Qualcomm's broadest contention is that Dr. Flamm's entire pass-through theory should be excluded. Specifically, Qualcomm has filed a motion to strike Dr. Flamm's declaration under *Daubert* and Federal Rule of Evidence 702. *Daubert* Mot. at 1. The Court addresses Qualcomm's *Daubert* motion at this stage because Dr. Flamm's model is a central component **[**77]** of Plaintiffs' proposed method to show that all or nearly all of the putative class members suffered an injury.

Federal Rule of Evidence 702 allows admission of "scientific, technical, or other specialized knowledge" by a qualified expert if it will "help the trier of fact to understand the evidence or to determine a fact in issue." Fed. R. Evid. 702. Expert testimony is admissible pursuant to Rule 702 if it is both relevant and reliable. Daubert, 509 U.S. at 589. An expert witness may provide opinion testimony if: (1) the testimony is based upon sufficient facts or data; (2) the testimony is the product of reliable principles and methods; and (3) the expert has reliably applied the principles and methods to the facts of the case. Fed. R. Evid. 702. "The duty falls squarely upon the district court to 'act as a gatekeeper to exclude junk science that does not meet Federal Rule of Evidence 702's reliability standards.'" Estate of Barabin v. AstenJohnson, Inc., 740 F.3d 457, 463 (9th Cir. 2014) (en banc) (quoting Ellis v. Costco Wholesale Corp., 657 F.3d 970, 982 (9th Cir. 2011)). However, this duty is to evaluate not the correctness of the expert's conclusions, but the principles and methodology used to generate the conclusions. *Primiano v. Cook, 598 F.3d 558, 564 (9th Cir. 2010)*. Moreover, the inquiry into admissibility of expert opinion is a "flexible one," where "[s]haky but admissible evidence is to be attacked by cross examination, contrary evidence, and attention to the burden of proof, **[**78]** not exclusion." *Id.* (citing Daubert, 509 U.S. at 594). In other words, the Court has broad discretion and flexibility in structuring and assessing an expert's reliability. *Murray v. S. Route Mar. SA, 870 F.3d 915, 924 (9th Cir. 2017)*.

Dr. Flamm is a professor at the University of Texas who specializes in applied microeconomics. Flamm Decl. ¶¶ 1-2. His credentials and expertise to offer expert opinion in this matter are not challenged. As noted above, Plaintiffs retained Dr. Flamm to provide an analysis of "whether common evidence would be available to show how the overcharge levied by Qualcomm would have affected the price and performance characteristics of mobile devices," and "how those price and performance characteristics would in turn be reflected in the price and performance of mobile devices purchased by final consumers." *Id.* ¶ 13. Dr. Flamm performs this analysis by relying on hedonic regression, a method commonly used in economics to determine **[*305]** the relative importance of the variables which affect the price of a good. *Id.* ¶ 15. In its motion to strike Dr. Flamm's declaration, Qualcomm does not—and could not—dispute that "regression analysis is generally a reliable method for determining damages in antitrust cases and is a mainstream tool in economic study." **[**79]** In re High-Tech, 2014 U.S. Dist. LEXIS 47181, 2014 WL 1351040, at *14 (internal quotation marks and citation omitted). Indeed, courts regularly recognize that hedonic regression is a widely accepted econometric methodology that satisfies the four *Daubert* factors of testability, peer review and publication, measurable error rate, and general acceptance. *See, e.g.,* In re ConAgra Foods, Inc., 90 F. Supp. 3d 919, 947 (C.D. Cal. 2015), *aff'd sub nom.* Briseno v. ConAgra Foods, Inc., 844 F.3d 1121 (9th Cir. 2017);

In re Toyota Motor Corp. Hybrid Brake Mktg., No. 10-MD-02172-CJC, 2012 U.S. Dist. LEXIS 151559, 2012 WL 4904412, at *4 (C.D. Cal. Sept. 20, 2012).

Instead, Qualcomm argues that "Dr. Flamm's regression results are built on completely unreliable data." *Daubert* Mot. at 2. However, district courts within and outside this district have often concluded that "experts' decisions about what data to use" in their analysis bear on the weight, not the admissibility, of expert testimony. *In re TFT-LCD (Flat Panel) Antitrust Litig.*, No. 10-CV-01064-SI, 2013 WL 124347, at *1 (N.D. Cal. Jan. 8, 2013); *see also, e.g.,* In re Air Cargo Shipping Servs. Antitrust Litig., No. 06-MD-01175-VVP, 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100, at *49 (E.D.N.Y. Oct. 15, 2014) ("The determination of which dataset is most reliable is a merits question and does not preclude [an expert's] preference of one over the other."), *report and recommendation adopted*, No. 06-MD-01775-JG, 2015 U.S. Dist. LEXIS 90402, 2015 WL 5093503 (E.D.N.Y. July 10, 2015); In re Static Random Access Memory Antitrust Litig., No. 07-MD-01819-CW, 2010 U.S. Dist. LEXIS 141670, 2010 WL 5071694, at *6 (N.D. Cal. Dec. 7, 2010); In re Sulfuric Acid Antitrust Litig., 446 F. Supp. 2d 910, 923 (N.D. Ill. 2006). Relatedly, the U.S. Supreme **[**80]** Court has held that an expert's omission of variables from a regression analysis will normally "affect the analysis' probativeness, not its admissibility." *Bazemore v. Friday, 478 U.S. 385, 400, 106 S. Ct. 3000, 92 L. Ed. 2d 315 (1986)*. These limitations on expert testimony are properly tested in the adversarial process "through competing evidence and incisive cross-examination." *Murray, 870 F.3d at 925*.

In any event, Qualcomm's challenges to Dr. Flamm's dataset do not sufficiently undermine the reliability of Dr. Flamm's regression analysis to warrant exclusion. Qualcomm's contention that Dr. Flamm did not examine sufficient data to reach a reliable conclusion is misplaced. *Daubert* Mot. at 2. As Qualcomm acknowledges, Dr. Flamm applies his methodology to extensive transactional data supplied by actors at every step of the handset distribution chain. Flamm Decl. ¶ 261. Specifically, Dr. Flamm analyzes data from six major OEMs, five wireless carriers, six of the largest U.S. retailers, the largest U.S. distributor, and a major contract manufacturer. *Id.* Although Qualcomm faults Dr. Flamm for using information from only one distributor and one contract manufacturer, *Daubert* Mot. at 6-8, Qualcomm does not suggest how the small sample size affected Dr. Flamm's conclusions. Indeed, after **[**81]** receiving data from another distributor, Dr. Flamm has updated his analysis and has found that the distributor pass-through estimate shifted from 89.1% in his original report to 88.4% in his updated report. ECF No. 708-7 ("Flamm Opp. Decl.") ¶ 15.

Qualcomm relatedly claims that Dr. Flamm's decision to use a small fraction of the available data was motivated by "convenience, not sound statistical practices." *Daubert* Mot. at 2. However, an examination of Dr. Flamm's report reveals that he did not discard evidence as a matter of convenience. Instead, Dr. Flamm's data selection is based on two neutral methodological choices: (1) to include data with sufficient information about the ten quality-control characteristics in his model, and (2) to focus his analysis on the first period a product is observed. *Daubert* Opp. at 17; Flamm Decl. ¶¶ 256, 258. Qualcomm does not argue that these methodological choices on their own are grounds for exclusion. Moreover, Dr. Flamm provides adequate explanations for each of these methodological choices.

[*306] First, Dr. Flamm uses the same ten quality-control characteristics in his model that Qualcomm's own retained experts used in a submission to the FTC. Flamm Decl. ¶ 256. In his **[**82]** analysis, Dr. Flamm controls for these ten quality-control characteristics in order to determine what effect, if any, a change in Qualcomm's royalty rate would have on the price of phones to consumers in the market. *Id.* Notably, Qualcomm identifies only two Samsung phone models that Dr. Flamm excluded from his analysis on the basis of inadequate data, as compared to the 971 models that Dr. Flamm did include. Flamm Opp. Decl. ¶¶ 13, 36. Indeed, the number of phone models considered by Dr. Flamm far exceeds the approximately 238 models considered by Qualcomm's own experts in their FTC filing. *Daubert* Opp. at 18. Moreover, Dr. Flamm's analysis and conclusion remain essentially unaltered even after he updates his regression analysis to account for these two additional phone models. *Id.* ¶ 14.

Second, Dr. Flamm explains why he uses "prices and costs from the first period a product is observed." Flamm Decl. ¶ 257. Dr. Flamm describes why he uses this data for different marketplace actors. For OEMs, this data "capture[s] the prices set with carriers as they negotiate the phone configurations to be offered in retail locations." *Id.* "[I]n the case of Apple," this data reflects "the price [Apple] selected for the **[**83]** features it included in phones to be offered in its stores and through other resellers." *Id.* Finally, with regard to retailers and wireless carriers, "using prices and costs from the first period shows the pass-through of their initial procurement costs into initial sales prices." *Id.* After removing the non-probative data, Dr. Flamm performs a regression analysis in which he controls for the ten quality-control characteristics in order to determine what effect, if any, a change in Qualcomm's royalty rate would have on the price of phones to consumers in the "but for" world. *Id.* ¶ 256. To double-check his result, Dr. Flamm also performs another regression analysis for OEMs, contract manufacturers, and distributors using average price and cost data for the entire lifespan of the devices. Flamm Opp. Decl. ¶¶ 33-35. "[A] number of courts have held that averaged and aggregated data may be used to demonstrate pass-through." *In re TFT-LCD (Flat Panel) Antitrust Litig., 267 F.R.D. 583, 605 (N.D. Cal. 2010)*; *see also* Giuliano v. Sandisk Corp., No. 10-CV-02787 SBA, 2015 U.S. Dist. LEXIS 193817, 2015 WL 10890654, at *18 (N.D. Cal. May 14, 2015) ("Courts have . . . held that averaged and aggregated data is not fatal to econometric models used to measure the extent of pass-through of component costs in the prices paid for end-use products."). These alternative results **[**84]** based on average price and cost data are consistent with Dr. Flamm's previous results and show consistent, positive pass-through rates for the examined segments of the distribution chain. *Id.*

Finally, Qualcomm purports to identify errors in Dr. Flamm's coding that supposedly undermine the reliability of his conclusions. *Daubert* Mot. at 2. Qualcomm argues only that Dr. Flamm's miscoding "add[s] further critical errors to his already unreliable methodology and data selection." *Id.* at 12. Nevertheless, the Court rejects Qualcomm's argument on its own terms. Some of Dr. Flamm's coding mistakes stem from mistakes made by Qualcomm's own expert, Dr. Johnson. ECF No. 692-4 at 1 ("Errors in the launch dates of certain versions of some Apple models were inadvertently incorporated into Exhibit 22, resulting in incorrect entries."). The remaining errors that Qualcomm identifies are minor inaccuracies that had no appreciable effect on Dr. Flamm's analysis or conclusions. Flamm Opp. Decl. ¶¶ 12, 14. For example, with respect to the "most glaring" coding error noted by Qualcomm, *Daubert* Mot. at 11, Dr. Flamm's pass-through rate for the relevant distributor—Wistron—remains identical even after correction, Flamm **[**85]** Opp. Decl. ¶ 12. As with its other challenges above, Qualcomm does not attempt to show that the coding errors were so significant as to render Dr. Flamm's hedonic regression unreliable. For these reasons, the Court DENIES Qualcomm's motion to strike the declaration of Dr. Flamm.

The Court next considers Qualcomm's more-targeted challenges to Plaintiffs' theory of pass-through at specific links in the distribution chain—namely (1) OEMs and (2) retailers and wireless carriers.

[*307] (iii) Pass-Through by OEMs

Qualcomm first contends that Plaintiffs have failed to establish predominance on the antitrust impact element because Dr. Flamm's model cannot show that any OEM "actually raised the price of a phone" or "would have made a different, 'better' phone absent the overcharge." Opp. at 10. Qualcomm raises two specific arguments. First, Qualcomm contends that Plaintiffs' theory of OEM pass-through is deficient because it fails to account for varying profit margins across OEMS. *Id.* at 11-13. Second, Qualcomm asserts that Plaintiffs' model of OEM pass-through ignores that the alleged overcharges make up only a small portion of total cost. *Id.* at 13-15. The Court addresses each argument in turn.

First, Qualcomm argues that Dr. Flamm **[**86]** incorrectly presumes that OEMs must account for increased costs by raising prices or reducing quality. *Id.* at 11. Qualcomm states that Dr. Flamm's premise is faulty because real-world evidence shows that "OEMs make highly individualized decisions about costs and margins." *Id.* In particular, Qualcomm cites deposition testimony that OEMs have other options to respond to price increases, such as renegotiating other costs or adjusting profit margins. *Id.* at 11-12.

In attempting to inject these individual inquiries into the analysis, Qualcomm appears to misapprehend the relevant inquiry. Plaintiffs' theory in the instant case is that Qualcomm imposed an industry-wide above-FRAND royalty charge on all handsets sold by OEMs. *See* Elhauge Decl. ¶ 58. Qualcomm and the OEM enter into a license ex ante that fixes the royalty rate, which is generally applied to the net sales price that the OEM charges for the handset. *See id.* ¶ 110. Thus, the relevant question in the counterfactual "but for" analysis is whether a reduction in Qualcomm's systematic and predictable royalty charge would have resulted in lower quality-adjusted prices for consumers. *See* Flamm Reply Decl. ¶ 18 ("[T]he relevant pass-through question at issue **[**87]** in this case is: in a counterfactual 'but-for' world in which consistent and predictable market-wide royalties throughout the relevant period were systematically lower than what prevailed in the actual world, would end-consumers have experienced systematically lower quality-adjusted prices?"). Dr. Flamm's analysis, which relies on testimony from OEMs and basic economic principles regarding pass-through of industry-wide taxes, answers that question.

Qualcomm, by contrast, focuses on the slightly different question of how OEMs can respond to changes in cost. Opp. at 11 (listing ways that "OEMs faced with cost changes can respond"); Flamm Reply Decl. ¶ 16 ("Dr. Johnson implies that the relevant 'but-for' world is one in which an individual OEM would be faced with unexpected shifts in the Qualcomm royalty it anticipated paying mid-way through a device's life cycle."). However, the crux of this case does not involve a situation in which "OEMs incurred unexpected cost reductions on some or all the phone designs already in production." Flamm Reply Decl. ¶ 18. In fact, Plaintiffs rationally assume that such price fluctuations would be the same in the "as is" and "but for" worlds because, in light of **[**88]** intense competition in the smartphone industry, OEMs can be expected to "pursue the profit-maximizing motive of negotiating the best cost for the components they purchase, all else being equal." *Id.* ¶¶ 17, 50 n.45. Qualcomm's royalty rates, on the other hand, remain a known constant throughout the life cycle of a product. *Id.* ¶ 17. Although the royalty amount may fluctuate based on the net sales price charged by the OEM, the royalty rate stays the same. Thus, the Court is not persuaded by Qualcomm's first contention that variances in profit margins across OEMs overwhelm common issues of antitrust impact.

The Court also finds unpersuasive Qualcomm's second, and related, contention that Dr. Flamm fails to account for the fact that "an OEM's response to a change in the cost of a specific input will depend (among other things) on the input and the size of the change." Opp. at 14. Once again, the relevant question centers on how OEMs would act in a "but for" world where Qualcomm's ex ante royalty rate is reduced, not how OEMs respond to changes in cost. Flamm Reply Decl. ¶ 49. More fundamentally, Qualcomm overlooks substantial documentary and testimonial **[*308]** evidence that OEMs did not optimize stand-alone **[**89]** component costs in isolation, but rather optimized total incremental costs as a whole. *See id.* ¶¶ 99-102 (citing testimony). Indeed, both economic theory and witness descriptions of industry practice confirm that royalty costs (including Qualcomm's royalty) are considered with all costs when making determinations about price and quality. *Id.* For this reason, the competing model offered by Qualcomm's expert, Dr. Johnson, does not undermine Dr. Flamm's methodology because Dr. Johnson performs his analysis by dividing component costs into sub-categories. ECF No. 641-11 ("Johnson Decl.") ¶¶ 110-11; Flamm Reply Decl. ¶ 108 ("[S]licing component cost categories into sub-categories can produce spurious estimates of pass-through relationships in finite samples, even when firms are passing through total incremental unit cost."). To the extent that Qualcomm has identified some examples where market participants have not always passed through cost-savings, Opp. at 15, Qualcomm raises a merits question, not a basis to deny class certification.

Qualcomm's comparison of the instant case to *In re Optical Disk, 303 F.R.D. 311*, is unpersuasive. In that case, the court explained that the indirect purchasers had "not presented a persuasive explanation **[**90]** as to why it would be reasonable to assume a uniform pass through rate given that [the components at issue] typically make up a relatively small portion of the cost of the products into which they are incorporated." *Id. at 324*. Qualcomm asserts that Dr. Flamm here has "not presented a persuasive explanation as to why it would be reasonable to assume a uniform pass through rate" for OEMs when the "overcharge" makes up a "relatively small portion" of the phone's total cost. Opp. at 13. Dr. Flamm, however, offers an explanation supported by economic theory and studies for why OEMs will pass through industry-wide taxes. Moreover, he does not simply assume a uniform pass-through rate for OEMs. Instead, he examines transactional data for six different OEMs—including the five largest OEMs in the U.S. market (Apple, Samsung, Motorola, LG, and HTC)—who "accounted for approximately 90% of total cell phone sales" during the relevant period. Flamm Decl. ¶ 261. Dr. Flamm calculates individual pass-through rates for these six OEMs in order to model a composite pass-through rate. *Id.* While his results show the pass-through rates are not identical, they are uniformly high and positive. The court in *In re Optical Disk* ***[**91]*** *Drive* made a similar observation when it later certified the class of indirect purchasers based on a more-substantial study of pass-through to consumers. *In re Optical Disk Drive Antitrust Litig., No. 10-MD-2143 RS, 2016 U.S. Dist. LEXIS 15899, 2016 WL 467444, at *9 (N.D. Cal. Feb. 8, 2016)* ("The [plaintiffs] offer that they have now measured pass-through rates for over 273 million . . . products. While results show the pass-through rates are not uniform, they are uniformly high and positive—which [plaintiffs] contend is sufficient to show that overcharges were consistently passed through to consumers."). Thus, the Court rejects Qualcomm's predominance challenges to Plaintiffs' ability to show pass-through at the OEM level.

(iv) Pass-Through by Retailers and Wireless Carriers

Qualcomm next contends that Plaintiffs cannot show common impact at either the retailer or wireless carrier level. Opp. at 9-10, 16-18. Qualcomm focuses on two particular practices used by these market participants. First, retailers and wireless carriers employ a practice called focal-point pricing. *Id.* at 9-10. Second, retailers and wireless carriers utilize different pricing and marketing practices. *Id.* at 16-18. Qualcomm suggests that the individualized nature of these practices raises issues unique to each market participant that are **[**92]** not adequately addressed by Dr. Flamm's model and, therefore, defeat predominance. The Court examines each of the two practices in turn.

First, Qualcomm argues that Dr. Flamm "does not account for how, and by how much, focal-point pricing affects the alleged pass-through rate." Opp. at 10. Focal-point pricing is a marketing strategy in which sellers set consumer prices at "focal points," such as those ending in $9.99. Johnson Decl. ¶ 118. Qualcomm's expert Dr. Johnson indicates in his report that focal-point pricing was a dominant strategy employed by the retailers and **[*309]** wireless carriers in this case, and that most devices were sold "at just two focal points, i.e., prices ending in $49.99 and in $99.99." *Id.* ¶ 119; *see also id.* ¶¶ 120-21 (providing specific pricing figures for specific retailers and wireless carriers). The consequence of focal-point pricing is that sellers "may assign products with small to moderate differences in costs to the same price point despite cost differences, or may not move a given product to the next higher price point in response to relatively small cost increases." *In re Lithium Ion Batteries, 2018 U.S. Dist. LEXIS 35744, 2018 WL 1156797, at *4*. Qualcomm argues that this pricing strategy results in class members who purchased at a focal point **[**93]** price and experienced no overcharge.

What Qualcomm fails to appreciate is that Dr. Flamm's model is designed to measure quality-adjusted price, not simply nominal price. The economic term "quality-adjusted prices" captures both the nominal price and total quality of a particular product. Flamm Decl. ¶ 98. To take a simple example, although a $2.00 two-liter soda has a higher nominal price than a $1.50 one-liter soda, the $2.00 two-liter soda has a lower quality-adjusted price than the $1.50 one-liter soda. *See generally* ¶¶ 92-97. In the instant case, Dr. Flamm's reply declaration posits that even if the nominal, focal-point price would not shift in the "but for" world where Qualcomm's overcharge is lessened or eliminated, the quality-adjusted price will change. *See* Flamm Reply Decl. ¶ 73 (stating that his hedonic regression model "demonstrates that 88% of upstream cost changes are passed through to consumers in the form of quality-adjusted price changes"). In particular, under Dr. Flamm's theory, OEMs would develop higher-quality phones with improved features even though the price charged to consumers by retailers and wireless carriers remains the same. OEMs have the economic incentive **[**94]** to either improve the phone's features or lower the price to consumers because of the intense competition among OEMs in the smartphone industry. *Id.* ¶¶ 50, 58-61. Indeed, Dr. Flamm notes occasions in which OEMs pursued "cost breaks" even smaller than Qualcomm's royalty overcharge to obtain modem chips from Qualcomm with disabled functionality. *Id.* ¶ 62. Dr. Flamm's conclusion has added force in light of the various economic literature and supporting empirical studies showing that industry-wide taxes, like Qualcomm's, are passed through to end purchasers. Flamm Decl. ¶ 122. Thus, notwithstanding focal point pricing, Dr. Flamm's hedonic regression remains a viable "method for determining whether the entire class of consumers was harmed (or not) by pass-through of Qualcomm's alleged overcharge." Flamm Reply Decl. ¶ 73.

Case law from this district supports that conclusion. In *In re Optical Disk Drive*, the court certified a class of indirect purchasers over the defendants' focal-point pricing predominance challenge. The court explained that the "[indirect-purchaser] plaintiffs ha[d] proffered evidence that in competitive markets, economic theory (supported by empirical studies) consistently **[**95]** predicts that pass-through rates will be at or near 100%." *In re Optical Disk Drive, 2016 U.S. Dist. LEXIS 15899, 2016 WL 467444, at *8*. To account for focal-point pricing, the plaintiffs "contend[ed] that in some instances manufacturers will adjust the 'quality' of particular computer systems, rather than the price." *2016 U.S. Dist. LEXIS 15899, [WL] at *9*. The court stated that "the manufacturer [could] select the particular components and features to include or omit so as to preserve the expected profit margins for a particular target retail price." *Id.*

Thus, the court accepted the plaintiffs' "reduced quality" theory "as the means by which they intend to argue they overpaid in some instances." 2016 U.S. Dist. LEXIS 15899, [WL] at *10.

The decision in *In re Lithium Ion Batteries* is not to the contrary. There, the court concluded that the plaintiffs' expert's quality-adjusted pricing theory did not "demonstrate that any products (and thus the purchasers of those products) actually experienced a quality reduction, rather than an increased cost, as a result of the alleged price-fixing conspiracy." In re Lithium Ion Batteries, 2018 U.S. Dist. LEXIS 35744, 2018 WL 1156797, at *4. The court went on to observe that, even "assuming that consumer class members experienced quality reductions rather than price differences, [the expert] d[id] not explain how the existence of those quality reductions affects the reliability **[**96]** of his prior overcharge pass-through regression calculations," which were based on actual **[*310]** cost and price data. 2018 U.S. Dist. LEXIS 35744, [WL] at *5. Here, for the reasons detailed above, Dr. Flamm adequately explains how his regression analysis shows that consumers in the "but for" world would have paid lower quality-adjusted prices. In one possible scenario, consumers would have paid the same nominal price for the phone but would have received a phone of higher quality. As in In re Optical Disk Drive, Dr. Flamm provides a sound economic basis—rooted in academic literature, empirical studies, and his own regression analysis on actual transactional data—to support his theory and methodology. For these reasons, the Court disagrees that the presence of focal-point pricing at the retail and wireless carrier level defeats predominance.

Second, Qualcomm argues that Dr. Flamm has not accounted for instances in which retailers and wireless carriers offered a variety of rebates, discounts, promotions, bundling programs, financing, upgrades, trade-ins, and other similar pricing strategies. Opp. at 16. However, Plaintiffs offer a simple rebuttal. Specifically, Plaintiffs contend that it is reasonable to assume that the same pricing strategies **[**97]** would have occurred in the "but for" world. Reply at 12-13. Federal and state cases alike support this proposition. *See* In re Optical Disk Drive, 2016 U.S. Dist. LEXIS 15899, 2016 WL 467444, at *10 (rejecting the notion that the plaintiffs "ha[d] not accounted for, and will never be able to account for, instances in which retailers sold computer systems below cost, provided discounts or rebates, or bundled products together"); In re : Cathode Ray Tube (CRT) Antitrust Litig., No. 1917, 2013 U.S. Dist. LEXIS 137945, 2013 WL 5429718, at *20 (N.D. Cal. June 20, 2013) ("CRT manufacturers would have offered special price concessions to those buyers in the but-for as well as the actual world."), *report and recommendation adopted*, No. 07-CV-05944-SC, 2013 U.S. Dist. LEXIS 137946, 2013 WL 5391159 (N.D. Cal. Sept. 24, 2013); Rosack v. Volvo of Am. Corp., 131 Cal. App. 3d 741, 182 Cal. Rptr. 800, 808 (Ct. App. 1982) ("[C]ontentions of infinite diversity of product, marketing practices, and pricing have been made in numerous cases and rejected." (citation omitted)).

Nor has Qualcomm identified a predominance issue on the ground that some wireless carriers partially or fully subsidized phones for customers who subscribed to their services. Johnson Decl. ¶¶ 125-34. As a result of these subsidy programs, many customers paid less than full price for their phones, or even received their phones at less than cost or for free. *Id.* ¶ 133. However, Dr. Flamm "provide[s] empirical analysis of pass-through that directly controls for the subsidization strategy emphasized by [Qualcomm], as well as **[**98]** for financing and other important aspects of carrier phone sales." Flamm Reply Decl. ¶ 127. Specifically, Dr. Flamm performs separate pass-through rate calculations for subsidized and unsubsidized phones and finds statistically significant pass-through rates for each wireless carrier for subsidized and unsubsidized phones. *Id.* tbl.5. Dr. Flamm also responds to Qualcomm's concern that some phones are free or purchased for below the production cost: he describes how service contracts are used in conjunction with subsidies to recover the cost of phones. *Id.* ¶ 127; *see also* Flamm Decl. ¶¶ 234-44. As support, Dr. Flamm cites to an FCC filing in which a wireless carrier admits that it can recoup phone subsidies through locked-in service plans. Flamm Reply Decl. ¶¶ 130-31.

In sum, the Court is persuaded that the common issues that Plaintiffs identify with respect to pass-through will predominate over the individualized issues that Qualcomm raises.

(3) No Impact to Certain Segments of Indirect Purchasers

Qualcomm lastly contends that Plaintiffs' proposed class includes a large number of members who have suffered no impact as a result of Qualcomm's conduct. Opp. at 7-8. "[A] well-defined class may inevitably **[**99]** contain some individuals who have suffered no harm as a result of a defendant's unlawful conduct." Torres v. Mercer Canyons Inc., 835 F.3d 1125, 1136 (9th Cir. 2016). However, predominance may be lacking if the "class is defined so broadly as to include a great number of members who for some reason could not have been harmed by the defendant's allegedly unlawful conduct." Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 824 (7th Cir. 2012); *see also* Mazza, 666 F.3d at 596 (concluding that common issues did not predominate because **[*311]** large numbers of class members were never exposed to the challenged conduct to begin with); In re Rail Freight Fuel Surcharge Antitrust Litig., 292 F. Supp. 3d 14, 137-38 (D.D.C. 2017) (determining that predominance was lacking where over 2,000 uninjured plaintiffs would have to be "weeded out" of the 16,000-member class). The Court finds that Plaintiffs overcome that potential issue in the instant case.

Plaintiffs' basic theory of impact is that all actors in the distribution chain (including OEMs, retailers, and carriers) passed on the above-FRAND portion of Qualcomm's license fees to indirect purchasers. Qualcomm points out that Apple and its contract manufacturers began withholding payments of iPhone royalties from Qualcomm in October 2016 and stopped paying altogether in January 2017. ECF No. 641-12 at 325:17-326:12. Therefore, according to Qualcomm, the large number of consumers who purchased Apple **[**100]** iPhones after October 2016 could not be affected by Qualcomm's overcharge. Opp. at 8. For support, Qualcomm notes that Plaintiffs' experts, Mr. Lasinski and Dr. Flamm, do not calculate overcharges to Apple for the period after October 2016. *Id.*

The Court disagrees with Qualcomm's assessment that Plaintiffs' experts have conceded that the segment of the class that purchased Apple iPhones after October 2016 have suffered no antitrust impact. Whether or not Apple and its contract manufacturers elected to stop paying royalties does not definitively answer whether Apple incorporated potential future payments of the royalties into its consumer pricing. Indeed, Apple's internal documents show that Apple considered Qualcomm's royalty when pricing and designing iPhones to be sold in 2017. ECF No. 724-4 at 21. Apple's decisional choice makes sense because Qualcomm continues to charge royalties and has initiated ongoing litigation efforts to collect those royalties. *See* ECF No. 725-7 at 19. Additionally, the previous effects of Qualcomm's allegedly anticompetitive conduct on Apple (and all OEMs) continued even after Apple and its contract manufacturers ceased royalty payments. Elhauge Reply Decl. ¶ 9. **[**101]** In this way, "[t]he effect of Qualcomm's anticompetitive conduct on chipset prices is a common impact across all OEMs, including Apple, that persists beyond 2016." *Id.*

Qualcomm reads too much into Mr. Lasinski's and Dr. Flamm's statements to argue that "Plaintiffs' experts admit [that the post-October 2016 Apple purchasers] were not impacted." Opp. at 8. In his report, Mr. Lasinski performs an exemplary calculation of the above-FRAND surcharge paid by Apple (and four other OEMs). Lasinski Decl. ¶¶ 12 n.5, 22. That calculation is based on common evidence of multiple license agreements and documentary evidence regarding Qualcomm's licensing practices. *Id.* ¶ 147. Although Mr. Lasinski has not yet calculated the above-FRAND surcharge paid by Apple after 2016, he confirms that he would apply the same methodology and common evidence to quantify the surcharge. ECF No. 725-3 ("Lasinski Reply Decl.") ¶ 4 n.4. Likewise, Dr. Flamm's statement that post-2016 Apple purchasers are not part of the class must be read in the context of his additional statement that he had been asked to use Mr. Lasinski's numbers in performing the analysis. ECF Nos. 641-9 at 147:3-15, 724-6 at 148:10-150:1. The Court has not **[**102]** been shown or located anything in Mr. Lasinski's or Dr. Flamm's reports suggesting that quantification of the industry-wide above-FRAND overcharge requires individualized inquiries for portions of the putative class.

In sum, the structure of Plaintiffs' proposed class reveals a reasonably close fit with Plaintiffs' theory of antitrust impact, and the membership of the class is co-extensive with those who could have been injured by Qualcomm's allegedly anticompetitive conduct.

(4) Conclusion on Antitrust Impact

Plaintiffs have shown that common issues will predominate with respect to the element of impact, as to both direct purchasers and indirect purchasers. In particular, Plaintiffs' theory and methodology of demonstrating pass-through to consumers on a common basis withstands scrutiny. Of course, Qualcomm has submitted evidence purportedly contradicting Plaintiffs' pass-through theory and has launched attacks on the completeness and accuracy of Dr.

Flamm's pass-through studies. Nevertheless, the persuasiveness of **[*312]** Qualcomm's evidence and arguments is an issue to be decided on the merits, not at class certification.

c. Damages

Qualcomm's final predominance arguments center on Plaintiffs' **[**103]** ability to prove damages on a class-wide basis. First, Qualcomm contends that California law cannot be applied to a nationwide class of consumers. Opp. at 23-24. Second, Qualcomm contends that Plaintiffs' damages equation cannot workably prove individual damages because the results vary by distribution channel. *Id.* at 18-19. The Court addresses each contention in turn.

(1) Choice of Law

Qualcomm first contends that California law may not be applied to a nationwide class of consumers. Plaintiffs rely on the California Cartwright Act for damages because Plaintiffs cannot seek damages under the federal Sherman Act. As the Court explained in ruling on Qualcomm's motion to dismiss, Plaintiffs are indirect purchasers who cannot "bring suits for money damages [under the Sherman Act], even if the indirect purchasers suffered an injury in the form of an overcharge passed on from direct purchasers." ECF No. 175 at 42 (quoting *Ill. Brick Co. v. Illinois, 431 U.S. 720, 730, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977))*. The California Cartwright Act, however, does not contain the same prohibition against damages suits by indirect purchasers. *Id.* at 39.

Thus, the operative question is whether Plaintiffs may seek damages on behalf of the entire class under the California Cartwright Act. It is important to conduct such a choice-of-law **[**104]** analysis because "[i]n a multi-state class action, variations in state law may swamp any common issues and defeat predominance." *Castano v. Am. Tobacco Co., 84 F.3d 734, 741 (5th Cir. 1996)*; *see also* *Mazza, 666 F.3d at 589* (holding that "the district court erred by misapplying California's choice of law rules and certifying a nationwide class under California's consumer protection and unjust enrichment laws"). As Qualcomm recognizes, the Court already ruled at the motion to dismiss stage that the Cartwright Act may be applied to a nationwide class because other states do not have an interest in barring their own citizens from recovering damages for a California-based corporation's anticompetitive conduct that took place almost entirely in California. ECF No. 175 at 36-42. Although Qualcomm repeats its argument that a nationwide class cannot be certified under California law, Qualcomm raises the issue solely "for the purposes of preserving the argument." Opp. at 23. The Court reproduces its reasoning here.

A court must ensure that the certification of a nationwide class under the laws of a single state comports with due process. *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 818, 105 S. Ct. 2965, 86 L. Ed. 2d 628 (1985)*. "Under California's choice of law rules, the class action proponent bears the initial burden to show that California has significant contact or significant **[**105]** aggregation of contacts to the claims of each class member." *Mazza, 666 F.3d at 589* (citation and internal quotation marks omitted). "Once the class action proponent makes this showing, the burden shifts to the other side to demonstrate that foreign law, rather than California law, should apply to class claims." *Id. at 590* (citation and internal quotation marks omitted).

"[A]nticompetitive conduct by a defendant within a state that is related to a plaintiff's alleged injuries and is not 'slight and casual' establishes a 'significant aggregation of contacts, creating state interests.'" *AT & T Mobility LLC v. AU Optronics Corp., 707 F.3d 1106, 1113 (9th Cir. 2013)* (footnote and citation omitted). Qualcomm does not dispute that Plaintiffs have sufficiently alleged that California has a constitutionally sufficient aggregation of contacts to the claims of each putative class member in this case. The Court agrees, as Qualcomm's principal place of business is in California, Qualcomm made business decisions related to its anticompetitive conduct in California, and Qualcomm negotiated the licenses at issue in California. Accordingly, the Court finds that Plaintiffs have met their initial burden. "California has a constitutionally sufficient aggregation of contacts to the claims of each putative class **[**106]** member in this case," **[*313]** and application of California law here poses no constitutional concerns. *Mazza, 666 F.3d at 590*; *see also* *In re Yahoo Mail Litig., 308 F.R.D. 577, 602 (N.D. Cal. 2015)* (concluding application of California law was constitutionally permissible where defendant's corporate headquarters were in

California, the defendant's executive decision makers were largely in California, and the processes at issue were developed and directed in California); *Clothesrigger, Inc. v. GTE Corp., 191 Cal. App. 3d 605, 236 Cal. Rptr. 605 (Ct. App. 1987)* (finding application of California law was constitutionally permissible where defendant's principal offices were in California and the allegedly fraudulent misrepresentations emanated from California).

Because the Court is satisfied that Plaintiffs have adequately alleged that California has sufficient contacts with the proposed class claims, the burden is on Qualcomm to show "that foreign law, rather than California law, should apply." *Mazza, 666 F.3d at 590* (citation omitted). California law may be applied on a classwide basis only if "the interests of other states are not found to outweigh California's interest in having its law applied." *Id.* (quoting *Wash. Mut. Bank, FA v. Superior Court, 24 Cal. 4th 906, 103 Cal. Rptr. 2d 320, 15 P.3d 1071, 1082 (Cal. 2001))*. To determine whether the interests of other states outweigh California's interest, courts administer the following three-step government interest test. The court must first **[**107]** determine whether the law of the other states is materially different from California law. *Id. at 590*. Second, if there are differences, the court determines whether the other state has an interest in having its law applied to decide whether a true conflict exists. *Id. at 591-92*. Third, if another state has an interest, the court determines which state's interest would be most impaired if its policy were subordinated to the law of another state. *Id. at 593*.

(i) Material Differences in State Law

The Court finds that Qualcomm has met its burden on the first step of California's choice-of-law analysis. Plaintiffs concede, as they must, that there are material differences between California's Cartwright Act and the antitrust statutes of certain other states. Specifically, some states would not allow suits for damages by indirect purchasers, like Plaintiffs, to proceed at all. This difference is material, as its application would "spell the difference between the success and failure of a claim." *Mazza, 666 F.3d at 591*.

(ii) Other States' Interests

As for step two, the Court finds that while California has an interest in applying its law, other states have no interest in applying their laws to the current dispute. California's interest is clear. **[**108]** The California Supreme Court has held that the "primary concern" of the Cartwright Act is "the elimination of restraints of trade and impairments of the free market." *Clayworth v. Pfizer, Inc., 49 Cal. 4th 758, 111 Cal. Rptr. 3d 666, 233 P.3d 1066, 1083 (Cal. 2010)*. The mechanism of enforcing that commitment and deterring anticompetitive behavior is to allow private rights of action for treble damages. *Id.* Here, California has an interest in allowing this suit to proceed to address Qualcomm's unlawful business activities in California and deter such anticompetitive conduct perpetuated by a resident California corporation.

In contrast, the other states have no interest in applying their law to prevent this lawsuit from going forward. As noted above, the state laws at issue prohibit indirect purchasers from seeking damages for antitrust violations. These laws are designed to protect businesses and other actors from excessive antitrust liability by limiting suits for damages to those brought by direct purchasers. *See* *Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 208, 212, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)* (explaining that the rule barring monetary recovery by indirect purchasers serves the purposes of "eliminat[ing] multiple recoveries" and "eliminat[ing] the complications of apportioning overcharges between direct and indirect purchasers").

The other states' interest in **[**109]** preventing excessive antitrust recovery for defendants is not implicated in the present case, where the sole defendant is a California resident. The California Supreme Court has recognized that in enacting liability limits, a state has an "interest in protecting resident defendants **[*314]** from excessive financial burdens." *Hurtado v. Superior Court, 11 Cal. 3d 574, 114 Cal. Rptr. 106, 522 P.2d 666, 672 (Cal. 1974)*. When the state "has no defendant residents to protect," the state also "has no interest in denying full recovery to its residents injured by [out-of-state] defendants." *Id. at 670*. Here, Qualcomm is the only defendant and is a resident of California, not one of the states that would forbid a damages suit to proceed. Thus, the other states have no interest in disallowing the suit to proceed against Qualcomm. *See* *Munguia v. Bekins Van Lines, LLC, No. 11-CV-01134-LJO, 2012 U.S. Dist. LEXIS 151596, 2012 WL 5198480, at *10 (E.D. Cal. Oct. 19, 2012)* (explaining that "a jurisdiction's only interest in having its [stricter] damages limitation rules applied is to protect its resident defendants from excessive financial burdens or exaggerated claims"); *Pecover v. Elec. Arts Inc., No. 08-CV-02820-VRW, 2010 U.S. Dist. LEXIS 140632, 2010 WL 8742757, at *20 (N.D. Cal. Dec. 21, 2010)* ("[I]n cases involving [California] resident defendants, foreign states do not have a legitimate interest in limiting the amount of recovery for nonresident plaintiffs under California **[**110]** law."). Indeed, applying other states' laws to bar recovery here would paradoxically disadvantage the other states' own citizens for injuries caused by a California defendant's unlawful activities that took place primarily in California. In such a circumstance, "California's more favorable laws may properly apply to benefit nonresident plaintiffs." *Clothesrigger, 236 Cal. Rptr. at 610*.

In fact, one of Qualcomm's principal authorities draws the same resident—nonresident distinction discussed above. In *In re Lithium Ion Batteries Antitrust Litigation*, like here, the indirect purchaser plaintiffs asked the court to certify a nationwide class under the Cartwright Act even though the class would encompass states that would prohibit such a suit for damages from proceeding. *No. 13-MD-02420-YGR, 2017 U.S. Dist. LEXIS 57340, 2017 WL 1391491, at *14 (N.D. Cal. Apr. 12, 2017)*. The court concluded that a nationwide class would be improper because three of the defendants were based in New Jersey whose law barred indirect purchaser damages suits. *Id.* The court reasoned that where states bar indirect purchasers from seeking damages, "'it is too much of a stretch to employ California law as an end run around the limitations those states have elected to impose on standing' to protect [their] *resident businesses*." *Id.* ***[**111]*** (emphasis added) (quoting *In re Optical Disk Drive Antitrust Litig., No. 10-MD-02143-RS, 2016 U.S. Dist. LEXIS 15899, 2016 WL 467444, at *12 (N.D. Cal. Feb. 8, 2016))*; *see also* *In re TFT-LCD (Flat Panel) Antitrust Litig., No. 07-MD-01827-SI, 2013 U.S. Dist. LEXIS 97825, 2013 WL 4175253, at *2 (N.D. Cal. July 11, 2013)* (concluding that Texas law prohibiting indirect purchaser suits should apply to Texas defendants). Qualcomm's own authority counsels in favor of the conclusion that the other states have no legitimate interest in applying their law to this dispute.[4]

Mazza is not to the contrary. In *Mazza*, the Ninth Circuit examined whether California's consumer protection laws could properly be applied to automobile sales that took place in 44 different states. *666 F.3d at 589, 592*. In concluding that other states had an interest in applying their consumer protection laws to the transactions at hand, the Ninth Circuit explained that each state has an interest in regulating the interactions of resident consumers and out-of-state businesses within the state by setting requirements like scienter and remedies. *Id. at 591-92*. In this way, the states could properly calibrate liability to protect consumers while attracting business. *Id. at 592-93*. *Mazza* therefore followed the principle that "[e]very state has an interest in having its law applied to its *resident* ***[**112]*** *claimants*." *Id. at 591-92* (emphasis added) (quoting *Zinser v. Accufix Research Inst., Inc., 253 F.3d 1180, 1187 (9th Cir. 2001))*. The same interests are not implicated by the state laws at issue in this case. No resident claims the benefit of non-California law here because those state laws do not seek to protect consumers by governing their interactions with businesses. Instead, the laws at issue limit which actors may bring **[*315]** antitrust damages actions to the benefit of the state's resident defendants.

Qualcomm has not met its burden of showing that the other states have an interest in having their laws applied. Thus, the Court need not address which state's interest would be most impaired if its policy were subordinated to the law of another state. The Court "find[s] California law applicable without proceeding to the third step in the analysis." *Pokorny v. Quixtar, Inc., 601 F.3d 987, 995 (9th Cir. 2010)* (citation omitted).

(2) Workability of Proving Damages

---

[4] Qualcomm's remaining authorities either do not contemplate or do not provide full discussion of the significance of the defendant's state of residence. *See* *In re Packaged Seafood Prods. Antitrust Litig., 242 F. Supp. 3d 1033, 1067 (S.D. Cal. 2017)*; *In re Korean Ramen Antitrust Litig., No. 13-CV-04115-WHO, 2017 U.S. Dist. LEXIS 7756, 2017 WL 235052, at *22 (N.D. Cal. Jan. 19, 2017)*; *In re Graphics Processing Units Antitrust Litig., 527 F. Supp. 2d 1011, 1027-28 (N.D. Cal. 2007)*.

Qualcomm next contends that Plaintiffs' damages equation cannot workably prove individual damages because the results vary by distribution channel and other individualized circumstances. Opp. at 18-19. Although individual damages calculations alone do not make class certification inappropriate under *Rule 23(b)(3)*, *see* *Leyva v. Medline Indus., Inc., 716 F.3d 510, 514 (9th Cir. 2013)* ("[T]he amount of damages is invariably an individual question and does not defeat **[**113]** class action treatment."), the U.S. Supreme Court has held that plaintiffs bear the burden of providing a damages model showing that "damages are susceptible of measurement across the entire class for purposes of *Rule 23(b)(3)*." *Comcast, 569 U.S. at 35*. The damages model must be tailored to "measure only those damages attributable to" plaintiffs' theory of liability. *Id.* If plaintiffs do not offer a plausible damages model that matches the theory of liability, "the problem is not just that the Court will have to look into individual situations to determine the appropriate measure of damages; it is that Plaintiffs have not even told the Court what data it should look for." *In re MyFord Touch Consumer Litig., 2016 U.S. Dist. LEXIS 179487, 2016 WL 7734558, at *15 (N.D. Cal. Sept. 14, 2016)*.

Plaintiffs have provided a damages model that fits Plaintiffs' theory of liability and can measure damages across the entire class. As noted above, Plaintiffs' basic theory is that Qualcomm's three interrelated anticompetitive practices allowed Qualcomm to extract an above-FRAND royalty payment from OEMs that was passed through to consumers. The Court has already detailed above Mr. Lasinski's methodology for calculating a weighted, average overcharge for each OEM as a result of Qualcomm's above-FRAND royalty. Lasinski Decl. ¶¶ 77, 107, 126-29, 147-48. **[**114]** Similarly, this Court has exhaustively explained Dr. Flamm's methodology for calculating an average overall pass-through rate of 87.4% to consumers. Flamm Decl. ¶¶ 256, 258, 261-83, 88-90. To calculate the total estimated damage of $4.84 billion to the class, Dr. Flamm multiplies his average overall pass-through rate by Mr. Lasinski's total overcharge to OEMs. *Id.* ¶ 291; ECF No. 693 ¶ 1.

Qualcomm's sole objection is that Dr. Flamm's damages model does not provide a way to calculate the overcharge on any particular device purchased by a class member, which Qualcomm says would require a "different pass-through rate for every permutation of possible distribution channels." Opp. at 18. However, Qualcomm does not explain why such an individualized inquiry is necessary. As explained above, Dr. Flamm calculates an average overall pass-through rate based on the weighted share of commerce in 18 primary sales channels. Flamm Decl. ¶¶ 283, 288. Other courts have approved similar weighted-average methodologies in calculating pass-through rates. *See, e.g.,* *In re Optical Disk Drive, 2016 U.S. Dist. LEXIS 15899, 2016 WL 467444, at *7* (allowing some degree of averaging and aggregating data); *In re Static Random Access Memory Antitrust Litig., 264 F.R.D. 603, 614 (N.D. Cal. 2009)* (permitting "the use of averaged and aggregated data"). **[**115]** These methods avoid the "retailer-by-retailer, manufacturer-by-manufacturer and product-by-product analysis of pass-through" that has been found problematic in other cases. *See* *In re Flash Memory Antitrust Litig., No. 07-CV-00086-SBA, 2010 U.S. Dist. LEXIS 59491, 2010 WL 2332081, at *12 (N.D. Cal. June 9, 2010)*. Even if Plaintiffs' damages model requires some individualized calculation of damages, class certification would still be appropriate. *See* *Leyva, 716 F.3d at 513* ("In this circuit, . . . damage calculations alone cannot defeat certification." (quoting *Yokoyama v. Midland Nat'l Life Ins. Co., 594 F.3d 1087, 1094 (9th Cir. 2010))*.

[*316] d. Conclusion Regarding Predominance

This Court's rigorous analysis shows that common issues are likely to predominate over individual issues. Importantly, this Court's qualitative assessment of predominance includes some analysis into how this case, should it proceed to trial, would actually be litigated. *See* *In re New Motor, 522 F.3d at 20* ("Under the predominance inquiry, a district court must formulate some prediction as to how specific issues will play out in order to determine whether common or individual issues predominate in a given case." (internal quotation marks and citation omitted)).

As such, this Court notes that there is no dispute that antitrust violation can be shown using exclusively evidence that is common to the entire class for the reasons **[**116]** discussed above. The Court further finds that antitrust violation is likely to be a central, disputed issue at summary judgment and at trial. Qualcomm has made clear—in filings in both this action and the FTC enforcement action—that Qualcomm will seek to contest the issue of antitrust violation by contending that its practices had no anti-competitive effect on the market. Given the considerable, compelling common proof Plaintiffs have submitted regarding Qualcomm's alleged antitrust violation, this question is likely to be central to this litigation. As a result, the voluminous class-wide proof of antitrust violation weighs in favor of a finding that common questions predominate.

In addition to concluding that common questions will predominate with respect to the central element of antitrust violation, the Court also finds that common questions will predominate over individual questions with respect to antitrust impact. The question of antitrust impact also falls at the heart of this case and is likely to be vigorously litigated by the parties. On this question, the extensive documentary evidence suggests that Qualcomm imposed an industry-wide above-FRAND royalty rate on OEMs. Moreover, **[**117]** based on the expert reports, the Court concludes that Plaintiffs have presented a methodology that supports a finding that evidence common to the class will be utilized in demonstrating impact to both direct and indirect purchasers.

Finally, the Court finds that Plaintiffs have set forth a methodology for calculating damages on a class-wide basis. Thus, following a rigorous analysis, the Court finds that Plaintiffs have satisfied *Rule 23(b)(3)*'s predominance requirement with respect to all three elements— antitrust violation, antitrust impact, and damages.

ii. Superiority

Rule 23(b)(3) provides four non-exhaustive factors for a court to consider in determining whether a class action is superior to other methods of adjudication. These factors are:

> (A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action.

Fed. R. Civ. P. 23(b)(3). "[T]he purpose of the superiority requirement is to assure that the class action **[**118]** is the most efficient and effective means of resolving the controversy." *Wolin v. Jaguar Land Rover N. Am., LLC, 617 F.3d 1168, 1175 (9th Cir. 2010)* (alteration in original) (citation omitted). As a leading treatise on civil procedure has observed, "if common questions are found to predominate in an antitrust action, then courts generally have ruled that the superiority prerequisite of *Rule 23(b)(3)* is satisfied." 7AA Charles Alan Wright et al., Federal Practice and Procedure § 1781 (3d ed. 2018). Examining the four superiority factors in the instant case, the Court reaches the same conclusion that Plaintiffs have established superiority here.

The first factor is each class member's interest in "individually controlling the prosecution or defense of separate actions." *Fed. R. Civ. P. 23(b)(3)(A)*. "Where recovery on an individual basis would be dwarfed by the cost of litigating on an individual basis, this factor weighs in favor of class certification." **[*317]** *Wolin, 617 F.3d at 1175*. Here, the amount at stake for each individual class member is too small to bear the risks and costs of litigating a separate action. Litigation costs would be high, given that the case involves the intersection of complex intellectual property and economic issues and requires substantial expert testimony. As one district court in this district recognized, **[**119]** "[i]n antitrust cases such as this, the damages . . . are likely to be too small to justify litigation, but a class action would offer those with small claims the opportunity for meaningful redress." *In re Static Random Access Antitrust Litig., No. 07-CV-01819-CW, 2008 U.S. Dist. LEXIS 107523, 2008 WL 4447592, at *7 (N.D. Cal. Sept. 29, 2008)*.

The second factor is "the extent and nature of any litigation concerning the controversy already commenced by or against members of the class." *Fed. R. Civ. P. 23(b)(3)(B)*. Pursuant to an order from the Judicial Panel on Multidistrict Litigation ("JPML"), federal cases filed throughout the country were transferred to this Court for coordinated or consolidated pretrial proceedings. *See* *In re Qualcomm Antitrust Litig., 273 F. Supp. 3d 1373, 1376 (U.S. Jud. Pan. Mult. Lit. 2017)*. As the JPML articulated, the "actions share[d] factual questions" about whether Qualcomm's conduct violated "federal and state antitrust and consumer protection laws" and "involve[d] overlapping putative nationwide classes of cell phone purchasers." *Id. at 1375*. Thus, centralization would "eliminate duplicative discovery; prevent inconsistent pretrial rulings, including with respect to class certification; and conserve the resources of the parties, their counsel, and the judiciary." *Id.* Since that time, the parties have alerted the JPML to additional actions that involve the **[**120]** same common questions of fact, and the JPML has transferred those additional actions to this Court. *See* ECF No. 5. At present, there are 36 actions pending before this Court. Consequently, this factor too weighs in favor of certification.

The third factor is "the desirability or undesirability of concentrating the litigation of the claims in the particular forum." *Fed. R. Civ. P. 23(b)(3)(C)*. When the JPML issued its transfer order, it selected this district as the appropriate transferee district. *In re Qualcomm Antitrust, 273 F. Supp. 3d at 1376*. The JPML observed that this district "presents a convenient and accessible forum with the necessary judicial resources and expertise to manage this litigation efficiently." *Id.* More specifically, numerous actions were already pending in this district, including the FTC enforcement action. *Id.* As the JPML expected, centralization in this district has facilitated coordination of discovery and other pretrial activities between the FTC action and this MDL. *Id.* Finally, this district will serve as a convenient location for many potential witnesses, such as the employees of Apple and other cell phone manufacturers, who live in or around this district. *Id.* Thus, this factor likewise supports certification.

The parties here **[**121]** focus on the manageability factor, which requires that courts consider "the likely difficulties in managing a class action." *Fed. R. Civ. P. 23(b)(3)(D)*. This manageability consideration "encompasses the whole range of practical problems that may render the class action format inappropriate for a particular suit." *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 164, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974)*. Thus, courts should consider, for example, "the potential difficulties in notifying class members of the suit, calculation of individual damages, and distribution of damages." *Six (6) Mexican Workers v. Ariz. Citrus Growers, 904 F.2d 1301, 1304 (9th Cir. 1990)*. "Manageability concerns must be weighed against the alternatives and will rarely, if ever, be sufficient to prevent certification of a class." *Bowerman v. Field Asset Servs., Inc., 242 F. Supp. 3d 910, 933 (N.D. Cal. 2017)* (quoting *Trosper v. Styker Corp., No. 13-CV-0607-LHK, 2014 U.S. Dist. LEXIS 117453, 2014 WL 4145448, at *17 (N.D. Cal. Aug. 21, 2014))*.

As Plaintiffs point out, additional proceedings in this case will focus almost exclusively on the common evidence concerning Qualcomm's behavior and the resulting effect in the market. Reply at 14. Splintering this case into more than a hundred million individual cases would not make the case more manageable. Along the same lines, Qualcomm proposes that Plaintiffs divide their single class into "subclasses based on brand, distribution **[*318]** channel, or some other criteria that might prove practicable." Opp. at 21. The Court questions whether **[**122]** Qualcomm's proposal actually qualifies as an alternative to class action treatment. Regardless, the Court finds Qualcomm's proposal would not conserve resources because the majority of the proof does not vary by brand or distribution channel. Qualcomm does not identify any defenses or other individual inquiries unique to each class member or categories of class members. *See id.* As this Court explained in rejecting a similar request for "bellwether" trials, Qualcomm's approach "would merely multiply the number of trials with the same issues and evidence." *In re High-Tech, 985 F. Supp. 2d at 1228*.

Qualcomm also raises practical problems based on the sheer size of the class. Qualcomm broadly contends that a class of hundreds of millions of consumers holding such a large amount of claims "is inherently unmanageable, unfair, and inferior to alternative forms of adjudication." Opp. at 20. More precisely, Qualcomm worries about difficulties in "providing notice, managing damages inquiries, and administering and verifying claims." *Id.* at 21. However, Plaintiffs' responses to these points are persuasive. Plaintiffs note that "many courts have certified broad classes with similarly high numbers of potential class members" where common evidence rendered **[**123]** class treatment manageable. Reply at 15 & n.13 (citing Ninth Circuit cases involving more than 100 million class members). Moreover, Plaintiffs have contacted three claims administrators who have confirmed that they will be able to reach a minimum of 70% of the estimated 232.8 million to 250 million class members using notice methods approved in other similarly large antitrust class actions. ECF No. 725-1 ¶¶ 14-15. The Court also expects that Plaintiffs will be able to propose efficient means to calculate and distribute damages to class members. Thus, questions regarding manageability weigh in favor of finding class treatment superior to other methods of adjudication.

In sum, the Court finds that the proposed class members' interests weigh in favor of having this case litigated as a class action. In particular, the nature of Qualcomm's alleged overarching conduct and the desirability of concentrating the litigation in one proceeding weigh heavily in favor of finding that class treatment is superior to other methods of adjudication of the controversy. *See* Zinser, 253 F.3d at 1190-92. Nor do manageability concerns favor another form of adjudication. Therefore, Plaintiffs have satisfied the superiority requirement. **[**124]** Because Plaintiffs have also satisfied the predominance requirement, the Court GRANTS Plaintiffs' motion for class certification under Rule 23(b)(3).

2. Rule 23(b)(2)

To the extent that Plaintiffs seek to certify a separate class for injunctive relief only under Rule 23(b)(2), Mot. at 7, the Court also grants that request. "Rule 23(b)(2) allows class treatment when 'the party opposing the class has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief or corresponding declaratory relief is appropriate respecting the class as a whole." Dukes, 564 U.S. at 360 (quoting Fed. R. Civ. P. 23(b)(2)). "Unlike Rule 23(b)(3), a plaintiff does not need to show predominance of common issues or superiority of class adjudication to certify a Rule 23(b)(2) class." In re Yahoo Mail, 308 F.R.D. at 587. Rather, Rule 23(b)(2)'s "requirements are unquestionably satisfied when members of a putative class seek uniform injunctive or declaratory relief from policies or practices that are generally applicable to the class as a whole." Parsons v. Ryan, 754 F.3d 657, 688 (9th Cir. 2014).

As described in detail in the predominance section above, Plaintiffs here have established that Qualcomm engages in two common practices applied uniformly throughout the market— namely, (1) Qualcomm's "no license-no chips" policy, and (2) Qualcomm's refusal to exhaustively license cellular SEPs to competing **[**125]** modem chip manufacturers. Additionally, Plaintiffs contend that Qualcomm's exclusive dealings with Apple exacerbated the effects of those two common practices. Qualcomm's practices are generally applicable to the entire class, and Plaintiffs seek an injunction to remedy these market-wide anticompetitive restraints and effects. FAC ¶¶ 164, 189, 196, 202, 210.

[*319] Qualcomm's main response is to analogize to cases where the plaintiffs attempted to certify claims for monetary relief under Rule 23(b)(2). *See* Opp. at 22. For example, in *Dukes*, the plaintiffs sought to certify claims for backpay under Rule 23(b)(2). 564 U.S. at 360. The U.S. Supreme Court rejected that effort because the monetary relief sought was not "incidental to" the injunctive relief. *Id.* The Court explained that "Rule 23(b)(2) applies only when a single injunction . . . would provide relief to each member of the class," not when each individual class member would be entitled to "a *different* injunction . . . against the defendant" or "an individualized award of monetary damages." Id. at 360-61. Those principles do not preclude Plaintiffs in the instant case from certifying a class for injunctive relief alone. Based on Plaintiffs' allegations and offer of proof, a single injunction barring Qualcomm's **[**126]** anticompetitive conduct would offer forward-looking relief to every member of the class. Unlike the backpay at issue in *Dukes*, the injunctive relief that Plaintiffs seek here does not depend on the specific circumstances of any individual class member.

Courts have approved the practice of "certify[ing] the injunctive aspects of [a] suit under Rule 23(b)(2) and the damages aspects under Rule 23(b)(3), achieving both consistent treatment of class-wide equitable relief and an opportunity for each affected person to exercise control over the damages aspects." Jefferson v. Ingersoll Int'l Inc., 195 F.3d 894, 898 (7th Cir. 1999). Indeed, the Ninth Circuit has recognized that Rule 23(b)(2) and Rule 23(b)(3) "are not mutually exclusive." Smith v. Univ. of Wash., Law Sch., 233 F.3d 1188, 1196 (9th Cir. 2000). Accordingly, courts in this district have certified classes under both Rule 23(b)(2) and Rule 23(b)(3) in antitrust suits where defendants' conduct "was market-wide and not specific to individual customers." In re TFT-LCD, 267 F.R.D. at 596; *see also* In re Korean Ramen Antitrust Litig., No. 13-CV-04115-WHO, 2017 U.S. Dist. LEXIS 7756, 2017 WL 235052, at *24 (N.D. Cal. Jan. 19, 2017). This Court follows that well-trodden course in the instant case.

Qualcomm also suggests that Plaintiffs' proposed class is not sufficiently cohesive to warrant the same injunctive relief for the entire class. Opp. at 22-23. The Court disagrees. As described above, Plaintiffs have shown that

Qualcomm's allegedly anticompetitive conduct has market-wide **[**127]** application and effect. Because Qualcomm's practices "are generally applicable to the class as a whole," Plaintiffs may pursue an injunction on behalf of a *Rule 23(b)(2)* class. *Parsons, 754 F.3d at 688*. Qualcomm's remaining arguments repeat the same arguments made above with respect to *Rule 23(b)(3)* predominance. Opp. at 23. In addition to the fact that *Rule 23(b)(2)* class actions have no predominance requirement, *In re Yahoo Mail, 308 F.R.D. at 587*, the Court has already rejected Qualcomm's predominance arguments in the preceding section. Accordingly, to the extent that Plaintiffs seek to certify a *Rule 23(b)(2)* class for injunctive relief only, the Court GRANTS Plaintiffs' motion for class certification.

IV. CONCLUSION

For the foregoing reasons, the Court GRANTS Plaintiffs' motion for class certification, and DENIES Qualcomm's motion to strike the declaration of Kenneth Flamm. The Court CERTIFIES the following class under *Rule 23(b)(2)* and *Rule 23(b)(3)*:

> All natural persons and entities in the United States who purchased, paid for, and/or provided reimbursement for some or all of the purchase price for all UMTS, CDMA (including CDMAone and cdma2000) and/or LTE cellular phones ("Relevant Cellular Phones") for their own use and not for resale from February 11, 2011, through the present (the "Class Period") in the United States. **[**128]** This class excludes (a) Defendant, its officers, directors, management, employees, subsidiaries, and affiliates; (b) all federal and state governmental entities; (c) all persons or entities who purchased Relevant Cellular Phones for purposes of resale; and (d) any judges or justices involved in this action and any members of their immediate families or their staff.

[*320] As Qualcomm does not challenge the adequacy of the proposed class representatives or proposed class counsel, the Court APPOINTS Sarah Key, Terese Russell, Carra Abernathy, Leonidas Miras, and James Clark as representatives of the class and APPOINTS Kalpana Srinivasan of Susman Godfrey L.L.P. and Joseph W. Cotechett of Cotchett, Pitre & McCarthy, LLP, as class counsel.

IT IS SO ORDERED.

Opinion by: KATHERINE POLK FAILLA

Opinion

[*297] OPINION AND ORDER

KATHERINE POLK FAILLA, District Judge:

In a 398-paragraph complaint, Plaintiffs detail a wide-ranging conspiracy to prevent the antiquated stock loan market from evolving into a transparent, direct, all-to-all electronic exchange. This market is critical to the short selling of stocks, a not-uncommon investment tool. The thrust of Plaintiffs' allegations is that Defendants conspired to boycott new market entrants — specifically, **[**6]** AQS, SL-x, and Data Explorers — in order to maintain their monopoly grip as prime broker intermediaries, and, by extension, to charge excessive fees under the cover of price opacity.

Defendants have jointly moved to dismiss the Amended Class Action Complaint (the "Amended Complaint" or "AC") under *Federal Rule of Civil Procedure 12(b)(6)* on five primary bases: the allegations are implausible; the alleged conduct as to SL-x and Data Explorers neither qualifies as *per se* unlawful nor violates the rule of reason; Plaintiffs lack antitrust standing; Plaintiffs' claims are untimely; and Plaintiffs' claim of unjust enrichment fails for the same reasons as their antitrust claim. Defendant EquiLend adds, in a supplemental motion to dismiss, that its alleged conduct was consistent with rational business strategy, and that the Court lacks specific personal jurisdiction over EquiLend Europe.

As set forth in the remainder of this Opinion, the Court rejects these arguments and denies Defendants' motions to dismiss. While it remains to be seen whether Plaintiffs' factual allegations will be borne out in discovery, the Court is not permitted to dismiss them at this early stage of the litigation.

BACKGROUND[1]

[1] This Opinion draws its facts from Plaintiffs' Amended Complaint (Dkt. #73) ("AC"), the well-pleaded allegations of which are taken as true for purposes of the instant motions. *See, e.g., Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. For ease of reference, the Court will refer to the memorandum in support of the joint motion to dismiss submitted by the various Bank of America, Credit Suisse, Goldman Sachs, J.P. Morgan, Morgan Stanley, and UBS defendants (collectively, the "Prime Broker Defendants") as "Def. Br." (Dkt. #110); to Defendant EquiLend's memorandum in support of its motion to dismiss as "EquiLend Br." (Dkt. #107); to Plaintiffs' memorandum in opposition to the joint motion to dismiss as "Pl. Opp." (Dkt. #112); to Plaintiffs' memorandum in opposition to EquiLend's motion to dismiss as "Pl. EquiLend Opp." (Dkt. #113); to the Prime Broker Defendants' joint reply as "Def. Reply" (Dkt. #115); and to EquiLend's reply as "EquiLend Reply" (Dkt. #114).

The Court pauses to observe that the briefing on all sides was excellent, for which the Court extends its gratitude.

A. Factual Background

[7]** Construed in the light most favorable to Plaintiffs, the Amended Complaint alleges the following:

[*298] 1. The Parties

During the class period, Defendants Bank of America,[2] Credit Suisse,[3] Goldman Sachs,[4] J.P. Morgan,[5] Morgan Stanley,[6] and UBS[7] (collectively, the "Prime Broker Defendants" or "Defendants") engaged in securities lending and stock lending transactions with class members, either directly or through Defendants' affiliates. (AC ¶¶ 50, 56, 61, 69-70, 77-78, 86-87). The Prime Broker Defendants are each partial owners of Defendant EquiLend, and their employees served on EquiLend's Board of Directors during the Class Period. (*Id.*). Employees from Bank of America, Goldman Sachs, J.P. Morgan, and Morgan Stanley also served on the Boards of Directors for the Options Clearing Corporation ("OCC") and the Depository Trust Clearing Corporation ("DTCC"), which are **[*299]** central clearinghouses for stock loan transactions. (*Id.* at ¶¶ 50, 61, 69, 77). Defendant UBS's employees served on the Board of Directors for DTCC. (*Id.* at ¶ 86). Defendant EquiLend is a "dealer consortium," which, it is alleged, Defendants used as a front for their conspiracy. (*Id.* at ¶¶ 10, 12).[8]

Plaintiffs **[**8]** Iowa Public Employees' Retirement System ("IPERS"), Los Angeles County Employees Retirement Association ("LACERA"), Orange County Employees Retirement System ("OCERS"), and Sonoma County Employees' Retirement Association ("SCERA") provide retirement and other benefits to public employees. (AC ¶¶ 40-43). Each manages many billions of dollars in assets and each has lent significant volumes of stock to the Prime

---

2 The claims against Bank of America Corporation were dismissed without prejudice by stipulation of the parties on January 26, 2018. (Dkt. #105). However, due to Bank of America Corporation's 2009 acquisition of Merrill Lynch & Co., and to Bank of America Securities LLC's 2010 merger with Defendant Merrill Lynch, Pierce, Fenner & Smith Inc., the Amended Complaint uses the term "Bank of America" to refer to Defendants Merrill Lynch, Pierce, Fenner & Smith Inc., Merrill Lynch Professional Clearing Corp., Merrill Lynch L.P. Holdings, Inc., and their parents, subsidiaries, and affiliates. (AC ¶¶ 46, 50). This Opinion will do the same.

3 The term "Credit Suisse" refers collectively to Defendants Credit Suisse AG, Credit Suisse Securities (USA) LLC, Credit Suisse Prime Securities Services (USA) LLC, and Credit Suisse First Boston Next Fund, Inc. (AC ¶¶ 53-56). Credit Suisse Securities (USA) LLC and Credit Suisse Prime Securities Services (USA) LLC are registered as broker-dealers with the SEC. (*Id.* at ¶¶ 53-54). Credit Suisse Prime Securities Services (USA) LLC is also a member of OCC. (*Id.* at ¶ 53). Credit Suisse First Boston Next Fund, Inc. is a part owner of Defendant EquiLend. (*Id.* at ¶ 55).

4 The term "Goldman Sachs" refers collectively to Defendants Goldman Sachs & Co. LLC, and Goldman Sachs Execution & Clearing, L.P. (AC ¶¶ 58-61). Goldman Sachs & Co. LLC is registered as a broker-dealer with the SEC and is a member of OCC. (*Id.* at ¶ 59). Goldman Sachs Execution & Clearing, L.P. is registered as a broker-dealer with the SEC. (*Id.* at ¶ 60).

5 The term "J.P. Morgan" refers collectively to Defendants J.P. Morgan Securities LLC, J.P. Morgan Prime, Inc., J.P. Morgan Strategic Securities Lending Corp., and J.P. Morgan Chase Bank, N.A. (AC ¶¶ 63-69). J.P. Morgan Securities LLC and J.P. Morgan Prime, Inc. are registered as broker-dealers with the SEC. (*Id.* at ¶¶ 64-65). J.P. Morgan Securities LLC is a member of OCC. (*Id.* at ¶ 64).

6 The term "Morgan Stanley" refers collectively to Defendants Morgan Stanley & Co. LLC, Prime Dealer Services Corp., and Strategic Investments I, Inc. (AC ¶¶ 73-75, 77). Morgan Stanley & Co. LLC and Prime Dealer Services Corp. are registered as broker-dealers with the SEC, and Morgan Stanley & Co. LLC is also a member of OCC. (*Id.* at ¶¶ 73-74, 76).

7 The term "UBS" refers collectively to Defendants UBS Americas Inc., UBS Securities LLC, and UBS Financial Services Inc. (AC ¶¶ 80-82, 86). UBS Americas Inc. is a part owner of Defendant EquiLend. (*Id.* at ¶ 80). UBS Securities LLC and UBS Financial Services Inc. are registered broker-dealers with the SEC and members of OCC. (*Id.* at ¶¶ 81-82).

8 The term "EquiLend" refers to Defendants EquiLend Holdings LLC, EquiLend LLC, EquiLend Europe Limited, and their parents, subsidiaries, and affiliates. (AC ¶ 89).

Broker Defendants and their clients. (*Id.*). SCERA has also borrowed significant volumes of stock from Defendant Credit Suisse. (*Id.* at ¶ 43). Plaintiff Torus Capital, LLC ("Torus") is a trading firm, headquartered in Connecticut, that has borrowed significant volumes of stock from Defendants Goldman Sachs and Bank of America. IPERS, LACERA, OCERS, SCERA, and Torus (collectively, "Plaintiffs") bring this suit as a class action on behalf of themselves and all other similarly situated persons and entities who entered into stock loan transactions with the Prime Broker Defendants from January 7, 2009, to the present (the "Class Period"). (*Id.* at 1). The proposed class in this action includes borrowers and lenders. (*Id.* at ¶ 7).

2. The Stock Loan Market

Stock lending transactions are used primarily **[**9]** to facilitate the short selling of stocks, in which short sellers predict that a stock price will decrease. (AC ¶ 94). Short sellers generally do not own the stocks they sell. (*Id.* at ¶ 95). Instead, they typically use the services of a broker-dealer to "borrow" the stock, in exchange for cash collateral and a lending fee. (*Id.* at ¶¶ 95, 97). In a stock "loan" transaction, the lender transfers title of the security to the borrower, and the borrower promises to return equivalent securities in the future, in exchange for return of the collateral. (*Id.* at ¶¶ 105-06). A short seller who accurately predicts that a stock price will decrease can profit by borrowing the stock, selling the "borrowed" stock at a high price to a third party, waiting for the stock price to fall, and then buying back the equivalent stock at the lower price to return to the "lender." (*Id.* at ¶¶ 95, 97, 105-06). This process is risky in part because stock loans typically have no set termination date; either the lender or borrower can terminate the loan at will. (*Id.* at ¶ 106).

A stock lending transaction generally involves a number of different parties. (AC ¶ 97). The owner of the stock is known as the "stock lender" **[**10]** or the "beneficial owner." (*Id.*). An intermediary agent, called an "agent lender," works for the lender in exchange for a portion of the lending fee. (*Id.*). Agent lenders are often banks that service many lenders, and thus have large aggregate collections of stocks to loan out. (*Id.* at ¶ 107). A "broker-dealer" acts as an intermediary matchmaker between the agent lenders and prospective borrowers. (*Id.* at ¶ 97). The broker-dealer collects a fee from the borrower, takes a cut, and pays the remainder to the lender. (*Id.*). At present, broker-dealers do not reveal to either lenders or borrowers what their counterparty has paid or received, or what percentage of the fee the broker-dealer has pocketed. (*Id.*). "Stock borrowers" are **[*300]** generally investors who borrow stocks to facilitate short selling. (*Id.*).

The stock loan market is known as an "over-the-counter" (or "OTC") market because it has no central marketplace where participants can engage in direct exchanges, or obtain real-time data about trading prices and transaction volumes. (AC ¶ 98). These characteristics of the market leave prospective lenders and borrowers dependent on the broker-dealer intermediaries, who often set the price **[**11]** of a trade without negotiation, and who keep data about the prices and volume of trades hidden from the market as a whole. (*Id.* at ¶¶ 98-99).

"Prime brokers" are broker-dealers who offer an array of services that include stock lending. (AC ¶ 102). Between 2014 and 2017, the Prime Broker Defendants controlled between 76% and 80% of market share for prime brokerage services, and, accordingly, the vast majority of real-time price and volume data. (*Id.* at ¶¶ 102-03). In 2016, the Prime Broker Defendants' share of lending fees amounted to approximately 65% of total industry revenue. (*Id.* at ¶ 113). In presumed justification, Defendants represented to their clients that one aspect of their role as prime brokers was to "protect[] clients from credit and counterparty risk by standing between clients and lenders in every stock loan trade." (*Id.* at ¶ 147).

Plaintiffs allege that the stock loan market has failed to evolve alongside other, more efficient markets for financial services that take advantage of central electronic trading exchanges, where buyers and sellers can transact more directly, and more transparently, such as the publicly-traded stock exchange. (AC ¶¶ 114-16). Financial markets **[**12]** with central electronic trading exchanges operate through a central counterparty, called a "clearinghouse," which acts as an intermediary between lenders and borrowers, and which guarantees the obligations of each to the other, thereby reducing risk from counterparty default. (*Id.* at ¶¶ 9 n.3, 116 n.25). "The clearinghouse becomes the borrower to every lender and the lender to every borrower ... [and] maintains sufficient capital to stand behind every trade it clears." (*Id.* at ¶ 145). Participants on these central electronic trading exchanges transact with the clearinghouse via "clearing brokers," who match buyers and sellers, and who sponsor the participants' access to the central clearing platform. (*Id.* at ¶¶ 115, 116 n.25).

Clearing brokers are generally members of the clearinghouse who have contributed to its capitalization. (AC ¶ 120 n.26). They "vouch for a counterparty's credit with the clearinghouse ... [and t]he clearinghouse then clears the trade, having marked the transaction against the sponsoring clearing member's credit." (*Id.*). In 2016, OCC was the only major clearinghouse that both was licensed by the SEC to clear securities lending transactions and offered clearing **[**13]** of stock loan trades. (*Id.* at ¶ 289). It is alleged that central clearing threatened Defendants' prime brokerage business in part because, with central clearing, the clearinghouse assumed the risk of counterparty default against which Defendants purported to protect their clients. (*Id.* at ¶ 147).

Plaintiffs allege that the lack of a central electronic trading exchange, and the opacity of price and volume data, in the stock loan market impede price consistency, obstruct performance benchmarking of service providers, and enable the Prime Broker Defendants to charge excessive fees as middlemen. (AC ¶¶ 103-04, 116, 118). Plaintiffs allege that a regulated, centralized exchange would lower borrowing costs and increase returns for stock loan transactions. (*Id.* at ¶ 119).

[*301] 3. The New Market Entrants

a. Quadriserv/AQS:

During the period relevant to the Amended Complaint, several entities attempted to bring innovation to the stock loan market. In 2001, industry veterans founded Quadriserv to provide new financial services to that market. (AC ¶ 127). One early Quadriserv product offered a "give to get" data-sharing service for daily stock loan transactions. (*Id.* at ¶¶ 128-29). Quadriserv launched **[**14]** another early product that acted as a registered broker-dealer, raised capital to make it a creditworthy counterparty, and matched borrowers and lenders anonymously for a flat, transparent fee. (*Id.* at ¶¶ 140-42). By 2005, more than $2 billion in stock loan transactions were matched on the Quadriserv platform, which maxed out the platform's credit exposure limit. (*Id.* at ¶ 143).

Quadriserv then began developing a second platform through its subsidiary, Automated Equity Finance Markets, Inc. ("AQS"). (AC ¶ 144). In or about 2005 or 2006, AQS began negotiating a partnership whereby OCC would provide central clearinghouse services for AQS transactions. (*Id.* at ¶ 148). As noted, the Prime Broker Defendants viewed central clearing as a threat to their control of the stock loan market. (*Id.* at ¶ 147). Accordingly, AQS undertook a series of moves to evade the influence of the Prime Broker Defendants' representatives on the OCC Board, following which the Board passed a proposed deal with AQS. (*Id.* at ¶¶ 149-52).

On January 7, 2009, Quadriserv launched AQS and announced its agreement with OCC. (AC ¶ 154). According to an OCC newsroom release dated January 7, 2009, AQS offered a platform to "match **[**15]** lenders and borrowers using a hybrid auction and continuous price discovery mechanism" where "matched loans [would] be processed through the OCC, which [would] provide central counterparty guarantees." (*Id.*). OCC began providing central clearing services for AQS transactions in early 2009. (*Id.* at ¶ 156). In late 2009, AQS announced that Eurex, a European clearinghouse, had agreed to provide central clearing services for AQS transactions involving European equities. (*Id.*).

By September 2009, AQS was "primed" to offer direct stock loan transactions via clearing brokers, in partnership with OCC and SunGard's Loanet platform, which is an "accounting and settlement processing system for securities lending[.]" (AC ¶¶ 161-62). In October 2010, SunGuard integrated its technology with AQS, and a SunGuard vice president and general manager stated that SunGuard's customers had "responded favorably" to the integration. (*Id.*

at ¶¶ 162-63).[9] AQS provided trade matching, access to central clearing via a broker, live pricing data, daily liquidity data, and the option to trade anonymously. (*Id.* at ¶¶ 146, 159).

AQS received "strong encouragement" from the Federal Reserve Bank of New York, which **[**16]** thought AQS had potential to improve systemic risk controls in the stock loan market. (AC ¶ 155). AQS also received support from Barclays Global Investors, an asset manager and stock lender; Renaissance Technologies, a quantitative hedge fund and stock borrower; Bessemer Ventures, a venture capital fund; and Deutsche Bourse, an exchange that supported AQS through its subsidiaries, one of which was Eurex. (*Id.* at ¶ 160). AQS received approximately $100 million in investment funds. (*Id.* at ¶ 299). Citi was an early investor in AQS. (*Id.* at ¶ 157 n.37). Defendant Bank of America made equity **[*302]** investments in AQS in 2007, 2008, 2009, and 2011. (*Id.* at ¶ 205). Some hedge fund clients switched their prime brokerage services to Bank of America, "*expressly referencing AQS* in their decisions to do so." (*Id.* at ¶ 157 (emphasis in original)). AQS also received support from "numerous agent lenders" because of its ability to reduce fees. (*Id.* at ¶ 165). AQS's own analysis of the market predicted that its services would "increase the market volume" and reduce broker-dealer fees by over 30%. (*Id.* at ¶¶ 167-69).

b. SL-x:

SL-x, which stands for "securities lending exchange," was founded in late 2010. (AC **[**17]** ¶ 172). SL-x was designed to enable "prime brokers, broker-dealers, and agent lenders" to communicate bids and offers simultaneously to all of their existing market contacts, and to engage in simultaneous negotiations, without requiring a phone call, Bloomberg message, instant message, fax, or other one-to-one means of communication. (*Id.* at ¶¶ 173-75). SL-x provided an automated matching service for "easy-to-borrow stock" transactions, and a preliminary screening service for potential counterparties. (*Id.* at ¶¶ 175, 180). Broker-dealers and agent lenders could trade anonymously on the SL-x platform, which could "progressively reveal information about each party, and important criteria such as number and price of securities and the nature and amount of collateral." (*Id.* at ¶¶ 179-80). SL-x also permitted access to central clearing through Eurex for trades in certain European stocks, and "took steps to access central clearing in the U.S.," such as beginning negotiations with, and building a platform that could connect to, OCC. (*Id.* at ¶¶ 178, 233). Centrally-cleared SL-x transactions "were estimated" to provide broker-dealers with "more than $8 billion in capital savings benefits through **[**18]** balance sheet risk weighting and the zeroing out of counterparty credit risk when facing a central counterparty[,]" in addition to "reduced operational and administrative costs." (*Id.* at ¶ 181).

SL-x also planned to offer "a real-time display of the price and quantity of completed loans" (which would reveal the fees taken by the Prime Broker Defendants). (AC ¶¶ 175, 183-84). SL-x intended to provide "real-time pricing information (including stock name, trade time, trade quantity, and trade price) on a live ticker viewable by all platform participants, providing an up-to-theminute stream of available, actionable stock loan prices for all SL-x users." (*Id.* at ¶ 177). In addition, SL-x "worked to integrate data and analytics from other market sources." (*Id.*).

SL-x received initial positive reception. One Prime Broker Defendant called SL-x "the most intelligent, thoughtful and usable approach to the [stock loan] market that we have ever seen." (AC ¶¶ 227, 230-32). And on December 4, 2012, UBS executives told SL-x that transitioning to a centrally-cleared market would in principle help market participants, and recognized "the unmistakable momentum arising from regulatory considerations and **[**19]** other pressures" toward central clearing. (*Id.* at ¶ 231). In an October 16, 2012 meeting, Karl von Buren, HSBC's Global Head of Equity Finance, told SL-x executives that the stock loan market was moving towards central clearing, and that HSBC might embrace SL-x. (*Id.* at ¶ 232). J.P. Morgan Chase executives also acknowledged that central clearing would benefit the stock loan market overall. (*Id.*).

In meetings with SL-x executives on February 26, March 19, May 9, July 10, and September 6, 2013, executives from Credit Suisse, Deutsche Bank, J.P. Morgan, Citigroup, and UBS praised the SL-x platform. (AC ¶ 230).

[9] The Amended Complaint also touts AQS's partnership with "DTC" (*see* AC ¶ 161), which is a subsidiary of DTCC that operates in conjunction with SunGuard (*see id.* at ¶ 162).

Specifically, on February **[*303]** 26, 2013, in a meeting in London, Karl Bishti, the European Prime Brokerage Desk Head at Credit Suisse and an Associate Director of EquiLend, told SL-x executives that the stock lending market would "change overnight" to increase automation and efficiency if SL-x gained broad support. (*Id.* at ¶¶ 240-41). Bishti raved that SL-x had "all the bells and whistles" he expected, lacked nothing, and had "no shortcomings" that would impede its marketability. (*Id.* at ¶ 230). Kevin Soobadoo, Head of Supply Trading at Deutsche Bank, called the SL-x platform "brilliant," **[**20]** "impressive," and the "most state-of-the-art piece of kit to hit the securities lending space." (*Id.*). On February 28 and October 17, 2013, executives from Nomura and Société Générale called the platform "fantastic" and "really an awesome product." (*Id.*). And on September 6, 2013, UBS executives Casey Whymark and Laurent Issner called the platform "very cool" and noted that they were "impressed." (*Id.*).

c. Data Explorers

In 2002, securities market participants founded Data Explorers, which initially offered a "give to get" data-aggregation service for stock loan transactions that enabled customers to compare the prices for their own transactions to those of comparable market participants. (AC ¶¶ 130-34). By 2007, every major agent lender and 20 borrower clients were participating in the service. (*Id.* at ¶ 137). By 2009, Data Explorers had acquired market data from both agent lenders and beneficial owners. (*Id.* at ¶ 185). Several Prime Broker Defendants also shared pricing data with Data Explorers in return for market analytics. (*Id.* at ¶ 138).

Data Explorers provided separate products for agent lenders and borrowers, and strictly segregated the data for each. (AC ¶ 136). Plaintiffs allege **[**21]** that Data Explorers maintained this segregation for the benefit of the Prime Broker Defendants, who remained the sole actors in the market who knew the "spread" between what borrowers were charged and what lenders received. (*Id.* at ¶¶ 136, 139). However, in or about 2010, Data Explorers began to offer "performance" data, and also started successfully marketing its product to other types of customers, including hedge funds. (*Id.* at ¶¶ 187-88). The performance data service enabled end-user borrowers and lenders to compare the financial terms of their own trades to those of comparable trades. (*Id.* at ¶ 188).

4. EquiLend

If AQS, SL-x, and Data Explorers were the *enfants terribles* of the stock loan world, EquiLend was the anachronism against which they rebelled. EquiLend was founded in 2001 and provides primarily post-trade "reconciliation" services for stock loan transactions, verifying that the shares, the margins, and the collateral were handled correctly, as well as other posttrade services such as billing delivery and recalls. (AC ¶ 305). EquiLend also offers a daily automated service to effect transactions for stock loans between agent lenders and broker-dealers at predetermined fixed **[**22]** rates. (*Id.* at ¶ 306). However, it "does not offer fully electronic, price-transparent trading capabilities or the ability to negotiate terms with multiple potential counterparties simultaneously, nor does it offer central clearing to market end users." (*Id.* at ¶ 307).

Plaintiffs allege that the Prime Broker Defendants "used their positions on the EquiLend Board to co-opt EquiLend as a vehicle through which to promote and achieve their anticompetitive objectives." (AC ¶ 304). For most of the Class Period, EquiLend had ten owners, six of whom were the Prime Broker Defendants. (*Id.* at ¶¶ 122, 309). Numerous members of EquiLend's **[*304]** Board of Directors were employees of the Prime Broker Defendants. (*Id.* at ¶ 309). EquiLend's directors met regularly to discuss "industry challenges such as central clearing." (*Id.* at ¶¶ 249-50). Under the Prime Broker Defendants' control, EquiLend acted "in illegitimate, non-competitive ways ... that in many cases did not further its own economic interests." (*Id.* at ¶ 304). Specifically,

> [t]he Prime Broker Defendants used EquiLend to: (i) suppress price transparency by refusing to release pricing data to its customers, despite having access to this data and despite **[**23]** a clear market demand for such data; (ii) force competitors out of the market by coercing their customers to use EquiLend ... even though EquiLend ... offered lower quality or entirely different services than what their customers desired and what prospective competitors offered; and (iii) stymie pro-competitive market developments by purchasing valuable

> patents and trading platform technology from SL-x and AQS for valuable consideration, and then refusing to use or capitalize on those assets in any way[.]

(*Id.* at ¶ 311).

Defendants' conspiratorial communications in emails, Bloomberg chats, text messages, internal memoranda, and recorded phone calls are allegedly housed on EquiLend's servers (as well as those of the individual Prime Broker Defendants). (AC ¶ 312). These communications show that Defendants told EquiLend's representatives, including its CEO, Brian Lamb, not to "break rank," and not to take action "until the 'EquiLend banks' determined as a group whether they would support any of the new platforms." (*Id.* at ¶ 16). Of note, when EquiLend Board member William Conley discussed ensuring that data transparency would not "kill our business," the businesses to which he was referring **[**24]** were those of the Prime Broker Defendants, not of EquiLend. (*Id.* at ¶ 313). During the Prime Broker Defendants' individual meetings with AQS and SL-x, they "made clear that they considered themselves bound by understandings reached in EquiLend board meetings." (*Id.*).

The Amended Complaint proffers several allegations to support an inference of counter-profit behavior. In or about August 2011, Palamon Capital Partners and SL-x jointly proposed to acquire EquiLend at a price that would have yielded a profit for all parties. (AC ¶ 314). The EquiLend Board refused to engage or negotiate the offer. (*Id.*). And in late 2014 or 2015, the tables were turned: "[T]he Prime Broker Defendants directed EquiLend to purchase [SL-x and AQS] to complete the elimination of them as competitors." (*Id.* at ¶ 270). Plaintiffs argue that, if "EquiLend had truly behaved as a profit-maximizing firm, it would naturally have ... capitalized on the valuable assets and technology" purchased from AQS and SL-x. (*Id.* at ¶ 315). One EquiLend executive "complained that EquiLend needed to upgrade its services and build something like SL-x, and EquiLend never did so." (*Id.*). Based on these actions, Plaintiffs conclude that **[**25]** EquiLend "is not the independent joint venture that it purports to be[.]" (*Id.* at ¶ 319).

5. Defendants' Anticompetitive Conduct

a. Allegations Concerning AQS

To review, Plaintiffs allege that Morgan Stanley and Goldman Sachs led the other Prime Broker Defendants in a conspiracy to block new market entrants from offering electronic trading and clearing platforms and services to enhance price transparency. (AC ¶¶ 198-99, 212). As one facet of this conspiracy, the Prime Broker Defendants "agreed on a common stance vis-à-vis **[*305]** AQS." (*Id.* at ¶ 210). Following initial meetings with AQS executives in or about 2009, Goldman Sachs refused to support the AQS platform at all. (*Id.* at ¶¶ 196, 209). At a 2009 meeting between the head of the Stock Loan Desk at Bank of America and William Conley of Goldman Sachs, Conley said that he was "opposed to transparency in any form" because of the "spread" fees that Goldman Sachs made on stock loan transactions; indeed, Conley "got so angry at the mention of [AQS's] name that spit was coming out of his mouth." (*Id.* at ¶ 200). Conley pressured Bank of America to "reverse course and to join the opposition to Quadriserv/AQS[.]" (*Id.*).

At the same time, Credit Suisse, **[**26]** J.P. Morgan, Morgan Stanley, and UBS each communicated to AQS "that the only way they would support the platform was if AQS made it ... a broker-only platform ... [and] lenders and borrowers would be barred from trading on the platform." (AC ¶ 210). When AQS refused, the Prime Broker Defendants agreed to starve AQS "by collectively refusing to participate on the platform, and thereby to keep their trade flow and trade data outside of the platform's electronic market." (*Id.* at ¶¶ 211-12). This collective boycott of AQS compromised its utility for other market participants. (*Id.* at ¶ 212).

In preparation for an SEC roundtable discussion on securities lending held on September 29 and 30, 2009, the Bank of America executive whom Conley had pressured "convened what he characterized as a meeting of 'the five families' ... so the Prime Broker Defendants could settle on their collective messaging[.]" (AC ¶ 202). Around the same time, Goldman Sachs's Conley, a Credit Suisse employee named Shawn Sullivan, and others held a private meeting in which they discussed electronic trading platforms, where "each agreed to oppose AQS and disparage AQS and central clearing during the roundtable discussion." **[**27]** (*Id.* at ¶ 203). One participant in that meeting later stated that she felt "sorry for what [they were] about to do" to AQS. (*Id.*). At the subsequent SEC meeting, Sullivan spoke out against AQS, arguing that central clearing would reduce liquidity and expose beneficial owners to greater credit risk from counterparties. (*Id.* at ¶ 204).

By 2011, under pressure from Goldman Sachs, Morgan Stanley, Credit Suisse, and unspecified "others," Bank of America withdrew its support for AQS. (AC ¶¶ 205-06). More pointedly, "Bank of America/Merrill Lynch personnel who had formerly supported AQS were purged." (*Id.* at ¶ 206). Specifically, Mike Stewart, Global Co-Head of Equities and an advocate for AQS, "was abruptly replaced with ... Stuart Hendel, the former head of prime brokerage at Morgan Stanley and UBS." (*Id.*). Hendel directed Bank of America personnel to disavow AQS, limited the volume of transactions that the Bank of America stock loan desk was permitted to place on AQS to a small fraction of prior volume, and made no further investments in AQS. (*Id.* at ¶ 207).

The Prime Broker Defendants also undertook to stop other market participants, including their clients, from using AQS. In 2012, Goldman **[**28]** Sachs threatened executives at agent lender BNY Mellon, including James Slater, its Head of Global Collateral Management and Securities Finance: If BNY Mellon used AQS for stock loan transactions, "Goldman Sachs would return all of the open stock borrowing trades with BNY and stop trading with the BNY stock loan desk altogether." (AC ¶ 218). Thereafter, BNY Mellon abruptly withdrew an offer to AQS of $50 million in credit and an agreement to participate actively on the AQS platform. (*Id.* at ¶ 18). And Defendants also threatened to **[*306]** cut off an array of services to their own hedge fund clients — including Renaissance Technologies, D.E. Shaw, Millennium Management, and SAC Capital — if those clients transacted on AQS. (*Id.* at ¶¶ 213, 215-16).

Finally, Defendants blocked access to AQS by refusing to serve as clearing brokers. OCC's by-laws required "that *only* broker-dealer members of OCC, such as the Prime Broker Defendants, could transact on AQS, either as the lender or borrower." (AC ¶ 214). Accordingly, the Prime Broker Defendants refused to "sponsor" their hedge fund clients' access to AQS by "stand[ing] in to facilitate and clear their trades." (*Id.*). Plaintiffs allege that the Prime **[**29]** Broker Defendants would not have refused to provide their hedge fund clients with access to AQS if they were acting unilaterally, as each would have been concerned about losing customers to other prime brokers. (*Id.* at ¶ 217).

By the end of 2014, AQS was struggling to maintain sufficient liquidity to act as a financially viable stock lending platform, and was marginalized in the market. (AC ¶ 269). However, around the same time, a regulatory development sparked new interest in AQS. On January 1, 2014, the Basel Committee on Banking Supervision had issued a set of measures, known as "Basel III," that "required the Prime Broker Defendants to carry more capital on their balance sheet to cover the same risk" in stock loan transactions. (*Id.* at ¶ 274). One way banks could comply was to centrally clear stock loan transactions, "thereby offloading the risk to a central clearing counterparty." (*Id.* at ¶ 276). According to Plaintiffs, staff at each Prime Broker Defendant were siloed to such a degree that the "loan trading staff did not know, and were not told by senior management until later, that a move toward central clearing of stock loan transactions — while superficially beneficial under **[**30]** Basel III — would be disastrous to the bank's profitability on a much larger scale." (*Id.* at ¶ 278). Hence, the following drama.

In 2014, Susan O'Flynn, Global Head of CCP Strategy, Governance and Optimization at Morgan Stanley, began promoting central clearing of stock loan transactions as a way to comply with Basel III while reducing balance sheet costs and increasing returns on Morgan Stanley's stock lending business. (AC ¶ 281). O'Flynn publically supported central clearing through Eurex and OCC, though she did not share her support with senior management or executives on Morgan Stanley's stock loan desk. (*Id.* at ¶¶ 282-83). In late 2015 or early 2016, executives from Morgan Stanley's stock loan business became aware of O'Flynn's activities and told O'Flynn and her direct supervisor, Thomas Wipf, Global Head of Bank Resource Management, that central clearing threatened Morgan Stanley's business as a prime broker intermediary for stock loan transactions. (*Id.* at ¶¶ 281, 284).

Rather than retreat from the balance sheet cost savings that central clearing would provide, Wipf maintained the budget projections that O'Flynn had provided while imposing three conditions on centrally cleared **[**31]** trades.

(AC ¶ 287). Specifically, Wipf required that (i) central clearing maintain price opacity, meaning that neither the borrower nor the lender would know the price at which their counterparty transacted; (ii) the clearinghouse not link to an independent trading platform; and (iii) the clearinghouse not publish market data from Morgan Stanley transactions. (*Id.*). Wipf also wanted the Prime Broker Defendants to gain complete control of access to the clearinghouses so that market participants would have no other choice but to use the Prime Broker Defendants' services to clear trades. (*Id.* at **[*307]** ¶ 288). That meant controlling OCC because, in 2016, OCC was the only clearinghouse licensed by the SEC that cleared stock loan trades. (*Id.* at ¶ 289).

At that time, OCC was negotiating a deal to acquire AQS, and AQS was developing a new service to assist lenders in investing the cash collateral from their loans through what are known as "repurchase agreements." (AC ¶¶ 291-92). Wipf devised a plan to stop the acquisition and gain exclusive control over all the pathways to central clearing, a plan that he and his colleagues at Morgan Stanley code-named "Project Gateway." (*Id.* at ¶¶ 21, 293). Between **[**32]** late 2015 and January 2016, Wipf and William Conley from Goldman Sachs met over a series of dinners in New York City that were paid for by Wipf. (*Id.* at ¶¶ 21-22, 294). Wipf and Conley agreed that Morgan Stanley and Goldman Sachs should acquire AQS in order to shut it down. (*Id.*). Specifically, Wipf and Conley planned to persuade the other Defendants to use EquiLend to purchase AQS in order to destroy it. (*Id.*).

In a January 2016 internal call, Wipf communicated the plan to his team at Morgan Stanley, which included Susan O'Flynn; Matthew Collins; Tejash Patel, the Managing Director and Co-Head of U.S. Securities Lending; and Thomas Kinnally, the Global Head of Client Financing, Firm Financing and Collateral Risk Management. (AC ¶¶ 22, 295). During the call, Wipf stated that he and Conley had agreed to "get a hold of this thing." (*Id.* at ¶¶ 22, 296). By use of that phrase, Wipf meant that "Goldman Sachs and Morgan Stanley needed to act together to acquire AQS and shut it down." (*Id.* at ¶ 296).

At a series of private dinners, meetings at industry conferences, and EquiLend board meetings, executives at Morgan Stanley and Goldman Sachs persuaded the other Defendants to join Project Gateway **[**33]** in order to maintain control over the "universal gateway" to central clearing. (AC ¶ 297). Defendants also agreed to clear all stock loan transactions through their own pipelines to OCC, which pipelines were not connected to an electronic trading platform. (*Id.*). And Defendants agreed to exert influence, as Directors of OCC and EquiLend, to prevent OCC's acquisition of AQS. (*Id.* at ¶ 298).

Late in the negotiations between OCC and AQS, OCC abruptly pulled out of the deal and stopped returning AQS's calls. (AC ¶ 298). Shortly thereafter, on August 1, 2016, EquiLend purchased AQS's assets — the fruits of nearly $100 million in investment — for less than $5 million. (*Id.* at ¶¶ 299-300). Following the purchase, "the Prime Broker Defendants did not increase their participation in the new electronic trading platform or take other action to make it prosper." (*Id.* at ¶ 301).

b. Allegations Concerning SL-x

As with AQS, Goldman Sachs refused to support SL-x from the outset. (AC ¶ 196). In a private meeting in 2011, William Conley told other Goldman Sachs employees that any central trading platform with counterparty clearing threatened Goldman Sachs's market position. (*Id.* at ¶ 219). Conley told **[**34]** SL-x executives: "I ain't supporting this," informing them that the Prime Broker Defendants would only support the evolution of central clearing through an entity that they controlled, specifically EquiLend. (*Id.* at ¶ 220). Brad Levy, Global Head of Goldman Sachs' Principal Strategic Investments Group, told SLx executives: "You ain't going to get this done." (*Id.* at ¶¶ 17, 220).

On August 1, 2011, SL-x sent a letter to EquiLend's Chairman, Jeffrey Benner, proposing a joint venture between SL-x and EquiLend that would afford EquiLend "strong governance rights and a meaningful **[*308]** 'seat at the table' in the development of the SL-x marketplace and shift to a CCP-model." (AC ¶ 221). The EquiLend Board members met in August and September 2011, decided against SL-x's proposal, agreed that no EquiLend member bank would support SL-x, and further agreed only to support such market innovations if developed within EquiLend. (*Id.* at ¶ 223).

On September 21, 2011, EquiLend's CEO, Brian Lamb, declined SL-x's offer. (AC ¶ 224). The same day, a Morgan Stanley employee, Edward McAleer, told SL-x that he had spoken (also on that day) with Anthony Schiavo, a Managing Director at Morgan Stanley and a Director **[**35]** at EquiLend, who said that SL-x should deal directly with EquiLend, not with Morgan Stanley, and that "approaching a group of brokers outside the EquiLend arena is not an approach he wants to take." (*Id.* at ¶ 226). On October 12, 2011, McAleer reiterated to SL-x, copying Schiavo on the communication, that "all the relevant people at MS" shared the "house view" that "we do not want to participate in a separate consortium," and noted Morgan Stanley's view "that any solution ... needs to involve EquiLend." (*Id.* at ¶ 227).

Thereafter, none of the Prime Broker Defendants supported SL-x individually. (AC ¶ 225). Each "withheld capital and support from SL-x through the fall of 2011 and throughout 2012[.]" (*Id.* at ¶ 228). From 2012 to 2014, SL-x executives met with and pitched its product to high-ranking stock loan executives at each of the six Prime Broker Defendants (Bank of America, Credit Suisse, Goldman Sachs, J.P. Morgan, Morgan Stanley, and UBS), all of whom sat on the board of EquiLend USA or EquiLend Europe. Each refused to support SL-x, allegedly as a result of the EquiLend agreement. (*Id.* at ¶ 229). In an October 2012 meeting with SL-x executives, some unspecified prime brokers expressed **[**36]** concern that SL-x provided "too much transparency," or "too much immediate transparency." (*Id.* at ¶ 184). SL-x refused a request from J.P. Morgan for "the ability to turn off the real-time ticker, or block certain trades from being included[.]" (*Id.*).

The Prime Broker Defendants doubled down on this position in mid-tolate 2013, when they "agreed to boycott SL-x, collectively refused to use its platform, and took steps to ensure that other market participants turned their back on SL-x as well." (AC ¶ 236). Following initially enthusiastic meetings with SL-x executives, "each bank went cold and, without explanation, refused to engage or proceed further with SL-x." (*Id.* at ¶¶ 237-38). In July 2013, Credit Suisse declined to join the SL-x platform, explaining that it would only join if and when the "Big Boys" committed to doing so and SL-x had acquired substantial liquidity. (*Id.* at ¶ 241). Also in July 2013, UBS declined to join the SL-x platform, saying that it would not do so until SL-x had secured "commitments from other large market participants and demonstrate[d] evidence of significant liquidity." (*Id.* at ¶ 242). In meetings on July 26, 2013, and September 26, 2013, James Buckland, **[**37]** UBS's Global Head of Securities Lending, "frequently referenced EquiLend in the context of discussing SL-x's strategy to gain widespread market acceptance of its platform, noting the benefit of being '***inside the club***' of EquiLend member banks to effectuate market changes and suggesting that any market transition towards an SL-x platform and central clearing of stock loan trades would need to come from inside EquiLend." (*Id.* (emphasis in original)).

As with AQS, the Prime Broker Defendants "in some instances threatened their clients with the loss of other prime brokerage services if they signed on to the SL-x **[*309]** platform[.]" (AC ¶¶ 237, 243). On October 12, 2012, Andrew Clayton, the Global Head of Securities Lending at stock lending agent Northern Trust, told SL-x executives that Northern Trust would not support SL-x without approval from Goldman Sachs. (*Id.* at ¶¶ 18, 252). In 2015, OCC's Chief Operating Officer told SL-x executives that "nothing was going to happen" between SL-x and OCC without approval from the Prime Broker Defendants and specifically from Goldman Sachs. (*Id.* at ¶ 253). DTCC's Managing Director also told SL-x that it could not offer central clearing services to SL-x without **[**38]** approval from the Prime Broker Defendants and, specifically, from Goldman Sachs. (*Id.*).

The Prime Broker Defendants were aware that EquiLend was an "archaic" and "entrenched although unexciting system," with poor functionality that could not compete with SL-x's capacity. (AC ¶¶ 247-49). Nonetheless, they communicated "similar statements" that they would only support innovations such as SL-x's from within EquiLend. (*Id.* at ¶ 245). On February 26, 2013, Credit Suisse representatives told SL-x executives that "a successful launch will require cooperation of EquiLend." (*Id.* at ¶ 246). On June 18, 2014, in a meeting in Berlin, Morgan Stanley executives, including EquiLend Board member Edward McAleer, told SL-x that Morgan Stanley would only support central clearing through EquiLend. (*Id.* at ¶ 243). At a meeting on July 19, 2013, Bishti told SL-x that winning market support would mean "facing off against EquiLend" and that transitioning to central clearing would require "cooperation" and "collaboration" with EquiLend; described EquiLend's Directors as "key players" and "members of the club"; and compared EquiLend to "the mafia run by five crime families[.]" (*Id.* at ¶¶ 241, 249). On August **[**39]** 7, 2013, John Shellard, Managing Director of Trading Services at J.P. Morgan and EquiLend Board member, told

SL-x executives that there was a "general agreement among Directors" of EquiLend "that industry advances should be achieved from within EquiLend," rather than through third parties like SL-x. (*Id.* at ¶¶ 17, 239). In July 2014, Bank of America told SL-x executives that there was internal controversy about how endorsing SL-x's product would affect Bank of America's relationship with EquiLend. (*Id.* at ¶ 244).

By September 2014, SL-x had exhausted its financial resources, cancelled its U.K. trading license, and abandoned plans to enter the U.S. market. (AC ¶ 268). After SL-x "shut its doors," the Prime Broker Defendants began negotiating with SL-x's private equity owner to purchase SL-x's intellectual property. (*Id.* at ¶ 271). In 2015, EquiLend purchased SL-x's intellectual property, without undertaking full due diligence, and allegedly with no intent to actually use it. (*Id.* at ¶ 272). EquiLend has since shelved the patents. (*Id.*).

c. Allegations Concerning Data Explorers

With its 2010 offering of "performance" data, the Prime Broker Defendants became "increasingly wary that Data **[**40]** Explorers would eventually package data that would expose the breadth of the price gap between borrowers and lenders[.]" (AC ¶ 186). During ten meetings that spanned 2011-2012, two Goldman Sachs employees, Shawn Byron and William Conley, "grilled Data Explorers" about "siloing borrower and lender data, despite Data Explorers' constant assurances that there was no leakage." (*Id.* at ¶ 189). Defendants "gradually decided they could not entrust market data to a firm they did not control." (*Id.* at ¶ 190). Accordingly, Goldman Sachs began contacting hedge funds, including SAC Capital Advisors, to stop them from sharing data with Data Explorers, achieving **[*310]** mixed success. (*Id.* at ¶ 191). "In approximately the second or third quarter of 2010, a representative from Goldman Sachs contacted Peter Economou at State Street (a large, influential agent lender) and demanded that State Street not report any of the trading data concerning State Street's trades with Goldman Sachs to Data Explorers, threatening State Street's business if it did not comply." (*Id.*). State Street refused to comply. (*Id.*). "[W]hen borrower clients instructed Morgan Stanley to provide Data Explorers with their market data, Morgan **[**41]** Stanley would provide a file that contained stale, sparsely populated data scrubbed clean of any timely or actionable information." (*Id.* at ¶ 192).

At a meeting of the EquiLend Board of Directors, William Conley stated that transparency about the spread between the fees paid to beneficial owners and those collected from borrowers would "kill our businesses." (AC ¶ 255). In response, the Prime Broker Defendants agreed to "neutralize" Data Explorers by "set[ting] up a competing business" called DataLend, which was formed as a division within EquiLend in 2011. (*Id.* at ¶¶ 255, 257).

The Prime Broker Defendants each agreed (first amongst one another and subsequently with DataLend) to distribution agreements with DataLend that ensured that their data would not be disclosed to lenders or borrowers, and specifically that data about what borrowers paid for stock loans would not be disclosed to beneficial owners. (AC ¶ 257). Plaintiffs allege that DataLend's purpose was to offer a bare minimum of data to compete with Data Explorers while still withholding transparency about the Prime Brokers' fees. (*Id.* at ¶ 258). Accordingly, the Prime Broker Defendants allegedly told Data Explorer's customers **[**42]** that it was "inaccurate and unreliable." (*Id.* at ¶ 259).

The Prime Broker Defendants also attempted to stop borrowers and lenders from accessing each other's data directly by seeking "to monopolize access to" agent lender data about aggregate stock loan supply. (AC ¶ 260). To accomplish this, DataLend sought to lure away Data Explorer's agent lender customers by offering "to provide the same data services to agent lenders effectively for nothing." (*Id.* at ¶¶ 261-62). All major agent lenders except BNY Mellon were members of EquiLend and were "offered DataLend's products for no additional fee." (*Id.* at ¶ 261). "Agent lenders used the new stream of lowcost information provided by DataLend to renegotiate prices with Data Explorers," causing Data Explorers' revenues to drop. (*Id.* at ¶ 264). The hobbled Data Explorers was acquired by another company over which Defendants allegedly wielded influence, and which has not indicated an interest in "carrying out Data Explorers' original vision of bridging the data divide between wholesale and retail customers." (*Id.* at ¶ 265).

B. Procedural Background

Plaintiffs filed an initial Complaint on August 16, 2017 (Dkt. #1), and an Amended Complaint on **[**43]** November 17, 2017 (Dkt. #73). On January 26, 2018, Plaintiffs voluntarily dismissed all claims against Defendants Bank of America Corporation; Credit Suisse Group AG; The Goldman Sachs Group, Inc.; J.P. Morgan Chase & Co.; Morgan Stanley; Morgan Stanley Capital Management, LLC; and UBS Group AG, without prejudice to their inclusion at a later time. (Dkt. #105). The parties stipulated that any statutes of limitations or repose concerning the claims against these dismissed Defendants would be tolled as if they were filed on August 16, 2017. (*Id.*).

[*311] On January 26, 2018, the Prime Broker Defendants filed a joint motion to dismiss the Amended Complaint (Dkt. #109), and Defendant EquiLend filed its own motion to dismiss the Amended Complaint (Dkt. #106). Plaintiffs filed oppositions to both of these motions, separately, on March 2, 2018. (Dkt. #112, 113). The Prime Broker Defendants and Defendant EquiLend filed separate replies on March 30, 2018. (Dkt. #114, 115).

DISCUSSION

A. Applicable Law

1. Motions to Dismiss Under *Federal Rule of Civil Procedure 12(b)(6)*

"To survive a [*Rule 12(b)(6)*] motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting **[**44]** *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "A claim is facially plausible 'when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.'" *Allco Fin. Ltd. v. Klee, 861 F.3d 82, 94-95 (2d Cir. 2017)* (quoting *Iqbal, 556 U.S. at 678*). "While *Twombly* does not require heightened fact pleading of specifics, it does require enough facts to 'nudge [a plaintiff's] claims across the line from conceivable to plausible.'" *In re Elevator Antitrust Litig., 502 F.3d 47, 50 (2d Cir. 2007)* (quoting *Twombly, 550 U.S. at 570*). In determining a *Rule 12(b)(6)* motion to dismiss, "the only facts to be considered are those alleged in the complaint, and the court must accept them, drawing all reasonable inferences in the plaintiff's favor." *Doe v. Columbia Univ., 831 F.3d 46, 48 (2d Cir. 2016)*.

2. Restraints of Trade in Violation of the Sherman Act, *15 U.S.C. § 1*

To state a claim under *Section 1* of the Sherman Act, a plaintiff must show "[i] a combination or some form of concerted action between at least two legally distinct economic entities that [ii] unreasonably restrains trade." *United States v. Am. Express Co., 838 F.3d 179, 193 (2d Cir. 2016)*. The Court considers each of these elements in turn.

To plead the first element, a plaintiff must show whether "the challenged conduct 'stems from independent decision or from an agreement, tacit or express.'" *Mayor & City Council of Baltimore, Md. v. Citigroup, Inc., 709 F.3d 129, 135 (2d Cir. 2013)* (quoting *Starr v. Sony BMG Music Entm't, 592 F.3d 314, 321 (2d Cir. 2010))*. "Agreements that fall within the scope of *Section 1* are characterized as either 'horizontal' or 'vertical.'" *In re Zinc Antitrust Litig., 155 F. Supp. 3d 337, 376 (S.D.N.Y. 2016)*. "A horizontal **[**45]** agreement is an 'agreement between competitors at the same level of the market structure,' while a vertical agreement is a 'combination[ ] of persons at different levels of the market structure.'" *Id.* (quoting *United States v. Topco Assocs., Inc., 405 U.S. 596, 608, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972))*.

"Section 1 does not disallow any and all agreements; it disallows only those 'in restraint of trade or commerce among the several States.'" In re Elec. Books Antitrust Litig., 859 F. Supp. 2d 671, 682 (S.D.N.Y. 2012) (quoting 15 U.S.C. § 1). Moreover, Section 1 "outlaws only unreasonable restraints." Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007). Therefore, to plead the second element, a Plaintiff must show that the concerted action was unreasonable. Courts generally evaluate reasonableness under **[*312]** the "rule of reason," which requires courts to weigh "all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition," including factors such as the relevant business and the history, nature, and effect of the restraint. *Id.*

B. The Prime Broker Defendants' Motion to Dismiss Is Denied

1. The Amended Complaint Adequately Alleges That Defendants Conspired to Restrain Trade in Violation of 15 U.S.C. § 1

a. Applicable Law

Defendants focus their efforts on Plaintiffs' pleading of the first element of a Sherman Act claim: whether there has been "a combination or some **[**46]** form of concerted action between at least two legally distinct economic entities[.]" Am. Express Co., 838 F.3d at 193 (internal quotation marks and citation omitted). Their opening sortie is to argue that Plaintiffs have failed to plead a plausible antitrust conspiracy. Such an argument presents a high hurdle in the context of a motion to dismiss, and a hurdle that is not crossed here.

"A plaintiff's job at the pleading stage, in order to overcome a motion to dismiss, is to allege enough facts to support the inference that a conspiracy actually existed." Citigroup, 709 F.3d at 136; *accord* Twombly, 550 U.S. at 556 ("[S]tating [a Section 1] claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made."). "To survive dismissal, 'the plaintiff need not show that its allegations suggesting an agreement are more likely than not true or that they rule out the possibility of independent action, as would be required at later litigation stages such as a defense motion for summary judgment, or a trial.'" Gelboim v. Bank of Am. Corp., 823 F.3d 759, 781 (2d Cir. 2016) (quoting Anderson News, LLC v. Am. Media, Inc., 680 F.3d 162, 184 (2d Cir. 2012)), *cert. denied*, *137 S. Ct. 814, 196 L. Ed. 2d 599 (2017)*. "Instead, a well-pleaded complaint may proceed even if ... actual proof of those facts is improbable, and ... a recovery is very remote and unlikely as long as the complaint presents *a* plausible interpretation **[**47]** of wrongdoing." In re London Silver Fixing, Ltd., Antitrust Litig., 213 F. Supp. 3d 530, 558 (S.D.N.Y. 2016) (emphasis in original) (internal quotation marks and citations omitted).

b. Discussion

Defendants' arguments with respect to the first element of Section 1 touch on six main issues, which the Court will address in turn: (i) facial plausibility; (ii) group pleading; (iii) direct evidence of conspiracy; (iv) parallel conduct; (v) so-called "plus factors"; and (vi) the sufficiency of the pleadings with particular respect to Bank of America, J.P. Morgan, UBS, and Credit Suisse.

i. The Alleged Conspiracy Is Facially Plausible

Defendants first argue that Plaintiffs' conspiracy theory is facially implausible. For the reasons that follow, the Court finds otherwise.

Duration and Membership: Defendants contend that it is facially implausible that "just six prime brokers effected a nine-year conspiracy that blocked the migration of stock loans to an anonymous exchange[,]" when borrowers, lenders, and agent lenders could have dealt with the "dozens of other prime brokers" in existence. (Def. Br. 17). Defendants cite no legal authorities to support this assertion, and the Court is aware of none. (*Id.*).

[*313] As an initial matter, the Court agrees with Plaintiffs that there is nothing facially implausible **[**48]** about the timeline of the alleged conspiracy, which began in 2009 with Goldman Sachs and Morgan Stanley, expanded by 2011 to include the other Defendants in a "general agreement," and continued "until the boycott achieved its objectives." (Pl. Opp. 20; AC ¶¶ 195-208, 239). *Cf. In re Foreign Exch. Benchmark Rates Antitrust Litig., 74 F. Supp. 3d 581, 585, 587 (S.D.N.Y. 2015)* (finding that allegations of a "long-running conspiracy" that endured for "over a decade" were plausible).

Contrary to Defendants' contentions, it is also not facially implausible that a small subset of prime brokers could bring about an actionable conspiracy, because the six named Prime Broker Defendants allegedly controlled between "76% and 80% of the market share in the stock loan market," and used that "overall clout in the market" to discourage others from investing in, or patronizing, AQS, SL-x, and Data Explorers. (AC ¶¶ 102, 122; Pl. Opp. 20). Plaintiffs argue, not without force, that it is not facially implausible for market participants who control this percentage of market power to carry out an effective group boycott. (Pl. Opp. 21). *See, e.g., Fashion Originators' Guild of Am. v. Fed. Trade Comm'n, 312 U.S. 457, 462, 465, 61 S. Ct. 703, 85 L. Ed. 949, 32 F.T.C. 1856 (1941)* (finding that members of a garment manufacturing and distribution guild, who collectively sold between 38% and 60% of all women's garments within a particular **[**49]** price range, and thus "occup[ied] a commanding position in their line of business[,]" carried out a group boycott in violation of the Sherman Act); *Starr, 592 F.3d at 323-24* (vacating the dismissal of an antitrust complaint that alleged price-fixing based on parallel conduct by defendants who controlled over 80% of the market). Of course, at later stages of litigation, Plaintiffs will be required to show in more detail how Defendants effectuated the alleged conspiracy. *Cf. Fashion Originators' Guild of Am., 312 U.S. at 461, 463* (observing that the boycott was effectuated through signed cooperation agreements and audits of members' books). But at the pleading stage, allegations of a conspiracy undertaken by six defendants that controlled 76% to 80% of the market are not rendered facially implausible by virtue of the existence of other market participants who could have transacted with the boycotted businesses.

EquiLend Board Meetings: Defendants next argue, again without reference to legal authority, that it is implausible that the conspiracy was planned at EquiLend board meetings because those meetings included "large agent-lenders" who supported the victim businesses and whose clients would have been harmed by the conspiracy. (Def. Br. 17; Def. Reply 4). Plaintiffs **[**50]** respond that the agent lenders on EquiLend's Board were themselves "entrenched" actors who "may well have their own incentives to preserve the status quo" and align themselves with Defendants, including vulnerability to pressure from the Defendants. (Pl. Opp. 27-30).

The parties' dispute on this issue amounts to a battle of competing inferences about who had the agent lenders' greatest loyalty. On a motion to dismiss, the Court must draw "all reasonable inferences in the plaintiff's favor[.]" *Columbia Univ., 831 F.3d at 48*. Here, the Amended Complaint alleges sufficient facts to support a reasonable inference in Plaintiffs' favor: namely, that the agent lenders were willing to align themselves with Defendants, even to the detriment of their own clients. For instance, the Amended Complaint alleges that "the other owners of EquiLend effectively acquiesce[d] to the **[*314]** Prime Broker Defendants" due to the latter's overall market clout (AC ¶ 122); that agent lenders BNY Mellon, State Street, and Northern Trust told SL-x that they "could not support it" because the Prime Broker Defendants "were aligned against the platform" and because their own conduct "was subject to the approval of" a Prime Broker Defendant (*id.* at ¶¶ **[**51]** 18, 218, 251-52); and that Defendants "lure[d]" agent lenders with services provided "at very little cost or, in some cases, virtually for free (*id.* at ¶¶ 261-62). Moreover, as Plaintiffs point out, the Amended Complaint also alleges numerous meetings in furtherance of the conspiracy that took place outside of EquiLend, such as at Wipf's dinner meetings with Conley and internal Morgan Stanley "pipeline call," and other "private dinners and meetings that often occurred at industry conferences[.]" (Pl. Opp. 27; AC ¶¶ 21-22, 297). Drawing all reasonable inferences in Plaintiffs' favor, the mere presence of the agent lenders in some of the meetings where the conspiracy was allegedly formed does not undercut the Amended Complaint's explication of that formation.

Access to OCC: Defendants also argue that the conspiracy is implausible because the bylaws of the sole central clearinghouse, OCC, prevent lenders and borrowers from transacting directly and require instead that they clear stock loans through broker-dealer members of OCC. (Def. Br. 18; AC ¶¶ 120 n.26, 214). In essence, Defendants characterize the Amended Complaint as alleging that they unlawfully agreed not to provide clearing broker **[**52]** services that would have afforded borrowers and lenders access to OCC — even though, according to Defendants, providing such services was not required by regulation and would not have been in their economic self-interest, as shown by the fact that the Amended Complaint does not allege that any of the roughly 60 other broker-dealer members of OCC chose to provide the service either. (Def. Br. 19; Def. Reply 3; AC ¶¶ 120 n.26, 154 n.36; *see also id.* at ¶¶ 13-14, 214).

Defendants point out that the Amended Complaint does not allege that they "did anything to discourage or prevent" other brokerage firms from offering clearing broker services. (Def. Br. 19). From this, they seek to analogize this case to *In re Interest Rate Swaps Antitrust Litigation*, in which a sister court in this District dismissed as implausible an antitrust complaint that alleged a conspiracy to destroy central clearing platforms for all-to-all interest rate swaps ("IRS") trading, where there was no regulatory mandate that required central clearing of such transactions, and where the infrastructure for such platforms did not yet exist. (*Id.* (citing *In re Interest Rate Swaps Antitrust Litig., 261 F. Supp. 3d 430, 463-72 (S.D.N.Y. 2017)* ("*In re IRS*")). Defendants here posit that the lack of "clearing brokers **[**53]** willing to clear stock loans through OCC" in the present action is similar to the absence of infrastructure in *In re IRS*. (*Id.*).

Defendants misconstrue the Amended Complaint. It does *not* allege that the conspiracy aimed to prevent borrowers and lenders from transacting directly without a clearing broker intermediary, and thus whether such transactions were permitted by OCC is of no moment. Nor does the Amended Complaint allege — or need to allege — that Defendants conspired to stop any of the roughly 60 other broker-dealer members of OCC from offering clearing broker services. Rather, the Amended Complaint alleges that Defendants refused to provide their own clients with clearing broker services, and threatened their clients, as well as other market participants, to prevent them from taking advantage of any such opportunities that **[*315]** OCC's other broker-dealer members might have provided. In Plaintiffs' words, "the Prime Broker Defendants controlled a sufficient share of the industry that other brokers alone could not provide sufficient liquidity," and "Defendants threatened retaliation against other market participants that considered dealing with AQS and SL-x." (Pl. Opp. 21; AC ¶¶ 18-20, **[**54]** 102, 122, 215-18, 252-53). Those threats allegedly succeeded. (Pl. Opp. 22; AC ¶ 382).

Drawing all reasonable inferences in Plaintiffs' favor, the necessary infrastructure existed for services such as those promised by AQS and SL-x, and it was Defendants' conduct, not structural impediments, that caused these companies to fail. Accordingly, unlike *In re IRS, 261 F. Supp. 3d at 463-72*, there is in this case no absence of enabling infrastructure that makes the alleged conspiracy implausible.[10]

Anonymous Exchange Trading: Defendants further submit that the conspiracy is implausible because "the clearing arrangements necessary to sustain anonymous exchange trading do not exist [in the stock loan market]." (Def. Br. 18). In support, they present an array of additional factual issues that the Court may not resolve on a motion to dismiss. Defendants infer that anonymous exchange trading was unsustainable from the fact that, although the Amended Complaint alleges that the Basel III regulatory development encouraged some entities to take steps toward central clearing, no regulation *requires* central clearing in this market. (*Id.*). Defendants also contend that stock loan transactions are "ill-suited" for anonymous exchange trading **[**55]** because lenders can terminate loans at will — a risk which, Defendants assert, causes borrowers to "desire to know the source of their loans to assess the risk that the loan shares will be recalled[.]" (*Id.* at 17-18). While Plaintiffs point out that AQS was allegedly "developed by industry insiders" with knowledge of demand and feasibility, Defendants question any inference of

---

[10] Of course, Defendants may well succeed at the summary judgment stage in arguing that their refusal to provide clearing-broker services was in their own economic self-interest and a "coincidence, independent responses to common stimuli[.]" ***United States v. Apple, Inc., 791 F.3d 290, 315 (2d Cir. 2015)*** (internal citation and quotation marks omitted). But such a conclusion would require factual determinations that the Court will not indulge when considering a motion to dismiss. *See Iqbal, 556 U.S. at 678*.

demand for AQS's product by submitting that even industry insiders could have erred, and by challenging the credibility of the allegation that the Federal Reserve Bank of New York supported AQS's offering. (Pl. Opp. 24; Def. Br. 18; Def. Reply 4-5).

Plaintiffs offer competing inferences concerning the stock loan market's suitability for anonymous exchange. (Pl. Opp. 23-25). They submit that the absence of a regulatory mandate is immaterial because, even without such a mandate, AQS and SL-x attracted market support for their offerings of anonymous, centrally-cleared stock lending. (*Id.* at 25). (*See also* AC ¶¶ 145-46, 154-61 (detailing AQS offerings and support); *id.* at ¶¶ 172-83 (detailing SL-x offerings and support)). Plaintiffs also submit that most borrowers do not currently care about, or demand to know, the identity of the lenders **[**56]** from whom they borrow stock. (Pl. Opp. 23). And, according to the Amended Complaint, anonymity was optional on AQS and SL-x, both of which also provided competency assessments of trading partners, including lenders' historical recall rates. (*Id.* at 23-24; AC ¶¶ 179-80, 271). Plaintiffs point to allegations in the Amended Complaint that "detail[] the demand for these new products" and explain their feasibility. (Pl. Opp. 23; *see* AC ¶¶ 7-8, **[*316]** 142-43, 179, 233, 279-84, 300, 311, 332-32).

More fundamentally, Plaintiffs submit, and the Court agrees, that these are "fact-laden arguments that cannot be credited" on a motion to dismiss. (Pl. Opp. 23, 25). On a motion to dismiss, the Court must accept all well-pleaded factual allegations as true. *See* *Iqbal, 556 U.S. at 678*; *see also* *Anderson News, 680 F.3d at 184* ("[T]o present a plausible claim at the pleading stage, the plaintiff need not show that its allegations suggesting an agreement are more likely than not true[.]"). On a future motion for summary judgment, Defendants may challenge the strength of the Amended Complaint's factual allegations, including whether Plaintiffs present sufficient evidence from which a reasonable fact-finder could conclude that the Federal Reserve Bank of New York supported **[**57]** AQS's offering. But the Court may not properly address that argument at this stage of the litigation.

For all of these reasons, the Amended Complaint's factual allegations are not facially implausible.

ii. Plaintiffs Do Not Rely on Impermissible Group Pleading

"[A]n antitrust plaintiff must present evidence tending to show that association members, in their individual capacities, consciously committed themselves to a common scheme designed to achieve an unlawful objective." *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 234 (2d Cir. 1999)*. The factual allegations must be "sufficient to 'give the defendant fair notice of what the ... claim is and the grounds upon which it rests.'" *Anderson News, 680 F.3d at 182* (quoting *Twombly, 550 U.S. at 555*). "Plaintiffs must allege a factual connection between each Defendant and the alleged conspiracy[.]" *Hinds Cty., Miss. v. Wachovia Bank N.A., 708 F. Supp. 2d 348, 362 (S.D.N.Y. 2010)*. Therefore, "[g]roup pleading, by which allegations are made against families of affiliated entities is simply insufficient to withstand review on a motion to dismiss." *Concord Assocs., L.P. v. Entm't Prop. Tr., No. 12 Civ. 1667 (ER), 2013 U.S. Dist. LEXIS 186964, 2014 WL 1396524, at *24 (S.D.N.Y. Apr. 9, 2014)*, *aff'd*, *817 F.3d 46 (2d Cir. 2016)*.

Defendants argue that Plaintiffs' allegations rely on impermissible generalizations about Defendants as a group. (Def. Br. 23). In this regard, they focus specifically on paragraphs of the Amended Complaint that describe "the Prime Broker Defendants," without further specification, as using **[**58]** their positions at EquiLend to discuss "their next move" (AC ¶ 211), "collectively decide[] that they could not tolerate" the victim platforms (*id.* at ¶ 25), "collectively refuse[]" to use AQS (*id.* at ¶ 212), "pressure[] other market participants" (*id.* at ¶ 251), and threaten to withhold services from hedge funds (*id.* at ¶¶ 215-16). While the Amended Complaint does name four individual Defendants as the source of the threats, it fails to allege additional details "such as when these threats supposedly occurred or whether they were made in parallel," and why the hedge funds could not have worked with other prime brokers outside the conspiracy. (Def. Br. 23).

Defendants concede that the Amended Complaint pleads some particular allegations about Goldman Sachs and Morgan Stanley, but argue that it impermissibly extends those more particular allegations to the remaining Defendants with a conclusory assertion that "Goldman Sachs and Morgan Stanley recruited the other Prime Broker Defendants to join their scheme ... primarily through Defendant EquiLend." (Def. Br. 23-24; AC ¶ 12). Defendants also argue that the Amended Complaint inadequately distinguishes between **[*317]** Defendants within corporate **[**59]** families. (Def. Br. 24). Finally, five of the Defendants are alleged to have held merely "an indirect partial ownership interest in EquiLend," which Defendants challenge as the basis for inferring participation in the conspiracy. (*Id.*).

Plaintiffs respond, and the Court agrees, that the Amended Complaint specifically alleges that each Defendant agreed to participate in the conspiracy. (Pl. Opp. 29).[11] In contrast, group pleading is "insufficient to withstand review on a motion to dismiss ... [where there are] no factual allegations in the complaint to connect each, or any, of the group defendants, directly to the conspiracy[.]" *Concord Assocs., L.P., 2013 U.S. Dist. LEXIS 186964, 2014 WL 1396524, at *24*. Because the Amended Complaint alleges each Defendant's participation separately, it is not impermissible group pleading to refer to their collective actions in furtherance of the conspiracy using a more general phrase such as "the Prime Broker Defendants." Further, the Amended Complaint identifies specific employees by name who held themselves out as representing the interests of their employers. Doing so provides each Defendant with sufficient notice of the claims against that Defendant and their grounds. As a result, it is proper to name a corporate sub-entity **[**60]** as a Defendant, such as "Credit Suisse Securities (USA) LLC," while pleading allegations using a more generic name, such as "Credit Suisse." The Amended Complaint accordingly does not rely impermissibly on group allegations.

iii. Plaintiffs Adequately Allege "Direct [**61] Evidence" of Conspiracy

At the pleading stage, there are two ways that a plaintiff may "allege enough facts to support the inference that a conspiracy actually existed." *Citigroup, 709 F.3d at 136*. One way to do this is to "assert direct evidence that the defendants entered into an agreement in violation of the antitrust laws." *Id.* An example of direct evidence is "a recorded phone call in which two competitors agreed to fix prices at a certain level." *Id.*; *see also* *Burtch v. Milberg Factors, Inc., 662 F.3d 212, 225 (3d Cir. 2011)* ("Direct evidence of a conspiracy is evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted." (internal quotation marks and citations omitted)). As an alternative to pleading direct evidence, a plaintiff may allege "circumstantial facts supporting the *inference* that a conspiracy existed." *Citigroup, 709 F.3d at 136*.

Plaintiffs identify certain allegations that, they claim, suffice to plead direct evidence of a conspiracy. (*See* Pl. Opp. 11-12). They include the following:

- John Shellard, a Managing Director at J.P. Morgan and EquiLend Board member, stated in an August 7, 2013 **[*318]** meeting that there was a "general agreement among [the] directors [of EquiLend]" that "industry advances should be achieved from within EquiLend," **[**62]** rather than through third parties such as AQS, SL-x, and Data Explorers. (AC ¶ 239).

- On a recorded Morgan Stanley conference call that occurred in January 2016, Thomas Wipf stated that he and William Conley agreed that Morgan Stanley and Goldman Sachs needed to "get a hold of this thing," by which he meant that they needed to act together to acquire and shut down AQS. (*Id.* at ¶¶ 295-96).

---

[11] *See* Pl. Opp. 29 n.6:

> *See, e.g.*, for Bank of America (¶¶ 46-51, 122-24, 149 n.33, 205-07 (joining the conspiracy), 225 (refusing to support SL-x), 229, 244); Credit Suisse (¶¶ 14-15, 17, 52-57, 89, 122-24, 203-05 (making false statements about AQS at the SEC panel), 210, 229, 240-41, 245-46, 249, 280); Goldman Sachs (¶¶ 11-12, 17-18, 21-23, 58-62, 89, 122-24, 149 n.33, 152-53, 189-91, 199-203 (organizing Prime Broker Defendants ahead of SEC Panel), 218 (threatening BNY Mellon), 219-20, 251-53, 257, 294-97 (formulating Project Gateway)); J.P. Morgan (¶¶ 17, 63-70, 89, 122-24, 149 n.33, 184, 210 (demanding that AQS serve as broker-only), 238-39, 245, 257 (negotiating parallel DataLend agreements)); Morgan Stanley (¶¶ 11-12, 19, 21-22, 71-78, 89, 121-24, 149 n.33, 192 (providing scrubbed data to Data Explorers), 199, 205-07, 210, 226-27, 243, 251, 279-98 (organizing Project Gateway)); UBS (¶¶ 79-87, 89, 122-24, 206-07, 210, 229, 242, 245, 249-50).

- Carl Bishti, a Credit Suisse executive and EquiLend Associate Director, stated at meetings on February 6, 2013, and July 19, 2013, that SL-x could cause the stock lending market to "change overnight," but not without the "cooperation" of EquiLend, which he described as, "the mafia run by five crime families." (*Id.* at ¶¶ 240-41).

- Emails and chats that are currently stored on Defendants' servers "indicate that EquiLend representatives, including CEO Brian Lamb, had been instructed not to 'break rank' and not to take independent actions in the marketplace until the 'EquiLend banks' determined as a group whether they would support any of the new platforms." (*Id.* at ¶ 16).

The alleged statements by Shellard and Wipf qualify as direct evidence of concerted action. It is true that, as Defendants point out, **[**63]** Shellard's statement describes an agreement among *EquiLend's directors*, not merely among the Prime Broker Defendants. (Def. Br. 21-22; Def. Reply 6). Yet the alleged conspiracy encompassed EquiLend as well as the Prime Broker Defendants. Defendants also observe that Shellard himself did not work as a prime broker for J.P. Morgan. (Def. Br. 21). The Court does not find this observation probative, as an employee need not work in a particular position to know of and describe his employer's collusive conduct. Both statements expressly describe agreements among the Defendants, and are thus direct evidence of concerted action (element one of a Sherman Act claim).

Bishti's statement, and the emails to Lamb and his colleagues, are different matters entirely. There are far too many layers of inference between Bishti's analogy to the mafia and any conclusions that might be drawn from it for the statement to qualify as direct evidence of anything much, except perhaps of Bishti's affinity for colorful speech. While the remainder of Bishti's statement might support an inference of EquiLend's strong hold on the market, it is a far cry from *direct* evidence of conspiracy. The allegation of emails and **[**64]** chats telling Lamb not to "break rank" is similarly too vague to qualify.[12]

[*319] Accordingly, Plaintiffs have adequately pleaded at least some "direct evidence" allegations of conspiracy. Notably, while the qualifying allegations may be slim, even a failure to allege direct evidence of conspiracy would not necessarily be fatal to the pleading.

iv. Plaintiffs Adequately Allege Parallel Conduct

A plaintiff may also make a showing of concerted action by alleging "circumstantial facts supporting the *inference* that a conspiracy existed." *Citigroup, 709 F.3d at 136*. For instance, a plaintiff may state a *Section 1* claim by alleging behavior "that would plausibly contravene each defendant's self-interest in the absence of similar behavior by rivals." *Starr, 592 F.3d at 327* (internal citation and quotation marks omitted). Another way to plead

---

[12] Defendants argue, and Plaintiffs do not contest, that other allegations fall short of qualifying as direct evidence of conspiracy. These include, for example, an unnamed executive's statement that Credit Suisse would pursue an exchange through EquiLend rather than invest in SL-x, which Defendants argue is a natural unilateral decision not to invest in a competitor. (AC ¶ 17; Def. Br. 22; Def. Reply 6). In this regard, Defendants contend that the allegation of a 2009 "meeting of 'the five families' ... [to] settle on their collective messaging" for an anticipated discussion with the SEC does not plead direct evidence of conspiracy. (AC ¶ 202; Def. Br. 20). Defendants argue that (i) this meeting "could not have been conspiratorial" because it was organized by Bank of America, which was not alleged to have joined the conspiracy until 2011; (ii) the Amended Complaint fails to specify either who attended the meeting or when and where it occurred; and (iii) a meeting to coordinate messaging to a public official is not an antitrust violation. (Def. Br. 20). Defendants also contest that the reference to "five families" fails adequately to allege direct evidence because Plaintiffs never identify to whom the phrase refers or connect the phrase to the alleged conspiracy. (*Id.*). And the allegation of use of the "Project Gateway" code word does not, in Defendants' view, plead direct evidence because the phrase was used to refer to lawful joint venture discussions by Thomas Wipf and William Conley about Morgan Stanley and Goldman Sachs potentially purchasing AQS. (Def. Br. 21; Def. Reply 7; *see also* AC ¶¶ 11, 21-22, 294-97, 363). Finally, Defendants claim that the allegation that Morgan Stanley and Goldman Sachs conspiratorially secured the participation of the other Defendants lacks the specifics necessary to count as direct evidence of conspiracy. (Def. Br. 21). However, the fact that these, and perhaps many more, allegations in the Amended Complaint do not satisfy the standard to plead direct evidence does not mean that the Amended Complaint does not contain other, well-pleaded allegations of direct evidence of conspiracy.

circumstantial evidence of conspiracy is by alleging parallel conduct. "Examples of parallel conduct allegations that might be sufficient under *Twombly*'s standard include parallel behavior that would probably not result from chance, coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties[.]" *Citigroup, 709 F.3d at 137* (internal citation and quotation marks omitted). **[**65]**

Because parallel conduct can result from many different factors, these allegations generally must be accompanied by "plus factors" that support an inference that the conduct resulted from a prior agreement. *See Citigroup, 709 F.3d at 137-38*. The Court will first address whether Plaintiffs have adequately pleaded parallel conduct and then assess Plaintiffs' pleading of plus factors.

Plaintiffs argue — and the Court agrees — that the Amended Complaint adequately pleads parallel conduct by Defendants. To start, concerning AQS, the Amended Complaint alleges that Credit Suisse, J.P. Morgan, Morgan Stanley, and UBS each, in separate meetings, communicated an identical position to AQS: that they would not support AQS unless it became a "broker-only platform." (Pl. Opp. 13; AC ¶ 210). Defendants contend that this pleading lacks sufficient factual details about who said what to whom and when, and that the Defendants' shared position was simply a recognition that "market standards" and OCC by-laws required "broker-dealers" to transact on AQS. (Def. Br. 25-26). Defendants' argument is fallacious; that OCC required end users to clear their trades through clearing brokers is not the same as a requirement that AQS be a "broker-only **[**66]** platform," the latter of which implies that no one but broker-dealers can use it. Moreover, the claim that the allegations of Defendants' identical positions regarding AQS lacks specificity only **[*320]** works when reading paragraph 210 in total isolation. Taken holistically, the allegations of Defendants' parallel conduct toward AQS, including withdrawals and denials of support and threats to other market participants, are sufficiently specific to survive a motion to dismiss. (*See* AC ¶¶ 196-218).

Next, Defendants maintain that the Amended Complaint's allegations show divergent, rather than parallel, conduct. (Def. Br. 25-28). They point out that several Defendants allegedly joined ACS, while Bank of America was initially a strong supporter and continued to make substantial transactions on the platform through 2011. (*See* AC ¶¶ 119, 205, 207).[13] In Defendants' view, any commonalities in their behavior toward SL-x resulted not from conspiracy, but rather from the fact that they were all responding to the same prompt, *i.e.*, SL-x approaching the group of them with a proposal to form a "consortium" to invest in SL-x. (*See id.* at ¶¶ 226-28). Indeed, they posit, Defendants did not act alike toward SL-x **[**67]** because Goldman Sachs and Morgan Stanley declined support immediately, while the other Defendants waited for several years before making a decision. The Court disagrees. No doubt, the Amended Complaint contains allegations of divergent conduct, such as Susan O'Flynn's actions in support of central clearing as other Morgan Stanley decision makers schemed to prevent it. (*See* AC ¶¶ 281-87). But the presence of some divergent conduct does not negate the allegations of other, parallel conduct.

As to Data Explorers, Defendants argue that the Amended Complaint makes no allegations of parallel conduct. (Def. Br. 27). That is incorrect. The Amended Complaint alleges that Defendants entered into identical distribution agreements with DataLend in an attempt to undermine Data Explorers and push it from the market. (Pl. Opp. 14; AC ¶¶ 257-58).

In a variation on this theme, Defendants argue that, to the extent the Amended Complaint *does* plead parallel conduct, it fails to support an inference of conspiracy because the alleged parallel conduct was not contrary to Defendants' self-interest and made good business sense. (Def. Br. 26-31). After all, AQS and SL-x threatened Defendants' profits as stock **[**68]** loan middlemen, and the platforms they offered were new, untested, and bereft of critical mass and client demand. Precisely because of these deficiencies, it made business sense for Defendants to decline to run trades through the AQS and SL-x platforms. And the fact that SL-x allegedly failed in Europe suggests it had little to offer, and that Defendants were wise not to invest. (Def. Br. 27; AC ¶ 268). Finally, according

---

[13] Defendants suggest that the 2011 date is significant because it is "two years after the alleged conspiracy commenced." (Def. Br. 25). This reasoning lacks merit because the Amended Complaint does not allege that Bank of America joined the conspiracy until 2011.

to Defendants, the refusals to invest do not support an inference of conspiracy to block all-to-all trading in the United States because SL-x had no immediate plans to offer such trading in the United States. (Def. Br. 27). Indeed, the SL-x platform was not even operational in the United States during the relevant Class Period. (*See* AC ¶¶ 20, 253, 268). More generally, Defendants caution against drawing inferences from their failure to invest in SL-x, which they deem to be nothing more than an allegation of inaction, a "particularly perilous" basis from which to draw conclusions. (Def. Br. 27).

The Court appreciates the challenges of drawing inferences from allegations of inaction. Nonetheless, on a motion to dismiss, all reasonable inferences must be **[*321]** drawn in Plaintiffs' **[**69]** favor, including those arising from allegations of inaction. On the broader contentions that the parallel conduct pleaded in the Amended Complaint fails to support an inference of conspiracy, the Court turns to a "plus factor" analysis.

v. Plaintiffs Adequately Allege Plus Factors

Allegations that a defendant engaged in parallel conduct, without more, are often insufficient to plead circumstantial evidence of a conspiracy if "such behavior could be the result of coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties." *United States v. Apple, Inc., 791 F.3d 290, 315 (2d Cir. 2015)* (internal citation and quotation marks omitted). Therefore, to survive a motion to dismiss, allegations of parallel conduct generally must be accompanied by "plus factors" that support an inference that the parallel conduct "flowed from a preceding agreement rather than from [the defendants'] own business priorities." *Citigroup, 709 F.3d at 137-38*. Examples of plus factors include "a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of interfirm communications." *Id. at 136* (internal citation and **[**70]** quotation marks omitted).

"[T]hese plus factors are neither exhaustive nor exclusive, but rather illustrative of the type of circumstances which, when combined with parallel behavior, might permit a jury to infer the existence of an agreement." *Citigroup, 709 F.3d at 136 n.6*. "The mere opportunity to conspire does not *by itself* support the inference that such an illegal combination actually occurred." *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 545 (2d Cir. 1993)* (emphasis added). However, allegations of an opportunity to conspire may, when considered alongside allegations of parallel conduct and other plus factors, suffice to defeat a motion to dismiss.

"[T]he presence of plus factors certainly does not compel or 'necessarily lead to an inference of conspiracy.'" *Anderson News, LLC v. Am. Media, Inc., 123 F. Supp. 3d 478, 499 (S.D.N.Y. 2015)* (quoting *Apex Oil Co. v. DiMauro, 822 F.2d 246, 254 (2d Cir. 1987))*. Of course, at the summary judgment stage, "plus factors may not necessarily lead to an inference of conspiracy. For example, such factors in a particular case could lead to an equally plausible inference of mere interdependent behavior[.]" *Apex Oil, 822 F.2d at 254*. And sometimes, a plaintiff's allegations of parallel conduct, combined with plus factors, will not support a *Section 1* claim. "An inference of conspiracy will not arise when the conspirators' parallel conduct 'made perfect business sense,' ... 'there are obvious alternative **[**71]** explanations for the facts alleged,' ... or the alleged facts 'suggest competition at least as plausibly as [they] suggest anticompetitive conspiracy[.]'" *In re IRS, 261 F. Supp. 3d at 462* (quoting *Citigroup, 709 F.3d at 138*; *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 322-23 (3d Cir. 2010)*; *In re Elevator Antitrust Litig., 502 F.3d at 51*). Nonetheless, "the requirement of '*plausible* grounds to infer an agreement *does not impose a probability requirement at the pleading stage*; it simply calls for enough facts to raise *a reasonable expectation* that *discovery* will reveal evidence of illegal agreement[.]'" *In re IRS, 261 F. Supp. 3d at 462* (internal quotation marks omitted) (emphases in original) (quoting *Anderson News, 680 F.3d at 184*).

Interfirm Communications: As Plaintiffs point out, the Amended Complaint **[*322]** pleads multiple interfirm meetings at conferences, private dinners, and EquiLend board meetings, including the 2009 meeting convened by Bank of America (AC ¶ 202), meetings between Wipf and Conley (*id.* at ¶¶ 21, 294); a 2009 meeting between Bank of America and Goldman Sachs executives (*id.* at ¶ 200); meetings between Morgan Stanley, Goldman Sachs, and other Defendants at private dinners and conferences (*id.* at ¶¶ 297, 312); and meetings of EquiLend's Board (*id.* at

¶¶ 223, 297). At this stage of the litigation, these allegations are sufficient both to plead "a high level of interfirm communications" and to support **[**72]** an inference of an opportunity to conspire. *Gelboim, 823 F.3d at 781*.

Defendants counter that agent lenders were also present at the EquiLend board meetings, and that it is implausible that meetings in furtherance of the conspiracy took place with agent lender participation. (Def. Br. 31-32). The Court has already rejected Defendants' contention that the mere presence of agent lenders at the EquiLend board meetings renders the allegations about those meetings implausible. Moreover, the inquiry into plus factors considers "interfirm communications," which need not necessarily be conspiratorial communications. The EquiLend board meetings easily satisfy that standard. Defendants also claim that, other than the EquiLend board meetings, the Amended Complaint presents merely "vague references to isolated discussions." (*Id.* at 32). That is not accurate. As noted above, the Amended Complaint alleges multiple interfirm meetings at private dinners and conferences, as well as during EquiLend board meetings.

