of a single co-conspirator, Laith Salma. But it should be evident from the foregoing summary of the record that a bevy of other co-conspirators also spoke to Giraudo's leadership role within **[*30]** the Big Five, and the conspiracy as a whole. He is deserving of the enhancement.

B. Cullinane

Cullinane and the government disagree about the proper calculation of the volume of commerce affected by him. Cullinane also argues that an enhancement based on his role in the offense is improper. The Court takes these arguments in turn.

1. Volume of commerce

Like Giraudo, Cullinane argues that the Court should allocate his volume of commerce based on his ownership stake in the rigged properties, and that the volume-of-commerce calculation provided for in the guidelines overstates the actual profit he made. The Court rejects these arguments for the reasons already stated with respect to Giraudo. See supra Part II.A.1.

Cullinane also argues that the volume-of-commerce enhancement is only meant to address "collusion among providers of services or products to extract a higher price from consumers for those services and products." Cullinane Sentencing Mem. at 4. The enhancement is not designed for cases like this one, in which the agreements "served to reduce the profits made by banks and lenders on their foreclosed mortgages." Id. It is not quite clear what rationale Cullinane thinks supports this **[*31]** conclusion. He may be saying that the guidelines only apply to upstream (or selling) cartels, not downstream (or buying) ones. But "a buying cartel's low buying prices are illegal and bring antitrust injury and standing to the victimized suppliers. Clearly mistaken is the occasional court that considers low buying prices pro-competitive or that thinks sellers receiving illegally low prices do not suffer antitrust injury." *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 988-89 (9th Cir. 2000)* (quoting 2 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 375b at 297 (rev. ed. 1995)). "To hold otherwise would be contrary to long-established ***antitrust law***," id., not to mention binding Ninth Circuit precedent, see id.

Cullinane's attorney offered a different logic at the May 7 hearing, maintaining that the volume-of-commerce enhancement does not contemplate the conduct at issue here because that conduct only harmed lenders, not homeowners—and that it was the abusive lending practices of the banks themselves which precipitated the widespread sales of homes at foreclosure auctions like the ones rigged by the defendants in this case. Cf. dkt. 307-22 ("Salma recalled Giraudo always saying 'fuck the banks.'"). But while civil ***antitrust law*** does distinguish **[*32]** between the directness of the harm suffered by plaintiffs in determining who has standing to sue, see *Assoc. Gen. Contractors of Calif., Inc. v. Calif. State Council of Carpenters, 459 U.S. 519, 545, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*, the victim's conduct is otherwise of no account. "[T]he Sherman Act does not authorize horizontal price conspiracies as a form of marketplace vigilantism." United States v. Apple, Inc., *791 F.3d 290, 332 (2d Cir. 2015)*.

2. Role enhancement

Cullinane argues that he is not deserving of a three-level role enhancement as "a manager or supervisor." *U.S.S.G. § 3B1.1(b)*. To the extent he is contending that the Big Five did not manage the conspiracy, that argument fails for the reasons discussed above. See supra Part II.A.3.b.

Cullinane also argues that he did not personally play a sufficiently significant role within the group to warrant the enhancement. He argues that the government has "fail[ed] to identify any specific conduct by [him] that satisfies the requirements of *U.S.S.G. § 3B1.1(b)* or to provide any evidence for the attribution to him of responsibility for the specific conduct of others." Cullinane Sentencing Mem. at 7. Cullinane argues that his role within the Big Five was "clearly secondary," noting that he principally researched the status and value of properties and "rarely participated in negotiations and agreements." Id.

Cullinane was the last to join the group, and the government **[*33]** does not dispute that he had less sway within it than the others. See dkt. 307-10 at 4-5. Nevertheless, he played an important role within the Big Five, managing the real estate it acquired, and shared equally in the profits on most properties. Id. at 5-6. This is sufficient for the Court to find by a preponderance of the evidence that he is deserving of the three-level enhancement. In addition, the application notes to *Guideline § 3B1.1* state than "[a]n upward departure may be warranted . . . in the case of a defendant who did not organize, lead, manage, or supervise another participant, but who nevertheless exercised management responsibility over the property, assets, or activities of a criminal organization." *U.S.S.G. § 3B1.1 note 2*. According to Grinsell, Cullinane managed and held title to most of the properties. Dkt. 307-10 at 5-6. So in the alternative, the Court finds that Cullinane is deserving of the enhancement based on his role in managing properties the Big Five acquired through rigging bids.

IV. CONCLUSION

For the foregoing reasons, the Court finds pursuant to the *Sentencing Reform Act of 1984* that Giraudo's offense level is 18 and Cullinane's is 17.

IT IS SO ORDERED.

JEFF BOARDMAN, et al., Plaintiffs, v. PACIFIC SEAFOOD GROUP, et al., Defendants.

Prior History: Boardman v. Pac. Seafood Grp., 822 F.3d 1011, 2016 U.S. App. LEXIS 8008 (9th Cir. Or., May 3, 2016)

Core Terms

Seafood, antitrust, geographic, markets, shrimp, discovery, summary judgment motion, groundfish, fishing, quotas, non-moving, fishermen, deliver, merger, vessel, Coast, processors, damages, prices, proposed acquisition, summary judgment, trawl-caught, acquisition, definitions, purchases, suppress, leasing, additional discovery, injunctive relief, relevant market

LexisNexis® Headnotes

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN1[] Opposing Materials, Motions for Additional Discovery

Fed. R. Civ. P. 56(d) allows the court to defer ruling on a pending motion for summary judgment if a nonmovant shows by affidavit or declaration that, for specified reasons, it cannot present facts essential to justify its opposition.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN2[] Judges, Discretionary Powers

Fed. R. Civ. P. 56(d) provides a device for litigants to avoid summary judgment when they have not had sufficient time to develop affirmative evidence. To justify a stay, the requesting party must establish that (1) it has set forth in affidavit form the specific facts it hopes to elicit from further discovery; (2) the facts sought exist; and (3) the sought-after facts are essential to oppose summary judgment. Failure to comply with these requirements is a proper ground for denying discovery and proceeding to summary judgment. The court has discretion in ruling on a motion to stay under Fed. R. Civ. P. 56(d).

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

HN3[] **Private Actions, Standing**

A defendant may challenge a plaintiff's antitrust standing as early as possible to avoid needless expense. Antitrust standing requirements are often disputed and resolved early in the litigation when they can be decided as a matter of law without the need for full discovery, trial or any determination of what the defendant did and whether it constituted an antitrust violation.

Evidence > Admissibility > Expert Witnesses

HN4[] **Admissibility, Expert Witnesses**

The substitute expert should have the opportunity to express his opinions in his own language after reviewing the evidence and performing whatever tests prior experts on both sides were allowed to perform.

Antitrust & Trade Law > Clayton Act > Claims

HN5[] **Clayton Act, Claims**

Determination of the relevant product and geographic markets is a necessary predicate to deciding whether a merger contravenes the Clayton Act.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Scintilla Rule

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN6[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. A factual dispute is genuine if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. In ruling on a motion for summary judgment, the court must draw all reasonable inferences in favor of the nonmoving party and may not credibility determinations or weigh evidence. Where the non-moving party bears the burden of proof at trial, the moving party need only prove that there is an absence of evidence to support the non-moving party's case. Where the moving party meets that burden, the burden then shifts to the non-moving party to designate specific facts demonstrating the existence of genuine issues for trial. This burden is not a light one. The non-moving party must show more than the mere existence of a scintilla of evidence. The non-moving party must do more than show there is some metaphysical doubt as to the material facts at issue.

Antitrust & Trade Law > Clayton Act > Claims

HN7[] Clayton Act, Claims

To prove an unlawful merger claim under § 7 of the Clayton Act, 15 U.S.C.S. § 18, a plaintiff must show that the effect of the challenged acquisition may be substantially to lessen competition, or to tend to create a monopoly. 15 U.S.C.S. § 18. An antitrust plaintiff does not need to prove that the challenged acquisition has altered prices in the relevant market; rather, all that is necessary is that the merger create an appreciable danger of such consequences in the future.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN8[] Standing, Requirements

Antitrust plaintiffs who seek only injunctive relief are subject to less stringent standards to prove standing than antitrust plaintiffs who seek damages. In determining whether a plaintiff seeking damages has antitrust standing, courts examine factors in addition to antitrust injury, including the potential for duplicative recovery, the complexity of apportioning damages, and the existence of other parties that have been more directly harmed.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN9[] Standing, Clayton Act

An antitrust plaintiff who seeks only injunctive relief still must show antitrust injury in order to establish standing -- either real or threatened. The antitrust injury requirement ensures that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place. An antitrust injury is defined as an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants acts unlawful. In holding that a plaintiff seeking only injunctive relief must show an antitrust injury, the Supreme Court of the United States explained that it would be incongruous to read the Clayton Act to authorize a private plaintiff to secure an injunction against a threatened injury for which he would not be entitled to compensation if the injury actually occurred.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN10[] Standing, Requirements

To establish an antitrust injury, the plaintiff must show (1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent. Antitrust injury requires the plaintiff to have suffered its injury in the market where the competition is being restrained. Parties whose injuries, though flowing from that which makes the defendant's conduct unlawful, are experienced in another market do not suffer antitrust injury. Antitrust standing is a question of law.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN11[] Standing, Requirements

A plaintiff cannot show an antitrust injury if the plaintiff does not participate in the market where the allegedly anticompetitive merger would occur.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN12[] **Standing, Requirements**

In the context of antitrust injury, the relevant inquiry is not whether dominance in one geographic market could be used to create pressure in another, which it very well might, but whether the plaintiff was a market participant, or potential entrant, in both geographic areas for the relevant product.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN13[] **Standing, Requirements**

Plaintiffs whose injuries, though flowing from that which makes the defendant's conduct unlawful, are experienced in another market do not suffer antitrust injury.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN14[] **Standing, Requirements**

Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation. Some injuries caused by an antitrust violation may thus be left unremedied for lack of a proper plaintiff. The fact that injury has occurred and that other claims have failed does not permit the appellate court to expand the coverage of ***antitrust law***.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Strike

HN15[] **Defenses, Demurrers & Objections, Motions to Strike**

A motion to strike is an extreme and drastic remedy that is heavily disfavored.

Judges: MICHAEL MCSHANE, UNITED STATES DISTRICT JUDGE.

Opinion by: MICHAEL MCSHANE

Opinion

OPINION AND ORDER

McShane, District Judge:

Plaintiffs[1] Jeff Boardman, Dennis Rankin, Lloyd D. Whaley, and MV Fisheries, Inc. bring this antitrust action against Defendants Pacific Seafood Group (Pacific Seafood) and more than 50 other businesses owned in whole or part by Defendants Frank Dulcich and Dulcich, Inc. Plaintiffs, who are commercial fishermen, seek a permanent injunction prohibiting Pacific Seafood from acquiring any additional ownership interest in Ocean Gold Seafoods and its affiliates, including Ocean Protein, LLC and Hoquiam Riverview Properties, LLC (Ocean Gold). Pacific Seafood currently **[*7]** owns about a third of Ocean Gold. Mot. Intervene 1, ECF No. 220. Francis Miller, Sherry Miller, Jacquelyn Rydman, and Mark Rydman, who collectively own about 48% of Ocean Gold, have intervened as Defendants.

Pacific Seafood moves for summary judgment, contending that Plaintiffs have not shown antitrust standing to bring this action because they do not participate in the relevant markets. Plaintiffs respond that they have antitrust standing, and alternatively that Pacific Seafood's motion for summary judgment should be stayed to allow additional discovery.

Because the Plaintiffs do not participate in the relevant markets, Plaintiffs lack antitrust standing. Pacific Seafood's motion for summary judgment is GRANTED. Plaintiffs' request for further discovery is denied.

PROCEDURAL BACKGROUND

Plaintiffs filed this action in January 2015 after Pacific Seafood notified Plaintiffs' counsel of the proposed acquisition of Ocean Gold. The settlement agreement in a prior action, *Whaley v. Pacific Seafood Group*, No. 10-cv-3057-MC, required that Pacific Seafood notify Plaintiff's counsel about any proposed acquisition of Ocean Gold. *See* Pls.' Mem. Opp'n 13 n.6, ECF No. 211.

Plaintiffs bring claims against **[*8]** Pacific Seafood for monopolization and attempted monopolization in violation of the *Sherman Act*, *15 U.S.C. § 2*, and for unlawful merger in violation of the *Clayton Act*, *15 U.S.C. § 18*. Plaintiffs seek only injunctive relief, not damages.

Plaintiffs assert that Pacific Seafood's proposed acquisition of Ocean Gold would cause a "substantial lessening of competition and the enhancement of an existing monopoly held by Pacific Seafood Group in the West Coast seafood input markets for trawl-caught groundfish, Pacific onshore whiting and Pacific coldwater shrimp." Second Am. Compl. ¶ 63, ECF No. 52. Plaintiffs claim that "[t]his resulting increased concentration in these West Coast seafood input markets will result in ex vessel price suppression to the detriment of plaintiffs." *Id.*

[1] Plaintiffs Todd Whaley, Miss Sarah LLC, Robert Seitz, and South Bay Wild, Inc., have settled with Defendants. The parties have agreed that these Plaintiffs should be dismissed with prejudice. ECF No. 243.

Shortly after filing their complaint, Plaintiffs moved for a preliminary injunction prohibiting Pacific Seafood from acquiring full ownership of Ocean Gold. Pls.' Mot. Prelim. Inj., ECF No. 22. In March 2015, this court granted Plaintiffs' motion for a preliminary injunction. *Boardman v. Pacific Seafood Group, 2015 U.S. Dist. LEXIS 190896, 2015 WL 13357739 (D. Or. Mar. 6, 2015)*, ECF No. 55.

Pacific Seafood moved to compel arbitration, based on the terms of the settlement agreement in *Whaley*. Defs.' Mot. Compel Arbitration, ECF No. 71. In June **[*9]** 2015, this court denied Pacific Seafood's motion to compel arbitration. *Boardman v. Pacific Seafood Group, 2015 U.S. Dist. LEXIS 190981, 2015 WL 13358335 (D. Or. June 8, 2015)*, ECF No. 83. In August 2015, this court granted Pacific Seafood's motion to stay proceedings pending its appeal of this court's rulings. Order, ECF No. 103. On appeal, the Ninth Circuit affirmed. *Boardman v. Pacific Seafood Group, 822 F.3d 1011 (9th Cir. 2016)*. The preliminary injunction remains in place.

After remand from the Ninth Circuit, the parties resumed discovery, which has been ongoing since the fall of 2016. Plaintiffs served Dr. Radtke's expert report on June 30, 2017.

Pacific Seafood deposed Dr. Radtke on October 25, 2017. Pacific Seafood filed the current motion for summary judgment on December 5, 2017. On December 19, 2017, Plaintiffs moved to replace Dr. Radtke after he stated that he was no longer able to testify due to his age and concerns about his ability to testify at trial. Pls.' Mot. Substitute Testifying Expert Witness, ECF No. 196. I granted Plaintiffs' motion to substitute, and Plaintiffs named Dr. Richard Sexton, a professor of agricultural and resource economics at University of California, Davis, to replace Dr. Radtke as an expert witness. *See* Sexton Decl. 3, ECF No. 212.

PLAINTIFFS' REQUEST FOR A STAY TO ALLOW ADDITIONAL DISCOVERY

I. Plaintiffs' Request [*10] for a Stay

In their response to Pacific Seafood's motion for summary judgment, Plaintiffs seek a stay for additional discovery based on *Federal Rule of Civil Procedure 56(d)*. Pls.' Mem. Opp'n 22, ECF No. 211. ***HN1***[] *Rule 56(d)* allows this court to defer ruling on a pending motion for summary judgment "[i]f a nonmovant shows by affidavit or declaration that, for specified reasons, it cannot present facts essential to justify its opposition."

Plaintiffs contend that they need additional discovery to respond to Pacific Seafood's motion for summary judgment. For example, they seek "documents and depositions necessary to assess the relative market shares of Pacific Seafood and Ocean Gold in Westport." Pls.' Mem. Opp'n 15. Plaintiffs state that although Dr. Radtke defined the relevant geographic markets based on his finding that commercial fishermen were willing to travel from 60 to 100 miles to sell their catch, Plaintiffs learned that Plaintiff Dennis Rankin has traveled more than 100 miles from the point of harvest to deliver his catch. Pls.' Mem. Opp'n 21.

Plaintiffs also contend that their substitute expert witness, Dr. Sexton, should be given time to formulate his own market definitions, arguing that Dr. Sexton "has not had a reasonable **[*11]** opportunity to review the evidence or form his own opinions on relevant subjects," including geographic markets. Pls.' Mem. Opp'n 20. Dr. Sexton states that "insufficient analysis has been conducted to render a definitive opinion on the correct geographic market or markets for the acquisition of Pacific whiting, Pacific coldwater pink shrimp, and trawl-caught groundfish." Sexton Decl. ¶ 9.

II. Legal Standards for a Stay of Summary Judgment Proceedings

Rule 56(d)[2] provides:

---

[2] Formerly designated as *Rule 56(f)* until *Rule 56* was amended in 2010.

> **(d) When Facts Are Unavailable to the Nonmovant.** If a nonmovant shows by affidavit or declaration that, for specified reasons, it cannot present facts essential to justify its opposition, the court may:
>
> **(1)** defer considering the motion or deny it;
>
> **(2)** allow time to obtain affidavits or declarations or to take discovery; or
>
> **(3)** issue any other appropriate order.

HN2[] *Rule 56(d)* "provides a device for litigants to avoid summary judgment when they have not had sufficient time to develop affirmative evidence." *United States v. Kitsap Physicians Serv., 314 F.3d 995, 1000 (9th Cir. 2002)*. To justify a stay, the requesting party must establish that "(1) it has set forth in affidavit form the specific facts it hopes to elicit from further discovery; (2) the facts sought exist; and (3) the sought-after facts are essential to oppose **[*12]** summary judgment." *Family Home and Fin. Ctr., Inc. v. Fed. Home Loan Mortg. Corp., 525 F.3d 822, 827 (9th Cir. 2008)* "Failure to comply with these requirements 'is a proper ground for denying discovery and proceeding to summary judgment.'" *Id.* (citation omitted). This court has discretion in ruling on a motion to stay under *Rule 56(d)*. *Morton v. Hall, 599 F.3d 942, 945 (9th Cir. 2010)*.

III. Discussion

Plaintiffs have not met their burden under *Rule 56(d)* that would support this court allowing additional discovery before ruling on Pacific Seafood's motion for summary judgment. Some of the evidence Plaintiffs claim they need to obtain through additional discovery is clearly within Plaintiffs' own knowledge. For example, Plaintiffs should know "where, when, and to whom [Plaintiffs] have delivered their seafood." Defs.' Reply 30, ECF No. 215. Other evidence Plaintiffs claim that they need, such as the relative market shares of Pacific Seafood and Ocean Gold in the Westport market, is not relevant in determining whether Plaintiffs are participants in the Westport market.

Plaintiffs also argue that Pacific Seafood's motion for summary judgment is premature. Plaintiffs' counsel, who is very experienced in antitrust litigation, stated at the hearing that

> in the typical case, . . . the plaintiff generates its expert witness disclosure, then the defendant does **[*13]** the same, and the plaintiff then responds in some sort of rebuttal filing. . . . . [U]nder the wave of filings that precede the actual trial, you will see clarification, modification, change based upon discovery, and comment from the other side. We never got through that process.

Tr. 10, ECF No. 242. Plaintiffs imply that Pacific Seafood has improperly short-circuited the expert discovery process by using Plaintiffs' own expert opinions to support Pacific Seafood's motion for summary judgment. However, ***HN3***[] a defendant may challenge a plaintiff's antitrust standing as early as possible to avoid needless expense. Antitrust standing requirements "are often disputed and resolved early in the litigation when they can be decided 'as a matter of law' without the need for full discovery, trial or any determination of what the defendant did and whether it constituted an antitrust violation." IIA Phillip E. Areeda et al., ***Antitrust Law*** ¶ 335e2 (4th ed. 2014). Here, Plaintiffs should have not have been surprised by Pacific Seafood's challenge to Plaintiffs' antitrust standing in light of the information it sought in discovery. Plaintiffs' expert defined the market. Plaintiffs are hard pressed now **[*14]** to argue that they are being unfairly bound by their own expert's findings.

Plaintiffs also argue that a stay is necessary to allow their new expert, Dr. Sexton, to draft a report, which presumably would include his own definitions of the relevant markets. In the order allowing Plaintiffs to replace Dr. Radtke, I limited the permissible scope of the new expert's opinions:

> I find that Defendants are entitled to strict limits on the new expert witness's report and testimony, and that Defendants may use Dr. Radtke's expert report and deposition testimony for impeachment. Plaintiffs do not contend that Dr. Radtke was incompetent when he drafted his expert report, but rather that he is no longer competent to testify in support of its conclusions. I conclude that to minimize the prejudice to Defendants,

> *Plaintiffs' new expert witness "may not testify in any manner that is contrary to or inconsistent" with Dr. Radtke's disclosure. Fujifilm Corp. v. Motorola Mobility LLC, No. 12-cv-03587-WHO, 2014 U.S. Dist. LEXIS 162733, 2014 WL 8094582, at *2 (N.D. Cal. Nov. 19, 2014)*. In other words, *the new expert's opinions must be "substantially similar" to Dr. Radtke's opinions. See In re Northrop Grumman Corp. ERISA Litig., 2016 U.S. Dist. LEXIS 185126, 2016 WL 6826171, at *4. Plaintiffs' new expert may, however, perform his or her own analysis and calculations so long as the* **[*15]** *results are not contrary to or inconsistent with Dr. Radtke's conclusions. See id.* As one court explained, ***HN4***[] the substitute expert "should have the opportunity to express his opinions in his own language after reviewing the evidence and performing whatever tests prior experts on both sides were allowed to perform." *Lincoln Nat'l Life Ins. Co. v. Transamerica Fin. Life Ins. Co., Nos. 1:04-cv-396, 1:06-CV-317, 2010 U.S. Dist. LEXIS 103744, 2010 WL 3892860, at *3 (N.D. Ind. Sept. 30, 2010)* (further quotation marks and citation omitted).

Order at 7 (emphasis added), ECF No. 214.

I agree with Pacific Seafood that allowing Dr. Sexton to formulate market definitions that are inconsistent with Dr. Radtke's market definitions would violate the limits imposed by the order. Plaintiffs have had ample time to formulate their market definitions, which are crucial to evaluating antitrust claims. *See Rebel Oil Co. v. Atlantic Richfield Co.,51 F.3d 1421, 1434 (9th Cir. 1995)*; *United States v. Marine Bancorporation, Inc., 418 U.S. 602, 618, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974)* ("***HN5***[] Determination of the relevant product and geographic markets is 'a necessary predicate' to deciding whether a merger contravenes the Clayton Act.") (quoting *United States v. E.I. Du Pont De Nemours & Co., 353 U.S. 586, 593 (1962))*. Plaintiffs have not shown that summary judgment proceedings should be stayed to allow further discovery.

FACTUAL BACKGROUND

I. Plaintiffs' Market Definitions

For purposes of the current motion for summary judgment, Pacific Seafood **[*16]** accepts Plaintiffs' market definitions. Plaintiffs allege three product markets: trawl-caught groundfish; whiting delivered onshore (i.e., whiting sold to an onshore processor rather than a vessel-based processor); and cold-water shrimp. Snider Am. Decl., Ex. 5, at 3, ECF No. 193. Plaintiffs define the following geographic markets for each of the three products at issue as follows:

1) For trawl-caught groundfish, Plaintiffs allege six economically distinct geographic markets: the Ft. Bragg market, off the north California coast at Mendocino County; the Eureka market, off the north California coast at Del Norte and Humboldt counties; the Charleston/Coos Bay market, off the south Oregon coast; the Newport market, off the central Oregon coast; the Astoria/Ilwaco market, offshore of the mouth of the Columbia River; and, most importantly here, the Westport, Washington market, drawing from fishing grounds north of the entrance to the Columbia River to the Canadian border north of the western tip of the Olympic Peninsula. Snider Am. Decl., Ex. 6, at 3. Because Ocean Gold operates only in Westport, the Westport market is the focus of Plaintiffs' antitrust claims.

2) For onshore whiting, Plaintiffs **[*17]** allege three economically distinct geographic markets: the Newport market, the Astoria/Ilwaco market, and the Westport market.

3) For cold-water shrimp, Plaintiffs allege five economically distinct geographic markets: the Eureka market, the Charleston/Coos Bay market, the Newport market, the Astoria/Ilwaco market, and the Westport market.

II. Plaintiffs Do Not Participate in the Westport Market or Sell to Pacific Seafood

Ocean Gold operates seafood processing facilities only in Westport. Since 2011, Ocean Gold has been purchasing whiting almost exclusively, accounting for 98% of Ocean Gold's seafood purchases. Defs.' Mot. Summ. J. 5-6. Trawl-caught groundfish and cold-water shrimp account for the remainder of Ocean Gold's purchases. For example, in 2016, Ocean Gold purchased 72,570,000 pounds of whiting, 730,000 pounds of trawl-caught groundfish, and 45,000 pounds of shrimp. Defs.' Mot. Summ. J. 6.

Pacific Seafood's Westport facility purchases the vast majority of cold-water shrimp sold there. Ocean Gold processes most of the shrimp purchased by Pacific Seafood.

None of the Plaintiffs delivers his harvest to the Westport market. For Boardman, it has been 25 or 30 years since he delivered **[*18]** to Westport; for Rankin, it has been 20 years; and for Whaley, it has been 6 years.

Nor have Plaintiffs presented credible evidence that they are prepared to deliver seafood to the Westport market in the future. Boardman, who harvests only shrimp, testified that he would not leave his long-time processor, Hallmark Fisheries. Snider Am. Decl., Ex. 1, at 179 (Boardman Depo.) Rankin, who harvests only groundfish, has not considered ports other than Astoria for the last six years, stating that he is "happy where I am." Snider Am. Decl., Ex. 2, at 95 (Rankin Depo.). Whaley, who harvests only shrimp, has not reached out to any processors in Westport for the last six years. Snider Am. Decl., Ex. 3, at 169 (Whaley Depo.).

None of the Plaintiffs has delivered to Pacific Seafood at any of its West Coast facilities since 2012. Boardman delivers his shrimp only to Hallmark Fisheries in Newport and Coos Bay, Oregon. Rankin delivers his groundfish only to Bornstein's facilities in Astoria, Oregon. Whaley has delivered shrimp and groundfish to processors in Newport, Oregon, and ports south of Newport. None of the Plaintiffs fish for whiting.

In response to the undisputed evidence that Plaintiffs do **[*19]** not participate in the Westport market, Plaintiffs state, "Every single plaintiff annually renews permits that allow them to deliver to Washington ports." Pls.' Mem. Opp'n 29. Plaintiffs state that Whaley and Boardman hold Washington shrimp permits and own vessels that could range along the entire West Coast. Plaintiffs also note that Whaley and Rankin own federal fishing quotas that they lease to other fishermen on an open exchange.

LEGAL STANDARDS FOR SUMMARY JUDGMENT MOTIONS

HN6[] Summary judgment is appropriate "if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A factual dispute is genuine "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. In ruling on a motion for summary judgment, the court must draw all reasonable inferences in favor of the nonmoving party and may not credibility determinations or weigh evidence. *See* *Reeves v. Sanderson Plumbing Prods., Inc., 530 U.S. 133, 150, 120 S. Ct. 2097, 147 L. Ed. 2d 105 (2000)*.

> Where the non-moving party bears the burden of proof at trial, the moving party need only prove that there is an absence of evidence to support the non-moving party's case. Where the moving party meets that burden, the burden then shifts **[*20]** to the non-moving party to designate specific facts demonstrating the existence of genuine issues for trial. This burden is not a light one. The non-moving party must show more than the mere existence of a scintilla of evidence. The non-moving party must do more than show there is some "metaphysical doubt" as to the material facts at issue.

In re Oracle Corp. Sec. Litig., 627 F.3d 376, 387 (9th Cir. 2010) (citations omitted).

DISCUSSION

I. Antitrust Standing and Antitrust Injury

"***HN7***[] To prove an unlawful merger claim under *§ 7* of the Clayton Act, a plaintiff must show that the effect of the challenged acquisition 'may be substantially to lessen competition, or to tend to create a monopoly.'" *Boardman v. Pacific Seafood Group, 822 F.3d 1011, 1021 (9th Cir. 2016)* (quoting *15 U.S.C. § 18*). An antitrust plaintiff does not need to prove that the challenged acquisition "has altered prices in the relevant market; rather, '[a]ll that is necessary is that the merger create an appreciable danger of such consequences in the future.'" *Id.* (quoting *Saint Alphonsus Med. Ctr.-Nampa Inc. v. St. Luke's Health Sys., Ltd., 778 F.3d 775, 788 (9th Cir. 2015)* (further citation and quotation marks omitted; alteration in *Boardman*)).

As Plaintiffs emphasize, ***HN8***[] antitrust plaintiffs who seek only injunctive relief are subject to less stringent standards to prove standing than antitrust plaintiffs who seek damages. *Oregon Laborers-Employers Health & Welfare Trust Fund v. Philip Morris Inc., 185 F.3d 957, 966 (9th Cir. 1999)* (*Oregon Laborers*) (citing *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 110-11, 107 S. Ct. 484, 93 L. Ed. 2d 427 & nn.5-6 (1986)*); *Cargill, 479 U.S. at 111 n.6* (in determining **[*21]** whether a plaintiff seeking damages has antitrust standing, courts examine factors in addition to antitrust injury, including "the potential for duplicative recovery, the complexity of apportioning damages, and the existence of other parties that have been more directly harmed"). At the hearing, Plaintiffs argued that because they do not seek damages, "the standing requirement . . . drops all the way to just general standing." Tr. 13. That is not correct. As I recently noted in separate antitrust action brought by Plaintiffs' counsel on behalf of other plaintiffs, "Plaintiffs appear to confuse the requirements for Article III standing with the 'more demanding standard for antitrust standing.'" *Innovation Marine Protein, LLC v. Pacific Seafood Group, No. 6:17-cv-00815-MC, 2018 U.S. Dist. LEXIS 48296, 2018 WL 1461501, at *7 (D. Or. Mar. 23, 2018)* (quoting *Lucas Automotive Eng'g v. Bridgestone/Firestone, Inc., 140 F.3d 1228, 1232 (9th Cir. 1998)* (further citation omitted)). ***HN9***[] An antitrust plaintiff who seeks only injunctive relief "still [must] show antitrust injury-- either real or threatened." *Oregon Laborers, 185 F.3d at 966*. The antitrust injury requirement "'ensures that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place.'" *Id.* (quoting *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*). An antitrust injury is defined as "an 'injury of the type the antitrust **[*22]** laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1102 (9th Cir. 1999)* (quoting *Atlantic Richfield Co., 495 U.S. at 334* (internal quotation marks omitted)). In holding that a plaintiff seeking only injunctive relief must show an antitrust injury, the Supreme Court has explained that "[i]t would be incongruous . . . to read the Clayton Act to authorize a private plaintiff to secure an injunction against a threatened injury for which he would not be entitled to compensation if the injury actually occurred." *Cargill, 479 U.S. at 112*.

HN10[] To establish an antitrust injury, the plaintiff must show "(1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." *American Ad Mgmt. v. General Tel. Co. of Cal., 190 F.3d 1051, 1055 (9th Cir. 1999)*. "Antitrust injury requires the plaintiff to have suffered its injury in the market where the competition is being restrained. Parties whose injuries, though flowing from that which makes the defendant's conduct unlawful, are experienced in another market do not suffer antitrust injury." *Id. at 1057* (footnote omitted). Antitrust standing "is a question of law." *Id. at 1054*.

II. Plaintiffs Lack Antitrust Standing

Pacific Seafood argues that Plaintiffs lack antitrust **[*23]** standing to bring this action because they do not participate in the relevant geographic market, and because Plaintiffs do not sell to Pacific Seafood or Ocean Gold. I agree.

A. Plaintiffs Do Not Participate in the Westport Market

The record here shows that Plaintiffs do not participate in the Westport market and are not likely to do so in the future. ***HN11***[] A plaintiff cannot show an antitrust injury if the plaintiff does not participate in the market where the allegedly anticompetitive merger would occur. For example, in *Reading Int'l, Inc. v. Oaktree Capital Mgmt. LLC, 317 F. Supp. 2d 301 (S.D.N.Y. 2003)*, the court held that the owner, operator, and landlord of a movie theater had not shown an antitrust injury caused by the defendant exhibitors' acquisitions of theaters outside of the "relevant geographic product market." *Id. at 311*. The court noted that courts addressing this issue generally hold that "to have standing, a plaintiff must be a participant in some capacity in the market in which the merger occurs." *Id. at 312*. The court found no decision "that has recognized antitrust standing where the defendant's horizontal acquisitions took place in a geographic market in which the plaintiff was not a consumer or an actual or potential competitor." *Id.* The court held, "***HN12***[] The relevant inquiry, **[*24]** therefore, is not whether dominance in one geographic market could be used to create pressure in another, which it very well might, but whether the plaintiff was a market participant (or potential entrant) in *both* geographic areas for the relevant product." *Id.* (footnote omitted); *see also* *Killian Pest Control, Inc. v. HomeTeam Pest Defense, Inc., No. 14-cv-05239-VC, 2015 U.S. Dist. LEXIS 192648, 2015 WL 13385918, at *3 (N.D. Cal. Dec. 21, 2015)* (the plaintiff lacked antitrust standing as to geographic markets where it did not participate or intend to participate).

Here, even if Pacific Seafood's proposed acquisition of Ocean Gold would suppress prices paid to fishermen who deliver to Westport, these Plaintiffs are not the proper parties to challenge the proposed merger. There is no evidence to support that they participate in the Westport market. More than 800 individual fishing vessels deliver seafood to Pacific Seafood at its facilities along the West Coast, but none of those fishing vessels or their owners are plaintiffs here. None of the fishing vessels or owners that deliver to Westport have joined this action.

Plaintiffs have not cited any authority to support their argument that a plaintiff whose most recent participation in the relevant market occurred more **[*25]** than six years before a proposed merger could qualify as a market participant. Nor have Plaintiffs shown that they are likely to sell in Westport, although they may have the hypothetical ability to do so. Plaintiffs have longstanding business relationships with their seafood processors and have shown no inclination to seek new processors or markets. I conclude as a matter of law that Plaintiffs are not participants in the Westport market, and will not be participants in the foreseeable future, and therefore lack antitrust standing to bring this action.

Plaintiffs argue that they have standing under the "inextricably intertwined" doctrine, which is a "narrow exception" to the market participation requirement. *American Ad Mgmt., 190 F.3d at 1057 n.5*. The inextricably intertwined exception originated with *Blue Shield of Virginia v. McCready, 457 U.S. 465, 483-84, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*, in which the defendant group health plan refused to reimburse subscribers for psychotherapy performed by psychologists, while reimbursing subscribers for psychotherapy provided by psychiatrists. The plaintiff was not a provider of psychotherapy services but rather was a consumer of such services who was denied reimbursement because of the defendant's alleged unlawful conspiracy to restrain competition in the market for psychotherapy **[*26]** services. The *McCready* Court held that the plaintiff had antitrust standing to bring an antitrust action because she was "within that area of the economy . . . endangered by that breakdown of competitive conditions." *Id. at 480* (quotation marks and citation omitted). The injury in *McCready*, the failure to reimburse, was caused directly by the anti-competitive method employed by the defendant to suppress competition between psychologists and psychiatrists.

Here, Plaintiffs argue that Pacific Seafood's acquisition of Ocean Gold would injure Plaintiffs "by creating a monopsony that enables Pacific Seafood to suppress ex vessel prices it pays its own suppliers, and, in turn, compel other processors to follow suit." Pls.' Mem. Opp'n 23. Unlike the plaintiff in *McCready*, however, Plaintiffs here have not shown that they would be harmed as a direct result of the allegedly anti-competitive merger. Plaintiffs do not sell in the Westport market, so their alleged injuries would be derivative of the harm to fishermen who do sell in the Westport market. The "inextricably intertwined" exception does not apply under these circumstances.

Plaintiffs also contend that they should be allowed to pursue a new theory **[*27]** of liability based on their participation in the market for leasing shares of their annual federal groundfish quotas to other fishermen.[3] Plaintiffs contend Pacific Seafood's proposed acquisition of Ocean Gold would reduce the revenue they earn from leasing

---

[3] Rankin and Whaley apparently hold quotas, while Boardman does not. *See* Defs.' Reply 15.

quota shares because the merger would result in the suppression of ex vessel prices paid to the fishermen who lease from Plaintiffs. Plaintiffs have not previously asserted standing based on their participation in the market for leasing quotas. In May 2017, when Defendants sought to compel discovery on Plaintiffs' Individual Fishing Quotas and Individual Transfer Quotas, Plaintiffs insisted that this very information ("what [Plaintiffs] have . . . done in terms of holding or transferred quota share") was "not an issue in this case." Tr. 10 (transcript of hearing on discovery), ECF No. 135. Based on Plaintiffs' statement, I denied Pacific Seafood's motion to compel Plaintiffs to produce information about the fishing quotas. *See* Order, ECF No. 132. At this stage of the litigation, and after Plaintiffs previously asserted that the fishing quotas were not relevant, it is too late for Plaintiffs to introduce a new theory of liability **[*28]** based on a market not alleged in the operative complaint. Even if Plaintiffs timely raised this theory, they have not shown that they would suffer a direct antitrust injury based on the possible loss of revenue from leasing quotas. I agree with Pacific Seafood that the market for quota leases is separate from the markets for ex vessel whiting or trawl-caught groundfish. *See* American Ad Mgmt., 190 F.3d at 1057 (**HN13**[] plaintiffs "whose injuries, though flowing from that which makes the defendant's conduct unlawful, are experienced in another market do not suffer antitrust injury").

Plaintiffs also argue that Pacific Seafood's proposed acquisition of Ocean Gold "will eliminate both actual and potential competition in Westport, resulting in suppressed ex vessel prices in adjacent ports." Pls.' Mem. 27. But geographic markets, by definition, are economically independent, so lowered prices in one market should not affect prices in an adjacent market. *See* Kaplan v. Burroughs Corp., 611 F.2d 286, 292 (9th Cir. 1979). I note that at the hearing, Plaintiffs disclaimed reliance on an umbrella theory of liability, which posits that price suppression by one buyer in a market may cause other buyers to lower their prices as well. *See* Boardman, 2015 U.S. Dist. LEXIS 190896, 2015 WL 13357739, at *3 (describing umbrella theory).

Plaintiffs also argue that they **[*29]** have antitrust standing based on their interest in preserving the economic health of the fishing industry. Plaintiffs state, "Fishermen are stewards of their unique industry, charged with caring for its biological and economic sustainability. Plaintiffs have a long history of performing that obligation, and this case is a continuation of their commitment." Pls.' Mem. Opp'n 29. This creative argument stretches the concept of antitrust standing and antitrust injury well beyond their current boundaries. The Ninth Circuit has explained that

> **HN14**[] Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation. Some injuries caused by an antitrust violation may thus be left unremedied for lack of a proper plaintiff. As we recognized in Exhibitors' Serv., Inc. v. American Multi-Cinema, Inc., 788 F.2d 574, 580 n.7 (9th Cir. 1986): "The fact that injury has occurred and that other claims have failed does not permit this court to expand the coverage of [***antitrust law***]."

Oregon Laborers,185 F.3d at 964 (additional citation and quotation marks omitted). However well-intentioned Plaintiffs are in trying to protect the fishing industry from Pacific Seafood's allegedly anti-competitive conduct, to bring an antitrust action Plaintiffs still **[*30]** must show that they will suffer an antitrust injury.

Pacific Seafood also contends that Plaintiffs lack antitrust standing because they do not sell to Pacific Seafood or Ocean Gold, and have not done so since at least 2012. Plaintiffs respond that because they seek only injunctive relief, they have standing even as an indirect purchaser. Plaintiffs cite dicta from Lucas Automotive Engineering, Inc. v. Bridgestone/Firestone, Inc., 140 F.3d 1228, 1234 (9th Cir. 1998), in which the court stated, "To maintain an antitrust divestiture suit, a private plaintiff must generally meet all the requirements that apply to the damages plaintiff, except that the injury itself need only be threatened, and *occasionally a party too remote for damages might be granted an injunction*." (Emphasis added.) Plaintiffs have not cited any decision issued since *Lucas Automotive* that applied this hypothetical exception to grant injunctive relief. I conclude that Plaintiffs cannot show a threatened antitrust injury caused by the proposed merger both because they do not participate in the Westport market and because they do not sell to either Pacific Seafood or Ocean Gold.

B. Market Conditions After Pacific Seafood's Proposed Acquisition of Ocean Gold

Pacific Seafood argues that Plaintiffs cannot show that they would **[*31]** be harmed by Pacific Seafood's acquisition of Ocean Gold because the market situation as to fishermen selling their catch in Westport would not change after the proposed merger. Pacific Seafood argues that because it currently purchases nearly all of the shrimp delivered to Westport, and because Ocean Gold purchases nearly all of the whiting and most of the groundfish delivered to Westport, fishermen delivering to the merged entity would face the same market conditions as before the merger. Plaintiffs contend that further discovery is required to determine the effect of a proposed merger on the Westport market. Because I conclude that Pacific Seafood has shown that Plaintiffs lack antitrust standing based on their failure to participate in the relevant markets, I need not address this issue.

III. Pacific Seafood's Motion to Strike

Pacific Seafood moves to strike Dr. Sexton's declaration; portions of Dr. Radtke's disclosure that were not adopted by Plaintiffs in their responses to interrogatories; a 2015 declaration by Dr. Radtke; and three declarations submitted by another expert witness, Dr. James Wilen, in the *Whaley* litigation.

HN15[] A motion to strike "is an extreme and drastic remedy" **[*32]** that "is heavily disfavored." *Novva Ausrustung Group, Inc. v. Kajioka, No. 2:17-cv-01293-RFB-VCF, 2017 U.S. Dist. LEXIS 108614, 2017 WL 2990850, at *2 (D. Nev. July 13, 2017)*. I deny Pacific Seafood's motion to strike as moot in light of my decision to grant summary judgment.

CONCLUSION

Defendants' Motion for Summary Judgment, ECF No. 190, is GRANTED. Defendants' Motion to Strike, ECF No. 217, is DENIED.

IT IS SO ORDERED.

DATED this 15th day of May, 2018.

Opinion

OPINION & ORDER

Plaintiff Mountain Crest SRL, LLC owns and operates Minhas Brewery, which is located in Monroe, Wisconsin. Mountain Crest is suing defendants Anheuser-Busch InBev SA/NV and Molson Coors Brewing Company under both the Sherman Act and Wisconsin common law, alleging that a conspiracy between defendants has hindered its efforts to export its beer to Ontario, Canada. Defendants **[*2]** have moved to dismiss Mountain Crest's second amended complaint on multiple grounds. Dkt. 50.

According to Mountain Crest, defendants' conspiracy has led to limitations on its ability to sell larger quantities of beer at a discount in some Ontario liquor stores. But the conduct Mountain Crest challenges is governed by a contract with the government of Ontario. The agreement was reaffirmed in 2015 and is now authorized by an Ontario statute enacted the same year. Liquor Control Act, R.S.O. 1990, c. L.18, § 10(3) (Can.). Under these circumstances, even if the court assumes that defendants urged the Ontario government to adopt the limitations that Mountain Crest is challenging, defendants' conduct is authorized under the act of state doctrine, which prohibits federal courts from invalidating the public acts of a foreign government. This conclusion is consistent with a recent decision by an Ontario court, *Hughes v. Liquor Control Board of Ontario*, CV-14-518059CP, 2018 ONSC 1723 (Ont. Sup. Ct. Mar. 15, 2018), concluding that the same conduct alleged in this case did not violate Canadian ***antitrust law*** because the conduct was approved by the Ontario government. The court will grant the motion to **[*3]** dismiss Mountain Crest's claims under the Sherman Act and decline to exercise supplemental jurisdiction over the state law claims in accordance with *28 U.S.C. § 1367(c)(3)*.

REGULATORY BACKGROUND

To help place Mountain Crest's factual allegations and claims in context, it is useful to first provide a brief overview of the relevant regulatory framework.[1] In Ontario, the sale of beer is governed by the Liquor Control Act, which created the Liquor Control Board of Ontario (LCBO) and declared that the LCBO "is for all purposes an agent of Her Majesty and its powers may be exercised only as an agent of Her Majesty." Liquor Control Act, R.S.O. 1990, c. L.18, §§ 2(1) and 4.03(2) (Can.). *See also Hughes*, 2018 ONSC 1723, ¶ 82 (LCBO is "a Crown agency wholly owned by the Government of Ontario").

Among other things, the LCBO has the power "to control the sale, transportation and delivery of liquor," "to establish government stores for the sale of liquor to the public," "to authorize manufacturers of beer and spirits and wineries that manufacture Ontario wine to sell their beer, spirits or Ontario wine in stores owned and operated by the manufacturer or the winery and to authorize Brewers Retail Inc. to operate stores for the sale of **[*4]** beer to the public," "to determine the nature, form and capacity of all packages to be used for containing liquor to be kept or sold," and "to do all things necessary for the management and operation of the Board in the conduct of its business." Liquor Control Act, R.S.O. 1990, c. L.18, § 3(1) (Can.). Only a government agency may import liquor into Canada. Importation of Intoxicating Liquors Act, R.S.C. 1985, c. I-3, § 3(1) (Can.).

The LCBO has authorized Brewers Retail Inc. (BRI) to sell liquor as a "government store" under the Liquor Control Act. Sale of Liquor in Government Stores, O. Reg. 232/16, § 6 (Can.). *See also Hughes*, 2018 ONSC 1723, ¶ 86 ("Brewers Retail is an established government store and the LCBO determines in what municipalities Brewers Retail may have stores."). BRI is a distribution and retail business that was incorporated in 1927 as a cooperative of Ontario brewers. Dkt. 49, ¶ 44. *See also Hughes*, 2018 ONSC 1723, ¶ 92 ("Brewers Retail was established for the specific purpose of providing Ontario with an efficient and cost-effective channel through which large volumes and packages of beer could be distributed and sold across the province."). BRI does business as "The Beer Store." **[*5]** BRI and the LCBO are the only two options in Ontario for buying beer for consumption off site. *Hughes*, 2018 ONSC 1723, ¶ 91. If an American brewer such as Mountain Crest wishes to export its beer to Ontario, the brewer must go through the LCBO or BRI. BRI has a three-quarter market share of beer sales in the province. Dkt. 49, ¶ 52. *See also Hughes*, 2018 ONSC 1723, ¶ 91 ("Save for the beer sold at the LCBO's Ordinary, Combination, and Agency Stores, Brewers Retail is the distributor, wholesaler, and retailer of beer in Ontario.").

ALLEGATIONS OF FACT

[1] A federal court may consider a foreign jurisdiction's law under *Rule 44.1 of the Federal Rules of Civil Procedure*. Both sides discuss various Canadian laws in their briefs and neither side objects to the court's consideration of that law.

The court draws the following allegations from Mountain Crest's second amended complaint, Dkt. 49, which is the operative pleading.

A. The parties

Mountain Crest owns and operates Minhas Brewery in Monroe, Wisconsin, which is Mountain Crest's principal place of business and operations. In 2003, the brewery started brewing for the Canadian "value-beer label" Mountain Crest, and exported the beer to Alberta, Canada on a contract basis. *Id.*, ¶ 17. In 2009, Mountain Crest began exporting beer to Ontario, Canada from Wisconsin. The brewery Mountain Crest operates is currently the 12th largest independently owned brewery in the United States. Mountain **[*6]** Crest's goal is "to compete with the major brewers in the low-cost value end of the beer market." *Id.*, ¶ 19.

Anheuser-Busch InBev SA/NV (ABI) is a corporation organized and existing under the laws of Belgium, with its headquarters in Leuven, Belgium. The Belgian company was previously known as Interbrew SA and later, InBev SA. In 1995, Interbrew SA acquired 100% of Labatt Breweries of Canada. Molson Coors Brewing Company is the result of the combination of Molson Inc. (Canada) into the Adolph Coors Company (Delaware) in February 2005.

ABI and Molson Coors acquired control of BRI by acquiring Labatt Breweries of Canada and Molson Inc. (Canada), the original members of the BRI cooperative. Defendants' subsidiaries each own 49% of BRI. At all relevant times, "defendants" have exclusively shared control. Sleeman Breweries Ltd, the Canadian subsidiary of Japanese brewer Sapporo, is a minority shareholder of BRI.

B. Events leading up to the June 2000 agreement

In 1992, Labatt and Molson were both independent Canadian companies that dominated the Ontario beer market and jointly controlled BRI. At that time, BRI sold only beer brewed in Ontario. The LCBO sold both domestic and imported beer, but **[*7]** focused on wine and spirits. *See also Hughes*, 2018 ONSC 1723, ¶¶ 92 and 114 ("The LCBO focused on wine and spirits [because it] did not develop the infrastructure necessary to warehouse, distribute and sell beer on a scale necessary to service Ontario's retail and licencee consumers. . . . In the early 1990's, approximately 95% of all domestic beer sold in Ontario was sold through Brewers Retail.").

During the 1990s and into the 2000s, Labatt and Molson operated an unincorporated trade association that consisted of just the two companies called "Brewers of Ontario," led by Jan H. Westcott, the executive director. Westcott operated as a representative of Labatt and Molson executives and took direction directly from the CEOs of both companies on a regular basis. They used this trade association (as opposed to BRI itself) to negotiate their commercial relationship with the LCBO.

The historical practice of the LCBO was to limit its sale of beer to containers no larger than a six pack, with some exceptions. *See also Hughes*, 2018 ONSC 1723, ¶ 115 (LCBO "followed [that practice] for decades"). In September 1993, the LCBO began considering a change to this practice, noting in a memo that "[n]o **[*8]** legislative or regulatory changes [would be] required." Dkt. 49, ¶ 73. *But see Hughes*, 2018 ONSC 1723, ¶ 157 ("The LCBO would have needed the Provincial Government's approval to change this status quo [regarding the sale 12 packs and 24 packs], and the Government refused to grant any such approval."). The author of the LCBO memo anticipated opposition from Molson and Labatt because BRI "sales will be diverted to the LCBO." Dkt. 49, ¶ 73.

In July 1994, Molson and Labatt executives met with LCBO executives. Molson and Labatt were "not interested in any widespread sale of 12's and 24's in LCBO stores" because it would give too much access to their U.S.-based competitors with whom they did not have distribution agreements. Dkt. 49, ¶ 75. The LCBO "felt completely at the mercy of Labatt and Molson" because Labatt and Molson already had exclusive distribution agreements with Anheuser-Busch, Miller Brewing, and Coors Brewing. *Id.*, ¶ 77.

In 1995, Interbrew acquired Labatt. Also in 1995, Molson and Labatt representatives agreed to begin supplying the LCBO with 12 and 24 packs for a limited number of LCBO stores. But in December 1998, LCBO corporate staff and Molson and Labatt executives produced **[*9]** a joint "Working Protocol," stating in part that "[t]he LCBO agrees to discontinue its stocking of 12 and 24 SKUs." *Id.*, ¶ 102. LCBO CEO Andy Brandt "felt pressure from Minister [of Consumer and Commercial Relations David] Tsubouchi to concede to demands from Molson and Labatt." *Id.*, ¶ 103. During a January 1999 LCBO board meeting, board members expressed their support for "allowing various package sizes for brewers wishing to sell beer through the LCBO." *Id.*, ¶ 104.

The brewers and the LCBO continued negotiating an agreement related to the LCBO's sales of larger format beer packages. At this time, Molson and Interbrew "were still engaged in their multi-year group boycott, refusing to supply the LCBO with any 6-packs beyond what the LCBO already had, providing any cases of beer larger than a 6-pack, or any beer in cans, to force the LCBO to comply with their demand that the LCBO not purchase 12s & 24s of beer from any U.S. brewer." *Id.*, ¶ 108.[2]

In April 1999, the LCBO was still pushing for the option of selling eight packs and nine packs, but by May 2000, the LCBO gave up on this idea because it knew that it "could not compel [BRI] to supply it with new brands of beer for sale." *Id.*, **[*10]** ¶ 119.

Minister of Consumer and Commercial Relations Bob Runciman (who succeeded Tsubouchi in June 1999) directed LCBO CEO Brandt to sign the proposed agreement, which would sharply limit the LCBO's sales of large format beer packages. On June 1, 2000, Brandt complied. Dave Perkins of Molson also signed the agreement on behalf of BRI.

Paragraph D of the June 2000 agreement included the following provision: "Consistent with historical practice, LCBO will not sell beer . . . in packages containing more than 6 containers and not promote beer at price points greater than 6 containers." Dkt. 49-19, at 4. The agreement about price points relates to "pack-up pricing," which is offering discounts when multiple six packs are purchased.

The agreement was kept "a closely guarded secret." Dkt. 49, ¶ 128. BRI's minority shareholder, Sleeman Breweries did not know about the agreement at the time it was signed. Ontario municipalities were not aware of the agreement either. They wrote letters to the LCBO asking them to stock 12 packs and 24 packs of beer.