Defendants concede that the Amended Complaint may adequately plead an "opportunity to conspire," but argue that such opportunity alone is insufficient to support an inference that a conspiracy actually happened. (Def. Br. 32). **[**73]** The Court does not disagree, and considers the opportunity to conspire as but one of a series of plus factors supporting an inference that Defendants' parallel conduct flowed from conspiracy.

Common Motive to Conspire: Plaintiffs argue that the Prime Broker Defendants had a "common motive to preserve their supracompetitive profits" from charging excess fees under cover of price opacity. (Pl. Opp. 18). The Amended Complaint makes this allegation explicitly: "The Prime Broker Defendants feared that, if borrowers and lenders saw what their counterparties were paying, they would use competition to reduce the Prime Broker Defendants' outsized intermediary profits." (AC ¶ 24). The Court has little difficulty finding a common motive to conspire from these allegations. Conversely, the Court rejects Defendants' argument that, while the Amended Complaint alleges that Defendants each had a unilateral interest in waiting to see how the purported victim entities evolved instead of "supporting ventures that supposedly threatened its profits," it falls short of alleging that Defendants had a common motive to conspire. (Def. Br. 32-33).

Actions Against Individual Self-Interest: Plaintiffs contend that **[**74]** the Amended Complaint alleges actions against self-interest because, "[a]bsent the conspiracy, it would have been in the self-interest of many of the Prime Broker Defendants to support the platforms to avoid the risk of being left behind[,]" and to offer their clients access to AQS to avoid their jumping ship to a competitor. (Pl. Opp. 18-19). At this stage of the litigation, the Court accepts this inference as reasonable. The Court thus concludes that Defendants' lack of support for the new market entrants serves as an additional plus factor, **[*323]** adding to other circumstantial evidence of conspiracy.

Defendants contend that the Amended Complaint effectively alleges that they "continued to conduct business as they always had," which — in Defendants' view — required no conspiracy to accomplish. (Def. Br. 33). That may well be the case, but it is not the appropriate inquiry for the moment. The law is clear that plus factors do not "necessarily lead to an inference of conspiracy." *Apex Oil Co., 822 F.2d at 254*. And they do not need to; "plus factors" need not *require* conspiracy in order to support an inference that parallel conduct by the defendants flowed from one.

Collusion in Other Markets: The Amended Complaint additionally **[**75]** alleges that Defendants' "stock loan conspiracy is but the latest in a string of anticompetitive conspiracies involving the financial markets in which the Prime Broker Defendants have participated[.]" (AC ¶ 346; *see also id.* at ¶¶ 347-62 (detailing alleged conspiracies in other markets)). "Allegations of anticompetitive wrongdoing in [other venues] — absent any evidence of linkage between such foreign conduct and conduct here — is merely to suggest ... that if it happened there, it could have happened here." *In re Elevator Antitrust Litig., 502 F.3d at 52* (internal citation and quotation marks omitted). The Court agrees squarely with Defendants that these allegations are irrelevant, and will not consider them for purposes of evaluating the sufficiency of the Amended Complaint. (*See* Def. Br. 33).

In sum, the Amended Complaint adequately pleads plus factors in addition to parallel conduct, and thereby supports an inference of concerted action from circumstantial evidence.

vi. Plaintiffs' Allegations Are Adequate As Against Bank of America, J.P. Morgan, UBS, and Credit Suisse

Bank of America: Defendants seek dismissal of the claim against Bank of America on the basis that its membership in the conspiracy is implausible because it was **[**76]** an early supporter of, and investor in, AQS before allegedly joining the conspiracy in 2011, at which point it declined to invest additional funds in AQS, and limited its transactions with AQS. (Def. Br. 34-36; *see* AC ¶¶ 157, 205-07). Defendants observe that Bank of America never withdrew its *initial* investment in, or eliminated *all* transactions with, AQS. (Def. Br. 35; Def. Reply 13; *see* AC ¶¶ 205, 207). Defendants infer from these observations, respectively, that joining the conspiracy would have been contrary to Bank of America's interests, and that Bank of America would not have wanted to harm AQS. (Def. Br. 35). Plaintiffs respond that it is entirely plausible that Bank of America initially supported AQS but changed its mind and joined the conspiracy as a result of pressure from the other Defendants, especially given that the transfer of Morgan Stanley's and UBS's head of prime brokerage to be head of Global Prime Brokerage at Bank of America allegedly facilitated such pressure. (Pl. Opp. 22; AC ¶¶ 200, 205-07).

Defendants also suggest an alternate explanation for Bank of America's decision not to invest more funds and to reduce its transactions with AQS in or about 2011: AQS was **[**77]** failing. (Def. Br. 35; *see* AC ¶¶ 212-13, 269). But, as Plaintiffs point out, AQS was not failing when Bank of America withdrew its support in 2011; it was not failing until the end of 2014, following the trade-flow hypoxia caused by Defendants. (Pl. Opp. 22; AC ¶¶ 206, 266, 269).

As to SL-x and Data Explorers, Bank of America allegedly continued meetings with SL-x longer than the other Defendants, **[*324]** and further had independent reasons not to support SL-x due to Bank of America's support of its rival AQS. (Def. Br. 36; AC ¶¶ 234, 239-40, 244). According to Defendants, the sole plausible allegation against Bank of America in relation to Data Explorers is that it held a seat on EquiLend's board. (Def. Br. 36). Unfortunately for Bank of America, presence on EquiLend's board, combined with allegations of parallel conduct supported by plus factors, is enough at this stage of the litigation.

To be sure, Defendants do hit on a weakness: the Amended Complaint arguably contradicts itself by alleging that Bank of America convened a meeting of the "five families" in furtherance of the conspiracy in 2009, a point in time when it was allegedly still a strong supporter of AQS. (Def. Br. 36; Def. Reply **[**78]** 13-14). Nonetheless, Defendants' counter-explanations for Bank of America's behavior improperly draw inferences against Plaintiffs. (Pl. Opp. 22). While the Court may be skeptical about the strength of the claims against Bank of America, at least as concerns conduct toward AQS, Plaintiffs' arguments, when taken as a whole, are not entirely implausible and thus cannot be rejected at the pleading stage.

J.P. Morgan, UBS, and Credit Suisse: Defendants argue that the allegations against J.P. Morgan, UBS, and Credit Suisse are insufficient because the Amended Complaint fails to allege that these Defendants threatened or discouraged AQS, SL-x, or their potential customers, or that they participated in any conspiratorial meetings. (Def. Br. 37). According to Defendants, the Amended Complaint also fails to allege that J.P. Morgan or UBS used the phrase "five families." (*Id.*). The primary allegations against these three Defendants are that they did not invest in or transact with AQS and SL-x, which decisions are, in Defendants' view, consistent with the Defendants' unilateral interests. (*Id.*; *see* AC ¶¶ 210, 239, 242, 245).

These arguments are not meritorious. As explained above, the Amended Complaint **[**79]** does allege that these Defendants participated in conspiratorial meetings. And because, as also explained above, the Court is not relying on references to the "five families," the fact that not every Defendant used that term does not matter. Not every member of a conspiracy needs to issue the same threats for the conspiracy to exist. Plaintiffs have adequately pleaded that these Defendants' failures to invest in or support new market entrants was part of a conspiracy to reduce competition in the market. More broadly, Plaintiffs adequately plead the first element of a Sherman Act claim.

2. The Amended Complaint Adequately Alleges an Unreasonable Restraint on Trade Under Either a *Per Se* or a Rule of Reason Theory

a. Applicable Law

Defendants also attack the sufficiency of Plaintiffs' pleadings on the second element of a Sherman Act claim — whether the alleged concerted action was an unreasonable restraint on trade — albeit to a lesser degree. Courts undertaking this analysis "apply one of two rules designed to provide guidance in forming judgments about the competitive significance of challenged restraints." *Am. Express Co., 838 F.3d at 193*. Plaintiffs may either plead that the alleged concerted action was *per se* illegal **[**80]** under *Section 1* of the Sherman Act, or that the conduct violated what is known as the "rule of reason." *See, e.g., Texaco Inc. v. Dagher, 547 U.S. 1, 3-5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*.

[*325] The *per se* rule applies to "certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." *N. Pac. R. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*; *see also Nw. Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 290, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)* (reiterating the *per se* rule). For instance, "[i]t has long been settled that an agreement to fix prices is unlawful *per se*. It is no excuse that the prices fixed are themselves reasonable." *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (1980)*.

Courts have made clear, however, that "[o]nly 'manifestly anticompetitive' conduct ... is appropriately designated *per se* illegal." *Bogan v. Hodgkins, 166 F.3d 509, 514 (2d Cir. 1999)* (internal citations and quotation marks omitted). Courts "presumptively appl[y] rule of reason analysis, under which antitrust plaintiffs must demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive before it will be found unlawful." *Dagher, 547 U.S. at 5*. The rule of reason "requires a court to weigh all of the circumstances surrounding the challenged conduct to determine whether the alleged restraint is unreasonable, **[**81]** taking into account the nature of the specific business, the industry, the restraint's history, and whether the defendant has market power." *LLM Bar Exam, LLC v. Barbri, Inc., 271 F. Supp. 3d 547, 578-79 (S.D.N.Y. 2017)* (quoting *In re Aluminum Warehousing Antitrust Litig., No. 13 MDL 2481 (KBF), 2014 U.S. Dist. LEXIS 121435, 2014 WL 4277510, at *25 (S.D.N.Y. Aug. 29, 2014)*).

"Group boycotts, which generally consist of agreements by two or more persons not to do business with other individuals, or to do business with them only on specified terms, may in some limited circumstances constitute *per se* violations of the Sherman Act." *Balaklaw v. Lovell, 14 F.3d 793, 800 (2d Cir. 1994)* (citing *Volvo N. Am. Corp. v. Men's Int'l Pro. Tennis Council, 857 F.2d 55, 73 (2d Cir. 1988)*). "[T]he category of restraints classed as group boycotts is not to be expanded indiscriminately, and the *per se* approach has generally been limited to cases in which firms with market power boycott suppliers or customers in order to discourage them from doing business with a competitor." *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*. In contrast, "modern ***antitrust law*** evaluates [joint venture] conduct — including the creation of the joint venture itself, its business focus, its product selection, and its pricing — under the rule of reason, with the pleading requirements that standard imposes." *In re IRS, 261 F. Supp. 3d at 467* (citing *Dagher, 547 U.S. at 1 n.1 & 6-7*). The animating inquiry is "whether there is a contract, combination ... or conspiracy amongst separate economic actors pursuing separate economic interests, such **[**82]** that the agreement deprives the marketplace of independent centers of decisionmaking, and therefore of diversity of entrepreneurial interests, and thus of actual or potential competition[.]" *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 195, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (internal citations and quotation marks omitted). Of course, even participants in joint ventures may be liable *per se* for conduct undertaken outside the venture. *Cf. Ariz. v. Maricopa Cty. Med. Soc., 457 U.S. 332, 355-57, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*.

[*326] b. Discussion

Defendants' second line of attack is to argue that, to the extent Plaintiffs' allegations concern joint venture or joint investment conduct, those allegations should trigger a rule of reason analysis — which, in Defendants' view, would fail. Plaintiffs respond that the conduct alleged should be deemed *per se* illegal, but that, in the alternative, the allegations also suffice to plead a claim even under the rule of reason. The Court agrees with Plaintiffs on both issues.

i. The Alleged Conduct Is *Per Se* Unlawful

Defendants argue that, except for the alleged boycott of AQS, all of the Amended Complaint's allegations concern actions taken in the context of, and in furtherance of, a joint venture, and thus should be evaluated under the rule of reason rather than the *per se* standard. (Def. Br. 38). Even though the Amended Complaint **[**83]** pleads at one point that EquiLend "is not the independent joint venture that it purports to be," Defendants observe that it elsewhere characterizes EquiLend as "organized as a joint venture." (Def. Br. 38; AC ¶¶ 310, 319). In Defendants' words, "Plaintiffs' antitrust claim primarily rests on allegations regarding EquiLend that are entirely consistent with lawful joint-venture conduct." (Def. Reply 14). Further, Defendants reiterate that the fact that EquiLend's ownership and board included agent lenders "contradict[s] any suggestion that it is illegitimate." (Def. Br. 38; *see* AC ¶¶ 308, 378).

Plaintiffs argue in contrast that "[t]he question of whether to apply *per se* or rule of reason turns on the type of *claim* at issue, not on isolated allegations that make up the claim." (Pl. Opp. 31). Plaintiffs argue that, taken as a whole, the Amended Complaint alleges a group boycott, which Plaintiffs contend automatically falls within a category of *per se* illegal conduct. (*Id.* at 7-8, 31). Even taking elements of the Amended Complaint in isolation, and even if EquiLend may have been a joint venture in some respects, Plaintiffs argue that the alleged conduct should still be analyzed under the *per se* rule because **[**84]** it was undertaken "*outside of the joint venture*." (*Id.* at 33 (emphasis in original)). In other words, Defendants' alleged concerted actions, aimed at starving AQS, SL-x, and Data Explorers of data and liquidity, took place in circumstances that exceeded Defendants' service on EquiLend's Board, even if the conduct was planned and agreed to at EquiLend meetings. Plaintiffs rely on *Starr v. Sony BMG Music Entertainment*, in which the Second Circuit vacated and remanded a rule-of-reason-based dismissal of an antitrust complaint involving purported joint ventures, where the plaintiffs had challenged the joint ventures as a sham means to implement anticompetitive agreements and there were "many allegations of conduct that took place outside of the joint ventures[.]" *Starr, 592 F.3d at 326-27*. (*See also* Pl. Opp. 32).

The Court agrees with Plaintiffs. The Amended Complaint alleges that EquiLend's joint venture status was a smokescreen behind which the Prime Broker Defendants could operate. The full relevant allegation in the Amended Complaint is that, "[t]hough EquiLend is nominally organized as a joint venture, this fact does not shield it — or the Prime Broker Dealers — from the antitrust laws. This is because EquiLend does **[**85]** not act as an independent, rational market participant[.]" (AC ¶ 310). In other words, the Amended Complaint is entirely consistent in its allegations regarding EquiLend's joint venture status. More importantly, the Amended Complaint alleges that the Prime Broker Defendants, acting as separate **[*327]** and individual economic decision-makers, conspired to boycott SL-x, Data Explorers, and also AQS, and that this conduct was undertaken on behalf of each Prime Broker Defendant, and not in furtherance of a legitimate joint venture.

Defendants rely on *Texaco Inc. v. Dagher*, in which the Supreme Court held that it was not *per se* illegal for "a lawful, economically integrated joint venture to set the prices at which the joint venture sells its products." *547 U.S. at 3*. But Defendants' reliance is misplaced. In *Dagher*, Texaco and Shell had formed a joint venture, called Equilon Enterprises, that "was approved by consent decree, subject to certain divestments and other modifications, by the Federal Trade Commission," in order to refine and sell gasoline. *Id. at 4*. The consent decree imposed no restriction on prices, and Equilon sold the gasoline at a single price under both the Texaco and Shell brand names. *Id.* The Supreme **[**86]** Court reasoned that the *per se* rule against price-fixing did not apply because:

> Texaco and Shell Oil did not compete with one another in the relevant market — namely, the sale of gasoline to service stations in the western United States — but instead participated in that market jointly through their investments in Equilon. In other words, the pricing policy challenged here amounts to little more than price

setting by a single entity — albeit within the context of a joint venture — and not a pricing agreement between competing entities with respect to their competing products.

Id. at 5-6. Here, in contrast, the parties have not disputed that the Prime Broker Defendants are direct competitors in the stock loan market. To be sure, some of the Prime Broker Defendants' alleged conduct toward SL-x and Data Explorers may arguably have been "*consistent with* lawful joint-venture conduct" (Def. Reply 14 (emphasis added)), rather than conduct undertaken by "separate economic actors pursuing separate economic interests," *Am. Needle, 560 U.S. at 195*. But mere consistency with an alternate inference supporting the Defendants' position is not enough at this stage of the litigation, where the Court must draw all reasonable inferences in **[**87]** favor of Plaintiffs.

In any event, plenty of relevant allegations cannot be so characterized. For instance, the Amended Complaint alleges that, at EquiLend board meetings in August and September 2011, the Prime Broker Defendants each agreed not to support SL-x. (AC ¶ 223). Thereafter, each Prime Broker Defendant separately and individually "withheld capital and support from SL-x through the fall of 2011 and throughout 2012[.]" (*Id.* at ¶ 228). A Morgan Stanley employee told an SL-x representative to deal directly with EquiLend. (*Id.* at ¶¶ 224-26). In late 2013, the Prime Broker Defendants allegedly agreed to a collective boycott of SL-x, and began threatening other market participants to deter them from using SL-x. (*Id.* at ¶¶ 236-37). Similarly, the Amended Complaint does not allege that EquiLend, acting as an "independent center[] of decisionmaking," *Am. Needle, 560 U.S. at 195*, launched DataLend because it wished to compete with Data Explorers. Rather, the thrust of the allegations is that the Prime Broker Defendants used EquiLend to launch a subpar product in an attempt to undermine Data Explorers so as to maintain opacity in pricing data *and* their lucrative roles as prime broker intermediaries. These allegations **[**88]** are a far cry from *Dagher*, and the alleged conduct is not immunized from the *per se* rule by virtue of EquiLend's presence in the fact pattern.

[*328] ii. The Alleged Conduct Violates the Rule of Reason

Despite the Court's conclusion that the allegations in the Amended Complaint qualify as *per se* unlawful restraints of trade under the Sherman Act, for completeness the Court also undertakes a rule of reason analysis. The Second Circuit has defined anticompetitive conduct as "conduct without a legitimate business purpose that make[s] sense only because it eliminates competition." *In re Adderall XR Antitrust Litig., 754 F.3d 128, 133 (2d Cir. 2014)*. Plaintiffs argue that, even if a rule of reason applies, the Amended Complaint satisfies this standard. (Pl. Opp. 33-41). The Court also finds that it has.

With respect to AQS, Defendants argue that the Amended Complaint alleges nothing improper about EquiLend's purchase of AQS, which it acquired at a low price after the platform failed and OCC declined to buy it. (Def. Br. 41-42; *see* AC ¶¶ 294, 299). Indeed, according to Defendants, the Amended Complaint does "not allege any facts suggesting that the Prime Broker Defendants undermined AQS's discussions with OCC." (Def. Br. 42; *see* AC ¶¶ 292, 298). While acknowledging **[**89]** that the Amended Complaint alleges that the purchase was made to "bury" AQS (AC ¶ 21), Defendants contend that, in fact, after the acquisition, EquiLend continued to operate the AQS technology, and the Amended Complaint has not alleged "facts suggesting otherwise" (Def. Br. 42). Plaintiffs respond that EquiLend's purchases of both SL-x and AQS were anticompetitive because "it would have been irrational for Defendants to buy platforms they had no intention of using in the absence of an anticompetitive motive," and, further, that when considered in the context of the Amended Complaint as a whole, both purchases confirm Defendants' alleged anticompetitive intent. (Pl. Opp. 38).

Drawing all inferences in favor of Plaintiffs, as required on a motion to dismiss, the Court concludes that the Amended Complaint adequately pleads that Defendants purchased both AQS's and SL-x's intellectual property for anticompetitive purposes, as evidenced by the underuse of the products after purchase. Defendants' contention that EquiLend *did* operate the AQS technology post-purchase, and that the Amended Complaint has not alleged "facts suggesting otherwise" (Def. Br. 42), improperly draws inferences in Defendants' **[**90]** favor. Further, the Amended Complaint does allege that, "the Prime Broker Defendants agreed to exert their influence as Directors of OCC and Directors of EquiLend to prevent OCC from acquiring AQS." (AC ¶ 298). That allegation supports an inference that "Defendants undermined AQS's discussions with OCC," even without specific factual allegations of precisely how Defendants went about doing so. (Def. Br. 42).

As to SL-x, Defendants contend that EquiLend's decision not to merge with SL-x cannot support an antitrust claim because there is no indication that a merger would have been in EquiLend's interest. (Def. Br. 41; *see* AC ¶¶ 224, 253, 268). Separately, Defendants argue that the Amended Complaint fails adequately to allege specific action by Defendants impeding SL-x's access to central clearing, or collusion not to invest in SL-x, and that any such allegation would fail a rule of reason analysis because each Defendant had rational unilateral reasons not to pursue the investment. (Def. Br. 41). Similarly, Defendants maintain that EquiLend's purchase of SL-x's intellectual property, and subsequent non-use of it, was "legitimate joint venture conduct." (*Id.*; AC ¶ 272). Plaintiffs respond **[**91]** that the Amended Complaint alleges more than a declined merger. For instance, Conley "told SL-x **[*329]** executives that the Prime Broker Defendants would not support SL-x" and would only permit this type of market evolution from within EquiLend, and the Prime Broker Defendants each declined to support SL-x *as a result of* their agreed boycott. (Pl. Opp. 37). Taking Plaintiffs' allegations as true and drawing all inferences in their favor, these allegations are sufficient to support a reasonable inference that Defendants' conduct toward SL-x was a result of an agreement among the Defendants, rather than of unilateral decision-making, and that EquiLend's purchase and non-use of SL-x's intellectual property was anticompetitive conduct that lacked "a legitimate business purpose" and made sense "only because it eliminates competition." *In re Adderall XR Antitrust Litig., 754 F.3d at 133*.

Defendants next argue that EquiLend's creation of DataLend was pro-competitive, as shown by its lower prices, and that the Amended Complaint does not allege any anticompetitive use of trading data or other anticompetitive conduct. Indeed, Defendants observe, the Amended Complaint does not even allege that Defendants failed to subscribe to Data Explorer's data service **[**92]** or forced Data Explorers to shut down. (Def. Br. 40; AC ¶¶ 261, 257). Plaintiffs respond by identifying allegations that Defendants overlook, allegations that evince both insult and injury: Defendants created DataLend not to compete with, but rather to "kill," Data Explorers by agreeing "in lockstep, to distribution agreements with DataLend" that limited price transparency but still provided a product that, while anemic and subpar, could nonetheless "undermine Data Explorers," and then aggressively underpriced that product. (Pl. Opp. 36-37). Plaintiffs argue as well that the restrictions limiting the distribution of pricing data were not pro-competitive. (*Id.* at 37). Plaintiffs are correct. At this stage of the litigation, the possibility that Defendants' conduct could conceivably be characterized as improving competition does not warrant dismissal.

Finally, Defendants argue that the joint-venture allegations (which comprise everything except the AQS boycott) fail the rule of reason. They form this conclusion because, in their view, the Amended Complaint (i) lacks allegations as to EquiLend's market power and the joint venture's competitive benefits and harms, and (ii) relies solely on assertions **[**93]** "that Defendants' conduct generally caused anticompetitive harm" and lacked a "pro-competitive rationale." (Def. Br. 38-39; AC ¶¶ 323-35, 389). Plaintiffs respond that they *have* alleged circumstantial evidence of Defendants' market power in the form of an allegedly successful boycott that drove out competitors. (Pl. Opp. 40). *See* *Todd v. Exxon Corp., 275 F.3d 191, 206-07 (2d Cir. 2001)* ("If a plaintiff can show an actual adverse effect on competition, such as reduced output ... we do not require a further showing of market power."). Plaintiffs point as well to the uncontested allegation that the Prime Broker Defendants controlled approximately 70% of market share. (Pl. Opp. 40; Def. Br. 39-40).

This dispute boils down to whether the allegations concern conduct by EquiLend alone, or conduct undertaken by the Prime Broker Defendants using EquiLend. As explained above, the Amended Complaint alleges that the Prime Broker Defendants took concerted action outside the scope of their joint venture in regards to both SL-x and Data Explorers. It is therefore the Prime Broker Defendants' market power, not Defendant EquiLend's market power, that matters. The Amended Complaint has adequately alleged that the Prime Broker Defendants held substantial market **[**94]** power.

[*330] In sum, whether analyzed as *per se* unlawful conduct, or under the rule of reason, the Amended Complaint adequately pleads that Defendants' concerted actions amounted to an unreasonable restraint on trade.

3. Plaintiffs Have Antitrust Standing

a. Applicable Law

In addition to a comprehensive attack on Plaintiffs' allegations of an antitrust violation, Defendants also contest whether Plaintiffs have standing to challenge any such violation. To confer antitrust standing, an alleged injury must be "of the type the antitrust laws were intended to prevent and [an injury] that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. A plaintiff must also allege that it is an "efficient enforcer" of the antitrust laws. *Ross v. Bank of Am., N.A. (USA), 524 F.3d 217, 222 n.1 (2d Cir. 2008)*. Courts determine "efficient enforcer" standing by primarily considering the following factors:

> [i] the directness or indirectness of the asserted injury; [ii] the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; [iii] the speculativeness of the alleged injury; and [iv] the difficulty of identifying damages and apportioning them among direct and indirect victims so as **[**95]** to avoid duplicative recoveries.

Gatt Commc'ns, Inc. v. PMC Assocs., LLC, 711 F.3d 68, 78 (2d Cir. 2013) (internal citation omitted). "The extent to which these factors apply when plaintiffs sue for injunctive relief depends on the circumstances of the case." *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 443 (2d Cir. 2005)*. "Similarly, the weight to be given the various factors will necessarily vary with the circumstances of particular cases." *Id.*

As to the third factor, speculativeness, a plaintiff need not "account precisely for the likely effects of" competition that would have occurred but for the defendant's wrongful conduct as long as there is a "fair assumption" that "those effects can be sufficiently estimated and measured[.]" *In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 689 (2d Cir. 2009)*; *see also* *J. Truett Payne Co., Inc., v. Chrysler Motors Corp., 451 U.S. 557, 566-67, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981)* (describing a "willingness to accept a degree of uncertainty in ... ascertaining business damages").

b. Discussion

Plaintiffs argue that Defendants' alleged boycott of AQS, SL-x, and Data Explorers deprived them "of more efficient, competitive, and transparent trading options" that would have increased price transparency and competition. (Pl. Opp. 41-42). Plaintiffs rely in particular on three allegations in the Amended Complaint, to the effect that the lack of a central marketplace for stock loan transactions (i) creates bottlenecks, (ii) wastes resources, and (iii) causes volatile, **[**96]** opaque, and artificially inflated prices. (AC ¶ 118). Defendants allegedly preserved this "inefficient, antiquated OTC structure," which conceals information about pricing and availability and leads to "high search costs and inefficient pricing," by blocking the development of "a fully electronic and transparent trading environment." (*Id.* at ¶¶ 324-26, 328). Defendants thereby maintained themselves as middlemen and stopped Plaintiffs from trading directly, making negotiations "cumbersome and difficult to do," and "reduc[ing] the volume of trades that would otherwise occur[.]" (*Id.* at ¶¶ 327, 329-30).

[*331] According to Plaintiffs, these harms could have been avoided through centralized "electronic trading" for stock loan transactions. (AC ¶¶ 117, 119). More specifically, AQS and Data Explorers would have provided price transparency to the stock loan market (*id.* at ¶¶ 146, 255), and SL-x would have made more lender stocks visible to potential borrowers (*id.* at ¶ 176). If "Defendants had acted unilaterally," they would have taken "the pro-competitive path to central clearing[,]" which in turn would have enhanced borrower choice in selecting brokers, increased competition, and lowered transaction **[**97]** costs. (*Id.* at ¶¶ 302, 344-45). The likely effect of centralized electronic trading in the OTC stock loan market — and thus the injury Defendants caused by blocking its development — could reasonably be expected to surpass that of electronic trading in futures exchange markets, which has been researched and quantified. (*Id.* at ¶¶ 334-35).

Defendants do not challenge that the injury alleged is "of the type the antitrust laws were intended to prevent[.]" Brunswick Corp., 429 U.S. at 489. Nor do they contest that Plaintiffs have satisfied three of the four factors to plead "efficient enforcer" standing. Instead, Defendants argue the remaining factor — the speculativeness of the alleged injury — disfavors standing for three reasons.

First, Defendants argue that the alleged injury is "base[d]" on the loss of an all-to-all trading platform, but Data Explorers and SL-x had no plans to offer such a trading platform in the United States. (Def. Br. 42-43; *see* AC ¶¶ 179, 193). Defendants describe Data Explorers as "a pricing service," and SL-x as "a non-operational platform that lacked central clearing in the United States and did not plan to offer anonymous trading." (Def. Reply 20).

Plaintiffs counter that Data Explorers and **[**98]** SL-x would have "increased efficiency and price competition and transparency in the market in different ways from AQS." (Pl. Opp. 43). Plaintiffs point to the Amended Complaint's allegations that Data Explorers offered "performance" data and other products to enhance borrowers' and lenders' insight into whether their terms were consistent with comparable market trades (*id.* at ¶ 188), and that it would have reduced pricing opacity (*id.* at ¶ 193). As for SL-x, the Amended Complaint alleges that it would have alleviated the need "to contact the Prime Broker Defendants by telephone or instant messages in order to get a quote" (*id.* at ¶ 173); provided "real-time" data about pricing and quantity, potentially "integrat[ing] data and analytics from other market sources" (*id.* at ¶¶ 174-75, 177); increased the visibility of lenders' stocks to potential borrowers (*id.* at ¶ 176); permitted central clearing for certain European transactions (*id.* at ¶ 178); enabled anonymous trading by, and provided automated matching for, broker-dealers and agent lenders while also making possible "simultaneous one-to-one and one-to-many negotiations" (*id.* at ¶¶ 179-80); and was "poised to clear U.S. stock loan **[**99]** trades" and would have done so but for Defendants' wrongful conduct (Pl Opp. 29; *see* AC ¶¶ 233-35). According to the Amended Complaint, SL-x would have afforded broker-dealers $8 billion in capital savings benefits in addition to reduced operational and administrative costs. (AC ¶ 181).

Second, Defendants argue that AQS lacked the ability to enable all-to-all trading due to rules requiring broker-dealer intermediaries. (Def. Br. 42-43). Plaintiffs counter that AQS accounted for this limitation by enabling all-to-all trading using clearing agents. (Pl. Opp. 43; *see* AC ¶ 154 n.36). Further, Plaintiffs contend that the fact that many buy-side parties embraced **[*332]** AQS shows that AQS would have benefitted investors, and AQS's own quantitative analysis shows the same. (Pl. Opp. 43; *see* AC ¶¶ 160, 162-63, 168-69). Specifically, AQS would have reduced lending risks (AC ¶ 158), provided useful centralization (*id.* at ¶ 159), promised direct execution of transactions via clearing brokers (*id.* at ¶ 161), and afforded "daily price discovery and transparency" (*id.* at ¶ 164). Defendants respond that the Amended Complaint fails to allege that Defendants blocked the more than 60 other brokerage firms from **[**100]** acting as enabling clearing-agent intermediaries. (Def. Br. 42-43; Def. Reply 20; *see* AC ¶ 154 n.36).

Third, Defendants theorize that AQS, SL-x, and Data Explorers were the direct victims of the alleged conspiracy and thus the proper plaintiffs to bring this claim. (Def. Br. 45). Plaintiffs counter that those entities' decisions not to sue have no bearing, and in any event, AQS has since filed a related action. (Pl. Opp. 44). Plaintiffs maintain that they have antitrust standing as both the "direct purchasers" and the "consumers" of the financial product at issue, and that their injuries were "logical, foreseeable, and [the] intentional object of Defendants' conspiracy." (*Id.* at 41).

Defendants' arguments are thought-provoking, but insufficient to merit dismissal. To start, Defendants challenge merely one of the four factors to plead "efficient enforcer" standing. The efficient enforcer inquiry is a general balancing test in which the importance assigned to each factor "will necessarily vary with the circumstances of particular cases." Gatt, 711 F.3d at 78. Thus, even if the injury alleged veers closer to speculative than prudence would advise, it would not eliminate Plaintiffs' standing. Again for the sake of completeness, **[**101]** the Court has also assessed the parties' arguments on speculativeness and has concluded that Plaintiffs' position is the stronger. The circumstances of this case are distinct from those in In re IRS, where the court rejected antitrust standing because it was "'entirely uncertain' that, absent the scheme, the necessary infrastructural preconditions for [the alleged lost benefit] ... would have developed." In re IRS, 261 F. Supp. 3d at 494 (quoting Gatt, 711 F.3d at 79). Here, Plaintiffs have plausibly alleged that the new market entrants were met with market demand, and would have provided benefits, including increased transparency and efficiency leading to lower prices, had the conspiracy not occurred.

4. Plaintiffs' Claims Are Not Time-Barred

a. Applicable Law

Defendants also mount a challenge to the timeliness of Plaintiffs' claims. Claims under *Section 1* of the Sherman Act are subject to a four-year statute of limitations that begins to run "when a defendant commits an act that injures a plaintiff's business." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*; *see* *15 U.S.C. § 15b*. "Thus, if a plaintiff feels the adverse impact of an antitrust conspiracy on a particular date, a cause of action immediately accrues to [the plaintiff] to recover all damages incurred by that date and all provable damages that **[**102]** will flow in the future from the acts of the conspirators on that date." *Zenith Radio Corp., 401 U.S. at 339*.[14] If the defendant **[*333]** engages in a continuing violation, each new overt act that is part of the violation restarts the period of limitations, but does not permit the plaintiff to recover for injuries caused by acts that occurred before that limitations period. *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* (internal citation omitted). Claims for unjust enrichment under New York law are subject to a six-year period of limitations where the plaintiff seeks an equitable remedy, and a three-year period of limitations where the plaintiff seeks monetary damages. *Matana v. Merkin, 957 F. Supp. 2d 473, 494 (S.D.N.Y. 2013)*.

The statute of limitations may be tolled by a defendant's fraudulent concealment of its conduct. "[C]lassic *§ 1* conduct [is] subject to *Rule 8(a)* pleading standards." *Hinds Cty., Miss. v. Wachovia Bank N.A., 700 F. Supp. 2d 378, 392 (S.D.N.Y. 2010)*. However, to plead fraudulent conduct, a plaintiff must allege each of the following elements with the particularity required by *Rule 9(b)*: "[i] that the defendant concealed from him the existence of his cause of action, [ii] that he remained in ignorance of that cause of action until some point within [the limitations periods], and [iii] that his continuing ignorance was not attributable to a lack of diligence on his part." *State of N.Y. v. Hendrickson Bros., 840 F.2d 1065, 1083 (2d Cir. 1988)*; *see* ***[**103]*** *also* *Butala v. Agashiwala, 916 F. Supp. 314, 319 (S.D.N.Y. 1996)* (collecting cases and confirming that to plead tolling by fraudulent concealment, each element — concealment, ignorance, and diligence — must satisfy *Rule 9(b)*'s heightened pleading standard).

b. Discussion

Plaintiffs filed their claims against the defendants named in the initial Complaint on August 16, 2017 (Dkt. #1), and against the additional defendants named in the Amended Complaint on November 17, 2017, alleging a continuing antitrust violation (Dkt. #73; AC ¶ 387). Accordingly, as Defendants' fourth line of attack, they contend that Plaintiffs' antitrust claim is time-barred to the extent it seeks damages for conduct committed before August 16, 2013, which time period would include the aspects of Plaintiffs' claim that are based on the alleged boycott of Data Explorers and the bulk of Plaintiffs' antitrust claim related to SL-x. (Def. Br. 46 (citing AC ¶¶ 254-65, 219-32)). Defendants also argue that Plaintiffs' unjust enrichment claim is time-barred for conduct prior to August 16, 2014, because, as Plaintiffs seek monetary damages, the three-year limitations period applies. (Def. Br. 46; AC ¶ 397).

i. Plaintiffs Adequately Allege Concealment

"[T]he plaintiff may prove the concealment **[**104]** element [of tolling] by showing either that the defendant took affirmative steps to prevent the plaintiff's discovery of his claim or injury or that the wrong itself was of such a nature as to be self-concealing." *Hendrickson Bros., 840 F.2d at 1083*. Examples of inherently self-concealing frauds

---

[14] The parties dispute whether a claim accrues when "the defendant commits an act that injures the plaintiff" (Def. Br. 45), or "when *the injury occurs*" (Pl. Opp. 50). Despite Defendants' apparent attempt to capitalize on the ambiguity of the phrase "commits an act that injures the plaintiff" (Def. Br. 45), the law is clear that the claim accrues at the time of injury. *See* *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338-39, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*. (*See also* Def. Reply 22 (acknowledging that a claim accrues "[a]s soon as a plaintiff suffers *any* injury from an allegedly wrongful act")).

include passing a fake vase off as a real antique, and a conspiracy that "must remain concealed from the victim of the" collusion in order "to endure." *Id. at 1084*.

Plaintiffs argue both that the alleged conspiracy was inherently self-concealing and that Defendants took affirmative steps to conceal it. (Pl. Opp. 45-46). At a minimum, the Court agrees that the **[*334]** Amended Complaint adequately pleads inherent self-concealment because the alleged conspiracy required numerous participants, was designed to endure, and depended on concealment for its success. *Cf. Hendrickson Bros., 840 F.2d at 1083-84* (finding that a "bid-rigging conspiracy" was inherently self-concealing where it had at least six members and discovery "would have defeated the enterprise").

Defendants retort that a finding of inherent self-concealment would conflict with the Amended Complaint's allegation that they "openly threatened industry participants." (Def. Br. 47). Not so. That Defendants made "open[] threat[s]" **[**105]** does not necessarily mean they made *public* threats. The Amended Complaint alleges that Defendants communicated threats directly to individual executives at hedge funds, and that these were threats to withhold bespoke services, such as official and unofficial assistance to former employees of the Defendants, the sharing of "proprietary research," and special access to initial public offerings. (AC ¶¶ 191, 213, 218). If any inferences are to be drawn from the nature of these services, the Court infers that such services were likely provided quietly, in the context of personal relationships, and that threats to eliminate them would have been similarly personalized and discrete. Accordingly, the threats do not undermine a finding that the conspiracy was inherently self-concealing.

Defendants next assert, incorrectly, that the conspiracy alleged here cannot be inherently self-concealing because it "is essentially the same as" that alleged in *In re IRS*. (Def. Reply 23). In point of fact, the court in *In re IRS* considered the issue of equitable tolling solely in relation to a set of allegations that "overwhelmingly" centered on a trading platform that the defendants stifled after taking over **[**106]** its majority ownership. *In re IRS, 261 F. Supp. 3d at 447-49, 487-88*. The court reasoned that those allegations did not qualify as inherently self-concealing because both the takeover and the platform's subsequent failure to evolve "occurred in plain sight and in contrast to the market's expectations." *Id. at 488*.[15] This case is distinguishable because, unlike a known majority owner acting in full public view to starve the evolution of an innovative platform under its direct governance and control, Defendants here allegedly used boycotts and threats to starve new market participants of data and liquidity without exercising governance ownership or wielding any publically visible control over those entities. The *In re IRS* court expressly distinguished circumstances like those in the present action from its own reasoning about concealment, recognizing that "a group boycott of exchange trading, like a cover price fixing scheme, could be of [a self-concealing] nature, where the perpetrators' collective venture must remain concealed to be successful." *Id. at 488* (internal citation and quotation marks omitted).

The Court's finding that Plaintiffs have alleged an inherently self-concealing conspiracy discharges Plaintiffs' burden to plead concealment. **[**107]** Still again, for the sake of completeness, the Court also considers whether the Amended Complaint pleads affirmative acts of concealment. Plaintiffs maintain that Defendants took affirmative steps to conceal the conspiracy by (i) conducting **[*335]** secret meetings, (ii) using code words, (iii) misrepresenting their support for both EquiLend and central clearing, and (iv) using threats to silence victims and witnesses. (Pl. Opp. 45-46). Plaintiffs rely on the Amended Complaint's allegations that Defendants conducted the conspiracy through "private meetings of the EquiLend board," using the code name "Project Gateway," and that Defendants misrepresented EquiLend's purpose as "optimiz[ing] efficiency in the securities finance industry" when its true purpose was to prevent such efficiency. (AC ¶¶ 374, 378). The Amended Complaint also alleges that Defendants made encouraging statements to SL-x executives about the platform and about central clearing more broadly,[16] which statements misrepresented their true lack of enthusiasm as shown by the fact that, after several

---

[15] The facts alleged in *In re IRS* as a whole were far broader, and included boycotts of third-party platforms over which the defendants did not exercise direct control. *In re IRS, 261 F. Supp. 3d at 452-59*. However, the majority of those other allegations occurred within the limitations period, and the court did not consider whether they qualified as an inherently self-concealing conspiracy to trigger equitable tolling. *Id. at 487-90*.

meetings with SL-x executives, Defendants allegedly "went cold," refused to engage further, and "reported that they were no longer willing **[**108]** to be first movers on SL-x." (AC ¶¶ 237-38). Finally, the Amended Complaint alleges that Defendants threatened to terminate certain services if their hedge fund clients decided to trade on AQS or on SL-x. (*Id.* at ¶¶ 213, 237, 243). For instance, the Amended Complaint alleges that a Goldman Sachs representative threatened influential agent lender State Street in an unsuccessful attempt to stop it from sharing data with Data Explorers (*id.* at ¶ 219), and that the quantitative hedge fund Renaissance Technologies "opted not to participate in AQS" after facing threats from each Defendant (*id.* at ¶ 215).

In Defendants' view, the Amended Complaint's pleadings of secret meetings and communications are too "general and conclusory," especially because Defendants' participation in and support of EquiLend was not concealed from the market. (Def. Br. 48). Defendants also argue that the Amended Complaint fails the *Rule 9(b)* requirement to plead with particularity that any alleged misrepresentations by Defendants were "intentionally false when made." (*Id.* at 48-49). On this point, the Court agrees. While the Amended Complaint does allege that Wipf and Conley met over private dinners in New York **[**109]** **[*336]** City (AC ¶¶ 21, 294); that Wipf informed his team of the planned conspiracy over an internal (albeit routine) Morgan Stanley call (*id.* at ¶¶ 22, 295); and that Morgan Stanley and Goldman Sachs persuaded the remaining Defendants to join the conspiracy during meetings at industry conferences and of the EquiLend Board (*id.* at ¶ 297), alleging that Defendants conspired during private meetings, without more, is insufficient to plead affirmative acts of concealment. *Compare* *Precision Assocs., Inc. v. Panalpina World Transp. (Holding) Ltd., No. 08 Civ. 42 (JG) (VVP), 2011 U.S. Dist. LEXIS 51330, 2011 WL 7053807, at *50 (E.D.N.Y. Jan. 4, 2011)* (allegation that the defendants "formulated the conspiracy during secret meetings," without alleging efforts to avoid detection, such as "pretextual press announcements," did not adequately plead affirmative acts of concealment), *with* *Hendrickson Bros., 840 F.2d at 1084* (finding affirmative acts of concealment where defendants allegedly burned and shredded documents to avoid their discovery).

As to pleading intentional misrepresentations, the Amended Complaint alleges that Defendants described EquiLend's purpose as promoting the broad goal of efficiency, and made supportive statements about both central clearing in general and Plaintiffs' products in particular before turning cold. (*See* AC ¶¶ 237, 377-80). Even taken in the light most favorable to Plaintiffs, **[**110]** the allegation that Defendants' initial enthusiasm dissipated does not support a reasonable inference that the enthusiastic statements were knowingly false when made. Nor do any facts alleged in the Amended Complaint support an inference that Defendants' threats against their hedge fund clients were made in furtherance of concealment, rather than merely to stop the clients from using Plaintiffs' products. The Amended Complaint also does not support Plaintiffs' arguments that Defendants used threats to silence victims and witnesses. The word "silence" appears once in the Amended Complaint, in a conclusory and unsupported assertion that Defendants abused their market power "to silence, punish, and exclude those who dared to cross them[.]" (*Id.* at ¶ 382). What the Amended Complaint does allege is that Defendants made threats "privately and in confidence"

---

[16] Plaintiffs specifically rely on the following alleged statements: On April 8, 2008, the Managing Director and General Manager of DTCC's Fixed Income Clearance and Settlement Group, Thomas Costa, told AQS executives that "this sounds great, but who's going to start your car in the morning?" (AC ¶ 171); in and around 2009, "Defendants conducted several meetings with AQS executives, initially expressing (or feigning) interest in the product" (*id.* at ¶ 209); on February 26, 2013, Credit Suisse's European Prime Brokerage Desk Head, Karl Bishti, told SL-x executives that "the product's functionality included 'all the bells and whistles' he would expect, that the platform lacked nothing that he could identify, and that he saw 'no shortcomings'" (*id.* at ¶ 230); on March 19, 2013, Deutsche Bank's Head of Supply Trading, Kevin Soobadoo, told SL-x executives that "the platform was 'brilliant' and 'impressive' and was the 'most state-of-the-art piece of kit to hit the securities lending space" (AC ¶ 230); on February 28, 2013, executives from Nomura called the SL-x platform "fantastic" (*id.*); on October 17, 2013, executives from Société Générale called the SL-x platform "really an awesome product" (*id.*); on September 6, 2013, UBS executives Casey Whymark and Laurent Issner "said the platform was 'very cool and we are impressed'" (*id.*); between November 2012 and May 2013, representatives from Defendant J.P. Morgan had several meetings with SL-x executives and "praised the SL-x product" (*id.* at ¶ 238); in October, 2014, a Morgan Stanley press release announced that "Morgan Stanley is supportive of CCP [central clearing] solutions" (*id.* at ¶ 380)(a)); in an October, 2016 interview, Thomas Wipf described the growth of "Morgan Stanley's central clearing on Eurex" (*id.* at ¶ 380(b)); and on August 1, 2016, EquiLend CEO, Brian Lamb, stated that "[m]omentum has been building in the past two years in support of CCPs [central clearing]" (*id.* at ¶ 380(c)).

to stop market participants from using and sharing data with the victim platforms. (*Id.* at ¶¶ 18, 191, 213, 215, 237, 243). These allegations do not support an inference that threats were made to silence anyone.

However, drawing all reasonable inferences in favor of Plaintiffs at this stage of litigation leads the Court to conclude that **[**111]** the phrase "Project Gateway" may have been designed as a code name rather than as mere shorthand. For this reason, the Amended Complaint plausibly alleges at least one affirmative act of concealment. When combined with the inherently self-concealing nature of the alleged conspiracy, the Amended Complaint adequately pleads concealment for tolling purposes.

ii. Plaintiffs Adequately Allege Ignorance

Plaintiffs argue that they had no prior knowledge of the collusion, which was brought to light only by counsel's recent investigation revealing "critical, non-public facts." (Pl. Opp. 47). That other industry participants and market regulators did not catch wind of the conspiracy shows, in Plaintiffs' view, that Plaintiffs could not have acquired knowledge of it through the exercise of reasonable diligence. (*Id.* at 47-48). The Court agrees.

Defendants argue that Plaintiffs were put on inquiry notice by a 2009 article in an industry magazine that called EquiLend a "cartel." (AC ¶ 125 & n.28; Def. Br. 49). But a single instance of unverified media speculation, mentioned in passing **[*337]** without any specifics, is not enough to put Plaintiffs on inquiry notice. *See Ala. Elec. Pension Fund v. Bank of America Corp., 175 F. Supp. 3d 44, 67 (S.D.N.Y. 2016)* ("a single article raising suspicions about the **[**112]** rate-setting process [at issue] is not enough to establish, on a motion to dismiss, that Plaintiffs failed to exercise reasonable diligence"); *Merced Irrigation Dist. v. Barclays Bank PLC, 165 F. Supp. 3d 122, 136 (S.D.N.Y. 2016)* (concluding that a "single, speculative" article did not put plaintiffs on inquiry notice). Defendants also contend that Plaintiffs had notice based on the Amended Complaint's assertion that a conspiracy is the only good explanation for why the stock loan market remains opaque. (AC ¶ 5; Def. Br. 49). However, the Court agrees with Plaintiffs that the alleged substantial investment support for the victim platforms shows that, at the least, it was not obvious that a conspiracy was in the works to destroy them. (*See* Pl. Opp. 47-48). Accordingly, the Amended Complaint adequately pleads ignorance for purposes of tolling.

iii. Plaintiffs Adequately Allege Diligence

"With respect to the third element, a 'plaintiff will prove reasonable diligence either by showing that: [i] the circumstances were such that a reasonable person would not have thought to investigate, or [ii] the plaintiff's attempted investigation was thwarted.'" *In re Commodity Exch., Inc., 213 F. Supp. 3d at 676* (quoting *In re Publ'n Paper Antitrust Litig., No. 3:04-MD-1631 (SRU), 2005 U.S. Dist. LEXIS 19896, 2005 WL 2175139, at *5 (D. Conn. Sept. 7, 2005))*. The Amended Complaint alleges that Plaintiffs exercised diligence by **[**113]** "regularly monitor[ing] their investments" and "regularly monitor[ing] new[s] reports concerning the financial industry and the stock lending market." (AC ¶¶ 385-86).

Defendants contend that these allegations are merely conclusory and therefore fail the *Rule 9(b)* pleading standard. (Def. Br. 50). *See also Butala, 916 F. Supp. at 319* (applying the *Rule 9(b)* standard to pleadings of tolling by fraudulent concealment). Plaintiffs argue that the allegations are sufficient because, in monitoring their investments and market news, they received no indication of the concealed conspiracy, which was only revealed when Plaintiffs' counsel conducted a diligent investigation that formed the basis of the Amended Complaint. (Pl. Opp. 48-49).

Plaintiffs have shown reasonable diligence under the first prong for purposes of defeating a motion to dismiss because, drawing all inferences in their favor, "a reasonable person would not have thought to investigate" above and beyond the standard activities of investment and news monitoring that Plaintiffs engaged in. At this stage of the litigation, requiring more from Plaintiffs would be "premature." *BPP Illinois, LLC v. Royal Bank of Scot. Grp. PLC, 603 F. App'x 57, 59 (2d Cir. 2015)* (summary order). The statutes of limitations on Plaintiffs' claims are tolled, making the claims timely. **[**114]**

5. Plaintiffs' Unjust Enrichment Claim Stands

Defendants argue that Plaintiffs' unjust enrichment claim should be dismissed because it is "entirely dependent on their fatally flawed antitrust claim." (Def. Br. 50). Since the Court has concluded Plaintiffs state a viable antitrust claim, their unjust enrichment claim stands as well.

C. EquiLend's Supplemental Motion to Dismiss Is Denied

EquiLend's supplemental motion to dismiss advances four main arguments: (i) its conduct was consistent with rational business strategy; (ii) the alleged use of its **[*338]** board meetings to plan the conspiracy is insufficient to support a claim against it; (iii) the allegations against it do not pass muster under a rule of reason analysis; and (iv) this Court lacks personal jurisdiction over EquiLend Europe. The Court addresses, and rejects, each of these arguments in turn.

To start, EquiLend contends that its purchase of AQS, its refusal to merge with SL-x, its subsequent purchase and shelving of SL-x's intellectual property, and its creation of the DataLend product were all "consistent with rational business strategy," and therefore cannot serve as evidence of its joining a conspiracy. (EquiLend Br. 4-8). Of course, **[**115]** the fact that conduct may be consistent with an innocuous explanation does not permit the Court, on a motion to dismiss, to ignore other inculpatory inferences that may reasonably be drawn from the same allegations when considered in light of the complaint as a whole. To be sure, pleading a *Section 1* claim requires "allegations plausibly suggesting (not merely consistent with) agreement[.]" *Twombly, 550 U.S. at 557*. That is why pleading parallel conduct that is consistent with unilateral action, unaccompanied by other circumstantial evidence of a conspiracy in the form of "plus factors," is insufficient to state a *Section 1* claim. *Id.* However, the Amended Complaint does not rest on bare allegations that EquiLend engaged in parallel conduct; Plaintiffs also allege circumstantial evidence of conspiracy, in that EquiLend acted against its own economic self-interest under direction from the Prime Broker Defendants. For example, the Amended Complaint alleges that: "EquiLend representatives, including CEO Brian Lamb, had been instructed not to 'break rank' and not to take independent actions" (AC ¶ 16); the Prime Broker Defendants "instruct[ed] EquiLend's then-CEO, Brian Lamb, to advance an agenda through EquiLend to halt the widespread **[**116]** dissemination of pricing data to the market at large" (*id.* at ¶ 124); EquiLend's refusal to allow itself "to be sold at any price," and its underuse of the assets purchased from AQS and SL-x, were counter-profit behaviors (*id.* at ¶¶ 314-15); and EquiLend's joint venture status was a sham (*id.* at ¶¶ 313, 319). That *some* of EquiLend's alleged conduct may be consistent with rational business strategy does not negate the presence of other "allegations plausibly suggesting ... agreement." *Twombly, 550 U.S. at 557*.

In an apparent attempt to bolster its consistency arguments, EquiLend ignores the allegations that it acted against economic self-interest and at the direction of the Prime Broker Defendants, instead making a series of assertions about what is missing from the Amended Complaint. EquiLend asserts, for instance, that the Amended Complaint "alleges no facts" connecting EquiLend's purchase of AQS to a boycott conspiracy. (EquiLend Br. 5). It follows up by noting that the Amended Complaint fails to allege that, following the purchase of AQS, EquiLend stopped operating the AQS platform. (*Id.*). Instead, the Amended Complaint merely alleges that, following the purchase, EquiLend failed to develop AQS assets further **[**117]** or to license those assets to third parties. (*See* AC ¶ 315). EquiLend acknowledges here the allegation that it purchased AQS at a rock-bottom price of $5 million, which price was a direct result of the harm caused by the boycott. (*Id.* at ¶ 301). But, it reasons, the mere fact that EquiLend may have benefited from the boycott, without more, is insufficient to infer its participation. EquiLend argues as well that there is nothing suspicious about its refusal to merge with SL-x, its purchase of, and subsequent failure to use, SL-x's intellectual property, or its launch of the DataLend product. (EquiLend **[*339]** Br. 6-8). EquiLend advances the innocuous inference that it purchased and shelved SL-x intellectual property in order to protect itself from patent trolls. (*Id.* at 7). Finally, it asserts that the Amended Complaint fails to plead that the launch of DataLend to complete against Data Explorers "is more consistent with conspiracy than it is with the 'wide swath of rational and competitive business strategy' that cannot support an inference of conspiracy." (*Id.* (quoting *Twombly, 550 U.S. at 554*)).

Unfortunately for EquiLend, the isolated facts it presents regarding its purchase of AQS's and SL-x's intellectual property and **[**118]** its launch of DataLend are not the only allegations connecting it to the boycott and the conspiracy more generally. As detailed above, the Amended Complaint alleges that EquiLend acted against self-interest, and at the direction of the Prime Broker Defendants. Those allegations support a reasonable inference that EquiLend acted on behalf of the conspiracy, not as an independent economic decisionmaker.

Next, EquiLend argues that the allegation that the conspiracy was planned at its board meetings is insufficient to implicate it in the conspiracy. (EquiLend Br. 3-4). It relies here on the reasoning of the court in *In re IRS*, which dismissed a complaint against an organization that EquiLend contends was analogous. (*Id.* at 4). The analogy is inapt. In *In re IRS*, the relevant allegations were threefold: the alleged conspirators had used the organization as a forum for conspiratorial discussions; the organization had failed to launch the product that the plaintiffs felt would have been attractive; and the organization had priced its existing products in a manner that the plaintiffs claimed was designed to be inaccessible to certain customers. *In re IRS, 261 F. Supp. 3d at 486-87*. Here, in contrast, the Amended Complaint alleges not **[**119]** merely that Defendants used EquiLend meetings as a forum to plot the conspiracy, but also that EquiLend engaged in active conduct in furtherance of the conspiracy, namely purchasing SL-x's intellectual property to shelve its enabling technology and launching DataLend to underprice and block the development of Data Explorers. These allegations of active conduct in furtherance of the conspiracy distinguish this case from *In re IRS*.

For similar reasons, EquiLend's contention that the Amended Complaint fails to plead sufficient facts to support a rule of reason violation also fails. EquiLend argues that a rule of reason analysis would require "allegations of a geographic market, a product market, market power in that market, and anticompetitive effects." (EquiLend Br. 11). But because the Amended Complaint pleads sufficient facts to support an inference that EquiLend was a member of the conspiracy, the allegations concerning the Prime Broker Defendants' market power in the U.S. stock lending market, and anticompetitive conduct including boycotts, also implicate EquiLend.

Finally, EquiLend argues that there is no specific personal jurisdiction over EquiLend Europe, which is incorporated in **[**120]** the United Kingdom and Wales and headquartered in London. (EquiLend Br. 11). Plaintiffs respond that the Amended Complaint attributes the EquiLend Board members' alleged "general agreement" not to allow "industry advances" outside of EquiLend to EquiLend Europe, as well as to the other EquiLend entities. (Pl. EquiLend Opp. 12). Plaintiffs point out that some of the alleged statements evidencing involvement in the conspiracy were made by individuals who sat on EquiLend Europe's board, and not on the board of the U.S. EquiLend entity. (*Id.*; *see* AC ¶¶ 239-46). Plaintiffs argue that, **[*340]** drawing all inferences in their favor, EquiLend Europe was part of the conspiracy. The Court agrees with Plaintiffs that it has jurisdiction over EquiLend Europe because its co-conspirators' "overt acts in furtherance of the conspiracy" may be imputed to it for purposes of exercising jurisdiction. *Charles Schwab Corp. v. Bank of Am. Corp., 883 F.3d 68, 87 (2d Cir. 2018)*. Accordingly, EquiLend's supplemental motion to dismiss is denied in its entirety.

CONCLUSION

For the reasons set forth above, Defendants' motions to dismiss are DENIED. Defendants are hereby directed to file an Answer to the Amended Complaint by **October 26, 2018**. The Parties are directed to file a proposed case management **[**121]** plan by **November 9, 2018**.

The Clerk of Court is directed to terminate the motions at Docket Entries 106 and 109.

SO ORDERED.

Opinion

[*129] **MEMORANDUM OPINION**

I. Introduction

To show a film, a movie theater must obtain a license from the film's distributor. The case before the Court involves the competitive market between theaters for exclusive licenses to show specialty films. Plaintiffs—2301 M Cinema d/b/a West End Cinema ("West End Cinema"), the Avalon Theatre Project, Inc. ("the Avalon"), **[**2]** the Denver Film Society, and the Cinema Detroit (collectively, "plaintiffs")—bring this action against Silver Cinemas Acquisition Co. d/b/a Landmark Theatres and its parent corporation 2929 Entertainment, LP (collectively, "Landmark"). Plaintiffs allege that Landmark violated federal ***antitrust law*** by using its national market power to coerce film distributors into granting Landmark exclusive licenses, preventing plaintiffs and other independent theaters from showing specialty films. Plaintiffs' four-count complaint charges Landmark with: (1) circuit dealing in violation of *Section 1 of the Sherman Act*; (2) using its monopoly power in violation of *Section 2 of the Sherman Act*; (3) attempting to use its monopoly power in violation of *Section 2 of the Sherman Act*; and (4) interfering with plaintiffs' business relations.

Pending before the Court is Landmark's motion to dismiss plaintiffs' complaint. *See* Defs.' Mot., ECF No. 16. After careful consideration of the motion, the response, the reply thereto, and the applicable law, Landmark's motion to dismiss is **GRANTED IN PART** and **DENIED IN PART**.

II. Background

Plaintiffs are four independent, community theaters that primarily show specialty films. Compl., ECF No. 1 ¶¶ **[**3]** 14-17. Specialty films include "independent films, art films, foreign films, and documentaries." *Id.* ¶ 24. Unlike mainstream commercial films, specialty films are not intended to appeal to a broad audience and are therefore released less widely than commercial films. *Id.* The first plaintiff, West End Cinema, operated in the District of Columbia from 2010 until 2015. *Id.* ¶ 14. In 2015, West End Cinema was "forced" out of business, allegedly by Landmark's anticompetitive licensing practices. *Id.* Landmark leased the West End Cinema's space and has since opened a Landmark theater **[*130]** in its place. *Id.* The Avalon is another independent theater located in the District of Columbia. *Id.* ¶ 15. The Denver Film Society is a nonprofit organization located in Denver, Colorado that provides specialty film programming via "year-round screening, film festivals, and other special events." *Id.* ¶ 16. It operates the Sie FilmCenter, a specialty film theater. *Id.* Finally, Cinema Detroit is a non-profit specialty film theater located in Detroit, Michigan. *Id.* ¶ 17.

Defendant Landmark is a Delaware corporation and subsidiary of 2929 Entertainment, LP. *Id.* ¶ 18. It operates fifty-one specialty film theaters in **[**4]** twenty-two geographic markets nationwide. *Id.* It is "the largest specialty film movie theater chain in the country" and is purportedly opening new theaters on a regular basis. *Id.*

Both plaintiffs and Landmark are "exhibitors," the industry term for movie theaters. *Id.* ¶ 21. Exhibitors must negotiate with film distributors for licenses to exhibit films at their theaters. *See id.* ¶ 22. Distributors are the entities responsible for marketing the film; they act as a "middleman" between the production studio and the exhibitor. *Id.* ¶ 5. Generally, a distributor's income for each film is tied to the revenue earned by the exhibitor during its run of the film. *See id.* ¶¶ 75-76. License agreements between distributors and exhibitors specify the terms under which the exhibitor may show a particular film. *See id.* ¶¶ 21-22, 25. In some instances, license agreements may include "clearances," or an exclusive right to show a film. *Id.* ¶ 25. In acquiescing to a clearance, a distributor agrees not to license a film to any other exhibitor, or to specific exhibitors, in the same geographic market. *Id.* Clearances are generally negotiated either for the first few weeks a film is shown, a "first-run" clearance, **[**5]** or for the entire period a film is screened by an exhibitor, a "day and date" clearance. *See id.* ¶¶ 21, 25, 28. Clearances must be negotiated on a theater-by-theater, film-by-film basis. Therefore, exhibitors may not engage in circuit-dealing, whereby "a dominant movie theater chain," known as a "circuit," "uses its market power to obtain preferential agreements, particularly clearances, from distributors for the licensing of films . . . in multiple geographic markets." *Id.* ¶ 28 (citing *United States v. Paramount Pictures, 334 U.S. 131, 154-55, 68 S. Ct. 915, 92 L. Ed. 1260 (1948))*.

Plaintiffs allege that Landmark, as the "dominant theater 'circuit' for the exhibition of specialty films in the United States," leverages its market position to obtain clearance agreements nationwide. *Id.* ¶¶ 29, 30. Rather than negotiating clearances on an individual theater-by-theater, film-by-film basis, plaintiffs assert that Landmark obtains "blanket clearances" for more than one film or theater from distributors that accede to Landmark's demands for fear of retribution and loss of Landmark's business. *Id.* ¶ 29. Plaintiffs seek an injunction, treble damages, costs and fees, and actual damages. *See id.* ¶¶ 89-90, 97-98, 102-04, 112-13.

III. Standard of Review

A motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* tests **[**6]** the legal sufficiency of a complaint. *Browning v. Clinton, 292 F.3d 235, 242, 352 U.S. App. D.C. 4 (D.C. Cir. 2002)*. A complaint must contain "a short and plain statement of the claim showing that the pleader is entitled to relief, in order to give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quotations and citations omitted).

Despite this liberal pleading standard, to survive a motion to dismiss, a complaint "must contain sufficient factual matter, accepted **[*131]** as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quotations and citations omitted). A claim is facially plausible when the facts pled in the complaint allow the court to "draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* The standard does not amount to a "probability requirement," but it does require more than a "sheer possibility that a defendant has acted unlawfully." *Id.*

"[W]hen ruling on a defendant's motion to dismiss [pursuant to *Rule 12(b)(6)*], a judge must accept as true all of the factual allegations contained in the complaint." *Atherton v. D.C. Office of the Mayor, 567 F.3d 672, 681, 386 U.S. App. D.C. 144 (D.C. Cir. 2009)* (quotations and citations omitted). In addition, the court must give the plaintiff the "benefit of all inferences that can be derived from the facts alleged." *Kowal v. MCI Commc'ns Corp., 16 F.3d 1271, 1276, 305 U.S. App. D.C. 60 (D.C. Cir. 1994)*. Even so, "[t]hreadbare **[**7]** recitals of the elements of a cause of action, supported by mere conclusory statements" are not sufficient to state a claim. *Iqbal, 556 U.S. at 678*.

"To survive a 12(b)(6) motion to dismiss a claim in an antitrust case, plaintiffs must do more than simply paraphrase the language of the antitrust laws or state in conclusory terms that the non-movant has violated those laws." *WAKA LLC v. DC Kickball, 517 F. Supp. 2d 245, 249 (D.D.C. 2007)* (citing *Dial A Car, Inc. v. Transp., Inc., 884 F. Supp. 584, 588 (D.D.C. 1995)*, *aff'd* *82 F.3d 484, 317 U.S. App. D.C. 240 (D.C. Cir. 1996))*. "[I]f [the plaintiff] claims an antitrust violation, but the facts he narrates do not at least outline or adumbrate such a violation, he will get nowhere merely by dressing them up in the language of antitrust." *Dial A Car, 884 F. Supp. at 588* (quoting *Sutliff, Inc. v. Donovan Companies, Inc., 727 F.2d 648 (7th Cir. 1984))* (internal quotation marks omitted). That said, because "the proof is largely in the hands of the alleged conspirators," dismissal procedures "should be used sparingly in complex antitrust litigation" until the plaintiff is given ample opportunity for discovery. *Poller v. Columbia Broad. Sys., 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*.

IV. Analysis

Landmark moves to dismiss the plaintiffs' complaint for failure to state a claim pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, putting forth several arguments. *See* Defs.' Mot., ECF No. 16. First, it contends that 2929 Entertainment should be dismissed, because the complaint does not allege that the parent corporation was responsible for the actions of its subsidiary. **[**8]** *Id.* at 29.[1] Second, Landmark argues that plaintiffs fail to state a plausible circuit dealing claim (Count I) because plaintiffs fail to allege: (1) that Landmark wielded its circuit power to coerce distributors; (2) concerted action or agreement; and (3) an antitrust injury. *Id.* at 13-25. Third, Landmark argues that plaintiffs fail to state a plausible monopolization or attempted monopolization claim (Counts II and III) because plaintiffs fail to allege: (1) that Landmark exercised leveraging conduct; and (2) that Landmark has monopoly power. *Id.* at 25-28. Finally, Landmark contends that plaintiffs fail to state a plausible tortious interference claim (Count IV). *Id.* at 28-29. The Court analyzes each argument in turn.

A. Defendant 2929 Entertainment, LP is Dismissed Without Prejudice

Landmark argues that its parent corporation 2929 Entertainment should be dismissed **[*132]** because the complaint does not allege that it was responsible for the actions of its subsidiaries. Defs.' Mot., ECF No. 16 at 29.

---

[1] When citing electronic filings throughout this opinion, the Court cites to the ECF page number, not the page number of the filed document.

Plaintiffs agree and reserve the right to seek leave to amend the complaint and add 2929 Entertainment as a defendant as discovery unfolds. Pls.' Opp'n, ECF No. 17 at 37. Therefore, the Court **GRANTS** Landmark's motion and dismisses without **[**9]** prejudice defendant 2929 Entertainment, LP from this action.

B. Plaintiffs Sufficiently Allege a Circuit Dealing Claim

Landmark argues that Count I must be dismissed because plaintiffs fail to state a plausible circuit dealing claim in violation of *Section 1 of the Sherman Act.* Defs.' Mot., ECF No. 16 at 13-25. First, Landmark argues that plaintiffs fail to allege that Landmark wielded its national circuit power to coerce distributors to agree to clearance agreements. *Id.* at 13-19. Landmark also argues that plaintiffs do not allege that it negotiated any unlawful blanket clearances covering more than one theater or film. *Id.* Instead, it contends that plaintiffs merely allege a series of theater-by-theater, city-by-city negotiated clearance agreements for individual films, a lawful industry practice. *Id.* at 14-18. Plaintiffs respond that they allege "six specific instances of Landmark's circuit dealing at work." Pls.' Opp'n, ECF No. 17 at 10. Moreover, plaintiffs argue that they allege that Landmark coerces and penalizes distributors, forcing them to enter into unlawful clearance agreements to avoid retribution. *Id.* at 19-21.

Alternatively, Landmark argues that plaintiffs fail to allege concerted action or agreement between Landmark and the distributors. Defs.' Mot., ECF **[**10]** No. 16 at 19-22. Instead, Landmark contends that plaintiffs' allegations merely "indicate unilateral decision-making." *Id.* at 21. Plaintiffs argue that the complaint alleges that distributors agree to provide blanket clearances for fear of retribution, even though such clearances are against the distributors' own economic interests. *See* Pls.' Opp'n, ECF No. 17 at 24-27.

Finally, Landmark argues that plaintiffs fail to allege an injury to competition and consumers. Defs.' Mot., ECF No. 16 at 22-25. Landmark contends that plaintiffs merely assert individual harm, an insufficient antitrust injury. *See id.* Plaintiffs respond that the complaint alleges injury to competition by way of decreased output and revenue for distributors and increased prices, fewer choices, and decreased quality for consumers. Pls.' Opp'n, ECF No. 17 at 29.

1. Coercive Use of National Power

Circuit dealing constitutes a *per se* violation of the Sherman Act, as "[t]he inclusion of theatres of a circuit into a single agreement gives no opportunity for other theatre owners to bid for the feature in their respective areas and . . . is therefore an unreasonable restraint of trade." *United States v. Paramount Pictures, 334 U.S. 131, 154, 68 S. Ct. 915, 92 L. Ed. 1260 (1948)*; *see* *Cobb Theatres III, LLC v. AMC Entm't Holdings, Inc., 101 F. Supp. 3d 1319, 1342 (N.D. Ga. 2015)*(citing *Paramount, 334 U.S. at 153-55*; *United States v. Griffith, 334 U.S. 100, 106-09, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)*, *disapproved on other grounds by* ***[**11]*** *Copperweld Corp. v. Indep. Tube Corp, 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))*. Circuit dealing occurs when an exhibitor "pools the purchasing power of an entire circuit to 'eliminate the possibility of bidding for films [on a] theatre by theatre [basis].'" *Cobb Theatres, 101 F. Supp. 3d at 1342* (quoting *Paramount, 334 U.S. at 154*). An exhibitor may pool its purchasing power by negotiating "agreements that cover exhibition in **[*133]** *two or more theatres* in a particular circuit . . . ." *Paramount, 334 U.S. at 154* (emphasis added). Such anticompetitive conduct "eliminate[s] the opportunity for a small competitor to obtain the choice of first runs," and "put[s] a premium on the size of the circuit." *Id.*

An exhibitor may also engage in circuit dealing by "unlawful monopoly leveraging," *Cobb Theatres, 101 F. Supp. 3d at 1342*, which occurs when an exhibitor "with a monopoly of theatres in any one town . . . . uses that strategic position to acquire exclusive privileges in a city where [the exhibitor] has competitors," *Griffith, 334 U.S. at 107*; *see* *United States v. Crescent Amusement Co., 323 U.S. 173, 181, 65 S. Ct. 254, 89 L. Ed. 160 (1944)* (finding circuit dealing when "the . . . defendants insist that a distributor give them monopoly rights in towns where they had competition or else defendants would not give the distributor any business in the closed towns where they had no competition"). Monopolistic advantage may be reflected in the agreements obtained or the favorable terms therein. *See* *Schine Chain Theatres v. United States, 334 U.S. 110, 115-16, 68 S. Ct. 947, 92 L. Ed. 1245 (1948)*, *overruled on other* ***[**12]*** *grounds by* *Copperweld Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628*.

Plaintiffs sufficiently allege that Landmark leverages its monopoly power by coercing film distributors to accept clearances agreements that favor Landmark and to deny plaintiffs' requests to show specialty films. *See, e.g.*, Compl., ECF No. 1 ¶¶ 4, 63. Rather than negotiating clearances on an individual theater-by-theater, film-by-film basis, as Landmark must, plaintiffs assert that Landmark wields its circuit power to obtain exclusive clearances against independent theaters. *See id.* ¶¶ 29, 64. First, plaintiffs allege that Landmark, as the largest specialty film exhibitor in the nation, exerts considerable influence over distributors. *See id.* ¶ 18. Landmark has fifty-one theaters in twenty-two major geographic markets nationwide. *Id.* ¶ 71. Specifically, plaintiffs allege several major markets in which Landmark occupies the majority of the specialty film exhibitor market, including St. Louis (80%), Houston (60%), Philadelphia (54%), Detroit (60%), Denver (73%), and the District of Columbia (68%). *Id.* ¶¶ 44-62. Taking such allegations in the light most favorable to plaintiffs, the Court must infer that distributors may be inclined to accede to Landmark's demands.

Next, plaintiffs **[**13]** allege that Landmark uses its considerable market power to deny smaller competitors, like plaintiffs, access to the market. *See id.* ¶ 71 ("Landmark's message to the distributors is clear: if you license a specialty film to any one of the plaintiffs when Landmark intends to exhibit that film, Landmark can and will use its national circuit power to retaliate against you by refusing to play that film or other films at various, if not all, of the 51 Landmark theaters in 22 major geographic markets throughout the country."). Despite Landmark's arguments to the contrary, plaintiffs allege that distributors must agree to Landmark's clearance demands or risk damaging their relationship with the largest specialty film exhibitor. For example, "distributors have informed plaintiffs that the *only* reason they were refusing to license a particular specialty film was because of clearances demanded by Landmark, and not because they desired to restrict the number of theaters playing the film." *Id.* ¶ 75 (emphasis added); *see* Cobb Theatres, 101 F. Supp. 3d at 1327 (denying motion to dismiss circuit dealing claim when defendant's conduct "operated as a demand . . . that distributors refuse to license certain films to the [plaintiff] or, alternatively, **[**14]** risk damaging **[*134]** their relationships with one of the nation's largest film exhibitors"). Such anticompetitive conduct may also be inferred by the distributors assent to Landmark's demands. *See id.* (denying motion to dismiss in part because "several major distributors began to honor [defendant's] demand for preferential treatment"). Here, plaintiffs allege that distributors frequently booked specialty film showings with plaintiffs and later cancelled the bookings, often at the last minute, "due to Landmark's clearance demands." Compl., ECF No. 1 ¶ 67, *see also id.* ¶ 66. Landmark's plausibly coercive conduct is also reflected in the favorable clearances and the advantageous terms that Landmark allegedly obtained from distributors across the three markets at issue. *See id.* ¶ 29 ("[D]istributors have denied access to virtually every specialty film for which Landmark has demanded a clearance . . . ."); *see also id.* ¶¶ 63-72.

Landmark contends that plaintiffs do not allege facts to suggest that Landmark actually threatened distributors. Defs.' Reply, ECF No. 18 at 12. But plaintiffs need not specifically allege *any* threats made by Landmark to state a plausible claim. *See* Griffith, 334 U.S. at 107-08 (finding that an exhibitor **[**15]** "need not be as crass" as to explicitly threaten a distributor "in order to make [its] monopoly power effective in [] competitive situations"). Indeed, reading the complaint in the light most favorable to plaintiffs, the Court may infer that the favorable agreements and reduced market access are plausibly attributed to Landmark's allegedly anticompetitive, coercive conduct. *See* Compl., ECF No. 1 ¶ 75; *see also* Cobb Theatres, 101 F. Supp. 3d at 1343 ("[An exhibitor] is guilty of circuit dealing . . . . even when the exhibitor does not expressly threaten distributors that it will withhold business of its closed or monopoly markets unless it is given preferential treatment"). That said, plaintiffs indeed allege that Landmark dropped a film at a Landmark theater as retribution against a distributor that failed to prevent plaintiff Avalon from showing the film at the same time. Compl., ECF No. 1 ¶ 70.

In sum, such alleged conduct may plausibly "eliminate the opportunity for the small competitor to obtain the choice first runs, and put a premium on the size of the circuit." Paramount, 334 U.S. at 154; *see* Griffith, 334 U.S. at 108 (holding that defendants may not use monopoly "to stifle competition by denying competitors less favorably situated access to the market"); *see also* ***[**16]*** Cobb Theatres, 101 F. Supp. 3d at 1343 (finding that plaintiffs stated a "monopoly leveraging" circuit dealing claim because the complaint "accuses AMC of using or attempting to use its circuit power and its monopoly power in a substantial number of non-competitive [closed] zones to drive high-quality theatres out of markets in which they compete with AMC," even though the complaint did not identify coercive threats, specific agreements, or specific closed markets).

Plaintiffs also allege that Landmark plausibly engaged in circuit dealing by negotiating blanket clearance agreements that unlawfully "cover exhibition in two or more theatres in a particular circuit." Paramount, 334 U.S. at 154. Such conduct allows "the exhibitor to allocate the film rental paid among theaters as it sees fit." *Id.* In *Cobb Theatres*, the district court denied defendant AMC's motion to dismiss, finding that the plaintiff had alleged an unlawful circuit dealing arrangement in part because AMC "simultaneously negotiated clearances for both of its Buckhead theatres." 101 F. Supp. 3d at 1343. So here too. Plaintiffs allege that Landmark negotiated a clearance for multiple theaters in the Denver market when it moved a film clearance from one theater **[*135]** to another, plausibly preventing plaintiff Sie **[**17]** FilmCenter from competing on a theater-by-theater basis. Compl., ECF No. 1 ¶ 65.

As such, the Court finds that plaintiffs allege sufficient facts to state a plausible circuit dealing claim. The Court is not persuaded by Landmark's arguments to the contrary, all of which rely on cases resolved with the benefit of discovery. *See* Defs.' Mot., ECF No. 16 at 17-19 (citing Orbo Theatre Corp. v. Loew's Inc., 156 F. Supp. 770 (D.D.C. 1957)(post-trial); Houser v. Fox Theatres Mgmt. Corp., 845 F.2d 1225 (3d Cir. 1988)(motion for summary judgment); Reading Int'l, Inc. v. Oaktree Capital Mgmt. LLC, No. 03 Civ. 1895(PAC), 2007 U.S. Dist. LEXIS 504, 2007 WL 39301 (S.D.N.Y. Jan. 8, 2007)(motion for summary judgment)). Paramount cites *Reading International, Inc. v. Oaktree Capital Management, LLC* as a case in which the circuit dealing claim was dismissed. Defs.' Mot., ECF No. 16 at 18. However, such reliance is inapposite, as the district court did not reach the merits of the plaintiffs' circuit dealing claim. Instead, it dismissed the claim because "plaintiffs raise the allegation of circuit dealing for the first time in their opposition papers." 317 F. Supp. 2d 301, 318 n.9 (S.D.N.Y. 2003).

Indeed, plaintiffs' allegations are not unlike those made by Landmark in its 2016 complaint charging Regal Entertainment Group ("Regal") with anticompetitive conduct and circuit dealing. *See Landmark Theatres v. Regal Entm't Grp.*, Civ. No. 16-123-CRC.[2] In opposing Regal's motion to dismiss, Landmark argued that it had **[**18]** adequately alleged a circuit dealing claim because: (1) "it alleges that Regal derives substantial power over distributors from its status as the largest exhibitor circuit in the United States"; (2) it "alleges that Regal demanded" that distributors deny Landmark access to the market and "eliminate the opportunity for the small competitor [Landmark] to obtain the choice first runs"; and (3) this demand "deprive[s] Landmark of the inputs it needs to compete with the threat that Regal could and would disadvantage distributors' films across Regal's circuit." Landmark's Opp'n, ECF No. 17 at 19-20 (Civ. No. 16-123)(citations and quotations omitted). When confronted with a similar argument that Landmark had not alleged specific facts regarding Regal's allegedly coercive demands, Landmark noted that it could not have "possibly" alleged additional facts "[w]ithout the benefit of discovery." *Id.* at 21. So here too.

2. Concerted Action

Landmark also argues that plaintiffs do not allege a viable circuit dealing claim because plaintiffs do not allege facts permitting a plausible inference of concerted action or agreement between Landmark and the distributors. Defs.' Mot., ECF No. 16 at 19-22. Instead, **[**19]** Landmark contends that plaintiffs' allegations "at best . . . indicate unilateral decision-making" in that Landmark prefers to not show the same films at the same time as plaintiffs and that distributors prefer to honor Landmark's preferences. *Id.* at 21-22.

Under Section 1 of the Sherman Antitrust Act, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." 15 U.S.C. § 1. Therefore, "[t]o state a claim based on a Section 1 violation, a plaintiff must allege that 'defendants entered into some contract, combination, conspiracy, or other concerted activity that **[*136]** unreasonably restricts trade in the relevant market.'" WAKA LLC v. DC Kickball, 517 F. Supp. 2d 245, 250 (D.D.C. 2007)(quoting Dial A Car, Inc. v. Transp., Inc., 884 F. Supp. 584, 591 (D.D.C. 1995)). To that end, "Section 1 does

---

[2] Landmark's case against Regal was settled before the district court resolved Regal's motion to dismiss. *See* Stipulation, ECF No. 19 (Civ. No. 16-123).

not prohibit unilateral or independent conduct by one organization, no matter how anticompetitive it might be." *Id.* (quotations and citations omitted). To plead concerted action, "antitrust plaintiffs may (and often must) prove conspiracies by 'circumstantial evidence and the reasonable inferences drawn from such evidence,' rather than through direct evidence." *Reading Int'l, Inc. v. Oaktree Capital Mgmt. LLC, Civ. No. 03-1895, 2007 U.S. Dist. LEXIS 504, 2007 WL 39301 at *7 (S.D.N.Y. Jan. 8, 2007)* (quoting *Petruzzi's IGA Supermarkets, Inc. v. Darling—Del. Co., 998 F.2d 1224, 1230 (3d Cir. 1993))*.

Plaintiffs allege "enough factual matter **[**20]** (taken as true) to suggest that an agreement was made." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. As previously discussed, plaintiffs allege that distributors and Landmark entered into anticompetitive clearance agreements, whereby "Landmark require[s] the distributor to *agree* that it will not license specified specialty films that the distributor would otherwise license to plaintiffs." Compl., ECF No. 1 ¶ 6 (emphasis added); *see also id.* ¶ 30 ("Distributors agree to Landmark's clearance demands because licenses with Landmark are essential to the commercial success of most of the specialty films they distribute."). Moreover, plaintiffs allege that distributors "refus[ed] to license" films to plaintiffs, *id.* ¶ 75, because they could not "break precedent" from their prior agreements with Landmark, *id.* ¶ 65. Plaintiffs place their allegations of Landmark's and the distributors' parallel conduct "in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action." *Twombly, 550 U.S. at 557*. As such, plaintiffs' allegations sufficiently "raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Id. at 556*.

Landmark argues that the plaintiffs merely allege unilateral **[**21]** action, as both Landmark and the distributors are acting independently for distinct, self-interested reasons. As such, it contends that its conduct can be explained by market forces. *See* Defs.' Mot., ECF No. 16 at 21-22. For example, Landmark argues that it prefers not to show the same films at the same times as plaintiffs. *See id.* It also argues that distributors likely prefer to show their films at a national, profitable exhibitor chain. *See id.* However, in so arguing, Landmark asks the Court to make a factual determination at this early stage of proceedings. *See id.* at 21. The Court may not do so. Indeed, at this stage, the plaintiffs "need not rule out independent action." *Oxbow Carbon & Minerals LLC v. Union Pac. R.R. Co., 81 F. Supp. 3d 1, 13 (D.D.C. 2015)*. While conspiracy allegations may fail to state a *Section 1* claim if there are "obvious alternative explanations for the facts alleged," *id.* (quotations and alterations omitted), "'it is also clear that allegations contextualizing agreement need not make any unlawful agreement more likely than independent action . . . at the motion to dismiss stage,'" *id.* (quoting *Evergreen Partnering Grp., Inc. v. Pactiv Corp., 720 F.3d 33, 47 (1st Cir. 2013))*. Without the benefit of discovery, it is not obvious that the favorable clearance agreements are caused *only* by market forces.

The Court is not persuaded by Landmark's **[**22]** reliance on *Cinema Village Cinemart, Inc. v. Regal Entertainment Group*, an unreported case from the Southern District of New York, in which the district **[*137]** court judge granted Regal's motion to dismiss, in part because the plaintiff failed to allege concerted action. Defs.' Mot., ECF No. 16 at 20-21 (discussing *Civ. No. 15-5488, 2016 U.S. Dist. LEXIS 135941, 2016 WL 5719790 (S.D.N.Y. Sept. 29, 2016))*. Unlike plaintiffs' complaint here, *none* of the plaintiff's allegations in *Cinema Village Cinemart* suggested an agreement between Regal and the distributors. *2016 U.S. Dist. LEXIS 135941, 2016 WL 5719790 at *3*. Whereas the plaintiffs in this case described in detail the various theaters and films affected by Landmark's allegedly unlawful agreements with distributors, the plaintiff in *Cinema Village Cinemart* failed to allege "what theaters or films [the clearances] concerned, or the nature of the supposed threats that induced them." *2016 U.S. Dist. LEXIS 135941, at *3*. In light of the significant differences between the two cases, the Court cannot rely on the comparison.

3. Antitrust Injury

Finally, Landmark argues that the Court must dismiss the plaintiffs' circuit dealing claim because plaintiffs fail to allege an antitrust injury. Defs.' Mot., ECF No. 16 at 22-25. Landmark argues that plaintiffs only allege that their individual theaters have been harmed, while **[**23]** ***antitrust law*** requires plaintiffs to allege that Landmark's anticompetitive conduct hurts competition and consumers. *Id.* at 22-23.

It is "clear that a plaintiff claiming federal antitrust violations must plead and prove 'more than injury casually linked to an illegal presence in the market.'" *WAKA, 517 F. Supp. 2d at 249* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. Because the antitrust laws "were enacted for the 'protection of *competition*, not *competitors*," *Brunswick, 429 U.S. at 488*, a plaintiff must allege an anticompetitive impact on the market, *id. at 488-89*. Therefore, to allege an antitrust injury, a plaintiff must plead an "[actual] injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Id. at 489*. "[A]bsent injury to competition, injury to plaintiff as a competitor will not satisfy the pleading requirement." *Mizlou Television Network, Inc. v. Nat'l Broad. Co., 603 F. Supp. 677, 684 (D.D.C. 1984)*.

Throughout the complaint, plaintiffs allege harm to competition and consumers. "[A]ctual anticompetitive effects include, but are not limited to, reduction of output, increase in price, or deterioration in quality." *Cobb Theatres, 101 F. Supp. 3d at 1335* (quotations and citations omitted). Here, plaintiffs allege just that. The complaint attributes decreased output and revenues for distributors to Landmark's unlawful clearance agreements. *See, e.g.*, Compl., **[**24]** ECF No. 1 ¶¶ 8-9, 73-82. For example, plaintiffs allege that fewer consumers view a film when it is shown in only one location, which leads to decreased distributor revenue. *Id.* ¶ 76. Indeed, distributors allegedly agree that clearance agreements are not necessarily in their economic interest; Landmark's clearance demands were allegedly the "only reason" that distributors refused to license films to plaintiffs. *Id.* ¶¶ 75, 77.

Additionally, plaintiffs allege that consumers have fewer exhibitor choices and endure increased movie prices and decreased theater quality as a result of the unlawful clearance agreements. *See, e.g., id.* ¶¶ 8-9, 73-82. For example, plaintiffs contend that consumers have fewer quality choices in the specialty film exhibitor market; if a consumer seeks to see a film shown by Landmark, the consumer will be unable to enjoy the film at another theater. *Id.* ¶ 78. If a Landmark theater sells out, a consumer may not be able to enjoy the film at all. *See id.* ¶ 79. Moreover, plaintiffs **[*138]** allege that the decreased competition causes higher ticket and concession prices. *Id.* ¶ 79. Finally, as a result of Landmark's alleged anticompetitive conduct, consumers may have to travel **[**25]** further to see a film. *See id.*; *see also id.* ¶ 65 (alleging that patrons in metropolitan Denver must travel an additional 6.5 miles to see a film at a Landmark theater). As Landmark stated in its opposition to Regal's motion to dismiss, it is "bedrock ***antitrust law*** that forcing consumers to travel well outside their market—at considerable inconvenience and expense—to get access to the product they desire *does* harm their welfare." Landmark's Opp'n, ECF No. 17 at 43 (Civ. No. 16-123). In sum, the plaintiffs sufficiently state an antitrust injury by "point[ing] to the specific damage done to consumers in the market." *Cobb Theatres, 101 F. Supp. 3d at 1335* (citations and quotations omitted).

Finally, Landmark disputes the accuracy of plaintiffs' allegations, arguing that plaintiffs misunderstand the relevant economic consequences of the clearance agreements. Defs.' Mot., ECF No. 16 at 22-25. For example, Landmark contends that the number of films available to the public *increased* as a result of "interbrand competition." Defs' Mot., ECF No. 16 at 23. In so arguing, however, Landmark again relies on summary judgment cases in asking the Court to make factual determinations regarding *actual* economic effects at the motion to dismiss **[**26]** stage. Again, the Court may not do so.

The Court therefore **DENIES** Landmark's motion to dismiss Count I of the complaint.

C. Plaintiffs Sufficiently Allege Monopolization

Landmark also argues that plaintiffs fail to state monopolization (Count II) or attempted monopolization (Count III) claims pursuant to *Section 2 of the Sherman Act.* Defs.' Mot., ECF No. 16 at 25-28. Landmark argues that plaintiffs do not allege two necessary elements of a *Section 2* claim: (1) leveraging conduct; and (2) monopoly power. *Id.*

"[T]he use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor, is unlawful." *Griffith, 334 U.S. at 107*. "To plead a claim for actual monopolization, a plaintiff must allege: '(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident.'" *WAKA LLC, 517 F. Supp. 2d at 250* (quoting *City of*

Moundridge v. Exxon Mobil Corp., 471 F. Supp. 2d 20, 41 (D.D.C. 2007) and citing United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)). "To state a claim for attempted monopolization, a plaintiff must provide facts showing: '(1) a specific intent to destroy competition or control competition in the relevant market, and (2) a dangerous probability of success in actually monopolizing **[**27]** the relevant market.'" Id. at 252 (quoting Dial A Car, Inc., 884 F. Supp. at 589-90). "The key inquiry involves the power of the defendant in the market in which it competes." *Id.* (citations and quotations omitted).

1. Leveraging Conduct

Landmark argues that plaintiffs do not state that Landmark leveraged any monopoly power because the complaint does not allege that it combined its open and closed towns when negotiating with distributors. Defs.' Mot., ECF No. 16 at 26-27. "When the buying power of the entire circuit is used to negotiate films for [an exhibitor's] competitive as well as [its] **[*139]** closed [or non-competitive] towns, [the exhibitor] is using monopoly power to expand [its] empire." Griffith, 334 U.S. at 108. The consequence of this conduct is "that films are licensed on a non-competitive basis in what would otherwise be competitive situations." *Id.*

Plaintiffs' Section 2 claims rely on the same allegations of anticompetitive behavior as their Section 1 claim. *Compare* Compl., ECF No. 1 ¶¶ 83-90 *with id.* ¶¶ 92-104. To that end, Landmark essentially repeats its argument that plaintiffs do not allege that Landmark leverages its monopoly power in non-competitive markets to negotiate favorable clearance agreements in competitive markets. Defs.' Mot., ECF No. 16 at 26-27. As **[**28]** thoroughly discussed, however, *supra* Sec. B.1, the Court finds that plaintiffs allege sufficient facts to infer that Landmark engaged in monopoly leveraging conduct. Indeed, at this stage of the proceedings, the Court cannot agree with Landmark that "there are no allegations that Landmark took advantage of its position in closed geographic markets to strengthen its hand in negotiations with distributors." Id. at 27. As discussed, plaintiffs allege that Landmark is the dominant specialty film exhibitor and that it wields its considerable market power to obtain favorable clearance agreements in competitive markets nationwide. *See, e.g.*, Compl., ECF No. 1 ¶¶ 18, 70-72, 75.

Nevertheless, Landmark argues that plaintiffs' Section 2 claims must fail because the complaint "does not identify Landmark's closed [or non-competitive] towns, if any" and because plaintiffs "say nothing about the competitive makeup of the other 15 markets where Landmark exhibits specialty films." Defs.' Mot., ECF No. 16 at 27. However, plaintiffs are not required to plead such specific facts at this early stage of the litigation. In *Cobb Theatres*, the district court denied the defendant's motion to dismiss even though the plaintiffs **[**29]** had not specifically identified non-competitive markets. 101 F. Supp. 3d at 1343. "Identifying specific closed markets used for leveraging" was "unnecessary" because plaintiffs alleged that the defendant exhibitor was "using the power of its *entire* nationwide circuit . . . to acquire exclusive privileges in markets where it had competitors." *Id.* So here too. Not only do plaintiffs allege that Landmark "leveraged its dominant position nationwide" by coercing distributors to enter into favorable clearance agreements, *see, e.g.*, Compl., ECF No. 1 ¶ 30, but plaintiffs also allege that distributors agree that Landmark's demands are the "only reason" distributors enter into such agreements, *id.* ¶ 75.[3]

2. Monopoly Power

Finally, Landmark argues that plaintiffs' Section 2 claims must fail because the complaint does not adequately allege that Landmark possessed, or had a dangerous possibility of possessing, monopoly power. Defs.' Mot., ECF No. 16 at 27-28. Monopoly power is the "existence of power to exclude competition when it is desired to do so." Griffith, 334 U.S. at 107 (quotations and citations omitted). It "may be inferred from a firm's possession of a

---

[3] Moreover, the Court is not persuaded by Landmark's misplaced reliance on *Six West Retail Acquisition, Inc. v. Sony Theatre Management Corp. See* Defs.' Mot., ECF No. 16 at 27 (citing Civ. No. 97-5499, 2004 U.S. Dist. LEXIS 5411, 2004 WL 691680 at *11 (S.D.N.Y. Mar. 31, 2004)). Landmark states that the plaintiff's attempted monopolization claim in that case was "dismiss[ed]," *id.*, but *Six West* was actually resolved "after years of discovery," 2004 U.S. Dist. LEXIS 5411, 2004 WL 691680 at *3-4, 7.

dominant share **[**30]** of a relevant market that is protected by entry barriers." *United States v. Microsoft **[*140]** Corp., 253 F.3d 34, 51, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*(citations omitted).

The Court disagrees that plaintiffs do not allege facts regarding Landmark's monopoly power. As the Court has discussed, plaintiffs allege that Landmark is the largest specialty film exhibitor in the nation. *See* Compl., ECF No. 1 ¶ 18. Landmark does not dispute that allegation; it agrees that it has fifty-one theaters in twenty-two major geographic markets nationwide. *See* Defs.' Mot., ECF No. 16 at 10; *see also* Compl., ECF No. 1 ¶ 71. Moreover, plaintiffs describe several markets in which Landmark occupies the majority of the specialty film exhibitor market. *See* Compl., ECF No. 1 ¶¶ 44-62. Such allegations are sufficient at this early stage of the proceedings. For example, in *Cobb Theatres*, the district court denied the defendant's motion to dismiss in part because the plaintiff alleged that the defendant had "69% share of [the] market," an amount sufficient to infer monopoly power. *101 F. Supp. 3d at 1340* ("in some circumstances, 'over two-thirds of the market is a monopoly'")(quoting *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 480, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992))*. In this case, plaintiffs allege several markets in which Landmark has close to 69% of the market, if not more. *See* Compl., ECF No. 1 ¶¶ 44-62 **[**31]** (discussing St. Louis (80%), Houston (60%), Philadelphia (54%), Detroit (60%), Denver (73%), and the District of Columbia (68%)).

Not only do plaintiffs allege that Landmark possesses a "dominant share" of the national market, but plaintiffs also allege that high entry barriers protect Landmark's monopoly and prevent access the market. *See* *Microsoft, 253 F.3d at 51*; *see also* *Cobb Theatres, 101 F. Supp. 3d at 1340* (noting that "high entry barriers to the market make it reasonable to presume [the defendant] has monopoly power"). Here, plaintiffs allege that high entry barriers, such as limited urban real estate and difficulty in obtaining financing, reinforce and protect Landmark's monopoly. Compl, ECF No. 1 ¶ 36.

The Court therefore **DENIES** Landmark's motion to dismiss Counts II and III of the complaint.

D. Plaintiffs Sufficiently Allege Tortious Interference

Both parties agree that plaintiffs' tortious interference claim "rises and falls" with plaintiffs' Sherman Act claims. Defs.' Mot., ECF No. 16 at 28 (one paragraph argument relying on its previous arguments); *see* Pls.' Opp'n, ECF No. 17 at 36-37 ("Landmark's only argument for dismissing plaintiffs' tortious interference claim is derivative of its earlier arguments").

Because the Court concludes **[**32]** that plaintiffs state claims under the Sherman Act, the Court **DENIES** Landmark's motion to dismiss Count IV of the complaint.

V. Conclusion

For the foregoing reasons, the Court **GRANTS IN PART** and **DENIES IN PART** Landmark's motion to dismiss. The Court **GRANTS** Landmark's motion to dismiss, in so far as defendant 2929 Entertainment, LP is dismissed from the action without prejudice. The Court **DENIES** Landmark's motion to dismiss Counts I, II, III, and IV of the plaintiffs' complaint. An appropriate Order accompanies this Memorandum Opinion.

SO ORDERED.

Signed: Emmet G. Sullivan

United States District Judge

September 28, 2018

ORDER

For the reasons stated in the accompanying Memorandum Opinion, it is hereby

ORDERED that the defendants' motion to dismiss the plaintiffs' complaint is **GRANTED IN PART** and **DENIED IN PART**; and it is further

ORDERED that defendant 2929 Entertainment, LP is **DISMISSED WITHOUT PREJUDICE**; and it is further

ORDERED that the defendants' motion to dismiss as to Counts I, II, III, and IV of the complaint is **DENIED**; and it is further

ORDERED that the remaining defendant shall answer the plaintiffs' complaint by no later than October 17, 2018.

SO ORDERED.

Judges: Honorable Kent J. Dawson, United States District Judge.

Opinion by: Kent J. Dawson

Opinion

ORDER

Presently before the Court is Defendant's Motion to Dismiss (#26). Plaintiff filed a response in opposition (#32) to which Defendant replied (#34).

I. Background

Switch is the long-time dominant high-end colocation **[*9]** data center provider in Las Vegas. Compl. ¶¶ 30-31. Colocation data centers allow organizations to operate their critical computing infrastructure in a third-party purpose-built and managed facility, rather than incur the capital expenditures and risks associated with housing this equipment internally. *Id.* ¶ 19. The basic offerings of data centers are space, power, cooling, and telecommunications services, including "cross-connects." *Id.* Cross-connects allow a data center's customers to connect to their vendors, suppliers, and own data located elsewhere. *Id.* ¶ 28. A customer can cross-connect internally (with another customer co-located in the same data center) or externally, to third-party facilities. *Id.* Cross-connects provide vital links to customers, suppliers, and partners. *Id.* ¶¶ 28-29, 72-73.

High-end colocation data centers — as opposed to lower-tier data centers — offer their customers continuous uptime, i.e., uninterrupted operations, through backup power, cooling, and networking capabilities. *Id.* ¶¶ 23-26, 95-100. Because of the expertise and significant capital expenditure necessary to successfully build and operate a high-end data center, customers generally cannot and **[*10]** do not self-supply. *Id.* ¶ 104.

According to the allegations of the complaint, Switch controls at least 85 percent of the high-end colocation data center market in Las Vegas. *Id.* ¶¶ 30-32. Switch has used that market power to charge prices well above what a competitive market would bear. *Id.* ¶¶ 5, 20, 32, 42, 49, 119, 133. In 2011, Michael Ballard, former President of Cobalt — who had previously been employed by Switch — began prospecting sites for a new data center. *Id.*¶ 33. Ballard developed plans for a data center on Sahara Avenue that he never ended up constructing. *Id.* ¶¶ 33-34.

When Switch learned of Ballard's plans, Switch sued Ballard — not Cobalt — for alleged theft of trade secrets and copyrighted works in designing the Sahara data center. *Id.* ¶ 34; *see* Ex. A (Switch's complaint).

On March 8, 2013, after the court in the Ballard suit denied Switch's motion for summary judgment, Switch agreed to accept the nominal sum of $40,000, to be paid to charity, in exchange for dismissing its complaint with prejudice. *See* Ex. B, Dkt. Nos. 80, 139; ECF No. 26-1 (Settlement Agreement); Compl. ¶ 34. The Settlement Agreement — to which Cobalt is also a signatory — does not contain any admission **[*11]** of liability by Cobalt. *See* Settlement Agreement at 1. According to the allegations of the complaint, Cobalt did not "publicly acknowledge[] the validity of" Switch's lawsuit (Mot. at 2 n.1). *See* Compl. ¶ 34.

The Settlement Agreement contains the following release:

> Ballard [and Cobalt] hereby release any and all claims, causes of action, disputes and damages, including, but not limited to claims of abuse of process, unfair competition, antitrust, defamation, or tortious interference against [Switch] stemming from the actions of [Switch] and arising out of the facts related to the Lawsuit . . . . This release shall remain in full effect notwithstanding the discovery or existence of any such additional or different facts. Ballard intends this release to be effective notwithstanding statutes or laws similar to *Cal. Civil Code Sect. 1542*, which reads: "A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

ECF No. 26-1 (Settlement Agreement) ¶ 4. Cobalt released any claims against Switch arising out of facts already in **[*12]** existence that related to Switch's lawsuit against Ballard. *Id.* Cobalt did not release claims arising out of unrelated facts, or claims that may later accrue based on future conduct. *Id.*

While Switch's lawsuit against Ballard was pending, Cobalt began designing a new data center, on Cheyenne Avenue. Compl. ¶ 35. In February 2013, Cobalt's multi-million dollar Cheyenne data center opened. *Id.* ¶¶ 35-36. Cobalt felt well positioned to compete with Switch. *See id.* ¶¶ 32, 133, 138, 140, 143-45. An experienced team of data center and real estate veterans led Cobalt, including Jefferson Brown, who later replaced Ballard as President. *Id.* ¶ 37. Industry participants predicted Cobalt's success after touring its state-of-the-art facility. *Id.* ¶ 39.

Cobalt alleges a subsequent barrage of anticompetitive and tortious conduct that Switch inflicted on Cobalt and Switch's only other competitor in the market, ViaWest Las Vegas. *See id.* ¶¶ 121-24. Plaintiff alleges that Switch's intentions quickly became clear shortly after Cobalt Cheyenne opened its doors, when Rob Roy, founder and CEO of Switch, told Cobalt in no uncertain terms that Switch would make it "impossible for Cobalt to compete with Switch" **[*13]** and that Switch was "trying to be a monopoly." *Id.* ¶ 43. Specifically, Roy told Cobalt that Switch would refuse to use carriers that "go into Cobalt"; "use the threat of taking away business to keep its vendors and carriers exclusive to Switch"; and "give away" cabinets at its Las Vegas data center to "keep control" of the market. *Id.*; *see id.* ¶ 77.

Plaintiff's complaint alleges that Switch followed through on its threat of anti-competitive conduct. First, Switch required its customers to agree to successive "Acceptable Use Policies" (AUPs) under which they were forbidden from dealing with competing data centers within 50 miles. *Id.* ¶ 48. Subsequent iterations required an agreement not to deal with data centers "within the State of Nevada" or "within [the] greater geographic area in which [the Switch Las Vegas facility] is located." *Id.* ¶ 51. Switch's 2013 AUP specifically targeted Cobalt, providing that "no entities having business dealings (Vendors and Clients) with Cobalt shall be permitted to enter or work with the Switch Ecosystem." *Id.*¶ 50. Switch reinforced the exclusionary effects of its AUPs with additional, exclusive "partnerships" with carriers. For example, Cobalt incurred **[*14]** significant time and expense fighting a battle with Switch and Zayo Group over an exclusive "marketing partnership" between Zayo and Switch. *Id.* ¶¶ 55-59. Cobalt incurred similar costs challenging an exclusive deal between Switch and CenturyLink in 2014. *Id.* ¶ 60.4

Plaintiff also alleges that Switch threatened prospective customers by not allowing them to cross-connect to trading partners in Switch's Las Vegas facility if those prospective customers co-located with a competitor (including Cobalt) instead of Switch. *Id.* ¶ 73. Plaintiff alleges that in June 2015, after promising discussions with Cannery

Casino & Hotel, Cobalt learned Cannery had decided to collocate with Cobalt. *Id.* ¶ 71. Switch heard about Cannery's decision and told Cannery that if it co-located with Cobalt, Cannery could not cross-connect directly to any of its vendors co-located at Switch. *Id.* ¶ 72. Even though Cannery preferred Cobalt over Switch, it had no choice but to give Switch its colocation business, or else it would lose access to vital trading partners. *Id.*

Switch made similar threats to suppliers that Switch's competitors needed to do business with to compete effectively. For example, Plaintiff alleges that **[*15]** in September 2014, Cobalt and SilverBack Migration, a supplier of infrastructure migration and support services, were in talks to establish a partnership. *Id.* ¶ 62. When Switch learned of the potential partnership, Roy threatened to deny SilverBack all further business with Switch if SilverBack consummated its partnership with Cobalt. *Id.* ¶¶ 62-63. As a result, SilverBack reluctantly reneged on the partnership, informing Cobalt that SilverBack "could not afford to fight" Switch. *Id.* ¶¶ 61, 63.

Although Switch disputes this allegation — stating that "ultimately . . . SilverBack agreed to do business with [Cobalt]" (Mot. at 16:1-2) — the complaint alleges the opposite: that "Switch's exclusionary tactics caused Cobalt to lose [its] important partnership with SilverBack." Compl. ¶ 61. Switch similarly threatened brokers, the Technology Business Alliance of Nevada (TBAN) (an important source of customers), Opportunity Village (a prominent nonprofit organization Cobalt was in talks with to pursue a joint promotional partnership), and the Governor's Office of Economic Development (GOED), resulting in their refusing to deal with or support Cobalt. *Id.* ¶¶ 64-70.

On top of its exclusive agreements **[*16]** and threats, Plaintiff alleges that Switch selectively employed predatory pricing to steal prospective customers from its competitors, knowing Switch could raise prices once they were sidelined. *Id.* ¶¶ 74-78. Indeed, one Switch representative admitted, "We do whatever we can to keep the other guys from getting started . . . We would even buy a billboard out front of another data center and advertise $1 per month [versus Switch's standard $1,199 per month] to keep the competition from succeeding." *Id.* ¶ 77. And Roy stated, in response to Cobalt entering the market, that Switch would be "giving away 250 cabinets per year." *Id.* The complaint alleges that Switch stole Yorba Linda Water District's business from Cobalt with a price that was below Switch's costs. *Id.* ¶ 74. And Switch told Cobalt customer Networx that it would pay Networx's legal fees if it broke its contract with Cobalt — which Networx did. *Id.* ¶ 78.

Finally, Plaintiff alleges that Switch's anticompetitive scheme also involved a campaign to slander and malign its competitors. According to the allegations of the complaint, Switch's 2013 AUP falsely represented: "The CEO of Cobalt Datacenters, Mike Ballard, signed a Settlement **[*17]** Agreement relating to Mike Ballard's unauthorized possession of Switch's intellectual property and confidential information." *Id.* ¶ 87. Switch also routinely and falsely represented to third parties that Cobalt and ViaWest Las Vegas did not offer concurrent maintainability and redundancies and referred to various agents of Cobalt as "liars" and "thieves" — long after Ballard had left Cobalt. *Id.* ¶¶ 91-92. The complaint asserts that the stream of false and disparaging statements created a cloud of uncertainty about doing business with Switch's competitors and induced numerous third parties not to deal with them. *Id.* ¶ 93.

The complaint also alleges that Switch's anticompetitive scheme caused Cobalt's failure. *Id.* ¶¶ 139-40. Despite the market's early optimism for Cobalt's Cheyenne facility, Cobalt was unable to secure enough customers to keep its doors open. *Id.* Less than three years after it opened, Cobalt shut down operations. *Id.* ¶ 41. ViaWest Las Vegas also achieved far less growth than it would have absent Switch's anticompetitive conduct. *Id.* ¶ 141.

The complaint asserts that the natural result was to provide an environment in which customers only had one choice in the market. As **[*18]** detailed in the complaint, before customers decide on a colocation data center provider to use, they decide where, geographically, they will co-locate. *Id.* ¶¶ 21-22. Customers who need absolute assurances against natural disasters choose southern Nevada — a unique attribute that Switch itself touts to sell southern Nevada as a distinct geographic market. *Id.* ¶¶ 107-12. Other customers are based in Nevada and either require close proximity to their co-located data or are required under Nevada law to house their data in state. *Id.* ¶¶ 113-14. All of these categories of customers have no reasonable substitute for Las Vegas, the only region in southern Nevada — indeed, in the state — with heightened colocation data centers. *Id.* ¶¶ 21-22, 108-14, 116-18. Having driven Cobalt from the market, Switch was able to maintain its supra competitive prices far above those offered by Cobalt or ViaWest for comparable services in competitive markets. *Id.* ¶¶ 133, 138, 142-45.

Cobalt filed the present action asserting claims for violations of the *Sherman Act (monopolization, attempted monopolization and agreements in restraint of trade)*, Nevada's Unfair Trade Practices Act (mirroring the federal Sherman Act claims), and common law claims for intentional interference with contract and prospective **[*19]** economic advantage. Defendant Switch, Ltd. has now moved to dismiss these claims.

II. Legal Standard

A motion to dismiss requires the Court to construe the facts in the light most favorable to the non-moving party. "To survive [the motion], a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)* (citing *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). This requires a two-pronged analysis. First, the Court identifies "the allegations in the complaint that are not entitled to the assumption of truth," that is, those allegations which are legal conclusions, bare assertions, or merely conclusory. *Id. at 1949-51*. Second, the Court considers the factual allegations "to determine if they plausibly suggest an entitlement to relief." *Id. at 1951*. Plausibility, in the context of a motion to dismiss, means that a plaintiff has pled facts which allow "the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id. at 1949*. If the allegations state non-conclusory, plausible claims for relief, such claims survive the motion to dismiss. *Id. at 1950*.

III. Analysis

A. Release and Waiver

Defendant argues that this action is barred by Plaintiff's waiver of claims in the 2013 settlement **[*20]** agreement. A release and waiver of claims is recognized in Nevada when there is an intentional relinquishment of a known right. *See Nevada Yellow Cab Corp. v. Eighth Judicial Dist. Ct., 123 Nev. 44, 152 P.3d 737, 740 (Nev. 2007)*. However, the settlement agreement's plain language only releases claims "arising out of the facts related to the Lawsuit." There is no plain language from which a reasonable person could conclude that they were releasing future claims based on new conduct that occurred after the settlement agreement was executed. Accordingly, the Court denies the motion to dismiss the Complaint based on the March 8, 2013 settlement agreement arising out of Switch's 2011 lawsuit against Ballard.

B. Adequacy of the Complaint

"The offense of monopoly under *§ 2* of the *Sherman Act* has two elements: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. Attempted monopolization requires (1) the defendant's specific intent to control prices or destroy competition, (2) predatory or anticompetitive conduct directed at accomplishing that purpose and (3) a reasonably dangerous probability of achieving monopoly **[*21]** power. *See Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1432-33 (9th Cir. 1995)*. The Nevada Unfair Practices Act tracks the federal ***antitrust law***. *Boulware v. Nevada, 960 F.2d 793, 800-801 (9th Cir. 1992)*.[1]

Initially, Defendant argues that Plaintiff has not pled facts with enough particularity. However, "[t]here is no requirement that . . . elements of the antitrust claim be pled with specificity." *Newcal Indus., Inc. v. Ikon Office Sol.,*

---

[1] To the extent Defendant challenges Plaintiff's claims for intentional interference with contractual relations and intentional interference with prospective economic advantage, the Court finds that they are adequately pled.

513 F.3d 1038, 1045 (9th Cir. 2008). From the stated allegations noted by the Court, Plaintiff easily satisfies the elements of the monopoly and attempted monopolization claims.[2]

Further, Plaintiff alleges specific facts that satisfy the specific intent requirement of the attempted monopolization claim. While "[s]uch intent may inferred from well-pleaded allegations of predatory and or anti-competitive conduct" or from "circumstantial evidence[,]" Plaintiff alleged direct evidence of specific intent: Switch's CEO's own statements. United Energy Trading, LLC v. Pacific Gas & Elec. Co., 200 F. Supp.3d 1012, 1023 (N.D. Cal. 2016) (citing Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993); *William Inglis & Sons Baking Co. v. ITT Cont'l Baking Co., 668 F.2d 1014, 1027 (9th Cir. 1981)*). While Defendant may have wished for more information, such as time and place of the statements, such specific pleading is not required. A plaintiff that has pled facts which allow "the court to draw the reasonable inference that the defendant is liable for the misconduct alleged" has stated claims sufficient to survive the motion to dismiss. Iqbal, 129 S. Ct. at 1949-50.

C. Federal Rule of Evidence 408

Defendant argues that many of Plaintiff's factual allegations are **[*22]** forbidden by Federal Rule of Civil Procedure 408, because they were statements made during settlement negotiations. However, there is no indication in the complaint when the statements were made, though to the degree the Court can infer from the complaint, the statements were alleged to have been made after execution of the settlement agreement in the prior case. Since the Court must rely on the allegations of the complaint in determining the sufficiency of the pleadings, it cannot consider Defendant's argument without converting the motion into a motion for summary judgment. To do so at this early stage of the litigation would deprive the parties of the benefit of discovery. Therefore, the Court declines to address this argument. Defendant may argue in a motion for summary judgment or in response to a motion for summary judgment that evidence is not admissible under Rule 408.

D. Predatory Pricing

In order to state a claim for predatory pricing under the Sherman Act, Plaintiff must allege (1) the prices complained of are below an appropriate measure of its rival's costs; and (2) that the competitor has a dangerous probability of recouping its investment in below-cost prices. *See* Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993) (citing Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588-89, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986) ("For the investment to be rational, the [predator] **[*23]** must have a reasonable expectation of recovering, in the form of later monopoly profits, more than the losses suffered.")). Here, Plaintiff has made sufficient allegations to meet both prongs having alleged price below Defendant's costs and sufficient ability to recover lost profits.

E. Exclusive Dealing

Exclusive dealing involves an agreement between a vendor and a buyer that prevents the buyer from purchasing a given good from any other vendor. Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 996 (9th Cir. 2010). There are "well-recognized economic benefits to exclusive dealing arrangements, including the enhancement of interbrand competition." Omega Envtl., Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1162 (9th Cir. 1997). Consequently, "an exclusive-dealing arrangement does not constitute a *per se* violation of section 1." Twin City Sportservice, Inc. v. Charles O. Finley & Co., Inc., 676 F.2d 1291, 1303-04 (9th Cir. 1982). Under the antitrust rule

---

[2] To the extent that Defendant disputes the relevant market as pled by Plaintiff, the Court must deny the motion to dismiss based on the allegations regarding the relevant market, because "the validity of the 'relevant market' is typically a factual element rather than a legal element, alleged markets may survive scrutiny under Rule 12(b)(6) subject to factual testing by summary judgment or trial." Newcal, 513 F.3d at 1044. The complaint adequately states a relevant market.

of reason, an exclusive dealing arrangement violates *Section 1* only if its effect is to "foreclose competition in a substantial share of the line of commerce affected." *Omega, 127 F.3d at 1162* (quoting *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*). Despite Defendant's assertions to the contrary, Plaintiff has adequately alleged that the exclusive dealing contracts foreclosed competition.

IV. Conclusion

Accordingly, IT IS HEREBY ORDERED that Defendant's Motion to Dismiss (#26) is **DENIED**.

Dated this 28th day of September, 2018.

/s/ Kent J. Dawson

The Honorable Kent J. Dawson **[*24]**

United States District Judge

FTC v. Wilh. Wilhelmsen Holding ASA

United States District Court for the District of Columbia

October 1, 2018, Filed

Civil Action No. 18-cv-00414-TSC

Reporter

341 F. Supp. 3d 27 *; 2018 U.S. Dist. LEXIS 169049 **; 2018-2 Trade Cas. (CCH) P80,509; 2018 WL 4705816

FEDERAL TRADE COMMISSION, Plaintiff, v. WILH. WILHELMSEN HOLDING ASA, WILHELMSEN MARITIME SERVICES AS, RESOLUTE FUND II, L.P., DREW MARINE INTERMEDIATE B.V., AND DREW MARINE GROUP, INC., Defendants.

Core Terms

Global, customers, vessels, products, Fleets, suppliers, chemicals, merger, marine, trading, water treatment, prices, ships, estimates, market share, boiler, calculations, effects, products and services, ports, concentration, cluster, buyers, engine, barriers, competitor, negotiate, merging, prima facie case, firms

Cirincione, LEAD ATTORNEYS, FEDERAL TRADE COMMISSION, Bureau of Competition, Washington, DC; Christopher John Caputo, Michael T. Blevins, Michael Joseph Lovinger, Stephen E. Antonio, LEAD ATTORNEYS, U.S. FEDERAL TRADE COMMISSION, Bureau of Competition, Washington, DC; David J. Gonen, Eric Matthew Sprague, Frances Anne Johnson, James Edward Rhilinger, III, Llewellyn Oliver Davis, McCormick Conforti, Merrick Joseph Pastore, Sophia Vandergrift, Stelios S. Xenakis, Thomas Joseph Dillickrath, LEAD ATTORNEYS, FEDERAL TRADE COMMISSION, Washington, DC; James Esten Abell, III, UNITED STATES FEDERAL TRADE COMMISSION, LEAD ATTORNEY, BUREAU OF COMPETITION, Washington, DC; Joshua M. Goodman, LEAD ATTORNEY, FEDERAL TRADE COMMISION, Bureau of Competition, Washington, DC.

For WILHELMSEN MARITIME SERVICES AS, Defendant: Catherine A. O'Connor, Catherine Fairley Spillman, Corey William Roush, Gorav Jindal, Paul B. Hewitt, LEAD ATTORNEYS, AKIN GUMP STRAUSS HAUER & FELD LLP, Washington, DC.

For RESOLUTE FUND II, L.P., DREW MARINE INTERMEDIATE II B.V., DREW MARINE GROUP INC., Defendants: Corey William Roush, LEAD ATTORNEY, AKIN GUMP STRAUSS **[**2]** HAUER & FELD LLP, Washington, DC; Mark William Ryan, LEAD ATTORNEY, MAYER BROWN LLP, Washington, DC; Michael E. Lackey, Jr., Oral D. Pottinger, LEAD ATTORNEYS, MAYER BROWN PLLC, Washington, DC.

For WILH, WILHELMSEN HOLDING ASA, Defendant: Corey William Roush, LEAD ATTORNEY, AKIN GUMP STRAUSS HAUER & FELD LLP, Washington, DC.

Opinion

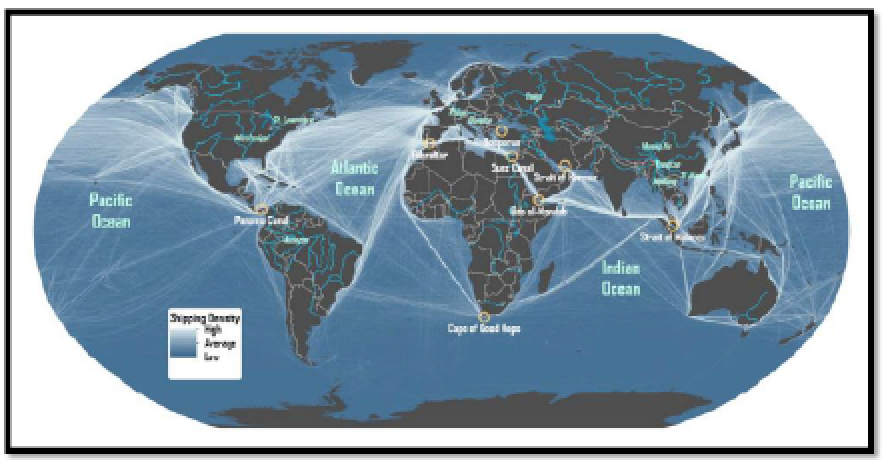
[*39] **MEMORANDUM OPINION**

The Federal Trade Commission ("FTC") has moved for a preliminary injunction to block a proposed merger between defendants Wilhelmsen Maritime Services AS ("WMS"), Wilhelmsen Ship Services ("WSS") (collectively "Wilhelmsen"), and The Resolute Fund II, L.P., Drew Marine Intermediate II B.V., and Drew Marine Group, Inc.

(collectively "Drew"), two large providers of marine water treatment chemicals and related services. The FTC objects to the merger on the grounds that Defendants are each other's closest and only realistic competition for supplying these chemicals and services on a global scale, and the merger threatens to reduce or eliminate tangible consumer benefits resulting from market competition. Having considered the evidence presented through live testimony, as well as extensive pleadings, exhibits, and other submissions, the court hereby GRANTS **[**3]** the motion for preliminary injunction.

I. BACKGROUND

This case is about the likely impact of a proposed merger in the international maritime industry—an industry on which much of the global economy, including intercontinental trade, large-scale transport of raw materials, and the import/export of foodstuffs and manufactured goods, depends. *See* PX90033 at 001; PX90034 at 001 (noting that "[international shipping transports more than 80 percent of global trade **[*40]** to peoples and communities all over the world," and that "[s]hipping is the most efficient and cost-effective method of international transportation for most goods"). By at least one estimate, the worldwide shipping industry includes 50,000 merchant ships registered in over 150 nations. PX90033 at 001. The following map, originally sourced from the National Center for Ecological Analysis and Synthesis, depicts common global shipping routes and underscores the breadth and density of maritime industry activities:



PX10126 at 023. While international merchant ships includes many types of vessels, all of them—and especially large ones—require regular maintenance to ensure continuous performance at operational levels. Companies like Wilhelmsen **[**4]** and Drew provide an array of products and services designed to ensure the continued operational performance of all types of maritime vessels. *See* PX10126 at 008-009 (noting that "VPP [vessel performance products] applications are necessary to maintain financial and operational efficiency of vessels," and that such products "are required by all commercial shipping vessel classes," which include container ships, bulk ships, cruise ships, military ships, tankers, cargo ships, and even offshore oil and gas rigs). Defendants sell maritime customers several categories of products, including cleaning chemicals, fuel treatment chemicals, welding gases, refrigerants, and, critically, water treatment chemicals. Am. Compl. ¶ 29; Ans. ¶ 29. The products at issue in this case are consumable water treatment products and related services, a category that includes products and services for the chemical treatment of boiler water, cooling water, water production, waste water, ballast water, and potable water. DX-1161 at 0019.

Marine vessels use water resources for a number of applications, including drinking, showering, cleaning, pools, spas, and—critically—for boiler and cooling systems. JX-0149 at **[**5]** 003. Depending on the type of ship, a boiler is necessary either as a constituent part of the main propulsion system or as part of an auxiliary system on which the propulsion system relies. PX90030 at 001. In auxiliary systems, the boiler primarily serves to generate steam to support ship functions in vessels running on marine diesel engines or diesel electric propulsion. PX90030 at 001. Examples include preventing Heavy Fuel Oil ("HFO")—a highly viscous substance—from falling below the temperature at which it is useable, heating HFO to ensure fluidity immediately before use in the engine, and for use in purifiers, **[*41]** booster modules, and other applications. PX90030 at 002-005. Cooling water systems reduce excess heat produced by the working machinery of a vessel's engine. PX90032 at 001. Essentially, cooling water systems circulate water through the engine to remove heat and reduce the likelihood of engine failure. Fry Hrg. Tr. at 943: 17-24 ("If you don't maintain the cooling water side, then you're relying on the oil side of the house to take up and remove that heat from the engine. And what happens is, if you don't cool the cylinders down, the oil starts breaking down. When the oil **[**6]** starts breaking down, then you get metal-to-metal contact inside the piston and the rings, and then you have an engine failure, and usually . . . under those circumstances you have a crank case explosion as well.").

Marine water treatment chemicals "are all the chemicals associated with the maritime operation of ships"—including boiler chemistry, diesel chemistry, central cooling water, and evaporators. Fry Hrg. Tr. at 936: 11-12. After measuring the pH, conductivity, temperature, and oxidation-reduction potential of the water with specialized testing equipment, ship engineers inject these chemicals into the boiler and engine cooling systems through specialized dosing equipment optimized for high-pressure/low-volume or low-pressure/high-volume applications. Fry Hrg. Tr. at 945: 10-12; JX-0135 at 005; PX90014 at 003-004. Once injected, water treatment chemicals ensure the performance and reliability of marine boiler and engine cooling systems by: (1) removing excess oxygen from the systems, (2) allowing fine-tuned control of boiler water, cooling water, and feedwater pH; and (3) preventing the leaching and circulation of harmful metals. *See* Fry Hrg. Tr. at 937: 1-21; *see also* JX-0135 **[**7]** at 002. In each of these applications, the chemicals operate to reduce or eliminate the incidence of scale, corrosion, and oxygen formation within boiler, feedwater, and engine cooling systems, as well as the risk of engine overheating with respect to cooling systems specifically. Fry Hrg. Tr. at 937: 1-6; JX-0135 at 003; Fry Hrg. Tr. at 943: 12-14 ("Q. And why do vessels use engine cooling water chemicals? A. To control the amount of corrosion and erosion within the cooling channels of the engine itself.").

Although marine water treatment chemicals "only account for a small fraction of the cost of managing a ship," PX80014 ¶ 3, failure to treat the water resources in boiler and engine cooling systems comes with significant consequences, including breakdown or catastrophic failure. *See, e.g.*, Thompson Hrg. Tr. at 259: 18-24 ("Q. What happens if a boiler develops corrosion? A. [I]t could potentially damage the boiler. It may require significant servicing or even replacement"); JX-0135 at 002 ("Deviating from recommended pH and phosphate control limits can lead to caustic corrosion and result in catastrophic failure of the boiler system."); Fry Hrg. Tr. at 942: 24-25-943:4, 17-24 (describing **[**8]** how failure to treat high pressure boiler water could cause a ruptured pipe and boiler explosion, and how failure to treat cooling water could cause engine failure or explosion). System failure requires costly repairs and unscheduled downtime that translates to lost business and profits for shipping companies. JX-0149 at 003 ("Water treatment is as much about asset protection as it is about maintaining efficiency. The consequences of not using the right treatments can be costly, resulting in unscheduled downtime, or in the worst cases catastrophic, leading to total breakdown of equipment"); PX90014 at 003; Thompson Hrg. Tr. at 259:21-24 (noting that due to the size of the boilers involved, replacement would likely require cutting a hole in the hull and removing the boiler in **[*42]** pieces). Maritime companies therefore regard a consistent and effective marine water treatment program as critical to maintaining an operational fleet of ships. *See, e.g.*, PX80014 ¶¶ 3, 5, 7 (describing the importance of water treatment chemicals to ship operations, the need for consistency and dependability in chemical products, and the preference for companies offering total packages of chemical products and **[**9]** related services); Medina Hrg. Tr. at 167: 8-10 ("[C]onstancy in the chemical makeup of [marine water treatment chemical] products is crucial to the maintenance of our equipment.").

Consistent with customer demand for reliable water treatment chemical programs, suppliers of water treatment chemicals focus their business strategy on providing more than the chemicals themselves. They supply a "total solution"—a programthat includes chemical products, test kits, technical expertise and support, and access to a global network with the ability to quickly and reliably provide product on demand, wherever a vessel is located, and whatever its specific needs may be. JX-0231 at 154 ("Manufacturer/supplier should be able to . . . [s]upply a total solution rather than just the product"); [TEXT REDACTED BY THE COURT] uses the phrase 'total solution' here, can you explain what that phrase means. A. It typically means the service that would come with the product, or even identifying what would be the best product for that application. So the total package would be not just a product but the service associated with the use, or identifying the right use of the right product for that application."); **[**10]** [TEXT REDACTED BY THE COURT] (noting that when Drew enrolls a new customer in its water treatment program it offers recommendations on how to use specific water treatment chemicals, how to test water in boiler and cooling systems, and how to properly dose the chemicals); Medina Hrg. Tr. at 170:7-171:25 (discussing various services provided by marine chemical suppliers); *see also, e.g.*, Thompson Hrg. Tr. at 279:9-281:22 (describing the specific products and services covered under contract with marine chemical supplier). Defendants—whose business is described in more detail below—provide such programs.

Defendant Drew Marine Group, Inc. is a subsidiary of defendant Drew Marine Intermediate II B.V., which is owned by defendant The Resolute Fund II, L.P., a private equity fund managed by The Jordan Company. Am. Compl. ¶ 24. Drew was originally established in 1928, and has grown over the ensuing years into a company with a global infrastructure. Am. Compl. ¶ 24; DX-1161 at 0006, 0010. As Drew Marine representatives put it at a management presentation on February 15, 2017, "Drew Marine's strength is in delivering technical support in specialty chemicals." DX-1161 at 0019. Accordingly, roughly **[**11]** [TEXT REDACTED BY THE COURT] of Drew's revenue is traceable to "Water Treatment Solutions," a category that includes an array of products and services related to the chemical treatment of boiler water, cooling water, water production, waste water, ballast water, and potable water. DX-1161 at 0019. Drew maintains a "sales, service and logistics network that spans 47 countries, with stocking locations in nearly 100 distribution facilities that in turn supply [an estimated] 1000 ports and customers worldwide." PX10126 at 017.

Defendant Wilhelmsen Maritime Services AS is a wholly owned subsidiary of defendant Wilh. Wilhelmsen Holding ASA, a publicly traded corporation headquartered in Norway. Am. Compl. ¶ 23. Wilhelmsen Ship Services (WSS) is a division of WMS that focuses on supplying marine customers with a number of products and services, including water treatment chemicals and associated equipment for boiler water, cooling water, water production, **[*43]** and pool water. PX61000 ¶¶ 51, 53; PX90046; PX90047; PX90050; PX90063. Wilhelmsen—the parent company—was founded as a shipping business in 1861. PX61000 ¶ 51. WSS was founded in 1968. Since then, WSS has developed into "the largest maritime **[**12]** services network in the world," capable of delivering "in 125 countries . . . [and] supporting [its] non-stop operations in 2,200 port locations across the globe." PX20172 at 006. Marine chemicals account for [TEXT REDACTED BY THE COURT] of WSS's total revenues. PX20137 at 0010.

Pursuant to a Share Purchase Agreement dated April 27, 2017, WMS proposed to acquire 100% of Drew's voting securities for approximately $400 million. Am. Compl. ¶ 25. The FTC then conducted a ten-month investigation, after which it "found reason to believe that the proposed Acquisition violates *Section 7* of the *Clayton Act* and *Section 5 of the FTC Act*." Mem. Supp. Prelim. Inj. 12 ("Mot."). The FTC initiated an administrative action alleging a violation of the above statutes, and the merits trial in that action is scheduled to begin on July 24, 2018. Mot. at 2. The FTC also filed the instant motion for a preliminary injunction under *Section 13(b) of the FTC Act*, to preserve the status quo pre-merger during the pendency of the administrative proceeding. Mot. at 12-13.

An evidentiary hearing on the motion for preliminary injunction began on May 29, 2018 and concluded on June 19, 2018. The court heard testimony from fifteen fact witnesses—either live or via video deposition—and **[**13]** three expert witnesses. Plaintiff and Defendants each submitted proposed findings of fact and conclusions of law on June 25, 2018, along with a combined 4,186 exhibits.

II. LEGAL STANDARDS

A. *Section 7* of the Clayton Act

Section 7 of the Clayton Act prevents mergers or acquisitions where "the effect . . . may be substantially to lessen competition, or to tend to create a monopoly" in "any line of commerce or in any activity affecting commerce in any section of the country." *15 U.S.C. § 18*. As the Supreme Court has noted, *Section 7* concerns "probabilities, not certainties," *Brown Shoe Co. v. United States, 370 U.S. 294, 323, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*, and thus the FTC need not demonstrate certainty that a proposed merger will produce anticompetitive effects—only that a "substantial lessening of competition will be 'sufficiently probable and imminent' to warrant relief." *FTC v. Arch Coal, Inc., 329 F. Supp. 2d 109, 115 (D.D.C. 2004)* (citing *United States v. Marine Bancorporation, 418 U.S. 602, 618, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974))*.

B. *Section 13(b)* Standard for Preliminary Injunction

Section 13(b) of the *Federal Trade Commission Act* empowers the Federal Trade Commission to seek preliminary injunctive relief in order to prevent a merger until it can adjudicate the merger's legality in an administrative proceeding, provided the agency has "reason to believe" that the merger will violate the antitrust laws. *15 U.S.C. § 53(b)*; *see also* *FTC v. CCC Holdings Inc., 605 F. Supp. 2d 26, 35 (D.D.C. 2009)*; *FTC v. H.J. Heinz Co., 246 F.3d 708, 714, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)*. *Section 13(b)* provides that an injunction may issue "[u]pon a proper showing **[**14]** that, weighing the equities and considering the Commission's likelihood of ultimate success, such action would be in the public interest." *15 U.S.C. § 53(b)*. As the D.C. Circuit noted in *Heinz*, the omission of any irreparable harm element evinces Congress's intention "to depart from what it regarded as the . . . traditional equity standard" that applies to traditional requests for preliminary **[*44]** relief. *Heinz, 246 F.3d at 714*; *see also* *FTC v. Exxon Corp., 636 F.2d 1336, 1343, 205 U.S. App. D.C. 208 (1980)* ("In enacting [*15 U.S.C. § 53(b)*], Congress . . . demonstrated its concern that injunctive relief be broadly available to the FTC by incorporating a unique 'public interest' standard . . . rather than the more stringent, traditional 'equity' standard for injunctive relief.").

Under *Section 13(b)*, the district court balances the FTC's likelihood of success against the equities on a sliding scale. *FTC v. Whole Foods Mkt., Inc., 548 F.3d 1028, 1035, 383 U.S. App. D.C. 341 (D.C. Cir. 2008)* (Brown, J.) (citing *H.J. Heinz Co., 246 F.3d at 727*). Since Congress's particular "public equity consideration in enacting *Section 13(b)* was 'the public interest in effective enforcement of the antitrust laws,'" a showing of "private equities" alone will not suffice to overcome a showing of likelihood of success, and the equities often favor the FTC. *Id.* Moreover, "[t]he FTC is not required to *establish* that the proposed merger would in fact violate *section 7* of the Clayton Act" in **[**15]** a *Section 13(b)* proceeding. *FTC v. Sysco Corp., 113 F. Supp. 3d 1, 22 (D.D.C. 2015)* (quoting *Heinz, 246 F.3d at 714*). Instead, "to demonstrate the likelihood of success on the merits, 'the government need only show that there is a reasonable probability that the challenged transaction will substantially impair competition." *Id.* (quoting *FTC v. Staples, 970 F. Supp. 1066, 1072 (D.D.C. 1997))*. Thus, the trial court's role in a *Section 13(b)* proceeding is to "measure the probability that, after an administrative hearing on the merits, the Commission will succeed in proving that the effect of the [proposed] merger 'may be substantially to lessen competition, or to tend to create a monopoly in violation of *section 7* of the Clayton Act.'" *Id.* (quoting *Heinz, 246 F.3d at 714*). The FTC satisfies this standard where it "rais[es] questions going to the merits so serious, substantial, difficult[,] and doubtful as to make them fair ground for thorough investigation." *Whole Foods, 548 F.3d at 1035 (Brown, J.)* (quoting *Heinz, 246 F.3d at 714-15*); *see also* *Sysco, 113 F. Supp. 3d at 22*. Nevertheless, a preliminary injunction in this context remains "an extraordinarily drastic remedy," *Exxon, 636 F.2d at 1343* (quoting *Medical Society v. Toia, 560 F.2d 535, 538 (2d Cir. 1977))*, especially since "as a result of the short life-span of most tender offers, the issuance of a preliminary injunction blocking an acquisition or merger may prevent the transaction from ever being consummated." *Id.*

C. *Baker Hughes* Burden-Shifting Framework

Courts in this Circuit apply **[**16]** the burden-shifting framework set out in *United States v. Baker Hughes Inc., 908 F.2d 981, 991, 285 U.S. App. D.C. 222 (D.C. Cir. 1990)*, to assess whether a proposed merger violates *Section 7* of the Clayton Act. Under that framework, the FTC bears the initial burden to prove that a proposed merger would result in "undue concentration in the market for a particular product in a particular geographic area." *Id. at 982*; *see also* *Heinz, 246 F.3d at 715* (quoting *United States v. Phila. Nat'l Bank, 374 U.S. 321, 363, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963))*; *United States v. Anthem, Inc., 236 F. Supp. 3d 171, 192 (D.D.C. 2017)*. Such a showing entitles the FTC to a presumption that the merger will substantially lessen competition. *Baker Hughes, 908 F.2d at 982* (citing *United States v. Citizens & Southern Nat'l Bank, 422 U.S. 86, 120-22, 95 S. Ct. 2099, 45 L. Ed. 2d 41 (1975))*; *Arch Coal, 329 F. Supp. 2d at 115-17*, *appeal dismissed*, *No. 04-5291, 2004 U.S. App. LEXIS 19405, 2004 WL 2066879*

(D.C. Cir. Sept. 15, 2004). Defendants are then entitled to rebut the presumption by presenting evidence that "'show[s] that the market-share statistics **[*45]** [give] an inaccurate account of the [merger's] probable effects' on competition in the relevant market." *Heinz, 246 F.3d at 715* (quoting *Citizens & Southern Nat'l Bank, 422 U.S. at 120*). Where defendants successfully rebut the presumption of illegality, "the burden of producing additional evidence of anticompetitive effect shifts to the government, and merges with the ultimate burden of persuasion, which remains with the government at all times." *Baker Hughes, 908 F.2d at 983*; *see also* *Heinz, 246 F.3d at 715*.

III. DISCUSSION

A. Likelihood of Success on the Merits

1. Prima Facie Case

Given that "the ultimate determination of the legality of a merger involves an assessment of the new firm's market power . . . and the prima **[**17]** facie case concerns market concentration," *Anthem, 236 F. Supp. 3d at 193 (D.D.C. 2017)*, it is appropriate to begin a merger analysis by defining the "relevant product and geographic boundaries of the market[] in question." *FTC v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 45 (D.D.C. 1998)*; *see also id.* ("[d]efining the relevant market is critical in an antitrust case because the legality of the proposed mergers in question almost always depends upon the market power of the parties involved."); *Marine Bancorporation, 418 U.S. at 618* (describing market definition as a "necessary predicate" to evaluating the legality of a merger under *Section 7*). The "relevant market has two components: (1) the relevant product market and (2) the relevant geographic market." *CCC Holdings Inc., 605 F. Supp. 2d at 37*; *see also* *Arch Coal, 329 F. Supp. 2d at 117*. In this case, there is no dispute regarding the relevant geographic market—the parties agree it is global. Nevo Hrg. Tr. at 564:18-565:8; Israel Hrg. Tr. at 1456:21-23. Thus, the court now turns to determining the bounds of the relevant product market.

a. Relevant Product Market

1. LEGAL STANDARD

The Supreme Court has long maintained that "[t]he outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and the substitutes for it." *Brown Shoe Co., 370 U.S. at 325*. Accordingly, the touchstone is demand substitution—"[m]arket **[**18]** definition focuses . . . on customers' ability and willingness to substitute away from one product to another in response to a price increase or a corresponding non-price change such as reduction in product quality or service." 2010 Merger Guidelines § 4. The key question is "whether there are other products offered to consumers which are similar in character or use to the product or products in question, as well as how far buyers will go to substitute one commodity for another." *Staples, 970 F. Supp. at 1074* (citing *United States v. E.I. du Pont de Nemours and Co., 351 U.S. 377, 393, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*); *see also* *United States v. H & R Block, 833 F. Supp. 2d 36, 51 (D.D.C. 2011)*. Where "one product is a reasonable substitute for the other, it is to be included in the same relevant product market even though the products themselves are not the same." *Cardinal Health, 12 F. Supp. 2d at 46*.

Whether a product is a reasonable substitute for another depends on two factors: (a) the extent to which "buyers view similar products as substitutes" and thus "can substitute the use of one for the other" (i.e., functional interchangeability), *Sysco 113 F. Supp. 3d at 25*; *Arch Coal, 329 F. Supp. 2d at 119*; and (b) the extent to **[*46]** which variations in the price of one product—an increase, for example—affects demand for another (i.e., cross-elasticity of demand). *See, e.g.,* *Cardinal Health, 12 F. Supp. 2d at 46* ("a product is construed to be a 'reasonable substitute' for another when the demand for it increases in response **[**19]** to an increase in the price for the other."). Thus, the boundaries of the relevant market lie where the reasonable alternatives for substitution—based on use or price—end. "The relevant market consists of all the products that the Defendants' customers view as substitutes to those supplied by the Defendants" *id.*, "even though the products themselves are not entirely the same." *Sysco, 113 F. Supp. 3d at 25*.

Broad markets sometimes include relevant submarkets that themselves may "constitute product markets for antitrust purposes." *Whole Foods, 548 F.3d at 1037-38 (Brown, J.)* (quoting *Brown Shoe, 370 U.S. at 325*). A firm need not "be included in the relevant product market for antitrust purposes" just because "it may be termed a competitor in the overall marketplace." *H & R Block, 833 F. Supp. 2d at 51* (quoting *Staples, 970 F. Supp. at 1075*); *see also Sysco, 113 F. Supp. 3d at 26* ("[F]or example, fruit can be bought from both a grocery store and a fruit stand, but no one would reasonably assert that buying all of one's groceries from a fruit stand is a reasonable substitute for buying from a grocery store"). Moreover, "the 'product' that comprises the market need not be a discrete good for sale," *Sysco, 113 F. Supp. 3d at 26*, but can be a "cluster of products . . . and services," *Phila. Nat'l Bank, 374 U.S. at 356*, as long as the combination of "a number of different products or services" into "a single market . . . reflects commercial **[**20]** realities." *United States v. Grinnell Corp., 384 U.S. 563, 572, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *Sysco, 113 F. Supp. 3d at 26* ("[W]hat is relevant for consideration here is not any particular food item sold or delivered by Defendants, but the full panoply of products and services offered by them that customers recognize as 'broadline distribution.'"). Such a "cluster market" can even "allow items that are not substitutes for each other to be clustered together in one antitrust market for analytical convenience." *FTC v. Staples, Inc. (Staples II), 190 F. Supp. 3d 100, 117 (D.D.C. 2016)* (finding a cluster market of consumable office supplies justified because "market shares and competitive conditions are likely to be similar for the distribution of pens to large customers and the distribution of binder clips to large customers."); *see also ProMedica Health Sys., Inc. v. FTC, 749 F.3d 559, 565-68 (6th Cir. 2014)* (describing the appropriateness of clustering multiple types of hospital services for the purposes of analytical convenience where competitive conditions were similar).

Lastly, antitrust markets can be based on targeted customers. Section 4.1.4 of the Merger Guidelines—described by the court in *Sysco* as providing "[t]he clearest articulation of [a targeted customer] approach to product market definition"—states that "[i]f a hypothetical monopolist could profitably target a subset of customers for price increases, the Agencies may identify relevant **[**21]** markets defined around those targeted customers, to whom a hypothetical monopolist would profitably and separately impose at least a [small but significant and non-transitory increase in price]." Merger Guidelines § 4.1.4; *Sysco, 113 F. Supp. 3d at 27*. In other words, a targeted customer market may exist when "[a] price increase for targeted customers may be profitable even if a price increase for all customers would not be profitable because too many other customers would **[*47]** substitute away." Merger Guidelines § 3. Thus, "[d]efining a market around a targeted consumer . . . requires finding that sellers could 'profitably target a subset of customers for price increases,'" which in turn demands that there be "differentiated pricing and limited arbitrage." *Staples II, 190 F. Supp. 3d at 117-18*.

Courts employ two main analytical approaches in order to determine whether the boundaries of a relevant product market are "drawn narrowly to exclude any other product to which, within reasonable variations in price, only a limited number of buyers will turn." *United States v. Aetna, Inc., 240 F. Supp. 3d 1, 20 (D.D.C. 2017)* (quoting *Times-Picayune Publ'g Co. v. United States, 345 U.S. 594, 612 n.31, 73 S. Ct. 872, 97 L. Ed. 1277 (1953))*. These include the hypothetical monopolist test, the application of which is frequently the subject of "testimony from experts in the field of economics," and the "practical indicia" described by the Supreme **[**22]** Court in *Brown Shoe. Sysco, 113 F Supp. 3d at 27*.

In determining the bounds of a relevant market, courts often opt "to ask hypothetically whether it would be profitable to have a monopoly over a given set of substitutable products . . . . If so, those products may constitute a relevant market." *H & R Block, 833 F. Supp. 2d at 51-52*; *see also* 5C PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** (hereinafter, "Areeda & Hovenkamp"), ¶ 530a, at 237 (4th ed. 2014) ("[A] market can be seen as the array of producers of substitute products that could control price if united in a hypothetical cartel or as a hypothetical monopoly."). This hypothetical inquiry is referred to by courts and in the merger guidelines as the hypothetical monopolist test. *See Sysco, 113 F. Supp. 3d at 27*; Merger Guidelines § 4.1.1. The test essentially asks whether a "hypothetical profit-maximizing firm, not subject to price regulation, that was the only present and future seller of those products . . . likely would impose at least a small but significant and non-transitory increase in price ("SSNIP") on at least one product in the market, including at least one product sold by one of the merging firms." Merger Guidelines § 4.1.1. A SSNIP is usually defined as five percent or more. *Id.*

The Brown Shoe Practical Indicia

Courts also **[**23]** determine the boundaries of a relevant product market by examining "such practical indicia as industry or public recognition of the [relevant market] as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Whole Foods, 548 F.3d at 1037-38 (Brown, J.)* (quoting *Brown Shoe, 370 U.S. at 325*). The *Brown Shoe* "'practical indicia' of market boundaries may be viewed as evidentiary proxies for proof of substitutability and cross-elasticities of supply and demand." *H & R Block, 833 F. Supp. 2d at 51* (quoting *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 792 F.2d 210, 218, 253 U.S. App. D.C. 142 (D.C. Cir. 1986))*.

2. ANALYSIS

The FTC defines the relevant product market here as "the supply of marine water treatment ("MWT") products and services to Global Fleet customers," where MWT products and services include "[t]he supply of BWT chemicals, CWT chemicals, and associated products and services." Plaintiff's Proposed Findings of Fact and Conclusions of Law ("PFF") ¶¶ 7, 17, ECF No. 81-2. This definition depends on at least three premises: (1) that there are no functional substitutes for the supply of **[*48]** boiler water treatment ("BWT") products and services or cooling water treatment ("CWT") products and services, (2) that it is appropriate to cluster BWT products **[**24]** and services and CWT products and services into one antitrust market for analytical convenience (while excluding other water treatment products), and (3) that it is appropriate to define the relevant market around "Global Fleets" as a distinct set of targeted customers. *See* PFF ¶¶ 17-44.

As an initial matter, the court finds that there are no reasonable substitutes for BWT or CWT products and services. These products and services have unique purposes—preserving the functionality of boilers and engines—and no party has pointed to any chemical or group of chemicals, or associated services, that could replace the critical functions that such products perform. In other words, it is possible to regard BWT products and services and CWT products and services as two *separate* product markets (e.g., the market for BWT and the market for CWT), insofar as none of the products grouped in either category have any reasonable substitutes that can perform the same functions.[1] Thus, the disputed threshold issues are (1) whether the markets for BWT and CWT can be clustered together in the manner proposed by the FTC, and (2) whether that cluster market can be further defined around the FTC's preferred set **[**25]** of targeted customers.

i. BWT and CWT as a Cluster Market

Defendants, supported by their expert, Dr. Mark A. Israel, advance two primary arguments against the FTC's proposed cluster market: that the market is overinclusive and underinclusive. Mem. Supp. Opp'n to Mot. at 23, ECF No. 50-2. They argue that the market is overinclusive insofar as it combines two categories of product—BWT and CWT—that are not reasonably interchangeable, meaning that combining them does not accurately reflect commercial realities and conflicts with the notion that product market definition depends on substitutability. ECF No. 50-2 at 24; DX-0060 ¶¶ 66-67. Defendants also argue that the proposed market is underinclusive because it is inappropriate for the FTC to consider BWT and CWT in the same market without also including the other water treatment and marine products typically sold alongside BWT and CWT, frequently in the same contract. ECF No. 50-2 at 25; DX-0060 ¶¶ 68-70. While Defendants acknowledge that these other products are not reasonable

[1] Defendants essentially concede this narrow point in their Memorandum in Opposition to Plaintiff's Motion for Preliminary Injunction, which acknowledges that "a market could be the market for the sale of boiler water treatment chemicals." ECF No. 50-2 at 2; *see also* ECF No. 50-2 at 28 (describing the appropriateness of separate BWT and CWT product markets).

substitutes for BWT or CWT, they assert that neither are BWT and CWT reasonable substitutes for one another, such that with respect to products typically **[**26]** sold together, the FTC cannot include one product category that is not a reasonable substitute and then exclude others on that same ground. In other words, "the FTC cannot both lump BWTC and CWTC because they are part of the same sales and purchase process, but then also exclude all other products that are also part of that process." ECF No. 50-2 at 25-26.

The FTC responds first that Defendants' argument regarding overinclusiveness—based on the absence of interchangeability between BWT and CWT—fundamentally misapprehends the nature of a cluster market. According to the FTC, a cluster market does not aim to group **[*49]** together substitutable products, but rather groups non-substitutable products that face similar competitive conditions. Reply to Opp'n. to Mot. 5, ECF No. 56-2. The FTC argues that since both BWT and CWT products function to maintain operational equipment on marine vessels, both involve the same customers with the same need for global consistency, and both are distinguishable from products like cleaning chemicals, which do not require the same level of consistency. ECF No. 56-2 at 5-6. Moreover, the FTC argues that Defendants face the same set of competitors for both products, **[**27]** and therefore BWT and CWT face similar competitive conditions and can be appropriately clustered. ECF No. 56-2 at 5-6. As for Defendants' underinclusiveness argument, the FTC notes that clustering BWT and CWT with other marine products is inappropriate because those products do not share similar competitive conditions, despite the fact that customers negotiate for them at the same time as they negotiate for BWT and CWT. ECF No. 56-2 at 9-10.

The court concludes that the FTC's use of the cluster market approach is appropriate in this case.[2] Although BWT and CWT products are distinct products intended for distinct uses, they are also indisputably similar. Both are specially blended chemicals that are injected into water systems using special equipment, in order to prevent corrosion and erosion in critical systems. Thompson Hrg. Tr. at 259:18-24; Fry Hrg. Tr. at 943:13-14. While both products make up a "small fraction of the cost of managing a ship," PX80014 ¶ 3, the cost of system failure in the absence of these products is high. JX-0135 at 002. The fact that these products are low cost, highly critical, and heavily dependent on precise chemistry means that maritime companies strongly **[**28]** prefer consistency in their use, so as to avoid the risk of adverse chemical reaction and the resulting temporary or catastrophic system failure. Moreover, BWT and CWT products are frequently sold together as part of an overall management program that includes a number of additional productrelated services. Deckman Hrg. Tr. at 475: 4-14. These similar characteristics matter because they factor into customers' decisions regarding the quantity of products they purchase, the timing of those purchases, as well as where they make their purchases. In other words, similar product characteristics—including function and risk—produce similar needs and constraints for shipping companies, which in turn affects supplier strategies and, accordingly, promotes similar competitive conditions across these product categories.[3]

[*50] It follows from this point that products that do not share key characteristics do not produce similar needs or constraints for shipping companies, meaning that they give rise to different competitive conditions. The court finds that the FTC has carried its burden to demonstrate those differences. While BWT and CWT chemicals are both "water treatment chemicals"—a category **[**29]** that includes "chemicals for the treatment of evaporator water, ballast water, potable water, and pool/spa water or their related equipment," DFF ¶ 85—the evidence is clear that (1) sales of BWT and CWT are the driving force behind sales in the "water treatment chemicals" category.[4] and (2)

---

[2] Defendants' argument regarding the lack of interchangeability between BWT and CWT—i.e., the alleged product market's "overinclusiveness"—is at odds with the concept of a cluster market as a doctrine that "allow[s] items that are not substitutes for each other to be clustered together in one antitrust market for analytical convenience." *Staples II, 190 F. Supp. 3d at 117*.

[3] The FTC also notes that for both BWT and CWT, "Defendants have similar market shares, earn similar margins, and face a nearly identical set of competitors," PFF ¶ 12, and the margins and revenue shares are higher than for other marine products. PX-61002 ¶¶ 84, 85. To be sure, competitive conditions for BWT and CWT are not identical. Defendants have noted that while engine manufacturers approve specific brands of CWT chemicals for use in their engines, DX-2599 at 0007, boiler manufacturers do not maintain any such list. DX-0060 ¶ 67. Moreover, there is at least one supplier of CWT chemicals that does not supply BWT chemicals. DX-0060 ¶ 67. Nevertheless, the law on cluster markets requires only *similarity* in competitive conditions—not indistinguishability. *See Staples II, 190 F. Supp. 3d at 117*.

other chemicals in that category, such as pool and spa chemicals, are easier to obtain from multiple suppliers. PX80006 ¶¶ 10. 27; Thompson Hrg. Tr. at 326:24-327:10. They also do not pose the same risks to a ship's critical systems, because they have no function related to those systems.

The same is true for the larger grouping of marine products. While Defendants correctly note that agreements for the sale of marine products to global fleets often include products in addition to BWT and CWT—such as tank cleaning chemicals, gases, or refrigerants, *see* Sarro Hrg. Tr. at 113 (noting that Teekay purchase agreements often include many different marine products, and that Teekay also purchases many products from WSS in addition to BWT and CWT); DX-1297 at 0013-0015 (listing products covered by purchase agreement)—the differences between these products and BWT/CWT are material. For example, tank cleaning **[**30]** products are less technically complex, do not pose the same operational risks, and are ordered on a short term, cleaning-by-cleaning basis, which makes it easier for shippers to switch suppliers. *See* Franzo Hrg. Tr. at 348:22-350:1-22 (describing the differences between tank cleaning and water treatment business and the difference in competitive conditions based on the characteristics of each product); JX-0254 ¶ 7 ("Different categories of chemicals require different levels of sophistication in chemistry. Water treatment chemicals are generally more sophisticated and harder to develop than other categories of marine chemicals."). Accordingly, tank cleaning presents a more lucrative business opportunity for smaller suppliers than does water **[*51]** treatment, where ships "really [do not] want to upset the apple cart by changing their products." Franzo Hrg. Tr. at 349:7-11; JX-0254 ¶ 3 (noting that tank cleaning is roughly 60% of [TEXT REDACTED BY THE COURT] business, and that water treatment business is small in comparison); PX-80028 at ¶ 3 (describing water treatment chemicals as [TEXT REDACTED BY THE COURT] "smallest product category" and tank cleaning chemicals as the largest). In other **[**31]** words, differences in product characteristics between BWT/CWT and other water treatment products lead to differences in maritime companies' sourcing decisions and are therefore connected to differences in competitive conditions.

Moreover, while the evidence suggests that companies tend to negotiate prices for multiple products at the same time, it also cuts against the notion that customers engage in one-stop shopping for all their marine products. *See* PX00004 at 010, 015 (noting that WSS and Drew customers do not typically "one-stop shop" and often "mix and match across suppliers"). In other words, framework agreements may set the price for several products from a particular supplier, but such agreements tend to be non-exclusive, leaving the door open to other, specific product purchases at individual ports. *See* PX-61002 at 041-042. Thus, an analytical approach that focuses on BWT and CWT to the exclusion of other marine products does not appear to fundamentally conflict with commercial reality, given that customers are empowered to make individualized product choices in different places and at different times.

For these reasons, the court concludes that FTC has appropriately clustered **[**32]** BWT and CWT products and services into one antitrust market for analytical convenience.

Table 2:
The Parties' Sales of Water Treatment Products by Type
2017

	WSS		Drew	
Product	Sales	Shares	Sales	Shares
Boiler water treatment chemicals	[redacted]			
Cooling water treatment chemicals				
Boiler and cooling water treatment equipment				
Water production treatment chemicals				
Pool & spa treatment chemicals				
Other water testing and dosing equipment				
Other water treatment chemicals				
Total				

Source: Parties' invoice data.

4 Notes: [illegible]

The table above, taken from DX-0060 at 0018, indicates that BWT and CWT products account for [TEXT REDACTED BY THE COURT]and[TEXT REDACTED BY THE COURT]of WSS and Drew's "water treatment products" revenue, respectively. All other chemicals in the category together account for only [TEXT REDACTED BY THE COURT]and [TEXT REDACTED BY THE COURT]of water treatment products revenue.

ii. "Global Fleets" as Targeted Customers

As defined by the FTC, "Global Fleets are fleets of 10 or more globally trading vessels—vessels above 1,000 gross tons in size that have traded at two ports that are at least 2,000 nautical miles apart in the preceding 12 months." Mot. Prelim. Inj. at 18, ECF No. 45-3. The FTC argues that it is appropriate to define the relevant product market around this group because "Global Fleets have distinct characteristics and requirements that limit customer choice, as compared to local or regional fleets," thus making them susceptible to price discrimination as a distinct customer group. ECF No. 45-3 at 19. In particular, the FTC points out that Global Fleet customers have "particular needs as it relates to centralized negotiation of contracts for delivery to geographically dispersed locations, product consistency, and product availability." ECF No. 45-3 at 19. The FTC also argues that Defendants have the ability to price discriminate because they "individually negotiate prices with each customer[,] and customers have a limited ability to arbitrage." ECF No. 45-3 **[**33]** at 19.

Defendants proffer several reasons why the "Global Fleets" distinction is not a meaningful way of segmenting customer groups. First, they contend that the definition of Global Fleets does not accord with commercial reality, given that neither WSS nor Drew use the FTC's definition of that term and less than half of WSS customers meet the Global Fleet criteria. ECF No. 50-2 at 26; DX-0060 ¶¶ 82, 85, 86. Defendants further argue that the Global Fleets construct is premised on arbitrary thresholds and accordingly produces variable and underinclusive results. Specifically, they allege that: (1) 43% of the vessels that WSS and Drew supply had trading patterns fitting the FTC's criteria in some fiscal quarters, but not in others, indicating **[*52]** that the boundaries of the Global Fleets construct are too permeable to be analytically helpful; and (2) the FTC's numerical cutoff—10 or more globally trading vessels—is arbitrary, and produces the following anomalous mismatches: (a) a quarter of the vessels in 23% of Global Fleets were not globally trading vessels, (b) 31% of the vessels in non-Global Fleets count as globally trading vessels, and (c) 20% of non-Global Fleets are comprised completely **[**34]** of globally trading vessels. ECF No. 50-2 at 27; *see also* DX-0060 ¶¶ 83-84 & Table 4. Defendants contend that including all vessels weighing 1,000 gross tons or more in the antitrust market would better accord with commercial realities.

The "Global Fleets" construct is meant to capture key aspects of the economic reality facing fleets with a significant number of globally trading vessels and which need access to the products and services that defendants provide. The construct purports to isolate a relevant subset of the market and measure how the result of a merger would affect customers within that subset. It follows that the construct is a useful way to discuss and predict economic conditions only if its key aspects correspond to elements of the existing marketplace that would make it possible to "profitably target a subset of customers for price increases" post-merger. *Sysco, 113 F. Supp. 3d at 38*. The FTC, relying on the analysis of its economic expert, Dr. Aviv Nevo, has carried its burden to show that the construct is useful here.

a. Global Fleets Constitute a Distinct Customer Group with Distinct Needs

The FTC has adequately demonstrated that Global Fleets are a distinct group with distinct needs, as compared **[**35]** to the entire group of MWT customers. The distinction matters primarily because vessel trading patterns differ. Some vessels trade more globally than regionally or locally, meaning they travel further, visit more countries and ports in more varied locations, and spend less time in port. PX-61000 ¶ 103. Within the FTC's definition of Global Fleets as fleets including ten or more globally trading vessels, a vessel trading partem that includes distances of more than 2,000 nautical miles is global, while regional patterns include distances of 500 and 2,000 nautical miles and local patterns include distances of less than 500 nautical miles. PX-61000 ¶ 105. The following data, reproduced from PX-61000 ¶ 110, illustrates the distinct travel patterns of local, regional, and globally trading vessels.

[*53]

EXHIBIT 8
Number of unique ports, countries, and continents visited, by trading pattern, 2017

	Trading Pattern	5th Percentile	25th Percentile	Median	75th Percentile	95th Percentile
	Number of unique ports visited					
1.	Global	5	12	18	25	38
2.	Regional	2	5	10	19	41
3.	Local	1	2	3	4	9
	Number of unique countries visited					
4.	Global	3	6	10	13	19
5.	Regional	1	1	3	5	12
6.	Local	1	1	1	2	3
	Number of unique continents visited					
7.	Global	1	2	3	4	5
8.	Regional	1	1	1	2	3
9.	Local	1	1	1	1	1

Source: Vessel Characteristic Data; Vessel Movement Data
Notes: Globally, regionally, and locally trading vessels are vessels that traveled more than 0 nm within the calendar year to two locations that were more than 2,000 nm, between 500 nm and 2,000 nm, and less than 500 nm apart from each other, as the crow flies. I include only the 42,986 live and active vessels of 1,000 gt or higher in 2017 that are classified as either globally trading, regionally trading, or locally trading in 2017.

Importantly, neither the emphasis on vessels with global trading patterns nor the 2,000 nautical mile cutoff for defining a globally trading vessel are arbitrary parameters. Different trading patterns create different product needs that affect how customers weigh the value of consistent worldwide seivice potential at high levels of product quality. PX-61000 ¶ 111 ("Globally trading vessels tend **[**36]** to be larger, travel much greater distances, and visit more countries and multiple continents during the course of a year. Therefore, it should be expected that then preferences over the importance of high quality water treatment products and services that are consistently available differs from vessels with regional and local trading patterns); *see* Sarro Hrg. Tr. at 77:15-25 ("Q. When Teekay's vessels are operating on a spot charter, how predictable is where they're traveling to? A. Well, it's quite unpredictable, actually, because it's subject to market conditions. So whatever charter we pick up at the time—you know, that's what ends up happening. And it's on a per-voyage basis, is whatever it is . . . would be where we're loading, and then we have to discharge. . . . Q. Do you know necessarily which port a spot charter will call in from month to month? A. No."); PX80002 at 003 ("Because we conduct much of our business as spot charters, we have limited ability to predict our vessels' trade routes, including what ports they will visit or when."). The industry itself recognizes that vessel trading patterns have commercial significance, as shown by the parties' own statements and internal **[**37]** documents. *See e.g.*, PX70006 (Grimholt IH Vol. 1 Tr.) at 164:23-167:15 (describing how WSS categorizes vessels as global when they "have traveled in excess of 2,000 nautical miles between the furthest points in a given twelve months," noting that such categorization "makes a difference [in] how [WSS] sell[s] and deliver[s]," and explaining how globally trading vessels "have different needs because they have vessels trading globally or further from their home ports, which means that our capability to serve them will be of more interest in a sales meeting than their local needs would be"); **[*54]** PX20388 at 005 (explaining that a potential sales model distinguishes between local, regional, and global trading patterns, and noting that the former two "don't necessarily correspond as well with our main competitive advantage which is our ability to provide standard products and services in virtually every port worldwide").[5] Notably, WSS collects data on which vessels traveled 2,000 nautical miles between furthest points in the last 12 months in order guide its sales strategy. *See* JX-0188 at 044-45.

The FTC's vessel size cutoff of 1,000 gross tons is also non-arbitrary and based on the parties' own conceptions **[**38]** of the market. The evidence shows that vessel size correlates with global trading pattern and, accordingly, with distinct product needs. *See* PX61000 ¶¶ 109, 111. In general, the larger the vessel, the more likely it is to trade globally. PX61000 ¶ 109. In keeping with this trend, internal documents show that Defendants

[5] Although WSS President and CEO Bjoerge Grimholt testified that trading pattern was not used internally for sales purposes, Grimholt Hrg. Tr. at 1224:24-25, this assertion is at odds with internal WSS documents explicitly using trading patterns to track sales and define market segments for sales purposes, *see, e.g.*, JX-0188 at 044-45, and with Grimholt's deposition testimony explaining the relationship between the two. PX70006 (Grimholt IH Vol. 1 Tr.) at 164:23-167:15.

focus their sales efforts on larger vessels and frame their business and competitive potential in terms of vessel size. *See* PX61000 ¶ 93; DX-1247_WSSFTC-0018878 at 11 (discussing categorization of vessels by weight for purposes of segmenting market and estimating market size); Grimholt Hrg. Tr. at 1236:10-16 (describing the total market in terms of sailing ships above 1,000 gross tons). Thus, combining the court's findings regarding trading pattern and vessel size, it follows that the FTC's definition of a globally trading vessel—vessels larger than 1,000 gross tons that have traveled 2,000 nautical miles between furthest points in the last 12 months—is both non-arbitrary and grounded in the ordinary course of business.

The evidence also shows that vessels are typically organized into fleets, containing varying numbers of globally trading vessels. *See* PX61000 ¶ 91. In **[**39]** order to measure the effect that a significant number of globally trading vessels would have on the water treatment needs of a fleet as a whole, Dr. Nevo organized the vessel-level raw data into fleets according to affiliation with unique owners or separate technical managers ("operators"). PX61000 ¶ 113. Dr. Nevo grouped vessels with the same operator into the same fleet, producing 9,407 unique "fleets" made up of varying numbers of vessels. PX61000 ¶¶ 113, 114; Nevo Hrg. Tr. at 586:6-20. He then defined "Global Fleets" as those having ten or more globally trading vessels, Nevo Hrg. Tr. at 586:21-587:6, and on the basis of that definition, identified 532 Global Fleets and calculated Defendants' market shares within the Global Fleets category. PX61000 ¶¶ 118, 123.

As noted above, Defendants objected to Dr. Nevo's definition of "ten or more globally trading vessels," on the grounds that ten vessels is arbitrary and incongruent with commercial reality. While the court agrees that Dr. Nevo's choice of ten globally trading vessels was arbitrary in the sense that the number ten is not compelled by any specific market reality, the court disagrees that Dr. Nevo's construction is therefore **[**40]** meaningless. As the court understands it, Dr. Nevo's choice of ten globally trading vessels was not intended as an exact statement of the threshold number of globally trading vessels a fleet must have in order to manifest distinct product-related **[*55]** needs and preferences. Rather, Dr. Nevo chose ten as a starting point for developing a series of statistical estimates, the non-statistical implications of which support the appropriateness of regarding Global Fleets as a distinct customer group.

Dr. Nevo's fleet-level analysis took the following course: first, he inferred—after analyzing data and documentation used or created in the ordinary course of Defendants' business—that fleets with a significant number of globally trading vessels were likely to have distinct preferences that uniquely suit global suppliers. Nevo Hrg. Tr. at 587:7-19. Then, using the fleet data he compiled, Dr. Nevo sought to approximate what share of the fleet-level market would have those preferences. Because he did not know what threshold number of vessels would separate fleets with distinct preferences from those without, Dr. Nevo chose the number ten because of its roundness and simplicity. Nevo Hrg. Tr. at 587:20-22 **[**41]** ("So then, the question is, where's the cutoff. And I started with ten. Ten is a starting point. . . . [I]t's a round number. That's literally why we chose [it]."), 589:3-4 ("[I]'ll be the first to admit . . . there's no hard rule as to why it was ten); *see also* *Staples II, 190 F. Supp. 3d at 118 n.10* (acknowledging and accepting expert's need to establish threshold cutoff for "practical analytical purposes"). After obtaining the results of that analysis, he ran trials to test the robustness of the results—that is, to measure how dependent his initial results were on his initial assumption of ten vessels. Nevo Hrg. Tr. at 589:1-590:11. Less dependency—i.e., more stability in the result—indicates the presence of a stable market reality that produces similar results despite variation in threshold numbers. *See* Nevo Hrg. Tr. at 596:20-597:19. Based on the initial trial, Dr. Nevo found that (1) Global Fleets accounted for most of all globally trading vessels—84% of vessels by tonnage and 71% by vessel count; (2) Global Fleets were mostly made up of globally trading vessels: 81.8% and 92.2% by count and tonnage; and (3) Global Fleets accounted for [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT] of WSS's and Drew's **[**42]** respective MWT revenue. *See* Nevo Hrg. Tr. at 595:16-596:13; PX61000 ¶¶ 118, 161, 123. He also found that similar market share calculations held across four subsequent trials, two substituting five and then fifteen as the threshold numbers, one using ten but omitting any attempt to standardize the names of "operators" as they appeared in the raw data, and one only measuring sales to all globally trading vessels, without sorting those vessels into fleets (thus eliminating the need for any threshold number at all). PX61000 ¶ 123 n.234; Nevo Hrg. Tr. at 589:14-590:11. Notably, the specific percentages differ between each of these trials. PX61000 ¶ 123 n.234. That is because the point of the trials is not to establish that any particular set of percentages is the most accurate one, but rather to rely on the consistency across the range of percentages to illustrate that (1) there is a significant segment of the market—whatever the exact numbers—that focuses on global trading and therefore has needs and preferences that distinguish it from other customers; and (2) that segment accounts for a majority of Defendants' business. *See* PX61000 ¶¶ 119-21. In other words, the qualitative implications **[**43]** of the percentages do not change even if the percentages themselves shift somewhat across trials. *See* PX61000 ¶ 123 n.234 (noting that market share percentages "are not qualitatively sensitive to alternative definitions of 'global fleets'"); Nevo Hrg. Tr. at 589:10-13 ("So . . . I really tried to say, well, what happens if I define it as 5 and 15, or various other measures, to make sure that the end result, at least qualitatively, doesn't actually change."). The court **[*56]** considers these factual observations to be accurate and well supported, and therefore finds that the FTC has carried its burden to demonstrate that it is appropriate to consider Global Fleets a distinct customer group within the market for MWT products.

b. <u>Price Discrimination Against Global Fleet Customers is Possible Post-Merger</u>

The court finds that the FTC has carried its burden to demonstrate that price discrimination is possible post-merger because: (1) Global Fleets are a distinct group of customers with distinct needs; (2) negotiation with Global Fleets typically occurs on an individualized basis; and (3) documentation reveals that Defendants have contemplated pricing differentials based on size and trading pattern. **[**44]** As the court has already discussed the first factor, the discussion in this section focuses on the remaining two.

Defendants typically negotiate framework agreements with Global Fleets for the whole fleet or for a significant proportion of vessels. *See e.g.*, PX80006 ¶ 21 (describing fleet-level negotiations for the entire [TEXT REDACTED BY THE COURT] fleet); JX-0277 ¶ 23 (describing same for Teekay). These negotiations are customer specific, and result in customer-specific pricing at ports relevant to the particular customer. *See* JX-0248 at 014 ("In negotiations, customers often focus on specific ports that they consider to be key in light of their trading patterns. They then negotiate a customer specific net price for the ports relevant to them."). JX-0240 at 011-014 (showing course of negotiation between [TEXT REDACTED BY THE COURT] and Drew Marine). While there are general pricing trends—for instance, low volume ports tend to have higher pricing than high volume ports—ultimate prices are determined on a customer-by-customer basis. PX70000 (Cassaras (Drew) IH Tr. at 84:8-85:3, 87:7-10). While customers retain the freedom to purchase outside of framework agreements, they typically **[**45]** choose not to do so with products for which consistency is valued. Sarro Hrg. Tr. at 106:9-107:11 (noting that he prefers not to purchase outside contract when "it's really important that you have that product on board from that supplier," including BWT). This individualization makes the pricing for each Global Fleet opaque to the next, which in turn facilitates differential pricing.

Moreover, WSS internal documents expressly contemplate market segmentation for the purpose of price discrimination. An internal pricing presentation dated November 2014 notes the benefits of "value-based pricing," which allows WSS to "segment customer[s] based upon preferences." PX20381 at 003. The presentation also distinguishes local and global customers by their preference for suppliers with global reach, and then considers a price discrimination exemplar that distinguishes local and global customers, noting that global customers are willing to pay more for global reach and describing how "[v]alue based pricing identifies differences in customers' preferences and valuation of attributes, then identifies ways to make them pay different prices for virtually the same product/service." PX20381 at 003. The **[**46]** presentation also describes how "[a]greement discount levels will be built bottom up by applying indexes to multiple price discrimination levels," which include "segment" and "trading pattern" indexes, among other factors. PX20381 at 011.

In sum, based on (a) the lack of pricing transparency in a marketplace characterized by individualized negotiations, combined with (b) evidence that Global Fleets constitute a distinct segment of the market with distinct preferences, (c) evidence that WSS recognizes the potential benefits of price discrimination, and (d) the lack of **[*57]** any evidence suggesting arbitrage, the court concludes that price discrimination is possible post-merger.

iii. Hypothetical Monopolist Test

Having determined in the foregoing discussion the validity of the cluster market and targeted customer approaches in defining the relevant product market in this case, the court also finds that the *Brown Shoe* practical indicia support the FTC's candidate market, with regard to (1) a product's peculiar characteristics and uses, for which there are no reasonable substitutes; (2) industry recognition of the product market as a separate entity, as shown by ordinary course documents demonstrating **[**47]** a business focus on globally trading vessels; and (3) distinct customers with distinct needs who require (4) specialized vendors who provide both the products and value-added services. *Whole Foods, 548 F.3d at 1037-38 (Brown, J.)*; *Brown Shoe, 370 U.S. at 325*. The court now turns to an examination of expert evidence concerning the Hypothetical Monopolist Test ("HMT").

To model the course of a hypothetical monopolist, Dr. Nevo—the only economist to have performed the HMT in this case—conducted a critical loss analysis, which essentially calculates "the largest amount of sales that a monopolist can lose before a price increase becomes unprofitable." *Swedish Match, 131 F. Supp. 2d at 160*. The test has three steps. First, Dr. Nevo calculated the critical loss threshold—that is, the point at which a hypothetical monopolist would lose too many customers for a SSNIP to be profitable. This step is purely mathematical—the critical loss threshold is the point at which increased profit margins resulting from an increase in price are offset by increased costs resulting from lost sales. Second, Dr. Nevo estimated the *actual* aggregate diversion ratio, which "represents the proportion of lost sales that are recaptured by all other firms in the proposed market as the result of a price increase . . . [s]ince **[**48]** these lost sales are recaptured within the proposed market, they are not lost to the hypothetical monopolist." *H & R Block, 833 F. Supp. 2d at 63*. The aggregate diversion is calculated with reference to suppliers to whom lost customers would potentially take their business. *Sysco, 113 F. Supp. 3d at 34*. Third, Dr. Nevo compared aggregate diversion to critical loss, and if aggregate diversion exceeds critical loss, then a SSNIP would be profitable for a hypothetical monopolist. *Id.* (citing *Swedish Match, 131 F. Supp. 2d at 160*).

Dr. Nevo used four kinds of data to calculate margins for different trials—estimates of gross margin for all water treatment products sold to all customers, WSS and Drew invoice data specific to BWT/CWT and Global Fleets, lowest gross margins by quarter, and variable cost margins based on accounting data specific to BWT/CWT and Global Fleets. For aggregate diversion, Dr. Nevo used three kinds of data—revenue information provided by marine suppliers, WSS salesforce data, and WSS and Drew win-loss data. PX61000 ¶ 227. After running multiple trials with varying inputs, including a SSNIP of 10% (in addition to the typical 5%), Dr. Nevo found that across all cases, the highest critical loss estimate was 17.5%, and the lowest aggregate diversion ratio estimate was **[**49]** 90%. PX61000 ¶¶ 232, 237; Nevo Hrg. Tr. at 903:14-904:4. In cross-examining Dr. Nevo and in closing arguments, Defendants challenged the basis for his estimates of margins and aggregate diversion, correctly noting that his BWT/CWT-specific estimates are drawn from broader data sets that include all water treatment products. Nevo Hrg. Tr. at 812:1-17. Nevertheless, Defendants' expert, Dr. Israel, presented nothing to suggest that the methodology Dr. Nevo employed in arriving **[*58]** at his estimates was flawed (apart from contesting the appropriateness of a cluster market analysis), and did not present any alternative calculations or HMT results. *See generally* DX-0060. Moreover, the gap between critical loss and aggregate diversion in every trial was so large as to ensure the stability of the HMT's qualitative result against any but the gravest of statistical errors. *See* PX61000 ¶¶ 232, 237. Further, that large gap is consistent with other, qualitative evidence regarding the role of ship chandlers and industrial suppliers in the product market.[6]

---

[6] Defendants argue that industrial suppliers and ship chandlers should be included as sellers in the relevant market, insofar as they sell some MWT chemicals to marine customers. The court disagrees. The evidence establishes that industrial suppliers focus most of their business on providing water treatment for industrial use on land, and have very limited involvement in the marine market. *See, e.g.*, Lange Hrg. Tr. at 1141:1-9 (noting that Nalco (owned by Ecolab) does not promote itself to the marine business), 1143:2-17 (describing total of [TEXT REDACTED BY THE COURT] in annual sales to marine industry, [TEXT REDACTED BY THE COURT] of which is to WSS); JX-0283 at 001 (explaining that [TEXT REDACTED BY THE COURT] "deals with water treatment chemicals for manufacturing industry sector on 'land,'" that only [TEXT REDACTED BY THE COURT] deals with water treatment for the marine sector, and that it only sells to a distributor in Japan). Additionally, Defendants have not shown that the small number of marine sales attributable to industrial suppliers includes the range of additional services that comprise the "total solution" that WSS and Drew provide. *Cf. Sysco, 113 F. Supp. 3d at 26* ("[F]or example, fruit can be bought from both a grocery store and a fruit stand, but no one would reasonably assert that buying all of one's groceries from a fruit stand is a reasonable substitute for buying from a grocery store."). Defendants have also produced no evidence to suggest that

In sum, the court concludes that "the supply of MWT products and services"—including BWT chemicals, CWT chemicals, and associated products **[**50]** and services—to Global Fleets constitutes a relevant antitrust market.

a. Market Concentration, Probable Effects on Competition, and Prima Facie Case

1. LEGAL STANDARD

Having defined a relevant antitrust market, the court must "consider the likely effects of the proposed acquisition on competition within that market." *Swedish Match, 131 F. Supp. 2d at 166*. At this juncture, the government must complete its prima facie case by showing that "the merger would produce 'a firm controlling an undue percentage share of the relevant market, and [would] result[ ] in a significant increase in the concentration of firms in that market.'" *Heinz, 246 F.3d at 715* (quoting *Philadelphia Nat'l Bank, 374 U.S. at 363*); *see also* *Baker Hughes, 908 F.2d at 982*. "Market concentration . . . is often measured using the Herfindahl-Hirschmann Index ("HHI")." *Heinz, 246 F.3d at 716*; *Swedish Match, 131 F. Supp. 2d at 167 n.11*. As the court explained in *Swedish Match*:

> "The HHI calculates market power [by] summing the squares of the individual market shares of all the firms in the market. The HHI takes into account the relative size and distribution of the firms in a market, increasing both as the number of firms in the market decreases and **[*59]** as the disparity in size among those firms increases."

Id. Sufficiently high HHI figures establish a *prima facie* case of anticompetitiveness. *H & R Block, 833 F. Supp. 2d at 71* (citing *Heinz, 246 F.3d at 715 n.9*). The merger guidelines **[**51]** consider markets with an HHI above 2500 to be "highly concentrated," and state that "[m]ergers resulting in highly concentrated markets that involve an increase in the HHI of more than 200 points will be presumed to be likely to enhance market power." Merger Guidelines § 5.3; *Heinz, 246 F.3d at 715* (citing *Baker Hughes, 908 F.2d at 982*) (noting that significant increase in market concentration "establishes a 'presumption' that the merger will substantially lessen competition.").

The FTC may also bolster its *prima facie* case by offering additional evidence. Relevant to this case, courts generally recognize that "a merger that eliminates head-to-head competition between close competitors can result in a substantial lessening of competition." *Sysco, 113 F. Supp. 3d at 61*. Where head-to-head competition between close competitors is an important feature of the relevant market, "[a] merger is likely to have unilateral anticompetitive effect if the acquiring firm will have the incentive to raise prices or reduce quality after the acquisition, independent of competitive responses from other firms." *H & R Block, 833 F. Supp. 2d at 81*; *see also Whole Foods, 548 F.3d at 1043 (Tatel, J.)* (citation omitted) (internal quotation marks omitted) ("[T]here can be little doubt that the acquisition of the second largest firm in the market by the largest firm **[**52]** in the market will tend to harm competition in that market.").

2. ANALYSIS

i. Defendants Have High Market Shares and HHIs Predict High Concentration

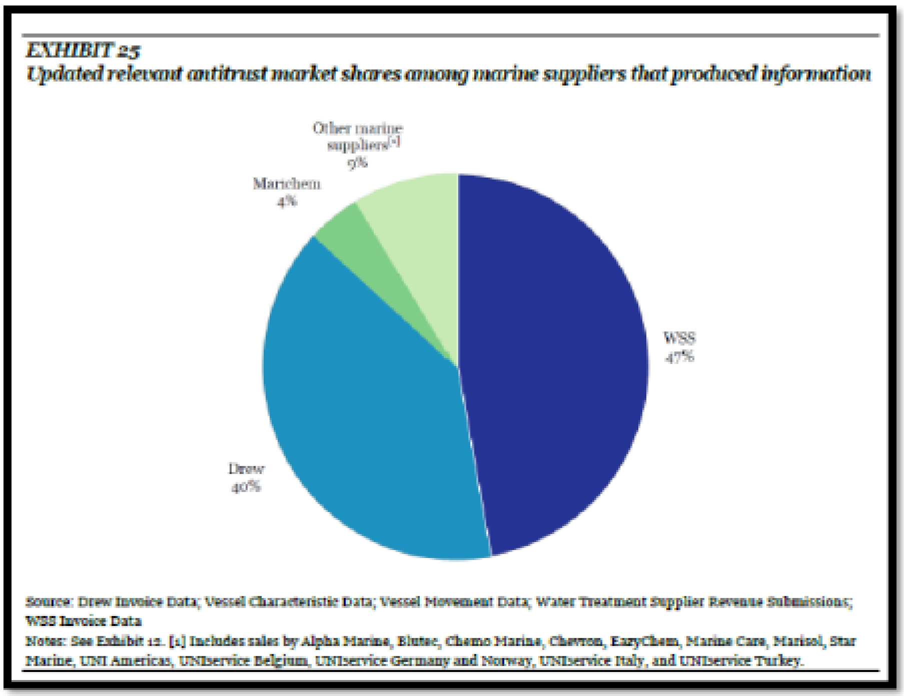
Dr. Nevo calculated HHIs based on market share information from two sources—revenue information reported by Defendants and in sworn declarations of third-party suppliers, and information provided by WSS's Potential Sales Model ("PSM").[7] PX61000 ¶¶ 250-51. Dr. Nevo claims that market shares based on revenue information are

---

ship chandlers—marine retailers that stock a wide range of consumable goods in warehouses near ports—provide that solution. The same is true of testing equipment manufacturers. These observations are consistent with the HMT results, which suggest that neither industrial suppliers nor ship chandlers would be considered viable substitutes by any significant group of customers in the event of a price increase. To the extent that Defendants suggest that ship chandlers or other companies could easily reorganize to supply a total MWT solution that argument relates to ease of entry into the market, not to current market conditions.

preferred because such information "actually reflect[s] the actual choices made by customers when choosing products." Nevo Hrg. Tr. at 627:17-628:3. He calculated market size by (a) aggregating the revenues of all suppliers who provided information, and (b) assigning each supplier a share based on their revenue as a proportion of overall revenue. *See* PX61000 ¶¶ 252-56. The market share calculations indicated that Defendants are the two largest MWT suppliers by revenue. The following graph depicts the size of all marine water treatment suppliers who submitted revenue data.

[TEXT REDACTED BY THE COURT] PX61002 ¶ 120, Ex. 12. Acknowledging that at least one supplier failed to submit revenue data, and to account for the possibility **[**53]** that other unknown suppliers exist. Dr. Nevo ran trials including revenue entries for five and ten unknown suppliers by assigning them revenue totals equal to the median for all non-party MWT suppliers. Nevo Hrg. Tr. at 628:8-17 (noting inclusion of all suppliers mentioned by Dr. Israel with exception of one, and including "dummy" suppliers). **[*60]** Dr. Nevo also ran trials assigning the "dummy" suppliers revenues equal to the *average* of all non-party MWT suppliers. PX61002 ¶ 271. Assuming five missing suppliers, and using the median value for "dummy" suppliers. Dr. Nevo calculated market shares at 46.1% for WSS and 38.7% for Drew (84.7% combined). PX61002 ¶ 271. Additional trials with different inputs produced combined shares between 78.7% and 82.8%. PX61002 ¶ 71 Ex. 26. The following graph depicts the result of Dr. Nevo's market share calculations, which correspond to his revenue calculations.[8]



PX61002 ¶ 270, Ex. 25. Based on these market shares, the post-merger HHI is 7,214, with an increase of 3,563, indicating extremely high market concentration and a very large increase in concentration. PX61002 ¶ 272, Ex. 27. Alternative trials based on the different formulations of the revenue and **[**54]** market share calculations revealed HHIs between 6,235 and 6,883, along with changes in HHIs between 3,075 and 3,399. PX61002 ¶ 272, Ex. 27.

---

[7] Though Dr. Nevo believes that the PSM tends to overestimate the size of the market and accordingly understate market concentration, he found that the results of his calculations using the PSM do not qualitatively differ from those obtained using revenue information from MWT suppliers. PX61000 ¶ 251.

[8] Defendants contend that the revenue information upon which Dr. Nevo relied is "unverified" because he made no effort to verify the accuracy of the information with the submitting parties. Hrg. Tr. at 1877:10-12. The court notes however that much of the revenue information was included in declarations given under penalty of perjury, and although some was provided in email communications with the FTC, Defendants have not proffered any specific reason to doubt the information's accuracy.

Defendants' expert Dr. Israel challenged Dr. Nevo's analysis on a number of grounds. First, Dr. Israel questioned the appropriateness of applying the cluster market doctrine and focusing on Global Fleets, contending that BWT and CWT should be broken out separately and that the relevant market should include sales to all vessels. DX-0060 ¶¶ 109-10. Dr. Israel also suggested that Dr. Nevo's use of revenues as a metric to compute shares is **[*61]** problematic because it (a) relies on several estimates and assumptions to fill gaps in revenue data, (b) places more weight on larger vessels with more engines and boilers, rather than treating every vessel as an equal business opportunity, and (c) ignores the utility of treating sales of MWT chemicals as unit sales—corresponding to vessels—where one vessel makes one lower or higher-priced product choice and so constitutes one unit share. DX-0060 ¶¶ 112-114. Dr. Israel calculated market share based on sales to all vessels weighing 1,000 gross tons or more. DX-0060 ¶¶ 108, 111, 112, 115. He also employed a "single **[**55]** invoice" rule, whereby he assumed that any vessel with less than two invoices from the merging parties in 2017 was making a "one-off" purchase, which Dr. Israel took to mean that that vessel purchased most of its BWT or CWT products from other suppliers. DX-0060 ¶ 116. Dr. Israel separated BWT and CWT into individual market categories, and, applying the single invoice rule, computed Defendants' combined market share as 31% and 33%, resulting in HHIs that are substantially lower and below the Guidelines cutoff of 2500. DX-0060 ¶ 117.

The court credits Dr. Nevo's analysis. While it has already determined that both the cluster market approach and the focus on Global Fleets are appropriate, the court also disagrees with Dr. Israel for other reasons. For one, the court sees no justification for treating all vessels as constituting equal shares of the overall market for MWT. The core of the FTC's argument in this case—as borne out by the evidence—is that all vessels are *not* created equal. *See* Nevo Hrg. Tr. at 640:18-19 (noting that "not all vessels are created equal"). Where a vessel has more boilers and engines, it has greater MWT needs that comprise a correspondingly larger part of the **[**56]** market, making such vessels more valuable to suppliers. Conducting the analysis by using just the number of vessels obscures this fact, while using revenue data acknowledges that capturing the market for larger ships means capturing a larger part of the market for MWT. The court views this increased sensitivity to market reality as a strength of Dr. Nevo's revenue-based analysis, not a flaw. Moreover, while there is some imprecision inherent in estimating revenue shares for suppliers that did not produce revenue information, there appears to be only one known supplier—Vecom—that failed to produce such data. *See* PX61002 ¶ 271 Ex. 26. Dr. Nevo ran trials accounting for up to ten additional hypothetical suppliers with revenues matching the median and average of all nonparty suppliers. *See* PX61002 ¶ 271 Ex. 26; PX61000 ¶ 263 Ex. 32. Defendants have pointed to no evidence suggesting that the absence of specific information about one missing supplier would change the data more substantially than ten additional suppliers with median or average revenues.[9] *See* *Sysco, 113 F. Supp. 3d at 54* ("The FTC need not present market shares and HHI estimates with the precision of a NASA scientist. The 'closest available approximation' **[**57]** often will do.") **[*62]** (quoting *FTC v. PPG Industries, Inc., 798 F.2d 1500, 1505, 255 U.S. App. D.C. 69 (1986))*.

Moreover, Dr. Nevo explained in his reply report that, notwithstanding his conceptual misgivings, he did compute market shares and HHI using Dr. Israel's methodology. PX61002 ¶ 142. Disregarding the single-invoice rule and clustering BWT and CWT, Dr. Nevo's analysis yielded a combined market share across all vessels of 49.2% and lower bound HHI of 2,546 with change in HHI of 945. *See* PX61002 ¶¶ 141-42, Ex. 15 & 16. Dr. Nevo further explained at the evidentiary hearing and in his reply report that he performed multiple alternative HHI calculations using several of Defendants' preferred candidate markets. Nevo Hrg. Tr. at 637:24-640:6. These markets include supply of marine water treatment as a whole, BWT separately, CWT separately, and one market including all chemicals, gases, and refrigerants—all at the vessel level, regardless of trading pattern, and including only vessels weighing at least 1,000 gross tons. Nevo Hrg. Tr. at 637:24-640:6; PX61002 ¶¶ 104-12. The results in each case

---

[9] The court does however have concerns about Dr. Israel's "single invoice" rule. In an effort to exclude "one-off" purchasers, that rule excludes any vessel with only a single invoice in 2017, regardless of how much was purchased in that invoice and regardless of the timing of purchases from year to year. Thus, if a vessel were to purchase multiple times from Defendants in 2015 and 2016, but only once in 2017, the single invoice rule would treat that vessel as a non-loyal customer that bought its total supply of MWT elsewhere—ignoring the quantity it did buy from Defendants during 2017, and discounting the possibility that the vessel stocked up on supplies for the relevant time period, or experienced downtime, or did not need to purchase again during that year for some other reason.

satisfied the Guidelines threshold for a structural presumption.[10] PX61002 ¶ 104 Ex. 8. In other words, here, as in *PPG* and *Sysco*, the FTC has presented "share calculations for **[**58]** 'every market the evidence suggests is

remotely possible,' which yield[ed] results of similar magnitudes in market concentration." *Sysco, 113 F. Supp. 3d at 54* (quoting *PPG Industries, 798 F.2d at 1506*).

In sum, the court finds that based on Dr. Nevo's testimony and other evidence, the FTC has demonstrated that the proposed merger will significantly increase concentration in the market for supply of MWT products to Global **[**59]** Fleets. Thus, the FTC has made out a *prima facie* case and established a rebuttable presumption that the merger will substantially lessen competition in the aforementioned market.

ii. Ordinary Course Documentation and Customer Testimony Confirm Market Position and Suggest Competitive Effects From Elimination of Head-to-Head Competition

The notion that WSS and Drew are each other's primary competition in the relevant market is supported by a number of Defendants' own documents. For instance, in a January 2015 internal presentation on the strategic rationale for the merger, WSS acknowledged that "[t]he combined entity will be the unrivalled leader in maritime services in general and marine chemicals in particular." PX20329 at 48. Another WSS internal presentation titled "Global Strategy 2013-2017" described WSS as having "relatively high market shares within Marine Chemicals"—

listing WSS as possessing slightly more than 50% market share in marine chemicals and describing Drew as having 25%. JX-0192 at 005. Furthermore, internal Drew documents acknowledge that **[*63]** "Drew Marine essentially has one global competitor - Wilh. Wilhemsen Holding ASA." JX-0055 at 027; *see also* JX-0053 at 024 (noting **[**60]** that "VPP segment is dominated by Drew Marine and the market's largest participant, Wilh. Wilhelmsen Holding ASA" and that "[r]emaining market [is] characterized by small regional/local suppliers, specializing in product sub-categories with limited product offerings, execution capabilities, and geographic reach."); JX-0048 at 006 (suggesting in strategic planning email that if Drew were to "[a]cquire WSS chemical business, take away [its] main competitor and win back this space fully for [Drew Marine], this could increase our ability to charge far better prices and win across all segments."); JX-0182 at 067 (noting that "WSS and DM hold majority of contract business for marine chemicals (in particular water treatment) due to long-term market participation and global presence."); JX-0096 at 054 (describing Drew Marine as "one of two global players in the performance chemicals market"). Moreover, the record includes multiple instances of serious competition between WSS and Drew, specifically on issues such as price and other non-price incentives.[11] *See* *Sysco, 113 F. Supp. 3d at 64-65*.[12]

Customer testimony from Global Fleets further supports the notion that Defendants occupy the number one and number two market **[**61]** positions and that competition between them plays a key role in providing consumer benefits at the fleet level. *See, e.g.*, [TEXT REDACTED BY THE COURT] (describing WSS and Drew as only viable options, describing how merger would leave fleet without alternatives, describing how negotiation with Vecom broke down over capability concerns); Sarro Hrg. Tr. at 93:24-99:9, 157:6-25 (describing WSS and Drew as only realistic options, and explaining how review process that originally included multiple suppliers was necessarily narrowed to WSS and Drew based on capability considerations); [TEXT REDACTED BY THE COURT] (describing WSS and Drew as only credible options, explaining how other suppliers would be unable to meet fleet-level needs, and explaining that merger would leave fleet without options); *see also* PX400013 (same). The court agrees with Defendants that such testimony is not without its flaws—while many customers testified that they consider Drew and WSS to be the only proven suppliers capable of meeting their needs on a global basis, some also admitted that they have not undertaken any detailed investigation of other suppliers. **[*64]** *See, e.g.*, PX70028 106:14-18. It is also true that customer **[**62]** testimony alone is often considered a less reliable form of evidence in this context. *Arch Coal, 329 F. Supp. 2d at 145* (noting that "[i]n many contexts . . . antitrust authorities do not accord great weight to the subjective views of customers in the market."). Nevertheless, in light of the extensive documentary and statistical evidence the FTC has presented in this case, it does not appear that the FTC is overrelying on customer input, and the fact that the documentary and statistical evidence aligns with customer testimony bolsters the reliability of the testimony.

iii. Quantitative Evidence Suggests Competitive Effects Based on High Market Shares and Elimination of Head-to-Head Competition

---

[11] *See, e.g.*, [TEXT REDACTED BY THE COURT] (describing process of pitting WSS and Drew against one another, resulting in lower prices); Knowles Hrg. Tr. at 1426:23-1427:6 (describing how Drew won [TEXT REDACTED BY THE COURT] business through competitive pricing against WSS); PX20063 (internal WSS email describing "aggressive offer from Drew" leading to increase in cost savings for Global Fleet customer); PX10346 at 002 (describing multiple non-price benefits afforded by Drew to Global Fleet customer in an effort to win business from WSS).

[12] Defendants argue that current market pricing is inconsistent with the notion that they exercise market power. This is because the generally low cost of MWT (as a function of vessel operating cost) relative to the importance of the products should incentivize suppliers to charge higher prices to realize maximum value. Defendants argue that the fact that suppliers have not done so indicates that the products must exist in a competitive environment—not a highly concentrated (and therefore noncompetitive) one. Israel Hrg. Tr. at 1500:8-1501:17. However, the court does not understand the FTC to contend that the current market is noncompetitive—rather, the FTC contends that the market *is* competitive, and that the continued competitiveness of the market depends on aggressive competition between the two existing global suppliers with high market shares. A head-to-head competition theory is not inconsistent with the presence of lower prices in the current market.

Dr. Nevo performed two additional studies to confirm that Defendants will have the incentive and ability to raise post-merger prices—the Gross Upward Pricing Pressure Index methodology ("GUPPI") and a merger simulation model.

A GUPPI analysis is essentially a bargaining framework that quantifies a firm's change in incentive to raise prices following a merger—i.e., the "upward pricing pressure." PX61000 ¶¶ 318-19. The model takes as a premise that, when WSS (or Drew) bids for business in the current market, higher prices increase **[**63]** the chance that customers will choose another supplier, and that given the closeness of competition between WSS and Drew, Drew (or WSS) will usually be the alternative supplier. PX61000 ¶ 317. In this model, the firm that chooses to raise or lower prices must balance the potential for increased profits at a higher price against the potential to lose profits but gain business at a lower price. PX61000 ¶ 317. The optimal price lies somewhere between these points. PX61000 ¶ 317. The model hypothesizes that without Drew or WSS as a check, the need for balancing disappears. PX61000 ¶ 317. The incentive to raise prices depends on the size of the fraction of diverting WSS customers that go to Drew (or vice versa) and the size of the margin that Drew or WSS earns. PX61000 ¶ 320. To estimate these variables, Dr. Nevo used a number of values drawn from market share estimates based on revenue data, market share estimates based on WSS's PSM tool, WSS salesforce data, and WSS win-loss data. PX61000 ¶ 321. For margins, Dr. Nevo used invoice data and variable cost margins. PX61000 ¶ 323. Dr. Nevo's results across multiple trials, accounting for variations of these inputs and calculated from the perspective **[**64]** of both Drew and WSS, produced percentages consistently over 20%, indicating strong incentives for post-merger price increase. Nevo Hrg. Tr. at 658:20-660:23.[13]

Dr. Nevo's merger simulation model aimed to quantify the effect that combining the first and second choice MWT suppliers would have on bargaining and prices in the relevant antitrust market. The model hypothesized that since customers needing supply are likely to solicit more than one bid and play the second-best supplier alternative off the first-best in order to secure better offers, a situation in which (a) the first and second-best merge, and (b) the third-best supplier (which will become second-best post-merger) represents a weak alternative relative to the merging parties, will tend to produce higher prices. Indeed, the weaker an option the third supplier represents relative to the merging parties, the more likely it is that customers will face higher prices. PX61000 ¶¶ 332-23; **[*65]** Nevo Hrg. Tr. at 663:22-665:5, 670:16-671:18. Using the same market share and margin estimates as in the GUPPI analysis, Dr. Nevo calculated estimated percentage price increases post-merger using eight scenarios involving all input combinations. Percentage **[**65]** increases across all sensitivities ranged from 13.6% to 53.1% ($6.7 million to $26 million in dollar increases), with ranges based on Dr. Nevo's preferred data of 29% to 46.6% (14.4 million to 23 million in dollar increases). PX61000 ¶ 339. Notably, the model did not predict the timing of price increases. As Dr. Nevo testified at the evidentiary hearing, such high price increases can be implemented over time, and in a market where it is typical for parties negotiating framework agreements to bargain over substantial discounts off list prices, price increases could simply involve reducing the amount of the discount in proportion to reduced negotiating leverage. Nevo Hrg. Tr. at 675:12-677:5.

Defendants argue that Dr. Nevo's models are flawed because they depend on unreliable data, specifically incomplete win-loss data and overbroad salesforce data. *See* Nevo Hrg. Tr. at 581:23-582:3 ("THE COURT: Dr. Nevo . . . for this win-loss data . . . what kind of numbers are we talking about in reaching these percentages? THEWITNESS: So these are very small numbers. I forget exactly. . . . But I think this is—it is very sparsely populated."), 722:11-723:8 (noting that salesforce and win-loss datasets **[**66]** are not specific to the market alleged). While the court agrees that there are some reliability issues with both the win-loss and salesforce data, the court disagrees that this flaw dooms the studies' significance, especially when, with respect to the merger simulation model in particular, the difference in market share between the merging parties and the third-best alternative so closely tracks the model's basic assumptions. Win-loss and salesforce data were the basis for market share estimates in only two of the scenarios in each analytical category (GUPPI and merger simulation), and did not form the basis of Dr. Nevo's preferred calculations. In all other trials, market shares were estimated using other data, and the results were stable across these variations. Moreover, even acknowledging the limited usefulness of

---

[13] Dr. Nevo's calculations did not rely on the salesforce data for the Drew GUPPI because that data was unavailable. Nevo Hrg. Tr. at 660:15-16.

certain data, calculations using that data can be considered as confirmatory, insofar as the results match the results of calculations that use more reliable data and accord with the inferences suggested by a larger body of evidence. *See* *Sysco, 113 F. Supp. 3d at 67* (finding merger simulation strengthened *prima facie* case despite imperfections in underlying data where result was qualitatively robust **[**67]** to other variations using more reliable data). Thus, the court concludes that Dr. Nevo's GUPPI analysis and merger simulation model strengthen the FTC's *prima facie* case that the proposed merger will substantially lessen competition in the relevant antitrust market.[14]

[*66] *iv. Summary*

The FTC has made out a strong *prima facie* case of anticompetitive effects based on high market concentration and has bolstered that case with additional evidence that the merger would substantially lessen competition in the market for supply of MWT chemicals and services to Global Fleets.

2. Rebuttal

Given the court's conclusion that the FTC has met its burden to show a *prima facie* case, the burden now shifts to Defendants "to show that traditional economic theories of the competitive effects of market concentration are not an accurate indicator of the merger's probable effect on competition in [this] market or that the procompetitive effects of the merger are likely to outweigh any potential anticompetitive effects." *CCC Holdings, 605 F. Supp. 2d at 46*. Typically, "the more 'compelling the [FTC's] prima facie case, the more evidence the defendant must present to rebut [the presumption] successfully." *Sysco, 113 F. Supp. 3d at 72* (quoting *Baker Hughes, 908 F.2d at 991*). Given that the FTC **[**68]** has made out a strong prima facie case, Defendants must make out a correspondingly strong rebuttal showing.

a. Barriers to Entry or Expansion

1. LEGAL STANDARD

A prima facie showing of anticompetitive effects associated with a merger can be rebutted by—among other factors—evidence that there are no significant entry barriers in the relevant market. *CCC Holdings, 605 F. Supp. 2d at 47*. Indeed, the D.C. Circuit has recognized that "[t]he existence and significance of barriers to entry are frequently . . . crucial considerations in a rebuttal analysis," given that "[i]n the absence of significant barriers, a company probably cannot maintain supracompetitive pricing for any length of time. *Baker Hughes, 908 F.2d at 987*. Accordingly, analysis of ease of entry—"the ability of other firms to respond to collusive pricing practices by entering to compete in the market," *Cardinal Health, 12 F. Supp. 2d at 54-55*—is key to "evaluating whether market

---

[14] The court also acknowledges the vessel-level "switching" study performed by Dr. Israel, which investigated head-to-head competition by examining what happens when vessels stop buying MWT from one of the merging parties, in order to find out whether the vessels "switch" to the other merging party or go elsewhere. Essentially, Dr. Israel used sales data to focus on vessels weighing 1,000 gross tons or more that purchase from one of the merging parties in one year but not the next year (or years, in some formulations). If that vessel disappeared from the invoice data for one party, and did not show up in the invoice data for the other within the relevant time period, Dr. Israel counted it as a "loss." Dr. Israel's results indicated that most vessels that switch from one merging party do not typically switch to the other. DX-0060 at ¶ 124 & Appendix 3.

Dr. Israel's study does not factor heavily in the court's calculus for several reasons: (1) the study does not appear to address the effect of the transaction on fleet-level bargaining over framework agreements, unlike Dr. Nevo's studies; (2) it employs the single-invoice rule, which this court has already found to be problematic in note 9, *supra*; (3) it assumes that vessel absences from sales data for a given period mean that another supplier is serving its needs, but provides no data to support that assumption (while the FTC has come forward with some evidence to show that the assumption is false or true in only a small number of cases that do not relate to competitive considerations, *see, e.g.*, PX70025 (Sarro Dep. Tr. at 116:12-23); PX40031 at 001)).

concentration statistics accurately reflect the pre-and likely postmerger competitive picture." *Heinz, 246 F.3d at 717 n.13*. "Low barriers to entry enable a potential competitor to deter anticompetitive behavior by firms within the market simply by its ability to enter the market." *Id.* (citing *FTC v. Procter & Gamble Co., 386 U.S. 568, 581, 87 S. Ct. 1224, 18 L. Ed. 2d 303 (1967))*. "In other words, entry is one way in which post-merger pricing practices can be forced **[**69]** back down to competitive levels." *CCC Holdings, 605 F. Supp. 2d at 47*.

Nevertheless, "[t]he prospect of entry into the relevant market will alleviate concerns about adverse competitive effects only if such entry will deter or counteract any competitive effects of concern so the merger will not substantially harm customers." Merger Guidelines § 9. Thus, entry must be "timely, likely, and **[*67]** sufficient in its magnitude, character, and scope to deter or counteract the competitive effects of concern." *Id.*; *Cardinal Health, 12 F. Supp. 2d at 55*. According to the Merger Guidelines, entry is timely when it is "rapid enough to make unprofitable overall the actions causing [competitive] effects and thus leading to entry," likely where it is profitable even "accounting for the assets, capabilities, and capital needed and the risks involved"—including sunk costs—and sufficient where the entering competitors provide products that "are . . . close enough substitutes to the products offered by the merged firm to render a price increase . . . unprofitable" and there are limited constraints on entrants' "competitive effectiveness," such that one firm can replicate the scale and strength of a merging firm, or one or more firms can operate without competitive disadvantage. Merger Guidelines § 9.1-9.3 **[**70]** . In general, "[t]he relevant time frame for consideration . . . is two to three years." *Staples II, 190 F. Supp. 3d at 133*. The expansion of current competitors is regarded as "essentially equivalent to new entry," and is therefore evaluated according to the same criteria. *CCC Holdings, 605 F. Supp. 2d at 57*; *Cardinal Health, 12 F. Supp. 2d at 55*.

2. ANALYSIS

Defendants contend that there are no significant barriers to expansion by other firms already in the market as defined by the FTC, and that one or more of those firms will expand to provide a competitive counterbalance that will maintain prices at pre-merger levels. Defendants note that they are required only to show that "another competitor or group of competitors could fill Drew's current position in the market," DFF ¶ 280, examine a number of potential barriers, and argue that none of them prevent expansion in this case.

First, Defendants argue that "there is no meaningful limit on the supply of BWTC and CWTC," meaning that the FTC cannot argue that "current suppliers are capacity constrained." ECF No. 50-2 at 39. In particular, Defendants assert that the chemistry that guides formulation of MWT products is well known, and toll blenders—chemical companies that blend MWT chemicals for suppliers, including Drew—are not bound **[**71]** by exclusive agreements and could find another outlet for their products among other market participants. ECF No. 50-2 at 34; DFF ¶¶ 287-91. Second, Defendants argue that the need for a global distribution network does not constitute a significant barrier to entry because "there is nothing that prevents . . . competitors from easily expanding their [distribution] networks in response to customer demand." ECF No. 50-2 at 40; DFF ¶¶ 298-300. Defendants emphasize that Drew outsources about two-thirds of its MWT business, [TEXT REDACTED BY THE COURT] and engaging others such as Wrist—a large ship chandler—to make last-mile deliveries to vessels at distant ports, often far from warehouses (which are leased, rather than owned). DFF ¶¶ 301-03. Defendants also argue that the FTC has failed to identify any ports "where entry would be needed and would purportedly not occur." ECF No. 50-2 at 37; DFF ¶¶ 298, 301-14. Third, Defendants argue that the ability to offer technical services in conjunction with the delivery of chemical products poses no barrier. They point out that Drew offers only three kinds of technical services: (1) log sheet reporting, which involves periodically recording boiler **[**72]** and cooling testing results in proprietary software and collating data in a central location to ensure consistency over time; (2) initial training sessions, which involve providing new customers with written materials describing dosing and testing methods for Drew's products and conducting a presentation for onboard **[*68]** engineers; (3) on-board visits to customer vessels, during which Drew representatives answer shipboard engineers' questions, review the testing history, and make recommendations. Defendants note that Drew had 40-53 service engineers between January 2015 and June 2017, and contend that procuring engineers is not a sustainable entry barrier because an entrant can start with a smaller number and scale up over time. ECF No. 50-2 at 40-41; DFF ¶¶ 316-21. Fourth, Defendants argue that reputation and brand are not significant barriers to entry because Global Fleet customers are highly sophisticated, and are therefore unlikely to be influenced by branding. DFF ¶ 322. Defendants note that to the extent that some

Global Fleet customers believe other suppliers are incapable of serving their needs, they are uninformed. DFF ¶ 326.

The court concludes that Defendants have not carried **[**73]** their burden to establish that entry will be appropriately timely, likely, and sufficient to deter or counteract the competitive effects of the merger. *See* Cardinal Health, 12 F. Supp. 2d at 55. Defendants' contention that Drew's business—including its products, services, reputation, customer relationships, and distribution model—is simple and capable of replication in a short period of time is at odds with inferences drawn from the state of the current market and with documentary and testimonial evidence from customers and suppliers. It defies basic economic principles for a profitable market to be simultaneously characterized by (a) markedly high concentration and head-to-head competition between two dominant firms over a significant period of time, and (b) low barriers to entry and easily replicable business models. Where the latter is true, economic incentives to compete should ensure that the former is not. Low barriers signify economic opportunities, and as Defendants' own expert acknowledges, "[e]conomics teaches that firms will enter markets where there are opportunities to earn economic profits (profits above the competitive level) until those economic profits are pushed to zero." DX-0060 ¶ 224; Israel Hrg. Tr. **[**74]** at 1567:4-10, 1568:11-24. The FTC has presented strong evidence that the current market is highly concentrated and dominated by head-to-head competition between Drew and WSS, notwithstanding that a number of other suppliers have been present in the market for years. In other words, "the fact that the merging parties have been able to maintain high margins and market shares without witnessing notable entry and expansion" suggests that, contrary to Defendants' contentions, the market for supply of MWT products is characterized by significant barriers to entry. PX61002 at ¶ 244.

This perspective is borne out in documentary and testimonial evidence, which suggests that barriers to entry—especially global distribution networks, customer relationships and reputation, and customer retention rates—play a significant role in the merging parties' respective business models. Global presence in particular is consistently considered a distinguishing feature of Defendants' business that is capital intensive and difficult to replicate. *See* JX-0279 at 022 (Drew presentation describing one of its features as an "Established Global Presence with Significant Barriers to Entry," and further explaining **[**75]** that its "Expansive Global Logistics and Distribution Network Enables Swift Order Fulfillment and is Difficult and Costly to Replicate"); *see also* PX60008 (Drew) at 006 ("Q. Rough order, how long would it take and how much would it cost to replicate your global fulfillment network? A. It would take a vast investment to enter our market from a distribution perspective and even if they did that they would inevitably **[*69]** fail to gain any traction [because]: [(i)] brand reputation (quality, consistency and reliability); [(ii)] High cost of failure means customers are not going to swap supplier from a product they trust for essential compliance or maintenance products and services"); JX-0231 at 157 (consultant's internal presentation to WSS describes barriers to entry as "logistics, channel, market knowledge, and customer base"); PX20184 at 003 (internal assessment explaining that "[t]he business idea and the strategic role played by the company is to supply these products to vessels around the world . . . through a truly global and seamless operation, meticulously designed for the global shipping community . . . [t]he complexity of this operation is the major barrier to entry for competing manufacturers **[**76]** and suppliers, focusing their efforts towards larger, land based markets."). Indeed, other market participants have confirmed that expanding a distribution network to the size of Drew's would require significant capital investment. *See* Franzo Hrg. Tr. at 357: 13-358:4 ("Q. What would it take for UNI Americas to expand its distribution network to the size of Drew Marine's? A. . . . I mean, we would need financial backing to make that move . . . Drew has built a tremendous company over 50 years . . . they didn't do it overnight. . . . [I]t would take a financial influx of capital to do such a thing.").

Similarly, evidence indicates that prior customer relationships and reputation function as barriers in the MWT industry because customers are highly risk averse, leading them to favor known providers and avoid switching suppliers. *See* JX-0250 at 009 (consultant presentation of MWT analysis to WSS indicates that "[c]ustomer relationships are important to maintain sales and contract extensions," because "[w]ater treatment products has a lock-in effect, as the vessels cannot change water treatment supplier continuously, as it would defeat its purpose"); [TEXT REDACTED BY THE COURT] (describing **[**77]** elimination of Marine Care from bidding process because "[t]he evaluation of the team was that the Marine Care bid had more risk to it. They didn't cover as many ports as we were seeking. They were an unknown supplier to us, so a lot more testing would be required to consider their chemicals."); Fry Hrg. Tr. at 962:11-23 (explaining that Military Sealift Command single sources its chemicals worldwide because "[c]ommonality of chemicals, commonality of training, commonality of test equipment" helps "prevent[] . . . mistakes and . . . minimize the risk to the ship itself.");[15] PX80000 (MSC Decl.) at ¶¶ 51-52 (noting that "[r]eputation cannot be understated given that even small discrepancies in the quality, availability, or service of marine chemicals could shorten the lifecycle of equipment or cause immediate failure," and that "if another company decided to make a concerted effort to replace Drew, it would take additional time for that company to earn the reputation for quality, service, and reliability that Drew and Wilhelmsen have developed over decades in the marine industry").

In sum, evidence relating to the foregoing barriers alone shows that here, as in *Sysco*, new entry and/or **[**78]** expansion are "capital intensive and demand[] a long time horizon"—capital to fund expansion of distribution network, and time to build relationships with customers and develop a high reputation for quality and reliability. 113 F. Supp. 3d at 81. The evidence does not reveal any specific competitor or potential **[*70]** competitor with any plan to enter, and in fact suggests the opposite—that expansion is costly, and no smaller competitor or potential competitor intends to expand or reposition in order to make a bid for Global Fleet customers. *See, e.g.*, [TEXT REDACTED BY THE COURT] ¶ 10 (noting that expansion is costly, on the order of $20,000-$30,000 in shipping per container of product on top of third-party fees, and that [TEXT REDACTED BY THE COURT] has not expanded for water treatment chemicals in five years); [TEXT REDACTED BY THE COURT] ¶ 8 (noting that [TEXT REDACTED BY THE COURT] has no intention of entering the MWT business); [TEXT REDACTED BY THE COURT] ¶ 6 (noting absence of expansion plans); *cf.* Sysco, 113 F. Supp. 3d at 81 ("Based on their assessment that expansion would not be an economically viable strategy, regional distributors have said that they have no plans to expand or reposition in order to **[**79]** serve national customers."). Defendants may be correct that at some point in the future one or more smaller competitors will be in a position to replicate the competitive benefits that Drew's presence currently provides. Nevertheless, the record does not support the notion that any entry or credible threat thereof will be timely, likely, and sufficient to counteract the likely anticompetitive effects of this merger.

b. Power Buyers

1. LEGAL STANDARD

Courts have also noted that the existence of power buyers—sophisticated customers who retain strategies post-merger that "may constrain the ability of the merging parties to raise prices," Merger Guidelines § 8—is a factor that can serve to "rebut a prima facie case of anticompetitiveness." Cardinal Health, 12 F. Supp. 2d at 59. However, "[t]he ability of large buyers to keep prices down . . . depends on the alternatives these large buyers have available to them." Sysco, 113 F. Supp. 3d at 48. Where mergers reduce alternatives—i.e., prevent the use of certain competitive strategies—"the power buyers' ability to constrain price and avoid price discrimination can be correspondingly diminished." *Id.* (citing Merger Guidelines § 8). Thus, the mere presence of power buyers "does not necessarily mean that a merger will **[**80]** not result in anticompetitive effects." Cardinal Health, 12 F. Supp. 2d at 59. In assessing a power buyer argument, the court should "examine the choices available to powerful buyers and how those choices likely would change due to the merger," keeping in mind that "[n]ormally, a merger that eliminates a supplier whose presence contributed significantly to a buyer's negotiating leverage will harm that buyer." Merger Guidelines § 8. Finally, although the consideration of non-entry factors—including the existence of power buyers—is "relevant, and can even be dispositive, in a section 7 rebuttal analysis," Baker Hughes, 908 F.2d at 987, courts have not typically held "that power buyers alone enable a defendant to overcome the government's presumption of anticompetitiveness." Cardinal Health, 12 F. Supp. 2d at 58; Chicago Bridge & Iron Co. N.V. v. FTC, 534 F.3d 410, 440 (5th Cir. 2008) ("[C]ourts have not considered the 'sophisticated customer' defense as itself independently adequate to rebut a *prima facie* case.").

2. ANALYSIS

[15] Defendants' contention that customers who believe that there are no other MWT suppliers capable of serving their needs are uninformed is itself indicative of the importance of reputation in the industry—if reputation were less important, it is unlikely that a sophisticated customer would fail to investigate potentially cheaper alternatives.

Defendants argue that the FTC's Global Fleets construct focuses on the largest shipping companies—those most likely to have the power to constrain the merger's anticompetitive effects. In support of this contention, Defendants point out that customers tend to purchase other goods from suppliers, which permits them to discipline attempted BWT and CWT **[**81]** price increases by switching or credibly threatening to switch purchases of these other products to other suppliers or by negotiating price decreases on other products. **[*71]** ECF No. 50-2 at 45; DFF ¶¶ 246-249. Defendants further argue that customers could adapt purchases to another supplier's distribution network or shift part of their fleet to another competitor, since many vessels in Global Fleets do not avail themselves of all of Defendants' networks—instead visiting a subset of available ports and picking up MWT from an even smaller subset. DFF ¶¶ 250-253. Defendants also contend that Global Fleets could stockpile larger quantities of MWT products in order to shift purchases to major ports with lower costs, DFF ¶¶ 254-258; ECF No. 50-2 at 45-46, and that customers can partner with suppliers to sponsor entry or expansion to new ports.

The court is unpersuaded by Defendants' power buyer argument. The evidence is mixed—at best—regarding the effectiveness of each of the Defendants' suggested strategies. Although at least one witness suggested that customers could shift purchases of other products in more competitive markets to other suppliers, *see* Kelleher Hrg. Tr. at 536:6-20, there is, **[**82]** as Dr. Nevo noted, little empirical basis for the notion that this strategy—already available to large customers—would yield any additional benefits beyond those customers currently enjoy. PX61002 ¶¶ 223, 232. Similarly, while testimony suggested that customers may be able to stockpile product and concentrate purchases in ports where products are cheaper, that same testimony suggests that storage space is often limited and that customers already do so. *See e.g.*, [TEXT REDACTED BY THE COURT] (describing size of storage facilities onboard and efforts to ensure that product sourcing occurs efficiently); *see also* Fry Hrg. Tr. at 963:13-964:22 (describing space constraints due to safety regulations, number of different consumable products, and need to maximize revenue-generating space). Defendants have not identified any *new* strategy or alternative likely to emerge post-merger—instead, they have focused on strategies that are already part of the competitive landscape and which show no promise of becoming more effective. On the other hand, the FTC has shown that the merger will result in the loss of a proven strategy—the ability to leverage one large, global supplier against another—that **[**83]** appears to be the most effective price constraint in the consolidated MWT market. In other words, the FTC has established a reasonable probability that as a result of the merger, sophisticated buyers will have one less alternative strategy through which they can exercise power, and Defendants have not identified any equally or more effective buyer options to counteract that loss. Thus, the reduction of buyer alternatives means that "power buyers' ability to constrain price and avoid price discrimination can be correspondingly diminished," *Sysco, 113 F. Supp. 3d at 48*, and evidence of buyer power is insufficient to rebut the FTC's prima facie case.

c. Efficiencies

1. LEGAL STANDARD

As the Merger Guidelines explain, "a primary benefit of mergers to the economy is their potential to generate significant efficiencies and thus enhance the merged firm's ability and incentive to compete, which may result in lower prices, improved quality, enhanced services, or new products." Merger Guidelines § 10. Though the Supreme Court has never recognized the so-called "efficiencies" defense in a *Section 7* case, other courts and the Horizontal Merger Guidelines acknowledge that evidence of efficiencies may prove "relevant to the competitive effects **[**84]** analysis of the market required to determine whether the proposed transaction will substantially lessen competition," *Arch Coal, 329 F. Supp. 2d at 151*, and accordingly that efficiencies produced by a merger can form part of a defendant's rebuttal of **[*72]** the FTC's prima facie case. *Sysco, 113 F. Supp. 3d at 81*; *Heinz, 246 F.3d at 720*. This is true even though "[c]ourts have rarely, if ever, denied a preliminary injunction solely based on the likely efficiencies." *CCC Holdings, 605 F. Supp. 2d at 72*.

Potential efficiencies require close judicial scrutiny—"the court must undertake a rigorous analysis of the kinds of efficiencies being urged by the parties in order to ensure that those 'efficiencies' represent more than mere speculation and promises about post-merger behavior," *Heinz, 246 F.3d at 721*, and a defendant must prove "extraordinary efficiencies" where market concentration levels are high. *Id. at 720-21*. An efficiencies analysis must demonstrate that the claimed efficiencies are (1) merger-specific, and (2) verifiable—meaning that efficiency claims "must represent a type of cost saving that could not be achieved without the merger and the estimate of the predicted saving must be reasonably verifiable by an independent party." *United States v. H & R Block, Inc., 833 F. Supp. 2d 36, 89 (D.D.C. 2011)*; *see also* *Sysco, 113 F. Supp. 3d at 82*. Moreover, "it is incumbent upon the merging firms to substantiate efficiency claims," as "much **[**85]** of the information relating to efficiencies is uniquely in the possession of the merging firms." Merger Guidelines § 10.

2. ANALYSIS

Defendants claim that the proposed merger will result in significant merger-specific efficiencies in the form of cost savings of [TEXT REDACTED BY THE COURT] and that these efficiencies will be realized in four ways: (1) production cost reductions from eliminating duplicative product lines, (2) customer-facing cost reductions from eliminating duplicative account managers and customer service operations, (3) reductions from eliminating duplicative back-office and administrative costs, and (4) price reductions as part of a plan to address expected revenue dis-synergies, in order to compensate for the possibility of lost customers who oppose the merger.

The FTC engaged an expert, Dr. Dov Rothman, to evaluate whether Defendants had substantiated their estimated cost efficiencies, and whether such efficiencies were merger-specific. Dr. Rothman reviewed data and documentation from the merging parties, and the parties' consultants provided him with spreadsheets relevant to their claimed cost savings. Dr. Rothman concluded in his report and his testimony at the evidentiary **[**86]** hearing that the merging parties had failed to provide sufficient information for him to verify the likelihood and magnitude of the claimed cost savings. PX61001 at ¶ 10. In particular, Dr. Rothman found that the alleged cost savings in each of the categories were based on a series of significant assumptions—percentage reductions in cost, percentage increases in productivity, or assumed cost/product equivalencies—that were "doing all the work" in calculation of the estimates. Rothman Hrg. Tr. at 1035:5-6. Dr. Rothman further pointed out that Wilhelmsen failed to provide any information that would have allowed him to confirm whether those assumptions are reasonable. *See, e.g.*, Rothman Hrg. Tr. at 1039:19-1040:5 ("So what Wilhelmsen has provided here, it's provided a description of the process by which these cost savings were estimated. So it's explained that it had functional teams and Cardo Partners go around and identify and assess areas of duplicative overlap. And Wilhelmsen has . . . provided information that describes the output of the analysis. What Wilhelmsen hasn't provided is information about the analysis itself. And I think there's an important distinction between describing **[**87]** the process of estimating cost savings and **[*73]** describing the actual analysis, the assumptions that go into that analysis.").

In response to these criticisms, Defendants note that WSS has a history of acquiring companies that produce MWT chemicals—specifically Unitor and Nalfleet—that demonstrates that WSS has previously achieved the cost savings it projected. Defendants also note that the efficiency estimates went through many rounds of internal vetting, DFF ¶¶ 352, 354, 357, 358, and rely on the testimony and report of Dr. Israel, who contended that the estimates are verifiable insofar as WSS identified the potential bases for cost savings, performed its own vetting and due diligence, and has a track record of realizing projected cost savings. DX-0060 ¶¶ 287, 290, 298.

The court finds that Defendants have failed to carry their burden to demonstrate the verifiability of their claimed efficiencies. In reaching this decision, the court stresses that the determinative issue is neither the presence of assumptions nor the absence of completely precise estimates. Instead, the critical issue is that because the bases for the assumptions Dr. Rothman identified and their role in the efficiencies **[**88]** analysis is unclear, the reasonableness of those assumptions, along with the ultimate determinations of likelihood and magnitude, cannot be verified with any degree of rigor. *Heinz, 246 F.3d at 721* ("[G]iven the high concentration levels, the court must undertake a *rigorous* analysis of the kinds of efficiencies being urged by the parties in order to ensure that those 'efficiencies' represent more than mere speculation and promises about post-merger behavior.") (emphasis added); *see also id.* (scrutinizing quantitative basis for claimed efficiencies). Nor can reference to the merging parties' past practices, managerial expertise and incentives, or internal verification processes serve to substantiate any efficiencies. The court cannot substitute Defendants' assessments and projections for independent verification. *H & R Block, 833 F. Supp. 2d at 91* ("While reliance on the estimation and judgment of experienced executives about costs may be perfectly sensible as a business matter, the lack of a verifiable method of factual analysis resulting in the cost estimates renders them not cognizable by the Court. If this were not so, then the efficiencies defense might well swallow the whole of *Section 7* of the Clayton Act because management would be able to **[**89]** present large efficiencies based on its own judgment and the Court would be hard pressed to find otherwise."). The court concludes that Defendants have failed to provide enough information about their estimated efficiencies to render them "reasonably verifiable by an independent party." *Id. at 89*. Given this conclusion, the court need not address the question of merger-specificity.

B. Weighing the Equities

Notwithstanding the court's determination on the likelihood of success on the merits, the court must still "weigh the equities in order to decide whether enjoining the merger would be in the public interest." *Heinz, 246 F.3d at 726*. The interests at issue are "(i) the public interest in effectively enforcing ***antitrust law*** and (ii) the public interest in ensuring that the FTC has the ability to order effective relief if it succeeds at the merits trial." *Sysco, 113 F. Supp. 3d at 86*; *see also* *Heinz, 246 F.3d at 726* ("The principal public equity weighing in favor of issuance of preliminary injunctive relief is the public interest in effective enforcement of the antitrust laws."). The FTC notes that absent a preliminary injunction, Defendants can combine assets and operations such that it is administratively difficult to restore competition to its pre-merger state. **[**90]** *Heinz, 246 F.3d at 726* ("*Section 13(b)* **[*74]** itself embodies congressional recognition of the fact that divestiture is an inadequate and unsatisfactory remedy in a merger case."). On the other hand, Defendants note that if this court issues a preliminary injunction, they will abandon the transaction rather than continue with the administrative proceeding—meaning that the efficiencies that they have identified will be lost, along with their potential benefits to consumers. *See* *Arch Coal, 329 F. Supp. 2d at 160* (taking abandonment of the transaction into account in weighing the equities).

Given the court's finding that Defendants' claimed efficiencies cannot be independently verified, the court cannot conclude on this record that those efficiencies outweigh the potential harm to the public resulting from further consolidation in the MWT industry. Moreover, although the court recognizes the time, resources, and effort that Defendants have put into planning this transaction, the parties' stated intention to abandon the transaction prior to the merits proceeding is a private equity, and cannot on its own overcome the public equities that favor the FTC. *Heinz, 246 F.3d at 727*; *Sysco, 113 F. Supp. 3d at 87*.

IV. CONCLUSION

The court finds on the basis of the entire record that the FTC has carried its burden to show **[**91]** a "reasonable probability" that the proposed merger between Drew and WSS would harm competition in the market for supply of MWT products and services to Global Fleets. The FTC has "raised questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals," *Heinz, 246 F.3d at 714-15* (quoting *FTC v. Beatrice Foods Co., 587 F.2d 1225, 1229, 190 U.S. App. D.C. 328 (D.C. Cir. 1978))*, and Defendants have offered insufficient evidence to rebut the FTC's showing of likely harm. Moreover, the equities favor issuance of a preliminary injunction. Accordingly, the FTC's Motion for Preliminary Injunction will be GRANTED. An appropriate order accompanies this memorandum opinion.

[EDITOR'S NOTE: The following court-provided text does not appear at this cite in F. Supp. 3d.]

[*none] ORDER

Having considered the pleadings, memoranda, declarations, exhibits, and other evidence presented by Plaintiff Federal Trade Commission (the "Commission") and by Defendants Wilh. Wilhelmsen ASA, Wilhelmsen Maritime Services AS (collectively "Wilhelmsen"), The Resolute Fund II, L.P., Drew Marine Intermediate II RN., and Drew Marine Group Inc. (collectively "Drew"), and for the reasons set forth in the accompanying Memorandum Opinion, the court hereby GRANTS **[**92]** the Commission's motion for a preliminary injunction enjoining the acquisition of Drew Wilhelmsen (ECF No. 45).

It is ORDERED that Defendants Wilhelmsen and Drew are hereby enjoined and restrained under *Section 13(b) of the Federal Trade Commission Act*, *15 U.S.C. § 53(b)*, from consummating the proposed acquisition, or otherwise effecting a combination of Wilhelmsen and Drew until the completion of the administrative proceeding evaluating the proposed merger now pending before the Commission.

It is further ORDERED that Wilhehnsen and Drew shall take any and all necessary steps to prevent *any* of their officers, directors, domestic or foreign agents, divisions, subsidiaries, affiliates, partnerships, or joint ventures from consummating, directly or indirectly, any such acquisition, or otherwise effecting any combination between Wilhelmsen and Drew.

It is further ORDERED that Wilhelmsen and Drew are directed to maintain the *status qua* until either (1) the completion of all legal proceedings by the Commission challenging the transaction, including all appeals, or (2) further order of the court, including upon request of the Commission, before completion of such legal proceedings.

It is further ORDERED that this court shall retain jurisdiction of this matter **[**93]** for all purposes and for the full duration of this Order, as provided in the previous paragraph.

SO ORDERED.

For Mylan Pharmaceuticals, Inc., Plaintiff: ARNOLD B. CALMANN, LEAD ATTORNEY, SAIBER LLC, Newark, NJ USA; JAKOB BENJAMIN HALPERN, SAIBER LLC, Florham Park, NJ USA.

For Celgene Corporation, Defendant: DANIEL RENE GUADALUPE, LEAD ATTORNEY, NORRIS, McLAUGHLIN & MARCUS, PC, Somerville, NJ USA; STEVEN M. PYSER, LEAD ATTORNEY, Williams & Connolly LLP, Washington, DC USA.

For Federal Trade Commission, Amicus: KARA LEE MONAHAN, LEAD ATTORNEY, FEDERAL TRADE COMMISSION, Washington, DC USA.

Judges: Esther Salas, United States District Judge.

Opinion by: Esther Salas

Opinion

SALAS, DISTRICT JUDGE

I. Introduction

A generic pharmaceutical company generally needs samples of a brand-name drug to perform certain studies before seeking U.S. Food and Drug Administration ("FDA") approval to market a generic version of that drug. Put simply, the generic company must show the FDA that its generic version is equivalent to the brand-name drug.

Here, Mylan Pharmaceuticals Inc. ("Mylan") wanted FDA approval to market generic versions of two brand-name drugs marketed by Celgene Corporation ("Celgene")—Thalomid® and Revlimid®. But Mylan says it **[*2]** couldn't get samples of these brand-name drugs. It blames Celgene for this, alleging that Celgene used a certain safety program as pretext to prevent Mylan from getting samples of each drug and conducting the requisite studies. Mylan asserts Celgene did this to improperly stifle generic competition. So Mylan brought this action against Celgene. It claims Celgene's conduct violates federal and state antitrust laws, as well as state laws prohibiting unfair competition and tortious interference.

Celgene has moved for summary judgment to dismiss this action. Its motion raises several issues. Indeed, the Court held lengthy oral argument and ordered supplemental briefing before and after oral argument on certain issues. No doubt this is a complex case. Rather than attempting to preview all of these issues—several of which require necessary background information—the Court provides this brief introduction and addresses each issue below after providing such background.

Based on the below discussion, the Court GRANTS in part and DENIES in part Celgene's motion for summary judgment.

II. The Hatch-Waxman Act

A. The Hatch—Waxman Act allows a generic company to "piggy-back" on a brand company's FDA [*3] approval efforts—which speeds the introduction of low-cost generic drugs to market and thereby furthers competition[1]

The Drug Price Competition and Patent Term Restoration Act of 1984—commonly known as the "Hatch-Waxman Act"—provides a regulatory framework that governs the testing and approval of new drugs. *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132, 143 (3d Cir. 2017)*. This framework is "designed in part to (1) ensure that only rigorously tested pharmaceutical drugs are marketed to the consuming public, (2) incentivize drug manufacturers to invest in new research and development, and (3) encourage generic drug entry into the marketplace." *In re Lipitor Antitrust Litig., 868 F.3d 231, 240 (3d Cir. 2017)*.

A pharmaceutical company that wants to market a new drug must submit a New Drug Application or "NDA" to the FDA. *In re Wellbutrin XL Antitrust Litig., 868 F.3d at 143* (quoting *Actavis, 133 S. Ct. at 2228*). "The NDA must include, among other things, a statement of the drug's components, scientific data showing that the drug is safe and effective, and proposed labeling describing the uses for which the drug may be marketed." *Caraco Pharm. Labs., Ltd. v. Novo Nordisk A/S, 566 U.S. 399, 404, 132 S. Ct. 1670, 182 L. Ed. 2d 678 (2012)*. A company that gets FDA approval of its NDA is often referred to as a brand-name company or brand company, and its FDA-approved product is often referred to as a brand-name drug or brand drug. *See, e.g., F.T.C. v. Actavis, Inc., 570 U.S. 136, 142, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*; *New York ex rel. Schneiderman v. Actavis PLC, 787 F.3d 638, 643 (2d Cir. 2015)*.

Conversely, a pharmaceutical company that seeks to market **[*4]** a generic version of a brand drug is often called a generic drug company or generic company, and its generic version of the brand drug is often referred to as a generic drug. *See, e.g., Mylan Pharm. Inc. v. Warner Chilcott Pub. Ltd. Co., 838 F.3d 421, 427-28 (3d Cir. 2016)*; *Schneiderman, 787 F.3d at 643 n.3*; *Janssen Pharmaceutica, N.V.*, 540 F.3d at 1355-56.

"One of the goals of Hatch-Waxman is to increase competition between generic and brand-name drugs." *In re Wellbutrin XL Antitrust Litig., 868 F.3d at 143*. To that end, the Hatch-Waxman Act allows generic companies to get FDA approval "without having to endure the gauntlet of procedures associated with NDAs." *Id.* In particular, a generic company can get similar approval as the brand-name company "by submitting an Abbreviated New Drug

[1] *See F.T.C. v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 2228, 186 L. Ed. 2d 343 (2013)*.

Application ('ANDA') that shows that the generic drug has the same active ingredients as, and is biologically equivalent to, the [FDA-approved] brand-name drug." *In re Lipitor Antitrust Litig., 868 F.3d at 240*; *see also* *Caraco, 566 U.S. at 405* ("Rather than providing independent evidence of safety and efficacy, the typical ANDA shows that the generic drug has the same active ingredients as, and is biologically equivalent to, the brand-name drug."). "This way, a generic manufacturer does not need to undergo the same costly approval procedures to develop a drug that has already received FDA approval." *In re Lipitor Antitrust Litig., 868 F.3d at 240*.

"[F]or drugs that work systemically by circulating in the bloodstream after ingestion in **[*5]** the form of a pill or capsule, bioequivalence is typically measured by comparing the rate and extent of absorption of the active ingredients in the blood." *Graceway Pharms., Inc. v. Sebelius, 783 F. Supp. 2d 104, 107 (D.D.C. 2011)*. "In other words, two drugs are bioequivalent if they deliver the same amount of the same active ingredient content into a patient's blood stream over the same amount of time." *New York v. Actavis PLC, 787 F.3d 638, 644 (2d Cir. 2015)*. Importantly, a generic company must generally obtain samples of a brand name drug to demonstrate bioequivalence to a brand-name drug. *See* *Natco Pharma Ltd. v. Gilead Scis., Inc., No. 14-3247, 2015 U.S. Dist. LEXIS 131058, 2015 WL 5718398, at *1 (D. Minn. Sept. 29, 2015)* (citing *21 U.S.C. §§ 355(b)(1)(A)*, *355(j)(2)(A)*).

B. The Hatch-Waxman Act provides special procedures for identifying and resolving patent disputes between brand and generic companies[2]

The Hatch-Waxman Act sets forth procedures for patent disputes between brand and generic drug companies. *See* *In re Lipitor Antitrust Litig., 868 F.3d at 240*. When a brand company submits an NDA, it must file information about its patents with the NDA. *Id.* If approved, the FDA then will list the patents in a publication informally known as the "Orange Book." *Id.* In particular, a brand company must list in the Orange Book any patents relating to the drug's composition or methods of use. *See id.*

Once listed in the Orange Book, a generic company may file an ANDA "if it can certify that its proposed generic drug will not actually **[*6]** violate the brand manufacturer's patents." *Id.* In fact, a generic company must assure the FDA that its ANDA product will not infringe a listed patent because the FDA cannot authorize a generic drug that would infringe a patent. *See* *id. at 240-41*; *In re Wellbutrin XL Antitrust Litig., 868 F.3d at 144*. One way for a generic company to do so is by certifying that any listed patent is invalid and/or will not be infringed by the manufacture, use, or sale of the ANDA product. *See* *In re Lipitor Antitrust Litig., 868 F.3d at 240-41*; *In re Wellbutrin XL Antitrust Litig., 868 F.3d at 144*. This is referred to as a "paragraph IV certification." *In re Wellbutrin XL Antitrust Litig., 868 F.3d at 144*.

A paragraph IV certification constitutes an act of infringement and "often 'means provoking litigation' instituted by the brand manufacturer." *In re Lipitor Antitrust Litig., 868 F.3d at 241* (quoting *Caraco, 566 U.S. at 407*). If the brand company timely sues the generic company for patent infringement, "the FDA must withhold approval of the generic for at least 30 months while the parties litigate the validity or infringement of the patent." *Id.; see also* *In re Wellbutrin XL Antitrust Litig., 868 F.3d at 144* ("[T]he FDA is required to withhold approval of the generic drug for 30 months or until the infringement case is resolved, whichever comes first.").

Notably, to incentivize generic companies to file ANDAs "challenging weak patents, the Hatch-Waxman Act provides that the *first* generic manufacturer to file a paragraph IV certification will **[*7]** enjoy a 180-day exclusivity period" from the first commercial marketing of its drug. *See* *In re Lipitor Antitrust Litig., 868 F.3d at 241* (emphasis added). This 180-day exclusivity period bars any other generic drug from competing with the brand-name drug—a potentially lucrative opportunity for an ANDA-filer. *See id.*

There are at least two important considerations concerning this 180-day exclusivity period: (1) it "belongs only to the first generic manufacturer to file an ANDA; if the first-ANDA filer forfeits its exclusivity rights, no other generic manufacturer is entitled to it"; and (2) "the brand-name manufacturer is *not* barred from entering the generic market

[2] *In re Lipitor Antitrust Litig., 868 F.3d at 240*.

with its own generic version of the drug—a so-called 'authorized generic'—during the 180-day exclusivity period." *Id.* (emphasis added).[3]

III. The FDA's Risk Evaluation and Mitigation Strategy ("REMS")

Under the FDA Amendments Act of 2007, the FDA can require drug manufacturers to implement a REMS for certain drugs. *See* 21 U.S.C. § 355-1. "REMS are required risk management plans that use risk minimization strategies beyond the professional labeling to ensure that the benefits of certain prescription drugs outweigh their risks."[4] A REMS can have elements such as a "Medication Guide **[*8]** or Patient Package Insert" or "Communication Plan."[5]

Another possible element of a REMS is an "ETASU"—which stands for: "Elements to Assure Safe Use."[6] "ETASU requirements are the most extensive elements of a REMS program" and "are intended to reduce a specific serious risk listed in the labeling of the drug."[7] A REMS with an ETASU may require, for example, that: "[p]rescribers have specific training/experience or special certifications"; "[e]ach patient using the drug be subject to monitoring"; and the "[d]rug be dispensed with evidence of safe-use conditions such as laboratory test results."[8]

As noted above, a generic company must typically obtain samples of a brand drug to show bioequivalence to the brand drug for FDA approval. *See, e.g.,* *Natco Pharma, 2015 U.S. Dist. LEXIS 131058, 2015 WL 5718398, at *1*. And Congress included a provision in the FDA Amendments Act of 2007 setting forth the following: "No holder of an approved covered application shall use any element to assure safe use required by the Secretary under this subsection to block or delay approval of an . . . [ANDA]." *21 U.S.C. § 355-1(f)(8)*).

IV. Celgene's Thalomid® & Revlimid® are both subject to REMS requirements[9]

A. Thalomid®

---

[3] A note on this second consideration may be helpful for contextual purposes. "An authorized generic is a generic drug sold by the company who markets the brand name drug (or a third party licensee)." *Sanofi-Aventis v. Apotex Inc., 659 F.3d 1171, 1174-75 (Fed. Cir. 2011)* (citation omitted). The brand company "who holds the approved NDA wants to stave off possible competition from the ANDA applicants (the generic makers)." *Mylan Pharms., Inc. v. F.D.A, 454 F.3d 270, 273 (4th Cir. 2006)*. And "[o]ne strategy for the NDA holder is to grant a third party a license to sell a generic version of the drug described in the approved NDA." *Id.* "The economic benefits of this practice are clear": "an authorized generic appeals to patients because it is sold at a lower price than the branded pioneer drug"—while also appealing to a brand company because it "benefits from sales of the authorized generic even after the patent protecting the [brand] drug has expired." *Id.* Indeed, "[b]y selling an authorized generic during the [180-day] exclusivity period enjoyed by the first paragraph IV ANDA applicant," the brand company "prevents that applicant from winning all of the customers who want to switch from the branded drug to a cheaper generic form." *Id.*

[9] Unless otherwise noted, citations to statements of facts are undisputed.

In the 1950s, **[*9]** a drug called thalidomide was marketed and widely prescribed in Europe and other countries as a treatment for morning sickness and nausea. (D.E. No. 228-1, Celgene's Statement of Material Facts ("Celg. SMF") ¶ 2). In the early 1960s, it was discovered that thalidomide causes severe birth defects including: missing legs, arms, feet and hands; spinal cord defects; cleft lip or palate; absent or abnormal external ears; heart, kidney, and genital abnormalities; and abnormal formation of the digestive system. (*Id.* ¶ 3). In fact, a single dose of thalidomide taken during pregnancy can cause these birth defects. (*Id.*). And about 40% of thalidomide victims died within a year of their birth. (*Id.*). So thalidomide was withdrawn from the market in many countries. (*Id.*).

Celgene obtained FDA approval in 1998 to market thalidomide—under the trade name Thalomid®—for treating manifestations of a particular form of leprosy known as erythema nodosum leprosum ("ENL"). (*See* D.E. No. 228-3, Ex. 1). But the FDA indicated that a restricted distribution program—called a "System for Thalidomide Education and Prescribing Safety" or "S.T.E.P.S."—was an integral part of the approval and a component of the terms **[*10]** of approval. (*Id.*).

In May 2006, the FDA approved the use of Thalomid®—in combination with dexamethasone—for treating newly diagnosed multiple myeloma. (D.E. No. 228-4, Ex. 12; D.E. Nos. 237-21 & 237-22, Ex. P58).

B. Revlimid®

In April 2005, Celgene sought approval from the FDA to market lenalidomide—an analogue of thalidomide that is more potent and has a better toxicity profile—under the brand name Revlimid®. (D.E. No. 228-8, Ex. 74 & 77; Celg. SMF ¶ 86). Mylan disputes the date of Celgene's NDA for Revlimid®, arguing that evidence shows Celgene's first submission was sent in December 2004, followed by more than thirty additional submissions before Celgene's application was deemed complete and approved. (*See* D.E. No. 237-1 ("Responses to Celg. SMF ¶ 87)). In any event, in December 2005, the FDA approved Revlimid® for treating transfusion dependent anemia due to myelodysplastic syndromes. (D.E. No. 228-8, Ex. 77). Notably, the FDA's approval letter states that approval was under the "RevAssist Risk Minimization Action Plan" or "RiskMAP"—and distribution of the drug is limited as described in the approval letter and in the detailed RevAssist program. (*Id.*)

In June 2006, the FDA approved **[*11]** the use of Revlimid®—in combination with dexamethasone—for treating multiple myeloma in patients who have received at least one prior therapy. (D.E. No. 228-8, Ex. 78).

C. The FDA approves Celgene's proposed REMS for each product

In September 2007, Congress enacted a law that, among other things, codified the FDA's risk management program authority under new provisions requiring that REMS programs be implemented for certain pharmaceutical products. (*See* D.E. No. 238-30, Ex. P315). As noted above, the law also prohibited a brand company from using any ETASU to block or delay approval of an ANDA. (*See id.*).

In September 2008, Celgene filed with the FDA its proposed REMS for Thalomid® and Revlimid®. (*See* D.E. Nos. 228-4, Ex. 9; 228-8, Ex. 79). In August 2010, the FDA found that REMS were necessary for Thalomid® and Revlimid ® to ensure that the benefits of the drugs outweigh their risks of side effects, and the FDA approved Celgene's REMS for each drug. (*See* D.E. Nos. 228-4, Ex. 9; 228-8, Ex. 79).

V. Mylan's Causes of Action against Celgene

On April 3, 2014, Mylan brought this action against Celgene, alleging in part that Celgene "has used REMS as a pretext to prevent Mylan from acquiring **[*12]** the necessary samples to conduct bioequivalence studies, even after the FDA determined that Mylan's safety protocols were acceptable to conduct those studies." (D.E. No. 1 ¶ 7). It alleges that, "[i]n flagrant violation of federal and state antitrust laws, Celgene has unlawfully maintained monopolies over its two 'lead' products—Thalomid and Revlimid—by preventing lower-priced generic competition from entering the market." (*Id.* ¶ 2).

Mylan asserts the following counts—some of which the Court has already dismissed and declines to further discuss here:

1. Violation of Sherman Act *Section 2* — Thalomid® — Monopolization, Attempted Monopolization and Conspiracy to Monopolize

2. Violation of Sherman Act *Section 2* — Revlimid® — Monopolization, Attempted Monopolization and Conspiracy to Monopolize

3. Violation of Sherman Act *Section 2* — Thalomid® — Denial of an Essential Facility or Resource Necessary to Compete

4. Violation of Sherman Act *Section 2* — Revlimid® — Denial of an Essential Facility or Resource Necessary to Compete

5. [*Dismissed*]

6. [*Dismissed*]

7. [*Dismissed*]
8. Violation of the New Jersey Antitrust Act, Section

56:9 3 and 56:9-4 — Thalomid® [*Partially Dismissed*]
9. Violation of the New Jersey Antitrust Act, Section

56:9 3 **[*13]** and 56:9-4 — Revlimid® [*Partially Dismissed*]
10. Violation of the New Jersey Antitrust Act, Section

56:9 3 and 56:9-4 — Thalomid® and Revlimid® [*Partially Dismissed*]
11. Violation of New Jersey Common Law — Thalomid® — Unfair Competition
12. Violation of New Jersey Common Law — Revlimid® — Unfair Competition
13. Violation of New Jersey Common Law — Thalomid® and Revlimid® — Unfair Competition
14. Violation of New Jersey Common Law — Thalomid® — Tortious Interference with an Economic Advantage
15. Violation of New Jersey Common Law — Revlimid® — Tortious Interference with an Economic Advantage
16. Violation of New Jersey Common Law — Thalomid® and Revlimid® — Tortious Interference with an Economic Advantage

17. Declaratory Judgment Pursuant to *28 U.S.C. §§ 2201-2202*

(*See id.* ¶¶ 187-380; D.E. No. 54).

VI. The Summary Judgment Standard

Summary judgment is appropriate "if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A fact is material if it "might affect the outcome of the suit under the governing law." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A "genuine" issue of material fact exists for trial "if the evidence is such that a reasonable jury could return a verdict for **[*14]** the nonmoving party." *Id.*

The movant bears the initial burden of establishing that no genuine issue of material fact exists. *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. Where the non-moving party bears the burden of proof at trial, the moving party may discharge its burden by showing "that there is an absence of evidence to support the nonmoving party's case." *Id. at 325*. If the movant meets this burden, the non-movant must then set forth specific facts that demonstrate the existence of a genuine issue for trial. *Id. at 324*; *Azur v. Chase Bank, USA, Nat'l Ass'n, 601 F.3d 212, 216 (3d Cir. 2010)*.

Notably, the "evidence of the non-movant is to be believed, and all justifiable inferences are to be drawn in his favor." *Anderson, 477 U.S. at 255*. But the non-moving party "must do more than simply show that there is some metaphysical doubt as to the material facts." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*; *see also* *Swain v. City of Vineland, 457 F. App'x 107, 109 (3d Cir. 2012)* (stating that the non-moving party must support its claim "by more than a mere scintilla of evidence").

VII. Does the rule-of-reason burden-shifting framework apply?

Under the "rule of reason" burden-shifting framework, the party seeking to impose liability must initially provide evidence of the anticompetitive nature of a defendant's conduct. *Warner Chilcott, 838 F.3d at 438*. Once established, the defendant then has the burden of proffering nonpretextual procompetitive justifications that its conduct is **[*15]** indeed a form of competition on the merits because it involves, for example, greater efficiency or enhanced consumer appeal. *See id.; In re Suboxone (Buprenorphine Hydrochloride and Naloxone) Antitrust Litig., No. 16-5073, 2017 U.S. Dist. LEXIS 171322, 2017 WL 4642285, at *8 (E.D. Pa. Oct. 17, 2017)*. And "the plaintiff may then either rebut those justifications or demonstrate that the anticompetitive harm outweighs the procompetitive benefit." *Mylan Pharm., 838 F.3d at 438*.

A. The parties' contentions

Celgene argues that Mylan's claims under *Section 2* of the Sherman Act—the only remaining Sherman-Act claims in this case—require Mylan to prove that Celgene engaged in the following anticompetitive conduct: "an improper unilateral refusal to deal that had an anticompetitive effect in the alleged relevant markets for Thalomid and Revlimid." (D.E. No. 270 at 1). Celgene contends that Mylan fails to show that Celgene improperly refused to deal and, even if Mylan meets this burden, Celgene "had valid business justifications for declining to sell samples on the terms demanded by Mylan." (*Id.* at 2). Said differently, Celgene argues that there was no improper refusal to deal and therefore no anticompetitive conduct that harmed Mylan—and thus no burden-shifting from Mylan to Celgene occurs for the first step of the analysis. (*Id.*). And even assuming that Mylan could show a harmful refusal to deal, "Celgene **[*16]** nonetheless has shown indisputably valid business justifications for insisting upon certain terms before dealing with Mylan." (*Id.*).

At oral argument, Celgene contended that "it's assumed that you could have an anticompetitive effect" because this is a unilateral refusal-to-deal case. (D.E. No. 277 at 6:22-7:7). But it states that an anticompetitive effect by itself is not enough for the first prong of the burden-shifting framework. (*Id.* at 7:7-10). As such, Celgene asserts that "if our justifications, if the conditions we place on the dealing here are valid business justifications, we win" and "[y]ou don't get into this sort of back-and-forth balancing." (*Id.* at 9:3-6). It argues that, if the Court finds that Celgene had a valid business justification, then Mylan does not get an opportunity to rebut that. (*See id.* at 9:8-18).

Mylan contends that its obligation is to "present sufficient evidence to create a jury issue of anticompetitive effect," which "has been easily satisfied here by . . . abundant evidence." (D.E. No. 271 at 1). And so Mylan argues that the "prima facie case shifts to Celgene" to "com[e] forward with evidence of procompetitive justification"—but Celgene's justifications **[*17]** fail. (*Id.*). Mylan lastly asserts that—although Celgene's justifications "are entirely pretextual" and therefore a balancing is unnecessary—any "balancing outcome is clear: the net effect of Celgene's conduct is anticompetitive, with higher prices and fewer choices for consumers." (*Id.* at 2).

And at oral argument, Mylan asserted that: "Celgene cites no case from this circuit that you do not apply the standard rule of reason context in a unilateral refusal to deal case. There's no Third Circuit case that says you win if you have a valid business justification." (D.E. No. 277 at 13:21-24).

B. A burden-shifting framework applies

Both parties agree that a burden-shifting framework applies here. (*See* D.E. No. 270 at 1; D.E. No. 271 at 1). And at oral argument, both parties summarized and confirmed their respective positions regarding each of the three steps. *First*, Mylan says that Celgene refused to provide samples, allowing Celgene to retain monopolies over Thalomid® and Revlimid®—which "shifts the burden of going forward to Celgene to come up with a justification that is both legitimate in principle and in fact was the reason for the refusal to deal." (D.E. No. 277 at 15:20-16:24. *But see* D.E. No. **[*18]** 270 at 2 ("Celgene did not refuse to deal with Mylan . . . . Mylan has produced no evidence that [Celgene's] demands were unreasonable or that Mylan could not comply with them . . . .")). *Second*, Celgene provides some "primary" procompetitive, non-pretextual justifications, including: "[a]ssuring that the product was going to be used safely, that patients' health was going to be maintained, and safe conditions not only for the people involved in the test but the personnel who were administering the test" and "wanting to insure itself from the liability standpoint, from indemnification, be sure that Celgene protected itself." (D.E. No. 277 at 17:2-17:25; *see also* D.E. No. 270 at 2 ("[E]ven assuming *arguendo* that Mylan could establish a refusal to deal that harmed competition, Celgene nonetheless has shown indisputably valid business justifications for insisting upon certain terms before dealing with Mylan.")). *Third*, Mylan rebuts each of the justifications. (*See, e.g.*, D.E. No. 277 at 25:17-26:2).

It appears that the parties cannot proffer (nor can the Court find) clear binding Third Circuit precedent about how the rule-of-reason burden-shifting framework specifically and neatly applies **[*19]** in a refusal-to-deal case such as this one. (*See also* D.E. No. 277 at 8:16-18 ("[Celgene's Counsel:] I will confess, the cases are not all the model of clarity because this area of the law is really difficult, and courts struggle with it.")). What is clear, however, is no Third Circuit precedent says that any other framework applies. *See also* *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 281 (3d Cir. 2012)* ("The rule of reason governs Plaintiffs' claims under *Section 1* and *Section 2* of the Sherman Act . . . .").

Moreover, the crux of the parties' dispute is whether Celgene had valid business justifications for its refusals that are non-rebuttable as a matter of law. As evident from the discussion below, this is what the parties have litigated—and this is what the Court endeavors to resolve while being mindful of the applicable burden-shifting framework.

VIII. *Section 2* of the Sherman Act

A. *Section 2* generally

Under *§ 2* of the Sherman Act, a firm cannot "monopolize" or "attempt to monopolize." *15 U.S.C. § 2*; *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. A monopolization claim under *§ 2* requires (1) "the possession of monopoly power in the relevant market" and (2) "the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Trinko, 540 U.S. at 407* (quotation **[*20]** marks and citation omitted).[10]

First, "[m]onopoly power is the ability to control prices and exclude competition in a given market." *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 307 (3d Cir. 2007)*. But just possessing monopoly power—and the concomitant charging of monopoly prices—"is not only not unlawful; it is an important element of the free-market system." *Trinko, 540 U.S. at 407*. Thus, "the possession of monopoly power will not be found unlawful unless it is

[10] "By contrast, to succeed on a claim of attempted monopolization under *§ 2*, a plaintiff must prove (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Warner Chilcott, 838 F.3d at 433* (internal quotation marks, citation, and footnote omitted).

accompanied by an element of anticompetitive *conduct*." *Id.* (emphasis in original). "Firms may acquire monopoly power by establishing an infrastructure that renders them uniquely suited to serve their customers." *Id.*

"The *second* element of a monopolization claim under § 2 requires the willful acquisition or maintenance of monopoly power." Broadcom, 501 F.3d at 308 (emphasis added). This acquisition or maintenance of monopoly power "must be accompanied by some anticompetitive conduct on the part of the possessor." *Id.* (citation omitted). "Anticompetitive conduct may take a variety of forms, but it is generally defined as conduct to obtain or maintain monopoly power as a result of competition on some basis other than the merits." *Id.* (citation omitted). "Conduct that impairs the opportunities of rivals and either does not further competition **[*21]** on the merits or does so in an unnecessarily restrictive way may be deemed anticompetitive." *Id.* (citation omitted). Indeed, "the Sherman Act directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself." Warner Chilcott, 838 F.3d at 438 (quotation marks and citation omitted). In short, "a monopolist will be found to violate § 2 of the Sherman Act if it engages in exclusionary or predatory conduct without a valid business justification." Broadcom, 501 F.3d at 318 (quoting *LePage's Inc. v. 3M*, 324 F.3d 141, 152 (3d Cir. 2003) (en banc)).

B. Refusal to deal with competitors

"[A]s a general matter, the Sherman Act 'does not restrict the long recognized right of [a] trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal.'" Trinko, 540 U.S. at 408 (quoting United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919) (first alteration added)). Although the Supreme Court places a "high value . . . on the right to refuse to deal with other firms," this "does not mean that the right is unqualified." Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985). Thus, "[u]nder certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate § 2." Trinko, 540 U.S. at 408.

The Supreme Court's *Trinko* case provides key policy considerations **[*22]** and precepts for a refusal-to-deal case such as this one, including the following.

First, "[f]irms may acquire monopoly power by establishing an infrastructure that renders them uniquely suited to serve their customers," and "[c]ompelling such firms to share the source of their advantage is in some tension with the underlying purpose of ***antitrust law***, since it may lessen the incentive for the monopolist, the rival, or both to invest in those economically beneficial facilities." Id. at 407-08.[11] Further, "[e]nforced sharing also requires antitrust courts to act as central planners, identifying the proper price, quantity, and other terms of dealing-a role for which they are ill suited"—and "compelling negotiation between competitors may facilitate the supreme evil of antitrust: collusion." Id. at 408.[12]

Second, the Court stated that, "[u]nder certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate § 2"—but that the Court has been "very cautious in recognizing such

---

[11] *See also* Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993) ("Even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws . . . ."); Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1078 (10th Cir. 2013) ("Were intent to harm a competitor alone the marker of antitrust liability, the law would risk retarding consumer welfare by deterring vigorous competition . . . ."); Olympia Equip. Leasing Co. v. W. Union Tel. Co., 797 F.2d 370, 379 (7th Cir. 1986) ("[I]f conduct is not objectively anticompetitive the fact that it was motivated by hostility to competitors . . . is irrelevant.").

[12] *See also* Trinko, 540 U.S. at 415 ("No court should impose a duty to deal that it cannot explain or adequately and reasonably supervise. The problem should be deemed irremediable by ***antitrust law*** when compulsory access requires the court to assume the day-to-day controls characteristic of a regulatory agency.") (internal quotation marks and citation omitted).

exceptions, because of the uncertain virtue of forced sharing and the difficulty of identifying and remedying anticompetitive conduct by a single firm." *Id.*

Third, "[a]ntitrust analysis **[*23]** must always be attuned to the particular structure and circumstances of the industry at issue. Part of that attention to economic context is an awareness of the significance of regulation." *Id. at 411*. It is "of particular importance" to determine whether there is "a regulatory structure designed to deter and remedy anticompetitive harm." *Id. at 412*. "Where such a structure exists, the additional benefit to competition provided by antitrust enforcement will tend to be small, and it will be less plausible that the antitrust laws contemplate such additional scrutiny." *Id.* "Where, by contrast, there is nothing built into the regulatory scheme which performs the antitrust function, the benefits of antitrust are worth its sometimes considerable disadvantages." *Id.*

IX. Celgene cannot be held liable under § 2 of the Sherman Act for conduct before FDA "approval" of Mylan's protocols

A. Relevant factual background

Thalomid® Samples.

- **9/2/2005**: Mylan wrote to Celgene requesting 3,360 capsules of Thalomid® for bioequivalency testing. (D.E. No. 228-4, Ex. 16);

- **12/19/2005**: Celgene responds to Mylan's 9/2/05 letter stating that Celgene "consider[s] our S.T.E.P.S. program to represent a binding commitment to the FDA that **[*24]** we will ensure, to the maximum extent possible, that the drug is used appropriately so as to avoid fetal exposure;" Mylan should contact the FDA to discuss S.T.E.P.S.; and, if the FDA says "in writing" to Celgene that Celgene can "violate" S.T.E.P.S., then Celgene will "further evaluate [Mylan's] request at that time." (D.E. No. 228-5, Ex. 18);

- **1/11/2006**: Mylan writes to the FDA, attaching Celgene's 12/19/2005 letter and requesting the FDA to provide Celgene with written authorization to supply Mylan with Thalomid® capsules; Mylan also provides the FDA with proposed protocols for the bioequivalence studies it intends to conduct. (*Id.* at Ex. 20);

- **2/8/2007**: The FDA writes Celgene, stating that the "FDA intends to exercise its enforcement discretion to permit Celgene to provide to another drug manufacturer (or its agent) 500 units of Thalomid for the purpose of conducting bioequivalence testing, when Celgene has received confirmation in writing from the sponsor, its agent, or FDA that the sponsor of the study either has an IND in effect for the study or has otherwise provided the agency with sufficient assurance that the bioequivalence study will be conducted in such a manner as to **[*25]** ensure the safety of the subjects." (D.E. No. 228-6, Ex. 26);

- **2/12/2007**: The FDA wrote to Mylan, referencing Mylan's 1/11/2006 letter and stating that the FDA "intend[ed] to exercise its enforcement discretion" to permit Celgene to provide 500 units of Thalomid® to another drug manufacturer "when Celgene has received confirmation in writing from the sponsor, its agent, or FDA that the sponsor of the study either has an IND in effect for the study or has otherwise provided the agency with sufficient assurance that the bioequivalence study will be conducted in such a manner as to ensure the safety of the subjects"; and "[t]hese safeguards would represent a substitute for the controls present in the S.T.E.P.S. program." (*Id.* at Ex. 28);

- **5/1/2007**: Mylan writes to the FDA stating that "[o]nce the Agency has reviewed the enclosed study protocols and has determined that Mylan has provided sufficient safeguards to assure that the bioequivalence studies will be conducted in such a manner as to ensure the safety of the subjects, we would appreciate receiving your written confirmation," which "will then be forwarded to Celgene." (*Id.* at Ex. 29);

• **9/11/2007**: The FDA writes to Mylan, stating **[*26]** that "[t]he proposed bioequivalence study protocol comparing Thalidomide Capsules . . . to . . . Thalomid® (Thalidomide) Capsules . . . are acceptable, provided that" Mylan includes 14 "recommendations." (*Id.* at Ex. 30);

• **11/16/2007**: Mylan writes to Celgene stating that "it is Mylan's understanding that" the FDA "informed Celgene that FDA intends to exercise enforcement discretion to permit Celgene to provide another drug manufacturer with Thalomid® for the purpose of conducting bioequivalence . . . testing"—and that "this letter confirms that Mylan has received affirmation from the Agency indicating the Mylan's proposed bioequivalence study protocols regarding Thalidomide Capsules provide adequate safety measures to ensure the safety of subjects" and Mylan "is prepared to pay full value for the shipment . . . of Thalomid® capsules." (*Id.* at Ex. 32).

Revlimid® Samples.

• **8/24/2012**: Mylan submits lenalidomide bioequivalence safety protocols to the FDA for review and requested "written confirmation" when the FDA determined that the protocols had "the appropriate safeguards"—and Mylan represented to the FDA that this written confirmation would then be provided to Celgene with a request **[*27]** for Revlimid®. (*See* D.E. No. 228-9, Ex. 84);

• **10/1/2012**: The FDA writes to Mylan stating that the FDA reviewed Mylan's protocols (as referenced in Mylan's 8/24/2012 letter to the FDA) and, "[b]ased upon the comparison of the safety measures in the latest approved Revlimid® labeling and the Risk Evaluation and Mitigation Strategy (REMS) RevAssist® program to the safety measures in the submitted protocols, the protocols are not safe to proceed and [certain] additions to the protocols are recommended. . . ." (*Id.* at Ex. 85);

• **11/19/2012**: Mylan writes to the FDA providing additional information and stating that "Mylan does still desire [the FDA's] assistance in obtaining . . . Revlimid®, so that we can conduct the necessary chemistry and bioequivalence testing to support the future filing of an Abbreviated New Drug Application (ANDA)." (*Id.* at Ex. 86);

• **2/28/2013**: The FDA writes Mylan stating that "[b]ased upon the comparison of the safety measures in the latest approved Revlimid® labeling and the Risk Evaluation and Mitigation Strategy (REMS) RevAssist® program to the safety measures in the submitted protocols, the three protocols are not safe to proceed." (*Id.* at Ex. 87);

• **5/1/2013**: **[*28]** Mylan writes to Celgene requesting Revlimid® samples, stating that "Mylan's safety protocols for its proposed bioequivalence testing have been submitted to the Office of Generic Drugs" and Mylan's "bioequivalence studies will be conducted in a manner to ensure the safety of the subjects." (*Id.* at Ex. 88);

• **5/7/2013**: Mylan writes to the FDA in response to the FDA's 2/28/2013 letter, submitting additional information and certain revisions. (*Id.* at Ex. 89);

• **5/14/2013**: Celgene writes to Mylan in response to Mylan's 5/1/2013 letter, stating that "Celgene will sell Revlimid to Mylan for the sole purpose of *in vitro* and *in vivo* bioequivalence testing necessary to support an ANDA upon (i) our satisfactory review of the documents requested [in the letter] and (ii) the execution of a Supply Agreement which will include the terms and conditions for sale, including indemnification provisions." Celgene also requested (among other things in nine categories of information) "written confirmation that Mylan's bioequivalence protocols have been approved by the [FDA]" and "written confirmation the FDA will allow Celgene to sell the requested amount of Revlimid . . . to Mylan." (*Id.* at Ex. 90);

• **7/29/2013** **[*29]** : The FDA writes Mylan in response to Mylan's 5/7/2013 letter, stating that the "three submitted protocols are safe to proceed." (*Id.* at Ex. 91);

- **3/11/2014**: Mylan writes Celgene, stating that the "letter serves to notify Celgene that Mylan has received all necessary approvals from the FDA to conduct the requested bioequivalence testing," citing the 7/29/2013 letter from the FDA to Mylan and attaching a copy of that letter to its correspondence." (*Id.* at Ex. 92).

B. The parties' contentions

Celgene argues that "there is no dispute that *until* at least November 2007, the FDA's February 2007 condition for permitting Celgene to sell Thalomid samples to Mylan was not satisfied." (D.E. No. 228 at 30 (emphasis in original)). And, for Revlimid®, Celgene contends that "[i]n August 2012, Mylan submitted to the FDA protocols for a lenalidomide study. The FDA rejected them, as well as Mylan's second submission, as 'not safe to proceed.' The FDA approved Mylan's protocols on its third attempt, in July 2013, and Mylan so informed Celgene in March 2014." (*Id.* (internal citations omitted)).

Celgene asserts that "[u]ntil the FDA informed Celgene that it would permit a sale for generic bioequivalence testing, **[*30]** and until Mylan communicated to Celgene that the FDA had approved its testing protocols, Celgene indisputably had at least a reasonable basis to fear that an extra-REMS sale of Thalomid or Revlimid would run afoul of the law—and potentially subject Celgene to FDA enforcement or a misbranding prosecution." (*Id.* at 31). Celgene argues that "in the absence of FDA approval, the antitrust laws do not compel a manufacturer to sell samples of a REMS product to a generic manufacturer for purposes of bioequivalence testing." (*Id.* at 32 (citations omitted)). And Celgene contends that, "[i]n addition to the law, the undisputed evidence in discovery refutes Mylan's argument that Celgene should have sold it samples before receiving the FDA's permission." (*Id.* at 33). Celgene maintains that "it was reasonable for Celgene to condition selling Thalomid and Revlimid samples on FDA authorization" and that "summary judgment should be granted on Mylan's claims that Celgene should have sold samples before Mylan informed Celgene of FDA's alleged approval." (*Id.* at 34).

In opposition, Mylan asserts that "Celgene never questioned the legality of providing samples to third parties outside of the REMs programs," and only for generic companies, **[*31]** "Celgene claimed that it needed approval from FDA. . . ." (D.E. No. 237 at 25). Mylan claims that, "at least after receiving FDA approval, Celgene had no reason (other than its anticompetitive desire to foreclose competition) to refuse to sell samples to Mylan." (*Id.* at 37). It asserts "the evidence makes clear that FDA review and approval of bioequivalence protocols is not required by law"—and the "FDA introduced the procedure in this case because there had been complaints about Celgene's refusal to provide samples." (*Id.*). Mylan maintains that generic companies were "permitted (but not required) to submit protocols for FDA review and the agency would then permit its approval to be communicated to Celgene in order to satisfy safety-related concerns." (*Id.* at 37-38). Mylan argues that "FDA review and approval of their bioequivalence protocols was unnecessary and Celgene's insistence on that review was part of its anticompetitive scheme." (*Id.* at 39-40).

C. Analysis

As noted, "a monopolist will be found to violate *§ 2* of the Sherman Act if it engages in exclusionary or predatory conduct without a valid business justification." *LePage's Inc*, 324 F.3d at 152; *see also* *Retractable Techs., Inc. v. Becton Dickinson & Co., 842 F.3d 883, 892 (5th Cir. 2016)* ("To determine whether conduct is exclusionary, the court looks to the proffered business **[*32]** justification for the act. If the conduct has no rational business purpose other than its adverse effects on competitors, an inference that it is exclusionary is supported.") (internal quotation marks and citations omitted).

As an initial matter, both parties—seemingly for the sake of convenience and for summary-judgment purposes—refer to the following as FDA "approvals" of Mylan's proposed bioequivalence study protocols that were conveyed to Celgene: (1) the November 16, 2007 letter relating to Thalomid® from Mylan to Celgene that confirmed Mylan "received affirmation from the [FDA] indicating that Mylan's proposed bioequivalence study protocols regarding

Thalidomide Capsules provide adequate safety measures to ensure the safety of subjects"[13]; and (2) the March 11, 2014 letter relating to Revlimid® from Mylan to Celgene that served "to notify Celgene that Mylan has received all necessary approvals from the FDA to conduct the requested bioequivalence testing."[14] (*See, e.g.*, D.E. No. 228 at 9-10, 11-12, 30, 34; D.E. No. 237 at 10, 13, 37-38; D.E. No. 277 at 19:8-20:5, 35:2-6, 54:12-22).

The Court finds there is no genuine dispute of material fact that Celgene acted reasonably by requiring **[*33]** FDA approval before selling Mylan samples of Thalomid® and Revlimid®. In so finding, the Court assumes Mylan meets the first prong of the burden-shifting framework. But the Court finds that Celgene has met its burden at this stage that it had a valid business justification for requiring FDA approval—which Mylan has not rebutted for this issue to go to a jury. *See* *Morris Comm'cns Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1295 (11th Cir. 2004)* ("Unlawful monopoly power requires anticompetitive conduct, which is conduct without a legitimate business purpose . . . .").

To begin with, the FDA's July 1998 NDA-approval letter for Thalomid® provides, in relevant part, as follows:

> We have reviewed this application under the restricted distribution regulations contained in 21 CFR 314 (Subpart H) and have concluded that restrictions on distribution and use of thalidomide are needed to assure safe use of the product. Please see *21. CFR 314.520*.
>
> We have completed our review of this application, including the restrictions on the distribution and use of this product you suggested in your June 8, 1998 submission to the NDA entitled "System for Thalidomide Education and Prescribing Safety (S.T.E.P.S.)." We have concluded that adequate information has now been presented to demonstrated [sic] that the drug, **[*34]** when marketed in accordance with the terms of restricted distribution and use outlined in the June 8, 1998 S.T.E.P.S. document, is safe and effective for use . . . .
> Please note that the June 8, 1998 S.T.E.P.S. restricted distribution program is an integral part of the approved NDA for this product and is an essential component of the terms of this NDA's approval by FDA for marketing this product in the United States. As such, any proposed change(s) in the S.T.E.P.S. program must be submitted to the FDA as a supplement to this NDA and any proposed change(s) must have FDA prior approval before implementation. Changing the S.T.E.P.S. program without prior FDA approval may render the product misbranded and an unapproved new drug.
> . . . .
> In order to monitor the success of compliance with the restricted distribution provisions of this approval action, we intend to conduct inspections of the monitoring sites, . . . as well as Celgene's records during the first quarter after product launch. We will meet with you to discuss the inspections within one month after completions of the inspections. Inspections and meetings with you will continue periodically thereafter as appropriate.

(D.E. No. 228-3, **[*35]** Ex. 1).

In its February 8, 2007 correspondence to Celgene, the FDA stated, in relevant part, that the agency

> intends to exercise its enforcement discretion to permit Celgene to provide to another drug manufacturer (or its agent) 500 units of Thalomid for the purpose of conducting bioequivalence testing, *when Celgene has received confirmation in writing from the sponsor, its agent, or FDA that the sponsor of the study either has an IND in effect for the study or has otherwise provided the agency with sufficient assurance that the bioequivalence study will be conducted in such a manner as to ensure the safety of the subjects*.

(D.E. No. 228-6, Ex. 26 (emphasis added)).

As for Revlimid®, the FDA's December 2005 NDA-approval letter states, in relevant part, as follows:

---

[13] (D.E. No. 228-6, Ex. 32).

[14] (D.E. No. 228-9, Ex. 92).

> It is approved under the provisions of 21 CFR 314.520 (Subpart H) . . . for use as recommended in the agreed upon labeling text, required patient labeling, and the components of the RevAssistSM Risk Minimization Action Plan (RiskMAP).
>
> Under 21 CFR 314.520 (Subpart H), distribution of the drug is limited as described below and in the attached detailed RevAssistSM program. The primary goal of the RevAssistSM program is to prevent fetal exposures, pending complete **[*36]** and adequate characterization of the teratogenic potential of lenalidomide.
>
> . . . .
>
> We remind you that your Revlimid® RiskMAP (called RevAssistSM) is an important part of the postmarketing risk management for Revlimid® . . . .
>
> . . . .
>
> Any change to the [Revlimid® Risk Minimization Action Plan] must be discussed with FDA prior to its institution and is subject to FDA's determination that the required components continue to be met. We expect your continued cooperation to resolve any problems regarding the RevAssistSM program that may be identified following approval of this application.

(D.E. No. 228-8, Ex. 77).

In its May 14, 2013 correspondence to Mylan, Celgene stated, in relevant part, that

> Please provide written confirmation that Mylan's bioequivalence protocols have been approved by the Food and Drug Administration ("FDA"), a copy of such FDA approved protocols, and written confirmation that the FDA will allow Celgene to sell the requested amount of Revlimid (2800 capsules) to Mylan (we note in your letter that Mylan has submitted its protocols to the Office of Generic drugs) . . . .

(D.E. No. 228-9, Ex. 90).

Mylan's own expert testified at deposition that it was not unreasonable to get **[*37]** assurances from the FDA—a point Mylan conceded at oral argument. (*See* D.E. No. 228-6, Ex. 31 at 59:12-60:12, 67:13-17; *see also* D.E. No. 277 at 41:10-21 ("[Court:] Doesn't your own expert — I pulled that transcript, I have it — doesn't your own expert say it was not unreasonable to get assurances from the FDA? [Mylan's Counsel]: He does, your Honor, and that testimony is there, and I would expect Celgene to argue it vociferously to the jury. But it does not eliminate a question of fact on that issue, your Honor. But, absolutely, he said that. We don't believe it was correct, but he said it. He's our expert. We're held to it . . . . It is something that the jury will have to weigh when the jury hears it.")).

And Mylan also conceded at oral argument that it asked for FDA approval of other companies' study protocols when such companies made sample requests to Mylan for clinical testing. (*See* D.E. No. 277 at 50:17-51:13; *see also* D.E. No. 228-10, Ex. 107 (discussing "a request from Amneal to purchase a quantity of Amnesteem (isotretinoin) from Mylan for purposes of completing its product development program" and stating that "Mylan is happy to cooperate with Amneal and make the product **[*38]** available," but "Mylan will just need a letter from the FDA confirming that Amneal has submitted bioequivalence study protocols that provide for the necessary safety precautions for prevention of fetal exposure to isotretinoin and that the FDA has reviewed those protocols and found them acceptable")).

To be sure, Mylan implies that Celgene has provided Thalomid® and Revlimid® to thousands of investigator-initiated trials ("IITs"), as well as other pharmaceutical companies, that would not result in a competitive threat—*without* requiring FDA review and approval of protocols. (*See* D.E. No. 237 at 16-17, 24-26).

But the record does not support Mylan's contention. Rather, Celgene has come forward with record evidence showing the opposite. (*See* D.E. No. 240-1, Celgene's Reply Statement of Material Facts ("Celg. Reply SMF") ¶ 317)). In particular, Celgene cites the following deposition testimony: "Every single patient that is enrolled in an investigator-initiated trial is enrolled in either STEPS or RevAssist or the lenalidomide counseling program." (D.E. No. 240 at 6 n.5; D.E. No. 240-4, Ex. 130 at 90:9-15;[15] *see also* D.E. No. 238-29, Ex. P307 at 4 (agreement

---

[15] The deponent previously "managed the implementation and execution of all investigator-initiated trials that involved Thalomid and Revlimid." (D.E. No. 238-27, Ex. P299 at 21:16-19; *see also id.* at 25:3-9).

between Celgene and Merck & Co., **[*39]** Inc. in which Merck & Co. must "ensure that the Investigators will prescribe . . . Revlimid® and will: a) register with Celgene's RevAssist® Program prior to prescribing . . . b) require that all Clinical Trial subjects register with Celgene's RevAssist® Program . . . and c) require that all Clinical Trial subjects return all unused" Revlimid® "in accordance with the RevAssist® Program")).

Mylan cites a portion of deposition testimony and argues that Celgene conceded "that it knew that it is possible for a company to conduct human trials using Thalidomide without necessarily using the precise STEPS method." (*See* D.E. No. 237 at 40 (internal quotation marks omitted) (citing Celg. Reply SMF ¶ 333)). But Mylan leaves out a portion reproduced in its own statement of material facts: "STEPS was designed and RevAssist was designed to mimic the types of controls we have in an IRB approved clinical trial in a commercial setting . . . [Y]es, it is possible to conduct a trial without using our STEPS or Lenalidomide REMS, *but we have to be assured that it meets a [sic] minimum standards of what is established in the way we commercially distribute our drug*." (Celg. Reply SMF ¶ 333 (alterations **[*40]** in original) (emphasis added)). After all, the issue is whether there was an objectively legitimate business justification in requiring FDA approval of study protocols before turning over samples, not the precise use of Celgene's REMS programs. *See LePage's Inc.*, 324 F.3d at 152 ("[A] monopolist will be found to violate *§ 2* of the Sherman Act if it engages in exclusionary or predatory conduct without a valid business justification.").[16]

Further, persuasive authority supports that—until Celgene was informed about the FDA's approval of Mylan's testing protocols for either drug—no reasonable jury can infer that Celgene had no objectively legitimate business justification for not selling Mylan samples of Thalomid® or Revlimid®. *See Natco Pharma, 2015 U.S. Dist. LEXIS 131058, 2015 WL 5718398, at *4-6* (granting brand company's motion to dismiss generic company's *Section 2* refusal-to-deal claims, in part, because "complying with FDA requirements requiring a valid prescription before dispensing [the brand product] constitutes a valid business reason to refuse to dispense [the brand product] outside of the REMS requirements"); *cf. In re Thalomid and Revlimid Antitrust Litig., No. 14-6997, 2015 U.S. Dist. LEXIS 177541, 2015 WL 9589217, at *15 (D.N.J. Oct. 29, 2015)* (denying Celgene's motion to dismiss plaintiffs' complaint because they "specify that Mylan and [another generic company named Lannett Company, Inc. ("Lannett")] gave **[*41]** Celgene letters from the FDA that stated that the agency would not take action should Celgene provide samples to them" and "Celgene continued to refuse to deal," which "raises a plausible inference that Celgene's reliance on its distribution programs is pretextual").

The overarching flaw with Mylan's position—regarding alleged liability for Celgene's conduct before FDA "approval" of Mylan's protocols—seems to be that a jury could find liability based apparently only on intent. For example, Mylan states that:

> at least after receiving FDA approval, Celgene had no reason (other than its anticompetitive desire to foreclose competition) to refuse to sell samples to Mylan. . . . The FDA introduced the procedure in this case because there had been complaints about Celgene's refusal to provide samples. Generics were therefore permitted (but not required) to submit protocols for FDA review and the agency would then permit its approval to be communicated to Celgene in order to satisfy safety-related concerns. . . . *Although Mylan did not protest contemporaneously to Celgene that FDA approval was unnecessary, Mylan did not have access to all of the evidence it now has demonstrating that Celgene's **[*42]** modus operandi was to delay and foreclose generic entry to protect its monopoly over the thalidomide and lenalidomide markets. Now, after discovery, it is clear that Celgene's intent was to restrict competition*.

(D.E. No. 237 at 37-38 (emphasis added) (internal citations omitted)).

As stated by the Court of Appeals for the Ninth Circuit, however, intent "is not sufficient alone to establish liability." *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1184 (9th Cir. 2016)* ("Competitors are not required to engage in a lovefest; indeed, '[e]ven an act of pure malice by one business competitor against another does not,

[16] *See also* *Morris Comm'cns Corp., 364 F.3d at 1295* ("Even a company with monopoly power has no general duty to cooperate with its business rivals and may refuse to deal with them if valid business reasons exist for such refusal. . . . Unlawful monopoly power requires anticompetitive conduct, which is conduct without a legitimate business purpose that makes sense only because it eliminates competition.") (internal quotation marks and citations omitted).

without more, state a claim under the federal antitrust laws."') (quoting *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993))*; *see also* *Olympia Equip. Leasing Co. v. W. Union Telegraph Co., 797 F.2d 370, 379 (7th Cir. 1986)* ("[I]f conduct is not objectively anticompetitive the fact that it was motivated by hostility to competitors . . . is irrelevant.").

In sum, the record in this case, as well as persuasive authority, compels this Court to find that there is no genuine issue of material fact that it was objectively reasonable for Celgene to require FDA approval of Mylan's protocols before selling Mylan samples of either Thalomid® or Revlimid®. Celgene is therefore granted summary judgment on Mylan's claims that Celgene improperly withheld samples of either of these drugs before **[*43]** receiving assurance that the FDA had approved Mylan's protocols.

X. Issues of material fact exist about whether Celgene can be held liable under *§ 2* of the Sherman Act for conduct after FDA "approval" of Mylan's protocols

A. Relevant factual background

Thalomid® Samples.

- **9/11/2007**: The FDA writes to Mylan, stating: "The proposed bioequivalence study protocol comparing Thalidomide Capsules . . . to . . . Thalomid® (Thalidomide) Capsules . . . are acceptable, provided that" Mylan includes 14 "recommendations." (D.E. No. 228-6, Ex. 30);

- **11/16/2007**: Mylan writes to Celgene stating that "it is Mylan's understanding that" the FDA "informed Celgene that FDA intends to exercise enforcement discretion to permit Celgene to provide another drug manufacturer with Thalomid® for the purpose of conducting bioequivalence . . . testing" and that "this letter confirms that Mylan has received affirmation from the Agency indicating that Mylan's proposed bioequivalence study protocols regarding Thalidomide Capsules provide adequate safety measures to ensure the safety of subjects." (*Id.* at Ex. 32);

- **11/21/2007**: Celgene's then-Regulatory and Compliance Counsel sends a calendar-invite email to several Celgene **[*44]** executives with the subject line "Exclusivity Strategy Special meeting," stating that another generic company's request "is deficient in a way that the Mylan request is not, and the Mylan request is what we should anticipate future requests looking like." (*See* D.E. No. 237-16, Ex. P26);

- **1/8/2008**: Celgene writes to Mylan in response to Mylan's 11/16/2007 letter, stating that "Mylan seeks to purchase 2,500 capsules of Thalomid®" which is "contrary to FDA's stated enforcement discretion policy" that "established a 500-unit limit" such that "Celgene is prohibited from provided the requested Thalomid®." Celgene also requests that Mylan provide additional information such as "intended risk management measures," stating that "Celgene's concerns about distributing Thalomid® outside of the S.T.E.P.S.® program are independent of FDA's regulatory oversight" and "there are significant business and liability concerns associated with Celgene's distribution of Thalomid®." Further, Celgene inquires about indemnification relating to Mylan's proposed studies. (D.E. No. 228-6, Ex. 34);

- **2/25/2008**: Mylan responds to Celgene's 1/8/2008 letter, stating that it is "curious that [Celgene] is asking for these **[*45]** voluminous and proprietary materials only now, many months after our initial exchange" where no mention of wanting such items was made and that "Celgene is using these information requests as pretext to continue to delay generic competition to Thalomid®." Further, Mylan provides a draft confidentiality agreement and states that "in hopes of avoiding further delay," Mylan is prepared to provide Celgene immediately with all the requested information on a confidential basis. (D.E. No. 238-13, Ex. P170);

• **6/27/2008**: Mylan writes Celgene (in response to Celgene's 1/8/2008 letter), stating that it "has received affirmation from FDA indicating that Mylan's proposed study protocols for Thalidomide capsules provide adequate safety measures to ensure the safety of patients sufficient to permit the Agency to exercise its enforcement discretion in permitting the transfer of a limited amount of Thalomid® for study purposes." Mylan also raises concern that Celgene is using "information requests as a pretext to continue to delay generic competition to Thalomid®," but "in hopes of avoiding further delay, we provide you with all of the information you requested." Mylan also represents that it "is willing **[*46]** to enter into an appropriate indemnification arrangement to indemnify Celgene" for liability resulting from Mylan's studies. (D.E. No. 228-7, Ex. 39);

• **6/24/2009**: Celgene writes Mylan, stating that Mylan has not provided Celgene a copy of the FDA's approval letter and Mylan's proposed bioequivalence protocol—and noting certain purported omissions from Mylan's submitted information as of that day. (*Id.* at Ex. 43; Celg. SMF ¶ 52).

Revlimid® Samples.

• **5/14/2013**: Celgene writes to Mylan in response to a 5/1/2013 letter from Mylan, stating: "Celgene will sell Revlimid to Mylan for the sole purpose of in vitro and in vivo bioequivalence testing necessary to support an ANDA upon (i) our satisfactory review of the documents requested [in the letter] and (ii) the execution of a Supply Agreement which will include the terms and conditions for sale, including indemnification provisions." Celgene also requested (among other things in nine categories of information) "written confirmation that Mylan's bioequivalence protocols have been approved by the [FDA]." (D.E. No. 228-9, Ex. 90);

• **7/29/2013**: The FDA writes Mylan in response to a 5/7/2013 letter, stating that Mylan's "three submitted protocols **[*47]** are safe to proceed" and "include adequate safeguards that serve as an appropriate substitute for the controls present in the FDA mandated Revlimid® REMS program for ensuring patient safety." (*Id.* at Ex. 91);

• **3/11/2014**: Mylan writes Celgene, stating that this "letter serves to notify Celgene that Mylan has received all necessary approvals from the FDA to conduct the requested bioequivalence testing," citing the 7/29/2013 letter from FDA to Mylan and attaching a copy of that letter to its correspondence. Mylan also states that it "will not reengage in the back-and-forth correspondence initiated by Celgene over a more than three year period when Mylan similarly sought samples of thalidomide. . . ." Mylan further provided terms regarding indemnification. (*Id.* at Ex. 92);

• **3/20/2014**: Celgene writes Mylan, reiterating its requests for the information it requested in its 5/14/2013 letter. Celgene also represents that it would sell Revlimid® samples to Mylan upon its "satisfactory review of the documents and information" it requested and the execution of a Supply Agreement, including indemnification provisions substantially similar to the indemnification provisions that Mylan had proposed. **[*48]** (D.E. No. 237-27, Ex. P77);

• **5/19/2014**: The FDA writes Celgene stating that it has received a request from Mylan for help in getting Revlimid® "supplies" to test "a proposed generic lenalidomide product against Revlimid" and it "will not consider it a violation of the REMS for Celgene to provide to Mylan (or its agent) a quantity of Revlimid sufficient to allow Mylan to perform the testing to support its abbreviated new drug application." Further, the FDA noted that federal law "prohibits the holder of a new drug application covered by a REMS from using [REMS' elements] to block or delay approval of" an ANDA. Finally, the FDA said it "expects Celgene to provide Mylan with a sufficient quantity of REVLIMID to conduct necessary testing, but in any event no less than 500 capsules of each strength (2.5mg, 5mg, 10mg, 15mg and 25mg)." (D.E. No. 228-9, Ex. 93).

B. The parties' contentions

Celgene argues that "Mylan never contests that it was reasonable for Celgene to insist on information and assurances from Mylan before selling these highly dangerous medicines." (D.E. No. 240 at 4). It contends that "[t]he FDA's purported approval—which Mylan refused to disclose to Celgene until discovery **[*49]** in this litigation . . . —gave Celgene no assurances, for example, that Mylan had sufficient insurance or that Mylan would indemnify Celgene against losses." (*Id.* at 8 (internal citation omitted)).

In opposition, Mylan asserts that "Celgene purposefully developed iterative requests for which no reasonable end could be reached." (D.E. No. 237 at 23). Mylan argues that Celgene put Mylan "through multiple rounds of questioning that could only have been for the purpose of delay." (*Id.*). As an example, Mylan states that Celgene "chose to wait until serving Mylan with a second set of information demands in 2009—nearly four years after Mylan's initial request to procure product and after Mylan had already produced hundreds of pages of information that went unreviewed by anyone at Celgene." (*Id.* (citations omitted)). Mylan further contends that "several individuals identified by Celgene as the 'key decision-makers' regarding Mylan's request for samples never even reviewed the information sent by Mylan" and that "executives and employees who typically evaluated information from requesting parties ultimately played no role in processing generic requests." (*Id.* at 22).

C. Analysis

As for Celgene's conduct after **[*50]** receiving notice of FDA approval of Mylan's protocols, there are genuine issues of material fact such that a reasonable jury could infer that Celgene had no objectively legitimate business justification for not selling Mylan samples of Thalomid® or Revlimid®.

Although redundant in part, it is critical to recount some key events, as well as provide additional background. As noted regarding Thalomid®, Mylan's November 16, 2007 letter to Celgene stated that the FDA had approved Mylan's proposed protocols and that Mylan would pay the full value of shipment of Celgene's samples. (*See* D.E. No. 277 at 66:1-7). On January 8, 2008, Celgene wrote Mylan, questioning the amount of requested Thalomid® samples and requesting more information. (*See id.* at 66:8-19). On February 25, 2008, Mylan sent Celgene a letter in which Mylan represented that it was "prepared to provide" all the requested information from Celgene's January 8, 2008 letter. (D.E. No. 238-13, Ex. P170). Further, Mylan "enclosed a simple confidentiality agreement which [Mylan] ask[ed] that Celgene sign and return"—and if "any changes" are desired, to immediately contact Mylan. (*Id.*).

Celgene and Mylan negotiated over the confidentiality **[*51]** agreement until June 24, 2008, when Celgene sent Mylan the executed agreement. (Celg. Reply SMF ¶ 203). On June 27, 2008, Mylan sent Celgene a letter providing responses and supplemental information in response to Celgene's requests in its January 8, 2008 letter and also offered to enter into an appropriate indemnification agreement. (*Id.* ¶ 204). Celgene disputes any implication that Mylan's responses were complete and satisfactory. (*Id.*).

On July 25, 2008, Mylan sent Celgene a follow-up letter because it had not received a response to its June 27, 2008 letter, setting an August 1, 2008 deadline for a response or else it would pursue legal action. (*Id.* ¶ 205). In an August 1, 2008 letter, Celgene represented to Mylan that it was "carefully reviewing the documentation" that Mylan provided with its June 27, 2008 letter and that it would send Mylan a draft indemnification agreement by August 15, 2008. (*Id.* ¶ 206). But in his deposition, Celgene's then-Regulatory and Compliance Counsel confirmed that, as of March 4, 2011, no "business people" at Celgene had reviewed the supporting documentation sent by Mylan in response to Celgene's January 8, 2008 letter. (*Id.* ¶¶ 181, 209).

On August 15, **[*52]** 2008, Celgene sent a draft indemnification agreement to Mylan and the parties exchanged negotiation-related correspondence. (*See id.* ¶¶ 211-12). Finally, in a June 24, 2009 letter, Celgene wrote Mylan requesting the FDA's approval letter concerning Mylan's testing protocol, a copy of the protocol, and certain evidence concerning insurance. (D.E. No. 228-7, Ex. 43).

There are issues of fact—which may be interrelated—that are apparent from this history. First is timing. For example, regarding Mylan's request for Thalomid® samples, why did Celgene not ask for the FDA approval letter before June 24, 2009 as opposed to sooner? (*See, e.g.*, Celg. Reply SMF ¶ 213; *see also* D.E. No. 277 at 79:5-83:6). To be sure, at oral argument, Celgene argued that timing issues (such as this one) are not fatal to summary judgment. For example, it explained that these timing issues related to what it learned through its "dealings" with another generic company, Lannett Company, Inc., who also sought samples from Celgene. (*See* D.E. No. 277 at 78:16-80:21). But as the Court indicated during the oral argument, this explanation must be presented to a jury. (*See id.* at 80:22-24; *see also id.* at 81:20-83:6).

Moreover, **[*53]** no "business people" at Celgene reviewed Mylan's supporting documentation in response to Celgene's January 8, 2008 letter. (Celg. Reply SMF ¶¶ 181, 209). But Celgene served an interrogatory response in a Federal Trade Commission (the "FTC") investigation that the two then-CEOs "made the decisions on behalf of Celgene regarding Celgene's responses to pharmaceutical companies requesting to purchase THALOMID® or REVLIMID®" with legal advice from Celgene's Deputy General Counsel and then-Regulatory and Compliance Counsel. (Celgene Reply SMF ¶ 207). Yet one of these two CEOs testified at deposition that "he did not have any input into Celgene's information requests on January 8, 2008, did not know for sure who had provided input, and had never seen Mylan's June 27, 2008 letter responding to the requests"—and further, "he could not recall reviewing 'a single response from a generic company' to Celgene's information requests, or sitting in any meeting with Celgene's legal, regulatory, or drug safety departments where such a response was discussed." (*Id.*). And the other CEO testified that "he had no 'personal knowledge of whether' anyone actually reviewed the protocols submitted by various **[*54]** generic companies over time." (*Id.* ¶ 208).