C. Events leading up to the 2015 agreement

In the years that followed, the LCBO continued efforts to renegotiate the agreement to allow sales of large **[*11]** format beer packages, but Interbrew and Molson resisted those efforts. For example, in February 2003, the LCBO expressed an interest in offering pack-up pricing and selling 12 and 24 packs at selected stores, but Molson and Labatt refused. And in October 2010, BRI accused the LCBO of violating Section D of the June 2000 agreement by selling beer in packages containing more than six containers.

In August 2004, Interbrew merged with AmBev, a Brazilian-based brewing conglomerate. After the merger, Interbrew changed its named to InBev. AmBev effectively became InBev's Americas division, with Labatt merged into AmBev. In February 2005, Molson Inc. merged with Colorado based Adolph Coors Co. to form the current Molson Coors Brewing Company.

In April 2014, the Premier of Ontario appointed Ed Clark to form a "Premier's Advisory Council on Government Assets," in part to investigate ways to "further monetize" the LCBO. *Id.*, ¶ 184. In November 2014, the council published its initial report, recommending that the LCBO sell 12-packs of beer.

---

[2] In ***antitrust law***, a group boycott is "an agreement to pressure a supplier or customer not to deal with another competitor." *Reading Int'l, Inc. v. Oaktree Capital Mgmt. LLC, 317 F. Supp. 2d 301, 318 (S.D.N.Y. 2003)*. Mountain Crest does not say when the alleged boycott started or how long it lasted.

In December 2014, the *Toronto Star* published for the first time a copy of the June 2000 agreement. Three days later, a proposed class action was filed in Ontario **[*12]** Superior Court, *Hughes v. Liquor Control Board of Ontario*, challenging the validity of the agreement on behalf of Ontario consumers, bars, and restaurants.

In January 2015, BRI announced in a press release that its ownership would become "open[] to all Ontario-based brewers." *Id.*, ¶ 194. The announcement was criticized because "the big three brewers [would] hold 12 seats on a 15-member board of directors, and retain overall control." *Id.*, ¶ 196.

In 2014 and 2015, BRI threatened the government of Ontario with NAFTA expropriation litigation if the government "took steps to undermine their cartel or system of restraints on U.S. exports to Ontario." *Id.*, ¶ 200. These threats "were planned and authorized by [d]efendants['] respective U.S. offices in St. Louis and Denver." *Id.*

On September 22, 2015, the government of Ontario entered into a "master framework agreement" with BRI, Labatt Brewing Company Ltd., Molson Canada 2005, and Sleeman Breweries Ltd. This agreement replaced the June 2000 agreement with the LCBO.

The 2015 agreement includes the following provision: "The Province shall direct the LCBO not to, at any time during the Term: (A) sell Beer in its stores, other than in Combination **[*13]** Stores, in formats larger than Six-Packs (with the exception of the one 8-unit SKU currently carried by LCBO stores that are not Combination Stores) or (B) provide Pack-up Pricing in LCBO stores." The agreement also granted Ontario immunity from suit by BRI and its members.

ANALYSIS

A. Overview of claims and defenses

At the heart of this case are two related practices at LCBO stores in Ontario, Canada: (1) not selling beer in a container larger than a six pack; and (2) not allowing "pack-up pricing," which would provide a discount for buying multiple six packs. Mountain Crest objects to these practices for the obvious reason that they inhibit sales of large quantities of beer at LCBO stores.

Mountain Crest's theory is that defendants are responsible for both of the LCBO practices at issue. According to Mountain Crest, defendants control the Beer Store, which is the LCBO's only competitor in Ontario for the retail sale of beer. Although the Beer Store is operated by BRI, defendants' Canadian subsidiaries are the major shareholders of BRI and Mountain Crest says that defendants may be held liable for actions taken on BRI's behalf. In order to keep the exclusive right to sell 12 packs and **[*14]** 24 packs of beer at the Beer Store, defendants allegedly limited their supply of beer to LCBO until LCBO agreed to defendants' demands regarding pack size and pack-up pricing. Dkt. 49, ¶ 108. Defendants later threatened to sue the government of Ontario under the North American Free Trade Agreement if LCBO changed its practices. *Id.*, ¶ 200.

Mountain Crest contends that defendants' alleged conduct is a restraint of trade in violation of *15 U.S.C. § 1* of the Sherman Act and an attempt to create a monopoly in violation of *15 U.S.C. § 2*. Mountain Crest also contends that defendants were unjustly enriched in violation of Wisconsin law when they charged various fees to Mountain Crest without providing Mountain Crest a corresponding benefit.[3]

Defendants seek dismissal of Mountain Crest's claims under the Sherman Act on multiple grounds: (1) the claims are barred under the act of state doctrine; (2) the claims are barred under the *Noerr-Pennington* doctrine; (3) the Sherman Act does not reach the alleged conduct; (4) comity requires dismissal of the claims; (5) the doctrine of

---

[3] Mountain Crest's second amended complaint is a sprawling 93 pages and includes numerous allegations about what it views as unfair practices by BRI and defendants. For example, Mountain Crest alleges that BRI consistently understocks brands of beer that defendants do not own. Dkt. 49, ¶¶ 100-02, 113, and 173-75. But both sides have assumed in their briefing that Mountain Crest's claims under the Sherman Act are limited to restrictions on selling larger packs of beer and pack-up pricing, so the court has made the same assumption.

forum non conveniens requires dismissal of the claims; (6) Mountain Crest has not stated a plausible claim under §1 or § 2; and (7) all of the alleged **[*15]** conduct involves BRI or defendants' Canadian subsidiaries rather than defendants and Mountain Crest has not alleged facts showing that it is appropriate to pierce the corporate veil. Because the court agrees with the first contention, it is not necessary to consider the others.

B. Act of state doctrine

1. Legal standard

The Supreme Court has been applying the act of state doctrine since at least *Underhill v. Hernandez*, in which it described the doctrine as follows:

> Every sovereign State is bound to respect the independence of every other sovereign State, and the courts of one country will not sit in judgment on the acts of the government of another done within its own territory. Redress of grievances by reason of such acts must be obtained through the means open to be availed of by sovereign powers as between themselves.

168 U.S. 250, 252, 18 S. Ct. 83, 42 L. Ed. 456 (1897). The "Court's description of the jurisprudential foundation for the act of state doctrine has undergone some evolution over the years," W.S. Kirkpatrick & Co. v. Envtl. Tectonics Corp., Int'l, 493 U.S. 400, 404-05, 110 S. Ct. 701, 107 L. Ed. 2d 816 (1990), but the Court's adherence to the doctrine has not wavered. The Court's most recent articulation of the doctrine is in Republic of Austria v. Altmann, 541 U.S. 677, 700, 124 S. Ct. 2240, 159 L. Ed. 2d 1 (2004): "the courts of one state will not question the validity of public acts (acts *jure imperii*) performed by other sovereigns **[*16]** within their own borders, even when such courts have jurisdiction over a controversy in which one of the litigants has standing to challenge those acts." *See also* Kirkpatrick, 493 U.S. at 409-10 ("The act of state doctrine . . . requires that, in the process of deciding, the acts of foreign sovereigns taken within their own jurisdictions shall be deemed valid."); Banco Nacional de Cuba v. Sabbatino, 376 U.S. 398, 400-01, 84 S. Ct. 923, 11 L. Ed. 2d 804 (1964) ("The act of state doctrine in its traditional formulation precludes the courts of this country from inquiring into the validity of the public acts a recognized foreign sovereign power committed within its own territory.").

Although neither the Supreme Court nor the Court of Appeals for the Seventh Circuit has considered whether the doctrine applies in the context of an antitrust claim, numerous lower courts have said that it does. *E.g.,* Spectrum Stores, Inc. v. Citgo Petroleum Corp., 632 F.3d 938 (5th Cir. 2011); *O.N.E. Shipping Ltd. v. Flota Mercante Grancolombiana, S.A., 830 F.2d 449 (2d Cir. 1987)*; Sea Breeze Salt, Inc. v. Mitsubishi Corp., No. CV162345DMGAGRX, 2016 U.S. Dist. LEXIS 139342, 2016 WL 8648638, at *4 (C.D. Cal. Aug. 18, 2016); In re Fresh & Process Potatoes Antitrust Litig., 834 F. Supp. 2d 1141, 1180 (D. Idaho 2011); In re Refined Petroleum Prod. Antitrust Litig., 649 F. Supp. 2d 572 (S.D. Tex. 2009).[4] The parties have not cited any cases to the contrary. And the Supreme Court has rejected antitrust claims under the "state action doctrine," which applies a rule similar to the act of state doctrine in the context of claims against state governments in the United States. City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991) ("[T]he Sherman Act [does] not apply to anticompetitive restraints imposed by **[*17]** the States as an act of government."). Courts have also consistently held that the sovereign does not have to be a party for the act of state doctrine to apply. *O.N.E. Shipping, 830 F.2d at 452*; Callejo v. Bancomer, S.A., 764 F.2d 1101 (5th Cir.1985); Int'l Ass'n of Machinists & Aerospace Workers, (IAM) v. Org. of Petroleum Exporting Countries (OPEC), 649 F.2d 1354, 1359 (9th Cir. 1981).

---

[4] American Banana Co. v. United Fruit Co., 213 U.S. 347, 29 S. Ct. 511, 53 L. Ed. 826 (1909), is sometimes described as a case in which the Supreme Court applied the act of state doctrine to an antitrust claim. *E.g.,* Timberlane Lumber Co. v. Bank of Am., N.T. & S.A., 549 F.2d 597, 605 (9th Cir. 1976); 1B Areeda & Hovenkamp ¶ 274b, at 385-86 (4th ed.) (stating that *American Banana* applied act of state doctrine to hold that "a seizure by a foreign government of the plaintiff's properties could not support an antitrust claim against the private party who allegedly induced the government to take the action"). But the Supreme Court has rejected that reading. Kirkpatrick, 493 U.S. at 407-08 ("*American Banana* was not an act of state case.").

2. Application of the doctrine to this case

Under a straightforward application of the act of state doctrine, Mountain Crest's antitrust claims against defendants fail as a matter of law because all of the conduct that allegedly violates the Sherman Act involves a public act by the Ontario government and a ruling in Mountain Crest's favor would require the court to determine that the Ontario government violated the Sherman Act as well.[5] *Kirkpatrick, 493 U.S. at 406* (act of state doctrine may apply "when a court must decide—that is, when the outcome of the case turns upon—the effect of official action by a foreign sovereign"). In fact, Mountain Crest's own allegations show that a ruling in Mountain Crest's favor would require this court to question the validity of no fewer than four public acts, all of which were performed in Ontario.

First, in June 2000, the LCBO and BRI entered into an agreement in which the parties agreed that the LCBO would not sell 12 packs and 24 packs of beer or offer pack-up pricing. The practices **[*18]** embodied in that agreement are the same practices that Mountain Crest is challenging as antitrust violations. Because the LCBO is a government agency created by the Liquor Control Act, R.S.O. 1990, c. L.18, §§ 2(1) (Can.), the 2000 agreement is a public act under the act of state doctrine.

Second, the Ontario Minister of Consumer and Commercial Relations directed the LCBO to sign the 2000 agreement. The parties agree that the LCBO was required to follow the direction of the Minister. *Hughes*, 2018 ONSC 1723, ¶¶ 82-83 ("[In 2000], the LCBO . . . reported to the Minister of Consumer and Commercial Relations [, who] was given express responsibility for approving all policy decisions that related to changes in the role of the LCBO.").

Third, in 2015, the Ontario legislature enacted an amendment to the Liquor Control Act, which states that the LCBO "is deemed to have been directed, and Brewers Retail Inc. is deemed to have been authorized, to enter into the June 2000 framework in relation to the Crown's or a Crown agent's regulation and control of the sale of beer in Ontario." Liquor Control Act. R.S.O. 1990. c. L.18, § 10(3) (Can.). The parties agree that the "June 2000 framework" is the agreement at issue **[*19]** in this case.

Fourth, also in 2015, BRI entered into a new agreement, this time with the government of Ontario itself. The agreement reaffirmed the same practices that Mountain Crest is challenging in this case. In fact, in the new agreement, the government "direct[s]" the LCBO not to sell "formats larger than Six-Packs" except in limited circumstances and not to provide "Pack-up Pricing in LCBO stores." Dkt. 49, ¶ 207.

Collectively, these acts make it clear that the conduct that allegedly violates the Sherman Act is the official policy of the Ontario government. "[W]hen it is made to appear that the foreign government has acted in a given way on the subject-matter of the litigation, the details of such action or the merit of the result cannot be questioned but must be accepted by our courts as a rule for their decision." *Sabbatino, 376 U.S. at 418*.

There is no way to separate defendants' alleged conduct from Ontario's official acts. Thus, the court agrees with defendants that there is no way to find that they violated the Sherman Act without also finding that the Ontario government violated the Act by entering into the 2000 and 2015 agreements. That is fatal to Mountain Crest's federal claims. *O.N.E. Shipping, 830 F.2d 449 at 452-53* (dismissing antitrust **[*20]** claim under act of state doctrine because the plaintiff's "allegations make clear that its antitrust suit is premised on contentions that it was harmed by acts and motivations of a foreign sovereign which the district court would be called on to examine and pass judgment on"); *Sea Breeze Salt, 2016 U.S. Dist. LEXIS 139342, 2016 WL 8648638, at *4-5* (dismissing antitrust claims under act of state doctrine because, "for Plaintiffs' antitrust claims to succeed, Plaintiffs must prove the participation of ESSA, a joint-venture majority controlled by the Mexican government, in a conspiracy to restrain trade"); *In re Fresh & Process Potatoes, 834 F. Supp. 2d at 1180* (dismissing antitrust claims under act of state

[5] Both sides assume that the act of state doctrine applies the same way to a provincial government as to the national government, so the court has made the same assumption.

doctrine because "the Court would need to conclude that [Canadian government agencies] illegally agreed to reduce the supply and export of potatoes in their respective provinces").

Perhaps equally important, the court sees no way that it could remedy any alleged restraints on trade without enjoining the Ontario government. After all, it is the practices at *LCBO* stores, not BRI stores, that Mountain Crest is challenging. Thus, no injunction against defendants could provide Mountain Crest any immediate relief. In fact, defendants observed in their opening brief that relief in Mountain Crest's favor would require **[*21]** the cooperation of the Ontario government, but Mountain Crest did not discuss the issue in its opposition brief, suggesting that Mountain Crest concedes the point. That in itself is sufficient to defeat Mountain Crest's federal claims. *Spectrum Stores, 632 F.3d at 955-56* (applying act of state doctrine because "granting of any relief to Appellants would effectively order foreign governments to dismantle their chosen means of exploiting the valuable natural resources within their sovereign territories"); *IAM, 649 F.2d at 1361* (applying act of state doctrine because "the granting of any relief would in effect amount to an order from a domestic court instructing a foreign sovereign to alter its chosen means of allocating and profiting from its own valuable natural resources").

3. *Hughes v. Liquor Control Board of Ontario*

This court's conclusion that the act of state doctrine applies is consistent with *Hughes*, 2018 ONSC 1723, a recent decision by the Ontario Superior Court of Justice. In that case, the court considered a challenge similar to the one raised by Mountain Crest in this case. The plaintiffs asserted that defendants' Canadian subsidiaries and the LCBO violated Canadian ***antitrust law*** when they agreed that the LCBO would not sell beer **[*22]** in packages greater than six containers. *Id.*, ¶ 7. The defendants said that their conduct was justified under the "regulated conduct" defense. *Id.*, ¶ 9. Under that defense, "conduct authorized by valid provincial or federal legislation is deemed to be in the public interest, and . . . such regulated conduct cannot constitute an 'undue' limit on competition contrary to the conspiracy provisions of the Competition Act." *Id.*, ¶ 221.

The Ontario court dismissed all of the plaintiffs' claims, concluding that "the Defendants were operating under a regulated provincial regime governing commerce in alcohol and that the 2000 Beer Framework Agreement was authorized conduct within the scope of the Regulated Conduct Defence." *Id.*, ¶ 197. The court rejected the plaintiffs' contentions that the defense did not apply because the Ontario government did not have authority to approve conduct that would otherwise violate ***antitrust law***. *Id.*, ¶¶ 235 and 241.

Hughes is instructive for at least three reasons. First, it confirms the view that the actions challenged in this case are public acts taken by the Ontario government. Second, it shows that defendants' conduct is valid under the law of the land where **[*23]** the conduct occurred. *Sabbatino, 376 U.S. at 415 n.17* (in determining that act of state doctrine applied, noting that "[i]t has not been seriously contended that the judicial institutions of [the foreign government] would declare the decree invalid"); *Riggs Nat. Corp. & Subsidiaries v. C.I.R., 163 F.3d 1363, 1368, 333 U.S. App. D.C. 371 (D.C. Cir. 1999)* (in determining that act of state doctrine applied, noting that the conduct in question had been upheld by foreign court where conduct occurred). Third, it shows that the Ontario government is unified in its approval of defendants' conduct: the executive, legislative, and judicial branches have each authorized that conduct.

A primary purpose of the act of state doctrine is to avoid unnecessary conflict with other countries. *Kirkpatrick, 493 U.S. at 404* (doctrine "reflect[s] the strong sense of the Judicial Branch that its engagement in the task of passing on the validity of foreign acts of state may hinder the conduct of foreign affairs") (internal quotations omitted); *Sabbatino, 376 U.S. at 417-18* ("To permit the validity of the acts of one sovereign state to be reexamined and perhaps condemned by the courts of another would very certainly imperil the amicable relations between governments and vex the peace of nations.") (internal quotations omitted). Although the regulation of alcohol may not present the most sensitive **[*24]** of international issues, the reasons for deferring to the Ontario government in this case are many. Not only has the policy of the Ontario government been stated clearly by all three branches, but the current policy reflects a careful consideration and balancing of many competing factors over a period of "decades." *Hughes*, 2018 ONSC 1723, ¶ 115.

The court in *Hughes* emphasized that point:

> The regulation of alcohol has very significant public policy ramifications because it touches upon, among other things, public health and welfare, the environment (recycling), public safety, jobs and employment, and government finances. Complex, high-level decisions were made from time-to-time by senior Government officials or in some cases, through the enactment of legislation by the Legislative Assembly that directed the activities of the LCBO. The LCBO was expected to implement Government policy with regard to the distribution and sale of alcohol within the parameters set out by the Liquor Control Act and related legislation

Id., ¶ 84. The court also noted that the particular rules being challenged had pragmatic justifications unrelated to any intent to suppress competition:

> Brewers Retail was established **[*25]** for the specific purpose of providing Ontario with an efficient and cost-effective channel through which large volumes and packages of beer could be distributed and sold across the province, which was not part of the LCBO's business. The LCBO focused on wine and spirits. The LCBO did not develop the infrastructure necessary to warehouse, distribute and sell beer on a scale necessary to service Ontario's retail and licencee consumers.

Id., ¶ 92.

4. Conclusion

Regardless of the reason for the rules at issue, the important point is that the Ontario government chose to reaffirm them despite being aware of the objections like the ones Mountain Crest is raising. (Mountain Crest alleges in its second amended complaint that, after the details of the 2000 agreement became public in 2014, there was widespread criticism of the agreement in the press.) A ruling in Mountain Crest's favor would both declare the Ontario government's policy choices invalid *and* require the government to dismantle its policy.

Mountain Crest does not allege that it is a singular victim of BRI's agreement with the Ontario government. Rather, it says that all independent American brewers are being harmed. If the harm is as **[*26]** significant as Mountain Crest suggests, then the executive branch may choose to intervene. *Sabbatino, 376 U.S. at 422-23* ("[T]he usual method for an individual to seek relief [for harm caused by an act of state] is to exhaust local remedies and then repair to the executive authorities of his own state to persuade them to champion his claim in diplomacy or before an international tribunal."). In fact, as noted in *Hughes*, that is exactly what the United States did previously when it concluded in the 1980s that Canada was discriminating against imported beer. 2018 ONSC 1723, ¶¶ 118-19 (discussing complaint brought under the General Agreement on Tariffs and Trade). But the proper remedy is not a showdown between a United States federal court and a foreign government. That is exactly the type of conflict that the act of state doctrine is intended to avoid.

5. Mountain Crest's objections

Mountain Crest advances several reasons for rejecting the application of the act of state doctrine in this case, but none are persuasive.

a. Commercial activity

Mountain Crest says that the act of state doctrine does not apply to a "private" or "commercial" agreement, even if the government is a party to the agreement, and that the June **[*27]** 2000 agreement was "private" and "commercial." But both aspects of this contention are incorrect. The "private or commercial" exception that Mountain Crest cites comes from the *Foreign Sovereign Immunity Act*, not the act of state doctrine, *Saudi Arabia v. Nelson, 507 U.S. 349, 359-60, 113 S. Ct. 1471, 123 L. Ed. 2d 47 (1993)*, so it has no application to this case.

To support the application of a "commercial activity" exception to the act of state doctrine, Mountain Crest cites *Alfred Dunhill of London, Inc. v. Republic of Cuba, 425 U.S. 682, 96 S. Ct. 1854, 48 L. Ed. 2d 301 (1976)*. That case was about the act of state doctrine, but the Court's holding was that the doctrine did not apply because the defendants failed to show that the conduct in question was authorized by the foreign government. *Id. at 694-95*. Unlike this case, there was "[n]o statute, decree, order, or resolution" from the foreign government. *Id.*

A minority of justices would have decided *Alfred Dunhill* on the alternate ground that the claim at issue was simply an attempt to collect a debt and "the concept of an act of state should not be extended to include the repudiation of a purely commercial obligation owed by a foreign sovereign or by one of its commercial instrumentalities." *Id. at 695* (opinion of White, J.). Lower courts have debated whether to follow this view. *Compare Honduras Aircraft Registry, Ltd. v. Honduras, 129 F.3d 543, 550 (11th Cir.1997)* ("[T]here is no commercial exception to the Act of **[*28]** State Doctrine as there is under the FSIA."), *and IAM, 649 F.2d at 1360* ("The act of state doctrine is not diluted by the commercial activity exception which limits the doctrine of sovereign immunity."), *with Petersen Energia Inversora, S.A.U. v. Argentine Republic, No. 15-cv-2739, 2016 U.S. Dist. LEXIS 122244, 2016 WL 4735367, at *7 (S.D.N.Y. Sept. 9, 2016)* ("The [act of state] doctrine does not, however, apply to the purely commercial conduct of a foreign sovereign."). Neither a majority of the Supreme Court nor the Court of Appeals for the Seventh Circuit has taken sides on this question. *E.g., Kirkpatrick, 493 U.S. at 404-05* (noting question but concluding that it was unnecessary to decide it).

But even if this court were to follow Justice White's view in *Alfred Dunhill*, it would make no difference. The public acts at issue in this case cannot be compared to the conduct in *Alfred Dunhill*, which was a simple failure to pay a debt. As the court noted in *Hughes*, the decisions at issue in this case involved policy choices regarding how Ontario wanted alcohol to be distributed and sold. 2018 ONSC 1723, ¶ 92. "The LCBO was never free to carry on business as if it were a private, profit-maximizing commercial enterprise free of government influence." *Id.*, ¶ 85. And the 2015 amendment to the Liquor Control Act states **[*29]** that the agreement relates to the "regulation and control of the sale of beer in Ontario." Liquor Control Act, R.S.O. 1990 c. L.18 § 10(3) (Can.).

Even the commercial activity exception under the FSIA does not extend to actions like those in this case in which the government is acting as a regulator. *Saudi Arabia, 507 U.S. at 360* ("[Under the FSIA], a state engages in commercial activity . . . where it exercises only those powers that can also be exercised by private citizens, as distinct from those powers peculiar to sovereigns"); *Republic of Argentina v. Weltover, Inc., 504 U.S. 607, 614, 112 S. Ct. 2160, 119 L. Ed. 2d 394 (1992)* ("[W]hen a foreign government acts, not as regulator of a market, but in the manner of a private player within it, the foreign sovereign's actions are 'commercial' within the meaning of the FSIA."). Even if the government was motivated by commercial interests, that would not be enough to trigger the exception when it is acting as a sovereign. *Weltover, 504 U.S. at 614*.

Mountain Crest also says that there is a separate exception to the act of state doctrine for "private" activities and that the 2000 agreement was "private" because it was secret. But Mountain Crest cites no authority for this view. Even under the FSIA, courts interpret "private" and "commercial" as having a similar meaning: not acting in a sovereign **[*30]** capacity. *E.g., Ministry of Def. & Support for Armed Forces of Islamic Republic of Iran v. Cubic Def. Sys., Inc., 984 F. Supp. 2d 1070, 1079-80 (S.D. Cal. 2013)*, *aff'd sub nom. Ministry of Def. & Support for the Armed Forces of the Islamic Republic of Iran v. Frym, 814 F.3d 1053 (9th Cir. 2016)*. It has nothing to do with secrecy. In any event, it is undisputed that the 2015 agreement and the legislation authorizing the 2000 agreement were both "public" in the sense to which Mountain Crest is referring. So even if Mountain Crest's understanding of the term "private" were correct, it would make no difference to this case.

b. Questioning the validity of a public act

Mountain Crest's second objection is that the court will not have to question the validity of the 2000 agreement or the 2015 amendment to Liquor Control Act in order to grant Mountain Crest relief. As to the 2000 agreement, Mountain Crest says that it is not controlling because defendants "continued their conspiracies to restrain the LCBO's ability to buy beer via package size limitations and price fixing arrangements even after the signing of the contract." Dkt. 55, at 32. As to the amendment to the Liquor Control Act, Mountain Crest says that it "did not prescribe as law the contents of the June 2000 contract." *Id.* at 33.

Neither argument is persuasive. Mountain Crest does not explain how defendants "continued their conspiracies" after the 2000 agreement, but presumably Mountain Crest is referring **[*31]** to BRI's alleged refusal to renegotiate the terms of that agreement despite the LCBO's interest in doing so. Even if that is what happened, Mountain Crest fails to explain the significance of those events. Regardless of any conduct by defendants, the source of the harm is still the agreement with the government. *Gen. Aircraft Corp. v. Air Am., Inc., 482 F. Supp. 3, 6-7 (D.D.C. 1979)* ("[W]here the injury complained of results directly from the acts or decisions of a foreign sovereign and only indirectly from defendants' allegedly unlawful anticompetitive activities, the Court must dismiss the claims [under act of state doctrine]."); *Hunt v. Mobil Oil Corp., 410 F. Supp. 10, 24 (S.D.N.Y. 1975)* (act of state doctrine barred antitrust claim for "defendants' conspiratorial manipulative activities" because source of harm was still "acts and conduct of Libyan officials"), *aff'd*, *550 F.2d 68 (2d Cir. 1977)*. And the government chose to reaffirm that agreement in 2015 and went so far as to endorse it in legislation. Thus, any alleged conspiracy between defendants was approved and adopted by the government. Mountain Crest points to no conduct by defendants after 2015 that contributed to any additional harm.

Mountain Crest's argument about the 2015 legislation is puzzling. Mountain Crest says that the law did not "prescribe the contents" of the agreement **[*32]** but again fails to explain the significance of its observation. The amendment states that the LCBO was "directed" and BRI was "authorized" to enter into the agreement. Liquor Control Act, R.S.O. 1990 c. L.18 § 10(3) (Can.). Because the agreement was already in effect at the time of the legislation, there is no reasonable reading of the provision other than as an approval of the contents of the agreement. If the agreement was unlawful, it follows that the government's approval of the agreement was unlawful as well. So a challenge to the agreement is also a challenge to the statute.

Mountain Crest does not deny that granting relief in its favor would require the court to invalidate the 2015 agreement. Instead, Mountain Crest says that agreement is not a public act because it is a "commercial contract," but the court has already rejected that argument.

c. Motives of Ontario government

Mountain Crest also says that the language of the 2015 agreement shows that the Ontario government was concerned about being sued by defendants because the agreement includes promises from BRI not to sue the government. This is related to another argument by Mountain Crest that the act of state doctrine should not **[*33]** apply because "the LCBO never gave up trying to resist Defendants' market allocation conspiracies." Dkt. 55, at 27.

Yet again, Mountain Crest does not explain the relevance of these observations. The question under the act of state doctrine is whether "the foreign government has acted in a given way on the subject-matter of the litigation," *Sabbatino, 376 U.S. at 418*; "the details of such action or the merit of the result cannot be questioned but must be accepted by our courts as a rule for their decision." *Id.* In other words, "the act of state doctrine is applied without inquiry into motives." *Konowaloff v. Metro. Museum of Art, No. 10 CIV. 9126 SAS, 2011 U.S. Dist. LEXIS 107262, 2011 WL 4430856, at *8 (S.D.N.Y. Sept. 22, 2011)*, *aff'd*, *702 F.3d 140 (2d Cir. 2012)*. All that matters is that the government took the act in question; it does not matter why. *In re Vitamin C Antitrust Litigation, 837 F.3d 175, 191 (2d Cir. 2016)* (in determining that act of state doctrine applies, "[w]hether Defendants had a hand in the [foreign] government's decision to mandate some level of price-fixing is irrelevant"; the court will "decline to analyze why [the foreign government] regulated [a market] in the manner it did and instead focus on what [foreign] law required"). *See also* *Am. Banana Co. v. United Fruit Co., 213 U.S. 347, 358, 29 S. Ct. 511, 53 L. Ed. 826 (1909)* ("[P]ersuading a sovereign power to do this or that cannot be a tort [because] **[*34]** it is a contradiction in terms to say that, within its jurisdiction, it is unlawful to persuade a sovereign power to b[r]ing about a result that it declares by its conduct to be desirable and proper. . . . The very meaning of sovereignty is that the decree of the sovereign makes law."). In this case, the agreements at issue were approved by the minister responsible for supervising the LCBO, the Ontario legislature, the Ontario government, and now an Ontario court. That is sufficient for applying the act of state doctrine, regardless whether the LCBO may have originally objected to the agreement.

d. Other arguments

Finally, Mountain Crest makes a series of conclusory arguments that do not require extended discussion: (1) the act of state doctrine should not apply because it was possible before entering into the 2000 and 2015 agreements for defendants to comply with both Canadian and U.S. law; (2) the doctrine is not jurisdictional; and (3) the doctrine should not be applied in the context of a motion to dismiss. In support of the first argument, Mountain Crest cites *Hartford Fire Ins. Co. v. California, 509 U.S. 764, 797, 113 S. Ct. 2891, 125 L. Ed. 2d 612 (1993)*. But that case is about the doctrine of international comity, not the act of state doctrine, which on its face does not **[*35]** require a private defendant to show that it was compelled to act a certain way.

As to the second argument, it is true that the act of state doctrine is not jurisdictional, but that means only that the court is not required to raise the issue on its own. Because defendants have raised a defense under the doctrine, it is simply irrelevant for the purpose of defendants' motion whether the doctrine is jurisdictional.

As to the third argument, Mountain Crest cites no authority for the view that a court may not apply the act of state doctrine in the context of a motion to dismiss for failure to state a claim. As with any other issue, it is appropriate to dismiss a claim on act of state grounds when it is clear from the face of the complaint that the doctrine applies. *Parungao v. Cmty. Health Sys., Inc., 858 F.3d 452, 457 (7th Cir. 2017)*. That is what the court has concluded in this case. As defendants note, other courts have held in the context of a motion under *Rule 12(b)(6)* that a claim should be dismissed under the act of state doctrine. *Konowaloff v. Metro. Museum of Art, 702 F.3d 140 (2d Cir. 2012)*; *Spectrum Stores, 632 F.3d at 956*; *In re Refined Petroleum Prods. Antitrust Litig., 649 F. Supp. 2d 572 (S.D. Tex. 2009)*; *Glen v. Club Mediterranee S.A., 365 F. Supp. 2d 1263 (S.D. Fla. 2005)*, *aff'd*, *450 F.3d 1251 (11th Cir. 2006)*; *Roe v. Unocal Corp., 70 F. Supp. 2d 1073 (C.D. Cal. 1999)*.

The bottom line is that the allegations in Mountain Crest's second amended complaint fall within the scope of the act of state doctrine as it has been defined by the Supreme Court and Mountain Crest has not identified **[*36]** a persuasive reason for declining to apply the doctrine in this case. The court will grant defendants' motion to dismiss Mountain Crest's claims under the Sherman Act.

C. State law claims

Mountain Crest relies on *28 U.S.C. § 1367* as the basis for exercising jurisdiction over its state law claim for unjust enrichment. Dkt. 49, ¶ 10. In their motion to dismiss, defendants ask the court to decline to exercise supplemental jurisdiction over the state law claims in accordance with *§ 1367(c)(3)*, which stands for the general rule that courts should dismiss state law claims when the court dismisses all the federal claims in the case before trial. *Burritt v. Ditlefsen, 807 F.3d 239, 252 (7th Cir. 2015)*. Because Mountain Crest does not object to defendants' request or otherwise respond to this argument, the court will dismiss Mountain Crest's state law claims without prejudice to its refiling them in state court.

ORDER

IT IS ORDERED that the motion to dismiss filed by defendants Anheuser-Busch InBev SA/NV and Molson Coors Brewing Company, Dkt. 50, is GRANTED as to plaintiff Mountain Crest SRL, LLC's federal claims. In accordance with *28 U.S.C. § 1367(c)(3)*, the court declines to exercise supplemental jurisdiction over Mountain Crest's state law claims and those claims are DISMISSED without prejudice **[*37]** to Mountain Crest refiling them in state court.

Nemickas v. Linn Cty. Anesthesiologists, P.C.

Court of Appeals of Iowa

May 16, 2018, Filed

No. 16-1493

Reporter

2018 Iowa App. LEXIS 474 *; 919 N.W.2d 637; 2018-1 Trade Cas. (CCH) P80,388; 2018 WL 2230721

RIMAS NEMICKAS, M.D., Plaintiff-Appellant, vs. LINN COUNTY ANESTHESIOLOGISTS, P.C., Defendant-Appellee.

Notice: PUBLISHED IN TABLE FORMAT IN THE NORTH WESTERN REPORTER.

Prior History: **[*1]** Appeal from the Iowa District Court for Linn County, Mary E. Chicchelly, Judge. An anesthesiologist appeals (1) the dismissal of his action alleging his former practice group violated the Iowa Competition Law and (2) the grant of summary judgment on his claims for breach of contract, fraudulent inducement, and tortious interference.

Disposition: AFFIRMED.

Core Terms

district court, antitrust, amend, summary judgment, exclusive contract, shareholders, tortious interference, employment contract, grievance committee, antitrust claim, anti trust law, anesthesiology, consumers, enforcer, patients, allegations, termination, contracts, motion to dismiss, asserts, damages, notice, fraudulent inducement, fair dealing, anesthesiologist, competitors, contractual, anesthesia, practicing, prices

LexisNexis® Headnotes

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

Civil Procedure > Appeals > Standards of Review

HN1[] **Private Actions, Standing**

A dismissal for lack of standing in an antitrust suit is reviewed for errors at law. The reviewing court will affirm if the petition shows no right of recovery under any state of the facts. The petition's allegations are considered in the light most favorable to the plaintiff.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN2[] Standards of Review, Abuse of Discretion

District courts are afforded considerable discretion in ruling on motions for leave to amend pleadings. An appellate court will only reverse when a clear abuse of discretion has been shown.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN3[] Appellate Review, Standards of Review

A grant of summary judgment is reviewed for the correction of legal error.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

HN4[] Relevant Market, Geographic Market Definition

Iowa Code § 553.5 (2015) is the counterpart to Sherman Act *§ 2* (*15 U.S.C.S. § 2*). Under Iowa's Competition Law, the definition of person includes an enterprise which, in turn, includes a professional corporation. *Iowa Code § 553.3(2)*, *(4)*. The law defines trade or commerce broadly as any economic activity involving or relating to any commodity, service, or business activity. *§ 553.3(8)*. And to round out the definitions, "relevant market" means the geographical area of actual or potential competition in a line of commerce, all or any part of which is within the state. *§ 553.3(6)*. Iowa's Competition Law lacks a definition for one significant term—monopoly. Stepping into the void, the Iowa Supreme Court has defined that term as the power to control market prices or exclude competition.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN5[] Defenses, Demurrers & Objections, Motions to Dismiss

Dismissal is not a favored resolution. There is case law cautioning that if the viability of a claim is debatable then it should not be dismissed, but endorsing continued use of motions to dismiss when the issue is standing.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

Governments > Legislation > Interpretation

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN6[] Regulated Practices, Monopolies & Monopolization

A continued mandate exists for Iowa courts to follow the harmonization provision in *Iowa Code § 553.2*.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN7[] Standing, Requirements

Antitrust standing is more than a search for an injury in fact. It is a search for the proper plaintiff to enforce the antitrust laws. To determine standing, a court examines the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them. The court considers five factors: (1) whether the petition asserts a causal connection between the antitrust violation and the plaintiff's alleged harm; (2) if the injury is the type sought to be redressed by antitrust laws; (3) the directness of the injury; (4) whether failing to provide a remedy would leave a significant antitrust violation undetected or unremedied; and (5) whether the damages claimed are highly speculative or abstract. Condensed into a more precise test, first, a court should determine whether the plaintiff suffered antitrust injury; second, the court should determine whether the plaintiff is an efficient enforcer of the antitrust laws, which requires some analysis of the directness or remoteness of the plaintiff's injury.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN8[] **Standing, Requirements**

A plaintiff does not have antitrust standing to prosecute an economic injury to himself unless that injury corresponds to an injury of the same type to the relevant market.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN9[] **Standing, Requirements**

Iowa's antitrust provisions are not intended to deal with claimed wrongs inflicted on individual parties. Their function is only to foster the public's access to a freely competitive market. The marketplace is often unfair, sometimes brutal; sometimes tortious acts take place there. Iowa Code ch. 553 presupposes all this. But, until an act impacts on the public's access to a competitive market, the injured are left to proceed with traditional tort or contract remedies. Chapter 553 simply does not provide a remedy for a private wrong.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN10[] **Standing, Requirements**

Medical practitioners denied privileges at one or more hospitals in a geographic area face a difficult task in establishing standing to bring an antitrust claim. An efficient enforcer of antitrust laws is one who can proficiently vindicate the legislative goals. There is case law analyzing five factors: (1) the directness or indirectness of the asserted injury; (2) whether there exists an identifiable class of persons motivated to vindicate the public interest in antitrust enforcement; (3) the nature of the damages; (4) the importance of avoiding duplicate recoveries; and (5) whether the plaintiff can enforce an antitrust judgment.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN11[] **Standing, Requirements**

A well-established body of federal precedent rejects antitrust standing for claims by physicians challenging exclusive contracts.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN12[] **Amendment of Pleadings, Leave of Court**

As a matter of practice, district courts should permit amendments and treat denials as the exception. And the district court should allow amendments so long as the amendment does not substantially change the issues in the case. Even amendments substantially changing the issues are permissible so long as the defendant is not prejudiced or unfairly surprised.

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN13[] **Summary Judgment, Entitlement as Matter of Law**

Summary judgment is appropriate when there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law. *Iowa R. Civ. P. 1.981(3)*. Courts view the summary-judgment record in the light most favorable to the nonmoving party and will grant that party all reasonable inferences that can be drawn from the record. The moving party must prove the facts are undisputed. And even when the facts are undisputed, summary judgment is inappropriate if reasonable minds could draw different inferences from those facts. The district court must not reach credibility determinations in granting summary judgment; assessments of what evidence to believe are left to the trier of fact.

Business & Corporate Compliance > ... > Contracts Law > Breach > Nonperformance

HN14[] **Breach, Nonperformance**

A party breaches a contract when, without legal excuse, it fails to perform any promise which forms a whole or a part of the contract.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN15[] **Actual Fraud, Elements**

To prove a defendant engaged in fraudulent representation or inducement, a plaintiff is required to show the following elements: (1) the defendant made a representation; (2) that proved to be false; (3) the representation was material; (4) the defendant did so with scienter; (5) the defendant intended to deceive persons; (6) the persons relied on the misrepresentation; and (7) the plaintiff suffered damages as a result.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

Labor & Employment Law > Employment Relationships > Employment Contracts > Contract Interpretation

HN16[] **Contract Interpretation, Good Faith & Fair Dealing**

The Iowa Supreme Court has not applied the doctrine of an implied duty of good faith and fair dealing to employment contracts.

Torts > ... > Contracts > Intentional Interference > Elements

HN17[] **Intentional Interference, Elements**

To prove tortious interference with existing contractual relationships, a plaintiff must show: (1) an existing valid contractual relationship or business expectancy; (2) knowledge of this by the interferer; (3) intentional interference inducing or causing a breach or termination of the relationship or expectancy; and (4) resulting damages.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN18[] **Intentional Interference, Elements**

To prove tortious interference with a prospective contractual relationship, a plaintiff must show: (1) a prospective contractual or business relationship; (2) the defendant knew of the prospective relationship; (3) the defendant intentionally and improperly interfered with the relationship; (4) the defendant's interference caused the relationship to fail to materialize; and (5) resulting damages. And interference with a prospective contract requires the plaintiff to show the defendant's sole or predominant reason for interfering was to financially injure or destroy him.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN19[] **Summary Judgment, Evidentiary Considerations**

The nonmoving party is entitled to all reasonable inferences in a motion for summary judgment. But the requirement to identify specific facts in response to a summary judgment motion includes the requirement to identify those facts that support the inference sought to be drawn.

Opinion by: TABOR

Opinion

TABOR, Judge.

When Dr. Rimas Nemickas was practicing with Linn County Anesthesiologists, P.C. (LCA), the group entered into exclusive contracts with two Cedar Rapids hospitals. After the practice group terminated his employment contract, Dr. Nemickas sued LCA under Iowa's anti-monopoly statute, *Iowa Code section 553.5 (2015)*. Dr. Nemickas also accused LCA of breach of contract, fraudulent inducement, and tortious interference. The district court granted LCA's motion to dismiss the *section 553.5* action, finding the doctor lacked standing to bring a state antitrust claim.

The district court issued summary judgment for LCA on the remaining claims. Dr. Nemickas now challenges **[*2]** the district court's rejection of his amended pleadings, the dismissal of his antitrust suit, and the grant of summary judgment. We find no abuse of discretion in the district court's handling of the myriad of amended pleadings filed by Dr. Nemickas. And we find no legal error in the district court's dismissal of the antitrust action or its grant of summary judgment on the contract-related claims. Accordingly, we affirm.

I. Facts and Prior Proceedings

Dr. Nemickas is a board-certified doctor of medicine and anesthesiology. He joined LCA in 1999 and became a shareholder of the practice in 2005. In 2012, LCA entered into separate contracts with two Cedar Rapids hospitals, Mercy Medical Center and St. Luke's Hospital, to be their exclusive provider of anesthesiology services. Two years later, in July 2014, LCA notified Dr. Nemickas that the officers of the practice would recommend his contract not be renewed as of December 2014. In August 2014, Dr. Nemickas filed a petition at law and requested a temporary restraining order against LCA's employment action. The petition also alleged a breach of contract by LCA.

The district court restrained LCA from holding its board meeting to consider Dr. **[*3]** Nemickas's employment status until after the parties conducted mediation as spelled out in the employment agreement. In September, the court expanded its injunction, ordering mediation occur within thirty days as set out in amendments to the agreement and that LCA provide Dr. Nemickas with ten days' written notice of the mediation and a list of specific events contributing to its decision not to renew his contract.

LCA provided Dr. Nemickas with notice on October 1 of the grievance committee meeting set for October 14. The practice also provided reasons for its proposed action, a series of complaints dating from 2000 to 2014 "demonstrating a lack of diligence regarding patient care." The list included: "complaints and reports from charge nurses at both Mercy and St. Luke's of a routine failure to review patient charts prior to administering anesthetic," "making social plans on phone while patient moving on table," "several incidents of falling asleep," and "inattentiveness to patients during general anesthesia while talking on phone". LCA also provided reports and complaints dating from 2000 to 2013 reflecting "disruptive and inappropriate conduct" by Dr. Nemickas, including "multiple **[*4]** events centered around explosive personality and inappropriate conversations in front of awake patients and Dr. Nemickas denying having any problem at follow up meeting." LCA summarized: "Based on chronic and recurring issues the Practice did not find Dr. Nemickas's behavior and performance consistent with the Practice's mission statement." Dr. Nemickas submitted a ten-page response to LCA's concerns to the grievance committee.

After its October 14 meeting, the grievance committee recommended LCA's concerns be considered by all shareholders in December 2014. Some data findings gathered by the grievance committee were sent late to Nemickas, but he received them before the scheduled meeting. Dr. Nemickas filed a request to enjoin any meeting to address his employment status which the district court denied. Dr. Nemickas was not present when the grievance committee presented to the LCA, but was able to make his own presentation and participate in the shareholder vote. After hearing presentations from both sides, twenty-four shareholders voted to issue Dr. Nemickas a ninety-day notice of "voluntary termination"; four opposed the motion and one abstained. On December 12, LCA sent Dr. Nemickas **[*5]** written notice of termination effective March 14, 2015. The doctor filed a fourth request for injunctive relief on March 2, asking the court to set aside LCA's decision to terminate his contract. The court denied the request. On March 14, Dr. Nemickas resigned his position with LCA. Both Mercy and St. Luke's advised Dr. Nemickas that he could not provide anesthesia services because of their exclusive contracts with LCA. But Dr. Nemickas continued to provide anesthesia services at the Surgery Center of Cedar Rapids under his St. Luke's privileges.

In April 2015, Dr. Nemickas filed an amended and substituted petition alleging three counts: breach of contract, fraudulent inducement, and antitrust violations under chapter 553. In May 2015, the court granted leave to amend. In June 2015, LCA filed a partial motion to dismiss, asserting Dr. Nemickas lacked standing to pursue the state antitrust claim.

During the summer of 2015, Dr. Nemickas tried repeatedly to amend his amended and substituted petition. On July 24, 2015, Dr. Nemickas filed a motion for leave to amend his petition to add a count of tortious interference. The motion also sought to change the caption to assert he was bringing **[*6]** the action "on behalf of himself and consumers of anesthesia services." LCA resisted the proposed amendment, arguing Dr. Nemickas lacked third-party standing to assert the chapter 553 action on behalf of unidentified consumers. In a third motion to amend filed August 12, Dr. Nemickas sought permission to add Mercy and St. Luke's hospitals as defendants in his antitrust action. LCA resisted.

The district court granted LCA's partial motion to dismiss on October 5, 2015. In that same ruling, the court denied Dr. Nemickas's motion to file a second amended and substituted petition. After a series of filings by Dr. Nemickas seeking reconsideration, the district court confirmed the dismissal on December 10. Dr. Nemickas sought interlocutory review of that ruling, which our supreme court denied.

LCA filed a motion for summary judgment in May 2016 with respect to Dr. Nemickas's claims for breach of contract, tortious interference, and fraudulent inducement. The motion noted the court had not granted Dr. Nemickas express permission to amend his petition to include the tortious interference claim but asserted LCA did not resist the motion to amend with respect to that claim. In August 2016, the **[*7]** district court granted LCA's motion for summary judgment in its entirety and ordered Dr. Nemickas to resign his clinical privileges and to "cease and desist" practicing anesthesia at St. Luke's Hospital. Dr. Nemickas appeals.

II. Scope and Standards of Review

Dr. Nemickas contends because he requested remedies in equity regarding the antitrust claim, our review should be de novo. *See* *Iowa R. App. P. 6.907*. LCA disagrees, arguing appellate review of dismissals for lack of standing in antitrust suits is for the correction of legal error. *See* *Southard v. Visa U.S.A. Inc., 734 N.W.2d 192, 194 (Iowa 2007)*. We agree with LCA. ***HN1***[] We review the dismissal for errors at law. *Comes v. Microsoft Corp., 646 N.W.2d 440, 442 (Iowa 2002)*. We will affirm "if the petition shows no right of recovery under any state of the facts." *Id.* (citing *Barnes v. State, 611 N.W.2d 290, 292 (Iowa 2000))*. We consider the petition's allegations in the light most favorable to the plaintiff. *Id.*

Dr. Nemickas asks us to review the district court's denial of his motions to amend for the correction of errors at law. LCA argues our review is for abuse of discretion. *See* *Rife v. D.T. Corner, Inc., 641 N.W.2d 761, 766 (Iowa 2002)*. (***HN2***[] "We afford district courts considerable discretion in ruling on motions for leave to amend pleadings." (citing *Davis v. Ottumwa YMCA, 438 N.W.2d 10, 14 (Iowa 1989)))*. LCA is again correct, we will only reverse "when a clear abuse of discretion has been shown." *See* *Davis, 438 N.W.2d at 14* (citing *B & B Asphalt Co. v. T.S. McShane Co., 242 N.W.2d 279, 284 (Iowa 1976))*.

The parties agree ***HN3***[] we **[*8]** review the grant of summary judgment for the correction of legal error. *See* *Baker v. City of Iowa City, 867 N.W.2d 44, 51 (Iowa 2015)*.

III. Analysis

A. Did the District Court Properly Dismiss the Antitrust Claim?

Dr. Nemickas based his antitrust claim on *section 553.5*,[1] known as the anti-monopoly provision, which reads: "A person shall not attempt to establish or establish, maintain, or use a monopoly of trade or commerce in a relevant

[1] In its October 2015 ruling, the district court noted the doctor's amended petition did not specify whether he was advancing a claim under *section 553.4* (Restraint prohibited) or *553.5* (Monopoly prohibited) but clarified it was the latter in his partial resistance to LCA's motion to dismiss.

market for the purpose of excluding competition or of controlling, fixing, or maintaining prices." HN4[] Section 553.5 is the counterpart to section 2 of the Sherman Act.[2] *See* Mueller v. Wellmark, Inc., 861 N.W.2d 563, 565 (Iowa 2015).[3] Under Iowa's Competition Law, the definition of "person" includes an "enterprise" which, in turn, includes a professional corporation. Iowa Code § 553.3(2), (4). The law defines "trade or commerce" broadly as "any economic activity involving or relating to any commodity, service, or business activity." *Id.* § 553.3(8); *see* Neyens v. Roth, 326 N.W.2d 294, 297 (Iowa 1982). And to round out the definitions, "'relevant market' means the geographical area of actual or potential competition in a line of commerce, all or any part of which is within this state." Iowa Code § 553.3(6). Iowa's Competition Law lacks a definition for one significant term—monopoly. Stepping into the void, our supreme court defined that term as "the power to control market prices or exclude competition." Neyens, 326 N.W.2d at 297 (quoting **[*9]** United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)).

In his April 2015 petition, Dr. Nemickas alleged: "The confidential exclusive anesthesiology services contracts between defendant and each of the hospitals in Cedar Rapids constitute an illegal monopoly." In his July 2015 resistance to LCA's partial motion to dismiss, he alleged the contracts were intended "to establish and maintain a monopoly of anesthesiology services in a relevant market with the purpose of excluding competition and of controlling, fixing or maintaining prices in violation of said law. Iowa Code § 553.5."[4]

So the question before the district court was whether Dr. Nemickas's allegations that LCA engaged in monopolistic practices, taken as true, stated a claim upon which relief could be granted. In considering LCA's motion, the district court recognized HN5[] dismissal is not a favored resolution. *See* Southard, 734 N.W.2d at 194 (cautioning if viability of a claim is debatable then it should not be dismissed, but endorsing continued use of motions to dismiss when issue is standing). But the district court reasoned dismissal was proper here because Dr. Nemickas neither

---

[2] Congress passed the Sherman Act, 15 U.S.C. §§ 1-7, in 1890 to preserve "free and unfettered competition as the rule of trade." *See* Molly Ebraheim, *Antitrust and Hospital Mergers: Uniqueness and Consistency in Market Definition Analysis*, 48 U. Tol. L. Rev. 337, 343 (2017). In 1914, Congress passed additional antitrust laws, including the Clayton Act, 15 U.S.C. § 18, to address certain mergers and acquisitions. *Id.* "Exclusive dealing arrangements that involve commodities may be challenged under either the Sherman Act or the Clayton Act, while those that involve a service or something other than a commodity may be challenged only under the Sherman Act." 54 Am. Jur. 2d Monopolies and Restraints of Trade § 141 (2018) (citing Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of Rhode Island, 239 F. Supp. 2d 180 (D.R.I. 2003).

[3] *Mueller* rejected a claim under section 553.4, which provides: "A contract, combination, or conspiracy between two or more persons shall not restrain or monopolize trade or commerce in a relevant market." Section 553.4 is the counterpart to section 1 of the Sherman Act. Id. at 567-68. Because section 1 applies to concerted action that restrains trade, federal courts have held that it requires two or more defendants. Energy Conversion Devices Liquidation Tr. v. Trina Solar Ltd., 833 F.3d 680, 684 (6th Cir. 2016), *cert. denied*, ***137 S. Ct. 1582, 197 L. Ed. 2d 705 (2017)***.