In sum, the Court finds that there are genuine issues of material facts such that a reasonable jury could infer that Celgene had no objectively legitimate business justification for not selling Mylan samples of Thalomid® or Revlimid® samples after FDA approval of Mylan's study protocols.[17] Policy considerations further bolster this finding.

"Antitrust analysis must always be attuned to the particular structure and circumstances of the industry at issue"—and "[p]art of that attention to economic context is an awareness of the significance of regulation." *Trinko, 540 U.S. at 411*. In fact, the Supreme Court stated in *Trinko* that "regulatory context . . . may also be a consideration in deciding whether to recognize an expansion of the contours of *§ 2*." *Id. at 412*. Juxtaposing the post-FDA approval record here with the policy behind the Hatch-Waxman Act—as well as the absence of a regulatory mechanism by which an agency can compel Celgene to turn over samples to Mylan—weighs against granting Celgene summary judgment for claims involving conduct after FDA approval of Mylan's protocols. *Cf. In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig.*, 64 F. Supp. 3d at 687 ("[R]egulatory structure requiring cooperation actually diminishes the **[*55]** need for antitrust scrutiny.").

XII. Mylan cannot recover monetary damages for claims concerning Revlimid®

A. The parties' contentions

Celgene argues that, although Mylan did not ask for Revlimid® samples until 2013, "its theory assumes that, in the but-for world, Mylan would have obtained samples, developed a generic product, passed bioequivalence testing,

---

[17] Celgene's motion for summary judgment seeks dismissal of Mylan's claims for attempted monopolization and denial of an "essential facility." (*See, e.g.*, D.E. No. 240 at 8 n.8). But Celgene's proffered basis for dismissal of these claims assumes that—whether before or after FDA approval—there is no genuine issue of material fact that Celgene had a legitimate business justification for refusing to provide samples of Thalomid® and Revlimid®. (*See id.*). Because the Court cannot dismiss Mylan's claims insofar as they concern Celgene's conduct *after* FDA approval of Mylan's protocols, the Court cannot dismiss Mylan's claims for attempted monopolization and denial of an "essential facility" at this time.

Similarly, because Mylan's state antitrust claims rise and fall with the federal antitrust claims, the Court denies Celgene's motion insofar as it seeks dismissal of those claims in their entirety. (*See* D.E. No. 277 at 184:11-23).

and filed an ANDA—all by January 2010." (D.E. No. 228 at 35). "No reasonable jury could so find," says Celgene. (*Id.*).

In particular, Celgene contends that Natco Pharma ("Natco"), another generic company, filed an ANDA seeking FDA approval to market a generic version of Revlimid® in July 2010. (*Id.* (citing Celg. SMF ¶¶ 113-15)). It says that Celgene and Natco then engaged in patent litigation relating to Natco's ANDA filing—but settled such that Natco can market a limited amount of its generic version beginning in 2022, with full market entry in 2026. (*Id.* at 13, 35). Notably, Celgene asserts that "Mylan's sole damages theory for Revlimid" is that, had Celgene sold Mylan Revlimid® samples, "Mylan would have been able to file an ANDA before Natco, and that Mylan, instead of Natco, would be the one to enter the market in 2022 as the exclusive ANDA **[*56]** seller of generic lenalidomide." (*Id.* at 35-36 (citations omitted)). In other words, Celgene states that "Mylan's expert's damages model assumes that Mylan would have filed its ANDA in January 2010, before Natco, and that Mylan would have negotiated the same patent litigation settlement with Celgene that Natco did"—even though "Mylan did not ask Celgene for Revlimid samples until 2013." (*Id.* at 38 (citations omitted)).[18] Celgene argues that there is no evidence supporting this assumption. (*See id.*).

Critically, Celgene argues—in supplemental briefing requested by the Court—that, if the Court finds that Celgene cannot be held liable for conduct *before* FDA approval of Mylan's protocols, the Court need not decide whether Mylan can recover damages for Revlimid®. (*See* D.E. No. 270 at 3). Celgene thus avers that any claim concerning Revlimid® should be limited to injunctive relief. (D.E. No. 228 at 35).

In opposition, Mylan argues that any earlier request for Revlimid® samples would have been futile. (*See* D.E. No. 237 at 51-52). It contends that Celgene had a policy—until at least August 2012—that it would not, under any circumstances, sell or provide Revlimid® samples to generic companies for purposes of **[*57]** bioequivalence testing. (*Id.* at 52). Indeed, Mylan states that Celgene denied or failed to respond to every generic company's request for Revlimid® samples before 2010. (*Id.*). And, in light of this and Celgene's "years stringing along Mylan in its requests for Thalomid samples," Mylan argues that it "was entirely reasonable" that requesting samples in January 2008 would have been futile. (*Id.*). Mylan avers that, "[b]ecause of Celgene's anticompetitive conduct, the jury should resolve the issue of what Mylan's development timeline would have looked like in the but-for world." (*Id.* at 54).

Notably, Mylan argues—in supplemental briefing requested by the Court—that "any determination by the Court that FDA review of Mylan's protocols was required can easily be incorporated into Mylan's existing damages models" because, for both drugs at issue, "the time frame from submission of Mylan's protocols to the conclusion of the FDA's review was a matter of months." (D.E. No. 271 at 3). Mylan argues that this is "consistent with the negotiation timelines assumed" by its expert. (*Id.* ("Adding an express assumption that Celgene would have requested an FDA review (and that Mylan would have pursued it) to each damages **[*58]** timeline would require only a minor change in the assumptions of the model and no change to the actual damages calculations for each drug.")).

B. Analysis

Mylan's damages theory for its Revlimid® claims implicates the following figure from Mylan's expert's report:

Timing Underlying Mylan's "But For" Entry Into Generic Lenalidomide

Event	Time Required	Completion Date
Request Revlimid Sample	N/A	1/2008

[18] (*See also* D.E. No. 228 at 38 ("Mylan must produce evidence that, but for Celgene's allegedly unlawful conduct, Mylan would have: (i) asked Celgene for samples of Revlimid in 2008—five years before it actually did ask; (ii) developed a generic lenalidomide product in one-sixth of the time it actually took; (iii) shown that its product was bioequivalent to Revlimid by January 2010; and (iv) obtained the same patent settlement license from Celgene that Natco did after years of litigation.")).

Event	Time Required	Completion Date
Time to get Sample	6-12 Months	7/2008 to 1/2009
Complete bioequivalence Testing and ready To File ANDA	6 Months	1/2009 to 7/2009
File ANDA (after Celgene data exclusivity rights expire 12/27/2009)	N/A	1/1/2010
Patent Trial	30 Month Stay	7/2012
Negotiate REMS and ready to enter	6-12 Months	1/2013 to 7/2013
Entry Date Used (Based on Celgene/Natco Licensing Agreement)	N/A	Q2 2022

(D.E. No. 228-10, Ex. 99, Figure 2).[19]

Natco filed an ANDA for a generic version of Revlimid® in July 2010. (Celg. SMF ¶ 113; *see also* D.E. No. 228-10, Ex. 99 at 83). Mylan's damages theory thus contemplates an ANDA filing for a generic version of Revlimid® in January 2010—*before* Natco. (D.E. No. 228-10, Ex. 99 at 106). Importantly, this means that Mylan's damages model involves Mylan having "first-to-file" status and benefitting from the lucrative 180-day **[*59]** exclusivity period. (*See* *id. at 107*). In turn, this means that no other generic company could have marketed a generic version of Revlimid® before the fourth quarter of 2022 besides Mylan. (*See* *id. at 110*). Mylan agreed at oral argument that, for its existing damages model, it would need to be the first-filer. (*See* D.E. No. 277 at 111:19-23; *see also id.* at 124:15-17).

But, for reasons already discussed, the Court finds that Celgene is entitled to summary judgment on Mylan's claims concerning pre-FDA approval of Mylan's study protocols. In other words, there is no genuine issue of material fact that Celgene had an objectively legitimate business justification for requiring FDA approval of study protocols before turning over Revlimid® samples. And Mylan did not seek Revlimid® samples from Celgene and get FDA approval of its protocols until 2013—and did not communicate said FDA approval to Celgene until 2014.

Unlike for its Thalomid® claims (discussed below), Mylan proffers no damages model for its Revlimid® claims that contemplates an ANDA filing *after* FDA approval of its study protocols. Moreover, Mylan does not point to any evidence that Mylan could have developed its study protocols for its lenalidomide **[*60]** ANDA sooner than it actually did—which Celgene noted at oral argument. (*See* D.E. No. 277 at 117:7-12).

In contrast, for its Thalomid®-related claims, Mylan's expert proffers a damages calculation that is *not* entirely invalidated by the Court's ruling concerning FDA approval of Mylan's protocols: "I calculate damages assuming the following characteristics of the 'but for world' . . . Mylan's launch is delayed to Q3 2012 under the assumption that *Celgene does not provide samples until after Mylan gets FDA approval for its safety protocol*." (D.E. No. 228-10, Ex. 99 at 120 (emphasis added)).

At oral argument, Mylan's rebuttal boiled down to one concept: futility. Mylan reasons that, "had Celgene not engaged in this recidivist behavior," then "samples would have been requested and the process would have begun much earlier than it did" because "Mylan had identified Revlimid® for potential generic entry many years before, certainly by 2008." (D.E. No. 277 at 87:16-21). According to Mylan, "[t]here's no question that it could and would have begun the process then, and so rather than getting FDA approval in 2013, it would have gotten it in 2009 or

[19] Giving Mylan the benefit of the doubt, the Court sets aside—for purposes of summary judgment—Mylan's allegation in its Complaint that: "In January 2009, Mylan began efforts to develop a generic equivalent to Celgene's Revlimid." (D.E. No. 1 ¶ 131).

earlier." (*Id.* at 87:21-24). Mylan submits that, **[*61]** by January 2008, pursuing a generic version of Revlimid® was an opportunity for Mylan—"and had Celgene not been the problem that it had shown itself to be, . . . there's really no question that samples would have been requested at that time." (*Id.* at 103:21-24; *see also id.* at 104:14-15 (arguing that "asking for the samples had been demonstrated to be futile, expensive and painful")). Mylan stresses that "a demand is not necessary to show futility," and "the facts overwhelmingly demonstrate that such a request would have been futile." (*Id.* at 104:19-22).

Setting aside that Mylan's expert proffers no damages calculation assuming that samples are turned over *after* FDA approval of Mylan's protocols, there are still at least two problems with Mylan's position.

First, Mylan complains of futility based on Thalomid®-related back-and-forth with Celgene. As discussed, the Court has determined that Celgene cannot be held liable for conduct *before* FDA approval of Mylan's protocols. The back-and-forth preceding that date—November 16, 2007—involved: (1) Mylan's September 2, 2005 request (D.E. No. 228-4, Ex. 16); (2) Celgene's December 19, 2005 response directing Mylan to contact the FDA regarding **[*62]** S.T.E.P.S. (D.E. No. 228-5, Ex. 18); (3) the FDA's February 12, 2007 letter to Mylan stating that it will exercise enforcement discretion "when Celgene has received confirmation in writing from the sponsor, its agent, or FDA that the sponsor of the study . . . has . . . provided the agency with sufficient assurance that the bioequivalence study will be conducted in such a manner as to ensure the safety of the subjects" (D.E. No. 228-6 at Ex. 28); and (4) the FDA's September 11, 2007 letter to Mylan finding the proposed protocols acceptable and providing 14 recommendations (*id.* at Ex. 30).

So then the critical date is November 16, 2007, when Mylan notified Celgene that the FDA approved its proposed protocols. This then begs the question: what happened between November 2007 and January 2008 that convinced Mylan that it would be "futile, expensive and painful" to ask for Revlimid® samples in January 2008?

The only potential answer on this record is Celgene's January 8, 2008 letter to Mylan, a conclusion Mylan confirmed at oral argument. (*See* D.E. No. 228-6, Ex. 34; D.E. No. 277 at 150:25-151:25). And the Court is unconvinced that a reasonable jury could find futility based on this one letter; **[*63]** it amounts to a mere scintilla of evidence. After all, in its November 16, 2007 letter, Mylan sought 2,500 capsules of Thalomid®—even though the FDA had notified both Celgene and Mylan in February 2007 that it intended "to exercise its enforcement discretion to permit Celgene to provide to another drug manufacturer (or its agent) 500 units of Thalomid" for bioequivalence testing. (*See* D.E. No. 228-6, Exs. 26, 28 & 32). And Celgene noted as much in its January 8, 2008 letter. (*See id.*, Ex. 34 ("Mylan seeks to purchase 2,500 capsules of Thalomid® . . . . Mylan's request is contrary to FDA's stated enforcement discretion policy, which established a 500 unit limit.")). Moreover, Mylan ultimately decided that "it would be fruitless to" respond to Celgene's June 24, 2009 letter. (Celg. SMF ¶ 53). Mylan's counsel characterized this one letter as evidence of that Celgene "was jerking [Mylan] around." (*See* D.E. No. 277 at 151:3-12). But counsel arguing that this is evidence of futility in January 2008 is not enough. *See* Berckeley Inv. Grp. v. Colkitt, 455 F.3d 195, 201 (3d Cir. 2006) (citation omitted) ("[S]ummary judgment is essentially 'put up or shut up' time for the non-moving party: the non-moving party must rebut the motion with facts in the record **[*64]** and cannot rest solely on assertions made in the pleadings, legal memoranda, or oral argument.").

To be sure, Mylan's Head of Global Regulatory Science and Operations submitted a declaration—served after his deposition in this case and after the close of fact discovery—affirming, in relevant part, that:

> 6. Mylan selected lenalidomide as a generic product for development in January of 2008.
> 7. Mylan could have requested Revlimid samples from Celgene upon selecting this product for development. The only reason that Mylan did not request samples from Celgene at that time was because Mylan knew, from its Thalomid negotiations with Celgene, that Celgene would not engage in good faith negotiations.
> 8. If Mylan requested samples from Celgene in January of 2008, and Celgene negotiated with Mylan in good faith, it should have taken Mylan and Celgene approximately six to twelve months at most to negotiate a supply agreement and for Mylan to receive samples of Revlimid.

(D.E. No. 228-9, Ex. 94 at 2). But this cannot create an issue of material fact about futility because Celgene submits that this conflicts with prior sworn testimony before the FTC and therefore is barred by the "sham affidavit" rule. **[*65]** (*See* D.E. No. 228 at 41). Mylan never responds to this—which Celgene notes. (*See* D.E. No. 240 at 16-17).

Second, even accepting that somehow the January 8, 2007 letter is enough for a jury to find futility, there is another problem: "there is not a single shred of evidence in the record, expert or otherwise, that [Mylan] could have gotten their FDA *protocols* completed, submitted and approved." (*See* D.E. No. 277 at 108:14-16 (emphasis added); *see also id.* at 109:5-9 ("They don't have any expert who says — and they've got experts who say a lot of stuff here that we don't agree with. But none of them say oh, and you somehow could have wound the clock backwards on FDA protocol development and FDA review.")). Celgene stressed this point at oral argument. (*See id.* at 117:5-12, 140:3-10, 146:17-24, 147:2-16). And it is correct: Mylan points to no *evidence* that its study protocols would have been prepared and approved. This is simply not accounted for in Mylan's timetable for market entry of a generic version of Revlimid® or Mylan's Revlimid® damages model (as it is for Thalomid®).[20]

Accordingly, the Court grants Celgene summary judgment on Mylan's Revlimid® damages claim; relief sought for **[*66]** any claim concerning Revlimid® is hereby limited to injunctive relief.[21]

XIII. Celgene's statute-of-limitations defense for Mylan's Thalomid®-related claims is denied without prejudice

A. The parties' contentions

1. Before oral argument

Celgene argues that Mylan cannot recover for injuries caused only by acts outside the four-year limitations period for antitrust claims. (*See* D.E. No. 228 at 44; D.E. No. 240 at 19). It contends that Mylan cites Celgene's conduct regarding Thalomid® samples between 2005 and 2009, with the last act occurring on June 24, 2009. (D.E. No. 240 at 19). But Celgene states that Mylan sued more than four years later, on April 3, 2014. (*Id.*). So Celgene asserts that "[t]he statute of limitations for Mylan's claims regarding Thalomid began to run on the date of Celgene's [June 24, 2009] letter, and it expired on June 24, 2013." (D.E. No. 228 at 45).

Further, Celgene argues that "Mylan cannot extend the statute of limitations indefinitely by asserting a 'continuing refusal to deal'" because "[e]ven a 'continuing offense' requires proof of a specific injurious act by the defendant within the limitations period." (*Id.* (citations omitted)). It argues that, if "the law **[*67]** was otherwise, the statute of limitations would be nonexistent for refusal-to-deal claims" because a "plaintiff would be free to wait to sue for years, or decades, after the defendant communicated a refusal to deal, only then to claim that the refusal 'continued' into the limitations period because the defendant did not sell to the plaintiff in the meantime." (*Id.* at 48).

In opposition, Mylan counters that the general rule regarding accrual of the limitations period does not apply when, as here, damages are unascertainable at the relevant time. (D.E. No. 237 at 41-42). It argues that, for claims involving unascertainable damages, the limitations period starts when damages become concrete and measurable. (*Id.* at 42). And Mylan avers that its damages claim "is based on lost profits from the sales of generic thalidomide it would have made but for Celgene's refusal to supply samples." (*Id.*). Mylan's view is that "future lost profits had not accrued" as of June 24, 2009. (*Id.*). Mylan states that, before it could start making sales, Mylan still needed to take certain steps to secure FDA approval—which could not happen without samples. (*Id.*). So Mylan says that damages

---

[20] In fact, on August 24, 2012, Mylan submitted its lenalidomide protocols to the FDA—but did not receive FDA approval until July 29, 2013. (*See* D.E. No. 228-9, Exs. & 91).

[21] For the reasons stated on the record, the Court denies Mylan's eleventh-hour request to change its damages model. (*See* D.E. No. 271 at 3; D.E. No. 277 at 125:21-136:13, 152:2-13).

began accruing when it would have entered **[*68]** the market in the third quarter of 2010 because that was when the injury was suffered. (*Id.*).

Further, Mylan contends that its Thalomid®-related claims are timely because of another exception to the general statute of limitations rule: the doctrine of continuing violations. (*Id.* (citations omitted)). It argues there is evidence that "Celgene committed several overt acts demonstrating the existence of a continuing scheme to protect its franchise from generic competition during the limitations period": (1) "Celgene continued to harm competition by delaying or outright foreclosing generic entry on Thalomid"; and (2) "in conjunction with shifting the Thalomid market to Revlimid, Celgene carried out its policy of categorically refusing to supply Revlimid samples to every generic that requested it, a policy that existed until at least mid-2012." (*Id.* at 43 (internal citations omitted)).

Regarding this second point, Mylan avers that, "[u]ntil at least 2012, Celgene continued to tell the FDA, FTC, and [the Connecticut Attorney General] that it should not have to sell samples to generics, but even if it must field requests, it should be permitted to do so via a procedure of its own choosing—one that would **[*69]** enable Celgene to maintain its monopoly power in the Revlimid market" and delay or foreclose Mylan's entry just like Celgene has done for thalidomide. (*Id.* at 44). In particular, Mylan argues that "Celgene's May 14, 2013 and March 20, 2014 letters to Mylan contained requests for information that were nearly identical to the categories of information that Celgene demanded in its January 8, 2008 letter regarding Thalomid"—which "constitute overt acts within the limitations period necessary to show the existence of Celgene's scheme to protect its franchise, because it was this entire scheme that caused Mylan's Thalomid harms." (*Id.* at 44).

In reply, Celgene argues that "damages for generic entry are not 'unascertainable' up to the moment of market entry, and indeed, Mylan is seeking *Revlimid* damages based on a projected market entry date that remains [four] years into the future." (D.E. No. 240 at 19 (emphasis in original)). As for Mylan's continuing-violations argument, Celgene argues that neither of Mylan's arguments make sense because: (1) "it is undisputed that Celgene did *nothing* to Mylan with respect to Thalomid after the limitations period began, so any violation did not 'continue' long enough to **[*70]** rescue Mylan's damages claim"; and (2) "Mylan cannot lump Thalomid and Revlimid into a single continuing 'violation,'" and "Mylan offers no authority that permits it to bootstrap Celgene's conduct with respect to one alleged product market into a 'continuing violation' with respect to wholly separate conduct allegedly impacting a different product market." (*Id.* at 20-21 (citations omitted) (emphasis in original)).

2. At oral argument

Mylan stressed that its argument relating to unascertainability is as follows:

> even under the assumptions in the damages model which are the earliest in terms of time, entry doesn't occur until 2010, within the limitations period. But prior to 2010, Mylan is not making money, it's incurring losses. It's making investments, it's doing this, it's doing that. But it hasn't sold anything in the market. The only time a cause of action accrues is when you're injured, and Mylan would not, certainly in this case, have been injured until it actually began selling the pills in the marketplace.

(D.E. No. 277 at 155:2-10).

Celgene responded that, "as a legal matter," it is "permissible" for one to "file a lawsuit on day one and . . . ask for damages for lost profits into the future." **[*71]** (*Id.* at 158:21-23). Celgene argues that this is, in fact, what Mylan's Revlimid®-related claim is because it contemplates lost future profits in 2022—and "[u]nder their logic, that claim never accrued." (*Id.* at 159:1-6). In Celgene's view, "the question in this case" is "as of June 2009 . . . was your Q3 2010 entry and whatever lost sales you had then, was it so speculative and unprovable as of '09 that [Mylan] literally didn't have a claim, and so the claim wouldn't accrue until September of 2010." (*Id.* at 160:1-6). Celgene stressed that its position "is that both as a matter of law and as a matter of the record in this case, the damages model that they have submitted -- that they submitted in June of 2016 [in this case], they could have done the exact same thing back in '09 and surely within four years of '09" as Mylan has not "pointed to a single magical event or series of events that took place between June 2009 and September 2010 when they say they would have come to market" that would make damages unascertainable until September 2010. (*Id.* at 166:21-167:4).

In response, Mylan emphasized that it "could not have been injured prior to 2010 even if damages could have been calculated **[*72]** in 2009" and "damages could not have been calculated in 2009." (*Id.* at 168:11-13). Mylan seems to argue that, even though it made predictions, "those could be challenged as speculative"—and, even if calculations can be made, "the injury does not begin until pills are actually sold in the marketplace." (*See id.* at 169:9-21).

Celgene then countered that the applicable precedent "make[s] clear you're not prohibited from suing for -- today for harm in the future" and the "question is given the nature of your case, given the nature of the claim, given the market . . . is it such that today you really — you really don't know whether you've been harmed in the future." (*Id.* at 171:5-10). It asserts that, "as a matter of law, Mylan is just wrong that a claim in a generic delay case does not — can't accrue until we somehow pass the date of my expert's but-for entry date." (*Id.* at 172:3-5).

3. After oral argument

"[B]ecause the parties appeared to present the Court with remarkably divergent interpretations and related arguments on the relevant law and its application to this matter," the Court ordered supplemental briefing. (*See* D.E. No. 276). In this briefing, the parties argue as follows.

Celgene **[*73]** reiterates that June 24, 2009, is the starting point, stating that "Mylan repeatedly threatened to sue Celgene well before this date." (D.E. No. 280 at 1 (footnote omitted)). Regarding the ascertainability exception, Celgene posits that the limitations period begins when a plaintiff could have estimated the size of and possible profits of market entry. (*Id.* at 2-3 (citation omitted)). Celgene contends that Mylan "offers no coherent argument that its alleged Thalomid-related damages were so speculative in June 2009 as to be unrecoverable as a matter of law"—and it "has not argued that that there was any uncertainty in 2009 about whether Mylan would launch a generic Thalomid product in the future or that Celgene's conduct had delayed Mylan's entry into the market." (*Id.* at 3). Celgene asserts that nothing Mylan relies upon was unknown to Mylan in June 2009, "nor even reflect events that occurred between June 2009 and the third quarter of 2010 that could have made damages less speculative." (*See id.* at 3-4).

Celgene avers that Mylan offered a "new legal argument" at oral argument: regardless of whether Mylan's future damages were ascertainable in 2009, Mylan's cause of action could not have accrued in 2009 because **[*74]** Mylan could not have been injured until market entry in 2010. (*See id.* at 4). Celgene contests this argument, arguing (among other things) that the law plainly is "that a claim for provable future damages accrues on the date of the wrongful conduct." (*Id.*). Moreover, Celgene notes that this conflicts with Mylan's Revlimid®-related claim and that, under its theory, it would have to wait until 2022 to pursue such a claim. (*Id.*).

Regarding the continuing-violation exception, Celgene argues that all of Mylan's cited case law "involved an overt act that injured the plaintiff during the limitations period"—which Mylan has failed to identify here regarding Mylan's ability to sell a generic version of Thalomid®. (*Id.* at 5). Celgene contends that its dealings with other generic companies regarding Thalomid® samples, as well as its dealings regarding Revlimid® samples, do not qualify as overt acts for Mylan's Thalomid®-related claims. (*Id.*).

For its part, Mylan begins by noting that its common law claims—unfair competition and tortious interference with economic advantage—are *not* implicated by Celgene's statute-of-limitations defense. (*See* D.E. No. 281 at 1). As for its antitrust claims, Mylan argues that a "claim **[*75]** has not accrued if *either* the fact of accrual is speculative *or* the amount of damages is unprovable." (*Id.* at 2 (emphasis in original)). And Mylan contends that, here, "*both* the fact and any amount of thalidomide damages were speculative—at least sufficient to raise an issue of fact that the speculative damages exception delayed the statute of limitations from running until the injury was first suffered in Q3 2010." (*Id.* at 3 (emphasis in original)).

Mylan contests Celgene's Revlimid® comparison, arguing that its Revlimid®-related "damages claim has accrued because the fact that Natco engaged in patent litigation with Celgene and was able to obtain a settlement, coupled with the fact that Mylan was well equipped to do the same, means that the fact of Mylan's Revlimid-related injury is ascertainable." (*Id.* at 4). And Mylan argues that "the amount of Revlimid damages is not speculative because market factors necessary for formulating the damages model . . . are already specified in detail in the real-world Celgene/Natco settlement agreement." (*Id.* (citations omitted)).

Mylan also maintains its continuing-violations theory for three reasons: (1) "Celgene's overt conduct against other generics such as Lannett . **[*76]** . . confirmed Celgene's refusal to deal policy, which continued to injure Mylan throughout the limitations period"; (2) "[g]iven Celgene's overarching strategy to protect its franchise, Celgene's refusal to supply Revlimid samples to Mylan in 2013 and 2014 reaffirmed to Mylan that Celgene would continue to prevent it from introducing generic versions of both of Celgene's thalidomide products"; and (3) "under the guise of REMS, Celgene continued to impose restrictions that blocked normal distribution channels from supplying samples to Mylan and other manufacturers." (*Id.* at 5).

B. Analysis

As an initial matter, Mylan is correct about its common law claims—which Mylan argues are governed by a six-year statute of limitations: they are not affected by Celgene's statute-of-limitations defense. (*See* D.E. No. 281 at 1). Celgene has not moved to dismiss Mylan's Thalomid®-related common law claims using this defense. Thus, these claims—unfair competition and tortious interference with economic advantage—are not subject to any time bar. And, because the Court denies Celgene's only remaining challenge regarding Mylan's Thalomid®-related claims discussed *infra*, the Court must hold a jury trial over Mylan's **[*77]** Thalomid®-related claims.

As for Mylan's federal and state antitrust claims, the parties do not dispute the statute of limitations is four years. *See* 15 U.S.C. § 15b; N.J.S.A. § 56:9-14. The accrual date is the issue. And, as evident from the Court's rather painstaking review of the parties' contentions, this is one that is vigorously contested.

On a motion for summary judgment, the "evidence of the non-movant is to be believed, and all justifiable inferences are to be drawn in his favor." *Anderson, 477 U.S. at 255*. And the Supreme Court has never suggested that "trial courts should act other than with caution in granting summary judgment or that the trial court may not deny summary judgment in a case where there is reason to believe that the better course would be to proceed to a full trial." *Id.*[22]

Here, as noted, the Court will hold a jury trial over Mylan's Thalomid®-related claims. And the continuing-violations doctrine, in particular, gives this Court pause to grant judgment as a matter of law at this time. After all, "[t]he purposeful nature of the inaction—here an ongoing refusal to sell . . .—obviously constitutes an injurious act, although perhaps not an overt one in the commonly-understood sense." *In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1172 (3d Cir. 1993)*. "[C]ertain conspiracies, **[*78]** such as boycotts, operate through inaction." *Id.* "[O]vert acts aren't what cause damage"; "[i]t is the effectiveness of the overall conspiracy that causes damages." *Id.*

The Court finds that, at this juncture, Celgene's statute-of-limitations defense risks being too intertwined with issues of material fact. Factual development at trial concerning Mylan's Thalomid®-related claims will permit the Court to best assess the parties' contentions.[23] Therefore, in an abundance of caution and consistent with this Court's

---

[22] *See also United States v. Certain Real & Personal Property Belonging to Hayes, 943 F.2d 1292, 1297 (11th Cir. 1991)* ("A trial court is permitted, in its discretion, to deny even a well-supported motion for summary judgment, if it believes the case would benefit from a full hearing."); *Rheumatology Diagnostics Lab., Inc. v. Aetna, Inc., No. 12-5847, 2015 U.S. Dist. LEXIS 80015, 2015 WL 3826713, at *4 (N.D. Cal. June 19, 2015)* ("The Supreme Court has recognized that, even in the absence of a factual dispute, a district court has the power to deny summary judgment in a case where there is reason to believe that the better course would be to proceed to a full trial. . . . Here, a summary judgment ruling on the [issue], as plaintiffs have presented it, would resolve only a sliver of their remaining claims, one that is closely intertwined with issues that will be presented to the jury regardless of whether [the issue] is decided as a matter of law. . . . Even assuming that plaintiffs have carried their burden under *Rule 56* on [the issue], the better course here is to proceed to a full trial.") (internal quotation marks and citation omitted).

discretion given the posture of this matter, the Court denies without prejudice Celgene's motion as it concerns this defense. *See, e.g., Certain Real & Pers. Prop. Belonging to Hayes, 943 F.2d at 1297* ("A trial court is permitted, in its discretion, to deny even a well-supported motion for summary judgment, if it believes the case would benefit from a full hearing.").

XIV. An issue of material fact exists about whether Mylan would have "skinnylabeled" in light of Celgene's orphan drug exclusivity for Thalomid®

A. Relevant factual background

On July 16, 1998, the FDA approved Celgene's NDA for Thalomid® for the treatment of manifestations of a particular form of leprosy known as ENL. (Celg. SMF ¶ 9). On May 25, 2006, the FDA approved using **[*79]** Thalomid® in combination with dexamethasone for the treatment of newly diagnosed multiple myeloma. (*Id.* ¶ 18; D.E. No. 228-4, Ex. 12; D.E. No. 237-21, Ex. P58). The multiple-myeloma indication was protected by an orphan drug exclusivity, meaning that no manufacturer other than Celgene could be approved by the FDA to market thalidomide for that indication until May 25, 2013. (Celg. SMF ¶¶ 18, 71).

On September 26, 2003, Mylan formally selected thalidomide for development. (*See* Celg. Reply SMF ¶ 174). Thalidomide was identified as a "first to file" opportunity, meaning that it was an opportunity to obtain the potentially lucrative 180-day exclusivity period. (*See id.*).

In December 2006, Barr Laboratories ("Barr"), another generic company, filed an ANDA to market a generic version of Thalomid®. (Celg. SMF ¶ 71). But Barr asked the FDA to approve a label addressing the *non*-orphan indication (i.e., ENL) without mentioning the orphan indication (i.e., multiple myeloma). (*Id.* ¶¶ 71, 72). In other words, Barr's ANDA proposed to carve out multiple myeloma and sought approval for ENL only. (*Id.* ¶ 72). This type of carveout request is also known as a "skinny label." (*Id.*).

B. The parties' contentions [*80]

Celgene argues that "[i]t is undisputed that, until May 2013, [its] orphan drug exclusivity prevented the FDA from approving any generic thalidomide product that included a multiple-myeloma indication on its label." (D.E. No. 240 at 22). Celgene insists that Mylan's Head of Global Regulatory Affairs "twice testified that Mylan intended to have a multiple-myeloma indication on its generic thalidomide label." (*Id.*). Celgene also criticizes Mylan's declarations filed "days before" its opposition to summary judgment. (*Id.* at 23).

But Celgene avers that, even with these declarations, there is still no testimony that Mylan would have sought to carve out a multiple-myeloma indication from its label—only that it *could* have. (*Id.*). Finally, Celgene dispenses with Mylan's internal 2006 documentation that purportedly indicates that Mylan anticipated launching thalidomide without a multiple-myeloma indication because, at the time of that documentation, the FDA had not approved Thalomid®'s multiple-myeloma indication. (*Id.* at 24). Simply put, Celgene argues that the 2006 documentation could not anticipate a multiple-myeloma indication. (*Id.*).

---

[23] For example, Mylan complains that "Celgene has an overarching strategy to protect its franchise of thalidomide and its analogs, including lenalidomide," and therefore "Celgene's refusal to supply Revlimid samples to Mylan in 2013 and 2014 reaffirmed to Mylan that Celgene would continue to prevent it from introducing generic versions of both of Celgene's thalidomide products." (D.E. No. 281 at 4-5). And the following is undisputed: Celgene's Thalomid® marketing expenses dropped from approximately $24 million in 2005 to approximately $14.1 million in 2006 and its Revlimid® marketing expenses increased from $18.9 million in 2005 to approximately $51.4 million in 2006 (Celg. Reply SMF ¶ 133)—and, in 2009, Celgene either did not respond to or categorically refused all requests from generics to purchase Revlimid® samples (*id.* ¶ 235). And lenalidomide, an analogue of thalidomide, is a more potent product with a better toxicity profile. (Celg. SMF ¶ 86).

In opposition, Mylan argues that Celgene ignores testimony of its Head of **[*81]** Global Regulatory Affairs that "she was unable to opine on Mylan's labelling strategy regarding thalidomide because Celgene's refusal to supply samples prevented Mylan from proceeding to the stage of development at which it would consider its labelling strategy." (D.E. No. 237 at 45 (citation omitted)). Mylan further argues that other people who did not report to this Head of Global Regulatory Affairs were responsible for drafting labels before 2013. (*Id.* at 45-46). Mylan cites her declaration in which she purportedly says that Mylan regularly employs carveout strategies for indications covered by orphan drug and other exclusivities. (*Id.* at 46). Mylan also cites a declaration purporting to explain that it does not finalize indications on its label for a generic product until bioequivalence testing is complete. (*Id.* (citation omitted)).

Finally, Mylan says that it has adduced multiple pieces of evidence and circumstances that make this inquiry suited for a jury, including: Barr's submission of a carved-out label; Mylan's financial incentive to file an ANDA as soon as possible for a first-to-file opportunity; Mylan carves out labels when necessary; and a 2006 planning document envisioning a launch without **[*82]** the multiple-myeloma indication. (*Id.* at 48).

C. Analysis

Mylan's evidence must be believed, and all justifiable inferences are to be drawn in its favor. *See* *Anderson, 477 U.S. at 255*. It is undisputed that, on September 26, 2003, Mylan formally selected thalidomide for development—and this was identified as a first-to-file opportunity. (Celg. Reply SMF ¶ 174). Mylan's Head of Global Policy submitted a declaration that "Mylan does not finalize its generic labels, including finalizing what indications to include, until after bioequivalence testing is complete." (D.E. No. 238-30, Ex. P316). She added that, generally, "a generic label will be finalized just before the related [ANDA] is submitted" and then the label is "updated as needed based on any relevant changes post submission to the [brand-name label], patent or exclusivity landscape." (*Id.*). For Thalomid®, she affirmed that "Mylan was unable to conduct bioequivalence testing because it never had access to Thalomid samples"—and "Mylan does not make labelling decisions until after bioequivalence testing is complete and we are preparing the labeling section of the ANDA." (*Id.*). And "Mylan regularly employs carve out strategies—successfully submitting and gaining approval **[*83]** for ANDAs that exclude (or 'carve out') indications covered by orphan drug and other exclusivities, while including all other FDA approved indications." (*Id.*).

And Mylan's Head of Global Regulatory Affairs affirmed in his declaration that "Mylan does not finalize indications on its label for a generic product until bioequivalence testing is complete and we are preparing the labeling section of the ANDA." (D.E. No. 237-20, Ex. P52). He too declared that "Mylan never had access to Thalomid for bioequivalence testing and thus had not finalize its label"—and "that Mylan regularly submits and gains approval for ANDAs that carve out indications subject to exclusivities including [orphan drug exclusivity]." (*Id.*).

As noted above, Barr's ANDA for a generic version of Thalomid® employed a carve-out. (*See* Celg. SMF ¶¶ 71, 72).

Celgene disputes that there is any genuine issue of material fact. In particular, Celgene argues that nobody said what "Mylan's label would have said." (*See* D.E. No. 277 at 180:10-11; *see also id.* at 181:3-6). And Celgene stresses several other points (*see, e.g.*, D.E. No. 240 at 22-25)—all of which may ultimately win the day. But not at this point because the Court must give **[*84]** Mylan the benefit of reasonable inferences. And the evidence is such that a reasonable jury *could* find in favor of Mylan on this skinny-labelling issue. The Court therefore denies Celgene's motion relating to Celgene's orphan drug exclusivity.

XV. Conclusion

The Court has endeavored to carefully consider an extensive record juxtaposed against a complex and developing area of law. In that vein, it is important to note that—as tempting as it may be to do so—the issue of FDA approvals of generic study protocols for brand drugs requiring REMS is one that the Undersigned believes requires careful consideration of the specific facts and circumstances. And the analysis presented above is tailored to the specific facts and circumstances of this case.

To summarize, the Court finds that, until the FDA approved Mylan's protocols and Celgene was so notified, it had a legitimate business justification for refusing to sell Mylan samples given the record before the Court. Conversely, however, the propriety of Celgene's conduct after FDA approval requires factfinding. Further, Mylan cannot recover monetary damages for its Revlimid® claims on this record. But the Court declines to find—at this time—that **[*85]** Mylan's Thalomid® claims are either time barred or that any attendant damages are barred by Celgene's orphan-drug exclusivity. These issues require factfinding. Finally, Mylan's state-law claims—both antitrust and otherwise—cannot be dismissed in their entirety in light of the Court's rulings.

An appropriate Order accompanies this Opinion.

/s/ Esther Salas

Esther Salas, U.S.D.J.

ORDER

SALAS, DISTRICT JUDGE

This matter having come before the Court on Celgene Corporation's ("Celgene") motion for summary judgment (*see* D.E. Nos. 227 & 228); and the Court having carefully considered the parties' submissions; and the Court further having ordered supplemental briefing on specific issues and having reviewed those submissions; and the Court further having considered the parties' oral arguments; and for the reasons in the accompanying Opinion,

IT IS on this 3rd day of October 2018,

ORDERED that Celgene's motion for summary judgment (*see* D.E. Nos. 227 & 228) is GRANTED in part and DENIED in part consistent with the accompanying Opinion; and it is further

ORDERED that the accompanying Opinion shall be temporarily filed UNDER SEAL; and it is further

ORDERED that the accompanying Opinion shall be unsealed **[*86] 14 days from publication of this Order on the Court's ECF System** unless an appropriate motion to seal the Opinion, **accompanied by proposed redactions**, is filed by either party, or jointly by the parties, on or before **October 16, 2018**.

Opinion

CIVIL MINUTES—GENERAL

Proceedings (In Chambers): ORDER RE: DEFENDANTS MAGNELL ASSOCIATE INC. AND NEWEGG INC.'S MOTION TO DISMISS PLAINTIFFS' SECOND AMENDED COMPLAINT [75] AND PLAINTIFFS' EX PARTE APPLICATION TO STRIKE REQUEST FOR JUDICIAL NOTICE [82]

Before the Court is the Motion to Dismiss Second Amended Complaint ("Motion"), filed by Defendants Magnell Associate Inc. dba Newegg.com ("Magnell") and Newegg, Inc. ("Newegg") (together with Magnell, "Defendants"), on June 18, 2018. (Docket No. 75). On July 16, 2018, Plaintiffs NongHyup Bank ("NH"), KEB Hana Bank ("KEB Hana"), and Kookmin Bank ("KB") (collectively, the "Banks" or "Plaintiffs") filed their Opposition. (Docket No. 79). Defendants filed their Reply on August 6, 2018. (Docket No. 80).

In connection with their Reply, Defendants also filed a Request for Judicial Notice ("RJN") on August 6, 2018. (Docket No. 81). On August 14, 2018, Plaintiffs filed an Ex Parte Application to Strike Request for Judicial Notice ("Ex Parte Application"). (Docket No. 82). **[*3]** Defendants filed their Opposition on August 16, 2018. (Docket No. 84).

The Court has read and considered these filings and held a hearing on September 19, 2018. For the reasons set forth below, the Motion, RJN, and Ex Parte Application are ruled upon as follows:

• Defendants' Motion to Dismiss Second Amended Complaint is **GRANTED** ***without leave to amend***. Based upon the allegations in the Second Amended Complaint, Plaintiffs' renewed attempt to establish secondary liability amounts to nothing more than showing a parent-subsidiary relationship between Newegg and Newegg Trading Limited ("NTL"), particularly considering the Court's previous dismissal of NTL on jurisdictional grounds. Plaintiffs therefore fail to allege sufficiently that NTL acted as Defendants' alter ego or agent. Moreover, Plaintiffs fail to plead their fraud, negligent misrepresentation, and California's Unfair Competition Law claims with sufficient specificity. Finally, Plaintiffs' allegations cannot be read to plausibly show that Newegg, rather than NTL, was the driving force behind the alleged fraudulent scheme.

• Both Defendants' RJN and Plaintiffs' Ex Parte Application are **DENIED** ***as moot***, because the Court does not rely **[*4]** upon the challenged portion of the Reply to reach its decision.

I. <u>BACKGROUND</u>

As it must, the Court assumes the truth of all facts alleged by Plaintiffs in the Second Amended Complaint ("SAC"). The Court's Order on April 26, 2018, granting Defendants' Motion to Dismiss First Amended Complaint, contained a detailed explanation of the relevant facts. (*See generally* Docket No. 62). The following background is similar but has been updated to reflect relevant additional allegations and citations to the SAC as the operative complaint.

A. <u>Parties and Relevant Non-Parties</u>

Plaintiff Industrial Bank of Korea ("IBK"), a bank incorporated under the laws of the Republic of Korea, is 51.8% owned by the Ministry of Strategy and Finance of Korea. (SAC ¶ 6). IBK's primary services include providing financing for Korea's small- and medium-sized enterprises. (*Id.* ¶ 7).

Plaintiff NH, a bank incorporated under the laws of the Republic of Korea, is primarily in the business of lending to farmers and agricultural cooperatives, deposittaking, and issuing securities and bonds. (*Id.* ¶ 9).

Plaintiff KEB Hana, a bank incorporated under the laws of the Republic of Korea, is primarily in the business of lending, deposit-taking, **[*5]** and private banking. (*Id.* ¶ 10).

Plaintiff KB, a bank incorporated under the laws of the Republic of Korea, provides lending, deposit-taking, cash management, private banking, and fund management services to retail, small business, and corporate clients. (*Id.* ¶ 11).

Defendant ASI Corporation "is or was a Delaware corporation," and Defendant ASI Computer Technologies, Inc., is a California corporation. (*Id.* ¶ 13). The Banks allege that ASI Corporation and ASI Computer Technologies, Inc., are indistinguishable and refer to the two collectively as "ASI." (*Id.*). (For the purposes of this Motion, the Court will also treat them as a single entity — "ASI."). "ASI is a wholesale distributor of computer software, hardware, and accessories that has over 500 employees and operates in four different countries, including through 13 sales and warehouse locations in the U.S. and Canada." (*Id.*).

Defendant Bill Chen was "Chief Financial Officer and/or Vice President of Finance of ASI." (*Id.* ¶ 14). Defendant Henry Chen is or was "Vice President of Business Development and/or Vice President of Sales of ASI." (*Id.* ¶ 15). Defendant Frances Chou "was a director and agent of ASI, authorized to act on behalf **[*6]** of ASI . . . ." (*Id.* ¶ 16). Defendant Christine Liang was "Chief Executive Officer and/or President of ASI" and "controlled the activities of ASI central to [Plaintiff's] Second Amended Complaint . . . ." (*Id.* ¶ 17).

Defendant Newegg, a Delaware corporation, "is the second largest online-only retailer in the United States" and owns and operates Newegg.com, which sells primarily consumer electronics, smart home, and gaming products. (*Id.* ¶¶ 18-19). The Banks allege that Newegg and Newegg.com are "one and the same." (*Id.* ¶ 20).

Defendant Magnell, a California corporation, is a wholly-owned subsidiary of Newegg. (*Id.* ¶ 21). The Banks allege that Magnell and Newegg are essentially indistinguishable. (*Id.* ¶ 24). Specifically, Newegg owns and operates the website Newegg.com and "Magnell is registered to do business as Newegg.com, and [ ] there are other indicia that Newegg.com may act through Magnell in some respects." (*Id.*).

Non-party NTL is a Hong Kong corporation. (*Id.* ¶ 28). NTL is "wholly-owned by Newegg Greater China (Hong Kong) Company Limited, which is in turn wholly-owned by Newegg Enterprises LLC," which shares the same registered address with Newegg and Magnell in the City of Industry, **[*7]** California. (*Id.*). Further, a sales agreement and two guaranties, executed and issued by Newegg, referred to NTL as "a subsidiary and affiliate of Newegg, Inc." (*Id.*). Partially on this basis, the Banks allege the corporate relationship as follows:

- Newegg dominated, influenced, and controlled Magnell and NTL, creating a unity of interest and ownership among the entities such that their separate corporate existences ceased to exist. (*Id.* ¶ 30).

- Newegg used NTL "as a mere shell or conduit for its affairs" and held itself out as liable for NTL's debts. (*Id.* ¶¶ 33-34).

- Newegg, Magnell, and NTL shared identical equitable ownership, shared some employees and directors, and conducted business on behalf of one another. (*Id.* ¶¶ 31-32).

- Newegg, Magnell, and NTL were "agents, partners, representatives, affiliates, alter egos and/or co-conspirators of each other" and therefore, Newegg had "full knowledge of, gave substantial assistance to, directed, authorized, consented to, and ratified the alleged misconduct" perpetrated by Magnell and NTL. (*Id.* ¶ 29; *see id.* ¶¶ 36-37).

Non-party Fred Chang founded Newegg and Magnell and was the Chief Executive Officer and Chairman of Newegg, the Personnel **[*8]** Manager of Magnell, and one of the two directors of NTL. (*Id.* ¶ 32). Non-party Edison Chih was the Chief Operating Officer ("COO") of both Newegg and NTL and the Director of Corporate Planning at Newegg. (*Id.*). Non-party Nicole Lee was the President of Newegg Greater China (Hong Kong) Company Limited and Chief Human Resources of Newegg, and is allegedly currently managing and overseeing NTL's finances. (*Id.*). Non-party Yueh Pai Chang was the Chief Financial Officer of Newegg and the other director of NTL. (*Id.*). Non-party James Wu was the Chief Administrative Officer and is currently the Chief Technology Officer and COO of Newegg. (*Id.* ¶ 75).

Non-party Moneual, Inc. ("Moneual") "was a prominent Korean manufacturer of computers and home appliances, including robot vacuum cleaners and various types of personal computers." (*Id.* ¶ 26). "Until its demise, Moneual was publicly perceived in Korea as a successful company on a rapid growth trajectory." (*Id.* ¶ 41).

Non-party Hong-Seok Park, whom the Banks refer to as "HS Park," "was the Chief Executive Officer of Moneual until his arrest and conviction for masterminding the massive fraud that is the subject of this lawsuit." (*Id.* ¶ 27).

B. Moneual's [*9] Relationship with the Banks

Between 2006 and 2014, Moneual requested that each of the Banks "factor" Moneual's export trade receivables from, among others, Newegg. (*Id.* ¶ 43). The Banks describe "factoring" as "a form of lending under which a lender purchases a business's trade receivables at a discount to their face value, advancing the money to the business and collecting the receivable from the business's customer at its maturity." (*Id.* ¶ 44).

Prior to agreeing to factor Moneual's receivables, the Banks purchased export finance facility ("EFF") insurance from the Korean Trade Insurance Corporation ("KSURE"), South Korea's official trade insurance agency. (*Id.* ¶ 46). In connection with the EFF insurance application process, KSURE conducted due diligence on Moneual, Newegg, and NTL, including "conducting credit investigations on each of these entities, and preparing credit certifications of each of their business histories." (*Id.* ¶ 47).

Following this due diligence from KSURE, HS Park, Moneual's CEO, would approach the Banks to "request that they factor Moneual's trade receivables . . . up to the insurance credit limits." (*Id.* ¶ 48).

C. Moneual's Relationship with the Defendants and Non-Parties [*10]

From 2012 to 2014, Newegg purchased — or, according to the Banks, purported to purchase — "home theater personal computers" ("HTPCs") from Moneual at prices varying between $2,530 and $2,980 per unit. (*Id.* ¶¶ 59, 80). The Banks allege that to "direct[] and authorize[] the Moneual transactions," Newegg used its "Hong-Kong based [NTL] to execute the transactions because Moneual had a manufacturing contractor in Hong Kong." (*Id.* ¶ 63).

To carry out the alleged fraudulent scheme, Newegg executed two guaranties and two sales agreements with Moneual:

On August 25, 2012, Newegg, which had a much higher credit rating than NTL, executed the first guaranty ("August 2012 Guaranty"), agreeing to guarantee NTL's export receivables "unconditionally and irrevocably" for "up to $20 million to Moneual and its successors and assigns on behalf of [NTL]." (*Id.* ¶ 64). Fred Chang executed the guaranty. (*Id.*).

On January 17, 2013, Fred Chang executed another guaranty ("January 2013 Guaranty") through which Newegg "guaranteed payment of up to $50 million to Moneual and its successors and assigns on behalf of [NTL]." (*Id.* ¶ 65). On November 27, 2013, Moneual entered two sales agreements with "Newegg.com" — the **[*11]** "Chih Sales Agreement" and the "Chang Sales Agreement," as the Banks refer to them. (*Id.* ¶¶ 69-71). Under the Chih Sales Agreement — executed by Edison Chih — Newegg.com agreed to purchase a total of $250 million of Moneual products over two years, which Newegg.com could then sell in the United States, Canada, and China. (*Id.* ¶ 71). Under the Chang Sales Agreement — executed by Fred Chang — Newegg.com agreed to purchase a total of $400 million of Moneual products over two years. (*Id.*). The Chang Sales Agreement also stated that Newegg's purchase orders "shall be issued, handled, and paid by [NTL]" and guaranteed by Newegg.com, which the Banks allege "necessarily referred to its owners and operator, Newegg, Inc." (*Id.* ¶ 73).

The Banks allege that Newegg permitted NTL to carry out the transactions on Newegg's behalf, even though "Newegg, Inc., acting under the name of its website, Newegg.com, was the contracting party with Moneual and the party that guaranteed to purchase significant amounts of Moneual's goods." (*Id.* ¶ 72).

The Banks also allege that all the KSURE EFF insurance policies Newegg entered into with Moneual listed the insured importer as "Newegg Inc (Newegg Com)"; the importer **[*12]** address in the City of Industry, California, where Newegg and Magnell shared the same registered corporate address; and the "Country of Payor" as the

United States. (*Id.* ¶ 75). The Banks further allege that "some of these insurance policies [but unclear as to how many] state[d] explicitly that [NTL] is Newegg, Inc.'s agent and representative." (*Id.*). Finally, NTL's purchase orders, executed by Edison Chih and submitted to Moneual, used the Newegg.com logo and referenced Newegg.com's Terms and Conditions. (*Id.* ¶¶ 78-79).

D. Relevant Factoring Transactions and Defaults

In support of the factoring relationships, Moneual provided the Banks with documentation evidencing its relationships with NTL (or Newegg.com), including: (1) invoices and purchase orders evidencing NTL's (or Newegg.com's) purchase (or purported purchase) of HTPCs from Moneual (*Id.* ¶¶ 79-80); (2) the August 2012 Guaranty and January 2013 Guaranty executed by Newegg (*Id.* ¶¶ 64-65); and (3) the Chih Sales Agreement and the Chang Sales Agreement between Newegg.com and Moneual (*Id.* ¶¶ 69-71).

The Banks allege that Moneual's "transactions with ...Newegg, Inc. (through [NTL] as its alter ego and agent) and other importers were **[*13]** merely a ruse orchestrated by Moneual — with assistance of its foreign importers ...to create the illusion that Moneual operated a genuine export business with legitimate customers and transactions so that the Banks would continue to finance Moneual's receivables." (*Id.* ¶ 80).

1. NH

NH began providing Moneual loans against its receivables in September 2011. (*Id.* ¶ 110). In February 2013, NH entered into a factoring transaction with Moneual relating to receivables due from China National Building Material Co., Ltd. ("CNBM"), a Chinese state-owned enterprise. (*Id.* ¶ 112). The CNBM factoring transactions were successful; NH was paid in full and on time (or nearly on time). (*Id.* ¶ 113). "The successful consummation of NH's first factoring transaction with Moneual gave NH comfort as to Moneual's creditworthiness, and induced it to enter into additional factoring transactions with Moneual..., including entering into EFAs ["export finance agreements"] to finance Moneual's exports to ... Newegg." (*Id.*). NH also allegedly asked Moneual additional questions about Newegg and NTL related to their business and revenue. (*Id.* ¶ 114).

On December 13, 2013, NH and Moneual entered into an EFA. (*Id.* ¶¶ **[*14]** 116). In connection with the set of receivables Moneual sought to sell NH under the EFA, Moneual provided NH with NTL's relevant purchase orders and Moneual's corresponding invoices, shipping documents, and signed SPIs, which NH staff would review before deciding to purchase the relevant receivables. (*Id.* ¶¶ 119-120).

NH purchased Moneual's NTL receivables based upon five sets of purchase orders. Pursuant to those five sets of purchase orders, NTL had ostensibly purchased thousands of HTPC units at a cost of $2,530 per unit. (*Id.* ¶¶ 136, 141, 146, 151, 156). The first set of purchase orders had an aggregate value of $9,993,500; the second set had an aggregate value of $3,795,000; the third set had an aggregate value of $6,198,500; the fourth set had an aggregate value of $3,795,000; and the fifth set had an aggregate value of $6,198,500. (*Id.* ¶¶ 139, 144, 149, 154, 159). NTL paid NH on the first, second, and third sets of purchase orders, and defaulted on the fourth and fifth sets, which were due to be paid on December 17, 2014, and December 22, 2014, respectively. (*Id.* ¶¶ 140, 145, 150, 155, 160).

2. KEB Hana

KEB Hana began providing Moneual loans against its receivables in 2012. (*Id.* ***[*15]*** ¶ 165). On August 13, 2012, after obtaining credit investigation results on Moneual and NTL (among other Moneual customers), KEB Hana and Moneual entered into an EFA. (*Id.* ¶¶ 165-167). On December 18, 2013, KEB Hana entered into an additional EFA with Moneual. (*Id.* ¶ 171).

In connection with each set of receivables Moneual sought to sell KEB Hana under the EFAs, Moneual provided KEB Hana with NTL's relevant purchase orders and Moneual's corresponding invoices, shipping documents, and signed SPIs, which KEB Hana staff would review before deciding to purchase the relevant receivables. (*Id.* ¶¶ 174-175).

Between November 9, 2012, and August 1, 2014, KEB Hana purchased Moneual's NTL receivables based upon what were ostensibly 219 shipments of goods. (*Id.* ¶ 184). NTL made timely (or near timely) payments to KEB Hana up until July 2014, which corresponded with 167 of the 219 shipments. (*Id.* ¶ 185). The Banks characterize the remaining 52 shipments as two sets of purchase orders pursuant to which NTL had ostensibly purchased millions of dollars' worth of Moneual goods, including HTPCs. (*Id.* ¶¶ 187-188, 194). The first set of purchase orders had an aggregate value of $46,754,400; the second set **[*16]** had an aggregate value of $20,235,600. (*Id.* ¶¶ 191, 197). NTL defaulted on both sets of purchase orders, which were due to be paid between September 1, 2014, and December 29, 2014. (*Id.* ¶¶ 192, 198).

3. KB

On June 10, 2013, and October 29, 2013, after obtaining credit investigation results on Moneual and NTL (among other Moneual customers), KB and Moneual entered into EFAs. (*Id.* ¶¶ 201, 203). In connection with each set of receivables Moneual sought to sell KB under the EFAs, Moneual provided KB with NTL's relevant purchase orders and Moneual's corresponding invoices, shipping documents, and signed SPIs, which KB staff would review before deciding to purchase the relevant receivables. (*Id.* ¶¶ 206-207).

KB purchased Moneual's NTL receivables based upon four sets of purchase orders. Pursuant to those four sets of purchase orders, NTL had ostensibly purchased millions of dollars' worth of Moneual products, including thousands of HTPC units at a cost of $2,530 per unit. (*Id.* ¶¶ 236, 240, 244, 248). The first set of purchase orders had an aggregate value of $19,987,000; the second set had an aggregate value of $10,120,000; the third set had an aggregate value of $9,867,000; and the fourth **[*17]** set had an aggregate value of $19,987,000. (*Id.* ¶¶ 238, 242, 246, 251). NTL timely (or nearly timely) paid KB on the first, second, and third sets of purchase orders, and defaulted on the fourth set, which was due to be paid by November 14, 2014. (*Id.* ¶¶ 239, 243, 247, 252).

E. <u>The Nature of the Alleged Fraudulent Scheme</u>

On October 20, 2014, Moneual filed for receivership in South Korea, "owing in excess of $500 million to its lenders, including the Banks." (*Id.* ¶ 254). News reports described Moneual's receivership filing as "abrupt," "unexpected," and a "shock," given Moneual's ostensibly healthy operations and finances. (*Id.*).

In late 2014, the Korean Customs Service initiated an investigation into Moneual. (*Id.* ¶ 255). On January 23, 2015, the Seoul district prosecutor indicted HS Park (Moneual's CEO) and other Moneual employees; the indictment was premised upon their execution of "large-scale fraud schemes using circular transactions." (*Id.*). "The indictment further charged that Moneual had greatly exaggerated the price of its HTPCs, often charging nearly $3,000 per unit when in fact, according to the Korean authorities, they were worth only approximately $7 to $18 per unit." (*Id.* ***[*18]***). "The indictment also detailed how Moneual's foreign importers, like ... Newegg, Inc., through its alter ego and agent, [NTL], provided Moneual with purchase order numbers to enable Moneual executives to generate false and fraudulent purchase orders, which Moneual then used to obtain financing from at least ten banks, including the plaintiff Banks." (*Id.*).

The Banks allege that the Korean authorities' investigation revealed that Newegg had prepared and emailed fraudulent purchase orders to Moneual or generated purchase order numbers that Moneual could use to create fraudulent purchase orders. (*Id.* ¶¶ 263-264). Moneual then passed these fraudulent Newegg purchase orders onto the Banks and other financial institutions to support its factoring requests. (*Id.*). However, "all of the purported transactions between Moneual and Newegg, Inc., through [NTL], took place on paper only; no physical transfer of goods ever occurred." (*Id.*).

"The Korean authorities' investigation also revealed that in exchange for foreign importers' participation in Moneual's fraudulent scheme to obtain money from financial institutions in exchange for bogus export receivables, Moneual paid the foreign importers, including **[*19]** ... Newegg, Inc. (or [NTL] on Newegg, Inc.'s behalf), and executives and employees of those foreign importers, kickbacks, which HS Park called 'commissions.'" (*Id.* ¶ 266).

The "Korean authorities' investigation revealed that the money HS Park wired to NTL, on behalf of Newegg, Inc., through the fraudulent circular transactions so that it could pay the Banks included an additional one to two percent 'commission' that Newegg, Inc. would retain as payment for its participation in the scheme." (*Id.* ¶ 272).

HS Park was ultimately convicted "of defrauding ten Korean banks, including the Plaintiff banks, of over $3 billion between 2007 and 2014 based on loans Moneual received for fraudulent export contracts." (*Id.* ¶ 274).

In their operative Second Amended Complaint, the Banks assert three claims for relief: (1) fraud; (2) negligent misrepresentation; and (3) violation of California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code §§ 17200 et seq.*

II. REQUEST FOR JUDICIAL NOTICE AND EX PARTE APPLICATION

In conjunction with their Reply filed on August 6, 2018, Defendants request that the Court take judicial notice of a "Protocol of a Suspect Examination (2nd Session) — Hong-Seok Park," a transcript of statements regarding Newegg **[*20]** made by non-party Hong-Seok Park during the course of a Korean Customs Service investigation. (*See* RJN (Docket No. 81)). Plaintiffs then filed an Ex Parte Application to Strike RJN on August 14, 2018. (Docket No. 82). On August 16, 2018, Defendants filed an Opposition. (Docket No. 84).

The Court does not rely upon the "Protocol of a Suspect Examination (2nd Session) — Hong-Seok Park," the challenged portion of the Reply, to reach its decision.

Accordingly, Defendants' RJN and Plaintiffs' Ex Parte Application are **DENIED *as moot***.

III. LEGAL STANDARD

"Dismissal under *Rule 12(b)(6)* is proper when the complaint either (1) lacks a cognizable legal theory or (2) fails to allege sufficient facts to support a cognizable legal theory." *Somers v. Apple, Inc., 729 F.3d 953, 959 (9th Cir. 2013)*. "*Federal Rule of Civil Procedure 8(a)(2)* requires only 'a short and plain statement of the claim showing that the pleader is entitled to relief,' in order to 'give the defendant fair notice of what the . . . claim is and the grounds upon which it rests . . . .'" *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*.

In ruling on the Motion under *Rule 12(b)(6)*, the Court follows *Twombly, Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*, and their Ninth Circuit progeny. "To survive a motion to dismiss, a complaint must contain sufficient factual matter . . . to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting **[*21]** *Twombly, 550 U.S. at 570*). The Court must disregard allegations that are legal conclusions, even when disguised as facts. *See id. at 681* ("It is the conclusory nature of respondent's allegations, rather than their extravagantly fanciful nature, that disentitles them to the presumption of truth."); *Eclectic Properties E., LLC v. Marcus & Millichap Co., 751 F.3d 990, 996 (9th Cir. 2014)*. "Although 'a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof is improbable,' plaintiffs must include sufficient 'factual enhancement' to cross 'the line between possibility and plausibility.'" *Eclectic Properties, 751 F.3d at 995* (quoting *Twombly, 550 U.S. at 556-57*) (internal citations omitted).

The Court must then determine whether, based on the allegations that remain and all reasonable inferences that may be drawn therefrom, the complaint alleges a plausible claim for relief. *See Iqbal, 556 U.S. at 679*; *Cafasso, U.S. ex rel. v. Gen. Dynamics C4 Sys., Inc., 637 F.3d 1047, 1054 (9th Cir. 2011)*. "Determining whether a complaint states a plausible claim for relief is 'a context-specific task that requires the reviewing court to draw on its judicial experience and common sense.'" *Ebner v. Fresh, Inc., 838 F.3d 958, 963 (9th Cir. 2016)* (quoting *Iqbal, 556 U.S. at 679*). Where the facts as pleaded in the complaint indicate that there are two alternative explanations, only one of which would result in liability, "plaintiffs cannot offer allegations that are merely consistent with their favored **[*22]** explanation but are also consistent with the alternative explanation. Something more is needed, such as facts tending to exclude the possibility that the alternative explanation is true, in order to render plaintiffs' allegations plausible." *Eclectic Properties, 751 F.3d at 996-97*; *see also* *Somers, 729 F.3d at 960*.

Fraud-based allegations are governed by *Rule 9(b)*. "*Rule 9(b)* demands that, when averments of fraud are made, the circumstances constituting the alleged fraud be specific enough to give defendants notice of the particular misconduct so that they can defend against the charge[.]" *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003)* (internal citations omitted). Under *Rule 9(b)*, fraud allegations must include the "time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." *Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007)* (citing *Edwards v. Marin Park, Inc., 356 F.3d 1058, 1066 (9th Cir. 2004))*. In other words, "[a]verments of fraud must be accompanied by 'the who, what, when, where, and how' of the misconduct charged." *Vess, 317 F.3d at 1106*. Such averments must be specific enough to "give defendants notice of the particular misconduct . . . so that they can defend against the charge and not just deny that they have done anything wrong." *Id.* (quoting *Bly—Magee v. California, 236 F.3d 1014, 1019 (9th Cir. 2001))*.

Whereas allegations concerning the circumstances of fraud must include the "the who, what, when, where, and how of the misconduct **[*23]** charged," *id.* (internal quotation marks and citations omitted), issues of "[m]alice intent, knowledge, and other conditions of a person's mind may be alleged generally." *Fed. R. Civ. P. 9(b)*.

IV. DISCUSSION

Through their Motion, Defendants argue that: (1) Plaintiffs' allegations do not support any form of secondary liability, (2) Plaintiffs' fraud claim is fatally deficient because the allegations fail to establish cognizable claims, (3) Plaintiffs' negligent misrepresentation claim is also fatally deficient for the same reason, and in any event, the claim is barred by the statute of limitations, and (4) Plaintiffs' UCL claim fails as a matter of law. The Court will address each argument in turn.

A. Secondary Liability

Because the thrust of the SAC remains focused on the alleged misconduct of NTL, an indirect subsidiary of Newegg, Defendants argue that Plaintiffs' renewed attempt to establish secondary liability amounts to nothing more than showing a routine parent-subsidiary relationship. The Court agrees and finds that the SAC has offered no new meaningful allegations to establish that NTL was an alter ego or agent of Newegg and/or Magnell.

1. Alter Ego Theory

Plaintiffs argue that the SAC adequately alleges **[*24]** that NTL was Newegg and/or Magnell's alter ego. (Opp. at 17-22).

"[T]he alter ego test may be used to extend personal jurisdiction to a foreign parent *or* subsidiary when, in actuality, the foreign entity is not really separate from its domestic affiliate." *Ranza v. Nike, Inc., 793 F.3d 1059, 1073 (9th Cir. 2015)* (emphasis in original). "To satisfy the alter ego test [to justify exercising personal jurisdiction or apply an alter ego theory of liability], a plaintiff must make out a prima facie case (1) that there is such ***unity of interest and ownership*** that the separate personalities [of the two or more entities] no longer exist ***and*** (2) that failure to disregard [their separate identities] would result in ***fraud or injustice***." *Id.* (internal quotation marks and citations omitted; alterations in original; emphasis added).

a. *Unity of interest and ownership*

"The 'unity of interest and ownership' prong of this test requires a showing that the parent controls the subsidiary to such a degree as to render the latter the mere instrumentality of the former." *Id.* (internal quotation marks and citations omitted). "This test envisions ***pervasive control*** over the subsidiary, such as when a parent corporation dictates every facet of the subsidiary's business — from broad **[*25]** policy decisions to routine matters of day-to-day operation." *Id.* (internal quotation marks and citations omitted; emphasis added).

Routine interaction and coordination between a parent and its subsidiary is not "pervasive control." *See, e.g., Corcoran v. CVS Health Corp., 169 F. Supp. 3d 970, 983 (N.D. Cal. 2016)* (so long as corporate formalities are observed, "an active parent corporation involved directly in decision-making about its subsidiaries' holdings" is insufficient to overcome presumption of corporate separateness) (quoting *Doe v. Unocal Corp., 248 F.3d 915, 928 (9th Cir. 2001)*); *AGA Service Co. v. United Air Ambulance, LLC, No. 16-cv-2663-W, 2017 U.S. Dist. LEXIS 157962, 2017 WL 4271991, at *3 (S.D. Cal. Sept. 26, 2017)* ("[A] close relationship between the [parent and subsidiary] ... is not sufficient to establish the type of pervasive control necessary to satisfy the unity-of-interest test."). Indeed, even "[t]otal ownership and shared management personnel are alone insufficient to establish the requisite level of control." *Ranza, 793 F.3d at 1073*.

Factors relevant to the unity-of-interest analysis include: "[1] the commingling of funds and other assets of the entities, [2] the holding out by one entity that it is liable for the debts of the other, [3] identical equitable ownership of the entities, [4] use of the same offices and employees, [5] use of one as a mere shell or conduit for the affairs **[*26]** of the other, [6] inadequate capitalization, [7] disregard of corporate formalities, [8] lack of segregation of corporate records, and [9] identical directors and officers." *Corcoran, 169 F. Supp. 3d at 983* (internal citations omitted; bracketed numbers in original).

Plaintiffs argue that allegations in the SAC "support at least six of nine factors." (Opp. at 18). The Court disagrees and finds only the second and ninth factors support the conclusion that NTL acted as Newegg and/or Magnell's alter ego. The remaining seven factors are neutral or militate against that conclusion.

As to the first and second factors, Plaintiffs point to same allegations in the SAC for support and address them together. Accordingly, the Court will also address them together. Plaintiffs first argue that Newegg executed the August 2012 Guaranty and the January 2013 Guaranty on behalf and for the benefit of NTL. (*Id.* at 18-19). Similarly, the Chih Sales Agreement and the Chang Sales Agreement between Newegg and Moneual — in which Newegg.com agreed to purchase $650 million of Moneual products over two years — stated that Newegg's "subsidiaries [including NTL] could purchase products for it ... [but Newegg] would guarantee the total amount of purchase from [NTL] and **[*27]** be fully responsible for any financial issues." (*Id.* at 19). Further, Plaintiffs state that Newegg issued payments for the goods and NTL continued to pay Plaintiffs — even though the SAC actually alleges that Plaintiffs "received payment for all purchased export receivables from ***Newegg, Inc***.—acting through [NTL]." (*Compare* SAC ¶ 82 *with* Opp. at 19) (emphasis added). Finally, Plaintiff appears to place much emphasis on the fact that the KSURE EFF insurance policies named Newegg as guarantor, but this is misleading because, as Defendants note, the policies were drafted and issued by KSURE and not Defendants. (*Id.*; Mot. at 17).

The Court is unpersuaded that Newegg and NTL commingled corporate funds without more relevant allegations (e.g., transferring money between accounts without documentation or having one shared account between the two entities). The Court agrees, however, that the two guaranties and two sales agreements qualify as "holding out by one entity that it is liable for the debts of another." *See* *Fru-Con Const. Corp. v. Sacramento Mun. Util. Dist., No. 05-cv-583-LKK, 2007 U.S. Dist. LEXIS 64017, 2007 WL 2384841, at *7 (E.D. Cal. Aug. 17, 2007)*. But corporate parents may, and indeed routinely do, guaranty debts of their subsidiaries while still maintaining corporate separateness. **[*28]** *See id.* ("The fact that [the parent] used its financial weight to secure [the subsidiary's] bond is insufficient to establish alter ego liability.") (collecting cases). Accordingly, the first factor militates against and the second factor militates in favor of, albeit very marginally, finding an alter ego relationship between Newegg and NTL.

As to the third factor, Plaintiffs argue that Newegg and NTL share identical equitable ownership because NTL is a wholly-owned subsidiary of Newegg, strongly suggesting that Fred Chang, Newegg's founder and CEO and an NTL director, ultimately beneficially owns both entities. (Opp. at 19). The SAC, however, alleges that NTL, via Newegg Greater China (Hong Kong) Company Limited, is whollyowned by Newegg Enterprises LLC. (SAC ¶ 28). Newegg Enterprises LLC, in turn, shares the same City of Industry, California registered address as Newegg, which suggests that NTL "is a subsidiary and affiliate of Newegg." (*Id.*; Mot. at 18). These allegations, accepted as true, merely establish that NTL is Newegg's subsidiary and do not suggest that a single person (or group of people) is the ultimate beneficial owner of both Newegg and NTL dictating the actions of both companies. **[*29]** Plaintiffs' conclusory and speculative allegation that Fred Chang ultimately beneficially owns both entities is unavailing. The third factor is thus neutral at best.

As to the fourth factor, Plaintiffs allege that Newegg and Magnell are headquartered in an office in City of Industry, California, while NTL is incorporated in and maintains its office in Hong Kong. (SAC ¶¶ 22, 27). With respect to overlapping employees, Plaintiffs point to four people: (1) Fred Chang, the founder of both Newegg and Magnell, CEO and Chairman of Newegg, Personnel Manager of Magnell, and one of two NTL directors; (2) Edison Chih, COO of Newegg and NTL and Fred Chang's assistant; (3) Nicole Lee, Chief Human Resources Officer of Newegg and President of Newegg Greater China (Hong Kong) Company Limited, which ostensibly involves managing and overseeing NTL's finances; and (4) Yueh Pai Chang, Chief Financial Officer of Newegg and the other NTL directors. (*See id.* ¶ 32; Opp. at 19-20). Plaintiffs do not identify when Nicole Lee and Yueh Pai Chang held their role at NTL or allege their misconduct, if any. In the context of establishing an alter ego relationship, Plaintiffs' allegations are underwhelming. *See* *Ranza, 793 F.3d at 1074* ("Some employees **[*30]** and management personnel move between the entities, but that does not undermine the entities' formal separation."). Plaintiffs have also failed to allege more striking facts, for example, a shared office space between Newegg/Magnell and NTL. The fourth factor thus militates against finding an alter ego relationship.

As to the fifth factor, Plaintiffs allege that Newegg used NTL as a mere shell or conduit because Newegg (1) purportedly asked to be involved in the fraudulent scheme, (2) allowed NTL to perform certain intra-Hong Kong transactions, (3) executed the two guaranties and the two sales agreements, (4) was named as the "Importer" in the insurance policies with KSURE, and (5) permitted NTL to use the Newegg.com logo and to reference Newegg's standard terms and conditions. (SAC ¶¶ 34, 61, 63-76; Opp. at 20-21). These allegations, however, are largely unavailing because they are not relevant (the insurance policies were not issued by Defendants), are conclusory and speculative (that Newegg asked to be a part of the scheme) (*id.* ¶¶ 34, 63), or contain no material deviations from previously rejected allegations in the FAC (the two guaranties and two sales agreements) (*compare id.* ¶¶ 69-74 *with* ***[*31]*** FAC ¶¶ 58-65). Moreover, as the Court previously noted, the fact that Newegg and/or NTL made use of the "Newegg.com" logo or trade name does not render them alter egos of one another. *See, e.g.,* *Eagle Canyon Owners' Ass'n v. Waste Mgmt., Inc., No. 16-cv-2811-LAB, 2017 U.S. Dist. LEXIS 109812, 2017 WL 3017501, at *5 (S.D. Cal. Jul. 13, 2017)* ("Use of a licensed logo on contracts, trucks, or online doesn't make a parent company party to a contract or subject to personal jurisdiction.") (internal citations omitted). The fifth factor thus militates against finding an alter ego relationship.

As to the sixth, seventh, and eighth factors, the SAC contains no allegations and Plaintiffs' Opposition does not suggest that any of the relevant entities are inadequately capitalized, that any of the relevant entities disregard corporate formalities, or that any of the relevant entities fail to segregate their corporate records from the records of the other entities. The sixth, seventh, and eighth factors thus militate against finding an alter ego relationship.

As to the ninth factor, the Court finds some support for Plaintiffs' position that there are identical directors and officers for the reason stated in the fourth factor. However, this factor only slightly militates in favor **[*32]** of finding that NTL was Newegg's alter ego, since "'[it] is considered a normal attribute of ownership that officers and directors of the parent serve as officers and directors of the subsidiary.'" *Gerritsen v. Warner Bros. Entm't Inc., 116 F. Supp. 3d 1104, 1138-39 (C.D. Cal. 2015)* (quoting *Sonora Diamond Corp. v. Superior Court, 83 Cal. App. 4th 523, 548-49, 99 Cal. Rptr. 2d 824 (2000))*.

In sum, only two of the nine factors — Newegg assuming liability for NTL's debt under the two guaranties and overlapping directors and officers — support Plaintiffs' unity-of-interest position. That is not enough to disregard corporate separateness. *See* [Stewart v. Screen Gems-EMI Music, Inc., 81 F. Supp. 3d 938, 956 (N.D. Cal. 2015)] ("Here, three factors weigh in favor of finding a unity of interest among the [defendant] entities: equitable ownership, use of the same offices and employees..., and identical officers and directors. These factors, even when considered together, are not sufficient to support of finding of unity of interest among these entities.").

Accordingly, there is insufficient unity of interest between NTL and Newegg and/or Magnell to establish an alter ego relationship.

b. *Fraud or injustice*

Unity of interest aside, Plaintiffs have also failed to demonstrate that fraud or injustice will follow by not recognizing an alter ego relationship between Defendants and NTL.

Plaintiffs argue that because the SAC alleges a fraudulent scheme concocted **[*33]** by Defendants and NTL, fraud or injustice would follow if the Court adheres to their corporate separateness. (Opp. at 21) ("Here, the SAC alleges that Newegg, Inc. [took various actions as stated above] ... for fraudulent NTL receivables...These allegations show that Newegg, Inc. acted in bad faith, perpetuated the fraud, and misrepresented the corporate form..."). At the hearing, Plaintiffs argued that the Court should not place too much weight on corporate formalities. But accepting Plaintiffs' argument would essentially eliminate this prong of the analysis, since every complaint involving an alter ego relationship would necessarily involve allegations that one corporate entity is hiding behind the corporate veil of another.

Moreover, as previously recognized by the Court, Plaintiffs may pursue NTL, the alleged primary wrongdoer whom Defendants purportedly controlled, in its home of Hong Kong (or wherever else it might be subject to jurisdiction). Certainly, Hong Kong courts would be more than capable of resolving Plaintiffs' dispute with NTL. *See, e.g.,* [Cook v. Champion Shipping AS, 732 F. Supp. 2d 1029, 1038 (E.D. Cal. 2010)] (finding that Hong Kong is an adequate alternative forum and dismissing maritime action on forum non conveniens grounds); [Capri Trading Corp. v. Bank Bumiputra Malaysia Berhad, 812 F. Supp. 1041, 1044 (N.D. Cal. 1993)] (finding that **[*34]** Hong Kong is an adequate alternative forum and dismissing civil RICO action on forum non conveniens grounds).

Accordingly, the Court finds no risk of fraud or injustice by declining to recognize an alter ego relationship between Defendants and NTL.

2. Agency Theory

Plaintiffs next argue that Newegg and/or Magnell and NTL were in an agency relationship. (SAC ¶ 22; Opp. at 22).

The SAC, however, offers no allegations to suggest anything more than a close parent-subsidiary relationship between Defendants and NTL. For example, Plaintiffs conclude that that Defendants and NTL were "agents, partners, representatives, affiliates, alter egos and/or co-conspirators of each other" and repeatedly allege that Newegg "dominated, influenced, and controlled Magnell and [NTL]," but offer no other facts to support such descriptions. (*See* SAC ¶¶ 29-30, 32, 36, 59; Opp. at 22). Further, Plaintiffs point to the two sales agreements, the KSURE insurance policies, the purchase orders, and other contracts as evidence that Newegg "controlled NTL's day-to-day operations with respect to the fraudulent scheme." (Opp. at 23). But, as Defendants note, these contractual relationships actually cut against Plaintiffs' argument that NTL was Defendants' **[*35]** agent since they concern three distinct business relationships: Newegg and Moneual, Newegg and NTL, and Moneual and NTL.

Through unadorned labels and conclusory statements, Plaintiffs' attempt to allege the existence of an agency relationship between Defendants and NTL falls far short of the pleading standards. *See, e.g., Lomeli v. Jackson Hewitt, Inc.*, No. 17-cv-02899-ODW-KSx, 2017 WL 4773099, at *4 (C.D. Cal. Oct. 19, 2017) ("[W]here a plaintiff alleges that a defendant is liable for fraud under an agency theory, *Rule 9(b)* requires that the existence of the agency relationship be pled with particularity.") (internal citation and quotation omitted); *Sawyer v. Bill Me Later, Inc., No. 10-cv-04461-SJO-JCGx, 2010 U.S. Dist. LEXIS 138098, 2010 WL 11492736, at *15 (C.D. Cal. Oct. 4, 2010)* ("To establish a parent corporation's liability for the acts or omissions of its subsidiary under an agency theory ... a plaintiff must show that the 'parent corporation *so controls the subsidiary* as to cause the subsidiary to become *merely* the agent or instrumentality of the parent[.]'"). The Court is therefore unpersuaded that an agency relationship existed between Defendants and NTL.

Accordingly, Defendants' Motion is **GRANTED *without leave to amend*** with respect to Plaintiffs' secondary liability claim.

B. Fraud Claim

Defendants next argue that Plaintiffs **[*36]** again fail to plead their fraud and negligent misrepresentation claims with sufficient specificity and therefore should be dismissed without further leave to amend. (Mot. at 15-21; Reply at 3-13). The Court will first turn to the fraud claim.

The Court, in its Order on April 26, 2018, granting Defendants' Motion to Dismiss First Amended Complaint, noted that "the bulk of the complained-of factoring transactions involved NTL rather than Newegg" and that "NTL is the primary, and perhaps the only, wrongdoer." (Docket No. 62 at 24-25). Plaintiffs therefore might consider pursuing NTL in Hong Kong or wherever it may be pursued. (*Id.*). Further, given the pervasive failure to distinguish between the alleged misconduct between Defendants and NTL, Plaintiffs may file a SAC in which they allege with more specificity as to what Newegg and/or Magnell did or did not do. (*Id.*).

The Court is unpersuaded that Plaintiffs have sufficiently done so for several reasons:

First, rather than remedying their allegations in the FAC — which referred to Defendants and NTL collectively as "Newegg" and/or "Newegg.com" — Plaintiffs have simply repackaged their allegations to state that Newegg committed the fraud and **[*37]** that NTL acted on Newegg's behalf at all relevant times.

For example, Plaintiffs previously alleged in the FAC that:

- "Before purchasing Moneual's export trade receivables from ASI, Newegg and other importers, the Banks purchased [EFF Insurance] from KSURE]." (FAC ¶ 36);

- "[B]eginning in 2012 and continuing until the scheme was uncovered in later 2014, [NTL], with Newegg, Inc.'s ... knowledge..." (*Id.* ¶ 52);

- "In accordance with the SPIs ... the Banks received payment for all purchased export receivables from Newegg payable before September 2014...." (*Id.* ¶ 66);

- "The successful consummation of some export finance transactions with ASI and Newegg..." (*Id.* ¶ 67).

Looking at the same statements in the SAC, Plaintiffs now allege that:

- "In connection with purchasing Moneual's export trade receivables from ASI, Newegg, Inc., ***acting through [NTL]***, and other importers, the Banks purchased EFF insurance from KSURE." (SAC ¶ 85);

- "Beginning in 2012 and continuing until the scheme was uncovered in later 2014 Newegg, Inc., ***acting through its subsidiary, [NTL]***..." (*Id.* ¶ 59);

- "In accordance with the SPIs ... the Banks received payment for all purchased export receivables from Newegg, Inc.—***acting [*38] through [NTL]***—payable before September 2014..." (*Id.* ¶ 82); and

- "The successful consummation of some export finance transactions with ASI and Newegg, Inc. (***acting through [NTL]***) ..." (*Id.* ¶ 83).

Plaintiffs, in fact, riddle their allegations in the SAC with some variation of the phrase "acting through NTL" when discussing actions attributable only to Newegg. (*See, e.g.*, SAC ¶¶ 59, 82-83, 85, 91, 93-94, 97, 111, 113, 115, 119, 165, 295).

Second, the substance of the fraudulent factoring transactions in the SAC still involves allegations against NTL rather than Newegg or Magnell. For example, Plaintiffs allege that it was NTL that:

• Received and countersigned SPIs (*see, e.g., id.* ¶¶ 81 ("Moneual would send Newegg, Inc.'s agent and representative, [NTL], SPIs..."), 138 ("Moneual also sent Newegg, Inc., through its agent and alter ego, [NTL], an SPI..."));

• Issued fraudulent purchase orders for Moneual products that were passed on to the Banks (*see, e.g., id.* ¶¶ 59 ("Newegg, Inc., acting through its subsidiary, [NTL]—which Newegg, Inc. directed and controlled at all relevant times—issued fraudulent purchase orders..."), 80 ("Moneual purported to charge [NTL] between $2,530 and $2,980 per **[*39]** HTPC unit, and those amounts were stated on the invoices and purchase orders from [NTL]..."));

• Engaged in paper-only transactions with Moneual (*see, e.g., id.* ¶ 60 ("[T]he transactions entered into between Moneual and [NTL] ... took place on paper only.")); and

• Purported to purchase Moneual products and received invoices from Moneual (*see, e.g. id.* ¶ 80 ("The invoices that Moneual issued to [NTL] listed Moneual as the seller and [NTL]...as the consignee of the goods.")); and

• Made payments, prior to any default, to the Banks in accordance with the SPIs (*see, e.g., id.* ¶¶ 140 ("NH received banks transfers ... from an account in the name of [NTL]..."), 145 (same), 150 (same), 239 ("KB received a payment ... from an account in the name of [NTL]..."), 243 (same), 247 (same)).

Because the allegations continue to tie the alleged misconduct to actions perpetrated by NTL rather than Newegg or Magnell, Plaintiffs' fraud claim remains nonviable — particularly in light of the Court's previous dismissal of NTL on personal jurisdiction grounds. *See* *U.S. ex rel. Lee v. Corinthian Colleges, 655 F.3d 984, 997-98 (9th Cir. 2011)* ("*Rule 9(b)* does not allow a complaint to merely lump multiple defendants together but requires plaintiffs to differentiate their allegations when suing more **[*40]** than one defendant and inform each defendant separately of the allegations surrounding his alleged participation in the fraud.") (internal quotation marks and citations omitted).

Third, it appears that Newegg is specifically alleged to have only executed the two guaranties and the two sales agreements and purportedly asked to be involved in the fraudulent scheme. But as already discussed, these allegations are conclusory, speculative, and insufficient to establish an alter ego or agent relationship between Defendants and NTL — something that may salvage Plaintiffs' fraud claim. *See supra*; *Lee, 655 F.3d at 998*.

Finally, at the hearing, Plaintiffs argued that there are specific allegations in the SAC that can be read plausibly to show that Newegg was the driving force behind the alleged fraudulent scheme instead of NTL being the driving force with Newegg lending financial support, consistent with an ordinary parent-subsidiary relationship.

Plaintiffs' SAC contains the following four specific allegations supporting their argument raised at the hearing: (1) Moneual is alleged to be doing business with Newegg.com, purportedly owned, operated, and controlled by Newegg at all relevant times; (2) Newegg, rather **[*41]** than NTL, was ultimately responsible for paying the receivables due on the Moneual-Newegg transactions; (3) the payments Plaintiffs were receiving were ultimately coming from Newegg; and (4) Newegg was merely acting through NTL, its Hong Kong subsidiary, with respect to the purchase orders, purported physical delivery of the goods, and all other misconduct. (*See, e.g.*, SAC ¶¶ 21-24, 29-30).

But upon further review, these allegations conflict with or are undermined by other statements in the SAC and case law examining similar allegations. Accepting uncontroverted allegations as true, these conflicting allegations suggest that Plaintiffs' theory of liability is nonviable even at the pleading stage. *See* *Webcor Construction, LP v.*

Zurich Am. Ins. Co., No. 17-cv-2220-YGR, 2017 U.S. Dist. LEXIS 160267, 2017 WL 4310763, at * 4 (N.D. Cal. Sept. 28, 2017) (granting motion to dismiss under Rule 12(b)(6) because the plaintiff's theory "is not supported by the conflicting allegations in the FAC").

The Court will turn to each of the four specific allegations.

1. Moneual's Relationship with Newegg.com

As to Plaintiffs' allegation that Moneual was conducting business with Newegg.com, allegedly owned, operated, and controlled by Newegg, the SAC contains several conflicting statements. For example, **[*42]** Plaintiffs allege that Magnell, not Newegg, "is registered to do business as Newegg.com"; that there are "other indicia that Newegg.com may have act[ed] through Magnell in some [unspecified] respects"; and that Plaintiffs cannot plead "precisely what Magnell's role was ... in the scheme ... involving Newegg.com". (SAC ¶¶ 21, 23). Plaintiffs also acknowledge that Magnell is named as a Defendant "to the extent that it took actions [again, unspecified] under the name Newegg.com." (*Id.* ¶ 24).

Plaintiffs appear to recognize that both Newegg and Magnell may have directed or controlled Newegg.com, to varying degrees, during the relevant timeframe. Yet, Plaintiffs still lump together Newegg and Magnell and attribute any actions involving Newegg.com to only Newegg without distinguishing between the actions attributable to Newegg and those attributable to Magnell. Plaintiffs even go as far as pleading that Newegg, Magnell, and NTL "were agents, partners, representatives, affiliates, alter egos and/or co-conspirators of each other and each was acting within the scope of such agency, partnership, representation, affiliation, or conspiracy" and that Newegg "dominated, influenced, and controlled **[*43]** Magnell and [NTL]" at all relevant times. (*Id.* ¶¶ 29-30). It seems that Plaintiffs, again, want to attribute all alleged fraudulent actions to Newegg, a theory that the Court has already rejected in its previous Order.

The decision in *Swartz* is particularly instructive. 476 F.3d at 765. There, the complaint contained "general allegations" that the defendants had engaged in fraudulent conduct but failed to plead which alleged misconduct is attributable to which specific defendant(s). Id. at 763-64. The Ninth Circuit noted that "there is no absolute requirement that where several defendants are sued in connection with an alleged fraudulent scheme, the complaint must identify [the actions of] ... each and every defendant." Id. at 764. However, the plaintiff must, at a minimum, "identify the role of each defendant in the alleged fraudulent scheme." Id. at 765 ("Rule 9(b) does not allow a complaint to merely lump multiple defendants together but require[s] plaintiffs to differentiate their allegations when suing more than one defendant ... and inform each defendant separately of the allegations surrounding his alleged participation in the fraud.") (internal quotation marks and citations omitted). Moreover, the Ninth Circuit concluded that "the **[*44]** lack of specificity in [the plaintiff's] allegations of fraud provides an independent reason" to dismiss under Rule 12(b)(6). *Id.*

2. Receivables Due on the Moneual-Newegg Transactions

As to Plaintiffs' contention that Newegg, rather than NTL, was ultimately responsible for paying the receivables due on the Moneual-Newegg transactions, the SAC contains allegations that point to the opposite conclusion and conclusory statements that are insufficient under Rule 12(b)(6).

At numerous points in the SAC, for example, Plaintiffs recognize that the trade receivables were due from NTL, rather than Newegg. (*See, e.g.*, SAC ¶¶ 64 ("Moneual transmitted the August 2012 Guaranty from Newegg, Inc. to KSURE ... [and] KSURE extended Moneual an insurance credit line for the ***Newegg Trading Limited trade receivables***."), 65 ("Newegg, Inc. executed the January 2013 Guaranty so that Moneual could procure EFF insurance ... for the ***Newegg Trading Limited export receivables***."), 88 ("In connection with seeking to sell its ***Newegg Trading Limited trade receivables***..."), 166 ("KEB Hana also purchased EFF insurance from KSURE ... to secure ***Newegg Trading Limited receivables*** it factor."), 206 ("for each set of ... export ***receivables from***

Newegg [*45] Trading Limited..."), 208 ("KB purchased Moneual's ASI and ***Newegg Trading Limited receivables***...") (emphasis added)).

Yet, Plaintiffs continue to attribute NTL receivables to Newegg by merely adding the phrase "acting through" in other parts of the SAC. (*See, e.g., id.* ¶¶ 85 ("In connection with purchasing Moneual's export trade receivables from ... Newegg, Inc., acting through Newegg Trading Limited..."), 93 ("Moneual agreed to transfer certain trade receivables backed by purchase orders from third parties—including ... Newegg, Inc., acting through Newegg Trading Limited..."), 111 ("In or around 2013, Moneual requested that NH factor its open account export receivables, including, among others, receivables due from ... Newegg, Inc., acting through Newegg Trading Limited, secured by EFF Insurance.").

Like the attempt to attribute all actions involving Newegg.com to only Newegg, Plaintiffs appear to want to attribute all actions involving export trade receivables to only Newegg, without differentiating the role of Newegg (as guarantor) and NTL (as the counterparty to the agreements with Moneual). This attempt, however, is unconvincing to show that Newegg was ultimately and solely responsible **[*46]** for paying the receivables due on the Moneual-Newegg transactions. *See, e.g.,* *United States v. Kiewit Pacific Co., No. 12-cv-2698-JST, 2013 U.S. Dist. LEXIS 153135, 2013 WL 5770514, at *11 (N.D. Cal. Oct. 24, 2013)* (granting motion to dismiss as to the fraud claims and noting that the plaintiffs' allegations that "Kiewit Pacific Co. ***acted through*** Kiewit Infrastructure Group" are insufficient) (emphasis added); *Filler v. Hanvit Bank, No. 01-cv-9510-MGC, 2003 U.S. Dist. LEXIS 15950, 2003 WL 22110773, at *3 (S.D.N.Y. Sept. 16, 2004)* (dismissing fraud claims against related corporate entities for lack of specificity where the "complaint are full of conclusory allegations that the Korean entity ***acted through*** [its] parent ... and assume that these two corporations constitute a single entity [without] any explanation of why these distinct corporations should be regarded as one") (emphasis added).

The difference in Plaintiffs' allegations against ASI and allegations against Newegg is also telling. Against Defendants ASI and Newegg, Plaintiffs' SAC contains some common allegations: (1) there is a parent-subsidiary relationship; (2) the parent and subsidiary share some common directors, officers, and employees; and (3) the parent and subsidiary maintain the same registered corporate address. But in contrast to the allegations against Newegg, Plaintiffs also **[*47]** allege the following against ASI:

- ASI Corp. is or was an affiliate of ASI Computer at all relevant times because it merged into ASI Computer during the fraudulent scheme;
- ASI Corp. and ASI Computer did not distinguish between themselves in communications with third parties;
- ASI Corp. and ASI Computer did not distinguish the roles of their officers, directors, employees, and agents;

- ASI Corp. and ASI Computer identified their affiliates (*i.e.*, officers, directors, employees, and agents) interchangeably with either or both entities; and
- ASI Corp. and ASI Computer shared an email domain: "@asipartner.com".

(*See, e.g.*, SAC ¶¶ 13-17). Consequently, Plaintiffs' allegations need not specifically distinguish between ASI Corp. and ASI Computer, especially considering the merger. The SAC offers a more persuasive inference at the pleading stage that ASI Computer was the driving force behind the alleged fraudulent scheme and was ultimately responsible for paying the receivables due on the Moneual-ASI transactions. The Court therefore denied Defendants ASI's Motion to Dismiss Plaintiffs Industrial Bank of Korea, et al.'s First Amended Complaint. (Docket No. 62).

3. Purported Payments from Newegg [*48]

As to Plaintiffs' contention that the payments Plaintiffs received were ultimately coming from Newegg, the SAC again contains conflicting statements and lends little to no support.

For example, for the five sets of purchase orders between NTL and NH, Plaintiffs allege the following:

- "Moneual had assigned the right to payment for goods sold pursuant to the First Set of NH-Newegg Purchase Orders to NH and ***instructing Newegg, Inc., through Newegg Trading Limited, to pay NH*** directly when payment became due." (*Id.* ¶ 138);

- "Moneual had assigned the right to payment for goods sold pursuant to the Second Set of NH-Newegg Purchase Orders to NH and ***instructing Newegg, Inc., through Newegg Trading Limited, to pay NH*** directly when payment became due." (*Id.* ¶ 144);

- "Moneual had assigned the right to payment for goods sold pursuant to the Third Set of NH-Newegg Purchase Orders to NH and ***instructing Newegg Trading Limited to pay NH*** directly when payment became due." (*Id.* ¶ 148);

- "Moneual had assigned the right to payment for goods sold pursuant to the Fourth Set of NH-Newegg Purchase Orders to NH and ***instructing Newegg Trading Limited to pay NH*** directly when payment became due." (*Id.* ¶ 153); and **[*49]**

- "Moneual had assigned the right to payment for goods sold pursuant to the Fifth Set of NH-Newegg Purchase Orders to NH and ***instructing Newegg Trading Limited to pay NH*** directly when payment became due." (*Id.* ¶ 158).

When viewing these allegations in the light most favorable to Plaintiffs, it appears that most of the payments (3 out of 5) received by NH came from NTL rather than Newegg. This interpretation is still insufficient to support Plaintiffs' contention that the payments they received were ultimately coming from Newegg. But when ignoring the conclusory and unsupported allegations that Newegg "acted through" NTL, Plaintiffs' SAC suggests that the payments received by NH all came from NTL. And in fact, Plaintiffs later recognize that the completed payments came from an NTL account. (*See, e.g., id.* ¶¶ 140 ("NH received bank transfers ... from an account in the name of Newegg Trading Limited [for the first set of purchased orders.]"), 145 ("NH received a bank transfer ... from an account in the name of Newegg Trading Limited [for the second set of purchased orders.]")).

Plaintiffs' allegations with respect to the four sets of purchase orders between NTL and KB are even more revealing: **[*50]**

- "Moneual also sent Newegg Trading Limited SPIs informing it that Moneual had assigned the right to payment for goods sold pursuant to the First Set of KB-Newegg Purchase Orders to KB and ***instructing Newegg Trading Limited to pay KB*** directly when payment became due." (*Id.* ¶ 237);

- "Moneual had assigned the right to payment for goods sold pursuant to the Second Set of KB-Newegg Purchase Orders to KB and ***instructing Newegg Trading Limited Newegg, Inc.'s agent and alter ego, to pay KB*** directly when payment became due." (*Id.* ¶ 241);

- "Moneual had assigned the right to payment for goods sold pursuant to the Third Set of KB-Newegg Purchase Orders to KB and ***instructing Newegg Trading Limited, Newegg, Inc.'s agent and alter ego, to pay KB*** directly when payment became due." (*Id.* ¶ 245); and

- "Moneual had assigned the right to payment for goods sold pursuant to the Fourth Set of KB-Newegg Purchase Orders to KB and ***instructing Newegg Trading Limited, Newegg, Inc.'s agent and alter ego, to pay KB*** directly when payment became due." (*Id.* ¶ 250).

Like the payments received by NH, the payments received by KB all came from an account in the name of and owned by NTL. The Court has already previously **[*51]** rejected — and still rejects, *see supra* — Plaintiffs' theory that NTL was Newegg's alter ego or agent, as there is insufficient unity of interest between NTL and Newegg. *See* *Xyience Beverage Co., LLC v. Statewide Beverage Co., Inc., No. 15-cv-2513-MMM, 2015 U.S. Dist. LEXIS 189549, 2015 WL 13333486, at *8 (C.D. Cal. Sept. 24, 2015)* (concluding that plaintiffs' "cross-claim does not survive *Rule 12(b)(6)* scrutiny" because plaintiffs cannot "circumvent the requirements for secondary liability by blandly alleging that [certain defendants] are alter egos of other defendants accused of committing primary violations") (internal quotation marks and citation omitted).

4. Newegg Acting Through NTL

As to Plaintiffs' contention that Newegg was merely acting through its Hong Kong subsidiary, NTL, with respect to the alleged fraud, the SAC contains mostly conclusory allegations. And as previously noted, the SAC is riddled with some variation of the phrase "acting through NTL" when discussing actions attributable only to Newegg. (*See, e.g., id.* ¶¶ 91, 93-94, 97, 111, 113, 115, 119, 165, 295). These conclusory assertions, however, cannot support Plaintiffs' theory that Newegg was the driving force behind the alleged fraud, because Plaintiffs appear to want to attribute all alleged misconduct to **[*52]** Newegg without distinguishing the roles of the three entities in question: Newegg, NTL, and Magnell.

At the hearing, Plaintiffs reasserted that Newegg's fingerprints are "all over" the alleged fraudulent scheme. But as thoroughly discussed above, courts routinely reject this vague and conclusive attempt to plead liability. *See, e.g., Swartz, 476 F.3d at 765*; *Kiewit Pacific Co., 2013 U.S. Dist. LEXIS 153135, 2013 WL 5770514, at *11*; *Filler, 2003 U.S. Dist. LEXIS 15950, 2003 WL 22110773, at *3*.

Accordingly, Defendants' Motion is **GRANTED *without leave to amend*** with respect to Plaintiffs' fraud claim.

C. Negligent Misrepresentation

Because Defendants raise the same arguments to dismiss Plaintiffs' fraud and negligent misrepresentation claims (*see* Mot. at 15-21; Reply at 3-13) and because Plaintiffs also acknowledge and respond to those arguments in defense of their claims (Opp. at 9-15), the Court concludes that Plaintiffs also fail to plead their negligent misrepresentation claim with sufficient specificity for the above-stated reasons.

At the hearing, Plaintiffs also argued that liability can be established based on a promissory fraud theory. Promissory fraud is a subspecies of fraud where a plaintiff must plead and prove that the defendant made a promise that the defendant had no intention of performing. *See* *UMG Recordings, Inc. v. Global Eagle Ent., Inc., 117 F. Supp. 3d 1092, 1109 (C.D. Cal. 2015)* (citing *Lazar v. Superior Court, 12 Cal. 4th 631, 638, 49 Cal. Rptr. 2d 377, 909 P.2d 981 (1996)* ("A promise to do something necessarily **[*53]** implies the intention to perform; hence, where a promise is made without such intention, there is an implied misrepresentation of fact that may be actionable fraud.")).

According to Plaintiffs, Newegg agreed to purchase Moneual products for resale, but had no intention of legitimately reselling those products since no physical transfer of goods ever occurred. But Plaintiffs' SAC has alleged neither a promise made to Plaintiffs nor nonperformance of that promise, since the agreements Plaintiffs pointed to were between Newegg and non-party Moneual. *See* *Sunnyside Development Co., LLC v. Opsys Limited, No. 05-cv-553-MHP, 2005 U.S. Dist. LEXIS 39303, 2005 WL 1876106, at *5-6 (N.D. Cal. Aug. 8, 2005)* ("[T]he mere fact that a party breaches a promise to perform a condition of contract is as a matter of law insufficient to give rise to an inference that the breaching party acted with fraudulent intent at the time that the promise was made"); *Grant v. Aurora Loan Servs., Inc., 736 F. Supp. 2d 1257, 1271 (C.D. Cal. 2010)* ("[I]f plaintiff adduces no further evidence of fraudulent intent than proof of nonperformance of an oral promise, he will never reach a jury.") (internal citations omitted).

Regardless of whether Plaintiffs' negligent misrepresentation claim is adequately pleaded, Defendants also argue that it is barred by the two-year statute of limitations. **[*54]** (Mot. at 21). Plaintiffs commenced this action on October 18, 2017. Defendants contend that the allegations contained in the SAC show that Plaintiffs' negligent misrepresentation claim accrued on or before October 18, 2014, more than two years before the original Complaint was filed. (Mot. at 22; *see also, e.g.*, SAC ¶¶ 154, 159 (NH purchased NTL export receivables on July 22 and July 25, 2014); 191, 197 (KEB Hana purchased NTL export receivables from April through August 2014); 251 (KB purchased NTL export receivables on June 17, 2014)). Plaintiffs, however, argue that their negligent misrepresentation claim is grounded in fraud, as opposed to negligence, so the statute of limitation is three years. (Opp. at 23).

Because Plaintiffs fail to plead their negligent misrepresentation claims with sufficient specificity to survive a motion to dismiss, the Court finds it unnecessary to address which statute of limitation applies. *See* *Greyhound Lines Inc. v. Viad Corp., No. 15-cv-01820-PHX-DGC, 2016 U.S. Dist. LEXIS 160960, 2016 WL 6833938, at *3 n.1 (D. Ariz. Nov. 21, 2016)* (dismissing fraud and negligent misrepresentation claims and noting that the court "need not decide which statute of limitations applies at this time").

Accordingly, Defendants' Motion is **GRANTED *without leave to amend*** **[*55]** with respect to Plaintiffs' negligent misrepresentation claims.

D. UCL Claim

Plaintiffs finally argue that they have adequately alleged a UCL claim under all three applicable prongs. (*See* SAC ¶ 321; Opp. at 25).

California's UCL prohibits "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue, or misleading advertising." *Cal. Bus. & Prof. Code § 17200*. "Because the statute is written in the disjunctive, it is violated where a defendant's act or practice violates any of the foregoing prongs." *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1168 (9th Cir. 2012)*. The UCL "does not proscribe specific activities," but rather, "borrows violations of other laws and treats them as unlawful practices that the [UCL] makes independently actionable." *Puentes v. Wells Fargo Home Mortgage., Inc., 160 Cal. App. 4th 638, 643-44, 72 Cal. Rptr. 3d 903 (2008)* (internal quotation marks and citations omitted).

As a preliminary matter, Defendants argue that Plaintiffs lack standing to sue under the UCL because Plaintiffs are neither consumers nor competitors and Plaintiffs' UCL claim is based on foreign private lending agreements. (Mot. at 23). But the UCL expressly permits claims to be brought by any "person," which is broadly defined to include "natural persons, corporations, firms, partnerships, joint stock companies, associations and other organizations of persons." *See* *§§ 17201*, *17204*. **[*56]** Further, Plaintiffs also expressly allege that some misconduct may have occurred in California — for example, Newegg executed the two guaranties and the two sales agreements in California. (SAC ¶¶ 64-65, 69-71). Whether Plaintiffs' allegations are viable is a different question. Accordingly, Plaintiffs have standing to sue under the UCL.

The Court will now turn to each prong of the UCL.

1. Unlawful

Conduct is "unlawful" under the UCL if it "violate[s] another 'borrowed' law." *Davis, 691 F.3d at 1168* (quoting *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999))*; *cf.* *People ex rel. Bill Lockyer v. Fremont Life Ins. Co., 104 Cal. App. 4th 508, 515, 128 Cal. Rptr. 2d 463 (2002)* ("With respect to the *unlawful* prong, virtually any state, federal or local law can serve as the predicate for an action under *section 17200*.") (internal quotation marks, citations, and alterations omitted; italics in original).

Here, it appears from the face of the SAC that the "borrowed law" Plaintiffs rely upon for its UCL claim is common law fraud, *18 U.S.C. § 1341* ("Fraud and swindles"), and *18 U.S.C. § 1343* ("Fraud by wire, radio, or television"). (SAC ¶ 321; Opp. at 25). As discussed above, Plaintiffs have not adequately alleged an alter ego or agency relationship between Defendants and NTL and failed to plead any viable fraud-based claim. Moreover, alleged common law violations are insufficient for a UCL claim. *See Shroyer v. New Cingular Wireless Services, Inc., 622*

F.3d 1035, 1044 (9th Cir. 2010) ("Because Shroyer does not **[*57]** go beyond alleging a violation of common law, he fails to state a claim under the unlawful prong of *§ 17200*.").

2. Unfair

"The UCL does not define the term 'unfair,'" and "the proper definition of 'unfair' conduct against consumers is currently in flux' among California courts." *Davis, 691 F.3d at 1169* (noting that an alleged misconduct "unfair" when it is (1) "offend[ing] established public policy or ... is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers"; or (2) "threaten[ing] an incipient violation of an ***antitrust law***, or violat[ing] the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threaten[ing] or harm[ing] competition") (internal quotation marks and citations omitted). But in the competitor context, the California Supreme Court articulated:

> When a plaintiff who claims to have suffered injury from a direct competitor's "unfair" act or practice invokes *section 17200*, the word "unfair" in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of **[*58]** the law, or otherwise significantly threatens or harms competition.

See *Cel-Tech, 20 Cal. 4th at 185*.

Here, Plaintiffs' attempt to plead a UCL claim under the unfairness prong fails. Among other reasons, Plaintiffs offer no factual allegations to support the claim that any purportedly fraudulent conduct — again, not alleged with sufficient particularity — threatens to violate the letter, policy, or spirit of the antitrust laws or harm competition.

3. Fraudulent

Conduct is "fraudulent" under the UCL if it is "likely to deceive." *Morgan v. AT & T Wireless Servs., Inc., 177 Cal. App. 4th 1235, 1254, 99 Cal. Rptr. 3d 768 (2009)*. The particularity requirement of *Rule 9(b)* applies to claims under the fraudulent prong of the UCL. *See* *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)*; *Sosa v. Bank of New York Mellon Trust, No. 12-cv-144-LB, 2012 U.S. Dist. LEXIS 92291, 2012 WL 2568188, at *4 (N.D. Cal. July 2, 2012)*; *Briosos v. Wells Fargo Bank, 737 F. Supp. 2d 1018, 1033 (N.D. Cal. 2010)*. *Rule 9(b)* requires the plaintiff to allege "the who, what, when, where, and how" of the alleged fraudulent conduct, *Vess, 317 F.3d at 1106*, and "set forth an explanation as to why [a] statement or omission complained of was false and misleading," *In re GlenFed, Inc. Sec. Litig., 42 F.3d 1541, 1548 (9th Cir. 1994)* (en banc) (superseded by statute on other grounds).

Since Plaintiffs have failed to plead its alleged fraudulent conduct with sufficient particularity, their attempt to plead a UCL claim under the fraudulent prong also fails. *See* *Chase v. Hobby Lobby Stores, Inc., 2017 U.S. Dist. LEXIS 162909, 2017 WL 4358146, at *8 (S.D. Cal. Oct. 2, 2017)* (dismissing UCL claim under the fraudulent prong since the "complaint provides sufficient detail **[*59]** as to the 'who, what, when and where' of the alleged misconduct ... [but] has not adequately alleged the 'how').

Accordingly, Defendants' Motion is **GRANTED *without leave to amend*** with respect to Plaintiffs' UCL claim.

V. <u>CONCLUSION</u>

For the reasons set forth above, the Motion, RJN, and Application are ruled upon as follows:

- Defendants' Motion to Dismiss Second Amended Complaint is **GRANTED *without leave to amend***; and
- Both Defendants' RJN and Plaintiffs' Ex Parte Application are **DENIED *as moot***.

Plaintiffs' claims against Defendants Magnell Associate Inc., dba Newegg.com and Newegg, Inc., are therefore **DISMISSED**.

Remaining in this action are Plaintiffs' claims for fraud, negligent misrepresentation, and violations of California's Unfair Competition Law as to Defendants ASI Corporation, ASI Computer Technologies, Inc., Bill Chen, Henry Chen, Frances Chou, and Christine Liang.

IT IS SO ORDERED.

Nat'l Prescription Opiate Litig. v. Purdue Pharma L.P. (In re Nat'l Prescription Opiate Litig.)

United States District Court for the Northern District of Ohio, Eastern Division

October 5, 2018, Decided; October 5, 2018, Filed

Judges: David A. Ruiz, United States Magistrate Judge. JUDGE DAN AARON POLSTER.

Opinion by: David A. Ruiz

Opinion

REPORT AND RECOMMENDATION

On May 25, 2018, the Distributor Defendants,[1] Pharmacy Defendants,[2] and Manufacturer Defendants[3] filed Motions to Dismiss the Second Amended Complaint. (R. 491, R. 497, R. 499).[4] On June 22, 2018, Plaintiffs filed an

[1] The motion to dismiss identifies the "Distributors" as AmerisourceBergen Drug Corporation, Cardinal Health, Inc., and McKesson Corporation. (R. 491, PageID# 7455).

[2] The motion to dismiss identifies the "Pharmacies" as Walmart Inc., Rite Aid Corp., Walgreens Boots Alliance, Inc., and CVS Health Corp. (R. 497, PageID# 7581).

[3] The motion to dismiss identifies the "Manufacturers" as Purdue Pharma LP, Purdue Pharma Inc., and The Purdue Frederick Company Inc. ("Purdue"); Allergan Finance, LLC f/k/a Actavis, Inc. f/k/a Watson Pharmaceuticals, Inc. ("Allergan/Actavis"); Watson Laboratories, Inc., Actavis Pharma, Inc., Actavis LLC, Teva Pharmaceuticals, USA, Inc., and Cephalon, Inc. ("Teva"); Johnson & Johnson ("J&J"); Janssen Pharmaceuticals, Inc., Ortho-McNeil-Janssen Pharmaceuticals, Inc., and Janssen Pharmaceutica, Inc. ("Janssen"); Endo Health Solutions Inc. and Endo Pharmaceuticals Inc. ("Endo"); Insys Therapeutics, Inc. ("Insys"); and Mallinckrodt LLC ("Mallinckrodt"). (R. 499, PageID# 7632).

[4] On May 18, 2018, Plaintiffs filed their Second Amended Complaint (R. 477), which included impermissible amendments. After the motions to dismiss were filed, Plaintiffs filed two "corrected" Second Amended Complaints on May 29, 2018—a redacted version (R. 513) and a sealed version. (R. 514). In order to maintain the integrity of the paragraph numbering from the document initially filed on May 18, 2018, the Special Master advised the parties that the subsequent "corrected" filings not delete the impermissible amendments, but rather use strike-through font to denote those portions that were no longer operative. Although the parties' briefs cite to R. 477, the court cites to R. 514 as it is the operative second amended complaint. For the sake of brevity, any reference to the "complaint" hereafter refers to R. 514. Public users unable to access the sealed version may refer to R. 513, where the paragraph numbers should parallel the citations to R. 514.

omnibus brief in opposition to the motions. (R. 654). On July 13, 2018, Defendants filed their reply briefs. (R. 742, 744, 746). This report and recommendation addresses all three motions.

I. *Fed. R. Civ P. 12(b)(6)* Standard

When ruling upon a motion to dismiss filed under *Fed. R. Civ. P. 12(b)(6)*, a court must accept as true all the factual allegations contained in the complaint. *See* *Erickson v. Pardus, 551 U.S. 89, 93-94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)*; *accord* *Streater v. Cox, 336 Fed. App'x 470, 474 (6th Cir. 2009)*. Nonetheless, a court need not accept conclusions of law **[*65]** as true. Under *Fed. R. Civ. P. 8(a)(2)*, a pleading must contain a "short and plain statement of the claim showing that the pleader is entitled to relief."

> As the Court held in *[Bell Atlantic Corp. v.] Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929*, the pleading standard *Rule 8* announces does not require "detailed factual allegations," but it demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation. *Id., at 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929* (*citing* *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986))*. A pleading that offers "labels and conclusions" or "a formulaic recitation of the elements of a cause of action will not do." *550 U.S., at 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929*. Nor does a complaint suffice if it tenders "naked assertion[s]" devoid of "further factual enhancement." *Id., at 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929*.
>
> To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to "state a claim to relief that is plausible on its face." *Id., at 570, 127 S.Ct. 1955*. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. *Id., at 556, 127 S.Ct. 1955*. The plausibility standard is not akin to a "probability requirement," but it asks for more than a sheer possibility that a defendant has acted unlawfully. *Ibid.* Where a complaint pleads facts that are "merely consistent with" a defendant's liability, it "stops **[*66]** short of the line between possibility and plausibility of 'entitlement to relief.'" *Id., at 557, 127 S.Ct. 1955* (brackets omitted).

Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (*quoting* *Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929*).

A court "may dismiss a complaint for failure to state a claim 'only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations.'" *Trollinger v. Tyson Foods, Inc., 370 F.3d 602, 615 (6th Cir. 2004)* (quoting *Swierzkiewickz v. Sorema N.A., 534 U.S. 506, 514, 122 S. Ct. 992, 152 L. Ed. 2d 1 (2002)*; *Hishon v. King & Spalding, 467 U.S. 69, 73, 104 S. Ct. 2229, 81 L. Ed. 2d 59 (1984))*.

II. Factual Allegations of the Complaint[5]

A. Increase in Opioid Use/Abuse and Overdose Deaths

The complaint alleges that the Manufacturers and Distributors of opioids began in the late 1990s to expand the use of opioids by developing a "deliberate marketing strategy" coupled with "deliberate efforts to evade restrictions on opioid distribution." (R. 514 at ¶¶3-4). Plaintiffs allege that annual deaths from opioid overdoses increased sharply from 8,000 in 1999 to 20,000 in 2009 and up to 33,000 in 2015. *Id* at ¶4. From 1999 through 2016, it is alleged that 350,000 individuals died from an opioid overdose. *Id* at ¶5. More than 200,000 of those deadly overdoses involved prescription opioids. *Id.* For others who overdosed from non-prescription opioids, such as heroin, it is estimated that 80 percent of people who began abusing heroin in the past decade started with prescription **[*67]** opioids. *Id.* at ¶6.

---

[5] This report and recommendation provides only a brief overview of the voluminous factual allegations in the over 300 page complaint.

By 2014, nearly 2 million Americans were addicted to prescription opioids with another 600,000 addicted to heroin. (R. 514 at ¶16).

B. Allegations of an Intentional Campaign to Increase Opioid Use

Plaintiffs allege that the Manufacturers[6] initiated a massive marketing campaign based on false and misleading information to cause a dramatic increase in opioid prescriptions. (R. 514 at ¶10). Despite knowing the highly addictive properties of opioids, the Manufacturers sought to dramatically increase sales by means of publications, websites, and educational programs, resulting in a fourfold increase in opioid sales since 1999 and $9.6 billion in opioid sales in 2015 alone. *Id.* at ¶¶11-13. Plaintiffs allege the Manufacturers engaged in a series of marketing techniques that knowingly misrepresented both the risks and benefits of opioids for chronic pain treatment in order to "reverse the long-settled understanding of the relative risks and benefits of opioids." (R. 514 at ¶¶174-175).

1. Nine Categories of Misrepresentations

Plaintiffs allege the Manufacturers employed the following "nine categories of misrepresentations" concerning opioid treatment: (1) the risk of addiction **[*68]** from chronic opioid therapy is low; (2) such risk can be easily identified and managed; (3) signs of addiction are "pseudoaddiction," requiring more opioids; (4) withdrawal can be avoided by tapering; (5) dosage can be increased without additional risks; (6) long-term opioid use improves functioning; (7) alternative forms of pain relief are riskier; (8) OxyContin provides twelve hours of pain relief; and, (9) new formulas of certain opioids successfully deter abuse. (R. 514 at ¶177). Plaintiffs assert that all the above are false; that the Manufacturers knew them to be false; and, nonetheless, "set out to convince physicians, patients, and the public at large of the truth of each of these propositions in order to expand the market for their opioids." *Id.* at ¶178. The complaint proceeds to allege that each of the Manufacturers perpetuated the notion that the risk of addiction from opioid use is low. *Id.* at ¶¶180-232. The complaint also alleges how some of the other eight propositions were perpetuated.[7] *Id.* at ¶¶233-351.

2. Use of Front Groups, Key Opinion Leaders, and Continuing Medical Education Courses to Spread False and Misleading Information

Plaintiffs further allege that Manufacturers **[*69]** funded and controlled advocacy groups, which Plaintiffs label as "front groups," that distributed patient education materials and treatment guidelines that overstated the benefits of opioids for chronic pain treatment while understating the risks of addiction. (R. 514 at ¶¶350-354). The front groups were used to create the façade of "neutral and credible third parties" to influence opioid prescribing practices. *Id.* These front groups included both professional societies as well as patient advocacy organizations and received millions of dollars from the Manufacturers. *Id.* at ¶353. Plaintiffs further allege that individual executives, board members, and staff members of these front groups received substantial payments from the Manufacturers, many of whom were physicians on the Manufacturers' payroll, as consultants or speakers at medical events. *Id.* at ¶¶354, 363. These front groups minimized addiction risks while promoting opioid use for chronic pain, criticized existing CDC guidelines for opioid prescribing, and lobbied against existing laws that curbed opioid use. *Id.* at 355. The Manufacturers allegedly guided, reviewed, and approved false and misleading statements issued by the front groups. **[*70]** *Id.* at ¶356.

---

[6] Plaintiffs' use of the term "Marketing Defendants" includes defendants that have "manufactured and sold" prescription opioids (R. 514 at ¶63), while those same defendants identify themselves as "Manufacturer Defendants" in their motion to dismiss. (R. 499). For the sake of consistency, the court refers to this category of defendants simply as "Manufacturers."

[7] The Plaintiffs acknowledge that "not every Marketing Defendant" propagated each of the nine misrepresentations, but asserts that liability is not predicated upon every Manufacturer perpetuating all nine misrepresentations. (R. 514 at ¶179).

Plaintiffs identify numerous organizations that allegedly received funding from Manufacturers and served as front groups to distribute tens of thousands of pamphlets and other materials containing misrepresentations regarding opioids. Those entities included: American Pain Foundation (APF), an off-shoot of APF, the National Initiative on Pain Control (NIPC), American Academy of Pain Medicine (AAPM), American Pain Society, Alliance for Patient Access (APA), the U.S. Pain Foundation, and the American Geriatrics Society. (R. 514 at ¶¶357-395). Plaintiffs also allege that the Federation of State Medical Boards (FSMB), a trade organization representing various state medical boards, received grants from Manufacturers for specific opioid and pain management programs. *Id.* at ¶¶377-382. Beginning in 1998, the FSMB began "developing treatment guidelines for the use of opioids for the treatment of pain," that "was produced 'in collaboration with pharmaceutical companies.'" *Id.* at ¶379. It is alleged that the 1998 Guidelines, as well as a subsequent FSMB publication entitled *Responsible Opioid Prescribing*, "convey[ed] the alarming message that 'under-treatment of pain' would result **[*71]** in official discipline, but no discipline would result if opioids were prescribed as part of an ongoing patient relationship and prescription decisions were documented." (R. 514 at ¶¶381-382).

Plaintiffs also allege that the Manufacturers "paid and cultivated a select circle of doctors who were chosen and sponsored" for their pro-opioid messages in order "to create the grave misperception science and legitimate medical professionals favored the wider and broader use of opioids." (R. 514 at ¶396). Plaintiffs label these doctors "key opinion leaders" (KOLs). *Id.* at ¶¶176, 398. They were used "to present the appearance that unbiased and reliable medical research supporting the broad use of opioid therapy for chronic pain had been conducted and was being reported on by independent medical professionals." *Id.* at ¶397. The publications of these physicians were funded by the Manufacturers as they supported the position that opioid treatment for chronic pain was appropriate, all while knowing these statements were false and misleading. *Id.* at ¶¶401-403. According to the complaint, one of the KOLs later acknowledged in an interview that his earlier statements were "pseudoscience," the primary **[*72]** goal of which was to destigmatize opioids. *Id.* at ¶¶410-11.

The Manufacturers are alleged to have "created a body of false, misleading, and unsupported medical and popular literature about opioids that (a) understated the risks and overstated the benefits of long-term use; (b) appeared to be the result of independent, objective research; and (c) was likely to shape the perceptions of prescribers, patients, and payors." (R. 514 at ¶446). Plaintiffs allege the literature originated from the Manufacturers' marketing departments and had no scientific research basis. *Id.* at ¶¶448-451. The Manufacturers "aggressively distributed their false message ... through thousands of Continuing Medical Education Courses," (CMEs), that physicians attended to maintain their licenses. (R. 514 at ¶¶429-432). These CMEs allegedly "inflate the benefits of opioids, and frequently omit or downplay their risks and adverse effects," causing physicians that listened to these CMEs to be misled. *Id.* at ¶¶433, 440-41.

3. Branded and Unbranded Advertising and Marketing

Plaintiffs allege that the Manufacturers collectively spent more than $14 million on medical journal advertising of opioids in 2011, which included $8.3 **[*73]** million by Purdue, $4.9 million by Janssen, and $1.1 million by Endo. (R. 514 at ¶442). These included journals targeting specialists, such as the *Journal of Pain and Clinical Journal of Pain*, as well as journals with a wider medical audience, such as the *Journal of the American Medical Association. Id.* It is further alleged that the Manufacturers promoted opioids through "unbranded advertising" that, in contrast to a "branded" advertisement, does not require the advertiser to include risks, possible side effects and contraindications. *Id.* at ¶444. Such advertising was directed at physicians and consumers, as studies have shown that physicians are significantly more likely to prescribe a drug if a patient asks for it. *Id.* at ¶¶443-44. As an example one website contained testimonials from alleged pain advocates, who were paid significant sums by Defendant Purdue. *Id.* at ¶445.

It is further alleged that the Manufacturers' sales representatives met with "hundreds of thousands" of doctors "to disseminate their misrepresentations in targeted, one-on-one settings that allowed them to promote their opioids and to allay individual prescribers' concerns about prescribing opioids for chronic **[*74]** pain." *Id.* at ¶¶452-455. The Manufacturers, in 2014 alone, spent "$166 million on detailing branded opioids to doctors. This amount is twice as much as the Manufacturers spent on detailing in 2000. The amount includes $108 million spent by Purdue, $34 million by Janssen, $13 million by Teva, and $10 million by Endo." *Id.* at ¶¶455-461.

C. Distribution and Sales Allegations

Since 1999, the onset of the Manufacturers' alleged marketing actions, the amount of prescription opioids in the United States nearly quadrupled. (R. 514 at ¶12). Plaintiffs maintain that all Defendants were required to register as either manufacturers or distributors pursuant to *21 U.S.C. § 823* and *21 C.F.R. §§ 1301.11*, *1301.74*. (R. 514 at ¶¶500-504). Plaintiffs allege the Defendants have a duty "to report suspicious orders and further to not ship those orders unless due diligence disproves those suspicions." *Id.* at ¶¶501-505. Plaintiffs allege these duties stem from multiple sources including state law, common law, an assumed duty, and as registrants with the Drug Enforcement Agency (DEA) as manufacturers and/or distributors of Schedule II controlled substances. *Id.*

Plaintiffs assert that the Controlled Substances Act (CSA) requires both the Manufacturers **[*75]** and the Distributors[8] of Schedule II substances, such as opioids, to limit sales within a quota set by the DEA; register to manufacture or distribute opioids; maintain effective controls against diversion of the controlled substances that they manufacture or distribute; and to design and operate a system to identify suspicious orders of controlled substances, halt such unlawful sales, and report them to the DEA. *Id.* at ¶507. Plaintiffs allege Defendants failed to control the supply chain, prevent diversion, report suspicious orders, and halt shipments. *Id.* at ¶¶14, 518.

Plaintiffs allege Defendants worked together to increase the supply of opioids and fraudulently increased the quotas that governed the manufacture and distribution of prescription opioids. (R. 514 at ¶¶526-528). It is alleged that the Manufacturers engaged in the practice of paying rebates and/or "chargebacks" to the Distributors for sales of prescription opioids to boost sales and refine their marketing efforts. *Id.* at ¶529. Defendants worked together through trade or other organizations, such as the Pain Care Forum (PCF) or the Healthcare Distribution Alliance (HDA) to increase opioid sales. *Id.* at ¶531. The PCF, which **[*76]** included the previously described front groups, Manufacturers and Distributors, spent $140 million to lobby state and national legislatures on an array of issues, including opioids. *Id.* at ¶¶533-535.

Furthermore, Plaintiffs allege the HDA created a private network where representatives of the Manufacturers and Distributors could form relationships and create alliances between them and hold strategic business discussions between high-level executives. *Id.* at ¶¶535-540. Thus, Plaintiffs allege that the Manufacturers and Distributors were "not two separate groups operating in isolation or two groups forced to work together in a closed system," but rather "operated together as a united entity, working together on multiple fronts, to engage in the unlawful sale of prescription opioids." *Id.* at ¶¶543-46. It is alleged the Defendants worked together to ensure that the Aggregate Production Quotas, Individual Quotas and Procurement Quotas allowed by the DEA remained artificially high to ensure that suspicious orders were not reported to the DEA thereby giving the DEA no basis to refuse to increase production quotas due to diversion. *Id.* at ¶¶550-552. Defendants, it is alleged, were "on notice" **[*77]** of the problems of abuse and diversion caused "inescapably from the fact that they flooded communities with opioids in quantities that they knew or should have known exceeded any legitimate market for opioids-even the wider market for chronic pain." *Id.* at ¶557.

Further, Defendants were "in possession of national, regional, state, and local prescriber-and patient-level data that allowed them to track prescribing patterns over time." *Id.* at ¶¶558-563. It is also alleged that "Defendants refused to identify, investigate and report suspicious orders to the DEA when they became aware of the same despite their actual knowledge of drug diversion rings." *Id.* at ¶566. Plaintiffs allege Defendants also failed to report prolific

---

[8] In the complaint, the Plaintiffs also classify the national retail pharmacy defendants as "Distributor Defendants." (R. 514 at ¶¶107, 111-112, 124-128). These defendants, however, moved separately to dismiss the complaint and, in the Analysis section, the court differentiates between these two categories of defendants by referring to them either as "Distributors" or "Pharmacies." For the purposes of this section only, the Plaintiffs' references to the Distributor defendants in the complaint may encompass the Pharmacies.

prescribers, but instead focused their sales efforts on them to even further increase their prescribing. *Id.* at ¶¶569-578.

Plaintiffs also allege that several Distributors and Manufacturers have either admitted, been fined for, or been charged with failing to report suspicious orders. (R. 514 at ¶¶580-593, 595). The Defendants, through their trade associations, have acknowledged that "HDMA[9] and NACDS members not only have statutory and regulatory responsibilities to guard **[*78]** against diversion of controlled prescription drugs, but undertake such efforts as responsible members of society." *Id.* at ¶599. They further have stated in court filings that "Distributors take seriously their *duty* to report suspicious orders, utilizing both computer algorithms and human review to detect suspicious orders based on the generalized information that is available to them in the ordering process." *Id.* (emphasis added).

It is alleged that the Manufacturers marketed their products and disseminated their misrepresentations in the state of Ohio, and their nationwide "policies, plans, and procedures that were the same in Summit County as they were across the country." (R. 514 at ¶¶671-672). Sales representatives from each of the Manufacturers visited prescribers in Summit County, which frequently coincided with payments to prescribers for "promotional speaking," "food and beverage," "consulting," "travel and lodging," "honoraria," and "education." *Id.* at ¶673. Summit County had an opioid prescription rate exceeding its population from 2008 to 2011—a rate that has remained higher than the national average.[10] *Id.* at ¶674.

III. Analysis

A. Counts One and Two: Federal RICO Claims

In Count **[*79]** One of the complaint, Plaintiffs allege a civil violation of the *Racketeer Influenced and Corrupt Organizations (RICO) Act § 1961 et seq.* based on a marketing enterprise theory against the Manufactures, specifically Defendants Purdue, Cephalon, Janssen, Endo, and Mallinckrodt, whom the Plaintiffs refer to as "Marketing Defendants." (R. 514, PageID# 11178). In Count Two, Plaintiffs allege a civil RICO violation based on a supply chain enterprise theory against both the Manufacturers and Distributors, specifically Defendants Purdue, Cephalon, Endo, Mallinckrodt, Actavis, McKesson, Cardinal, and AmerisourceBergen, whom Plaintiffs refer to as "Supply Chain Defendants." *Id.* at PageID# 11187.

The RICO Act includes a civil-suit provision that permits: "[a]ny person injured in his business or property by reason of" RICO's substantive provisions to "sue...in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee...." *18 U.S.C. § 1964(c)*. If a defendant "engages in a pattern of racketeering activity in a manner forbidden by these provisions, and the racketeering activities injure the plaintiff in his business or property, **[*80]** the plaintiff has a claim under *§ 1964(c)*." *Sedima, S.P.R.L. v. Imrex Co., Inc., 473 U.S. 479, 495, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)*. The Supreme Court has instructed that "the RICO statute provides that its terms are to be 'liberally construed to effectuate its remedial purposes.'" *Boyle v. United States, 556 U.S. 938, 944, 129 S. Ct. 2237, 173 L. Ed. 2d 1265 (2009)* (citations omitted); *accord* *Ray v. Spirit Airlines, Inc., 836 F.3d 1340, 1349 (11th Cir. 2016)*. The Defendants' motions challenge Plaintiffs' RICO standing, allege they failed to plead causation and necessary RICO elements, and assert that Plaintiffs' supply chain enterprise theory attempts to bring a cause of action for violating the CSA for which they maintain there is no private right of action. (R. 491-1, PageID# 7477-7491, 499-1, PageID# 7664-7689).

1. Standing

---

[9] HDMA is the Healthcare Distribution Management Association, the predecessor of HDA. (R. 514 at ¶522).

[10] The complaint states that from 2010 to 2016, according to Ohio data, Summit County, whose population is 540,000 residents, averaged 36.4 million doses of opioids dispensed per year, with a high of 39.5 million. (R. 514 at ¶689).

"RICO's civil-suit provision imposes two distinct but overlapping limitations on claimants—standing and proximate cause. Standing poses a threshold question involving constitutional, prudential and (as in this case) statutory limitations on who may sue, regardless of the merits of that person's claim." Trollinger, 370 F.3d at 612 (*citing* Allen v. Wright, 468 U.S. 737, 750-51, 104 S. Ct. 3315, 82 L. Ed. 2d 556 (1984)). In addition, "[b]ecause Congress modeled this provision on similar language in the antitrust laws (§ 4 of the Clayton Act and § 7 the Sherman Act) and because the antitrust laws have been interpreted to require that a private plaintiff show proximate cause in order to have standing to sue, RICO civil **[*81]** claims also require proximate cause." Trollinger, 370 F.3d at 612 (*citing* Holmes v. Sec. Investor Prot. Corp., 503 U.S. 258, 267-68, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992); Sedima, 473 U.S. at 496).

The Defendants are correct in asserting that the standing requirements of a civil RICO claim require a plaintiff to allege (1) a direct injury,[11] and (2) the injury is to the plaintiff's "business or property." (R. 491-1, PageID# 7478-7486; R. 499-1, PageID# 7664). Plaintiffs summarize their alleged injuries into three categories: (1) public expenditures made in direct response to opioid use and trafficking; (2) lost tax revenue resulting from abuse, misuse, and addiction; and (3) losses caused by diminished property values. (R. 514 at ¶¶ 902, 934).

a. Business or Property

There is no dispute that a RICO claim requires injury to "business or property." *See, e.g.*, Sedima, 473 U.S. at 496 ("the plaintiff only has standing [under RICO] if, and can only recover to the extent that, he has been injured in his *business or property* by the conduct constituting the violation") (emphasis added); *accord* Ray, 836 F.3d at 1349. Plaintiffs do not contest that such a requirement exists, but rather argue that "[t]he harms that the Manufacturer and Distributor Defendants caused, which also impact the Plaintiffs' revenue-generating function, are direct injuries to their 'business and **[*82]** property.'" (R. 654, PageID# 15747).

The Supreme Court in *Reiter v. Sonotone Corporation* analyzed the meaning of "business or property" under the Clayton Act and indicated that "monetary injury, standing alone, may be injury in one's 'property.'" 442 U.S. 330, 340, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979). The *Reiter* court further noted in the most unambiguous terms that "Money, of course, is a form of property." Id. at 338; *see also* Chattanooga Foundry and Pipe Works v. City of Atlanta, 203 U.S. 390, 396, 27 S. Ct. 65, 51 L. Ed. 241 (1906) ("[a] person whose property is diminished by a payment of money wrongfully induced is injured in his property."). Plaintiffs have alleged loss of tax revenue and increased public expenditures as damages in both of their RICO claims. (R. 514 at ¶¶902, 934). "[I]njuries in the form of lost tax revenues and increased law enforcement costs...are at bottom, claims for lost money. Such inherently economic losses constitute injury to 'property' within the meaning of [RICO]." European Community v. RJR Nabisco, Inc., 150 F.Supp.2d 456, 492-93 (E.D.N.Y. 2001) (citing *Reiter*). Moreover, courts have determined that a government entities' loss of tax revenue is a "business or property" interest under RICO. City of New York v. FedEx Ground Package Sys., Inc., 91 F. Supp. 3d 512, 524 (S.D.N.Y. 2015); City of New York v. Gordon, 1 F. Supp. 3d 94, 113 (S.D.N.Y. 2013) (finding the city's complaint alleging lost tax revenue "easily satisfies [RICO's injury to business or property] element); *see also* City of New York v. Smokes-Spirits.com, Inc., 541 F.3d 425, 445 (2d Cir. 2008) ("[L]ost taxes can constitute injury to 'business or property' for purposes **[*83]** of RICO...."), *rev'd on other grounds sub nom.*, Hemi Group, LLC v. City of New York, 559 U.S. 1, 130 S. Ct. 983, 175 L. Ed. 2d 943 (2010) (reversing on lack of proximate cause).

In a criminal action, the Supreme Court held that a government's "right to uncollected excise taxes ... is 'property' in its hands. This right is an entitlement to collect money from petitioners, the possession of which is 'something of value'...." Pasquantino v. United States, 544 U.S. 349, 355-56, 125 S. Ct. 1766, 161 L. Ed. 2d 619 (2005)

[11] The court views the "direct injury" requirement as a consideration in the proximate cause inquiry and, therefore, addresses it below. In re Neurontin Mktg. & Sales Practice Litig., 712 F.3d 21, 36 (1st Cir. 2013) (*citing* Holmes, 503 U.S. at 274 ("our use of the term 'direct' should merely be understood as a reference to the proximate-cause enquiry")); *see also* Wallace v. Midwest Fin. & Mortg. Servs., Inc., 714 F.3d 414, 419 (6th Cir. 2013) (stating that RICO incorporated "many traditional proximate-cause considerations," and that "[o]ne such consideration is directness....").

("Valuable entitlements [to collect excise taxes] are 'property' as that term ordinarily is employed") (*citing* Leocal v. Ashcroft, 543 U.S. 1, 9, 125 S. Ct. 377, 160 L. Ed. 2d 271 (2004) ("When interpreting a statute, we must give words their ordinary or natural meaning" (internal quotation marks omitted); *Black's Law Dictionary* 1382 (4th ed. 1951) (defining "property" as "extend[ing] to every species of valuable right and interest")).

As such, Plaintiffs have alleged a facially plausible claim for injury to their property. Defendants, however, assert that a government entity, when suing as a plaintiff, "cannot rely on expenditures alone to establish civil RICO standing, and there is no indication that the County holds a property interest in the law enforcement or health care services that it provides to the public." Canyon Cty. v. Syngenta Seeds, Inc., 519 F.3d 969, 976, 979 (9th Cir. 2008). (R. 491-1, PageID# 7480-7481; R. 499-1, PageID# 7665-7666)). Defendants, however, have not identified any Supreme **[*84]** Court or Sixth Circuit case directly on point with the facts of this case. Defendants rely almost exclusively on *Canyon County* and argue that RICO precludes the recovery of such government service expenditures. *Id.* This argument, however, is not persuasive on this record.

i. "Business or Property" as Commercial Interests

Canyon County determined that the "business or property language" found in both RICO and in the Clayton Act should be interpreted uniformly. 519 F.3d at 977. The court held to the view that an injury to business or property under the Clayton Act encompasses only "the interests of the [state] as a party to a commercial transaction." 519 F.3d at 977 (acknowledging, however, that courts have "often, though not invariably, interpreted the two statutory provisions in a like manner."); *see also* Welborn v. Bank of New York Mellon Corp., 557 Fed. App'x 383, 387 (5th Cir. 2014) ("When a government sues under the civil RICO statute, the 'business or property' element requires that the injury 'refer to commercial interests or enterprises.'"). The Defendants, however, do not cite any Supreme Court or Sixth Circuit authority explicitly stating that a civil RICO action by a governmental entity is limited to property interests that stem from a commercial transaction or commercial interests. **[*85]**

Indeed, the import of the phrase "business or property" in the Clayton Act context has been construed at one time to be limited to "commercial interests." *See, e.g.,* Hawaii v. Standard Oil Co. of Cal., 405 U.S. 251, 264, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972) ("[T]he words 'business or property,' ... refer to commercial interests or enterprises" and a state may not seek damages for other injuries under the Clayton Act). The language in the *Hawaii* decision was greatly softened by *Reiter*, which also considered the meaning of the phrase "business or property" in the Clayton Act. The *Reiter* Court explained that the *Hawaii* Court's reference to "the phrase 'commercial interests or enterprises,' read [i]n context, in no sense suggests that only injuries to a business entity are within the ambit of [the Clayton Act]." Reiter, 442 U.S. at 339 (finding that Congress' use of the disjunctive in the phrase "business or property" indicates that "'business' was not intended to modify 'property,' nor was 'property' intended to modify 'business.'")[12] The Seventh Circuit Court of Appeals has acknowledged the *Hawaii* decision's interpretation of the "business and property" phrase under the Clayton Act as referring only to commercial interests and competitive injuries, but held that "this is not the case under RICO." Illinois Dep't of Revenue v. Phillips, 771 F.2d 312, 314 (7th Cir. 1985) **[*86]** . Other Circuit decisions also cautioned against reflexively applying the Clayton Act's antitrust principles to RICO. *See, e.g.,* Schacht v. Brown, 711 F.2d 1343, 1357-58 (7th Cir. 1983), *cert. denied sub nom. Arthur Andersen & Co., v. Schacht, 464 U.S. 1002, 104 S. Ct. 508, 104 S. Ct. 509, 78 L. Ed. 2d 698 (1983)*; Bennett v. Berg, 685 F.2d 1053, 1059 (8th Cir. 1982) ("In a RICO context, there are few countervailing reasons to lessen the impact of RICO remedies by imputing the limitations on standing which apply to ***antitrust law***."). The *Schacht* decision noted that "RICO was broadly aimed at 'striking ... a mortal blow against the property interests of organized crime," and, therefore, it was "reluctant to undermine that broad mission of RICO by engrafting onto its civil provisions a competitive injury requirement." 711 F.2d at 1358.

---

[12] The *Canyon County* decision appears to endorse a restrictive reading of *Hawaii* expressly rejected by *Reiter*. "[T]he language of an opinion is not always to be parsed as though we were dealing with language of a statute." 442 U.S. at 341-342 (explaining that a "central premise" in *Hawaii* was a "concern over duplicative recoveries" and noting that the state of Hawaii was essentially trying to recover injuries to the business or property of consumers who could recover their own damage).

ii. Municipal Cost Recovery Rule

Canyon County also applied the municipal cost recovery rule, a tort doctrine developed under state common law, as a basis for concluding the public expenditures alone were insufficient to create RICO standing. *519 F.3d at 974, 979-980*. "The 'municipal cost recovery rule,' also called the 'free public services doctrine,' is a common-law rule which provides that, absent specific statutory authorization or damage to government-owned property, a county cannot recover the costs of carrying out public services from a *tortfeasor* whose conduct caused the need for the services." 32 A.L.R.6th 261 (Originally published in 2008) (emphasis added). Although the Ninth Circuit acknowledged that "we are not dealing with state common law, but with a statutory cause of action created by Congress [RICO]," the court applied the common law tort doctrine. *Id. at 980*. Furthermore, relying on a prior Ninth Circuit decision—*Diaz v. Gates, 420 F.3d 897, 900 (9th Cir. 2005)—Canyon County* found that "[f]inancial loss alone, however, is insufficient" to establish an injury to business or property **[*87]** under RICO "'[w]ithout a harm to a specific business or property interest,'" and that said inquiry is "typically determined by reference to state law." *519 F.3d at 975*.

The Sixth Circuit, however, has expressed a different view, acknowledging that "some role" may exist for state law with respect to the question of "where to set the 'business or property' threshold" in RICO cases, but emphasizing that this question "depends on federal statutory purpose, and that purpose is likely to support a definition that is uniform throughout the country." *Jackson v. Sedgwick Claims Mgmt. Servs., Inc., 731 F.3d 556, 565 (6th Cir. 2013)* (*quoting DeMauro v. DeMauro, 115 F.3d 94, 96-97 (1st Cir.1997))*.[13] The *Canyon County* court opted to apply the state law doctrine barring recovery of municipal costs based on the notion that had "Congress meant to disrupt settled expectations and alter the legislatively-chosen system of funding local government services[,]" and allow treble recovery "under RICO for injuries arising from [the] provision of governmental services[] ...we believe that Congress would have been more explicit." *519 F.3d at 980*.

The Sixth Circuit, in *Jackson*, however has stated:

> Concerns about the scope of RICO are not new. Courts have long recognized that RICO has evolved "into something quite different from the original conception of its **[*88]** enactors," who sought to "supplement old remedies and develop new methods for fighting crime." Nonetheless, the unexpected scope of RICO can largely be attributed to the terms of the statute itself. Congress chose "self-consciously expansive language" when it adopted RICO, defined the "predicate acts" necessary to establish a pattern of racketeering activity broadly, and directed courts to give the statute a liberal construction, Organized Crime Control Act of 1970. As a consequence, courts have frequently rejected arguments that RICO should be given constructions that prevent it from reaching conduct that Congress may not have intended it to reach. "[T]he fact that RICO has been applied in situations not expressly anticipated by Congress does not demonstrate ambiguity. It demonstrates breadth."
> * * *
>
> Another limitation in *§ 1964(c)* that has its origins in the antitrust laws is the requirement that a plaintiff be "injured in his business or property" in order to bring a civil action. While the Supreme Court has yet to definitively interpret this phrase as it appears in *§ 1964(c)*, it has construed it in the context of the antitrust laws. In *Reiter v. Sonotone Corp.*, ... the Court held that "consumers who **[*89]** pay a higher price for goods purchased for personal use as a result of antitrust violations sustain an injury in their 'business or property'" under *§ 4*. In so doing, it rejected the respondents' argument that "the phrase 'business or property' means 'business activity or property related to one's business.'" While conceding the breadth of its ruling that

[13] *See also Miller v. York Risk Servs. Grp., 2013 U.S. Dist. LEXIS 173354, 2013 WL 6442764, at *3 (D. Ariz. Dec. 9, 2013)* (distinguishing between the Sixth Circuit's federal statutory purpose inquiry and the Ninth Circuit's state-law based approach with respect to determining whether there has been a RICO injury to business or property), *adopted*, *2013 U.S. Dist. LEXIS 191271, 2013 WL 11739992 (D. Ariz. Dec. 19, 2013)*.

> "monetary injury, standing alone, may be injury in one's 'property,'" the Court pointed out that "[t]he phrase 'business or property' also retains restrictive significance.

Jackson, 731 F.3d at 563-564 (internal citations omitted).

In addition, the court finds instructive other decisions addressing the scope of the municipal cost recovery rule and declining to find that it creates an absolute shield for chronic wrongdoers engaged in a pattern of conduct that creates great public expense. For example, courts have found an exception when the government's costs are the product of a public nuisance. The Ohio Supreme Court was not persuaded that the municipal cost recovery rule barred Cincinnati's recovery of expenses for police, emergency, health, corrections, prosecution and other related public services, in an action brought against handgun manufacturers, trade associations, **[*90]** and handgun distributors—alleging tort claims of negligence, product liability, and public nuisance. Cincinnati v. Beretta U.S.A. Corp., 95 Ohio St. 3d 416, 2002- Ohio 2480, 768 N.E.2d 1136 (Ohio 2002). The Ohio Supreme Court stated:

> Although a municipality cannot reasonably expect to recover the costs of city services whenever a tortfeasor causes harm to the public, it should be allowed to argue that it may recover such damages in this type of case. Unlike the train derailment that occurred in the *Flagstaff*[14] case, which was a single, discrete incident requiring a single emergency response, the misconduct alleged in this case is ongoing and persistent. The continuing nature of the misconduct may justify the recoupment of such governmental costs. Therefore, if appellant can prove all the elements of the alleged torts, it should be able to recover the damages flowing from appellees' misconduct. Moreover, even the *Flagstaff* court recognized that recovery by a governmental entity is allowed "where the acts of a private party create a public nuisance which the government seeks to abate." Flagstaff, 719 F.2d at 324. We therefore reject the court of appeals' holding that appellant cannot recover its governmental costs.

Id. at 1149-50.

Similarly, in *City of Boston v. Smith & Wesson Corp.*, 2000 WL 1473568 (Mass. Super. Ct. 2000), the court held that said rule did not bar the city's claim **[*91]** to recover law enforcement and emergency services costs against the defendants—firearms manufacturers, distributors, sellers, and firearms industry trade associations. The court distinguished other decisions applying the doctrine, noting as follows:

> What each of these cases has in common is that the acts causing the damage were of the sort the municipality reasonably could expect might occur, and each of the results was a discrete emergency. Fires, fuel spills and ruptured gas mains are all frequent happenings which, while every effort is made to prevent them, can be expected to occur. Train derailments and airplane crashes are more unusual, but not so rare that a municipality can never expect to have to respond to such an emergency. The cases thus stand for the principle that such contingencies are part of the normal and expected costs of municipal existence, and absent legislation providing otherwise are costs to be allocated to the municipality's residents through taxes. In addition, in those cases there is no evidence that the specific defendants had engaged in a repeated course of conduct causing recurring costs to the municipality.

Id. at * 8; *see also* James v. Arms Tech., Inc., 359 N.J. Super. 291, 820 A.2d 27, 48-49 (N.J. App. Div. 2003) ("We do not accept the proposition **[*92]** that [the municipal cost recovery rule's] reasoning should apply in a case such as this, where the City claims a *repeated course of conduct* on defendants' part, requiring the City to expend substantial governmental funds on a continuous basis.")(emphasis added);[15] City of Chicago v. Beretta U.S.A.

---

[14] *Canyon County* relied upon City of Flagstaff v. Atchison, Topeka & Santa Fe Ry. Co., 719 F.2d 322, 324 (9th Cir. 1983). The *Flagstaff* court applied the municipal cost recovery rule, but noted that it does not stand for the proposition that "a governmental entity may never recover the cost of its services. Recovery is permitted where it is authorized by statute or regulation ... or required to effect the intent of federal legislation [or] ... where the acts of a private party create a public nuisance which the government seeks to abate.").

Corp., 213 Ill. 2d 351, 821 N.E.2d 1099, 1145, 290 Ill. Dec. 525 (Ill. 2004) (citing *City of Flagstaff* and noting the public nuisance exception).

When balancing the fact that neither party has identified Supreme Court or Sixth Circuit precedent directly on point, with the Sixth Circuit's emphasis on federal statutory purpose over state-law based property rules and the jurisprudence confirming that the municipal cost recovery rule does not apply to preclude remedying a repeated course of conduct that allegedly injures a governmental plaintiff, the court is not persuaded that it is applicable to the present set of facts. Moreover, the Sixth Circuit has not indicated that it would concur with the Ninth Circuit's decision in *Canyon County* as it relates to the application of said rule.[16] The *Cincinnati v. Beretta* and *City of Boston* decisions declined to apply the doctrine to state law tort claims based on the persuasive reasoning that a doctrine that publicly spreads the costs caused by one-time tortfeasors, **[*93]** such as a negligent driver, is inappropriately applied where a defendant engages in a course of repetitive conduct that causes harm of a substantial magnitude and imposes a repeated burden on government services. In addition, the court declines, in this case, to completely transplant that common law tort doctrine to defeat a claim arising under this federal statute. Doing so to defeat well pleaded allegations of an ongoing pattern of intentional racketeering activity is the antithesis of the construction of RICO that Congress designed it to have.[17]

b. Personal Injuries

The Defendants also argue that RICO's aforementioned limitation to recovery for an injury to "business or property" eliminates recovery for personal injuries or pecuniary damages flowing from such injuries. (R. 491-1, PageID#

---

[15] The court determined the "Municipal Cost Recovery Rule does not apply to cases ... where a municipality seeks to recover damages for the cost of abating a nuisance." Further, it also indicated that "if the City has a worthy claim, application of the Municipal Cost Recovery Rule would leave the City without a remedy." *Arms Tech., Inc., 359 N.J. Super. at 327-28*. The court noted: "[i]f tortious conduct exists, the consequence is that the gun manufacturers are subsidized for their wrongful acts, and the cost of the governmental services must be borne by the taxpayers of the City. This result is fundamentally unfair, given the City's limited resources and strained ability to provide other essential services to its citizens. Application of the rule also serves as a disincentive; if culpable, the insulated defendants have no reason to obtain liability insurance to cover the cost of their conduct, or to take reasonable measures to eliminate, or at least reduce, the harm resulting from the use of their product." *Id. at 328*.

[16] The Sixth Circuit's citations to *Canyon County* in three decisions cannot be construed as endorsing its holding with respect to the "municipal cost recovery rule," as discussion of that doctrine is entirely absent from those cases. *See* *Saia v. Flying J. Inc., 2017 U.S. App. LEXIS 25872, 2017 WL 6398013, at *3 (6th Cir. July 11, 2017)*, *cert. denied*, ***138 S. Ct. 657, 199 L. Ed. 2d 533 (2018)***, *reh'g denied*, ***138 S. Ct. 1182, 200 L. Ed. 2d 328 (2018)***; *Stooksbury v. Ross, 528 F. App'x 547, 555 (6th Cir. 2013)*; *City of Cleveland v. Ameriquest Mort. Sec., Inc., 615 F.3d 496, 504, 506 (6th Cir. 2010)*.

[17] The court also notes that a recent New York supreme court decision addressed whether local governmental entities, who brought suit against opioid manufacturers, were barred from recovering the costs of governmental services by the municipal cost recovery rule. *In re Opioid Litigation, 2018 N.Y. Misc. LEXIS 2428, 2018 WL 3115102 (N.Y. Sup. Ct., Jun. 18, 2018)*. The court found as follows:

> [A] review of the current state of the law revealed no case law supporting the Manufacturers' contention that such rule bars recovery for municipal expenses incurred, not by reason of an accident or an emergency situation necessitating "the normal provision of police, fire and emergency services," but to remedy public harm caused by an intentional, persistent course of deceptive conduct. The Manufacturers' argument that, despite allegations they designed and implemented materially deceptive marketing campaigns to mislead the public and prescribers about the risks and benefits of prescription opioids, **[*94]** the municipal cost recovery rule forecloses the plaintiffs from recovering the costs for services to treat residents suffering from prescription opioid abuse, addiction or overdose, or for the increased costs of programs implemented to stem prescription opioid-related criminal activities, if accepted, would distort the doctrine beyond recognition.

Id. (citations omitted).

7478-7479; R. 499-1, PageID# 7665) (*citing* Doe v. Roe, 958 F.2d 763, 767 (7th Cir. 1992); Jackson, 731 F.3d at 565). The *Jackson* court observed that "those regional circuits that have construed the phrase business or property have uniformly recognized that 'the ordinary meaning of the phrase injured in his business or property excludes personal injuries, including the pecuniary losses therefrom." 731 F.3d at 564-565 (internal quotation marks omitted); *accord* Gucwa v. Lawley, 731 Fed. App'x 408, 412 (6th Cir. 2018) ("Even though personal injuries may lead to monetary damages, such personal injuries and their associated pecuniary losses—including medical expenses—do not confer relief under § 1964(c).").

Plaintiffs do not contest that **[*95]** the law precludes recovering such damages, but rather argue that their "damages claims are not for personal injuries, but police and fire services, lost taxes, revenue and funding." (R. 654, PageID# 15747). They further argue that "[t]he harms that the Manufacturer and Distributor Defendants caused, which also impact the Plaintiffs' revenue-generating function, are direct injuries to their 'business and property.'" *Id.* Plaintiffs deny (and the court does not construe) the complaint as seeking to directly recover for the personal injuries sustained by opioid users/addicts. Nevertheless, the law also bars losses flowing from those personal injuries. Whether Plaintiffs' injuries flow from the personal injuries suffered by their residents is a crucial question in this litigation. Plaintiffs have alleged at least thirteen separate categories of damages with respect to their RICO claims in Counts One and Two. (R. 514, ¶¶902, 934).

The Defendants fail to meaningfully differentiate among the categories, contending they are all derivative of residents' personal injuries. (R. 491-1, PageID# 7478-7479; R. 499-1, PageID# 7665). Without a full record regarding the source of the various categories **[*96]** of damages, the court declines to paint with such a broad brush. While some of the claimed categories of damages may ultimately not survive if it is revealed through discovery that they fall into an area of prohibited recovery, the court cannot find at this preliminary stage in the proceedings that all thirteen categories are unrecoverable. For example, it is highly debatable whether Plaintiffs' costs associated with training emergency personnel and first responders flow from an individual resident's personal injuries. (R. 514 at ¶¶902(c), 934(c)). Even further removed from any personal injuries are Plaintiffs' claimed losses associated with lost tax revenue and diminished property values. *Id.* at ¶¶902(k-n), 934(k-m).[18]

The Sixth Circuit has instructed that a court "may dismiss a complaint for failure to state a claim 'only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations.'" Trollinger, 370 F.3d at 615 (quoting Swierzkiewickz, 534 U.S. at 514). Defendants, as the moving party, have failed to meet their burden of demonstrating that all of Plaintiffs' claimed damages are purely derivative of personal injuries and, therefore, do not constitute an injury to "business **[*97]** or property." For the foregoing reasons, Defendants' motion to dismiss on these grounds is not well taken.

2. Causation

a. "But for" Cause

The Defendants assert that Plaintiffs have plead no facts establishing "but for" causation. (R. 491-1, PageID# 7516-7517; R. 499-1, PageID# 7666-7672, 7683-7684). First, they maintain that Plaintiffs have not alleged what they characterize as the "first step" in the causal chain—"that specific Ohio prescribers were exposed to the Manufacturers' alleged deceptive marketing" or that but for the Manufacturers' purported failure to monitor and report suspicious orders of prescription opioids to DEA Field Division Offices, Plaintiffs would not have suffered the injuries associated with prescription opioid misuse, abuse, and addiction. *Id.* "But since 'we presume that general allegations embrace those specific facts ... necessary to support the claim,'...causal weaknesses will more often be

---

[18] The court's recommendation should not be misconstrued as an affirmative finding that none of Plaintiffs' claimed damages are premised upon pecuniary damages flowing from personal injuries. In addition, to the extent that Plaintiffs seek damages for losses of property value in their communities, such claims may, after discovery, be too speculative. *See, e.g.* Ameriquest, 615 F.3d at 505-506. However, in this case, such arguments are more appropriate after the record has been developed.

fodder for a summary-judgment motion under *Rule 56* than a motion to dismiss under *Rule 12(b)(6)*." *Trollinger, 370 F.3d at 615*.[19]

Further, the complaint's allegations set forth a nationwide campaign targeting physicians throughout the United States to change their prescribing practices based on allegedly false **[*98]** statements and misrepresentations. The complaint alleges that the Marketing Defendants carried out this same marketing scheme in Ohio. (R. 514, PageID# 6966-6969, ¶¶671-683) ("The Marketing Defendants all marketed their products and disseminated their misrepresentations in the state of Ohio."). Plaintiffs also alleged that "sales representatives from each of the Marketing Defendants visited prescribers in Summit County." *Id.* at ¶673.[20] Thus, Defendants' first assertion is rejected.

Moreover, Defendants contend that Plaintiffs failed to allege that if they had reported suspicious orders to DEA, it would have led to enforcement actions and that would have averted prescription opioid diversion and "related societal harms in Summit County." (R. 491-1, PageID# 7516; R. 499-1, PageID# 7684). The court disagrees that Plaintiffs are required to divine the actions that the DEA would have taken had the Defendants properly reported the suspicious orders as alleged or that Plaintiffs would be required to foresee the alternate series of events had such actions been taken. Contrary to Defendants contention, "but-for" causation is rather easily satisfied by the allegations in the complaint. Reading **[*99]** the complaint's averments in favor of Plaintiffs, as required when considering a motion to dismiss, they assert but-for Defendants' allegedly deceptive marketing scheme that changed the way physicians prescribe opioids, coupled with the systemic undermining of quotas and institutional controls as well as the failure to report suspicious orders by both the Marketing and Distributor Defendants, the number of opioids would not have tripled or quadrupled thereby directly giving rise to the opioid epidemic—the costs of which have resulted in Plaintiffs' alleged injuries. Plaintiffs have sufficiently pled that the Defendants' alleged actions were the "but for" cause of their injuries as required by *18 U.S.C. § 1964(c)* and under *Holmes, 503 U.S. at 268*, and *Anza v. Ideal Steel Supply Corp., 547 U.S. 451, 456-61, 126 S. Ct. 1991, 164 L. Ed. 2d 720 (2006)*.

b. Proximate Cause

The Defendants argue that Plaintiffs plead facts that are too attenuated and remote to establish proximate cause. They further contend that the causal chain is broken by: (1) the independent medical judgment of medical professionals who prescribe the opioid products; and (2) third-party criminal acts. (R. 491-1, PageID# 7481-7481; R. 499-1, PageID# 7667-7669). Defendants maintain that Plaintiffs fail to allege a direct relation between their injuries and the **[*100]** conduct of the Defendants. *Id.* Plaintiffs counter that their damages can be properly and efficiently apportioned among the Defendants, that their RICO damages cannot be sought or recovered by *any other party*, and that recovery is necessary to vindicate the purposes underlying RICO and deter future violations. (R. 654, PageID# 15749).

This court cannot say at this early stage of the proceedings that the Plaintiffs' injuries are so remote as to bar any potential recovery. Plaintiffs, local governments, have been impacted by the opioid epidemic. Their injuries, alleged to be caused by the Defendants' conspiracy to dramatically increase the usage and supply of opioids for off-label purposes, to some extent, stem from ills associated with opioid use and/or addiction. The connection between their

---

[19] To the extent Defendants argue that Plaintiffs allegations fail to satisfy *Rule 9(b)*'s pleading requirements, such argument is not persuasive, because courts have recognized that pleadings are sufficient so long as they provide enough detail to put the responding party on notice and enable a response. *See infra* Section III-A-4-a.

[20] To the extent Defendants maintain that Plaintiffs were required to name specific prescribers, this court disagrees. Where the alleged scheme is so broad in scope, no meaningful purpose would be served by merely naming a doctor or several doctors to serve as examples of physicians who were misled by Defendants' marketing scheme. The complaint alleges that Summit County physicians confirmed the existence of the alleged marketing scheme in Summit County. (R. 514 at ¶675). Defendants will certainly have the opportunity to request the identity of these doctors during discovery, and Plaintiffs will need to support their theories with evidence to withstand a motion for summary judgment or persuade the trier of fact.

injuries and the Defendants' alleged racketeering and fraudulent activity is not so attenuated, as their injuries plainly stem from opioid use/abuse and not some possible other source. This court cannot find, absent any discovery, that Plaintiffs' injuries were incidental to the alleged fraud or the oversupply/diversion of opioids. While Defendants' alleged actions caused harm to others (*i.e.* those **[*101]** who became addicted to opioids), the ensuing harm to Plaintiffs—the costs associated with responding to and working to stem the opioid epidemic—cannot be deemed incidental. Taking into consideration Plaintiffs' allegation that as many as 25 percent of patients who receive prescription opioids long-term for chronic pain in a primary care setting become addicted (R. 514 at ¶16), the costs associated with dealing with this surge in addictions cannot be described as incidental but, even if not inevitable in individual cases, it is inescapable in the aggregate.

The Supreme Court has addressed proximate cause under RICO in *Holmes, 503 U.S. at 258*, *Anza, 547 U.S. at 451*, and *Hemi Group LLC, 559 U.S. at 1*. The Manufacturers have asserted that *Anza* is analogous to the case at bar (R. 499-1, PageID# 7665), while the Distributors have asserted that *Hemi* is analogous. (R. 491-1, PageID# 7482-7483). While the court disagrees that any of these decisions are factually analogous to the case at bar, the decisions remain instructive in their application of the *Holmes* factors. The *Holmes* court identified the underlying rationale behind the need for proximate cause as follows: (1) "the less direct an injury is, the more difficult it becomes to ascertain the amount of a plaintiff's **[*102]** damages attributable to the violation, as distinct from other, independent, factors," (2) "recognizing claims of the indirectly injured would force courts to adopt complicated rules apportioning damages among plaintiffs removed at different levels of injury from the violative acts, to obviate the risk of multiple recoveries," and (3) "directly injured victims can generally be counted on to vindicate the law as private attorneys general, without any of the problems attendant upon suits by plaintiffs injured more remotely." *Holmes, 503 U.S. at 268*.

i. Directness

Relying upon *Anza, 547 U.S. at 460* and *Jackson, 731 F.3d at 565*, the Defendants, as discussed above, contend that Plaintiffs' injuries are barred because they are derivative of personal injuries suffered by third-party opioid users. (R. 491-1, PageID# 7479-7479; R. 499-1, PageID# 7665). Unsurprisingly, Plaintiffs respond that their damages were directly caused by the Defendants' actions; and, in addition, argue that the *Holmes* factors analysis weighs in favor of finding sufficient proximate cause at this early stage. The Supreme Court has cautioned that "the infinite variety of claims that may arise make it virtually impossible to announce a black-letter rule that will dictate the result in every **[*103]** case" and its use of "the term 'direct' should merely be understood as a reference to the proximate-cause enquiry ...." *Holmes, 503 U.S. at 274, n. 20* (citations omitted).[21] "The injurious conduct need not

---

[21] Though not a RICO action, the Supreme Court recently addressed proximate cause under the Fair Housing Act (FHA). *Bank of Am. Corp. v. City of Miami, Fla., 137 S. Ct. 1296, 197 L. Ed. 2d 678 (2017)*. Significantly, the Court found that Miami's allegations—that the Defendant banks had discriminated against minorities leading to property tax and municipal spending injuries—arguably fell within the "zone of interests" protected by the FHA. *Id. at 1303*. Further, with respect to proximate cause, despite the fact that Miami's alleged injuries clearly went beyond the "first step" and flowed through individuals who had allegedly been the victims of racially discriminatory lending, the Supreme Court, rather than ordering dismissal, remanded the case for further analysis of proximate cause. *Id. at 1306, 1311* ("The lower courts should define, in the first instance, the contours of proximate cause under the FHA and decide how that standard applies to the City's claims for lost property-tax revenue and increased municipal expenses.") Several lower courts have also noted that the fact that a plaintiff's increased costs/damages "runs through a separate injury" to a third party or parties "does not by itself require dismissal on proximate cause grounds." *Cty. of Cook, Illinois v. Wells Fargo & Co., 314 F. Supp. 3d 975, 2018 WL 1469003, at *6 (N.D. Ill. Mar. 26, 2018)*; *City of Oakland, 2018 U.S. Dist. LEXIS 100915, 2018 WL 3008538 at *1 (N.D. Cal. June 15, 2018)*. Nor does the lack of a direct relationship between the plaintiff and defendant defeat nor necessarily frustrate proximate cause. The Sixth Circuit found there was sufficient directness where there is a "link between the scheme and the type of injury [plaintiff] suffered." *Wallace, 714 F.3d at 420*. "What matters . . . is not whether there is a direct relationship between the plaintiff and defendant, but whether there is a 'sufficiently direct relationship between the defendant's wrongful conduct and the plaintiff's injury . . . .'" *In re Volkswagen "Clean Diesel" Mktg., Sales Pracs., & Prod. Liab. Litig., 2017 U.S. Dist. LEXIS 179652, 2017 WL 4890594, at *9 (N.D. Cal. Oct. 30, 2017)* (citations omitted).

be the sole cause of the plaintiffs' injuries, but there must be 'some direct relation' between the conduct and the injury to sustain a claim." Ray, 836 F.3d at 1349 (*citing* Williams, 465 F.3d at 1287-88; Anza, 547 U.S. at 457).

The first of the *Holmes* factors requires the court to determine how difficult it would be to ascertain which portion of Plaintiffs' damages resulted from Defendants' allegedly unlawful conduct versus damages that may be attributable to other factors or to other parties. First, the court notes that injuries in *Holmes* and *Anza*, unlike the injuries asserted herein, were individualized, while the injury asserted herein is rather aggregative.[22]

Defendants suggest that there are too many possible intervening causes, identifying the "exercise of independent medical judgment" by physicians who acted as "learned intermediaries," as well as "intervening third-party criminal acts." (R. 491-1, PageID# 7483-7484; R. 499-1, PageID# 7669-7670). First, the notion that the physicians cut off the chain of causation ignores pertinent allegations in **[*104]** the complaint. While the complaint alleges that Defendants directly targeted patients with their advertising, the lion's share of the allegations point to a systematic campaign, based on allegedly false statements, that *specifically targeted physicians*. Not only is it alleged that Defendants, through their sales representatives, directly contacted hundreds of thousands of prescribers (R. 514, ¶¶452-455), it is also alleged that Defendants sponsored seminars, influenced medical associations, controlled third-party front groups to maintain the guise of impartiality, and finally directly paid KOLs—all to influence physicians' prescribing decisions and to abolish concern regarding opioid addiction/abuse. (*See generally* R. 514). In other words, the complaint alleges that prescribing physicians were also targets of the misrepresentations. Given these allegations, the court declines to find that the physicians' act of writing prescriptions breaks the causal chain, as a matter of law, when the very purpose of the Defendants' alleged scheme was to achieve exactly that result. The complaint further alleges that the Manufacturers and Distributors conspired to increase opioid sales through trade **[*105]** organizations such as the PCF or HAD; they were in a unique position to recognize the diversion of drugs and did in fact make such a recognition; and they concealed this information despite an obligation to report suspicious orders, all in order to further their supply chain scheme. (R. 514, ¶¶498-593, PageID# 6918-6947). Defendants have no cogent rationale explaining how the prescribing physicians would be an intervening cause with respect to the supply-side allegations.

The court also disagrees that the complaint's RICO claims are rendered deficient by the failure to specifically identify a prescribing physician who relied on Defendants' alleged fraudulent statements. The First Circuit Court of Appeals rejected a similar argument, in *In re Neurontin Litigation*, where the defendants had maintained that "its supposed misrepresentations went to prescribing doctors, and so the causal link to Kaiser [a healthplan provider and insurer] must have been broken." 712 F.3d 21, 37 (1st Cir. 2013). Relying on the Supreme Court's holding in *Bridge*,[23] the circuit court rejected that argument. The court of appeals also rejected the argument that "no physician in this case, or in the Neurontin MDL as a whole, testified that he or **[*106]** she prescribed Neurontin because of defendants' fraudulent off-label marketing," an argument that mirrors Defendants' argument herein. Id. at 29. The court reasoned that plaintiffs had presented "other evidence" of causation to the jury, as well as "evidence as to why such individual [physician] testimony was unreliable."[24] *Id.* In addition, the defendants'

---

[22] In City of Oakland, 2018 U.S. Dist. LEXIS 100915, 2018 WL 3008538, at *1, a district court, when confronted with a proximate cause issue in a claim arising under the FHA, observed that "where damages are aggregative, precision is not expected. Invariably some approximation is required," but noted that "aggregative injury itself does not obviate proximate cause analysis...."

[23] The Supreme Court in Bridge v. Phoenix Bond & Indemnity Co., 553 U.S. 639, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008), held unanimously that a civil-RICO plaintiff does *not* need to show that it *detrimentally relied* on the defendant's alleged misrepresentations. *See also* Wallace, 714 F.3d at 420 ("While reliance is 'often used to prove ... the element of causation,' that does not mean it is the only way to do so, nor does that 'transform reliance itself into an element of the cause of action.'") (*citing Bridge*).

[24] The plaintiffs' primary evidence came from expert testimony from a health economics professor, who used "aggregate data and statistical approaches to link patterns in promotional spending to patterns in prescribing for the drug." 712 F.3d at 30. The expert's regression analysis "found a causal connection between the fraudulent marketing and the quantity of prescriptions

"scheme relied on the expectation that physicians would base their prescribing decisions in part on [their] fraudulent marketing." *712 F.3d at 39*.

Further, the court is unconvinced that Defendants' reliance on *Ind./Ky./Ohio Reg'l Council of Carpenters Welfare Fund v. Cephalon, Inc.* ("*Carpenters*") compels a different result. *2014 U.S .Dist. LEXIS 69526, 2014 WL 2115498 (E.D. Pa. May 21, 2014)*. Defendants focus on the *Carpenters* court's observation that "physician-prescribers are presumed to have knowledge of a drug label's contents." *Id. at *6* (*citing* *In re Schering Plough Corp. Intron/Temodar Consumer Class Action, 678 F.3d 235, 240 (3d Cir. 2012))*. However, the *Carpenters* decision was based on the finding that the allegations in the complaint were general and conclusory, it did not set forth a general rule that a physician's knowledge of a drug label insulates a drug manufacturer or distributor from liability for fraudulent **[*107]** marketing or unlawful distribution practices. *Id. at **6-7*. Defendants make no meaningful attempt to illustrate that the current complaint is similarly defective, beyond making generalized statements of insufficiency. (R. 499-1, PageID# 7675-7680). Conversely, in *In re Epogen, 590 F. Supp. 2d 1282, 1290 (C.D. Cal. 2008)*, a district court held that the plaintiff's RICO claims were essentially trying to "shoehorn allegations that Defendants have engaged in off-label promotion in violation of the FDCA into [a] RICO [action]." Although the claims therein were dismissed—with leave to amend—the court observed that "[t]he existence of the FDCA does not completely preclude injured parties from asserting claims of fraud or false advertising." *Id. at 1290, 1292*. In addition, the court observed that: "[Plaintiffs] *may* bring a RICO claim that is truly based on allegations of mail or wire fraud (in the form of deceptive advertising)....To the extent that Plaintiffs allege that Defendants made false statements or deliberately concealed material facts in order to mislead health care professionals and consumers about the safety of EPO, those claims are viable under RICO." *Id. at 1290* (emphasis in original).

Second, Defendants' statement that third party criminal acts break the chain of causation **[*108]** (R. 491-1, PageID# 7517-7519; R. 499-1, PageID# 7669), even if accepted as true, would fail to break the chain of causation for those damages that were caused by the legal prescription of opioids. The complaint alleges that out of 350,000 fatal overdoes during the relevant time span, more than 200,000 overdoses involved prescribed opioids rather than illicit heroin. (R. 514 at ¶5). It is further alleged that the vast majority of persons who began using heroin in the relevant time period turned to the drug after becoming addicted to prescription opioids.[25] (R. 514 at ¶6). Thus, under the facts pled, the criminal acts involving heroin or the illegal use/trade of legal prescriptions do not, as a matter of law upon consideration of a motion to dismiss, break the chain of causation. Even these actions can to some extent, given the allegations, be attributed and foreseeable to Defendants, who allegedly both flooded the market with opioids and created the demand for them.

Construing the allegations of the complaint as true, the court rejects Defendants' arguments and finds the first factor counsels in favor of proximate cause. The complaint contains sufficiently detailed allegations that a quantifiable **[*109]** causal link existed between Defendants' conduct and the damages suffered by Plaintiffs as a result of the opioid epidemic. The "direct causal connection" requirement has been met, as it is not apparent as a matter of law that "intricate, uncertain" inquiries are required to link the Defendants' alleged conduct to Plaintiffs'

---

written for off-label indications. She also testified as to why Pfizer's proposed physician-by-physician analysis of causation was not a scientifically valid approach to causation." *Id.* The expert testified "as to the well-recognized unreliability in the field of healthcare economics of asking doctors individually whether they were influenced by the many methods of off-label marketing. She said that self-reporting from physicians about patterns of practice that may be controversial shows both conscious reluctance and unconscious bias, which lead them to deny being influenced." *Id.* Although such expert testimony is not before the court, this case cautions against prematurely determining, without a sufficiently developed record, that certain allegations must be present before causation can be determined to have been sufficiently pled. Defendants' reliance on *City of Chicago v. Purdue Pharma, L.P.*, for the proposition that the complaint must specifically identify doctors is misplaced, as the district court was addressing state law claims and found that the plaintiffs failed to allege sufficient detail about the false claims. *2015 U.S. Dist. LEXIS 60587, 2015 WL 2208423, at *14 (N.D. Ill. May 8, 2015)*. Thus, the court finds that the absence "self-reports" from physicians in the complaint is not dispositive. In addition, the court finds the rationale of *In re Neurontin* more compelling.

[25] The court recognizes that overdoses involving prescribed opioids may also include individuals who were not the prescribed user of the drug. The fact that this category may include both illicit users as well as those who were prescribed the opioids in question does not preclude proximate cause or warrant dismissal at this preliminary stage.

injuries. *Anza, 547 U.S. at 460*. Hence, the first of the *Holmes* factor weighs in favor of a finding that proximate cause has been sufficiently plead.

ii. Complexity of Apportioning Damages/Repetitive Recovery

The second *Holmes* factor is perhaps the easiest to apply to the allegations in the present case. Plaintiffs' brief in opposition expressly states that they are *not* attempting to recover any of the following: (1) personal injuries incurred by individuals "suffering as a result of [opioid] over-prescription, overuse, and addiction," (2) funds expended by competitors or non-purchasing customers,[26] or (3) "monies for health insurance plan members required to pay increased health insurance premiums...." (R. 654, PageID# 15755). The court also does not construe the complaint as seeking to recover these costs. Plaintiffs' complaint seeks thirteen categories of damages, which can be summarized **[*110]** into three general categories—(1) public expenditures made in direct response to opioid use and trafficking; (2) reduced tax revenue resulting from that abuse, misuse, and addiction; and (3) losses caused by diminished property values—none of these damages are recoverable by those individuals who became addicted to opioids, as personal injuries. (R. 514 at ¶¶902, 934). These individuals cannot recover from Defendants the public expenditures of Plaintiffs, they cannot claim lost county or municipal tax revenue, and they cannot claim the diminished values of Plaintiffs' property, or the reduced tax income to Plaintiffs. By way of example, if Plaintiffs seek to recover the costs associated with providing police, firefighters or other emergency personnel with Naloxone to block a potentially fatal overdose (*Id.* at ¶902), this cost cannot be claimed by any other entity except Plaintiffs.[27]

Therefore, the second *Holmes* factor also weighs in favor of a finding that proximate cause has been sufficiently pled.

iii. Other Injured Parties Vindicating the Law

The third and final *Holmes* factor is an inquiry into whether more directly injured victims can bring suit. Plaintiffs argue that if their suit **[*111]** is barred "few, if any, victims of the RICO conspiracy will be able to 'vindicate the law as private attorneys general.'" (R. 654, PageID# 15754) (*quoting Holmes, 503 U.S. at 269-270*). Of course, it is too early to determine whether any laws have been violated. Nevertheless, taking the allegations as true, the court agrees with Plaintiffs that no other category of potential plaintiff groups, aside from states and their political subdivisions, can be counted on to vindicate the law in the same manner.[28]

The court again finds *In re Neurontin* instructive. Although the plaintiff therein was an insurer and not a government entity, the court noted that there was no risk of duplicative recovery because "[n]either the individual physicians, nor the [Drug Information Service] members, nor the [Pharmacy and Therapeutics] Committee members—the parties to whom [defendant] directly made its misrepresentations—ever paid anything toward a Neurontin prescription, so there is no risk of multiple recoveries due to a suit by another of those actors." *712 F.3d at 37*. Defendants have not shown that another party would be able to recover for the specific damages Plaintiffs sustained from Defendants' alleged enterprise. The third factor also favors **[*112]** a finding that proximate cause has been sufficiently pled.

---

[26] It is not entirely clear whether Plaintiffs are merely differentiating case law with this statement or disclaiming any interest in monies spent by private providers of emergency services. In any event, it does not meaningfully impact the court's conclusion.

[27] If discovery were to reveal that Plaintiffs routinely assessed these costs to the individuals who required them and/or to their insurers, and that Plaintiffs actually recovered such costs, Defendants would in no way be precluded from arguing that no damages were incurred.

[28] Defendants have stridently asserted that civil RICO damages are unavailable for personal injuries. (R. 491-1, PageID# 7478-7479; R. 499-1, PageID# 7665). In such case, patients, who were inappropriately prescribed opioids and suffered physical or mental injuries as a result, would be precluded from bringing a RICO claim to recover for their personal injuries.

Based on the application of the *Holmes* factors, the court concludes that the connection between Plaintiffs' injuries and the Defendants' alleged scheme—to vastly increase opioid sales by changing physician prescribing practices through fraud coupled with increasing the supply of opioids by failing to report suspicious orders—"is not so indirect, unforeseeable, or illogical that the defendants must prevail as a matter of law." *Wallace, 714 F.3d at 422*.

3. Existence of an Enterprise

"The [RICO] statute does not specifically define the outer boundaries of the 'enterprise' concept but states that the term 'includes any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity.'" *Boyle, 556 U.S. at 944* (citing *§ 1961(4)*). The *Boyle* court recognized that the definition of enterprises was "obviously broad" and ensure[d] that the definition has a wide reach. *Id.* Some structure, however informal, was found to be necessary, because: "it is apparent that an association-in-fact enterprise must have at least three structural features: a purpose, relationships among those associated with the enterprise, **[*113]** and longevity sufficient to permit these associates to pursue the enterprise's purpose." *Id.*

> [A]n association-in-fact enterprise is simply a continuing unit that functions with a common purpose. Such a group need not have a hierarchical structure or a "chain of command"; decisions may be made on an ad hoc basis and by any number of methods—by majority vote, consensus, a show of strength, etc. Members of the group need not have fixed roles; different members may perform different roles at different times. The group need not have a name, regular meetings, dues, established rules and regulations, disciplinary procedures, or induction or initiation ceremonies. While the group must function as a continuing unit and remain in existence long enough to pursue a course of conduct, nothing in RICO exempts an enterprise whose associates engage in spurts of activity punctuated by periods of quiescence.

Id. at 944, 948 (footnotes omitted).

Defendants contend that Plaintiffs have not alleged any facts that could establish the three requisite structural features. (R. 499-1, PageID# 7673-7674, 7685-7686; R. 491-1, PageID# 7490). Specifically, they argue that Plaintiffs have failed to allege that "each defendant had **[*114]** 'some part in directing the enterprise's affairs.'" *Id.* (*quoting* *United States v. Fowler, 535 F.3d 408, 419 (6th Cir. 2008)* (*citing* *Reves v. Ernst & Young, 507 U.S. 170, 179, 113 S. Ct. 1163, 122 L. Ed. 2d 525 (1993))*. Defendants also assert that the complaint fails to allege a "common purpose," and merely alleges profit-seeking activity by competitors. The court disagrees. First, pursuit of profit is not the exclusive province of legitimate commercial endeavors. Second, Plaintiffs clearly allege a vast scheme that had a fundamental overarching purpose—to materially expand prescription opioid use by altering the medical community's prescribing practices of opioids through repeated fraudulent statements and misrepresentations. The Defendants allegedly used front groups and KOLs, as well as their own sales representatives, to spread their false and misleading message. If such a conspiracy is established by the facts, a profit motive would not negate a common purpose. While Defendants would characterize the allegations as alleging merely "a pattern of crimes" "independently and without coordination," (R. 499-1, PageID# 7673), it is alleged that front groups, such as APF, AAPM, and APA, were funded and directed by multiple Defendants to spread their false message under the guise of a neutral third party. (R. 514 at ¶¶357-428). **[*115]**

On the supply side, the Distributors attempt to portray the allegations as establishing no more than "routine business relationships" or "membership in trade organizations." (R. 491-1, PageID# 7491). Defendants' contentions turn a blind eye to allegations that allege much more. It is alleged the PCF and the HDA created a private network where representatives of the Manufacturers and Distributors could form relationships and create alliances and hold strategic business discussions between high-level executives. (R. 514 at ¶¶534-553). Plaintiffs further allege that the Manufacturers and Distributors were "not two separate groups operating in isolation or two groups forced to work together in a closed system," but rather they "operated together as a united entity, working together on multiple fronts, to engage in the unlawful sale of prescription opioids." *Id.* at ¶¶543-546. Though Defendants may have competed over the ever-mushrooming opioid market, that does not shield them from allegations of racketeering activity in furtherance of a scheme to grow that market.

Defendants assert that their mere participation in trade associations is insufficient to form an enterprise. (R. 744, PageID# **[*116]** 17655; R. 746, PageID# 17711). "In *Boyle*, the [Supreme] Court upheld an instruction that allowed a jury to find an association-in-fact enterprise 'form[ed] solely for the purpose of carrying out a pattern of racketeering acts' and instructed that '[c]ommon sense suggests that the existence of an association-in-fact is oftentimes more readily proven by what it does, rather than by abstract analysis of its structure.'" *Ouwinga v. Benistar 419 Plan Servs., Inc., 694 F.3d 783, 794 (6th Cir. 2012)* (*citing* *Boyle, 556 U.S. at 942*). "[A] pattern of racketeering activity may be sufficient in a particular case to permit a jury to infer the existence of an association-in-fact [enterprise]." *Id. at 951*. It is alleged, for example, that the Manufacturers and Distributors used the HDA to jointly increase production quotas, to stymie efforts that would prevent the diversion of opioids, and to coordinate their refusal to report suspicious orders, including those made by direct competitors. (R. 514 at ¶¶545-552). Defendants do not meaningfully explain how these relationships are insufficient as a matter of law. (R. 746).

An inability to describe the exact inner workings of these associations, without the benefit of discovery, is not dispositive at this stage. At the same time, the allegations in the complaint **[*117]** are significantly more detailed than a mere assertion that because the Defendants were members of a trade association that they must have been part of an illicit enterprise. Again, discovery may yield no fruit in this regard, but Plaintiffs should have an opportunity to prove the substance of their allegations.

Finally, Plaintiffs have alleged longevity sufficient to pursue the enterprise's purpose—the 1990s to the present. (R. 514 at ¶¶829, 834).

4. Racketeering Activity

The Defendants argue that Plaintiffs fail to plead any actionable "racketeering activity." (R. 491-1, PageID# 7486-7490; R. 499-1, PageID# 7674-7678, 7686). "RICO takes aim at 'racketeering activity,' which it defines as any act 'chargeable' under several generically described state criminal laws, any act 'indictable' under numerous specific federal criminal provisions, including mail and wire fraud ...." *Sedima, 473 U.S. at 481*. Plaintiffs allege Defendants engaged in mail and wire fraud under *18 U.S.C. §§ 1341* and *1343*. (R. 514 at ¶¶888-890, 911-916).

a. Marketing Enterprise Claim

"When pleading predicate acts of mail or wire fraud, in order to satisfy the heightened pleading requirements of *Rule 9(b)*, a plaintiff must '(1) specify the statements that the plaintiff contends **[*118]** were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent.'" *Heinrich v. Waiting Angels Adoption Servs., Inc., 668 F.3d 393, 404 (6th Cir. 2012)* (*citing* *Frank v. Dana Corp., 547 F.3d 564, 570 (6th Cir. 2008))*. Nevertheless, a RICO plaintiff is *not* required to plead or prove first-party reliance on an allegedly false statement. *See* *Bridge, 553 U.S. at 648*. In addition, "courts have relaxed *Rule 9(b)*'s heightened pleading requirements in cases involving complex fraudulent schemes or those occurring over a lengthy period of time and involving thousands of billing documents." *In re U.S. Foodservice Inc. Pricing Litig., 2009 U.S .Dist. LEXIS 117403, 2009 WL 5064468, at *18 (D. Conn. Dec. 15, 2009)* ("dates, times and places need not be pleaded with absolute precision, so long as the allegations sufficiently put the defendant on notice as to the circumstances of the charged misrepresentations.") (citations omitted); *In re Sumitomo Copper Litig., 995 F. Supp. 451, 456 (S.D.N.Y. 1998)* ("In complex civil RICO actions involving multiple defendants, therefore, *Rule 9(b)* does not require that the temporal or geographic particulars of each mailing or wire transmission made in furtherance of the fraudulent scheme be stated with particularity.").

The Manufacturers assert that the marketing enterprise and supply chain enterprise RICO claims are based entirely on allegations that they fraudulently marketed opioids, but the complaint fails to plead "any such fraudulent marketing **[*119]** anywhere in Summit County as to any Manufacturer Defendant with the particularity required by *Rule 9(b)*." (R. 499-1, PageID# 7678, 7688). They further aver that the so-called "nine categories of misrepresentations" alleged in the complaint do not satisfy the particularity requirements of *Rule 9(b)*. *Id.* at

PageID# 7679. They further contend that Plaintiffs impermissibly rely on the statements of third-parties. *Id.* at PageID# 7681. Plaintiffs point to *Williams v. Duke Energy Intern., Inc.*, wherein the Sixth Circuit Court of Appeals stated:

> [T]his court has held that "[i]t is a principle of basic fairness that a plaintiff should have an opportunity to flesh out her claim through evidence unturned in discovery. *Rule 9(b)* does not require omniscience; rather the Rule requires that the circumstances of the fraud be pled with enough specificity to put defendants on notice as to the nature of the claim." *Michaels Bldg. Co. v. Ameritrust Co., N.A., 848 F.2d 674, 680 (6th Cir. 1988)*. "Especially in a case in which there has been no discovery, courts have been reluctant to dismiss the action where the facts underlying the claims are within the defendant's control." *Id.*

681 F.3d 788, 803 (6th Cir. 2012). A recent decision from this district supports that notion and cautions that "*Rule 9*'s pleading requirement of particularity must be read **[*120]** in harmony with *Rule 8*'s 'policy of simplicity in pleading[.]' [and] ... courts should not be 'too exacting' or 'demand clairvoyance from pleaders' in determining whether the requirements of *Rule 9(b)* have been met." *Ford v. Pa. Higher Educ. Assist. Agency, 2018 U.S. Dist. LEXIS 44549, 2018 WL 1377858 at *4 (N.D. Ohio Mar. 19, 2018)* (Lioi, J.) (citations omitted); *see also* *In re Sumitomo Copper Litig., 995 F. Supp. at 456* ("In cases in which the plaintiff claims that the mails or wires were simply used in furtherance of a master plan to defraud, the communications need not have contained false or misleading information themselves [and] a detailed description of the underlying scheme and the connection therewith of the mail and/or wire communications, is sufficient to satisfy *Rule 9(b)*.") (*citing* *Schmuck v. U.S., 489 U.S. 705, 715, 109 S. Ct. 1443, 103 L. Ed. 2d 734 (1989)*).

Plaintiffs have sufficiently alleged that the Manufacturers engaged in an "Opioid Marketing Enterprise." At a minimum, they have sufficiently alleged that mail and wire communications were a "step in the plot" of the overarching fraudulent scheme.[29] It is alleged that the "[t]he pattern of racketeering activity used by the RICO Marketing Defendants ... likely involved thousands of separate instances of the use of the U.S. Mail or interstate wire facilities in furtherance of the unlawful Opioid Marketing Enterprise, including essentially uniform misrepresentations, concealments **[*121]** and material omissions regarding the beneficial uses and non-addictive qualities for the long-term treatment of chronic, non-acute and non-cancer pain...." (R. 514 at ¶¶839, 840-848). As set forth in the summary above, the complaint details nine categories of specific misrepresentations. It further sets out how the so-called misrepresentations were disseminated, including through speakers' programs, front groups, KOLs, and directly through sales representatives.

Whether these so-called misrepresentations were indeed false or misleading is an issue of fact. Defendants' motion to dismiss demands an untenable level of specificity above and beyond the pleading rules. Plaintiffs cannot be expected to plead the minutiae of their **[*122]** case without the benefit of discovery.[30] Further, the court finds compelling the reasoning of a decision from the Southern District of New York:

---

[29] In *Schmuck, 489 U.S. at 710-711*, the Supreme Court explained that:

> The federal mail fraud statute does not purport to reach all frauds, but only those limited instances in which the use of the mails is a part of the execution of the fraud, leaving all other cases to be dealt with by appropriate state law." To be part of the execution of the fraud, however, the use of the mails need not be an essential element of the scheme. It is sufficient for the mailing to be "incident to an essential part of the scheme," or "a step in [the] plot."

(internal citations and footnotes omitted).

[30] Defendants repeated statement that Plaintiffs have failed to identify even one Summit County prescriber who relied on the misrepresentations is a red herring. Plaintiffs allege that interviews with Summit County doctors have confirmed that Defendants' sales representatives "carried the deceptive messages to local prescribers." (R. 514 at ¶675). Defendants will have ample opportunity to ascertain the identity of these doctors in discovery. The allegation that Ohio is one of the hardest hit states by the opioid epidemic, with 39.5 million opioid doses dispensed in Summit County in 2012 alone for a county-wide population of 540,000, coupled with the allegation that it leads the nation in overdose deaths per capita, when accepted as true, renders hollow any notion that the Defendants' more than a decade long nationwide push to expand prescription opioid use failed to permeate Summit County. *Id.* at ¶¶689, 714-719.

> [I]t is difficult to see any useful purpose in requiring that a RICO complaint specifically allege each mailing in furtherance of a complex commercial scheme, at least where, as here, the complaint alleges that numerous mailings of particular kinds were made in furtherance of the scheme. Once the plaintiff alleges with particularity the circumstances constituting the fraudulent scheme, neither the reputational interests nor the notice function served by *Rule 9(b)* would be advanced in any material way by insisting that a complaint contain a list of letters or telephone calls.

Spira v. Nick, 876 F. Supp. 553, 559 (S.D.N.Y. 1995) (footnotes omitted). Taking into consideration the clandestine nature of the alleged conspiracy to swell the market for opioids by undermining the medical community's apprehension towards prescribing them, it is unsurprising that Plaintiffs cannot connect each dot in the conspiracy without the benefit of discovery, as the evidence necessary to prove their allegations, if it exists, undoubtedly lies primarily in the hands of Defendants. Given the detailed allegations of the complaint, **[*123]** it cannot reasonably be deemed a fishing expedition.

Finally, the Manufacturers' assertion that Plaintiffs are relying on statements made by third parties fails to read the complaint as a whole. (R. 499-1, PageID# 7681-7682). Plaintiffs have alleged that the Manufacturers spent millions of dollars on both advertising as well as direct contact with physicians through sales representatives, through which they spread their alleged misrepresentations concerning the safety and efficacy of opioids; that the Manufacturers created the body of literature to support false assertions; and that so-called third parties were merely front groups or KOLs sponsored and controlled directly by the Manufacturers. (R. 514 at ¶¶442-445, 448-455). Although the veracity of these allegations may be in dispute, they cannot be challenged in a 12(b)(6) motion.

b. Supply Chain Enterprise

i. Mail and Wire Fraud

The Distributors also assert that Plaintiffs have failed to allege with sufficient particularity any predicate acts of mail or wire fraud under RICO. (R. 491-1, PageID# 7486-7487). Without repeating the requirements of mail or wire fraud pleading set forth above, the complaint itself appears to concede that **[*124]** a high level of specificity is lacking, but asserts that "[m]any of the precise dates of the fraudulent uses of the U.S. mail and interstate wire facilities have been deliberately hidden by Defendants and cannot be alleged without access to Defendants' books and records. However, Plaintiffs have described the types of, and in some instances, occasions on which the predicate acts of mail and/or wire fraud occurred." (R. 514 at ¶871). The complaint does broadly aver that the Distributors used the mail and/or the wires to ship the opioids themselves, to seek higher production/procurement quotas, to submit reports to the DEA that contained material omissions and/or misrepresentations, to transmit documents that facilitated the transport of the opioids, to process rebates and chargebacks, to make payments to trade organizations such as the HDA—all while being aware that many of the orders were suspicious, exceeded any reasonable amount for legitimate purposes, and subject to diversion. *Id.* at ¶¶855-877.

Furthermore, all three of the moving Distributors are alleged to have paid millions of dollars in civil penalties and/or settlement agreements with the United States and/or the state of West **[*125]** Virginia involving similar allegations that they failed to report suspicious orders of controlled substances: in 2016 AmerisourceBergen Drug Corporation settled a lawsuit with West Virginia for $16 million (R. 514 at ¶585); in 2016 Cardinal Health, Inc. agreed to pay $44 million to the United States and $20 million to West Virginia (*Id.* at ¶¶584-585); and, in 2017 McKesson Corporation agreed to pay $150 million to the United States. (*Id.* at ¶¶581-582). While the court does not construe any of these allegations as admissions by the Distributors, these facts do bolster the plausibility of Plaintiffs' allegations.

Finally, as stated above, the specific evidence of a conspiracy, if indeed one existed, would lie in the hands of Defendants.

ii. Felonious Manufacture, Importation, Receiving, Concealment, Buying, Selling, or Otherwise Dealing in a Controlled Substance as a Predicate Act

The Defendants also challenge the alleged supply chain enterprise, asserting that Plaintiffs have failed to allege a predicate act under RICO. (R. 491-1, PageID# 7486, 7488-7489; R. 499-1, PageID# 7686-7687). "*Section 1961(1)* [of the RICO Act] contains an exhaustive list of acts of 'racketeering,' commonly referred to as 'predicate **[*126]** acts.'" *Beck v. Prupis, 529 U.S. 494, 497, 120 S. Ct. 1608, 146 L. Ed. 2d 561 at n. 2 (2000)*. Under RICO, "racketeering activity" includes "the *felonious* manufacture, importation, receiving, *concealment*, buying, *selling*, or *otherwise dealing* in a controlled substance or listed chemical (as defined in section 102 of the Controlled Substances Act), punishable under *any law* of the United States." *18 U.S.C. § 1961(1)(D)* (emphasis added). The Manufacturers concede that "certain conduct involving the manufacture and distribution of controlled substances may constitute a predicate act if it is 'punishable by imprisonment for more than one year.'" (R. 499-1, PageID# 7686). They maintain, however, that the alleged "failure to monitor and report suspicious orders amounts to (at most) a violation of *21 U.S.C. § 842(a)(5)*" and is not punishable by more than a year. (R. 499-1, PageID# 7687). Defendants fail to cite any authority that limits Plaintiffs' allegations to *§ 842*, a position not compelled by the plain language of the code.[31] (R. 746, PageID# 17717).

Plaintiffs counter that Defendants' failure to report suspicious orders instead violates *§ 843*, which makes it unlawful to "knowingly or intentionally ... furnish false or fraudulent material information in, or omit any material information from, any application, report, record, or other **[*127]** document required to be made, kept, or filed under this subchapter or subchapter II..." (R. 654, PageID# 15770, *citing 21 U.S.C. § 843(a)(4)(A)*). Such a violation is punishable by up to four years imprisonment. *21 U.S.C. § 843(d)(1)*. Despite the admission in their motion to dismiss that the felonious dealing in a controlled substance constitutes a predicate act, Defendants assert that a violation of *§ 843(a)(4)(A)* would not qualify as a predicate act because it is not specifically enumerated in *§ 1961(1)(D)*.[32] (R. 491-1, PageID# 7488; R. 499-1, PageID# 7694-7695). Without relying on any binding case law to support their argument, Distributors assert that "[v]iolations of *Section 843(a)(4)* do not fall within that language [of *18 U.S.C. § 1961(1)(D)*]" because providing false information or making material omissions does not constitute "buying, selling, or otherwise dealing" in controlled substances. (R. 491-1, PageID# 7488). First, the court is skeptical whether providing false information, as alleged, does not constitute "concealment" or "otherwise dealing in a controlled substance" as Distributors suggest. Second, the court takes note that in making the above assertion, the Distributors completely cut out the provision of *§ 1961(1)(D)* that expressly references "concealment" of a controlled substance and **[*128]** furnishing false information as alleged may constitute concealment. Thus, the plain language of *§ 1961(1)(D)* does not appear to preclude the use of a violation of *§ 843(a)(4)(A)* as a predicate

---

[31] *§ 842* applies to persons who "refuse or negligently fail to make, keep, or furnish any record, report, notification, declaration, order or order form, statement, invoice, or information required under this subchapter or subchapter II...." The complaint alleges intentional conduct that goes well beyond negligence—that Defendants knew about suspicious orders from their own sales representatives and the exacting data they kept but concealed them. (R. 514 at ¶¶554-593).

[32] The Distributors cite one non-binding decision in their argument: *In re Epogen & Aranesp Off-Label Mktg. & Sales Practices Litig., 590 F. Supp. 2d 1282, 1290 (C.D. Cal. 2008)*. (R. 491-1, PageID# 7488-7489). That case, however, is inapposite and contains no discussion at all as to whether a violation of *§ 843(a)(4)(A)* may serve as a predicate act under the language of *§ 1961(1)(D)*. Further, the plaintiff therein alleged RICO liability solely on the basis of off-label marketing relying exclusively on mail and wire fraud as racketeering activities. *In re Epogen, 590 F. Supp. 2d at 1287* ("Plaintiffs allege that Defendants' unlawful promotion of EPO for unsafe, off-label uses constituted a pattern of racketeering activity, including mail and wire fraud."). The district court did hold that "[a]llowing Plaintiffs to proceed on a theory that Defendants violated RICO by engaging in off-label promotion, without specific allegations that Defendants made false or misleading statements, would, in effect, permit Plaintiffs to use RICO as a vehicle to enforce the FDCA and the regulations promulgated thereunder." *Id. at 1289-1290*. Plaintiffs correctly note that "the *In re Epogen* plaintiff did not assert felony predicate acts, claims under the CSA, or the existence of a felony violation of the FDCA." (R. 654, PageID# 15774). Defendants' attempt to portray *In re Epogen* as holding that a felony violation of either the FDCA or the CSA can never serve as a RICO predicate act under *§ 1961(1)(D)* is far too broad and distorts the limited scope of the decision.

act. The argument that *§ 843* is not expressly enumerated as a predicate act by *§ 1961(1)(D)* is untenable, as *§ 1961(1)(D)* does not identify any single, specific section of the United States Code that would constitute a predicate act under the subsection. If Defendants' construction were adopted, the entirety of *§ 1961(1)(D)* would be rendered a nullity.

While Defendants maintain their alleged conduct is more akin to a violation of *§ 842*, the question of whether *§ 842*, *§ 843*, or neither was violated is ultimately an issue of fact that cannot be resolved on a motion to dismiss. Plaintiffs' argument—that the Manufacturers and Distributors, by allegedly suppressing or refusing to identify and report suspicious orders effectively engaged in activity tantamount to "concealment" or "otherwise dealing in controlled substances"—is construed as true at this pleading stage. Thus, Plaintiffs have sufficiently pled a predicate act pursuant to *section 1961(1)(D)* with respect to their supply side RICO theory.

Alternatively, the Manufacturers argue that they "have no duty to monitor, prevent, **[*129]** or report the downstream diversion of prescription opioids at the pharmacy or physician level, where diversion occurs." (R. 499-1, PageID#7687). They maintain that under the "plain text" of *21 C.F.R. § 1301.74(b)*, their duty extends only to monitoring and reporting suspicious orders placed with them *by their direct customers* (*i.e.*, pharmaceutical distributors). *Id.* Plaintiffs counter that such an argument reads words into the text of the CSA and its regulations that do not exist. (R. 654, PageID# 15770). *21 C.F.R. § 1301.74(b)* states:

> The registrant shall design and operate a system to disclose to the registrant suspicious orders of controlled substances. The registrant shall inform the Field Division Office of the Administration in his area of suspicious orders when discovered by the registrant. Suspicious orders include orders of unusual size, orders deviating substantially from a normal pattern, and orders of unusual frequency.

The plain text of the regulation is not so limiting, and does not state that a registrant's obligation to report suspicious orders applies only to orders from its direct customers. Rather, the plain text requires the registrant to report suspicious orders whenever one is "discovered by the registrant." **[*130]** [33] Further, Defendants cite no case law interpreting the provisions of *§ 1301.74(b)* so narrowly. Plaintiffs also fail to cite any authority interpreting the regulation, save for a DEA enforcement action against Mallinckrodt and Mallinckrodt's ensuing admission that "[a]s a registrant under the CSA, [it] had a responsibility to maintain effective controls against diversion, including a requirement that it review and monitor these sales and report suspicious orders to DEA." (R. 654, PageID# 15770, *citing* R. 514 at ¶520). Nonetheless, the onus is on Defendants as the moving party to demonstrate that Plaintiffs fail to state a claim.

For the forgoing reasons, it is recommended that the court deny the motions to dismiss Counts One and Two.

B. Preemption

The Manufacturers argue that all state law claims are preempted, as they conflict with the FDA's decisions regarding approval and labeling of medications. (R. 499-1, PageID# 7689-93).

1. Claims Involving Marketing of Opioids

The Manufacturers portray the complaint as alleging that they falsely represented opioids as safe and effective for the long-term treatment of chronic non-cancer pain. (R. 499-1, PageID# 76989-7690). They argue the FDA has approved this **[*131]** use, which demonstrates that it found "substantial evidence that the drug will have the effect it purports or is represented to have" and that the opioids in question are safe and effective for treating chronic pain. *Id. citing* *21 U.S.C. § 355(d)*. They cite cases holding that state law claims are preempted where a claim would

---

[33] Undoubtedly, a registrant manufacturer would have the most precise information about orders from its direct customers. However, the complaint alleges that the Manufacturers, in concert with the Distributors, collected vast amounts of data that, at least plausibly, led to Defendants' discovery of suspicious orders by parties other than their direct customers.

require a drug manufacturer to make statements about safety or efficacy that differ from what the FDA required. *Id.* (*citing* Rheinfrank v. Abbott Labs., Inc., 680 Fed. App'x 369, 386 (6th Cir. 2017); In re Celexa & Lexapro Mktg. & Sales Practices Litig., 779 F.3d 34, 42-43 (1st Cir. 2015); Utts v. Bristol-Meyers Squibb Co., 251 F. Supp. 3d 644, 663-73 (S.D.N.Y. 2017)).

Conversely, Plaintiffs dispute that their claims are based on allegations that Defendants falsely claimed their medications were "safe and effective for the long-term treatment of chronic non-cancer pain." (R. 654, PageID# 15826). Rather, they insist their allegations revolve around Defendants' "false and misleading promotion of these drugs." *Id.* They argue that there is no preemptive conflict between their state law claims and federal law, because the latter did not require the Manufacturers to misleadingly promote their products. (R. 654, PageID# 15826). Plaintiffs assert that they do not seek to stop the Manufacturers from selling opioids, but only to stop their deceptive marketing. *Id.* Plaintiffs cite cases in support of the proposition that, "because **[*132]** drug manufacturers are under no federal obligation to promote their products, courts have consistently refused to find preemption of fraud-based marketing claims involving FDAapproved drugs even where the manufacturer would be precluded from altering its label (as in the case of generic drugs for which the manufacturer is required to maintain a label identical to the branded equivalent.)" *Id.*, PageID# 15827 (*citing* Arters v. Sandoz Inc., 921 F. Supp. 2d 813, 819-20 (S.D. Ohio 2013) (state law fraud claims based on defendants' allegedly fraudulent or unreasonably dangerous promotion of generic drug were not preempted); Priest v. Sandoz, Inc., 2016 U.S. Dist. LEXIS 186635, 2016 WL 11162903, at *7 (W.D. Tex. Dec. 29, 2016), *report and recommendation adopted*, 2017 U.S. Dist. LEXIS 73278 , 2016 WL 8896188 (W.D. Tex. Jan. 31, 2017) (obligation to refrain from falsely promoting drugs does not make it impossible to comply with federal law regarding labelling); Beavers-Gabriel v. Medtronic, Inc., 2015 U.S. Dist. LEXIS 2522, 2015 WL 143944, at *6 (D. Haw. Jan. 9, 2015) (no impossibility preemption for fraud claims); Elmore v. Gorsky, 2012 U.S. Dist. LEXIS 177793, 2012 WL 6569760, at *3 (S.D. Tex. Dec. 17, 2012)).

The cases upon which Defendants rely are all distinguishable. *Rheinfrank* is inapposite because it was argued the defendant should have added a warning label the FDA had twice refused. 680 Fed. App'x at 384-388. In *In re Celexa*, it was argued that the FDA should not have approved Lexapro, and that defendant should have shared negative efficacy information with the FDA. 779 F.3d at 36-43. Because the FDA had reviewed this information and approved the drug, the state law **[*133]** claim was in conflict with federal law. *Id.* In *Utts*, the plaintiffs' fraud-based claims were preempted, because they alleged a fraud upon the FDA. 251 F. Supp. 3d at 679-680 (*citing* Buckman Co. v. Plaintiffs' Legal Comm., 531 U.S. 341, 350, 121 S. Ct. 1012, 148 L. Ed. 2d 854 (2001) (holding that state law fraud on the FDA claims conflict with federal law and are impliedly preempted)). Herein, the state law claims are not premised upon inappropriate labeling or a fraud upon the FDA, but rather fraudulent marketing in the promotion and sale of their opioids.[34]

At this current stage of the proceedings, Defendants have not met their burden to show that Plaintiffs' claims are preempted.

2. Claims Involving Off-Label Uses

The Manufacturers also argue that claims related to the inappropriate promotion of opioids for off-label uses are preempted. (R. 499-1, PageID# 7689-7691). Preemption is required, they assert, because the FDA is invested with exclusive authority and a variety of enforcement options to address off-label promotion. *Id.* Moreover, the FDCA does not create a private right of action to enforce its provisions. Perdue v. Wyeth Pharms., Inc., 209 F.Supp.3d 847, 851-52 (E.D.N.C. 2016); *see also* McDaniel v. Upsher-Smith Pharms., Inc., 229 F.Supp.3d 707, 713 (W.D. Tenn. 2017).

---

[34] The Manufacturers' reply characterizes Plaintiffs' brief as conceding that various claims are preempted. (R. 746, PageID# 17706-17707). The court does not construe Plaintiffs' brief as abandoning or conceding any of their state law claims as preempted. But after discovery, the Plaintiffs may narrow their claims and Defendants may renew their arguments upon a full record.

Plaintiffs assert they are not suing to enforce FDCA off-label use rules, but rather contend that Defendants misrepresented the risks associated with off-label opioid use. (R. 514, PageID# 6818-6869, **[*134]** ¶¶177-349). They argue that state law claims may proceed on such grounds even where the alleged wrongful conduct might also violate the FDCA. (R. 654, PageID# 15829-15830). Moreover, Plaintiffs assert that state law claims founded on violations of federal law duties are precluded only to the extent that they "exist solely by virtue of" the federal law in question and do not "rely on traditional state tort law." *Buckman, 531 U.S. at 352-353*. They rely upon cases in which state law claims proceeded on such grounds even where the alleged wrongful conduct might also have violated the FDCA. *Id.*; *see also* *Loreto v. Procter & Gamble Co., 515 Fed. App'x 576, 580 (6th Cir. 2013)*; *Desiano v. Warner-Lambert & Co., 467 F.3d 85 (2d Cir. 2006)*, *aff'd sub nom.* *Warner-Lambert Co., LLC v. Kent, 552 U.S. 440, 128 S. Ct. 1168, 170 L. Ed. 2d 51 (2008)*; *Arters, 921 F. Supp. 2d at 819-20*.

The Sixth Circuit, in *Loreto*, indicated that "plaintiffs may not bring a state-law claim against a defendant when the state-law claim is in substance (even if not in form) a claim for violating the FDCA." *515 Fed. App'x 576 at 579*. The *Loreto* court explained its method for distinguishing between state law claims that seek to enforce the FDCA and those that actually arise under state law; only the former are preempted. *Id.* The *Loreto* court noted,

> [T]he conduct on which the claim is premised must be the type of conduct that would traditionally give rise to liability under state law—and that would give rise to liability **[*135]** under state law even if the FDCA had never been enacted. If the defendant's conduct is not of this type, then the plaintiff is effectively suing for a violation of the FDCA (no matter how the plaintiff labels the claim), and the plaintiff's claim is thus impliedly preempted under *Buckman*.

Id. The *Loreto* court found no preemption of a claim that a manufacturer's marketing materials misrepresented the health benefits of vitamin C in its over-the-counter cold remedy, ruling that the claim relied "solely on traditional state tort law predating the FDCA," even though the conduct also violated the FDCA. *Id. at 580*. In *Arters*, it was alleged that the defendants had promoted Amiodarone as a routine treatment, rather than as a drug of last resort. *921 F. Supp. 2d at 819-820*. The court held that claims arising from off-label promotion did not seek to enforce the FDCA, because plaintiff did not allege that defendants violated their duty on the ground that the promotion was off-label, but rather because it was fraudulent. *Id.*

Here, Plaintiffs do not seek to enforce the provisions of the FDCA, instead they allege that Defendants fraudulently and misleadingly promoted their opioids. These allegations are of the type that would traditionally **[*136]** be brought as state law claims and, therefore, are not preempted.

3. Obstacle Preemption

The Manufacturers next argue that Plaintiffs' diversion monitoring theory "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress" under the FDCA. (R. 499-1, PageID# 7691, *citing* *Crosby v. Nat'l Foreign Trade Council, 530 U.S. 363, 372-73, 120 S. Ct. 2288, 147 L. Ed. 2d 352 (2000))*. They frame the allegations as an assertion that the Manufacturers "had a duty not to sell their prescription opioids due to concerns with opioid diversion," and a prayer for damages and an injunction against any further violations. *Id.* at PageID# 7693. Defendants contend that "allowing these claims to proceed would undermine the FDA's decision to make (and keep) [the Manufacturers'] prescription opioids available to the public" and are thus preempted. *Id.* (internal quotation marks omitted).

The complaint cannot be reasonably construed as alleging that Defendants should have stopped selling opioids altogether, but rather alleges that they failed in their duty to prevent or actively concealed opioid diversion and misuse. Plaintiffs contend that their allegations focus on Defendants' "duty to use due care in selling their dangerous products and that they are liable for failing **[*137]** to use such care." (R. 654, PageID# 15832). Plaintiffs further argue that their diversion and monitoring claims are consistent with federal standards of care applicable to the sale of opioids, and thus create no obstacle to the implementation of the FDCA. *Id.*, PageID# 15830-15832.

Federal law preempts state law under the doctrine of obstacle preemption when state law "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress." *Crosby, 530 U.S. at 372-373*. State tort actions related to the sale and marketing of pharmaceuticals raise the specter of obstacle preemption. In *Wyeth v. Levine*, the Supreme Court considered obstacle preemption in the context of a state tort claim alleging that the manufacturer of Phenergan had failed to provide adequate warnings about the risks of injecting the drug. *555 U.S. 555, 129 S. Ct. 1187, 173 L. Ed. 2d 51 (2009)*. The Supreme Court rejected Wyeth's obstacle preemption argument, noting that with limited resources to monitor the 11,000 drugs on the market, the FDA appears to view state tort law as a "complementary" form of drug regulation indicating:

> If Congress thought state-law suits posed an obstacle to its objectives, it surely would have enacted an express pre-emption provision at **[*138]** some point during the FDCA's 70-year history. But despite its 1976 enactment of an express preemption provision for medical devices ... Congress has not enacted such a provision for prescription drugs. See *Riegel v. Medtronic, Inc., 552 U.S., at 327 (2008)* ("Congress could have applied the pre-emption clause to the entire FDCA. It did not do so, but instead wrote a pre-emption clause that applies only to medical devices.") Its silence on the issue, coupled with its certain awareness of the prevalence of state tort litigation, is powerful evidence that Congress did not intend FDA oversight to be the exclusive means of ensuring drug safety and effectiveness. As Justice O'Connor explained in her opinion for a unanimous Court: "The case for federal pre-emption is particularly weak where Congress has indicated its awareness of the operation of state law in a field of federal interest, and has nonetheless decided to stand by both concepts and to tolerate whatever tension there [is] between them." *Bonito Boats, Inc. v. Thunder Craft Boats, Inc., 489 U.S. 141, 166-167, 109 S.Ct. 971, 103 L.Ed.2d 118 (1989)* (internal quotation marks omitted).

Wyeth, 555 U.S. at 574-575 (internal footnotes omitted).

The Manufacturers assert that one of Congress' core objectives in enacting the FDCA was to "ensure that any product regulated by the FDA is safe and effective for its intended use." **[*139]** *FDA v. Brown & Williamson Tobacco Corp., 529 U.S. 120, 133, 120 S. Ct. 1291, 146 L. Ed. 2d 121 (2000)*. They state that courts have consistently "held that this regulatory scheme preempts any state law claim seeking to prohibit drug manufacturers from selling their FDA-approved products as permitted by FDA." *See, e.g. Zogenix, Inc. v. Patrick, 2014 U.S. Dist. LEXIS 51840, 2014 WL 1454696, at *1-2 (D. Mass. Apr. 15, 2014)*; *Gross v. Pfizer, Inc., 825 F. Supp. 2d 654, 659 (D. Md. 2011)* (requiring a drug manufacturer "to stop production of a drug" "would directly conflict with" FDA's "sole authority ... to determine whether a drug may be marked."), *aff'd sub nom. Drager v. PLIVA USA, Inc., 741 F.3d 470 (4th Cir. 2014)*. Both *Zogenix* and *Gross* are distinguishable because they, respectively, involved an attempt to enforce a state regulatory ban on the sale of certain drugs and a challenge to the adequacy of label warnings approved by the FDA. By contrast, Plaintiffs here seek to enforce an alleged state law duty to, for example, monitor the sale of drugs with due care—a claim that is not inconsistent with the purposes of the FDCA, and thus not preempted.

C. Statute of Limitations

Noting that the complaint is based on facts dating back to the 1990s, the Manufacturers assert that applying the most generous of the applicable statute of limitations—the 5-year period for an OCPA claim—would bar claims relying on conduct predating early 2013. (R. 499-1, PageID# 7708-7709). Plaintiffs counter that dismissal based **[*140]** on affirmative defenses at the pleading stage is inappropriate where issues of fact concerning tolling exceptions exist.

Resolving a motion to dismiss based on statute-of-limitations grounds is appropriate when the undisputed facts "conclusively establish" the defense as a matter of law. *Estate of Barney v. PNC Bank, 714 F.3d 920, 926 (6th Cir. 2013)*; *Cataldo v. U.S. Steel Corp., 676 F.3d 542, 547 (6th Cir. 2012)*, *cert. denied, 568 U.S. 1157, 133 S. Ct. 1239, 185 L. Ed. 2d 177 (2013)*. But where there are disputed factual questions, for example "relating to the accrual date, ... claims that the defendant fraudulently concealed facts thereby preventing the plaintiff from learning of its injury, ... and complex issues about whether information in the plaintiff's possession sufficed to alert it of the claim[,]" then a statute of limitations defense is more appropriately addressed in the context of a summary judgment motion or at trial. *Am. Premier Underwriters, Inc. v. Nat'l R.R. Passenger Corp., 839 F.3d 458, 464 (6th Cir. 2016)*; *Lutz v. Chesapeake Appalachia, LLC, 717 F.3d 459, 473-476 (6th Cir. 2013)* (reversing and remanding to the district court to resolve issue of fraudulent concealment). Moreover, parties "are entitled to have their cause tried on the merits if they can prove that the doctrine of fraudulent concealment should be applied to their case." *Jones v. TransOhio Sav. Ass'n, 747 F.2d 1037, 1043 (6th Cir. 1984)* ("We are unprepared to hold, prior to any discovery on the issue, that Appellants can prove no set of facts consistent with these allegations sufficient to toll the statute **[*141]** of limitations.").

The complaint alleges that the fraudulent concealment and continuing violation doctrines extend the applicable limitations periods, because "Defendants were deliberate in taking steps to conceal their conspiratorial behavior and active role in the deceptive marketing and the oversupply of opioids through overprescribing and suspicious sales, all of which fueled the opioid epidemic." (R. 514 at ¶¶770, 767-777). The complaint also alleges that Defendants, including the Manufacturers, purposefully concealed their unlawful conduct while assuring the government and the public that they were complying with applicable laws and cooperating with law enforcement to curb the opioid crisis, thereby, it is alleged, depriving Plaintiffs of any actual or implied notice of potential claims. (R. 514, ¶¶768-777). It further contends that Defendants' wrongful conduct has not ceased, continues to cause Plaintiffs' injuries, that the opioid epidemic continues to spread, and that the resulting claimed injuries are ongoing. *Id.* at ¶¶715, 718, 724, 727, 729, 744, 767-768, 780, 818, 827. These allegations are sufficient to raise a plausible inference that the applicable limitation periods **[*142]** are subject to tolling.

D. Counts Three and Four: Ohio RICO Statute Claims

In Counts Three and Four, Plaintiffs allege a violation of Ohio's Corrupt Practices Act (OCPA), *O.R.C. § 2923.31 et seq.* against the Marketing Defendants and Supply-Chain Defendants respectively. (R. 514, ¶¶939-973). OCPA, sometimes referred to as the "Ohio RICO" statute, is "patterned after" the federal RICO statute.[35] Consequently, Ohio courts look to federal case law applying RICO to determine how to apply OCPA. *O'Rourke, 640 N.E.2d at 240*; *Durrani, 2014 U.S. Dist. LEXIS 32693, 2014 WL 996471, at *8*.

Defendants assert that Plaintiffs' OCPA claims must be dismissed for the same reasons as the federal RICO claims. (R. 491-1, PageID# 7489-7490; R. 499-1, PageID# 7693-7694). Because the court finds Plaintiffs have sufficiently pleaded the former, the court rejects Defendants' argument. Defendants, however, raise an additional argument: to establish a "pattern" of racketeering activity under the OCPA, a plaintiff must allege "at least one incident other than a violation of" federal mail, wire, or security fraud statutes. *O.R.C. § 2923.34(A)*. Plaintiffs do not challenge the existence of such a requirement, but assert they also pleaded "telecommunications fraud," and "felony dealing in controlled substances pursuant to *RICO section 1961(1)(D)*." (R. **[*143]** 654, PageID# 15778). Plaintiffs have alleged a felony violation of the CSA, specifically *§ 843(a)(4)(A)* ("to furnish false or fraudulent material information in, or omit any material information from, any application, report, record, or other document required to be made, kept, or filed under this subchapter or subchapter II..."). *Id.* Defendants contention—that a violation of *§ 843* does not constitute a predicate act—was addressed and rejected above. Thus, Defendants' motion to dismiss the OCPA claims should be denied.

E. Ohio Product Liability Act and Abrogation

The Distributors, joined by the Pharmacies and Manufacturers, argue that Plaintiffs' common law negligence and public nuisance claims, as well as Plaintiffs' statutory public nuisance claim, should be dismissed because they are abrogated by the Ohio Product Liability Act (OPLA), *O.R.C. §§ 2307.71 through 2307.80*. (R. 491-1, PageID# 7492-

---

[35] *See, e.g.*, *Aaron v. Durrani, 2014 U.S. Dist. LEXIS 32693, 2014 WL 996471, at *8 (S.D. Ohio Mar. 13, 2014)* (*citing* *U.S. Demolition & Contracting v. O'Rourke, 94 Ohio App. 3d 75, 640 N.E.2d 235, 240 (Ohio Ct. App. 1994))*.

7496, 7502-7505; R. 497-1, PageID# 7599; R. 499-1, PageID# 7695). OPLA, by its terms, abrogates a significant swath of common law tort litigation. O.R.C. § 2307.71(B) expressly states that "Sections 2307.71 to 2307.80 of the Revised Code are intended to abrogate all common law product liability claims or causes of action." Pursuant to the statute, a product liability claim is defined as follows: **[*144]**

> "Product liability claim" means a claim or cause of action that is asserted in a civil action pursuant to sections 2307.71 to 2307.80 of the Revised Code and that seeks to recover compensatory damages from a manufacturer or supplier for death, physical injury to person, emotional distress, or physical damage to property other than the product in question, that allegedly arose from any of the following:
>
> (a) The design, formulation, production, construction, creation, assembly, rebuilding, testing, or marketing of that product;
>
> (b) Any warning or instruction, or lack of warning or instruction, associated with that product;
>
> (c) Any failure of that product to conform to any relevant representation or warranty.
>
> "Product liability claim" also includes any public nuisance claim or cause of action at common law in which it is alleged that the design, manufacture, supply, marketing, distribution, promotion, advertising, labeling, or sale of a product unreasonably interferes with a right common to the general public.

O.R.C. § 2307.71(A)(13).[36] Thus, there are essentially two types of product liability claims that fall under OPLA's abrogation provisions: (1) product-related causes of action seeking compensatory damages for physical injury or for physical **[*145]** property damage (other than the product in question); and (2) public nuisance-type actions alleging unreasonable interference with a right common to the general public.[37]

1. Abrogation of Negligence Claim

The Distributors argue that Plaintiffs' common law negligence claim is, "at its core, a product liability claim—precisely the kind of claim abrogated by the OPLA." (R. 491-1, PageID# 7504, *citing* Volovetz v. Tremco Barrier Sols., Inc., 2016- Ohio 7707, 74 N.E.3d 743, 753 (Ohio. Ct. App. 2016) (stating courts look to "[t]he essential nature of the substantive allegations of the plaintiff's claim, not the artificial label attached to the claim")). Plaintiffs argue that their negligence claim is not abrogated because they do not seek compensation for physical injuries caused by Defendants' products, but rather "to recover for economic harms inflicted on their communities by Defendants' conduct in marketing and distributing their products." (R. 654, PageID# 15799). Plaintiffs' negligence action does not implicate a Type 2 product liability claims, as it does not allege an unreasonable interference with a right common to the general public. It does, however, potentially implicate a Type 1 product liability claim, as Plaintiffs do not challenge that their action involves the "design, formulation, **[*146]** production, construction, creation, assembly, rebuilding, testing, or marketing of that product." O.R.C. § 2307.71(A)(13)(a). Nevertheless, Plaintiffs assert that OPLA divides compensatory damages into two distinct categories: "harm" and "economic loss." (R. 654, PageID# 15798). They maintain that only claims for "harm" constitute "product liability claims" under OPLA, whereas, "claims solely for 'economic loss' are expressly exempted from the statute and remain available at common law." *Id.* The complaint alleges Defendants breached their duties resulting in "economic damages including, but not limited to, significant expenses for police, emergency, health, prosecution, corrections, rehabilitation, and other services," as well as "non-physical property damage, and damage to its proprietary interests."[38] (R. 514 at ¶¶1062-1063). Thus, the dispositive issue is whether Plaintiffs' negligence action seeks to recover damages for a loss defined as "harm" by OPLA.

---

[36] The last paragraph emphasizing the inclusion of public nuisance claims was added by amendment and went into effect on August 1, 2007. State ex rel. Ohio Gen. Assembly v. Brunner, 115 Ohio St. 3d 103, 2007- Ohio 4460, 873 N.E.2d 1232, 1235 (Ohio, 2007).

[37] For the sake of brevity, these will be referred to as "Type 1" and "Type 2" product liability claims respectively.

[38] Though Plaintiffs allege an unreasonable interference with a right common to the general public with their common law public nuisance claim, pleading in the alternative is permissible.

The statute also clarifies that injuries defined as "harm" do not constitute "economic loss" under OPLA, *O.R.C. § 2307.71(A)(2)*. OPLA defines "economic loss" as "direct, incidental, or consequential pecuniary loss, including, but not limited to, damage to the product in question, **[*147]** and nonphysical damage to property other than that product." *Id.* Damages that fall into this category are excluded from the definition of "harm." *O.R.C. § 2307.71(A)(7)*. Type 1 product liability claims encompass claims for compensatory damages for death, physical injury to person, emotional distress, or physical damage to property other than the product in question—the same categories of injuries defined as "harm" by *O.R.C. § 2307.71(A)(7)*.

These distinctions are crucial with respect to Type 1 actions, as another section of OPLA states that: "Any recovery of compensatory damages for economic loss based on a claim that is asserted in a civil action, *other than a product liability claim*, is not subject to *sections 2307.71 to 2307.79* of the Revised Code, but may occur under the common law of this state or other applicable sections of the Revised Code." *O.R.C. § 2307.72(C)* (emphasis added). Because civil actions that implicate Type 1 product liability only fall within OPLA's ambit if they allege harm, a claim for solely economic loss by its very definition excludes harm and is not abrogated. This natural reading of the statutory language was confirmed by an Ohio Supreme Court decision, which predated the 2007 amendment:

> [*O.R.C. §] 2307.72* makes it clear that although a cause of action may concern **[*148]** a product, it is *not a product liability claim* within the purview of Ohio's product liability statutes *unless it alleges damages other than economic ones*, and that a failure to allege other than economic damages does not destroy the claim, but rather removes it from the purview of those statutes.

LaPuma v. Collinwood Concrete, 75 Ohio St. 3d 64, 1996 Ohio 305, 661 N.E.2d 714, 716 (Ohio 1996) (emphasis added); *Volovetz, 74 N.E.3d at 752* (acknowledging *LaPuma*'s holding in a footnote, but finding that plaintiff's negligence claim was barred because it sought recovery for compensatory damages stemming from physical damage to property).

Because Plaintiffs' negligence claim seeks only damages for non-physical property damage and expenses related to governmental expenditures, it is not abrogated by OPLA to the extent it seeks recovery solely for economic loss and not for harm.[39]

2. Abrogation of Public Nuisance Claims

Plaintiffs' Fifth ("Statutory Public Nuisance") and Sixth ("Common Law Absolute Public Nuisance") Claims for Relief allege that Defendants created and maintained a public nuisance in the marketing and distribution of prescription opioids. (R. 514 at ¶¶974-1038). Defendants assert that Plaintiffs' public nuisance claims are abrogated by OPLA and can only be brought as product liability claims under **[*149]** OPLA, if at all.[40] (R. 491-1, PageID# 7492-7496). OPLA was amended in 2007 to expressly include in the definition of a "product liability claim" "any public nuisance claim or cause of action at common law in which it is alleged that the design, manufacture, supply, marketing, distribution, promotion, advertising, labeling, or sale of a product unreasonably interferes with a right common to the general public." *O.R.C. § 2307.71(A)(13)*.

a. Application to Statutory Public Nuisance Claim

---

[39] Defendants argue that framing Plaintiffs' injury as economic loss elevates form over substance, and that the personal injury to the users of opioids is the gravamen of the claim. (R. 744, PageID# 17663-17664). The court cannot find, without the benefit of any factual discovery, that *all* of Plaintiffs' claimed injuries stem from death, physical injuries, or physical damage to property.

[40] "Claims that are authorized by the Ohio Products Liability Act should be pled with reference to the applicable provision of the Act." *Greenway v. Kimberly-Clark Corp., 2016 U.S. Dist. LEXIS 82446, 2016 WL 3460229, at *2 (N.D. Ohio June 24, 2016)* (citations omitted).

Defendants contend that the reference to "*any* public nuisance claim" abrogates both common law *and* statutory public nuisance claims (R. 744, PageID# 17658-17659), while Plaintiffs contend that statutory public nuisances are not abrogated because the phrase "at common law" in the statute modifies both "public nuisance claim" and "cause of action." (R. 654, PageID# 15729). Under Ohio law, "[t]o determine the intent of the legislature," a court must "first look to the plain language of the statute," and if it is "plain and unambiguous," the statute should be applied as written. *State v. Gordon, 153 Ohio St. 3d 601, 2018-Ohio-1975, 109 N.E.3d 1201, 2018 WL 2356650, at *2 (Ohio May 23, 2018)* (citations omitted). The court finds the phrase "any public nuisance claim or cause of action at common law" to be ambiguous. Accordingly, the court looks **[*150]** to the legislative history, which notes:

> SECTION 3. The General Assembly declares its intent that the amendments made by this act to *sections 2307.71* and *2307.73* of the Revised Code are not intended to be substantive but are intended to clarify the General Assembly's original intent in enacting the Ohio Product Liability Act, *sections 2307.71 to 2307.80* of the Revised Code, as initially expressed in Section 3 of Am. Sub. S.B. 80 of the 125th General Assembly, to abrogate all common law product liability causes of action *including common law public nuisance causes of action, regardless of how the claim is described, styled, captioned, characterized, or designated*, including claims against a manufacturer or supplier for a public nuisance allegedly caused by a manufacturer's or supplier's product.

2006 Ohio Laws File 198 (Am. Sub. S.B. 117) (emphasis added).

Given that the legislature explained it intended to abrogate "*common law* public nuisance causes of action," the court agrees with Plaintiffs' statutory construction. Therefore, Plaintiffs' *statutory* public nuisance claim in Count Five is not abrogated by OPLA.

b. Application to Common Law Absolute Public Nuisance Claim

Despite asserting that the 2007 amendment to OPLA intended to abrogate common law public **[*151]** nuisance actions, Plaintiffs aver that their self-styled "common law absolute public nuisance claim" is not abrogated by OPLA because their claim is an "equitable nuisance" claim. (R. 654, PageID# 15729). Plaintiffs rely on an observation from the Ohio Supreme Court in *State ex rel. Miller v. Anthony* that an abatement action was "not a common law action, but a summary proceeding more in the nature of a suit in equity." *72 Ohio St. 3d 132, 1995- Ohio 39, 647 N.E.2d 1368, 1371 (Ohio 1995)* (*quoting* *Cameron v. United States, 148 U.S. 301, 304, 13 S. Ct. 595, 37 L. Ed. 459 (1893))*. The court does not construe the *dicta* from this decision as an affirmative finding that an absolute public nuisance claim is not a common law cause of action within the meaning of OPLA.[41] Moreover, "the distinction between legal and equitable claims [has been] abolished." *Hodges v. Ettinger, 127 Ohio St. 460, 189 N.E. 113, 115, 39 Ohio L. Rep. 653 (Ohio 1934)*. Finally, numerous courts, including a recent decision of the Sixth Circuit Court of Appeals, have recognized that an absolute public nuisance claim in Ohio is a common law action.

> Under Ohio law, *a common law public nuisance* is "an unreasonable interference with a right common to the general public." Examples of such rights, from Ohio and elsewhere, include: a right of public passage (e.g., obstruction of highways); a right to use public space (e.g., pollution of fisheries); a right to navigable **[*152]** waterways (e.g., obstruction of public streams); a right to public health (e.g., exposure to diseased animals); a right to public safety (e.g., negligent marketing/sale of dangerous weapons); a right to public morality (e.g., houses of ill-repute); a right to public peace (e.g., excessive noise); and a right to public comfort (e.g., excessive odors or fumes).

---

[41] Notably, *State ex rel. Miller* did not involve an absolute public nuisance action, but instead considered whether a nuisance abatement action brought pursuant to statute—*O.R.C. § 3719.10*—required a jury trial under Ohio's constitution. The court concluded that a jury trial was not required because "the nuisance abatement provisions of R.C. Chapter 3767 are equitable in nature and not created by common law." *647 N.E.2d at 1371*. Thus, it appears the court was focused on the equitable nature of the abatement remedy. Furthermore, by Plaintiffs' logic, the statutory-based nuisance action in *State ex rel. Miller* would not be considered a statutory nuisance claim simply because the court characterized the remedy as equitable in nature. The court declines to elevate form over substance.

> *Ohio law recognizes two types of public nuisances: qualified and absolute*. A qualified public nuisance mirrors a negligence tort.... An absolute public nuisance, sometimes called nuisance per se, comes in two forms, one requiring more evidence of intent (akin to an intentional tort), the other requiring less (akin to a strict liability tort). The action thus requires either the "intentional" creation of a public nuisance or "an abnormally dangerous condition that cannot be maintained without injury to property, no matter what care is taken."

City of Cincinnati v. Deutsche Bank Nat'l Trust Co., 863 F.3d 474, 477 (6th Cir. 2017) (emphasis added); *see also Cleveland v. JP Morgan Chase Bank, N.A., 2013-Ohio-1035, 2013 WL 1183332, at *3 (Ohio Ct. App Mar. 21, 2013)* (describing a public nuisance claim as a common law tort action used to vindicate interference with a general public right); *Brown v. Scioto Cty. Bd. of Commrs., 87 Ohio App. 3d 704, 622 N.E.2d 1153, 1158 (Ohio Ct. App. 1993)* (describing the common law elements of a public nuisance claim and recognizing that, in addition, there are also statutorily defined public **[*153]** nuisances).

Plaintiffs concede that a public nuisance claim, which they label as an "equitable" action, requires an unreasonable interference with a right common to the general public. (R. 654, PageID# 15719). The Sixth Circuit ascribed the same elements to common law public nuisance claims under Ohio law. *Deutsche Bank Nat'l Trust Co., 863 F.3d at 477*. These are identical causes of action that are not derived from statute. Under Plaintiffs' reasoning, common law public nuisance claims essentially do not exist in Ohio, because public nuisance claims are properly designated as suits arising in equity. Such a conclusion is untenable, as it would render the Ohio Legislature's 2007 amendment a nullity.[42] Furthermore, Plaintiffs' argument is contrary to the only Ohio decision that appears to have squarely addressed the operation of the 2007 amendment. *See City of Toledo v. Sherwin-Williams Co., 2007 Ohio Misc. LEXIS 5632, 2007 WL 4965044 (Ohio C.P. December 12, 2007)* (finding that plaintiff's public nuisance claim was "expressly subsumed by the OPLA"). Thus, the court finds that Plaintiffs' absolute public nuisance claim constitutes a common law public nuisance claim and, therefore, falls within the purview of OPLA.

However, Plaintiffs raise an additional argument as to why their absolute public nuisance claim **[*154]** should not be construed as abrogated by OPLA—that the 2007 amendment that added the Type 2 product liability claims definition should be read as covering only those public nuisance actions that seek compensatory damages defined as harm elsewhere in the statute. (R. 654, PageID# 15730). This argument is similar to Plaintiffs' argument above with respect to OPLA's inapplicability to their negligence claim. Plaintiffs' argument here is contrary to the plain language of the statute. *O.R.C. § 2307.71*, as amended, abrogated Type 2 claims—public nuisance claims alleging that "the design, manufacture, supply, marketing, distribution, promotion, advertising, labeling, or sale of a product *unreasonably interferes with a right common to the general public*." (emphasis added). Notably absent from the Type 2 product liability definition is the language contained in Type 1 claims that apply only to actions seeking compensatory damages for "death, physical injury to person, emotional distress, or physical damage to property other than the product in question" (*i.e.* "harm"). *O.R.C. § 2307.71(A)(13)*. Thus, the distinction between harm and economic loss is conspicuously absent in the Type 2 definition of product liability claims.[43] Therefore, **[*155]** the issue of whether Plaintiffs' damages under its public nuisance theory are properly categorized as economic loss is immaterial.

---

[42] In other words, Plaintiffs contend that non-statutory public nuisance actions in Ohio are equitable actions not common-law actions, and the 2007 amendment applies only to common law public nuisance actions. Such a result would completely frustrate the Ohio Legislature's clear intent to abrogate common-law public nuisance actions, as the amendment would have no applicability.

[43] The argument that the harm requirements of Type 1 claims should be bootstrapped to Type 2 claims is not well taken. As noted above, the court should apply the plain language of the statute where it is unambiguous. Although this court above found that the statute was ambiguous with respect to the question of whether the term "common law" modified both the phrase "any public nuisance claim" and "cause of action," the decision not to include the preexisting language from the Type 1 definition into the Type 2 definition speaks volumes. Had the legislature intended such limiting language in the application of OPLA as it relates to public nuisance claims, it could easily have repeated the language contained in the Type 1 definition. It opted not to do so. It is also telling that the Type 2 definition was not made a subsection of the Type 1 definition, revealing a clear intent to create an alternative or additional definition of a "product liability claim."

Consequently, O.R.C. § 2307.72(C), which states that "[a]ny recovery of compensatory damages for economic loss based on a claim that is asserted in a civil action, *other than a product liability claim*, is not subject to [OPLA]...." is also inapplicable. The Ohio Supreme Court's holding in *LaPuma* interpreted OPLA as it existed in 1996; it did not create a judicial rule exempting product liability claims if they asserted only economic loss. 661 N.E.2d at 716. Before the 2007 amendment, only the Type 1 definition of product liability claims existed, and the definition expressly excluded claims for economic loss rather than harm. This distinction was not maintained with respect to the Type 2 definition. Therefore, Plaintiffs' argument—that its absolute public nuisance claim is not abrogated because it seeks to recover only economic loss—does not exempt its common law public nuisance claim from OPLA. It is recommended that Count Six be dismissed.

F. Count Five: Statutory Public Nuisance

Count Five alleges a statutory public nuisance against all Defendants. (R. 514, PageID# 11208). It seeks "abatement, **[*156]** recovery of abatement costs, injunctive relief, and to prevent injury and annoyance from any nuisance," as well as "all other legal and equitable relief as allowed by law." *Id.* at ¶¶995-996.

The Pharmacies and Distributors assert that, among the Plaintiffs, only the Summit County Prosecutor may maintain a statutory public nuisance action brought pursuant to O.R.C. §4729.35. (R. 491-1, PageID# 7501; 497-1, PageID# 7608-7609; R. 742, PageID# 17613-17615). In addition, the Distributors and Manufacturers assert that Plaintiffs' remedies for a statutory public nuisance are limited to an injunction. (R. 491-1, PageID# 7501-7502; R. 499-1, PageID# 7700, n. 39). This latter argument does not provide a basis for dismissal. While the category of damages recoverable may be a legal issue proper for the court's consideration, Defendants have not identified any authority supporting their proposed statutory construction. *Id.*

1. Ohio Rules of Statutory Interpretation and Applicable Laws

First, under the express rules of Ohio statutory construction, a court should construe various statutes in harmony unless their provisions are irreconcilably in conflict:

> If a general provision conflicts with a special or local provision, **[*157]** they shall be construed, if possible, so that effect is given to both. If the conflict between the provisions is irreconcilable, the special or local provision prevails as an exception to the general provision, unless the general provision is the later adoption and the manifest intent is that the general provision prevail.

O.R.C. §1.51; *see also* United Tel. Co. v. Limbach, 71 Ohio St. 3d 369, 1994- Ohio 209, 643 N.E.2d 1129, 1131 (Ohio 1994) ("All provisions of the Revised Code bearing upon the same subject matter should be construed harmoniously. ... [and] in the interpretation of related and co-existing statutes must harmonize and give full application to all such statutes unless they are irreconcilable and in hopeless conflict.") (citations omitted).

The following Ohio statutes address the issue of public nuisance and are relevant to the court's discussion. First, Chapter 3767 of the Ohio Revised Code addresses nuisances generally, and gives several definitions of a nuisance, including the following: "That which is defined and declared by statutes to be a nuisance." O.R.C. § 3767.01(C)(1). A separate chapter of the Ohio Revised Code, dealing with occupations and professions, identifies one such public nuisance:

> The violation by a pharmacist or other person of any laws of Ohio or of the United States of America or of any rule of the board of pharmacy **[*158]** controlling the distribution of a drug of abuse as defined in section 3719.011[44] of the Revised Code or the commission of any act set forth in division (A) of section 4729.16 of the Revised Code, is hereby declared to be inimical, harmful, and adverse to the public welfare of the citizens of

[44] O.R.C. §§ 3719.01(R) & 3719.011 define opiate as "a drug of abuse."

> Ohio and to constitute a public nuisance. The attorney general, the prosecuting attorney of any county in which the offense was committed or in which the person committing the offense resides, or the state board of pharmacy may maintain an action in the name of the state to enjoin such person from engaging in such violation. Any action under this section shall be brought in the common pleas court of the county where the offense occurred or the county where the alleged offender resides.

O.R.C. §4729.35. Returning to the general chapter on nuisances, *O.R.C. § 3767.03* states that: "[w]henever a nuisance exists," an authorized party[45] "may bring an action in equity in the name of the state ... to abate the nuisance and to perpetually enjoin the person maintaining the nuisance from further maintaining it."

2. Available Remedies

Defendants assert that any violation of *O.R.C. § 4729.35* limits Plaintiffs' recovery to injunctive relief and that abatement costs are unrecoverable. (R. 491-1, **[*159]** PageID# 7501-7502; R. 499-1, PageID# 7700). However, Defendants' argument—that *O.R.C. § 4729.35*'s provision that an authorized individual "may maintain an action in the name of the state to enjoin" a public nuisance is tantamount to a limitation on the remedies available—is an untenable interpretation of the plain text of the statute. Nothing in this statute can reasonably be construed as addressing or expressly limiting the categories of relief available for the nuisance. Rather, it identifies and defines a public nuisance, identifies who may bring the action to enjoin a nuisance, and finally where the claim should be brought. Further, Defendants' interpretation of the remedies available for a violation of *O.R.C. § 4729.35* is not supported by any authority cited in their briefs.

Finally, Defendants' interpretation of *O.R.C. § 4729.35* contravenes Ohio's laws on statutory construction, as stated above, that require a court to construe statutes so as to give effect to both the special and general provisions, and to construe all provisions of the Revised Code bearing upon the same subject as being in harmony. Defendants' construction does the opposite—it manufactures a conflict where none exists on the face of the statute. Because *O.R.C. § 4729.35* **[*160]** is silent as to what remedies are available and the more general statute explains that an action seeking to abate a nuisance is equitable in nature, the court declines to recommend limiting the recovery or remedies available for a violation of *O.R.C. § 4729.35* from what is typically recoverable in public nuisance actions.

3. City of Akron's Authority to Bring Public Nuisance Suit

Turning to the argument that the City of Akron is barred from bringing a nuisance claim, Defendants assert that *O.R.C. § 4729.35* limits the authority for bringing an action to enjoin a violation of Ohio or federal drug laws to the state attorney general, the county prosecutor of the county in which the offense occurred, and the state board of pharmacy. Plaintiffs' contention that the City of Akron may, nevertheless, maintain a nuisance action for an ostensible violation of federal or Ohio drug laws based on other more generalized nuisance statutes flies in the face of the another portion of the Revised Code that they specifically rely upon—*O.R.C. §1.47* ("In enacting a statute, it is presumed that: (B) The entire statute is intended to be effective").[46] Plaintiffs' position—that municipalities could

---

[45] *O.R.C. § 3767.03* includes a significantly broader list of authorized parties who may maintain a public nuisance action than *O.R.C. § 4729.35*, as it includes the attorney general, the village solicitor, the city or township law director, the county prosecutor, or any person who is a citizen of the county in which the nuisance exists so long as the action is brought in the name of the state. The ramifications of this discrepancy is addressed below.

[46] Plaintiffs also rely on *O.R.C. § 715.44*, which states as follows:

A municipal corporation may:

> (A) Abate any nuisance and prosecute in any court of competent jurisdiction, any person who creates, continues, contributes to, or suffers such nuisance to exist;

maintain a statutory public nuisance action for violation **[*161]** of a state or federal drug law—would eviscerate the express statutory provision limiting who can bring suit. Plaintiffs' reliance on *State ex rel. DeWine v. Fred's Party Center, Inc., 2014- Ohio 2358, 13 N.E.3d 699 (Ohio Ct. App. 2014)* is misplaced. (R. 654, PageID# 15726). Therein, not only was the suit brought by the Ohio Attorney General, but the court's passing reference to *O.R.C. § 4729.35* in a footnote neither states nor implies that any party, other than the attorney general, the county prosecutor, or the board of pharmacy is vested with authority to bring an action under that statute. *Id.* at n. 1. Although *O.R.C. § 4729.35* is not the exclusive avenue for a municipal plaintiff to bring a public nuisance claim, the City of Akron cannot claim that the very nuisance it seeks to abate is the one caused by a violation of Ohio or federal drug laws, as set forth in *O.R.C. § 4729.35*, but then attempt to circumvent the limitations on who may bring such a suit as set forth in the same statute simply by claiming to rely on a different portion of the Revised Code. In the complaint, Plaintiffs, including the City of Akron, clearly identify the public nuisance they seek to enjoin as violations of Ohio or federal drug laws (or the rules of the board of pharmacy). (R. 514, PageID# 7068, ¶¶979, 983-984, 986, 988). As such, the City of Akron **[*162]** lacks standing to pursue a statutory public nuisance claim based on violations of Ohio or federal drug laws, or the rules of the board of pharmacy.

4. Sufficiency of the Factual Allegations

The Manufacturers argue that Plaintiffs' statutory nuisance claim should be dismissed for failure to allege facts demonstrating a statutory violation. *See* *Brown, 622 N.E.2d at 1158* (explaining that Ohio statutes and regulations that define certain conduct as being a public nuisance "amount to a legislative declaration that the proscribed conduct is an unreasonable interference with a public right"); *O.R.C. § 3767.01(C)(1)* (defining "nuisance" as "that which is defined and declared by statutes to be a nuisance"). The Manufacturers' statement that they "have complied with all relevant federal and state controlled substances requirements" (R. 499-1, PageID# 7702) is merely an assertion of fact that is disputed by Plaintiffs and does not support dismissal at this stage. They also contend that the alleged violations of Ohio law apply **[*163]** only to distributors and not to pharmaceutical manufacturers. (R. 499-1, PageID# 7700-7701; R. 746, PageID# 17724-17725). Plaintiffs state that certain other laws and rules governing the distribution of controlled substances do apply to the Manufacturers' alleged conduct, including those requiring them to maintain diversion controls and to create a system to disclose suspicious orders, report such orders, and adhere to sales quotas set by the DEA. (R. 654, PageID# 15726-15728, *citing* R. 514 at ¶¶504, 507, 510, 863, 915, 961). The complaint alleges that all Defendants have aided and abetted the violation of federal and state laws controlling the distribution of a drug of abuse as defined in *O.R.C. § 3719.011*.[47] (R. 514 at ¶¶981-986).

The complaint also alleges violations of *O.R.C. § 2925.02(A)(1)* and *(3)*, which prohibit the administering, inducing, or causing another to use a controlled substance "[b]y force, threat, or deception" (*§ 2925.02(A)(1)*), as well as the administering, inducing, or causing another to use such a substance "by any means," with the additional requirement that the actions "cause serious harm" or "cause the other person to become drug dependent" (*§ 2925.02(A)(3)*). (R. 514 at ¶¶986-987). The Manufacturers argue that to the extent these **[*164]** violations are asserted in an attempt by Plaintiffs to hold them liable for failing to stop the sale of prescription opioids that have been approved by the FDA and are regulated by the DEA, any such claim is preempted. (R. 499-1, PageID# 7701-7702). But nowhere in the complaint is it alleged that the Manufacturers should be prevented from operating their business in a lawful manner; rather, Plaintiffs seek to abate the alleged public nuisance.

***

(C) Prevent injury and annoyance from any nuisance;

***

[47] The Manufacturers also assert that Plaintiffs' Opposition cites to statutory violations not specifically pled, but the complaint identifies specific statutes as bases for alleged liability and also states that the claimed violations include, but are not limited to, conduct proscribed by Ohio and federal law. (R. 514 at ¶984).

Like the Manufacturers, the Pharmacies assert that the complaint fails to allege specific details of nuisance-creating conduct on their part affecting Summit County or even the State of Ohio and that the complaint contains "no more than conclusory factual allegations ..." (R. 497-1, PageID# 7609-7610). They concede, however, that Plaintiffs have alleged several violations of Ohio and federal law, but protest that the allegations are not sufficiently specific with respect to recordkeeping defaults and contend the allegations that they failed to maintain effective controls against diversion or failed to disclose suspicious orders are implausible. *Id.* Indeed, the complaint contains allegations that the Pharmacies engaged in misconduct and violated **[*165]** federal and state laws, and references numerous fines and settlements involving the Pharmacies. (R. 514, ¶¶ 504, 612-659, 684-686). Furthermore, where the facts at issue may be in the control of others, dismissal prior to discovery is not appropriate. *Ohio Pub. Emps. Ret. Sys. v. Fed. Home Loan Mortg. Corp., 830 F.3d 376, 383 (6th Cir. 2016)* (explaining that the pleading standards only require enough facts to demonstrate a reasonable expectation that discovery will reveal evidence to support the allegations).

5. Safe Harbor

"Ohio courts have long imposed the following concrete limitation on public nuisance claims: What the law sanctions cannot be held to be a public nuisance." *City of Cleveland v. Ameriquest, 621 F. Supp.2d 513, 526 (N.D. Ohio 2009)*, *aff'd*, *615 F.3d 496 (6th Cir. 2010)* (citations omitted). The Manufacturers claim that they are shielded from nuisance liability by virtue *O.R.C. § 2925.02(B)*, which provides a "safe harbor" for persons whose conduct is in accordance with Ohio controlled substance regulations. (R. 499-1, PageID# 7001-7002). They assert that they "have complied with all relevant federal and state controlled substances requirements." *Id.*

But as *Ameriquest* makes clear, safe harbor immunity from nuisance liability is available only to those who perform in accordance with their applicable regulatory obligations. *621 F. Supp. 2d at 528* ("Under a long line of decisions, a showing that the challenged **[*166]** conduct is subject to regulation and was performed in conformance therewith insulates such conduct from suit as a public nuisance"). The complaint alleges that all Defendants failed to do so. (R. 514 at ¶¶981-988). It also alleges misconduct unrelated to Defendants' respective regulated activities, for example, as to the Manufacturers, an extensive deceptive marketing scheme that intended to change the perception of opioids and boost sales by misleading doctors and the public about the risks of long-term opioid use. (R. 514 at ¶¶174-179, 989).

While regulatory oversight is a factor to be considered when determining the sufficiency of a public nuisance claim, "extensive regulation does not automatically bar a public nuisance claim." *City of Cleveland v. JP Morgan Chase Bank, N.A., 2013-Ohio-1035, 2013 WL 1183332, *6 (Ohio Ct. App. March 21, 2013)*; *Cincinnati v. Beretta, 768 N.E.2d at 1143*. The *Beretta* court rejected defendants' assertion that they were engaged in "legislatively authorized conduct," and were not subject to liability. *768 N.E.2d at 1143*. The court concluded that "even though there exists a comprehensive regulatory scheme involving the manufacturing, sales, and distribution of firearms, ... the law does not regulate the distribution practices alleged in the complaint," *i.e.*, practices that "fostered the criminal misuse of firearms [and] helped **[*167]** sustain the illegal firearms market in Cincinnati ...." *Id. at 1140*. Contrary to Manufacturers' contention that the complaint is defective because it fails to plead "any facts to show that any Manufacturer Defendant somehow deceived a particular resident in Summit County into using opioids, much less into becoming opioid dependent," that level of specificity is not required prior to discovery. (R. 499-1, PageID# 7702).

Accordingly, it is recommended that Defendants' motions to dismiss be partially granted to the extent they seek to bar the City of Akron from maintaining a statutory public nuisance action based on either: (1) a violation of an Ohio or federal drug law; or (2) any rule of the board of pharmacy controlling the distribution of a drug of abuse. It is otherwise recommended that Defendants' motions to dismiss count five, or to limit Plaintiffs' statutory remedies, be denied.[48]

G. Count Seven: Negligence

The complaint alleges a negligence claim against all Defendants. (R. 514, PageID# 11220). A negligence claim must allege (1) a duty owed by the defendant to the plaintiff to conform to a certain standard of conduct, (2) that the defendant breached that duty, and (3) that the breach **[*168]** of the duty proximately caused the plaintiff's injury. *Cromer v. Children's Hosp. Med. Ctr. of Akron, 142 Ohio St. 3d 257, 2015- Ohio 229, 29 N.E.3d 921, 928-929 (Ohio 2015)*. Defendants challenge the sufficiency of the complaint with respect to the first and third elements. (R. 491-1, PageID# 7505-7513, 7515-7519; R. 497-1, PageID# 7599-7608; R. 499-1, PageID# 7702-7703).

1. Duty of Care

"The existence of a duty is a question of law for a court to determine." *Mussivand v. David, 45 Ohio St. 3d 314, 544 N.E.2d 265, 270 (Ohio 1989)* ("There is no formula for ascertaining whether a duty exists. Duty...is the court's expression of the sum total of those considerations of policy which lead the law to say that the particular plaintiff is entitled to protection.") (citations and quotations omitted). "The Ohio Supreme Court has explained that '[t]he existence of a duty depends on the foreseeability of the injury.'" *Jaycox v. Setty Family Veterans Residential Care Home, 97 Fed. Appx. 640, 2004 WL 1171348, *3 (6th Cir. May 24, 2004)* (quoting *Menifee v. Ohio Welding Products, Inc., 15 Ohio St. 3d 75, 15 Ohio B. 179, 472 N.E.2d 707, 710 (Ohio 1984))*. Moreover,

> The concept of foreseeability is an important part of all negligence claims, because "[t]he existence of a duty depends on the foreseeability of the injury." *Menifee at 77, 472 N.E.2d 707*. As a society, we expect people to exercise reasonable precautions against the risks that a reasonably prudent person would anticipate. *Commerce & Industry Ins. Co. v. Toledo, 45 Ohio St.3d 96, 98, 543 N.E.2d 1188 (1989)*. Conversely, we do not expect people to guard against risks that the reasonable person would not foresee. *Menifee at 77, 472 N.E.2d 707*; Keeton, Dobbs, Keeton & Owen, Prosser and Keeton **[*169]** on the Law of Torts, Section 43, 280 (5th Ed.1984). The foreseeability of the risk of harm is not affected by the magnitude, severity, or exact probability of a particular harm, but instead by the question of whether some risk of harm would be foreseeable to the reasonably prudent person. *See* *Gedeon v. E. Ohio Gas Co., 128 Ohio St. 335, 339, 190 N.E. 924, 40 Ohio L. Rep. 649 (1934)*. Accordingly, the existence and scope of a person's legal duty is determined by the reasonably foreseeable, general risk of harm that is involved.

Cromer, 29 N.E.3d at 928-29 ("The existence of an actor's duty to another person usually arises from the foreseeability of injury to someone in that other person's 'general situation.'") (*quoting* *Gedeon, 190 N.E. at 926*). The "foreseeability of harm usually depends on the defendant's knowledge." *Menifee, 472 N.E.2d at 710*. But in order to owe a duty of care, it is not necessary that the defendant foresee the injury in the precise form in which it occurred. *Bohme, Inc. v. Sprint Int'l Comm. Corp., 115 Ohio App. 3d 723, 686 N.E.2d 300, 303 (Ohio Ct. App. 1996)*; *Pavlides v. Niles Gun Show, Inc., 93 Ohio App. 3d 46, 637 N.E.2d 404 (Ohio Ct. App. 1994)* (holding that an actor cannot necessarily avoid the imposition of a legal duty merely because he did not foresee the exact consequences of his actions).

---

[48] Although the Distributors broadly argued that both Plaintiffs' negligence and nuisance claims should be dismissed based on the economic loss doctrine, they made no attempt to distinguish between common law public nuisance claims and statutory public nuisance claims. (R. 491-1, PageID# 7513-7514; R. 744, PageID# 17672-17673). "The doctrine bars tort plaintiffs from recovering purely economic loss that 'do not arise from tangible physical injury' to persons or property.'" *Deutsche Bank, 863 F.3d at 477* (*quoting* *Queen City Terminals v. Gen. Am. Trans., 73 Ohio St. 3d 609, 1995- Ohio 285, 653 N.E.2d 661, 667 (Ohio 1995))*. The movant has presented the court with no compelling reason to apply such a tort doctrine to a statutory claim, especially where it does not appear that Plaintiffs seeks any relief beyond that which is permitted by statute.

In *Cincinnati v. Beretta*, the Ohio Supreme Court addressed the question of whether gun manufacturers owed a duty of care to a local government concerning harms caused by negligent manufacturing, marketing and distributing of firearms. **[*170]** *Beretta* involved allegations that the defendants failed to exercise sufficient control over the distribution of their guns, thereby creating an illegal secondary market in the weapons. The *Beretta* court concluded that the harms that resulted from selling these weapons were foreseeable—that Cincinnati was a foreseeable plaintiff. *768 N.E.2d at 1144*. Plaintiffs argue that the harm caused by the marketing and distribution of opioids are similarly foreseeable.

Plaintiffs assert that Defendants have a common law duty "to not expose Plaintiffs to an unreasonable risk of harm[;] ... a legal duty to exercise reasonable and ordinary care and skill in accordance with applicable standards of conduct in manufacturing, advertising, marketing, selling and/or distributing opioids." (R. 514 at ¶¶1040-1041). Defendants deny that they owed any common law duty to Plaintiffs. (R. 499-1, PageID# 7702-7703; R. 491-1, PageID# 7511-7512; R. 497-1, PageID# 7599-7601; R. 744, PageID# 17666-17667). Defendants claim that the common law does not recognize the duty of care that Plaintiffs assert; that Plaintiffs are actually alleging a statutory duty of care under the CSA which creates duties owed only to the DEA and the Ohio Board **[*171]** of Pharmacy, and which provides for no private right of action; that Plaintiffs are attempting to use negligence *per se* to plead around the absence of a private right of action; that there is no duty to prevent a third person from causing harm; and that the learned intermediary doctrine forecloses any duty running from Defendants to Plaintiffs. Moreover, Distributors deny any foreseeable harm caused by their actions and characterize themselves as mere "middlemen" who "do not write prescriptions or determine whether opioid medications are appropriate for patients" or "meet directly with patients and furnish them with opioids" as pharmacists do. (R. 491-1, PageID# 7511). The Pharmacies assert that Ohio imposes no common law duty "to exercise due care in the distribution of opioids, and specifically to detect, identify, or report suspicious orders." (R. 497-1, PageID# 7599).

Plaintiffs, for their part, do not argue that there is a private right of action under these statutes, but rather argue that the complaint's references to statutes merely identified a statutory standard of care that they contend could serve as a basis to support their theories of a common law duty and breach. (R. 654, **[*172]** PageID# 15787). Here, Plaintiffs base their duty and breach arguments on Defendants' own conduct—failing to report suspicious orders or otherwise act to prevent diversion—which caused their harm. (R. 514 at ¶¶546, 568-569, 607-659, 989, 1046-1071). Plaintiffs' Opposition references allegations in their complaint to argue that Defendants sold opioids "without regard to the likelihood that the opioids would be placed in the hands of criminals, addicts, juveniles, and others not permitted to use or possess prescription opioids" (*id.* at ¶1050); that the Marketing Defendants disseminated deceptive marketing about the safety and addictiveness of opioids through front groups and KOLs (*id.* at ¶¶350-428); that Marketing Defendants funded CMEs to encourage doctors to increase their prescriptions of opioids (*id.* at ¶¶429-442); that Defendants marketed, distributed and sold opioids "in a way that created and fostered an illegal, secondary prescription opioids market that resulted in a foreseeable and unreasonable risk of harm to Plaintiffs" (*id.* at ¶1049); that Manufacturers knew of doctors who were writing large quantities of opioids "[b]ut ... were singularly focused on maintaining, capturing, **[*173]** or increasing their sales" (*id.* at ¶574); that the Pharmacies knew of oversupply of prescription opioids (*id.* at ¶607); that Marketing and Supply Chain Defendants were aware of suspicious orders from their facilities (*id.* at ¶¶763, 589); that Marketing Defendants provided incentives to sales representatives and ignored red flags of diversion during regular visits to pharmacies and doctors (*id.* at ¶¶516, 568-569); and their sales representatives frequently promoted opioids in Summit County (*id.* at ¶673).

Plaintiffs argue that these allegations are sufficient to establish that their resulting harm (*i.e.* dramatically increased expenditures on public health and safety) was the foreseeable and likely result of Defendants' actions. (R. 654, PageID# 15783-15784). Taking Plaintiffs' allegations as true, Plaintiffs have stated a plausible claim that it was reasonably foreseeable that they would be forced to bear the public costs of increased harm from the over-prescription and oversupply of opioids in their communities if Defendants failed to implement and/or follow adequate controls in their marketing, sales, distribution, and dispensing of opioids.

Defendants argue, however, that Ohio law imposes **[*174]** no duty "to prevent a third person from causing harm to another absent a special relation between the parties." (R. 499-1, PageID# 7687; R. 497-1, PageID# 7600; R. 491-1, PageID# 7512). Defendants argue that Plaintiffs have not alleged any special relationship that would give rise to such a duty. *Id.* The defendants in *Cincinnati v. Beretta* raised a similar argument against municipal expenditures following the actions of firearm manufacturers. *768 N.E.2d at 1144-46*. Therein, the city alleged that defendants marketed and distributed their firearms in such a way as to "ensure the widespread accessibility of the firearms to prohibited users" thereby fostering criminal misuse and an illegal aftermarket. *Id. at 1140*. The Ohio Supreme Court determined that the "special relationship rule [was] not determinative" because plaintiffs were not alleging a duty to control third persons. Instead, the court maintained that "the issue is whether appellees are themselves negligent by manufacturing, marketing, and distributing firearms in a way that creates an illegal firearms market that results in a foreseeable injury." *Id.* In this case, Plaintiffs' do not assert a duty to prevent the actions of third persons, but rather a duty owed **[*175]** by Defendants to Plaintiffs to use reasonable care in, for example, marketing, monitoring, reporting, and selling their opioids. The wrongful conduct alleged is that of Defendants, and not of third persons.

The Pharmacies contend that they do not owe a duty as a result of the learned intermediary doctrine. The learned intermediary doctrine is not applicable as explained *supra* in the RICO analysis. Distributors also argue that any duty they may owe to "report suspicious order is a duty that was created by statute, and the duty runs to the DEA and the Ohio Board of Pharmacy, not the County." This duty, they argue, is "unknown at common law." They maintain that when Plaintiffs assert a common law duty of care, they are actually seeking to enforce the CSA and Ohio's pharmacy regulations for controlled substances. (R. 491-1, PageID# 7505-7511; R. 497-1, PageID# 7602-05). Because the court finds that Plaintiffs have plausibly pleaded facts sufficient to establish that Defendants owed them a common law duty, the court does not reach this argument based upon the limited record before it.[49]

2. Proximate Cause

Plaintiffs must allege facts that, if proven, plausibly establish a causal link between **[*176]** Defendants' actions and Plaintiffs harm that is not too remote. The Ohio Supreme Court and the Sixth Circuit have employed the proximate cause test devised by the U.S. Supreme Court in *Holmes* in negligence cases like this one. *503 U.S. at 268-70*; *see also Cincinnati v. Beretta, 768 N.E.2d at 1147-49*; *Ameriquest, 615 F.3d at 504*.

Plaintiffs argue that Defendants' alleged negligent sales practices, including failing to comply with obligations to monitor and report suspicious orders, halt suspicious orders, and implement effective diversion controls have led directly to the creation of a population of addicted patients and nourished the illegal secondary market, both of which lie at the root of the opioid crisis, resulting in complex and costly consequences to Plaintiffs' provision of public health, social, and criminal justice services. (R. 514 at ¶¶1040-1060).

Defendants insist that Plaintiffs' alleged injuries are far too remote and indirect to establish proximate cause. (R. 491-1, PageID# 7515-7518; R. 497-1, PageID# 7605-7608).[50] They argue that there are numerous intervening causes which break the causal link between their own actions and Plaintiffs' harms. These include the actions of prescribing doctors, criminals in the secondary market, and addicted users, among others. **[*177]** *Id.* Defendants also argue that Plaintiffs' harms were not proximately caused by Defendants actions, because those harms are derivative of harms sustained by third parties. Defendants urge the court to reach the same result on causation as the one reached by courts in the recent mortgage finance cases. *See JP Morgan Chase Bank, 2013-Ohio-1035, 2013 WL 1183332, at *6; Ameriquest, 621 F. Supp. 2d at 536*.

The Ohio Supreme Court has explained that in order to establish proximate causation, "there must be some direct relation between the injury asserted and the injurious conduct alleged." *Cincinnati v. Beretta, 768 N.E.2d at 1148*. The Ohio Supreme Court in *Beretta* adopted *Holmes*' analysis for remoteness and proximate cause, concluding that

---

[49] Nor is it necessary to address Defendants' arguments with regard to negligence *per se*, as those arguments presuppose Plaintiffs' failure to plead a common law duty.

[50] While asserting that Plaintiffs' negligence claim should be dismissed, the Manufacturers do not meaningfully develop any new argument and adopt earlier arguments. (R. 499-1, PageID# 7702). For the reasons stated elsewhere in this report and recommendation, such reiterated arguments, including the assertion that proximate cause is lacking, fail.

the complaint had set forth facts sufficient to establish proximate cause. As to the first factor, the court reasoned that concerns with the difficulty of proof were minimal, in part, because "the complaint...alleged that as a direct result of misconduct ...[the city] has suffered 'actual injury and damages including but not limited to, significant expenses for police, health, prosecution, emergency, corrections and other services.'" *Id. at 1148*. The second factor did not pose a problem because there was "little risk of double recovery, since [the city] is seeking recovery for injuries to itself **[*178]** only." *Id.* Finally, invoking the deterrence principle embedded in the third *Holmes* factor, the court stated that "[a]lthough appellant is indirectly attempting to protect its citizens from the alleged misconduct by the gun manufacturers and trade associations, appellant is seeking recovery for its own harm. Under these circumstances, the general interest will be best served by having this plaintiff bring this lawsuit." *Id.* The court reversed the appellate court ruling that the city's claims were "too remote for recovery." *Id.*

Although the facts of this case differ in some respects from *Beretta*, its analysis of remoteness under *Holmes* is persuasive. Furthermore, the court has conducted a proximate cause analysis regarding the *Holmes* factors in section III-A-2-b above that need not be repeated here.[51]

Noting that Plaintiffs plead criminal acts, Defendants assert that their position is analogous to sellers who supply to independent retailers from whom drugs are obtained for diversion. *See, e.g., Ashley Cty. v. Pfizer, Inc., 552 F.3d 659, 663 and n.5 (8th Cir. 2009)* (applying Arkansas law to find that intervening acts by retailers and methamphetamine cooks to whom they sold pseudoephedrine were independent causes relieving distributors of liability based **[*179]** on the legal sale of products later used for illicit purpose); *City of Philadelphia v. Beretta U.S.A. Corp., 277 F.3d 415, 424 (3d Cir. 2002)* (affirming dismissal of public nuisance claim against gun distributors because of the many "links that separate a manufacturer's sale of a gun to a licensee and the gun's arrival in the illegal market through a distribution scheme that is not only lawful, but also is prescribed by statute with respect to the manufacturers' conduct"). The Distributors also argue that Plaintiffs plausibly allege that only Manufacturers could have foreseen that intervening criminal or intentional acts would occur and, therefore, do not establish that the alleged harm was foreseeable to Distributors. (R. 744, PageID# 17672, *citing Feichtner v. Ohio Dep't of Trans., 114 Ohio App. 3d 346, 683 N.E.2d 112, 119-20 (Ohio Ct. App. 1995)* (recognizing that there is no common law duty to anticipate or foresee criminal activity); *Volter v. C. Schmidt Co., 74 Ohio App. 3d 36, 598 N.E.2d 35, 39 (Ohio Ct. App. 1991)* ("Where the harm is intentionally caused by a third person and is not within the scope of the risk created by the actor's conduct, the intentional act is considered a superseding cause because such acts are typically not foreseeable.")).

Not only does the complaint allege that the opioid addiction epidemic and its attendant injury to government entities were foreseeable to all Defendants, it also alleges that even after Defendants **[*180]** were aware of the opiate addiction crisis they continued distributing commonly abused and diverted drugs in quantities and with frequency that they knew or should have known could not be justified by legitimate medical need and they manipulated quotas to evade reporting duties and maintain that inflated level of sale.[52] (R. 514 at ¶¶18, 518, 550, 557, 565, 579, 496, 606-08, 763, 929, 1012, 1019-1020). The Distributors' argument is also refuted by allegations that they conspired with the Manufacturers in a concerted scheme to expand the opioid market, to ensure that distribution quotas remained artificially high and that suspicious orders were not reported. (R. 514 at ¶¶760-766). In addition, Defendants' arguments concerning third-party intervening acts and alleged superseding events raise significant factual issues not suitable for resolution on a motion to dismiss.

---

[51] Although the Pharmacies were not subject to the RICO claims addressed above, the differences between the allegations against them and the remaining Defendants do not compel a different result when addressing the issue of proximate cause. The Pharmacies are alleged to have "failed to report suspicious orders, prevent diversion, or otherwise control the supply of opioids [flowing] into communities across America," (R. 514 at ¶¶579, 607-626), and have been the subject of fines by the DEA for failing to do so. (*Id.* at ¶¶627-659). Moreover, the Pharmacies, the ultimate dispenser of opioids, are arguably a step closer to the injured parties than the other Defendants.

[52] As the cited paragraphs illustrate, the Pharmacies' argument to the contrary is misplaced. (R. 742, PageID# 17611). The complaint does claim the Distributors could have foreseen, and were aware of, unnecessary prescriptions and the operation of pill mills, but nevertheless supplied them.

3. Economic Loss Rule

The Defendants argue that the economic loss doctrine requires dismissal of Plaintiffs' negligence claim. (R. 491-1, PageID# 7513-7514; R. 497-1, PageID# 7601-7602.).[53] They assert that the doctrine prohibits a negligence claim unless the plaintiff incurred a physical injury to person or property. *Id.*; *see* ***[*181]*** *Corporex Dev. & Constr. Mgt., Inc. v. Shook, Inc., 106 Ohio St. 3d 412, 2005- Ohio 5409, 835 N.E.2d 701, 704 (Ohio 2005)*; *Floor Craft Floor Covering, Inc. v. Parma Cmty. Gen. Hosp. Ass'n, 54 Ohio St. 3d 1, 560 N.E.2d 206, 208 (Ohio 1990)*; *see also Deutsche Bank Nat'l Tr. Co., 863 F.3d at 477* (noting, "The premise of the economic loss rule is that tort law does not impose an independent duty to avoid consequential economic damages."); *Pavlovich v. Nat'l City Bank, 435 F.3d 560, 569 (6th Cir. 2006)*. Defendants also rely upon, *Queen City Terminals, Inc. v. Gen. Am. Transp.*, in which the Ohio Supreme Court held that "in order to recover indirect economic damages in a negligence action, the plaintiff must prove that the indirect economic damages arose from tangible physical injury to persons or from tangible property damage. Indirect economic damages that do not arise from tangible physical injury to persons or from tangible property may only be recovered in contract." *73 Ohio St. 3d 609, 1995- Ohio 285, 653 N.E.2d 661, 667 (Ohio 1995)*; *see also Ashtabula River Corp. Grp. II v. Contrail, Inc., 549 F.Supp.2d 981, 987 (N.D. Ohio 2008)* (R. 744, PageID# 17675).

Plaintiffs argue that the doctrine primarily applies to bar recovery in cases between parties in a contractual relationship. *See Corporex, 835 N.E.2d at 701*; *Chemtrol Adhesives, Inc. v. Am. Mfrs. Mut. Ins. Co., 42 Ohio St. 3d 40, 537 N.E.2d 624 (Ohio 1989)*; *Digiknow, Inc. v. PKXL Cards, Inc., 2011-Ohio-3592, 2011 WL 2899600, at *1 (Ohio Ct. App. July 21, 2011)*. Plaintiffs argue that the doctrine does not apply to their negligence claim because it is not based on the negligent performance of contractual duties. (R. 654, PageID# 15795-15797).

The Ohio Supreme Court in *Corporex* explained that the rule "stems from the recognition of a balance between tort law, designed to redress losses suffered by a breach of duty imposed by law to protect societal **[*182]** interests, and contract law, which holds that parties to a commercial transaction should remain free to govern their own affairs." *835 N.E.2d at 704* ("Tort law is not designed to compensate parties for losses suffered as a result of a breach of duties assumed only by agreement."). In other words, the economic loss rule recognizes that the risk of consequential economic loss is something that the parties can allocate by agreement when they enter into a contract. This allocation of risk is not possible where, as here, the harm alleged is caused by involuntary interactions between a tortfeasor and a plaintiff. Thus, courts have noted that in cases involving only economic loss, the rule "will bar the tort claim if the duty arose only by contract." *Campbell v. Krupp, 195 Ohio App. 3d 573, 2011-Ohio 2694, 961 N.E.2d 205, 211 (Ohio Ct. App. 2011)*. By contrast, "the economic loss rule does not apply—and the plaintiff who suffered only economic damages can proceed in tort—if the defendant breached a duty that did not arise solely from a contract." *Id.*; *see also Corporex, 835 N.E.2d. at 705* ("When a duty in tort exists, a party may recover in tort. When a duty is premised entirely upon the terms of a contract, a party may recover based upon breach of contract."); *Ineos USA LLC v. Furmanite Am., Inc., 2014-Ohio-4996, 2014 WL 5803042, at *6 (Ohio Ct. App. Nov. 10, 2014)* ("[W]here a tort claim alleges that a duty was breached independent **[*183]** of the contract, the economic loss rule does not apply.").

As discussed elsewhere in this opinion, Plaintiffs have pleaded facts which, if proven, plausibly establish the existence of a common law tort duty. Moreover, it would be premature on this limited record to apply the economic-loss rule as Defendants have characterized Plaintiffs' economic damages as purely derivative of personal injuries, which if ultimately successful at summary judgment or before the trier-of-fact, could foreclose this argument. In addition, Plaintiffs have facially pled damages to their proprietary interests. (R. 514 at ¶1063). As such, Defendants have not shown that Plaintiffs' negligence claim runs afoul of the economic loss rule.

---

[53] Manufacturers make only cursory reference to the economic loss doctrine as a reason to dismiss Plaintiffs' negligence claim. (R. 499-1, PageID# 7702). They simply cite to *Corporex* in a bullet point, and then refer to a single paragraph of argument in their public nuisance section. Also, the Pharmacies adopt Distributors' arguments. (R. 742, PageID# 17613).

H. Count Eight: Fraud

In Count Eight, Plaintiffs assert a common law fraud claim against the Marketing Defendants. (R. 514, PageID# 11227). To state a cognizable cause of action for fraud under Ohio law, a complaint must plead the following elements:

> (a) a representation or, where there is a duty to disclose, omission of a fact; (b) which is material to the transaction at hand; (c) made falsely, with knowledge of its falsity, or with such utter disregard and recklessness as to whether **[*184]** it is true or false that knowledge may be inferred; (d) with the intent of misleading another into relying upon it; (e) justifiable reliance upon the representation or concealment; and (f) a resulting injury proximately caused by the reliance.

Lucarell v. Nationwide Mutual Ins. Co., 152 Ohio St. 3d 453, 2018- Ohio 15, 97 N.E.3d 458, 472 (Ohio 2018) (citations omitted).

The briefs focus on the element of justifiable reliance. Generally, whether a plaintiff justifiably relied on an allegedly fraudulent misrepresentation or omission is a question of fact and not appropriate for determination on a motion to dismiss. *See, e.g., Jewell Coke Co., L.P. v. ArcelorMittal USA, Inc., 756 F. Supp. 2d 858, 867 (N.D. Ohio 2010)*. The Manufacturers assert that because the claim is based on alleged misrepresentations made to third parties, it fails to plead the essential element of justifiable reliance (R. 499-1, PageID# 7703). Specifically, they contend that the misrepresentations and omissions alleged by Plaintiffs were made to induce reliance by third-party payors (R. 514 at ¶1074), or directed at state and federal regulators (*id.* at ¶856), and with intent that others rely on their omissions. *Id.* at ¶1075. As such, they contend first-party reliance is lacking.

Plaintiffs respond that the complaint avers justifiable reliance and alleges that "Plaintiffs ... did in fact rightfully, reasonably, **[*185]** and justifiably rely on Marketing Defendants' representations and/or concealments both directly and indirectly ..." (R. 514 at ¶1081) and "proceeded under the misapprehension that the opioid crisis was simply a result of conduct by persons other than Defendants [and] [a]s a consequence, these Defendants prevented Plaintiffs from a more timely and effective response to the opioid crisis" (*id.* at ¶1082). (R. 654, PageID# 15801). In addition, they argue that Ohio recognizes a theory of recovery based on false statements made to third parties that are known or intended to deceive the pleader, *i.e.*,

> that where a party makes false representations to another with the intent or knowledge that they be exhibited or repeated to a third party for the purpose of deceiving him or her, the third party can maintain an action in tort against the party making the false statements for the damages resulting from the fraud.

50 Ohio Jur. 3d, Fraud and Deceit § 79 (2018). "The maker of a fraudulent misrepresentation is subject to liability for pecuniary loss to another who acts in justifiable reliance upon it if the misrepresentation, although not made directly to the other, is made to a third person and the maker **[*186]** intends or has reason to expect that its terms will be repeated or its substance communicated to the other, and that it will influence his conduct in the transaction or type of transaction involved." Restatement of the Law (Torts) *§ 533* (2018). Plaintiffs also cite to authority from the Sixth Circuit and this court recognizing that a *prima facie* common fraud claim is stated based on that theory. *See Nernberg v. Pearce, 35 F.3d 247, 250-51 (6th Cir. 1994)* (stating that "[i]t is generally accepted that a plaintiff is not required to prove direct reliance on a fraudulent misrepresentation to state a claim for fraud."); *accord Lewis v. Horace Mann Ins. Co., 410 F. Supp. 2d 640, 664 (N.D. Ohio 2005)* (denying summary judgment and reasoning that reliance may be satisfied where a fraudulent statement or omission becomes known to a complainant who acts upon it, even if indirectly communicated by others) (also citing Oh. Jur.3d. Ed., Fraud & Deceit § 89, and *Lin v. Gatehouse Constr. Co., 84 Ohio App. 3d 96, 616 N.E.2d 519, 524 (Ohio 1992))*.[54]

---

[54] The cases that defendants cite, as plaintiffs note, are distinguishable because there was a lack of evidence supporting reliance. *See Lucarell, 97 N.E.3d at 473-474* (finding that plaintiff "failed to prove that any fraudulent representation had been made to her" where fraud claim was based on misrepresentation made by defendant to lender to induce lender to approve plaintiff's business loan); *Mike McGarry & Sons, Inc. v. Constr. Res. One, LLC, 2018-Ohio-528, ¶ 78-79 (Ohio Ct. App. Feb. 9,*

The Manufacturers are correct in stating that the complaint alleges that they intentionally made misrepresentations and omissions to the medical community, patients, and government regulators with the intent of inducing reliance. (R. 499-1, PageID# 7703-7704). Their contention that this claim fails by not alleging any first-party reliance, however, is not well-taken, **[*187]** as noted above. In addition, Plaintiffs also aver that the Manufacturers knowingly set out to convince physicians, patients and the public at large that false propositions regarding the safety and efficacy of opioids were true (R. 514, *e.g.*, ¶¶177-178, 1076-1078); issued press releases falsely minimizing the risks of addiction and abuse potential of the drugs (*id. e.g.*, ¶¶190, 340-341); and in public outreach and pronouncements, falsely portrayed their compliance with regulatory obligations, cooperation with law enforcement, and commitment to preventing diversion (*id. e.g.*, ¶¶595-98, 601-606). The complaint further alleges:

> Defendants also concealed from Plaintiffs the existence of Plaintiffs' claims by hiding their lack of cooperation with law enforcement and affirmatively seeking to convince the public that their legal duties to report suspicious sales had been satisfied through public assurances that they were working to curb the opioid epidemic. They publicly portrayed themselves as committed to working diligently with law enforcement and others to prevent diversion of these dangerous drugs and curb the opioid epidemic, and they made broad promises to change their ways insisting **[*188]** they were good corporate citizens. These repeated misrepresentations misled regulators, prescribers and the public, including Plaintiffs, and deprived Plaintiffs of actual or implied knowledge of facts sufficient to put Plaintiffs on notice of potential claims.

Id. at ¶772. These allegations support a reasonable inference that these Defendants intended to induce Plaintiffs to rely on their false assurances and omissions in order to deter potential liability for injuries such as those alleged in the complaint. Based on the foregoing, a genuine dispute of fact exists as to whether Plaintiffs' justifiably relied on alleged fraudulent statements and omissions, and it is not appropriately decided on a motion to dismiss.

I. Count Nine: Injury Through Criminal Acts

In Count Nine, Plaintiffs seek relief against all Defendants for injury through criminal acts pursuant to *O.R.C. § 2307.60(A)(1)*, which states:

> Anyone injured in person or property by a criminal act has, and may recover full damages in, a civil action unless specifically excepted by law, may recover the costs of maintaining the civil action and attorney's fees if authorized by any provision of the Rules of Civil Procedure or another section of the Revised **[*189]** Code or under the common law of this state, and may recover punitive or exemplary damages if authorized by *section 2315.21* or another section of the Revised Code.

O.R.C. § 2307.60(A)(1).[55] Defendants argue that the vast majority of courts have held that "a conviction for the alleged predicate criminal act" is required before a cause of action accrues. (R. 499-1, PageID# 7704; R. 497-1, PageID# 7614).[56] Defendants maintain that Plaintiffs have failed to allege the requisite criminal conviction against any of them and, therefore, their claims must be dismissed. *Id.* Conversely, Plaintiffs contend that the cases upon which Defendants rely are irreconcilable with a 2016 decision from the Supreme Court of Ohio—*Jacobson v. Kaforey, 149 Ohio St. 3d 398, 2016- Ohio 8434, 75 N.E.3d 203 (Ohio 2016)*. (R. 654, PageID# 15802-15805). Therein, the Ohio Supreme Court held that:

2018) (reversing denial of summary judgment, reasoning that fraud claim could not be maintained where party presented no evidence that it took action in reliance on the allegedly false statement).

[55] Defendants acknowledge the lone exception is inapplicable. (R. 499-1, PageID# 7704).

[56] *Citing Jane v. Patterson, 2017 U.S. Dist. LEXIS 55952, 2017 WL 1345242, at *4 (N.D. Ohio Apr. 12, 2017)*; *A.A. v. Otsego Local Sch. Bd. of Educ., 2016 U.S. Dist. LEXIS 176621, 2016 WL 7387261, at *9 (N.D. Ohio Dec. 21, 2016)*; *Ortiz v. Kazimer, 2015 U.S. Dist. LEXIS 38496, 2015 WL 1400539, at *12 (N.D. Ohio Mar. 26, 2015)*, *aff'd*, *811 F.3d 848 (6th Cir. 2016)*; *Tri-State Comp. Exch., Inc. v. Burt, 2003-Ohio-3197, 2003 WL 21414688, at *6 (Ohio Ct. App. June 20, 2003)*.

> R.C. 2307.60(A)(1), by its plain and unambiguous terms, creates a statutory cause of action for damages resulting from any criminal act. The wording chosen by the Ohio General Assembly is explicit: any person "injured * * * by a criminal act has * * * a civil action" unless a civil action "is specifically excepted by law." (Emphasis added.) R.C. 2307.60(A)(1).

Jacobson, 75 N.E.3d at 206 (emphasis in original). A few weeks before *Jacobson*, a decision from this district found that "Ohio Rev. Code § 2307.60(A)(1) clearly authorizes a civil action **[*190]** for damages for anyone injured by a criminal act, regardless of whether any person has pleaded guilty to or been convicted of a criminal offense." *Chem. Bank v. Kausmeyer, 2016 U.S. Dist. LEXIS 170659, 2016 WL 7178662, at *7 (N.D. Ohio Dec. 9, 2016)* (Pearson, J.) (*citing* *Cuyahoga Hts. Local School Dist. v. Palazzo, 2016 Ohio-5137, 69 N.E.3d 162, 2016 WL 4037309 (Ohio Ct. App. July 28, 2016))*. In addition, a recent decision from this district observed that O.R.C. § 2307.60 authorizes a civil action for damages caused by criminal acts, noting:

> Interestingly, in 2007, the Ohio General Assembly amended ORC § 2307.60 to create a *presumption of civil liability* when the defendant had been convicted of a criminal violation. Am. Sub. S.B. 117. Had the General Assembly wanted to make a criminal conviction a condition precedent to establishing an ORC § 2307.60 claim, they presumably could have done so. However, the creation of this presumption does not conclusively establish that a conviction is not required for civil liability.
>
> Accordingly, the Court will deny the motion to dismiss at this time. Defendants may renew their challenge in the form of a motion for summary judgment after discovery and further research.

*Buddenberg v. Weisdack, 2018 U.S. Dist. LEXIS 108333, 2018 WL 3159052, at *5-6 (N.D. Ohio June 28, 2018)* (Polster, J.) (emphasis in original).

Given that Defendants, as the moving party, bear the burden of demonstrating that Plaintiffs fail to state a claim, dismissal cannot be recommend at this time, especially given the not unreasonable **[*191]** inference from the Ohio Supreme Court's *Jacobson* decision that a conviction may not be a necessary prerequisite.

The Pharmacies also assert that Plaintiffs have not alleged any "injur[y]" to their "person or property" pursuant to O.R.C. § 2307.60(A)(1). (R. 497-1, PageID# 7615). They allege O.R.C. § 2307.60(A)(1) does not provide for recovery for purely economic loss, but cite no authority in support of this proposition, and the statute itself does not contain such an express limitation. *Id.* The only case cited by the Pharmacies is inapposite. *See* Pavlovich, 435 F.3d at 569 ("Under Ohio law, "[t]he economic-loss rule generally prevents recovery *in tort* of damages for purely economic loss.") (emphasis added). The *Pavlovich* decision contains no discussion concerning a statutory action brought under O.R.C. § 2307.60(A)(1), and Defendants cite no other authority suggesting claims arising under that section should be construed identically to tort claims.

Finally, the Pharmacies argue that they are "specifically excepted by law" from liability under § 2307.60, by virtue of O.R.C. §§ 2925.02(B), 2925.03(B). (R. 497-1, PageID# 7615). Defendants fail to meaningfully develop this argument. The complaint alleges that Defendants are not in compliance with multiple provisions of the Revised Code rendering any exceptions unavailable. **[*192]** (R. 514 at ¶¶1095-1097). The Pharmacies protest that "such unsupported and generic legal conclusions should be disregarded." (R. 497-1, PageID# 7615). This statement cannot be credited, as Plaintiffs' assertions or conclusions, as Defendants phrase it, cannot be construed in a vacuum ignoring the other voluminous allegations in the complaint that support the conclusion. To the extent Defendants merely reiterate the safe harbor argument addressed above, it fails for the same reasons.

J. Count Ten: Unjust Enrichment

In Count Ten, Plaintiffs assert an unjust enrichment claim against all Defendants. (R. 514, PageID# 11235). The following elements comprise a valid unjust enrichment cause of action: "(1) a benefit conferred by a plaintiff upon a defendant; (2) knowledge by the defendant of the benefit; and (3) retention of the benefit by the defendant under circumstances where it would be unjust to do so without payment." *Hambleton v. R.G. Barry Corp., 12 Ohio St. 3d*

179, 12 Ohio B. 246, 465 N.E.2d 1298 (Ohio 1984) (internal quotations omitted). Plaintiffs allege that they conferred a benefit upon Defendants "by paying for Defendants' externalities: the cost of the harms caused by Defendants' improper distribution practices," and that retention of that benefit would be unjust. (R. **[*193]** 514 at ¶¶1114-1115; 1108-1121).

The Defendants assert that Plaintiffs do not properly allege that they conferred a benefit upon them. (R. 491-1, PageID# 7519-7522; R.497-1, PageID# 7612; R. 499-1, PageID# 7705-7706). The Distributors argue that under Ohio law, "[i]t is not enough that a plaintiff suffers a loss and defendant receives a benefit; rather, 'a plaintiff must establish that a benefit has been conferred upon that defendant *by that particular plaintiff*.'" (R. 491-1, PageID# 7520-21) (quoting Ohio Edison Co. v. Direct Energy Bus., LLC, 2017 U.S. Dist. LEXIS 117025, 2017 WL 3174347, at *3 (N.D. Ohio July 26, 2017) (emphasis in original); Bihn v. Fifth Third Mortg. Co., 980 F. Supp. 2d 892, 904 (S.D. Ohio 2013)). Moreover, the Distributors construe Johnson v. Microsoft Corp., 106 Ohio St. 3d 278, 2005- Ohio 4985, 834 N.E.2d 791, 799 (Ohio 2005) and its progeny to announce a "rule of law" holding that unjust enrichment claims may only be sustained if they arise from an economic transaction between the parties.[57] (R. 491-1, PageID# 7520-21; R. 744, PageID# 17675-17676).

Plaintiffs assert *Ohio Edison* is distinguishable, arguing that this case does not raise the same concerns—namely, an inability to allocate benefits and losses where multiple actors bought and sold from each other in a complicated market. They also argue that *Johnson* "is even farther afield" because its concern was that indirect purchasers would invoke unjust enrichment to accomplish an end-run around antitrust **[*194]** laws limiting recovery to direct purchasers. According to Plaintiffs, the reasoning does not mandate the same privity in this case. (R. 654, PageID# 15808). In the present action, Plaintiffs' theory of recovery is not based on a financial transaction, therefore the claim is not barred by *Johnson's* limiting indirect purchasers from maintaining unjust enrichment claims against parties other than those with whom they dealt with directly. Johnson, 834 N.E.2d at 799.

Further, the Pharmacies argue that the alleged expenditures did not save them any expense or loss, but rather the money benefited Plaintiffs' residents by increasing healthcare services and addiction treatment for opioid users. City & Cty. of San Francisco v. Philip Morris, Inc. 957 F. Supp. 1130 (N.D. Cal 1997) (finding that the City could not recover the costs of providing medical care to indigent smokers where there was no allegation that defendant tobacco company had a duty to cover those costs and plaintiff did not show that defendant was enriched); Ashley Cty., Ark. v. Pfizer, Inc., 552 F.3d 659, 666 (8th Cir. 2009) (explaining that Arkansas law only implies a contract to pay for services when they were rendered in expectation of payment from a defendant, and finding that plaintiff had no expectation that the defendant drug manufacturer would pay for municipal services provided in dealing with **[*195]** the methamphetamine crisis). (R. 497-1, PageID# 7612; R. 742, PageID# 17617).

Plaintiffs assert that "[u]njust enrichment arises not only where an expenditure by one party adds to the property of another but also where the expenditure saves the other from expense or loss." (R. 654, PageID # 15806-15807, *quoting* White v. Smith & Wesson, 97 F. Supp. 2d 816, 829 (N.D. Ohio 2000) (Nugent, J.)). Therein, the court found that a municipal plaintiff adequately plead an unjust enrichment claim where it was alleged that plaintiff "conferred a benefit upon Defendants, *i.e.*, that the City paid for what may be called the Defendants' externalities—the costs of the harm caused by Defendants' [conduct].").[58] *Id.* Courts applying *White's* analysis have arrived at the same result. *See, e.g.,* City of Los Angeles v. Wells Fargo & Co., 22 F. Supp. 3d 1047, 1061 (C.D. Cal. 2014) (citing *White* and finding a sufficient restitution theory where plaintiff alleged the benefits conferred were "externalities—the costs of harm caused by Defendants' discriminatory lending that the City has had to shoulder"); City of Los Angeles v. Bank of Am. Corp., 2014 U.S. Dist. LEXIS 85957, 2014 WL 2770083, at *12-13 (C.D. Cal. June 12, 2014) (finding a valid claim for unjust enrichment where plaintiff alleged that the defendants' predatory lending resulted in their

[57] The Manufacturers raise this same argument, citing Randleman v. Fid. Nat'l Title Ins. Co., 465 F. Supp. 2d 812, 824 (N.D. Ohio 2006) in support. (R. 499-1, PageID# 7706).