[4] Because Dr. Nemickas named only LCA in his antitrust action, and was unsuccessful in adding the two Cedar Rapids hospitals as defendants, he is unable to pursue a restraint-of-trade claim. *See* Iowa Code § 553.4 (requiring proof of a "contract, combination, or conspiracy between two or more persons"); *see also* Energy Conversion Devices Liquidation Tr., 833 F.3d at 684 (interpreting parallel federal provision to require two or more defendants). And we are skeptical that he could obtain relief under his section 553.5 claim—naming LCA as a single monopolist—given his concentration on LCA's exclusive contracts with the hospitals. In similar suits, the excluding party, the hospital or surgical center, is consistently named as a defendant. *See, e.g.,* Minnesota Ass'n of Nurse Anesthetists v. Unity Hosp., 208 F.3d 655, 657 (8th Cir. 2000); BCB Anesthesia Care, Ltd. v. Passavant Mem'l Area Hosp. Ass'n, 36 F.3d 664, 665 (7th Cir. 1994); Balaklaw v. Lovell, 14 F.3d 793, 795 (2d Cir. 1994); Bhan v. NME Hosps., Inc., 929 F.2d 1404, 1407 (9th Cir. 1991); Oltz v. St. Peter's Cmty. Hosp., 861 F.2d 1440, 1442 (9th Cir. 1988); Konik v. Champlain Valley Physicians Hosp. Med. Ctr., 733 F.2d 1007, 1009 (2d Cir. 1984); New Mexico Oncology v. Presbyterian Healthcare Services, 169 F. Supp. 3d 1204, 1205 (D.N.M. 2016); Korshin v. Benedictine Hospital, 34 F. Supp. 2d 133, 134 (N.D.N.Y. 1999); Davies v. Genesis Med. Ctr. Anesthesia & Analgesia, P.C., 994 F. Supp. 1078, 1085 (S.D. Iowa 1998); **Leyba v. Renger, 874 F. Supp. 1229, 1231 (D.N.M. 1994)**; Rockland Physician Associates, P.C. v. Grodin, 616 F. Supp. 945, 947 (S.D.N.Y. 1985); Belmar v. Cipolla, 96 N.J. 199, 475 A.2d 533, 535 (N.J. 1984). But because we affirm the district court's dismissal on the standing question, we need not decide if Dr. Nemickas otherwise states a claim upon which relief can be granted.

alleged a valid **[*10]** antitrust injury nor identified a "genuine market-wide anticompetitive effect" from LCA's exclusive contracts with the two Cedar Rapids hospitals. *See Midwest Comm'n. v. Minnesota Twins, Inc., 779 F.2d 444, 450 (8th Cir. 1985)* (holding if injury alleged is not an "antitrust injury," the plaintiff does not have a claim cognizable under the antitrust laws); *Davies, 994 F. Supp. at 1101* (advising that to avoid dismissal of complaint, plaintiff asserting an attempt-to-monopolize claim must allege a relevant geographic market).

On appeal, Dr. Nemickas contends the district court leaned too heavily on federal law in deciding the standing question. He cites *Comes, 646 N.W.2d at 445*,[5] for the proposition that the Iowa Competition Law "does not restrict the class of persons who may bring suit." *See Iowa Code § 553.12*. He further argues *Southard* "refined *Comes*" and held "competitors and consumers as participants in the market are proper anticompetition plaintiffs." *See 734 N.W.2d at 199*. Dr. Nemickas sees *Comes* and *Southard* through rose-colored glasses. A more clear-eyed view of that case law reveals ***HN6***[] a continued mandate for Iowa courts to follow the "harmonization provision" in *section 553.2*.[6] *See Comes, 646 N.W.2d at 446*; *see also Southard, 734 N.W.2d at 196* (clarifying "with respect to setting the outer limits of what injuries are compensable under Iowa's competition law, our decision in *Comes* is narrow"). Accordingly, **[*11]** the district court appropriately looked to federal standing requirements when deciding LCA's motion to dismiss.

HN7[] Antitrust standing is a more than a search for an injury in fact. *See Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1448 (11th Cir. 1991)*. It is a search for the proper plaintiff to enforce the antitrust laws. *Id.* To determine standing, we examine "the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them." *Southard, 734 N.W.2d at 198* (quoting *Associated Gen. Contractors v. Cal. State Council of Carpenters, 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*. We consider five factors: (1) whether the petition asserts a causal connection between the antitrust violation and the plaintiff's alleged harm; (2) if the injury is the type sought to be redressed by antitrust laws; (3) the directness of the injury; (4) whether failing to provide a remedy would leave a significant antitrust violation undetected **[*12]** or unremedied; and (5) whether the damages claimed are highly speculative or abstract. *Id.* Condensed into a more precise test, "[f]irst, a court should determine whether the plaintiff suffered 'antitrust injury'; second, the court should determine whether the plaintiff is an efficient enforcer of the antitrust laws, which requires some analysis of the directness or remoteness of the plaintiff's injury." *Todorov, 921 F.2d at 1449*.

1. *No antitrust injury*. Applying the *Southard* test to the facts asserted in Dr. Nemickas's amended petition, we conclude he does not have antitrust standing. His petition does not allege an antitrust injury. He complains LCA's exclusive contracts with the two hospitals bar any anesthesiologist who is not a LCA member from enjoying staff privileges. Dr. Nemickas practiced in Cedar Rapids for several years under the exclusive contracts. He was only prevented from practicing at the local hospitals after leaving LCA. His alleged injury, the inability to practice at St. Luke's and Mercy, resulted from his separation from LCA not the exclusive contracts.

And even considering his current inability to practice at the hospitals without regard to his separation from LCA, Dr. Nemickas does not **[*13]** allege the type of injury protected by antitrust laws. *See Next Generation Realty, Inc. v. Iowa Realty Co., Inc., 686 N.W.2d 206, 208 (Iowa 2004)* ("Antitrust is in place to protect the market, not any

---

[5] In *Comes*, our supreme court declined to follow federal precedent on whether indirect purchasers had standing to sue under the Iowa Competition Law. *Id. at 445-49*. The *Comes* court did so because: (1) the language of *section 553.12* supported indirect purchaser standing; (2) uniformity only requires a uniform standard of conduct under state and federal law, not a uniform rule as to who may sue; and (3) most federal courts allowed indirect purchasers to sue at the time the Iowa Competition Law was enacted in 1976. *See id.*

[6] *Iowa Code section 553.2* states:

> This chapter shall be construed to complement and be harmonized with the applied laws of the United States which have the same or similar purpose as this chapter. This construction shall not be made in such a way as to constitute a delegation of state authority to the federal government, but shall be made to achieve uniform application of the state and federal laws prohibiting restraints of economic activity and monopolistic practices.

individual merchant doing business there."); *see also* Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 338, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990) ("The antitrust laws protect *competition*, not *competitors*." (quoting Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))).

Dr. Nemickas asserts in his amended petition that patients in Cedar Rapids "have no availability of any alternative anesthesiology services" except those of LCA, and he alleges LCA "dominates and controls charges and prices" for those services. But Dr. Nemickas doesn't share whatever hardship patients may suffer based on LCA's market dominance. His ox is being gored in a different quarter. His personal financial hit—resulting from being let go by a practice that has an exclusive contract with two local hospitals—differs from any injury to the competitive marketplace. *See* Scott v. Galusha, 890 S.W.2d 945, 950 (Tex. App. 1994) (***HN8***[] "[A] plaintiff does not have antitrust standing to prosecute an economic injury to himself unless that injury corresponds to an injury of the same type to the relevant market."); *see also* In re Crude Oil Commodity Futures Litig., 913 F. Supp. 2d 41, 57 (S.D.N.Y. 2012) ("The antitrust standing requirement weeds out claims by jilted competitors against firms that legitimately outperform them or choose not to partner with them.").

HN9[] Iowa's antitrust provisions are **[*14]** "not intended to deal with claimed wrongs inflicted on individual parties. Their function is only to foster the public's access to a freely competitive market." Next Generation Realty, Inc., 686 N.W.2d at 208. The *Next Generation* court rejected the claim of a disgruntled competitor, waxing:

> The marketplace is often unfair, sometimes brutal; sometimes tortious acts take place there. Chapter 553 presupposes all this. But, until an act impacts on the public's access to a competitive market, the injured are left to proceed with traditional tort or contract remedies. Iowa Code chapter 553 simply does not provide a remedy for a private wrong.

Id. at 208-09. The district court correctly determined Dr. Nemickas did not allege an antitrust injury as necessary to proceed under chapter 553.

2. *Not efficient enforcer*. Even had Dr. Nemickas alleged an antitrust injury he would be ill-suited to bring an antitrust claim because he is not an efficient enforcer. ***HN10***[] Medical practitioners denied privileges at one or more hospitals in a geographic area face a difficult task in establishing standing to bring an antitrust claim. *See, e.g.,* Davies, 994 F. Supp. at 1093-96 (finding anesthesiologist did not establish efficient enforcer status). An "efficient enforcer" of antitrust laws is one who can proficiently vindicate **[*15]** the legislative goals. *See* Todorov, 921 F.2d at 1450 (analyzing five factors: (1) the directness or indirectness of the asserted injury; (2) whether there exists an identifiable class of persons motivated to vindicate the public interest in antitrust enforcement; (3) the nature of the damages; (4) the importance of avoiding duplicate recoveries; and (5) whether the plaintiff can enforce an antitrust judgment).

Dr. Nemickas asserts an average consumer is ill-equipped to notice changes in availability, quality, and price of anesthesiology services—making a competitor, like him, better suited to serve as an enforcer. On the contrary, Dr. Nemickas could benefit from LCA's exclusive contracts with the hospitals because consumers may seek out alternative sources for anesthesiology services. *See* Davies, 994 F. Supp. at 1096 (noting if the defendant began charging more for anesthesiology services or providing lower quality care then consumers will seek out alternative care with other facilities or physicians). And if the exclusive contracts do result in higher prices and a lower level of care "these effects will not be missed by patient-consumers or insurers." *See* Kochert v. Greater Lafayette Health Servs., Inc., 463 F.3d 710, 719 (7th Cir. 2006).

Dr. Nemickas failed to allege an antitrust injury and would not be an efficient **[*16]** enforcer of such claim.[7] Because Iowa antitrust statute is guided by federal law, we are not inclined to diverge from ***HN11***[] a well-established body of federal precedent rejecting antitrust standing for claims by physicians challenging exclusive contracts. *See, e.g.,* Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 31, 104 S. Ct. 1551, 80 L. Ed. 2d 2

[7] Because we conclude the district court properly dismissed the petition on these standing grounds, we need not reach the question whether Dr. Nemickas correctly identified the relevant anesthesiology market as the two hospitals in Cedar Rapids.

(1984) (abrogated on other grounds by Illinois Tool Works Inc. v. Independent Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)); Balaklaw, 14 F.3d at 797; Konik, 733 F.2d at 1015; Korshin, 34 F. Supp. 2d at 138; Davies, 994 F. Supp. at 1096. Any expansion of antitrust standing is best left to our supreme court. *See* Rosauer Corp. v. Sapp Dev., L.L.C., 856 N.W.2d 906, 907 (Iowa 2014) (finding appropriate for court of appeals to defer to supreme court on whether to extend reach of "implied warranty of workmanlike construction").

B. Did the District Court Abuse its Discretion by Denying Attempts by Dr. Nemickas to Amend His Petition?

Dr. Nemickas next argues he was "given no opportunity to remedy or substantiate his petition." At issue is (1) a motion for leave to amend petition filed July 24, 2015; (2) an amendment to the motion for leave to amend petition filed August 12, 2015; and (3) a motion for extension of time filed October 14, 2015, to "plead over" in accordance with Nesper Sign & Neon Co. v. Nugent, 168 N.W.2d 805 (Iowa 1969). In its appellee's brief, LCA interprets these motions as Dr. Nemickas's efforts to advance three purposes: (1) add a tortious interference claim[8]; (2) add the two hospitals as antitrust defendants; and (3) "bolster his allegations **[*17]** that he had suffered an antitrust injury, primarily by seeking to claim that he was prosecuting the antitrust claims on behalf of not only himself, but unidentified 'consumers.'"

We first address the district court's refusal to accept the amendments filed on July 24 and August 12. In reviewing the district court's exercise of discretion, we start with the language of the applicable rule:

> A party may amend a pleading once as a matter of course at any time before a responsive pleading is served or, if the pleading is one to which no responsive pleading is required and the action has not been placed upon the trial calendar, the party may so amend it at any time within 20 days after it is served. Otherwise, a party may amend a pleading only by leave of court or by written consent of the adverse party. Leave to amend, including leave to amend to conform to the proof, shall be freely given when justice so requires.

Iowa R. Civ. P. 1.402(4). ***HN12***[] As a matter of practice, district courts should permit amendments and treat denials as the exception. Baker v. City of Iowa City, 867 N.W.2d 44, 51 (Iowa 2015). And "[t]he district court should allow amendments so long as the amendment does not substantially change the issues in the case." *Id.* Even amendments substantially changing the **[*18]** issues are permissible so long as the defendant is "not prejudiced or unfairly surprised." *Id.*

Here, the district court rejected the doctor's motion to add the hospitals as parties because it determined Dr. Nemickas lacked standing and dismissed the chapter 553 claim leaving no surviving claim relevant to the hospitals. That rejection was not an abuse of discretion because the amendment would not have altered the outcome of the suit. The same rationale supports Dr. Nemickas's belated attempts to bolster his allegations concerning the antitrust injury by claiming he brought suit on behalf of consumers. The district court did not abuse its discretion in denying Dr. Nemickas's request to amend his pleadings.

Dr. Nemickas also complains he was denied permission to "plead over" to correct deficiencies in his petition under Iowa Rule of Civil Procedure 1.444.[9] The district court correctly concluded Dr. Nemickas could not rely on the "pleading over" language in rule 1.444 and its interpretation in *Nesper Sign*. In *Nesper Sign*, the plaintiff misnamed

---

[8] LCA did not resist addition of the tortious interference claim. The district court addressed the merits of that claim, as does LCA on appeal. Accordingly, we reach the merits of this claim later in this opinion.

[9] Iowa Rule of Civil Procedure 1.444 states:

> If a party is required or permitted to plead further by an order or ruling, the clerk shall forthwith mail or deliver notice of such order or ruling to the attorneys of record. Unless otherwise provided by order or ruling, such party shall file such further pleading within ten days after such mailing or delivery; and if such party fails to do so within such time, the party thereby elects to stand on the record theretofore made. On such election, the ruling shall be deemed a final adjudication in the trial court without further judgment or order; reserving only such issues, if any, which remain undisposed of by such ruling and election.

the defendant, Nugent, as an individual rather than a corporation, but otherwise filed a legitimate cause of action. *168 N.W.2d at 806-07*. In the present case, Dr. Nemickas did not misidentify a defendant through **[*19]** inadvertent error. Rather, he identified LCA as the sole defendant and failed to name either hospital as a defendant in his original amended petition. In concluding Dr. Nemickas was not an efficient enforcer of Iowa's ***antitrust law***, the district court did not require or permit further pleading. Accordingly, *rule 1.444* did not apply. *See* *Hubbard v. Marsh, 239 Iowa 472, 32 N.W.2d 67, 68 (Iowa 1948)*.

C. Did the District Court Properly Grant Summary Judgment on the Remaining Claims?

HN13[] Summary judgment is appropriate when there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law. **[*20]** *Iowa R. Civ. P. 1.981(3)*. We view the summary-judgment "record in the light most favorable to the nonmoving party and will grant that party all reasonable inferences that we can draw from the record." *See* *Estate of Gray ex rel. Gray v. Baldi, 880 N.W.2d 451, 455 (Iowa 2016)* (quoting *Cawthorn v. Catholic Health Initiatives Iowa Corp., 806 N.W.2d 282, 286 (Iowa 2011))*. As the moving party, LCA must prove the facts are undisputed. *See* *Phillips v. Covenant Clinic, 625 N.W.2d 714, 717 (Iowa 2001)*. And "[e]ven when the facts are undisputed, summary judgment is inappropriate if reasonable minds could draw different inferences from those facts." *Frontier Leasing Corp. v. Links Eng'g, LLC, 781 N.W.2d 772, 775-76 (Iowa 2010)* (quoting *Colonial Baking Co. of Des Moines v. Dowie, 330 N.W.2d 279, 282 (Iowa 1983))*. The district court must not reach credibility determinations in granting summary judgment; assessments of what evidence to believe are left to the trier of fact. *See* *id. at 776*.

1. **Breach of Contract**

"***HN14***[] A party breaches a contract when, without legal excuse, it fails to perform any promise which forms a whole or a part of the contract." *Molo Oil Co. v. River City Ford Truck Sales, Inc., 578 N.W.2d 222, 224 (Iowa 1998)* (citing *Magnusson Agency v. Pub. Entity Nat'l Co., 560 N.W.2d 20, 27 (Iowa 1997))*. To show LCA breached the employment contract, Dr. Nemickas was required to satisfy five elements: (1) a contract existed; (2) its terms and conditions were established; (3) he performed those required terms and conditions; (4) LCA breached the contract in a particular way; and (5) Dr. Nemickas suffered damages as a result of the breach. *See* *id.*

Dr. Nemickas insists the employee handbook and LCA's bylaws served as contracts between him and LCA. **[*21]** He further claims LCA breached contractual guarantees by not conducting a proper peer-review procedure. He also contends he did not have a chance to address all of the allegations against him.

As an initial matter, the district court decided the handbook was not a binding contract. The handbook explicitly stated "these documents are not a contract of employment and that my employment relationship with [LCA] is voluntary and subject to the terms of my Employment Contract," and Dr. Nemickas signed his name below this disclaimer. We agree with the district court that the handbook was specific in avoiding the creation of a contract. *See* *Vick v. Heatilator, Inc., 537 N.W.2d 810, 812 (Iowa Ct. App. 1995)*.

Next, the district court decided LCA complied with the peer-review and grievance procedures set out in its bylaws. That process allowed Dr. Nemickas to counter the allegations against him in writing and at the grievance committee and shareholder meetings. Dr. Nemickas presented a ten-page response, spoke with the grievance committee, presented to the shareholders and participated in the shareholder vote. The district court found Dr. Nemickas was afforded due process and LCA met each requirement set out in the bylaws. Accordingly, the court decided the doctor **[*22]** had not presented a genuine issue of material fact as to any breach of the employment contract by LCA. We find no error in the court's conclusion.

2. Fraudulent Inducement/Misrepresentation/Good Faith & Fair Dealing

Dr. Nemickas next asserts LCA misled the shareholders in connection with his termination in violation of an implied duty of good and fair dealing. Specifically, he claims LCA purported to share negative results from a peer review when no true peer review was conducted; LCA inaccurately alleged his conduct threatened its contracts with the hospitals; LCA alleged he had a high number of "no-requests" from doctors who work with the group's anesthesiologists when he had no opportunity to determine the veracity of that data; LCA would waive the non-compete clause in Dr. Nemickas's employment contract; and "putative concerns raised by LCA as required by court order were a pretext to other positive pressures being exerted from outside the group." On appeal, Dr. Nemickas argues Iowa courts should recognize an implied duty of good faith and fair dealing in all contracts.

HN15[] To prove LCA engaged in fraudulent representation or inducement, Dr. Nemickas was required to show the following **[*23]** elements: (1) LCA made a representation; (2) that proved to be false; (3) the representation was material; (4) LCA did so with scienter; (5) LCA intended to deceive the shareholders; (6) the shareholders relied on the misrepresentation; and (7) Dr. Nemickas suffered damages as a result. *See* *Whalen v. Connelly, 545 N.W.2d 284, 294 (Iowa 1996)*.

The district court determined Dr. Nemickas had not met his "burden of production as to any of the elements of a claim of fraudulent inducement to generate a viable jury question." We agree with the district court's determination. Dr. Nemickas failed to present baseline facts from which a jury could find LCA made false representations to the shareholders with an intent to deceive them. Rather, the grievance committee presented reports of Dr. Nemickas's misconduct that it gathered in response to a court order obtained by the doctor. Moreover, as LCA points out on appeal, the practice group did not need a "pretext" to fire Dr. Nemickas; the employment contract allowed for voluntary termination for any reason or no reason upon ninety days' notice, which Dr. Nemickas received.

On the issue of an implied duty of good faith and fair dealing, Dr. Nemickas acknowledges ***HN16***[] our supreme court has not applied the **[*24]** doctrine to employment contracts. *See, e.g., Fogel v. Trustees of Iowa Coll., 446 N.W.2d 451, 456 (Iowa 1989)*; *see also* *Anderson v. Douglas & Lomason Co., 540 N.W.2d 277, 282 (Iowa 1995)* ("We have consistently rejected recognition of a covenant of good faith and fair dealing."). But Dr. Nemickas contends his contract with LCA included this implied duty and that LCA had "an even higher duty" to him because its shareholders were fiduciaries. Dr. Nemickas is asking to expand the application of this doctrine beyond the existing Iowa precedent. We believe any such an expansion would be better left to our supreme court. *See* *Rosauer, 856 N.W.2d at 907*.

3. Tortious Interference

In his final claim, Dr. Nemickas seeks damages based on LCA's alleged interference with his existing and prospective business contracts—the interference, according to Dr. Nemickas, is LCA's act of maintaining exclusive contracts that allow only LCA anesthesiologists to provide services at the two Cedar Rapids hospitals.

HN17[] To prove LCA's tortious interference with Dr. Nemickas's *existing* contractual relationships he must show: (1) an *existing* valid contractual relationship or business expectancy; (2) knowledge of this by the interferer; (3) intentional interference inducing or causing a breach or termination of the relationship or expectancy; and (4) resulting damages. *Locksley v. Anesthesiologists of Cedar Rapids, P.C., 333 N.W.2d 451, 457 (Iowa 1983)*. Similarly, **[*25]** ***HN18***[] to prove tortious interference with a *prospective* contractual relationship Dr. Nemickas must show: (1) a *prospective* contractual or business relationship; (2) that LCA knew of the prospective relationship; (3) LCA intentionally and improperly interfered with the relationship; (4) LCA's interference caused the relationship to fail to materialize; and (5) resulting damages. *See* *Iowa Coal Min. Co. v. Monroe Cty., 555 N.W.2d 418, 438 (Iowa 1996)*. And interference with a prospective contract requires Dr. Nemickas to show LCA's sole or predominant reason for interfering was to financially injure or destroy him. *See* *Tredrea v. Anesthesia & Analgesia, P.C., 584 N.W.2d 276, 283 (Iowa 1998)*.

The district court concluded Dr. Nemickas failed to demonstrate that a reasonable jury could find LCA entered into the exclusive contracts with the sole or predominant purpose of interfering with Dr. Nemickas's business relationships with patients and physicians at the two hospitals. The district court continued: "In fact, Dr. Nemickas consented to and benefited from these contracts." We find no error in the district court's conclusion.

We recognize Dr. Nemickas, as ***HN19***[] the nonmoving party, "is entitled to all reasonable inferences in a motion for summary judgment." *See* *Green v. Racing Ass'n of Cent. Iowa, 713 N.W.2d 234, 246 (Iowa 2006)*. But "the requirement to identify specific facts in response to a summary judgment **[*26]** motion includes the requirement to identify those facts that support the inference sought to be drawn." *Id.* Dr. Nemickas did not meet that requirement on any of the summary judgment claims.

IV. Conclusion

To recap, the district court properly dismissed Dr. Nemickas's *section 553.5* claim because he lacked antitrust standing. The court did not abuse its discretion by denying the doctor's numerous motions to amend. And the court properly granted summary judgment on the remaining claims.

AFFIRMED.

Thompson v. 1-800 Contacts, Inc.

United States District Court for the District of Utah, Central Division

May 17, 2018, Decided; May 17, 2018, Filed

Opinion by: TENA CAMPBELL

Opinion

ORDER AND MEMORANDUM DECISION

Plaintiffs, who bought contact lenses online from the Defendants, allege that they paid artificially-inflated prices for those contact lenses due to Defendants' anti-competitive agreements. **[*5]** To recover damages, they bring this proposed class action alleging antitrust violations of *§ 1 of the Sherman Act*.

Defendants move to dismiss the claims[1] for failure to allege antitrust standing, failure to establish a relevant product market, and failure to allege a single overarching conspiracy. Alternatively, they argue that any damages Plaintiffs

[1] Two Defendants—Arlington Lens Contact Services (AC Lens) and National Vision (NV)—have tentatively settled with the Plaintiffs and are not part of the current proceedings.

can prove must be limited to contact lens purchases made within the *Sherman Act*'s four-year statute of limitations—i.e., 2012 to 2016. Because Plaintiffs seek damages for purchases dating back to 2004, they rely on two bases for tolling that statute: fraudulent concealment and statutory tolling. Defendants respond that Plaintiffs' allegations do not establish either. For the reasons set forth below, the motions are

BACKGROUND[2]

Antitrust Complaint

Plaintiffs assert in their Consolidated Amended Complaint (CAC)[3] that a series of trademark litigation settlement agreements between 1-800 and other on-line contact lens retailers suppressed competition in the online market for contact lenses, artificially inflated the cost of contact lenses purchased online, and deprived consumers of complete and important information about competing retailers and their **[*6]** products. This, they contend, violated *§ 1* of the Sherman Act, which provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*.

The Agreements

In 2004, Defendant 1-800 Contacts began filing trademark infringement cases against its competitors. It settled those suits and entered into settlement agreements with the targets of its trademark litigation. Plaintiffs contend that those settlement agreements restrain competition in violation of the Sherman Act.

In each bilateral settlement agreement, the parties agreed to limit or withhold use of certain trademark and related key words in their bids for advertisement space on Internet search engines like Google and Yahoo. The agreements prohibited the retailers "from bidding on any search keywords or phrases with the other company's names, websites or trademarks in them" and required them to use "negative keywords" to prevent that company's advertisement from appearing in a response to a search query that contains one or more of the specified words. (CAC ¶¶ 10-11, ECF No. 72.) This, Plaintiffs allege, **[*7]** illegally manipulated the number and types of ads seen by the online shopper.

Altogether the CAC alleges the existence of fifteen agreements (see Pls.' Omnibus Mem. in Opp'n to Defs.' Mot. Dismiss ("Opp'n") at 30, ECF No. 142), four of which are addressed in some detail in the CAC. 1-800 and Vision Direct entered into two agreements: one dated June 2004 and a follow-up settlement agreement dated May 2009. In March 2010, 1-800 settled its lawsuit against AC Lens and National Vision. And finally, in June 2010, 1-800 settled with Walgreens in the fourth agreement.

FTC's Investigation and Decision

---

[2] The court's recitation of facts throughout this order is based on well-pleaded factual allegations in Plaintiffs' complaint, as well as reasonable inferences drawn from those facts. The court treats those facts as true for purpose of analyzing the motions under *Federal Rule of Civil Procedure 12(b)(6)*.

[3] In November 2016, contact lens purchasers J. Thompson and William Duncanson filed an antitrust complaint on behalf of themselves and others similarly situated against 1-800 Contacts, Inc. (1-800) and Vision Direct, Inc. Around the same time, other consumers filed similar but independent complaints, either here or in other federal districts. Given the similarity of the claims, the cases were transferred and consolidated. On May 31, 2017, the consolidated Plaintiffs filed an amended complaint—the Consolidated Amended Complaint (CAC)—against 1-800 and Vision Direct, as well as Walgreens Boots Alliance, Inc., Walgreen Co., Luxottica Retail North America, Inc., AC Lens, and National Vision.

Before the private consumers filed their private antitrust actions, the Federal Trade Commission (FTC), in 2015, began investigating 1-800's practice of suing competitors for trademark violations and then settling with those parties on terms that limited the parties' use of trademarks in on-line advertising. In January 2015, the FTC issued a Civil Investigative Demand to 1-800,[4] in which it sought information to determine whether 1-800 was violating ***antitrust law***. In August 2016, following its investigation, the FTC filed an administrative complaint against 1-800. In October 2017, after a lengthy **[*8]** evidentiary hearing conducted by an administrative law judge, the FTC issued Findings of Fact and Conclusions of Law and ruled that 1-800 had violated *Section 5 of the FTC Act*, "which encompasses violations of *Section 1* of the Sherman Act." (See Oct. 27, 2017 FTC Initial Decision In the Matter of 1-800 Contacts, Inc. at 117, attached as Ex. A to Notice of Supplemental Authority, ECF No. 152-1.)

The Plaintiffs, in their opposition to the motions to dismiss, point to the FTC's findings to bolster their complaint and convince the court to deny the motions to dismiss. But because the FTC decision is not part of the CAC and has no precedential value, the court will not consider it here.

The Motions to Dismiss

Defendants jointly filed two motions to dismiss. In the first motion, they contend that Plaintiffs lack antitrust standing, fail to allege a cognizable relevant market, and fail to allege a single overarching conspiracy or other concerted activity barred by the Sherman Act. (See Defs. Vision Direct, Inc., Walgreens Boots Alliance, Inc., Walgreen Co., & Luxottica Retail N. Am. Inc.'s Mot. Dismiss Pls.' Consol. Am. Compl., ECF No. 116 (hereinafter "Vision Direct Motion") (incorporated by 1-800 in its motion).)

In the second motion, they focus on **[*9]** the statute of limitations, asserting that claims based on purchases of contact lenses before October 13, 2012, are time-barred. And they challenge Plaintiffs' reliance on two separate rules that prevent dismissal of damages incurred before that date: (1) statutory tolling, and (2) fraudulent concealment. (See 1-800 Contacts' Mot. Dismiss Pls.' Consol. Am. Compl., ECF No. 118 (hereinafter "1-800 Motion") (incorporated by Vision Direct et al. in their motion).)[5]

LEGAL STANDARD

When analyzing a motion to dismiss, the court "must accept all the well-pleaded allegations of the complaint as true and must construe them in the light most favorable to the plaintiff." *Thomas v. Kaven, 765 F.3d 1183, 1190 (10th Cir. 2014)* (internal citation and quotation marks omitted). To withstand the motions to dismiss, Plaintiffs need only show that the allegations in the CAC "state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*; *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

ANTITRUST STANDING

In order to bring a private antitrust claim, the party must have antitrust standing, which consists of "antitrust injury" and a plausible connection between that injury and the alleged violation of the antitrust laws. *Tal v. Hogan, 453 F.3d 1244, 1253 (10th Cir. 2006)*. According to Plaintiffs, they suffered antitrust injury because the advertisement

---

[4] Ex. 4 to Decl. of Carl E. Goldfarb, ECF No. 143-4.

[5] All parties filed requests for judicial notice of documents relevant to the statute of limitations issue. (See Pls.' Request for Judicial Notice, ECF No. 144; Vision Direct et al. Request for Judicial Notice, ECF No. 117; 1-800 Contacts' Request for Judicial Notice, ECF No. 120.) Judicially-noticed "documents may only be considered to show their contents, not to prove the truth of the matters asserted therein." *Tal v. Hogan, 453 F.3d 1244, 1264-65 n.24 (10th Cir. 2006)*. The court will only consider those documents when analyzing the statute of limitations question of whether, or when, Plaintiffs were on notice of their claims against Defendants.

restrictions **[*10]** deprived them of truthful information and caused them to pay artificially inflated prices online. Defendants contend that the alleged connection between their injury and Defendants' agreements, as well as the economic theory underlying the antitrust claims, are flawed.

Courts typically consider six non-exclusive factors when analyzing whether a plaintiff has antitrust standing. *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (AGC). These AGC factors include:

> (1) the causal connection between the antitrust violation and the plaintiff's injury; (2) the defendant's intent or motivation; (3) the nature of the plaintiff's injury—i.e., whether it is one intended to be redressed by the antitrust laws; (4) the directness or the indirectness of the connection between the plaintiff's injury and the market restraint resulting from the alleged antitrust violation; (5) the speculative nature of the damages sought; and (6) the risk of duplicative recoveries or complex damages apportionment.

Sharp v. United Airlines, Inc., 967 F.2d 404, 406-07 (10th Cir. 1992) (noting that the AGC factors are not "black-letter rules" but rather guidelines for analysis).

Defendants focus on causation, the nature of the injury, and the remoteness of that injury to the alleged anti-competitive behavior. They say that "Plaintiffs fail **[*11]** to allege any facts at all showing how these narrowly tailored advertising agreements caused them to pay higher prices for contact lenses than they would have but for the existence of these agreements" and that "Plaintiffs' harm (overcharges on contact lenses purchased online) is too far removed from the alleged anticompetitive conduct (restrictions on bidding for certain online advertising keywords relating to contact lenses)." (Vision Direct Mot. at 12, 15.)

Causation and Nature of the Injury

In response, Plaintiffs say that their injury—a financial loss stemming from a "competition-reducing aspect or effect"[6] of the settlement agreements—is carefully alleged in the CAC. (See Opp'n at 5-6.) This financial injury, they assert, is the "epitome of 'antitrust injury'" and is "precisely the type of injury that is likely to result from defendants' advertising restrictions: higher search costs and higher prices." (Id. at 6-7.) The court agrees.

Plaintiffs back up their theory of causation with multiple allegations in the CAC. According to Plaintiffs, Defendants (who together control "approximately 80% of the online retail market for contact lens sales") "committed not to compete against one **[*12]** another in certain critical online advertising, thereby suppressing competition and inflating the amount consumers paid for the online purchase of contact lenses from Defendants." (CAC ¶ 2.) Their allegations link the agreements to higher prices. Plaintiffs identify the agreements and the key provisions, explain how the agreements work, and explain that, under their theory, they paid overcharges and were deprived of "the total amount of truthful information about sellers of contact lenses online and about the prices of contact lenses sold online." (Id. ¶ 75; see also id. ¶¶ 1-13, 51, 58-74.)

And, in their opposition brief, Plaintiffs elaborate on the connection between the alleged injury and the agreements.

> By suppressing one of the primary ways in which they compete [i.e., online advertising], defendants purposefully made it more difficult to communicate their goods and services to consumers. This, in turn, made it less likely for defendants to compete on price, thereby stabilizing prices, diminishing competition, and causing harm to consumers.

(Opp'n at 9.)

Defendants say that Plaintiffs' CAC is inadequate in part because it does not lay out, for example, prices and discounts offered **[*13]** by the online retailers, and because Plaintiffs' vague theory is "economically flawed on its

---

[6] *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*, quoted in *Elliott Indus. Ltd. P'ship v. BP Am. Prod. Co., 407 F.3d 1091, 1124-25 (10th Cir. 2005)*.

face." (Vision Direct Mot. at 3.) But Defendants ask Plaintiffs to provide an economic analysis that requires specific data and expert testimony. That is too much to expect of Plaintiffs at this stage. "The facts necessary to show 'antitrust injury' are often very complex," and Plaintiffs should not be required to provide an expert affidavit setting out Plaintiffs' economic theory at the motion-to-dismiss stage. See, e.g., *Davis v. Southern Bel Tel. & Tel. Co., 755 F. Supp. 1532, 1536, 1536-37 (S.D. Fla. 1991)* (rejecting argument in motion to dismiss based on plaintiffs' failure to provide a detailed economic analysis).

In addition to the CAC allegations, case law addressing advertising restrictions provides some support to Plaintiffs' argument that their theory (i.e., Defendants' advertising restrictions (even partial ones) resulted in higher search costs and higher prices for contact lenses purchased online) is plausible. In *Bates v. State Bar of Arizona, 433 U.S. 350, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)*, the United States Supreme Court noted that a restriction "on advertising serves to increase the difficulty of discovering the lowest cost seller of acceptable ability. As a result, to this extent [the advertisers] are isolated from competition, and the **[*14]** incentive to price competitively is reduced." *Id. at 377*. See also *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 773, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)* ("[R]estrictions on the ability to advertise prices normally make it more difficult for consumers to find a lower price and for [rivals] to compete on the basis of price."); *Morales v. Trans World Airlines, Inc., 504 U.S. 374, 388, 112 S. Ct. 2031, 119 L. Ed. 2d 157 (1992)* (finding that "restrictions on fare advertising have the forbidden effect upon fares"); *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 461-62, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)* ("A concerted and effective effort to withhold (or make more costly) information desired by consumers for the purposes of determining whether a particular purpose is cost justified is likely enough to disrupt the proper functioning of the price-setting mechanism of the market . . . ."); *Realcomp II, Ltd. v. FTC, 635 F.3d 815, 830 (6th Cir. 2011)* (finding that even partial advertising restrictions in an agreement among real estate brokers to restrict internet advertising were anticompetitive).

Remoteness of the Harm

Defendants further contend that the alleged injury is too remote. According to Defendants, the Plaintiffs allege a "downstream effect on contact lens pricing" which is too far removed from the alleged anticompetitive agreements. (Vision Direct Mot. at 17.) But Plaintiffs purchased the contact lenses directly from Defendants in the market that was allegedly restrained.[7] That is sufficient to avoid dismissal. See, e.g., **[*15]** *Reiter v. Sonotone Corp., 442 U.S. 330, 342, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)* ("where petitioner alleges a wrongful deprivation of her money because the price of the hearing aid she bought was artificially inflated by reason of respondents' anticompetitive conduct," she has alleged an antitrust injury); *McCready v. Blue Shield of Va., 649 F.2d 228, 231 (4th Cir. 1981)* (rejecting contention that patient's injury was too remote, because although alleged anticompetitive conduct was directed at psychologists, both patient and psychologists were "in the target area"); see also *Trans World Airlines, 504 U.S. at 388-89* (holding that restrictions on airfare advertising directly affected airfare prices paid by consumers).

For the reasons set forth above, the court finds that Plaintiffs have sufficiently alleged that they suffered an antitrust injury as a result of Defendants' settlement agreements.

RELEVANT PRODUCT MARKET

---

[7] Defendants cite to *Lorenzo v. Qualcomm Inc., 603 F. Supp. 2d 1291 (S.D. Cal. 2009)*, and *Feitelson v. Google Inc., 80 F. Supp. 3d 1019 (N.D. Cal. 2015)*, to support their argument that Plaintiffs' injury is too remote from the advertising practices alleged. Those cases are distinguishable because the consumers in those cases were indirect purchasers who did not participate in the markets being restrained. See *Qualcomm, 603 F. Supp. 2d at 1299* (consumers "alleged injury at least three levels removed from any alleged misconduct by Qualcomm."); *Google, 80 F. Supp. 3d at 1028* (finding alleged injury too remote because there was a series of supply chain levels between the defendants alleged to have engaged in anticompetitive conduct and the end consumers).

Under *§ 1* of the Sherman Act, Plaintiffs must allege that the agreements unreasonably restrain trade in the "relevant market." *TV Commc'ns Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1027 (10th Cir. 1992)*. The relevant market has two components: a relevant geographic market and a relevant product market.

Here, the Defendants target the Plaintiffs' definition of the relevant product market, which Plaintiffs define as the online market for retail sales of contact lenses. According to Plaintiffs, "[b]ecause of the ease of purchasing **[*16]** contacts without going to a physical store, the retail market for contact lenses sold to customers at physical locations (e.g., brick-and-mortar stores and sales by eye care professionals) exists separately from, is not an adequate substitute for, and does not restrain prices in the online market for the sale of contact lenses." (CAC ¶ 39.) Defendants respond that the relevant product market must include the off-line market for retail sales of contact lenses (i.e., contact lenses sold by eye care providers and "brick and mortar" businesses such as Costco and Walmart who sell the very same product provided by online sellers).

According to Defendants, the online market proposed by Plaintiffs is too narrow because the products sold by the online and offline market are identical and, further, that Plaintiffs' "bald allegations" fail to establish "that offline sales do not restrain online prices and that online sellers would profitably impose a small but significant nontransitory price increase [the SSNIP analysis used in the "hypothetical monopolist test" applied by economists]." (Reply Br. of Vision Direct, Inc., Walgreens Boots Alliance, Inc., Walgreen Co., and Luxottica Retail N. Am. **[*17]** Inc. (hereinafter "Vision Direct Reply") at 10, ECF No. 148.) They point out that the "Plaintiffs do not set forth any facts that establish contact lens prices, let along identify the amount online retailers supposedly discount as compared to offline retailers." Accordingly, they argue, the CAC must be dismissed because it "provides no factual basis to infer that online prices would remain below offline prices if online sellers increased their prices." (Id. at 11.)

Typically, determination of the relevant product market is fact-intensive and not suitable for resolution at the motion-to-dismiss stage. "It is well settled that defining the relevant market is an issue of fact." *Telecor Communs., Inc. v. Southwestern Bell Tel. Co., 305 F.3d 1124, 1131 (10th Cir. 2002)*; see also, e.g., *Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("The proper market definition in [an antitrust case] can be determined only after a factual inquiry into the 'commercial realities' faced by consumers.") (quoting *United States v. Grinnell Corp., 384 U.S. 563, 572, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*; *Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 762 F.3d 1114, 1120 (10th Cir. 2014)* (noting that the definition of a relevant product market "involves an issue of fact."); *Todd v. Exxon Corp., 275 F.3d 191, 199-200 (2d Cir. 2001)* ("Because market definition is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant product market.").

In limited circumstances, courts have dismissed complaints for failure to allege a relevant product **[*18]** market. In particular, courts have dismissed antitrust claims when the market definition was, on the face of the complaint, legally inadequate[8] or when the plaintiff made no attempt to allege facts applying the requisite interchangeability test announced in *Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*.[9] But, as discussed below, the CAC does not suffer from either of those inadequacies.

---

[8] See, e.g., *Campfield v. State Farm Mut. Auto. Ins. Co., 532 F.3d 1111, 1118-19 (10th Cir. 2008)* (the alleged product market was "inadequately pled because [the alleged conspiring defendants were] not competitors, and therefore [could not] engage in a per se illegal, horizontal restraint of trade."); *TV Commc'ns Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1025 (10th Cir. 1992)* ("[A] company does not violate the Sherman Act by virtue of the natural monopoly it holds over its own product. Consequently, [the plaintiff] has not alleged a relevant market which [the defendant] is capable of monopolizing in violation of the antitrust laws.") (internal citations omitted); *U.S. Gen., Inc. v. Draper City, No. 2:05-cv-917-TS, 2006 U.S. Dist. LEXIS 41598, 2006 WL 1594184, at *3 (D. Utah June 7, 2006)* (citing TV Commc'ns Network, and dismissing complaint because plaintiff too narrowly defined the relevant product market as a "single [real estate] development on Traverse Mountain.").

[9] See, e.g., *Total Renal Care, Inc. v. Western Nephrology & Metabolic Bone Disease, P.C., No. 08-cv-513-CMA-KMT, 2009 U.S. Dist. LEXIS 80821, 2009 WL 2596493, at *7 (D. Colo. Aug. 21, 2009)* (dismissing complaint because there was only a "cursory mention of a relevant product and geographic market"); *Commercial Data Servers, Inc. v. IBM Corp., 166 F. Supp. 2d 891, 897 (S.D.N.Y. 2001)* (dismissing complaint that failed to allege any facts or explanation supporting the proposed market); *B.V.*

To begin the analysis of the proposed relevant product market, courts focus on "the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Id. at 325*. But while this general test defines the "outer boundaries of a product market," the United States Supreme Court explained that, "within this broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes." *Id. at 324-25*. Then, after considering reasonable interchangeability, courts apply the "hypothetical monopolist test."

Reasonably Interchangeable Products

The first step—reviewing the "reasonable interchangeability" of the product at issue (i.e., whether **[*19]** the product has a reasonably good substitute)—is easily determined here. There is no dispute that the products—the contact lenses—are "functionally interchangeable." Indeed, they are identical. See *FTC v. Staples, Inc., 970 F. Supp. 1066, 1074 (D.D.C. 1997)* (finding functional interchangeability because office supplies sold by online and offline companies were identical).

But that does not end the analysis. "Courts will generally include functionally interchangeable products in the same product market unless factors *other than* use indicate that they are not actually part of the same market." *FTC v. Arch Coal, Inc., 329 F. Supp. 2d 109, 119 (D.D.C. 2004)* (underline emphasis added; italics emphasis in original). Here, Plaintiffs allege "factors other than use," as discussed below, to allege a "submarket" for the online sale of contact lenses.

Hypothetical Monopolist Test and *Brown Shoe* Practical Indicia

At the second step, courts focus on "how far buyers will go to substitute one commodity for another" and "'the responsiveness of the sales of one product to price changes of the other.'" *Staples, 970 F. Supp. at 1074* (citing and quoting *United States v. E. I. Du Pont de Nemours & Co., 351 U.S. 377, 400, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*. The courts determine this "cross-elasticity of demand" using the "SSNIP" analysis (i.e., whether the plaintiff has alleged that a small but significant (i.e., profitable) non-transitory (lasting or permanent) **[*20]** increase in price by the online retailers would not result in a material loss of online customers to the offline retailers).[10]

Courts generally look "to two main types of evidence in defining the relevant product market: the 'practical indicia' set forth by the Supreme Court in Brown Shoe and testimony from experts in the field of economics." *FTC v. Sysco Corp., 113 F. Supp. 3d 1, 27 (D.D.C. 2015)*. But in a complaint, providing economic expert testimony is neither practical nor required (particularly when key data is in the defendants' possession). Accordingly, Plaintiffs necessarily focus on the Brown Shoe indicia to demonstrate that their relevant product market definition is plausible.[11] See, e.g., *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 792 F.2d 210, 218, 253 U.S. App. D.C.*

Optische Industrie De Oude Delft v. Hologic, Inc., 909 F. Supp 162, 171-72 (S.D.N.Y. 1995) ("Because a relevant market includes all products which are reasonably interchangeable, [p]laintiff's failure to define its market by reference to the rule of reasonable interchangeability is, standing alone, valid grounds for dismissal.") (internal citations and quotation marks omitted).

[10] Generally speaking, if cross-elasticity of demand is low, the products are not substitutes and do not compete in the same market. *Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 762 F.3d 1114, 1120 (10th Cir. 2014)* ("A relevant product market excludes products with low or zero cross-elasticity of demand.").

[11] Defendants fault the Plaintiffs' reliance on the Brown Shoe indicia. "Unable to provide any factual allegations that support a traditional economic analysis, Plaintiffs turn to the Brown Shoe 'practical indicia.' But merely ticking off a handful of Brown Shoe factors is meaningless if those factors have no bearing on consumers' likely response to an increase in price." (Vision Direct Reply at 11 (internal citation omitted).) Significantly, the two cases Defendants cite to support their statement are, at a minimum, procedurally distinguishable because the courts were reviewing motions for summary judgment. See *Reifert v. S. Cent. Wis. MLS Corp., 450 F.3d 312, 320 (7th Cir. 2006)* (holding that although Brown Shoe indicia were "important considerations, . . . they were never intended to exclude economic analysis altogether" and granting summary judgment because plaintiff provided

142 (D.C. Cir. 1986) (identifying Brown Shoe indicia as "evidentiary proxies" for proof of low cross-elasticity); Sysco Corp., 113 F. Supp. 3d at 27 (same).

The Brown Shoe indicia include "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." Brown Shoe, 370 U.S. at 325. Applying those indicia, Plaintiffs assert that "[o]nline markets for consumer goods have long been considered to require **[*21]** unique pricing, sales models, strategies, advertising methods, and distribution channels." (Opp'n at 20.)

Plaintiffs allege that retailers of optical products recognize the online market as a separate economic entity. Given that "economic actors usually have accurate perceptions of economic realities,"[12] Plaintiffs' allegations suggest a distinct online market. According to the CAC, the relevant economic actors (1-800 and the other defendants) view their primary competition as online retailers. (CAC ¶ 44 (alleging that Defendants focus primarily on their online-retailer competition when setting price and developing customer-service offerings).) And online retailers tailor their advertisements to the online customer, relying "heavily on search engine advertising" and competing for search-engine advertising space. (Id. ¶ 45.)

Pricing and customer service offerings are tailored as well. Online prices are materially lower than the offline retailer prices. (Id. ¶¶ 42-43.) Furthermore, "[o]nline retailers' ability to offer a unique combination of selection, depth and breadth of inventory and delivery speed" distinguishes them from offline retailers and appeals to online customers. (Opp'n at **[*22]** 22.) Plaintiffs describe the online retailers as specialized vendors who "are able to sell contact lenses anywhere in the United States that receives mail. . . . [and can] provide consumers the convenience of being able to order contacts from any location without having to find a brick-and-mortar store selling the type of contact lenses covered by their prescription." (CAC ¶ 41.) Additionally, Plaintiffs allege that offline retailers are not able to carry the extensive inventory offered by online retailers: "Online retailers frequently maintain a large volume of inventory across various manufacturers and brands, a fulfillment center, a customer service center, and a scale of operations to develop new customer retention tools. This allows online retailers to fulfill and ship prescriptions rapidly, unlike many brick-and-mortar retailers." (Id. ¶ 42.)

As for price sensitivity, Plaintiffs allege that "[o]line sellers of contact lenses could impose a small but significant and non-transitory increase in price without losing so many sales to brick-and-mortar stores to make the price increase not profitable." (Id. ¶ 40.) Although this is simply a recitation of the economic SSNIP test, the court **[*23]** may not expect anything more from Plaintiffs short of an economic analysis, which is not suitable in a complaint.

To supplement their allegations, Plaintiffs point to similar cases. In those situations, courts defined the relevant product market as a subset of competitors (i.e., specialized vendors) who, like the broader group of competitors, sold the very same product.

In FTC v. Staples, Inc., 970 F. Supp. 1066 (D.D.C. 1997), the FTC challenged the proposed merger of office superstores Staples and Office Depot. There, the defendants argued that the market consisted of all retailers of office supplies (i.e., office superstores as well as "non-superstore alternatives such as Wal-Mart, Best Buy, Quill, or Viking"). Id. at 1074. The court disagreed. Although the court noted that "the products in question [i.e., office supplies] are undeniably the same no matter who sells them," it held that the "sale of consumable office supplies through office superstores" was the relevant product market. Id. at 1080. "[T]he mere fact that a firm may be termed a competitor in the overall marketplace does not necessarily require that it be included in the relevant product market for antitrust purposes." Id. at 1075. And although distinct pricing was a significant factor in the court's decision **[*24]** (something the court was able to determine after an evidentiary hearing filled with data and expert analyses), the court found other distinguishing factors significant as well. After comparing the different types of retail

no expert analysis); Ky. Speedway, LLC v. NASCAR, Inc., 588 F.3d 908, 919 (6th Cir. 2009) (granting summary judgment because plaintiff provided no expert testimony to define the relevant market). Defendants essentially ask the court to apply the more stringent summary-judgment standard to their motion to dismiss.

[12] ***FTC v. Whole Foods Market, Inc., 548 F.3d 1028, 1048 (D.C. Cir. 2008)***.

formats, the court found that the "high volume, discount office supply chain stores "are, in fact, very different in appearance, physical size, format, the number and variety of SKU's offered [over 5,000 SKU's], and the type of customers targeted and served . . . ." *Id. at 1078*. The court further noted that although "Staples and Office Depot do not ignore sellers such as warehouse clubs, Best Buy, or Wal-Mart, the evidence clearly shows that Staples and Office Depot each consider the other superstores as the primary competition." *Id. at 1079-80*. Here, Plaintiffs' allegations track the decisive factors in *Staples.*

The decision in *FTC v. Whole Foods Market, Inc., 548 F.3d 1028 (D.C. Cir. 2008)*, provides another good example. There, the FTC challenged a proposed merger between Whole Food and Wild Oats, which the court termed "premium, natural, and organic supermarkets" (PNOs). *Id. at 1032*. The court agreed with the FTC that the PNOs made up a submarket. Although the PNOs sold some of the same products that supermarkets sold, the court differentiated them by their **[*25]** intangible "non-product oriented" characteristics such as "higher levels of customer service" and a "'unique environment'" with "a particular focus on the 'core values' [their] customers espoused." *Id. at 1039*. These "factors other than use"[13] placed the PNOs in a submarket for antitrust purposes. As the FTC did in Whole Foods, Plaintiffs distinguish the online retail market by "factors other than use."

Finally, in *FTC v. Cardinal Health, Inc., 12 F. Supp. 2d 34 (D.D.C. 1998)*, the court defined the relevant product market as the wholesale prescription drug industry, despite the fact that the wholesalers sold the same product (prescription drugs) that their competitors (e.g., drug manufacturers, or mail-order companies) sold. The Cardinal Health court focused not on the product (the prescription drugs) but on the services offered to consumers of that product. After asking the question whether "enough customers view other forms of prescription drug delivery methods as acceptable substitutes to the services provided by the [wholesale drug market]," *id. at 46*, the court found no reasonable substitutes for the products and services provided by the wholesale drug industry. According to the court, the industry offered "a 'unique cluster of products and services'" that "comprise[d] **[*26]** a distinct submarket within the larger market of drug delivery." *Id. at 46-47*. Those products and services gave customers "an efficient way to obtain prescription drugs through centralized warehousing, delivery, and billing services[.]" *Id. at 47*.

Here, as was done in *Staples, Whole Foods*, and *Cardinal Health*, Plaintiffs emphasize service-oriented characteristics of online contact lens retailers, the preference of their customers for those services, and the distinct "infrastructure" of the online retailers' business. Referring to online contact lens retailers as "specialized vendors," Plaintiffs assert that "[c]ustomers who shop online prefer the convenience of online shopping, home delivery and low prices. Online retailers' ability to offer a unique combination of selection, depth and breadth of inventory, and delivery speed appeals to these customers." (Opp'n at 22-23 (citing CAC ¶¶ 41-42); see also CAC ¶ 43 ("Pricing for contact lenses sold online typically falls below pricing for contacts sold by eye care professionals.").)

Given the market characteristics set forth in the CAC and the precedent for distinct submarkets of competitors selling identical products, Plaintiffs have plausibly alleged that the **[*27]** relevant product market is the online retail market for contact lenses. In other words, Plaintiffs allege a "theoretically rational explanation" for their market definition. *Commercial Data Servers, Inc. v. IBM Corp., 166 F. Supp. 2d 891, 896 (S.D.N.Y. 2001)*. That is sufficient to avoid dismissal.