[58] Because the Plaintiffs theory of recovery is not based on an economic transaction, the Distributors assertion that *White* was "effectively overruled" by *Johnson* does not follow. (R. 744, PageID# 17676).

enrichment at plaintiffs' expense, which paid for defendants' "externalities, or costs of harm caused by its mortgage lending discrimination"); **[*196]** *City of Boston, 12 Mass. L. Rep. 225, 2000 WL 1473568, at *18* (finding plaintiffs stated a claim for unjust enrichment by alleging that they "conferred a benefit upon Defendants by paying for the costs of the harm caused by Defendants' conduct ("externalities")").[59]

Distributors also argue that the complaint fails to plead that they had "knowledge" of the claimed benefit allegedly bestowed upon them, maintaining that alleging that "Defendants were aware of these obvious benefits ...." (R. 514, ¶1115) is too vague and conclusory to state the element. (R. 491-1, PageID# 7521). An identical allegation has been recognized by this court as adequately supporting the unjust enrichment element of knowledge at the pleading stage. *White, 97 F. Supp. 2d at 829*. Distributors further argue that no injustice occurred because Plaintiffs are responsible for the alleged social service expenditures, but cite no authority for that proposition. (R. 491-1, PageID# 7522). Conversely, the *White* decision rejected a similar argument noting that "Defendants fail to cite a single case from Ohio that even comes close to advocating [the] view" that a municipality should be prohibited from recovering "for all governmental functions, such as police, medical, fire and emergency services, **[*197]** and other related expenditures, because these are the kinds of traditional services and functions that a municipality is expected to provide and which are most efficiently and fairly spread among the public." *97 F. Supp. 2d at 821-822* (internal quotations omitted). Here, the complaint pleads that the costs Plaintiffs assumed "are not part of the normal and expected costs of a local government's existence," and that "Defendants' alleged wrongful acts are neither discrete nor of the sort a local government can reasonably expect." (R. 514, ¶¶1118-1119).

Finally, the Defendants contend the claim should be dismissed, arguing they are derivative of Plaintiffs' other claims, and would permit "'an end run around policies' barring a plaintiffs' other failed claims." (R. 491-1, PageID# 7519-7520, *citing* *Johnson, 834 N.E.2d at 799*; R. 499-1, PageID# 7705). While that proposition is correct, the propriety of any application to this case would be determined at a later stage of these proceedings. In addition, multiple causes of action based on the same conduct may be asserted alternatively. *PCA Minerals, LLC v. Merit Energy Co., LLC, 725 F. App'x 342, 349 (6th Cir. 2018)* ("nothing prohibits a plaintiff from pleading multiple claims when there are...multiple theories...that are legally viable and consistent with the facts; where **[*198]** a plaintiff has a contract claim, tort claim, and a claim for statutory violation, all may be pled"); *Hutchings v. Nationstar Mortg. LLC, 2013 U.S. Dist. LEXIS 149027, 2013 WL 5670939 (N.D. Ohio Oct. 16, 2013)* ("[A] plaintiff is not precluded from arguing or pursuing multiple theories in the alternative throughout the course of the litigation."); *Auto Chem Labs., Inc. v. Turtle Wax, Inc., 2008 U.S. Dist. LEXIS 83158, 2008 WL 4372697, at *15 (S.D. Ohio Sept. 23, 2008)* ("[A] party may plead alternative causes of action for the same matter, but may only prevail under one or the other.").

Based on the alleged facts in this case, Plaintiffs state a facially plausible unjust enrichment claim on the theory that they conferred a benefit upon all Defendants by alleging that they paid for the cost of harm caused by the defendant's conduct, *i.e.*, the defendant's externalities. *See, e.g., City of Everett v. Purdue Pharma L.P., 2017 U.S. Dist. LEXIS 156653, 2017 WL 4236062, *9 (W.D. Wash. Sept. 25, 2017)* (finding that plaintiffs' unjust enrichment claim based on their payment of the "so called externalities" of a defendant's conduct was not facially implausible). Accordingly, it is recommended that the court deny the motions to dismiss Count Ten of the complaint.

K. Count Eleven: Civil Conspiracy

Count Eleven of the complaint alleges a civil conspiracy claim against all Defendants. (R. 514, PageID# 11237). "An underlying unlawful act is required before a civil conspiracy claim can succeed." *Williams v. Aetna Fin. Co., 83 Ohio St. 3d 464, 1998- Ohio 294, 700 N.E.2d 859, 868 (Ohio 1998)*. "Conspiracy in and of itself does not

---

[59] Plaintiffs also note that potential recovery under unjust enrichment and restitution theories are recognized where third parties have assumed costs of pollution remediation necessitated by defendant activities. *See, e.g., Little Hocking Water Ass'n, Inc. v. E.I. du Pont Nemours & Co., 91 F. Supp. 3d 940, 985-986 (S.D. Ohio 2015)* (observing that unjust enrichment may serve as an alternative theory of recovery where actual damages are too difficult to determine, but it would be unjust to allow the defendant to benefit from the savings it enjoyed without payment to the plaintiff) (citing cases). (R. 654, PageID # 15807-08).

normally **[*199]** establish a basis for recovery in a civil action in Ohio; rather, there must be an actionable wrong committed as a result of the conspiracy." *Glassner v. R.J. Reynolds Tobacco Co., 223 F.3d 343, 354 (6th Cir. 2000)* (*quoting* *NPF IV, Inc., v. Transitional Health Servs., 922 F. Supp. 77, 83 (S.D. Ohio 1996))*; *Hale v. Enerco Grp., Inc., 2011 U.S. Dist. LEXIS 781, 2011 WL 49545, at *5 (N.D. Ohio Jan. 5, 2011)* (reciting the elements of a cognizable conspiracy claim as "(1) a malicious combination; (2) two or more persons; (3) injury to person or property; and (4) existence of an unlawful act independent from the actual conspiracy") (citation and internal quotation marks omitted).

1. Unlawful Acts

Defendants argue that the cause of action should be dismissed "for failure to allege any actionable underlying tort" or an "underlying unlawful act." (R. 491-1, PageID# 7524; R. 497-1, PageID# 7613; R. 499-1, PageID# 7706-7708). With respect to the Manufacturers, as addressed above, Plaintiffs have sufficiently pled a claim for fraud—an intentional tort. In *Williams*, the Ohio Supreme Court found that the evidence supported a finding of a civil conspiracy where the defendants committed a fraud upon the plaintiff. *700 N.E.2d at 869*. With respect to the other Defendants, Plaintiffs also note that under Ohio law, "the unlawful acts of any one member of the conspiracy will satisfy the underlying unlawful act requirement". (R. 654, PageID# 15814, *quoting* *Hale, 2011 U.S. Dist. LEXIS 781, 2011 WL 49545, at *5* (citations and **[*200]** internal quotation marks omitted); *Williams, 83 Ohio St. 3d 464, 1998-Ohio 294, 700 N.E.2d 859, 868* ("[i]n a conspiracy, the acts of co-conspirators are attributable to each other.")). They contend that the complaint, moreover, alleges facts demonstrating that *each* Defendant engaged in unlawful acts supporting the causes of action therein. With the exception of the negligence claim, each of Plaintiffs' claims is based on alleged wrongful acts pursued "purposely, without a reasonable or lawful excuse" and therefore may serve to fulfill the underlying unlawful act element. *See* *Williams, 700 N.E.2d at 868*. Thus, the statutory public nuisance, Ohio RICO, and injury through criminal acts claims would also suffice.

2. Conspiratorial Agreement

Likewise, the Defendants' arguments that a conspiratorial agreement or malicious combination has not been alleged is not well taken. (R. 491-1, PageID# 7522-7524; R. 497-1, PageID# 7613-7614; 499-1, Page ID#7707). Pleading the existence of a malicious conspiracy requires "only a common understanding or design, even if tacit, to commit an unlawful act." *Gosden v. Louis, 116 Ohio App. 3d 195, 687 N.E.2d 481, 496-98 (Ohio Ct. App. 1996)*. "All that must be shown is that ... the alleged coconspirator shared in the general conspiratorial objective ...." *Aetna Cas. & Sur. Co. v. Leahey Const. Co., Inc., 219 F.3d 519, 538 (6th Cir. 2000)* (citation and internal quotation marks omitted). Direct evidence of an express **[*201]** agreement to undertake unlawful activity is rare and not required; a party may rely on circumstantial evidence to prove the claim. *Weberg v. Franks, 229 F.3d 514, 528 (6th Cir. 2000)*. The complaint alleges,

> Defendants conduct in furtherance of the conspiracy described herein was not mere parallel conduct because each Defendant acted directly against their commercial interests in not reporting the unlawful distribution practices of their competitors to the authorities, which they had a legal duty to do. Each Defendant acted against their commercial interests in this regard due to an actual or tacit agreement between the Defendants that they would not report each other to the authorities so they could all continue engaging in their unlawful conduct.

(R. 514 at ¶1130, *see also* ¶¶552-553, 764-766). Plaintiffs note that conduct against economic self-interest is recognized as a "plus factor" that may support the plausibility of alleged conspiratorial behavior. (R. 654, PageID# 15812, citing *In re Polyurethane Foam Antitrust Litig., 152 F. Supp. 3d 968, 989 (N.D. Ohio 2015))*. Furthermore, the complaint alleges that Defendants worked together to manipulate quotas (R. 514 at *e.g.* ¶¶526-528, 548, 550), and that their failure to comply with diversion prevention obligations (*id., e.g.,* ¶¶551-553, 565-566, 611-619) were mutually **[*202]** beneficial to all Defendants in the scheme to expand the opioid market (*id., e.g.* ¶¶760-766). The court has also discussed above the many allegations that the three sets of Defendants acted in concert and need not repeat those discussions here. Although Defendants fault Plaintiffs for not pleading with pinpoint accuracy, it is alleged that Defendants' activities were clandestine and hidden from the public. Prior to discovery, such precision cannot reasonably be expected, and Defendants' position goes well beyond the *Twombly* and *Iqbal* pleading requirements. Defendant's motion to dismiss Count Eleven should, therefore, be denied.

L. Statewide Concern Doctrine

The Manufacturers and Distributors argue that Plaintiffs' claims should be dismissed under the "statewide concern" doctrine, which "is a fundamental principle of Ohio law that... a municipality may not, in the regulation of local matters, infringe on matters of statewide concern." *Reading v. Pub. Util. Comm., 846 N.E.2d 840, 845-46 (Ohio 2016)* (quoting *State ex rel. Evans v. Moore, 69 Ohio St. 2d 88, 431 N.E.2d 311 (Ohio 1982)* (prevailing-wage law superseded local wage regulation)); *see also* *State ex rel. Villari v. Bedford Hts., 11 Ohio St. 3d 222, 11 Ohio B. 537, 465 N.E.2d 64 (Ohio 1984)* (calculation of employee benefits), *overruled on other grounds,* *State ex rel. Adkins v. Sobb, 26 Ohio St. 3d 46, 26 Ohio B. 39, 496 N.E.2d 994 (Ohio 1986)* (vacation-leave credits); *Cleveland Elec. Illum. Co. v. Painesville, 15 Ohio St. 2d 125, 239 N.E.2d 75 (Ohio 1968)* (transmission of electricity through high-voltage lines); *State ex rel. McElroy v. Akron, 173 Ohio St. 189, 181 N.E.2d 26 (Ohio 1962)* (licensing of watercraft). **[*203]** Defendants cite Ohio Supreme Court cases recognizing the general doctrine, but have not cited any Ohio authority holding that the doctrine applies to preclude *lawsuits* brought to vindicate rights under federal or state law. For instance, in *JP Morgan*, an Ohio appellate court refrained from making any ruling on that ground, offering only *dicta* to suggest that litigation might, under certain circumstances, constitute regulation. *2013-Ohio-1035, 2013 WL 1183332, at *6* ("The existence of regulation should not, itself, preclude [a nuisance] cause of action. This will often require more evidentiary development than available when ruling on a motion to dismiss.")

Plaintiffs argue that Ohio's Home Rule Amendment allows a sphere of joint authority where local regulation of police powers can co-exist with state regulation in general matters so long as the local regulation does not conflict with state law. *Ohio Const. Art. XVIII, § 3*; *American Financial Service Ass'n v. Cleveland, 112 Ohio St. 3d 170, 2006-Ohio 6043, 858 N.E.2d 776, 784 (Ohio 2005)*. Plaintiffs assert that they possess police powers, including the power to "adopt and enforce local health and safety measures" in order to "protect the public health, safety, or morals, or the general welfare of the public." *See* *Marich v. Bob Bennett Constr. Co., 116 Ohio St. 3d 553, 2008- Ohio 92, 880 N.E.2d 906, 911 (Ohio 2008)*. Therefore, Plaintiffs argue that this litigation presents no conflict with state law.

The Ohio Supreme Court has explained **[*204]** that even where the doctrine applies, it does not trump the state constitutional authority of municipalities to enact legislation pursuant to the Home Rule Amendment, provided that the local legislation is not in conflict with general laws. *American Financial Services*, on which Defendants rely, explains that "the Ohio Constitution's home-rule provision protects municipalities' authority to govern themselves, and it provides municipalities some authority to control local health and safety matters when the exercise of that authority does not conflict with general laws." *858 N.E.2d at 784*. To determine whether an ordinance is in 'conflict' with general laws, "the test is whether the ordinance permits or licenses that which the statute forbids and prohibits, and vice versa." *Id.* The only such conflicts Defendants mention are with the Ohio Attorney General's lawsuit over the opioid crisis and Distributors' unexplained citation to *O.R.C. §4729.01*. (R. 499-1, PageID# 7662; R. 491-1, PageID# 7515). Defendants argue that if both of these suits proceed, they would impermissibly split the claims at issue and "risk inconsistent rulings and duplicative recoveries...." (R. 499-1, PageID# 7662). Defendants, however, have identified no Ohio Supreme **[*205]** Court authority holding that, in such context, the statewide concern doctrine bars locally-originated municipal or county lawsuits seeking to remedy alleged injuries within their borders. Dismissal, therefore, is unwarranted.

M. Article III Standing

The Pharmacies move to dismiss to the complaint on the ground that Plaintiffs lack standing under Article III of the U.S. Constitution. (R. 497-1, PageID# 7595-7598). Article III standing requires: (1) an "injury in fact" (2) that is "fairly traceable to the challenged actions of the defendant, and not the result of the independent action of some third party not before the court" and (3) that is "likely to be redressed by the requested relief." *Bank of Am. Corp. v. City* of Miami, 137 S. Ct. 1296, 1302, 197 L. Ed. 2d 678 (2017); Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992). The Pharmacies assert that Plaintiffs have not suffered an "injury in fact" but only a "generalized grievance" and that Plaintiffs' injury is not "fairly traceable" to the Pharmacies' conduct. (R. 497-1, PageID# 7596-7597). They do not contest the third element.

1. Injury in Fact

For purposes of Article III standing, an injury cannot be based on a "generalized grievance" that "no more directly and tangibly" affects the plaintiff "than it does the public at large." *Lujan, 504 U.S. 555 at 574-575, 112 S. Ct. 2130, 119 L. Ed. 2d 351*. Cases assessing "generalized grievances" typically involve citizens **[*206]** challenging the propriety of governmental action. *Id. at 573, 576*. The cases the *Lujan* court used to illustrate what is meant by "generalized grievance" involved taxpayer lawsuits—not suits brought by governmental entities. *See, e.g., Valley Forge Christian Coll. v. Ams. United for Separation of Church and State, Inc., 454 U.S. 464, 474, 102 S. Ct. 752, 70 L. Ed. 2d 700 (1982)* (no standing where taxpayer sued Department of Health, Education and Welfare for allegedly discounted conveyance of government property to a Christian college); *U.S. v. Richardson, 418 U.S. 166, 94 S. Ct. 2940, 41 L. Ed. 2d 678 (1974)* (holding taxpayers' challenge to the government's failure to disclose CIA expenditures was a "generalized grievance"). *Lujan* itself involved a suit by an environmental advocacy organization challenging a rule promulgated by the Secretary of the Interior, ruling that plaintiffs had alleged an injury to the species in question, but not to themselves. *504 U.S. 555 at 577-578, 112 S. Ct. 2130, 119 L. Ed. 2d 351*.

The Defendants rely on *Richardson and Coyne v. American Tobacco Co., 183 F.3d 488 (6th Cir. 1999)* to support their conclusion that Plaintiffs allege only a generalized grievance. (R. 497-1, PageID# 7596). In *Coyne*, two Ohio local officials sued tobacco companies as private citizens—not in their representative capacities—alleging that the tobacco companies had caused the State of Ohio to expend public funds on health care costs caused by tobacco-related illnesses. *Id. at 491*. The Sixth Circuit held that these **[*207]** plaintiffs had asserted harms that affected the State as a whole and thus had only asserted a generalized grievance. The Pharmacies argue that Plaintiffs' alleged harms are like those in *Coyne*.

The court is not persuaded that Plaintiffs have alleged only a "generalized grievance." The plaintiffs in *Coyne, Lujan, Richardson*, and *Valley Forge Christian College* lacked standing because, as taxpayers, their harms were no different from those of all taxpayers. This is not the case here. Plaintiffs' allegations of extraordinary increases in public expenditures on hospitals, law enforcement, emergency and first responders, treatment of infants born with opioids-related medical conditions, and the criminal justice system constitute injury in fact. (R. 514 at ¶948).

2. Fairly Traceable

The Sixth Circuit has recently addressed the "fairly traceable" prong of the Article III standing test, explaining that it is a lower standard than proximate cause. *Parsons v. U.S. Dep't of Justice, 801 F.3d 701 (6th Cir. 2015)*. The *Parsons* court noted that "even an attenuated line of causation to the eventual injury" would suffice. *Id. at 713*; *United States v. Students Challenging Regulatory Agency Procs. (SCRAP), 412 U.S. 669, 688, 93 S. Ct. 2405, 37 L. Ed. 2d 254 (1973)*. The court explained that causation in this context "means more than speculative, but less than but-for." *Parsons, 801 F.3d at 714*. In short, so long as the causal **[*208]** link is more than merely speculative, a plaintiff's injuries will be deemed fairly traceable to the actions of the defendant.

The Pharmacies argue that any link between Plaintiffs' alleged harm and their own alleged failure to monitor and report suspicious orders is wholly speculative and does not meet even the relaxed standard of causation associated with the "fairly traceable" requirement for Article III standing. Plaintiffs have alleged that all Defendants, including the Pharmacies, failed to monitor, report, and prevent the diversion of prescription opioids and that this failure has caused Plaintiffs to incur extraordinary municipal costs. (R. 514 at ¶¶555-556, 579-606, 607-659, 934). The court finds these allegations are sufficient. Because Plaintiffs have plausibly pleaded an injury in fact that is fairly traceable to the actions of Defendants, the claim that Plaintiffs lack Article III standing to bring this action should be denied.

IV. Conclusion

After fully considering the second amended complaint and the memoranda in support and against dismissal, it is recommended that the Manufacturers', Distributors' and Pharmacies' separate Motions to Dismiss (R. 491, R. 497, R. 499) be **[*209]** GRANTED in part and DENIED in part. Specifically, it is recommended that the motions be GRANTED with respect to the common law absolute public nuisance claim contained in Count Six, and GRANTED with respect to the City of Akron's statutory public nuisance claim in Count Five to the extent it is based on violations of Ohio or federal drug laws, or the rules of the board of pharmacy. In all other respects, it is recommended that the motions be DENIED.

Opinion

[*624] PUBLIC VERSION

MEMORANDUM OPINION

This matter is before the Court on PLAINTIFF STEVES AND SONS, INC.'S MOTION FOR EQUITABLE RELIEF (ECF No. 1191), which the parties addressed through briefs before and after the evidentiary hearing on equitable remedies ("the Remedies Hearing"). For the reasons set forth below, PLAINTIFF STEVES AND SONS, INC.'S MOTION FOR EQUITABLE RELIEF (ECF No. 1191) will be granted in part and denied in part.

GENERAL BACKGROUND

On June 29, 2016, Steves and Sons, Inc. ("Steves") filed this action against JELD-WEN, Inc. ("JELD-WEN") by filing a COMPLAINT FOR INJUNCTIVE AND DELCARATORY RELIEF, DAMAGES AND SPECIFIC PERFORMANCE (ECF No. 1). The Complaint contained six counts, including COUNT ONE which alleged a violation of *Section 7 of the Clayton Act*, § *15 U.S.C. § 18*, and sought damages **[**7]** under *Section 4 of the Clayton Act*, and injunctive relief under *Section 16 of the Clayton Act*, all by virtue by an allegedly illegal merger that occurred in 2012 but that subsequently substantially lessened competition in the so-called molded interior doorskin market. COUNT TWO alleged various breaches of contract. Steves voluntarily dismissed COUNT THREE (Breach of Warranty), COUNT FIVE (Specific Performance), and COUNT SIX (Trespass to Chatels). In COUNT FOUR, Steves sought declaratory relief and that claim remains for decision by the Court.

COUNTS ONE and TWO were tried to a jury and the jury returned a verdict in favor of Steves on both the antitrust claim and the breach of contract claims. Steves' claim for equitable relief is based on the jury's finding of liability on the antitrust violations in COUNT ONE and arises by virtue of *Section 16 of the Clayton Act*.

By agreement of the parties, the record in the antitrust and breach of contract trial is part of the record upon which the decision respecting Steves' motion for equitable remedies will be decided. In addition, the Court conducted a three day evidentiary hearing during which the parties presented additional evidence on the issues of equitable relief. **[**8]**

Equitable relief under *Section 16 of the Clayton Act* must be tethered to the alleged violation of *Section 7 of the Clayton Act* found by the jury. It is therefore appropriate briefly to summarize the evidence upon which the jury found that JELD-WEN had violated *Section 7 of the Clayton Act*.

The product at issue in this litigation is called an interior molded doorskin. It is created by pouring a moist, softened fibrous material (treated with resin and wax) into a mold and then subjecting it to heat and pressure. The doorskin is a component part of an interior molded door which is made with a four-sided wooden frame and certain filling material to which the molded doorskin is glued. The doorskin provides the decorative covering for the front and the back of the door. The end product resembles a solid wood door but is much lighter and can be made and shipped at a considerably lower cost than a solid wooden door.

Steves and JELD-WEN both sell interior molded doors. JELD-WEN also makes **[*625]** doorskins, some of which it uses to make its own doors, and some of which it sells to independent door manufacturers (the "Independents") of which Steves is one. Steves has never made its own doorskins and has to purchase doorskins from **[**9]** doorskins manufacturers.

From 2001 to 2012, there were three manufacturers from which the Independents, including Steves, could purchase doorskins: Masonite Corporation, JELD-WEN, and Craftmaster International ("CMI"). All three were vertically integrated manufacturers of doorskins and interior molded doors. In 2011, Steves was negotiating for possible long-term supply contracts with all three manufacturers. In May 2012, JELD-WEN and Steves entered into a long-term supply agreement (the "Supply Agreement") that was to last for seven years and that contained an evergreen provision by which the contract was automatically renewed annually if notice of termination was not given in accord with the provisions of the Supply Agreement. In June 2012, JELD-WEN announced that it intended to acquire CMI and the acquisition was completed in October 2012.

The jury found that, as a consequence of the merger and JELD-WEN's conduct in 2014 and thereafter, competition was substantially lessened in the doorskin market and that, as a result, Steves sustained injuries of the type that the antitrust laws were designed to prevent. Thereupon, the jury awarded Steves $58,632,454.00 in antitrust damages which, **[**10]** when trebled as required by statute, amounts to antitrust damages in the amount of $175,897,362.00. The jury also found that JELD-WEN had breached Sections 1, 6, and 8 of the Long Term Supply agreement and awarded damages in the amount of $12,151,873.00 on account of those breaches. That award will be reduced by $2,188,271.00 because the Court granted JELD-WEN, INC'S MOTION FOR JUDGMENT AS A MATTER OF LAW AGAINST STEVES & SONS, INC. (ECF No. 1773).

As a primary equitable remedy, Steves asks the Court to order JELD-WEN to divest Towanda (formerly part of CMI) to restore competition in the doorskin market. Steves also asks the Court to impose certain so-called "behavioral" or "conduct" remedies, including restrictions and obligations on JELD-WEN, to the end that the divested entity will be able to successfully operate as a stand-alone independent business or to be successfully combined with the assets of the acquiring party so as to become an effective competitor. To those ends, Steves contends that the equitable remedy of divestiture must be accompanied by the following conduct remedies:

> (1) transfer of all tangible assets and likes necessary to develop, manufacture, and sell doorskins at Towanda; **[**11]**
> (2) a transfer of licensing of all intangible assets used in the development, manufacturing, and sale of molded doorskins at the Towanda facility to include:
> - Transfers or licenses to the purchasing entity of patents used to make doorskins, schematics or designs used to manufacture doorksins, customer lists, vendor lists, and know-how in trade secrets to operate the facility
>
> (3) an Order assuring that the acquiring entity can retain the services of the employees currently operating the Towanda facility;
> (4) an Order prohibiting JELD-WEN from hiring their employees for at least two-year transitional period;
>
> **[*626]** (5) a provision requiring the divested entity to offer an eight-year long-term supply agreement to Steves at reasonable prices and terms (based on the LTSA);
> (6) a provision allowing independent door manufacturers like Lynden, Haley, and Excel to terminate their supply agreements with JELD-WEN without penalty; and
> (7) a provision allowing JELD-WEN to be allowed to buy doorskins from the divested entity for a period of two years, the so-called transition period.

At the trial on the merits, Steves proved, by a preponderance of the evidence that, before JELD-WEN acquired CMI in 2012, there **[**12]** was a competitive doorskin market with three vertically integrated suppliers. Indeed, the evidence showed, and the Court finds, that the competition among those three suppliers was vigorous and quite effective. The merger reduced the number of suppliers to two. Steves also proved that the merger substantially lessened competition in the doorskin market. The issue now to be decided is how competition can be restored, and whether divestiture of Towanda (without or along with the requested conduct remedies) is the correct, and, as Steves urges, indeed the only way to do that.

I. FINDINGS OF FACT

In making the decision about equitable relief, it is necessary to respect and apply the jury's findings which are binding factual findings and then for the Court to make factual findings based on the trial record and the record at the Remedies Hearing.

A. Jury Findings

The jury found that "JELD-WEN's acquisition of CMI violated *Section 7 of the Clayton Act*." (ECF No. 1022, ¶ 1). The jury also found that "JELD-WEN's violation of the *Clayton Act* caused an injury to Steves that was of the type that the antitrust laws were intended to prevent." (ECF No. 1022, ¶ 2). As to antitrust damages, the jury found:

> 3. (a) **[**13]** As to COUNT ONE, we, the jury, find by a preponderance of the evidence, that the plaintiff is entitled to damages for antitrust injuries ***already sustained*** as a result of the following conduct (if none, write "0"):
>
> (1) JELD-WEN's overcharging Steves for doorskins (other than Madison or Monroe)
> $8,630,567
> (2) JELD-WEN's overcharging Steves for Madison and Monroe doorskins
> $1,303,035
> (3) JELD-WEN's shipping defective doorskins to Steves and failing to reimburse Steves for those doorskins
> $441,458
> (4) JELD-WEN's refusing to reimburse Steves for the cost of doors that incorporated defective doorskins
> $1,776,813
>
> (b) As to COUNT ONE, we, the jury, find by a preponderance of the evidence, that the plaintiff is entitled to damages in the amount of $46,480,581 for ***future lost profits***. If none, write "0."

Those findings are binding on the Court.

B. Factual Findings by the Court

The Court finds the following facts that pertain to the issues of equitable remedies as the parties have emphasized them in the briefing. Additional fact findings are set out along with topics to which they **[*627]** relate in the Conclusions of Law. All findings of fact are proved by a preponderance of the evidence.

1. Interior Molded Doorskin [14] Market in 2001**

As explained above, Steves and JELD-WEN were in 2012, and are now, participants in the interior molded doorskin market in the United States. Steves is an independent door manufacturer that has never produced its own doorskins. As a result, it must purchase doorskins from doorskin manufacturers. JELD-WEN, however, is a vertically integrated door manufacturer, meaning that it both produces doorskins and uses them internally to manufacture and sell finished doors.

Before 2001, JELD-WEN and Masonite were the only doorskin manufacturers in the United States. In the 1970s, Masonite had built a manufacturing facility in Towanda, Pennsylvania ("Towanda"), the facility that is at the center of Steves' request for equitable relief.

In 2000, Masonite was owned by a parent company, International Paper Company. Masonite primarily sold doorskins made at Towanda to Premdor, Inc., but it also sold to eleven other independent door manufacturers. Towanda, as a part of Masonite, did not have "standalone administrative departments" with research and development, accounting, or sales and marketing capabilities; those services were instead provided from separate locations by either Masonite **[**15]** or International Paper.

In 2000, Premdor agreed to buy all of Masonite, including Towanda, from International Paper. However, after Premdor's competitors expressed concerns to the Department of Justice ("DOJ") about the effect of the acquisition on the supply of doorskins, International Paper and Premdor reached a settlement with the DOJ. Pursuant to that settlement agreement, Towanda would be divested and set up as a separate entity to be known as Craftmaster International, Inc. ("CMI").

CMI was to serve as a doorskin supplier to Masonite and JELD-WEN and other customers among the Independents. CMI was then incorporated on September 1, 2001, after Premdor's purchase closed. In March 2002, following an auction sale, CMI was purchased by its new owners, who also owned two of the Independents, Haley and Woodgrain.

When CMI was incorporated, International Paper and Masonite also entered into certain agreements with CMI to enable it to function as an independent entity. First, International Paper and Masonite would provide administrative and technical support services to CMI until it could set up its own services—a process that eventually took longer than a year. Second, CMI and Masonite **[**16]** would be given three years to manufacture the dies needed to produce certain types of doorskins, so that both entities could offer the same complement of doorskins to their customers. Even though Towanda and Masonite's doorskin manufacturing plant in Laurel, Mississippi ("Laurel") were "very similar," certain products were made only at Towanda, and some were made only at Laurel. Similarly, CMI would sell doorskins to Masonite, and vice versa under set terms for three years to help assure that CMI would prosper going forwards. Finally, CMI received a royalty-free license to use such of Masonite's intellectual property as was necessary to manufacture doorskins at Towanda.

2. CMI's Performance as Independent Doorskin Supplier Before the Merger: 2002-2012

According to Bob Merrill ("Merrill"), the former CEO of CMI, and a current JELD-WEN executive, CMI did not become a **[*628]** "completely standalone entity" until a little more than two and a half years after it was divested from Masonite. CMI's initial financial performance was strong because it could control costs and reduce overhead through the separation agreements, and the housing bubble increased demand for new homes and for doors, and in turn, **[**17]** component supplies like doorskins. For instance, in 2006—a year after the peak of the housing bubble—CMI's net sales were [ ], and its profitability was [ ], calculated as earnings before interest, taxes, depreciation, and allocations ("EBITDA").[1] The Independents, including Steves, also benefitted from increased competition between CMI, Masonite, and JELD-WEN, each of which tried to create and sell new styles of doorskins as part of their efforts to win customers.

CMI also used Towanda to manufacture two so-called "trim board" products, MiraTEC and Extira. Masonite had started the MiraTEC business in 1998, but it had yielded only about [ ] in revenue (and negative EBITDA) by the time Towanda was divested in 2001. However, CMI viewed both MiraTEC and Extira as undeveloped products that held considerable promise and "worked to grow [them] aggressively." As a result, those products' financial performance "grew rapidly," and they were responsible for over [ ] in revenue and more than [ ] of EBITDA at CMI's peak in 2006. Moreover, they were important contributors to CMI's overall business after the housing bubble burst; indeed, Merrill testified that they were "the only thing that really **[**18]** kept [CMI] afloat."

Like Masonite, CMI initially sold doorskins to eleven Independents in the United States and Canada. But beginning in 2003, CMI's customer base contracted significantly because eight of those eleven customers were acquired by companies to which CMI did not sell doorskins. In addition, CMI had only one long-term doorskin supply agreement, which ended when that customer was acquired by Masonite. This customer consolidation significantly reduced the volume of doorskins that CMI could sell. Consequently, the company took a cue from JELD-WEN and Masonite and "forward integrat[ed]" from 2005 to 2010, buying two door manufacturers and building two door manufacturing plants to allow the company to more efficiently use the doorskin volume produced by Towanda—that is, by selling doorskins internally as well as externally. By 2011, CMI's internal doorskin sales constituted nearly 40% of its total doorskin sales.

---

[1] EBITDA is a "surrogate . . . for cash flow" that investors use as an approximate measure of an entity's profitability.

There is a dispute respecting the performance of Towanda's doorskin business from 2009 to 2014. Steves relies on PTX 341 and PTX 342 to show that, looking only at the doorskin business, Towanda posted positive EBITDA annually from 2009 through 2013 and that there was **[**19]** positive, albeit not sizeable, EBITDA projected for 2014. And, that is what those documents show.

The record is not entirely clear as to the provenance of PTX 341 and 342, but the record does prove that JELD-WEN prepared these figures based both on historical CMI records (for 2009 through 2012) that were acquired in the merger and on JELD-WEN's own records thereafter. And, JELD-WEN used these documents to make business and strategy decisions. Thus, even though their provenance is not entirely clear, the record shows that they are reliable and probative of the state of **[*629]** the doorskin business at Towanda for the period involved.

JELD-WEN takes the view that the profitability of Towanda in 2011 and 2012 should be determined by CMI's audited financial statements, DTX 191, and by the information that JELD-WEN gave to the DOJ in August 2012, DTX 60. And, JELD-WEN says that the most important evidence on that point came from the testimony of Bob Merrill at the Remedies Hearing where Merrill testified that the figures in PTX 341 and 342 were not consistent with documents that he had seen.

The Court does not credit DTX 191 or DTX 60 on the issue of the profitability of the doorskin business at Towanda **[**20]** because those documents reflect information about CMI as a whole, not just Towanda's doorskin business. And, CMI had other businesses such as the door business and the trim business (MiraTEC and Extira) and locations other than Towanda.

Nor can the Court credit Merrill's testimony. If, as he said was the case, Merrill had documentary evidence to refute the proofs that appeared in PTX 341 and 342, those refuting documents would have, indeed should have, been produced. They were not. As a result, Merrill's testimony on the profitability of the doorskin business at Towanda for the time period involved is rejected as not reliable.

The evidence on this issue is probative in the remedial phase of these proceedings because, to find that divestiture is an appropriate remedy, the Court must be satisfied that a divested Towanda can operate competitively and profitably in the doorskin market. And, the fact that Towanda did that in the past, even in the face of adverse market conditions, is evidence that supports a finding that a divested Towanda could do so now.

In any event, it is not disputed that CMI, as an entity, was in difficult financial straits in 2011 and 2012 before the merger. CMI certainly **[**21]** was not profitable then, even with a slightly positive EDITDA from the doorskin business and a positive contribution from the Miratec and Exitera lines.

Indeed, by 2011, CMI's owners had been forced to invest their own funds into CMI to support its cash flow. Thus, after exploring several options, they decided to sell the company by putting it up for auction. As part of that process, they engaged an investment firm that worked with CMI's management to prepare offering documents, send out teaser memos to prospective buyers, and solicit bids from interested entities. One such entity was Steves, which, in October 2011, offered to invest [ ] in CMI in exchange for a minority ownership stake in the company. See DX-462 at 6. CMI's owners rejected the offer, and Steves did not pursue that possibility any further. CMI then identified what management considered to be the "serious prospective buyers" (either four or five) that had submitted purchase bids, and selected JELD-WEN and Masonite as the finalists. JELD-WEN was ultimately chosen as the buyer because of concerns about Masonite's intentions for CMI's door manufacturing plants.

In sum, CMI's doorskin business was quite profitable, and CMI **[**22]** was a competitive factor in the doorskin market from the time of its creation until the housing crisis. Even during the housing crisis, the doorskin component of CMI's business (i.e., Towanda) fared adequately (with slightly positive EBITDA). But, by 2011, it was necessary to put the entirety of CMI up for sale. And, even under those conditions, there were several serious buyers.

[*630] 3. JELD-WEN's Acquisition of CMI and Execution of the Supply Agreement with Steves

JELD-WEN was interested in acquiring CMI for three main reasons: (1) the availability of doorskins of a certain height that were made at Towanda; (2) the lower costs and higher efficiency of Towanda; and (3) the possibility of manufacturing MiraTEC and Extira (so-called "trim" products) at Towanda in addition to doorskins. JELD-WEN wanted to maintain CMI's doorskin volume, so it entered into long-term supply agreements with three of CMI's existing customers: Haley, Woodgrain, and Lynden Door ("Lynden"). The first two contracts were agreed to as part of JELD-WEN's acquisition of CMI ("the CMI Acquisition") because Haley and Woodgrain were also owned by CMI's owners. See PTX-115 ¶ 1.

In 2011, JELD-WEN and Steves were parties to a **[**23]** long-term doorskin supply agreement that they had executed in 2003. But, in 2011, JELD-WEN terminated that agreement. Later in 2011, Steves initiated discussions with JELD-WEN about another long-term supply agreement. And, as part of its plan to secure merger approval, JELD-WEN entered into the current Supply Agreement.

Thus, it was that, on May 1, 2012, Steves and JELD-WEN entered into the Supply Agreement, pursuant to which Steves would purchase doorskins from JELD-WEN on defined terms. Stipulation of Undisputed Facts (ECF No. 1003-1) ("Stip.") ¶ 10; see also Supply Agreement (PTX-149) at 1. Those terms applied to "the full range of JELD-WEN molded doorskin products." Supply Agreement § 1. The Supply Agreement would be in effect through December 31, 2019, but would automatically renew for a successive seven-year term unless either party terminated the contract. Id. § 2. Steves could terminate the Supply Agreement for any reason upon two-year written notice to JELD-WEN, and JELD-WEN could likewise terminate it without cause upon seven-year written notice to Steves. Id. § 3(a)(2)(b).

The doorskin prices that JELD-WEN could charge Steves varied according to a contractually defined formula based on JELD-WEN's **[**24]** key input costs. The Supply Agreement, in fact, obligated JELD-WEN to give Steves annual notice of the prices and input costs for the coming year by November 30, and JELD-WEN could not impose any price increases if it failed to do so. Id. § 6(c). Although Steves had to purchase at least 80% of its interior molded doorskin requirements from JELD-WEN, Steves could purchase any quantity of doorskins from another supplier that offered a price at least 3% lower than JELD-WEN's purchase price, after JELD-WEN had the chance to match that lower price. Id. § 4. Beyond those pricing provisions, the contract required JELD-WEN to provide Steves with doorskin products of satisfactory quality. If any doorskins were defective, JELD-WEN would have to reimburse Steves for the cost of those doorskins, but only after JELD-WEN's inspection and verification of the defect. Id. § 8. Reimbursements for any other costs beyond the price of the doorskins were to be negotiated on a case-by-case basis, Supply Agreement § 8, such that they were never mandatory.

Finally, any disputes under the Supply Agreement were to be resolved under a rather protracted alternative dispute resolution process. Only when that process was exhausted **[**25]** could a party begin litigation. That process would begin with an internal conference between the parties' senior executives. If they could not reach a resolution within thirty days of the dispute being submitted, the parties would have to proceed to mediation. A lawsuit could then be filed only where mediation had failed to **[*631]** yield a solution to the parties' disagreement. Id. § 10.

On July 18, 2012, soon after executing the Supply Agreement, JELD-WEN publicly announced the CMI Acquisition, Stip. ¶ 9, the completion of which was contingent on regulatory approval by government agencies, see PTX-115 ¶ 5; DX-50 § 6.1. Early in 2012, JELD-WEN and CMI had decided to preemptively request approval of the transaction from the DOJ because executives from both companies had been involved in Premdor's acquisition of Masonite, and were therefore aware of the problems that DOJ review could pose. The record is clear that JELD-WEN decided to approach the DOJ only after it had entered into long-term supply contracts with the Independents, knowing that this oft-used tactic would assuage the concerns of the DOJ and the Independents about anticompetitive effects of the proposed merger.

After JELD-WEN approached the **[**26]** DOJ, the agency's Antitrust Division notified JELD-WEN that it had opened a preliminary investigation into the proposed CMI Acquisition. Representatives of CMI and JELD-WEN—Merrill and James Morrison ("Morrison"), respectively—then gave presentations to the DOJ about the Acquisition. See DX-60; DX-54. That presentation emphasized that JELD-WEN had entered into long-term supply contracts with the Independents. Thereafter, the DOJ also contacted Steves, which told the DOJ that it did not oppose the merger because it believed that the Supply Agreement would prevent JELD-WEN from taking any anticompetitive actions. The Antitrust Division subsequently closed its investigation on September 28, 2012, see DX-48, and the Acquisition was completed on October 24, 2012. Stip. ¶ 8. The final purchase price paid by JELD-WEN was [ ].

4. JELD-WEN's Integration of CMI's Operations

Following the merger, JELD-WEN made some general administrative changes. For instance, it closed CMI's head office in Chicago and two of CMI's four door manufacturing plants, and transitioned CMI's human resources, payroll, insurance, safety, environmental, and health and benefits functions into JELD-WEN's organizational structure. **[**27]** DX-933 at 2. Although JELD-WEN and CMI accounting managers were supposed to develop an integration plan, see DX-933 at 2, the accounting systems for Towanda and for JELD-WEN's "legacy plants" (the doorskin plants that it originally owned and developed) remain separate, with Towanda using different accounting software. Similarly, the consolidation of JELD-WEN's and CMI's operations has apparently not affected certain interactions with customers, at least from Steves' perspective. Steves still orders and pays for doorskins from Towanda in the same way it did before the CMI Acquisition; the same is true for Steves' orders of, and payments for, doorskins from JELD-WEN's legacy plants.

At the time of the merger, JELD-WEN operated a doorskin plant in Marion, North Carolina ("Marion" or "the Marion plant"). However, Marion's design prevented it from meeting environmental regulations, and bringing the plant up to standard was projected to be costly and time-consuming. In addition, Marion was both inefficient and unprofitable, with old equipment in poor condition. On the record as a whole, the Court finds that the Marion plant was closed because of the projected cost to bring it into compliance **[**28]** with environmental regulations, and the projected cost to improve its old and ill-maintained operational equipment, not because of the acquisition of CMI.

[*632] Nevertheless, the acquisition of CMI allowed JELD-WEN to move Marion's doorskin production to Towanda. Moving Marion's doorskin production to Towanda—a very efficient and less cost-intensive plant—would therefore enable JELD-WEN to save around [ ] in manufacturing costs, and would eliminate [ ] in fixed costs associated with maintaining Marion as an operational plant. JELD-WEN mothballed Marion in June or July 2013.

In 2011, JELD-WEN had determined that its Dubuque plant was "[i]mpaired," PTX-668 at JW-CIV-00369666, which is analogous to a decision to close the plant. Because Dubuque was situated in an urban environment that was not conducive to doorskin manufacturing, it was JELD-WEN's second-most expensive fiber facility. The location of the Dubuque plant restricted JELD-WEN's ability to perform necessary environmental control tasks. DX-935 at 2. Dubuque would have been closed in 2011, but closure in 2011 was not practical because of startup problems and doorskin quality issues that were occurring at JELD-WEN's newly-opened plant **[**29]** in Dodson, Louisiana ("Dodson"). PTX-668. Once JELD-WEN acquired CMI, it closed the Dubuque plant because the capacities of Dodson and Towanda together rendered Dubuque's doorskin production unnecessary to overcome the problems at the Dodson plant. See DX-935 at 2, 5. JELD-WEN sold Dubuque in or around August 2016. Morrison, who recommended that Dubuque be closed and sold, testified that he would not have made that recommendation if the CMI acquisition had not occurred or if there was a reasonable chance that JELD-WEN would have to divest Towanda. For reasons set forth later, the Court declines to credit Morrison's testimony, finding him to be an untruthful witness. But, apart from that, the record shows that JELD-WEN had determined to close Dubuque before the merger.

JELD-WEN also made certain process changes at the Towanda facility after the CMI Acquisition. It spent around [ ] to install its own manufacturing processes at Towanda by the end of 2013. Among other changes, JELD-WEN: switched the primer used to JELD-WEN primer instead of more expensive third-party primer; reduced the amount of petroleum wax and resin used to make doorskins; enabled Towanda to make lower density doorskins **[**30]** and thereby save on specific component costs; improved the humidization process; and reduced the thickness of doorskins. DX-933 at 3. The changes made by JELD-WEN to the manufacturing process also have resulted in annual savings on doorskin manufacturing costs. The record is that the [ ] expense yielded annual savings of approximately [ ]. See DX-190 at 2. On this record as a whole, the Court finds that, because all of these processes were useful, and used, in other facilities, they would have been implemented in any event and are not attributable to the merger.

After the merger and over time, JELD-WEN made capital improvements to Towanda in order to improve the state of the facility and to decrease the doorskin defect rate. These investments included: (1) adding new doorskin dies, coating equipment, refiners, steam injection valves, a coating manufacturing plant to produce primer at Towanda, and a hydraulic commander to enhance doorskin fiber quality; DX-909 at 13; (2) replacing a line stacker that suffered from quality issues, the sprinkler system, malfunctioning mat separation conveyors, a fiber bin with water infiltration problems, and pressure pumps; DX-909 at 13-14; (3) repairing **[**31]** roofs to prevent water infiltration; DX-909 at 13; and (4) upgrading the doorskin coating process and boiler operating system. DX-909 at 14; DX-917.

[*633] These steps cost JELD-WEN around [ ] in 2015 and [ ] in 2016. DX-909 at 13-14. All told, JELD-WEN estimates that it spent approximately [ ] in capital improvements from July 2014 to July 2017). The investments have generated benefits for JELD-WEN. Many of the improvements noted above were deemed "high return on investment projects," meaning that their projected annual savings were only slightly less than their initial costs. DX-909 at 13-14. And, the record shows that the total returns from those projects to date exceed their total expense.

Through Morrison, JELD-WEN offered evidence that it would not have pursued them if there was a possibility that the CMI Acquisition would not be consummated or that divestiture would be required. As explained, the Court simply does not find Morrison to be a credible witness.

However, it is, of course, self-evident that JELD-WEN would not have made changes to Towanda if the CMI acquisition had not been consumated, because JELD-WEN simply could not have done that. So that aspect of Morrison's testimony is **[**32]** disingenuous. And, the record is that JELD-WEN has known of the risk of divestiture since mid-2015 and still has made many changes to, and investment in, Towanda. So the record disproves that aspect of Morrison's testimony.

JELD-WEN also asserts that, because it acquired CMI, it was able to modify the doorskin designs ("SKUs") manufactured at each of its doorskin plants. After acquiring Towanda, JELD-WEN had four operational plants, but each one does not produce all the different SKUs offered to customers—both because of increased demand for certain SKUs in different parts of the United States, and because of some plants' inability to make certain SKUs given their actual production capacity (which accounts for the die changes necessary to produce a specific quantity of doorskins in a given amount of time).[2] Instead, in 2013, the company began using a statistical tool called a mix model to examine, every quarter, which particular SKUs should be produced at specific doorskin plants—in other words, how the total "mix" of SKUs should be allocated so that each plant's capacity is utilized most efficiently. The mix model accounts for a number of variables, including the overall sales of specific **[**33]** SKUs externally, to independent door manufacturers, and internally, to JELD-WEN's door manufacturing plants; the current and required location of different doorskin dies; and a freight analysis, which measures the freight costs associated with shipping doorskins from the four plants to the buyers' locations.

The record shows that JELD-WEN would have developed the mix model whether or not it had acquired CMI. However, the record shows that having product from Towanda to use in the mix model provides some unquantified measure of savings to both JELD-WEN's internal customers and its external customers. That is because the model helps to balance doorskin production across four plants in different regions of the United States, thereby reducing transit times and freight costs. If one plant, such as Towanda, is closed or divested, then JELD-WEN's internal and JELD-WEN's freight-paying customers that received doorskins from that plant might pay higher freight costs because the doorskins would need to be shipped from another plant, from **[*634]** potentially much farther away.[3]

---

[2] A die is a tool used to create a specific doorskin design. Because a plant cannot run all its dies simultaneously, the dies in service are rotated as needed to meet JELD-WEN's doorskin design needs. However, die changes increase downtime, reducing production efficiency and, in turn, production capacity.

[3] JELD-WEN decides which plants will supply particular doorskins to customers. Accordingly, even if Steves orders doorskins from Towanda, JELD-WEN may supply those doorskins from Dodson or one of its West Virginia plants. Because the mix model

Similarly, a customer who received its doorskins primarily from Towanda would not be able to receive every SKU from other plants **[**34]** without substantial changes to JELD-WEN's mix allocation. JELD-WEN says that would cause production inefficiencies and reduced capacity that would inflate JELD-WEN's doorskin prices. All of these apprehended consequences of divestiture were posited in general terms, but JELD-WEN offered no quantification of the apprehended cost increase.

The mix model also led to related changes in JELD-WEN's operations, such as a doorskin consolidation process that eliminated trade matches and redundant SKUs between JELD-WEN and CMI. That process cost around [ ] and took a year to complete. DX-917. This modification affected SKU availability at both Towanda and JELD-WEN's legacy plants. However, much like JELD-WEN's manufacturing process changes and capital improvements at Towanda, that project "paid for itself" within a relatively short period after it was finished. And, the record is that the mix model would still be used and useful in the event of divestiture. It would just operate differently.

Finally, JELD-WEN improved the MiraTEC and Extira business, which is independent of JELD-WEN's doorskin manufacturing business at Towanda. According to Merrill, JELD-WEN is the only company that currently **[**35]** makes both trim and doorskin products.

JELD-WEN has devoted significant resources to growing the MiraTEC and Extira business, which was responsible for around [ ] of Towanda's [ ] EBITDA in 2017. Moreover, exterior trim and panel products like MiraTEC and Extira are "key anchor products" that have allowed JELD-WEN to pursue expansion into the general building products industry, which involves other exterior components that JELD-WEN does not yet make, like siding and fencing. Based on this planned development, JELD-WEN's current CFO, L. Brooks Mallard ("Mallard"), has projected 2018 revenues and EBITDA for JELD-WEN of [ ] and [ ], respectively. See Apr. 12 Remedies Tr. at 710:19-711:21; DX-928 at 2-4.

Nothing in the record suggests that, in the event of divestiture, MiraTEC and Extira products made by an entity other than JELD-WEN could not be sold to JELD-WEN's existing customers for those products. But, if that is the case, the new owner of Towanda, not JELD-WEN, would be receiving the net revenues and the EBITDA generated by those sales.

5. Post-Merger Interactions Between Steves and JELD-WEN

Pursuant to the Supply Agreement, JELD-WEN supplied doorskins to Steves in 2012 and 2013. It **[**36]** is helpful to understand certain provisions of the Supply Agreement that were central to the antitrust violations found by the jury and that are important to the conduct of the parties.

Section 6a of the Supply Agreement sets forth the Initial Price of the doorskins to be supplied to Steves by reference to Schedule 1. Section 6b of the Supply Agreement provides that the "Initial Price shall remain in effect for the duration of this Agreement unless a price increase or **[*635]** decrease takes place in accordance with the terms hereof." Compl. Ex. A. Section 6c sets out the adjustment mechanism for the price increases or decreases that are referred to in Section 6b.[4] Section 6c provides that price adjustments are to be made with references to what are called "key input costs" for Raw Material (wood; resin, wax, oil, and sealer; paint; and packaging) and for Energy (electric power prices, natural gas prices, boiler fuel. (Compl. Ex. A, § 6(c), Sch, 2.)

The record shows that, after the merger, JELD-WEN's key input costs declined every year. Steves' damages expert, Avram Tucker ("Tucker"), testified that, based on his assessment and calculations, JELD-WEN had not disclosed to Steves the full extent of the cost decreases.

"balance[s] the mix across the group," the plant identified by the customer might not make the requested SKU, or might not have sufficient volume for supply from that location to be most efficient for all customers.

[4] By making the damage award in paragraph 3(a)(1) of the Verdict Form, the jury had to conclude, based on the evidence, that Section 6c operated to measure both price increases and price decreases. That is proved by the testimony of the negotiators and the evidence about how the parties administered the contract.

And, notwithstanding these declining **[**37]** costs, JELD-WEN, in 2013, 2014 and 2015, increased the prices that it charged Steves to purchase doorskins under the Supply Agreement.[5] Tucker determined that JELD-WEN had overcharged Steves a cumulative amount of 7.87% in the years following the CMI Acquisition. Steves' antitrust expert, Carl Shapiro ("Shapiro"), testified that other JELD-WEN customers without a supply agreement, such as Excel, Unidoor, and ABS, experienced even greater price increases. Documentary evidence from JELD-WEN's files confirms that testimony. In addition, JELD-WEN charged Steves markedly higher prices for the Madison and Monroe styles of doorskins because JELD-WEN took the view that they were outside the scope of the Supply Agreement, a view that the jury rejected.

As Shapiro explained, JELD-WEN's pricing decisions were a consequence of JELD-WEN's enhanced market power after the CMI Acquisition. Following the merger, JELD-WEN and Masonite were the only two doorskin suppliers in the United States. Steves believed, as found above, that the Supply Agreement would protect it from any anticompetitive activity. Then, in July 2014, Orsino's replacement as JELD-WEN's CEO, Kirk Hachigian ("Hachigian"), sent Steves **[**38]** a presentation made by Masonite on a publically available telephone call for its investors in which Masonite's CEO made clear that Masonite would not sell doorskins to companies that competed with it in the North American door market, as Steves did. Shortly thereafter, in September 2014, Hachigian sent Steves a notice of termination of the Supply Agreement, effective September 10, 2021.[6] That letter followed Steves' rejection of Hachigian's demand to add to the normal doorskin prices permitted under Section 6b of the Supply Agreement a so-called "capital charge," which (according **[*636]** to Hachigian) was to help offset the cost of making capital improvements to JELD-WEN's facilities that made the doorskins sold to Steves. Nothing in the contractual pricing provisions of the Supply Agreement allowed a capital charge.[7] Although these events made Steves concerned about its ability to obtain an adequate doorskin supply, Steves did not terminate the Supply Agreement (as it could have done) to seek a supply elsewhere because Steves believed that there was no viable supply alternative.

In 2014, Steves also experienced a change in the way that JELD-WEN dealt with doorskin defects under the Supply Agreement. Before **[**39]** late 2014, the procedure followed between Steves and JELD-WEN was as follows:

> If Steves discovers defects in JELD-WEN's doorskins after receiving them, it completes and submits a vendor debit memo ("VDM") to JELD-WEN to initiate the reimbursement process. From 2010 to 2011, JELD-WEN responded promptly after receiving VDMs, sometimes inspecting the defective doorskin at Steves' plant and sometimes extending Steves a credit based on a picture of the defect.

In mid-2014, JELD-WEN changed its approach and significantly limited reimbursements for those defects.

Likewise, in 2014-15, JELD-WEN changed the way that it compensated for defective doorskins that had been incorporated in the finished doors that Steves sold to its customers, for which Steves could negotiate for reimbursement under the Supply Agreement. Beginning in 2012, if a Steves' customer rejected a door as defective because of a defective doorskin, Steves would give its customer credits for the purchase price of the doors (assuming that Steves agreed with the defect assessments). Steves would then seek reimbursement from JELD-WEN for the full cost of the doors which had defective doorskin (i.e., the sale price that Steves refunded **[**40]** to the customers) and JELD-WEN would typically pay that entire amount. In those situations, Steves would submit a VDM for the defective door to JELD-WEN, just as it did with the defective doorskins.

---

[5] JELD-WEN did not communicate with Steves about key input costs or price changes in 2016 or 2017, so the doorskin prices imposed in 2015 remained the same for those years.

[6] Hachigian subsequently sent Steves a letter, in March 2015, stating that JELD-WEN reserved the right to assert that the Supply Agreement terminated on December 31, 2019 (at the end of its normal seven-year term) instead of in September 2021. PTX-521. JELD-WEN (through Hachigian) abandoned that position at trial. However, proposed acceleration of the termination date is further evidence that JELD-WEN was emboldened by the knowledge that, in 2014, the substantial lessening of competition caused by the merger allowed JELD-WEN to pressure Steves to accept JELD-WEN's new pricing demands.

[7] The record shows that JELD-WEN extracted new contracts from other independent manufacturers requiring them to pay the capital charge. That was the result of lessened competition. It was either pay or face termination and the loss of doorskin supply.

However, the record shows that JELD-WEN adopted a policy in late 2014 or early 2015, to reimburse Steves only for the defective doorskins, rather than for the full cost of the doors. In explanation, JELD-WEN told Steves that "[t]here was a specific change in their [door reimbursement] policy," which applied whether the doors with defective doorskins were sold to customers or remained in Steves' manufacturing plant. This shift followed what Fancher characterized as a "general direction" from JELD-WEN's management to "tighten" its door reimbursement process.

At trial, JELD-WEN took the view that, although it was never contractually required to reimburse Steves for the cost of the doors, JELD-WEN did so as a matter of customer relations. However, it is clear that, because of the substantially lessened competition caused by the merger, JELD-WEN no longer felt that it was competitively necessary to extend this benefit to Steves in 2015 and thereafter.

The record establishes that JELD-WEN will continue **[**41]** to engage in this same sort of conduct respecting pricing and contract administration in the future. That is because, as Shapiro testified, the entry of another doorskin supplier besides JELD-WEN **[*637]** and Masonite into the U.S. market is unlikely. In addition, JELD-WEN is still charging Steves inflated prices for doorskins under the Supply Agreement, including Madison and Monroe doorskins. Likewise, JELD-WEN continues to disregard the price adjustment provisions of § 6c. Moreover, JELD-WEN has tried unilaterally to add labor costs as a key input cost under Schedule 2 and has refused to supply the backup information for the key input costs. The jury found that Steves sustained damages because JELD-WEN had violated Section 6c and other pricing provisions of the contract, including those for the pricing of Madison and Monroe doorskins. And, the jury rightly found that those damages were the consequence of the antitrust violation, i.e., the substantial lessening of competition caused by the merger.

6. Steves' Efforts to Obtain Alternative Doorskin Supply and the Consequences of Not Doing So

After receiving the original and the accelerated notices of termination from JELD-WEN, Steves, with knowledge that a **[**42]** reliable supply of doorskins was essential to its survival, began to explore ways to obtain doorskins without relying on JELD-WEN. Of course, between now and September 2021, Steves can purchase as many doorskins as it needs from JELD-WEN under the Supply Agreement. However, the record proves that JELD-WEN cannot be relied upon to supply Steves with doorskins after that point. Indeed, JELD-WEN has expressed the view that it might be necessary to "kill off" a few of the Independents. That, for Steves, is the predictable result of terminating the Supply Agreement.

Faced with loss of doorskin supply from JELD-WEN, Steves tried to arrange a supply contract with Masonite, even after Masonite's July 2014 announcement that it would no longer sell doorskins to independent door manufacturers such as Steves. Masonite's CEO, Fred Lynch, told Steves that Masonite will not enter into any long-term supply agreement with Steves. Lynch did advise that Masonite remains generally willing to sell doorskins to Steves on a spot sale basis, depending on availability and without a supply agreement. Nonetheless, the prices that Masonite has offered Steves are around 37% higher than the prices it pays under **[**43]** the Supply Agreement.

Unable to secure a reliable, competitively priced source of supply from either domestic supplier, Steves approached foreign doorskin suppliers like Teverpan, Kastamonu, and Yildiz to explore alternate sources of supply. And, those discussions continue today. But, the record shows that Steves could fill only a small part of its doorskin requirements from foreign supply sources. And, the record shows that foreign suppliers can supply only a limited number of the doorskin designs and sizes that Steves uses to manufacture its doors. Further, Steves has experienced serious quality deficiencies with doorskin samples that it has received from foreign suppliers.[8]

Finally, Steves has investigated the possibility of building its own doorskin manufacturing plant ("the MDS Project") so as to have a reliable source of supply after the Supply Agreement ends in September 2021. To that end, Steves hired former JELD-WEN employee John Pierce ("Pierce") in March 2015 to, among other **[*638]** things, provide

---

[8] In opposing divestiture, JELD-WEN has asserted that it too has experienced quality problems with the products made by these foreign manufacturers. Indeed, JELD-WEN argues that product from foreign suppliers cannot help fill the short-fall in supply that would ensue a divestiture of Towanda.

information that Steves could use in furtherance of its MDS Project. Then, in July 2015, Steves engaged another former JELD-WEN employee, John Ambruz ("Ambruz"), for the primary purpose **[**44]** of completing a study about the feasibility of Steves building a doorskin manufacturing plant ("the Feasibility Study"). On March 30, 2016, Ambruz emailed Sam and Edward Steves the completed Feasibility Study, which discussed the challenges associated with building a doorskin manufacturing plant—particularly the cost, time, and need for a manufacturing partner.

In early 2017, Steves reached an interim conclusion that it could not feasibly build its own doorskin plant. The record establishes that Steves has made no concrete progress toward building a doorskin manufacturing plant. However, Ambruz and Gregory Wysock—a former Masonite employee hired to work on the MDS Project in July 2016—are still employed by Steves. Moreover, Steves has not completely abandoned its plans to build a plant. Thus, Steves continues to look for a manufacturing partner that could help construct a plant, and it was in contact with several potential partners before trial. However, Steves has had no further communication with those entities since before the trial began. Considered as a whole, the record establishes conclusively that Steves cannot fulfill its doorskin requirements from foreign manufacturers or **[**45]** by building its own doorskin plant.

If Steves cannot repair its relationship with JELD-WEN (which, on this record, will not happen) or acquire doorskins another way (which, as of now, is not possible), it will go out of business after the Supply Agreement expires in 2021. Steves' success rises and falls with its door manufacturing business; in 2017 alone, its interior molded doors sales constituted around 70% of its total revenue. And Steves cannot make those doors without interior molded doorskins. Consequently, if Steves cannot obtain a reliable doorskin supply, its business will soon fail.

That event would affect the 1,100 employees that currently work for Steves, and the members of the Steves family, which has run the company since it was founded in 1866. Steves' principal officers, Edward and Sam Steves, are the fifth generation of the Steves family to manage Steves. Moreover, Sam Steves' son and Edward Steves' daughter are current employees of Steves, and Sam Steves hopes to "pass[] on the reins" to them in the future. Maintaining Steves as a family business is an important goal of the entire Steves family.

7. The Discussions Between JELD-WEN and Steves; The Initiation of Alternative [**46] Dispute Resolution Process; The Filing of This Action: 2012-2016

JELD-WEN has presented the affirmative defense of laches, a topic that is separately considered in Section II.C, infra. The record contains considerable evidence about what Steves knew when, and what Steves did (in addition to attempting to secure an alternative source of supply as outlined in Section I.B.6). Additional facts on those topics are set out below as well as in Section II.C below that addressed the laches defense.

Steves began noticing doorskin quality issues after the merger as soon as November 2012. However, at that time, it did not view those defects as a result of the merger. It is difficult to pinpoint the exact period when Steves connected the dots between the CMI Acquisition and the decrease **[*639]** in doorskin quality.[9] Similarly, Steves had concerns about JELD-WEN's doorskin prices when it received the first notification required by the Supply Agreement in late 2012, and had discussions with Orsino about accurate pricing throughout 2013. However, that initial disagreement concerned whether JELD-WEN's reduction of doorskin thickness should be reflected in doorskin pricing under the Supply Agreement, and it was **[**47]** not thought by Steves to be related to the CMI Acquisition. In fact, the problems with the key input costs provision that underlie Steves' pricing claims in this litigation did not arise until after Hachigian replaced Orsino as JELD-WEN's CEO in early 2014.

---

[9] Edward Steves stated during his deposition that he realized in early 2013 that the CMI Acquisition had caused the "degradation" of doorskin quality. Apr. 12 Remedies Tr. at 637:19-638:8. However, he later testified that he did not view the quality issues as related to the Acquisition. Id. at 685:6-17. Having heard the testimony and reviewed the deposition, the Court concludes that Edward Steves was speaking temporally, not causally.

The record shows that, as of August 2014, Sam and Edward Steves exchanged email messages that used the term "antitrust." For example, on August 12, 2014, Sam Steves e-mailed Edward Steves to ask whether Steves was "finished with exploring anti trust issues if J[ELD-WEN] terms [terminated] the supply agreement." DX-291. Then, on August 26, Sam Steves made reference to Steves'"claim on the overcharge" when considering how to respond to a Hachigian e-mail that discussed, in part, doorskin pricing under the Supply Agreement. Sam Steves noted that "the antitrust" was "perhaps the most important" issue at that point. DX-466.

Although the emails were offered in evidence, their meaning and context was not developed at trial. As explained more fully in Section II.C below, even though Steves was aware of potential antitrust ramifications of JELD-WEN's pricing pressure, changes in the treatment of defects, and arbitrary treatment respecting **[**48]** the key input costs, Steves reasonably focused its attention on finding alternative sources of doorskin supply in an effort to survive JELD-WEN's conduct, rather than place its hope for survival on pursuing a first of its kind antitrust action.[10] Many of those efforts took place in the fall of 2014 and early 2015. In addition, Steves, quite reasonably, continued to meet with JELD-WEN in an effort to find some reasonable commercial solution. Indeed, JELD-WEN, largely through Hachigian, repeatedly told Steves that JELD-WEN wanted some commercial solution. Faced, as it was with losing the supply of a key component of its most important product, Steves was reasonable in continuing to try to work on a commercial solution with JELD-WEN.

In early 2015, it became obvious that negotiations with JELD-WEN would not work. Therefore, Steves formally initiated dispute resolution procedures under the Supply Agreement in March 11, 2015. See DX-243 at 1; see also PTX-149 § 10(a)-(b). The formal invocation of Section 10 did not, however, provide JELD-WEN with notice of Steves' possible antitrust claim. However, the dispute process was addressed to contractual matters that lay at the heart of Steves' antitrust concerns so resolution **[**49]** of those issues in the contractually required dispute process likely would **[*640]** mean that Steves would have no antitrust injury.

Steves asked JELD-WEN to meet for the initial dispute resolution conference called for by the Supply Agreement on March 23, DX-243 at 2, but JELD-WEN deferred the internal conferences required by Section 10 until May 2015. Although the focus of those conferences was JELD-WEN's compliance with the key input costs and doorskin quality provisions of the Supply Agreement, Steves' attorney, Marvin Pipkin, also raised Steves' antitrust concerns at the second conference, and Bruce Taten responded on JELD-WEN's behalf. But, the record does not disclose the substance of the discussion about those antitrust concerns. After those conferences failed to yield a resolution to either the contract or antitrust issues, Steves requested, in July 2015, mediation, as is specified to be the next step under the Supply Agreement, see PTX-574 at 1. That occurred on September 4, 2015.

The mediation was also unsuccessful. At the end of it, Steves presented JELD-WEN with a draft complaint that raised both the contract and antitrust issues. The parties then chose to enter into a standstill agreement, **[**50]** which provided that Steves would not sue JELD-WEN on the date of the agreement, and that JELD-WEN would give Steves two days' notice before suing Steves, effective for thirty days. See PTX-591. The standstill agreement recited the mutual desire of Steves and JELD-WEN to continue efforts to work out a solution to their disputes, which then included both the contractual issues and the antitrust ramifications of JELD-WEN's conduct. Subsequently, Steves and JELD-WEN entered into standstill agreements with similar provisions on September 29, 2015; October 13, 2015; January 7, 2016; and April 25, 2016. See PTX-593; PTX-606; PTX-641; PTX-682. Sam Steves acknowledged that these agreements permitted Steves to file suit on any date other than the dates of the agreements themselves, but he said that Steves did not do so because it believed that the parties could resolve their dispute without litigation, as expressed in the standstill agreements. As it was involved in this back-and-forth process with JELD-WEN, Steves, in December 2015, asked the DOJ to examine JELD-WEN's potentially anticompetitive conduct. Steves gave a presentation to the DOJ later that month, and then produced documents to **[**51]** the DOJ in January 2016, in response to a civil investigative demand. On April 7, 2016, JELD-WEN also made a presentation to the DOJ. See DX-45. On May 18, 2016, the DOJ closed its investigation without taking any

[10] As the parties so often observe, no previous case brought by a private party seeking divestiture under the Clayton Act had gone to verdict at the time so Steves had no precedents to inform whether to pursue such a course or, if pursued, what the likelihood of success might be.

action. See DX-182. Steves then asked JELD-WEN to execute another standstill agreement, and when JELD-WEN refused, Steves filed this action on June 29, 2016.

8. Current Status and Standalone Viability of Towanda

Whether divestiture is a viable remedy in this case depends, in part, on whether, if divested, Towanda would be able to operate as an effective competitor in the doorskin market and thereby restore the competition that the merger substantially lessened. The parties have quite different views on the subject.

Towanda occupies 19 of the 275 total acres of land on which the property sits. The plant consists of several different areas: the main plant, which contains the main production lines; the smaller "die form" plant, where Masonite originally manufactured doorskins and which still houses a production line today; the wood yard, which receives doorskin inputs like logs or chips; and the water treatment plant, which removes chemicals from water used in the manufacturing **[**52]** process before that water is redistributed to the environment **[*641]** through the nearby spray fields. All these areas existed when JELD-WEN acquired Towanda, and JELD-WEN purchased the entire property. Towanda's operations require more than 400 total employees, and around 300 in the main plant alone.

Towanda has a design capacity of [ ] doorskins per year. That figure reflects Towanda's maximum production capacity based on its design, which accounts for the number of openings in a press, the number of dies that can be produced within that opening, the number of times the press can go up and down in a specific period of time, and some scheduled maintenance downtime.

However, design capacity is not the same as actual production capacity. The latter is more realistic for production calculations because it also incorporates the downtime that is required to change dies in the press so that different styles (SKUs) can be manufactured. A die change requires waiting for the press to cool down, replacing the die (using a crane), and then reheating the press.

Towanda's two doorskin manufacturing lines are Line 1 (in the main plant) and Dieform (in the die form plant). Line 1 is a high-volume/low-mix press, **[**53]** meaning that it produces a large quantity of a lower variety of SKUs. It currently produces only 6'8" doorskins-the most common size for residential con-struction—and can only produce between 50-60 different SKUs at one time. Line 1 is intended to be the "main production line" at Towanda. Thus, Line 1 has fewer die changes and far less downtime.

Dieform, in contrast, is a high-mix/low-volume press, sacrificing doorskin quantity for SKU variety. It uses smaller dies that can be changed without causing as much downtime as die changes for Line 1. Consequently, Dieform can produce over 250 different SKUs, and it accommodates all of JELD-WEN's 7' and 8' doorskins, as well as its smaller orders for more niche doorskin designs. That line's production capacity is therefore lower.

Even with Line 1 and Dieform being designed to maximize efficiency, some unaccounted-for downtime is still needed to produce the many SKUs sold. This downtime reduces Towanda's current actual production capacity to [ ] doorskins per year. In 2017, and for reasons not explained in the record, Towanda's actual production was [ ] doorskins. Towanda's current doorskin business is strong, generating EBITDA of [ ] in 2017. **[**54]**

These earnings are attributable to several factors. First, doorskin volume has increased because the housing market is performing well. There is evidence that the number of domestic "housing starts"—new homes for which construction is started—was approximately [ ] in 2001, and around [ ] in 2017. Thus, the current demand for doorskins is roughly similar to the demand in the early 2000s, when CMI achieved positive EBITDA (albeit not as high as 2006, when the number of housing starts was approximately [ ]). The market has also improved considerably since 2011, as reflected in the significantly higher volume of doorskins sold to JELD-WEN's external customers in 2016 ([ ]) compared to 2011 ([ ]). Towanda's volume is also used to supply JELD-WEN's door manufacturing plants, which in 2017 purchased about [ ] of Towanda's [ ] doorskins.

Second, the increased demand has helped spread out Towanda's high fixed costs, reducing Towanda's cost per doorskin in 2017 to approximately [ ]. This expense is even lower than the [ ] that each doorskin cost CMI at its peak in 2006 (and substantially lower than the [ ] per-doorskin cost at CMI's nadir in 2011). That **[*642]** reduction is, in part, attributable to JELD-WEN's **[**55]** changes to Towanda, which have lowered both variable and fixed production costs.

Third, doorskin prices have rebounded since 2011, so that JELD-WEN can now charge an average of [ ] per doorskin—only slightly lower than the peak average price of [ ] in 2006.

Finally, JELD-WEN's mix model allows it to allocate SKU demand across its four doorskin plants, increasing Towanda's production efficiency and helping it operate at the level needed to achieve a profit. As Towanda's design capacity is [ ] doorskins, Towanda therefore must sell around [ ] doorskins each year at prices ranging from [ ] doorskin to be profitable. Given the current state of the market, Towanda's actual capacity of [ ] doorskins in 2017 easily surpassed that threshold.[11]

The record proves, without dispute, that today Towanda is a profitable competitor in the doorskin market. And, the Court so finds. Also, the record shows, also beyond dispute, that Towanda was profitable from the formation of CMI in 2001 until the down turn in the housing market in 2006 and it was a competitor in the supply of doorskins to independent door manufacturers then as well. And, the Court so finds.

JELD-WEN argues that, if divested from JELD-WEN, **[**56]** Towanda cannot operate profitably or be a competitor in the doorskin industry. In support of that view, JELD-WEN makes several arguments.

First, JELD-WEN argues that divesting Towanda in its current state would be more complex than the successful divestiture from Masonite in 2001. That earlier process benefited from the relatively amicable relationship between Masonite and SMI and the existence of fewer doorskin designs. Towanda and Masonite's Laurel plant were also similar and the designs offered by each were "exact trade matches," so the companies simply needed time to duplicate dies at each plant. Here, however, says JELD-WEN, CMI and JELD-WEN had "completely different designs" when they merged, and that distinction has largely persisted. That, however, is really just an argument that JELD-WEN would need at least two years to replicate Towanda's design offerings at its legacy plants. And, thus, it relates not to Towanda's future as a competitive entity, but to JELD-WEN's.

Second, JELD-WEN says that Towanda's fixed costs would increase because it would have to set up its own departments to provide administrative and technology services. Those expenses are currently absorbed by JELD-WEN **[**57]** and thus not factored into Towanda's per-doorskin costs. That may well be true, but it hardly shows that a divested Towanda would not be profitable or competitive.

Third, says JELD-WEN, Towanda cannot adequately utilize its capacity without benefitting from JELD-WEN's other doorskin plants or internal door customers. It is true that JELD-WEN uses a good deal of Towanda's output. But, it is virtually **[*643]** certain that Steves alone would purchase [ ] doorskins from a divested Towanda. And, JELD-WEN would buy some of its requirements from the new owner of Towanda (at least [ ] doorskins) at least for two years while it seeks other sources of supply. And, JELD-WEN might well choose to continue buying from Towanda thereafter if, as JELD-WEN has argued, it will not likely make up any shortfall by buying from foreign suppliers or building another plant. Further, the Independents reasonably can be considered as other potential customers of a new owner of Towanda, especially considering (1) the higher prices recently extracted by JELD-WEN in requiring those companies to renegotiate their contracts and (2) the higher prices sought by Masonite. Combined, (all three)

---

[11] Towanda's overall profitability is aided by its MiraTEC and Extira production. Towanda is the only facility in the world that makes those products. They are produced on Line 2, a sealed press that sits across from Line 1. However, the manufacturing process for doorskins and MiraTEC and Extira is intertwined in many respects, so those products share many of the same manufacturing facilities in the main plant. As a result, Line 2 and the production equipment needed for MiraTEC and Extira cannot be removed as part of divestiture, because doing so would make doorskin production impossible. Any acquisition of Towanda's doorskin business, then, must include the acquisition of its MiraTEC and Extira business.

the sales would exceed the 17-18 **[**58]** million needed for profitable operation.[12] Thus, the record establishes that a divested Towanda likely would be able to sell at least as much doorskin product as it did in 2017.

Of course, the owner of a divested Towanda would find it necessary to supply a more diverse range of SKUs than CMI supplied in 2005 or 2006 because fewer SKUs existed at that time. Fancher opined that Towanda could not, as a standalone entity, supply all the SKUs needed to meet its external customers' needs—both because "the design mix that would run through [Towanda] couldn't support it," and because Towanda and JELD-WEN's legacy plants both make designs that the other does not.

However, the record contains no particularized evidence from JELD-WEN about which specific SKUs purchased by JELD-WEN's external customers would be implicated by divestiture, or about the effect on Towanda's production capacity and profitability of devoting its resources to meeting the SKU needs of its customers. The consequence of that evidentiary void is that no specific finding can be made.

Nonetheless, the record does permit the general conclusion that divestiture would restrict to some extent Towanda's ability to meet the needs of **[**59]** JELD-WEN's Independent customers because the die changes required to produce the requisite SKU variety would lead to increased downtime and reduced production capacity. This reduced capacity could also result in higher costs for Towanda, which could reduce profitability. There is no evidence that permits the Court to find whether those costs would increase or by how much.

From this record, the Court finds that a divested Towanda would be required to adjust product mix in a not insignificant way, but that the facility is capable of being operated to produce a mix of products that will allow Towanda to be profitable and competitive even if it must make substantial adjustments to do so.

Finally, JELD-WEN argues that it is not possible to conclude that a divested Towanda would be competitive because the existence of a potential buyer who could profitably sell doorskins from Towanda is unknown at this time. It is correct that the record does not identify entities, other than Steves, that are currently interested in buying Towanda and are capable of **[*644]** operating the plant within the scope of their corporate structure or separately.

Steves is the only entity that has expressed interest in acquiring **[**60]** Towanda. However, Steves' executives admittedly lack knowledge about operating a doorskin plant. Of course, in the event of divestiture, Towanda's management and line employees would be retained, or at least given the opportunity to remain. That would be so for a new owner because the retention of its operating personnel would afford the greatest likelihood for success in restoring competition that was substantially lessened by the merger. And, that approach succeeded when CMI was created and divested in 2002 and when CMI was acquired by JELD-WEN in 2012. The record discloses no reason why that approach would not be successful again.

It is not surprising that, at this juncture in the case, potential buyers have not emerged. This is, after all, the first privately brought action under *Section 16 of the Clayton Act* to have gone to verdict and, in which, a private party has sought divestiture. And, as the Supreme Court of the United States explained in *Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*, there are not likely to be firm expressions of interest until after the issue of whether divestiture is an appropriate remedy is settled on appeal and the landscape is clear. But, the record shows that Towanda was a profitable operation before the **[**61]** housing crisis and is once again and that its doorskin business produced small, but positive, EBITDA even during the housing crisis. And, even when CMI was up for sale in 2011, at a time when it was not profitable, there were several interested buyers. On this record, the Court concludes that buyers for this profitable operation can be expected to emerge again when the legal battles are ended.

---

[12] The record shows that, in the event of divestiture, JELD-WEN would continue to buy from Towanda at least until it could build a new plant which would take several years or until JELD-WEN could find a reliable source of foreign supply (which, like Steves, JELD-WEN has not deemed to be a viable solution). JELD-WEN's counsel have argued that JELD-WEN would not buy from divested Towanda. Because JELD-WEN's witnesses said otherwise and counsel's argument makes no sense if JELD-WEN is to meet its needs, the argument is rejected.

9. Impact of Divestiture on JELD-WEN and Other Entities

Divestiture has been on the table in this action since it was filed in June 2016. Nonetheless, the record is that JELD-WEN has not examined how it would operate in the event that JELD-WEN is ordered to divest Towanda. Nor has JELD-WEN developed a plan for that eventuality. Thus, there is no well thought-out or documented support for how JELD-WEN would be affected by divestiture.

Of course, the absence of such a plan does not foreclose testimony from JELD-WEN's officers and employees giving their opinions about how divestiture might affect JELD-WEN''s overall operations in a general way and how a divestiture might affect JELD-WEN's customers. And that is how JELD-WEN has chosen to present evidence on those topics: by offering opinions of its **[**62]** executives. Those opinions may properly be considered even though they come from witnesses who admittedly have not studied the subject and who are biased to present the worst case scenario.

The lack of concrete analysis and the inherent bias make the opinions of JELD-WEN employees about future events (such as the restructuring of JELD-WEN's company-wide manufacturing operations, potential layoffs, and ripple effects on customers) quite speculative and rather unreliable. Nevertheless, it is possible to conclude that, if Towanda's capacity is removed from JELD-WEN's orbit, JELD-WEN will encounter, in the short run, difficulty manufacturing in its other facilities the number of doorskins that it needs to supply its own needs for making JELD-WEN doors and the needs of its independent doorskin customers.

It is helpful to review JELD-WEN's most recent production figures as a benchmark. In 2017, JELD-WEN, company-wide, **[*645]** including Towanda, made approximately [ ] doorskins, consuming 30 million internally and selling [ ] to the Independents who are its customers, with [ ] of those going to Steves. If, after divestiture, Steves secured its requirements ([ ] doorskins) from the new owner of Towanda, **[**63]** JELD-WEN would need to produce [ ] doorskins to meet its needs and those of its external customers.

The record is not precise on the point, but it appears that divestiture would result in a short-fall of approximately [ ] doorskins in JELD-WEN's internal and external needs (excluding Steves). However, that does not take into account that any divestiture order necessarily would make provision for JELD-WEN to purchase its short-fall from the new owner of Towanda for at least two years. That would be important to JELD-WEN, to its customers, and to the new owner of Towanda.

JELD-WEN also offered evidence that the "full production based on [m]ix" figures in [the record at PTX-1045] do not accurately reflect the effect of losing Towanda on JELD-WEN's doorskin capacity and production volume. That is because divestiture would make it necessary for JELD-WEN to redistribute to its legacy plants the SKUs that are currently manufactured at Towanda in order to provide the quantity and variety of doorskins that its customers desire. This change would cause two problems according to JELD-WEN. First, if those plants tried to accommodate those SKUs, their actual capacity would suffer, to some undefined **[**64]** extent, because the additional die changes needed would increase downtime, thereby reducing efficiency and lowering volume. Second, economics aside, producing the necessary quantity of the Towanda SKUs at the other plants is not possible without using the dies that are used at Towanda to produce those SKUs or making new dies of the same kind. Thus, those dies would have to be made for the legacy plants to use and that would require time.

The record does not show how much time or how much money that would require because JELD-WEN has not put "pen to paper" on that topic or any other relating to how to operate in the event of divestiture. That void notwithstanding, JELD-WEN has shown that divestiture would likely cause operational dislocations that would affect, to an undefined extent, its requirements for doorskins in the number of SKUs in its current line. However, because JELD-WEN has not analyzed how it would reallocate Towanda's SKUs, the degree of the resulting total capacity decrease at its legacy plants, like the degree of impact, is unclear.

It does appear from the record that it would be difficult to replace Towanda's production immediately. JELD-WEN's doorskin plant in Latvia **[**65]** currently has some excess capacity. However, that "excess" does not account for the reality that Latvia has never achieved close to its design capacity of [ ] doorskins per year. Furthermore, the Latvia plant is tailored to the European doorskin market and only produces a few doorskin designs that are usable in the U.S. market. Producing some of Towanda's SKUs in Latvia would also require the use of different dies than those used now in Latvia, and Latvia is currently running close to its total capacity, so that its production process could not be altered without consequences. The record does not show what those consequences are or what their economic impact would be.

Notwithstanding those difficulties, JELD-WEN's contingency business plans outlining options in the event that a natural disaster shuttered one or more of its plants shows that JELD-WEN considers that its Latvian plant, or other domestic plants (including a restarted Marion plant), **[*646]** could be used to augment doorskin supplies until the shuttered plant was back on line. Thus, contrary to JELD-WEN's urgings, it is not possible to conclude that divesting Towanda would leave JELD-WEN without options, even in the short term. JELD-WEN's **[**66]** own business records show otherwise.

The record also leads to the conclusion that obtaining doorskins from alternate suppliers or building a replacement plant is not any more promising for JELD-WEN than it is for Steves. Because of the merger, the only other domestic supplier of doorskins is Masonite, purchase from which is conceptually possible but not considered viable by JELD-WEN. And, given Masonite's position on sales to the Independents, JELD-WEN is likely correct. JELD-WEN conceptually could also purchase doorskins from foreign suppliers, such as Teverpan. But JELD-WEN, like Steves, has concerns about the quality of doorskins made by foreign suppliers, and those suppliers offer fewer SKUs than Towanda. Considering the record as a whole, the Court concludes that foreign suppliers cannot meet a significant part of JELD-WEN's requirements any more than they can meet a significant part of Steves' requirements.

Finally, the record is clear JELD-WEN could build its own doorskin manufacturing plant to replace Towanda's production. And, JELD-WEN is equipped to do that because it has extensive experience building such plants. However, that option would require considerable time and resources. **[**67]** The record shows that JELD-WEN would need at least two to two and a half years, more likely longer, to complete the project. The cost to JELD-WEN has been estimated to be between [ ] to set up a facility with production lines similar to Towanda's. That is a very wide range and thus is quite imprecise.

In sum, the Court finds that divestiture of Towanda would have significant, but not well-documented, consequences for JELD-WEN. However, nothing in the record permits the Court to conclude that divestiture would create the "disaster" that JELD-WEN's counsel urge the Court to find.

The record shows that limitations on JELD-WEN's total production capacity could have several collateral consequences. For instance, JELD-WEN has long-term doorskin supply agreements with several door customers. One of those contracts, with a U.K.-based company called Howdens, provides for certain penalties if JELD-WEN cannot meet Howden's supply needs, with the precise consequences dependent on the size and frequency of the failure. See DX-943 §§ 3.3, 5.13. However, JELD-WEN's obligations with respect to those penalties are subject to a force majeure clause,[13] see id. § 22, which might apply to capacity reductions because of **[**68]** a divestiture order. See id. § 1.1, at 7. Although Howdens is a foreign customer that is supplied primarily by JELD-WEN U.K. and JELD-WEN Europe, see DX-943 § 3.3, JELD-WEN's contracts with domestic customers like The Home Depot and Lowe's contain similar provisions.

In addition, JELD-WEN argues that both its internal and external customers would have to deal with higher doorskin prices and a less streamlined purchasing process. Reduced doorskin capacity, says JELD-WEN, would force JELD-WEN to raise its prices where permitted. Whether that would, or could, be done with a competitive **[*647]** Towanda as a supplier was not addressed by JELD-WEN's witness.

---

[13] JELD-WEN's assertion to the contrary is mistaken. See Def. FOF ¶ 190. The contract states that the force majeure provision applies "[w]ithout prejudice to clauses 5.10 to 5.16"—that is, including the cited penalty provision for delivery failures. DX-943 § 22; see also id. § 5.13.

Furthermore, if JELD-WEN's legacy plants cannot produce all of Towanda's SKUs, customers who previously received doorskins made only at Towanda would need to purchase from both Towanda and JELD-WEN (or another supplier). And, JELD-WEN projects that losing its external volume altogether would cause it to lose almost [ ] of revenue and [ ] in EBITDA. Finally, says JELD-WEN, its internal customers—its own door plants—would lose earnings without Towanda because they would lack the doorskins needed to make the current volume of doors. That loss **[**69]** is projected to be roughly [ ] decrease in JELD-WEN's EBITDA.

The Court is concerned that the foregoing figures were belatedly cobbled together for the Remedies Hearing and were not produced during discovery so that they could be tested. And, although the Court rejected Steves' motion to exclude this evidence from consideration in the remedies phase of the case, it is not the sort of evidence in which the Court can place much confidence. That said, the record shows that divestiture, if ordered, would result in some not insignificant collateral consequences.

Finally, says JELD-WEN, Towanda's purchase price in a divestiture auction sale would likely not capture Towanda's full value to JELD-WEN. JELD-WEN offered the opinion of its CFO that Towanda's current enterprise value[14] is approximately nine times its EBITDA. By applying that multiplier to Towanda's 2017 EBITDA of [ ], JELD-WEN contends that the plant's enterprise value is around [ ]. That number, says JELD-WEN, is the minimum a purchaser would have to pay JELD-WEN in recognition of Towanda's worth. According to JELD-WEN, a divestiture sale is unlikely to yield this price.

Whether that multiplier (and hence the asserted enterprise value) **[**70]** is appropriate here is not a matter that has been supported by economic evidence. It is, at best, an unresearched, undocumented ball park figure. Nonetheless, as Shapiro testified, a forced sale always contains some "presumed detriments" for the seller. Id. at 808:16-21. There is nothing in the record to suggest otherwise here. However, it is both premature and improvident to conclude that a post-appeals bidding process would not yield a fair price for Towanda as it exists today. That assessment cannot, and should not, be made until there are bids made after the appellate process is ended and future buyers have a clear picture that they will not be engaged in a futile activity. But, the record is sufficient to find that Towanda, including its doorskin business, as well as the MiraTEC and Extira businesses, have value which potential buyers will recognize when it is clear whether divestiture is an appropriate legal remedy.

The jury findings and the foregoing factual findings made by the Court provide the framework for the legal analysis of Steves' request for equitable remedies. The legal analysis reflects additional factual findings that are most appropriately made in context of the **[**71]** specific legal issues to which those additional findings relate.

II. LEGAL ANALYSIS AND CONCLUSIONS

The most significant form of requested relief is divestiture. It will be assessed first. Then, the opinion will consider the so-called "conduct" remedies sought by Steves.

[*648] A. Steves' Request for Divestiture

1. Legal Standard

Section 16 of the Clayton Act allows private parties to obtain injunctive relief "against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*. This injunctive relief may include an order requiring the acquiring company to divest the assets of the acquired firm. *California v. Am. Stores, 495 U.S. 271, 295, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)*.

---

[14] Enterprise value assesses how the stock market values an entity, taking into account the entity's market capitalization and its net debt.

Given the lack of authority from private suits based on Section 7 of the Clayton Act that have reached the divestiture issue, the decisional law respecting the standard for injunctive relief must come mostly from decisions in cases brought by the Government under Section 15. That provision allows the Government to institute proceedings "to prevent and restrain violations of [the Clayon] Act." 15 U.S.C. § 25. Notwith-standing the semantic difference between Sections 15 and 16, those provisions offer largely the same (and possibly identical) remedies. See Am. Stores, 495 U.S. at 281-82.

Whoever brings suit, the Government or private party, "[t]he relief in an antitrust case must be 'effective **[**72]** to redress the violations' and 'to restore competition.'" Ford Motor Co. v. United States, 405 U.S. 562, 573, 92 S. Ct. 1142, 31 L. Ed. 2d 492 (1972) (quoting United States v. E. I. du Pont de Nemours & Co., 366 U.S. 316, 326, 81 S. Ct. 1243, 6 L. Ed. 2d 318 (1961)); see also United States v. U.S. Gypsum Co., 340 U.S. 76, 88, 71 S. Ct. 160, 95 L. Ed. 89, 1951 Dec. Comm'r Pat. 580 (1950) (an antitrust remedy must, "so far as practicable, cure the ill effects of the illegal conduct, and assure the public freedom from its continuance"). "Mergers come in a wide variety of shapes and sizes," so the remedy awarded should be "carefully tailored to the competitive harm" in the case. U.S. Dep't of Justice, Antitrust Division Policy Guide to Merger Remedies § I(A) (2011) ("Merger Remedies Guide"). District courts are thus "clothed with large discretion to fit the decree to the special needs of the individual case." Ford, 405 U.S. at 573 (internal quotations omitted); see also Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 131, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969) ("Section 16 should be construed and applied . . . with the knowledge that the remedy it affords, like other equitable remedies, is flexible and capable of nice 'adjustment and reconciliation between the public interest and private needs as well as between competing private claims.'" (quoting Hecht Co. v. Bowles, 321 U.S. 321, 329-330, 64 S. Ct. 587, 88 L. Ed. 754 (1944))).

The "most drastic, but most effective, of antitrust remedies" is divestiture. E.I. du Pont, 366 U.S. at 326, but complete divestiture is "the remedy best suited to redress the ills of a competitive merger." Am. Stores, 495 U.S. at 285; see also Ford, 405 U.S. at 573. For this reason, the DOJ seeks divestiture in "the vast majority **[**73]** of cases" like this one. Merger Remedies Guide § I(B)(1). Moreover, "[t]he relief which can be afforded [under Section 15] . . . is not limited to the restoration of the status quo ante" in the pre-acquisition market. Ford, 405 U.S. at 573 n.8; cf. U.S. Gypsum, 340 U.S. at 89 (equitable remedy for Sherman Act violation can affect "[legal] practices connected with acts actually found to be illegal," so that defendants are "denied future benefits from their forbidden conduct"). Consequently, divestiture may extend to assets that were unrelated to the antitrust violation if the divested entity would need those assets to become competitive, or if the integration of legally-and illegally-acquired assets makes their **[*649]** separation impossible. See Utah Pub. Serv. Comm'n v. El Paso Nat. Gas Co., 395 U.S. 464, 469, 89 S. Ct. 1860, 23 L. Ed. 2d 474 (1969) (approving equal division between defendant and divested entity of gas reserves developed post-merger); Polypore Int'l, Inc. v. FTC, 686 F.3d 1208, 1218-19 (11th Cir. 2012) (affirming FTC's inclusion of a foreign plant in divestiture order because it "needed to be divested to restore the competition eliminated by the acquisition and provide the acquirer with the ability to compete"); see also Malcolm R. Pfunder et al., Compliance with Divestiture Orders under Section 7 of the Clayton Act: An Analysis of the Relief Obtained, 17 **Antitrust Bull**. 19, 56-67 (1972) (detailing approaches to identifying divestiture assets).

Structural remedies like divestiture also can be coupled **[**74]** with—or replaced entirely by—conduct remedies that can "preserve a merger's . . . efficiencies" and limit anticompetitive conduct at the same time. Merger Remedies Guide § II. "Conduct relief can be a particularly effective option when a structural remedy would eliminate the merger's potential efficiencies, but, absent a remedy, the merger would harm competition." Id.; see also In re Evanston Nw. Healthcare Corp., 144 F.T.C. 1, 520 (2007). However, "conduct remedies risk excessive government entanglement in the market," Saint Alphonsus Med. Ctr.-Nampa Inc. v. St. Luke's Health Sys., Ltd., 778 F.3d 775, 793 (9th Cir. 2015), so they should be "tailored as precisely as possible to the competitive harms associated with the merger." Merger Remedies Guide § II n.12. This approach is consistent with the general need for courts considering divestiture to avoid "impos[ing] sanctions . . . which ultimately create economic havoc" in industries in which courts are not "well-versed." 5 Earl W. Kintner et al., Federal ***Antitrust Law*** § 40.9 (2017).

At the same time, courts have observed that divestiture is an "'extreme remedy.'" Taleff v. Sw. Airlines Co., 828 F. Supp. 2d 1118, 1122 (N.D. Cal. 2011), aff'd, 554 F. App'x 598 (9th Cir. 2014) (quoting Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 322 (3d Cir. 2007)). It also has some drawbacks. One antitrust treatise highlights three particular problems:By and large, spinoffs of established businesses or subsidiaries are far more successful than the creation of new ones. Second, the **[**75]** merging firms have every incentive to make the divestiture work poorly, particularly if it calls for the creation of a competitive firm. Third, buyers who are not competitors or are not established in the business may start out at a very considerable disadvantage, which sometimes later proves fatal.9G Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 990c2 (4th ed. 2016) (footnotes omitted); see also 5 Kintner et al., supra, § 40.12 (listing "potential hazards of divestiture").

Divestiture also operates somewhat differently in private suits. The Supreme Court has explicitly noted that a district court's ability to order divestiture does not "mean that such power should be exercised in every situation in which the Government would be entitled to such relief under *[Section] 15*." *Am. Stores, 495 U.S. at 295*. Also, *Section 16* requires a plaintiff to establish standing to seek injunctive relief, and a defendant can rely on equitable defenses and other equitable considerations to avoid divestiture. *Id. at 295-96*. And, in government actions, "the proof of the violation of law may itself establish sufficient public injury to warrant relief." *Id. at 295*. Thus, it is no surprise that, in cases brought by the government, **[*650]** Courts have viewed divestiture as "simple, relatively easy to administer, **[**76]** and sure," *E.I. du Pont, 366 U.S. at 331*, because hardships do not need to be balanced nor the public interest assessed in the same way as in *Section 16* cases. See *Ford, 405 U.S. at 575* ("'[O]nce the Government has successfully borne the considerable burden of establishing a violation of law, all doubts as to the remedy are to be resolved in its favor.'" (quoting *E.I. du Pont, 366 U.S. at 334*)); *El Paso Nat. Gas, 395 U.S. at 472* ("[T]he pinch on private interests is not relevant to fashioning an antitrust decree, as the public interest is our sole concern."); *E.I. du Pont, 366 U.S. at 326* ("[C]ourts are authorized, indeed required, to decree relief effective to redress the violations, whatever the adverse effect of such a decree on private interests."). These differences do not make those precedents inapposite, but they do caution that, in a private action, divestiture is not as easy a remedy as it is in a government action.

It is also true that scholars have expressed doubt about the wisdom of divestiture under *Section 16*. Indeed, according to one treatise, "private divestiture is to be avoided when other injunctive relief is effective" because "courts are in agreement that divestiture should be applied in a relatively limited number of private suits due to the wide-ranging repercussions of such action, and the possible adverse effect on interests **[**77]** of those who are not parties to the antitrust violation." 5 Kintner et al., supra, § 40.32 (citing, inter alia, *Burkhead v. Phillips Petroleum Co., 308 F. Supp. 120, 127 (N.D. Cal. 1970)* ("[D]ivestiture would appear to be appropriate only in a limited number of cases where no other form of preventative relief would suffice . . . ."); *Schrader v. Nat'l Screen Serv. Corp., 1955 Trade Cas. ¶ 68,217, at 71,009 (E.D. Pa. 1955)* ("[C]onsiderations of policy are against decreeing divestiture or the complete destruction of a nationwide business at the suit of an individual in a private action under the antitrust laws . . . .")); cf. *Blue Cross & Blue Shield United of Wis. v. Marshfield Clinic, 883 F. Supp. 1247, 1264 (W.D. Wis. 1995)*, aff'd in part, rev'd in part on other grounds, *65 F.3d 1406 (7th Cir. 1995)* ("It is questionable whether divestiture of a long completed transaction is an appropriate remedy in a private action under the Sherman Act."). Similarly, Areeda and Hovenkamp take the view that "the Government's recommendation of divestiture deserves far more weight than a similar request from other litigants." 3D Areeda & Hovenkamp, supra, ¶ 326b. Because divestiture can have "far-reaching effects on persons who are not parties to the litigation" and "can affect the viability of otherwise profitable companies, the status of preexisting contracts, and the fortunes of rivals," they recommend taking "great care" before ordering divestiture in private actions. Id.

American Stores, to some extent, has changed the Clayton Act landscape **[**78]** because most of the foregoing cases were decided and since the foregoing views were expressed by commentators. Nonetheless, the concerns expressed in the pre-American Store cases and comments teach that courts must rely on the facts of each case to decide whether divestiture is an appropriate remedy and that courts should resort to it in limited circumstances.

That said, it is still true that divestiture should be ordered when it is the most effective way of restoring the substantially lessened competition brought about by the merger at issue and where its collateral consequences can be mitigated. And, the appropriate remedy should be selected upon "determining (a) what competitive **[*651]** harm the violation has caused or likely will cause and (b) how the proposed relief will remedy that particular competitive harm." Merger Remedies Guide § I(A). Moreover, that remedy should be "calculated to minimize adverse economic effects upon the industry, the public, and the stockholders affected by the unlawful merger. . . . [C]aution, progressive enforcement, and remedy formulation on a case-by-case basis are essential ingredients to effectively combat the effects of an antitrust violation, and to minimize **[**79]** the risk of economic dislocation." 5 Kintner et al., supra, § 40.9 (footnote omitted).

These general considerations should be kept in mind when assessing whether to award divestiture or alternate injunctive relief. However, the parties agree that "well-established principles of equity" establish the framework governing requests for injunctive relief, including divestiture, under the Clayton Act. *eBay Inc v. MercExchange, L.L.C., 547 U.S. 388, 391, 126 S. Ct. 1837, 164 L. Ed. 2d 641 (2006)*; see also *Am. Stores, 495 U.S. at 285* (*Section 16* permits divestiture only "when appropriate in light of equitable principles"). Under that approach,

> a plaintiff . . . must satisfy a four-factor test before a court may grant such relief. A plaintiff must demonstrate: (1) that it has suffered an irreparable injury; (2) that remedies available at law, such as monetary damages, are inadequate to compensate for that injury; (3) that, considering the balance of hardships between the plaintiff and defendant, a remedy in equity is warranted; and (4) that the public interest would not be disserved by a permanent injunction.

eBay, *547 U.S. at 391* (emphasis added).[15] Even where those factors are met, district courts still retain "equitable discretion" to grant or deny permanent injunctive relief. Id.

2. *Section 16* Standing

Before considering the eBay factors, the Court must assess whether **[**80]** Steves has standing to seek divestiture. "[I]n order to seek injunctive relief under *[Section] 16*, a private plaintiff must allege threatened loss or damage 'of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.'" *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. In other words, Steves must be able to demonstrate "a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur." *Zenith Radio, 395 U.S. at 130*.

Steves contends that the likely loss of its business when the Supply Agreement expires in September 2021 gives it standing here. This "threatened loss" is linked to an antitrust injury that has already occurred: JELD-WEN's termination of the Supply Agreement in September 2014, which was enabled by its increased market power after the CMI Acquisition. See Summary Judgment Op. at 30-31. JELD-WEN disagrees that Steves will go out of business when the **[*652]** Supply Agreement ends. See Def. Post-Remedies Equitable Br. (ECF No. 1652) (Under Seal) at 25-27 (discussing issue in context of irreparable harm). If JELD-WEN is correct, then Steves would need to identify other threatened antitrust loss or damage to support its request for divestiture.

If **[**81]** JELD-WEN is asserting that Steves lacks standing because it will not go out of business in September 2021, that argument is unpersuasive. Steves' *Section 7* claim sought both legal and equitable relief, and the *Seventh Amendment* entitled Steves to a jury trial on "all issues common to both claims." *Davis v. Ampthill Rayon Workers, Inc., 446 F. Supp. 681, 683 (E.D. Va. 1978)*, aff'd, *594 F.2d 856 (4th Cir. 1979)* (citing *Beacon Theatres, Inc. v. Westover, 359 U.S. 500, 510-11, 79 S. Ct. 948, 3 L. Ed. 2d 988 (1959))*. "[A] jury verdict in such mixed law-equity cases is binding on the court as to all matters in law and as to all matters in equity where the facts found are common to the law and equity issues." Id. (citing *Dairy Queen v. Wood, 369 U.S. 469, 479, 82 S. Ct. 894, 8 L. Ed. 2d 44 (1962))*; see also *Bresler v. Wilmington Tr. Co., No. CIV. PJM 09-2957, 2015 U.S. Dist. LEXIS 36625, 2015 WL 1402377, at *22 (D. Md. Mar. 25, 2015)*, amended in part, *2015 U.S. Dist. LEXIS 91389, 2015 WL 4385994 (D. Md. July 10, 2015)* ("'[W]here claims at law and in equity are joined and the legal claims are tried separately by a jury, the jury's verdict operates as a finding of fact binding on the trial court in its determination of the equitable

---

[15] Although eBay applied that test to the Patent Act, the Supreme Court's concluding statement that such discretion also extends to "other cases governed by such standards" makes clear that the test applies in other cases arising under federal statutes. *E.I. DuPont de Nemours & Co. v. Kolon Indus., Inc., 894 F. Supp. 2d 691, 697 (E.D. Va. 2012)* (citing *eBay, 547 U.S. at 394*).

claims.'" (quoting Dybczak v. Tuskegee Inst., 737 F.2d 1524, 1526-27 (11th Cir. 1984))); Int'l Wood Processors v. Power Dry, Inc., 593 F. Supp. 710, 737 (D.S.C. 1984), aff'd, 792 F.2d 416 (4th Cir. 1986) ("The court is . . . bound by the jury verdict on its subsequent ruling on the equitable claims under the doctrine of collateral estoppel.").

Here, the Court instructed the jury that Steves' request for future lost profits was based on the claim that Steves "was harmed because, as a result of JELD-WEN's alleged antitrust violation, Steves will be unable to maintain a viable interior molded door manufacturing business when **[**82]** the contract between Steves and JELD-WEN terminates on September 10, 2021, and will therefore be unable to exist as a company." The Court further instructed the jury that it "must consider any factors that could affect the future success of Steves' business and any other factors affecting Steves' future performance." Jury Instructions (ECF No. 1025), Instruction No. 35. After receiving these instructions, the jury awarded Steves damages for future lost profits. Verdict Form ¶ 3(b). Any factual determinations that were necessary to award these damages are binding on the Court.

To show that Steves will not go out of business, JELD-WEN relies on evidence suggesting that it might continue to sell doorskins to Steves after the Supply Agreement expires; that, without JELD-WEN, Steves can satisfy its doorskin needs through domestic or foreign suppliers like Masonite, Kastamonu, or Teverpan; and that Steves could build its own doorskin manufacturing plant to replace the lost volume from JELD-WEN. But JELD-WEN presented virtually the same evidence to the jury at trial. The jury could not have awarded future lost profits without considering and rejecting that evidence, which is essential to an **[**83]** issue the jury was required to consider—"the future success of Steves' business and any other factors affecting Steves' future performance." Instead, the jury must have decided that Steves will go out of business because Steves cannot find any viable alternative means of doorskin supply. Furthermore, nothing from the Remedies Hearing or the trade secrets trial renders this jury's conclusions **[*653]** improper or unreliable.[16] Consequently, JELD-WEN's position about the likelihood of Steves going out of business is foreclosed by the verdict.

Moreover, given the factual overlay between the legal and equitable relief, the Court finds, by a preponderance of the evidence, that it is not likely that JELD-WEN will continue to supply Steves with doorskins after the Supply Agreement terminates. Indeed, part of JELD-WEN's pricing plan was to kill off some of the independent door makers that were its doorskin customers. And, the Court finds that JELD-WEN's conduct toward Steves (demanding price increases two years after the Supply Agreement was executed even though costs had decreased, engaging in evasive, sharp, and deceptive conduct over the calculation of input costs under Section 6 of the Supply Agreement, **[**84]** and in its general bullying conduct toward Steves) shows that JELD-WEN regarded Steves, a significant player in the interior door market, to be an independent to be killed off.

Further, the Court, as finder of the fact in the remedies phase of the case, finds that Steves has proved that, absent equitable relief, it will be forced out of business when the Supply Agreement terminates in 2021 (See Section II.A.3.(a), infra). And, as found above, JELD-WEN is still engaging in the conduct that led the jury to conclude that the merger had substantially lessened competition and that had caused Steves antitrust injury.

In sum, for the foregoing reasons, Steves has standing to seek injunctive relief under Section 16 that would remedy the threatened loss, and damage presented by the merger.

3. Equitable Factors Analysis

---

[16] The parties dispute whether the Court may rely on the record in the trade secrets trial to help resolve the divestiture issue. See Aug. 2 Tr. (ECF No. 1751) at 90:15-91:20, 203:18-206:10. Assuming, without deciding, that the Court can, that record does not establish that Steves can prevent going out of business by building a doorskin plant by September 2021. At best, the evidence at the trade secrets trial indicates that Steves has preliminarily concluded that building a doorskin plant is not feasible, but is continuing to investigate the possibility of doing so. That is no different than what the evidence at the antitrust trial showed. See Def. FOF ¶¶ 265-78.

(a) Irreparable Injury & Absence of Adequate Remedy at Law

To obtain equitable relief in the form of an injunction here, and an order mandating divestiture and conduct remedies, Steves must prove that, absent such relief, it will suffer irreparable injury. Generally, "'[i]rreparable injury is suffered when monetary damages are difficult to ascertain or are inadequate.'" *Handsome Brook Farm, LLC v. Humane Farm Animal Care, Inc., 193 F. Supp. 3d 556, 574 (E.D. Va. 2016)* (quoting *Multi—Channel TV Cable Co. v. Charlottesville Quality Cable Operating Co., 22 F.3d 546, 551 (4th Cir. 1994))*. Whether **[**85]** a plaintiff has an adequate remedy at law "inevitably overlaps" with whether it has suffered irreparable harm. *MercExchange L.L.C. v. eBay, Inc., 500 F. Supp. 2d 556, 582 (E.D. Va. 2007)*.

Most courts to have confronted the question have found that the permanent loss of a business constitutes irreparable injury. See, e.g., *Warren v. City of Athens, 411 F.3d 697, 711 (6th Cir. 2005)* ("financial ruin" that would happen without injunction is irreparable injury); *Am. Passage Media Corp. v. Cass Commc'ns, Inc., 750 F.2d 1470, 1474 (9th Cir. 1985)* ("The threat of being driven out of business is sufficient to establish irreparable harm."). This is particularly true where a company has operated **[*654]** as a family business for a substantial period of time. Judge Friendly recognized long ago that "the right to continue a business in which [a father] had engaged for twenty years and into which his son had recently entered is not measurable entirely in monetary terms" because "the [family] want[s] to sell automobiles, not to live on the income from a damages award." *Semmes Motors, Inc. v. Ford Motor Co., 429 F.2d 1197, 1205 (2d Cir. 1970)*. This "seminal decision" has been cited often, including by the Fourth Circuit. *Auto. Elec. Serv. Corp. v. Ass'n of Auto. Aftermarket Distribs., 747 F. Supp. 1483, 1514 (E.D.N.Y. 1990)* ("This is not a case of mere lost profits, but rather the basic existence of a seventy year old business may be threatened."); see also *Tom Doherty Assocs., Inc. v. Saban Entm't, Inc., 60 F.3d 27, 38 (2d Cir. 1995)* (threat to "the very viability of the plaintiff's business" is irreparable injury); *Wells Am. Corp. v. Ziff-Davis Pub. Co., 900 F.2d 258, 1990 U.S. App. LEXIS 4004, 1990 WL 33532, at *2 (4th Cir. 1990)* ("harm to plaintiffs' **[**86]** [sic] goodwill, its business reputation, business opportunities, or its continued existence" may be irreparable); *Roso-Lino Beverage Distribs., Inc. v. Coca-Cola Bottling Co. of N.Y., 749 F.2d 124, 125-26 (2d Cir. 1984)* ("The loss of [plaintiff]'s distributorship, an ongoing business representing many years of effort and the livelihood of its husband and wife owners, constitutes irreparable harm."); *Fed. Leasing, Inc. v. Underwriters at Lloyd's, 650 F.2d 495, 500 (4th Cir. 1981)* (plaintiff showed irreparable harm where it "s[ought] to preserve its existence and its business").

There is no reason for the Court to deviate from that majority approach here. The termination of a plaintiff's business might not constitute irreparable harm if the entity has only been in business for a "short period of time," *DFW Metro Line Servs. v. Sw. Bell Tel. Co., 901 F.2d 1267, 1269 (5th Cir. 1990)* (per curiam); see also *HCI Techs., Inc. v. Avaya, Inc., 446 F. Supp. 2d 518, 521 (E.D. Va. 2006)* (citing DFW Metro in dicta), or if that injury could be fully remedied by money damages, see *Hardin v. Houston Chronicle Pub. Co., 426 F. Supp. 1114, 1117-18 (S.D. Tex. 1977)*, aff'd, *572 F.2d 1106 (5th Cir. 1978)*; *Lamarca v. Miami Herald Publ'g Co., 395 F. Supp. 324, 328 (S.D. Fla. 1975)*, aff'd, *524 F.2d 1230 (5th Cir. 1975)*. But, Steves has been in business for more than 150 years, making the 1.5-year existence of the plaintiff in DFW Metro seem fleeting in comparison. *901 F.2d at 1269 n.7*. In addition, as in several of the cases described above, there is independent value to continuing Steves as a family operation: Edward and Sam Steves described at the Remedies Hearing their family's deep connection with Steves' business, in which their children have begun to continue **[**87]** and, neither *Hardin* or *Lamarca* involved the facts that Steves has proved in this case.

JELD-WEN tries to distinguish Semmes Motors and subsequent cases in three ways. First, it argues that Steves' business is not at risk because it has several viable doorskin supply alternatives when the Supply Agreement terminates. This line of reasoning has been addressed in connection with Steves' *Section 16* standing. See supra Section I.A.2. In sum, the Court finds, as did the jury, that, after 2021, purchases from JELD-WEN, Masonite, or foreign suppliers do not provide viable alternative supplies of doorskins in the quantity and quality required by Steves. Indeed, it is disingenuous of JELD-WEN to suggest that Steves can turn to foreign suppliers when JELD-

WEN itself will not do so. Further, as set out in Section II.B.6 above, the Court finds that building a doorskin plant of its own is **[*655]** not a viable alternative way to supply Steves' doorskin needs after 2021.[17]

Second, JELD-WEN argues that Steves' claimed injury is merely harm to members of the Steves family, which does not justify permanent injunctive relief for Steves. But the only two cases that JELD-WEN cites **[**88]** in support, *Moody v. Michigan Gaming Control Board, No. 12-CV-13593, 2013 U.S. Dist. LEXIS 54490, 2013 WL 1664380 (E.D. Mich. Apr. 17, 2013)* and *Law v. National Collegiate Athletic Association, No. 94-2053-KHV, 1996 U.S. Dist. LEXIS 3478, 1996 WL 104328 (D. Kan. Jan. 5, 1996)*, are distinguishable. In Moody, the only harm underlying the plaintiff's emergency preliminary injunction motion was his nephew's and son's inability to obtain their harness racing training licenses—an injury not suffered by the plaintiff, whose occupational license had been suspended. *2013 U.S. Dist. LEXIS 54490, 2013 WL 1664380, at *1-2*. Similarly, in Law, the plaintiff coaches sought a classwide injunction under the Clayton Act to prevent the NCAA from enforcing a restricted earnings rule against any coach. However, each named plaintiff had to demonstrate a threat of antitrust injury because the class had not been certified, and just two were employed under the rule in question. As a result, those two coaches could seek injunctive relief only for themselves, not for the whole class. See *Law, 1996 U.S. Dist. LEXIS 3478, 1996 WL 104328, at *3-4*.

Steves, on the other hand, is not seeking divestiture to remedy some harm suffered by individuals in the Steves family rather than Steves itself. Instead, Steves' irreparable injury is the loss of its business. That the business also has a family character is relevant to the irreparable injury analysis. See *Semmes Motors, 429 F.2d at 1205*; *Auto. Elec. Serv., 747 F. Supp. at 1514*. Moody and Law might be applicable if Steves had only identified **[**89]** as an irreparable injury the effect of the loss of Steves' business on, for instance, Edward and Sam Steves, but Steves has not made that claim here. Accordingly, the references to the Steves family in Steves' papers do not lessen the irreparable nature of the company's antitrust injury.

Finally, JELD-WEN insists that Semmes Motors and its progeny, most of which deal with preliminary injunctions, are meaningless where, as here, a plaintiff has obtained future lost profits damages. To obtain equitable relief, a plaintiff must show that its harm cannot be compensated by money damages. *Dairy Queen, 369 U.S. at 478*; *Hughes Network Sys., Inc. v. InterDigital Commc'ns Corp., 17 F.3d 691, 694 (4th Cir. 1994)*. Tucker, however, told the jury that his lost profits calculation was a "reasonable," "conservative," and non-speculative estimate of Steves' future harm. As Tucker proposed, **[*656]** the jury awarded damages of $46,480,581 in loss profits. Trebling that part of the award under the Clayton Act yields total future lost profit damages of around $139 million. See *15 U.S.C. § 15(a)*.[18] In JELD-WEN's view, Steves'"strategic decision to calculate its future harm in money damages" at trial precludes it from now claiming that those damages are inadequate. Def. Post-Remedies Equitable Br. at 24.

A plaintiff's presentation of a future damages **[**90]** number may influence the irreparable injury and legal remedy inadequacy analysis. In *SAS Institute, Inc. v. World Programming Ltd., 874 F.3d 370 (4th Cir. 2017)*, the plaintiff sought and received damages for lost profits, almost half of which was based on expected future losses. The court

---

[17] JELD-WEN's claim that Steves should be held accountable here for delaying its efforts to build a doorskin plant is unpersuasive, especially where that factor did not affect the jury's future lost profits award. Intentionally engaging in conduct that contributes to an irreparable injury may undermine a plaintiff's irreparable harm showing. See *Cone v. Randolph Cty. Schs. Bd. of Educ., No. 1:06CV00579, 2006 U.S. Dist. LEXIS 76684, 2006 WL 3000445, at *5, *7 (M.D.N.C. Oct. 20, 2006)* (child's loss of educational services was not irreparable injury, in part because it was caused by parents' intentional obstruction of school placement plan). However, the minimal, and unpersuasive, evidence cited by JELD-WEN does not establish that Steves ceased efforts to build a doorskin plant in order to improve its position in this litigation. Moreover, the record shows that Steves would not have made any notable progress towards building a plant had it devoted its full attention during these proceedings to finding a manufacturing partner. Steves' irreparable injury thus cannot be traced back to its decision to stop negotiations with manufacturing partners. In any event, the record shows that Steves simply cannot afford to build its own doorskin plant so JELD-WEN's position is academic at best.

[18] There were other antitrust damages that also were trebled. Those that survived judgment as a matter of law also will be trebled.

rejected the plaintiff's request for permanent injunctive relief because it found that the "fact that [the plaintiff] already asked for and received these future damages undermines its claim of irreparable injury moving forward." *Id. at 386*. Likewise, in International Wood Processors, the court determined that the plaintiff had an adequate remedy at law because it "requested and received prospective damages" at trial, and under its own damages theory, could "suffer no further future harm" after receiving future lost profits damages. *593 F. Supp. at 737*. And, in Taleff, the court denied plaintiff's request for a post-merger divestiture order under *Section 16* because the only alleged harm was "expressed in terms of monetary damages." *828 F. Supp. 2d at 1123*. Thus, the plaintiff had not shown that legal remedies would be inadequate.

Nonetheless, a plaintiff is not prohibited from seeking alternate injunctive relief merely because it tries to quantify its future harm in front of the jury. The purpose of the Remedies Hearing was, in part, **[**91]** to allow Steves to present further evidence about the inadequacy of its future lost profits award. See Order (ECF No. 1127) at 2.[19] Steves then put on compelling evidence of the incalculable value of its business, which the Court (like the jury) finds would not survive without injunctive relief restoring competition. None of the cases cited by JELD-WEN involved this same sort of loss. See *SAS Inst., 874 F.3d at 386* ("[Plaintiff]'s claims of difficult-to-calculate damages in the form of lost business relationships, market share, and goodwill were largely unsupported by evidence."); *Taleff, 828 F. Supp. 2d at 1123 n.7* (plaintiff alleged harm in terms of higher ticket prices and less cost-effective service); *Int'l Wood Processors, 593 F. Supp. at 737* (plaintiff would "suffer no further future harm" after receiving future lost profits). And, Steves has consistently asserted that JELD-WEN's *Section 7* violation threatens the very existence of its business, so its current position **[*657]** cannot be characterized as some sort of opportunistic about-face. Consequently, Steves' representations to the jury do not prevent it from arguing here that future lost profits damages are inadequate.

The Court finds that, with an adequate supply of doorskins, Steves **[**92]** would, as it has for 150 years, continue in business and prosper. There is nothing in the record to suggest otherwise. The lost profits award would not provide a supply of doorskins. Rather, the Steves shareholders would, like the Semmes family, just live off of the damages award, a choice which, as explained in Semmes, it does not have to make. Were it otherwise, well-heeled companies, like JELD-WEN, would never have to face the undoing of an illegal merger but, instead, could simply pay the damages and finance their way out of the violation of the Clayton Act, leaving in place a merger that has been proved to have substantially lessened competition.

For these reasons, JELD-WEN's arguments fall short, and Steves has shown that the likely, if not certain, loss of its business is an irreparable injury that cannot be adequately remedied by the future lost profits damages it has been awarded.[20]

(b) Balance of Hardships

Under the third eBay factor, "courts 'must balance the competing claims of injury and must consider the effect on each party of the granting or withholding of the requested relief.'" *Winter v. Nat. Res. Def. Council, Inc., 555 U.S. 7, 24, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)* (quoting *Amoco Prod. Co. v. Gambell, 480 U.S. 531, 542, 107 S. Ct. 1396, 94 L. Ed. 2d 542 (1987))*. Before undertaking that assessment, the Court must address Steves' assertion

[19] JELD-WEN continues to assert that Steves' quantification of damages must have been an election of legal over equitable remedies. But this wrongly assumes that Steves was required to make an election at some point before now. "Generally, a party is not required to elect between inconsistent remedies or rights or theories of recovery during the trial or at the pleading stage or prior to the jury's verdict; election is generally made after the verdict is entered prior to the entry of judgment." 28A C.J.S. Election of Remedies § 6 (2018). In any event, "a decision as to the time of election rests within the sound discretion of the trial court." Id.; see also *Rahemtulla v. Hassam, No. CIV.A.3:05-0198, 2008 U.S. Dist. LEXIS 42902, 2008 WL 2247195, at *1 (M.D. Pa. May 30, 2008)* (collecting cases). Further, the cases present the so-called "election of remedies" issue as a question of how to preclude double recovery and how to proceed with entry of judgment where the principles of Brown Shoe Co. operate as they do under the facts of this case.

[20] Steves has agreed that it is not entitled to both remedies.

that **[**93]** the hardships claimed by JELD-WEN should be disregarded because the jury has already found that JELD-WEN violated the Clayton Act. See Pl. Post-Remedies Equitable Br. (ECF No. 1606) (Under Seal) at 20 (divestiture is appropriate even if it entails "harsh consequences" for JELD-WEN). That argument necessarily affects the weight given to JELD-WEN's harms.

Steves cites three cases in support of its position, including E.I. du Pont and El Paso Natural Gas. See *El Paso Nat. Gas, 395 U.S. at 472* ("[T]he pinch on private interests is not relevant to fashioning an antitrust decree, as the public interest is our sole concern."); *E.I. du Pont, 366 U.S. at 326* ("[C]ourts are authorized, indeed required, to decree relief effective to redress the violations, whatever the adverse effect of such a decree on private interests."). But Steves' reliance on those cases is misplaced. As noted above, in those cases, the Supreme Court was discussing divestiture in the context of Government actions, which, unlike *Section 16* suits, do not implicate private hardships. The third case cited similarly involves an FTC enforcement action and, more importantly, relies on E.I. du Pont. See *FTC v. Whole Foods Mkt., Inc., 548 F.3d 1028, 1033, 383 U.S. App. D.C. 341 (D.C. Cir. 2008)* ("Even remedies which 'entail harsh consequences' would be appropriate to ameliorate the harm to competition from **[**94]** an antitrust violation." (quoting *E.I. du Pont, 366 U.S. at 327*)). Notwithstanding what Steves believes about the perfect applicability of Government cases in the *Section 16* setting, the differences between Government and private cases limit the relevance of the Government case principles on the balance of hardship factor because, in Government cases, there is no balance of hardships. See *Am. Stores, 495 U.S. at 295-96*; supra Section II.A.1.

[*658] Moreover, assigning less, or no, weight to JELD-WEN's hardships would contradict Supreme Court and Fourth Circuit precedent. Steves' argument essentially reduces a court's role to rubber-stamping divestiture based on a jury verdict finding a *Section 7* violation. The Supreme Court, however, "has consistently rejected invitations to replace traditional equitable considerations with a rule that an injunction automatically follows a determination that a copyright has been infringed," instead requiring the hardships to be balanced in every case. eBay, *547 U.S. at 392-93*. The Fourth Circuit found it "impossible to square this directive with the idea that hardship to the losing party should simply be ignored," "even in cases involving clear wrongdoing." *SAS Inst., 874 F.3d at 388*. This statement echoes its earlier determination that courts may not "conclude that any harm **[**95]** that would be suffered by a defendant was self-inflicted and thus entitled to lesser weight in the balancing-of-the-harms portion of the preliminary injunction calculus." *Scotts Co. v. United Indus. Corp., 315 F.3d 264, 285 (4th Cir. 2002)*. Thus, the Court must consider JELD-WEN's hardships in assessing the balance of hardships.[21]

Turning then to the balancing of hardships, the Court finds that Steves will suffer irreparable injury without permanent injunctive relief. If the Court does not order an equitable remedy to restore competition, Steves will likely lose its entire business when the Supply Agreement expires. This effect looms large in the balance of hardships. See *Buffalo Courier-Express, Inc. v. Buffalo Evening News, Inc., 601 F.2d 48, 58 (2d Cir. 1979)* (balance would have been "amply passed" if plaintiff had "shown a significant possibility that it would be driven out of business" by defendant's anticompetitive actions); *Auto. Elec. Serv., 747 F. Supp. at 1514* (highlighting "ruinous financial hardship" that would result if no equitable relief imposed); cf. *SAS Inst., 874 F.3d at 387-88* (noting that permanent injunction "would likely be ruinous" for defendant (internal quotation marks omitted)). Furthermore, as Steves argues, the relative impact of all the hardships cited by JELD-WEN would be less severe on JELD-WEN than the hardship that will befall Steves. JELD-WEN **[**96]** is a much larger business than Steves, and it is a very diversified company. And, as Steves argues, the record shows that the impact of divestiture on JELD-WEN would not be as a serious a hardship on JELD-WEN as would the loss of doorskin supply. Nevertheless, it is necessary to assess the hardship that likely will befall JELD-WEN in the event of divestiture. Of course, it is JELD-WEN's burden to prove the hardships that it will face.

---

[21] That is not to say that all harms that JELD-WEN might allege are cognizable here. For example, loss of profits obtained through anticompetitive conduct is not a valid hardship because it is a product of doing what the antitrust laws require—that is, competing with other firms. See *New York v. Actavis, PLC, No. 14 CIV. 7473, 2014 U.S. Dist. LEXIS 172918, 2014 WL 7015198, at *45 (S.D.N.Y. Dec. 11, 2014)*, aff'd sub nom. *New York ex rel. Schneiderman v. Actavis PLC, 787 F.3d 638 (2d Cir. 2015)*; see also *Cadence Design Sys., Inc. v. Avant! Corp., 125 F.3d 824, 830 (9th Cir. 1997)*. Yet JELD-WEN does not rely much on any such harm, and the instances where it does will be appropriately disregarded without affecting the hardship balancing.

JELD-WEN's chief witness on this topic was its CFO, Brooks Mallard, who testified to numerous speculative consequences of divestiture which the Court will not consider because of their speculative nature. Nonetheless, other witnesses have testified, at least generally, about the hardship that divestiture would visit upon **[*659]** JELD-WEN. Chief among those are the costs associated with separating Towanda as an independent entity. JELD-WEN and CMI integrated numerous functions when they merged in 2012, and it takes time and resources to "unscramble all those eggs" now. Suppl. Interrogatory Responses at 4. Courts have found that the "obvious hardship" of splitting up entities that have "combined . . . assets and operations" after a merger weighs heavily in the equitable **[**97]** analysis. *Ginsburg v. InBev NV/SA, 623 F.3d 1229, 1235-36 (8th Cir. 2010)*; see also *Taleff, 828 F. Supp. 2d at 1123* & n.8. That hardship is real, but it can be reduced by divestiture conditions that, for instance, allow current Towanda employees to remain at the plant and require the new owner and JELD-WEN to work together to effectuate an orderly transition of administrative support services. But JELD-WEN would still need to spend money to effect that transition, and there is no obvious way to eliminate that expense. And, of course, "[a] long time has elapsed between the closing of the merger and the conclusion of the litigation," and that presents "greater risks of unforeseen costs and failure." In re Evanston Nw. Healthcare, 144 F.T.C. at 521. The record does not permit quantification of those costs, but they are present in some measure, and must be considered in the balance of hardships.

As discussed in Section I.A.9, divestiture would also affect JELD-WEN's ability to meet its customers' doorskin demands. As explained previously, the mix model allocates SKU production across all four of JELD-WEN's plants, and Towanda's Dieform line permits the manufacture of many SKUs that JELD-WEN's legacy plants do not currently produce. Even if Steves shifts its entire doorskin volume to the divested Towanda entity (thereby freeing **[**98]** capacity in JELD-WEN's plants that supply much of Steves requirements), JELD-WEN would still need to satisfy its other customers' demands for different doorskin varieties. JELD-WEN says that it could not fully accomplish this goal by simply increasing the number of SKUs produced by its legacy plants because those plants are already running close to full production capacity. But, there is present some unquantified additional capacity. Also, JELD-WEN says that attempting to produce more SKUs would add downtime because of die changes, thereby decreasing total production capacity.

The extent of this capacity decrease is not shown by the record because JELD-WEN has not studied how it would reallocate SKUs among its legacy plants if Towanda was divested, and thus the extent of the decrease must be considered as speculative and unproven. However, the Court can still consider that there will be some shortfall and that can be considered as a hardship. See *SAS Inst., 874 F.3d at 387-88* (examining hardships in general manner); *Ginsburg, 623 F.3d at 1235-36* (same).

JELD-WEN's alternatives for obtaining doorskins present their own hardships. JELD-WEN's Latvia facility only produces a few doorskin designs that are usable in the U.S. doorskin market. Other **[**99]** foreign suppliers do not offer as many SKUs as Towanda and, as Steves knows from experience, the quality is not consistent. But, JELD-WEN's "disaster plan" includes supply from Latvia and foreign suppliers as short-term options. However, based on the record, the Court cannot conclude that all SKUs lost to JELD-WEN by virtue of the divestiture of Towanda could be replaced by Latvia and foreign suppliers. In contrast, also as considered on JELD-WEN's disaster plan, restarting operation of the Marion plant would go much further in remedying JELD-WEN's doorskin deficit. Marion has a low-volume/high-mix line that could serve a similar function to Towanda's Dieform **[*660]** line, even if the total production capacity is lower. It is estimated that to restart the Marion plant would cost [ ] because of the need to replace old equipment and comply with environmental relations. And it would take about two years to activate Marion.[22]

Of course, Steves' current divestiture proposal would prevent JELD-WEN from incurring any immediate deficit in doorskin supply. That proposal includes a condition by which JELD-WEN can purchase from the divested entity, for a period of two years, enough doorskins "to ensure **[**100]** that JELD-WEN will be able to fulfill orders of its door and doorskin customers" that exist at the time any divestiture order is entered, as long as those doorskins "cannot reasonably be manufactured as one of its remaining doorskin manufacturing facilities." Proposed Divestiture Order

---

[22] The record teaches that building a new doorskin plant is not realistic in the short run, even with JELD-WEN's experience.

§ VI(J). This provision would, in theory, permit JELD-WEN to meet its customers' doorskin needs through Towanda while setting up another long-term solution during that proposed two-year transition period. That approach would ameliorate the doorskins shortfall hardship identified by JELD-WEN and could even eliminate it, particularly if some of JELD-WEN's other independent customers choose to exit their contracts and buy from the new owner of Towanda. Of course, in that event, JELD-WEN would lose the profits from those sales.

The new owner of a divested Towanda might choose to supply JELD-WEN for longer than the two-year period proposed by Steves. Based on JELD-WEN's claim of hardship, that would seem to be an attractive proposition to JELD-WEN. And, a new owner likely would prefer the stability that would ensure a longer term supply contract with JELD-WEN. Thus, there are ameliorating measures for an even **[**101]** longer term hardship (beyond the first two years after divestiture).

The collateral effects of any sustained drop in doorskin volume are hard to predict on this record. JELD-WEN emphasizes the penalties that might be imposed under certain long-term supply agreements if those customers' needs cannot be met, but the language of the force majeure clauses in those contracts suggests that supply failures because of a divestiture order would not give rise to any fines. At the same time, JELD-WEN says that its door manufacturing plants would produce fewer doors based on the doorskins available, thereby reducing the company's EBITDA.

It is also reasonably inferable that JELD-WEN would lose some external customers, both because of the limited doorskin quantities and if JELD-WEN increases prices to cope with lower production capacity. Counting this loss as a hardship is questionable because, in most cases, it would be impossible to tell whether customers left because of the fallout from JELD-WEN's doorskin deficit or because of increased competition, which is an appropriate result of injunctive relief. See *Actavis, 2014 U.S. Dist. LEXIS 172918, 2014 WL 7015198, at *45*. That issue aside, loss of any customers would lower JELD-WEN's total revenue and EBITDA **[**102]** to some extent. But, if customers shift because of increased competition, that is a hardship that is expected to accompany divestiture and it does not weigh heavy in the balance of hardships.

JELD-WEN also claims hardship because the reallocation of production could cause loss of employment in its legacy **[*661]** plants. That assertion is pure speculation. And, it is contrary to the assertion made by JELD-WEN that, after divestiture, its legacy plants would be operating at near capacity.

JELD-WEN also contends that divestiture would cause loss of employment at Towanda. That contention is illogical because a new owner would need the experience offered by Towanda's current management and employees. And, the contention is at odds with history because when JELD-WEN bought CMI, the Towanda management and employees came along with the facility. And, in any event, that apprehended harm will be lessened, or eliminated, by requiring the acquiring entity to allow Towanda's management and employees to remain. And, it is logical that those people would benefit from such a requirement.

Finally, JELD-WEN would lose the value of the improvements it has made at Towanda, as well as the MiraTEC and Extira business **[**103]** that it has developed there. JELD-WEN made total investments of around [ ] in manufacturing installations and capital improvements at the plant between 2014 and 2017, which it expected would pay dividends in the form of company-wide savings well into the future. Even if the loss of those investments can be discounted somewhat because they would not have been possible without the anticompetitive merger, they may still be considered as a hardship. See *Smith & Nephew, 955 F. Supp. 2d at 79*; *W. Watersheds Project v. Salazar, No. CV 11-00492, 2011 U.S. Dist. LEXIS 151556, 2011 WL 13124018, at *20 (C.D. Cal. Aug. 10, 2011)*. But, the record also shows that JELD-WEN has recouped (and then some) its investments in Towanda so they will not be lost.

JELD-WEN's acquisition of CMI's MiraTEC and Extira business, on the other hand, has never posed any antitrust concerns, so the loss of that business weighs more heavily in the hardship analysis. As detailed above, JELD-WEN has structured its business so that MiraTEC and Extira are important parts of its future trajectory, and divestiture would force the company to change course. The record establishes that the manufacturing of these lines could not be removed from Towanda.

Whether the new owner would be willing to pay an appropriate value for the MiraTEC and Extira **[**104]** lines is unknown. And, any sale of those lines would involve licensing of intellectual property necessary to make those products. But, here too, the existing management and employees know how to operate the lines and make the product, and there is no reason on the record to believe that the end products would not be bought by those who are buying them now. Certainly, JELD-WEN offered no evidence to that effect. And, if, as JELD-WEN says, the lines are good products, then a buyer of Towanda could be expected to place value on them.

As the foregoing discussion reflects, the consequences of divestiture on JELD-WEN cannot be discerned with certainty in large measure because JELD-WEN has chosen not to internally assess those effects, except in broad and somewhat speculative terms. Nonetheless, from the showing that JELD-WEN has made, the record proves that all of its claimed hardships can be ameliorated by allowing time for an orderly divestiture, by imposing terms to assure JELD-WEN a reliable source of doorskin supply to satisfy its external and internal requirements for at least two years, by assuring that divestiture occurs in an environment and under circumstances that will produce **[**105]** a reasonable purchase price. Steves, on the other hand, has presented forceful evidence to show a more certain and far more serious harm: permanently going out of business. Therefore, **[*662]** even though the scales are not so one-sided as Steves contends, the balance of hardships tips decidedly in Steves' favor.

(c) Public Interest

(1) Legal Standard

The final eBay factor requires the Court to find "that the public interest would not be disserved by a permanent injunction." eBay, *547 U.S. at 391*. "'The public interest inquiry primarily addresses impact on non-parties rather than parties.'" *Inst. of Cetacean Research v. Sea Shepherd Conservation Soc., 725 F.3d 940, 946 (9th Cir. 2013)* (quoting *Bernhardt v. L.A. Cnty., 339 F.3d 920, 931 (9th Cir. 2003))*. Courts are reluctant to cause any "concrete harms to innocent third parties." If those potential effects exist, the public interest asserted must rely on more than "broad, abstract rule of law concerns." *SAS Inst., 874 F.3d at 388*.

That is not an issue here because the public interest in this case has been firmly established by Congress which is responsible not only for passing laws, but also "establish[ing] their relative priority for the Nation," priorities which courts must respect. *Tenn. Valley Auth. v. Hill, 437 U.S. 153, 194, 98 S. Ct. 2279, 57 L. Ed. 2d 117 (1978)*. Accordingly, "[w]here a valid law speaks to the proper level of deference to a particular public interest, it controls." *Inst. of Cetacean Research, 725 F.3d at 946*; see also 11A Charles Alan Wright **[**106]** & Arthur R. Miller, Federal Practice and Procedure § 2948.4 (3d ed. 1998) ("The public interest . . . may be declared in the form of a statute."). Here, by enacting *Section 7 of the Clayton Act*, Congress has explicitly indicated that preserving competition is in the public interest. *United States v. Ivaco, Inc., 704 F. Supp. 1409, 1430 (W.D. Mich. 1989)*. Consequently, divestiture would serve the public interest here, assuming that such relief would "'restore competition'"—the central aim of any injunctive relief under the Clayton Act. *Ford, 405 U.S. at 573* (quoting *E.I. du Pont, 366 U.S. at 326*).

Nonetheless, divestiture is not always the ideal equitable relief for the public interest. In some cases, the divested entity might not actually restore competition, depending on the circumstances in which the entity would operate. In others, divestiture might restore competition, but other injunctive relief might also do so with fewer impacts on the public interest. Before ordering divestiture, then, the Court must consider two questions: (1) whether Towanda would be "a willing, independent competitor capable of effective production" in the doorskin market, *White Consol. Indus., Inc. v. Whirlpool Corp., 781 F.2d 1224, 1228 (6th Cir. 1986)*; and (2) even if Towanda would be a viable entity, whether less intrusive injunctive relief can restore competition just as well as divestiture, see *E.I. du Pont, 366 U.S. at 327-28* (equitable relief should **[**107]** cause "as little injury as possible to the interest of the general public" (internal quotations omitted)). Courts have not clearly addressed these issues before ordering divestiture. However,

> [t]here is . . . no doubt that the antitrust court may and should assess the propriety of equitable relief in each particular case . . . and that the judge may decline to restructure a firm where there are serious doubts as to feasibility or a likelihood that other remedies are likely to be sufficient to restore effective competition.

3A Areeda & Hovenkamp, supra, ¶ 303e3 (emphasis added). See also Pfunder et al., supra, at 54 ("In order to achieve the goal of restoring or restructuring competition, a **[*663]** careful economic analysis must be undertaken of the particular assets or entity to be divested. In order for divestiture to achieve procompetitive structural relief, the assets to be divested must comprise an economically viable going concern—that is, the entity must have the economic capability of surviving and competing effectively in the market." (emphasis added)). The parties vigorously dispute what showing Steves must make to enable the Court to answer these questions. JELD-WEN says that before deciding Steves' request for divestiture, Steves must **[**108]** prevail on five factors:

> (1) whether the divestiture assets are sufficient to create a business that will replace lost competition;
> (2) whether the divestiture buyer has the incentive to compete in the relevant market;
> (3) whether the divestiture buyer has the business acumen, experience, and financial ability to compete in the relevant market in the future;
> (4) whether the divestiture itself is likely to cause competitive harm; and
> (5) whether the asset sale is structured to enable the buyer to emerge as a viable competitor.

These factors are used by the DOJ in assessing the remedy of divestiture. Gov't Equitable Relief Statement (ECF No. 1640) at 1-2, 7; see also 5 Kintner et al., supra, § 40.12 (identifying similar "crucial factors considered when framing divestiture order or decree"). This approach, says JELD-WEN, is necessary because it is the approach that the DOJ takes before ordering divestiture. Treating this analysis as a threshold requirement would be dispositive. Although the first and fourth DOJ factors are included in the public interest framework set out above, and will be addressed here, Steves has provided practically no information that would inform the other three factors.

Steves, on the other hand, **[**109]** argues that Towanda's viability as a successful competitor be assessed quite differently. This type of assessment, Steves says, would be more in line with the public interest because the results of the analysis urged by JELD-WEN could be made worthless by changed market conditions and the outcome of future appeals. Moreover, as Steves asserts, the Supreme Court has approved of the method that it urges in *Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*, another *Section 7* case. There, the Supreme Court found that the trial court's divestiture order was sufficiently final to enable appellate review even though the order only commanded divestiture without specifying the details of the divestiture sale or separation process, which would be the subject of a proposed divestiture plan to be filed by the defendant. See *id. at 304, 308-10*. According to Steves, the Court can conclude now that divestiture is appropriate, and then work out the particulars by appointing a special master to supervise divestiture after JELD-WEN appeals the order and if the remedy of divestiture is affirmed. The Fourth Circuit (and perhaps the Supreme Court) would then be able to affirm the liability and remedy decisions before the divestiture process moves to fruition. Only then, says Steves, **[**110]** would capable and serious buyers be willing to offer realistic prices for Towanda.

Steves is correct on this point. Neither JELD-WEN nor the DOJ cites any cases in which courts declined to order divestiture because the party seeking divestiture failed to provide the details that the DOJ uses in making its decisions. In fact, the general resources that address the issue teach that divestiture specifics are typically **[*664]** worked out in the compliance process by the court, the parties, or some other monitor. One treatise explains:

> Divestiture decrees rarely contain provisions specifying the details of satisfactory compliance with the order to divest; however, usually courts include continuing supervision provisions to ensure that the acquiring company divests itself of the offending assets and that they are divested in such a manner as to assure restoration of the competitive balance. Tribunals also retain jurisdiction to approve or reject the method of compliance, and to modify its decree or order if the prescribed remedy proves incapable of being carried out according to its terms. . . .
>
> Once the order to divest is entered, the defendant is required to propose within a specified time a plan **[**111]** of compliance indicating the method by which it proposes to locate a purchaser acceptable to the court. These plans are subject to the government's approval, and in instances where disagreements cannot be resolved at this late stage, the government must challenge the plan before the court. Some orders leave the defendant

> considerable discretion to choose the assets to be divested. Even broader is the defendant's discretion to negotiate with parties interested in purchasing the assets to be divested, and to accept the most lucrative offer that will not be attended by anticompetitive consequences.

5 Kintner et al., supra, § 40.12 (footnotes omitted); see also Pfunder et al., supra, at 95-111. The administrative law judge in one recent FTC case cited by JELD-WEN took this exact approach. See In re Evanston Nw. Healthcare, 144 F.T.C. at 335-45, 356-73. Although the FTC reversed that initial decision on substantive grounds, nothing in its opinion suggests that the ALJ's procedural methods were improper. See id. at 519-23.

Brown Shoe does not make it a hard and fast rule that courts must approach divestiture in this way. That case addressed the finality of a particular divestiture order under the Expediting Act, which would not provide the basis for any appeal here. See *Brown Shoe, 370 U.S. at 306-08*. Nonetheless, the Supreme Court's guidance **[**112]** about the substance of general divestiture orders is both helpful and persuasive. In Brown Shoe, the district court's divestiture order only required the defendant to "divest itself completely of all stock, share capital, assets or other interests it held in [the divested entity], so that the "remaining task for the District Court [after appeal] w[ould] be its acceptance of a plan for full divestiture, and the supervision of the plan so accepted." *Id. at 304, 308*. The Supreme Court found the broader divestiture order ripe for review because it had "consistently reviewed antitrust decrees contemplating either future divestiture or other comparable remedial action prior to the formulation and entry of the precise details of the relief ordered." *Id. at 309-10*. The Supreme Court also instructed that policy interests supported that approach:

> [A full divestiture] order requires careful, and often extended, negotiation and formulation. This process does not take place in a vacuum, but, rather, in a changing market place, in which buyers and bankers must be found to accomplish the order of forced sale. The unsettling influence of uncertainty as to the affirmance of the initial, underlying decision compelling divestiture **[**113]** would only make still more difficult the task of assuring expeditious enforcement of the antitrust laws. The delay in withholding review of any of the issues in the case until the details of a divestiture had **[*665]** been approved by the District Court and reviewed here could well mean a change in market conditions sufficiently pronounced to render impractical or otherwise unenforceable the very plan of asset disposition for which the litigation was held. The public interest, as well as that of the parties, would lose by such procedure.

Id. at 309 (emphasis added).

JELD-WEN's sole response to the compelling logic set out by the Supreme Court is to argue that Brown Shoe is inapposite because it was a Government case, and the Government was presumed to be acting in the public interest. Following that logic, there was no need for that district court to have considered the identity and intention of the buyer of the divested assets. There are undoubtedly distinctions between Government actions and private suits for injunctive relief under the Clayton Act. However, those differences do not compel the Court to decide the propriety of divestiture in a manner that is directly contrary to the forceful logic of **[**114]** the Supreme Court.

JELD-WEN's "fear of piecemeal appeals" may be real, *id. at 310*, but that alone cannot dictate a result that Brown Shoe observed makes no sense. Those practical concerns apply equally here. Moreover, the Court can decide whether divestiture is in the public interest without knowing the identity of the buyer. And, if divestiture is ordered and affirmed, and no buyer expresses interest in Towanda, then divestiture will simply not occur. If it turns out that the divestiture process yields a buyer that lacks the incentive or the means to operate Towanda competitively, the Court can decline to divest the plant to that buyer. Finally, if the Court orders a divestiture plan that directs the sale of Towanda to an unsatisfactory buyer, JELD-WEN could presumably appeal that order. That last issue remains unresolved. See id. ("No instance has been found in which the Court has reviewed a case following a divestiture decree such as the one we are asked to consider here, in which the party subject to that decree has later brought the case back to this Court with claims of error in the details of the divestiture finally approved."). But, as this case has repeatedly shown, there is a first **[**115]** time for everything.

(2) The DOJ's Statement of Interest

Pursuant to *28 U.S.C. § 517*, the DOJ submitted a Statement of Interest (ECF No. 1640) after the jury returned its verdict that the merger had substantially lessened competition and that Steves had sustained antitrust injury as a consequence. To begin, the DOJ expressed, in general, a strong preference for the structural relief of divestiture to restore competition. The DOJ then suggested that the Court should use the same analytical framework that the DOJ employs. That framework will be quite useful later.

The DOJ also expressed reservation about ordering divestiture, noting that a potential buyer (other than Steves) had not been identified. And, as to Steves, the DOJ expressed concern that,if Steves were to acquire Towanda, there would be three vertically integrated doorskin suppliers whereas before the JELD-WEN/CMI merger there had been two vertically integrated suppliers and one (CMI) that was not. On that point, the DOJ was in error because CMI was vertically integrated well before the merger.

The DOJ's other concern-the absence of an identified buyer at this state-is, as explained earlier, premature for the reasons set out by the Supreme Court **[**116]** in *Brown Shoe*. Moreover, it is unrealistic to think that the divestiture process in a private party case could proceed in the same way as the Government would proceed until the validity of the divestiture remedy has been **[*666]** affirmed on appeal. Certainly that is so here because appeal has been promised, and it is unrealistic to expect that potential buyers will come forth and be vetted while an appeal looms. However, once the legal battles have ended, the Court fully expects that the Special Master will be able to proceed within much the same framework as used by the DOJ.

(3) Standalone Viability of Towanda

The record here shows that a divested Towanda would provide significant competition in the doorskin market and restore competition that the merger lessened. The analysis begins with the undisputed evidence that, from its formation in 2002 until the housing crisis started in 2007, CMI, including Towanda's doorskins, was profitable. In this case, both parties agree that EBITDA is an appropriate measure of profitability. And the Court finds from PTX 341 and PTX 342 that, looking only at Towanda's doorskin business, the EBITDA was positive in every year from 2009 to 2013 and that it was projected **[**117]** to be profitable on that basis in 2014. That is to say, in the doorskin aspect of its business, Towanda's EBITDA in 2009, 2010, 2011 and 2012 was positive even though overall finances for that same period showed a loss.[23]

It is also clear from the record that CMI was losing money in 2011 and that made it necessary for the owners of the company to put it on the market. But, the record also shows that the situation has changed. In particular, the record establishes that:

- since the merger in 2012, demand for doorskins has increased substantially so that Towanda's most recent annual output was [ ] doorskins;
- from the time it was created CMI (through Towanda) was an important supplier of doorskins to all the Independents. Towanda is a low cost plant;
- Towanda has been significantly improved;
- the new owner could expect Steves to order [ ] doorskins per year under a long term supply contract.