CONSPIRACY

Defendants contend that Plaintiffs have not alleged an overarching conspiracy which, they say, is a necessary element of a Sherman Act *§ 1* claim. *Section 1* declares that "[e]very contract, combination . . . or conspiracy, in restraint of trade or commerce" is illegal. *15 U.S.C. § 1*. A "conspiracy" is only one of three types of concerted

[13] *FTC v. Arch Coal, Inc., 329 F. Supp. 2d 109, 119 (D.D.C. 2004)*.

actions targeted by the Act.[14] A "contract" in restraint of trade is another. No allegation of an "overarching" conspiracy is necessary.

Here, Plaintiffs allege contracts in restraint of trade. They challenge "a series of bilateral agreements [between 1-800 and] other online sellers of contact lenses . . . ." (Opp'n at 27.) Because Plaintiffs' theory focuses on a series of bilateral horizontal agreements,[15] not an overarching conspiracy, the CAC must allege that each agreement, standing alone, unreasonably restrains trade. The CAC accomplishes that.

According to the CAC, the parties to each contract agreed to terms designed to restrict each other's advertising **[*28]** efforts: "These agreements prohibit the parties from bidding against each other in certain search advertising auctions, and obligate the parties to implement certain negative keywords — thereby precluding certain competitive, truthful, and relevant online advertisement." (CAC ¶ 58; see also, e.g., id. ¶¶ 61, 63, 68, 70, 72.) Plaintiffs then allege that "[e]ach Defendant benefitted from the agreements 1-800 Contacts entered into with other Agreeing Contact Lens Sellers by, among other things, allowing Defendants to charge supracompetitive prices to the detriment of consumers" and depriving Plaintiffs "of truthful information about competing sellers of contact lenses online." (Id. ¶¶ 59, 73.) And, finally, Plaintiffs allege the anticompetitive effects of these agreements. (See, e.g., id. ¶¶ 74-75.)

Contrary to the Defendants' contention, the CAC does allege that each individual agreement causes anticompetitive effects. That satisfies the concerted action requirement.

STATUTE OF LIMITATIONS

A four-year statute of limitations applies to Plaintiffs' claims. *15 U.S.C. § 15b*. Under that statute, Plaintiffs' claims would be limited to purchases made after October 13, 2012 (i.e., four years before the Plaintiffs **[*29]** filed this action on October 13, 2016). But Plaintiffs contend they were on notice of their claims no earlier than August 8, 2016, when the FTC filed its administrative action against 1-800. In other words, they avoid Defendants' statute-of-limitations defense by relying on two tolling exceptions, which would extend recovery of damages as far back as January 1, 2004: (1) equitable tolling under the fraudulent concealment rule, and (2) statutory provision tolling linked to the FTC's administrative action.

A. Tolling based on Fraudulent Concealment

According to the CAC, Defendants' violations of the Sherman Act (and Plaintiffs' subsequent injuries) began in January 2004, at which point the statute of limitations began to run.[16] But Plaintiffs say the statute of limitations was tolled because Defendants concealed the information that gave rise to the antitrust claims "by inserting mandatory, contractual, non-disclosure provisions in the relevant agreements." (Opp'n at 30 (citing CAC ¶ 80).)

---

[14] "By its language, *section 1* of the Sherman Act applies to three different types of conduct: contract, combination, or conspiracy. These terms have been interpreted generally to cover concerted action, or agreement by parties to act together." *James R. Snyder Co., Inc. v. Associated Gen. Contractors of Am., Detroit Chapter, Inc., 677 F.2d 1111, 1121 (6th Cir. 1982)*.

[15] "[A]greements between companies that directly compete with one another [are] called 'horizontal' agreements.'" *In re: Disposable Contact Lens Antitrust, 215 F. Supp. 3d 1272, 1287 (M.D. Fla. 2016)*.

[16] See *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* ("Generally, a cause of action [under the federal antitrust acts] accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business."); *In re: Animation Workers Antitrust Litig., 87 F. Supp. 3d 1195, 1209-10 (N.D. Cal. 2015)* (antitrust claims begin to accrue (and the statute begins to run) when the injury occurs, not when plaintiffs should have discovered their injuries) (citing cases, including *Robert L. Kroenlein Trust ex rel. Alden v. Kirchhefer, 764 F.3d 1268, 1275-76 (10th Cir. 2014))*.

Under this equitable tolling doctrine, Plaintiffs must plead that Defendants used fraudulent means to successfully conceal relevant information from consumers, and that Plaintiffs did not know or through **[*30]** the exercise of due diligence could not have known that they might have a cause of action. *King & King Enters. v. Champlin Petroleum, 657 F.2d 1147, 1154 (10th Cir. 1981)*. Because this tolling rule is fraud-based, the *Rule 9(b)* pleading standard applies. *In re: Nine W. Shoes Antitrust Litig., 80 F. Supp. 2d 181, 192 (S.D.N.Y. 2000)*. "At a minimum, *Rule 9(b)* requires that a plaintiff set forth the 'who, what, when, where and how' of the alleged fraud.'" *US ex rel. Sikkanga v. Regence Bluecross Blueshield of Utah, 472 F.3d 702, 727 (10th Cir. 2006)* (internal citations and quotation marks omitted).

The question of whether the claims were fraudulently concealed is typically factual and not amenable to resolution on a motion to dismiss.

> As many courts have noted in the antitrust conspiracy context, it is generally inappropriate to resolve the fact-intensive allegations of fraudulent concealment at the motion to dismiss stage, particularly where the proof relating to the extent of the fraudulent concealment is alleged to be largely in the hands of the alleged conspirators.

In re: Rubber Chems. Antitrust Litig., 504 F. Supp. 2d at 789; see also *In re Mercedes-Benz Antitrust Litig., 157 F. Supp. 2d 355, 373 (D.N.J. 2001)* ("any serious consideration of [reasonable diligence in a fraudulent concealment analysis] would take the Court well outside the boundaries of pleading").

1. Fraudulent Means

"[A]ny affirmative act of concealment, including those involved in the underlying violation, is sufficient" to satisfy the first element. *SEC v. Kovzan, 807 F. Supp. 2d 1024, 1035 (D. Kan. 2011)*. To support this element, Plaintiffs allege that

> [a]t various times **[*31]** between 2004 and 2013, 1-800 Contacts and the other Agreeing Contact Lens Sellers entered into a series of non-public, bilateral, written agreements under which each party to the particular agreement committed to cease using or to refrain from using certain keywords for online advertising. These ongoing agreements were all kept secret from consumers, with their secrecy enforced by non-disclosure provisions in the agreements.

(CAC ¶ 12.)

Plaintiffs assert that Defendants' non-disclosure provisions are affirmative acts to conceal the true nature and anti-competitive effect of the settlement agreements. In the CAC, they quote specific nondisclosure provisions in the Defendants' settlement agreements. (See Opp'n at 30-31 (quoting CAC ¶¶ 66-72).) Then they add the allegation that 1-800 "entered into 'substantially, similar written agreements'" with other non-parties. (Id. at 31 (citing CAC ¶ 56 (listing contracting parties and dates of agreements).)

1-800 and Vision Direct entered into two settlement agreements, one in 2004 and one in 2009, and both contain non-disclosure language. The 2004 Agreement contained the following limitation on disclosure:

> The Parties will mutually agree on press releases **[*32]** and/or public statements regarding this Agreement ("the mutually agreed PR"). Neither Party will deviate from the mutually agreed PR without the prior written consent of the other Party, which consent will not be unreasonably withheld.

(CAC ¶ 66.) The second agreement between 1-800 and Vision Direct, dated 2009, contains a similar non-disclosure provision:

> In the event that any Party wishes to issue a press release regarding this Settlement Agreement, then the Parties will jointly agree on the language of such press release.

(May 2009 Agreement ¶ 20, ECF No. 117-2 (attached to Vision Direct's Request for Judicial Notice, ECF No. 117).)

Following the settlements between 1-800 and Vision Direct, 1-800 entered into a settlement agreement with AC Lens. In that March 2010 Agreement, the parties agreed

> to generally keep this Agreement confidential. The parties will mutually agree on any press releases and/or public statements regarding this Agreement ("the mutually agreed PR"). Neither Party will deviate from the mutually agreed PR without the prior written consent of the other Party, which consent will not be unreasonably withheld.

(CAC ¶ 71.)

And the June 2010 Agreement between 1-800 and Walgreens **[*33]** contains a complete bar:

> NONDISCLOSURE: The terms of this Agreement and the Agreement itself shall be held in confidence and not disclosed by any Party to any third party or any other person or entity without the prior express written consent of the other Party. . . . The Parties agree to provide prompt written notice of any request, demand, subpoena, Order, or any other thing that might require disclosure of the Agreement or any of its terms, such that the other Party shall have as much time as possible to object to or attempt to prevent such disclosure. The Parties shall make no public statements regarding the Agreement or any of its terms. If asked by the media about this Lawsuit, the Parties shall only state that: "The matter has been resolved to the satisfaction of both parties."

(CAC ¶ 69.)

Defendants respond that a non-disclosure agreement is a standard term in settlement agreements and is not an affirmative act to conceal. But the non-disclosure provisions give Defendants a tremendous amount of discretion. The standard for disclosure is "reasonableness" as the parties choose to define it. (And the agreement between 1-800 and Walgreens provides little, if any, room to disclose **[*34]** any information.) What may constitute unreasonably-withheld consent is driven by factors unknown to the Plaintiffs, including motivations for including the non-disclosure provisions in the agreements. Such information is uniquely in the hands of Defendants.

Given that Plaintiffs have alleged agreements to engage in anti-competitive conduct, it is reasonable to infer that a provision requiring the contracting parties to keep the terms of that allegedly anti-competitive agreement private was an affirmative act to conceal. At this stage in the litigation, allegations identifying and quoting the nondisclosure provisions, listing names of the parties to the agreements, and providing dates of those agreements, satisfy the *Rule 9(b)* pleading standard and establish the first element of fraudulent concealment.

2. Successful Concealment

Plaintiffs have satisfied this element as well. They allege they did not have actual knowledge of the settlement agreements, much less the anti-competitive nature and financial harm to consumers such as themselves. And, they assert, as a result of the agreements' nondisclosure provisions, they "were prevented from learning of the facts needed to commence suit against Defendants." **[*35]** (CAC ¶ 80.)

3. Inquiry Notice and Due Diligence Element

Defendants contend that even if Plaintiffs did not have actual knowledge, they are not entitled to tolling because they had constructive knowledge of their potential claims when the settlement agreements or the material terms of those agreements were publicly disclosed. In other words, "Defendants' public disclosures of a number of the agreements in court and SEC filings, as well as other documents in the public record disclosing the facts Plaintiffs now rely upon in their CAC, put Plaintiffs on inquiry notice of their claims." (1-800 Mot. at 15.) Defendants also emphasize the antitrust complaint filed by Lens.com against 1-800 in June 2011.[17] All of that information, they say,

---

[17] It appears that a fair amount of the Plaintiffs' complaint is drawn from (or at least tracks) the allegations in the Lens.com complaint, but that case has a significant distinguishing characteristic: it alleges unilateral action by 1-800 and does not name any other parties. At most, Lens.com alleged that "various other persons, firms and corporations, not named as defendants herein and presently unknown to Lens, have participated as co-conspirators with 1-800 . . . ." (Lens.com Compl. ¶ 7, attached as Ex. 21 to Decl. of Ashley D. Kaplan, ECF No. 119.)

would have been adequate to raise Plaintiffs' suspicions about their injuries and prompt a duty to exercise reasonable diligence to uncover their claims.

Plaintiffs respond that even though the settlement agreements or some terms were disclosed in some public settings, including unsealed lawsuits, that did not amount to constructive knowledge because the information was not reasonably accessible to them as consumers, and, even if known, the content would not **[*36]** allow an average consumer to make the analytical leap that he may have paid artificially inflated prices for contact lenses.

Publicly available documents may be sufficient to charge a plaintiff with constructive knowledge. For example, in cases alleging securities fraud, investors had reason to track the companies in which they invested. See, e.g., *Sterlin v. Biomune Sys., 154 F.3d 1191, 1201, 1203 (10th Cir. 1998)* (holding that news article in widely-read investor publication triggered investor's duty to exercise reasonable diligence); *Stichting Pensioenfonds ABP v. Countrywide Fin. Corp., 802 F. Supp. 2d 1125, 1139 (C.D. Cal. 2011)* (press reports and earlier-filed lawsuits placed investor on notice because "all the facts had been widely-reported"); *Salinger v. Projectavision, Inc., 934 F. Supp. 1402, 1408 (S.D.N.Y. 1996)* (in securities fraud case, SEC filings and press releases put investors on inquiry notice of the probability of fraud). But see *Staehr v. Hartford Fin. Servs. Grp., Inc., 547 F.3d 406, 412, 416, 427 (2nd Cir. 2009)* (holding that mainstream press reports, industry newsletters, regulatory filings, and multiple lawsuits did not provide "reasonable investor[s] of ordinary intelligence" with sufficient "storm warnings" of the probability of securities fraud by insurance company because the information was too vague and most of the publicly available information "was not reasonably accessible to the ordinary investor.").

Other cases cited by Defendants are distinguishable on their facts. **[*37]** For instance, the plaintiffs were organizations, significant material facts were revealed, or the information was widely disseminated through press releases, news reports, and multiple complaints. Here, Plaintiffs are individual consumers who had no reason to know about (much less understand) the antitrust implications of the settlement agreements or the disclosed terms. It would be unreasonable to expect a person making one, or even a few, discrete purchases online to research the legal actions and securities regulations involving that retailer, much less apply a complex economic analysis to determine that the prices he paid for their product were artificially inflated. "[O]nly by operation of a legal fiction could the filing of a private lawsuit by an unrelated party in a different vicinage put consumers on notice as a matter of law that [an antitrust] conspiracy was afoot." *In re: Mercedes-Benz Anti-Trust Litig., 157 F. Supp. 2d at 373-74* (a third party's earlier lawsuit did not place car purchasers on constructive notice of antitrust claim, which only became clear when details of alleged price-fixing conspiracy were outlined in *New York Times* article); see also *In re: Nine W. Shoes Antitrust Litig., 80 F. Supp. 2d at 193* (shoe purchasers did not have constructive notice of antitrust claims until national **[*38]** media reported the alleged antitrust conspiracy).

The information provided by Defendants does not convince the court that Plaintiffs would have had ready access to the information, much less any reasonable basis to begin investigating their antitrust claims. Consequently, the Plaintiffs satisfy the final prong of the fraudulent concealment rule.

B. Tolling based on the FTC Action

According to Plaintiffs, the first indication that they paid artificially inflated prices appeared in the FTC's administrative complaint in August 2016. (See Opp'n at 30 ("[A] reasonably diligent investigation would not have led to the discovery of defendants' anticompetitive conduct until the FTC, which had the benefit of pre-complaint discovery, filed its [complaint against 1-800].").) But at that point, the statute was independently tolled by *15 U.S.C. § 16(i)*, as discussed below.

The *Clayton Act* tolls the statute of limitations for private antitrust actions, such as the one brought by Plaintiffs, while a government action is pending and for one year after "any civil or criminal proceeding . . . instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws," provided that the private **[*39]** action is "based in whole or in part on any matter complained of" in the government action. *15 U.S.C. § 16(i)* (emphasis added). Plaintiffs contend that, by operation of that provision, the statute of limitations was tolled when the FTC filed its complaint against 1-800.

Defendants respond that the tolling provision does not apply because "[t]he FTC administrative action was not brought 'to prevent, restrain, or punish violations of any of the antitrust laws. Rather, it was brought under *Section 5 of the FTC Act, 15 U.S.C. § 45*." (1-800 Motion at 11.) Although it is true that the FTC filed its action against 1-800 under *§ 5*, it did so to enforce Sherman Act *§ 1*. Defendants' strained interpretation of *§ 16(i)* is not supported by the statutory language or case law. See *Luria Steel & Trading Corp. v. Ogden Corp., 484 F.2d 1016, 1022 (3d Cir. 1973)* (holding that FTC proceedings under *§ 5* tolled statute of limitations for a private cause of action under Sherman Act *§ 1*); *Rader v. Balfour, 440 F.2d 469, 473 (7th Cir. 1971)* (same); *In re Antibiotic Antitrust Actions, 333 F. Supp. 317, 319-20 (S.D.N.Y. 1971)* (same); see also *In re: Nexium (Esomeprazole) Antitrust Litig., 842 F.3d 34, 60 (1st Cir. 2016)* (citing *FTC Act § 5(a)(2)*, the court said "the FTC is empowered to directly enforce the substantive antitrust laws."); *Realcomp II, Ltd. v. FTC, 635 F.3d 815, 824 (6th Cir. 2011)* (applying Sherman Act cases to determine whether the defendant's actions violated *§ 5 of the FTC Act*).

Given the above, the court holds that Plaintiffs are entitled to rely on the statutory tolling provision.

ORDER

For the foregoing reasons, the court DENIES Defendants **[*40]** Vision Direct, Inc., Walgreens Boots Alliance, Inc., Walgreen Co., and Luxottica Retail North America Inc.'s Motion to Dismiss Plaintiffs' Consolidated Amended Complaint (ECF No. 116) and 1-800 Contacts' Motion to Dismiss Plaintiffs' Consolidated Amended Complaint (ECF No. 118).

DATED this 17th day of May, 2018.

BY THE COURT:

/s/ Tena Campbell

Judges: JUDITH E. LEVY, United States District Judge. Magistrate Judge David R. Grand.

Opinion by: JUDITH E. LEVY

Opinion

FINAL JUDGMENT

WHEREAS, Plaintiffs, the United States of America and the State of Michigan, filed their joint Complaint on June 25, 2015, alleging that W.A. Foote Memorial Hospital, d/b/a/ Allegiance Health; Hillsdale Community Health Center; Community Health Center of Branch County; and ProMedica Health System, Inc. violated *Section 1 of the Sherman Act, 15 U.S.C. § 1*, and *Section 2 of the Michigan Antitrust Reform Act, MCL 445.772*;

AND WHEREAS, Plaintiffs **[*2]** and W.A. Foote Memorial Hospital, d/b/a Henry Ford Allegiance Health, by their respective attorneys, have consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law;

AND WHEREAS, Plaintiffs require Allegiance to agree to undertake certain actions and refrain from certain conduct for the purpose of remedying the anticompetitive effects alleged in the Complaint;

AND WHEREAS, Plaintiffs require Allegiance to agree to be bound by the provisions of the Final Judgment pending its approval by the Court;

NOW THEREFORE, before any testimony is taken, without this Final Judgment constituting any evidence against or admission by Allegiance regarding any issue of fact or law, and upon consent of the parties to this action, it is ORDERED, ADJUDGED, AND DECREED:

I. JURISDICTION

This Court has jurisdiction over the subject matter of and each of the parties to this action. *28 U.S.C. §§ 1331*, *1337(a)*, *1345*, *1367(a)*. The Complaint states a claim upon which relief may be granted against Allegiance under *Section 1 of the Sherman Act, 15 U.S.C. § 1*, and *Section 2 of the Michigan Antitrust Reform Act, MCL 445.772*.

II. DEFINITIONS

As used in this Final Judgment:

A. "Allegiance" means Defendant W.A. Foote Memorial Hospital, d/b/a Henry Ford Allegiance **[*3]** Health, a corporation organized and existing under the laws of the State of Michigan and affiliated with the Henry Ford Health System with headquarters in Detroit, Michigan, (i) its successors and assigns, (ii) all subsidiaries, divisions, groups, affiliates, partnerships, and joint ventures that are controlled by Henry Ford Allegiance Health, and (iii) their directors, officers, managers, agents, and employees.

B. "Agreement" means any contract, arrangement, or understanding, formal or informal, oral or written, between two or more persons.

C. "Communicate" means to discuss, disclose, transfer, disseminate, or exchange information or opinion, formally or informally, directly or indirectly, in any manner.

D. "Communication" means any discussion, disclosure, transfer, dissemination, or exchange of information or opinion.

E. "Joint Provision of Services" means any past, present, or future coordinated delivery of any healthcare services by two or more healthcare providers, including a clinical affiliation, joint venture, management agreement, accountable care organization, clinically integrated network, group purchasing organization, management services organization, or physician hospital **[*4]** organization.

F. "Marketing" means any past, present, or future activities that are involved in making persons aware of the services or products of the hospital or of physicians employed or with privileges at the hospital, including advertising, communications, public relations, provider network development, outreach to employers or physicians, and promotions, such as free health screenings and education.

G. "Marketing Manager" means any company officer or employee at the level of director, or above, with responsibility for or oversight of Marketing.

H. "Person" means any natural person, corporation, firm, company, sole proprietorship, partnership, joint venture, association, institute, governmental unit, or other legal entity.

I. "Provider" means any physician or physician group and any inpatient or outpatient medical facility including hospitals, ambulatory surgical centers, urgent care facilities, and nursing facilities.

III. APPLICABILITY

This Final Judgment applies to Allegiance and all other persons in active concert or participation with Allegiance who receive actual notice of this Final Judgment by personal service or otherwise.

IV. PROHIBITED CONDUCT

A. Allegiance shall not enter **[*5]** into, attempt to enter into, maintain, or enforce any Agreement with any other Provider that:

(1) prohibits or limits Marketing; or

(2) allocates any service, customer, or geographic market or territory between or among Allegiance and any other Provider, unless such Agreement is reasonably necessary for and ancillary to a bona fide Agreement providing for the Joint Provision of Services.

B. Allegiance shall not Communicate with any other Provider about Allegiance's Marketing in its or the Provider's county, except Allegiance may:

(1) Communicate with any Provider about joint Marketing if the Communication is related to the Joint Provision of Services;

(2) Communicate with any Provider about Marketing if the Communication is part of customary due diligence relating to a merger, acquisition, joint venture, investment, or divestiture; or

(3) Market to Providers, including through its physician liaison program.

C. Allegiance shall not exclude or eliminate Hillsdale County from its Marketing or business development opportunities.

V. REQUIRED CONDUCT

A. Within thirty days of entry of this Final Judgment, Allegiance shall hire and appoint an Antitrust Compliance Officer. The Antitrust Compliance Officer **[*6]** may be a current employee of Henry Ford and must be approved by Plaintiffs.

B. Antitrust Compliance Officer shall:

(1) within sixty days of entry of the Final Judgment, furnish a copy of this Final Judgment, the Competitive Impact Statement, and a cover letter that is identical in content to Exhibit 1 to (a) all of Allegiance's Marketing Managers and other employees engaged, in whole or in part, in activities relating to Allegiance's Marketing or business development activities; (b) all direct reports of Allegiance's CEO; and (c) Allegiance's officers and directors (including their Boards of Directors);

(2) within thirty days of any person's succession to any position described in Section V.B.(1) above, furnish a copy of this Final Judgment, the Competitive Impact Statement, and a cover letter that is identical in content to Exhibit 1;

(3) annually brief each person designated in Section V.B.(1) and (2) on the meaning and requirements of this Final Judgment and the antitrust laws;

(4) obtain from each person designated in Section V.B.(1) and (2), within sixty days of that person's receipt of the Final Judgment, a certification that he or she (i) has read and, to the best of his or her ability, **[*7]** understands and agrees to abide by the terms of this Final Judgment; (ii) is not aware of any violation of the Final Judgment that has not already been reported to Allegiance; and (iii) understands that any person's failure to comply with this Final Judgment may result in an enforcement action for civil or criminal contempt of court against Allegiance and/or any person who violates this Final Judgment;

(5) maintain a record of certifications received pursuant to Section V.B.(4);

(6) annually communicate to Allegiance's employees that they may disclose to the Antitrust Compliance Officer, without reprisal, information concerning any potential violation of this Final Judgment or the antitrust laws;

(7) ensure that each person identified in Section V.B.(1) and (2) of this Final Judgment receives at least four hours of training annually on the meaning and requirements of this Final Judgment and the antitrust laws, such training to be delivered by the Antitrust Compliance Officer or an attorney with relevant experience in the field of ***antitrust law***; and

(8) maintain a log of telephonic, electronic, in-person, and other communications regarding Marketing with any Officers or Directors of any **[*8]** healthcare system Provider and make it available to Plaintiffs for inspection upon either Plaintiff's request.

(9) provide to Plaintiffs annually, on or before the anniversary of the effective date of this order, a written statement affirming Allegiance's compliance with Section V of this order, and including the training or instructional materials used or supplied by Allegiance or Henry Ford in connection with the training as required by Section V.B.(7).

C. Allegiance shall:

(1) upon learning of any violation or potential violation of any of the terms and conditions contained in this Final Judgment, promptly take appropriate action to terminate or modify the activity so as to comply with this Final Judgment and maintain all documents related to any violation or potential violation of this Final Judgment;

(2) upon learning of any violation or potential violation of any of the terms and conditions contained in this Final Judgment, within thirty days of its becoming known, file with each Plaintiff a statement describing any violation or potential violation, and any steps taken in response to the violation, which statement shall include a description of any communication constituting the **[*9]** violation or potential violation, including the date and place of the communication, the persons involved, and the subject matter of the communication; and

(3) certify to each Plaintiff annually on the anniversary date of the entry of this Final Judgment that Allegiance has complied with the provisions of this Final Judgment.

VI. COMPLIANCE INSPECTION

A. For the purposes of determining or securing compliance with this Final Judgment, or of determining whether the Final Judgment should be modified or vacated, and subject to any legally recognized privilege, from time to time authorized representatives of the United States Department of Justice or the Office of the Michigan Attorney General, including consultants and other retained persons, shall, upon the written request of an authorized representative of the Assistant Attorney General in charge of the Antitrust Division or of the Office of the Michigan Attorney General, and on reasonable notice to Allegiance, be permitted:

(1) access during Allegiance's office hours to inspect and copy, or at the option of the United States or the State of Michigan, to require Allegiance to provide hard copy or electronic copies of, all books, ledgers, **[*10]** accounts, records, data, and documents in the possession, custody, or control of Allegiance, relating to any matters contained in this Final Judgment; and

(2) to interview, either informally or on the record, Allegiance's officers, directors, employees, or agents, who may have individual counsel present, regarding such matters. The interviews shall be subject to the reasonable convenience of the interviewee and without restraint or interference by Allegiance.

B. Upon the written request of an authorized representative of the Assistant Attorney General in charge of the Antitrust Division or of the Office of the Michigan Attorney General, Allegiance shall submit written reports or response to written interrogatories, under oath if requested, relating to any of the matters contained in this Final Judgment as may be requested.

C. No information or documents obtained by the means provided in this section shall be divulged by the United States or the State of Michigan to any person other than an authorized representative of the executive branch of the United States or the State of Michigan, except in the course of legal proceedings to which the United States or the State of Michigan is a party **[*11]** (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

D. If at the time information or documents are furnished by Allegiance to the United States or the State of Michigan, Allegiance represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under *Rule 26(c)(1)(G) of the Federal Rules of Civil Procedure*, and Allegiance marks each pertinent page of such material, "Subject to claim of protection under *Rule 26(c)(1)(G) of the Federal Rules of Civil Procedure*," then the United States and the State of Michigan shall give Allegiance ten calendar days notice prior to divulging such material in any legal proceeding (other than a grand jury proceeding).

VII. INVESTIGATION FEES AND COSTS

Allegiance shall pay to the United States the sum of $5,000.00 for pre-trial litigation costs and the State of Michigan the sum of $35,000.00 to partially cover transcripts and related litigation costs.

VIII. RETENTION OF JURISDICTION

This Court retains jurisdiction to enable any party to this Final Judgment to apply to this Court at any time prior to the expiration of this Final Judgment for further orders and directions as may be necessary or appropriate to carry out **[*12]** or construe this Final Judgment, to modify any of its provisions, to enforce compliance, and to punish violations of its provisions.

IX. ENFORCEMENT OF FINAL JUDGMENT

A. Plaintiffs retain and reserve all rights to enforce the provisions of this Final Judgment, including their right to seek an order of contempt from this Court. Allegiance agrees that in any civil contempt action, any motion to show cause, or any similar action brought by Plaintiffs regarding an alleged violation of this Final Judgment, Plaintiffs may establish a violation of the Final Judgment and the appropriateness of any remedy therefor by a preponderance of the evidence, and Allegiance waives any argument that a different standard of proof should apply.

B. In any enforcement proceeding in which the Court finds that Allegiance has violated this Final Judgment, Plaintiffs may apply for a one-time extension of this Final Judgment, together with such other relief as may be appropriate. Allegiance agrees to reimburse the Plaintiffs for any attorneys' fees, experts' fees, and costs incurred in connection with any effort to enforce this Final Judgment.

X. EXPIRATION OF FINAL JUDGMENT

Unless this Court grants an extension, this **[*13]** Final Judgment shall expire five years from the date of its entry.

XI. NOTICE

For purposes of this Final Judgment, any notice or other communication required to be filed with or provided to the United States or the State of Michigan shall be sent to the persons at the addresses set forth below (or such other address as the United States or the State of Michigan may specify in writing to Allegiance):

Chief
Healthcare & Consumer Products Section

U.S. Department of Justice
Antitrust Division
450 Fifth Street, Suite 4100
Washington, DC 20530
Division Chief
Corporate Oversight Division
Michigan Department of Attorney General
525 West Ottawa Street
P.O. Box 30755
Lansing, MI 48909

XII. PUBLIC INTEREST DETERMINATION

The parties, as required, have complied with the procedures of the Antitrust Procedures and Penalties Act, *15 U.S.C. § 16*, including making copies available to the public of this Final Judgment, the Competitive Impact Statement, and any comments thereon, and the United States' responses to comments. Based upon the record before the Court, which includes the Competitive Impact Statement and any comments and response to comments filed with the Court, entry of this Final Judgment is in the public interest.

Dated: **[*14]** May 21, 2018

Ann Arbor, MI

/s/ Judith E. Levy

JUDITH E. LEVY

United States District Judge

Exhibit 1

[Letterhead of Allegiance]

[Name and Address of Antitrust Compliance Officer]

Dear [XX]:

I am providing you this notice to make sure you are aware of a court order recently entered by the Honorable Judith E. Levy, a federal judge in Ann Arbor, Michigan. This court order applies to our institution and all of its employees, including you, so it is important that you understand the obligations it imposes on us. Ms. Georgia Fojtasek has asked me to let each of you know that they expect you to take these obligations seriously and abide by them.

In a nutshell, the order prohibits us from agreeing with other healthcare providers, including hospitals and physicians, to limit marketing or to divide any geographic market, territory, customers, or services between healthcare providers. This means you cannot give any assurance to another healthcare provider that Henry Ford Allegiance Health will refrain from marketing our services, and you cannot ask for any assurance from them that they will refrain from marketing. The court order also prohibits communicating with any health care system provider, or their **[*15]** employees about our marketing plans or about their marketing plans. There are limited exceptions to this restriction on communications, such as discussing joint projects, but you should check with me before relying on those exceptions.

A copy of the court order is attached. Please read it carefully and familiarize yourself with its terms. The order, rather than the above description, is controlling. If you have any questions about the order or how it affects your activities, please contact me. Thank you for your cooperation.

Sincerely,

[Allegiance's Antitrust Compliance Officer]

Opinion by: Stefan R. Underhill

Opinion

[*296] **RULING AND ORDER**

This case involves a "turf battle" between two sets of construction organizations. The defendant, New England Regional Council of Carpenters (the **[*297]** "Carpenters"), has entered into collective bargaining agreements ("CBAs") with non-party construction companies and construction managers (collectively, the "employers"). The agreements contain restrictive subcontracting clauses (sometimes known as "hot cargo" clauses, but which I call the "CBA clauses") that prohibit signatories from subcontracting work to any employer that has not acceded to a Carpenters' CBA. The plaintiffs—construction trade unions,[1] contractors,[2] and trade associations[3] (collectively, the "Ironworkers")[4]—allege that the Carpenters have used the CBA clauses to expand the scope of their work by preventing the Ironworkers from bidding on and performing work that traditionally was assigned to the Ironworkers. According to the complaint, that conduct constitutes anticompetitive behavior, in violation of *sections 1* and *2 of the Sherman Act*, *15 U.S.C. §§ 1* & *2*, and unfair labor practices, in violation of *29 U.S.C. § 187*.

I previously granted summary judgment for the Carpenters, *see* *Conn. Ironworkers Emp'rs Ass'n v. New Eng. Reg'l Council of Carpenters, 157 F. Supp. 3d 173, 175 (D. Conn. 2016)* ("*Ironworkers* ***[**4]*** *I*"), after I concluded that the Carpenters' conduct was shielded from antitrust scrutiny by both the non-statutory exemption to the antitrust laws and the construction industry proviso contained in *Section 8(e) of the National Labor Relations Act* ("NLRA"), *29 U.S.C. § 158(e)*. On appeal by the Ironworkers, the Second Circuit agreed that the Carpenters' actions fell within the construction industry proviso, and affirmed with respect to the unfair labor practices claim. *See* *Conn. Ironworkers Emplrs. Ass'n v. New Eng. Reg'l Council of Carpenters, 869 F.3d 92, 96-97 (2d Cir. 2017)* ("*Ironworkers II*"). The Court concluded, however, that "there are factual disputes that preclude a decision on whether the conduct falls within the non-statutory exemption," and reversed with respect to the Ironworkers' *Sherman Act* claim. *Id.* The Court remanded "for further proceedings consistent with this opinion, including for such additional discovery as will permit the District Court to be informed of the relevant history and permit the parties to move for summary judgment or, if necessary, to proceed to trial." *Id. at 97*.

Following the remand, and before allowing additional discovery, I scheduled a new argument on the undecided issue raised by the Carpenters' previously-briefed motion for summary judgment. After examining the parties' submissions, **[**5]** I conclude that the Ironworkers have failed to provide evidentiary support for the actual adverse

---

[1] International Association of Bridge, Structural, Ornamental, & Reinforcing Iron Workers Locals Nos. 15, 37, and 424 (the "Iron Workers"); Sheet Metal Workers Locals Nos. 38 and 40 (the "Sheet Metal Workers"); and Glaziers Locals Nos. 1274 and 1333 affiliated with District Council 11 of the International Union of Painters & Allied Trades, AFL-CIO (the "Glaziers").

[2] M.R.S. Enterprises ("M.R.S."); Barrett, Inc.; Ernest Peterson, Inc. ("Peterson"); and Berlin Steel Construction Co. ("Berlin Steel").

[3] Connecticut Ironworkers Employers Association ("Connecticut Ironworkers") and Associated Sheet Metal & Roofing Contractors of Connecticut ("Sheet Metal Contractors").

[4] Two union pension funds were originally also plaintiffs. I dismissed those plaintiffs for lack of standing in March 2012. *See* *2012 U.S. Dist. LEXIS 37523, 2012 WL 951793 (D. Conn. Mar. 20, 2012)*.

effect on competition required to state a prima facie case for violation of the Sherman Act under the rule of reason. Therefore, I again grant the Carpenters' motion for summary judgment.

I. Standard of Review

Summary judgment is appropriate when the record demonstrates that "there **[*298]** is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. When ruling on a summary judgment motion, the court must "view the evidence in the light most favorable to the non-moving party and draw all reasonable inferences in its favor." *Sologub v. City of New York, 202 F.3d 175, 178 (2d Cir. 2000)*; *Aldrich v. Randolph Ctrl. Sch. Dist., 963 F.2d 520, 523 (2d Cir. 1992)* (court is required to "resolve all ambiguities and draw all inferences in favor of the nonmoving party"). "The burden of showing that no genuine factual dispute exists rests upon the moving party." *Carlton v. Mystic Transp., 202 F.3d 129, 133 (2d Cir. 2000)*. When a motion for summary judgment is properly supported by documentary and testimonial evidence, however, the nonmoving party may not rest upon the mere allegations or denials of the pleadings, but must present sufficient evidence supporting its position "to require a jury or judge to resolve the parties' differing versions of the **[**6]** truth at trial." *Anderson v. Liberty Lobby, 477 U.S. 242, 249, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*; *Colon v. Coughlin, 58 F.3d 865, 872 (2d Cir. 1995)*.

"The trial court's function at this stage is to identify issues to be tried, not decide them," *Graham v. Long Island R.R. Co., 230 F.3d 34, 38 (2d Cir. 2000)*, and so "[o]nly when no reasonable trier of fact could find in favor of the non-moving party should summary judgment be granted." *White v. ABCO Eng'g Corp., 221 F.3d 293, 300 (2d Cir. 2000)*. Summary judgment therefore is improper "[w]hen reasonable persons, applying the proper legal standards, could differ . . . on the basis of the evidence presented." *Sologub, 202 F.3d at 178*. Nevertheless,

> the mere existence of some alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no genuine issue of *material* fact. . . . Only disputes over facts that might affect the outcome of the suit under the governing law will properly preclude the entry of summary judgment.

Anderson, 477 U.S. at 247-48.

"[A] complete failure of proof concerning an essential element of the nonmoving party's case necessarily renders all other facts immaterial," and in such circumstances, there is "no genuine issue as to any material fact." *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*; *accord* *Goenaga v. March of Dimes Birth Defects Found., 51 F.3d 14, 18 (2d Cir. 1995)* (movant's burden satisfied if it can point to an absence of evidence to support an essential element of nonmoving party's claim). To present a "genuine" issue of material fact **[**7]** and avoid summary judgment, the record must contain contradictory evidence "such that a reasonable jury could return a verdict for the non-moving party." *Anderson, 477 U.S. at 248*.

"In the context of antitrust cases," the Second Circuit has noted that "summary judgment is particularly favored because of the concern that protracted litigation will chill pro-competitive market forces." *PepsiCo v. Coca-Cola Co., 315 F.3d 101, 104 (2d Cir. 2002)* (per curiam). Thus, "[a]lthough all reasonable inferences will be drawn in favor of the non-movant, those inferences 'must be reasonable in light of competing inferences of acceptable conduct.'" *Id. at 105* (quoting *Top Mkts. v. Quality Mkts., 142 F.3d 90, 95 (2d Cir. 1998))*.

II. Background

The Ironworkers and the Carpenters are both construction organizations that operate throughout New England. The **[*299]** Carpenters have entered into CBAs with many construction companies and construction managers in the region that contain restrictive subcontracting clauses.[5] Those clauses—"colloquially called 'hot cargo' clauses"—"bar signatories from subcontracting work to any employer that is not also a signatory to a Carpenters' CBA." *See* Ironworkers II, 869 F.3d at 97. The Ironworkers allege that the Carpenters have used the CBA clauses anticompetitively "to prevent the Ironworkers from performing the relevant work," thereby "secur[ing] work in **[**8]** the New England area that allegedly belonged to the Ironworkers." *See* *id. at 97-98*. They assert that the Carpenters' conduct constitutes anticompetitive behavior in violation of sections 1 and 2 of the Sherman Act, 15 U.S.C. §§ 1 & 2.

The Carpenters moved for summary judgment in May 2014, Doc. No. 85, arguing that their actions were "shield[ed] . . . from antitrust scrutiny" by "the non-statutory labor exemption and the 'construction industry proviso' provided in Section 8(e)" of the NLRA. *See* Ironworkers I, 157 F. Supp. 3d at 175. I granted the Carpenters' motion. In a ruling issued on January 20, 2016, I held that the Carpenters had "established the requisite elements to be afforded the protection of the construction industry proviso" and had also shown that "the subcontracting provisions at issue," as "lawful provisions of a valid CBA, . . . [were] protected by the non-statutory labor exemption." *Id. at 187*. Therefore, I concluded, "the Carpenters [were] not subject to antitrust scrutiny for their attempts to enforce the subcontracting agreements." *Id. at 188*.

The Ironworkers appealed and the Second Circuit reversed in part. Although the Court agreed that "the construction industry proviso applies to the disputed subcontracting practices," it decided that "disputes of material **[**9]** fact prevent [it] from deciding . . . whether the non-statutory exemption applie[d]." *Ironworkers II, 869 F.3d at 104*. The Court referred to the standard for applying the non-statutory exemption set forth in *Local 210, Laborers' International Union of North America v. Labor Relations Division, Associated General Contractors of America, New York State Chapter, 844 F.2d 69 (2d Cir. 1988)* ("*Local 210*"):

> First, the agreement at issue must further goals that are protected by national labor law and that are within the scope of traditionally mandatory subjects of collective bargaining. Second, the agreement must not impose a direct restraint on the business market [that] has substantial anticompetitive effects, both actual and potential, that would not follow naturally from the elimination of competition over wages and working conditions that results from collective bargaining agreements.

Id. at 79-80 (citations, internal quotation marks, and alterations omitted).

With respect of the first prong of the *Local 210* test, I had relied on *Local 210* and a Supreme Court decision on which it relied, *Fibreboard Paper Prod. Corp. v. NLRB, 379 U.S. 203, 85 S. Ct. 398, 13 L. Ed. 2d 233 (1964)* ("*Fibreboard*"), for the proposition that most "subcontracting clauses *are* within the scope of the mandatory subjects of collective bargaining." *See* *Ironworkers II, 869 F.3d at 107*. Quoting **[*300]** Justice Stewart's concurrence in *Fibreboard*, I concluded that "the 'substitution of one group of workers for another to perform the same task in the same location under **[**10]** the ultimate control of the same employer' is a mandatory subject of collective bargaining." *Ironworkers I, 157 F. Supp. 3d at 184* (quoting *Fibreboard, 379 U.S. at 224* (Stewart, J., concurring)) (internal brackets omitted). Because "each subcontracting agreement . . . was a part of an existing CBA," and the Ironworkers failed to show that "the type of subcontracting agreement at issue [was] anything other than a lawful subject of a CBA," I held that the CBA clauses were protected by the non-statutory exemption. *Id. at 92* (emphasis removed).

The Second Circuit deemed my reliance on *Local 210* and *Fibreboard* "misplaced." *Ironworkers II, 869 F.3d at 107*. Both decisions, the Court determined, were "premised on the fact that the particular subcontracting clauses . . . were designed to '*preserve* work traditionally performed by a union for a particular employer.'" *Id.* (quoting *Local 210, 844 F.2d at 73*) (emphasis in *Ironworkers II*); *see also id.* ("[T]he 'contracting out' of the work *previously performed* by members of an existing bargaining unit is a subject about which the *National Labor Relations Act*

---

[5] Some of the signatories to Carpenters' CBAs are individual contractors, but most are associations of employers such as the Associated General Contractors of Rhode Island, *see* Ex. 7 to Carroll Aff., Doc. No. 88-7, the Connecticut Construction Industries Association, *see* Ex. 10 to Carroll Aff., Doc. No. 88-10, and the Construction Industry Association of Western Massachusetts. *See* Ex. 12 to Carroll Aff., Doc. No. 88-12.

requires employers and the representative of their employees to bargain collectively.") (quoting Fibreboard, 379 U.S. at 209 (emphasis in *Ironworkers II*). Those precedents stood only "for the proposition that work *preservation*—not restrictive subcontracting **[**11]** generally—is a legitimate labor purpose and a mandatory subject of collective bargaining." *Id.* With respect to the present case, the Second Circuit concluded that "the record [was] insufficient to determine whether or not the[] subcontracting clauses were in fact being used to preserve work . . . or whether [they] were used for work *expansion*." *Id. at 108*. Because the latter "purpose . . . would not fall within the scope of traditionally mandatory subjects of collective bargaining," the Court held that I "erred in finding, as a matter of law, that the disputed subcontracting practices were entitled to the protection of the 'non-statutory exemption.'" *Id.*

The Second Circuit remanded "for further proceedings consistent with [its] opinion, including for such additional discovery as will permit the District Court to be informed of the relevant history and permit the parties to move for summary judgment or, if necessary, to proceed to trial." *Id. at 109*. On remand, prior to reopening discovery, I elected to address the undecided alternative ground raised by the Carpenters' previously-briefed motion for summary judgment. This ruling addresses the unresolved issues raised by that motion.

III. Discussion

Following **[**12]** the Second Circuit's determination that the CBA clauses are not entitled to the non-statutory exemption, the Carpenters' motion for summary judgment presents two further matters for decision. First, what is the proper standard for analysis of the Ironworkers' claims? The Ironworkers insist that the CBA clauses constitute "group boycott[s]" that should be deemed "*per se* violations of the antitrust laws." Mem. Opp'n Mot. Summ. J., Doc. No. 100, at 40. The Carpenters, conversely, argue that the CBA clauses are "exclusive dealing requirements" that should be "analyzed under the rule of reason." Mem. Supp. Mot. Summ. J., Doc. No. 86, at 32-33. I agree that the CBA clauses—which at worst substitute one group of unionized workers for another—are not "manifestly anticompetitive." *See* Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988). Accordingly, *per se* condemnation is inappropriate, and I analyze the clauses under the rule of reason.

[*301] Second, do the CBA clauses function as "unreasonable" restraints under the rule of reason? The multi-part, burden-shifting rule of reason requires that the "plaintiff bear[] the initial burden of showing that the challenged action has had an *actual* adverse effect on competition as a whole in the relevant market." **[**13]** *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., 996 F.2d 537, 543 (2d Cir. 1993)* ("*Capital Imaging*"). Here, I conclude that the Ironworkers have failed to present evidence sufficient to show that the CBA clauses are anticompetitive under the rule of reason. As a result, the Ironworkers cannot state a prima facie case for violation of the Sherman Act, and I grant the Carpenters' motion for summary judgment.

A. Should the CBA clauses be analyzed under the *per se* rule or the rule of reason?

Most arrangements alleged to violate the antitrust laws are analyzed under the so-called rule of reason, a multi-part test through which the factfinder "weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *See* Bus. Elecs. Corp., 485 U.S. at 723. A few arrangements, however, such as "group boycotts," are considered "unlawful *per se*." FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986). In order to avoid application of the rule of reason—which entails a "burdensome" and "demanding calculus," *Am. Steel Erectors v. Local Union No. 7, Int'l Ass'n of Bridge, Structural, Ornamental & Reinforcing Iron Workers, 815 F.3d 43, 61, 67 (1st Cir. 2016)* ("*ASE II*")—the Ironworkers attempt to obtain the benefit of the *per se* rule by "forcing the [CBA clauses] into the 'boycott' pigeonhole." *See* Ind. Fed'n of Dentists, 476 U.S. at 458. The Carpenters respond that the CBA clauses are not a "group boycott," but rather akin to "exclusive dealing requirements" that **[**14]** should be "analyzed under the rule of reason." Mem. Supp. Mot. Summ. J., Doc. No. 86, at 32-33. I agree with the Carpenters.

1. *Are the CBA clauses a proscribed "group boycott"?*

Although courts often list so-called "'[g]roup boycotts' . . . among the classes of economic activity that merit *per se* invalidation" under the antitrust laws, it is "far from certain" what conduct "fall[s] within the forbidden category." Nw.

Wholesale Stationers v. Pac. Stationery & Printing Co., 472 U.S. 284, 294, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985); *see also* *Spectators' Commc'n Network v. Colonial Country Club, 253 F.3d 215, 223 (5th Cir. 2001)* (observing that "the distinction between boycotts that are *per se* illegal and those judged by the rule of reason is often a vexing one"). Broad dicta in older cases notwithstanding, "*per se* condemnation is not visited on every arrangement that might, as a matter of language, be called a group boycott or concerted refusal to deal." *U.S. Healthcare v. Healthsource, Inc., 986 F.2d 589, 593 (1st Cir. 1993)*. Instead, the Supreme Court has "limit[ed] the *per se* rule in the boycott context to cases involving horizontal agreements among direct competitors."[6] **[*302]** *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*; *cf.* *Bogan v. Hodgkins, 166 F.3d 509, 515 (2d Cir. 1999)* (stating that the "classic model of a group boycott" is "a concerted attempt by a group of competitors at one level to protect themselves from competition from non-group members who seek to compete at that level") (quoting *Smith v. Pro Football, 593 F.2d 1173, 1178, 193 U.S. App. D.C. 19 (D.C. Cir. 1978))* (internal quotation marks omitted). Thus, for the Ironworkers **[**15]** to prevail on their boycott claim under the *per se* rule, "a horizontal agreement is a prerequisite." *PepsiCo, 315 F.3d at 110*.

The Carpenters argue that this case "obviously [does] not present" a group boycott under recent precedent, *see* *Ind. Fed'n of Dentists, 476 U.S. at 458*, because the challenged agreements were made "between parties at different levels of the market structure." Mem. Supp. Mot. Summ. J., Doc. No. 86, at 32. The Carpenters and the employers "did not compete" with one another; rather, the Carpenters "w[ere] an upstream supplier" of labor for the employers. *See* *MacDermid Printing Sols. v. Cortron Corp., 833 F.3d 172, 185 (2d Cir. 2016)*. Thus, the Carpenters argue, the agreements between the Carpenters and the employers were "no[t] . . . inherently anticompetitive" and should not be subject to *per se* treatment. *See id.*

The Ironworkers respond that the Carpenters' CBAs "involve both horizontal and vertical provisions." Suppl. Mem. Opp'n Mot. Summ. J., Doc. No. 116, at 11. As adduced at oral argument, the Ironworkers' theory appears to be that because most of the CBAs were made between the Carpenters and associations of employers, the vertical agreements between the Carpenters and the associations also operate as "horizontal agreements among the construction managers . . . [who are] parties to **[**16]** th[e] association[s]." *See* Mot. Hr'g Tr. (Jan. 24, 2018), Doc. No. 148, at 9. In other words, if the employers collectively agreed with the Carpenters to boycott the Ironworkers, then the employers also "agreed with each other to do it." *See id.* at 11.

I doubt that a third party's agreement with an association is by itself enough to establish a horizontal agreement among members of the association. "Mere membership in associations is not enough to establish participation in a conspiracy with other members of those associations," *Osborn v. Visa Inc., 797 F.3d 1057, 1067, 418 U.S. App. D.C. 193 (D.C. Cir. 2015)*, *cert. dismissed as improvidently granted*, *__ U.S. __, 137 S. Ct. 289, 196 L. Ed. 2d 396 (2016)* (mem.), and "concerted action does not exist every time a trade association member speaks or acts." *Alvord-Polk, Inc. v. F. Schumacher & Co., 37 F.3d 996, 1007 (3d Cir. 1994)*. In the absence of evidence that "two or more of the association's members have committed themselves to the anti-competitive activity of the . . . association," the existence of the association alone does not suffice to infer a horizontal agreement.[7] *See* *id. at 1017* (Stapleton, J., concurring in part and dissenting in part). Because "membership alone is not proof of an

---

[6] Agreements within the scope of the Sherman Act may be "'horizontal,' *i.e.*, 'agreement[s] between competitors at the same level of the market structure,' or 'vertical,' *i.e.*, 'combinations of persons at different levels of the market structure, *e.g.*, manufacturers and distributors.'" *Anderson News v. Am. Media, 680 F.3d 162, 182 (2d Cir. 2012)* (quoting *United States v. Topco Assocs., 405 U.S. 596, 608, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972))*. Thus, an agreement among several general contractors, or between labor unions, might impose a "horizontal" restraint; but an agreement between a labor union, which supplies labor, and a general contractor, which purchases it, could not. In the latter example, the union and the contractor are part of a "vertical chain" and do not "compete on the same horizontal plane" within the market. *ASE II, 815 F.3d 43, 61, 62 (1st Cir. 2016)*.

[7] Of course, "it normally will not be difficult to show the necessary agreement among a group of [ ] members" because an association typically is "controlled by its members." *Alvord-Polk, Inc. v. F. Schumacher & Co., 37 F.3d 996, 1017 (3d Cir. 1994)* (Stapleton, J., concurring in part and dissenting in part). That the Ironworkers have nonetheless failed to show any evidence of agreement among the employers here is therefore telling.

agreement," **[*303]** *Nova Designs v. Scuba Retailers Ass'n, 202 F.3d 1088, 1092 (9th Cir. 2000)*, I find unpersuasive the Ironworkers' argument that "multi-employer bargaining association[s] . . . by [their] very nature, involve horizontal agreements." Mot. **[**17]** Hr'g Tr. (Jan. 24, 2018), Doc. No. 148, at 12-13.

I need not dwell on whether the CBAs are better regarded as horizontal, vertical, or both, however, because even were the agreements primarily horizontal, "[t]his case . . . cannot be fitted into the category of group boycott cases." *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 131 (2d Cir. 1978)* (en banc). Not all horizontal agreements are *per se* violations of the antitrust laws. *See* *Premier Elec. Constr. Co. v. Nat'l Elec. Contractors Ass'n, 814 F.2d 358, 370 (7th Cir. 1987)* ("*Premier*"); *cf.* *Bogan, 166 F.3d at 513, 516* ("assum[ing] plaintiffs' view of the Agreement as primarily horizontal, rather than vertical," but nevertheless holding that "[p]laintiffs fail[ed] to establish a threshold case for *per se* treatment"). Assuming, *arguendo*, that the Carpenters' CBAs entailed horizontal agreements among members of the associations, the Ironworkers have not even hinted at any "economic incentive" for the employers to boycott them. *See* *Betkerur v. Aultman Hosp. Ass'n, 78 F.3d 1079, 1090 (6th Cir. 1996)*. Quite simply, the employers—as purchasers of labor—"would stand nothing to gain financially" by driving the Ironworkers out of the labor supply market. *See id.*

In order to illustrate that point, consider *Premier Electrical Construction Co. v. National Electrical Contractors Ass'n*, a case in which an employers' association actually used an agreement with a union to "eliminate a source of **[**18]** competition." *814 F.2d at 368*. In *Premier*, the National Electrical Contractors Association ("NECA") had agreed with the International Brotherhood of Electrical Workers ("IBEW") to create a National Electrical Industry Fund, into which members of the NECA would pay one percent of their gross payroll.[8] *Id. at 359*. Because members of the NECA were required to pay into the fund, their cost of doing business increased relative to non-members, and non-members soon were able to underbid NECA members for work. *See* *id. at 368*. Concerned, the NECA entered into a new agreement with the IBEW under which the IBEW would obtain, as part of any collective bargaining agreement with a firm that was not a member of the NECA, a commitment that the firm also make a contribution to the National Electrical Industry Fund. *Id. at 359*. The Seventh Circuit, following the Fourth Circuit, held that the "contribution requirement [was] price-fixing, a *per se* violation of the antitrust laws," because the NECA had "used the [IBEW] to increase its rivals' costs of doing business . . . and thereby raised the market price to its own advantage." *Id. at 368*. "The result was higher prices to purchasers of electrical work and higher profits for members" of the NECA, which "could **[**19]** be shared with the [u]nion" to "compensat[e] it for the assistance." *Id.*

Here, unlike *Premier*, it is far from obvious how the CBA clauses could have improperly raised costs or fixed-prices. There is no reason for employers—who purchase labor—to want higher labor prices. If (contrary to the evidence in the record) the Carpenters' prices were higher, then the employers who affiliated with them would be underbid by rivals who signed with the Ironworkers. If the quality of the Carpenters' work was lower (as the Ironworkers repeatedly suggest, without evidence), **[*304]** then that also would comparatively advantage employers who continued to affiliate with the Ironworkers. Furthermore, employers often enter into agreements with multiple unions, *cf.* *Carpenters Fringe Benefit Funds of Ill. v. McKenzie Eng'g, 217 F.3d 578, 583 (8th Cir. 2000)* (noting that employer "entered into pre-hire collective bargaining agreements with multiple craft unions whose claimed work jurisdictions frequently overlap[ped]"); *Stevens Eng'rs & Constructors v. Iron Workers Local 17 Pension Fund, 2016 U.S. Dist. LEXIS 114028, 2016 WL 4479486, at *18 (N.D. Ohio Aug. 25, 2016)* ("[T]he craft jurisdictions of many craft unions overlap and employers assign tasks that fall within the craft jurisdictions of multiple unions in different manners."), and **[**20]** different unions frequently work on a single construction project. *See, e.g.,* *Huber, Hunt & Nichols v. United Ass'n of Journeymen & Apprentices of the Plumbing & Pipefitting Indus., Local 38, 282 F.3d 746, 747-48 (9th Cir. 2002)*. Therefore, even if a large proportion of employers acceded to the Carpenters' CBA clauses, those employers would not necessarily be able to shut out their rivals who continued to affiliate with the Ironworkers.

---

[8] The fund was intended to "defray the costs of the Association's bargaining with the Union on behalf of its members and administering their collective bargaining agreements." *Premier, 814 F.2d 358, 370 (7th Cir. 1987)*.

Indeed, notwithstanding the challenged CBA clauses, counsel for the Ironworkers admitted at the hearing that "sometimes [employers] just skip the Carpenters and bring in Ironworkers to actually do the work."[9] Mot. Hr'g Tr. (Jan. 24, 2018), Doc. No. 148, at 69. In other words, not only did the employers lack a clear incentive to drive the Ironworkers out of the market, but also, in practice, they seem to have continued employing the Ironworkers. That being so, I simply cannot understand how the employers had any "economic motivation [to participate in] a boycott," or how the CBA clauses would have enabled both the Carpenters and the employers to "benefit[] financially at the expense of consumers." *See* *Betkerur, 78 F.3d at 1090-91*. "Because the Agreement's anticompetitive effect . . . is not obvious," the Ironworkers have not "made a case sufficient to cross the threshold to *per se* treatment." *Bogan, 166 F.3d at 515*.

The Ironworkers, apparently recognizing **[**21]** that the employers' incentive to join the posited boycott is murky at best, strive to bring their case within the rule of *Klor's, Inc. v. Broadway-Hale Stores, 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*. In *Klor's*, a large department store chain, Broadway-Hale, used its "'monopolistic' buying power" to organize a boycott of its much smaller rival, Klor's. *Id. at 209*. Klor's filed suit under the Sherman Act, alleging that manufacturers and distributors had "conspired among themselves and with Broadway-Hale either not to sell to Klor's or to sell to it only at discriminatory prices and highly unfavorable terms." *Id.* The Supreme Court held that the defendants had "[p]lainly" engaged in a group boycott. *Id. at 212*. The Court observed that Klor's "[a]lleged . . . a wide combination consisting of manufacturers, distributors and a retailer," which "t[ook] from Klor's its freedom to buy . . . in an open competitive market and dr[ove] it out of business as a dealer in the defendants' products," and also "deprive[d] the manufacturers and distributors of their freedom to sell to Klor's." *Id. at 213*. Thus, the Court concluded that the alleged conduct "clearly ha[d], by its 'nature' and 'character,' a 'monopolistic tendency,'" and was to be regarded as illegal *per se. See id.*

Klor's is admittedly difficult **[**22]** to reconcile with more recent cases, which have "recognized that the scope of *per se* illegality should be narrow in the context of vertical **[*305]** restraints." *Bus. Elecs. Corp., 485 U.S. at 724*; *cf., e.g.,* *Ron Tonkin Gran Turismo v. Fiat Distribs., 637 F.2d 1376, 1382 (9th Cir. 1981)* (noting that "*Klor's* has often been criticized"). In *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*, the Supreme Court distinguished *Klor's* on the basis that the case "involv[ed] not simply a 'vertical' agreement between supplier and customer, but . . . [also] a 'horizontal' agreement among competitors." *Id. at 136*. That is, not only did Broadway-Hale vertically agree with each manufacturer and distributor to boycott Klor's, but also the manufacturers and distributors "horizontal[ly] agree[d] among [themselves] . . . to hurt [Broadway-Hale's] competitor." *Id. at 135*. Taken together, *Klor's* and *NYNEX Corp*. indicate that the *per se* rule continues to apply to "situations in which a vertical player organizes a horizontal cartel." *United States v. Apple, Inc., 791 F.3d 290, 323 (2d Cir. 2015)*.

In other words, *Klor's* entailed an instance of a "hub-and-spoke" conspiracy, "in which an entity at one level of the market structure, the 'hub,' coordinates an agreement among competitors at a different level, the 'spokes.'" *Id. at 314*. According to the Second Circuit, hub- and-spoke arrangements "consist of *both* vertical agreements between the hub and each spoke and a **[**23]** horizontal agreement among the spokes 'to adhere to the [hub's] terms.'" *Id.* (quoting VI Areeda & Hovenkamp (3d ed.), *supra*, at ¶ 1402c). Thus, notwithstanding the "'hub-and-spoke' metaphor," the plaintiff "must also prove the existence of a 'rim' to the wheel in the form of an agreement among the horizontal competitors." *Id. at 314 n.15*. For example, in *United States v. Apple, Inc.*, the Second Circuit held that Apple had "orchestrated a horizontal conspiracy among [publishers] to raise ebook prices" by vertically contracting with each publisher under terms that "were only attractive . . . to the extent [the publishers] acted collectively." *Id. at 297, 320*. Even though the contracts themselves "might well, if challenged, have to be evaluated under the rule of reason," the Second Circuit held that Apple was liable for the entire conspiracy under the *per se* rule because it used the vertical contracts to "organize[] a horizontal cartel." *Id. at 323*.

Apple shows why *Klor's* is inapposite to the present case: simply put, the Ironworkers have not placed a rim on their alleged wheel. Besides stating that the employers are members of associations (which, as noted above, is not enough to show a horizontal agreement), the Ironworkers **[**24]** have not shown or provided a reasonable basis to

---

[9] Counsel for the Carpenters represented that the Ironworkers worked on four of the seven projects mentioned in the complaint. Mot. Hr'g Tr. (Jan. 24, 2018), Doc. No. 148, at 69.

infer any agreement among the employers to drive the Ironworkers out of the market.[10] Absent such an agreement, the Carpenters' allegedly pernicious motives on their own do not suffice to overcome the "presumption in favor of [the] rule-of-reason standard." *Bus. Elecs. Corp., 485 U.S. at 726*.

2. *Are the CBA clauses an "exclusive dealing" arrangement?*

The Ironworkers have failed to introduce "evidence of any horizontal agreement *among* general contractors or *among* [labor unions] to foreclose the plaintiffs **[*306]** from the . . . market." *See* *ASE II, 815 F.3d at 64*. Instead, the Ironworkers have shown the existence of a series of vertical agreements between the Carpenters (as suppliers of labor) and employers (as purchasers), by which the employers committed to obtain their labor only from unions affiliated with the Carpenters. The Carpenters assert that those "vertical arrangements" most closely resemble an "exclusive dealing" agreement and should be analyzed under the rule of reason. *Cf.* *id. at 67*.

An exclusive dealing agreement is "a contract between a [supplier] and a buyer that forbids the buyer from purchasing the contracted [service] from any other seller." XI Phillip E. Areeda & Herbert **[**25]** Hovenkamp, et al., ***Antitrust Law*** ¶ 1800, at 3 (2d ed. 2005) ("Areeda & Hovenkamp (2d ed.)"). Unlike a group boycott, an exclusive dealing agreement "is not a *per se* violation of the antitrust laws." *Stop & Shop Supermkt. Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 62 (1st Cir. 2004)* ("*Stop & Shop*"). Instead, "[e]xclusive dealing arrangements have a significant efficiency potential," were "generally approved" at common law, and "simply do not belong in a classification of practices that are even presumptively condemned without market analysis." XI Areeda & Hovenkamp (2d ed.), *supra*, ¶ 1820, at 4, 161, 163. As a result, "[e]xclusive dealing contracts are analyzed under the rule of reason."[11] *Minn. Ass'n of Nurse Anesthetists v. Unity Hosp., 208 F.3d 655, 660 (8th Cir. 2000)* (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 333-35, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961))*.

The Ironworkers insist unpersuasively that the CBA clauses are not exclusive dealing agreements, and propose five criteria for identifying such arrangements. According to the Ironworkers, exclusive dealing agreements consist only of arrangements whereby:

> (1) the buyer agrees to purchase all of its "supplies" from one source;
>
> (2) the agreement provides some business justification or pro-competitive features favorable to the buyer to warrant the exclusive arrangement;
>
> (3) the term of the arrangement is limited to a short-term, such as 2-3 years;
>
> (4) the exclusive arrangement is **[**26]** reached after a competitive bidding process; and
>
> (5) the agreement is vertical and not horizontal.

Suppl. Mem. Opp'n Mot. Summ. J., Doc. No. 116, at 10-11.

The first and last of the Ironworkers' proposed criteria are (partially) correct,[12] but the middle three only relate to the *reasonableness* of an exclusive dealing agreement, not whether it constitutes such an agreement at all. By asserting that "there are no pro-competitive effects or business justifications" to support the CBA clauses, *see* Suppl. Mem. Opp'n Mot. Summ. J., Doc. No. 116, at 11; that the Carpenters' "arrangements with the various [employers] have been in existence for over 20 years," *id.* at 11; and that "there was no competitive bidding process

---

[10] Moreover, even if membership in an association sufficed, the Carpenters signed CBAs with *multiple* employers' associations, none of which are alleged to have been in horizontal agreements with one another. The amount of the market that would have been covered by any one hub-and-spoke agreement with a single employers' association would be too small to amount to a *per se* violation of the Sherman Act. *Cf.* *Premier, 814 F.2d at 371* (holding that *per se* treatment was appropriate because "[t]he agreement . . . affected 100 [percent] of an economically significant market").

[11] The Ironworkers argued at the hearing that "a group exclusive dealing arrangement . . . is an oxymoron because a group exclusive dealing arrangement is the definition of a concerted refusal to deal." Mot. Hr'g Tr. (Jan. 24, 2018), Doc. No. 148, at 23-24. That reasoning begs the question, however, for it assumes that CBA clauses entail horizontal agreements among the employers. I already have determined that the Ironworkers have not supported that assumption with evidence.

[12] With respect to the first proposed criterion, a seller also might contract to sell exclusively to one buyer (as when a parts supplier agrees to sell only to one automobile manufacturer).

before **[*307]** reaching the agreements," *id.* at 11, the Ironworkers might indicate that the CBA clauses "constitute[] an unreasonable restraint of trade . . . under the rule of reason." *Virgin Atl. Airways v. British Airways, 257 F.3d 256, 263 (2d Cir. 2001)* ("*Virgin Atl*."). But they do not transform those plainly vertical restraints into a horizontal group boycott.[13]

3. *Should all non-exempt labor arrangements be regarded as* per se *antitrust violations?*

Finally, the Ironworkers try to earn *per se* treatment by invoking a presumption against superfluity. *Cf., e.g., Kawashima v. Holder, 565 U.S. 478, 486, 132 S. Ct. 1166, 182 L. Ed. 2d 1 (2012)* (discussing **[**27]** presumption against superfluities in statutory interpretation). The reason that the Supreme Court developed the non-statutory labor exemption, they argue, "is because it was so obvious that any multi-employer bargaining association violates the antitrust laws." *See* Mot. Hr'g Tr. (Jan. 24, 2018), Doc. No. 148, at 12. Were labor agreements analyzed under the rule of reason, the Ironworkers claim that the non-statutory exemption would be unnecessary. Therefore, the Ironworkers assert, the existence of the non-statutory exemption means that *all* non-exempt agreements should be regarded as *per se* violations of the antitrust laws. That theory is flatly wrong.

The Second Circuit has expressly stated that "the failure of [a] defendant['s] claim for complete antitrust immunity does not mean that plaintiffs are entitled to prevail." *Jacobi v. Bache & Co., 520 F.2d 1231, 1237 (2d Cir. 1975)* (Friendly, J.). The Third Circuit, too, has observed that "[a] finding that particular union conduct . . . is non-exempt . . . should not drive a court inexorably to the conclusion that the union has violated the antitrust laws." *Larry V. Muko, Inc. v. Sw. Pa. Bldg. & Constr. Trades Council, 670 F.2d 421, 426 (3d Cir. 1982)* ("*Muko II*"). Precisely because "the rule of reason provides the 'breathing space' necessary" for the labor laws to work, *see* *Jacobi, 520 F.2d at 1239*, courts "caution **[**28]** against mechanical or imprudent application of the *per se* rule in the labor context." *Muko II, 670 F.2d at 426*.

In fact, when the Second Circuit has analyzed non-exempt labor conduct under the antitrust laws, it has applied the rule of reason as a matter of course. *See* *Berman Enters. v. Local 333, United Marine Div., Int'l Longshoremen's Ass'n, 644 F.2d 930, 936-37 (2d Cir. 1981)*; *see also* *Commerce Tankers Corp. v. Nat'l Maritime Union of Am., AFL-CIO, 553 F.2d 793, 802 (2d Cir. 1977)* ("[E]ven if the 'nonstatutory' exemption does not apply, there is at least a substantial question whether a *per se* approach under the antitrust laws is applicable in the case of a non-exempt labor activity."); *id. at 802 n.8* (citing with approval Professor Handler's conclusion that "the [Supreme] Court intended that there be a full-scale rule of reason inquiry in every instance in which a non-exempt activity is claimed to be in violation of antitrust") (quoting Handler, *Labor and Antitrust: A Bit of History*, 40 Antitrust L.J. 233, 239-40 (1971)); *cf.* ***[*308]*** *Jacobi, 520 F.2d at 1238* ("[W]ithin the area of supervised self-regulation contemplated by the Securities Exchange Act, *per se* concepts are generally displaced and the courts are to examine whether the particular restraint, even though it would be a *per se* violation if performed by others, was reasonable."). That precedent indicates I should apply the rule of reason in this case.

Although the Third Circuit—which has addressed the question in greater detail—has **[**29]** left open the possibility of applying the *per se* rule in the labor contest "where appropriate," that court also has held that "[i]n most cases the rule of reason will supply the measure of illegality." *Muko II, 670 F.2d at 427-28*. Under the Third Circuit's test, if "union activity falls outside the protection of the labor exemption," then the "court must apply traditional antitrust principles in determining whether the activity in question violates the antitrust laws." *Id. at 427*. Even assuming, *arguendo*, that the Second Circuit would follow the Third Circuit's standard, I already have determined that *per se* condemnation would not be warranted under "traditional antitrust principles." *Id.* Accordingly, the *per se* rule does not apply.

---

[13] Risibly, the Ironworkers also suggest that the CBA clauses are not exclusive dealing agreements because the general contractors and the unions are not in "a 'business' relationship, but rather, a 'labor' relationship." Suppl. Mem. Opp'n Mot. Summ. J., Doc. No. 116, at 11. That the unions are not for-profit businesses is irrelevant; for purposes of the various entities' location in the market, the unions "supply" labor and the general contractors "purchase" it. Furthermore, if the unions are conceived of as "labor" rather than "business" entities, then it is not clear why they should be subject to antitrust scrutiny at all (which was, in fact, the *Carpenters'* argument in contending that the CBA clauses fell within the non-statutory exemption).

In antitrust cases, "there is a presumption in favor of [the] rule-of-reason standard," and any "departure from that standard must be justified by demonstrable economic effect." *See* Bus. Elecs. Corp., 485 U.S. at 726. Here, the Ironworkers have not justified such a departure. Thus, I conclude that the CBA clauses must be analyzed under the rule of reason.

B. Do the CBA clauses function as unreasonable restraints under the rule of reason?

The rule of reason analysis "requires a burdensome multipart showing." ASE II, 815 F.3d at 67. First, the "plaintiff **[**30]** bears the initial burden of showing that the challenged action has had an *actual* adverse effect on competition as a whole in the relevant market." Capital Imaging, 996 F.2d at 543. "The fact that the defendant's actions prevent a plaintiff from competing in a market is not enough, standing alone, to satisfy this initial burden of proof." Virgin Atl., 257 F.3d at 264. If the plaintiff "surmounts its first hurdle," then "the burden shifts to the defendant to offer evidence of the pro-competitive 'redeeming virtues'" of the challenged conduct. *Id.*; Capital Imaging, 996 F.2d at 543. Should the defendant "come[] forward with such proof, the burden shifts back to plaintiff for it to demonstrate" that "the same procompetitive effect could be achieved through alternative means that are less restrictive of competition." Virgin Atl., 257 F.3d at 264; Capital Imaging, 996 F.2d at 543. Ultimately, in order to prove a violation of the Sherman Act, the plaintiff must show that the challenged conduct "will have an actual adverse effect on competition in the relevant market." Elec. Commc'ns Corp. v. Toshiba Am. Consumer Prods., 129 F.3d 240, 244 (2d Cir. 1997).

1. *Lack of antitrust injury*

As an initial matter, I question whether the labor union plaintiffs—the Iron Workers, Sheet Metal Workers, and Glaziers—have standing to attack the CBA clauses.[14] "[I]n order to have standing to **[*309]** prosecute private antitrust claims, plaintiffs must show **[**31]** more than that the defendants' conduct caused them an injury." Balaklaw v. Lovell, 14 F.3d 793, 797 (2d Cir. 1994). They must show "*antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Id.* (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)). "[I]njuries resulting from competition alone are not sufficient to constitute antitrust injuries." *Id.* Instead,

> the test for antitrust injury is essentially economic. A private plaintiff must identify the economic rationale for a business practice's illegality under the antitrust laws and show that its harm flows from whatever it is that makes the practice unlawful. If the plaintiff's injury is directly related to the competitive evil that makes a practice unlawful, then that harm is antitrust injury. If, however, the harm doers not flow from a competitive evil, then it may be injury-in-fact, but not be an antitrust injury.

IIA Phillip E. Areeda & Herbert Hovenkamp, et al., ***Antitrust Law*** ¶ 391, at 318, 320 (3d ed. 2007) ("Areeda & Hovenkamp (3d ed.)").

In an exclusive dealing case, plaintiffs may show injury-in-fact by "argu[ing] that they are foreclosed (or excluded) from a market," i.e., that they have been "denied the ability **[**32]** to make sales that they would otherwise have made." *Id.* ¶ 397, at 435. But not every injury-in-fact constitutes an antitrust injury. For instance, an "exclusive-dealing partner whose business relationship was terminated in favor of another exclusive-dealing partner" is "[c]learly not a victim of antitrust injury." XI Areeda & Hovenkamp (2d ed.), *supra*, ¶ 1823, at 199.

That essentially is the situation presented here. "Hot cargo" clauses are "standard in construction industry CBAs, including those of the Plaintiff unions." *See* Mem. Supp. Mot. Summ. J., Doc. No. 86, at 10. Stripped of rhetoric, the gravamen of the Ironworkers' complaint is that the Carpenters have used their CBA clauses to enter into exclusive

[14] Previously, at the outset of the case, I denied the Carpenters' motion to dismiss the union plaintiffs' claims for lack of antitrust standing and concluded that the latter had "stated an injury that is recognized under ***antitrust law***." 2012 U.S. Dist. LEXIS 37523, 2012 WL 951793, at *14. With the benefit of a fuller record, however, I "revisit the issue on summary judgment." *See* IM Partners v. Debit Direct, 394 F. Supp. 2d 503, 521 n.12 (D. Conn. 2005); *cf.* Dorking Genetics v. United States, 76 F.3d 1261, 1271 (2d Cir. 1996) (noting that a 12(b)(6) movant "may . . . ask the district court to revisit [an] issue on summary judgment after discovery").

dealing arrangements with employers who formerly had exclusively dealt with the Ironworkers. The resulting "turf battle," *Ironworkers II, 869 F.3d at 97*, between two beneficiaries of exclusive dealing arrangements is not properly adjudicated under the antitrust laws. *Cf. Elec. Commc'ns Corp., 129 F.3d at 244* ("[I]t is simply not an antitrust violation for a manufacturer to contract with a new distributor, and as a consequence, to terminate his relationship with a former distributor, even if the effect of the new contract is to seriously damage **[**33]** the former distributor's business.").

Consider *Balaklaw v. Lovell*, in which a hospital switched its exclusive contract for anesthesiology services from one anesthesiologist (Balaklaw) to another (King). Balaklaw challenged the hospital's exclusive dealing agreement with King under the Sherman Act. *See 14 F.3d at 795-96*. The Second Circuit held that Balaklaw had not suffered an "antitrust injury" because there was "no foreclosure of competition." *Id. at 799* (internal quotation marks omitted). "From the consumers' point of view," the Court reasoned, "nothing about the market ha[d] changed," because Balaklaw already "had exclusive control over anesthesiology services" at the hospital "prior to the [challenged] agreement." *Id. at 798*. As a result, the hospital's choice of one set of exclusive dealing partners over another was "only a reshuffling of competitors" and did not increase or decrease opportunities for competition in the market. *Id. at 798* (quoting *Coffey v. Healthtrust, Inc., 955 F.2d 1388, 1393 (10th Cir. 1992))*. Recalling that the antitrust laws "require plaintiffs to establish that the defendants **[*310]** *engaged in anticompetitive conduct* that caused them an antitrust injury," *id. at 800* (emphasis added), the Second Circuit held that Balaklaw—who "entered the competition for an exclusive contract . . . **[**34]** [and] lost"—did not suffer "an injury of the type the antitrust laws were intended to prevent." *Id. at 802*.

The Ironworkers attempt to distinguish *Balaklaw* on the basis that the plaintiff "had participated in a competitive process to obtain the exclusive contract," Mem. Opp'n Mot. Summ. J., Doc. No. 100, at 49, which (they allege) did not occur here. But the mere fact that the Carpenters and the Ironworkers did not participate in a formal competitive process does not mean that the choice of one over the other was more than "a reshuffling of competitors." *Cf. Balaklaw, 14 F.3d at 798*. According to the Ironworkers, the work at issue here was "traditionally performed by [them]" and "never sought" by the Carpenters. *Cf. Ironworkers II, 869 F.3d at 98*; *Ironworkers I, 157 F. Supp. 3d at 177*; *see Local Rule 56(a)(2)* Statement, Doc. No. 98, at 2 ("Plaintiff contractors performed eighty percent of the panel work ten years ago . . . . Iron Workers and Glaziers performed one hundred percent of the panelized window systems, punch windows, curtain wall installation and store fronts ten years ago . . . .") (internal parentheticals omitted). When the Carpenters began to obtain such work, the Ironworkers may have suffered "injury [as] a competitor," *see Virgin Atl., 257 F.3d at 265*, but that substitution of exclusive contractors did not by itself **[**35]** create "an adverse effect on competition market-wide." *Todd v. Exxon Corp., 275 F.3d 191, 213 (2d Cir. 2001)* (Sotomayor, J.). Because the Ironworkers have not shown that their injury stemmed from "impairment of the competitive structure of the market," *see Stop & Shop, 373 F.3d at 66* (citing *Brown Shoe Co. v. United States, 370 U.S. 294, 344, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*, they did not suffer—and do not have standing to raise—antitrust injury.[15]

"The Sherman Act . . . [is] designed to protect competition, not individual competitors." *Virgin Atl., 257 F.3d at 265*. Here, the Ironworkers' "simple loss of business" does not establish an antitrust injury, *Stop & Shop, 373 F.3d at 66*; "at most it reflects only harm to individual competitors, not to competition." *Unity Hosp., 208 F.3d at 661-62*.

2. *Lack of adverse effect on competition*

The other plaintiffs—M.R.S., Barrett, Peterson, Berlin Steel, Connecticut Ironworkers, and Sheet Metal Contractors—do appear to have antitrust standing to pursue Sherman Act claims. Nevertheless, their claims (along with those of the labor unions) fail at the rule of reason's first hurdle. Viewed in the light most favorable to the Ironworkers, the evidence would not permit a reasonable trier of fact to find that "the challenged action has had an

---

[15] I held to the contrary in response to the motion to dismiss because the Carpenters had merely argued that the unions' "harm[s] [were] too indirect to support standing." *See 2012 U.S. Dist. LEXIS 37523, 2012 WL 951793, at *14*. As discovery has now shown, however, the problem is not that the unions' harms are indirect; it is that they are only are only harms to competitors, rather than to competition.

actual adverse effect on competition as a whole in the relevant market." Capital Imaging, 996 F.2d at 543. To show an "adverse effect on competition," *id.*, the Ironworkers rely heavily on the **[**36]** testimony of their expert witness, Prof. Edward Deak. Deak's report states that the restrictive clauses "*potentially* raise[] the price" of labor by "limit[ing] . . . the number of bidders." Deak Rep., Ex. 5 to Carroll Aff., Doc. No. 88-5, at 67 (emphasis added). The report cites no evidence, however, **[*311]** to show that the clauses have had or are likely to have "an *actual* adverse effect" on prices. *Cf.* Capital Imaging, 996 F.2d at 543. Indeed, Deak acknowledged during his deposition that he "didn't test the [CBA clauses'] impact on price" and "didn't do any analysis about whether the [C]arpenters' conduct increased prices." Deak Dep. (Mar. 24, 2014), Ex. 6 to Carroll Aff., Doc. No. 88-6, at 8, 9. Furthermore, Deak's report admits that "[u]nion carpenter hourly wages . . . are recognized as being lower than the hourly rates for union ironworkers," Deak Rep., Doc. No. 88-5, at 64, which hardly supports the conclusion that excluding the (higher-priced) Ironworkers from bidding would increase costs.[16]

Deak speculates that overall prices might increase because "[u]nion carpenters may require more hours of labor than other union trades in performing the work," *id.*, but there is no evidence to substantiate that supposition in **[**37]** the record. Deak testified that he "did not do . . . any analysis that said output was reduced because of the [C]arpenters" or that "the [C]arpenters' conduct resulted in a reduction in quality." Deak Dep., Doc. No. 88-6, at 9-10. Other evidence suggests that the Carpenters and the Ironworkers were equally efficient: Roland Levesque, the president and founder of plaintiff M.R.S. Enterprises, testified that the Carpenters "install[ed] exterior metal panels . . . at about the same efficiency rate as . . . sheet metal workers or ironworkers." Local Rule 56(a)(1) Statement, Doc. No. 87, at 22-23 (citing R. Levesque Dep. (Dec. 18, 2013), Ex. 46 to Carol Aff., Doc. No. 88-46, at 4). The Ironworkers complain that Levesque's assessment "simply [represents] testimony of a particular witness," Local Rule 56(a)(2) Statement, Doc. No. 97, at 15, but they, not the Carpenters, bear the burden to introduce sufficient evidence to show an "*actual* adverse effect on competition" under the rule of reason. Capital Imaging, 996 F.2d at 543. They have not done so.

The Ironworkers also fail to substantiate their Sherman Act claims by showing "market power." Market power refers to "the ability to raise prices above those that would be charged in a competitive market." *In re Aggrenox Antitrust Litig., 199 F. Supp. 3d 662, 665 (D. Conn. 2016)* (quoting **[**38]** *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 109, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*); *see* IIB Areeda & Hovenkamp (3d ed.), *supra*, ¶ 501, at 109 ("Market power is the ability to raise price profitably by restricting output. . . . A defendant firm has market power if it can raise price without a total loss of sales."). Market power can be shown directly, "by evidence of the control of prices or the exclusion of competition," or indirectly, by "proof that the defendant has a large percentage share of the relevant market." *Heerwagen v. Clear Channel Commc'ns, 435 F.3d 219, 227 (2d Cir. 2006)*. "The relevant market consists of a relevant product market and a relevant geographic market." *Id.* For exclusive dealing claims, "a plaintiff makes a prima facie case . . . by showing market structure, power, and coverage of the exclusive-dealing arrangement sufficient to create an inference of reduced output and higher prices in the affected market." XI Areeda & Hovenkamp (2d ed.), *supra*, ¶ 1820, at **[*312]** 161. The required degree of foreclosure to state a prima facie case in the exclusive dealing context is at minimum "30 or 40 percent." *See ASE II, 815 F.3d at 61*; *accord* XI Areeda & Hovenkamp (2d ed.), *supra*, ¶ 1822, at 194.

Here, the Ironworkers' effort to show market power fails because the report of their expert witness, Dr. Deak, does not establish a well-defined market **[**39]** or the Carpenters' share within it. The boundaries of the proposed product market are highly uncertain: Deak seems to arbitrarily limit the product market to union labor, even though many general contractors presumably hire non-union labor as well (and the Carpenters themselves allegedly "regard[] non-union carpenter work as [their primary] competition"). *See* Deak Rep., Doc. No. 88-5, at 66. In addition, Deak does not identify the dollar value of the relevant market; the total number of general contractors in the market; or even the number of signatories to the Carpenters' CBAs. *Compare id.* at 66 (stating that "[t]he

---

[16] In their Answers to Interrogatories, the Carpenters offered "reduce[d] [ ] labor costs" due to lower "[w]age and benefit rates" as one reason that general contractors agreed to the restrictive clauses with the Carpenters. *See* Deak Rep., Ex. 5 to Carroll Aff., Doc. No. 88-5, at 73. As the leading antitrust treatise notes, "[e]xclusive contracts are often ways of organizing the market to encourage more competitive pricing than might otherwise occur," such as by "grouping purchases together into a single contract in order to reduce the costs of using the market." XI Areeda & Hovenkamp, *supra*, ¶ 1811, at 144.

[Carpenters] already ha[ve] approximately 400-700 signatory members throughout their six state region including the sub-state relevant market") *with id.* at 67 (stating that "some 700 [general contractor]s and [construction manager]s have signed with the [Carpenters] throughout New England").

With respect to the boundaries of the proposed geographic market, Deak purports to establish (based on the parties' headquarters and the jurisdictions defined in the CBAs) a precise geographic market consisting of Connecticut, Rhode Island, and four counties in western Massachusetts. *Id.* at 46. Nevertheless, **[**40]** throughout his report, Deak seems to rely on evidence of the Carpenters' market share throughout the larger New England region. *See, e.g., id.* at 75 ("[T]he Carpenters are currently signatory with hundreds of construction managers in the New England area and continue to sign additional construction managers."). Because the Carpenters are headquartered in Boston and maintain separate CBAs for work in the "Eastern Massachusetts Jurisdictional Area," to conflate their (perhaps dominant) market share in the Boston area with their market share in Connecticut, Rhode Island, and western Massachusetts likely overstates the Carpenters' power in the relevant geographic market. Simply put, the Ironworkers have "not supplied" the "reliable numbers" and geographic boundaries that "are an essential starting point" for a market power analysis. *See* *Stop & Shop, 373 F.3d at 68*.

The Ironworkers' case boils down to an unwarranted presumption against exclusive dealing agreements. They assert that "you do not have to be an expert in economics to know that if you eliminate competition, prices will eventually rise [and] quality will suffer." Mem. Opp'n Mot. Summ. J., Doc. No. 100, at 42. But that argument begs the question, for "[e]xclusive **[**41]** dealing foreclosing upstream rivals from access to downstream markets may not produce any competitive harm at all."[17] XI Areeda & Hovenkamp (2d ed.), *supra*, ¶ 1802, at 69. Even when a plaintiff suffers a "'foreclosure' injury" in the form of "den[ial of] access to a market" that would otherwise be open, that "private injury . . . may not be injury to *competition*." **[*313]** *Id.* at 71 (emphasis added). "Whether [ ] competition is injured depends on the availability of alternative[s]," as well as "how competitive the market was to begin with." *Id.* at 69.

Because the Ironworkers have not provided any evidence of "lower output and higher prices in a properly defined market," they have not shown "injury to 'competition,'" but (at most) merely injury to themselves as competitors. *See id.* That does not suffice to state a prima facie case under the rule of reason. *See* *NYNEX Corp., 525 U.S. at 135* ("[T]he plaintiff . . . must allege and prove harm, not just to a single competitor, but to the competitive process, *i.e.*, to competition itself."); *Virgin Atl., 257 F.3d at 259* ("[W]hat the antitrust laws are designed to protect is competitive conduct, not individual competitors."). Hence, **[**42]** I grant the defendant's motion for summary judgment for failure to show an adverse effect on competition.

IV. Conclusion

For the foregoing reasons, I grant the Carpenters' motion for summary judgment. The Clerk shall enter judgment in favor of the defendant and close the case.

So ordered.

Dated at Bridgeport, Connecticut, this 23rd day of May 2018.

For Kansas City, Missouri Employees', Retirement System, Plaintiff (1:16-md-02704-PAE): Bonny E Sweeney, LEAD ATTORNEY, Hausfeld, San Francisco, CA; Scott Allan Martin, LEAD ATTORNEY, Hausfeld LLP, New York, NY; Benjamin Galdston, Blair Allen Nicholas, Brandon Marsh, David R. Kaplan, Lucas E. Gilmore, Bernstein Litowitz Berger & Grossmann LLP, San Diego, CA.

For Genesee County Employees' Retirement System, Plaintiff (1:16-md-02704-PAE): David J. Goldsmith, Gregory Scott Asciolla, Jay L. Himes, Karin Elizabeth Garvey, Matthew Joseph Perez, Robin Ann Van Der Meulen, LEAD ATTORNEYS, Labaton & Sucharow LLP (NYC), New York, NY; Daniel Lawrence Brockett, LEAD ATTORNEY, Quinn Emanuel, New York, NY.

For LD Construction LLC on behalf of themselves and all others similarly situated, LDLJ Associates, L.P. on behalf of themselves and all others similarly situated, David Gardner on behalf of himself and all others similarly situated, Plaintiffs (1:16-md-02704-PAE): Jason Allen Zweig, LEAD ATTORNEY, Hagens Berman Sobol Shapiro LLP (NYC), New York, NY; Steve W. Berman, LEAD ATTORNEY, Hagens Berman Sobol **[*5]** Shapiro LLP (Seattle), Seattle, WA.

For Harrison County, Mississippi, Magnolia Regional Health Center, Cullman Regional Medical Center, Inc. on behalf of themselves and all others similarly situated, Plaintiffs (1:16-md-02704-PAE): George A. Zelcs, John Anton Libra, LEAD ATTORNEYS, Korein Tillery, LLC, Chicago, IL; Michael John Guzman, LEAD ATTORNEY, Kellogg, Hansen, Todd, Figel & Frederick PLLC (DC), Washington, DC; R. Bryant McCulley, LEAD ATTORNEY, McCulley McCluer PLLC, Sullivans Island, SC; David Charles Frederick, Derek Tam Ho, Kellogg, Hansen, Todd, Figel & Frederick PLLC (DC), Washington, DC.

For THE CITY OF PHILADELPHIA On Behalf of Itself and All Others Similarly Situated, Plaintiff (1:16-md-02704-PAE): Chad Emerson Bell, George A. Zelcs, LEAD ATTORNEYS, PRO HAC VICE, Korein Tillery, Chicago, IL; John Anton Libra, LEAD ATTORNEYS, Korein Tillery, LLC, Chicago, IL; Kate Lv, LEAD ATTORNEY, PRO HAC VICE, Scott+Scott, Attorneys at Law, LLP, San Diego, CA; Michael John Guzman, LEAD ATTORNEY, Kellogg, Hansen, Todd, Figel & Frederick PLLC (DC), Washington, DC; Randall P. Ewing, Jr., LEAD ATTORNEY, PRO HAC VICE, Korein Tillery, LLC.

For Policemen's Annuity and Benefit Fund of Chicago, **[*6]** Plaintiff (1:16-md-02704-PAE): George A. Zelcs, John Anton Libra, LEAD ATTORNEYS, Korein Tillery, LLC, Chicago, IL; Kate Lv, LEAD ATTORNEY, PRO HAC VICE, Scott+Scott, Attorneys at Law, LLP, San Diego, CA; Michael John Guzman, LEAD ATTORNEY, Kellogg, Hansen, Todd, Figel & Frederick PLLC (DC), Washington, DC.

For Triangle T Partners, LLC On behalf of itself and all others similarly situated, Consolidated Plaintiff (1:16-md-02704-PAE): David A. Langer, Merrill G Davidoff, Berger & Montague, P.C, Philadelphia, PA; Michael C. Dell'Angelo, PRO HAC VICE, Berger & Montague, P.C., Philadelphia, PA.

For Lawrence W. Gardner on behalf of himself and all others similarly situated, Petitioner (1:16-md-02704-PAE): Jason Allen Zweig, LEAD ATTORNEY, Hagens Berman Sobol Shapiro LLP (NYC), New York, NY; Steve W. Berman, LEAD ATTORNEY, Hagens Berman Sobol Shapiro LLP (Seattle), Seattle, WA.

For Bank Of America Corporation, Bank of America, N.A., Merrill Lynch, Pierce, Fenner & Smith Incorporated, Defendants (1:16-md-02704-PAE): Adam Selim Hakki, Richard Franklin Schwed, LEAD ATTORNEYS, New York, NY.

For Barclays PLC, Barclays Bank PLC, Defendants (1:16-md-02704-PAE): Christopher J. Clark, James Ellis Brandt, **[*7]** Lawrence Edward Buterman, LEAD ATTORNEYS, Latham & Watkins LLP (NY), New York, NY; M. Theodore Takougang, LEAD ATTORNEY, PRO HAC VICE, Latham & Watkins LLP (NY), New York, NY; Margaret M. Zwisler, William H Rawson, LEAD ATTORNEYS, PRO HAC VICE, Latham & Watkins LLP (DC), Washington, DC.

For Barclays Capital Inc., Defendant (1:16-md-02704-PAE): Christopher J. Clark, James Ellis Brandt, Lawrence Edward Buterman, LEAD ATTORNEYS, Latham & Watkins LLP (NY), New York, NY; M. Theodore Takougang, LEAD ATTORNEY, PRO HAC VICE, Latham & Watkins LLP (NY), New York, NY; Margaret M. Zwisler, William H Rawson, LEAD ATTORNEYS, PRO HAC VICE, Latham & Watkins LLP (DC), Washington, DC.

For BNP Paribas, S.A., BNP Paribas Securities Corp. Defendants (1:16-md-02704-PAE): Leah Friedman, LEAD ATTORNEY, Friedfields Bruckhaus Deringer US LLP, New York, NY; Marshall Howard Fishman, LEAD ATTORNEY, Christine Vanessa Sama, Goodwin Procter, LLP (NYC), New York, NY; Michael Lacovara, LEAD ATTORNEY, Freshfields Bruckhaus Deringer LLP, New York, NY.

For Citigroup, Inc., Citibank N.A., Citigroup Global Markets Inc., Citigroup Global Markets Limited, Defendants (1:16-md-02704-PAE): Brad Scott Karp, Julia Tarver-Mason Wood, **[*8]** William Clareman, LEAD ATTORNEYS, Paul, Weiss, Rifkind, Wharton & Garrison LLP (NY), New York, NY; Kenneth Anthony Gallo, LEAD ATTORNEY, Paul, Weiss, Rifkind, Wharton & Garrison LLP, New York, NY; Ravi Sharma, LEAD ATTORNEY, PRO HAC VICE, Paul, Weiss, Rifkind, Wharton & Garrison, LLP (DC), Washington, DC; Roberto Gonzalez, LEAD ATTORNEY, Paul, Weiss, Rifkind, Wharton & Garrison, LLP (DC), Washington, DC.

For Credit Suisse Group AG, Credit Suisse AG, Credit Suisse International, Credit Suisse Securities (USA) LLC, Defendant (1:16-md-02704-PAE): David George Januszewski, Elai E. Katz, Herbert Scott Washer, Jason Michael Hall, Sheila Chithran Ramesh, LEAD ATTORNEYS, Cahill Gordon & Reindel LLP, New York, NY.

For Deutsche Bank AG, Deutsche Bank Securities Inc., Defendants (1:16-md-02704-PAE): Eric Peter Stephens, Rebekah E Blake, Tracy V. Schaffer, LEAD ATTORNEYS, Jones Day (NYC), New York, NY; Paula W. Render, LEAD ATTORNEY, PRO HAC VICE, Jones Day (CH), Chicago, IL.

For The Goldman Sachs Group, Inc., Defendant (1:16-md-02704-PAE): Elizabeth P. Papez, LEAD ATTORNEY, PRO HAC VICE, Winston & Strawn LLP, Washington, DC; Joseph Laurence Motto, LEAD ATTORNEY, PRO HAC VICE, Winston & Strawn LLP, **[*9]** Chicago, IL; Mark Steven Geiger, Richard C. Pepperman, II, LEAD ATTORNEYS, Sullivan and Cromwell, LLP(NYC), New York, NY; Robert Y. Sperling, LEAD ATTORNEY, PRO HAC VICE, Winston & Strawn LLP (IL), Chicago, IL; Susannah Providence Torpey, LEAD ATTORNEY, Winston & Strawn LLP (NY), New York, NY.

For Goldman Sachs & Co., Goldman Sachs Bank USA, Goldman Sachs Financial Markets, L.P., Goldman Sachs International, Defendants (1:16-md-02704-PAE): Elizabeth P. Papez, LEAD ATTORNEY, PRO HAC VICE, Winston & Strawn LLP, Washington, DC; Joseph Laurence Motto, LEAD ATTORNEY, PRO HAC VICE, Winston & Strawn LLP, Chicago, IL; Richard C. Pepperman, II, Mark Steven Geiger, LEAD ATTORNEYS, Sullivan and Cromwell, LLP(NYC), New York, NY; Robert Y. Sperling, LEAD ATTORNEY, PRO HAC VICE, Winston & Strawn LLP (IL), Chicago, IL; Susannah Providence Torpey, LEAD ATTORNEY, Winston & Strawn LLP (NY), New York, NY.

For J.P. Morgan Chase & Co., J.P. Morgan Chase Bank, N.A., J.P. Morgan Securities LLC, J.P. Morgan Securities PLC, Defendants (1:16-md-02704-PAE): Andrew D. Lazerow, Katharine Mitchell-Tombras, Robert D. Wick, LEAD ATTORNEYS, PRO HAC VICE, Covington & Burling, L.L.P. (DC), Washington, DC; John S. Playforth, **[*10]** LEAD ATTORNEY, PRO HAC VICE, Covington & Burling LLP, Washington, DC.

For Royal Bank of Scotland PLC, The Royal Bank of Scotland Group PLC, RBS Securities Inc., Defendants (1:16-md-02704-PAE): Arthur J. Burke, LEAD ATTORNEY, Davis Polk & Wardwell, New York, NY; James Irving McClammy, Kelly Lynn McNamee, LEAD ATTORNEYS, Davis Polk & Wardwell LLP, New York, NY.

For UBS AG, UBS Securities LLC, Defendants (1:16-md-02704-PAE): David Charles Bohan, LEAD ATTORNEY, Katten Muchin Rosenman LLP (Chicago), Chicago, IL; Kristin Coveney, LEAD ATTORNEY, PRO HAC VICE, Katten Muchin Rosenman LLP (Chicago), Chicago, IL; Daniel G. Swanson, Gibson, Dunn & Crutcher LLP (CA2), Los Angeles, CA; Gil M. Soffer, Katten Muchin Rosenman LLP, Chicago, IL.

For HSBC Bank USA, N.A., HSBC Securities (USA) Inc., Defendants (1:16-md-02704-PAE): Andrew S. Marovitz, LEAD ATTORNEY, PRO HAC VICE, Mayer Brown LLP (Chicago), Chicago, IL; Britt Marie Miller, LEAD ATTORNEY, PRO HAC VICE, Mayer Brown LLP, Chicago, IL; Richard A. Spehr, LEAD ATTORNEY, Mayer Brown LLP (NY), New York, NY.

For Morgan Stanley, Morgan Stanley Bank, N.A., Morgan Stanley & Co. LLC, Morgan Stanley Capital Services LLC, Morgan Stanley Derivative Products **[*11]** Inc., Morgan Stanley & Co. International plc, Morgan Stanley Bank International Limited, Defendants (1:16-md-02704-PAE): Daniel Slifkin, Michael A Paskin, LEAD ATTORNEYS, Cravath, Swaine & Moore LLP, New York, NY.

For ICAP SEF (US) LLC, ICAP Global Derivatives Limited, ICAP SEF (US) LLC, Defendants (1:16-md-02704-PAE): Harry T. Robins, LEAD ATTORNEY, Morgan, Lewis & Bockius LLP (New York), New York, NY; Jon Randall Roellke, LEAD ATTORNEY, Anthony R. Van Vuren, Morgan, Lewis & Bockius (DC), Washington, DC; Stacey Anne Mahoney, LEAD ATTORNEY, Morgan Lewis & Bockius, LLP (NY), New York, NY.

For IRS Antitrust MDL Plaintiffs, Plaintiff (1:16-mc-02704-PAE): Daniel Lawrence Brockett, Quinn Emanuel, New York, NY; Thomas P Ogden, Wollmuth Maher & Deutsch LLP, New York, NY.

For IRS Antitrust MDL Defendants, Defendant (1:16-mc-02704-PAE): Jon Randall Roellke, Morgan, Lewis & Bockius (DC), Washington, DC.

Judges: Paul A. Engelmayer, United States District Judge.

Opinion by: Paul A. Engelmayer

Opinion

OPINION & ORDER

PAUL A. ENGELMAYER, District Judge:

This decision resolves a motion by the putative class plaintiffs in this multi-district litigation for leave to file a Third Amended Complaint. For the reasons that follow, that motion **[*12]** is granted in part and denied in part.

I. Background

This case centers on claims of *Sherman Act* *§ 1* violations affecting the market for interest-rate swaps ("IRS" or "IRSs"). Plaintiffs' core factual allegations and liability theories, and the case's procedural background through July 28, 2017, are detailed in the 108-page decision the Court issued that day. *See* *In re Interest Rate Swaps Antitrust Litigation, 261 F. Supp. 3d 430 (S.D.N.Y. 2017)* ("*In re IRS*"). It resolved motions to dismiss the two Second Amended Complaints: one by the putative plaintiff class ("SAC"); the other by non-class plaintiffs Javelin Capital Markets LLC ("Javelin") and Tera Group, Inc. ("Tera") ("JTSAC"). The Court incorporates that decision by reference and recites here only necessary background.

A. Initial Proceedings

On November 25, 2015, the initial complaint before this Court was filed. *See* Complaint, (No. 15 Civ. 9319). On June 2, 2016, the United States Judicial Panel on Multidistrict Litigation ("JPML") transferred all related cases to this Court for coordinated or consolidated pretrial proceedings with the actions pending in this District. Dkt. 1.[1]

On July 26, 2016, the Court held an initial conference and stayed formal discovery. *See* Dkt. 92. On August 3, 2016, the Court appointed Quinn **[*13]** Emanuel Urquhart & Sullivan, LLP, and Cohen Milstein Sellers & Toll, PLLC, as interim co-lead counsel for the putative class. Dkt. 99.

On September 9, 2016, class plaintiffs, Dkt. 113, and the Javelin/Tera plaintiffs, Dkt. 114, each filed an Amended Complaint. On November 4, 2016, defendants filed motions to dismiss. *See* Dkts. 123-134.

On December 9, 2016, class plaintiffs filed the SAC, Dkt. 142, and the Javelin/Tera plaintiffs filed the JTSAC, Dkt. 145 ("JTSAC"). The SAC was 145 pages and 406 paragraphs long.

On May 23, 2017, after extensive briefing on motions to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* by each of the then-13 groups of corporate defendants and their affiliates, the Court heard argument. *See* Dkt. 233 (transcript).

B. July 28, 2017: The Court's Ruling on the Motions to Dismiss

In its ruling on the motions to dismiss, the Court drew a sharp distinction between the Sherman Act *§ 1* allegations regarding 2008-2012 (made by class plaintiffs only) and those regarding 2013-2016 (made by both sets of plaintiffs).

The Court dismissed the former claims and sustained the latter. That was for three distinct reasons: (1) the character, depth, and overall plausibility of plaintiffs' claims of collusive conduct among **[*14]** the investment banks who dealt in IRSs ("Dealer Defendants" or "Dealers") in violation of *§ 1* differed markedly across the two periods; (2) plaintiffs' claims based on injuries incurred before November 25,2011 fell outside the four-year statute of limitations and were time-barred; and (3) class plaintiffs lacked antitrust standing to pursue claims covering the pre-2013 period.

1. 2008-2012

The SAC's allegations of unlawful collusion during 2008-2012, the Court held, fell well short of plausibly alleging conduct violating *§ 1*. That was so whether the SAC was construed to allege parallel conduct by competitors occurring under circumstances giving rise to an inference of a *§ 1* conspiracy, direct evidence of a *§ 1* conspiracy, or both. *See generally* *In re IRS, 261 F. Supp. 3d at 463-472*.

As for parallel conduct by the Dealer Defendants, the Court noted, the SAC contained scant allegations of such during this period. The main parallel conduct alleged—choosing in various ways not to support the eventual emergence of electronic all-to-all trading of IRS—did not give rise to an inference of collusion. That was because there was good reason, as a matter of "rational and competitive business strategy," *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 554, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, "for any individual Dealer independently **[*15]** to have sought to maintain the status quo and to discourage, not facilitate, all-to-all IRS exchange trading," because, as alleged, "such platforms presented an existential threat to the Dealers' profit margins as market makers," *In re IRS, 261 F. Supp. 3d at 463-464*.

---

[1] Docket references here are to 16-MD-2704, insofar as many filings pertinent to the motion to amend have not been filed on the docket in No. 16-MC-2704, the "master case" docket established for filings of significance, Dkt. 11, which is intended to encompass motions to dismiss and associated filings. The Court asks counsel henceforth to file substantive motions and supporting submissions, as well as letters relating to discovery disputes and to counsel's monthly status calls with the Court, on the dockets in both 16-MD-2704 and 16-MC-2704.

The inference urged by the SAC of an all-Dealer conspiracy to inhibit future electronic all-to-all trading platforms from eventually coming into being was made all the less plausible, the Court held, given the state of the industry during 2008-2012. Key infrastructure to support electronic anonymous all-to-all IRS trading was not yet in place. These included mechanisms for central clearing accessible to and financially supported by the buy-side. *Id. at 465*.

Rather, the regulatory impetus for the development of all-to-all trading had come from the Dodd-Frank statute, enacted July 21, 2010, and its 2012-2013 implementing regulations. *See Id. at 445-447*. These established a comprehensive regulatory framework for swaps including IRSs; required that swaps be traded on platforms ("swap execution facilities," or "SEFs"); required the buy side to trade IRSs via these new platforms; and mandated the central clearing of IRS trades. *See id.* The CFTC itself, the Court observed, had recognized **[*16]** that mandating central clearing would promote participation by the buy-side in anonymous all-to-all IRS trading in these new trading fora that Dodd-Frank had brought about. *See id. at 446* (citing Clearing Requirements Determination Under *Section 2(h)* of the *CEA, 77 Fed. Reg. 74,284, 74,287 (Dec. 13, 2012)* ("CFTC Clearing Rule")). At the same time, the CFTC had recognized, buy-side participants would face significant costs and burdens adapting to such platforms. These included infrastructural, technological, and financial costs (*e.g.*, posting of financial collateral to enable clearing of their trades).

Further, during 2008-2012, the companies that later came to offer all-to-all anonymous trading platforms for IRSs—Javelin, Tera, and three others—did not yet offer such platforms. There were thus no extant all-to-all trading platforms for the Dealers to boycott. *See generally Id. at 465* ("Before Dodd-Frank made this vital infrastructure a looming reality, there would have been no urgency for collective action to block all-to-all exchange trading from emerging.").