Likewise the new owner would be able to count on contracts to supply JELD-WEN with [ ] doorskins per year. Given the high prices that JELD-WEN charges the other independent doormakers, it is likely that a new competitor would be able to attract business from JELD-WEN's Independent doormaker manufacturer **[**118]** customers other than Steves. And, the new owner of Towanda would have every incentive to try to attract business from the

[23] The record is not entirely clear why that is so but it appears to be that the losses largely occurred in the door manufacturing businesses of CMI at the time because the EBITDA for the doorskin business was positive and, according to JELD-WEN and the record, the MiraTec and Extira business was also profitable during that period of time.

Independents, who are now customers of JELD-WEN's by offering lower prices than the high prices they are now paying to JELD-WEN.[24]

The events of 2011 and 2012 also provide some evidence probative of whether Towanda could be a viable competitor in the doorskin market after divestiture. In particular, when the company was last on the market in 2011, there were approximately five serious buyers for the company. It is fundamentally correct that companies are not prepared to invest in other companies unless they believe they can make a profit **[*667]** in so doing. And, the new buyer will be bidding on a far more successful entity than were the five serious buyers in 2011.

Further, the record shows that the margins at Towanda, which is a way of measuring profitability, were strong. The margin is the difference between the cost of manufacturing the doorskin against the selling price of the doorskin. Professor Shapiro testified that, as far back as 2012, the margin for doorskins made at Towanda was approximately 35%. Since then, JELD-WEN's costs have gone down because improvements have **[**119]** been made at Towanda, thereby lowering the cost of manufacturing the doorskins. Further, the evidence establishes that the key input costs at Towanda have declined. The ultimate conclusion from this information is that the margin has gone up.

Accordingly, there are three substantial reasons for concluding that a divestiture of Towanda is likely to be competitive and profitable. First, there is the fact that Towanda was profitable before the significant housing downturn and that it has returned significantly to profitability. Second, the EBITDA numbers show that, even during the rough periods during the housing crisis, Towanda's EBITDA for doorskins was positive, albeit not large. Third, the margin figures indicate that a substantial profit can be made.

(4) Divestiture Will Remedy the Lessened Competition Found by the Jury

Here, as the jury found, and the record shows, the merger substantially reduced competition in the doorskin industry. Less than two years after the merger reduced the number of suppliers from three to two, one of those suppliers essentially withdrew from the market, thereby depriving the Independents of that key component of a reliable supply source. Masonite made that **[**120]** decision known to its investors and to JELD-WEN in a public telephone conference. Not long thereafter, the other supplier, JELD-WEN, embarked upon a plan to raise doorskin prices, and, in so doing, emphasized that it was then the only game in town. At the same time, JELD-WEN felt free to disregard existing contract obligations respecting pricing and to engage in bullying tactics to get increased prices even if that would kill off some of the Independents who were its customers.

Also, the quality of JELD-WEN's doorskins declined as the lessened competition took hold. And, by the beginning of 2015, the manner in which JELD-WEN dealt with defective products changed because competition had lessened.

None of that was possible when, in 2011 and 2012, CMI had been a competitor. Divestiture will once again restore three competitors who make and sell doorskins. The record does not show whether Masonite can be expected to increase its participation in selling to the Independents. But, it does permit the finding that JELD-WEN and divested Towanda can be expected to compete in selling doorskins.

Divestiture is stiff medicine. Therefore, it is important to assess whether an alternative equitable remedy, **[**121]** or a combination thereof, can effectively restore the competition that was substantially lessened by the merger. This assessment starts by remembering that, in the spring of 2012, there were three vertically integrated doorskin suppliers: Masonite; JELD-WEN; and CMI. The record shows that these three companies competed vigorously in selling doorskins to Steves and the other independent (non-integrated) door manufacturers. That is pointedly illustrated by the fact that, in 2011 and 2012, Steves was in negotiations for a new long-term supply contract, and there was significant price competition for Steves' business. **[*668]** The favorable terms were reflected in the Supply Agreement that JELD-WEN and Steves executed in May 2012, a few months before the merger closed.

[24] Further, as did JELD-WEN in 2012 when it acquired CMI, the new owner will also have the MiraTec and Extira lines and will make those products available to the customers who now buy them from JELD-WEN.

Divestiture would once again place three domestic doorskin suppliers in the doorskin market. Nothing in the record points to how that could be accomplished short of divestiture. Neither party has posited an alternative.

Although the Court could solve Steves' supply problem by ordering JELD-WEN to supply Steves' requirements for a long term, that alternate remedy would not restore competition in the industry as a whole. And, the record **[**122]** proves that the lessened competition has adversely affected the Independents other than Steves. So simply securing a long-term supply for Steves would not aid those manufacturers.

Even if the Court could order JELD-WEN to sell, for a period of time, to Steves and the other Independents at the prices that prevailed before JELD-WEN secured new prices in 2014 and 2015, there still would be only one domestic supplier willing to sell to the Independents other than on a spot basis. And, there would be no structure in place to foster competition after the Court-ordered prices expired.

Based on this record, the Court can discern no alternative to divestiture that would restore competition that the merger substantially lessened.

(5) Use of Special Master

JELD-WEN also contests the potential appointment of a special master to assist with divestiture. JELD-WEN claims that using a special master exceeds the boundary defined in La Buy v. Howes Leather Co. See *352 U.S. 249, 256, 77 S. Ct. 309, 1 L. Ed. 2d 290 (1957)* ("The use of masters is to aid judges in the performance of specific judicial duties, as they may arise in the progress of a cause, and not to displace the court." (internal citation and quotation marks omitted)).

JELD-WEN is mistaken. *Fed. R. Civ. P. 53* governs **[**123]** when a special master may be appointed. The cases cited by JELD-WEN discussed a version of *Rule 53* that required an "exceptional condition" to justify special master referrals. See *id. at 250, 256*; *Beazer E., Inc. v. Mead Corp., 412 F.3d 429, 440 (3d Cir. 2005)*; *United States v. Microsoft Corp., 147 F.3d 935, 954, 331 U.S. App. D.C. 121 (D.C. Cir. 1998)*; *Burlington N. R. Co. v. Dep't of Revenue of State of Wash., 934 F.2d 1064, 1071 (9th Cir. 1991)*. The current *Rule 53* is very different, allowing special masters to, as relevant here, "address pretrial and posttrial matters that cannot be effectively and timely addressed by an available district judge or magistrate judge of the district." *Fed. R. Civ. P. 53(a)(1)(C)*. This provision accounts for courts' increased reliance on masters "to assist in framing and enforcing complex decrees." In particular, it permits appointment of a special master "when a complex decree requires complex policing, particularly when a party has proved resistant or intransigent . . . . The master's role in enforcement may extend to investigation in ways that are quite unlike the traditional role of judicial officers in an adversary system." *Fed. R. Civ. P. 53(a)(1)* advisory committee's note to 2003 amendment.

Courts have frequently used *Rule 53(a)(1)(C)* to appoint special masters to oversee compliance with complex injunctive relief and make appropriate recommendations to those courts, see, e.g., *RLI Ins. Co. v. Nexus Servs., Inc., No. 5:18-CV-00066, 2018 U.S. Dist. LEXIS 110609, 2018 WL 3244413, at *13-14 (W.D. Va. July 2, 2018)*; *Ohio Valley Envtl. Coal. v. Fola Coal Co., LLC, No. CV 2:13-16044, 2016 U.S. Dist. LEXIS 73904, 2016 WL 3190255, at *14 (S.D.W. Va. June 7, 2016)* **[**124]** , or to conduct sales of disputed assets in foreclosure cases. See, e.g., *Stearns Bank Nat'l Ass'n v. Come* ***[*669]*** *Again, Inc., No. 8:15-CV-322-T-30JSS, 2016 U.S. Dist. LEXIS 21139, 2016 WL 695990, at *2 (M.D. Fla. Feb. 22, 2016)*. Here, divestiture compliance involves extraordinarily complex issues that, given the state of the Court's docket and its limited knowledge about asset sales in the building products industry, "cannot be effectively and timely addressed by" the Court or any judge in this district. *Fed. R. Civ. P. 53(a)(1)(C)*. And, even if *Rule 53(a)(1)(C)* did not confer appointment authority here, the Fourth Circuit has approved of special master appointments "based on [a court's] inherent authority to fashion appropriate post-verdict relief." *Trull v. Dayco Prods., LLC, 178 F. App'x 247, 251 (4th Cir. 2006)*. As a result, the Court has ample grounds for appointing a special master if it determines that divestiture is appropriate.

Finally, the parties will be afforded an opportunity to comment on and object to the order appointing the Special Master because the Court does not contemplate adopting the order proposed by Steves, and the Special Master would not be allowed to take significant action without the approval of the Court.

B. The Requested Ancillary Conduct Remedies

To assure that the requested divestiture is effective in restoring competition, Steves proposes several forms of so-called "conduct remedies." Some are appropriate. Others are not.

First, Steves says that JELD-WEN should divest to a new owner not only the Towanda facility, but also the equipment used to develop, manufacture, and sell doorskins there. That is a rather obvious requirement. Section II.A.1, supra.

Second, Steves would require transfer or licensing of all intangible assets used in the development, manufacturing, and sale of doorskins at Towanda (to include patents, schematics, designs, customer lists, vendor lists, trade secrets, and the **[**125]** know-how necessary to operate the facility).[25] A requirement of that sort is also permissible and appropriate. Section II.A.1, supra.

Third, Steves asks for an order affording the new owner a reasonable opportunity to retain the services of current Towanda employees. That too is permissible and appropriate so as to afford the divested entity an opportunity to succeed. Section II.A.1, supra.

Fourth, Steves asks that JELD-WEN be prohibited from rehiring those employees for two years. That is permissible and appropriate to afford the divested entity an opportunity to succeed. Section II.A.1, supra.

Fifth, to help assure the divested firm's success, Steves seeks an order requiring the divested entity to offer Steves an eight-year doorskin supply contract at prices based on the current Supply Agreement. Certainly, a provision requiring the new owner to agree to supply Steves beyond 2021 is a permissible, and necessary, step to remedy the irreparable remedy proved by Steves. And, the divested entity would benefit from a long-term supply agreement with Steves. However, fixing the duration of that agreement and specifying the prices to be based on the current supply agreement would be too great **[**126]** a restriction on the new owner which must be allowed to negotiate its own contract terms if it is to succeed. Section II.A.1, supra.

[*670] Sixth, Steves seeks a provision that would allow JELD-WEN's independent customers-such as Lynden, Haley, and Excel-to terminate, without penalty, their supply agreement with JELD-WEN to help alleviate the effect of the lessened competition on them (the high prices recently extracted by JELD-WEN). Considering that the lessened competition from the merger allowed JELD-WEN to extract high prices from its independent customers, a provision of this sort would help restore competition. Section II.A.1, supra

Lastly, Steves asks that the Court limit JELD-WEN's ability to buy doorskins from the new owner of Towanda to a period of two years. A provision of that sort would not help the new owner to succeed. And, JELD-WEN, like Steves, would be a natural customer for the new owner because JELD-WEN already uses some of Towanda's output. On the other hand, JELD-WEN cannot be allowed to limit the quantity of doorskins that are available to the Independents by buying up all of the output of Towanda. Therefore, it would be appropriate to allow JELD-WEN to buy from the new **[**127]** owner of Towanda, but to require that, after the first two years following divestiture, the new owner satisfy the requirements of the Independents before supplying more than [ ] doorskins to JELD-WEN. Section II.A.1, supra.

For the foregoing reasons, and to the extent recited above, the ancillary provisions and conduct relief will be granted and denied.

---

[25] If the buyer should be Steves, it will be necessary to make provisions that secure to JELD-WEN the benefits of the jury verdict and any relief granted in the trade secrets trial.

C. JELD-WEN's Equitable Defenses

As noted in a separate opinion, unclean hands is not a valid defense to a *Section 16* request for injunctive relief on the facts of this case. See Divestiture Evidentiary Issues Op. (ECF No. 1759) at 14. Accordingly, laches is the only pleaded equitable defense remaining to JELD-WEN here. Laches is an available equitable defense to divestiture. See *Am. Stores, 495 U.S. at 296*. The defense also can bar the proposed ancillary remedies.

Laches "operates throughout the entire remedial portion of equity jurisprudence." 2 John Norton Pomeroy, A Treatise on Equity Jurisprudence § 418, at 169 (5th ed. 1941). According to the eminent English chancellor, Lord Camden:

> A court of equity, which is never active in relief against conscience or public convenience, has always refused its aid to stale demands, where the party has slept upon his rights, and acquiesced **[**128]** for a great length of time. Nothing can call forth this court into activity but conscience, good faith, and reasonable diligence.

Id. § 419, at 171 (emphasis added) (internal quotation marks omitted). Laches is thus defined as "such neglect or omission to assert a right as, taken in conjunction with lapse of time, more or less great, and other circumstances caus[es] prejudice to an adverse party." *Id. at 171-72* (internal quotation marks omitted). Each case turns on its own facts because, as explained by the Supreme Court,

> what might be inexcusable delay in one case would not be inconsistent with diligence in another, and unless the nonaction of the complainant operated to damage the defendant, or to induce it to change its position, there is no necessary estoppel arising from the mere lapse of time.

N. Pac. R. Co. v. Boyd, 228 U.S. 482, 509, 33 S. Ct. 554, 57 L. Ed. 931 (1913) (citing *Townsend v. Vanderwerker, 160 U.S. 171, 186, 16 S. Ct. 258, 40 L. Ed. 383 (1895))*. In Townsend, the Supreme Court considered the assertion of laches where the defendant's dead and intestate relative **[*671]** ("Marvin") had agreed to convey to the plaintiff a one-half interest in a house on a lot owned by Marvin in exchange for the plaintiff contributing funds to build the house and supervising the construction. The plaintiff superintended the job from 1879 to 1880, and made the required **[**129]** payments from 1879 to 1884. But, he did not file a bill in equity until 1889, after Marvin had died. See *Townsend, 160 U.S. at 172-73*. The Supreme Court held that, this delay notwithstanding, the defense of laches was not available, and thus that plaintiff could treat the property as subject to a lien in his favor and could have it sold to satisfy his claim for half of its original value. *Id. at 182-83*. In making its decision, the Supreme Court examined the circumstances of the house payments and the relationship between Marvin and the plaintiff. As the Supreme Court explained, those individuals had lived together in the house after it was built. Moreover, Marvin regarded the plaintiff as a foster child, and had stated that she would include him in her will and intended the house to be his when she was done with it. Mindful of these circumstances, the Supreme Court held that laches did not preclude the equitable relief sought because,

> [d]ealing with the person who stood in this relationship with him and whom he had always been upon friendly, and even intimate, terms, the same diligence could not be expected of [the plaintiff] as would have been if he had been treating with a stranger.

Id. at 185-86. In other words, what constitutes reasonable **[**130]** diligence depends upon the particular facts of the case, including the relationship between the parties.

The Supreme Court was confronted with another ten-year delay in Northern Pacific Railway Company. In that case, a railroad reorganization pursuant to bankruptcy proceedings had been completed in 1896, and the plaintiff attacked that reorganization by filing a bill in equity in 1906. Noting that background, the Supreme Court held that:

> [t]he fact that improvements are put upon the property—that the stocks and bonds of the new company almost immediately became the subject of transactions with third persons-calls for the special application of the rule of diligence. But the doctrine of estoppel by laches is not one which can be measured out in days and months, as though it were a statute of limitation. For what might be inexcusable delay in one case would not be inconsistent with diligence in another, and unless the nonaction of the complainant operated to damage the

> defendant, or to induce it to change its position, there is no necessary estoppel of laches arising from the mere lapse of time.

N. Pac. R., 228 U.S. at 508-09 (emphasis added). The Court went on to assess the plaintiff's diligence and concluded that **[**131]** he had made reasonable, albeit time-consuming, efforts to put himself in the position of a judgment creditor of the railroad so that he could proceed in equity to collect his debt. See *id. at 509*. As does Townsend, this decision teaches that the determination of laches must be made in perspective of the facts of each case respecting the circumstances of the delay and the effects thereof.

The Fourth Circuit's approach to the doctrine of laches is consistent with that foundation. "Laches imposes on the defendant the ultimate burden of proving '(1) lack of diligence by the party against whom the defense is asserted, and (2) prejudice to the party asserting the defense.'" *White v. Daniel, 909 F.2d 99, 102 (4th Cir. 1990)* (quoting *Costello v. United States, **[*672]** 365 U.S. 265, 282, 81 S. Ct. 534, 5 L. Ed. 2d 551 (1961))*. The defense "applies to preclude relief for a plaintiff who has unreasonably 'slept' on his rights," barring "claims where a defendant is prejudiced by a plaintiff's unreasonable delay in bringing suit after the plaintiff knew of the defendant's violation." *PBM Prods., LLC v. Mead Johnson & Co., 639 F.3d 111, 121 (4th Cir. 2011)*; see also *Kloth v. Microsoft Corp., 444 F.3d 312, 325 (4th Cir. 2006)* (laches involves an "equitable balancing of a plaintiff's delay with prejudice to a defendant" (internal quotation marks omitted)). The laches analysis is highly fact-dependent. See *White, 909 F.2d at 102*.

Before addressing the elements of the laches framework, it is necessary **[**132]** to address Steves' contention that JELD-WEN must overcome the "strong presumption" that laches does not apply because Steves initiated this litigation within the Clayton Act's statute of limitations for damages claims. *Synergistic Int'l, L.L.C. v. Korman, No. CIV. 2:05CV49, 2007 U.S. Dist. LEXIS 9752, 2007 WL 517677, at *8 (E.D. Va. Feb. 8, 2007)*. Both cases that Steves cites as establishing this "presumption" are trademark infringement suits, so their principles do not necessarily control in an antitrust case. See *Elvis Presley Enters., Inc. v. Elvisly Yours, Inc., 936 F.2d 889, 894 (6th Cir. 1991)* (citing *Tandy Corp. v. Malone & Hyde, Inc., 769 F.2d 362, 365 (6th Cir. 1985))*; *Synergistic Int'l, 2007 U.S. Dist. LEXIS 9752, 2007 WL 51767, at *8* (citing *Reno Air Racing Ass'n, Inc. v. McCord, 452 F.3d 1126, 1138-38 (9th Cir. 2006))*.

Section 4B of the Clayton Act imposes a four-year statute of limitations for damages claims by any private plaintiff or by a government entity. See *15 U.S.C. § 15b*. *Section 16*, on the other hand, contains no statute of limitations. See id. *§ 26*; *New York ex rel. Spitzer v. Saint Francis Hosp., 94 F. Supp. 2d 399, 421-22 (S.D.N.Y. 2000)*. Nonetheless, because *Section 4* and *Section 16* provide different remedies for the same antitrust violations, *Cargill, 479 U.S. at 113*, several courts have used *Section 4B*'s limitations period as a guideline for analyzing laches defenses to *Section 16* claims. See *Oliver v. SD-3C LLC, 751 F.3d 1081, 1086 (9th Cir. 2014)*; *Midwestern Mach. Co. v. Nw. Airlines, Inc., 392 F.3d 265, 277 (8th Cir. 2004)*; *Duty Free Ams., Inc. v. Estee Lauder Cos., Inc., No. 12-60741-CIV, 2014 U.S. Dist. LEXIS 43673, 2014 WL 1329359, at *14 (S.D. Fla. Mar. 31, 2014)*, aff'd, *797 F.3d 1248 (11th Cir. 2015)*; *KFC Corp. v. Marion-Kay Co., 620 F. Supp. 1160, 1168 (S.D. Ind. 1985)*; *Argus Inc. v. Eastman Kodak Co., 552 F. Supp. 589, 600 (S.D.N.Y. 1982)*; *Farbenfabriken Bayer, A. G. v. Sterling Drug, Inc., 197 F. Supp. 627, 629 (D.N.J. 1961)*, aff'd, *307 F.2d 210 (3d Cir. 1962)*.[26] Moreover, one of the first cases to adopt that approach was *International Telephone & Telegraph Corp. v. General Telephone & Electronics Corp., 518 F.2d 913 (9th Cir. 1976)*. IT&T's conclusion was supported in part by the existence of what the court referred to as a "double standard" for calculating the laches period:

> If relief **[**133]** is sought, not on the theory that past or present actions or behavior constitute actual violations of the substantive ***antitrust law***, but because the plaintiff is threatened with an impending violation, then laches should normally run from the time when the plaintiff was first confronted with an enjoinable threat and thus could have obtained injunctive relief. If the threat later matures into an actual violation and the plaintiff sues to

---

[26] Although the Fourth Circuit implicitly approved of that approach, it has not directly addressed the question. See *Weinberger v. Retail Credit Co., 498 F.2d 552, 556 (4th Cir. 1974)*.

> prevent recurrence or **[*673]** continuation of the violation, then laches should be recomputed from the time of the subsequent actual violation.
>
> This 'double standard' for laches reflects the fact that there are two basic theories of relief for actions under *[Section] 16*. Injunctions may be obtained against (1) impending violations of the substantive law, and (2) past or present violations likely to continue or recur.

Id. at 928-29 (emphasis added) (citing *Zenith Radio, 395 U.S. at 130*). In IT&T, the plaintiff sought to restrain certain actual violations of the Sherman and Clayton Acts, and the court held that "the proper starting point for computation of the laches period is the time when the alleged violations occurred." *Id. at 929* (emphasis added). In doing so, it noted that "[t]he four-year limitation of . . . *Section 4B* for **[**134]** private antitrust actions for damages is long enough to enable potential plaintiffs to observe the actual effects and the possible antitrust violation and to calculate its potential defects." Id. That approach comports with the common sense understanding that the actual competitive effects of a merger may be delayed as they were in this case.

Examining the laches period in this flexible manner is consistent with how laches operates in copyright infringement suits. See *Petrella v. Metro-Goldwyn-Mayer, Inc., 572 U.S. 663, 134 S. Ct. 1962, 1977-78, 188 L. Ed. 2d 979 (2014)*. More importantly, it comports with longstanding Fourth Circuit law:

> In the application of the doctrine of laches, the settled rule is that courts of equity are not bound by, but that they usually act or refuse to act in analogy to, the statute of limitations relating to actions at law of like character. The meaning of this rule is that, under ordinary circumstances, a suit in equity will not be stayed for laches, before, and will be stayed after the time fixed by the analogous statute of limitations at law; but if unusual conditions or extraordinary circumstances make it inequitable to allow the prosecution of a suit after a briefer . . . period than that fixed by the statute, the [court] will not be bound by the statute, **[**135]** but will determine the extraordinary case in accordance with the equities which condition it.

King v. Richardson, 136 F.2d 849, 862 (4th Cir. 1943) (emphasis added) (internal quotation marks omitted). Using *Section 4B*'s limitations period as a guideline (as posited by ITT) and not a firm rule better serves the purposes of the Fourth Circuit's settled laches approach because it accounts for the alternate ways in which the laches period may start running under *Section 16*.

As a result, although Steves' initiating this action within *Section 4B*'s limitations period does not necessarily lead to a strong presumption against laches (as it would in trademark infringement suits), it is appropriate to rely on that four-year period as a guideline to determine whether Steves unreasonably delayed here.

1. Reasonableness of Steves' Delay

"An inexcusable or unreasonable delay may occur only after the plaintiff discovers or with reasonable diligence could have discovered the facts giving rise to his cause of action." *White, 909 F.2d at 102*. This factor thus requires the Court to decide when Steves knew or should have known that it was facing "threatened loss or damage" from a *Section 7* violation, as needed to establish *Section 16* standing. *15 U.S.C. § 26*. The laches period would have started running only at that time. See *Ray Communs., Inc. v. Clear Channel Communs., Inc., 673 F.3d 294, 301 (4th Cir. 2012)* ("Logic dictates **[**136]** that 'unreasonable delay' does not include any period of time before the [plaintiff] is able to pursue a claim . . . ." (internal quotation marks **[*674]** omitted)). And, of course, Steves could not have been aware of any *Section 7* violation until it was reasonably knowable that "the effect of [the CMI] [A]cquisition may be substantially to lessen competition." *15 U.S.C. § 18*.

JELD-WEN argues that Steves should have known of a threatened *Section 7* violation as early as April 2012, when Steves became aware of the planned CMI Acquisition, and at the latest on October 24, 2012, when the merger was consummated. But accrual principles for *Section 4* damages claims help show why that is not correct. *Section 4B*'s limitations period "starts to run at 'the point the act first causes injury.'"[27] *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1051 (8th Cir. 2000)* (quoting *Klehr v. A.O. Smith Corp., 521 U.S. 179, 190-91, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997))*. Because *Section 7* makes the acquisition itself illegal, and the antitrust harm from the acquisition is usually known when the merger is consummated, *Section 4* claims often begin accruing on that date. See *id. at 1050*. But a *Section 7* violation "may occur 'at or any time after the acquisition, depending upon the circumstances of the particular case.'" *Midwestern Mach., Inc. v. Nw. Airlines, Inc., 167 F.3d 439, 443 (8th Cir. 1999)* (quoting *United States v. E.I. du Pont de Nemours & Co., 353 U.S. 586, 597, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957))*; see also *United States v. ITT Cont'l Baking Co., 420 U.S. 223, 242, 95 S. Ct. 926, 43 L. Ed. 2d 148 (1975)* (violation may occur post-consummation if there was "no realistic threat of restraint of commerce or creation of a monopoly" **[**137]** when acquisition completed).

Areeda and Hovenkamp's example of this sort of situation is particularly apt here:

> One might imagine a merger that occurred in 1980 but with no immediate price increase, perhaps because the firm at that point lacked the power. But suppose the firm thereafter augmented its power and finally exacted a monopoly price increase in 1990 . . . and the plaintiff brings its action in 1993. In such a case the statute of limitation would not begin to run until the post-merger price increase occurred.

12 Areeda & Hovenkamp, supra, ¶ 1205b.

With these principles in mind, the first task is to ascertain the period of delay that is involved here. This action was filed on June 29, 2016, slightly more than four years after JELD-WEN announced that it was going to acquire CMI and a few months before the fourth anniversary of the consummation of the merger. Therefore, at its maximum reach, the period of delay was equivalent to the four-year statute of limitations set by *Section 4B* for damages claims. Thus, the filing of the antitrust action was within the guideline period as outlined in *ITT* and *King v. Richardson*. That does not, however, resolve the reasonable delay analysis.

To begin, as explained below, the period **[**138]** from April 2012 to August 2014 cannot be included in the period of delay in the laches calculus. Thus, it is necessary to remember that JELD-WEN was aware at the time of the merger that the antitrust issues associated with the CMI Acquisition were significant. PTX-90. Indeed, having calculated market concentration as a consequence of the forthcoming acquisition and the Herfindahl-Hirschman indices for markets impacted by the merger, JELD-WEN retained highly-qualified antitrust counsel from one of the nation's largest **[*675]** law firms, O'Melveny & Myers. In sum, and as the record shows, JELD-WEN knew full well of the merger's antitrust implications.

Mindful of those implications, JELD-WEN pursued an established merger strategy to assuage any possible concerns from the DOJ, from CMI's customers, and from JELD-WEN's own customers (including Steves). Specifically, JELD-WEN developed a plan to enter into long-term supply agreements with independent door manufacturers in the United States (notably Steves, Lynden, and Haley), see PTX-93; PTX-139. As part of its strategy, JELD-WEN deliberately decided not to approach the DOJ about the proposed CMI Acquisition until those long-term agreements had been **[**139]** entered. In fact, JELD-WEN's internal documents show that the company considered it a "tactical error to even call [the DOJ]" before entering into those supply agreements, and that JELD-WEN was fully aware that having those contracts in place would "be very positive for us [at the DOJ] if we ever go." PTX-160. As Shapiro explained at trial, acquiring firms often enter into long-term contracts with customers in order to prevent a challenge to the merger. That tactic limits the DOJ's ability to secure evidence necessary to block a merger because customers with supply agreements are less willing to oppose a merger proposed by their supplier and because customers do not have reason to be threatened.

And, when JELD-WEN did approach the DOJ about the CMI Acquisition, it emphasized its long-term supply agreements with Steves, Lynden, and others. And Morrison, who led the company's presentation to the DOJ, admitted that the purpose of entering into such contracts was "to alleviate" customer concerns about not having a

---

[27] Steves did not need to suffer actual antitrust injury to bring a *Section 16* claim, which requires only "threatened" injury. However, based on the facts in the record, it is not clear that this distinction is relevant to the outcome here.

supply and "to assure the customers of CMI, who might eventually become customers of JELD-WEN, that JELD-WEN was committed to their continued supply." See PTX-139.

Based on these **[**140]** facts, the Court finds that before, and at the time of, the merger in 2012, Steves had no reason to believe that there would be anticompetitive effects from the merger because JELD-WEN designed its pre-merger strategy to create that state of mind. To the contrary, Steves had a positive relationship with JELD-WEN through its CEO, Phillip Orsino, and had a recently signed long-term contract with JELD-WEN which Orsino described as a lifetime arrangement. And, although Steves did not take that assurance literally, under all the known circumstances, it was reasonable for Steves to believe that the merger would not produce a substantial lessening of the competition that had produced the favorable terms in the Supply Agreement.

The record here establishes, and the Court finds, that Steves did not know, and could not reasonably have known, that JELD-WEN's conduct violated *Section 7* until August 2014 at the earliest. JELD-WEN is right that Steves learned of the CMI Acquisition in April 2012, and it knew that the merger would reduce the number of doorskin suppliers from three to two. But that did not mean much to Steves because it reasonably believed that the prices that JELD-WEN could charge were constrained **[**141]** by the Supply Agreement. Applying *Section 4* accrual rules here, any claim would have been dead in the water in April or October 2012 because there was no existing or threatened antitrust injury, and antitrust damages would have required speculation about JELD-WEN's future acts.

Although, in November 2012, Steves subsequently noticed some decline in doorskin quality, it did not associate those problems with the CMI Acquisition then. **[*676]** The same is true of the doorskin pricing issues arising in late 2012 through 2013, which Steves perceived as a purely contractual issue that could be, and eventually was, worked out through communications with Orsino. There was no reason for Steves to believe that these issues were anticompetitive effects from the merger; both sides treated Steves' concerns as essentially contract disputes. In any event, Steves could have tried to shift its doorskin purchases to Masonite if it was dissatisfied with JELD-WEN. In other words, even though JELD-WEN had acquired excess market power through the CMI Acquisition, it did not use that power before 2014.

However, the record establishes that, in May 2014, Hachigian, who had taken over from Orsino as JELD-WEN's new CEO, informed **[**142]** Steves that it would be necessary to renegotiate the Supply Agreement to secure higher prices, including a so-called "capital charge" (to help defray JELD-WEN's cost of capital invested in the business) because Hachigian thought that the Supply Agreement was mispriced and unfair to JELD-WEN. At that time, Hachigian also told Steves that he intended to invoke the termination provisions of the Supply Agreement to bring the parties to the bargaining table.

In retrospect, that conduct represented the first of a series of events wherein JELD-WEN exercised the market power brought about by the substantial lessening of competition effected by the merger (as found by the jury). However, Steves was reasonable in believing that the purpose of the threatened termination was, as Hachigian had represented, to bring the parties to the negotiating table to try to get a more favorable agreement for JELD-WEN. Then, in July 2014, Hachigian sent Sam Steves a Masonite presentation stating that Masonite would not sell doorskins to competing door manufacturers like Steves. Hachigian sent that presentation to Steves, not for mere informational purposes, but as a message from JELD-WEN that Steves had to deal **[**143]** with JELD-WEN because the only other supplier (Masonite) was not to be a future source of supply. That conduct, combined with the termination notice and Hachigian's actions in May 2014, portended that the JELD-WEN might now be using the increased market power that it had gained as a result of the merger.

Sam and Edward Steves appear to have recognized that possibility in mid-August 2014. Thus, on August 12, 2014, Sam Steves e-mailed Edward Steves to express his concerns about Masonite's statements that it and JELD-WEN were the only vertically integrated doorskin manufacturers and that the barrier to entry in the doorskin market was "prohibitive." Sam Steves then asked whether Steves was "finished with exploring anti trust issues if J[ELD-WEN] term[inate]s the [S]upply [A]greement." DX-291. Then, on August 26, Sam Steves sent Edward Steves another e-mail that proposed a response to an e-mail from Hachigian about various issues under the Supply Agreement, including the proposed capital charge. In that e-mail to his brother, Sam Steves suggested that Steves send a "VERY strong response" and "tee up [its] claim on the overcharge." His proposed response also included this suggested language: **[**144]** "We remain troubled that you continue to threaten termination of the agreement if we don't consent to . . . a price increase! Finally, and perhaps most important—the antitrust." DX-466.

Neither Sam nor Edward Steves were called upon to explain the comments made in those emails. So, it is difficult to discern their meaning. Nonetheless, those e-mails show that Steves should have been alerted to the possibility that the threatened price **[*677]** increases and the contract termination were effects of the merger. That possibility would have become more concrete when Hachigian sent the Supply Agreement termination letter on September 10, 2014. Accordingly, the record permits the conclusion that Steves should have known that it faced threatened or actual antitrust injury by August 12, 2014,[28] and that Steves did know by September 10, 2014.

Therefore, the question becomes whether JELD-WEN has proven that the time between August 12, 2014 and June 29, 2016 (when this action was filed) constitutes unreasonable delay for purposes of laches. As previously explained, that is a case-specific inquiry that depends on the particular facts at hand. In this case, the inquiry begins with the understanding that **[**145]** Steves needs a reliable supply of doorskins to survive, a fact known by both Steves and JELD-WEN. The inquiry also must take into account that, in August 2014, there were only two domestic doorskin manufacturers, and that one, Masonite, recently had announced that it would not sell doorskins to independent door manufacturers like Steves. The reasonableness assessment must also consider that the other supplier, JELD-WEN, had just given notice to Steves that the Supply Agreement would end in 2021 unless Steves agreed to JELD-WEN's demands for a substantial price increase. Also, in August 2014, there was virtually no decisional law around which to measure the viability of a private party antitrust lawsuit, much less one in which the substantial lessening of competition had been brought about under the circumstances presented by this record. Finally, the assessment must keep in mind that JELD-WEN was a far bigger and far better-heeled company than Steves. The question then becomes whether it was reasonable for Steves, confronted with these realities in August 2014, to have instituted a costly, protracted, and novel antitrust litigation to attempt to solve a supply dilemma that was then **[**146]** seven years in the future. The record teaches that such a course was not reasonable.

Instead, as the record here shows, when confronted with contract termination, Steves reasonably elected to try to find another reliable source of supply. To that end, in October 2014, the Steves Brothers met with Masonite's CEO, Fred Lynch who informed them that Masonite would not sell doorskins to Steves except on a spot basis, and at prices that were so high that Steves could not make a profit. Faced with that position by Masonite, it became both necessary and reasonable for Steves to treat further with JELD-WEN. So, in January 2015, Sam and Edward Steves met with Hachigian, Merrill, and other JELD-WEN representatives in an effort to resolve the differences between the two companies, and thereby to secure the reliable source of supply on which Steves' survival depended.

However, in that meeting, Hachigian threatened that JELD-WEN would be "total pricks" over the remaining term of the Supply Agreement if Steves did not agree to renegotiate the contract to pay higher **[*678]** doorskin prices. See PTX-514. And, from January 2015 to the middle of that year, JELD-WEN informed Steves about a series of greater price **[**147]** increases, which JELD-WEN conceded at trial were actually prohibited by the Supply Agreement. During that same period, JELD-WEN refused to provide Steves with the contractually required information that would allow Steves to determine whether the proposed price increases were legitimate under the controlling provisions of the Supply Agreement.

With those developments, Steves again approached Masonite, the only other domestic supplier, about a supply of doorskins. It was reasonable to make the last ditch effort with Masonite. Lynch again informed Edward Steves that Masonite would not supply Steves with doorskins on a long-term basis, offering to sell Steves' doorskins only on a spot basis at prices that would be unprofitable for Steves.

---

[28] At least one case has suggested that the continuing violations doctrine might apply to extend the laches period each time a new anticompetitive act occurs. See *IT&T, 518 F.2d at 929*. However, the Court already noted that this doctrine usually does not apply in Clayton Act cases, and held that the anticompetitive effects here were "unabated inertial consequences" of the CMI Acquisition, not independent *Section 7* violations. See Summary Judgment Op. at 30-31 (internal quotations omitted). Therefore, any doorskin price increases or quality reductions after August 2014 did not change the beginning date of the laches period.

Therefore, at about the same time, Steves found it necessary to explore the possibility of buying doorskins from foreign manufacturers or building its own doorskin plant. Steves ultimately determined that neither option was likely to provide an adequate source of supply by the time that the Supply Agreement would expire. Nonetheless, it was reasonable for a small company like Steves to explore securing a doorskin supply by purchasing from foreign suppliers **[**148]** or building its own plant rather than instituting a novel antitrust lawsuit against its much larger and more powerful supplier. The record shows that the process of assessing the viability of foreign manufacturers as a source of supply, like the process of evaluating whether it was possible or sensible to build a plant as the source of supply was complicated and time-consuming. Here, the record shows that, once Steves had determined that it could rely on neither of the two domestic doorskin suppliers (Masonite or JELD-WEN), it timely and diligently pursued the only other conceivable alternatives to filing an antitrust suit. Accordingly, the record here shows, and the Court finds, that Steves proceeded with reasonable diligence to consider the viability of these alternate sources of supply rather than starting a lengthy, costly,and novel antitrust lawsuit against its vastly better-financed supplier.

By early 2015, Steves had concluded that its future was at serious risk because the Supply Agreement with JELD-WEN would expire in 2021, and neither Masonite nor foreign suppliers offered a reasonable alternative mean of supply. Moreover, it was entirely uncertain whether Steves could afford **[**149]** to build a doorskin plant, either on its own or with a partner.

However, there was available to Steves another means to try to resolve the problems that both threatened Steves' existence and that, if not solved, would present antitrust injury: the alternative dispute resolution provision ("ADR") in the Supply Agreement. That process required Steves and JELD-WEN, as a first step, to hold an internal conference among senior executives. PTX-149 § 10(a). If that step was unsuccessful, the contract the required the parties to engage in mediation as a second step. Id. § 10(b).

On March 11, 2015, Steves invoked the ADR provisions of the Supply Agreement, and it requested an internal conference among senior executives to occur on March 23. DX-243 at 2. However, the two internal conferences did not take place until May 2015. At one of those meetings, Steves' attorney, Marvin Pipkin, expressed Steves' concern about antitrust issues arising out of JELD-WEN's conduct. The record does not reflect the exact details of Pipkin's statements or JELD-WEN's response. But it is clear that, by May 2015, JELD-WEN **[*679]** was aware of the risk of an antitrust claim if it persisted to exploit, in its dealings with Steves, the substantially **[**150]** lessened competition that the merger had produced. Of course, Steves too was aware of that potential antitrust claim.

After the internal conferences were unsuccessful, on July 2, 2015, Steves requested the mediation required by the Supply Agreement. That mediation took place in September 2015. The parties' disputes were not resolved then, but Steves presented JELD-WEN with a draft Complaint that raised both contract and antitrust claims.

Thereafter, on September 4, 2015, the parties entered into the first of several standstill agreements, which were extended on September 29, 2015; October 13, 2015; January 27, 2016; and April 25, 2016. Those agreements contained provisions reciting the parties'"desire to continue to discuss their differences in an effort to resolve these differences without litigation." See PTX-591; PTX-593; PTX-606; PTX-641; PTX-682.

While the standstill agreements were in effect, Steves, in December 2015, gave a presentation to the DOJ complaining of antitrust violations, after which the DOJ initiated a civil investigative demand. JELD-WEN subsequently gave a presentation to the DOJ on April 7, 2016. The investigation was closed by the DOJ on May 18, 2016. In June 2016, **[**151]** Steves requested JELD-WEN to agree to another extension of the standstill agreements, which JELD-WEN rejected. Immediately thereafter, on June 29, 2016, Steves filed this action.

On this record, the Court holds that JELD-WEN has not met its burden to prove that the delay between September 10, 2014 and June 29, 2016 was unreasonable. To the contrary, the record shows that, during that period, Steves took every reasonable step to try to secure a reliable supply of doorskins that was essential for its survival. It was reasonable for a small purchaser, like Steves, to try all reasonable measures to avoid litigation with the supplier of an ingredient essential to its core product line. That is especially so where, as here, the supplier is a vastly larger company that can afford costly litigation and where, as here, that supplier indicates a continued desire to attempt to work things out short of litigation. Public policy supports efforts by parties to work out difficult issues respecting their business relationships without resorting to litigation. See *Essilor Int'l v. Nidek Co., 217 F.3d 857*, [published in full-text format at *1999 U.S. App. LEXIS 28426*] 1999 WL 989071, at *5; (Fed. Cir. 1999); *NAACP v. NAACP Legal Def. & Educ. Fund, Inc., 753 F.2d 131, 137, 243 U.S. App. D.C. 313 (D.C. Cir. 1985)*; *Piper Aircraft Corp. v. Wag-Aero, Inc., 741 F.2d 925, 932 (7th Cir. 1984)*; cf. *Petrella, 134 S. Ct. at 1976*. Furthermore, common sense teaches that antitrust litigation would be lengthy and exceedingly expensive. And, in this case, the **[**152]** kind of antitrust case that Steves would have to bring would be the first of its kind. So there was no reliable way to predict what such litigation might cost or whether it would even be concluded before Steves would lose its source of supply in 2021.

Nor was it unreasonable for Steves to use the contractually-required ADR process to try to work out a business compromise to the contract-related problems that actually produced its antitrust injury, instead of immediately commencing antitrust litigation. Even after those procedures failed, the parties, both mindful of the potential for antitrust litigation, agreed to standstill agreements with a view to solving their differences. Considering the representations in those agreements that both parties wanted to resolve their differences without litigation, Steves reasonably avoided **[*680]** filing an antitrust suit until JELD-WEN refused to continue the process.

Considering the record as a whole, JELD-WEN has not proven that the delay from August 2014 to June 2016 was unreasonable. That, of course, defeats JELD-WEN's laches defense, because it has failed to prove the first element of that defense. Thus, the inquiry respecting the application of laches **[**153]** to the equitable remedies is at an end.

2. Prejudice to JELD-WEN

Ordinarily, it is preferable to articulate a single basis for decision, and thereby refrain from making alternative holdings. See *Karsten v. Kaiser Found. Health Plan of Mid-Atl. States, Inc., 36 F.3d 8, 11 (4th Cir. 1994)*. However, this case presents an exception to that rule, given that it presents issues of first impression on which appeal is virtually certain, and considering the nature of the relief sought. Therefore, in the interest of judicial economy, it is appropriate to consider the prejudice element of JELD-WEN's laches defense so that the entire picture will be available for consideration in the likely event of appeal.

Even unreasonable delay does not animate the bar of laches if that delay does not cause harm to the defendant. *Ray Commc'ns, 673 F.3d at 305*. Prejudice is shown by "a disadvantage on the part of the defendant in asserting or establishing a claimed right or some other harm caused by detrimental reliance on the plaintiff's conduct," *White, 909 F.2d at 102*, including economic prejudice. *Ray Commc'ns, 673 F.3d at 305*. In addition, a defendant is always "'aided by the inference of prejudice warranted by the plaintiff's delay.' . . . [T]he greater the delay, the less the prejudice required to show laches, and vice versa." *White, 909 F.2d at 102* (quoting *Giddens v. Isbrandtsen Co., 355 F.2d 125, 128 (4th Cir. 1966)*. But, in every case, "the defendant **[**154]** is ultimately required to prove prejudice (given the defendant's burden to plead and prove laches under *Fed. R. Civ. P. 8(c)*)." Id.

Here, there is no contention that JELD-WEN suffered any disadvantage in asserting or establishing a claimed right. Instead, JELD-WEN relies on the presence of "some other harm caused by detrimental reliance on [Steves'] conduct." In particular, JELD-WEN asserts various economic disadvantages that it says constitute prejudice.

JELD-WEN contends that, beginning immediately after the merger and continuing through 2016, it took numerous steps to integrate Towanda into its overall manufacturing operation. It claims that it closed CMI's Chicago headquarters, consolidated administrative functions, mothballed the Marion plant in 2013, sold Dubuque in 2016, and otherwise integrated Towanda into its general manufacturing plans but for Steves' delay in initiating suit. Those positions are based almost exclusively on the testimony of Morrison, and the Court declines to accept his testimony.

Morrison, who also served as JELD-WEN's trade secrets expert in the liability phase of the trade secrets case, was shown at the trade secrets trial to be a witness who could not be believed. He lied **[**155]** on his resume, which was offered into evidence, stating that he had graduated from Louisiana State University when in fact he had attended but one semester. He lied again, at his deposition and trial, when asked about his resume and his education, and he allowed JELD-WEN to publicly tout him as a graduate of Louisiana State University for years. A person who will lie about something of that nature is not to be believed. Moreover, having observed Morrison's conduct when testifying in the Remedies Hearing, the Court notes that he was **[*681]** more advocate than witness, and regrettably concludes that he would say anything to support JELD-WEN's cause whether it was supported by facts or not.

Accordingly, the Court does not believe his testimony that, in reliance on the absence of an antitrust suit, JELD-WEN would not have mothballed the Marion plant, closed the Dubuque plant, made the modifications in its system, and effectuated the integration of the Towanda plant into JELD-WEN's operations. Wholly apart from Morrison's lack of credibility, the record shows that the Marion plant was mothballed because of the expense of meeting environmental regulations and updating antiquated equipment. And, the **[**156]** record also shows that the decision to close the Dubuque plant was made in 2011, before the merger. Thus, the record also shows that Morrison's testimony is not credible.

Putting aside Morrison's testimony, the evidence is generally undisputed that JELD-WEN expended significant funds installing capital improvements and manufacturing processes in Towanda and integrating Towanda into its operation. But, the preponderance of the evidence does not establish that JELD-WEN relied on the absence of an asserted antitrust claim by Steves, in taking those steps. To the contrary, JELD-WEN made substantial investment in Towanda even after it was told by Pipkin in May 2015 that Steves had antitrust concerns and after Steves presented a copy of an anti complaint in September 2015. That JELD-WEN continued to invest in Towanda with that knowledge materially undercuts JELD-WEN's contention that it would not have made investments in Towanda had it been aware of a possible antitrust claim.

Further, the Court finds that JELD-WEN was fully aware that an antitrust action could be filed at any time within four years after the merger and, in any event, it is charged with that knowledge. And, mindful of that **[**157]** possibility, JELD-WEN made its investments in Towanda, integrated Towanda into its operational system, and took all the actions it now uses to prove the prejudice component of its laches defense.

The record shows that JELD-WEN relied not on Steves' inaction but on having successfully lulled Steves and the DOJ into action by entering into long-term contracts with the independent doorskin customers, including Steves. JELD-WEN thus relied on that tactic to insulate it going forward after the merger, not on Steves' inaction. Accordingly, JELD-WEN has not met its burden of proof on the component of detrimental reliance.

But, even if JELD-WEN can be said to have made the requisite showing of detrimental reliance, it has nonetheless failed to show prejudice that would suffice to establish laches. For example, the record is clear that JELD-WEN has more than recovered the capital investments (plant modifications and new equipment) that it made in Towanda after the merger, the making of which JELD-WEN asserts as prejudice. And, its operation of Towanda has yielded considerable profit. JELD-WEN, of course, will not have to disgorge that profit.

As discussed fully in Section II.A.3.(b) (Balance of **[**158]** Hardships), the operational changes that, of necessity, will be made in the event of divestiture will no doubt be troublesome to achieve, will entail significant expense, and will have some detrimental collateral consequences. However, the making of the changes necessary to restore competition is not such prejudice as will call into operation the equitable defense of laches into play.

JELD-WEN's position on laches is founded principally on the decisions in **[*682]** *Garabet v. Autonomous Techs. Corp., 116 F. Supp. 2d 1159 (C.D. Ca. 2000)* and *Taleff v. Southwest Airlines Co., 828 F. Supp. 2d 1118 (N.D. Ca. 2011)*. In both cases, the plaintiffs sued under *Section 7* of the Clayton Act, alleging that the merger itself would substantially lessen competition. In both cases, the plaintiffs were aware of the proposed merger and the threat to competition for several months before the merger. In Gabaret, the plaintiffs filed suit after the merger (one day in Taleff, the same day in Garabet). In Garabeet, the court held that the plaintiffs lacked anitrust standing for each antitrust injury and the court sustained a defense of laches. *Garabet, 116 F. Supp.2d at 1165-71*. In *Taleff*, the court did not actually decide the applicability of laches, but it held that the delay in filing suit until after the merger tipped the balance of hardship against the plaintiffs. *828 F. Supp. 2d at 1123-24*.

Neither *Gabaret* nor *Taleff* **[**159]** apply here because the facts of this case are different. Here, unlike *Garabet* and *Taleff*, there was no reason for the plaintiff to apprehend a lessening of competition before or at the time of the merger. To the contrary, JELD-WEN's strategy was intended to give Steves comfort. And, as explained above, the conduct causing antitrust injury occurred well after the merger.

Accepting JELD-WEN's theory would mean that where, as here, the lessening of competition occurs after the merger, a party thereby injured simply could never seek equitable redress to restore competition. For the reasons previously explained, the rules of antitrust injury and antitrust standing as well as the fundamental principles of equity foreclose such a result.

CONCLUSION

For the reasons, and to the extent, set forth above, PLAINTIFF STEVES AND SONS, INC.'S MOTION FOR EQUITABLE RELIEF (ECF No. 1191) will be granted in part and denied in part. The motion will be granted to require that JELD-WEN divest itself of the Towanda facility and, to the extent set out in Section II.B, to grant the conduct remedies necessary to the success of the divested entity as a manufacturer of interior molded doorskins. The motion will be **[**160]** denied as to the requested conduct remedies not necessary to that purpose.

To assure, to the extent reasonably possible, that JELD-WEN receives a fair price for Towanda, and to assure that divestiture produces a competitive entity that is likely to restore competition, the process specified by the Supreme Court in Brown Shoe, will be followed so as to assure that the divestiture is conducted in a realistic setting that is conducive to attracting qualified buyers who will pay a fair price for Towanda. To assure the success of that process, a Special Master will be appointed.

It is so ORDERED.

2018 U.S. Dist. LEXIS 173210 *; 2018 WL 4896352

CLARENCE ROBERT HOGLUND, JR., Plaintiff, v. CHARTER COMMUNICATIONS, INC., et al., Defendants.

Core Terms

satellite, geographic, television, disability, cause of action, condominium complex, internet service, allegations, disconnect

Counsel: **[*1]** Clarence Robert Hoglund, Jr, Plaintiff, Pro se, Pinson, AL.

For Charter Communications Inc, Thomas M Rutledge, Chairman, CEO Charter, Employees of the Gardendale Alabama office of Charter Communications Inc, Defendants: Barry W Hair, Bradley J Smith, CLARK HAIR & SMITH PC, Birmingham, AL.

Judges: L. Scott Coogler, United States District Judge.

Opinion by: L. Scott Coogler

Opinion

Memorandum of Opinion

Plaintiff Clarence Robert Hoglund, Jr. ("Hoglund") filed this action against Charter Communications, Inc. ("Charter"), Thomas M. Rutledge, and Employees of the Gardendale Alabama Office of Charter Communications (collectively "Defendants"), alleging violations of the *Sherman Antitrust Act*, the *Robison-Patman Act*, *Americans with Disabilities Act*, *Hobbs Act*, *Fourteenth Amendment of the United States Constitution*, and *Ala. Code § 13A-6-193*. Before this Court is Defendants' motion to dismiss. (Doc. 8.) The motion has been fully briefed and is now ripe for review. For the reasons stated below, Defendants' motion to dismiss (doc. 8) is due to be granted.

I. BACKGROUND[1]

Hoglund is a seventy-six-year-old disabled veteran. In January 2014, Hoglund moved to a condominium complex in Trussville, Alabama. He specifically chose this complex because he would be able to install a Dish satellite to watch

[1] In evaluating a motion to dismiss, this Court "accept[s] the allegations in the complaint as true and construe[s] the facts in the light most favorable to the plaintiff." *Johnson v. Midland Funding, LLC, 823 F.3d 1334, 1337 (11th Cir. 2016)*. The following facts, are therefore, taken from the allegations contained in Hoglund's Complaint, and the Court makes no ruling on their veracity.

television. **[*2]** Hoglund's landlord allowed him to install the satellite, and between January 2014 and June 2016, Dish provided Hoglund with uninterrupted television service.

In June 2016, Hoglund requested Charter internet service. When a Charter technician came to Hoglund's condominium, he disabled the Dish satellite. The technician told Hoglund that he had been instructed to disconnect any cable connection not provided by Charter. After calling Charter and receiving an apology, Hoglund apparently had the satellite repaired. According to Hoglund, this scene repeated itself multiple times until he moved in April 2017. Every few weeks, Charter would come and disconnect the Dish satellite and Hoglund would then have the satellite repaired. This resulted in Hoglund losing television service for days at a time.

When Hoglund contacted Charter's Gardendale, Alabama office, he was told that Charter owned all of the cable lines in his condominium complex so that only Charter could provide television service to its residents. Following Hoglund's conversation with Charter's Gardendale office, he made numerous customer service complaints and wrote to Charter CEO Thomas Rutledge about the satellite disconnection, **[*3]** but according to Hoglund, those complaints were falsely categorized as complaints about Charter's internet service. Hoglund also filed a complaint with the Federal Communications Commission, which he alleges Charter responded to by stating that all of Hoglund's prior complaints related to internet service problems and not his Dish satellite. Hoglund claims that his issues with Charter forced him to move out of his condominium and into a single-family residence. He contends that this move has caused him serious financial, emotional, and physical harm because he now lives farther from friends, medical facilities, and shopping areas and has had to hire someone to help maintain his house.

II. Standard of Review

The Federal Rules of Civil Procedure require that a complaint provide "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. To meet this standard, the complaint must state enough facts to raise the right to relief "above a speculative level." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Pleadings based upon "labels and conclusions" or "naked assertion[s]" without supporting factual allegations will not suffice. *Id. at 555, 557*. A party need not specifically plead each element in his or her cause of **[*4]** action, but the pleading must contain "enough information regarding the material elements of a cause of action to support recovery under some viable legal theory." *Am. Fed'n of Labor & Cong. Of Indus. Orgs. v. City of Miami, Fla., 637 F.3d 1178, 1186 (11th Cir. 2011)*. Ultimately, the Court must be able to draw a reasonable inference from the facts that the other party is liable. *Reese v. Ellis, Painter, Ratterree & Adams, LLP, 678 F.3d 1211, 1215 (11th Cir. 2012)*. The Court must construe pleadings broadly and resolve inferences in the nonmoving party's favor. *Levine v. World Fin. Network Nat'l Bank, 437 F.3d 1118, 1120 (11th Cir. 2006)*.

Moreover, the Court must liberally construe Hoglund's complaint because he submitted his complaint *pro se. See* *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)*. However, while a *pro se* plaintiff will be given greater leniency, "[t]his leniency . . . does not require or allow courts to rewrite an otherwise deficient pleading in order to sustain an action." *Thomas v. Pentagon Fed. Credit Union, 393 Fed. Appx. 635, 637 (11th Cir. 2010)*.

To survive a motion to dismiss, the plaintiff's complaint must "state a claim to relief that is plausible on its face." *Twombly, 550 U.S. at 570*. To be plausible, the claim for relief must contain "enough fact[s] to raise a reasonable expectation that discovery will reveal evidence" to support the claim. *Id. at 556*. If this Court decides that the facts pleaded by plaintiff do not state a plausible claim, the complaint is due to be dismissed. *Id. at 570*. To have facial plausibility, the plaintiff's complaint must plead "factual content that allows the **[*5]** court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

III. Discussion

Hoglund first brings claims against Charter under *Sections One* and *Two of the Sherman Antitrust Act*. To bring a claim under *Section One, 15 U.S.C. § 1*, a plaintiff must allege (1) an agreement between two or more persons or business entities, (2) designed to achieve an unlawful objective, (3) that actually restrains trade. *See Aquatherm Indus., Inc. v. Fla. Power & Light Co., 145 F.3d 1258, 1262 (11th Cir. 1998)*. Moreover, the plaintiff must define both the relevant product and geographic markets. *See Jacobs v. Tempur-Pedic Int'l, Inc., 626 F.3d 1327, 1336 (11th Cir. 2010)*. *Section Two of the Sherman Antitrust Act, 15 U.S.C. § 2*, prohibits (1) monopolization; (2) attempted monopolization; and (3) conspiracies to monopolize. *See 15 U.S.C. § 2*. Like claims brought under Section One, the failure to define either the product or geographic boundaries of a relevant market is fatal to a monopolization claim. *See Spanish Broad. Sys. of Fla., Inc. v. Clear Channel Commc'ns. Inc., 376 F.3d 1065, 1074 (11th Cir. 2004)*.

For antitrust purposes, the geographic market "is the area in which the product or its reasonably interchangeable substitutes are traded." *T. Harris Young & Assoc., Inc. v. Marquette Elecs., Inc., 931 F.2d 816, 823 (11th Cir. 1991)*. In other words, "[t]he relevant market is the 'area of effective competition' in which competitors generally are willing to compete for consumer potential . . . ." *Am. Key Corp. v. Cole Nat. Corp., 762 F.2d 1569, 1581 (11th Cir. 1985)*.

Here, Hoglund does not specifically define the relevant product **[*6]** or geographic markets. Construing Hoglund's complaint liberally, the Court finds that the relevant product market at issue is television and internet services. The closest Hoglund comes to defining the relevant geographic market is describing Charter's control over the cable lines in his condominium complex located at 811 Penny Lane, Trussville, Alabama. Common sense dictates that the relevant geographic market cannot be this narrow. Charter, Dish, and other television providers compete with each other to service consumers throughout the United States and not just the occupants of Hoglund's condominium complex. Moreover, when the condominium residents signed their leases they had the ability to, as Hoglund did, inquire into the cable and internet services that would be available to them. If they wished for a provider other than Charter, they could have chosen to live somewhere else. Thus, at some point, Charter competed for the residents' business, and the condominium complex is not so isolated from the rest of the economy as to plausibly form a distinct geographic market. *See Wampler v. Sw. Bell Tel. Co., 597 F.3d 741, 746 (5th Cir. 2010)* (finding that one multiple dwelling unit did not constitute a plausible geographic market because AT&T had **[*7]** to initially compete with other internet service providers to contract with the unit and those dissatisfied with AT&T's services could choose to live somewhere else). Accordingly, Hoglund's Sherman Act claims fail as a matter of law.

Additionally, Hoglund alleges that Charter violated *Section 3 of the Robison-Patman Act, 15 U.S.C. § 13a*, stating that Charter's actions denied him the benefits of competition. The Supreme Court has held that private causes of action may not be brought under this criminal statute. *See Nashville Milk Co. v. Carnation Co., 355 U.S. 373, 381, 78 S. Ct. 352, 2 L. Ed. 2d 340 (1958)*. Thus, Hoglund may not bring a claim under *15 U.S.C. § 13a*. Even assuming Hoglund meant to bring this claim under *Section 2(a) of the Robinson-Patman Act, 15 U.S.C. § 13(a)*, his claim fails as a matter of law. To show a violation of this provision, a plaintiff must allege: "(1) That the defendant is engaged in commerce; (2) that, in the course of such commerce, the defendant has discriminated in price between different purchasers of commodities of like grade and quality; (3) that either or any of the purchases involved in such discrimination are in commerce; and (4) that there is likely to be a severe, adverse effect on competition." *Littlejohn v. Shell Oil Co., 483 F.2d 1140, 1143-44 (5th Cir. 1973)*.[2] Hoglund's complaint is bereft of facts or allegations that Charter ever engaged in price discrimination. **[*8]** Therefore, regardless of whether Hoglund is alleging a violation of *Section 2(a)* or *Section 3 of the Robinson-Patman Act*, this claim is due to be dismissed.[3]

---

[2] In *Bonner v. City of Prichard, 661 F.2d 1206 (11th Cir. 1981)* (en banc), the Eleventh Circuit adopted as binding precedent all decisions by the former Fifth Circuit prior to October 1, 1981.

[3] To the extent that Hoglund seeks damages under *Section Four of the Clayton Act*, he is not entitled to them because he has not sufficiently alleged violations of any underlying ***antitrust law***. *See 15 U.S.C. 15(a)*.

Hoglund also asserts a claim under Title III of the Americans with Disabilities Act ("ADA"), *42 U.S.C. § 12181, et seq.*[4] A claim under Title III of the ADA must allege (1) that the plaintiff is an individual with a disability; (2) that the defendant is a place of public accommodation; and (3) that the defendant denied the plaintiff full and equal enjoyment of the goods, services, facilities or privileges offered by defendant (4) on the basis of his disability. *See Schiavo ex rel. Schindler v. Schiavo, 403 F.3d 1289, 1299 (11th Cir. 2005)*. The ADA's definition of "public accommodation" does not include a business that provides services to private residences. *See 42 U.S.C. § 12181(7)*. Also, Hoglund's complaint does not allege that Charter interrupted his Dish satellite service because of his disability. Thus, Hoglund fails to state a claim under Title III of the ADA.

Hoglund next attempts to bring a claim under the Hobbs Act, *18 U.S.C. § 1951*, alleging that the disruption of his access to Dish's television services constituted robbery and that Charter's implied threat to continue disconnecting his Dish satellite amounted to extortion. The Hobbs Act is a criminal statute that prohibits **[*9]** robbery or extortion within the context of interstate commerce. *See 18 U.S.C. § 1951(a)*. An implied private right of action under a federal statute may only be found when there is "clear evidence of Congress's intent to create a cause of action."*McDonald v. State Farm Bureau Life Ins. Co., 291 F.3d 718, 723 (11th Cir. 2002)* (quoting *Baggett v. First Nat'l Bank of Gainesville, 117 F.3d 1342, 1345 (11th Cir. 1997))*. There is no evidence that Congress intended to create a private cause of action under the Hobbs Act. *See Wisdom v. First Midwest Bank, of Popular Bluff, 167 F.3d 402, 409 (8th Cir. 1999)* (holding that "neither the statutory language of *18 U.S.C. § 1951* nor its legislative history reflect an intent by Congress to create a private right of action"); *see also Brookhart v. Rohr, 385 Fed. Appx. 67, 70 (3d Cir. 2010)* ("The Hobbs Act provides only for criminal sanctions and not civil relief."). Therefore, Hoglund's claim under the Hobbs Act is due to be dismissed.

Next, Hoglund asserts a claim under the *Fourteenth Amendment to the United States Constitution*, alleging Charter's refusal to allow him to choose the television provider of his choice violated his civil rights. The *Fourteenth Amendment* "can be violated only by conduct that may be fairly characterized as 'state action.'" *Lugar v. Edmondson Oil Co., Inc., 457 U.S. 922, 924, 102 S. Ct. 2744, 73 L. Ed. 2d 482 (1982)*. It does not apply to the conduct of private parties unless those parties are acting on behalf of the state. *See Nat'l Broadcasting Co., Inc. v. Commc'ns Workers of Am., 860 F.2d 1022, 1024-25 (11th Cir. 1988)*. Charter is a private company. Hoglund's complaint contains no facts or allegations that Charter disconnected his Dish satellite at the request of the state. Thus, the complaint fails to **[*10]** state a claim under the *Fourteenth Amendment*.

Finally, Hoglund brings a claim under *Ala. Code § 13A-6-193*, alleging that Charter's employees abused him by disrupting his access to the Dish satellite. *Section 13A-6-193* is an Alabama criminal statute that prohibits elder abuse and neglect. *See Ala. Code § 13A-6-193*. Under Alabama law, "[o]ne claiming a private right of action within a statutory scheme must show clear evidence of a legislative intent to impose civil liability for a violation of the statute." *Century Tel of Ala. v. Dothan/Houston Cty. Commc'ns Dist., 197 So. 3d 456, 463 (Ala. 2015)* (quoting *Am. Auto. Ins. Co. v. McDonald, 812 So. 2d 309, 311 (Ala. 2001))*. There is no evidence that this elder abuse statute was intended to create a private cause of action. Thus, Hoglund has not sufficiently stated a claim under the Alabama elder abuse statute.

In sum, Hoglund's complaint fails to state a claim under the Sherman Antitrust Act, Robinson-Patman Act, Americans with Disabilities Act, Hobbs Act, *Fourteenth Amendment*, or *Ala. Code § 13A-6-193*. To the extent that Hoglund would be able to assert any claim against Charter, it would be an Alabama state law claim for tortious interference with property rights. This Court doubts that it would have subject matter jurisdiction over such a claim. Because Hoglund's complaint fails to state a claim upon which relief can be granted, it is due to be dismissed.

---

[4] The ADA has three sections. *Title I* regulates discrimination in the workplace. *Title II* prohibits discrimination by public entities. Title III prohibits discrimination by private entities in places of public accommodation. Although Hoglund does not specify which section of the ADA he claims Charter violated, Charter is neither a public entity nor Hoglund's workplace. Therefore, the Court will construe Hoglund's complaint as bringing a claim under Title III.

IV. Conclusion

For the reasons stated above, Defendants' **[*11]** motion to dismiss (doc. 8) is due to be GRANTED and this case DISMISSED WITH PREJUDICE. A separate order consistent with this opinion will be entered contemporaneously herewith.

DONE and **ORDERED** on October 9, 2018.

Opinion

MEMORANDUM RE: DEFENDANT PABCO'S MOTION FOR SUMMARY JUDGMENT AND PLAINTIFFS' MOTION TO STRIKE

Baylson, J.

This action was brought by twelve large homebuilders ("Homebuilder Plaintiffs") **[*3]** in the United States seeking damages for *Sherman Act* violations by seven (7) separate defendants. This case was consolidated by the Judicial Panel on Multidistrict Litigation with other similar cases already pending in this Court for pretrial litigation purposes only. After several years of litigation, the two classes of drywall purchasers, both Direct and Indirect Purchasers, have reached settlements. The Court has already approved the Direct Purchaser settlement and a request for approval of the Indirect Purchaser settlement is pending.

Although several Defendants have settled with the Homebuilder Plaintiffs, PABCO has not. This Court denied PABCO's prior motion for summary judgment as reported at *163 F. Supp. 3d 175 (Feb. 18, 2016)*. (Mot., ECF 309).

Following the class certification settlements in this case, Defendant PABCO has again moved for summary judgment on "liability issues" heavily relying on a recent Third Circuit case, *Valspar Corporation v. DuPont, 873 F.3d 185 (Sept. 14, 2017)*, which was handed down after

PABCO asserts that the Valspar Third Circuit decision requires this Court to reconsider and change its holding denying summary judgment. Plaintiff Homebuilders have answered this Motion for Summary Judgment with a Motion to Strike. (ECF 310).[1]

Having carefully **[*4]** reviewed the Valspar decision and this Court's earlier decision, the Court will deny the PABCO's Motion and grant the Plaintiffs' Motion to Strike.

Valspar is, of course, a binding precedent and this Court recognizes it is an important decision in a sequence of precedential antitrust decisions by the Third Circuit on summary judgment motions. Nonetheless, this Court believes that its own analysis of PABCO's prior Motions for Summary Judgment in the class actions, and denying them at least as to PABCO, was well grounded in existing Third Circuit law, and Valspar does not require or not allow for reconsideration or reversal.

The *Valspar* decision carefully continued the Third Circuit's analysis of facts presented of record, taken in the light most favorable to the non-moving party in the context of ***antitrust law***. As is customary, the Third Circuit not only applied traditional summary judgment standards, but also the unique standards that it has consistently held are

[1] Plaintiffs Motion to Strike addresses the summary judgment motions by Defendant PABCO, New NGC, Inc. ("National"), and USG Corporation, United States Gypsum Company, and L&W Supple Corporation (collectively "USG Defendants"). In this memorandum we address only PABCO's motion, as National has since settled with Plaintiffs, rendering its motion moot. (See ECF 331.) USG Defendants' motion is addressed separately in an Order filed this date.

applicable in antitrust cases charging a price fixing conspiracy, particularly in the context of an oligopoly and facts about pricing, which have been historically referred to as "conscious parallelism."

In Judge Hardiman's decision, **[*5]** the Circuit Court recognized that conscious parallelism, standing alone, does not prove any conspiracy to fix prices, but that a court must apply so-called "plus factors" and then determine, from the evidence considered as a whole, whether it was more likely or not that the defendants had agreed upon prices.

Judge Hardiman's careful analysis of the facts in Vaspar is similar to this Court's analysis of the facts, in denying PABCO's prior motion for summary judgment in the class cases. See *163 F. Supp. 3d at 251-259*. Consistent with Judge Hardiman's emphasis on the third plus factor, traditional conspiracy evidence, this Court noted a number of communications between PABCO and other drywall manufacturers that would allow a jury to find an agreement on prices. *Id. at 255-257*.

Judge Hardiman's opinion in Valspar relies heavily on three recent Third Circuit cases, *In re Baby Food Antitrust Litig., 166 F.3d 112 (3d Cir. 1999)*, *In Re Flat Glass Antitrust Litig., 385 F.3d 350 (3d Cir. 2004)*, and In *Re Chocolate Confectionary Antitrust Litig., 801 F.3d 383 (3d Cir. 2015)*, which are three of the precedents that this Court also relied upon. See, e.g., *163 F. Supp. 3d at 192-94*.

Contrary to PABCO's arguments, this Court did not ignore or violate the standards set forth in Valspar, nor did it ignore or violate the standards set forth in any of the three cases cited above.

What distinguishes this case from *Vaspar* is that in considering the plus factors **[*6]** in this case, there was evidence of "traditional" conspiratorial evidence, specifically as to PABCO. See *163 F. Supp. 3d at 255-57* (discussing emails from PABCO's Director of Sales and VP of Sales and Marketing related to the decision to eliminate job quotes and coordinated behavior among manufacturers).

The Valspar decision clearly holds that there was no such evidence as to DuPont and this absence of evidence was the major factor in affirming the grant of summary judgment in favor of DuPont by the district court. *Valspar, 873 F.3d at 202* ("Valspar did not offer any single **FORM (check)** of evidence that would have gotten it close to showing that a conspiracy is more likely than not.")

We also note that following this Court's decision denying summary judgment to all defendants which had moved for summary judgment (but one), this Court granted non-settling defendants' motion for certification under *28 U.S.C. § 1292(b)*, for interlocutory appeal. (See 13-2437, ECF 391). We determined that the statutory prerequisites for interlocutory appeal were satisfied, and cited the district court's decision in Valspar, with a note that "if the Third Circuit affirms Valspar in a precedential opinion, this Court may reconsider its summary judgment decision." (13-cv-2437, **[*7]** ECF 384). However, the Third Circuit rejected the defendants' request for certification in this case.

Vaspar continued the well-settled Third Circuit standards for adjudicating summary judgment motions in antitrust cases charging price agreements in violation of the Sherman Act. Because of the absence of any "plus factors" as to DuPont, the Third Circuit affirmed the grant of summary judgment by the district court. To the contrary, in view of the evidence of plus factors applicable to PABCO, as set forth in detail in this Court's prior opinion denying summary judgment, PABCO does not have any right to a second "bite at the summary judgment apple" — but it retains its defenses for trial, as this Court has only upheld the sufficiency of the Plaintiffs' evidence to allow a jury to find that there was an agreement. This Court's prior denial of PABCO's summary judgment motion in no way relieves Homebuilder Plaintiffs of proving to the satisfaction of a jury that PABCO was in fact a member of a conspiracy to fix prices of drywall.

In sum, as explained in our extensive February 18, 2016 decision, Defendant PABCO has not demonstrated that there is no genuine issue of material fact as to the **[*8]** alleged conspiracy, and has not shown that Valspar changes Third Circuit law or requires this Court to conclude that its prior decision as to PABCO was erroneous. We will therefore grant the Homebuilder Plaintiffs' motion to strike as to PABCO only.

An appropriate order follows.

ORDER RE: PENDING MOTIONS FOR SUMMARY JUDGMENT AND SCHEDULING

In this last remaining case in this multi-district litigation, twelve large homebuilder plaintiffs (hereinafter "Homebuilder Plaintiffs") have claimed damages for antitrust violations. Only three defendants remain in this case, PABCO, and United States Gypsum Company ("USG") and its wholly-owned subsidiary, L&W Supply Corporation. ("L&W").

PABCO, whose prior motion for summary judgment (MDL Dkt., ECF 205) was denied, asserts that a recent Third Circuit case *Valspar Corporation v. DuPont, 873 F.3d 185 (Sept. 14, 2017)* requires reconsideration and granting summary judgment in its favor against the Homebuilder Plaintiffs. (ECF 745.)

As discussed in the foregoing memorandum, the Court has concluded that the Third Circuit's decision in Valspar does not change Third Circuit law and does not require this Court to reexamine its prior holding denying summary judgment as to PABCO and the other defendants who had moved for **[*9]** summary judgment.

Defendants USG/L&W are in a different situation than PABCO. USG/L&W settled the claims of the Direct and Indirect Purchaser classes as of February 12 and 13, 2015 (ECF 180 & 181), when the class Plaintiffs filed Motions for Preliminary Approval. This was prior to the transfer of the Homebuilders' Complaint, which had been filed in the United States District Court for the Northern District of California as of March 17, 2015, and was transferred to this Court by the Judicial Panel on Multidistrict Litigation, as a "tag along" case. The first docket entry of the Homebuilder Plaintiffs in this Court is April 2, 2015, which is after the USG/L&W settlement became public knowledge by the filing of the motion for preliminary approval.

On May 31, 2018, in this case, USG/L&W filed a motion for summary judgment (ECF 740) asserting that Homebuilder Plaintiffs do not have sufficient evidence to allow a jury to find that USG/L&W had entered into any agreement with a competitor to fix the price of the drywall. Thus, USG/L&W now moves for summary judgment against the Homebuilder Plaintiffs, as the other Defendants had moved for summary judgment against the class Plaintiffs.[1]

USG/L&W **[*10]** assert that their motion for summary judgment is timely because they had settled the class claims (Direct Purchasers and Indirect Purchasers) against them, prior to the close of discovery and prior to all other non-settling defendants having filed motions for summary judgment on May 12, 2015 (ECF 204-208). USG/L&W have not previously presented to this Court their independent grounds for summary judgment.

The Homebuilder Plaintiffs have moved to strike the USG/L&W Motion and assert that USG/L&W's motion comes much too late and cannot succeed since the evidence introduced by Plaintiffs in opposing the prior motions for summary judgment clearly applies to USG and L&W.

In their Motion to Strike, the USG/L&W Motion for Summary Judgment, Homebuilder Plaintiffs accurately point out that in prior memoranda and orders, after the Homebuilder Plaintiffs case became part of this multidistrict litigation, this Court often referred to "defendants," including by definition USG/L&W, when, in fact, USG/L&W were no longer part of the continuing litigation of the class actions because they had settled those actions only, but not this case.

Notwithstanding this arguably overly broad use of the term "defendants," **[*11]** Homebuilder Plaintiffs surely knew USG/L&W were not included in the Court's broad references to Defendants merely because they had already settled with both proposed classes, but had not settled with the Homebuilder Plaintiffs.

---

[1] Other motions for summary judgment are also pending and fully briefed, but are not affected by this Order. See Defendants' Motion for Partial Summary Judgment on Umbrella Damages (ECF 724), Defendants' Motion for Summary Judgment on Choice of Law (ECF 754), Defendants' Motion for Partial Summary Judgment concerning Certainteed, Continental, Georgia-Pacific, Lafarge, Panel Rey, and Tin (ECF 756), and Defendants' Motion for Partial Summary Judgment on Unassigned Claims (ECF 755).

When Homebuilder Plaintiffs entered this MDL after USG/L&W reached a settlement with the class Plaintiffs, Homebuilder Plaintiffs were fully involved in the MDL. The USG/L&W settlements were finally approved on August 20, 2015 (ECF 276 & 278). Homebuilder Plaintiffs thus knew that USG/L&W were no longer in the class action, and also, had not yet filed a motion for summary judgment in this case. In addition, this Court's lengthy opinion dated February 18, 2016, granting summary judgment to Certainteed, but denying it to all other moving defendants (not including USG/L&W)[2] quite obviously put Homebuilder Plaintiffs on notice that USG/L&W had not moved for summary judgment because of the prior settlement with both classes.

The Court notes the joint stipulation setting a schedule for dispositive motions in this case (ECF 735), filed May 21, 2018, set a deadline for any dispositive motions for July 2, 2018. Thus, the USG/L&W motion for summary judgment is timely.

Therefore, **[*12]** the Court finds, without deciding the merits of the USG/L&W motion for summary judgment at this time, that the Homebuilder Plaintiffs, whose counsel have consistently had impressive mastery of the underlying facts in this case, and the procedural history, are not prejudiced by being required to respond to the USG/L&W motion for summary judgment at this time. Denying USG/L&W's right to file such a motion, as *Rule 56* allows in every case, would be unfair.

For the reasons stated above and in the foregoing Memorandum, this Court concludes and ORDERS:

1. Homebuilder Plaintiffs' Motion to Strike (15-cv-1712, ECF 310) will be GRANTED as to PABCO but will be DENIED as to USG and L&W.

2. Although the Court does not see any need for any further discovery, if Homebuilder Plaintiffs and/or USG/L&W assert discovery is necessary, they should promptly confer with each other, and may conduct agreed upon discovery. In the absence of agreement, either party should file a motion to compel, within 21 days, without legal memorandum, following which the Court will have a recorded telephone conference. If discovery is to take place, the following schedule will be changed.

3. Homebuilder Plaintiffs shall respond to **[*13]** the USG/L&W Motion for Summary Judgment within thirty (30) days, and shall incorporate by reference, without repetition or new submission of previously submitted exhibits, the arguments and evidence presented by the class plaintiffs in opposing the prior motions for summary judgment.

4. Moving defendants, USG/L&W, shall file a reply brief within 21 days.

5. The Court will have oral argument on the USG/L&W Motion at a date to be set after briefs have been filed. Because counsel for these clients are out of town, the Court will approve, if mutually agreed, "live streaming" of the argument rather than requiring counsel to appear in Philadelphia.

BY THE COURT:

Dated: 10/11/18

/s/ Michael M. Baylson

MICHAEL M. BAYLSON

United States District Court Judge

End of Document

---

[2] Homebuilder Plaintiffs' brief, pp. 9-12, details numerous facts, cited in this Court's opinion, concerning USG/L&W communications with other defendants. USG/L&W's reply brief shall respond as to these facts of record.

[Dealer Mgmt. Sys. Antitrust Litig. v. CDK Global]

United States District Court for the Northern District of Illinois, Eastern Division

October 22, 2018, Decided; October 22, 2018, Filed

Opinion by: Robert M. Dow, Jr.

Opinion

MEMORANDUM OPINION AND ORDER

Before the Court are the motions to dismiss Plaintiff Motor Vehicle Software Corporation's second amended complaint filed by Defendants Reynolds and Reynolds Co. [44], CDK Global, Inc. [45], and Computerized Vehicle Registration, Inc. [46]. Also before the Court is the motion to strike Motor Vehicle Software Corp.'s supplemental brief in opposition to Defendants' motions to dismiss [144]. For the reasons set forth below, the Court denies the motion to strike [144] and the motions to dismiss [44; 45; 46].

I. Background[1]

Plaintiff Motor Vehicle Software Corporation ("MVSC" or "Plaintiff") brings this action to remedy and put a stop to alleged ongoing federal and state antitrust violations being committed by Defendants CDK Global, Inc. ("CDK") and The Reynolds and Reynolds Company ("Reynolds"), and their joint venture Computerized Vehicle Registration, Inc. a/k/a CDK Vehicle Registration, Inc. ("CVR"). [*Motor Vehicle Software Corporation v. CDK Global, Inc., et al.*, Case No. 18-cv-865, Dkt. 76, at ¶ 1.] MVSC is a provider of electronic vehicle registration and titling services ("EVR"). [*Id.* at ¶ 2.] As an EVR provider, MVSC partners with state **[*21]** governments to issue the physical registration, license plates, and titles for vehicles sold at car dealerships. [*Id.*] Electronic registration and titling has made the process far more convenient and efficient for dealerships and consumers. [*Id.*]

Defendant CVR is a wholly-owned joint venture of CDK and Reynolds that (like MVSC) provides EVR services. [*Id.*] In order to process the registration and title with a state, EVR providers require basic information about the car sale—namely, vehicle, buyer, and financing details. [*Id.* at ¶ 3.] That data is stored on a dealership's Dealer Management System software, otherwise referred to as a dealership's "DMS." [*Id.*] Because the data is not stored anywhere else, it is impossible to provide EVR services without access to this data. [*Id.*] In addition to storing a

[1] For purposes of the motions to dismiss, the Court accepts as true all of Plaintiff's well-pleaded factual allegations and draws all reasonable inferences in Plaintiff's favor. *Killingsworth v. HSBC Bank Nev., N.A., 507 F.3d 614, 618 (7th Cir. 2007)*.

dealer's data, the DMS manages every function of a dealer's business from sales and inventory to service and parts. [*Id.* at ¶ 4.] A car dealership cannot operate without the DMS software. [*Id.*]

Defendants CDK and Reynolds control close to 80 percent of the United States market by number of dealers and approximately 90 of the United States market by vehicles sold. [*Id.*] It is deeply disruptive **[*22]** and expensive for a dealer to switch DMS providers, as switching takes up to a year of preparation and training. [*Id.*] MVSC alleges that CDK and Reynolds use their market power to compel dealers to submit to long-term contracts of five to seven years in length. [*Id.*] While dealers own the data on their DMS, CDK and Reynolds also have seized control over who is allowed to access the data. [*Id.* at ¶ 5.] Many third-party vendors require access to dealer data in order to perform essential tasks—such as EVR services—for the dealer. [*Id.*] CDK and Reynolds provide vendors access (for a fee) to the data on a dealer's DMS pursuant to formal third-party access programs. [*Id.*] CDK's arrangement is called the Third Party Access ("3PA") program, and Reynolds's arrangement is called the Reynolds Certified Interface ("RCI") program. [*Id.*] These programs allow third-party vendors to access in real time necessary data from a dealer's DMS in order to provide services for the dealership. [*Id.*]

In this case, Plaintiff challenges an alleged horizontal agreement between CDK and Reynolds to exclude MVSC from their third-party programs in order to prevent MVSC from obtaining the data it needs to provide EVR **[*23]** services. [*Id.* at ¶ 6.] According to MVSC, the purpose of the agreement is to block MVSC's access to the data on which its services depend, thereby eliminating a formidable competitor to CVR. [*Id.*] MVSC competes with CVR in two state EVR markets—Illinois and California. [*Id.* at ¶ 8.] In the Illinois EVR market, CVR maintains a market share of approximately 95 percent. [*Id.*] Real-time access to dealer data is a prerequisite to competing in Illinois because the state requires that a dealership provide the registration and license plates to the car buyer at the time of sale. [*Id.*] Participation in the 3PA and RCI programs is the only means for an EVR provider to obtain this real time access to dealer data. [*Id.*]

Unlike Illinois, California does not require that a car buyer receive the registration and license plates at the time of the sale. [*Id.* at ¶ 9.] Real-time access to dealer data (and participation in the 3PA and RCI programs) therefore has not been necessary in California. [*Id.*] Instead, MVSC was able to obtain the required dealer data by other means, either through companies that provided intermediary access to a dealer's DMS or through a manual workaround whereby dealers ran a **[*24]** daily report with the necessary data and then transmitted the information to MVSC. [*Id.*]

MVSC alleges that because it was able to compete in the California EVR market based on the quality of its products and services, CDK and Reynolds engaged in a campaign to completely block MVSC's access to dealer data in California. [*Id.* at ¶ 10.] In addition to blocking MVSC from participating in their 3PA and RCI programs, CDK and Reynolds have cut off MVSC's access through intermediaries. [*Id.*] Furthermore, according to MVSC, CDK and Reynolds are intimidating dealers with near constant threats that if dealers continue to provide MVSC with their data, then the dealers will be in breach of their DMS contract. [*Id.*]

As of January 2014 (and possibly earlier), CDK and Reynolds had entered into an agreement in which both DMS providers agreed to block MVSC from participating in their third-party access programs. [*Id.* at ¶ 100.] Thus, CDK and Reynolds (competitors in the DMS market) coordinated their actions and agreed that they both would reject MVSC from their third-party programs. [*Id.* at ¶ 101.] The agreement continues to this day. [*Id.* at ¶ 100.]

According to MVSC, CDK and Reynolds entered into the **[*25]** agreement with CVR's encouragement. [*Id.* at ¶ 101.] MVSC alleges that CVR was not a bystander to the CDK and Reynolds agreement to block MVSC from their respective 3PA and RCI programs. [*Id.* at ¶ 109.] Rather, CVR executives actively participated in conspiratorial conversations with CDK and Reynolds, specifically discussing the need to block MVSC from accessing dealer data (whether through the 3PA and RCI data integration programs or otherwise) so that MVSC could not compete effectively. [*Id.*] A long-time member of CVR's Board of Directors—which is comprised of representatives from CDK, Reynolds, and CVR—admitted to MVSC that the board specifically discussed keeping MVSC at a disadvantage with respect to data access. [*Id.* at ¶ 110.] Board members recognized that MVSC "outcompeted CVR" with respect to "technology and improved services," and so board members agreed that CVR needed a competitive advantage as compared to its competitors regarding access to dealer data. [*Id.*] The CVR executives who are alleged to have had these conspiratorial conversations with CDK and Reynolds at board meetings and elsewhere include, but are not limited to, Scott Herbers (former CVR General Manager), Jim **[*26]** Quinlan (current CVR General Manager), and John Roeder (CVR Senior Executive of Sales and Operations). [*Id.* at ¶ 111.]

MCSC further claims that, outside of board meetings, CVR executives worked with CDK to keep its integration program "closed" to MVSC. [*Id.* at ¶ 112.] In an internal CDK presentation regarding its 3PA program, there is a section entitled "Category Restrictions in Place," with a subsection dedicated to "CVR Competitors." [*Id.*] It reads: "Not allowed to sign, even with extract, only unless in a territory not of value to CVR." [*Id.*] These rules as described in the internal CDK presentation were implemented and are enforced with the express participation, input, and approval from CVR executives. [*Id.*]

CDK and Reynolds together own CVR, owning 80 percent of the company and 20 percent of the company, respectively. [*Id.* at ¶ 22.] Although MVSC alleges that CDK and Reynolds both control the management and decision making of CVR, Plaintiff alleges that it is CDK that exercises substantial control over the decision-making and operations of CVR, directing its day-to-day operations such as its marketing, dealer on-site visits, hiring and firing of employees, budgets, investments **[*27]** in technology and services, and other functions normally handled internally by a corporate entity. [*Id.* at ¶¶ 7, 152.] CDK controls the CVR board of directors (and CDK executives occupy most seats). [*Id.* at ¶ 56.] CVR's general manager reports directly to a CDK Vice President. [*Id.*] CVR executives are concurrently CDK executives (with CVR's longtime general manager also serving as a top executive at CDK). [*Id.*] In public filings, CDK informs investors that it holds a "controlling" financial and management interest in CVR. [*Id.*] CDK rolls up CVR's financial results into CDK's consolidated financial statements and controls CVR's budget and capital investments. [*Id.* at ¶ 57.] CVR employees have CDK email addresses and job descriptions. [*Id.*] CDK makes hiring and firing decisions for CVR and posts new job listings for CVR on the CDK website. [*Id.*] CDK houses CVR's offices within CDK's California headquarters on the same floor as CDK employees. [*Id.*] CDK dictates where CVR should focus its sales efforts and CDK executives accompany CVR sales representatives on trips to dealerships. [*Id.*] CDK also refers to CVR as "our" EVR service. [*Id.* at ¶ 58.] Still, Reynolds retains seats on CVR's board **[*28]** [*id.* at ¶ 110], and reaps profits from its interest in CVR. [*Id.* at ¶ 55.]

II. Legal Standard

To survive a *Federal Rule of Civil Procedure ("Rule") 12(b)(6)* motion to dismiss for failure to state a claim upon which relief can be granted, the complaint first must comply with *Rule 8(a)* by providing "a short and plain statement of the claim showing that the pleader is entitled to relief," *Fed. R. Civ. P. 8(a)(2)*, such that the defendant is given "fair notice of what the * * * claim is and the grounds upon which it rests." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))* (alteration in original). Second, the factual allegations in the complaint must be sufficient to raise the possibility of relief above the "speculative level." *E.E.O.C. v. Concentra Health Servs., Inc., 496 F.3d 773, 776 (7th Cir. 2007)* (quoting *Twombly, 550 U.S. at 555*). "A pleading that offers 'labels and conclusions' or a 'formulaic recitation of the elements of a cause of action will not do.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 555*). Dismissal for failure to state a claim under *Rule 12(b)(6)* is proper "when the allegations in a complaint, however true, could not raise a claim of entitlement to relief." *Twombly, 550 U.S. at 558*. In reviewing a motion to dismiss pursuant to *Rule 12(b)(6)*, the Court accepts as true all of Plaintiff's well-pleaded factual allegations and draws all reasonable inferences in Plaintiff's favor. *Killingsworth v. HSBC Bank Nev., N.A., 507 F.3d 614, 618 (7th Cir. 2007)*.

III. Analysis

A. Motion to Strike

When this case was pending in the United States District **[*29]** Court for the Central District of California, Judge Fischer granted Defendants' motions to dismiss MVSC's *Section 2* claims and various state-law claims. [*Motor Vehicle Software Corp. v. CDK Global, Inc., et al.*, Case No. 17-896, Dkt. 73, at 10-12.] Judge Fischer concluded, however, that Plaintiff sufficiently alleged a *Section 1* claim against Defendants CDK and Reynolds based on their alleged horizontal conspiracy. [*Id.* at 6-8.] MVSC filed a second amended complaint, which Defendants again moved to dismiss. After the case was transferred to the Northern District of Illinois as part of this MDL, Judge St. Eve requested that the parties file supplemental briefs addressing their respective arguments under Seventh Circuit case law.[2] [Document 144-1 in Case No. 18-cv-864, at 42:12-43:25.] After Defendants filed their supplemental briefs [118; 120; 121], MVSC filed a supplemental brief addressing Seventh Circuit case law and citing to discovery material it contends elaborates on and further supports the allegations in its second amended complaint [138].

Defendants CDK and CVR filed a motion to strike MVSC's supplemental brief because (1) it goes beyond the scope of the request for supplemental briefing on Seventh Circuit **[*30]** case law, (2) the Court should not consider discovery materials supporting an opposition to the motions to dismiss because Defendants have not had an opportunity to respond, and (3) MVSC's use of the discovery materials was improper. Although Judge St. Eve agreed that the parties should limit their supplemental briefs to the law and not to re-argue the factual points already set out in the initial briefing on Defendants' motions to dismiss [144-1, at 43:14-25], MVSC's supplement does not reargue factual points already in their opposition brief. Rather, MVSC identifies discovery material purportedly supporting the allegations in its second amended complaint. Defendants argue that such supplementation is not permitted under the plain language of *Rule 12*, but the Seventh Circuit has indicated that a party opposing (or appealing) a *Rule 12(b)(6)* dismissal "may elaborate on [its] factual allegations so long as the new elaborations are consistent with the pleadings." *Geinosky v. City of Chicago, 675 F.3d 743, 745 n.1 (7th Cir. 2012)* (collecting cases). Furthermore, although Defendants did not seek leave to file a sur-reply, they did take the opportunity to respond to the documents submitted by MVSC in their motion to strike. [144, at 4.] To the extent that Defendants contend **[*31]** that MVSC's use of the discovery material violates "the spirit, if not the letter, of a confidentiality order[,]" a position the Court takes no position on at this time, the Court is not persuaded that refusing to consider the documents is the appropriate remedy. Accordingly, Defendants' motion to strike [144] is denied. In any event, consideration of the documents MVSC attached to and referenced in its supplemental brief does not change the outcome of the Court's ruling on the arguments raised by Defendants in support of dismissal, to which the Court now turns.

B. Market Participant Requirement

Defendant CDK argues that Plaintiff's *Section 2* claims against it fail because CDK is not a participant in the relevant EVR markets (or any EVR market for that matter). In order to state a claim against CDK for monopolization or attempted monopolization, Plaintiff must allege facts sufficient to establish that CDK competes in the relevant market.[3] *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 457, 459, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*; *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 854 (7th Cir. 2011)*. With respect to Count II, the relevant market is the Illinois EVR market. With respect to Count III, the relevant market is the California EVR market. MVSC argues that CDK is a participant in the relevant EVR markets by way of its relationship to its majority-owned **[*32]** subsidiary CVR.

---

[2] "[I]n federal question cases consolidated under *§ 1407*, the law of the transferor court warrants 'close consideration' but does not bind the transferee court." *In re Sulfuric Acid Antitrust Litig., 743 F. Supp. 2d 827, 853 (N.D. Ill. 2010)* (citations omitted).

[3] CDK moves to dismiss all of MVSC's *Section 2* claims for failure to establish that it is participant in the EVR market. [45 (CDK Br.), at 4.] Although market power in the relevant market is an element of monopolization and attempted monopolization claims under *Section 2*, it is not an element of a conspiracy to monopolize claim. *Wagner v. Magellan Health Servs., Inc., 121 F. Supp. 2d 673, 680 (N.D. Ill. 2000)* ("[M]arket power is not an element of a conspiracy to monopolize claim under *Section 2*." (citing *United States v. National City Lines, 186 F.2d 562 (7th Cir. 1951)*). The Court therefore focuses on MVSC's monopolization and attempted monopolization arguments.

Both CDK and MVSC discuss the substantial control test set forth by United States Court of Appeals for the District of Columbia Circuit in *Caribbean Broad. System, Ltd. v. Cable & Wireless P.L.C., 148 F.3d 1080, 331 U.S. App. D.C. 226 (D.C. Cir. 1998)*.[4] In that case, the court held that an "ownership interest in another company is not sufficient by itself to make the owner a competitor, for purposes of the antitrust laws, of the subsidiary's rivals. To be a competitor at the level of the subsidiary, the parent must have substantial control over the affairs and policies of the subsidiary." *Id. at 1088* (collecting cases).[5] CDK argues that the requisite "substantial control" effectively equates to "the showing required to establish that a parent company is liable for a subsidiary's act under an agency theory." [45 (CDK Br.), at 6.] Thus, in support of its substantial control argument, CDK cites to numerous cases addressing agency and veil piercing standards under various laws. While these cases may shed some light on how to analyze an investor's control in a company, the ultimate standard is whether the investor has "substantial control over the affairs and policies of the subsidiary"—meaning that the investor exercises "the type of day-to-day control" over "the company in which it invested as to make it a **[*33]** competitor of that company's rivals." *Caribbean Broad. Sys., Ltd., 148 F.3d at 1089*.[6]

---

[4] CDK asserts that the Seventh Circuit has long followed the substantial control standard, citing *National Lead Co. v. FTC, 227 F.2d 825 (7th Cir. 1955)*, rev'd on other grounds, *352 U.S. 419, 77 S. Ct. 502, 1 L. Ed. 2d 438 (1957)*. [120 (CDK Supp. Br.), at 2.] However, in *National Lead*, the Court did not apply the substantial control standard. In that case, the Seventh Circuit held that a parent company should have been dismissed from an FTC action for purported violations of the Federal Trade Commission Act and the Clayton Act by the parent company's subsidiary. *227 F.2d at 829*. In concluding that the parent company never "engaged in the [relevant] industry as a producer, distributor or otherwise," the court applied a "substantial identity" rule, which required "evidence of such complete control of the subsidiary by the parent as to render the former a mere tool of the latter, and to compel the conclusion that the corporate identity of the subsidiary is a mere fiction." *Id. at 828-29*. But no court has ever cited *National Lead* in support of a "substantial control" analysis. Nor would it make sense to do so. When *National Lead* was decided, the Supreme Court still applied the "now-defunct doctrine known as the 'intraenterprise conspiracy doctrine,'" under which the Supreme Court "treated cooperation between legally separate entities as necessarily covered by *§ 1*[.]" *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 192, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (discussing the history of the "'intraenterprise conspiracy doctrine"). It therefore would make sense to require "evidence of such complete control of the subsidiary by the parent as to render the former a mere tool of the latter, and to compel the conclusion that the corporate identity of the subsidiary is a mere fiction" before blurring the legal lines between a parent company and its subsidiary. Given that the Supreme Court has abandoned the intraenterprise conspiracy doctrine in favor of a more functional approach, it would be inappropriate to equate the strict "substantial identity" standard applied in *National Lead* with the "substantial control" standard advanced by the parties in this case.

[5] Because all parties have relied on the substantial control standard, the Court assumes without deciding that the substantial control standard applies. In discussing whether Defendants are a unified entity incapable of conspiring under federal antitrust laws pursuant to *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*—, an issue addressed in more detail below—MVSC argues that Reynolds is judicially estopped from arguing that it is incapable of conspiring with CVR because Reynolds argued in prior motions to dismiss that it was not a participant in the EVR market. In other words, because Reynolds previously took the position that it is not a competitor in the EVR market, MVSC argues that it cannot claim to be a unified entity with CVR, its partially-owned subsidiary that competes in the EVR market. This position has some support. See, *e.g., Copperweld Corp., 467 U.S. at 777* ("Any anticompetitive activities of corporations and their wholly owned subsidiaries meriting antitrust remedies may be policed adequately without resort to an intra-enterprise conspiracy doctrine. A corporation's initial acquisition of control will always be subject to scrutiny under *§ 1* of the Sherman Act and *§ 7* of the Clayton Act. Thereafter, the enterprise is fully subject to *§ 2* of the Sherman Act and *§ 5* of the Federal Trade Commission Act." (internal citations omitted)); *In re: Zinc Antitrust Litig., 2016 U.S. Dist. LEXIS 73192, 2016 WL 3167192, at *21 (S.D.N.Y. June 6, 2016)* ("[D]efendants cannot have it both ways. Glencore Ltd. and Pacorini may not * * * argue that they are incapable of conspiring with each other for purposes of forming an anticompetitive agreement in violation of *Section 1* of the Sherman Act, but also argue, on the other hand, that Pacorini may not be individually liable for playing a direct and key role in Glencore Ltd.'s ability to control prices in a market in which it competes." (internal citation omitted)). If that is MVSC's position, however, it is unclear why MVSC would rely on the substantial control standard, which might allow a parent company to avoid *Section 2* scrutiny in its subsidiary's market even if the parent and subsidiary were a unified entity under *Copperweld*.

[6] Although the court in *Caribbean Broadcasting System* cited cases applying agency standards, the court did not actually engage in an agency analysis. The "substantial control" test used by the court in *Caribbean Broadcasting System* has been adopting by other courts and the test appears capable of being applied without resort to agency, veil piercing, and/or alter ego standards,

Plaintiff makes such allegations here. Plaintiff's second amended complaint alleges that CDK owns 80 percent of CVR. [*Motor Vehicle Software Corporation v. CDK Global, Inc., et al.*, Case No. 18-cv-865, Dkt. 76, at ¶ 56.] CDK controls CVR's board of directors and CDK executives occupy most of its seats. [*Id.*] CVR's general manager reports directly to a CDK Vice President. [*Id.*] CVR executives are concurrently CDK executives, with CVR's longtime general manager also serving as a top executive at CDK. [*Id.*] In public filings, CDK informs investors that it holds a "controlling" financial and management interest in CVR. [*Id.*] CDK treats CVR as a division rather than a separate subsidiary—for example, by rolling up CVR's financial results into CDK's consolidated financial statements. [*Id.* at ¶ 57.] CDK controls CVR's budget and capital investments. [*Id.*] CVR employees have CDK email addresses and job descriptions. [*Id.*] CDK makes hiring and firing decisions of CVR employees. [*Id.*] CDK posts new job listings for CVR on the **[*34]** CDK website. [*Id.*] CDK houses CVR's offices within CDK's California headquarters—on the same floor as CDK employees. [*Id.*] CVR is a marketing conduit for CDK, as CDK dictates where CVR should focus its sales efforts and CDK executives accompany CVR sales representatives on trips to dealerships. [*Id.*] Finally, CDK touts CVR as "our" EVR service. [*Id.* at ¶ 58.] These allegations are sufficient to establish at the motion to dismiss stage that CDK substantially controls CVR. *Cf.* *In re Packaged Seafood Prods. Antitrust Litig., 242 F. Supp. 3d 1033, 1064 (S.D. Cal. 2017)* (merely alleging "domination or control" over "production, pricing, hiring, budgeting, capitalization, and/or marketing of canned tuna" not sufficient to establish agency).

CDK cites cases indicating that some of these allegations standing alone would be insufficient to establish that an investor company controls the day-to-day operations of its subsidiary. See, *e.g.,* *Caribbean Broad. Sys., Ltd., 148 F.3d at 1089* (allegations that company with minority ownership interest had one representative on subsidiary's board of directors and "engaged in discussions and negotiations" regarding the relationship between the parent and its subsidiary was not sufficient to establish substantial control). But many of the cases cited by CDK stand for the proposition that **[*35]** mere oversight and/or high-level involvement by a parent corporation (which likely exists to some extent in any parent/subsidiary relationship) is not enough to establish substantial control. See, *e.g.,* *Phoenix Canada Oil Co. v. Texaco, Inc., 658 F. Supp. 1061, 1084 (D. Del. 1987)*, aff'd, *842 F.2d 1466 (3d Cir. 1988)* (shared officers and directors and involvement in substantial financial decisions not enough to establish an agency relationship); *United States v. Bestfoods, 524 U.S. 51, 72, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1998)* (noting that "supervision of the subsidiary's finance and capital budget decisions" is "consistent with the parent's investor status") (internal quotation marks omitted); *whiteCryption Corp. v. Arxan Techs., Inc., 2016 U.S. Dist. LEXIS 78106, 2016 WL 3275944, at *11 (N.D. Cal. June 15, 2016)* (holding that parent company's involvement in "higher level policy and strategy decisions" was not sufficient to establish agency liability).

Here, MVSC alleges that CDK is involved in more than oversight and high-level policy and strategy decisions. To begin, MVSC alleges facts indicating that CDK employees work closely with CVR employees in the day-to-day operations of CVR. MVSC alleges that at least one CVR executive reports directly to a CDK Vice President, and CVR executives serve concurrently as CDK executives. CDK executives also accompany CVR sales representatives on trips to dealerships. CDK even makes hiring and firing decisions for CVR employees and posts **[*36]** new job listings for CVR on the CDK website. CDK does not explain how these allegations are consistent with the typical, high-level involvement of any parent corporation. Furthermore, MVSC alleges facts indicating the operations of CVR and CDK are intertwined. CVR employees have CDK email addresses and job descriptions.[7] And CDK houses CVR's offices within CDK's California headquarters—on the same floor as CDK employees.

---

see, *e.g.,* *Spanish Broad. Sys. of Fla., Inc. v. Clear Channel Commc'ns, Inc., 376 F.3d 1065 (11th Cir. 2004)*, which are applied differently under various state and federal laws. Although there may be reason to adopt such standards as part of the "substantial control" analysis, the parties have not explained why any such standards are appropriate and/or necessary here.

[7] One of the cases relied extensively upon by CDK recognizes that the use of a parent company's email addresses supports a finding of substantial control, even though it is not sufficient by itself. *whiteCryption Corp. v. Arxan Techs., Inc., 2016 U.S. Dist. LEXIS 78106, 2016 WL 3275944, at *11 (N.D. Cal. June 15, 2016)* ("[B]eyond the use of [ ] associated email addresses, the acts appear to be more consistent with higher level policy and strategy decisions.").

CDK criticizes MVSC's response by noting that "MVSC does not defend the adequacy of *any* of its specific allegations" but instead simply compiles its allegations to argue that they "overall" are comparable to the kinds of allegations that have been found sufficient in other cases. [49 (CDK Reply), at 2.] But the Court does not need to look at MVSC's allegations in isolation. Taking MVSC's allegations together, it is unclear to the Court what additional allegations could be necessary to establish at the pleading stage that CDK substantially controls MVSC. CDK appears to argue that MVSC must allege comingling of funds and a lack of corporate formalities to establish substantial control. [49 (CDK Reply), at 5 (distinguishing *Stewart v. Screen Gems-EMI Music, Inc., 81 F. Supp. 3d 938 (N.D. Cal. 2015)*; *Barba v. Seung Heun Lee, 2009 U.S. Dist. LEXIS 132415, 2009 WL 8747368, at *5 (D. Ariz. Nov. 4, 2009)*; *Sawyer v. Bill Me Later, Inc., 2010 U.S. Dist. LEXIS 138098, 2010 WL 11492736, at *14 (C.D. Cal. Dec. 14, 2010))*.] Although such allegations certainly would support a finding **[*37]** of substantial control, CDK does not cite any case indicating that such allegations are necessary.

Furthermore, where a plaintiff alleges—as MVSC does here—that a parent company has directed its subsidiary to engage in anticompetitive conduct and itself engages in anticompetitive conduct, such allegations are sufficient to establish market participation by the parent company. See, e.g., *Nobody in Particular Presents, Inc. v. Clear Channel Commc'ns, Inc., 311 F. Supp. 2d 1048, 1070 (D. Colo. 2004)* ("[A] parent can be considered a competitor in a market where its subsidiary is a participant if, and only if, the parent sufficiently controls, dictates, or encourages the policies of the subsidiary. When the parent controls, directs, or encourages the subsidiary's anticompetitive conduct, the parent engages in sufficient independent conduct to be held directly liable as a single enterprise with the subsidiary under the Sherman Act." (citations omitted)); *Intellectual Ventures I LLC v. Cap. One Fin. Corp., 2016 U.S. Dist. LEXIS 4581, 2016 WL 160263, at *5 (D. Md. Jan. 14, 2016)* (plaintiff adequately alleged market participation of defendant where the defendant "is a parent company, controlling or directing the anticompetitive conduct" of its affiliates);[8] see also *In re Packaged Seafood Prods. Antitrust Litig., 242 F. Supp. 3d 1033, 1059 (S.D. Cal. 2017)* (allegations that parent companies "directly conspired with their respective subsidiaries" sufficient to establish market participation). Because MVSC alleges **[*38]** facts sufficient to establish that CDK controlled the day-to-day operations of CVR and directly participated in the alleged anticompetitive conduct, MVSC states a plausible claim that CDK was a participant in the relevant EVR markets.[9]

C. Monopoly versus Oligopoly

CDK argues that Plaintiff's monopolization and attempted monopolization claims fail because they are premised on concerted action, not just the action of a single firm. In support of this argument, CDK relies on cases recognizing that "monopolization and attempted monopolization are single-firm violations." *United Food & Commercial Workers Local 1776 & Participating Emp'ls Health & Welfare Fund v. Teikoku Pharma USA, Inc., 74 F. Supp. 3d 1052, 1076 (N.D. Cal. 2014)* (citations omitted); see also *Standfacts Credit Servs., Inc. v. Experian Info. Sols., Inc., 405 F. Supp. 2d 1141, 1152 (C.D. Cal. 2005)* ("*section 2* prohibits only monopolization by a single entity, as opposed to shared monopolization"), aff'd in part *294 F. App'x 271 (9th Cir. 2008)*.

While this case was pending before the Central District of California, the court accepted that argument with respect to the monopolization and attempted monopolization claims in MVSC's first amended complaint, noting that they were "based on concerted conduct rather than on the conduct of a single **[*39]** entity." [*Motor Vehicle Software Corp. v. CDK Global, Inc., et al., Case No. 17-cv-896, Dkt. 73, at 8, 2017 U.S. Dist. LEXIS 218016 (N.D. Cal. Oct. 2, 2017)*.] In reaching that conclusion, the court cited *Rebel Oil Co. v. Atlantic Richfield Co.*, which held that "[t]o

---

[8] CDK argues that *Intellectual Ventures* and *Nobody in Particular* can be dismissed as wrongly decided because they did not reference the "day-to-day" analysis discussed in *Caribbean Broadcasting System*. [49 (CDK Reply), at 3.] However, both cases still analyzed whether and to what extent the parent companies exercised substantial control over their respective subsidiaries.

[9] MVSC also has submitted documents elaborating (albeit to a very limited extent) on its factual allegations relating to CDK's substantial control over CVR. For example, Bob Karp (CDK's North America President) was involved in discussions regarding at least one CVR executive's bonus grid and was praised for his "deep level of engagement in CVR." [*Motor Vehicle Software Corporation v. CDK Global, Inc. et al.*, Case No. 18-cv-865, Dkt. 118, at 7-9.]

pose a threat of monopolization, one firm *alone* must have the power to control market output and exclude competition." 51 F.3d 1421, 1443 (9th Cir. 1995) (citation omitted). In *Rebel Oil*, the court noted that an oligopolist lacks such unitary power. Since MVSC had not established that Defendants were a unitary entity, the court dismissed MVSC's monopolization and attempted monopolization claims. [Motor Vehicle Software Corp. v. CDK Global, Inc., et al., Case No. 17-cv-896, Dkt. 73, at 8, 2017 U.S. Dist. LEXIS 218016 (N.D. Cal. Oct. 2, 2017).] Here, however, Plaintiff is not challenging an alleged oligopoly. Rather, Plaintiff is challenging the anticompetitive conduct of the unitary CDK/CVR entity.[10] Because MVSC's monopolization and attempted monopolization claims do not challenge an oligopoly, the Court will not dismiss MVSC's monopolization and attempted monopolization claims on that basis.

D. Anticompetitive Conduct

Defendant CDK also argues that MVSC's Section 2 claims also fail because MVSC has not alleged that CDK engaged in **[*40]** any anticompetitive conduct. To state a claim for monopolization or attempted monopolization under Section 2, a plaintiff must allege that the defendant engaged in predatory or anticompetitive conduct. Spectrum Sports, Inc., 506 U.S. at 456 (recognizing "predatory or anticompetitive conduct" as an element of an attempted monopolization claim); Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 854 (7th Cir. 2011) (holding that a claim for monopolization under Section 2 requires that the defendant "willfully acquired or maintained that power by means other than the quality of its product, its business acumen, or historical accident"). "Anti-competitive conduct is behavior that tends to impair the opportunities of rivals and either does not further competition on the merits or does so in an unnecessarily restrictive way." *Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 894 (9th Cir. 2008)*. To state a claim for conspiracy to monopolize under Section 2, a plaintiff must allege "the existence of a combination or conspiracy[.]" Goodloe v. Nat'l Wholesale Co., 2004 U.S. Dist. LEXIS 13630, 2004 WL 1631728, at *6 (N.D. Ill. July 19, 2004) (citing The Great Escape, Inc. v. Union City Body Co., Inc., 791 F.2d 532, 541-42 (7th Cir. 1986)). Plaintiff contends that CDK has engaged in anticompetitive conduct by (1) conspiring to deny Plaintiff access to dealer data, and (2) refusing to sell Plaintiff a service sold to non-competitors. [47 (MVSC Opp.), at 10.]

To the extent that MVSC seeks to bring Section 2 claims based on the alleged conspiracy to deny MVSC access to dealer data, MVSC sufficient has alleged the requisite **[*41]** anticompetitive conduct. CDK argues that because Plaintiffs' Section 2 claims are based on an alleged "group boycott" of Plaintiff, Plaintiff essentially is challenging concerted action. However, the CDK/CVR entity cannot use the allegedly anticompetitive agreement between CDK and Reynolds in the DMS market to maintain or obtain monopoly power in the EVR market. As MVSC notes, "[h]orizontal collusion is anti-competitive conduct that supports liability under Section 2." [47 (MVSC Opp.), at 9.] A defendant violates "Section 2 of the Sherman Act * * * [if it] 'has acquired or maintained his strategic position, or sought to expand his monopoly, or expanded it by means of those restraints of trade which are cognizable under [Section] 1.'" Fin. & Sec. Prods. Ass'n v. Diebold, Inc., 2005 U.S. Dist. LEXIS 45409, 2005 WL 1629813, at *4 (N.D. Cal. July 8, 2005) (quoting United States v. Griffith, 334 U.S. 100, 106, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)); see also Gumwood HP Shopping Partners, L.P. v. Simon Prop. Grp., Inc., 2013 U.S. Dist. LEXIS 92133, 2013 WL 3214983, at *7 (N.D. Ind. Mar. 13, 2013) ("Where defendant has engaged in unlawful restraint of trade that would independently violate Section 1 of the Sherman Antitrust Act, it is well established that it also violates Section 2 if it acquires or maintains a monopoly by means of that restraint of trade." (citing Griffith, 334 U.S. at 106). Because Plaintiff has alleged that the CDK/CVR entity is attempting to maintain and/or acquire monopoly power in the Illinois and California EVR markets by way of conduct that violates Section 1 (*i.e.* CDK's alleged horizontal agreement with **[*42]** Reynolds), Plaintiff has alleged sufficient anticompetitive conduct to state a claim against the CDK/CVR entity under Section 2.

---

[10] For the reasons discussed below, CDK and CVR can be treated as a single entity under *Copperweld* for the purposes of examining MVSC's antitrust claims.

To the extent that Plaintiff seeks to establish an antitrust violation based on the CDK/CVR entity's alleged unilateral refusal to deal, however, Plaintiff's *Section 2* claims fail. Plaintiff argues that the fact that the CDK refuses to allow Plaintiff to purchase its services at the rates generally available to others shows that CDK's refusal to deal with Plaintiff is motivated by anticompetitive conduct and therefore is improper. However, as Judge St. Eve noted, there is "no antitrust duty to deal * * * in selling services to [ ] competitors in the retail market." *In re Dealer Mgmt. Sys. Antitrust Litig., 313 F. Supp. 3d 931, 955 (N.D. Ill. 2018)* (citing *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 450, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009))*; see also *Schor v. Abbott Labs., 457 F.3d 608, 610 (7th Cir. 2006)* ("[A]ntitrust law does not require monopolists to cooperate with rivals by selling them products that would help the rivals to compete. Cooperation is a problem in antitrust, not one of its obligations." (internal citation omitted)); *Authenticom, Inc. v. CDK Global, LLC, 874 F.3d 1019, 1025 (7th Cir. 2017)* ("Even monopolists are almost never required to assist their competitors[.]" (citation omitted).

The Supreme Court has recognized an exceedingly narrow exception to this principle in *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*, in which the Supreme Court held that a plaintiff could bring a refusal-to-deal **[*43]** claim under *Section 2* where the "unilateral termination of a voluntary (and thus presumably profitable) course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end." *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 409, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (summarizing *Aspen Skiing*). The Supreme Court has recognized, however, that *Aspen Skiing* "is at or near the outer boundary of *§ 2* liability." *Id.* The Supreme Court therefore has rejected refusal-to-deal claims unless they fall within the "limited exception recognized by *Aspen Skiing*." *Id.* For example, in *Trinko*, the Supreme Court rejected a refusal-to-deal claim because the complaint did not allege that the defendant "engaged in a course of dealing with its rivals, or would ever have done so absent statutory compulsion." *Id.* Because MVSC has not made such allegations here, MVSC has not sufficiently alleged its refusal-to-deal claim. *Viamedia, Inc. v. Comcast Corp., 2017 U.S. Dist. LEXIS 24213, 2017 WL 698681, at *4 (N.D. Ill. Feb. 22, 2017)* (plaintiff bringing a unilateral refusal-to-deal claim must show "a preexisting voluntary and presumably profitable course of dealing between the monopolist and rival" (citing *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1074 (10th Cir. 2013))*.

Indeed, in *Authenticom, Inc. v. CDK Glob.*, the Seventh Circuit concluded that CDK's decision to prevent unauthorized access to its DMS is "a far cry from *Aspen Skiing*" and it is clear **[*44]** that a refusal-to-deal theory "cannot support relief" based on that purported refusal to deal. *874 F.3d at 1026* ("And as we have noted, even if it did, this case is a far cry from *Aspen Skiing*, which represented the high-water mark in *section 2* cases for a duty-to-deal theory. *Trinko* and *Linkline* leave no doubt that such a theory cannot support relief."). The Court sees no reason to depart from that reasoning here.[11] Still, because CDK's agreement with Reynolds supports MVSC's *Section 2* claims, MVSC sufficiently has alleged that CDK engaged in anticompetitive conduct supporting its *Section 2* claims against CDK.

E. Antitrust Injury

Defendant Reynolds argues that Plaintiff "cannot establish any viable antitrust injury where the allegedly restrained trade is illegal." [44 (Reynolds Mem.), at 9-16.] To succeed on an antitrust claim, Plaintiff must establish actual or threatened "'antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent.'" *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. Federal courts therefore have held that a plaintiff cannot establish an antitrust injury where the business alleged to have been restrained itself was unlawful. See, *e.g., Modesto Irrigation Dist. v. Pac. Gas & Elec. Co., 309 F. Supp. 2d*

---

[11] In *Authenticom*, the Seventh Circuit was addressing a refusal-to-deal claim under *Section 1*. Although the court distinguished *Aspen Skiing*, which was a *Section 2* claim, on that ground, that distinction was not the only basis for the court's decision. The court also focused on the fact that the history between the parties did not fit within the narrow exception established by *Aspen Skiing*, which also is true with respect to MVSC's *Section 2* claims.

1156, 1169-70 (N.D. Cal. 2004), aff'd, *158 Fed. Appx. 807 (9th Cir. 2005)* (plaintiff lacked antitrust injury because its conduct **[*45]** was "unlawful by its own terms"); *Maltz v. Sax, 134 F.2d 2, 4 (7th Cir. 1943)* (company "engaged in the business of making and selling gambling devices" could not establish an antitrust injury). Still, "[c]ourts have generally held that a plaintiff's wrongdoing is not a defense to an antitrust suit." *In re Dealer Mgmt. Sys. Antitrust Litig., 313 F. Supp. 3d at 946*. "Proof of the plaintiff's unrelated unlawful conduct is not a valid *in pari delicto* defense to an antitrust charge." *Pinto Trucking Serv., Inc. v. Motor Dispatch, Inc., 649 F.2d 530, 534 (7th Cir. 1981)*.

Here, Reynolds frames MVSC's antitrust injury as the denial of access to Reynolds's DMS without authorization through Authenticom. Because—according to Reynolds—it is a violation of the Computer Fraud and Abuse Act ("CFAA") and the California Computer Crime Law ("CCCL") for Plaintiff to access Reynolds's DMS without authorization through Authenticom, Reynolds contends that Plaintiff cannot establish an antitrust injury. To the extent Reynolds seeks to raise an *in pari delicto* defense based on Plaintiff's purported violations of the CFAA and related state-law claims, the court recently rejected such an argument in ruling on the motions to dismiss in *Authenticom, Inc. v. CDK Global, LLC* (Case No. 18-cv-868). That Reynolds may have claims against Plaintiff under the CFAA and related state laws does not foreclose Plaintiff's **[*46]** antitrust claims. *In re Dealer Mgmt. Sys. Antitrust Litig., 313 F. Supp. 3d at 947* ("Both things can be true: Defendants may be able to state valid cyber-security claims against Authenticom *and* Authenticom may be able to state valid antitrust claims against Defendants.").

To the extent that Reynolds argues that Plaintiff cannot establish an antitrust injury because Plaintiff's conduct purportedly violates the CFAA and/or the CCCL, Reynolds argument also fails. Even assuming Plaintiff's conduct violates the CFAA or the CCCL,[12] it would only be because Reynolds denied it access to its DMS pursuant to the alleged conspiracy. Unlike the cases cited by Reynolds, Plaintiff's "as-alleged practices are not illegal independent of Defendants' challenged conduct." *In re Dealer Mgmt. Sys. Antitrust Litig., 313 F. Supp. 3d at 947*; *cf. In re Canadian Import Antitrust Litig., 470 F.3d 785, 791 (8th Cir. 2006)* (finding no antitrust injury where alleged injury (not being able to import less expensive drugs distributed by Canadian pharmacies) was caused by "federal statutory and regulatory scheme adopted by the United States government * * *, not by the conduct of the defendants"); *Pearl Music Co. v. Recording Indus. Ass'n of Am., Inc., 460 F. Supp. 1060, 1068 (C.D. Cal. 1978)* (finding lack of standing or capacity to bring antitrust claim where plaintiff's conduct was "totally illegal under the laws of forty-nine states"); *Modesto Irrigation Dist., 309 F. Supp. 2d at 1170* (plaintiff lacked antitrust injury because its conduct was "unlawful by **[*47]** its own terms"); *Snake River Valley Elec. Ass'n v. PacifiCorp, 357 F.3d 1042, 1050 n.8 (9th Cir. 2004)* (noting that there would be no antitrust injury where plaintiff had not obtained required state approval to engage in conduct allegedly restrained); *Maltz v. Sax, 134 F.2d 2, 4 (7th Cir. 1943)* (company "engaged in the business of making and selling [illegal] gambling devices" could not establish an antitrust injury). Even if Reynolds's authorization is necessary for Plaintiff to be able to access its DMS, Reynolds "is not free to withhold such approval pursuant to illegal arrangements." *In re Dealer Mgmt. Sys. Antitrust Litig., 313 F. Supp. 3d at 948* (collecting cases).

Regardless, whether MVSC and/or Authenticom violated the CFAA or the CCCL is a question of fact that cannot be determined based on the pleadings alone. *In re Dealer Mgmt. Sys. Antitrust Litig., 313 F. Supp. 3d at 949* (rejecting similar argument with respect to purported violations of the CFAA and related state laws by Authenticom). Accordingly, Reynolds's motion to dismiss Plaintiff's conspiracy claim based on a failure to allege an antitrust injury is denied.[13]

---

[12] The Court takes no position on whether Plaintiff's conduct violates the CFAA and/or the CCCL. As the Court noted in ruling on the motions to dismiss in *Authenticom, Inc. v. CDK Global, LLC* (Case No. 18-cv-868), "'authorization' here is 'a factual matter' and 'not properly before the Court based on the pleadings alone[.]" *In re Dealer Mgmt. Sys. Antitrust Litig., 313 F. Supp. 3d at 949* (quoting *Weingand v. Harland Fin. Sols., Inc., 2012 U.S. Dist. LEXIS 123160, 2012 WL 3763640, at *2 (N.D. Cal. Aug. 29, 2012))*.

[13] Neither CDK nor CVR moved to dismiss MVSC's antitrust claims for failure to allege an antitrust injury. They did, however, adopt Reynolds's argument in their supplemental briefs. [120 (CDK Supp. Br.), at 7; 121 (CVR Supp. Br.), at 7.] Because MVSC

F. Conspiracy to Monopolize Claim

i. Plausibility of Allegations

The court previously dismissed Plaintiff's conspiracy to monopolize claim because Plaintiff failed to plead sufficient facts to find that CVR engaged in conspiratorial conversations with either CDK or Reynolds. [*Motor* ***[*48]*** *Vehicle Software Corp. v. CDK Global, Inc., et al.*, Case No. 17-896, Dkt. 73, at 11.] At most, Plaintiff alleged that CVR had the motive and opportunity to conspire. [*Id.*] Plaintiff's second amended complaint alleges more than the motive and opportunity to conspire. Defendants argue, however, that Plaintiff's additional allegations are lacking sufficient factual details to survive a motion to dismiss.

Defendants cite cases indicating that Plaintiff must allege the who, what, where, and when of its antitrust claims. [See, *e.g.*, 44 (Reynolds Br.), at 5-6.] However, such specific allegations are only necessary to survive a motion to dismiss under *Rule 9(b)*. *United States ex rel. Presser v. Acacia Mental Health Clinic, LLC, 836 F.3d 770, 776 (7th Cir. 2016)*. Plaintiff's antitrust claims are not subject to the heightened pleading standards of *Rule 9(b)*. *In re Plasma-Derivative Protein Therapies Antitrust Litig., 764 F. Supp. 2d 991, 999 (N.D. Ill. 2011)* (citing *Twombly, 550 U.S. at 569 n. 14*). Plaintiff need only allege "enough facts to state a claim to relief that is plausible on its face." *Twombly, 550 U.S. at 570*. Plaintiff has done so here.

In its second amended complaint, Plaintiff alleges that "CVR executives actively participated in conspiratorial conversations with CDK and Reynolds, specifically discussing the need to block MVSC from accessing dealer data (whether through the 3PA and RCI data integration programs or otherwise) so that MVSC could not effectively compete." **[*49]** [*Motor Vehicle Software Corporation v. CDK Global, Inc., et al.*, Case No. 18-cv-865, Dkt. 76, at ¶ 109.] Plaintiff further alleges that "[a] long-time member of CVR's Board of Directors—which is [comprised] of representatives from CDK, Reynolds, and CVR—admitted MVSC that the board specifically discussed keeping MVSC at a disadvantage with respect to data access. Board members recognized that MVSC 'outcompeted CVR' with respect to 'technology and improved services,' and so board members agreed that CVR needed a competitive advantage as compared to its competitors regarding access to dealer data." [*Id.* at ¶ 110.] Plaintiff further alleges which CVR executives participated in the conspiratorial conversations. [*Id.* at ¶ 111.] In conjunction with Plaintiff's allegations regarding an improper agreement between CDK and Reynolds, these allegations are sufficient to state a claim to relief that is plausible on its face.

This case therefore is unlike the cases relied upon by Defendants, in which the plaintiff merely alleged parallel conduct, *Twombly, 550 U.S. at 557*, alleged conduct equally consistent with innocent conduct, *id.*, or offered conclusory assertions without any factual detail. See, *e.g., Oliver v. SD-3C* ***[*50]*** *LLC*, 2016 WL 5950345, at *11 (N.D. Cal. Sept. 30, 2016) (alleging "upon information and belief" that all companies who participated in licenses and who abided by the terms of licenses were co-conspirators). The Court recognizes that MVSC's allegations with respect to Reynolds's involvement in the alleged conspiracy are not robust. Still, MVSC's allegations regarding Reynolds's involvement in discussions regarding the need to block MVSC from accessing dealer data and keeping MVSC at a disadvantage with respect to data access, in conjunction with Reynolds's alleged agreement with CDK, are sufficient to state a plausible claim, and *Rule 8* requires no more. Thus, to the extent that Defendants seek dismissal of MVSC's conspiracy claim based on the plausibility of MVSC's allegations, Defendants motions to dismiss are denied.

ii. Copperweld Doctrine

---

adequately has alleged an antitrust injury, the Court need not address whether CDK and CVR properly joined Reynolds's motion.

Defendants argue that Plaintiff's conspiracy-to-monopolize claim fails under *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*, which held that legally separate entities—such as a parent company and its wholly owned subsidiary—may constitute a single entity that it is incapable of engaging in concerted action under the Sherman Act.[14] "Although *Copperweld* did not set clear parameters for what constitutes **[*51]** a single economic entity beyond the parent-subsidiary context, it nonetheless encouraged the courts to analyze the substance, not the form, of economic arrangements." *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 834 (3d Cir. 2010)* (citations and quotations omitted). "The relevant inquiry, therefore, is whether there is a contract, combination * * * or conspiracy amongst separate economic actors pursuing separate economic interests, such that the agreement deprives the marketplace of independent centers of decisionmaking, and therefore of diversity of entrepreneurial interests, and thus of actual or potential competition." *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 195, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (internal quotation marks omitted). As the Supreme Court noted in *American Needle*, "it is not determinative that two parties to an alleged [Sherman Act] violation are legally distinct entities. Nor, however, is it determinative that two legally distinct entities have organized themselves under a single umbrella or into a structured joint venture." *Id. at 196*. If an agreement joins independent centers of decision-making, "the entities are capable of conspiring[.]" *Id.*

Defendants argue that under *Copperweld*, MVSC cannot bring an antitrust conspiracy claim against a joint venture (CVR) and its parent corporations **[*52]** (CDK and Reynolds). Based on CDK's majority ownership interest in CVR and CDK's involvement in the operations of CVR,[15] Plaintiff admits that CDK and CVR are a unified entity for antitrust purposes. MVSC argues, however, that Reynolds still is capable of conspiring with the CDK/CVR entity. Defendants argue that because MVSC alleges that Reynolds and CDK jointly own CVR and that they jointly control the management and decision making of CVR, Reynolds also is incapable of conspiring with the CDK/CVR entity.[16] [See, *e.g, Motor Vehicle Software Corporation v. CDK Global, Inc., et al.*, Case No. 18-cv-865, Dkt. 76, at ¶ 152.] Defendants also note that MVSC alleges that Reynolds retains seats on CVR's board [*id.* at ¶ 110], and reaps profits from its interest in CVR. [*Id.* at ¶ 55.] According to Defendants, this makes Reynolds a participant in the "economically integrated joint venture" incapable of conspiring because of Defendants' unity of interests.

But Defendants here do not have a unity of interests. CDK and Reynolds are competitors. Their status as competitors is not changed by the fact that they entered into a joint **[*53]** venture. To the contrary, as the Supreme Court has noted, "the most significant competitive threats arise when joint venture participants are actual or potential competitors[.]" *Am. Needle, Inc., 560 U.S. at 197* (quoting 7 P. Areeda & H. Hovenkamp, ***Antitrust Law*** ¶ 1464c, at 206 (2d ed. 2003)). For example, in *American Needle*, the Supreme Court held that a joint venture created by National Football League to develop, license, and market the intellectual property of member teams involved concerted action subject to antitrust scrutiny. *560 U.S. at 199*. The Supreme Court concluded that even

[14] Although *Copperweld* involved a conspiracy claim under *Section 1*, courts have held that *Copperweld* also applies to *Section 2* claims. See, *e.g., Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 847 F.3d 1221, 1234 (10th Cir. 2017)*; *Fid. Nat'l Title Ins. Co. of New York v. Intercounty Nat'l Title Ins. Co., 161 F. Supp. 2d 876, 883 (N.D. Ill. 2001)*.

[15] In support of its argument that Defendants are incapable of conspiring under the *Copperweld* doctrine, Defendant CVR cites a number of cases applying the *Copperweld* doctrine to partially owned subsidiaries. [46 (CVR Br.), at 3 n.3.] However, almost all of the cases cited involved one majority owner. Given that CDK has a majority interest in CVR and is alleged to be extensively involved in the operations of CVR, these cases support the argument that CDK and CVR may be considered a unified entity pursuant to *Copperweld*. Still, Plaintiff has alleged that CDK, CVR, ***and Reynolds*** conspired with each other. Defendants have only cited to one case— *Stanislaus Food Prod. Co. v. USS-POSCO Indus., 2010 U.S. Dist. LEXIS 92236. 2010 WL 3521979 (E.D. Cal. Sept. 3, 2010)* —in which the alleged misconduct involved a joint venture and its ***two*** parent companies. For the reasons discussed below, that case also is distinguishable.

[16] While this case still was in the Central District of California, Reynolds argued that the allegations in MVSC's first amended complaint regarding Reynolds's extensive control over CVR barred MVSC's *Copperweld* arguments. Because MVSC's first amended complaint was not verified, Reynolds has abandoned this argument because of Seventh Circuit caselaw only holds that an amended complaint cannot contradict an earlier ***verified*** complaint. [118 (Reynolds Supp. Br.), at 7 (citing *Beal v. Beller, 847 F.3d 897, 901 (7th Cir. 2017)*.] Regardless, although MVSC's first amended complaint included more allegations regarding Reynolds's control over CVR, it is not clear to the Court that those allegations directly undermine MVSC's *Copperweld* argument.

when a "group of firms agree to produce a joint product, cooperation amongst those firms" still may be treated as concerted action. *Id.*

Defendants argue that *American Needle* is distinguishable because in that case, the NFL teams competed against each other in the market of their joint venture and captured "individual economic benefits separate and apart from [the joint venture's] profits as a result of the decisions they [made] for [the joint venture]." [50 (CVR Reply), at 3.] Because (according to Defendants) CDK and Reynolds do not compete in the EVR market or capture economic benefits from that market separate and apart from their joint venture's profits, **[*54]** Defendants contend that *American Needle* does not support MVSC's argument. Defendants submit instead that this case is more similar to *Stanislaus Food Prod. Co. v. USS-POSCO Indus., 2010 U.S. Dist. LEXIS 92236, 2010 WL 3521979 (E.D. Cal. Sept. 3, 2010)*, in which the court found that a joint venture was incapable of conspiring with its two parent companies.

However, in *Stanislaus*, the creation of the joint venture eliminated the competition that previously existed between its two parent companies. The Court noted, "[i]f two erstwhile competitors combine to become a single economic entity—by merger or acquisition, for example—the act of combination may violate the antitrust laws, but their subsequent relations are generally immune from *section 1*." *Id.* at 19. Because the parent companies did not have any business enterprise other than their joint venture, the court concluded that Defendants were an economically integrated joint venture incapable of conspiring pursuant to *Copperweld*.

In this case, Plaintiff alleges that Defendants CDK and Reynolds are competitors in the DMS market. Although they both have an ownership interest and involvement in the operations of their joint venture CVR, they have their own respective business enterprises. As the Supreme Court noted in *American Needle*, even when a joint venture "partially **[*55]** [unites] the economic interests of the parent firms," the parent companies "still have distinct, potentially competing interests." *560 U.S. at 198* (internal quotations omitted). Although antitrust concerns might be stronger where—as in *American Needle*—the parent firms competed in the market of their joint venture, that does not mean that two parent companies have completely united economic interests simply because they enter into a joint venture. Although MVSC alleges that Reynolds has an ownership interest in CVR and controls CVR with CDK, these allegations do not change the fact that CDK and Reynolds are separate economic actors pursuing separate economic interests. Their interests may be partially united as a result of their joint venture, but that is not enough to avoid antitrust scrutiny.

Defendants have not identified a single case in which a court has concluded that ***two*** parent companies that compete against each other in one market are incapable of conspiring with their joint venture. Although Defendants cite cases applying *Copperweld's* holding that a parent company is incapable of conspiring with its wholly-owned subsidiary or extending that holding to similar situation in which there was **[*56]** a similar unity of interests, see, *e.g., McCoy v. Iberdrola Renewables, Inc., 760 F.3d 674, 681 (7th Cir. 2014)* (parent company and two wholly-owned subsidiaries not capable of engaging in concerted action); *Vollrath Co. v. Sammi Corp., 9 F.3d 1455, 1463 (9th Cir. 1993)* (parent company, its subsidiary, and its subsidiary's subsidiary not capable of engaging in concerted action), Defendants have not identified such a unity of interests in this case.

Implicitly recognizing that Defendants do not have a complete unity of interests, Defendants argue that "CVR's supposed participation in a conspiracy with Reynolds (and CDK) to restrict MVSC's unauthorized access to the respective DMSs does not deprive the market place of independent centers of decisionmaking, as it pertains to the alleged wrongful conduct." [121 (CVR Supp. Br.), at 3 (quotations and alterations omitted).] However, given that Reynolds and CDK compete in the DMS market—where the horizontal agreement to advance CVR's monopoly power is claimed to have occurred—the alleged misconduct actually does deprive the market of independent decisionmakers. This case is unlike *Texaco Inc. v. Dagher*, cited by Defendants, in which the Court concluded that the purely internal pricing decisions of a joint venture entered into by Texaco Inc. and Shell Oil were not horizontal price-fixing agreements **[*57]** subject to *per se* liability under the Sherman Act.[17] Because Defendants are capable

[17] Defendants rely on *Texaco Inc. v. Dagher, 547 U.S. 1, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* in support of their *Copperweld* argument. However, in *Texaco*, the Supreme Court did not actually address whether the defendants were capable of conspiring

of engaging in concerted conduct, Defendants' motion to dismiss MVSC's conspiracy claim under *Copperweld* is denied.[18]

G. State-Law Claims

Defendants have moved for dismissal of certain state-law claims that—according to Defendants—fail for the same reasons that Plaintiff's federal antitrust claims fail. [See (Reynolds Mem.), at 16-17; (CDK Mem.), at 12; (CVR Mem.), at 6-7.] Although MVSC did not respond to Defendants' arguments for dismissing MVSC's state-law claims, MVSC did respond fully to Defendants' arguments regarding the federal antitrust claims. Because Plaintiff's federal antitrust claims survive, Defendants' motions to dismiss Plaintiff's related **[*58]** state-law claims are denied.

IV. Conclusion

For the reasons set forth below, the Court denies the motion to strike [144] and the motions to dismiss [44; 45; 46].

Date: October 22, 2018

End of Document

under *Copperweld*. Because the plaintiff only argued that defendants conduct was a *per se* violation of the Sherman Act, the Court limited its analysis to whether a joint venture's internal price setting was subject to a *per se* or rule of reason analysis.

[18] Given that the Court is denying Defendants' motion to dismiss MVSC's conspiracy claim under *Copperweld*, the Court does not address Plaintiff's alternative argument that Reynolds is judicially estopped from invoking *Copperweld* because Reynolds previously took the position that it was not a competitor in the CVR market. The Court notes, however, that it is not readily apparent that such position is inconsistent with the invocation of *Copperweld*.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Preliminary Considerations > Jurisdiction > Subject Matter Jurisdiction

HN1[] **Motions to Dismiss, Failure to State Claim**

Under *Fed. R. Civ. P. 12(b)(1)*, a party may assert lack of subject-matter jurisdiction as a defense. A *Fed. R. Civ. P. 12(b)(1)* motion for lack of subject matter jurisdiction can challenge the sufficiency of the pleading itself (facial attack) or the factual existence of subject matter jurisdiction (factual attack). A facial attack goes to the question of whether the plaintiff has alleged a basis for subject matter jurisdiction, and the court takes the allegations of the complaint as true for purposes of *Fed. R. Civ. P. 12(b)(1)* analysis. However, a factual attack challenges the factual existence of subject matter jurisdiction. In that case, the district court has broad discretion over what evidence to consider and may look outside the pleadings to determine whether subject-matter jurisdiction exists. Regardless, the plaintiff bears the burden of proving that jurisdiction exists.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

A pleading fails to state a claim under *Fed. R. Civ. P. 12(b)(6)* if it does not contain allegations that support recovery under any recognizable legal theory. In considering a *Fed. R. Civ. P. 12(b)(6)* motion, the Court construes the pleading in the non-movant's favor and accepts the allegations of facts therein as true. The pleader need not provide detailed factual allegations to survive dismissal, but the obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. In essence, the pleading must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face and the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN3[] **Heightened Pleading Requirements, Fraud Claims**

Fed. R. Civ. P. 9(b) provides a heightened pleading standard for claims of fraud. In alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake. Malice, intent, knowledge, and other conditions of a person's mind may be alleged generally. Claims of fraud must meet the following requirements: (1) specify the statements that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent. At a minimum, a claimant must allege the time, place and contents of the alleged fraud.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN4[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The Racketeer Influenced and Corrupt Organizations Act establishes bases for both criminal and civil suits. A RICO civil suit may be brought by any person injured in his business or property by reason of a violation of *18 U.S.C.S. § 1962* of this chapter. *18 U.S.C.S. § 1964(c)*. *18 U.S.C.S. § 1962* provides that it shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt. *18 U.S.C.S. § 1962(c)*. In other words, a party advancing a civil RICO claim must establish their right to sue and then further allege the following elements: (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity.

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > Elements

HN5[] **Mail Fraud, Elements**

To state a claim based on mail or wire fraud, the plaintiffs must allege the following three elements: (1) devising or intending to devise a scheme to defraud or to perform specified fraudulent acts; (2) involving a use of the mails; and (3) for the purpose of executing the scheme or attempting to do so. The plaintiffs must allege that defendants possessed the specific intent to deceive or defraud. The scheme to defraud must involve misrepresentations or omissions reasonably calculated to deceive persons of ordinary prudence and comprehension. The plaintiffs need not show actual reliance, but the plaintiffs must demonstrate that the misrepresentations or omissions were material. Specific intent to defraud or deceive exists if the defendant by material misrepresentations intends the victim to accept a substantial risk that otherwise would not have been taken.

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > Elements

HN6[] Mail Fraud, Elements

Importantly, a defendant may commit mail fraud even if he personally has not used the mails. A mail fraud conviction requires only a showing that the defendant acted with knowledge that use of the mails would follow in the ordinary course of business, or that a reasonable person would have foreseen use of the mails. In other words, there is no requirement that the defendant have actually intended that the mails or wire be used. And, further, the mailings may be innocent or even legally necessary. The use of the mails need only be closely related to the scheme and reasonably foreseeable as a result of the defendant's actions.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN7[] Heightened Pleading Requirements, Fraud Claims

When pleading predicate acts of mail or wire fraud, in order to satisfy the heightened pleading requirements of *Fed. R. Civ. P. 9(b)*, a plaintiff must (1) specify the statements that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > Notice Requirement

HN8[] Motions to Dismiss, Failure to State Claim

A court generally cannot look beyond the face of the plaintiff's complaint when adjudicating a motion to dismiss for failure to state a claim unless the court converts the motion into a motion for summary judgment after proper notice is given to the parties. However, a district court can consider such documents without converting the motion into one for summary judgment where two conditions are met: 1) the documents are referred to in the complaint, and 2) are central to the claims contained therein.

Opinion

ORDER DENYING ROBERT BOSCH LLC'S MOTION TO DISMISS PLAINTIFFS' FIRST AMENDED CLASS ACTION COMPLAINT

On June 7, 2016, nine plaintiffs (including first-named Plaintiff Jason Counts) filed a 442-page complaint framing a putative class-action and alleging deceptive advertising, breach of contract, and fraudulent concealment claims under the laws of thirty states against Defendant General Motors ("GM"). ECF No. 1. Fundamentally, Plaintiffs allege that GM installed a "defeat device" in the 2014 Chevrolet Cruze Diesel which results in significantly higher emissions **[*2]** when the vehicle is in use compared to when it is being tested in laboratory conditions.

GM filed a motion to dismiss on October 3, 2016, which contended that Plaintiffs' suit should be dismissed because Plaintiffs lack standing to bring suit, their claims are preempted by the *Clean Air Act*, the primary jurisdiction doctrine mandates deference to an EPA investigation of the claims, and Plaintiffs have failed to state a claim upon which relief can be granted. ECF No. 12. The motion was granted in part and denied in part. ECF No. 21. The Court held that Plaintiffs had standing, that their claims were not preempted by the Clean Air Act (CAA), and that the primary jurisdiction doctrine was inapplicable. The Court also held that Plaintiffs had not stated a claim for fraudulent misrepresentation based on statements GM made in its advertising campaign. However, the Court found that Plaintiffs had stated a claim for fraudulent concealment in that they had sufficiently alleged that GM had actively concealed the existence of the defeat device and had exclusive knowledge of the device. Plaintiffs did not oppose dismissal of their breach of contract claims.

After GM's motion to dismiss was denied **[*3]** in part, Plaintiffs' counsel initiated another lawsuit involving similar allegations but different diesel vehicles and naming GM as a Defendant. *In re Duramax Litigation*, Case No. 17-cv-11661. That complaint also named Bosch, a German company, as a Defendant and alleged that certain electronic devices supplied by Bosch to GM enabled the defeat devices.

A series of discovery motions were addressed in *Counts*, substantial discovery was exchanged, and the scheduling order was modified. On February 20, 2018, GM and Bosch's motions to dismiss were denied in the *Duramax* case. *298 F. Supp. 3d 1037*. The Court concluded that Plaintiffs had plausibly stated a *Racketeer Influenced and Corrupt Organizations Act* (RICO) claim against both GM and Bosch. *Id.*; *18 U.S.C. § 1961 et seq.*

On April 6, 2018, Plaintiffs filed a motion for leave to file an amended complaint. ECF No. 82. In Plaintiffs' proposed first amended complaint, they sought to join Robert Bosch GmbH and Robert Bosch LLC (collectively, "Bosch") as Defendants, add a RICO claim against all three Defendants, and add Bosch as Defendants to Plaintiffs' state law claims. In opposing that motion, GM argued that Plaintiffs had actual or constructive notice **[*4]** of Bosch's involvement with GM's diesel vehicle production since at least the filing of the complaint in the *Duramax* litigation and concluded, apparently, that there was no basis to include Bosch as a Defendant. GM argued that Plaintiffs' true motivation behind amending the complaint was the Court's denial of GM's (and Bosch's) motion to dismiss a similar RICO claim in the *Duramax* litigation. GM argued that this "wait-and-see" approach is disfavored and should not be rewarded. Finally, GM argued that allowing the amendment would prejudice GM by substantially delaying the resolution of the case and dramatically altering the "landscape of the litigation." Def. Resp. Br. at 18, ECF No. 86.

The Court granted the motion to amend and to join Bosch. ECF No. 93. The Court found that the delay in filing the motion was reasonable because Plaintiffs sought to include corroborating information learned during discovery which they believed would strengthen and particularize their allegations against Bosch. Those allegations were predicated on internal and confidential material from GM and Bosch which would not have been available to Plaintiffs prior to discovery. Similarly, the Court found that it **[*5]** was reasonable for Plaintiffs to await the Court's decision in *Duramax* regarding the viability of the RICO claims before seeking leave to amend, because that approach conserved judicial resources rather than wasting them. Finally, the Court found that granting leave to amend would cause no prejudice to Defendants, other than the "prejudice" that is inherent in defending complex commercial litigation. On June 11, 2018, Plaintiffs filed their First Amended Class Action Complaint ("amended complaint"). ECF Nos. 94-95.

Defendant Bosch now moves pursuant to *Federal Rules of Civil Procedure 9(b)*, *12(b)(1)*, and *12(b)(6)* for dismissal of the amended complaint. ECF No. 108. Defendant GM filed a notice of joinder/concurrence in the motion. ECF No. 109. In the motion, Bosch argues that Plaintiffs fail to allege: 1) that their injuries were "by reason of" a RICO violation by Bosch; 2) that they suffered a cognizable RICO injury; 3) that Bosch engaged in a pattern of racketeering activity; 4) that Bosch participated in the conduct of a RICO enterprise; and 5) the existence of a conspiracy to violate RICO. Plaintiffs contend that the Court has already rejected these arguments in *Duramax*. Bosch responds that it does not seek to relitigate the Court's **[*6]** holding in *Duramax*, but rather seeks to "address deficiencies with Plaintiffs' complaint that were either not before the Court when it decided those earlier motions or that were not fully addressed in those proceedings." Mot. at 1, ECF No. 108. Moreover, Bosch argues that the "law of the case" doctrine does not apply because the Court has not yet addressed the viability of Plaintiffs' RICO claims in this case.

I.

A.

HN1[] Under *Rule 12(b)(1)*, a party may assert lack of subject-matter jurisdiction as a defense. "A *Rule 12(b)(1)* motion for lack of subject matter jurisdiction can challenge the sufficiency of the pleading itself (facial attack) or the factual existence of subject matter jurisdiction (factual attack)." *Cartwright v. Garner, 751 F.3d 752, 759 (6th Cir. 2014)* (citing *United States v. Ritchie*, 15 F.3d 592, 598 (6th Cir.1994)). "A facial attack goes to the question of whether the plaintiff has alleged a basis for subject matter jurisdiction, and the court takes the allegations of the complaint as true for purposes of *Rule 12(b)(1)* analysis." *Id.* However, a "factual attack challenges the factual existence of subject matter jurisdiction." *Id.* In that case, "the district court has broad discretion over what evidence to consider and may look outside the pleadings to determine whether subject-matter jurisdiction exists." *Adkisson v. Jacobs Eng'g Grp., Inc., 790 F.3d 641, 647 (6th Cir. 2015)*. Regardless, "the **[*7]** plaintiff bears the burden of proving that jurisdiction exists." *DLX, Inc. v. Kentucky, 381 F.3d 511, 516 (6th Cir. 2004)*.