As to purported direct evidence of a conspiracy, the Court noted, the SAC mainly relied on allegations regarding "Project Fusion." *See id. at 465-466*. There, Dealers had purchased a controlling interest in Tradeweb—an entity **[*17]** which had developed a dealer-to-client request-for quotes ("RFQ") platform that operated consistent with the day's norms—allegedly to ensure that it would not expand to introduce all-to-all anonymous trading to the IRS market. *Id.* But the SAC's claims as to that venture fell well short of plausibly alleging a *§ 1* conspiracy. The SAC's claim of a plot to terminate a Tradeweb plan to open an all-to-all IRS platform was highly conclusory, both because the existence of such a plan was summarily pled, *id. at 466*, and because the SAC did not allege direct evidence of a conspiracy to quash such a plan, *id. at 466-467*. Further, the Court held, to the extent collective action was alleged in connection with Dealers' joint ownership in Tradeweb, this claim did not describe *per se* unlawful conduct. It described a joint venture among horizontal competitors that, as pled, was well-funded and had legitimate business objectives and potentially redeeming justifications. Under settled *§ 1* doctrine, it thus could be held unlawful only under the Rule of Reason. But, the Court held, the SAC failed to plead key facts to make out a Rule of Reason claim (including defining Tradeweb's product or geographic market and its market share or **[*18]** power within that market). The SAC also did not allege why Tradeweb's decision to focus its resources on trading platforms and asset classes other than a novel platform for all-to-all IRS trading had been, on balance, anti-competitive. *Id. at 467-469*.

Independently, the Court held that most of the SAC's *§ 1* claims as to 2008-2012 were time-barred. Rejecting plaintiffs' claim of fraudulent concealment, the Court held outside the four-year statute of limitations the SAC's claims based on injuries incurred before November 25, 2011. That ruling effectively supplied an alternative basis to dismiss the SAC's *§ 1* claim to the extent it covered 2008 through November 25,2011. *See id. at 487-490*.

Finally, the Court held, class plaintiffs lacked antitrust standing to pursue claims of injury suffered before 2013. The putative plaintiff must be an "efficient enforcer" of the antitrust laws, and a central factor in that inquiry is whether the plaintiff's claimed injury is speculative. *Id. at 491*. But in the years before 2013—when Dodd-Frank's mandates had yet to take effect and the SEFs that first offered all-to-all IRS trading had yet to emerge—the SAC's *§ 1* claims failed this standard. The SAC's theory was the Dealers had blocked from emerging **[*19]** the species of IRS trading fora that emerged in 2013-2014: platforms enabling electronic all-to-all anonymous trading. It postulated that, had these platforms arisen in 2008-2012, the prices at which class plaintiffs would have traded IRSs would have been superior. This theory of injury, the Court held, was "extraordinarily conjectural," as the SAC's "alternative history of

IRS trading for the first five years of the class period (2008-2012) requires too many leaps of imagination and guesswork for a claim of class injury to be viable." *Id. at 494*. That ruling provided a third basis for the dismissal of the claims covering 2008-2012. *See id. at 490-495*.

2. 2013-2016

In contrast, as to 2013-2016, the Court held, the SAC stated a viable *§ 1* claim of a group boycott. So did the JTSAC, which brought claims to the same effect on behalf of Javelin and Tera, which claimed to have been targeted by a Dealer boycott of the platforms they opened in 2013 and 2014. *See id. at 472*.

As to plausibility, by 2013-2016, the Court noted, platforms for all-to-all anonymous IRS trading had emerged, facilitated by Dodd-Frank and its implementing regulations. The background conditions and market infrastructure thus now made claims of a conspiracy **[*20]** to destroy or marginalize these platforms more plausible. In this period, as alleged, five such platforms emerged. These included three (Tera, Javelin, and TrueEx) that plaintiffs claimed were targets of a Dealer conspiracy. *See id.*

Further, unlike in the 2008-2012 period, the SAC alleged numerous acts of parallel conduct by competing Dealers suggestive of a conspiracy to boycott these platforms, not merely a common decision not to support or trade on these platforms. These included similar Dealer tactics at meetings with Javelin and Tera, parallel withholdings by Dealers of affiliated clearing services, common excuses and vocabulary, parallel conduct towards the exchanges' customers, and parallel refusals to consent to smaller "inter-dealer brokers" doing business with the new exchanges. *Id. at 472-474*. Strikingly, the SAC alleged parallel ruses by four Dealers towards Tera the day after Tera's first IRS trade. The four Dealers feigned sudden interest in "auditing" Tera—in an apparent attempt to block Tera's progress. *Id. at 473-474*. Other alleged incidents and statements by individual Dealers supported the claim of collusion. *Id. at 476-477*. Viewed in total, these allegations made plausible the claim that the Dealers had **[*21]** conspired to stunt these emergent exchanges, which threatened Dealers' profit margins. *See generally id. at 472-481*.

Nor did the other deficiencies of the 2008-2012 claims preclude the 2013-2016 claims. The later claims were undisputedly timely. And, as to antitrust standing, class plaintiffs' theory of injury from 2013-2016 was not inherently unduly speculative. The Court, however, did caution—including in a later order clarifying the scope of trades that class plaintiffs could pursue—that due attention to the mechanics of trading would be necessary as the case progressed to assure that plaintiffs' theories of injury were not unduly speculative. *Id. at 494-495*; *see also* Dkt. 251 (August 29, 2017 order).[2]

C. Subsequent Progress of This Litigation

Following resolution of the motions to dismiss, this litigation moved productively forward. The parties negotiated, and in August 2017 the Court approved, a case management plan governing, *inter alia*, fact discovery. *See* Dkt. 246 (August 21, 2017 order); Dkt. 250 (August 28, 2017 order). The plan set a May 21, 2018 deadline for the substantial completion of document production and a December 21, 2018 deadline for the completion of fact discovery.

To meet these **[*22]** deadlines, the parties and the Court worked intensively. In brief:

---

[2] The balance of the July 28, 2017 decision involved issues not relevant here. On defendant-specific grounds, the Court dismissed plaintiffs' claims against three defendants or groups: a Dealer (HSBC Bank PLC), an inter-dealer broker (ICAP Capital Markets LLC), and an entity (TradeWeb Markets LLC) which allegedly first refrained from opening an all-to-all IRS platform and later opened such a platform but kept it minimally active. *See generally In re IRS, 261 F. Supp. 3d at 483-487*. The Court also rejected defendants' argument that the Dodd-Frank statute impliedly precluded plaintiffs' *§ 1* claims, *id. at 495-498*, and resolved challenges to state-law claims, *id. at 498-501*.

Counsel engaged in extensive negotiations over discovery parameters. These involved counsel for numerous entities, including the putative class; non-class plaintiffs Javelin and Tera; the 11 groups of Dealer Defendants that remained in the case; and third-party institutions to whom discovery was directed. These negotiations addressed such matters as custodians, topics, search terms, and time-frames.

Multiple times, the parties briefed discovery disputes, which the Court resolved in a series of written decisions. *See, e.g.*, Dkt. 266 (October 10, 2017 decision); Dkt. 296 (October 25, 2017 decision); Dkt. 322 (January 8, 2018 decision).

The Court also convened a monthly telephone conference with counsel. Each call was preceded by a joint letter from lead counsel giving a status update on the case, primarily focusing on discovery. These letters and calls enabled the Court to take stock of the progress of the case, including discovery; to give counsel direction on open issues; to receive a preview of unresolved discovery disputes; and to set briefing schedules as to discovery disputes. *See, e.g.*, Dkt. 302 (November 15, 2017 **[*23]** joint letter); Dkt. 308 (transcript of November 17, 2017 call); Dkt. 315 (December 13, 2017 joint letter); Dkt. 320 (transcript of December 15, 2017 call); Dkt. 324 (January 24, 2018 joint letter); Dkt. 331 (transcript of January 26, 2018 call).

Important here, these activities—and the production of documents, now well underway—were conducted against the backdrop of the decision on the motions to dismiss. The Court's rulings as to discovery were premised on—and took as durable—the Court's central holding that the surviving claims in the case were limited to the 2013-2016 period. Two examples illustrate the point.

October 10, 2017 discovery ruling: On October 10, 2017, the Court resolved a dispute as to the start date of the period as to which defendants were obliged to produce documents on topics relevant to the alleged conspiracy in 2013-2016. Plaintiffs argued that defendants should produce documents created on or after January 1, 2009, arguing that events before 2013 might be germane to the formation of the 2013-2016 conspiracy. Defendants proposed a start date of January 1, 2012.

The Court chose an intermediate start date: July 21, 2010, the date of Dodd-Frank's passage. This date, **[*24]** the Court held, balanced plaintiffs' interest in discovering defendants "pre-conspiracy dealings" against the burdens of obliging the 11 defendant groups to make pre-conspiracy discovery. Explaining why documents created after July 21, 2010 were more likely to be relevant than those created before, the Court explained: "[A]fter Dodd-Frank was enacted, it became materially more foreseeable that electronic all-to-all platforms for IRSs would one day develop." Dkt. 266 at 2. The extensive negotiations and agreements among counsel that ensued regarding document production parameters—including the selection of custodians and the assessment of the burdens yielded by particular electronic-review search terms—were premised on this ruling.

January 8, 2018 discovery rulings: On January 8, 2018, the Court resolved an omnibus set of seven discovery disputes that the parties had briefed, after notifying the Court that they had reached an impasse on these issues. *See* Dkt. 311 (notice of impasse); Dkt. 319 (December 19, 2017 joint letter-brief); Dkt. 322 (January 8, 2018 decision). The disputes involved events that had occurred or entities that had existed before 2013. The parties centrally disputed **[*25]** whether these topics were relevant to the surviving (2013-2016) conspiracy claims, and, if so, whether the burden of producing materials as to these topics outweighed the benefits of ordering production.

Resolving these disputes, the Court noted that all seven topics "either exclusively or largely involved the pre-2013 period," with defendants contending that the topics were therefore wholly or largely irrelevant, and plaintiffs "argu[ing] that these topics remain relevant to . . . the alleged Sherman Act *§ 1* conspiracy in 2013-2016 that the Court has held adequately pled." *See* Dkt. 322 at 2. The Court recognized that discovery from earlier years might remain relevant to the 2013-2016 claims (as reflected in the July 21, 2010 discovery cut-off date). But, the Court noted, "requests for discovery as to pre-2013 events" must "be critically evaluated for relevance and. . . any discovery that is ordered [must] be carefully tailored to viable theories of relevance." *Id.* at 3.

Balancing the importance of each category of records sought against the burden and expense of its production, *see Fed. R. Civ. P. 26(b)(1)*, the Court precluded discovery as to some topics altogether as irrelevant or scantly relevant to the surviving claims. **[*26]** As to others, the Court allowed discovery or targeted discovery where an adequate showing of relevance to the 2013-2016 period had been made. *See* Dkt. 322 at 4-13. The parties' ensuing negotiations and agreements regarding document production parameters turned on these rulings, too.

D. February 21, 2018: Plaintiffs Disclose the PTAC

On February 21, 2018, in a letter submitted in advance of a monthly status call, plaintiffs' counsel disclosed their intention to move for leave to file a Proposed Third Amended Complaint ("PTAC"). *See* Dkt. 335 (February 21, 2018 joint letter). The motion, a memorandum of law in support, and the 198-page, 549-paragraph PTAC were filed later that day. *See* Dkt. 337 ("Pl. Mem."), 338-1 ("PTAC").[3] These were filed on the last day on which, under the case management plan, motions seeking leave to amend were permitted.

The PTAC proposed to amend the SAC in three ways. First, plaintiffs proposed to add a plaintiff—the Los Angeles County Employees Retirement Association ("LACERA")—to serve alongside the existing class plaintiff, the Public School Teachers' Pension and Retirement Fund of Chicago ("CPTF"). Second, plaintiffs proposed to amplify their allegations with **[*27]** respect to 2013-2016. Third, most consequentially, plaintiffs proposed to restore their claims as to 2008-2012. In support, the PTAC proposed to add approximately 150 new paragraphs of pre-2013 allegations.

Before February 21, 2018, plaintiffs had not alerted the Court to the possibility of an amendment to revive the five years of dismissed claims. In contrast, plaintiffs had notified the Court in January 2018 of their intention to seek leave to amend to add LACERA as a plaintiff *See* Dkt. 324 at 2.

The PTAC's new allegations as to 2008-2012 largely related to two topics as to which the Court had dismissed claims in July 2017 and denied discovery in January 2018.

"Project Fusion": The first topic involved the 2007 "Project Fusion," addressed above, involving Tradeweb. The Court had dismissed the SAC's claims based on this episode. And in January 2018, the Court had precluded plaintiffs' bid for discovery on "Project Fusion" as irrelevant to the surviving claims. Dkt. 322 at 6.[4]

Swapstream: The second topic was a trading platform, Swapstream, which the Chicago Mercantile Exchange ("CME") had operated in 2008-2010. The SAC had alleged that, in 2008, CME had announced plans to introduce **[*28]** a clearing product called "CME Cleared Swaps" for all over-the-counter ("OTC") swaps executed on Swapstream. SAC ¶¶ 184-185. The Dealers, concerned that introduction of this product could lead CME one day to develop "successful clearinghouses and exchanges for other asset classes," *id.* ¶ 186, had "boycotted" Swapstream and relied instead on a different clearing entity, SwapClear, that cleared only inter-dealer trades, *id.* ¶ 188. In its ruling on the motions to dismiss, the Court had held that the Dealers' common decisions not to use CME's new clearing product did not make out a claim of collusion. *In re IRS, 261 F. Supp. 3d at 464 & n.13*. And, in January 2018, after plaintiffs had sought extensive discovery as to Swapstream and its clearing products on the theory that Swapstream had been a "SEF precursor," the Court had declined to authorize such discovery. Dkt. 322 at 4.

E. The February 23, 2018 Status Call

---

[3] Javelin and Tera have not moved to amend their Second Amended Complaints. The Court hereafter uses "plaintiffs" to refer to class plaintiffs.

[4] The Court had allowed more limited discovery, after July 21, 2010, into the "Dealers' communications and collaboration in connection with operating Tradeweb." *Id.* This was to enable plaintiffs to test whether Tradeweb, in which Dealer personnel had served as directors or officers, had provided a forum in which Dealers had conspired to further the 2013-2016 conspiracy. *Id.* at 6-7.

A monthly status call was held two days later. *See* Dkt. 345 (transcript of February 23, 2018 call). The Court questioned class plaintiffs' counsel about the PTAC.

Counsel acknowledged that, apart from the addition of LACERA, counsel had not notified the defense about a possible amendment of the complaint until February **[*29]** 14, 2018. Dkt. 345 at 19-20. Plaintiffs' counsel further acknowledged that they had been considering filing a PTAC that would revive the dismissed claims from the date (July 28, 2017) of the Court's ruling dismissing those claims. *Id.* at 20.

Plaintiffs' counsel further acknowledged that a decision had been made *not* to notify the defense or the Court earlier of the possibility of a motion to amend to restore the 2008-2012 claims: "We wanted to make sure the amended complaint was in a near final form so that we could tell them with certainty what the new allegations would be." *Id.* at 21. Asked whether counsel had given thought during the preceding six-to-seven months to whether a possible amendment to revive the 2008-2012 claims might bear on the ongoing discovery discussions and negotiations, plaintiffs' counsel stated that they had not viewed their silence as "an affirmative decision to withhold information," but as a decision "to make sure this complaint was in a near final form and that we were set on filing." *Id.* at 21-22. Plaintiffs' counsel admitted that, were the 2008-2012 claims revived, it "would have an effect on the scope of discovery." *Id.* at 22.

Asked whether it had occurred to counsel that the PTAC might moot **[*30]** "the substantial investment of time" that counsel and the Court had spent since August "resolving and discussing discovery issues," plaintiffs' counsel stated: "It did." *Id.* Plaintiffs' counsel added: "We apologize for any inconvenience to the Court and defense counsel." *Id.* Counsel added that "[c]ertain critical witnesses only came to light recently and were still being talked to up through the time period that we notified defendants." *Id.* Reminded that they had given notice a month earlier to the proposed addition of LACERA, plaintiffs' counsel reiterated that while they had considered alerting the Court and defense in earlier status letters to the possible amendment to revive the dismissed claims, "we wanted to make sure it was something we were going to go through with . . . . And we again apologize for any inconvenience to the Court." *Id.* at 23.

Finally, plaintiffs' counsel clarified that, despite the PTAC's listing as defendants two entities (HSBC and ICAP) whom the Court had dismissed, plaintiffs had not intended to restore claims against those parties. But, plaintiffs' counsel stated, the PTAC was intended to restore claims against Tradeweb, another dismissed defendant. *Id.* at 26. Plaintiffs' **[*31]** counsel stated that they had not yet notified Tradeweb of the amended complaint that had been filed to restore claims against it. *Id.* at 26-28.

F. Later Submissions Relating to the PTAC

On March 30, 2018, defense counsel filed a memorandum of law opposing the PTAC to the extent it sought to restore dismissed claims, Dkt. 353 ("D. Mem."), and a declaration of Richard F. Schwed in support, Dkt. 354 ("Schwed Decl."). The same day, counsel for Tradeweb submitted a letter opposing the restoration of claims against it. Dkt. 355.

On April 2, 2018, plaintiffs' counsel filed a letter seeking leave to file a reply, noting that the defense had filed with their brief a document (the Project Magellan Agreement) relating to Swapstream which plaintiffs had only recently seen, Dkt. 356, and a declaration of counsel addressing the filing of the PTAC, Dkt. 356-1. The Court authorized a reply on that point. Dkt. 357. On April 3, 2018, plaintiffs filed a reply. Dkt. 359.

III. Discussion

The PTAC proposes to amend the SAC by (1) adding LACERA as a plaintiff; (2) amplifying the factual allegations regarding the 2013-2016 period as to which plaintiffs' *§ 1* claims have been held viable; and (3) adding extensive new factual allegations **[*32]** regarding 2008-2012 and on that basis reviving plaintiffs' claims as to that period. The

Court reviews these three categories of proposed amendments in turn, after first reviewing the governing legal standards.

A. Applicable Legal Standards

"Although *Rule 15(a) of the Federal Rules of Civil Procedure* provides that leave to amend 'shall be freely given when justice so requires,' it is within the sound discretion of the district court to grant or deny leave to amend." *McCarthy v. Dun & Bradstreet Corp., 482 F.3d 184, 200 (2d Cir. 2007)*. "A district court has discretion to deny leave for good reason, including futility, bad faith, undue delay, or undue prejudice to the opposing party." *Id.* (citing *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*). Leave to amend is properly denied upon on a showing of prejudice or bad faith, and an "[a]mendment may be prejudicial when, among other things, it would 'require the opponent to expend significant additional resources to conduct discovery and prepare for trial' or 'significantly delay the resolution of the dispute.' *AEP Energy Servs. Gas Holding Corp. v. Bank of Am., NA., 626 F.3d 699, 725-26 (2d Cir. 2010)* (quoting *State Teachers Ret. Bd. v. Fluor Corp., 654 F.2d 843, 856 (2d Cir. 1981))*; *see also* *Cresswell v. Sullivan & Cromwell, 922 F.2d 60, 72 (2d Cir. 1990)* ("The Court plainly has discretion . . . to deny leave to amend when the motion is made after an inordinate delay, no satisfactory explanation is offered for the delay, and the amendment would prejudice the defendant").

B. Leave to Add LACERA as a Plaintiff

Plaintiffs seek leave **[*33]** to add LACERA, a California municipal pension fund, as a plaintiff. Defendants do not oppose this, while reserving the right later to challenge LACERA's standing depending on discovery.

The Court grants this motion. The PTAC alleges facts about LACERA that make it a suitable plaintiff: As of June 30, 2016, late in the class period, LACERA held net assets in trust for pension benefits totaling $53.8 billion, and during this period, "LACERA entered into IRS transactions directly with multiple Dealer Defendants." PTAC ¶ 39. Adding LACERA has the benefit of assuring, on the anticipated motion for class certification, that the universe of IRS trades involving putative class plaintiffs will be broader, more diverse, and potentially more representative of the variety of covered trades. Defendants, who have had notice of LACERA's prospective addition since January 2018, do not claim that adding LACERA would meaningfully add to discovery burdens or affect the existing schedule.

C. Leave to Amplify the 2013-2016 Allegations

Plaintiffs seek leave to elaborate on the factual allegations regarding the 2013-2016 period as to which the Court has upheld the SAC's claims as viable. Defendants also do **[*34]** not oppose this amendment.

The Court grants this motion. The PTAC's new allegations about the 2013-2016 period fortify—and give defendants fuller notice of the nature of—plaintiffs' claims.

For example, the PTAC newly alleges: (1) a March 2013 meeting at which Tera demonstrated its trading platform, and after which an identified J.P. Morgan collateralized default swap trader warned a Tera employee that if Tera launched an anonymous central limit order book for swaps, the employee "would need personal security and should check his car for bombs," PTAC ¶ 357; (2) Javelin's October 2013 filing of the SEF industry's first "Made Available-to-Trade" ("MAT") application to the CFTC, which, if granted, would have enabled a wide range of cleared IRSs to be executed on SEFs, *id.* ¶ 408, but which prompted complaints and a withdrawal of liquidity from a Dealer, RBS, *id.* ¶ 409; (3) a warning by a Dealer employee to a Javelin representative, following Javelin's MAT application, that he "would never work on Wall Street again," *id.* ¶ 411; (4) the existence of buy-side support as of November 2013 for Javelin's platform and the expressed hope of these firms that Javelin's new "phased-in approach" for **[*35]** certain swaps might appease the Dealer Defendants, but which proved a "non-starter" because the Dealers reacted with "hostility," *id.* ¶¶ 412-413; and (5) an October 2014 meeting with Barclay's at which a Javelin representative was told that the Dealer Defendants had already "boxed out" Javelin's platform and at which "Barclays personnel expressly warned against any further MAT application, and even raised the prospect of physical intimidation," *id.* ¶ 415.

The PTAC also adds an allegation that appears aimed at clarifying the scope of damages plaintiffs intend to pursue if liability is established as to the 2013-2016 period. It alleges that had the three SEFs against which plaintiffs claim the Dealer Defendants conspired not been impeded, there would have been greater transparency and price competition not only on all-to-all IRS trades, but also, derivatively, more beneficial pricing on trades executed over the counter and on non-anonymous RFQ platforms. *See id.* ¶¶ 477-478.

Defendants do not argue that these new allegations would impose material burdens, meaningfully affect ongoing discovery, or disrupt the existing schedule. The Court accordingly permits those proposed amendments that **[*36]** amplify plaintiffs' claims as to 2013-2016.

D. Leave to Revive Plaintiffs' Claims as to 2008-2012

The thrust of the PTAC's new allegations as to 2008-2012 is that the Dealer Defendants colluded to impede from emerging two electronic-trading platforms that would have supported all-to-all anonymous trading of IRSs. One would have been operated by Tradeweb, *see, e.g., id.* ¶¶ 212-227, 238-240, 242, 277-282; the other, Swapstream, would have been operated by CME, *see, e.g., id.* ¶¶ 119-211; *see also id.* P 14 (CME and Tradeweb, as of 2007, were "two threats to the Dealer Defendants' hold on the IRS market"). The PTAC attempts to cure the SAC's pleading deficiencies as to these potential platforms. It also includes new allegations to the effect that the buy-side would have responded favorably during 2008-2012 had an all-to-all platform for IRS trading existed, and that the "pillars" needed to support such all-to-all trading (such as mechanisms for central clearing, order routing, and post-trade processing) were being used for inter-Dealer trades before Dodd-Frank and were adaptable to the buy-side's use. *See, e.g., id.* ¶¶ 92, 100-101, 104-118.

For multiple independent reasons, the Court denies plaintiffs **[*37]** leave to file the PTAC to the extent that it attempts to revive plaintiffs' claims as to 2008-2012.

1. Futility

The PTAC does not remedy the gauntlet of deficiencies that led the Court to dismiss the SAC's claims as to 2008-2012 for failure to state a claim. Amending these claims would thus be futile. Four points in particular merit discussion:

Antitrust standing/speculative injury: Even assuming a *§ 1* conspiracy were now well-pled based on the episodes alleged regarding the potential Tradeweb and CME platforms—and the Court does not so find—plaintiffs' theory of injury as to 2008-2012 would remain far too conjectural to survive.

A court determining whether a plaintiff is an "efficient enforcer" of the antitrust laws so as to have antitrust standing must consider factors including "the speculativeness of the [plaintiff's] alleged injury." *See* *In re IRS, 261 F. Supp. 3d at 490-491* (quoting *Gatt Commc'ns, Inc. v. PMC Assocs., LLC, 711 F.3d 68,78 (2d Cir. 2013)* (internal quotations omitted)). On this basis, the Court previously held that even were the SAC' s claims as to 2008-2012 otherwise viable, they would fail this requirement:

> [C]lass plaintiffs' theory of pre-2013 injury is extraordinarily conjectural, such that, had the *§ 1* claim as to that period not otherwise have been dismissed as implausible **[*38]** (and had the pre-2012 aspects of that claim not been dismissed as time-barred), the claim would not satisfy the requirements of antitrust standing. Among other infirmities, it is "entirely uncertain," *Gatt, 711 F.3d at 79*, that, absent the scheme, the necessary infrastructural preconditions for all-to-all trading, such as central clearing of IRS trades, would have developed before Dodd-Frank willed them into being in 2013. Plaintiffs' alternative history of IRS trading for the first five years of the class period (2008-2012) requires too many leaps of imagination and guesswork for a claim of

> class injury to be viable. *See Reading [Indus., Inc. v. Kennecott Copper Corp.*], 631 F.2d [10], at [14] [(2d Cir. 1980)] (no antitrust standing where indirect purchaser at end of vertical distribution line "predicate[d] its claim of injury on a basis too tenuous and conjectural for a valid causal finding of anticompetitive effect and damages"); *see also Paycom [Billing Servs. Inc. v. MasterCard Int'l Inc.*], 467 F.3d [283,] 293 [(2d Cir. 2006)] (no antitrust standing where chain of causation was "highly speculative" and was built on "conclusory allegations").

Id. at 494.

The new allegations in the PTAC do not cure this fundamental problem. Plaintiffs' claim is still that, that but for defendants' conduct, all-to-all anonymous trading platforms would have developed **[*39]** years prior to Dodd-Frank, such that defendants' conduct caused them injury on their 2008-2012 IRS trades. But in various ways including the following, plaintiffs' 2008-2012 theory of injury remains a product of speculation, imagination, and guesswork.

First, the PTAC does not allege that any such platform actually developed in the pre-2013 period, or came anywhere close. In this respect, the PTAC's allegations as to 2008-2012, like the SAC's, sharply contrast with those regarding 2013-2016. With respect to 2013-2016, plaintiffs concretely allege collusion to boycott and otherwise stymie three extant all-to-all anonymous IRS trading platforms (Javelin, Tera, and TrueEx) accessible to the buy-side. Plaintiffs are joined in so alleging by two entities that operated such platforms, Javelin and Tera. In contrast, the PTAC does not allege that either CME or Tradeweb ever launched such a platform during 2008-2012. *See* discussion *infra*, at 23-29. Nor does the PTAC allege that—despite such a platform's ostensible business logic, its ostensible appeal at the time to the buy-side, and the ostensible existence of the technological and infrastructural "pillars" that could be adapted to support such a platform—any **[*40]** entity, including ones like Bloomberg that are not alleged to have been boycotted, ever launched or came close to launching such a platform until after Dodd-Frank's mandates took effect in 2013.

Second, while the PTAC adds detail to its allegations as to the existence *among Dealers* of clearing arrangements, post-trade processing technology, and the necessary legal infrastructure in the pre-2013 period, *see* PTAC ¶¶ 104-118, its repeated allegation that these building blocks would have been seamlessly *adapted* to the all-to-all context, *see, e.g., id.* ¶¶ 100, 110-111,117, is conclusory. Plaintiffs posit the ready adaptation of such infrastructure as central clearing of trades from an inter-dealer environment in which swaps were traded among highly capitalized, repeat players to one that facilitated trading of sophisticated derivatives by any market participant, no matter how small, thinly capitalized, or inexperienced. But the PTAC does not concretely allege why this process would have been natural, fluid, or at all likely. On the contrary, the PTAC—tracking the observations of the CFTC when it later guided this process—elsewhere notes some of the formidable hurdles to such an evolution. **[*41]** *See, e.g.*, PTAC ¶¶ 98, 100, 110, 115, 334, 345 (acknowledging that buy-side clearing would require "operational changes," "connections," legal arrangements, collateral arrangements, and retention of clearing agents).

Third, the PTAC's claim that buy-side firms would have participated in an anonymous, all-to-all platform had one been introduced before Dodd-Frank is an *ipse dixit*. Although the PTAC alleges that buy-side firms were interested conceptually in such a potential platform, the PTAC does not allege that any buy-side firm, before Dodd-Frank's mandates took effect, had invested in any of the collateral, technological, or legal arrangements needed to facilitate such participation in anonymous all-to-all trading.[5] Class plaintiffs CPTF and LACERA, large public pension funds, do not allege that they did so. And while the PTAC lists large buy-side firms that had expressed interest in using central clearing so as to permit trading on an all-to-all platform, *see, e.g.*, PTAC ¶¶ 133-134 (listing Allstate, BlackRock, DE Shaw, Freddie Mac and PIMCO as firms to whom CME "successfully reached out," and stating that Citadel, Countrywide Financial Corporation, Nomura, and other "asset managers, **[*42]** hedge funds, and proprietary trading firms" had committed to "an Early Adopter Program for clearing via Swapstream"), it does not allege that any such firm made any investment or took other concrete action toward this end pre-Dodd-Frank. None of these firms is party to this lawsuit.

---

[5] *See* CFTC Clearing Rule at 74,323 (IRS clearing requires "startup and ongoing costs relating to technology and infrastructure, new or updated legal agreements, . . . and costs related to collateralization").

Indeed, even after Dodd-Frank had *mandated* the central clearing and collateralization arrangements necessary to enable all-to-all swap trading, compliance with these obligations by buy-side participants proved challenging: Ultimately, the CFTC delayed implementation of its mandates, recognizing as late as December 2012 that buy-side firms were still scrambling to achieve "operational readiness" to clear their trades.[6] As the Court earlier observed: "The CFTC delayed implementation of this mandate to 2013, in part due to 'multiple requests from buy-side entities for extra time to cope with the costs and burdens imposed by implementing mandatory clearing, which one commenter described as 'overwhelming." *See* *In re IRS, 261 F. Supp. 3d at 446* (quoting CFTC Clearing Rule at 74,320).

Fourth and finally, to resolve reliably class plaintiffs' claim to have experienced pricing injuries on their 2008-2012 trades as a result of the absence of the IRS trading platforms they **[*43]** imagine, a jury presumably would have to do more than merely posit the existence of some such platform. A jury would also have to conjure features of the platform or platforms that might have been, such as their design, mechanics, costs, entry barriers, efficiencies, limitations, regulatory constraints, and trading metrics and modalities. The PTAC scarcely addresses such matters, even as to the platforms that it claims CME and Tradeweb, but for the alleged boycott, would have introduced.[7] Nor can the structural features of the allegedly aborted platforms be inferred from later events. While Dodd-Frank put into place a "SEF" framework for swaps trading, it cannot be assumed that the free market—but for the Dealers' allegedly illegal actions to quell CME and Tradeweb—would organically have arrived at the same place. The PTAC leaves these important parameters, which may well be inherently unknowable, to speculation.

In light of these and other factors, a jury evaluating plaintiffs' claims to have experienced injuries between 2008-2012 from the alleged conspiracy would thus be required to imagine a mode of market trading that—until mandated by a landmark federal statute and its implementing **[*44]** regulations aimed at stabilizing this corner of the financial system—never came to be (or even close). The PTAC's 2008-2012 claims would unavoidably require a jury to conjure an alternative history in which a form of marketplace that took federal legislation to bring about would have organically sprung up. Such would require an unacceptable amount of conjecture.

The PTAC's claim of injury as to 2008-2012, anchored in an imagined alternate history, therefore remains unacceptably speculative. It is "too tenuous and conjectural for a valid causal finding of anticompetitive effect and damages." *Reading, 631 F.2d at 13*.

Tradeweb/"Project Fusion" allegations: The PTAC also fails to rehabilitate the claim that "Project Fusion" violated *§ 1*. The Court held conclusory the SAC's allegation that "Tradeweb was planning to introduce electronic all-to-all trading to the IRS market" by "late 2007." The PTAC abandons that claim. In its stead, the PTAC asserts that (1) Tradeweb was gradually upgrading its swap trading capabilities and by 2006 "was in a race with CME and Bloomberg to develop the most advanced swaps execution platform," PTAC ¶ 212; (2) introducing all-to-all IRS trading was a "competitive necessity" for Tradeweb, **[*45]** because its "formidable adversaries" Bloomberg and CME were capable of, and exploring, doing so, *id.* ¶ 219; (3) Tradeweb was "primed to adopt all-to-all trading with central clearing," *id.* ¶ 102, and (4) unidentified Tradeweb executives, at unspecified times, "discussed the threat" presented by Bloomberg and CME and "discussed whether Tradeweb should upgrade its IRS trading platform to an all-to-all anonymous platform to fend off these threats," *id.* ¶ 223.

These reconfigured allegations about amorphous "discuss[ions]" and Tradeweb's being "primed" to adopt all-to-all trading, *id.* ¶ 102, again fall far short of plausibly alleging plaintiffs' "critical background premise," *In re IRS, 261 F. Supp. 3d at 466*: that Tradeweb was planning in 2007 to launch all-to-all IRS trading. Such a plan cannot be

---

[6] *See* CFTC Clearing Rule, at 74,324 (stating in December 2012 that, "[i]n response to . . . concerns about legal documentation and operational readiness, the Commission. . . clarified that compliance with the clearing requirement will not be required for any swaps until March 11, 2013").

[7] In contrast to the 2013-2016 allegations, the owner-operators of the two platforms allegedly quashed in earlier years do not join in this lawsuit. (CME is a non-party. Tradeweb was sued in the SAC but dismissed; the PTAC would restore the claims against it.) The PTAC does not allege that, prior to Dodd-Frank, concrete specifications were ever developed for a CME or Tradeweb all-to-all trading platform for IRSs.

inferred, either, from the PTAC's general claims that Tradeweb intended to offer "efficient electronic trading," PTAC ¶¶ 215, 218, or that, but for a conspiracy, competitive pressure from Bloomberg and CME would have led Tradeweb to offer this form of IRS trading platform, *Id.* ¶¶ 219, 221. CME never launched such a platform, *see id.* ¶¶ 135, 159, and Bloomberg—which plaintiffs do not claim was the subject of a boycott or anything **[*46]** other than a total free agent—elected not to do so until Dodd-Frank compelled it to, *id.* ¶¶ 226, 442 & n.166. The PTAC's theory of a plot to block a Tradeweb plan to introduce all-to-all IRS trading thus starts with the ill-pled premise that there ever was such a plan.

The PTAC also fails to rectify the other pleading deficiencies in the Project Fusion allegations. The Court earlier held that Project Fusion, as a joint venture, was subject to review only under the Rule of Reason. To elude this ruling, plaintiffs dub the Project Fusion joint venture a "sham" and a "formalistic shell," PTAC ¶¶ 271, 282. But as the Court has explained, the facts pled in the SAC were inconsistent with those labels. Rather, the SAC alleged that:

> (1) The Dealers invested $280 million in Tradeweb; (2) they owned Tradeweb alongside existing owner Thomson; (3) Tradeweb, post-acquisition, was organized consistent with customary corporate formalities; (4) Tradeweb proceeded to expand other aspects of its trading platforms; and (5) its decision not to offer an all-to-all trading platform until 2013 put it on par with all other trading platforms of the day, including . . . Tera, Javelin, TrueEx, and Bloomberg.

In re IRS, 261 F. Supp. 3d at 468 n.17. Notably, **[*47]** the PTAC continues to plead these facts. *See* PTAC ¶¶ 241-251,268-276. Accordingly, even assuming a well-pled agreement among owners to terminate a Tradeweb plan to open an all-to-all IRS trading platform, the Project Fusion joint venture as alleged remains subject to review only under the Rule of Reason. *In re IRS, 261 F. Supp. 3d at 467-468* (collecting cases).[8]

The PTAC adds two paragraphs of allegations as to application of the Rule of Reason. *See* PTAC ¶¶ 281-282. These are far too spare and incomplete to close the gaps in the SAC's pleadings on this point. *See* *In re IRS, 261 F. Supp. 3d at 468-469*. Like the SAC, the PTAC lacks allegations defining Tradeweb's product or geographic market, *id. at 469*. It loosely recites that "[t]he relevant market is the market for IRS," PTAC ¶ 281; *compare* SAC IN 398-400, but that allegation is a mismatch for Tradeweb's function as alleged, which was not as a buyer or seller of (nor a market marker for) IRSs, but as a provider of electronic trading platforms, *In re IRS, 261 F. Supp. 3d at 468*. As to that market, the PTAC does not make any allegations as to Tradeweb's market power, let alone regarding its actual or potential competitors and/or the barriers to other entrants. It is silent as to the market share of Tradeweb's then-competitors (*e.g.*, Bloomberg, the New **[*48]** York Stock Exchange, Nasdaq, CME, or others). The assembled pleadings again do not allege "that Tradeweb had any presence, let alone power, in *any* market." *Id. at 469*.

The PTAC's failure to situate Tradeweb in any relevant market, as required, again leaves to conjecture the impact of this one market participant's alleged decision not to introduce a novel product (a new IRS trading platform) in favor of other business priorities. *See* *id. at 469*. And while the PTAC recites that this decision was anti-competitive because it "reduce[d] output," PTAC ¶ 280, it lacks non-conclusory allegations as to the pro-competitive benefits and anti-competitive harms of the joint venture's decision to focus Tradeweb's offerings (like those of competitor Bloomberg) on other products and platforms. Measured against the standards applicable to Rule of Reason claims, *see* *In re IRS, 261 F. Supp. 3d at 468*, the PTAC, like its predecessor, falls well short.

CME/Swapstream allegations: The vast majority of plaintiffs' new factual allegations concern CME's Swapstream platform. The PTAC substantially overhauls the SAC's claim of a Dealer boycott of that platform and an affiliated

---

[8] In a separate bid to avoid Rule of Reason review, the PTAC labels the Tradeweb joint venture a "naked restraint" that was the product of collusion between the Dealer investors and Tradeweb itself On this basis, it alleges that Tradeweb's decisions after Project Fusion to forgo a plan to open an all-to-all IRS platform warrant per se condemnation. PTAC ¶ 277. This label notwithstanding, on the facts pled, as under the SAC, Tradeweb was not a horizontal competitor of the Dealers, as "it was a provider of electronic trading platforms, not a market maker." *In re IRS, 261 F. Supp. 3d at 468*. The label "naked restraint," which ***antitrust law*** uses in connection with horizontal competitors, therefore, does not fit.

fledgling clearing mechanism, CME Cleared Swaps. While the new allegations significantly **[*49]** flesh out plaintiffs' claims, they do not, in the end, viably plead a *§ 1* violation.

The PTAC alleges that, in 2006, CME, an operator of derivatives exchanges and trading platforms, PTAC ¶¶ 121-122, acquired a trading platform known as Swapstream, which until then had focused on a limited set of dealer-to-dealer IRS swaps in Europe, *id.* ¶¶ 124-127. It alleges that CME envisioned transforming Swapstream into a worldwide electronic platform for all-to-all anonymous IRS trading, *id.* ¶¶ 125,127,194, and that "[b]uy-side firms were clamoring to trade on Swapstream," *id.* ¶¶ 132-133. But, it alleges, CME realized the platform needed "a critical mass" of Dealer support to succeed. *Id.* ¶ 135. CME approached multiple Dealers and offered them "equity in the platform and an opportunity for revenue sharing." Supplemental Declaration of Richard Cohen, Dkt. 319-2 ("Cohen Suppl. Decl."), at ¶ 11 (cited at PTAC ¶ 105 n.19); *see also* PTAC ¶ 136. It did not find takers: certain Dealers (including Bank of America, Citi, Credit Suisse, Goldman Sachs, and JPMorgan) initially stated that they would "not support an IRS execution platform," PTAC ¶ 144, while others "were less overtly hostile to Swapstream, but **[*50]** still would not support it," *id.* ¶ 145. The PTAC alleges that "[p]rior to the[ir] meetings with the CME, the Dealer Defendants met and coordinated their positions and messaging." *Id.* ¶ 145. It further alleges that Dealers articulated "pretextual" concerns with CME's platform. *Id.* ¶¶ 183-184. CME tried to induce smaller dealers to participate by extending them preferred "founding member" status, but these efforts also did not bear fruit. *Id.* ¶¶ 150-151.

In fall 2008, CME's discussions with individual Dealers entered a second phase. By that time, CME's negotiations had "morphed into a group discussion" between CME and multiple Dealers, Cohen Suppl. Decl. ¶ 11, as a result, the PTAC alleges, of Dealers' insistence on "collective negotiations" as a means to "monitor and control Swapstream's development," *id.* ¶ 152. The Dealers were represented in these negotiations by a common lawyer, Edward Rosen from the Cleary Gottlieb firm. *Id.* ¶ 153. In the negotiations, the Dealers allegedly took common positions, sought "governance" over the platform as a means "to ensure they could control [its] development," and discouraged CME from operating a joint trading-and-clearing platform. *Id.* ¶ 155. Ultimately, **[*51]** CME "was unable to secure a critical mass of liquidity providers" and therefore "abandon[ed] Swapstream" as a trading platform, focusing instead on IRS clearing. *Id.* ¶¶ 158-159.

The PTAC alleges that CME next initiated joint negotiations with the Dealers regarding a "clearing-only solution" that would be "open to the buy-side." *Id.* ¶¶ 160-161. During these "Project Magellan" discussions, CME offered Dealers "revenue sharing" and "equity" in exchange for commitments to send trades to the new clearing platform. *Id.* ¶ 165. In these negotiations, the Dealers again took common positions, including insisting on means of control over CME's clearing platform. *Id.* ¶¶ 174-177. The negotiations led to a written "Clearing Revenue Share Agreement" between CME and most Dealer Defendants (save BPS). *See id.* ¶¶ 179-180. Under that agreement, the participating Dealers agreed to provide minimum clearing volume to CME in exchange for revenue sharing. *Id.* ¶ 179; *see also* Schwed Decl. Exh. K ("Magellan Agreement") §§ 2.01, 2.03, 4.02(e).[9] The PTAC terms the revenue-sharing provision a "poison pill" that provided that, "should CME ever launch an execution platform, the Dealer Defendants would capture nearly all the profits." **[*52]** PTAC ¶ 179.

The PTAC's allegations regarding Swapstream are more substantial than those regarding Tradeweb. And the PTAC pointedly presents the Swapstream allegations in a manner that plaintiffs argue "mirror[s] those already found sufficient by the Court as to the 2013-2016 period," including allegations of parallel conduct beyond refusing to agree to use the IRS platform that CME proposed to roll out. *See* Pl. Mem. 12-13. However, despite the PTAC's attempt to pattern the new allegations on those involving later years that the Court has sustained, the new allegations as to Swapstream differ materially from—and far less plausibly indicate a *§ 1* conspiracy than—plaintiffs' well-pled allegations of a 2013-2016 plot to boycott Javelin, Tera and TrueEx.

---

[9] The Defendants filed the Magellan Agreement under seal pursuant to the protective order governing confidential material entered in this case, see Dkt. 300, and this Court's order, Dkt. 351.

First, a number of the PTAC's core allegations as to the scheme against Swapstream must be discounted or disregarded altogether, because they are contradicted either by pled or cognizable facts and/or because they fail pleading standards.

Plaintiffs, for example, claim that CME was driven to open an all-to-all IRS trading platform in 2007 because it, "Tradeweb, and Bloomberg [were] racing to be the first to launch such a platform." Pl. Mem. at **[*53]** 7; *see* PTAC ¶¶ 212, 220-224. However, this figure of speech aside, the PTAC does not allege such a "race" with these competitors, neither of whom is non-conclusorily pled to have then, or at any time before Dodd-Frank, planned or intended any such platform.[10]

Plaintiffs also imply that CME launched the Swapstream IRS trading platform before abandoning it. *See* Pl. Mem. at 8. In fact, on close reading, the PTAC confirms that no such platform was built or launched. *See, e.g.*, PTAC ¶¶ 119, 131, 135, 159. The PTAC's Swapstream theory is thus best described not as a Dealer boycott of an extant platform—as plaintiffs adequately plead with respect to Javelin, Tera, and TrueEx—but of a plot to deter CME from rolling out a new offering.

Plaintiffs also claim that the Project Magellan Agreement contained a "poison pill" aimed at pretermitting any attempt by CME to open an all-to-all anonymous IRS trading platform. *Id.* ¶ 179. Defendants attached the Project Magellan Agreement to their papers opposing leave to add these new claims. It is undisputedly cognizable here. The agreement demonstrably does *not* contain a "poison pill" or anything close. Rather, as defendants observe, the provision at issue **[*54]** states only that if the CME "establish[es] a new Electronic Trading Platform for IRS," it will grant the Magellan dealers a limited right to try to negotiate a Magellan-like agreement with the new trading platform. Magellan Agreement, § 5.05(b)(i). Specifically, CME agreed to:

> Negotiate in good faith with the Dealer Founding Members [i.e., the Magellan dealers] the terms of their participation in the Electronic Trading Platform on the most favorable terms offered to any other prospective participant supporting IRS Products on such Electronic Trading Platform (including . . . rights at least as favorable as the terms set forth in this Agreement, unless CME or such Electronic Trading Platform can demonstrate a reasonable commercial or regulatory basis for requiring adjustment of such terms) . . . .

Id. By its plain terms, the Magellan Agreement did *not* "poison" CME's plans to launch an IRS clearinghouse. And the contractual requirement that CME enter into good-faith negotiations towards a similar agreement in the event it launched an IRS clearinghouse cannot plausibly be painted as a "poison pill," either.

The PTAC also contains a significant number of conclusory allegations. These include the PTAC's **[*55]** central allegation relating to the period before joint discussions between the Dealers and CME began (*i.e.*, before the fall of 2008)—that some Dealers sought to bring other Dealers into line with respect to Swapstream. *See, e.g.*, PTAC ¶¶ 145, 151-152, 158. The PTAC's allegations on this score do not allege "a specific time, place or person involved." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 565 n.10, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

Finally, the PTAC's persistent claims as to the motivations or actions of "the Dealer Defendants" as a general collective bloc, or generalized claims of parallel conduct, must also be set aside, like the similar claims in the SAC, as impermissible group pleading. *See In re IRS, 261 F. Supp. 3d at 478*; *see also* discussion *infra*, at 32-33 (listing examples). In contrast, the claims of a conspiracy to boycott Javelin, Tera, and Tradeweb were held viable because they were backed by specifically pled acts of common conduct, most strikingly, that four Dealers on the same day—the business day after Tera's first trade—had separately notified Tera that they would not clear trades on its platform until they had conducted a review of its rulebook, a move which was later mimicked by other Dealers and which the SAC credibly alleged was pretextual. *See In re IRS, 261 F. Supp. 3d at 473-474*.

---

[10] As noted above, the PTAC abandons the SAC's express claim of a Tradeweb plan to introduce such a platform in lieu of a generalized claim of "discussions" of such among its executives. *Id.* ¶ 223. The PTAC does not allege any plan by Bloomberg prior to Dodd-Frank to enter this space. Rather, it alleges that in 2011—a year after Dodd-Frank mandated SEF trading—a Bloomberg executive stated that Bloomberg was "very ready to commence SEF trading." PTAC ¶ 117.

Second, and significant, although the PTAC **[*56]** does plead collective action regarding Swapstream, the well-pled allegations of concerted action among Dealers are centered on the period *after* joint negotiations between CME and the Dealers are alleged to have begun (*i.e.*, from the fall of 2008 onwards). In that period, as pled, discussions and lawyered negotiations had begun between CME and the Dealers to reach agreement regarding the terms under which participating Dealers collectively would participate in CME's Swapstream platform. As reviewed above, the parleys during this period occurred in two phases: regarding (1) CME's initial proposal to revamp Swapstream; and (2) CME's ensuing proposal—which resulted in a negotiated business arrangement memorialized in the Magellan Agreement—to launch a stand-alone clearinghouse.

This paradigm of collective negotiations between multiple collaborating competitors and a shared counterparty or counterparties to explore facially legitimate business arrangements does not lend itself to *per se* condemnation. *See, e.g., Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 501, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)* (standard setting is subject to the Rule of Reason). As the Court reviewed in its discussion of Tradeweb, legitimate joint business ventures, including at the point of their creation, **[*57]** are subject to the Rule of Reason, and "business practice[s]" involving the "core activity of [a] joint venture . . . do not fall within the narrow category of activity that is *per se* unlawful." *Texaco, Inc. v. Dagher, 547 U.S. 1, 8, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*; *see id.* at n.1; *Nw. Wholesaler Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 298, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)* ("mere allegation of a concerted refusal to deal does not suffice" to merit *per se* condemnation "because not all concerted refusals to deal are predominantly competitive"); *Major League Baseball Props., Inc. v. Salvino, 542 F.3d 290, 316 (2d Cir. 2008)* ("*Per se* treatment is not appropriate. . . where the economic and competitive effects of the challenged practice are unclear"); *see also In re IRS, 261 F. Supp. 3d at 467* (collecting cases and holding Project Fusion subject to Rule of Reason review).

The facts pled reveal potential pro-competitive justifications from the collaboration here in connection with the Dealers' negotiations with CME, enough to persuade the Court that the conduct alleged—in contrast to a horizontal price-fixing conspiracy or the boycott pled against Javelin, Tera, and TrueEx—is not by nature suitable to condemnation *per se*. Both sets of discussions among the Dealers and CME had the potential, *inter alia*, (1) to launch a new venture by assuring CME of the critical mass of Dealer support it claimed to need; (2) to help CME set standards for a new modality of IRS **[*58]** trading acceptable to a broad range of market participants; and, (3) as in other business contexts involving negotiations with a swath of industry players, to avoid the inefficiencies associated with duplicative one-on-one negotiations. *See, e.g.*, PTAC ¶ 135 (noting CME's goal to enlist one or more Dealers from each of "Tier 1" and "Tier 2").

That the second stage of Dealer/CME negotiations led to a counseled agreement between CME and most (although not all) Dealer Defendants also weighs against finding *per se* anti-competitiveness. The Magellan Agreement's text, too, reveals a pro-competitive justification: The revenue-sharing pact enabled the introduction of a novel clearing platform whose standing was enhanced by the agreed participation of reputable Dealers who agreed to provide minimum clearing volume to the CME. *See id.* ¶¶ 160, 179-180.[11]

That leaves the Rule of Reason. Potentially, a viable Rule of Reason claim could have been pled with respect to the Dealers' collective action as to CME, attempting to show overall anti-competitive effect in a defined market. But unlike with respect to Tradeweb, the PTAC does not even gesture in that direction with respect to Swapstream, **[*59]** confining itself to a theory of *per se* illegality.

---

[11] The above facts preclude the claim (PTAC ¶ 152) that the joint negotiations (*id.* ¶ 156) with respect to which the Dealers collaborated were an illegitimate sham that offered no efficiency enhancements so as to make Rule of Reason review unwarranted. That the Dealers had, and coordinated privately with, common Cleary Gottlieb counsel, took common positions in the joint negotiations, and sought governance rights in the CME clearinghouse, *id.* ¶¶ 152-157, 161-167, 183, 186, likewise do not signal a sham. Under the circumstances pled, seeking "governance" of the platform was understandable given each Dealer's interest in control of the new clearinghouse. The Dealers were being asked to take an investment stake in the clearinghouse, stood to receive potential returns from the clearing services the clearinghouse offered, and could face financial exposure in the event the clearinghouse defaulted. *See, e.g.*, PTAC ¶¶ 98, 100, 106.

In any event, the PTAC does not make the requisite pleadings to enable a Rule of Reason claim. It does not define the product or geographic market of the company, CME, whose offerings were allegedly skewed by the defendants' collective refusal to support an all-to-all IRS trading platform. Nor, although touting CME's capabilities, does it allege that CME had power in any market, including that for electronic exchanges with respect to swap trading generally or IRS trading in particular. *See* *In re IRS, 261 F. Supp. 3d at 469*. And while the PTAC denounces the Dealers' conduct as anti-competitive, *id.* ¶¶ 193-196, it does not assess these anti-competitive impacts against the potential pro-competitive benefits of the agreement that the collaborating Dealers negotiated towards, and eventually struck with CME, including those identified above.

The Court, finally, considers the PTAC's allegations of a boycott predating the initiation of "joint negotiations" (*id.* ¶ 156) with CME. By definition, the line of authority subjecting concerted activity in connection with competitors' joint ventures to Rule of Reason review does not apply to actions within this time window.

The limited **[*60]** allegations within this window, *see, e.g., id.* ¶¶ 136-151, however, do not adequately plead a *§ 1* conspiracy. The Dealers' parallel actions, motivations, perspectives, and intentions are largely pled generically and in undifferentiated fashion, with the PTAC not specifying a particular defendant or defendants. *See, e.g., id.* ¶ 139 ("[T]he Dealer Defendants became extremely concerned about losing valuable asset manager clients to a new CME-run IRS trading platform."); *id.* ¶ 141 ("Some of the Dealer Defendants' trading-desks initially expressed interest in Swapstream."); *id.* ¶ 143 ("The Dealer Defendants' strategic investment groups each responded to CME in a similar fashion."); *id.* ¶ 145 ("Prior to these meetings with the CME, the Dealer Defendants met and coordinated their position and messaging.").

As to this time window, the PTAC several times repeats the allegation that "the Dealer Defendants" traded on the Swapstream platform before, but not after, its acquisition by the CME. *Id.* ¶ 120, 124, 147. That allegation—if pled concretely—could certainly be telltale of illicit coordination among Dealers aimed at icing Swapstream, lest it expand in a manner threatening to the Dealers' interest. **[*61]** But this allegation is problematic, because, closely analyzed, the PTAC's factual allegations on this issue prove elusive. In all its 549 paragraphs, the PTAC identifies by name only two defendants (RBS and BNPP) that allegedly traded (or participated as market makers) on Swapstream before its acquisition by CME. *Id.* ¶ 124. And even if the PTAC's broad allegations to the effect that "the Dealer Defendants," *id.*, "many of the Dealer Defendants," *id.* ¶ 120, and/or "all of the Dealer Defendants," *id.* ¶ 147, had executed inter-dealer trades on Swapstream at some point before its acquisition by CME sufficed to implicate the 11 Dealer Defendants in such pre-CME trading, the PTAC nowhere alleges that Swapstream was facilitating more than *de minimus* trades as of the time of the CME acquisition, or, notably, that *any* entity (defendant or otherwise) was trading on the platform as of the time the "Dealer Defendants" allegedly ceased doing so in August 2007. *Id.* ¶ 147. The facts pled are too generalized, threadbare, and question-begging to permit the inference of a coordinated plot among the Dealers, in this way, to neutralize Swapstream.

The PTAC, finally, alleges that the Dealer Defendants were **[*62]** unsupportive of Swapstream and that they communicated to CME—either at the outset, *id.* ¶ 144, or thereafter, *id.* ¶ 145—that they would not "support an IRS execution platform," *id.* ¶ 144. But the Dealers' parallel lack of interest is not indicative of an inter-Dealer agreement. As pled, such conduct was consistent with any Dealer's independent self-interest. *See id.* ¶ 29 (the Dealer Defendants "want[ed] desperately to preserve the status quo' of the OTC market"). As the Court earlier explained in assessing why the SAC's similar allegation of the Dealers' common lack of support for all-to-all IRS trading was not indicative of collusion, "each Dealer had good reason to independently discourage . . . and not encourage, development of a new trading paradigm that threatened, someday, to cannibalize their trading profits." *In re IRS, 261 F. Supp. 3d at 464*; *see also* *Mayor and City Council of Baltimore v. Citigroup, 709 F.3d 129, 135 (2d Cir. 2009)* (inference of conspiracy will not arise when the coconspirators' parallel conduct "made perfect business sense").

As with its Tradeweb allegations, the PTAC's allegations as to CME and Swapstream therefore do not plead unlawful collusion among the Dealer Defendants. And viewing the PTAC's allegations in their entirety, it, like the SAC, does not plausibly plead **[*63]** a *§ 1* conspiracy among the Dealers.

The statute of limitations: A Sherman Act *§ 1* claim is subject to a four-year statute of limitations that runs from the date of injury. Class plaintiffs filed their initial Complaint on November 25, 2015. As in connection with the SAC, plaintiffs argue that the limitations period should be equitably tolled due to fraudulent concealment. This bid for relief from the statutory time bar is again unpersuasive.

In dismissing the SAC's claims of injury incurred prior to November 25, 2011, the Court found two required elements of fraudulent concealment lacking. *In re IRS, 261 F. Supp. 3d at 487-490*. First, as to the element of concealment, central facts as to the SAC's claim of a plot to block from emerging an all-to-all Tradeweb platform had *not* been concealed. These included the Dealers' collective ownership stake in Tradeweb and the visible nature of that platform's offerings. *Id. at 488-489*. Also in tension with a theory of concealment, the SAC's thesis was that, before 2012, the benefits of all-to-all IRS trading had been "widely recognized by market participants, regulators and economists" such that "absent a conspiracy . . . [e]volution to all-to-all trading that would have been open to the entire market **[*64]** would have been inevitable." *Id. at 488* (quoting SAC ¶¶ 87, 342); *see id.* (quoting SAC ¶ 99 that "[t]here were. . . no natural or technological reasons why the IRS market did not evolve by 2008, at the latest, to allow the buy side to conduct all-to-all trading of IRS on electronic platforms"). Second, for similar reasons, the Court rejected plaintiffs' claim that they had not been on inquiry notice as to pre-2012 claims. *Id. at 489* ("[A]ccepting class plaintiffs' premise that only a plot can explain the missing platform, class plaintiffs had every basis, in real time, to smell a rat."). As to a third element, diligence, defendants had raised substantial questions about the diligence of the class plaintiff, CPTF, before June 2014, when it claimed to have discovered that a conspiracy was afoot. The Court, however, had no occasion to resolve that element. *Id. at 489-490*.

The PTAC's new claims, focused on CME's decision not to introduce a Swapstream platform for all-to-all anonymous trading of IRSs, are subject to a similar critique.

Plaintiffs' theory remains that the failure of the IRS market to move towards such a trading model "was unnatural and contrary to expectations," as to suggest conspiratorial manipulation. *Id. at 489* **[*65]** ; *see* PTAC ¶¶ 89, 102-103. And while the CFTC's post-Dodd-Frank assessments call into question plaintiffs' claims that the buy-side before Dodd-Frank was ready, willing, and able to move to such a trading model, *see, e.g., In re IRS, 261 F. Supp. 3d at 446, 465*, the Court must take the PTAC at face value in claiming that the failure of such a platform to emerge was unnatural. The PTAC doubles down on that thesis, insofar as it adds the claim that the "pillars" or "pieces" needed to facilitate such a platform were all in place, "being utilized by the IRS Dealers well before Dodd-Frank," and adaptable to support an all-to-all IRS trading platform hospitable to the buy-side. *See, e.g.*, PTAC ¶¶ 92, 95, 102-103.

As to the element of inquiry notice, Swapstream's failure to evolve in this direction, as pled, occurred in broad daylight, putting plaintiffs on unusually acute inquiry notice. The PTAC alleges that, in 2007, CME had publicly announced a plan to offer all-to-all anonymous trading with central clearing for the buy-side. *Id.* ¶ 125 & nn.27-29 (quoting and citing July 2007 press release to this effect and prior news coverage). The PTAC further alleges that "[b]uy-side firms were clamoring to trade on Swapstream," *id.* ¶ 132, and that Swapstream had advertised these firms' interest in doing so, ¶ 133 (quoting Swapstream press release). But, the PTAC alleges, once the Dealers declined to participate, Swapstream aborted this plan. *Id.* ¶¶ 158-159. This too was a public event—CME announced it in a 2010 CME press release. *See* CME Group, Annual Report (Form 10-K) (February 26, 2010), available at https://www.sec.gov/Archives/edgar/data/1156375/000119312510043180/d10k.htm (CME "began the process of winding down [its] Swapstream operations" in 2009); D. Mem. at 23 n.14. On plaintiffs' theory that only a conspiracy—as opposed to a common lack of **[*66]** interest among Dealers in moving their IRS trading to such a platform, or a lack of buy-side readiness, or other lawful causes—can explain this event, plaintiffs, like the buy-side firms who assertedly had been awaiting Swapstream's rollout, had "reason to suspect the probability of any manner of wrongdoing," which is "all that is necessary to cause the tolling period to cease." *In re IRS, 261 F. Supp. 3d at 489* (quoting *131 Main St. Assocs. v. Manko, 179 F. Supp. 2d 339, 348 (S.D.N.Y. 2002))*.

As to the element of concealment, the PTAC generally alleges that there were secret meetings and other clandestine communications among Dealers both before and during the collective negotiations with CME. *See* PTAC ¶ 145 (Dealer Defendants "coordinated their position and messaging. . . through email, electronic chat messages, formal and informal industry events, dinners, and during and following meetings of Tradeweb's board of directors"); *Id.* ¶ 146. But these general allegations, unspecific as to time and content, are, like their similar forebears in the SAC, insufficient to show affirmative concealment. *See* *In re IRS, 261 F. Supp. 3d at 489* ("The SAC's claims of secret meetings under the aegis of such groups to further the pre-2012 plot are general and conclusory. These ill-pled allegations cannot discharge plaintiffs' burden to **[*67]** show concealment.") (internal citation omitted).[12]

Because the PTAC fails adequately to plead the elements of either concealment or of inquiry notice, the Court again has no occasion to address the third element: whether plaintiffs acted with the required diligence in inquiring into pre-November 25,2011 events, including with respect to why Tradeweb and Swapstream did not open the trading platforms that plaintiffs prefer. *See* *In re IRS, 261 F. Supp. 3d at 490*. As with the SAC, defendants raise substantial questions as to the adequacy of CPTF and LACERA's claims to have conducted such diligence, including noting that many of the new allegations in the PTAC rely on citations to public-record material. However, the burdens of undertaking this inquiry are, again, unjustified given the independent deficiencies found in plaintiffs' claims. *See id.*

For all the above reasons, granting the motion for leave to amend to restore plaintiffs' claims as to 2008-2012 would, therefore, be futile.

2. Delay, Prejudice, and Gamesmanship

Independent of the finding of futility, the Court finds that granting leave to restore the claims covering 2008 through 2012 would substantially delay this litigation. It would also unduly prejudice **[*68]** the defense. Further, the Court holds, plaintiffs' counsel's communications with the Court and defense during the extended period of discovery negotiations and litigation conveyed a misleading impression—that plaintiffs' claims were fixed at 2013-2016—whereas in fact counsel had in mind, and were actively pursuing, a transformative amendment to restore plaintiffs' claims as to the five prior years. On close review of the assembled communications, the Court is, regrettably, constrained to find an unwelcome degree of gamesmanship meriting denial of the motion for leave to amend. Because these considerations of delay, prejudice, and gamesmanship arise out of common events, the Court addresses them together.

Delay: Reviving the 2008-2012 claims would upend the schedule for discovery carefully negotiated by the parties and approved by the Court.

Relevant here, the case management plan set a May 21,2018 deadline for substantial completion of document production and a December 21,2018 deadline for the completion of all fact discovery. Most imaginable amendments, even if disclosed on the last date for a motion for leave to amend, could comfortably have been accommodated under this schedule. **[*69]** For example: an amendment adding claims of a fourth or fifth platform—alongside Javelin, Tera, and TrueEx—which the Dealers purportedly conspired in 2013-2016 to inhibit. Or the amendments to the 2013-2016 claims that plaintiffs separately pursue without objection, which add allegations of the Dealers' means and methods during 2013-2016 and sharpen or broaden theories of damages arising from the 2013-2016 conspiracy. Amendments of this nature would—and/or will—add to the parties' document production

---

[12] The PTAC, finally, alleges that the Magellan Agreement contains a non-disclosure clause which prevented outsiders from discovering its secret "poison pill provision." PTAC ¶ 199. In fact, as noted, the Agreement does not contain a poison pill provision. Depending on the facts, a non-disclosure agreement can serve as an affirmative act of concealment. *Compare* *In re Copper Antitrust Litig., 436 F.3d 782, 790-791 (7th Cir. 2006)* (nondisclosure agreement supported equitable tolling), *with* *GO Comp. v. Microsoft Corp., 508 F.3d 170, 179 (4th Cir. 2007)* (finding claim time-barred and rejecting claim that nondisclosure agreements kept anti-competitive activities secret). Here, however, the Magellan agreement is facially benign, post-dates the alleged plot to terminate an all-to-all IRS trading platform, and governs a separate subject matter: the operation of and financial stakes of participants in CME's separate clearing platform. A non-disclosure clause in the agreement, therefore, lends no support to plaintiffs' claim of concealment.

and other discovery obligations. But they can be accomplished within the framework of the parties' carefully negotiated agreements as to trading data, custodians, databases, and search terms. And they are not in tension with the Court's rulings as to the time frame of document production. The addition of plaintiff LACERA is, similarly, readily accommodated to the case schedule.

In contrast, allowing the PTAC's pre-2013 claims would be functionally tantamount—or close to it—to allowing a new MDL-sized lawsuit to be hitched to the existing claims. To be sure, at a concept level, plaintiffs' core theory across 2008-2016 is the same: that Dealers at all times coordinated to thwart all-to-all **[*70]** trading platforms, whether potential (2008-2012) or extant (2013-2016). But, in practice, the PTAC's narrative and its claims regarding 2008-2012 implicate a host of events, entities, concepts, and personnel outside the scope of the 2013-2016 claims and outside the scope of the post-Dodd-Frank discovery that the Court has allowed on those claims.

Among other things, the claims as to the earlier period uniquely implicate:

• the Dealers' acquisition of an ownership interest in, and stewardship of, Tradeweb, beginning in 2007, including Tradeweb's earlier business plans and its decisions following the acquisition as to which platforms and asset classes to pursue, and the role of individual Dealers' personnel in those decisions, PTAC ¶¶ 212-282;

• the Dealers' dealings with CME, beginning in 2007, as relevant to IRS trading and Swapstream, including CME's evolving plans for that platforms, the steps the Dealers took ostensibly to influence Swapstream, and the two rounds of negotiations between the Dealers and CME, culminating in the Project Magellan Agreement, *id.* ¶¶ 119-211;

• the state of the IRS market as of 2007 and the extent to which it was ready for all-to all trading, including the **[*71]** state of clearing and various post-trade services, the services offered by providers such as SwapClear, SwapsWire (today, MarkitSERV), and the International Derivatives Clearing Group, and the utility to potential buy-side clearing of the software system Calypso, *id.* ¶¶ 104-118;

• the interactions relevant to IRS trading between 2007 and enactment of Dodd-Frank among all Dealer groups (including numerous individual personnel named in the PTAC), both directly with one another and as accomplished through industry fora like the ISDA, the Futures Industry Association, and working and drafting groups of these associations, *id.* ¶¶ 283-291;

• the conduct and communications of the Dealers, and numerous of their personnel named in the PTAC, relating to IRS trading between 2007 and enactment of Dodd-Frank towards interdealer brokers, including GFI Group, ICAP, and platforms under development in Europe such as i-Swap, *id.* ¶¶ 292-308; and

• the actions of the Dealers between 2007 and enactment of Dodd-Frank in allegedly erecting artificial barriers to buy-side clearing of IRS trades, including in connection with the Dealers' influence over OTCDerivNet (on whose board named representatives of various **[*72]** Dealers sat), LCH.Cleamet, and SwapClear, *Id.* ¶¶ 309-334.

Under these circumstances, allowing the PTAC's claims as to 2008-2012 to be added would require that the time-consuming and laborious process of framing the document discovery to be produced for that period begin from something close to a standing start. For many reasons, the parties' agreements as to document production parameters in 2013-2016 would not, logically, control discovery relevant to the 2008-2012 claims.

As to document custodians, at particular Dealers, given natural turnover and promotions and reassignments, there were assuredly different personnel responsible for IRS-related matters during the two periods. Beyond that, the many issues and incidents novel to the earlier period (*e.g.*, interactions with and exercise of influence over Tradeweb and CME/Swapstream) likely involved substantially different personnel at particular Dealers from those as to whom discovery has been authorized as to 2013-2016.

As to the delineations of topics and search terms that would guide document collection and review, the many distinct events, issues, entities, and players at issue in 2008-2012 similarly would require a fresh assessment **[*73]** of these parameters. So would the fact that plaintiffs' claims involve a materially different (pre-Dodd-Frank) regulatory environment than during 2013-2016. It is likely, too, that there would be rounds of discovery disputes requiring judicial intervention, including as to the start date for document review (numerous allegations in the PTAC date to 2007 and years before) and as to the permissibility of discovery into particular topics.

There would also be an overarching question as to the proper scale of overall discovery, which the Court would likely be called upon to resolve. Adding five years of claims to the existing four years would not ineluctably entitle plaintiffs to the receipt of 125% more discovery. A nine-year conspiracy claim implicating numerous episodes, issues, and personnel would by its nature require thoughtful application of the proportionality command of *Federal Rule of Civil Procedure 26(b)(1)*. To the extent that defense discovery for 2013-2016 had not already been produced to plaintiffs, a fair question would arise whether to revisit the agreed parameters of that discovery in the interests of keeping the overall discovery burden manageable.

The PTAC's expanded claims also implicate third parties. Those **[*74]** identified on the face of the PTAC include numerous clearinghouses, interdealer brokers, other service providers, and industry associations. Plaintiffs have pursued third-party discovery as to the 2013-2016 claims and could be expected to seek discovery from various entities named in the 2008-2012 claims. As to these third parties, the scope of discovery—potentially as sought by both sides—would be an issue. Extended negotiations (and/or discovery litigation) with these parties would be likely, possibly complicated by the greater age of the materials sought.

Finally, independent of electronic and hard-copy document discovery, the 2008-2012 claims would require—as have the 2013-2016 claims—the locating and harvesting of IRS trading data throughout the period. Such data is relevant, *inter alia*, to liability (including the existence of a pricing injury from the alleged conspiracy) and damages. Even assuming that such discovery demands did not give rise to disputes requiring extended negotiation and resolution, identifying and collecting this data, which before Dodd-Frank's SEF mandate took effect was likely held in decentralized locales, would likely take substantial time.

For these reasons, **[*75]** an amendment to add the industry-wide, complex, and half-decade-long claims proposed by the PTAC, if allowed to stand, would obliterate the May 21, 2018 deadline for substantial completion of document production.[13] In connection with the 2013-2016 period, it took counsel for the many parties (and third parties) seven months of focused work, beginning from the date of the ruling on the motion to dismiss, to formulate and narrow discovery demands, negotiate discovery parameters including as to custodians and search terms and strings, and to litigate to completion most discovery disputes as to matters pertinent to that period.[14] A similar exercise would now be necessitated as to plaintiffs' new claims.

All factors considered, the Court's judgment is that permitting the PTAC to be amended to add back five years of claims as to 2008-2012 would cause, at a bare minimum, a six-month delay of the substantial completion deadline for document production. A more realistic (yet still conservative) estimate is that, given the scale and splay of the added charges, reviving the 2008-2012 claims would require moving that deadline back by nine or more months.

Further, because plaintiffs' claims as **[*76]** to the two periods implicate common personnel and circumstances, in the event the PTAC were accepted, the deposition discovery scheduled to occur between May 21, 2018 and

---

[13] This would have been so even if, improbably, all defendants had immediately acceded to the entire PTAC, such that negotiations over the scope of document production could have begun shortly after the PTAC's filing on February 21, 2018. A more realistic assumption for the start date of any negotiations over post-PTAC document production parameters is the date on which the Court realistically could have resolved the parties' dispute as to the viability of the PTAC's 2008-2012 claims. It took the Court two months after argument to resolve the motions to dismiss the SAC. As to the PTAC, the Court, on May 10, 2018, issued a bottom-line order notifying counsel as to how it had determined to resolve the motion for leave to amend and that a decision (this) would follow. Dkt. 386.

[14] One discrete dispute—only recently briefed—remains in the process of resolution as to cellphone records of Dealer employees, sought by plaintiffs. *See* Dkt. 384. The Court has also recently received briefing on, and resolved at a hearing, a dispute as to discovery plaintiffs have propounded on an inter-dealer broker. *See* Dkt. 382.

December 21, 2018, as a practical matter, would have to be shelved and put over, to enable expanded document discovery first to be completed. Otherwise, deponents relevant to both periods could face multiple depositions; and deposition preparation and questioning might be impeded by incomplete document discovery. The added five years of claims covering expanded topics, in the Court's assessment, would also likely require elongating the period for deposition discovery. While the Court would press to move expeditiously, a realistic estimate is that an additional three months for deposition discovery would be necessary.

All in, therefore, this Court's conservative estimate, informed by its experience managing this MDL and by its experience presiding over—and, earlier, litigating—other complex financial cases is that permitting the 2008-2012 claims to stand would cause a delay of—at the very least-12 months for the completion of fact discovery.

Prejudice: Apart from the inherent casualties of a long delay—which may compromise **[*77]** the truth-seeking process and parties' and witnesses' interest in closure—the amendment here, if granted, would palpably prejudice the defendants.

For seven months, defendants expended time, money, and energy in the discovery phase of this litigation on the only rational assumption as to this case's temporal scope: that plaintiffs' surviving claims were limited to 2013-2016.

On that premise, counsel exchanged several hundred discovery communications, held dozens of meet-and-confers addressing discovery, and "devoted enormous effort to reaching agreement on matters such as the scope of discovery, search terms, and custodians." D. Mem. at 6. Counsel also, after a series of meet-and-confers failed to yield resolution, litigated a series of disputes that turned on this temporal premise. One dispute involved the document-discovery start date; another involved whether pre-Dodd-Frank events and entities that had been implicated by the dismissed claims were fair game for discovery. The Court's resolution of these disputes in turn shaped the time-intensive discovery efforts that followed—including the identification of custodians, the formulation of search terms and search strings, the tabulation **[*78]** of "hit counts" aimed at measuring efficacy and burden and ensuing negotiations, and the collection of millions of documents. *Id.* It is safe to assume that, on these efforts, each of the 11 defendant groups devoted very substantial time and incurred very substantial legal fees.[15]

Reviving the 2008-2012 claims would negate this work, waste these efforts, and largely send the parties back to the discovery drawing board. It would effectively overrule the Court's rulings setting the document-discovery start date and excluding (in whole or large part) a host of pre-Dodd Frank topics from the scope of permitted discovery.[16] It would require counsel to start negotiating anew the expanded universe of discovery issues. It would require developing and testing new potential search terms to gauge the utility and burden of each. It would require counsel to revisit prior compromises based on aggregate burdens for each defendant in light of the added burdens presented by the amended allegations and extended time period. It would almost certainly open up new rounds of protracted litigation over discovery disputes. It is safe to assume that the duplicative fees (of counsel and litigation support) and costs **[*79]** wasted by the need for this do-over, when measured across the 11 defense firms, would extend well into seven figures, to say nothing of the wasted time of client personnel.

In these circumstances, plaintiffs' terse incantation of regret for "any inconvenience," Dkt. 345 at 22, 23, that may have been caused by the last-minute disclosure of this most consequential proposed amendment is quite unequal to the moment. It reflects a lack of appreciation, or perhaps denial, of the scale of the work that the proposed amendment would moot. *Cf. BNP Paribas Mortg. Corp. v. Bank of Am., N.A., No. 09 CIV. 9783 RWS, 2013 U.S. Dist. LEXIS 174580, 2013 WL 6484727, at *6 (S.D.N.Y. Dec. 9, 2013)* (denying motion to amend, based on prejudice stemming from length of case and because amendment would have "interfere[d] with ongoing expert discovery and trial preparation"); *In re "Agent Orange" Prod. Liab. Litig., 220 F.R.D. 22, 26 (E.D.N.Y. 2004)* ("Leave

---

[15] The time spent by the Court resolving the discovery disputes alone—which was substantial—gives the Court insight as to the formidable amount of time that counsel for each party expended on the range of discovery matters summarized above.

[16] The pre-Dodd-Frank topics as to which the Court substantially or wholly precluded discovery as irrelevant or marginally so included CME's Swapstream platform, *see* Dkt. 322, at 4, Project Fusion, *id.* at 6, SwapClear's rulebook restrictions, *id.* at 8-9, and the Dealers' activities with respect to OTCDerivNet, SwapClear, and LCH.Clearnet, *id.* at 12-13.

to amend must nonetheless be denied because of the large additional expenditures of time and effort that would be required by the court and parties.").

Plaintiffs' arguments against finding prejudice miss the mark. Plaintiffs note that that the new claims "address subjects that were raised in previous complaints." Pl. Mem. at 24. But that **[*80]** observation does not grapple with the sunk costs that would largely go to waste were discussions as to discovery parameters required to start anew. And the fact that plaintiffs have repeatedly attempted to refine their claims as to these subjects—the PTAC is plaintiffs' fourth complaint—*disfavors* granting leave to amend. The principal subjects of the amendment (Project Fusion and CME/Swapstream) were at the heart of the claims the Court dismissed. Plaintiffs then sought discovery on these subjects, which the Court denied. This is thus the third time that plaintiffs have litigated in an attempt to insert these subjects into this case. *See, e.g., State Trading Corp. of India v. Assuranceforeningen Skuld, 921 F.2d 409, 418 (2d Cir. 1990)* ("[A] busy district court need not allow itself to be imposed upon by the presentation of theories seriatim.") (internal quotation omitted).

Plaintiffs also note that as of when they moved to amend, no "substantive" documents had been produced or any depositions held. Pl. Mem. at 24. But that argument trivializes the intensive pre-production work by all counsel over the preceding seven months that the PTAC would supervene. In any event, defendants, executing on the negotiated discovery plan, have since made voluminous document productions, ***[*81]*** *see* Dkt. 388 at 1 (May 16, 2018 status letter), and, following a recent limited extension of the substantial completion deadline, are on track to achieve substantial completion of document production by late June.[17]

Gamesmanship: The Court, finally, addresses plaintiffs' counsels' conduct towards the Court and the defense in connection with the bid to restore the 2008-2012 claims.

Plaintiffs' counsel began to consider amending to restore these claims on July 28, 2017, *see* Dkt. 345 at 20, and thereafter investigated such an amendment, Dkt. 356 at ¶ 5. Many of the PTAC's new allegations as to 2008-2012 are sourced to publicly available materials, which plaintiffs' counsel appear to have accessed between July 28, 2017 and February 2018. *See, e.g.*, PTAC ¶¶ 100 & nn.17-18, 112 & n.20, 117 & n.21, 118 & n.22, 122 & nn.23-24, 124 & nn.25-26, 125 & nn.27-29, 131 & n.30, 133 & nn.31-32, 169 & nn.33-34, 172 & n.36, 213 & n.38, 214 & n.39, 215 & nn.40-41, 216 & nn.42-43, 217 & nn.44-45, 218 & nn.46-47, and 238 & n.62; *see also* Dkt. 356-1 ¶ 5 ("We had already pled all of the relevant facts of which we had knowledge in our prior pleading."). Counsel also conducted interviews or follow-up interviews **[*82]** regarding the 2008-2012 claims: three in September 2017, four in October 2017, two in December 2017, five in January 2017, and eight between February 1 and 21, 2018. Dkt. 343 at 3.

Plaintiffs' counsel first disclosed their intention to move for leave to restore the 2008-2012 claims to the defense on February 14, 2018 and to the Court on February 21, 2018—the latter being the deadline for so moving. Plaintiffs' counsel admit having made an affirmative decision not to disclose earlier the prospect of moving to so amend. Dkt. 345 at 21. Plaintiffs' counsel explain that they did not have a legal duty to disclose a possible amendment. And they represent that they did not make a "final decision" to file a proposed amended complaint along these lines until February 12, 2018. *See* Dkt. 345 at 24 (status call of February 23, 2018); Dkt. 343 (letter of February 23, 2018) ("[W]e did not make a final decision to proceed until we were satisfied, based on interviews and other research conducted in late January and February 2018, that our allegations were well-founded."); Dkt. 356-1 (declaration of April 2, 2018) ("On or around February 12, 2018, following these interviews, we believed we had learned **[*83]** enough key facts to support the proposed amendment.").

Plaintiffs' counsel are correct that there was no freestanding duty—under the law or the case management plan—to reveal in advance a forthcoming amendment, even a sweeping one. Plaintiffs' silence on that point, however, did not occur in a vacuum. During the seven months while plaintiffs' counsel were actively working towards an amendment that would vastly expand the temporal and substantive contours of this litigation, a separate work-stream was underway. Specifically, counsel for all parties—drawing heavily at times on the resources of the Court—

[17] In a status call with counsel held May 18, 2018, the Court, on consent, extended the substantial completion deadline until June 29, 2018.

were intensively negotiating, litigating, and implementing, at great time and expense, an MDL discovery plan premised on the current contours of the case.

A question therefore is presented by plaintiffs' counsel's communications with the Court and defense during this process. Having reviewed those communications, the Court, regrettably, concludes this: In ways large and small, plaintiffs' counsel throughout these seven months fed the false impression that the temporal scope of plaintiffs' claims was fixed at 2013-2016. The result was to mislead the Court and the defense and to occasion **[*84]** extensive work and expense that—had the retooled 2008-2012 claims proven viable—would have largely gone wasted. And, even crediting as true the representation that the "final decision" to file a PTAC was made shortly before the filing deadline, counsel's choice not to reveal earlier the substantial prospect of such a game-changing amendment while counsel's conduct and statements suggested otherwise prevented the Court and experienced counsel for all parties from assessing the impact of—and adapting the case management plan to accommodate—the possibility of such a consequential event.

The following communications with the Court are illustrative:

- ***August 2017 case management plan***: On August 18, 2017, the parties submitted a jointly proposed case management plan, Dkt. 245-1, which the Court approved, Dkts. 246, 250. At the Court's direction, the plan set prompt but achievable deadlines for fact discovery and for intermediate activities foundational to the fact-discovery process. In addition to those reviewed above regarding substantial completion of document production and fact discovery, these included that the parties: (a) designate "outside counsel data representatives" "to begin a **[*85]** meet and confer process regarding the scope of data productions in this proceeding within twenty-one (21) days" of court approval of the plan; (b) provide "a preliminary document custodian list" within 21 days and "preliminary search terms" within 30 days; and (c) "determine whether they are in agreement or disagreement on document custodians" within 45 days. This agreed-upon schedule sits uneasily alongside counsel's contemporaneous pursuit of claims whose addition would inherently make it obsolete—and all the more obsolete were the motion for leave to amend to be filed on the last permissible date.

- ***August 2017 motion for clarification***: On August 11, 2017, plaintiffs moved for clarification of "a narrow aspect" of the July 28 ruling, to wit, that the Court had not limited their 2013-2016 claims to "order book trading" alone but instead had preserved claims as to all anonymous request-for-quotes ("RFQ") trading on the three exchanges at issue (Javelin, Tera, and TrueEx). *See* Dkts. 241-242. The Court so clarified. Dkt. 251 at 1. Although not directed to the temporal scope of claims, a fair implication of this request, given plaintiffs' silence, was that plaintiffs did not intend to **[*86]** take issue with the other parameters of their claims as resolved by the July 28 ruling.

- ***October 2017 dispute regarding defense discovery***: As noted, plaintiffs sought pre-2013 discovery as relevant to their 2013-2016 claims. They asked the Court to order the defense to produce documents from January 2009 forward, Dkt. 254 at 3, while stating that—"to address any reasonable burden objections"—they were willing to receive documents from January 2010 forward if defendants agreed also to produce their regulatory production from a CFTC investigation and their document production from a separate MDL involving credit default swaps, *id*. A natural implication of plaintiffs' motion and negotiating position was that plaintiffs would not later ask for production of documents dating to January 2008 (or earlier), as the amendment that plaintiffs then had under consideration, to add claims dating to 2008, would necessarily contemplate.

- ***October 2017 dispute regarding CPTF's standing***: On October 18, 2017, defendants sought formal discovery from CPTF, to substantiate that CPTF had participated in IRS trades within the case's scope as narrowed. Dkt. 270. In opposition, plaintiffs argued that expediting **[*87]** discovery would "disregard the schedule in the case, which the parties negotiated and the Court ordered," and "disrupt the orderly flow of discovery." Dkt. 295 at 1. In contrast, plaintiffs noted, CPTF "has been diligently meeting every deadline under this schedule." *Id.* The Court ruled for plaintiffs. Dkt. 296 at 1. A natural implication of these statements was that plaintiffs were committed to "the schedule in the case" and did not foresee events that might "disrupt the orderly flow of discovery."

• ***November 15-17, 2017 status letter/call***: The parties' November 15, 2017 joint letter reported on discovery negotiations and an agreement to extend certain interim deadlines, and, referring to discovery disputes as to pre-2013 events, that "some disagreements relating to the scope of discovery may require resolution by the Court." Dkt. 302 at 1-2. In the ensuing call, the Court asked whether there was "anything else that class plaintiffs have to report to me other than what's in the November 15 letter?" Plaintiffs' counsel said no, noting only that these discovery disputes were nearing an impasse. Dkt. 308 at 4, 9-10. The Court asked counsel, upon an impasse, promptly to brief "gating issues," **[*88]** to allow the Court to resolve "threshold issues that are holding us up"; counsel stated that they remained hopeful that the schedule in the case management plan was realistic. *Id.* at 8, 14-15. That schedule, of course, would be wholly *unrealistic* in the event that the motion plaintiffs were then considering to restore the 2008-2012 claims were made and granted. And the Court fairly read counsel's negative response to its question whether class plaintiffs had "anything else" to report to imply the absence of any unreported matters of consequence, which an amendment to more than double the case's scale surely would be.

• ***December 13-15, 2017 status letter/call***: The parties' December 13, 2017 joint letter reported an impasse on the pre-2013 discovery issues, but anticipated that the resolution of these issues would likely resolve disagreements over defendants' document custodians. Dkt. 315 at 1. In the ensuing call, plaintiffs' counsel expressed confidence that, after those rulings, "we hopefully can hit the ground running." Dkt. 320 at 7. The Court asked counsel: "Does any party anticipate any other issue being brought in reasonably short order to the Court's attention?" *Id.* at 10-11. Other than possible disputes **[*89]** regarding search terms after the Court's ruling, plaintiffs' counsel said no. *Id.* at 11. Counsel's Statements—and negative response to the Court's inquiry about whether other issues might arise in reasonably short order—again sit uncomfortably alongside their ongoing consideration of moving to restore the 2008-2012 claims, the deadline for which was two months away and as to which plaintiffs' counsel had by then conducted nine interviews. *See* Dkt. 343 at 3.

• ***December 2017 omnibus discovery disputes***: On December 19, 2017, plaintiffs moved for discovery on numerous pre-Dodd Frank subjects, including Tradeweb/Project Fusion and CME/Swapstream. In a joint letter setting out each side's position, Dkt. 319, plaintiffs argued only that these subjects were germane to the existing 2013-2016 claims. Plaintiffs said nothing about potential restoration of the 2008-2012 claims (to which these subjects also related). As discussed earlier, the entire exercise of litigating and resolving these issues stood to be mooted by the amendment that plaintiffs then had under consideration to restore the 2008-2012 claims. On top of the time counsel spent negotiating and briefing these disputes, the Court, to keep the **[*90]** case on schedule, spent significant time in late December 2017 and early January 2018 resolving them. *See* Dkt. 322 (January 8, 2018 order resolving disputes).

• ***January 24-26, 2018 status letter/call***: The parties' January 24, 2018 joint letter stated that, in light of the resolution of the omnibus discovery disputes, "it appears that any further disputes regarding the scope of document discovery will primarily involve party-specific issues, as opposed to gating issues." Dkt. 324 at 1. It added that plaintiffs had asked "each defendant" whether "it is on track to meet the substantial completion deadline" for document productions. *Id.* The letter further reported that plaintiffs anticipated seeking leave to add LACERA, and, if defendants agreed, the parties would submit a proposed order to that effect. *Id.* at 2. In the ensuing call, the Court asked defense counsel if there was any prejudice to adding LACERA; the defense responded that, subject to reserving the right to challenge standing, it did not expect to object to this amendment. Dkt. 331 at 17-18. Various of plaintiffs' counsel's statements are problematic in light of the amendment then under consideration to revive the 2008-2012 claims, **[*91]** as to which counsel had by then conducted 14 interviews. The statement that future discovery issues were likely to be "party-specific" is coherent only upon the assumption that the claims at issue not expand beyond 2013-2016. The statement that plaintiffs' counsel had asked each defendant whether it was "on track to meet the substantial completion deadline" presupposes that *plaintiffs* did not have in mind a motion to be filed three weeks later that would vitiate that deadline. Plaintiffs' volunteering of their intention to seek to add LACERA by the February 21 deadline fairly implied the absence of other intended amendments. And the Court's inquiry whether that addition might cause any prejudice was a natural opportunity for responsible counsel to alert the Court to the far more consequential amendment that plaintiffs were pursuing.

The Court is constrained to express its disappointment at counsel's lack of candor. The assembled record reflects a series of points over a half-year period at which responsible counsel, to assure that the Court was not badly misled as to the direction that counsel anticipated for this complex and important multi-district litigation, would and should have **[*92]** disclosed the real and presumably growing prospect of pursuing a game-changing amendment. At each juncture, however, plaintiffs' counsel—deliberately—chose not to do so. Plaintiffs' counsel instead repeatedly assured the Court that this litigation was on track to meet the deadlines in the case management plan and that counsel were dedicated to meeting those deadlines. Audaciously, in correspondence with the Court, plaintiffs' counsel even chided the defense for filing a discovery motion that could disrupt the orderly case schedule to which plaintiffs professed to be "diligently" committed, *see* Dkt. 295, and touted that they had inquired of each defendant whether it was on track to meet the deadline for substantial completion of document production, *see* Dkt. 324. Plaintiffs' counsel also foisted on the Court and the defense costly and time-consuming discovery motions that the expanded claims, which counsel were actively exploring, would have rendered obsolete. The Court expected better of the estimable and experienced counsel whose applications to lead the putative class the Court was pleased to grant.

Plaintiffs' counsel were also unacceptably coy in their dealings with the defense. **[*93]** The discovery negotiations and litigation here centrally turned on the aggregate burden presented by plaintiffs' discovery requests. Plaintiffs' counsel's decision to keep under wraps the possibility of a momentous amendment, and to feign that the claims to be litigated were fixed at 2013-2016, enabled plaintiffs to lock in commitments as to aggregate discovery pertinent to the 2013-2016 claims. Only when those negotiations had essentially reached fruition did plaintiffs disclose their bid to expand their claims by five years.

The Court therefore concludes, reluctantly but firmly and after considered attention to the question, that plaintiffs' counsel engaged in unacceptable gamesmanship. Presumably concerned that earlier disclosure of their intention to move to revive the dismissed claims might lead the defense to object or the Court to pretermit such a bid, plaintiffs kept mum until virtually the last possible minute. The result of this tactical conduct was to mislead both the Court and opposing counsel as to a highly material dimension of this litigation and to cause both to expend significant time, and counsel to incur substantial costs and expenses, on work that the amended complaint **[*94]** stood to overtake. This conduct independently warrants denial of the motion for leave to restore the 2008-2012 claims. *Cf. State Trading Corp., 921 F.2d at 418* (denying leave to amend based on tactical decision not to earlier plead new allegations; "not unreasonable to impute lack of good faith" to plaintiff where tactical delay appeared undertaken to reduce chance *of forum non conveniens* dismissal).[18]

The Court finally addresses two justifications plaintiffs' counsel give for not alerting the Court earlier to the prospect of the amendment.

First, counsel assert that their silence was necessitated "by the work-product doctrine." Dkt. 356-1 ¶ 7. That is wrong. While that doctrine might shield from discovery the substance of counsel's legal work, that doctrine would not be implicated by providing earlier notice of a potential tectonic amendment, any more than it was implicated by plaintiffs' courtesy of giving the Court and defense advance notice of their intention to add LACERA as a class plaintiff.

Second, counsel claim to have feared witness tampering, based on an incident in which an in-house lawyer for defendant Bank of America attempted to contact Richard Cohen, a former executive whom plaintiffs' filings had identified **[*95]** as a consultant. *Id.* ¶ 8. Plaintiffs extrapolate that the defense groups would have responded to notice of a potential PTAC by "persuading or coercing former employees not to cooperate with us." *Id.* ¶ 7. There is,

---

[18] For avoidance of doubt, although the case law identifies counsel's bad faith as a basis to deny a motion for leave to amend, the Court has chosen not to reach the issue of whether the conduct in question is properly termed such. The Court's judgment is that the finding of gamesmanship, on the facts here, is sufficient to support denial of leave to amend and that no productive purpose would be served by inquiring further into bad faith. The Court's discussion of gamesmanship above, therefore, should not be taken as reflecting a finding of bad faith with respect to any firm or individual, as the Court has not so found. The Court is further deeply respectful of the vigor and top quality of plaintiffs' counsel's overall representation of the putative class in this case, and is confident that this episode will prove aberrational.

however, a world of difference between disclosing an intention to move for leave to amend and disclosing witness identities. And had this concern been raised, the Court, upon a proper showing, stood ready to use its supervisory powers to enjoin or otherwise guard against witness tampering. Further, had the need arisen for the Court to test plaintiffs' *bona fides* in pursuing an amendment, the obvious solution was for plaintiffs to make an *in camera* submission to the extent that witness names or other confidential material were implicated. *See, e.g.*, Dkt. 343 at 3 (listing—in redacted form, with the Court's authorization—witnesses interviewed in connection with the PTAC).

Accordingly, the Court holds that, independent of the proposed amendment's futility, the factors of delay, undue prejudice, and plaintiffs' counsel's gamesmanship support denial of the motion to amend to restore the 2008-2012 claims.[19]

CONCLUSION

For the reasons reviewed above, the Court grants in part and denies in part plaintiffs' motion to file the Proposed Third Amended Complaint. The Court directs plaintiffs, within one week of this order, to file a Third Amended Complaint consistent with the rulings herein.[20]

SO ORDERED.

Dated: May 23, 2018

New York, New York

---

[19] In light of these findings, and the distinct procedural posture of this case, the cases on which plaintiffs rely are far afield. *Pasternack v. Shrader, 863 F.3d 162 (2d Cir. 2017)*, held that "the denial of leave to amend, based solely on delay and litigation expense, was an abuse of discretion." *Id. at 174*. Unlike in *Pasternack*, the Court's findings here of delay and prejudicial incurring of expenses are not generalized but are solidly anchored in a detailed record and the Court has also found gamesmanship. Further, although in *Pasternack* "essentially no discovery had been undertaken," here, counsel had engaged in more than six months of intensive and expensive negotiations and litigation over discovery (as well as initial rounds of document production) which, along with the scheduling order, the amendment would subvert. Also inapposite is *Loreley Fin. (Jersey) No. 3 Ltd. v. Wells Fargo Sec., LLC, 797 F.3d 160 (2d Cir. 2015)*. The Second Circuit there reversed a denial of leave to amend because the district court had put plaintiffs to "a Hobson's choice: agree to cure deficiencies not yet fully briefed and decided or forfeit the opportunity to replead." *Id. at 190*. The Circuit held that the district court had abused its discretion under *Rule 15* to deny leave to amend in finding that a plaintiff had forfeited its right to amend by standing by its allegations after defendant's objections were previewed at an informal pre-motion conference. Nothing of the sort happened here: Prior to the PTAC, plaintiffs filed three successive complaints, including an SAC filed after defendants filed a proper motion to dismiss an initial amended complaint. Although the case management plan set a deadline for motions for leave to amend, *Rule 15* did not afford plaintiffs an entitlement to file a *fourth* complaint, let alone one that proposed to more than double the temporal reach of plaintiffs' claims. *See, e.g., F5 Capital v. Pappas, 856 F.3d 61, 90 (2d Cir. 2017)*; *Lopez v. Ctpartners Exec. Search Inc., 173 F. Supp. 3d 12, 42-44 (S.D.N.Y. 2016)*. In any event, the findings here of long delay, undue prejudice, and gamesmanship distinguish *Loreley*. For the same reasons—and also because the amendment here was not based on discovery that yielded new evidence—*WPP Luxembourg Gamma Three Sarl v. Spot Runner, Inc., 655 F.3d 1039, 1059 (9th Cir. 2011)* is of no help to plaintiffs here. Finally, the district court decisions on which plaintiffs rely are inapposite. *See, e.g., Boiling v. Gold, No. C13-0872JLR, 2015 U.S. Dist. LEXIS 66063, 2015 WL 2406487, at *4-6 (W.D. Wash. May 19, 2015)* (addressing only futility of proposed third amended complaint, not other considerations); *United States v. Int'l Bus. Machs. Corp., 66 F.R.D. 223, 227 (S.D.N.Y. 1975)* (allowing amendment which court found unnecessary given its conclusion that the allegations therein were already embraced by the existing complaint); *Kissing Camels Surgery Ctr., LLC v. Centura Health Corp., No. 12-CV-3012-WJM-BNB, 2014 U.S. Dist. LEXIS 156357, 2014 WL 5599127, at *3 (D. Colo. Nov. 4, 2014)* **[*96]** (allowing amendment where plaintiffs promptly sought leave to amend after dismissal order, amendments were based on information learned in discovery, and no showing of delay, undue prejudice, or gamesmanship had been made).

[20] In light of this ruling, there is no factual basis for plaintiffs' proposed restoration of claims against Tradeweb. The Third Amended Complaint, as filed, is not to include such claims.

LexisNexis® Headnotes

Patent Law > Jurisdiction & Review > Standards of Review > Abuse of Discretion

Patent Law > ... > Damages > Patentholder Losses > Reasonable Royalties

HN1[] **Standards of Review, Abuse of Discretion**

The court reviews a district court's methodology for calculating an ongoing royalty under the abuse of discretion standard.

Civil Procedure > Trials > Judgment as Matter of Law

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN2[] **Trials, Judgment as Matter of Law**

The Tenth Circuit reviews de novo a district court's grant of summary judgment, and denial of a motion for judgment as a matter of law.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Trials > Jury Trials > Jury Instructions

HN3[] **Standards of Review, Abuse of Discretion**

The Tenth Circuit reviews whether a district court erred in refusing to give a particular jury instruction under the abuse of discretion standard. However, the Tenth Circuit also reviews all the instructions de novo to determine whether the absence of the requested instruction resulted in a misstatement of the applicable law to the jury. The Tenth Circuit then determines whether the instructions, taken as a whole, convey the proper law and focus the jury on the relevant inquiry.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN4[] **Standards of Review, Abuse of Discretion**

The Tenth Circuit uses an abuse of discretion standard when it reviews (1) a district court's decision to deny a motion for reconsideration; (2) a district court's decision on a motion for a new trial, and (3) a challenge to the language and structure of a special verdict form.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

HN5[] **Sherman Act, Defenses**

The *Sherman Act's* statute of limitations bars recovery if a cause of action is asserted more than four years after it accrues. *15 U.S.C.S. § 15b*.

Antitrust & Trade Law > Business & Corporate Compliance > Antitrust

Civil Procedure > Appeals

HN6[] **Antitrust & Trade Law**

As a general proposition, when reviewing a district court's judgment involving federal ***antitrust law***, the U.S. Court of Appeals for the Federal Circuit is guided by the law of the regional circuit in which that district court sits.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

HN7[] **Sherman Act, Defenses**

The U.S. Supreme Court recognized the continuing conspiracy exception in Zenith Radio Corp. (In the context of a continuing conspiracy to violate the antitrust laws, each time a plaintiff is injured by an act of the defendants, a cause of action accrues to recover the damages caused by that act and as to those damages, the statute of limitations runs from the commission of the act). The Tenth Circuit elaborated on the exception in Kaw Valley Electric Cooperative Co. by holding that an act may trigger the exception only if it satisfies a two-part test: (1) It must be a new and independent act that is not merely a reaffirmation of a previous act; and (2) it must inflict new and accumulating injury on the plaintiff.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Pleadings & Proof

HN8[] **Sherman Act, Defenses**

When a party invokes the continuing conspiracy exception, that party bears the burden of proof to establish it. In Kaw Valley, the Tenth Circuit stated that, to come within the continuing conspiracy exception, a plaintiff must show that it has been injured by continued, separate antitrust violations within the limitations period. In a court of common law a party defendant pleads the statute of limitations; the plaintiff replies an exception, and he must raise a prima facie case by evidence.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

HN9[] **Entitlement as Matter of Law, Legal Entitlement**

The U.S. Supreme Court made clear in Celotex that, at summary judgment, a party is entitled to judgment as a matter of law when the nonmoving party has failed to make a sufficient showing on an essential element of her case with respect to which she has the burden of proof.

Business & Corporate Compliance > ... > Standards of Performance > Contracts Law > Standards of Performance

HN10[] **Contracts, Standards of Performance**

Under Colorado contract law, it is a condition of each party's remaining duties to render performances that there be no uncured material failure by the other party to render any such performance due at an earlier time.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN11[] **Reviewability of Lower Court Decisions, Preservation for Review**

It is the general rule that a federal appellate court does not consider an issue not passed upon below.

Civil Procedure > Trials > Jury Trials > Verdicts

HN12[] **Jury Trials, Verdicts**

As a general matter, it must be left to the sound discretion of the trial court what form of verdict to request of a jury.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Patent Law > Infringement Actions > Defenses > Patent Invalidity

HN13[] **Estoppel, Collateral Estoppel**

A patentee, having been afforded the opportunity to exhaust his remedy of appeal from a holding of invalidity, has had his "day in court," and a defendant should not have to continue defending a suit for infringement of an adjudged invalid patent. An affirmance of an invalidity finding, whether from a district court or the Board, has a collateral estoppel effect on all pending or co-pending actions. The U.S. Court of Appeals for the Federal Circuit has long applied the U.S. Supreme Court's holding in Blonder-Tongue to apply collateral estoppel in mooting pending district court findings of no invalidity based on intervening final decisions of patent invalidity. The Federal Circuit also recently applied the U.S. Supreme Court's holding in B&B Hardware to apply such estoppel to Board decisions.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Patent Law > Infringement Actions > Defenses > Patent Invalidity

HN14[] **Estoppel, Collateral Estoppel**

A remand for briefing is not a requirement to applying estoppel when there is no indication from the patent owner that it did not have a full and fair opportunity to litigate the validity of its patent in the parallel case.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Patent Law > Infringement Actions > Defenses > Patent Invalidity

HN15[] **Estoppel, Collateral Estoppel**

An unrelated accused infringer may take advantage of an unenforceability decision under the collateral estoppel doctrine.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN16[] **Jury Trials, Province of Court & Jury**

The jury holds the exclusive function of appraising credibility and determining the weight to be given to testimony.

Patent Law > ... > Damages > Patentholder Losses > Reasonable Royalties

HN17[] **Patentholder Losses, Reasonable Royalties**

There is a "fundamental difference" between a reasonable royalty for pre-verdict infringement and damages for post-verdict infringement. For example, when calculating an ongoing royalty rate, the district court should consider the change in the parties' bargaining positions, and the resulting change in economic circumstances, resulting from the determination of liability. When patent claims are held to be not invalid and infringed, this amounts to a substantial shift in the bargaining position of the parties. The court has also instructed district courts to consider changed economic circumstances, such as changes related to the market for the patented products. District courts may consider "additional evidence" of "economic circumstances that may be of value in determining an appropriate ongoing royalty. The requirement to focus on changed circumstances is particularly important when an ongoing royalty effectively serves as a replacement for whatever reasonable royalty a later jury would have calculated in a suit to compensate the patentee for future infringement. The later jury would necessarily be focused on what a hypothetical negotiation would look like after the prior infringement verdict. Therefore, post-verdict factors should drive the ongoing royalty rate calculation in determining whether such a rate should be different from the jury's rate.

Patent Law > ... > Damages > Patentholder Losses > Reasonable Royalties

HN18[] **Patentholder Losses, Reasonable Royalties**

District courts may award a lower ongoing royalty rate if economic factors have changed in the infringer's favor post-verdict--for example, if a newly-developed non-infringing alternative takes market share from the patented products.

Opinion by: CHEN

Opinion

[*1086] [*1285]** CHEN, *Circuit Judge*.

Plaintiff-Cross-Appellant XY, LLC (XY) sued Defendant-Appellant Trans Ova Genetics, L.C. (Trans Ova) for patent infringement and breach of contract. Trans Ova counterclaimed, alleging patent invalidity, breach of contract, and antitrust violations. The district court granted summary judgment in favor of XY on Trans Ova's antitrust counterclaims. A jury **[**2]** found breaches of contract by both parties and awarded damages. The jury also found **[*1286]** that (i) Trans Ova failed to prove that the asserted patent claims were invalid, (ii) Trans Ova willfully infringed the asserted claims, and (iii) XY was entitled to damages for patent infringement. The parties filed various post-trial motions. The district court denied all of Trans Ova's requested relief on the antitrust, breach of contract, invalidity, and willfulness issues and granted XY's request for an ongoing royalty. Trans Ova appeals the district court's antitrust, breach of contract, invalidity, and willfulness rulings. XY appeals the ongoing royalty rate adopted by the district court.

We affirm in part, vacate in part, and remand. Two issues presented on appeal are moot. With respect to the remaining issues, we affirm on all issues except the district court's ongoing royalty rate, which we vacate. We remand for the district court to recalculate an ongoing royalty rate in accordance with this opinion.

Background

I. Technological Background

XY's patents relate to the sorting of X- and Y-chromosome-bearing sperm cells, which can be used for selective breeding purposes. Some of the asserted patent **[**3]** claims require the use of "flow cytometry," a process by which cells flow through a flow cytometer at a high rate of speed in a fluid stream and "are evaluated at several thousands of [cells] per second." J.A. 8346-47.

Dr. Lawrence Johnson developed a technique for sorting animal semen using flow cytometry **[***1087]** in the 1980s as part of research sponsored by the United States Department of Agriculture (USDA). Dr. Johnson's technique is patented in U.S. Patent No. 5,135,759 (the Johnson Patent), which issued in 1992. The Johnson Patent was initially licensed to XY under a USDA partnership program. The Johnson method involves staining DNA in sperm cells with a dye; using a laser beam to activate the fluorescence of the dye (with X-chromosome cells being brighter because they contain more DNA than Y-chromosome cells); detecting the amount of fluorescence in the cells; and sorting the cells into separate containers for X and Y cells.

Six of XY's patents are at issue in this appeal. They can be grouped into four categories: (1) the "Fluid Patents" (U.S. Patent Nos. 6,149,867 and 6,524,860); (2) the "Freezing Patent" (U.S. Patent No. 7,820,425); (3) the "In-Vitro Fertilization Patent" (U.S. Patent No. 8,569,053); and (4) the "Reverse Sort Patents"[1] (U.S. Patent Nos. 7,713,687 and 7,771,921).

The Fluid Patents claim flow cytometry devices and **[**4]** methods that use "sheath fluids" to provide optimum pre- and post-sorting fluid environments for the cells to "achieve as unaffected a sorted result as possible." '867 patent, J.A. 13485 col. 4 ll. 40-55, J.A. 13493 col. 20 ll. 1-4; '860 patent, J.A. 13516 col. 18 ll. 47-50, J.A. 13509 col. 4 ll. 27-43. The claimed fluids are introduced in a "coordinated" fashion such that the cells' fluid environment changes at various stages of the sorting process to minimize stress on the cells and keep as many of the cells alive as possible. *See, e.g.*, '867 patent, J.A. 13490 col. 13 ll. 1-65, J.A. 13493 col. 20 l. 1.

The Freezing Patent claims methods for "cryopreserving sperm that have been selected for a specific characteristic." J.A. 13300 col. 2 ll. 9-10, 16-17; J.A. 13315 col. 31 l. 64 - col. 32 l. 11. The claimed methods purport to "facilitat[e] storage and/or shipment **[*1287]** of selected sperm samples to sites distant from the collection site." J.A. 13300 col. 2 ll. 44-46. According to the patent, thawing the samples "yields viable sperm that can be used in procedures such as artificial insemination . . . and in vitro fertilization." *Id.* col. 2 ll. 46-48.

---

[1] The Reverse Sort Patents involve a sorting process that reverses the order of steps recited in the sorting process described in the Freezing Patent. In the Freezing Patent, sperm is first sorted and then frozen, while in the Reverse Sort Patents, the sperm is first frozen, then thawed and sorted.

The Reverse Sort Patents claim methods of first freezing, then thawing, and **[**5]** finally sorting sperm cells. *See, e.g.*, '687 patent, J.A. 13434 col. 30 ll. 9-42. The parties agree that a principal difference between the claimed methods in the Reverse Sort Patents and prior art methods is the use of a relatively high concentration of dye for staining the sperm cells in the Reverse Sort Patents—greater than 40 micromolar. *See, e.g., id.* col. 30 ll. 15-17.

The In-Vitro Fertilization Patent claims methods of in-vitro fertilization using sorted and reverse sorted sperm. *See generally* J.A. 14930-31 col. 10 l. 14 - col. 12 l. 26.

II. Factual Background

Trans Ova provides services related to embryo transfer and in-vitro fertilization for cattle. Before the events giving rise to this lawsuit, Trans Ova purchased sorted semen from Inguran, LLC (Inguran), which was a licensee of XY's patents. Trans Ova became dissatisfied with the quality of Inguran's product, however, and sought to license XY's technology to produce its own sorted semen.

XY and Trans Ova entered into a five-year licensing agreement (the Agreement) in April 2004 under which Trans Ova was authorized to use XY's technology in animal breeding. The Agreement was subject to automatic renewal in April 2009, unless, *inter alia* ***[**6]*** , Trans Ova was in material breach of the Agreement. XY retained the right to terminate the Agreement in the event of certain breaches by Trans Ova, upon written notice to Trans Ova.

In November 2007, Inguran acquired XY and, in the same month, XY sent a letter purporting to terminate the Agreement (Termination Letter) because of alleged breaches by Trans Ova. Trans Ova disagreed with XY's allegations of breach and argued that the Agreement had not been terminated. Over the course of several years, the parties negotiated but failed to resolve their disputes. Trans Ova continued to make royalty payments to XY pursuant to the Agreement, in accordance with its position that the Agreement had not been terminated, but XY declined all payments except one (which XY alleges it accepted in error). During the period of negotiations, XY alleges that it became aware of further breaches by Trans Ova (in addition to those alleged in **[***1088]** the Termination Letter), including underpayment of royalties and development of improvements to XY's technology without disclosure of such improvements to XY.

III. Procedural History

In March 2012, XY sued Trans Ova for patent infringement in the United States District Court **[**7]** for the Western District of Texas. Trans Ova moved to dismiss or transfer for improper venue. On March 28, 2013, the district judge granted Trans Ova's motion and transferred the case to the District of Colorado. XY filed an amended complaint, adding claims for breach of contract and unjust enrichment. Trans Ova, in turn, asserted (1) patent invalidity, (2) monopolization and attempted monopolization under the Sherman Act, and (3) breach of contract by XY and Inguran.[2]

[*1288] A. Summary Judgment

XY moved for summary judgment that Trans Ova's antitrust claims were barred by the applicable four-year statute of limitations. Trans Ova argued in response that the "continuing conspiracy" exception, per Tenth Circuit case law, effectively restarted the limitations period with each "new and independent act" that inflicted "new and accumulating injury" on Trans Ova after XY sent the Termination Letter. J.A. 41 (quoting *Champagne Metals v. Ken-Mac Metals, Inc., 458 F.3d 1073, 1088 (10th Cir. 2006))*. The district court determined that Trans Ova had not identified any new injury resulting from XY's post-termination actions in its brief in opposition to XY's motion. Therefore, the district court held that the continuing conspiracy exception did not apply and Trans Ova's antitrust **[**8]** claims were barred by the statute of limitations. *Id.* at 43-44.

[2] Inguran was previously a party to this suit. After dismissing Trans Ova's antitrust counterclaims, the district court granted Inguran's motion for judgment on the pleadings as to the remaining claims against Inguran and removed Inguran from the suit. *See* J.A. 55-63.

Trans Ova filed a motion for reconsideration, which the district court denied. The district court reaffirmed its ruling that Trans Ova had failed to show a triable issue of new and accumulating injury resulting from any of XY's post-termination actions. The district court clarified that, in granting summary judgment, it had assumed that the Termination Letter was not a "final act" that permanently excluded Trans Ova from the market, but "nevertheless found that Trans Ova did not meet the threshold requirement to show that any subsequent acts caused new injuries." J.A. 50. "It was Trans Ova's burden, in opposing summary judgment, to present evidence that the continuing conspiracy exception applied" and "Trans Ova's failure to address the new injury prong of the analysis fell short of meeting that burden." *Id.* (citing *Celotex Corp. v. Catrett, 477 U.S. 317, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986))*. Trans Ova's identification of two allegedly new categories of injuries in its briefing on the motion for reconsideration "should have been included in its prior briefing" and thus came too late. J.A. 51.

B. Jury Trial

The case proceeded to a jury trial. The jury found that both parties had breached the Agreement. Specifically, **[**9]** the jury found that Trans Ova materially breached and failed to cure prior to the April 2009 renewal date set out in the Agreement. As a result, under the jury's finding, the Agreement terminated in April 2009, and Trans Ova's post-termination use of XY's patented technology was unlicensed and infringing. The jury also found, however, that XY violated the Agreement and its duty of good faith and fair dealing by attempting to terminate the license in November 2007. As compensation for the respective breaches, the jury awarded XY $1,481,000 and Trans Ova $528,000 in damages.

The jury also found that none of the asserted patent claims were invalid and that Trans Ova willfully infringed. The jury awarded XY $4,585,000 for Trans Ova's patent infringement. In addition, the jury found that XY had unclean hands from its purported termination of the Agreement in November 2007.

C. Post-Trial

After trial, Trans Ova filed motions on the breach of contract, willfulness, and invalidity issues. XY filed motions seeking an award of an ongoing royalty and enhanced damages.

Regarding the breach of contract issues, Trans Ova moved for judgment as a matter of law under *Rule 50(b)* or, in the alternative, a new trial **[**10]** under *Rule 59(a)* or an amended judgment under *Rule 59(e)*. Trans Ova argued that XY's attempt to terminate the Agreement **[***1089]** was a material breach that excused Trans Ova's obligations under the Agreement and that the jury's findings that both parties breached **[*1289]** and were entitled to damages were irreconcilable. Trans Ova also argued that the jury verdict form was structured in such a way that the jury was not able to determine whether Trans Ova's obligations under the Agreement had been suspended due to XY's breach. At trial, the district court overruled an objection by Trans Ova to the verdict form that was based on similar arguments. The district court denied Trans Ova's motion, inferring that the jury found a material breach by Trans Ova before XY sent the Termination Letter. The district court also determined that a reasonable jury could have reached the conclusions reflected in the verdict form based on the evidence presented at trial.

With respect to willfulness, Trans Ova moved under *Rule 59(e)* for a ruling of no willful infringement. XY opposed the motion, arguing, *inter alia*, that Trans Ova could not seek its requested relief because Trans Ova had not challenged the sufficiency of XY's evidence on willfulness by **[**11]** moving under *Rule 50(a)* at trial. The district court rejected this argument, stating that "Trans Ova's argument is not a challenge to the sufficiency of XY's evidence at trial, but rather an argument that the jury's willful infringement finding was clearly erroneous as a matter of law." J.A. 11. More particularly, the district court understood Trans Ova to be arguing that certain of its invalidity defenses were objectively reasonable under the test for willfulness set out in *In re Seagate Technology, LLC, 497 F.3d 1360 (Fed. Cir. 2007)* (en banc). The district court determined that the invalidity defenses were objectively reasonable and granted Trans Ova's motion, finding no willful infringement as a matter of law. However, as explained, *infra*, the district court later revisited this decision after the Supreme Court issued its opinion in *Halo Electronics, Inc. v. Pulse Electronics, Inc., 136 S. Ct. 1923, 195 L. Ed. 2d 278 (2016)*.

On invalidity, Trans Ova moved under *Rule 59(a)* for a new trial. The district court denied the motion, holding that Trans Ova's arguments in support of the motion were merely a critique of XY's expert's opinions and amounted to nothing more than a rehash of arguments presented to the jury at trial. Trans Ova had stipulated to the qualification of XY's expert to testify regarding "the subject matter of the asserted patents" under **[**12]** *Federal Rule of Evidence 702*. The district court held that Trans Ova was not entitled to a new trial because "Trans Ova's arguments point to a classic battle of the experts . . . rather than an indication that the overwhelming weight of the evidence leans but one way." J.A. 16-17.

XY filed a motion requesting that the district court set an ongoing royalty as an equitable remedy for Trans Ova's future infringement. The district court noted Trans Ova's admission that it intended to continue to practice XY's patents and determined that an ongoing royalty would be appropriate. The district court then observed that the jury effectively adopted the 15% royalty rate on gross sales and the 4% royalty rate for reverse sorting services proposed by XY's damages expert at trial. The district court also noted that "every one of XY's prior licenses include[d] a 10% royalty rate, which tend[ed] to prove that 10% [was] XY's established royalty." J.A. 28. After considering the relevant evidence and the parties' various arguments under certain of the factors set out in *Georgia-Pacific Corp. v. U.S. Plywood Corp., 318 F. Supp. 1116, 1120 (S.D.N.Y. 1970)*, the district court calculated an ongoing royalty rate for gross sales by averaging the jury's 15% rate with the 10% rate in XY's prior licenses to arrive at a **[**13]** rate of 12.5%. For reverse sorting services, the district court awarded an ongoing royalty rate of 2%, half of the jury's rate for those services.

[*1290] XY also moved for an award of enhanced damages, which the district court denied.

Based on the jury's unclean hands finding, the district court denied XY's unjust enrichment claim and XY's request for injunctive relief.

D. Post-Judgment

After the Supreme Court issued its decision in *Halo*, XY moved under *Rule 59(e)* to alter or amend the judgment with respect to the ongoing royalty rate and under *Rule 60(b)(6)* to reconsider the district court's finding of no willful infringement and denial of enhanced damages. The district court denied XY's motion with respect to the ongoing royalty rate. Regarding willfulness, the district court granted XY's motion in part by reinstating the jury's finding of willfulness—in view of *Halo*'s **[***1090]** abrogation of the objective prong of *Seagate*'s test for willfulness, under which the district court had granted judgment as a matter of law of no willful infringement—but denied XY's motion for reconsideration of the district court's denial of enhanced damages.

Trans Ova appeals the district court's rulings on the antitrust, breach of contract, invalidity, **[**14]** and willfulness issues. XY appeals the district court's calculation of the ongoing royalty rate. We have jurisdiction pursuant to *28 U.S.C. § 1295(a)(1)*.

Standards of Review

HN1[] We review a district court's methodology for calculating an ongoing royalty under the abuse of discretion standard. *See* *ActiveVideo Networks, Inc. v. Verizon Commc'ns, Inc., 694 F.3d 1312, 1332 (Fed. Cir. 2012)*.

We review each of the other disputed issues in this appeal under the law of the regional circuit, the Tenth Circuit. *Classen Immunotherapies, Inc. v. Elan Pharms., Inc., 786 F.3d 892, 896 (Fed. Cir. 2015)* (grant of summary judgment); *Lincoln Nat'l Life Ins. Co. v. Transamerica Life Ins. Co., 609 F.3d 1364, 1367 (Fed. Cir. 2010)* (denial of judgment as a matter of law); *Voda v. Cordis Corp., 536 F.3d 1311, 1328 (Fed. Cir. 2008)* (challenge to jury instructions); *Lummus Indus., Inc. v. D.M. & E. Corp., 862 F.2d 267, 273 (Fed. Cir. 1988)* (challenge to special verdict form); *Golden Bridge Tech., Inc. v. Apple Inc., 758 F.3d 1362, 1367 (Fed. Cir. 2014)* (denial of motion for reconsideration); *Promega Corp. v. Life Techs. Corp., 875 F.3d 651, 659 (Fed. Cir. 2017)* (denial of new trial).

HN2[] The Tenth Circuit reviews *de novo* a district court's grant of summary judgment, *Timmons v. White, 314 F.3d 1229, 1232 (10th Cir. 2003)*, and denial of a motion for judgment as a matter of law, *Jones v. United Parcel Serv., Inc., 674 F.3d 1187, 1195 (10th Cir. 2012)*.

HN3[] The Tenth Circuit reviews whether a district court erred in refusing to give a particular jury instruction under the abuse of discretion standard. *Morrison Knudsen Corp. v. Fireman's Fund Ins. Co., 175 F.3d 1221, 1231 (10th Cir. 1999)*. However, the Tenth Circuit also "review[s] all the instructions *de novo* to determine whether the absence of the requested instruction resulted in a misstatement of the applicable law to the jury." *Powers v. MJB Acquisition Corp., 184 F.3d 1147, 1152 (10th Cir. 1999)*. The Tenth Circuit then determines whether the instructions, taken as a whole, convey the proper law and focus the jury **[**15]** on the relevant inquiry. *Id.*

HN4[] The Tenth Circuit also uses an abuse of discretion standard when it reviews (1) a district court's decision to deny a motion for reconsideration, *Wright ex rel. Tr. Co. of Kan. v. Abbott Labs., Inc., 259 F.3d 1226, 1235 (10th Cir. 2001)*; (2) a district court's decision on a motion for a new trial, *United States v. Lamy, 521 F.3d 1257, 1265-66* ***[*1291]*** *(10th Cir. 2008)*; and (3) a challenge to the language and structure of a special verdict form, *Webb v. ABF Freight Sys., Inc., 155 F.3d 1230, 1249 (10th Cir. 1998)*.

Discussion

I. Trans Ova's Antitrust Counterclaims

Trans Ova asserted counterclaims under *§ 2* of the Sherman Act alleging monopolization and attempted monopolization of the market for sorting nonhuman, mammalian semen by sex. *HN5*[] The Sherman Act's statute of limitations bars recovery if a cause of action is asserted more than four years after it accrues. *15 U.S.C. § 15b*. It is undisputed that Trans Ova's antitrust causes of action first accrued in November 2007 when XY sent the Termination Letter. The instant litigation began in 2012. Therefore, Trans Ova's antitrust counterclaims are barred by the statute of limitations unless an exception applies. The only potential exception identified by Trans Ova is the continuing conspiracy exception. The parties agree that Tenth Circuit case law governs our determination of whether the continuing conspiracy exception should apply in this case. *See In re Indep. Serv. Orgs. Antitrust Litig., 203 F.3d 1322, 1325 (Fed. Cir. 2000)* *HN6*[] ("As a **[**16]** general proposition, when reviewing a district court's judgment involving federal ***antitrust law***, we are guided by the law of the regional circuit in which that district court sits.").

HN7[] The Supreme Court recognized the continuing conspiracy exception in *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* ("In the context of a continuing conspiracy to violate the antitrust laws, . . . each **[***1091]** time a plaintiff is injured by an act of the defendants[,] a cause of action accrues . . . to recover the damages caused by that act and . . . , as to those damages, the statute of limitations runs from the commission of the act."). The Tenth Circuit elaborated on the exception in *Kaw Valley Electric Cooperative Co. v. Kansas Electric Power Cooperative, Inc*. by holding that an act may trigger the exception only if it satisfies a two-part test: "(1) It must be a new and independent act that is not merely a reaffirmation of a previous act; and (2) it must inflict new and accumulating injury on the plaintiff." *872 F.2d 931, 933 (10th Cir. 1989)* (quoting *Pace Indus., Inc. v. Three Phoenix Co., 813 F.2d 234, 238 (9th Cir. 1987))*; *see also* *Champagne Metals, 458 F.3d at 1088* (applying the *Kaw Valley* test).

As an initial matter, the parties dispute whether the movants (XY and Inguran) or Trans Ova bore the burden of proof on the applicability of the continuing conspiracy exception. Trans Ova argues **[**17]** that it was the movants' obligation to present sufficient undisputed evidence to establish that the Termination Letter was "a final act that caused all of the injuries." Trans Ova Open. Br. at 13 (citing *Celotex Corp. v. Catrett, 477 U.S. 317, 323-24, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986))*. According to Trans Ova, the district court erred when it placed the burden on Trans Ova to show a new and independent act that inflicted new and accumulating injury. XY counters that Trans Ova bore the burden to show a triable issue as to the applicability of the continuing conspiracy exception, because "the party who seeks to recover, upon the ground of his being within some exception of the statute of limitations, is bound to establish such exception by proof" and the "plain language of *Rule 56(c)* mandates the entry of summary judgment . . . against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." XY Resp. Br. at 24-25 (quoting *Somerville's Ex'rs v. Hamilton, 17 U.S. (4 Wheat.) 230, 234,* ***[*1292]*** *4 L. Ed. 558 (1819)*; *Celotex, 477 U.S. at 322*).

We agree with XY that Trans Ova bore the burden to present evidence that the continuing conspiracy exception applied. *See* *Akron Presform Mold Co. v. McNeil Corp., 496 F.2d 230, 233 (6th Cir. 1974)* (noting that, ***HN8***[] when a party invokes the continuing conspiracy exception, that party bears the burden of **[**18]** proof to establish it). In *Kaw Valley*, the Tenth Circuit stated that, to come within the continuing conspiracy exception, "a ***plaintiff*** must show that it has been injured by 'continued, separate antitrust violations within the limitations period.'" *872 F.2d at 933* (emphasis added) (quoting *Hennegan v. Pacifico Creative Serv., Inc., 787 F.2d 1299, 1301 (9th Cir. 1986))*; *see also* *Piatt v. Vattier, 34 U.S. (9 Pet.) 405, 413, 9 L. Ed. 173 (1835)* ("In a court of common law a party defendant pleads the statute of limitations; the plaintiff replies an exception, and he must raise a prima facie case by evidence.").

HN9[] The Supreme Court made clear in *Celotex* that, at summary judgment, a party is entitled to judgment as a matter of law when "the nonmoving party has failed to make a sufficient showing on an essential element of her case with respect to which she has the burden of proof." *477 U.S. at 323*. Under *Kaw Valley*, the "new and accumulating injury" is an essential element of proving applicability of the continuing conspiracy exception and an issue on which Trans Ova bore the burden of proof at trial. *See* *Kaw Valley, 872 F.2d at 934-35* (finding that the continuing conspiracy exception did not apply because there was no accumulating injury). Because Trans Ova bore the burden of proof, and because Trans Ova failed to identify any "new and accumulating injury" resulting from any of XY's post-termination **[**19]** acts in its brief opposing XY's motion for summary judgment,[3] the district court did not err in granting summary judgment in XY's favor.[4]

For the foregoing reasons, we affirm the district court's grant of XY's motion for summary judgment on Trans Ova's antitrust counterclaims.[5]

[*1092]** II. Breach of Contract

Trans Ova presses three arguments on the breach of contract issues: (1) Trans Ova's breaches were excused by XY's prior material breach and continuing breaches, (2) the jury's findings that both parties breached were irreconcilably inconsistent, and (3) the district court abused its discretion **[*1293]** by adopting a confusing and improperly structured special verdict form.

First, Trans Ova argues that its obligations under the Agreement were excused because XY materially breached the Agreement before Trans Ova breached. ***HN10***[] Under Colorado contract law, "it is a condition of each party's remaining duties to render performances . . . that there be no uncured material failure by the other party to render any such performance due at an earlier time." *Colo. Interstate Gas Co. v. Chemco, Inc., 854 P.2d 1232, 1239 (Colo. 1993)*.[6] The district court rejected this argument and held that a reasonable jury could have found that Trans **[**20]** Ova materially breached before XY by underpaying royalties and developing improvements to XY's

---

[3] *See generally* Trans Ova's Br. in Opp'n to XY's Mot. for Summ. J., *XY, LLC v. Trans Ova Genetics, LC*, No. 13-CV-876 (D. Colo. Aug. 22, 2014), ECF No. 247. Trans Ova's brief alleged only a single injury that resulted from XY's conduct: exclusion from the relevant market covered by XY's patents. *See id.*

[4] The district court did not abuse its discretion in disregarding arguments about new and accumulating harm that Trans Ova raised for the first time in its motion for reconsideration. *See* *Servants of Paraclete v. Does, 204 F.3d 1005, 1012 (10th Cir. 2000)* (affirming district court's decision to disregard arguments and evidence presented for the first time in a motion for reconsideration).

[5] Trans Ova argues that the district court's decision turned on its erroneous interpretation of Trans Ova's expert's testimony. In particular, Trans Ova argues that the district court incorrectly read Trans Ova's expert testimony characterizing the antitrust damages as overlapping with the contract damages to mean that there was only a single antitrust injury. However, the district court expressly stated that it "did not rely on [Trans Ova's expert's] testimony as evidence that no new injury had been inflicted." J.A. 52. The district court's decision rested on Trans Ova's failure to raise arguments identifying a new and accumulating injury, not on any consideration of expert testimony on damages.

[6] The parties agree that Colorado contract law applies here.

technology without disclosing such improvements to XY. J.A. 7-10 (citing trial evidence). We agree with the district court that a reasonable jury could have found that Trans Ova's breaches occurred before XY's breach based on the trial evidence. Therefore, like the district court, we reject Trans Ova's argument that its breaches were excused by XY's later breach.

Second, Trans Ova argues that the jury's findings are inconsistent because, if Trans Ova materially breached before XY, XY's breach must have been excused. However, Trans Ova never presented this argument to the district court in its briefing in support of its post-trial motion. Trans Ova only argued before the district court that there was insufficient evidence for a reasonable jury to conclude that Trans Ova breached before XY. Moreover, XY has not appealed the jury's finding that it was liable for breach of contract, nor did XY argue in its briefing on Trans Ova's post-trial motion that its breach should be excused by Trans Ova's prior breach. Because Trans Ova did not present this argument to the district court, we decline to **[**21]** consider it in the first instance on appeal. *Singleton v. Wulff, 428 U.S. 106, 120, 96 S. Ct. 2868, 49 L. Ed. 2d 826 (1976)* ***HN11***[] ("[I]t is the general rule . . . that a federal appellate court does not consider an issue not passed upon below.").

Finally, Trans Ova argues that the district court abused its discretion by adopting XY's proposed special verdict form. In particular, Trans Ova argues that the district court erred by not including a question about whether XY's breach was material in the verdict form. Significantly, Trans Ova does not argue that the jury was improperly instructed as to what constitutes a material breach, because the parties stipulated to the proposed jury instruction on this issue. ***HN12***[] As a general matter, "it must be left to the sound discretion of the trial court what form of verdict to request of a jury." *See* *Structural Rubber Prods. Co. v. Park Rubber Co., 749 F.2d 707, 720 (Fed. Cir. 1984)*; *ClearOne Commc'ns, Inc. v. Bowers, 643 F.3d 735, 765 (10th Cir. 2011)*. We see no reason to deviate from this general rule in this case and find no abuse of discretion by the district court in adopting XY's proposed verdict form. Because the jury was properly instructed on materiality, the jury was adequately equipped to determine how a material breach by one party affected later breaches by the opposing party. In view of the jury instructions, the verdict form was not "clearly unreasonable." *Lazare Kaplan Int'l, Inc. v. Photoscribe Techs., Inc., 714 F.3d 1289, 1293 (Fed. Cir. 2013)*.

For the **[**22]** foregoing reasons, we affirm the district court's denial of Trans Ova's motion on the breach of contract issues.

III. Invalidity

Trans Ova argues that the district court abused its discretion in denying Trans **[*1294]** Ova's motion for a new trial on the invalidity issues. XY counters that the district court did not abuse its discretion, because Trans Ova's motion improperly requested that the district court reweigh the evidence and reevaluate the credibility of XY's expert, Dr. James Wood. **[***1093]** XY notes that Trans Ova stipulated as to Dr. Wood's expertise and competency to testify before the jury in the areas of flow cytometry and the subject matter of the asserted patents.

A. Collateral Estoppel

As a threshold matter, we need not address Trans Ova's invalidity arguments as to the Freezing Patent claims in view of our affirmance today in a separate appeal invalidating these same claims, which collaterally estops XY from asserting the patent in any further proceedings. In this separate case appealed to us and argued on the same day as the instant appeal, the Patent Trial and Appeal Board of the U.S. Patent and Trademark Office (Board) held that these claims are unpatentable in a final written decision **[**23]** from an *inter partes* review proceeding. *See generally XY, LLC v. ABS Glob., Inc.*, Appeal No. 16-2228. In a separate order issued today, we affirm the Board's decision.[7]

That affirmance renders final a judgment on the invalidity of the Freezing Patent, and has an immediate issue-preclusive effect on any pending or co-pending actions involving the patent. This court has previously applied

---

[7] On remand, the district court should consider the impact, if any, of our affirmance of the Board's decision that held claims unpatentable on the damages award and whether a new trial on damages is warranted.

collateral estoppel to such co-pending cases because *HN13*[] "a patentee, having been afforded the opportunity to exhaust his remedy of appeal from a holding of invalidity, has had his 'day in court,'" and a defendant should not have to continue "defend[ing] a suit for infringement of [an] adjudged invalid patent." *U.S. Ethernet Innovations, LLC v. Tex. Instruments Inc., 645 F. App'x 1026, 1028-30 (Fed. Cir. 2016)* (citing *Blonder-Tongue Labs., Inc. v. Univ. of Ill. Found., 402 U.S. 313, 91 S. Ct. 1434, 28 L. Ed. 2d 788 (1971))*; *Translogic Tech., Inc. v. Hitachi, Ltd., 250 F. App'x 988 (Fed. Cir. 2007)*.[8]

We do not find, as the Dissent states, that "in the event of conflict the administrative agency's decision 'moots' the district court's decision." Dissent at 6. Rather, we find that an affirmance of an invalidity finding, whether from a district court or the Board, has a collateral estoppel effect on all pending or co-pending actions. This court has long applied the Supreme Court's holding in *Blonder-Tongue* to apply collateral estoppel in mooting pending district court findings of no invalidity based **[**24]** on intervening final decisions of patent invalidity. *See, e.g., Mendenhall v. Barber-Greene Co., 26 F.3d 1573, 1576 (Fed. Cir. 1994)*; *Dana Corp. v. NOK, Inc., 882 F.2d 505, 507-08 (Fed. Cir. 1989)*. This court also recently applied the Supreme Court's holding in *B&B Hardware, Inc. v. Hargis Industries, Inc., 135 S. Ct. 1293, 1303, 191 L. Ed. 2d 222 (2015)*, to apply such estoppel to Board decisions. *See MaxLinear, Inc. v. CF CRESPE LLC, 880 F.3d 1373 (Fed. Cir. 2018)*. The instant case is a straightforward application of this court's and Supreme Court precedent.

As to the Dissent's concern of applying estoppel without briefing, both precedent and the parties' positions allow application of collateral estoppel *sua sponte* here. *HN14*[] A remand for briefing is not a requirement to applying estoppel when there is no indication **[*1295]** from the Patent Owner that "it did not have a full and fair opportunity to litigate the validity" of its patent in the parallel case. *Dana Corp., 882 F.2d at 508*. Here, in oral argument, both parties assumed that an affirmance of the Board's decision would result in estoppel and thus simply disputed the result of such estoppel. Trans Ova argued that an affirmance would call for a remand of this case to reassess damages in light of the Freezing Patent's invalidity, while XY argued that an affirmance would not require a remand because the asserted patents were grouped in a way where the invalidation of one patent would not affect the damages award. Oral Arg. at 1:30-46, 18:10-19:20. There **[**25]** is no indication that either party thought estoppel would not apply. Thus, this court, in circumstances such as this one, applies estoppel *sua sponte* to avoid "unnecessary judicial waste" from remanding an issue that has a clear estoppel effect. *Arizona v. California, 530 U.S. 392, 412, 120 S. Ct. 2304, 147 L. Ed. 2d 374 (2000)*.

Further, the fact that the Defendant in this case and the Petitioners in an *inter partes* review at the Board were different parties is of no consequence. *HN15*[] "An unrelated accused infringer may . . . take advantage of an unenforceability decision under the collateral estoppel doctrine." *Pharmacia & Upjohn Co. v. Mylan Pharms., Inc., **[***1094]** 170 F.3d 1373, 1379 (Fed. Cir. 1999)* (affirming district court application of collateral estoppel).

Thus, in view of this court's concurrent affirmance of the Board's decisions in *XY, LLC v. ABS Global, Inc.*, Appeal No. 16-2228, we do not address Trans Ova's invalidity arguments as to the Freezing Patent claims in this appeal, and dismiss Trans Ova's appeal of the district court's decision on this issue as moot.

B. Abuse of Discretion

For the remaining patents-at-issue, we agree with XY that the district court did not abuse its discretion in denying Trans Ova's motion for a new trial on the issue of patent invalidity. First, *HN16*[] "[t]he jury holds 'the exclusive function of appraising credibility . . . [and] **[**26]** determining the weight to be given to the testimony.'" J.A. 17 (quoting *United Int'l Holdings, Inc. v. Wharf (Holdings) Ltd., 210 F.3d 1207, 1227 (10th Cir. 2000))*. Second, the jury's findings of no invalidity for these patents is supported by substantial evidence, as discussed *infra*.

For the In-Vitro Fertilization Patent, asserted claim 9 requires "produc[ing] sex-selected embryos capable of blastocyst formation." XY Principal Br. at 42. Dr. Wood testified that the primary reference asserted against claim 9, the Merton reference, disclosed only a "failed experiment" that did not show producing sex-selected embryos

---

[8] These decisions are non-precedential, but lay out the reasoning for co-pending appellate decisions having a preclusive effect on each other.

capable of blastocyst formation. J.A. 11324. Although 1.5% of inseminated oocytes (i.e., eggs) reached blastocyst stage in Merton's experiment, Dr. Wood testified that this was a statistically insignificant result and that the blastocyst formation could have been caused by external stimuli via parthenogenesis. *See* J.A. 11323 ll. 15-22 ("[C]leavage is the first stage of [embryo] development. . . . [T]he cleavage process can be stimulated by either a sperm entering the oocyte or it can be stimulated by [a] change in environment" that "stimulate[s]" the embryo "to go through what's called parthenogenesis . . . ."). The jury reasonably credited Dr. Wood's testimony **[**27]** and determined that claim 9 of the In-Vitro Fertilization Patent was not invalid because the Merton reference did not disclose the limitation reciting "produc[ing] sex-selected embryos capable of blastocyst formation."

[*1296] The asserted claims of the Fluid Patents (claims 12 and 13 of the '867 patent and claims 1 and 32 of the '860 patent) require chemical coordination between pre- and post-sort fluids that are added to sperm cells to help them survive the sorting process. XY Principal Br. at 45. Dr. Wood testified that, although the prior art reference (the Johnson Patent) disclosed the fluids, it did not contemplate any coordination in introducing the fluids so as to aid the sperm in adapting at each transition between sorting stages. *Id.* at 46. The Karabinus reference, another reference asserted against the Fluid Patents, also did not disclose coordination according to Dr. Wood. *Id.* at 47. Dr. Wood testified that coordination requires more than the mere introduction of fluid into the sorting process, which was all that the asserted prior art references taught. The jury reasonably relied on Dr. Wood's testimony to reject Trans Ova's invalidity arguments on the Fluid Patents.

The asserted claims of the Reverse Sort Patents (claims **[**28]** 1, 2, and 13 of the '687 patent and claims 1, 2, 5, and 18 of the '921 patent) were also found to be not invalid by the jury. The parties disputed whether the common claim step of dyeing the sperm cells with "Hoechst 33342 stain" at a concentration of greater than 40 micromolar would have been obvious over prior art references that disclosed using a concentration of approximately 9 micromolar. Dr. Wood testified that a person of ordinary skill would not have increased the staining amount from 9 to 40 because skilled artisans (1) were already satisfied with the staining capabilities at 9 and (2) would have been concerned about the toxicity to the sperm cells caused by the increase to 40. The jury reasonably relied on this testimony from Dr. Wood to find that a person of ordinary skill in the art would not have found the increase to 40 to be obvious and, therefore, that the asserted claims of the Reverse Sort Patents were not invalid.

For the foregoing reasons, we affirm the district court's denial of Trans Ova's motion for a new trial on the invalidity issues.

IV. Willfulness

As noted, *supra*, the district court declined to award enhanced damages, even after it reinstated the jury's willfulness finding. Because **[**29]** no enhanced damages were awarded, which XY does not appeal, we dismiss as moot Trans Ova's appeal of the district court's decision to reinstate the jury's finding that Trans Ova's infringement was willful. *See* *Odetics, Inc. v. Storage Tech. Corp.,* ***[***1095]*** *185 F.3d 1259, 1274-75 (Fed. Cir. 1999)* (holding that a dispute about the district court's limitation of the time period during which the jury could find willful infringement was moot in view of the court's determination that the district court did not abuse its discretion in declining to award enhanced damages).

V. Ongoing Royalty

The parties do not dispute the district court's decision to award an ongoing royalty. The only dispute relates to the appropriateness of the district court's mandated rates. In particular, XY appeals the district court's 12.5% rate for gross sales of products practicing the patents and 2% rate for reverse sorting services. XY argues that these ongoing royalty rates are too low in view of the jury's decision to award backward-looking damages based on a 15% rate on gross sales and a 4% rate on reverse sorting services.[9] XY argues that the district court misapplied **[*1297]** our precedent by neglecting to focus on the post-verdict economic circumstances of the parties when calculating the ongoing royalty **[**30]** rates. Trans Ova argues in response that the district court "had broad discretion to assess a reasonable ongoing royalty rate" and that "XY seeks to strip . . . all district courts . . . of that

[9] Trans Ova does not contest that the jury relied on these rates to arrive at its damages award.

discretion by requiring that they set an ongoing royalty rate no lower than the amount awarded for infringement absent exceptional circumstances." Trans Ova Resp. Br. at 48.

In *Amado v. Microsoft Corp.*, we held that ***HN17***[] there is a "fundamental difference" between "a reasonable royalty for pre-verdict infringement and damages for post-verdict infringement." *517 F.3d 1353, 1360 (Fed. Cir. 2008)*. For example, when calculating an ongoing royalty rate, the district court should consider the "change in the parties' bargaining positions, and the resulting change in economic circumstances, resulting from the determination of liability." *Id. at 1362*. When patent claims are held to be not invalid and infringed, this amounts to a "substantial shift in the bargaining position of the parties." *ActiveVideo Networks, Inc. v. Verizon Commc'ns, Inc., 694 F.3d 1312, 1342 (Fed. Cir. 2012)*. We have also instructed district courts to consider changed economic circumstances, such as changes related to the market for the patented products. *Paice LLC v. Toyota Motor Corp., 504 F.3d 1293, 1315 n.15 (Fed. Cir. 2007)*; *ActiveVideo, 694 F.3d at 1343* (noting that district courts may consider "additional evidence" of "economic circumstances that may be of value **[**31]** in determining an appropriate ongoing royalty").

The requirement to focus on changed circumstances is particularly important when, as in this case, an ongoing royalty effectively serves as a replacement for whatever reasonable royalty a later jury would have calculated in a suit to compensate the patentee for future infringement. *See* *Paice, 504 F.3d at 1315 n.15* ("This process will . . . allow the parties the opportunity to present evidence regarding an appropriate [ongoing] royalty rate to ***compensate*** [the patentee] . . . ." (emphasis added)). The later jury would necessarily be focused on what a hypothetical negotiation would look like ***after*** the prior infringement verdict. Therefore, post-verdict factors should drive the ongoing royalty rate calculation in determining whether such a rate should be different from the jury's rate. *See* *Arctic Cat Inc. v. Bombardier Recreational Prods. Inc., 876 F.3d 1350, 1370 (Fed. Cir. 2017)* ("Ongoing royalties may be based on a post-judgment hypothetical negotiation using the *Georgia-Pacific* factors.").

The district court focused on pre-verdict factors that were either irrelevant or less relevant than post-verdict factors. In particular, the district court awarded an ongoing royalty based on an average between the jury's reasonable royalty for past infringement (15%) **[**32]** and the rate established in the parties' pre-suit license Agreement (10%). There are several problems with the district court's usage of the 10% license rate in determining the ongoing royalty rate. First, that license rate had already been considered by the jury when it found that a higher rate of 15% was warranted for assessing damages, and that determination has not been appealed. To incorporate the license rate a second time in the context of the ongoing rate essentially amounts to undoing a jury finding. Second, the license rate was arrived at in the context of the parties' pre-suit bargaining positions. It therefore is not relevant to assessing any changed circumstances that could alter a hypothetical negotiation between the date of first infringement and the date of the jury's verdict. The district court also appeared **[***1096]** to consider XY's past behavior in engaging in "failed negotiations to enter into an amended license **[*1298]** agreement with Trans Ova" in calculating the ongoing royalty. J.A. 26-27. However, the district court cited no evidence that the parties' past actions would carry forward during future infringement or why they would be relevant for calculating a royalty rate for **[**33]** ***future*** patent infringement. The district court thus provided no reasoned basis for lowering the royalty XY could recover for future infringement from the rate the jury provided for past infringement. The focus should have been on XY's improved bargaining position and any other changed economic factors (as articulated in *Amado*, *ActiveVideo*, and *Paice*) rather than XY's past acts.

XY points out that, if we were to affirm the result in this case, it would result in the "absurd practical result . . . that XY would have been better off forgoing the 12.5% ongoing royalty and suing Trans Ova repeatedly for future infringement at the jury's 15% reasonable royalty rate." XY Reply Br. at 13. Assuming no changed circumstances exist (either good or bad for XY) between the date of first infringement and the date of the jury's verdict, we agree with XY that allowing the district court's ongoing rates to stand in this case would create an odd situation. Although ***HN18***[] district courts may award a lower ongoing royalty rate if economic factors have changed in the infringer's favor post-verdict—for example, if a newly-developed non-infringing alternative takes market share from the patented products—the district **[**34]** court identified no economic factors that would justify the imposition of rates that were lower than the jury's.[10]

For these reasons, we vacate the district court's ongoing royalty rate and remand with instructions to recalculate the rate in accordance with this opinion.

CONCLUSION

We have considered all of the parties' remaining arguments. They do not affect our decisions on any of the disputed issues. For the foregoing reasons, the district court's judgment is

AFFIRMED IN PART, DISMISSED IN PART, VACATED IN PART AND REMANDED

Concur by: NEWMAN (In Part)

Dissent by: NEWMAN (In Part)

Dissent

NEWMAN, *Circuit Judge*, concurring-in-part, dissenting-in-part.

I concur in the court's judgment on the contract and antitrust issues. My concern is with the holding that the district court's judgment of validity of the Freezing Patent is "moot" on the ground of collateral estoppel. This holding of estoppel is based on a PTAB ruling in a separate case involving non-mutual parties, and contravenes not only the America Invents Act's estoppel provision, but also the general law of collateral estoppel. Of further concern, this holding that judicial authority is estopped by an administrative agency ruling between non-mutual parties warrants **[**35]** attention to the constitutional balance among the branches of government. In addition, due process is not served by my colleagues' *sua sponte* creation of this estoppel on this appeal, without notice to the parties, without briefing, and without opportunity to respond.

I respectfully dissent from the panel majority's holding of collateral estoppel and ensuing invalidity as to the Freezing Patent. I concur as to validity and infringement of the two Fluid Patents, the In-Vitro Fertilization Patent, and the two Reverse Sort Patents. I also would affirm the jury's damages verdict.

[*1299] ***DISCUSSION***

The America Invents Act contains the following special estoppel provision applied to a civil action involving an alleged infringer who obtained inter partes review in the PTO:

> *35 U.S.C. § 315(e)(2)*. Civil actions and other proceedings. - The petitioner in an inter partes review of a claim in a patent under this chapter that results in a final written decision under *section 318(a)*, or the real party in interest or privy of the petitioner, may not assert either in a civil action arising in whole or in part under *section 1338* of title 28 or in a proceeding before the International Trade Commission under section 337 of the Tariff Act of 1930 that the claim is invalid **[**36]** on any ground that the petitioner raised or reasonably could have raised during that inter partes review.

---

[10] To the contrary, the district court stated: "The evidence at trial showed that the use of sorted semen via XY's technology has spread rapidly in recent years, and the success and popularity of XY's methods suggests that a higher rate than that in the Agreement may be appropriate." J.A. 27.

[*1097]** Thus *section 315(e)(2)* estops the PTAB petitioner from asserting designated grounds of invalidity in a civil action. However, that is not the situation here. This appeal is from a district court civil action to which the PTAB petitioner (or its privy) is not a party.

In the district court decision here on appeal, validity of the Freezing Patent was first found by a jury and sustained by the district judge. The jury's finding of no invalidity is supported by substantial evidence. The jury verdict and the district court's judgment of validity of the Freezing Patent are not "mooted" by the PTAB's invalidity decision between non-mutual parties. The PTAB's decision may indeed be sustainable on the "substantial evidence" standard of the Administrative Procedure Act (APA), but the agency decision does not automatically override and estop the district court's earlier validity judgment, and remove that judgment from our appellate cognizance. Contrary to the majority's position, the district court's judgment that is here on appeal requires our appellate response, not discard.

Nor can the PTAB's decision be **[**37]** somehow validated by our concurrent separate affirmance of that agency decision on the APA standard of review. That separate action cannot ratify our concurrent refusal to apply the Article III standard of review to the district court decision here on appeal; that separate action cannot justify our discard of the district court's judgment as "mooted" by the agency decision. The law of collateral estoppel does not contemplate that result.

In *United States v. Mendoza, 464 U.S. 154, 104 S. Ct. 568, 78 L. Ed. 2d 379 (1984)*, the Court explained the principle of collateral estoppel:

> [L]ike the related doctrine of res judicata, [collateral estoppel] serves to "relieve parties of the cost and vexation of multiple lawsuits, conserve judicial resources, and, by preventing inconsistent decisions, encourage reliance on adjudication.

Id. at 158 (quoting *Allen v. McCurry, 449 U.S. 90, 94, 101 S. Ct. 411, 66 L. Ed. 2d 308 (1980))* (footnote omitted). However, the Court has recognized the constitutional concerns raised by collateral estoppel: "The issue of collateral estoppel is a question that clouds the underlying issue of constitutionality." *Mackey v. Mendoza-Martinez, 362 U.S. 384, 387, 80 S. Ct. 785, 4 L. Ed. 2d 812 (1960)*. In *Mackey*, the Court remanded to the district court "to put in issue the question of collateral estoppel and to obtain an adjudication upon it." *Id.* Here, however, this court *sua sponte* finds collateral estoppel, discarding **[**38]** the district court judgment without consideration of the merits.

The Court teaches that estoppel is not routinely automatic. In *Blonder-Tongue Laboratories, Inc. v. University of Illinois Foundation, 402 U.S. 313, 91 S. Ct. 1434, 28 L. Ed. 2d 788 (1971)*, for example, the **[*1300]** Court rejected the position "that a plea of estoppel by an infringement or royalty suit defendant must automatically be accepted once the defendant in support of his plea identified the issue in suit as the identical question finally decided against the patentee or one of his privies in previous litigation." *Id. at 332-33*.

In *Montana v. United States, 440 U.S. 147, 162, 99 S. Ct. 970, 59 L. Ed. 2d 210 (1979)*, the Court further guided that collateral estoppel is subject to a variety of exceptions. The Federal Circuit so acknowledged in *Bingaman v. Department of Treasury, 127 F.3d 1431, 1437 (Fed. Cir. 1997)* ("Collateral estoppel is subject to exceptions when the circumstances dictate."). Yet today no opportunity is provided to raise possible exceptions and objections.

The *Restatement (Second) of Judgments §§ 28-29* collects the many "Exceptions to the General Rule of Issue Preclusion." *Section 28* recites circumstances in which relitigation of an issue has been held not to be precluded in a subsequent action between the same parties. *Section 29* records additional circumstances negating issue preclusion when there is non-mutuality of parties:

> (1) Treating the issue as conclusively determined would be incompatible with an applicable scheme of administering the remedies in **[**39]** the actions involved;
> (2) The forum in the second action affords the party against whom preclusion is asserted procedural opportunities in the presentation and deXY, termination of the issue that were not available in the first action and could likely result in the issue being differently determined;

(3) The person seeking to invoke favorable preclusion, or to avoid unfavorable preclusion, could have effected joinder in **[***1098]** the first action between himself and his present adversary;
(4) The determination relied on as preclusive was itself inconsistent with another determination of the same issue;
(5) The prior determination may have been affected by relationships among the parties to the first action that are not present in the subsequent action, or apparently was based on a compromise verdict or finding;
(6) Treating the issue as conclusively determined may complicate determination of issues in the subsequent action or prejudice the interests of another party thereto;
(7) The issue is one of law and treating it as conclusively determined would inappropriately foreclose opportunity for obtaining reconsideration of the legal rule upon which it was based;

(8) Other compelling circumstances make **[**40]** it appropriate that the party be permitted to relitigate the issue.

Restatement § 29 (citing cases). Applying these principles to this appeal, we need understand no more than the different standards of validity in the PTAB and the district court, the different burdens of proof, and the different standards of appellate review in this court, to appreciate that inconsistent decisions can be reached in the PTAB and the district court, all weighing heavily against estoppel.[1] My colleagues' **[*1301]** holding that in the event of conflict the administrative agency's decision "moots" the district court's decision, raises critical issues of constitutional balance.

The imposition of estoppel by my colleagues contravenes the America Invents Act, *§ 315(e)(2)*, as well as the Supreme Court's rulings. My colleagues rely on *Dana Corp. v. NOK, Inc., 882 F.2d 505 (Fed. Cir. 1989)*, to support depriving XY of the opportunity to contest the appellate application of collateral estoppel. Maj. Op. at 20. Yet in *Dana Corp*. the parties had opportunity to debate the issue; it was not an appellate surprise, as we explained:

> NOK first raised estoppel in its reply brief. The parties addressed the issue at oral argument, during which Dana's counsel asserted that collateral estoppel **[**41]** should not be applied against Dana to defeat its infringement claim against NOK based on invalidity of the '621 patent. After oral argument, this court ordered the parties to file supplemental briefs on that issue. Dana was required to address "its position that collateral estoppel should not be applied to this case and the related question of the propriety of this court, in the first instance, making that determination."

882 F.2d at 508 (quoting Order). In contrast, estoppel was not raised on this appeal, was not briefed, not argued at the hearing,[2] not briefed post-hearing.

The court in *Dana Corp*. held that a remand was unnecessary because the patentee did not seek to supplement the record. My colleagues deny XY this opportunity, despite no party raising the question of whether estoppel negates or moots this district court judgment. "The indispensable ingredients of due process are notice and an opportunity to be heard by a disinterested decision-maker." *Abbott Labs. v. Cordis Corp., 710 F.3d 1318, 1328 (Fed. Cir. 2013)*

---

[1] My colleagues rely on this panel's concurrent affirmance of the PTAB's invalidation of the Freezing Patent in a non-mutual proceeding, *XY, LLC v. ABS Global, Inc.*, Appeal No. 16-2228. On the standard of "substantial evidence," the PTAB decision is supportable. However, on the district court's standard of "clear and convincing evidence," or even applying the standard of "preponderant evidence," the Freezing Patent retains validity. This discrepancy and the ensuing uncertainty of outcome illuminate a major flaw in the America Invents Act. Although it is now confirmed that Congress has authority to authorize the PTAB to invalidate issued patents, see *Oil States Energy Services, LLC v. Greene's Energy Group, LLC, 138 S. Ct. 1365, 200 L. Ed. 2d 671, 2018 WL 1914662 (U.S. 2018)*, it cannot be inferred that Congress also authorized the PTAB to override the judgments of Article III courts.

[2] The panel majority proposes that "[t]here is no indication that either party thought estoppel would not apply." Maj. Op. at 20. However, neither is there any indication that either party thought estoppel would apply—it was never discussed. "The fallacy of the argument consists in assuming the very ground in controversy." *Trs. of Dartmouth Coll. v. Woodward, 17 U.S. 518, 697, 4 L. Ed. 629 (1819)* (Story, J., concurring).

(citing *Caperton v. A.T. Massey Coal Co., 556 U.S. 868, 876-81, 129 S. Ct. 2252, 173 L. Ed. 2d 1208 (2009)*; *LaChance v. Erickson, 522 U.S. 262, 266, 118 S. Ct. 753, 139 L. Ed. 2d 695 (1998)*; *Memphis Light, Gas & Water Div. v. Craft, 436 U.S. 1, 13, 98 S. Ct. 1554, 56 L. Ed. 2d 30 (1978)*; *Mathews v. Eldridge, 424 U.S. 319, 333,* **[***1099]** *96 S. Ct. 893, 47 L. Ed. 2d 18 (1976))*. *Dana Corp*. afforded procedural safeguards that my colleagues deny.

My colleagues argue that their imposition of *sua sponte* estoppel avoids "unnecessary judicial waste." Maj. Op. at 20. However, the conclusion of estoppel is reached without receiving **[**42]** the argument of the parties. Due process is not "unnecessary judicial waste."

The majority's imposition of collateral estoppel is inconsistent with precedent. In *B&B Hardware, Inc. v. Hargis Industries, Inc., 135 S. Ct. 1293, 1303, 191 L. Ed. 2d 222 (2015)*, the Court applied issue preclusion arising from agency and Eighth Circuit trademark rulings, explaining why the "well-known exceptions" in *§ 28 of the Restatement* were not applicable on the facts that existed. Collateral estoppel is not subject to automatic imposition without affording any opportunity for party discussion.

The opportunity to rebut a charge of collateral estoppel is a consistent theme in this court's jurisprudence, including the **[*1302]** cases cited by the panel majority. In *Mendenhall v. Barber-Greene Co., 26 F.3d 1573, 1580 (Fed. Cir. 1994)*, this court observed that "[e]ach appellant raised the issue [of collateral estoppel] during pending litigation at virtually the earliest possible date." In *Pharmacia & Upjohn Co. v. Mylan Pharmaceuticals, Inc., 170 F.3d 1373 (Fed. Cir. 1999)*, the district court imposed collateral estoppel on the patentee, and on appeal the patentee had the opportunity to argue against preclusion. *Id. at 1379-80*. Conflicting views of the PTAB and the district court as to the Freezing Patent's validity does not lead to automatic eradication of the district court's judgment of validity. In *Arizona v. California, 530 U.S. 392, 412-13, 120 S. Ct. 2304, 147 L. Ed. 2d 374 (2000)*, relied upon by the majority, the Court declined to *sua sponte* accept a preclusion defense.

Our **[**43]** non-precedential opinions are in accord with this established jurisprudence. In *U.S. Ethernet Innovations, LLC v. Texas Instruments Inc., 645 F. App'x 1026 (Fed. Cir. 2016)*, the district court afforded the patentee the opportunity to rebut application of collateral estoppel, and the ruling of failure to rebut was a subject of the appeal. *Id. at 1028-29*. Similarly, in *Translogic Technology, Inc. v. Hitachi, Ltd, et al., 250 F. App'x 988 (Fed. Cir. 2007)*, the patentee argued against the application of collateral estoppel.

The panel majority seeks support in this court's recent decision in *MaxLinear, Inc. v. CF Crespe LLC, 880 F.3d 1373 (Fed. Cir. 2018)*. Maj. Op. at 19-20. However, *MaxLinear* was not a case of collateral estoppel; *MaxLinear* related to inconsistent PTAB decisions, whereby this court remanded to the PTAB instructing that: "On remand, the Board must consider whether the dependent claims 4, 6-9, and 21 can survive the unpatentability of claims 1 and 17 from which they depend in view of the prior art cited in the '728 IPR." *Id. at 1377-78*. This was not an application of collateral estoppel on appellate review.

Here, collateral estoppel was not pleaded and was not argued, yet is imposed on appeal without opportunity for response—contrary to precedent requiring that the precluded party "had a full and fair opportunity to present its arguments" concerning estoppel. *Transclean Corp. v. Jiffy Lube International, Inc., 474 F.3d 1298, 1308 (Fed. Cir. 2007)*. The cases cited by the panel majority do not support their position; they support **[**44]** the contrary position.

These departures from statute, precedent, practice, and due process add to the uncertainty of the patent grant, and thus add disincentive to patent-supported innovation. I discern no benefit to the public. I respectfully dissent.