B.

HN2[] A pleading fails to state a claim under *Rule 12(b)(6)* if it does not contain allegations that support recovery under any recognizable legal theory. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. In considering a *Rule 12(b)(6)* motion, the Court construes the pleading in the non-movant's favor and accepts the allegations of facts therein as true. *See Lambert, 517 F.3d at 439*. The pleader need not provide "detailed factual allegations" to survive dismissal, but the "obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In essence, the pleading "must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face" and "the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions." *Iqbal, 556 U.S. at 678-79* (quotations and citation omitted).

C.

HN3[] *Federal Rule of Civil Procedure 9(b)* provides a heightened pleading standard for claims of fraud. "In alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake. Malice, intent, knowledge, and other conditions of a person's mind may be **[*8]** alleged generally." *Id.* As explained by the Sixth Circuit in *Frank v. Dana Corp. 547 F.3d 564 (6th Cir. 2008)*, claims of fraud must meet the following requirements: "(1) specify the statements that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent." *Id. at 569* (citation omitted). At a minimum, a claimant must allege "the time, place and contents" of the alleged fraud. *Id.*

D.

HN4[] The Racketeer Influenced and Corrupt Organizations Act establishes bases for both criminal and civil suits. A RICO civil suit may be brought by "[a]ny person injured in his business or property by reason of a violation of section 1962 of this chapter." 18 U.S.C. § 1964(c). Section 1962 provides that: "It shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt." *Id.* at § 1962(c). In other words, a party advancing a civil RICO claim must establish their right to sue and then further allege the following elements: "'(1) conduct (2) of an enterprise **[*9]** (3) through a pattern (4) of racketeering activity.'" *Heinrich v. Waiting Angels Adoption Servs., Inc., 668 F.3d 393, 404 (6th Cir. 2012)* (quoting *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 496, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985))*.

II.

As Bosch correctly underscores, the doctrine of the law of the case does not apply to Plaintiffs' RICO claim because the Court addressed the viability of the RICO claim in *Duramax*, and not in this case. Bosch suggests that this Court's opinion in *Duramax*, much like any other district court precedent, only constitutes persuasive (not controlling) authority. This too is true. As a practical matter, however, this case is a companion case to *Duramax*, and arises out of substantially similar facts. Moreover, the Court's opinion on the viability of a RICO claim in this context has not changed since February of this year when the Court denied GM and Bosch's motion to dismiss the *Duramax* plaintiffs' RICO claim. Thus, absent a change in applicable law, a novel argument, or a meaningful factual distinction between the allegations in *Duramax* and the allegations in the present case, the result will be the same.

A.

Bosch argues that Plaintiffs fail to allege that they suffered a cognizable RICO injury.[1] Plaintiffs may assert a RICO claim only if they can identify an injury to their "business or property by reason of a violation of **[*10]** section 1962." 18 U.S.C. § 1964(c). In so limiting the scope of RICO standing, Congress exhibited an intention to exclude "personal injury—that is, an injury 'to a person, such as a broken bone, a cut, or a bruise' or a 'bodily injury.'" *Jackson v. Sedgwick Claims Mgmt. Servs., Inc., 731 F.3d 556, 564 (6th Cir. 2013)* (quoting Black's Law Dictionary 857 (9th ed. 2009)). Similarly, a RICO injury must be concrete, not intangible or speculative. *See Saro v. Brown, 11 F. App'x 387, 389 (6th Cir. 2001)*; *see also Fleischhauer v. Feltner, 879 F.2d 1290, 1299 (6th Cir. 1989)* (explaining that RICO plaintiffs must identify a "reasonable and principled basis of recovery" which is "not based upon mere speculation and surmise"); *Short v. Janssen Pharm., Inc., No. 1:14-CV-1025, 2015 U.S. Dist. LEXIS 61123, 2015 WL 2201713, at *3 (W.D. Mich. May 11, 2015)* ("Short must, at a minimum, show some direct, pecuniary injury to his own pocket that is unrelated to the claimed personal injury.").

In *Reiter v. Sonotone Corp.*, the Supreme Court interpreted § 4 of the Clayton Act, which authorizes "[a]ny person who shall be injured in his business or property" by reason of an ***antitrust law*** violation to bring suit. *442 U.S. 330, 337, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*. The Supreme Court held that "where petitioner alleges a wrongful deprivation of her money because the price of the hearing aid she bought was artificially inflated by reason of respondents' anticompetitive conduct, she has alleged an injury in her 'property' under § 4." *Id. at 342*. That holding did not involve the RICO **[*11]** statute, but the Sixth Circuit has held that "Reiter's common-sense observation about § 4 applies with equal logical force to § 1964(c)." *Jackson, 731 F.3d at 564*.

---

[1] The Court will discuss Defendant's arguments in a different order than they were presented. It seems intuitive to first discuss whether Plaintiffs have alleged a cognizable RICO injury, then discuss whether Plaintiffs have alleged a RICO violation (i.e. whether Bosch engaged in a pattern of racketeering activity; whether Bosch participated in the conduct of a RICO enterprise; whether there was a conspiracy to violate RICO). Finally, the Court will discuss whether Plaintiffs have sufficiently alleged a causal connection between the violation and the injury.

Bosch takes issue with the three types of injuries identified by Plaintiffs: 1) "future attempted repairs, future additional costs, decreased performance of the vehicle, and diminished value of the vehicle," 2) harm caused from "unwittingly driv[ing] vehicles that were polluting in volumes and manners a reasonable consumer would not expect," and 3) "[o]verpayment for [Subject] Vehicles" because the "price for the vehicles was artificially inflated" by a "diesel premium of $2,400." Mot. at 19 (citing Compl. ¶¶ 28-37, 219, 284). With respect to future attempted repairs, future costs, and diminished future performance or value, this Court held in *Duramax* that such injuries are too speculative to constitute a cognizable RICO injury. *In re Duramax Diesel Litig., 298 F. Supp. 3d 1037, 1071 (E.D. Mich. 2018)*. With respect to "unwittingly driv[ing]" polluting vehicles, this Court previously held (in *Counts*) in its order granting GM's motion to dismiss in part that such environmental harms are insufficient to support Article III standing under *Lujan v. Defs. of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351(1992)*. Order at 10, ECF No. 21. This Court did hold in *Duramax*, however, that overpayment for the vehicles **[*12]** constitutes a cognizable RICO injury:

> Plaintiffs' first alleged injury clearly suffices to create RICO standing. Plaintiffs contend that they "paid a premium of nearly $9,000, as GM charged more for its Duramax engine than a comparable gas car." Con. Am. Compl. at 115. Plaintiffs thus identify a specific payment attributable directly to the vehicle component at issue which they opted to purchase on the basis of fraudulent conduct. This is cognizable out-of-pocket injury: "[T]he price of the [Duramax engine-equipped vehicle which Plaintiffs] bought was artificially inflated by reason of [Defendants' fraudulent] conduct." *Reiter, 442 U.S. at 342*. *See also* *Jackson, 731 F.3d at 564*; *Canyon Cty. v. Syngenta Seeds, Inc., 519 F.3d 969, 976 (9th Cir. 2008)*. Accepting Plaintiffs' allegations as true, the fraud (and thus overcharge) occurred at the time the purchase was made. *See* *Bailey, 992 F. Supp. 2d at 579*. Unlike in *Bridgestone* (where only some tires exhibited the defect), the alleged injury occurred every time a Duramax vehicle was purchased. The amount by which Plaintiffs overpaid is not contingent on a future occurrence or on the vagaries of the free market. It occurred and became determinable at the moment the Plaintiffs paid a premium for a vehicle component which did not work as had been represented. Plaintiffs experienced a **[*13]** financial property loss at that moment, which distinguishes the present case from others where the overpayment or diminution in value had not yet occurred. *Compare* *Bridgestone, 155 F. Supp. 2d at 1093 & n.26*; *Gelt, 27 F.3d at 769*, with *Bailey, 992 F. Supp 2d at 580-81*. This is a cognizable RICO injury.

Duramax, 298 F. Supp. 3d at 1071.

Similarly, Plaintiffs in this case allege that they paid a diesel premium of $2,400 because the price of the vehicle was inflated by Defendants' fraudulent conduct (conduct which will be discussed below). Compl. ¶ 284. Bosch nevertheless asks the Court to revisit its holding, citing to the *Ignition Switch* litigation. Mot. at 21 (citing *See* *Ignition Switch, 2016 U.S. Dist. LEXIS 92499, 2016 WL 3920353, at *7, 16)*. As noted in the *Duramax* opinion, the *Ignition Switch* opinion does appear to support a conclusion contrary to the conclusion reached by this Court. This Court nevertheless rejected the *Ignition Switch* litigation, as explained fully in *Duramax. Duramax, 298 F. Supp. 3d at 1072*. That explanation still obtains. Notably, the *Ignition Switch* is an unreported district court opinion from another circuit which relied heavily on the Second Circuit's opinion in *McLaughlin v. American Tobacco Co., 522 F.3d 215 (2d Cir. 2008)*.

Recently, two other district courts have rejected the injury analysis in both *Ignition Switch* and *Mclaughlin* and have held that overpayment due to deceptive conduct may constitute a RICO injury. *See* *In re Chrysler-Dodge-Jeep EcoDiesel Mktg., Sales Practices & Prods. Liab. Litig., 295 F. Supp. 3d 927, 959 (N.D. Cal. 2018)* (rejecting the defendants' **[*14]** reliance on *Ignition Switch* and *Mclaughlin* and noting that "when a plaintiff alleges that he or she overpaid for a good or service because of anticompetitive or deceptive conduct, the Supreme Court's decision in *Reiter* and the Ninth Circuit's decision in *Canyon County* support that such an injury is one to property not merely expectation interests. Those decisions bind this Court; *McLaughlin* and [*Ignition Switch*] do not.") (internal citations and quotations omitted); *Nemet v. Volkswagen Group of America, Inc., No. 3:17-cv-04372-CRB, Dkt. No. 5374, 349 F. Supp. 3d 881, 2018 U.S. Dist. LEXIS 171598 (N.D. Cal.)* ("Bosch relies on certain out-of-circuit decisions in which courts have held that when consumers do not receive the benefit of their bargain the injury they suffer is one to their expectation interests, not to their business or property as RICO requires . . . As the district court in *Chrysler* recently noted, the Supreme Court's decision in *Reiter* and the Ninth Circuit's decision in *Canyon County* support the opposite: that when a plaintiff alleges that he or she overpaid for a good or service because of anticompetitive or deceptive conduct, . . . such an injury is one to property, not merely expectation interests. The Court therefore **[*15]** does not follow *McLaughlin* and [*Ignition Switch*] here.") (internal citations and quotations omitted).

Finally, Bosch takes issue with the overpayment theory by identifying what they suggest is an internal inconsistency in the *Duramax* opinion:

> This Court in Duramax found that "overpayment" for the "vehicle component at issue" conferred RICO standing. See *298 F. Supp. 3d at 1071-72*. But, in considering a related theory of RICO injury, the Court also noted that the Duramax plaintiffs' "contention that they 'would have paid substantially less' [for their vehicles had they known of the higher emissions] appears to be premised on some approximation of what the new market value for the vehicles would have been" and that "[d]etermining what that decrease in value would have been seems hopelessly speculative." *Id. at 1071* (emphasis added). Plaintiffs' "overpayment" theory requires the same speculation, because it too is nothing more than a claim that Plaintiffs "would have paid substantially less" for the Subject Vehicles under different circumstances. See Compl. ¶ 284 ("Plaintiffs would not have paid a diesel premium of $2,400, if proper disclosures had been made."). Nor is the speculation rendered concrete by attaching the $2,400 **[*16]** number to it, because the $2,400 figure is itself the product of Plaintiffs' speculation. Plaintiffs declare $2,400 to be the price difference between a "diesel Cruze" and a "comparable gas car," Compl. ¶ 217, but they also concede - as they must - that there are many differences between diesel and gas vehicles other than NOx emissions: "diesel engines generally produce greater torque, low-end power, better drivability, and much higher fuel efficiency" than gasoline engines, id. ¶ 4. Plaintiffs thus fail to allege a supposed "diesel premium" attributable to NOx emissions performance, the subject of the claimed fraud.

Mot. at 21-22. Contrary to Bosch's assertion, the allegation that GM charged an artificially inflated premium for the vehicles is distinct from Plaintiffs allegation that they "would have paid substantially less" for the vehicles had they known of the alleged defeat device. The reason the Court found that the former allegation was sufficiently concrete was not because the Plaintiffs attached a specific dollar amount to it ($9,000 in *Duramax*, and $2,400 in this case). Rather, the former allegation is more concrete because it is not premised on Plaintiffs' subjective willingness **[*17]** to pay or on the hypothetical new market value for a "dirty" diesel engine (the product as allegedly delivered) as opposed to a "clean" diesel engine (allegedly a non-existent product). Rather, it is premised on a premium that *GM itself* allegedly charged for a diesel engine knowing that it would not perform as represented. This is a cognizable RICO injury.

B.

Bosch contends that Plaintiffs fail to allege that Bosch engaged in a pattern of racketeering activity. Pursuant to *§ 1961(5)*, a "'pattern of racketeering activity' requires at least two acts of racketeering activity, one of which occurred after the effective date of this chapter and the last of which occurred within ten years (excluding any period of imprisonment) after the commission of a prior act of racketeering activity." Plaintiffs must allege that each Defendant engaged in two predicate acts of racketeering activity. *See Kerrigan v. ViSalus, Inc., 112 F.Supp.3d 580, 605 (E.D. Mich. 2015)*. *See also Crest Const. II, Inc. v. Doe, 660 F.3d 346, 358 (8th Cir. 2011)*; *Guaranteed Rate, Inc. v. Barr, 912 F.Supp.2d 671, 684 (N.D. Ill. 2012)*.

Here, as in *Duramax*, the Plaintiffs alleged predicate acts of mail and wire fraud. As the Court noted in *Duramax*,

> ***HN5***[] To state a claim based on mail or wire fraud, the Plaintiffs must allege the following three elements: "(1) devising or intending to devise a scheme to defraud (or to perform specified fraudulent **[*18]** acts); (2) involving a use of the mails; and (3) for the purpose of executing the scheme or attempting to do so. *United States v. Kennedy, 714 F.3d 951, 958 (6th Cir. 2013)* (quoting *United States v. Frost, 125 F.3d 346, 354 (6th Cir.1997))*. The Plaintiffs must allege that Defendants possessed the "specific intent to deceive or defraud." *Frost, 125 F.3d at 354*. The "scheme to defraud must involve 'misrepresentations or omissions reasonably calculated to deceive persons of ordinary prudence and comprehension.'" *Bender v. Southland Corp., 749 F.2d 1205, 1216 (6th Cir. 1984)* (quoting *United States v. Van Dyke, 605 F.2d 220, 225 (6th Cir. 1979))*. The

> Plaintiffs need not show "actual reliance," but the Plaintiffs must demonstrate that the misrepresentations or omissions were "material." *United States v. Daniel, 329 F.3d 480, 487 (6th Cir. 2003)*. Specific intent to defraud or deceive exists if "the defendant by material misrepresentations intends the victim to accept a substantial risk that otherwise would not have been taken." *Id. at 488*.
>
> ***HN6***[] Importantly, "[a] defendant may commit mail fraud even if he personally has not used the mails." *Frost, 125 F.3d at 354* (citing *United States v. Griffith, 17 F.3d 865, 874 (6th Cir.1994))*. "A mail fraud conviction requires only a showing that the defendant acted with knowledge that use of the mails would follow in the ordinary course of business, or that a reasonable person would have foreseen use of the mails." *Id.* In other words, there is no requirement that the defendant have actually intended that the mails (or wire) be used. *Id.* And, further, "'[t]he **[*19]** mailings may be innocent or even legally necessary.'" *Id.*(quoting *United States v. Oldfield, 859 F.2d 392, 400 (6th Cir. 1988))*. The use of the mails "'need only be closely related to the scheme and reasonably foreseeable as a result of the defendant's actions.'" *Id.* (quoting *Oldfield, 859 F.2d at 400*).
>
> ***HN7***[] "When pleading predicate acts of mail or wire fraud, in order to satisfy the heightened pleading requirements of *Rule 9(b)*, a plaintiff must '(1) specify the statements that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent.'" *Heinrich, 668 F.3d at 404* (quoting *Frank v. Dana Corp., 547 F.3d 564, 570 (6th Cir. 2008))*.

In re Duramax Diesel Litig., 298 F. Supp. 3d 1037, 1083 (E.D. Mich. 2018).

Bosch argues that Plaintiffs have alleged no facts that allow the Court to infer that Bosch specifically intended to defraud them. Mot. at 23. Rather, Bosch contends that Plaintiffs have offered nothing more than conclusions and unfounded allegations. Mot. at 23-24. To the contrary, Plaintiffs allege that Bosch "actively participated in the development of the defeat device." Am. Compl. ¶ 165, ECF No. 94. Plaintiffs allege that the EDC17 "controls every parameter that is important for effective, low-emission combustion." *Id.* ¶ 167. Plaintiffs further allege that the EDC17 is equipped with a defeat device, that Bosch "exerts near-total **[*20]** control" over the EDC17, and that the EDC17 is designed "to prevent customers, like GM, from making significant changes on their own." Compl. ¶¶ 147, 248.

Bosch contends that its alleged act of supplying the EDC17 for the subject vehicles is insufficient to raise an inference that Bosch had the specific intent to defraud Plaintiffs, because the EDC17 or similar device is present in every modern automobile engine. Mot. at 24-25 (quoting *In re Volkswagen "Clean Diesel" Mktg., Sales Practices, & Prods. Liab. Litig, MDL No. 2672, 2017 U.S. Dist. LEXIS 179652, 2017 WL 4890594, at *2 (N.D. Cal. Oct. 30, 2017)* ("***The EDC17 is not inherently a tool for deceit***; it is widely used by automakers that operate modern diesel engines.") (emphasis in original). Simply put, every modern vehicle may indeed have an EDC17 or a similar system, but not all EDC17's are necessarily designed and equipped with defeat devices, as is alleged here. As this Court noted in *Duramax*, Bosch's specific intent to defraud customers "can be inferred from the nature of the alleged conduct. The way in which EDC17 interacted with the Duramax engine is inherently deceptive. The alleged purpose of the device is to provide the perception of reduced emissions while avoiding the reality of reduced emissions." *Duramax, 298 F. Supp. 3d at 1083*.

Bosch contends that "unlike in *Duramax*, Plaintiffs here **[*21]** allege only scant facts about how the alleged 'defeat device works,' and none that supports the conclusory assertion that Bosch LLC *knew* that the Subject Vehicles contained these unspecified defeat devices." Mot. at 25 (emphasis in original). Bosch underscores paragraphs 126-148 of the *Duramax* complaint, in which the plaintiffs set forth details concerning testing that was performed on the subject vehicles. Bosch contends that no such details are present here. Those allegations were unnecessary to sustain the plaintiffs' RICO claim in *Duramax*, and indeed were entirely absent from the Court's discussion of predicate acts of racketeering activity. Thus, their absence from the current amended complaint is of no significance. The allegations set forth above are sufficient to raise an inference that Bosch knew that the subject vehicles contained the defeat devices. The amended complaint alleges that Bosch designed the EDC17 containing the defeat device and had exclusive control thereof. *See* Am. Compl. ¶¶ 148, 165, 167, 248. As stated in *Duramax*, "Defendants cannot reasonably argue that the deceptive nature of EDC17 was unanticipated or unintended, and even if they do, that argument should **[*22]** be resolved only by a jury. Plaintiffs have plausibly alleged that the purpose of EDC17 was deception, and so Defendants' protestations that it has an innocent and lawful purpose are non-cognizable at the pleading stage." *Duramax, 298 F. Supp. 3d at 1083*.

Bosch also argues that Plaintiffs have failed to allege the predicate acts of mail or wire fraud because Plaintiffs have identified no actionable misrepresentation or omission by Bosch. Bosch argues that, in order to proceed under an omission theory, Plaintiffs must allege the existence of an independent legal duty to disclose information. In *Duramax*, the Court surveyed the applicable authority and found no such requirement. *Id. at 1085*. Although the defendants did identify some non-controlling precedent in support of their position that a fraudulent omission theory requires an independent duty to disclose, the Court concluded that the more recent and better reasoned cases supported the opposite conclusion. *Id.* That conclusion still obtains.

Bosch now cites to *Jamieson*, which Bosch contends conclusively establishes that fraud by omission requires an affirmative duty to disclose information. Mot. at 28 (citing *United States v. Jamieson, 427 F.3d 394, 415 (6th Cir. 2005)* (reviewing conviction for conspiracy to commit mail fraud). Not so. **[*23]** In fact, the Sixth Circuit rejected Jamieson's contention that the trial court should have instructed the jury concerning a "duty to disclose." *United States v. Jamieson, 427 F.3d at 415* ("*Even if* the trial court's refusal to give the 'duty to disclose' instruction was error, the error must be considered harmless.") (emphasis added). Thus, the Sixth Circuit did not affirmatively state that the failure to give the "duty to disclose" instruction was erroneous. In fact, the Sixth Circuit shied away from doing so (perhaps due to the lack of precedent on point, as this Court noted in *Duramax*).

The Sixth Circuit found that the district court's instruction "adequately guards against the jury finding that a simple omission, independent of any other statements encouraging trust and confidence in the defendant, can constitute fraud." *Id.* This dicta suggests that, in the Sixth Circuit's opinion, a "simple omission" on its own cannot constitute fraud. Contrary to Bosch's contention, however, this dicta does not rise to the level of a "holding" that "something more than a 'simple omission' is required before that omission is actionable as mail or wire fraud." Mot. at 28. No such holding is present in *Jamieson*, and even the dicta in *Jamieson* ***[*24]*** is unsupported by any citation to controlling law.

Even if such a holding could be derived from *Jamieson*, it would not warrant a conclusion contrary to the one reached in *Duramax*. The "simple omission" alleged in this case is not "independent of any other statements encouraging trust and confidence in the defendant." *Jamieson, 427 F.3d at 415*. Rather, the factual predicates giving rise to the scheme to defraud include affirmative misrepresentations concerning the operation of the emissions technology, the importance of which was explained in *Duramax*:

> If Plaintiffs were relying on these advertisements as the basis for its claim of fraud, then Defendants' arguments regarding puffery and duty to disclose would become relevant. However, these representations do not constitute the fraudulent scheme; they merely further it. The level of emissions produced by a diesel engine was a material consideration for consumers purchasing a vehicle. GM's extensive advertising which emphasized the low emissions and environmentally-friendly nature of its "clean diesel" engine underscores its understanding of that fact. Thus, regardless of whether these advertisements would be actionable on their own, they were material to the scheme. **[*25]** The advertisements urged consumers to buy Duramax vehicles *because* they were environmentally friendly even though the Defendants had purposefully worked together to obfuscate the true level of emissions. Plaintiffs have specifically identified a number of communications that were "reasonably calculated to deceive persons of ordinary prudence and comprehension." The communications themselves may not have been demonstrably fraudulent, but they were intended to increase the likelihood that consumers would purchase Duramax vehicles because they produced emissions at a low level, when in fact the true level of emissions was much higher. The nondisclosure of the true operation of the Duramax engine was material precisely because GM worked so hard to convince consumers that it was a "clean diesel" engine.

Duramax, 298 F. Supp. 3d at 1084.

Here, Plaintiffs allege that the EDC17 is equipped with a defeat device, that Bosch "exerts near-total control" over the EDC17, and that the EDC17 was designed "to prevent customers, like GM, from making significant changes on their own." Compl. ¶¶ 147, 248. Plaintiffs also allege that Bosch and GM worked together to develop and implement a specific set of software algorithms in the Affected **[*26]** Vehicles to reduce emissions in testing environments but not on the road. *Id.* ¶ 158.Bosch also allegedly engaged in marketing and lobbying efforts in the United States to get regulators to approve "clean diesel." ¶ 42. *Id.* Bosch allegedly took these actions with knowledge of the engine's true operation, and under circumstances where its alleged coconspirator had actively marketed the engine's emissions reduction capability. For the same reasons discussed in *Duramax* and above, these constitute sufficient predicate acts to give rise to RICO liability.

C.

Additionally, Bosch argues that Plaintiffs do not plead a plausible claim that Bosch participated in the conduct of the alleged enterprise by either "making decisions on behalf of the enterprise or by knowingly carrying them out." Mot. at 30-31 (citing *Duramax, 298 F. Supp. 3d at 1086*).

In *Reves v. Ernst & Young*, the Supreme Court addressed the requirement that a RICO defendant "conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs." *507 U.S. 170, 179, 113 S.Ct. 1163, 122 L.Ed.2d 525 (1993)* (quoting*§ 1962(c)*). The Court explained:

> Once we understand the word "conduct" to require some degree of direction and the word "participate" to require some part in that direction, the meaning of *§ 1962(c)* comes into **[*27]** focus. In order to "participate, directly or indirectly, in the conduct of such enterprise's affairs," one must have some part in directing those affairs. Of course, the word "participate" makes clear that RICO liability is not limited to those with primary responsibility for the enterprise's affairs, just as the phrase "directly or indirectly" makes clear that RICO liability is not limited to those with a formal position in the enterprise, but some part in directing the enterprise's affairs is required.
>
> *Id.*
>
> "[L]iability [under *§ 1962(c)*] depends on showing that the defendants conducted or participated in the conduct of the "*enterprise's* affairs," not just their *own* affairs." *Id. at 185, 113 S.Ct. 1163*. "Although *Reves* does not explain what it means to have some part in directing the enterprise's affairs, subsequent decisions from our sister circuits have persuasively explained that it can be accomplished either by making decisions on behalf of the enterprise or by knowingly carrying them out." *United States v. Fowler, 535 F.3d 408, 418 (6th Cir. 2008)*.

In *Duramax*, this Court concluded that the plaintiffs had adequately alleged that Bosch participated in the conduct of a RICO enterprise:

> Plaintiffs' allegations characterize EDC17 as performing an inherently deceptive function. **[*28]** Thus, the operation of EDC17 is the apparent heart of the fraudulent enterprise and, because Bosch bears primary responsibility for programming EDC17, it "knowingly carried...out" core aspects of the alleged enterprise.

Duramax, 298 F. Supp. 3d at 1087. The same allegations are present here concerning Bosch's primary responsibility for programming the EDC17, as detailed above. Accordingly, Plaintiffs' allegations are adequate. Bosch's argument for distinguishing *Duramax* is not persuasive. Bosch argues that:

> Unlike in Duramax, Plaintiffs have incorporated documents into the Complaint that demonstrate there was no fraudulent enterprise between GM and Bosch LLC. See Compl. ¶¶ 149-58. Such documents show nothing more than back-and-forth between manufacturer and supplier during an ongoing development process. See, e.g., Compl. ¶ 156 (citing GMCOUNTS000023551, an email chain in which a GM employee circulated an innocuous meeting agenda among GM and Bosch engineers). And as discussed above, intent cannot be inferred simply by supplying the EDC-17. Supra p. 24-25.

> Many months and tens of thousands of documents into discovery, Plaintiffs cannot cite even one document demonstrating that Bosch LLC knowingly carried out the supposed objectives **[*29]** of the alleged RICO enterprise. Unable to support their weighty allegations, Plaintiffs instead resort to a familiar and defective crutch: "information and belief." See Compl. ¶¶ 156 (referencing an unremarkable document but alleging "[o]n information and belief, discussions at these regular meetings included developing and concealing defeat devices for the [Subject] Vehicles."), 157 (similar, but alleging "[o]n information and belief, AECD disclosures drafted by Bosch GmbH and Bosch LLC were deceptive and false when submitted by GM to regulators.").

Id.

Bosch contends that the documents incorporated by reference in Plaintiffs' complaint "show nothing more than back-and-forth between manufacturer and supplier during an ongoing development process." Therefore, Bosch concludes that the documents "demonstrate that there was no fraudulent enterprise between GM and Bosch LLC." This conclusion does not follow. Failing to affirmatively demonstrate the alleged fraudulent enterprise does not establish the absence of a fraudulent enterprise.

Bosch criticizes Plaintiffs for failing to identify documentary evidence demonstrating Bosch's participation in the RICO enterprise after receiving tens of **[*30]** thousands of documents from Defendants. Bosch overlooks the procedural posture of this case. Plaintiffs are under no obligation at the pleading stage to identify documentary evidence substantiating their claims. The fact that they attempted to do so, successfully or not, is not fatal to their claims, nor does their attempt to do so create an obligation that did not otherwise exist. Bosch contends that "at this stage of the case, Plaintiffs can no longer claim that 'the relevant facts lie exclusively within the knowledge and control of' GM and Bosch LLC." Mot. at 32. The implication is that Plaintiffs should face a higher pleading burden at this stage because they have had the benefit of discovery before filing an amended complaint. Neither *Rule 8(a)* nor *9(b)* makes such a distinction.

Moreover, this documentary evidence is not properly before the Court's consideration on a 12(b)(6) motion.[2] ***HN8***[] A court generally cannot look beyond the face of the Plaintiff's complaint when adjudicating a motion to dismiss for failure to state a claim unless the court converts the motion into a motion for summary judgment after proper notice is given to the parties. However, a district court can consider such documents **[*31]** without converting the motion into one for summary judgment where two conditions are met: 1) the documents are referred to in the complaint, and 2) are central to the claims contained therein. *Gavitt v. Born, 835 F.3d 623, 640 (6th Cir. 2016)*.

Here, the documents are referred to in the complaint. However, Bosch offers no explanation as to how "an email chain in which a GM employee circulated an innocuous meeting agenda among GM and Bosch engineers" is central to Plaintiffs' claim. In fact, Bosch's characterization of the document cuts the opposite way, suggesting that it has no evidentiary value at all. That document, though potentially illustrative of some alleged communication between GM and Bosch, is by no means central to Plaintiffs' claim that Bosch participated in the conduct of a RICO enterprise. Plaintiffs' claim does not rise or fall based on that alleged correspondence. Rather, the salient allegations are those discussed above concerning Bosch's role in programming the EDC17, the device at the heart of the fraudulent enterprise. *See Duramax, 298 F. Supp. 3d at 1087*.[3]

Before addressing the remaining arguments advanced by the motion to dismiss, it is worth emphasizing a point made by Bosch in opposing their joinder and now criticizing Plaintiffs' information **[*32]** and belief pleading. *Rule 8(a)* and, in this circumstance, *rule 9(b)* are not the only rules governing the pleadings. Pursuant to *Federal Rule of Civil Procedure 11(b)*, by presenting a pleading to the Court Plaintiffs are certifying that to the best of their "knowledge, information, and belief, formed *after an inquiry reasonable under the circumstances* . . . the factual

[2] If the current evidentiary record affirmatively disproves the Plaintiffs' claims, as Bosch contends, Bosch presumably would not hesitate to move for summary judgment.

[3] Bosch also argues briefly that Plaintiffs fail to plead the existence of a RICO conspiracy because they fail to plead intent or a substantive RICO violation. Because the Court disagrees with Bosch's conclusions on those two points (as discussed above), the Court also disagrees with Bosch's conclusion as to the RICO conspiracy.

contentions have *evidentiary* support." (emphasis added). Of course, the rule applies with equal force to "the denial of factual contentions." *Fed. R. Civ. P. 11(b)(4)*. Because Plaintiffs have the benefit of substantial discovery that was previously only available to General Motors, their duty of inquiry extends to that discovery. It is reasonable to expect a thorough review of the discovery furnished thus far and that the amended complaint reflects a candid appraisal of the evidentiary basis for the allegations. To the extent Plaintiffs are being cavalier with their "information and belief" pleading solely to survive the 12(b)(6) motion, they risk sanctions. *See* *Fed. R. Civ. P. 11(c)*.

D.

Bosch argues that Plaintiffs fail to allege that their injuries were "by reason of" a RICO violation. Mot. at 10 (quoting 19 U.S.C. 1964(c)). The RICO proximate causation analysis is closely related to (even subsumed in) the statutory standing analysis. **[*33]** The Supreme Court has "held that a plaintiff's right to sue...required a showing that the defendant's violation not only was a 'but for' cause of his injury but, was the proximate cause as well." *Holmes, 503 U.S. at 268, 112 S.Ct. 1311*. The plaintiff must show "some direct relation between the injury asserted and the injurious conduct alleged." *Id.* Importantly, the causation inquiry must focus on the alleged link between the "predicate acts" and the asserted injury. Plaintiffs must show that each defendant's wrongful conduct was a "substantial and foreseeable cause of the injury and the relationship between the wrongful conduct and the injury is logical and not speculative." *In re ClassicStar Mare Lease Litig., 727 F.3d 473, 487 (6th Cir. 2013)* (quotations omitted).

In *Duramax*, this Court held as follows:

> Plaintiffs have plausibly alleged that Bosch's joint activities with GM were a substantial factor contributing to their injury. EDC17 is the means by which Plaintiffs were injured. According to Plaintiffs, Bosch 'exerts near-total control' over the customization of EDC17, eliminating the possibility that GM programmed the functionality which enables use of defeat devices without Bosch's knowledge. *See* Con. Am. Compl. at 94-95. Plaintiffs thus plausibly allege that Bosch developed the vehicle **[*34]** component which has caused Plaintiffs' injury, that Bosch was aware of the deception that component would inevitably contribute to, and that Bosch was aware that consumers would pay a premium for vehicle capabilities that the component would not deliver.

Duramax, 298 F. Supp. 3d at 1076. Similarly, Plaintiffs in this case allege that Bosch "actively participated in the development of the defeat device." Compl. ¶ 165, ECF No. 94. Specifically, Plaintiffs allege that the EDC17 "controls every parameter that is important for effective, low-emission combustion." *Id.* ¶ 167. Plaintiffs further allege that the EDC17 is equipped with a defeat device, that Bosch "exerts near-total control" over the EDC17, and that the EDC17 is designed "to prevent customers, like GM, from making significant changes on their own." Compl. ¶¶ 147, 248. Plaintiffs have sufficiently alleged that Bosch's programming of the EDC17 was a substantial and foreseeable cause of their injury.

Bosch argues as follows in its motion to dismiss:

> This Court in Duramax sustained plaintiffs' RICO claim on the understanding that it was "not primarily premised on proof of violation of EPA regulations" and that "alleg[ations] that the [defendants] intended to deceive **[*35]** regulators" were not essential to the plaintiffs' RICO claim. *See* *298 F. Supp. 3d at 1088*. That premise is not viable here, and for that reason the RICO claims here fail. The Complaint makes clear that the allegations regarding EPA and CARB are central to the claim and that the EPA and CARB are the "direct victims." *See* Compl. ¶¶ 160-61. ("[I]n order ***to obtain the COCs necessary to sell their vehicles, GM*** did not disclose, and ***affirmatively concealed from government regulators***, the presence of the test-detecting and performance-altering software code that it developed with Bosch . . . . ***Because the COCs were fraudulently obtained*** . . . **the [Subject] Vehicles** were never covered by a valid COC, ***and thus were never legal for sale***.") (emphasis added), 163 ("GM hid . . . facts from the EPA, CARB and other state regulators, and consumers, and it continued to sell and lease the [Subject] Vehicles despite their ***illegality*** and with the complicity of Bosch"), 242 (The alleged enterprise's "direct purpose was ***to deceive the regulators*** and the public")

Mot. at 10-11. As Bosch acknowledged, this Court concluded in *Duramax* that the plaintiffs' RICO claim was not premised on proof of violation of EPA regulations. Bosch **[*36]** contends that "this premise is not viable here," however, due to certain allegations in Plaintiffs' complaint that supposedly demonstrate that the EPA and CARB, and not Plaintiffs, were the "direct victims" of any alleged RICO activity. Yet these identical allegations were also present in the complaint at issue in *Duramax*. Compl. ¶¶ 164-165, ECF No. 18 (Case No. 17-cv-11661). For the same reasons identified in *Duramax*, Plaintiffs' RICO claim in this case is not dependent on proof of a violation of EPA regulations.

Bosch's argument here is also somewhat out of place. The argument centers around alleged regulatory violations and their importance to sustaining Plaintiffs' RICO claims. Yet Bosch raises this discussion in section A of its brief, which purports to address causation. It is unclear how the two topics relate. In *Duramax*, the Court determined that the Plaintiffs' RICO claims were not dependent on proof of a regulatory violation. The Court made this determination in response to the defendants' argument that the EPA's extensive regulatory scheme provided the exclusive remedy to redress violations of the CAA, thereby precluding plaintiffs' RICO claim. The Court found that argument **[*37]** to be without merit, and to be largely coterminous with the defendants' argument that plaintiffs' state law claims are preempted by the CAA. The discussion in that opinion had nothing to do with causation.

Bosch now advances the same argument by raising it in the context of the causation requirement. Bosch suggests that Plaintiffs' allegations concerning fraud on the EPA and CARB somehow undermine the causal relationship between the RICO violation and Plaintiffs' injury. According to Bosch, those allegations demonstrate that the EPA and CARB are the "direct victims" of Bosch's conduct. Even if the EPA and CARB are direct victims, the conclusion Bosch reaches does not follow. There is no reason why Bosch's conduct cannot have multiple "direct victims," including EPA, CARB, and the Plaintiffs. Bosch's discussion is non-responsive to the allegations in the Complaint concerning the injuries sustained by Plaintiffs, not the EPA or CARB, and the causal connection between those injuries and the RICO violation.

As explained in *Duramax*,

> Plaintiffs' RICO claim is not primarily premised on proof of violation of EPA regulations and thus is cognizable. The alleged common purpose at the heart of the **[*38]** RICO scheme is the deception of consumers. The alleged injury is overpayment by consumers. The identified predicate acts of mail and wire fraud involve communications to consumers. Admittedly, Plaintiffs also allege that the RICO Defendants intended to deceive regulators and made fraudulent mail and wire communications to regulators. But neither of those allegations are essential to Plaintiffs' RICO claim. Accordingly, they are best construed as collateral matters that are only peripherally related to the regulatory concerns advanced by EPA regulations.

In re Duramax Diesel Litig., 298 F. Supp. 3d 1037, 1088 (E.D. Mich. 2018). In other words, the allegations concerning regulatory violations are collateral allegations which are unnecessary to sustain Plaintiffs' RICO claim. Bosch concludes that this is somehow fatal to Plaintiffs' RICO claim. This conclusion does not follow logically. When faced with a motion to dismiss under *rule 12(b)(6)*, the Court is to consider whether the Plaintiffs have pled *sufficient* facts to sustain their claim, not whether they have pled more facts than necessary.

III.

Accordingly, it is **ORDERED** that the motion to dismiss, ECF No. 108, is **DENIED**.

MEMORANDUM OF DECISION AND ORDER ON DEFENDANT'S MOTION TO DISMISS SECOND AMENDED COMPLAINT

DEIN, U.S.M.J.

I. INTRODUCTION

By Memorandum of Decision and Order (Docket No. 40) dated January 10, 2018, this court dismissed the plaintiffs' **[*2]** Amended Complaint without prejudice. Thereafter, plaintiffs were granted leave to and did file a Second Amended Complaint (Docket Nos. 49, 51). Defendant has now moved to dismiss the Second Amended Complaint pursuant to *Fed. R. Civ. P. 12(b)(6)* (Docket No. 54) (the "Motion to Dismiss"). Plaintiffs have opposed the Motion to Dismiss (Docket No. 59) ("Opp.") and defendant has filed a Reply (Docket No. 62). After oral argument on the Motion to Dismiss, the parties submitted supplemental letters to the court (Docket Nos. 71, 72) addressing questions raised at oral argument. The court has carefully considered the parties' submissions and arguments made in open court. For the reasons detailed herein, the Second Amended Complaint fails to state a claim on which relief can be granted. The Motion to Dismiss is therefore ALLOWED and the Second Amended Complaint is dismissed with prejudice.

II. STATEMENT OF FACTS[1]

Since the Second Amended Complaint is premised on and merely expands upon the allegations of the First Amended Complaint, this court will assume the reader's familiarity with its earlier decision and will not repeat the extensive factual history laid out therein. All of those facts remain relevant to the instant **[*3]** analysis. What follows is a brief overview of the facts and regulatory context for this Motion.

The defendant, Sanofi-Aventis US LLC ("Sanofi"), is a life sciences company that sells, among other medicines, Lantus — an insulin glargine solution used for management of diabetes. See SAC ¶ 3. Lantus is sold in vial form or, as particularly relevant here, in an injector pen known as Lantus SoloSTAR. Id. Plaintiffs, FWK Holdings, LLC and Cesar Castillo, Inc., are purchasers of Lantus and allege that Sanofi unlawfully extended its period of market exclusivity over insulin glargine products and charged supra-competitive prices for Lantus after February 2015. Id. ¶¶ 14, 15, 196, 197. On behalf of themselves and a purported class of similar purchasers, the plaintiffs seek damages for having had to pay those supra-competitive prices. The plaintiffs define the class as anyone who "purchased Lantus (in cartridges or SoloSTAR) directly from Sanofi at any time between February 13, 2015 and December 31, 2016 or until the anticompetitive effects of Sanofi's conduct cease[.]" Id. ¶ 486.

The plaintiffs assert two counts in their Complaint, monopolization and attempted monopolization. Both counts are antitrust **[*4]** claims arising under *§ 2* of the Sherman Act (*15 U.S.C. § 2*). Both counts are premised on the plaintiffs' arguments that Sanofi engaged in an exclusionary conduct scheme consisting of improperly listing patents in the U.S. Food & Drug Administration's ("FDA") *Approved Drug Products with Therapeutic Equivalence Evaluations* ("Orange Book"), commencing and maintaining a sham litigation lawsuit against Eli Lilly & Company ("Lilly"), and engaging in a pattern of anticompetitive serial petitioning. Id. ¶¶ 496-514.

As relevant for this opinion, Sanofi is the holder of "formulation" patents covering preparations of insulin, and "pen" patents covering injector pens or components thereof. Id. ¶¶ 216-217, 249-254, 354, 390-402. As with Sanofi's previous motion to dismiss (Docket No. 21), the instant Motion focuses largely on Sanofi's conduct related to U.S Patent No. 8,556,864 ("the '864 Patent"), titled "Drive Mechanisms Suitable for Use in Drug Delivery Devices." SAC Ex. I. This patent covers a part used in Sanofi's insulin injector pen, the Lantus SoloSTAR. The plaintiffs allege that Sanofi improperly listed the '864 Patent in the Orange Book and commenced sham litigation against Lilly asserting infringement of that patent. Sanofi denies that its conduct related **[*5]** to the '864 Patent was anticompetitive, and argues that because the '864 Patent stood as a lawful bar to competition, the plaintiffs' other allegations fail due to issues of causation.

---

[1] Unless otherwise noted, the facts are derived from the Second Amended Complaint (Docket No. 51) ("SAC").

The Orange Book is intended to put other drug manufacturers on notice of relevant patents. Companies seeking FDA approval of a new drug submit a new drug application ("NDA") pursuant to the Federal Food, Drug, and Cosmetic Act, *21 U.S.C. § 301 et seq.* ("FDCA"). Those companies must list any patents in the Orange Book "which claim[] the drug for which the applicant submitted the application or which claim[] a method of using such drug and with respect to which a claim of patent infringement could reasonably be asserted." *21 U.S.C. § 355(b)(1)*. Sanofi submitted an NDA for Lantus and a Supplemental NDA for Lantus SoloSTAR, and has listed patents for each. See SAC ¶¶ 182, 203, 280, 282. The plaintiffs claim that Sanofi improperly listed certain patents, including the '864 Patent, in the Orange Book, thereby illegally gaining the ability to commence litigation against competitors and extend its period of exclusivity, as explained below.

Under the Drug Price Competition and Patent Term Restoration Act, *Pub. L. No. 98-417, 98 Stat. 1585 (1984)*, known as the Hatch-Waxman Amendments, drug manufacturers seeking approval to sell products similar to already **[*6]** approved brand drugs can file an application for approval which relies on a brand manufacturer's NDA. Id. ¶¶ 35, 37, 71. This makes it easier for follow-on or generic manufacturers to gain FDA approval. In doing so, the new manufacturer must certify as to how their product impacts the patents that the brand drug manufacturer listed for its original NDA.

As relevant here, Lilly submitted an application for its insulin glargine product Basaglar, relying on Sanofi's NDA submissions for its Lantus products. Basaglar, like the Lantus SoloSTAR, provides insulin glargine in an injector pen. See id. ¶¶ 300-02. Lilly planned on using its own pen for the product, the KwikPen, which Lilly had previously been using for other products. Id. Because Lilly relied on Sanofi's submissions, it had to file certifications related to Sanofi's patents for Lantus and Lantus SoloSTAR. With the exception of one patent, Lilly certified that Sanofi's listed patents "were invalid, unenforceable, and/or would not be infringed by the commercial manufacture, use, or sale of [Basaglar]." Id. ¶ 306. This type of certification is known as a "paragraph IV certification." Filing a paragraph IV certification "may provoke **[*7]** litigation. The patent statute treats such filing as an act of technical infringement and provides the brand company an opportunity to sue." Id. ¶ 79; *35 U.S.C. § 271(e)(2)(A)*. Thus, if Sanofi had reason to believe that Lilly's product infringed any of its listed patents when Lilly filed its paragraph IV certification, it had the opportunity to sue Lilly prior to the FDA approving Lilly's product. "If the branded drug manufacturer initiates a patent infringement action against its would-be competitor within forty-five days of receiving notification of the paragraph IV certification, the FDA will not grant final approval to the [new drug application] until the earlier of (a) the passage of 30 months, or (b) the issuance of a decision by a court that the patent is invalid or not infringed by the [new] product." Id. ¶ 80; *21 U.S.C. § 355(c)(3)(C)*.

After receiving Lilly's paragraph IV certifications, Sanofi sued Lilly for patent infringement on two of the formulation patents and two of the pen patents, including the '864 patent. SAC ¶ 325. The plaintiffs claim that this litigation was a sham because it was based on improper Orange Book listings and because Sanofi had no reasonable basis for thinking that its patents were infringed. As is provided **[*8]** for by *21 U.S.C. § 355(c)(3)(C)*, the lawsuit against Lilly triggered an automatic stay of FDA approval for Basaglar. Id. ¶ 326. On September 28, 2015, the morning of trial, Lilly and Sanofi settled the litigation. Id. ¶ 375. As part of the settlement, Sanofi granted Lilly a royalty-bearing license so that Lilly could manufacture and sell Basaglar, and Lilly agreed to delay its launch of Basaglar until December 15, 2016. Id. ¶¶ 375-77.

In addition to the conduct related to Lilly, the plaintiffs include in their Second Amended Complaint additional facts that they claim add to Sanofi's overall anticompetitive scheme. First, the plaintiffs allege that "[e]ven after Sanofi's litigation with Lilly, [Sanofi] expected other companies would soon seek to create affordable follow-on insulin glargine products. To further frustrate those efforts, Sanofi obtained and then listed in the Orange Book an additional thirteen patents over its SoloSTAR injector pen." Id. ¶ 389 (emphasis omitted). The plaintiffs allege that "[n]one of the new patents claim insulin or insulin glargine. Each claims one or more aspects of the SoloSTAR packaging. All are improperly listed in the Orange Book and serve to frustrate competition." Id. **[*9]** ¶ 403. Second, the plaintiffs allege that Sanofi commenced lawsuits against would-be competitors Merck and Mylan, exhibiting a "pattern of anticompetitive petitioning for which [Sanofi] is independently liable under federal ***antitrust law***, even if each act of petitioning is not independently objectively baseless." Id. ¶ 500.

This court granted Sanofi's first motion to dismiss on January 10, 2018 (Docket No. 40). Therein, this court held that the plaintiffs failed to state a claim related to antitrust liability stemming from improper Orange Book listings because the alleged facts did not show that it was unreasonable to list the '864 Patent. This court also dismissed the plaintiffs' sham litigation claim, ruling that the plaintiffs failed to plead facts which showed that Sanofi's litigation against Lilly involving the '864 Patent was objectively baseless. As the '864 Patent stood as a legal barrier to Basaglar's market entry prior to December 15, 2016, this court dismissed the plaintiffs' remaining allegations for lack of causation. The court's dismissal was without prejudice. The plaintiffs have now submitted a Second Amended Complaint and Sanofi has again moved for this court to dismiss both counts.

Additional facts **[*10]** are included herein as necessary.

III. LEGAL STANDARD

A. Motion to Dismiss for Failure to State a Claim

While Sanofi has moved to dismiss the Second Amended Complaint for failure to state a claim pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, it argues further that this court should decline to reconsider its earlier rulings, and, instead, invoke the "law of the case" doctrine. See Mem. in Supp. of Motion to Dismiss (Docket No. 55) at 13-14. The law of the case doctrine holds that "unless corrected by an appellate tribunal, a legal decision made at one stage of a civil or criminal case constitutes the law of the case throughout the pendency of the litigation." *Ellis v. United States, 313 F.3d 636, 646 (1st Cir. 2002)* (internal citation and quotation omitted). In light of the substantial new allegations of the Second Amended Complaint, however, as well as the extensive arguments presented by the parties, this court has considered the sufficiency of the Second Amended Complaint anew, and applied the *12(b)(6)* standard of review. Nevertheless, as detailed below, this court has not altered its decision and incorporates herein the analysis included in its decision of January 10, 2018 (Docket No. 40) (hereinafter, "Order").

Standard of Review

Motions to dismiss under *Rule 12(b)(6)* test the sufficiency **[*11]** of the pleadings. When confronted with such a motion, the court accepts as true all well-pleaded facts and draws all reasonable inferences in favor of the plaintiff. See *Cooperman v. Individual Inc., 171 F.3d 43, 46 (1st Cir. 1999)*. The court may also consider "implications from documents attached to or fairly incorporated into the complaint . . . facts susceptible to judicial notice . . . [and] concessions in plaintiff's response to the motion to dismiss." *Schatz v. Republican State Leadership Comm., 669 F.3d 50, 55-56 (1st Cir. 2012)* (internal quotations and citations omitted).

As the First Circuit has explained, in considering the merits of a motion to dismiss, the court proceeds in two steps. First, we "isolate and ignore statements in the complaint that simply offer legal labels and conclusions or merely rehash cause-of-action elements." *Id. at 55*. Second, we "take the complaint's well-pled (*i.e.*, non-conclusory, non-speculative) facts as true, drawing all reasonable inferences in the pleader's favor, and see if they plausibly narrate a claim for relief." Id. Dismissal is only appropriate if the complaint, so viewed, fails to allege "a plausible entitlement to relief." *Rodriguez-Ortiz v. Margo Caribe, Inc., 490 F.3d 92, 95 (1st Cir. 2007)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 559, 127 S. Ct. 1955, 1967, 167 L. Ed. 2d 929 (2007))*. "Plausible . . . means something more than merely possible[.]" *Schatz, 669 F.3d at 55*. "The bottom line is that the combined allegations, taken as true, must state a plausible, **[*12]** not merely conceivable, case for relief." *Carrero-Ojeda v. Autoridad De Energía Eléctrica, 755 F.3d 711, 718 (1st Cir. 2014)* (internal citations and quotations omitted). "Engaging in this plausibility inquiry is 'a context-specific task that requires the reviewing court to draw on its judicial experience and common sense.'" *Germanowski v. Harris, 854 F.3d 68, 72 (1st Cir. 2017)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 679, 129 S. Ct. 1937, 1950, 173 L. Ed. 2d 868 (2009))*.

B. Monopolization and Attempted Monopolization Under the Sherman Act

Plaintiffs bring two counts under the Sherman Act, *15 U.S.C. § 2*, one for monopolization and the other for attempted monopolization. SAC ¶¶ 496-514. In order to be successful on a claim under *§ 2* of the Sherman Act, a plaintiff must "demonstrate (1) that the defendant possesses monopoly power in the relevant market, and (2) that the defendant has acquired or maintained that power by improper means." *Town of Concord v. Boston Edison Co., 915 F.2d 17, 21 (1st Cir. 1990)* (internal quotations and citations omitted). "[A] practice, a method, a means, is 'improper' if it is 'exclusionary.' To decide whether [a company's] conduct was exclusionary, we should ask whether its dealings with [a competitor] went beyond the needs of ordinary business dealings, beyond the ambit of ordinary business skill, and 'unnecessarily excluded competition' from the [] market." *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 230 (1st Cir. 1983)* (internal citations omitted). Thus, successful claims of monopolization must establish "that the **[*13]** defendant 'has engaged in impermissible 'exclusionary' practices with the design or effect of protecting or enhancing its monopoly position.'" *Boston Sci. Corp. v. Schneider (Europe) AG, 983 F. Supp. 245, 268 (D. Mass. 1997)* (quoting *Coastal Fuels of P.R., Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 195-96 (1st Cir. 1996))*. "In other words, the acquisition and maintenance of the power must be willful, rather than a result of legitimate means such as patents, superior products, business acumen, or historic accident." Id. Finally, "[a]ttempted monopolization under *§ 2* of the Sherman Act requires proof of (1) anti-competitive or exclusionary conduct; (2) specific intent to monopolize; and (3) a dangerous probability that the attempt will succeed." *Id.*, and cases cited.

Applying these principles compels the conclusion that Sanofi's Motion to Dismiss must be allowed.

IV. ANALYSIS

A. Orange Book Listing

The plaintiffs ask this court to reconsider its prior holding that the Complaint fails to state a claim that Sanofi had unreasonably listed the '864 Patent in the Orange Book. In particular, the plaintiffs continue to assert that the '864 Patent is just for packaging, and that it was improper to list it in the Orange Book since the Patent does not claim the approved drug product. See, e.g., Opp. at 19-24. Sanofi, on the other hand, continues to argue that the '864 Patent was appropriately listed as a "drug delivery **[*14]** system[ ] used and approved in combination with a drug." Reply at 4. This court previously held that "while it may be debatable whether the Lantus SoloSTAR fits neatly into the category of patents that must be disclosed, it does not fit into the category of patents that must not be disclosed." Order at 21. The allegations in the Second Amended Complaint do not warrant a different conclusion. The court once again concludes that the facts in the Second Amended Complaint are insufficient to show that Sanofi unreasonably or improperly listed the '864 Patent in the Orange Book.

Appropriate Standard of Review

As addressed in this court's prior Order, "Orange Book listing is a statutory obligation and enforcement is a statutory right." *In re Lipitor Antitrust Litig., No. 12-2389, 2013 U.S. Dist. LEXIS 126468, 2013 WL 4780496, at *21 (D.N.J. Sept. 5, 2013)*; see also *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-02503, 2015 U.S. Dist. LEXIS 125999, 2015 WL 5458570, at *12 (D. Mass. Aug. 16, 2015)*. Applicants are "required by law" to identify "any patent that 'claims the drug for which the applicant submitted the application or which claims a method of using such drug and with respect to which a claim of patent infringement could reasonably be asserted if a person not licensed by the owner engaged in the manufacture, use, or sale of the drug.'" *In re Buspirone Patent Litig., 185 F. Supp. 2d 363, 371 (S.D.N.Y. 2002)* (quoting *21 U.S.C. § 355(b)(1)*).

While companies must list certain patents in the Orange Book, improperly listing a patent may subject **[*15]** the patent holder to antitrust liability. See *id. at 373* (conduct in providing information for listing in Orange Book is "not immune from liability under the Sherman Act."). Importantly, however, an improper listing does not give automatic rise to antitrust liability. This court established in its prior Order, and reaffirms here, that in order to establish a claim under the Sherman Act for Orange Book listing, a party must show that the defendant's decision to list a patent was unreasonable. See Order at 19.

The plaintiffs contend that this court was incorrect in using such a reasonableness standard. They argue that the court improperly focused on whether Sanofi reasonably (or unreasonably) believed that the '864 Patent fit within the criteria for patents to be listed in the Orange Book. See Opp. at 24-26. This misconstrues this court's ruling. Sanofi's subjective belief as to the propriety of its interpretation of the listing requirements is not at issue. Rather, as this court previously ruled, and confirms herein, it is objectively reasonable to interpret the Listing Provisions in *21 C.F.R. § 314.53* and the associated FDA Response as allowing the '864 Patent to be listed in the Orange Book as a component of a drug delivery system. Therefore, **[*16]** in listing the '864 Patent, Sanofi did not engage in improper conduct. See *Organon Inc. v. Mylan Pharms., Inc., 293 F. Supp. 2d 453, 460 (D.N.J. 2003)* ("given the statutory and regulatory language at the time it submitted the '099 Patent for listing in the Orange Book, Organon had a reasonable basis for the submission, and therefore, Organon's listing was not improper."). While the plaintiffs attempt to distinguish Organon on the grounds that the regulatory language at issue in that case was ambiguous and the Orange Book listing requirements here are not, that attempt must fail. As detailed in this court's prior Order and herein, the listing requirements and associated guidance are subject to differing interpretations. Where there is more than one reasonable interpretation of the listing requirements, and a party follows one of those interpretations, the conduct is not improper.

The '864 Patent is Not Just for Packaging

The plaintiffs argue that the '864 Patent is for packaging and is precluded from being listed in the Orange Book. This court found that argument unpersuasive in its earlier decision. See Order at 20. While the plaintiffs have expanded on their legal arguments in their Second Amended Complaint, they have not added any substantive facts which compel this court to reach a different result. **[*17]**

As an initial matter, the plaintiffs contend that the Lantus SoloSTAR was approved only as packaging. This contention is belied by the record. Rather, the SoloSTAR was approved as a drug product.

It is undisputed that Lantus SoloSTAR is sold as an injector pen filled with insulin glargine. See SAC ¶ 209. Lantus SoloSTAR was approved as a "disposable insulin injection device." SAC Ex. D. The 2003 Comments and Response from the FDA, discussed in detail in this court's prior Order, indicate that "pre-filled drug delivery systems" are drug products for Orange Book listing purposes. See Order at 7-9 (discussing *68 Fed. Reg. 36676-01, 2003 WL 21391636, at 36,680 (June 18, 2003)* ("FDA Response")). As evidenced by the FDA website, of which this court takes judicial notice, insulin injector pens are considered "pre-filled drug delivery systems." FDA, https://www.fda.gov/CombinationProducts/AboutCombinationProducts/ucm101496.htm#examples (last visited Oct. 22, 2018) (listing as examples of combination products "[p]refilled drug delivery systems (syringes, insulin injector pen, metered dose inhaler)"); see *Kader v. Sarepta Therapeutics, Inc., No. 14-14318, 2016 U.S. Dist. LEXIS 46025, 2016 WL 1337256, at *11 (D. Mass. Apr. 5, 2016)* (holding that official statements of the FDA made on a government website constitute public records of which the court can take judicial notice). The **[*18]** FDA's SoloSTAR approval letter refers to the Lantus SoloSTAR as a "drug product." SAC Ex. D. ("If you issue a letter communicating important information about this drug product . . . we request that . . . .").

In an effort to avoid this conclusion, the plaintiffs excerpt various phrases from communications between the FDA and Sanofi relating to the proposed labelling for the SoloSTAR in which "the FDA repeatedly referred to the [SoloSTAR] pen as a container" or "packaging." SAC ¶¶ 203-10. The plaintiffs rely on these select comments in concluding that "it was unreasonable for Sanofi to believe that its [supplemental new drug application] approval was for anything other than a package change." Id. ¶ 211. However, these select references must be placed in context. As Sanofi accurately asserts, "[t]hose references concerned where to put the drug label in order to minimize the risk of medication errors and how to protect the insulin cartridge integrated into the device." Reply at 4-5 (citing SAC Ex. N at 68-78, 98-101). A fair reading of the referenced communications shows that the FDA approved SoloSTAR as a "disposable insulin injection device." SAC Ex. D; Cf. SAC ¶ 204. It is consistently **[*19]** referred to by the FDA as a "device." See SAC Ex. N at 68, 71, 74, 76. The record compels the conclusion, as detailed in this court's earlier Order, that the SoloSTAR was not just packaging but was approved as a drug delivery system. Order at 20-21.

Need to Claim the Drug Product

As before, the plaintiffs next allege that Sanofi was unreasonable in listing the '864 Patent because it does not claim the relevant drug or drug product. They assert that it was improper to list the '864 Patent, which claims only components of an injector pen but does not mention Lantus SoloSTAR, or insulin glargine, because the Regulations provide that "[f]or patents that claim a drug product, the applicant must submit information only on those **patents that claim the drug product**, as defined in *§ 314.3*, that is described in the pending or approved NDA." *21 C.F.R. § 314.53(b)(1)* (emphasis added). The plaintiffs argue that since the '864 Patent does not expressly mention Lantus, Lantus SoloSTAR, or insulin glargine, it is improper to list it in the Orange Book as claiming Lantus SoloSTAR. This court does not agree.

As detailed in this court's earlier Order, the FDA's guidance regarding what a patent must expressly claim is ambiguous and is reasonably read to allow for the **[*20]** listing of the '864 Patent. The FDA has expressly interpreted "drug products", for which patents must be listed in the Orange Book, to include "pre-filled drug delivery systems." See FDA Response. Similarly, as detailed above, the FDA has recognized that insulin injector pens constitute "pre-filled drug delivery systems" and it approved SoloSTAR as a "disposable insulin injection device." Hence, it is reasonable to interpret the FDA Regulations as requiring the listing of patents for devices such as SoloSTAR regardless of whether the patent itself expressly references insulin glargine, or insulin glargine in conjunction with the pen-type injector. See SAC ¶ 272.

This court previously held on this point that "even assuming such a 'claim' must be made in the patent, it is not clear whether or not the 'claims' of the '864 patent, which are for a drug delivery device which includes a dose dial sleeve and a dose limiting mechanism, among other things, are sufficient to satisfy any such requirement." Order at 21. The court hereby affirms its prior ruling. The '864 Patent indisputably claims components of the Lantus SoloSTAR, which, as addressed *supra*, Sanofi correctly had reason to believe met the definition of "drug product" **[*21]** under the ambiguous FDA guidance. The plaintiffs have not alleged facts which show that it was unreasonable for Sanofi to list patents claiming components of that drug product.

The plaintiffs rely on *Pfizer, Inc. v. FDA, 753 F. Supp. 171 (D. Md. 1990)*, to argue that patents for components of a drug product should not be listed. Opp. at 17-18. The court in Pfizer, however, did not hold that component parts of drugs cannot be listed — rather, the court ruled that listed components must be part of the specific drug "for which the applicant submitted the application." *753 F. Supp. at 176-77*.

The listed drug at issue in Pfizer was a "nifedipine solution in a soft gelatin capsule, which Pfizer markets in the United States under the trade name Procardia." *Id. at 173*. The FDA in that case refused to list Pfizer's '986 patent, "which claimed a tablet formulation of nifedipine[,]" in the Orange Book for Procardia. *Id. at 174*. The FDA had two principal issues with listing the '986 patent. First, the FDA needed proof that the composition underlying the tablet formulation in the '986 patent was approved. Id. Second, the FDA relied on its own interpretation of the term "drug" to conclude that patents need only be filed when they claim the listed drug or drug product for which the NDA was submitted. *Id. at 174-75*. While both Procardia, a soft gelatin **[*22]** capsule, and Pfizer's tablet formulation include nifedipine, they were two distinct products. See *id. at 176*. The court in Pfizer held that a listed patent must claim the approved drug product for which the NDA was submitted — in that case Procardia. Id. Pfizer could not submit a patent for a different product just because it shared an active ingredient with Procardia. Pfizer was not submitting components of Procardia itself, but a patent for a different product which shared a component with Procardia.[2] In the instant case, by comparison, Sanofi's patent listed a component of Lantus SoloSTAR, the relevant approved drug product. Including the '864 Patent in the Orange Book is entirely consistent with Pfizer.

Finally, the plaintiffs disagree with this court's interpretation of correspondence between companies and the FDA, which evidence confusion in the industry over the very question presented by this litigation. See, e.g., Letter from GSK to FDA, Docket No. FDA-2005-A-0476 (Feb. 11, 2009), available at https://www.regulations.gov/document?D=FDA-2005-A-0476-0004 ("in the absence of further guidance from the FDA, [GSK] has modified its Orange Book listing practice to list those patents . . . **[*23]** that claim all or a portion of integrated drug-device products, regardless of whether the approved drug substance is specifically mentioned in the claims of such patents."). This court also took judicial notice of responses from the FDA, including a 2011 response to an inquiry from Forest Laboratories, Inc., in which the FDA wrote that "due to the need to address other Agency priorities," it "has been unable to reach a decision" on "whether a patent that claims a drug delivery device whose use is integral to the administration of the active ingredient and the approval of the NDA, but that does not claim the active ingredient of the approved drug product, should be submitted for listing in [the Orange Book]." Interim Response to Forest Laboratories, Inc., Docket No. FDA-2011-A-0363 (Nov. 7, 2011), available at https://www.regulations.gov/document?D=FDA-2011-A-0363-0008.

The plaintiffs claim that the letters show, not confusion, but rather an admission by industry members that the current framework does not allow for the listing of patents unless that patent explicitly claims the active drug substance. The court takes judicial notice of the letters themselves, and is not bound to accept **[*24]** the interpretation of their content provided by either party. See *OrbusNeich Med. Co. v. Boston Sci. Corp., 694 F. Supp. 2d 106, 111 (D. Mass. 2010)* ("The public filing of [a] document with a regulatory agency [] makes it a proper subject of judicial notice, at least with regard to the fact that it contains certain information, though not as to the truth of its contents."). The letters, posing the question of whether component patents must be listed, further show what this court has held — that the ambiguous listing requirements in this area allow for Sanofi's interpretation permitting the listing of the '864 Patent.

For the foregoing reasons, the plaintiffs again fail to state a claim for Sherman Act violations based on the Orange Book listing of the '864 Patent.

B. Litigation Against Lilly

The plaintiffs also ask this court to reconsider its prior order dismissing their sham litigation claim. They contend that Sanofi engaged in exclusionary conduct through "[c]ommencing and maintaining a sham litigation against Lilly to delay introduction of competing insulin glargine products into the U.S. market." SAC ¶ 498. The plaintiffs further claim that "Sanofi's suit against Lilly was objectively baseless and motivated by a subjective desire to delay competition in the insulin glargine market." **[*25]** Id. ¶ 499. This court previously dismissed the plaintiffs' sham litigation claim regarding the Lilly lawsuit. The allegations in the Second Amended Complaint do not compel a different result.

Once Lilly filed its paragraph IV certification, Sanofi had the statutory right to sue under *35 U.S.C. § 271(e)(2)(A)*. A paragraph IV certification is deemed to be "a defined act of infringement sufficient to create case or controversy jurisdiction to enable a court to promptly resolve any dispute concerning infringement and validity." *Glaxo, Inc. v. Novopharm, Ltd., 110 F.3d 1562, 1569 (Fed. Cir. 1997)*. Importantly, while a patent holder has the right to sue upon receipt of a paragraph IV certification, it is not obligated to do so.

[2] The Pfizer court's discussion of the definition of "drug" recognized that it includes component parts of the final drug. ***Id. at 176*** (citing *21 U.S.C. § 321(g)(1)*); see also *United States v. Generix Drug Corp., 460 U.S. 453, 459, 103 S. Ct. 1298, 1301-02, 75 L. Ed. 2d 198 (1983)* ("The term 'drug' is plainly intended throughout the Act to include entire drug products, complete with active and inactive ingredients."). Recognizing component parts of a drug product is entirely consistent.

The filing of a lawsuit is generally protected activity under the First Amendment, as recognized by the Noerr-Pennington doctrine. E. R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961); and United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965). However, this immunity is lost if the lawsuit is a "sham." See In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-02503, 2015 U.S. Dist. LEXIS 125999, 2015 WL 5458570, at *11 ("Under the Noerr-Pennington doctrine, filing a lawsuit is protected under the First Amendment unless the lawsuit is a 'sham.'" (citing Prof'l Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 113 S. Ct. 1920, 1928, 123 L. Ed. 2d 611 (1993))).

The Supreme Court has identified a two-part definition for sham litigation.

> First, the lawsuit must be objectively baseless in the sense that no reason-able litigant could realistically expect success on the merits. If an objective litigant could conclude **[*26]** that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor ....

Prof'l Real Estate Investors, Inc., 508 U.S. at 60-61, 113 S. Ct. at 1928 (internal quotations, citations, and emphasis omitted). To prevail, "a plaintiff must allege that both prongs of the test are met." United Food & Commer. Workers Unions & Employers Midwest Health Benefits Fund v. Novartis Pharms. Corp., 902 F.3d 1, 13 (1st Cir. 2018). In the instant case, Sanofi contends that the plaintiffs have failed to allege that its litigation to enforce the '864 Patent was "objectively baseless." See, e.g., id.; see also 800 Adept, Inc. v. Murex Sec., Ltd., 539 F.3d 1354, 1370 (Fed. Cir. 2008) (to prove objectively baseless prong, the plaintiff had to prove the defendant "had no reasonable basis to believe that its patent claims were valid or that they were infringed[.]"). This court agrees, and concludes that the plaintiffs have not alleged sufficient facts to make the necessary showing.

Plaintiffs argue that they have cured deficiencies from their previous complaint related to the Lilly sham litigation **[*27]** claim. Opp. at 28-31. The court disagrees. This court found the following in its prior Order:

> According to the Amended Complaint, prior to bringing suit Sanofi had the pages of Lilly's § 505(b)(2) application that (1) showed the list of ingredients of Lilly's NDA product, and (2) identified the type of injector pen by which the Lilly NDA product would be administered. Other than repeatedly stating that the documents showed that Lilly's products would not infringe any of the claims in the two injector pen patents (the '864 and '044 patents) or any claims in the two vial formulation patents (the '652 and '930 patents), the plaintiffs have offered no facts in support of these conclusions. Since this court must disregard conclusory allegations of fact and law, the allegations of the Amended Complaint are insufficient to show that the underlying lawsuit lacked any reasonable merit.

Order at 27 (internal citations and quotations omitted). This court also found that other factors supported the conclusion that the underlying lawsuit was not objectively baseless, including the fact that Sanofi was enforcing valid patents in the face of a paragraph IV certification, that the litigation was hard fought on issues related to the '864 Patent, and that the settlement **[*28]** included favorable terms to Sanofi.

The plaintiffs have amended their Complaint to include facts they believe are sufficient to show that Sanofi's lawsuit against Lilly lacked any reasonable merit. First, the plaintiffs allege in detail the differences between the two pens. SAC ¶¶ 333-343. They assert that, based on those differences, "[n]o reasonable pharmaceutical company in Sanofi's position would realistically expect to succeed in proving infringement." Id. ¶ 332. Next, the plaintiffs assert that if there was a valid basis for infringement, Sanofi would have sued Lilly earlier, when Lilly used its KwikPen in connection with another insulin product Humalog. Id. ¶¶ 289-298. The plaintiffs contend that since "Sanofi never took the position that Lilly's KwikPen infringed Sanofi's initial injector pen patents, let alone sue Lilly for infringement[,]" Sanofi had no reasonable basis to claim that the KwikPen infringed Sanofi's patents in connection with Lantus or Lantus SoloSTAR. Id. ¶ 298. Finally, the plaintiffs allege that when Sanofi launched a follow-on version of Lilly's Humalog product using its SoloSTAR pen, Sanofi filed a paragraph IV certification alleging that

"Lilly's '132 patent was **[*29]** 'invalid, unenforceable, or will not be infringed' by Sanofi's Admelog SoloSTAR product." Id. ¶ 438. The plaintiffs allege that Sanofi's paragraph IV certification in that instance contradicts its position in the Lilly litigation that Basaglar infringed the '864 Patent. See id.

Even considering these new allegations, however, the plaintiffs have failed to allege sufficient facts to establish that Sanofi's suit against Lilly ("Sanofi I") was objectively baseless. "A firm that has received a patent from the patent office (and not by fraud . . .), and thus enjoys the presumption of validity that attaches to an issued patent . . . is entitled to defend the patent's validity in court, to sue alleged infringers, and to settle with them, whatever its private doubts, unless a neutral observer would reasonably think either that the patent was almost certain to be declared invalid, or the defendants were almost certain to be found not to have infringed it, if the suit went to judgment." *United Food & Commercial Workers Unions v. Novartis Pharm. Corp., No. 15-12732, 2017 U.S. Dist. LEXIS 102389, 2017 WL 2837002, at *11 (D. Mass. June 30, 2017)* (internal quotation and citation omitted), aff'd, *902 F.3d 1 (1st Cir. 2018)*. It does not matter whether Sanofi would have prevailed at trial. If Sanofi had even a colorable claim of infringement, it is afforded Noerr-Pennington immunity. Id.; see **[*30]** also *Asahi Glass Co. v. Pentech Pharm., Inc., 289 F. Supp. 2d 986, 995 (N.D. Ill. 2003)* ("to avoid turning every patent case into an antitrust case, some threshold of plausibility must be crossed at the outset before a patent antitrust case should be permitted to go into its inevitably costly and protracted discovery phase . . . the determination of whether such a suit is a sham depends not on what the patentee believes but on the nature of and the underlying merits of the patentee's case." (internal citations and quotations omitted)). Thus, even if the plaintiffs are right that Lilly would have ultimately prevailed at trial, that is not the question before the court. The sham litigation exception to the Noerr-Pennington doctrine was not intended to provide all third parties with an opportunity to re-litigate cases. The doctrine was reserved for those cases in which the record shows that the suit was objectively baseless.

None of the plaintiffs' new allegations show that Sanofi's suit was objectively baseless. While the plaintiffs now provide the court with ample allegations showing the differences between the injector pens, these differences do not objectively show that Lilly's product did not infringe Sanofi's '864 Patent. Despite the alleged differences between the pens, **[*31]** the underlying litigation docket shows a hard fought case in which non-infringement was anything but clear.[3] See *AstraZeneca AB v. Mylan Labs., Inc., Nos. 00-6749, 03-6057, 2010 U.S. Dist. LEXIS 50049, 2010 WL 2079722, at *4 (S.D.N.Y. May 19, 2010)* (finding that the underlying lawsuit was "hard-fought and close" and that such an "outcome hardly bespeaks baseless litigation."). For example, the record in Sanofi I is clear that Sanofi was asserting that Lilly's pen violated the claims in the '864 Patent. See Sanofi I Joint Claim Construction Brief (Docket No. 149) at 1. Sanofi's contention that the '864 Patent had been infringed formed the basis of many of Sanofi's discovery requests. See, e.g., Sanofi I Docket No. 224 at 1 ("Lilly's accused product includes a pen containing various components that, when assembled, combine to form a closing mechanism. Sanofi's asserted device patents include claims to injection devices having particular components, and Sanofi must therefore be able to analyze the structure of the internal components of Lilly's accused device."); see also Docket Nos. 215, 227 (discovery letters).

The court in Sanofi I conducted an extensive claims construction process in which the court accepted some of each party's constructions of the '864 Patent. Sanofi I Docket No. 192. The extent of the litigation negates the plaintiffs' assertion **[*32]** that no reasonable pharmaceutical company would expect to succeed on infringement claims. The fact that the pens had many differences does not show otherwise.

The plaintiffs' allegations regarding Sanofi's conduct related to another insulin product Humalog are also unsuccessful in showing that the underlying suit was baseless. Sanofi's decision not to sue Lilly previously, and decision to file a paragraph IV certification with regard to another drug product, do not show that Sanofi's belief in

[3] The court takes judicial notice of the underlying litigation. *Maher v. Hyde, 272 F.3d 83, 86 n.3 (1st Cir. 2001)* (holding that a court may take judicial notice of the docket of any court case).

this particular instance was base-less. Those allegations, even if true, do not show that Sanofi had no reasonable expectation of winning its suit against Lilly concerning this product, Basaglar.[4]

Finally, the settlement between Sanofi and Lilly in the underlying lawsuit provides further support for the conclusion that the lawsuit was not baseless. See *Toyo Tire & Rubber Co., Ltd. v. Atturo Tire Corp., No. 14-0206, 2017 U.S. Dist. LEXIS 48672, 2017 WL 1178224, at *4 (N.D. Ill. Mar. 30, 2017)* ("courts have invariably held that lawsuits terminating in favorable settlement are also objecttively reasonable and are not shams"). Under the terms of the settlement, Lilly was granted a royalty-bearing license such that Lilly could manufacture and sell Basaglar in the KwikPen device globally. SAC ¶ 375. Sanofi, for **[*33]** its part, gained royalties and a delay in Lilly coming to market. Lilly gained the ability to come to market before the expiration of the patents at issue, including the '864 Patent. See id. The court is certainly aware that "[p]arties may settle a litigation for a variety of reasons independent of the merits of the claims." *Morton Grove Pharm. Inc. v. Par Pharm. Co., No. 04-7007, 2006 U.S. Dist. LEXIS 13779, 2006 WL 850873, at *11 (N.D. Ill. Mar. 28, 2006)* (internal citations omitted). This court acknowledges both parties' arguments related to the import of the settlement, and simply notes that the existence of such a settlement supports the conclusion that Sanofi's underlying infringement claim was at least colorable. For the foregoing reasons, the plaintiffs have failed to state a claim for antitrust violations related to sham litigation.

C. Serial Petitioning

The court must next address the plaintiffs' added allegations related to serial petitioning. The plaintiffs argue that Sanofi has filed two additional lawsuits against Merck and Mylan, which, when assessed in connection with the Lilly lawsuit, constitute a "pattern of anticompetitive petitioning for which [Sanofi] is independently liable under federal ***antitrust law***, even if each act of petitioning is not independently objectively baseless."[5] SAC ¶ 500. The plaintiffs **[*34]** allege that "[s]imply by filing those suits (which were just as meritless as Sanofi's suit against Lilly), Sanofi triggered regulatory stays that [are] delaying full competition in the Lantus and insulin glargine market lasting at least into 2020." Id. ¶ 11. The plaintiffs claim this is particularly harmful to purchasers because, even though Lilly's product is now on the market, "the largest drop in product price occurs when the number of follow-on products in the market goes from one to two[.]" Id. ¶ 424.

As relevant to the Merck lawsuit, Merck submitted an application for its version of insulin glargine on May 31, 2016. Id. ¶ 405. Merck "included a paragraph IV certification to the laundry list of patents then listed in the Orange Book as covering Lantus and Lantus SoloSTAR, on August 4, 2016." Id. ¶ 407. The plaintiffs allege that Sanofi "refused to accept or review portions of Merck's NDA to determine if it had a viable, non-frivolous claim of patent infringement." Id. ¶ 410. "Instead, on September 16, 2016, Sanofi sued Merck on [] ten patents in the United States District Court for the District **[*35]** of Delaware." Id. ¶ 411.

The second lawsuit the plaintiffs rely on is against Mylan. The plaintiffs allege that "rather than wait for Sanofi to sue Mylan and block competition, Mylan brought the fight to Sanofi[.]" Id. ¶ 426. "On June 5, 2017, Mylan filed with the Patent Trials and Appeals Board ("PTAB") petitions for inter partes review [ ] of Sanofi's vial formulation patents — the '652 patent and the '930 patent." Id. ¶ 427. The plaintiffs assert that "Sanofi opposed the petitions, but on December 13, 2017, the PTAB granted Mylan's petitions — meaning Mylan had demonstrated a 'reasonable likelihood of success' in showing at least one claim of each patent would be found invalid — and instituted an inter partes review of the vial formulation patents." Id. ¶ 428 (internal punctuation omitted). Mylan separately filed an application "seeking permission to manufacture, market, and sell a follow-on version of Lantus SoloSTAR.

---

[4] This conclusion is supported by the fact that these facts were all known at the time of Sanofi I and Lilly raised some of the same arguments yet nevertheless proceeded towards trial and eventual settlement in Sanofi I. See Sanofi I Docket No. 149 at 3 ("the injector pen part patents were never asserted against Lilly's marketed KwikPen product.").

[5] The lawsuit with Merck is Sanofi-Aventis U.S. LLC v. Merck Sharp & Dohme Corp., No. 16-00812 (D. Del. filed Sept. 16, 2016). The parties completed a five day bench trial on June 4, 2018 and have submitted post trial briefing. The lawsuit with Mylan is Sanofi-Aventis U.S. LLC v. Mylan N.V., No. 17-09105 (D.N.J. filed Oct. 24, 2017). The litigation is ongoing.

Contained within its application was a paragraph IV certification that the plethora of vial formulation patents and injector pen patents listed under Lantus in the Orange Book were invalid, unenforceable, or would not be infringed by Mylan's proposed follow-on insulin glargine product." **[*36]** Id. ¶ 430. As with Merck, the plaintiffs claim that Sanofi "refused to accept or review portions of Mylan's NDA to determine whether it had any viable, non-frivolous claim of infringement against Mylan." Id. ¶ 433. "Sanofi sued Mylan on October 24, 2017, alleging that Mylan infringed every one of Sanofi's eighteen injector pen patents and vial formulation patents." Id. ¶ 434. As a result of the lawsuit, "the FDA was automatically prohibited from approving Mylan's product for 30 months, or until March 18, 2020." Id. ¶ 435.

The plaintiffs allege that these two lawsuits, which were filed in response to paragraph IV certifications, subject Sanofi to antitrust liability regardless of their merit. The court does not agree. In its recent decision affirming summary judgment for a competitor in the face of allegations of serial petitioning, the First Circuit noted that although not every suit need be baseless in order for a serial petitioning claim to survive, "the task here is to identify sham litigation, not probable winners. And while we can see the logic inherent in reasoning that a nonfrivolous suit might be viewed differently when flown in a flock of frivolous suits, we see little logic **[*37]** in concluding that an exercise of the right to file an objectively reasonable petition loses its protection merely because it is accompanied by other exercises of that right." *P.R. Tel. Co. v. San Juan Cable LLC, 874 F.3d 767, 772 (1st Cir. 2017)*. In concurring, Judge Barron, joined by Judge Torruella, explained that in evaluating serial petitioning cases, the court relies "on a more record-based, case-specific line of reasoning that . . . leaves open the possibility that . . . a monopolist might be liable under the antitrust laws for engaging in a pattern of petitioning, even though no single filing in that pattern is objectively baseless." *Id. at 773*. Judge Barron explained further that "[t]he antitrust violation — if it exists — in a pattern case of that kind inheres in the monopolist's use of the petitioning process to make the costs of the rival's petitioning activity so high that the rival cannot secure the legal relief that would enable it actually to become a competitor." *Id. at 776*. Judge Barron noted that "no circuit has actually permitted a suit to go forward in which the underlying petitions were not baseless and there was no clear and convincing evidence that an alleged monopolist sought to use the govern-mental process [] as an anticompetitive weapon." *Id. at 777* (citations, **[*38]** quotations, and emphasis omitted). The court does not find, in the allegations of the Second Amended Complaint, facts related to these three lawsuits to meet the high bar necessary for the plaintiffs to make a plausible serial petitioning claim. Each suit followed a paragraph IV certification, an act of infringement that permits a company to sue on a colorable claim. Sanofi contends that it did not fully review the records before engaging in litigation in part because Merck and Mylan demanded burdensome confidentiality agreements. Reply at 14. Even if Sanofi did not fully review Merck and Mylan's applications, and even if the PTAB made a preliminary ruling in Mylan's favor, Sanofi has a protective right to sue and defend colorable claims related to its listed patents. The plaintiffs have neither pleaded a plausible case that these suits were individually baseless, nor have they pleaded a plausible case that Sanofi, through filing these lawsuits, used the governmental process as an anticompetitive weapon. The plaintiffs' antitrust claims, as premised on serial petitioning allegations, fail to state a claim.

D. Causation

The court is cognizant of the fact that the '864 Patent is not the only Orange **[*39]** Book listing and litigated patent the plaintiffs complain of. In fact, the Second Amended Complaint adds even more Orange Book listing claims, asserting that "[e]ven after Sanofi's litigation with Lilly, it expected other companies would soon seek to create affordable follow-on insulin glargine products. To further frustrate those efforts, Sanofi obtained and then listed in the Orange Book an additional *thirteen* patents over its SoloSTAR injector pen." SAC ¶ 389 (emphasis in original). These Sherman Act claims, as based on these other patents, fail for lack of causation.

"An antitrust plaintiff must prove a causal connection between the antitrust violation and actual damages suffered." *In re Wellbutrin XL Antitrust Litig., Nos. 08-2431, 08-2433, 2012 U.S. Dist. LEXIS 66312, 2012 WL 1657734, at *33 (E.D.P.A. May 11, 2012)*. In an antitrust class action, "individual injury (also known as antitrust impact) is an element of the cause of action; to prevail on the merits, every class member must prove at least some antitrust impact resulting from the alleged violation." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 311 (3d Cir. 2008)*. The plaintiffs have alleged harm from Sanofi's practices "between February 13, 2015 and December 31, 2016 or until the anticompetitive effects of Sanofi's conduct cease[.]" SAC ¶ 486. As addressed above, the plaintiffs have failed to state a plausible claim **[*40]** for relief based on the listing of the '864 Patent or the litigation enforcing that patent against Lilly, which ended in a settlement agreement that delayed Lilly's market entry until December 2016.

The plaintiffs argue that even if Sanofi's conduct related to the '864 Patent were valid, the thirty-month stay provided for by statute expired on June 20, 2016, six months prior to Lilly's product coming to market. Opp. at 34-35. The plaintiffs seem to be arguing that there were damages during that additional period for which the '864 Patent was not an independent bar. That delay, however, was the product of a settlement agreement entered into between the parties in Sanofi I on September 28, 2015, well before the expiration of the stay. SAC ¶ 375. As explained above, when a party sues on a paragraph IV certification, as Sanofi did here, "the FDA will not grant final approval to the [new drug application] until the earlier of (a) the passage of 30 months, or (b) the issuance of a decision by a court that the patent is invalid or not infringed by the [new] product." *21 U.S.C. § 355(c)(3)(C)*. Where, as here, the court endorsed a settlement prior to the expiration of 30 months, Sanofi is entitled to any additional delay embodied in that settlement.

Thus, the '864 Patent **[*41]** , and the settlement based thereon, stood as a lawful bar to Lilly's market entry, and the plaintiffs cannot show that Sanofi's conduct related to any other patent caused harm from Lilly's delay during that time period. Additionally, in light of this court's dismissal of the plaintiffs' serial petitioning claim alleging harm from the Merck and Mylan suits, the plaintiffs have failed to show that Sanofi can be held liable for actions causing market delay after December 31, 2016.

E. Claim of Overall Scheme

Finally, the court addresses the fact that the plaintiffs have not simply alleged that the Orange Book listings and the litigations against Lilly, Merck, and Mylan violated the antitrust laws, but that these actions collectively create an "illegal scheme to prevent, delay, and/or minimize the success of the introduction into the United States marketplace of any competing versions of [] insulin glargine products[.]" SAC ¶ 502. A court "can consider the individual aspects of [a scheme] claim so long as it keeps the larger scope of the scheme in context." *In re Asacol Antitrust Litig., 233 F. Supp. 3d 247, 261 (D. Mass. 2017)*. "In antitrust cases in which a scheme is alleged, 'plaintiffs should be given the full benefit of their proof without tightly compartmentalizing **[*42]** the various factual components and wiping the slate clean after scrutiny of each.'" Id. (quoting *Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 698-99, 82 S. Ct. 1404, 1410, 8 L. Ed. 2d 777 (1962))*. However, "if all we are shown is a number of perfectly legal acts, it becomes much more difficult to find overall wrongdoing. Similarly, a finding of some slight wrongdoing in certain areas need not by itself add up to a violation. We are not dealing with a mathematical equation. We are dealing with what has been called the 'synergistic effect' of the mixture of the elements." *City of Anaheim v. S. Cal. Edison Co., 955 F.2d 1373, 1376 (9th Cir. 1992)* (quoting *City of Groton v. Conn. Light & Power Co., 662 F.2d 921, 929 (2d Cir. 1981)*.

A consideration of the overall mixture of alleged conduct in this case does not warrant a different conclusion than does the evaluation of each element. As shown above, the plaintiffs have not plausibly shown that Sanofi engaged in the improper practice of Orange Book listing and suing competitors to cause anticompetitive injury. The plaintiffs' antitrust claims, as premised on an overall scheme of improper listings and improper litigations, are dismissed.

F. Market Power

As the court concludes that the Second Amended Complaint fails to adequately plead an improper means of acquiring monopoly power, this court need not address the parties' arguments over whether the plaintiffs have adequately pled that **[*43]** Sanofi possessed monopoly power in the relevant market.

V. CONCLUSION

For the reasons herein, the plaintiffs have failed to state a claim on which relief can be granted for monopolization or attempted monopolization. The Motion to Dismiss (Docket No. 54) is hereby ALLOWED and the Second Amended Complaint is dismissed with prejudice.

Opinion by: LORNA G. SCHOFIELD

Opinion

OPINION AND ORDER

LORNA G. SCHOFIELD, District Judge:

Plaintiffs,[1] a group of individuals and businesses that purchased foreign exchange ("FX") instruments from retail foreign exchange dealers ("Retail Dealers"), filed this putative class action against 18 banks and their affiliates[2] seeking injunctive relief under the Sherman Antitrust Act, *15 U.S.C. § 1, et seq.*, and damages under certain state antitrust and consumer protection laws. Plaintiffs allege that they paid inflated prices for various financial instruments because of Defendants' alleged conspiracy to fix prices in the FX spot market. Plaintiffs' Consolidated Class Action Complaint ("CCAC") was dismissed because it failed to plead facts **[*6]** sufficient to establish antitrust standing as to Plaintiffs' claims under the Sherman Act and the state antitrust laws of California, Illinois and New York. *Contant v. Bank of Am. Corp., No. 17 Civ. 3139, 2018 U.S. Dist. LEXIS 42870, 2018 WL 1353290, at *5 (S.D.N.Y. Mar. 15, 2018)* ("*Contant I*"). The CCAC also failed to plead sufficient facts to establish proximate cause, which is required for each of Plaintiffs' claims, and failed to meet due process requirements for bringing state law claims, except those under New York law. *2018 U.S. Dist. LEXIS 42870, [WL] at *8*. Finally, the CCAC failed to establish the availability of injunctive relief for Plaintiffs' Sherman Act claim. *2018 U.S. Dist. LEXIS 42870, [WL] at *9*. Plaintiffs move for leave to file their Proposed Second Consolidated Class Action Complaint (the "Proposed Complaint") pursuant to *Federal Rule of Civil Procedure 15(a)(2)*. For the following reasons, Plaintiffs' motion is granted in substantial part.

BACKGROUND

Familiarity with the procedural history and the allegations contained in the CCAC is assumed. *See* *Contant I, 2018 U.S. Dist. LEXIS 42870, 2018 WL 1353290, at *1-2*. The following alleged facts are taken from the Proposed Complaint and documents integral to the complaint, and are assumed to be true only for the purposes of this motion. *Cohen v. Rosicki, Rosicki & Assocs., P.C., 897 F.3d 75, 80 (2d Cir. 2018)*.

On May 20, 2015, the United States Department of Justice announced that Defendants Citigroup, JPMorgan Chase, Barclays, RBS and UBS were pleading guilty to conspiring to manipulate FX **[*7]** benchmark rates. Those benchmark rates are derived at the same time daily from bids and offers in the FX spot market during short windows of time called "fix periods." The two principal benchmark rates that Defendants manipulated are the European Central Bank rate and the World Markets/Reuters rate. These are the two most widely referenced FX benchmark rates and are used to set FX exchange rates globally. In 2013, Defendants collectively controlled 90.92% of the global FX spot trading market, and 98% of all FX spot trading volume in the United States. Defendants conspired in electronic chatrooms to fix prices, conform FX trade quotes and coordinate the timing and volume of trades, thereby artificially inflating the prices paid by non-Defendant FX purchasers.

Defendants' price fixing scheme operated to Plaintiffs' detriment by causing them to pay more for the FX instruments[3] that they purchased from Retail Dealers than they otherwise would have paid. The Retail Dealers

---

[1] The named plaintiffs are James Contant, Sandra Lavender, Victor Hernandez, Martin-Han Tran, FX Primus Ltd., Carlos Gonzalez, Ugnius Matkus, Charles G. Hitchcock III, Jerry Jacobson, Tina Porter and Paul Vermillion.

[2] Defendants are Bank of America Corporation, Bank of America, N.A., Merrill Lynch, Pierce, Fenner & Smith Incorporated, The Bank of Tokyo-Mitsubishi UFJ, Ltd., Barclays Bank PLC, Barclays Capital Inc., BNP Paribas, BNP Paribas North America, Inc., BNP Paribas Securities Corp., BNP Paribas Prime Brokerage, Inc., Credit Suisse Group AG, Credit Suisse AG, Credit Suisse Securities (USA) LLC, Deutsche Bank AG, Deutsche Bank Securities Inc., The Goldman Sachs Group, Inc., Goldman, Sachs & Co., HSBC Bank plc, HSBC North America Holdings, Inc., HSBC Bank USA, N.A., HSBC Securities (USA) Inc., JPMorgan Chase & Co., JPMorgan Chase Bank, N.A., Morgan Stanley, Morgan Stanley & Co., LLC, Morgan Stanley & Co. International PLC, RBC Capital Markets, LLC, The Royal Bank of Scotland plc, RBS Securities Inc., Société Générale S.A., Standard Chartered Bank, UBS AG, UBS Group AG and UBS Securities, LLC. The Citigroup Defendants have settled.

[3] "FX Instrument" is defined in the Proposed Complaint and in the *FOREX* settlements as any FX spot transaction, forward, swap, future, option or any other FX transaction or instrument the trading or settlement value of which is related in any way to FX rates.

quoted Plaintiffs prices based on the rates in the price-fixed spot market, thereby passing on to Plaintiffs the costs of Defendants' anticompetitive practices. When a Plaintiff placed an order for an FX instrument with **[*8]** a Retail Dealer, the Retail Dealer would then execute a covering trade, purchasing the FX Instrument from a Defendant liquidity provider and reselling it to the Plaintiff for that purchase price plus a retail markup. Depending on the Retail Dealer, the amount of the markup could be fixed based on the currency pair, or it could be calculated as a multiple of the best bid-ask spread quotes that the Retail Dealer receives from liquidity providers.

The Proposed Complaint bases these allegations primarily on analyses conducted by Plaintiffs expert, Dr. Carol L. Osler. According to Dr. Osler, "Each [Retail Dealer] maintains a proprietary algorithm for generating bid and ask quotes that are based on a data feed from the interbank market. Therefore, clients' trading costs are in proportion to the size of the trade and depend on the bid-ask spreads charged to the [Retail Dealers]." Most algorithms set the bid and ask prices for a retail FX instrument via a three step process -- "Step 1: Take in prices from one or more dealer banks as sources of liquidity; Step 2: Identify the highest bid and lowest ask prices among those liquidity-provider prices; Step 3: Set the retail ask price by adding **[*9]** a markup to the wholesale ask[] and set the retail bid price by subtracting a markup from the wholesale bid." In the alternative, some Retail Dealers calculate retail prices by "first identifying the wholesale mid-quote and adding (for the ask) or subtracting (for the bid) an appropriate markup." Because of Defendants' dominant market share in the wholesale FX Market, "the Step-1 market prices will almost certainly include streaming quotes from one or more Defendant liquidity providers . . . ."

Dr. Osler's statistical models confirm that the spot FX prices charged by Defendants to Retail Dealers are nearly perfectly correlated with the prices at which Plaintiffs purchased the instruments from the Retail Dealers. "Because the distorted bid and ask quotes from the liquidity providers are incorporated into the [Retail Dealer] bid and ask quotes, any price distortions at the liquidity provider level are passed down to the retail customer at the [Retail Dealer] level," and are "fully incorporated into [Retail Dealer] pricing."

STANDARD

"Leave to amend should be 'freely give[n] . . . when justice so requires,' *Fed. R. Civ. P. 15(a)(2)*, but should generally be denied in instances of futility [or] undue delay . . . **[*10]** ." *United States ex rel. Ladas v. Exelis, Inc., 824 F.3d 16, 28 (2d Cir. 2016)* (some internal quotation marks omitted). "A proposed amendment to a complaint is futile when it could not withstand a motion to dismiss." *F5 Capital v. Pappas, 856 F.3d 61, 89 (2d Cir. 2017)*. To withstand dismissal, a pleading "must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*; *accord Myun-Uk Choi v. Tower Research Capital LLC, 890 F.3d 60, 65 (2d Cir. 2018)*.

In reviewing a motion for leave to amend, a court accepts as true all factual allegations and draws all reasonable inferences in the plaintiff's favor. *See Trs. of Upstate N.Y. Eng'rs Pension Fund v. Ivy Asset Mgmt., 843 F.3d 561, 566 (2d Cir. 2016)*. In adjudicating a motion for leave to amend, "A complaint is also deemed to include any written instrument attached to it as an exhibit, materials incorporated in it by reference, and documents that, although not incorporated by reference, are integral to the complaint." *Cohen, 897 F.3d at 80*.

DISCUSSION

The Proposed Complaint claims that Defendants' price-fixing agreements violated *§ 1* of the Sherman Antitrust Act; the state antitrust statutes of Arizona, California, Illinois, Minnesota, New York and North Carolina and the consumer protection statutes of California, Florida and Massachusetts. For the reasons below, Plaintiffs' motion for leave to file the Proposed Complaint is granted in substantial part. The Proposed Complaint adequately **[*11]** pleads (at least as to some Defendants) all of Plaintiffs' claims, except for the Sherman Act claim, which still fails for lack of Article III standing.

A. Contradictions between the CCAC and Proposed Complaint

Defendants argue that it is inappropriate even to assess the sufficiency of the facts pleaded in the Proposed Complaint, because "Plaintiffs may not delete previously pleaded factual allegations and replace them with contradictory allegations." This argument fails, because Plaintiffs inserted the challenged amendments and corrections to their pleading with the help of an expert to address the CCAC's deficiencies identified in *Contant I*.

Pursuant to *Rule 15(a)*, "The court should freely give leave when justice so requires." *Fed. R. Civ. P. 15*. "Leave to amend, though liberally granted, may properly be denied for: undue delay, bad faith or dilatory motive on the part of the movant . . . ." *Ruotolo v. City of New York, 514 F.3d 184, 191 (2d Cir. 2008)* (citations omitted); *accord* *Melendez v. POP Displays USA, No. 18 Civ. 2323, 2018 U.S. Dist. LEXIS 126159, 2018 WL 3611934, at *3 (S.D.N.Y. July 27, 2018)*. It is "well established that an amended complaint ordinarily supersedes the original and renders it of no legal effect." *Int'l Controls Corp. v. Vesco, 556 F.2d 665, 668 (2d Cir. 1977)*; *accord* Elliott v. City of Hartford, 649 F. App'x 31, 32 (2d Cir. 2016) (summary order).

This is not a case where Plaintiffs have blatantly changed their version of facts known personally to them, suggesting bad faith. Here, the Proposed **[*12]** Complaint corrects and clarifies a description of a complex business transaction outside the ken of Plaintiffs and their lawyers. *See, e.g.,* *Bernadotte v. New York Hosp. Med. Ctr. of Queens, No. 13 Civ. 965, 2014 U.S. Dist. LEXIS 26115, 2014 WL 808013, at *6 (E.D.N.Y. Feb. 28, 2014)* ("Taken as a whole, while not congruous, Plaintiff's allegations are not in such direct contradiction that the Court is moved to abandon the usual deference afforded to an Amended Complaint."); *Streit v. Bushnell, 424 F. Supp. 2d 633, 640 (S.D.N.Y. 2006)* ("It would be a harsh rule of law indeed if a litigant were to change a statement in an amended pleading to repair a weakness cited by an adversary or by the Court, only to have the case dismissed because the conforming change in some way may conflict with an allegation in the earlier pleadings"). Assessing the Proposed Complaint's sufficiency is appropriate.

B. Sherman Act Claim

The Proposed Complaint's Sherman Act claim once again fails for lack of Article III standing. "[T]he irreducible constitutional minimum of standing contains three elements." *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. "The plaintiff must have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." *Spokeo, Inc. v Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)* (citation omitted).

Plaintiffs seek only injunctive relief with respect to their Sherman Act Claim, presumably **[*13]** because they may not seek damages as indirect purchasers. *See* *Illinois Brick Co. v. Illinois, 431 U.S. 720, 735, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)* (holding the treble damage actions under *§ 4* of the Clayton Act are limited to "direct purchaser[s]"); *see also* *Lotes Co. v. Hon Hai Precision Indus. Co., 753 F.3d 395, 413 n.7 (2d Cir. 2014)* ("The indirect purchaser doctrine . . . does not apply to claims for equitable relief."). However, injunctive relief is not available because Plaintiffs fail to allege any ongoing misconduct. *See* *15 U.S.C. § 26*. Past injuries "do not confer standing . . . unless the plaintiff can demonstrate that she is likely to be harmed again in the future in a similar way." *Nicosia v. Amazon.com, Inc., 834 F.3d 220, 239 (2d Cir. 2016)* (affirming dismissal of injunctive claim).

Like the CCAC, the Proposed Complaint pleads no plausible threat of ongoing or recurring violations. The Proposed Complaint asserts a Class Period ending on December 31, 2013, suggesting the alleged violations ended in 2013. The Proposed Complaint alleges that, following investigations, guilty pleas and fines, "Defendants terminated and suspended traders, forced traders to resign and implemented internal safeguards. . . ." -- suggesting that Defendants have reformed their FX operations.

Plaintiffs assert three arguments why the Proposed Complaint pleads a sufficient threat of future harm; none are persuasive. First, Plaintiffs **[*14]** point to "recent developments in government investigations" into the price fixing conspiracy. This argument fails, because the Government's uncovering of further details with respect to Defendants' past misconduct does not imply that the misconduct is continuing or likely to recur. Second, Plaintiffs argue that allegations "that the same market conditions that facilitated the Conspiracy continue today" are sufficient, because "[i]f Defendants continue to be able to manipulate FX prices, those Plaintiffs will continue to be harmed." This argument assumes without reason that, despite being caught and punished for manipulating the market, Defendants will continue to manipulate the market simply because they allegedly still can. *See, e.g., Shain v. Ellison, 356 F.3d 211, 216 (2d Cir. 2004)* (denying injunctive relief where an "accumulation of inferences is simply too speculative and conjectural to supply a predicate for prospective injunctive relief"); *Nat'l Football League Mgmt. Council v. Nat'l Football League Players Ass'n, 296 F. Supp. 3d 614, 625 (S.D.N.Y. 2017)* (denying an injunction where the "alleged harm [was] far too speculative to justify injunctive relief").

Third, as evidence of an ongoing threat, Plaintiffs point to a paragraph in the Proposed Complaint that alleges ongoing regulatory violations "that included failing to segregate client **[*15]** funds, failing to report FX transactions, failure to report Credit Suisse's short positions, selling risky investment products to clients, and the charging of incorrect rates and commissions to FX clients." But this allegation does not describe an ongoing threat from the *same* FX-related misconduct that catalyzed the present lawsuit -- i.e., collusion amongst Defendants to rig FX benchmarks. Because Plaintiffs cannot obtain damages or injunctive relief under the Sherman Act, their alleged injury is not "likely to be redressed by a favorable judicial decision," *Spokeo, 136 S.Ct. at 1547*, and leave to amend is denied.

C. State Law Claims -- Proximate Cause

As discussed in detail in *Contant I*, proximate cause is required for all of the Plaintiffs' state law claims, which are unchanged in the Proposed Complaint. *2018 U.S. Dist. LEXIS 42870, 2018 WL 1353290, at *7*. Proximate cause -- under the rubric of "directness" -- is also in effect a requirement for antitrust standing for at least the California, Illinois and New York antitrust claims. *See Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 135, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)* (noting that "directness" is in essence a proximate cause requirement); *see also Harry v. Total Gas & Power N. Am., Inc., 889 F.3d 104, 116 (2d Cir. 2018)* ("The overall [antitrust standing] inquiry is akin to proximate cause in tort law . . . ."); *see generally Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 540-45, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("*AGC*") (discussing the "efficient enforcer" doctrine **[*16]** and the four factors used to measure the link between a defendant's conduct and the plaintiff's injury in an antitrust action); *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 778 (2d Cir. 2016)* ("the 'directness or indirectness of the asserted injury' [] requires evaluation of the 'chain of causation' linking appellants' asserted injury and the Banks' alleged price-fixing").

"A proximate cause determination does not require a jury to identify the liable party as the sole cause of harm; it only asks that the identified cause be a substantial factor in bringing about the injury." *Hydro Inv'rs, Inc. v. Trafalgar Power Inc., 227 F.3d 8, 15 (2d Cir. 2000)*; *accord ScentSational Techs., LLC v. Pepsico, Inc., No. 13 Civ. 8645, 2018 U.S. Dist. LEXIS 91180, 2018 WL 2465370, at *7 (S.D.N.Y. May 23, 2018)*. The harm alleged need have only "a sufficiently close connection to the conduct the statute prohibits," *Lexmark, 572 U.S. at 133* -- proximate causation does not demand total causation.

Accepting the Proposed Complaint's allegation that retail FX prices "move in nearperfect correlation" with FX benchmarks, because FX benchmarks constitute the predominant component of FX retail prices, a direct link connects the alleged anticompetitive conduct and Plaintiffs' injury; any engineered increase in FX benchmark rates galvanized an equivalent increase in the price paid by retail consumers. *See In re Foreign Exch. Benchmark Rates Antitrust Litig., No. 13 Civ. 7789, 2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *9 (S.D.N.Y. Sept. 20, 2016)* ("*FOREX*") (directness factor satisfied where rates in the market in which plaintiffs participated allegedly **[*17]** "track" and "move in virtual lockstep" with rates in the manipulated market).

Defendants argue that the Proposed Complaint does not sufficiently plead proximate cause or "directness" because Plaintiffs' purchases cannot be traced to Defendants: "Plaintiffs here allege that they purchased currency from an unidentified [Retail Dealer] that dealt with a defendant, but they cannot plausibly allege a direct and proximate connection between their completely fungible currency transactions in the retail foreign currency market and any antecedent transaction between their [Retail Dealer] and one of the defendants." This argument fails for two reasons. First, the Proposed Complaint alleges that Defendants manipulated the FX benchmark rates, which underlie the pricing of all FX Instruments, including those sold by nonconspirators. *See* *Gelboim, 823 F.3d at 779* (stating that, where defendants allegedly manipulated the LIBOR benchmark, "there appears to be no difference in the injury alleged by those who dealt in LIBOR-denominated instruments, whether their transactions were conducted directly or indirectly with the Banks").

Second, this argument mischaracterizes the Proposed Complaint, which limits the putative class to **[*18]** those who purchased indirectly from a Defendant through a Retail Dealer:

> All persons and entities who . . . indirectly purchased an FX Instrument *from a Defendant or co-conspirator* in the United States and/or while domiciled in the United States, by entering into an FX Instrument with a member of the Direct Settlement Class [i.e., the Retail Dealers who were plaintiffs and class members in *FOREX*], where the Direct Settlement Class member entered into the FX Instrument *directly with a Defendant or coconspirator* [emphasis added].

The "Direct Settlement Class" in *FOREX* is defined to include participants in the FX spot market, who traded "FX Instruments" and "FX Exchange-Traded Instruments" with Defendants, but does not include consumers "who purchased supracompetitive foreign currency exchange rates from Defendants and their co-conspirators *for their own end use* . . . ." *Nypl v. JP Morgan Chase & Co., No. 15 Civ. 9300, 2016 U.S. Dist. LEXIS 75155, 2016 WL 3211440, at *2 (S.D.N.Y. June 8, 2016)*.

Contrary to Defendants' argument, these transactions are not impossible to identify because of the fungible nature of currency. By mirroring the "Direct Settlement Class" in *FOREX*, the putative class in this case does not include Plaintiffs who purchased fungible currency notes from a Retail Dealer to use in buying goods **[*19]** and services. It includes only Plaintiffs who purchased a traceable FX instrument from a Retail Dealer. The Proposed Complaint alleges that every FX instrument Plaintiffs purchased from a Retail Dealer is traceable back to a Defendant liquidity provider, which is plausible given the recordkeeping requirements imposed on Retail Dealers by the Commodity Futures Trading Commission. *See* *17 C.F.R. § 5.14* ("No person shall be registered as a retail foreign exchange dealer under the Act unless . . . he prepares and keeps current ledgers or other similar records which show or summarize, with appropriate references to supporting documents, *each transaction* affecting his asset, liability, income, expense and capital accounts . . . .") (emphasis added). Accordingly, the Proposed Complaint alleges that Plaintiffs' losses were proximately caused by, and flowed directly from, Defendants' misconduct.[4]

Defendants argue that "because the bid and ask quotes of defendants and other nondefendant liquidity providers are comingled in the [Retail Dealers'] algorithms, plaintiffs cannot rely on those algorithms -- and their purported self-imposed absence of pricing discretion -- to show that defendants' alleged conduct **[*20]** directly or proximately caused plaintiffs' claimed injury." This argument is inapposite.

First, Plaintiffs are not required to provide expert analysis at the pleading stage, much less rebut anticipated counterarguments. *See* *Elkind v. Revlon Consumer Prods. Corp., No. 14 Civ. 2484, 2015 U.S. Dist. LEXIS 63464, 2015 WL 2344134, at *11 n.7 (E.D.N.Y. May 14, 2015)* (stating that plaintiffs are generally not required to provide expert analysis at the pleading stage).

---

[4] Defendants argue in a summary fashion that Plaintiffs' inability to trace the foreign currency they purchased in the retail market to defendants' conduct undermines Plaintiff's ability to meet the other *AGC* antitrust standing requirements, as it does the "directness" requirement. *See* *AGC, 459 U.S. at 540-45*; *Gelboim, 823 F.3d at 778*. This argument fails for the same reasons as explained in the text; the Proposed Complaint plausibly alleges Plaintiffs' ability to trace the transactions at issue to the Defendants' wrongful conduct.

Second, the Proposed Complaint alleges that the conspiring Defendant liquidity providers controlled 90% of trading in the global FX spot market and 98% of trading in the United States FX spot market. Given this market share and the likelihood that streaming quotes would include those from Defendants, the Proposed Complaint plausibly alleges that Defendants' misconduct was the "substantial factor in bringing about the injury." *Hydro Inv'rs, 227 F.3d at 15*.

D. State Law Claims -- Due Process Requirements

The Proposed Complaint also pleads facts sufficient to satisfy due process. The Proposed Complaint pleads consumer and antitrust claims under the law of 8 different states (New York, Arizona, California, Florida, Illinois, Massachusetts, Minnesota, North Carolina), in each case on behalf of one or more named Plaintiffs who both reside in that state and purchased FX instruments in that state, and **[*21]** on behalf of a putative class of those who "purchased an FX Instrument from a Defendant or co-conspirator in [that state] and/or while domiciled in [that state] . . . ."

Under the *Fourteenth Amendment Due Process Clause*, a state law may not be applied unless that state has "a significant contact or significant aggregation of contacts, creating state interests, such that choice of its law is neither arbitrary nor fundamentally unfair." *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 818, 105 S. Ct. 2965, 86 L. Ed. 2d 628 (1985)* (citing *Allstate Ins. Co. v. Hague, 449 U.S. 302, 312-13, 101 S. Ct. 633, 66 L. Ed. 2d 521 (1981))*. Application of a state's law is invalid where the state has "no significant contact or significant aggregation of contacts, creating state interests, with the parties and the occurrence or transaction." *Allstate, 449 U.S. at 308*. This places "modest restrictions on the application of forum law." *Shutts, 472 U.S. at 818*.

Courts treat antitrust claims as torts for purposes of due process analyses. *See In re Magnetic Audiotape Antitrust Litig., 334 F.3d 204, 208 (2d Cir. 2003)* (stating that the "effects" test, which is used to analyze whether the exercise of specific personal jurisdiction comports with due process in the tort context, applies to antitrust claims).[5] For tort claims, the factors relevant to determining a state's interest are: "(a) the place where the injury occurred, (b) the place where the conduct causing the injury occurred, (c) the domicile, residence, nationality, place of incorporation **[*22]** and place of business of the parties, and (d) the place where the relationship, if any, between the parties is centered." *Johnson v. Nextel Commc'ns Inc., 780 F.3d 128, 142 (2d Cir. 2015)* (citing *Restatement (Second) of Conflict of Laws § 145(2)* (1971)).

The Proposed Complaint satisfies these due process requirements by alleging facts relevant to the first three factors. Factor (d) is inapplicable because, as alleged, Plaintiffs did not transact with Defendants and had no relationship with them. The Proposed Complaint alleges that at least one Plaintiff lives in each of the states in question, and that Plaintiff purchased an FX instrument while physically located in their respective states of residence. Plaintiffs were therefore injured in their home states. *See In re TFT-LCD (Flat Panel) Antitrust Litig., No. 09 Civ. 4997, 2012 U.S. Dist. LEXIS 121756, 2012 WL 3727221, at *3 (N.D. Cal. Aug. 27, 2012)* ("for purposes of state law indirect purchaser claims, plaintiffs are deemed to be injured in the states where they agreed to pay inflated prices for products."). The Proposed Complaint alleges that the Defendants each maintain a significant corporate presence in each of the states. Accordingly, application of the laws of each Plaintiff's home state to that Plaintiff's claims comports with due process. *See, e.g., Falise v. Am. Tobacco Co., 94 F. Supp. 2d 316, 354 (E.D.N.Y. 2000)* (holding that application of New York law satisfied due process where plaintiffs suffered injury in New York). **[*23]**

Defendants argue that the Proposed Complaint does not satisfy the requirements of due process because Plaintiffs must plead facts to show that title passed in their home states. Defendants cite no authority for the proposition that,

---

[5] *See also Fashion Two Twenty, Inc. v. Steinberg, 339 F. Supp. 836, 841 (E.D.N.Y. 1971)* ("[A]n action alleging violations of the antitrust laws is a claim for injuries sustained, and therefore in the nature of a tort."); *accord* ***Daniel v. Am. Bd. of Emergency Med., 988 F. Supp. 127, 231-32 (W.D.N.Y. 1997)*** (analyzing antitrust actions for purposes of the New York long-arm statute); *Saratoga Harness Racing Inc. v. Veneglia, 897 F. Supp. 38, 44 n.8 (N.D.N.Y. 1995)* (same).

for the *Nextel* state interest analysis, the place of injury is where title passes. The two securities cases upon which Defendants rely have nothing to do with application of state law under the *Due Process Clause* and are inapposite.

E. State-Specific Arguments

Defendants raise arguments specific to the antitrust laws of six of the states. For the reasons below, leave to replead the Florida and Illinois claims is denied with respect to Bank of America, N.A., HSBC Bank USA, N.A. and JPMorgan Chase Bank, N.A. Leave to amend is otherwise granted.

1. Arizona

The Proposed Complaint asserts a claim under Arizona's Uniform State Antitrust Act (the "AUSAA"), *Ariz. Rev. Stat. Ann. § 44-1401, et seq.*, on behalf of an Arizona resident and an Arizona putative class. Defendants argue that the Proposed Complaint fails to state a claim under the AUSAA, because Plaintiffs did not serve Arizona's Attorney General with a copy of the CCAC contemporaneously with its filing, as required by the statute. *See Ariz. Rev. Stat. Ann. § 44-1415* ("A person filing a complaint, **[*24]** counterclaim or answer for any violation of the provisions of this article shall simultaneously with the filing of the pleading . . . in the federal court, serve a copy of the complaint, counterclaim or answer on the attorney general."). Plaintiffs argue that because the provision is procedural, not substantive, under *Shady Grove Orthopedic Associates, P.A. v. Allstate Insurance Co., 559 U.S. 393, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010)*, it is inapplicable in federal proceedings.

Deciding the *Shady Grove* issue, on which various district courts have split, is unnecessary. *Compare In re Asacol Antitrust Litig., No. 15 Civ. 12730, 2016 U.S. Dist. LEXIS 94605, 2016 WL 4083333, at *15 (D. Mass. July 20, 2016)* (dismissing without prejudice claims under Arizona ***antitrust law*** for a failure to serve the Arizona Attorney General), *with In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 254 (D. Conn. 2015)* (declining to dismiss for failure to serve the state attorney general under an analogous Hawaii statute). Even those courts that have held that service requirements are substantive, and hence enforceable in federal court, have dismissed without prejudice to renewal after proper service. *See, e.g., Asacol, 2016 U.S. Dist. LEXIS 94605, 2016 WL 4083333*; *In re Chocolate Confectionary Antitrust Litig., 749 F. Supp. 2d 224, 232 (M.D. Pa. 2010)*, *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d 1133, 1158 (N.D. Cal. 2009)* (same). Plaintiffs have already served the Arizona Attorney General the CCAC, which in any event was dismissed, and presumably they will timely serve the new complaint filed pursuant to this Opinion. No reason exists to deny leave to file an amended complaint that includes the AUSAA claim.

2. California

The **[*25]** Proposed Complaint asserts two claims for violation of the Cartwright Act and California's Unfair Competition Law (the "UCL"), respectively, on behalf of the California Plaintiffs and a California putative class. *California Business and Professions Code § 16720, et seq.*; *1720, et seq.* Defendants argue that the Proposed Complaint is deficient as to these claims because it "pleads no specific intrastate conduct within California."

This argument fails because it misstates the law. To state a valid Cartwright Act or UCL claim, a plaintiff must allege either (1) that the antitrust misconduct occurred within California *or* (2) that the plaintiff suffered antitrust injury in California. *See RLH Indus., Inc. v. SBC Communications, Inc., 133 Cal. App. 4th 1277, 1281-82, 35 Cal. Rptr. 3d 469 (2005)* (recognizing that the Cartwright Act is meant to protect against "anticompetitive conduct that causes injury in California"); *Norwest Mortg., Inc. v. Superior Court, 72 Cal. App. 4th 214, 226, 85 Cal. Rptr. 2d 18 (1st Div. 1999)* (holding that the UCL applies where anticompetitive conduct occurred in California or when the plaintiff was injured there); *see also McKinnon v. Dollar Thrifty Auto. Grp., Inc., No. 12 Civ. 4457, 2013 U.S. Dist. LEXIS 29095, 2013 WL 791457, at *4 (N.D. Cal. Mar. 4, 2013)* (stating that UCL claims are inadequate "where none of the alleged misconduct or injuries occurred in California"). Even the case cited by Defendants illustrates the point; *Meridian Project Sys. v. Hardin Constr. Co., 404 F. Supp. 2d 1214, 1225 (E.D. Cal. 2005)*, states, "California's UCL does not support claims by non-California residents where none of the alleged misconduct *or injuries* occurred **[*26]** in California." *404 F. Supp. 2d at 1225* (emphasis added).

Here, the Proposed Complaint alleges that the California Plaintiffs were injured in California when they purchased overpriced FX instruments while in California. Accordingly, the Proposed Complaint's California claims are adequately pleaded.[6]

3. Florida

The Proposed Complaint pleads a cause of action under the Florida Deceptive and Unfair Trade Practices Act (the "FDUTPA"), *Fl. Stat. § 501.201, et seq.*, on behalf of the Florida residents in the purported class. Defendants argue that the Proposed Complaint fails to state a claim under the FDUTPA because (1) Plaintiffs are not "consumers" within the meaning of the statute and (2) the FDUTPA does not apply to federally regulated banks. Neither argument merits denial of leave to amend.

a. "Consumers"

Defendants argue that, for purposes of FDUTPA, "[c]onsumers are those who purchased goods and services for personal, family or household use . . . ." This argument misstates the law. In 2003, the FDUTPA was amended to apply to a broader category than just consumers. *See* *Fla. Stat. Ann. § 501.202* ("The provisions of this part shall be construed liberally . . . . To protect the consuming public *and legitimate enterprises* from those who engage in unfair methods **[*27]** of competition, or unconscionable, deceptive, or unfair acts or practices in the conduct of any trade or commerce." (emphasis added)). Furthermore, the FDUTPA defines the terms "consumer" and "trade or commerce" as:

> "Consumer" means an individual; child, by and through its parent or legal guardian; business; firm; association; joint venture; partnership; estate; trust; business trust; syndicate; fiduciary; corporation; any commercial entity, however denominated; or any other group or combination.
> "Trade or commerce" means the advertising, soliciting, providing, offering, or distributing, whether by sale, rental, or otherwise, of any good or service, or any property, whether tangible or intangible, or any other article, commodity, or thing of value, wherever situated. "Trade or commerce" shall include the conduct of any trade or commerce, however denominated, including any nonprofit or not-for-profit person or activity.

Fla. Stat. Ann. § 501.203(7-8). Given these broad definitions, Florida courts have clarified that the FDUTPA "is not limited to contracts for 'personal, family or household purposes' as defined in the Uniform Commercial Code." *State v. Commerce Commercial Leasing, LLC, 946 So. 2d 1253, 1258 (Fla. Dist. Ct. App. 2007)*. Plaintiffs' purchase of FX instruments falls within these definitions because **[*28]** Plaintiffs are individuals, businesses or associations; and Plaintiffs purchased FX instruments, which are, at minimum, a "thing of value." *Fla. Stat. Ann. § 501.203(8)*.

In arguing to the contrary, Defendants cite two types of cases, neither of which is persuasive. First, Defendants cite cases involving claims brought by sellers -- rather than the buyers -- of goods and services, who do not qualify as "consumers" because they have not purchased anything. *See* *Burger King Corp. v. Ashland Equities, Inc., 161 F.Supp.2d 1331, 1338 (S.D. Fla. 2001)* (holding that plaintiffs, who owned Burger King franchises and claimed that Burger King interfered with their attempt to sell those franchises, were not "consumers" under FDUTPA); *N.G.L. Travel Assocs. v. Celebrity Cruises Inc., 764 So. 2d 672, 674 (Fla. 3d DCA 2000)* (holding that travel agencies that sold services to cruise lines, rather than purchasing services from them, were not "consumers" entitled to protection

[6] In this regard, Plaintiffs should limit the definition of the California Class to those who purchased an FX Instrument in California, and not include those who were merely domiciled there. *See* *In re TFT-LCD, 2012 U.S. Dist. LEXIS 121756, 2012 WL 3727221, at *3* ("for purposes of state law indirect purchaser claims, plaintiffs are deemed to be injured in the states where they agreed to pay inflated prices for products.").

under FDUTPA). These cases are inapplicable because Plaintiffs are the buyers, rather than the sellers, of FX instruments.[7]

Second, Defendants cite cases that have defined the term "unfair trade practices" and held that "deceptive conduct" relating to securities is not covered by the FDUTPA, because (1) federal securities "laws provide plaintiffs with an appropriate civil remedy" and (2) the FDUTPA is modeled after the **[*29]** Federal Trade Commission Act, which does not apply to securities transactions. *Rogers v. Cisco Sys., Inc., 268 F. Supp. 2d 1305, 1315-16 (N.D. Fla. 2003)*; *see also* *Minshall v. TD Evergreen, No. 05 Civ. 1232, 2005 U.S. Dist. LEXIS 50237, 2005 WL 8145046, at *1 (M.D. Fla. Aug. 4, 2005)*. These cases are inapplicable, first, because they do not shed light on the definition of "consumer." Also, although FX instruments are analogous to securities in some respects, Plaintiffs do not have recourse under federal securities or antitrust laws. Defendants cite nothing to suggest that the Florida legislature meant to exempt the conduct in question from FDUTPA.

b. Banking Exception

Leave to amend is denied with respect to three of the Defendants. The FDUTPA explicitly "does not apply to . . . . Banks, credit unions, and savings and loan associations regulated by federal agencies." *Fla. Stat. Ann. § 501.212(4)(c)*; *see also* *Bankers Tr. Co. v. Basciano, 960 So. 2d 773, 778 (Fla. 5th DCA 2007)* ("FDUTPA does not apply to banks and savings and loan associations regulated by the state or the federal government."). Plaintiffs argue that this statutory exception to FDUTPA "only applies where the specific activities at issue were subject to federal banking laws." "A review of the governing case law reveals some ambiguity as to whether being regulated by a federal agency is sufficient in and of itself to exempt an entity under *Fla. Stat. § 501.212(4)(c)* or if, in addition to being federally regulated, the activity at issue **[*30]** must be subject to the federal regulatory authority." *Regions Bank v. Legal Outsource PA, No. 214 Civ. 476, 2015 U.S. Dist. LEXIS 162248, 2015 WL 7777516, at *5 (M.D. Fla. Dec. 3, 2015)* (collecting cases that reached conflicting conclusions regarding whether the FDUTPA can ever apply to banks).

"The majority of Florida courts" have held that a federally regulated bank cannot be held liable under the FDUTPA, regardless of whether the anticompetitive activity at issue is itself federally regulated. *Id. See, e.g.,* *Bankers Tr., 960 So. 2d at 779* ("the statute unambiguously excludes banks."); *see also* *Wing Kei Ho v. Bank of Am., N.A., No. 16 Civ. 80538, 2016 U.S. Dist. LEXIS 195248, 2016 WL 8679174, at *4 (S.D. Fla. Sept. 19, 2016)*; *Wilson v. EverBank, N.A., 77 F. Supp. 3d 1202, 1221 (S.D. Fla. 2015)*; *Sovereign Bonds Exch. LLC v. Fed. Republic of Germany, 899 F. Supp. 2d 1304, 1315 (S.D. Fla. 2010)*.

This majority position is most likely to be found correct if considered by the Supreme Court of Florida. "When the language of the statute is clear and unambiguous and conveys a clear and definite meaning, there is no occasion for resorting to the rules of statutory interpretation and construction; the statute must be given its plain and obvious meaning." *Bank of New York Mellon v. Glenville, __ So.3d __, 2018 Fla. LEXIS 1580, 2018 WL 4327881, at *5 (Fla. Sept. 6, 2018)*. Here, the FDUTPA exception is explicit; the FDUTPA cannot be applied to a "bank" "regulated by federal agencies" -- regardless of what activities are regulated. *Fla. Stat. Ann. § 501.212(4)(c)*. Plaintiffs' additional argument that Defendant's FX activities are not "federally regulated" is unpersuasive in light of the Proposed Complaint's protracted discussion of the various federal entities that levied civil and criminal **[*31]** penalties against Defendants for the precise FX benchmark rigging at issue here, including, for example, the Commodity Futures Trading Commission and Federal Reserve.

---

[7] Defendants cite other cases in which the plaintiff also had not purchased anything, but that are less applicable to the facts at hand. *See, e.g.,* *Kertesz v. Net Transactions, Ltd., 635 F. Supp. 2d 1339, 1350 (S.D. Fla. 2009)* (holding that a college student, whose photograph appeared in advertising on a pornographic website, was not a "consumer" who can sue under FDUTPA); *Cannova v. Breckenridge Pharm., Inc., No. 08 Civ. 81145, 2009 U.S. Dist. LEXIS 1168, 2009 WL 64337, at *3 (S.D. Fla. Jan. 9, 2009)* (dismissing an FDUTPA claim premised on wrongful termination of employment).

The Parties dispute which Defendants are "banks" within the meaning of the exemption. Defendants fall into three categories: (1) three Defendants are federally chartered national associations (the "NAs"); (2) twenty-four Defendants are bank holding companies (the "BHCs") or their subsidiaries and (3) twenty-four Defendants are foreign banks, foreign banking organizations or subsidiaries thereof (the "Foreign Defendants").

All of the NAs are "banks" within the meaning of the FDUTPA, and Plaintiffs concede as much.[8] *See George v. Wells Fargo Bank, N.A., No. 13 Civ. 80776, 2014 U.S. Dist. LEXIS 2000, 2014 WL 61487, at *5 (S.D. Fla. Jan. 8, 2014)* ("There can be no dispute that 'N.A.' stands for 'National Bank.' As a National Bank, Defendant is exempt from FDUTPA."). But ambiguity exists with respect to what non-NA entities constitute "banks" for the purposes of the FDUTPA exemption. *See Brown v. Capital One Bank (USA), N.A., No. 15 Civ. 60590, 2015 U.S. Dist. LEXIS 193887, 2015 WL 12712062, at *2 (S.D. Fla. June 19, 2015)* (stating that "there is no express definition of 'bank' or 'federal agency' within the meaning of [FDUTPA]").[9]

In the absence of guidance from the Florida courts, *see Casey v. Merck & Co., 653 F.3d 95, 100 (2d Cir. 2011)* ("To determine questions of state law, we look principally to the opinions of **[*32]** that state's courts."), this Opinion refers to the definition of "bank" from the "Taxation and Finance" portion of the Florida Annotated Statutes:

> The term "bank" means a bank holding company registered under the Bank Holding Company Act of 1956 of the United States, 12 U.S.C. ss. 1841-1849, as amended, or a bank or trust company incorporated and doing business under the laws of the United States (including laws relating to the District of Columbia), of any state, or of any territory, a substantial part of the business of which consists of receiving deposits and making loans and discounts or of exercising fiduciary powers similar to those permitted to national banks under authority of the Comptroller of the Currency and which is subject by law to supervision and examination by state, territorial, or federal authority having supervision over banking institutions. The term "bank" also includes any banking association, corporation, or other similar organization organized and operated under the laws of any foreign country, which banking association, corporation, or other organization is also operating in this state pursuant to chapter 663.

Fla. Stat. Ann. § 220.62.

In light of this definition, and lacking any other, **[*33]** leave to amend is granted with respect to both the BHCs and the Foreign Defendants. Accepting the facts pleaded in the Proposed Complaint, and drawing all inferences in Plaintiffs' favor, it is plausible that the BHCs do not qualify as banks under this definition because a "a substantial part of the[ir] business" does not consist of "receiving deposits and making loans and discounts or of exercising fiduciary powers similar to those permitted to national banks." *Id.* Likewise, it is plausible to infer that some of the Foreign Defendants will not qualify as banks because they do not operate in Florida "pursuant to chapter 663." *Id.* Determining which, if any, of the BHCs and Foreign Defendants qualify as banks will require discovery and need to be resolved at a later stage. *See Christie v. Bank of Am., N.A., No. 13 Civ. 1371, 2014 U.S. Dist. LEXIS 147022, 2014 WL 5285987, at *4 (M.D. Fla. Oct. 15, 2014)* (denying a motion to dismiss a FDUTPA claim because the issue of whether the defendant qualified as a "bank" was "better addressed on a more fully developed record"); *Renfrow v. First Mortg. Am., Inc., No. 08 Civ. 80233, 2011 U.S. Dist. LEXIS 63392, 2011 WL 2416247, at *3 (S.D. Fla. June*

---

8 Only three NAs are left from the original four because Citibank, N.A., is no longer a party to the action.

9 The BHCs and Foreign Defendants are not necessarily "banks." *See Bankers Tr. Co. v. Basciano, 960 So. 2d 773, 779 (Fla. Dist. Ct. App. 2007)* ("Nothing in FDUTPA suggests that bank subsidiaries, affiliates or agents are necessarily exempt from FDUTPA."); *see also State v. Commerce Commercial Leasing, LLC, 946 So. 2d 1253, 1258 (Fla. Dist. Ct. App. 2007)* ("It is quite a leap, however, to suggest that, just because an entity is a subsidiary of a bank, it is necessarily exempt from the Act."); *but see Sovereign Bonds Exch. LLC v. Fed. Republic of Germany, 899 F. Supp. 2d 1304, 1316 (S.D. Fla. 2010)* (holding that German Banks cannot be sued under the FDUTPA because they "are subject to federal regulation under the International Banking Act of 1978, the Foreign Bank Supervision Enhancement Act of 1991, and the Gramm-Leach-Bliley Act of 1999 . . . ."); *Caban v. J.P. Morgan Chase & Co., 606 F. Supp. 2d 1361, 1371 (S.D. Fla. 2009)* (dismissing FDUTPA claims against J.P. Morgan Chase & Co., a BHC "because the statute does not apply to federally regulated banks such as Chase.").

13, 2011) (same). Leave to amend is therefore granted in substantial part with respect to the FDUTPA claim, except that the Proposed Complaint shall not include the NAs as defendants in the Florida cause of action.

4. Illinois

The Proposed Complaint asserts **[*34]** violations of the Illinois Antitrust Act ("IAA"), *740 Ill. Comp. Stat. 10/1, et seq.*, on behalf of the Illinois Plaintiff and an Illinois putative class. Defendants argue that the Proposed Complaint fails to state a claim under the IAA because (1) the IAA does not allow for class actions and (2) the IAA does not apply to banks. Neither argument merits denial of leave to amend.

a. Class Actions

The IAA states, "no person shall be authorized to maintain a class action in any court of this State for indirect purchasers asserting claims under this Act, with the sole exception of this State's Attorney General, who may maintain an action parens patriae as provided in this subsection." *740 Ill. Comp. Stat. Ann. 10/7(2)*. If, as Defendants argue, this provision is "substantive" under the doctrine of *Shady Grove, 559 U.S. at 397-406*, then it must be applied in federal court. But if, as Plaintiffs argue, the provision is "procedural" under the doctrine of *Shady Grove, 559 U.S. at 397-406*, then only the dictates of *Rule 23* would apply. District courts have reached conflicting conclusions about whether indirect purchasers' class action claims raised under the IAA in federal court can proceed. *Compare In re Propranolol Antitrust Litig., 249 F. Supp. 3d 712, 728 (S.D.N.Y. 2017)* (holding that the IAA provision is a "state procedural rule [that] does not control in federal court, where *Rule 23* sets the only relevant **[*35]** requirements to file a class action."), *with In re Digital Music Antitrust Litig., 812 F. Supp. 2d 390, 416 (S.D.N.Y. 2011)* (concluding, by following the analysis outlined in Justice Stevens's *Shady Grove* concurrence, that "[b]ecause the indirect purchaser restrictions of the IAA are 'intertwined' with the underlying substantive right, application of *Rule 23* would 'abridge, enlarge or modify' Illinois' substantive rights, and therefore Illinois' restrictions on indirect purchaser actions must be applied in federal court.").

For two reasons, the IAA allows for class actions in federal court. First, it is unnecessary to reach the *Shady Grove* question, because the statute, by its terms, does not apply in federal court; the statute states, "no person shall be authorized to maintain a class action *in any court of this State* for indirect purchasers asserting claims under this Act." *740 Ill. Comp. Stat. Ann. 10/7(2)*. The proscription has no effect on indirect purchaser class claims brought outside of Illinois courts. *Id.; see also In re Aggrenox Antitrust Litig., No. 14 Md. 2516, 2016 U.S. Dist. LEXIS 104647, 2016 WL 4204478, at *5 (D. Conn. Aug. 9, 2016)* (holding that an IAA class action could proceed in federal court).

Second, even if it is necessary to reach the *Shady Grove* analysis, the statute is procedural, not substantive, and does not apply in federal court. In *Shady Grove*, the New York statute, which the Supreme Court held **[*36]** to be procedural, stated that "an action to recover a penalty, or minimum measure of recovery created or imposed by statute may not be maintained as a class action." *N.Y. C.P.L.R. 901; see Shady Grove, 559 U.S. at 397*. If that New York statute, which foreclosed a wide range of potential class actions, did not "abridge, enlarge or modify any substantive right," then the IAA, which applies exclusively to antitrust class actions, must also be procedural. In short, although some courts have reached a conflicting conclusion by following the reasoning of one justice's concurrence, the holding of *Shady Grove*, which was approved by five justices, is controlling.

b. Banking Exemption

Defendants next argue that they are exempt under the IAA's banking exemption, which states, "No provisions of this Act shall be construed to make illegal . . . . the activities of any state or national bank to the extent that such activities are regulated or supervised by officers of the state or federal government under the banking laws of this

State or the United States." *740 Ill. Comp. Stat. Ann. 10/5(11)*. It appears that no court has ever applied the IAA banking exemption as the parties have not cited any case, nor has the Court found one.

For purposes of interpreting the IAA's banking exemption, **[*37]** this Opinion uses the definition of "national bank" from the Illinois Banking Act ("IBA"), *205 Ill. Comp. Stat. Ann. 5/2*, which is specifically referenced in the IAA exemption -- i.e., "the banking laws of this State." *740 Ill. Comp. Stat. Ann. 10/5(11)*. Under the IBA, "'National bank' means . . . a national banking association without regard to its location." *205 Ill. Comp. Stat. Ann. 5/2*. "'State bank' means any banking corporation that has a banking charter issued by the [Banking] Commissioner [of Illinois] under this Act." *205 Ill. Comp. Stat. Ann. 5/2*.

This reading of the IAA comports with the Illinois Bar Committee's 1967 comments to the IAA exemptions, which state, "It is assumed that all of the provisions of *Section 5* will be strictly construed and narrowly applied." *740 Ill. Comp. Stat. Ann. 10/5*. Furthermore, unlike the FDUTPA, which exempts "banks," the IAA exempts "any state or national bank." The modifiers "state or national" are presumed to carry significance and limit the definition of "bank." *See, e.g., Maimonides Med. Ctr. v. United States, 809 F.3d 85, 89 (2d Cir. 2015)* ("we must give effect to every word of a statute wherever possible.") (quotation marks omitted). Leave to amend is denied with respect to the NAs, which clearly are within the definition of "national bank," but granted with respect to the BHCs and the Foreign Defendants.

5. Massachusetts

Plaintiffs assert a claim under Chapter **[*38]** 9 of the Massachusetts Consumer Protection Act (the "MCPA"), *Mass. Gen. Laws ch. 93A, §1 et seq.*, on behalf of the Massachusetts Plaintiff and a putative Massachusetts class. Defendants argue that Plaintiffs are not "consumers" entitled to bring a claim under Chapter 9 of the MCPA, because "trading in foreign currency instruments is not a consumer-oriented activity." In support of this argument, Defendants rely principally on *Axiom Inv. Advisors, LLC by & through Gildor Mgmt., LLC v. Deutsche Bank AG, 234 F. Supp. 3d 526, 537 (S.D.N.Y. 2017)*, which held that trading on the FX spot market between Deutsche Bank and a large hedge fund was not "consumer oriented" for purposes of the New York's Consumer Protection Act, *N.Y. Gen. Bus. Law §§ 349*, *350*. This argument fails for two reasons.

First, *Axiom*'s analysis under New York law does not shed light on the MCPA, which expressly contemplates that the purchase of investment instruments can be a consumer activity. In 1988, the Massachusetts legislature passed "An Act Providing Increased Protection for Consumers in Securities and Commodities Transactions," which amended the definition of "trade" and "commerce" in the MCPA to include the term "any security." *See Barron v. Fid. Magellan Fund, 57 Mass. App. Ct. 507, 513, 784 N.E.2d 634 (2003)* (describing the evolution of consumer securities actions under the MCPA). As a result of that amendment, the "definitions" **[*39]** chapter of MCPA states in broad terms:

> "Trade" and "commerce" shall include the advertising, the offering for sale, rent or lease, the sale, rent, lease or distribution of any services and *any property*, tangible or *intangible*, real, personal or mixed, *any security* . . . and any contract of sale of a *commodity for future delivery*, and any other article, commodity, *or thing of value wherever situate*, and shall include any trade or commerce directly or indirectly affecting the people of this commonwealth.

Mass. Gen. Laws Ann. ch. 93A, § 1(b) (emphasis added). Beyond merely incorporating the MCPA's general definitions of "trade" and "commerce," *Section 9* expressly contemplates that individual consumers can bring claims for anticompetitive conduct that negatively affects their investments. *See Mass. Gen. Laws Ann. ch. 93A, § 9(3)* ("if the court finds any method, act or practice unlawful with regard to any security or any contract of sale of a commodity for future delivery as defined in section two, and if the court finds for the petitioner, recovery shall be in the amount of actual damages.").

Accordingly, the purchase of FX instruments is not automatically outside of Chapter 9 of the MCPA simply because it is an investment. *See Barron v. Fid. Magellan Fund, 57 Mass. App. Ct. 507, 784 N.E.2d 634 (2003)* (holding that anticompetitive conduct affecting **[*40]** plaintiff's shares in a mutual fund fell within Chapter 9); *Bergeron v. Ridgewood Sec. Corp., 610 F. Supp. 2d 113, 147 (D. Mass. 2009)* ("It is beyond question that chapter 93A applies to the sale of securities."). If Plaintiffs purchased investment instruments for their personal portfolios, then FX instruments are, at minimum, "a thing of value" within the ambit of Chapter 9.

Second, Defendants' reliance on *Axiom, 234 F. Supp. 3d at 537*, is misplaced, because the factual circumstances of that case are distinguishable from this case. *Axiom* held that FX trading in the spot market between Deutsche Bank and Axiom, a large hedge fund, was not "consumer oriented" within the meaning of New York's Consumer Protection Act, *N.Y. Gen. Bus. Law §§ 349*, *350*, because it did not have "a broader impact on consumers at large." *Id.* (citing *Oswego Laborers' Local 214 Pension Fund v. Marine Midland Bank, N.A., 85 N.Y.2d 20, 647 N.E.2d 741, 623 N.Y.S.2d 529, (1995))*. *Axiom* noted that "[t]ransactions between businesses or sophisticated parties that do not affect average consumers do not constitute consumer-oriented conduct." *Id.* (citations omitted). In contrast to *Axiom*, Plaintiffs here are not billion dollar hedge funds that trade directly with liquidity providers on the FX spot market. They are individuals who purchased FX instruments from a Retail Dealer. Plaintiffs use FX instruments "for a variety of purposes, including long and short-term investing, **[*41]** portfolio diversification, and to hedge their foreign investments against risks of foreign currency fluctuations." This small-scale purchasing of FX instruments in the retail market qualifies as a consumer activity.[10]

6. North Carolina

The Proposed Complaint asserts a claim under the North Carolina Unfair Trade Practice Act (the "NCUTPA"), *N.C. Gen. Stat. § 75-1, et seq.*, on behalf of the North Carolina Plaintiff and a putative North Carolina Class. Defendants seek dismissal of the NCUTPA claim on the grounds that (1) application of the NCUTPA is precluded by the statute's regulatory scheme exception and (2) the Proposed Complaint does not plead a sufficient effect on North Carolina in state business. Both arguments fail.

a. Regulatory Scheme Exception

Defendants invoke the NCUTPA's regulatory scheme exception, which they assert "bars such claims when application of the statute would create unnecessary and overlapping supervision, enforcement, and liability in the face of existing state or federal laws and regulatory schemes. A concurrent state regulatory scheme is not required, an overlapping federal scheme is sufficient . . . ." This argument mischaracterizes the law.

An overlapping state or federal regulatory **[*42]** regime is not alone sufficient to preclude application of the NCUTPA. *See* *Walker v. Fleetwood Homes of N. Carolina, Inc., 362 N.C. 63, 70, 653 S.E.2d 393 (2007)* ("[A] violation of a regulatory statute which governs business activities 'may also be a violation of *N.C. Gen. Stat. § 75-1.1*.'"). Absent a showing that the overlapping regulatory regime provides plaintiffs an adequate remedy, courts have held NCUTPA to apply. *See* *Ellis v. Smith-Broadhurst, Inc., 48 N.C. App. 180, 182, 268 S.E.2d 271 (1980)* (holding that NCUTPA provides a cause of action to plaintiff suing an insurance company where state statutes regulating insurance companies did not provide for civil damage actions); *see also* *Ray v. United Family Life Ins. Co., 430 F. Supp. 1353, 1356 (W.D.N.C. 1977)* (same). The cases cited by Defendants are distinguishable because, in each of them, the plaintiff could bring a cause of action and seek relief under a different statute. *See, e.g.,* *Lindner v. Durham Hosiery Mills, Inc., 761 F.2d 162, 167 (4th Cir. 1985)* (holding that NCUTPA did not apply

[10] Because the Proposed Complaint asserts a consumer claim under Chapter 9 of the MCPA, it is unnecessary to address whether the alleged misconduct occurred "primarily and substantially" in Massachusetts, as that test applies only to business claims under Chapter 11 of the MCPA. *See* *Mass. Gen. Laws Ann. ch. 93A, § 11* ("No action shall be brought or maintained under this section unless the actions and transactions constituting the alleged unfair method of competition or the unfair or deceptive act or practice occurred primarily and substantially within the commonwealth."); *see also* *Pare v. Northborough Capital Partners, LLC, 89 F. Supp. 3d 192, 193 (D. Mass. 2015)* ("Unlike actions under *§ 9*, an action brought under *§ 11* must allege unfair practices that occur primarily and substantially within the Commonwealth.").

where the plaintiff could recover under North Carolina Securities Act, as well as the Securities Act of 1933 and the Securities Exchange Act of 1934); *Hagy v. Advance Auto Parts, Inc., No. 15 Civ. 509, 2016 U.S. Dist. LEXIS 133499, 2016 WL 5661530, at *2 (W.D.N.C. Sept. 28, 2016)* (holding that NCUTPA did not apply where there was a private cause of action available under the Medicare Secondary Payer Act, *42 U.S.C.A. § 1395y(b)*); *Skinner v. E.F. Hutton & Co., 314 N.C. 267, 275, 333 S.E.2d 236 (1985)* (confirming *Linder*'s holding that the NCUTPA does not apply to securities claims).[11]

b. In State Effects

Defendants also argue that the proposed NCUTPA claim does not plead an adequate effect **[*43]** on in state business. This argument fails because the Proposed Complaint alleges that the Plaintiffs, who are North Carolina residents, were injured in North Carolina when they purchased FX instruments at inflated prices while located in North Carolina.[12] This in state injury is sufficient to state a claim under the NCUTPA. *Compare* *In re Lidoderm Antitrust Litig., 103 F. Supp. 3d 1155, 1174 n. 16 (N.D. Cal. 2015)* ("Here, GEHA has alleged in-state injury and that defendants' products were being sold in North Carolina. That is sufficient at this juncture to state a claim under the NCUDTPA.") (internal citations omitted), *with* *Duke Energy Int'l, L.L.C. v. Napoli, 748 F.Supp.2d 656, 677 (S.D. Tex. 2010)* (dismissing NCUTPA where plaintiff failed to explain how it "experienced harm in North Carolina as a the result of the alleged wrongful conduct"); *In re Parmalat, 383 F. Supp. 2d 587, 603 (S.D.N.Y.2005)* (dismissing NCUTPA claim where plaintiff failed to allege any in state injury).

Both of the cases cited by Defendants illustrate that an injury that occurs in North Carolina is sufficient to sustain a NCUTPA claim. *See* *Dixie Yarns, Inc. v. Plantation Knits, Inc., No. 93 Civ. 301, 1994 U.S. Dist. LEXIS 21725, 1994 WL 910955, at *2 (W.D.N.C. July 12, 1994)* (dismissing an NCUTPA claim where "[i]t is not at all clear that Defendants injury occurred when it received the goods free on board in North Carolina."); *The 'In' Porters, S.A. v. Hanes Printables, Inc., 663 F. Supp. 494, 501 (M.D.N.C. 1987)* (holding that NCUTPA claims are not available "to a foreign plaintiff suing a resident defendant over alleged foreign injuries **[*44]** having a negligible effect, if any, on North Carolina trade or commerce."). Leave to amend the NCUTPA claim is granted.

CONCLUSION

For the foregoing reasons, Plaintiffs' motion to amend is DENIED with respect to the Sherman Act claim. Plaintiffs' motion for leave to amend is GRANTED with respect to all state law claims, except to the extent that the Proposed Complaint raises claims against the NAs under Florida and Illinois law.

The Clerk of Court is respectfully directed to close the motion at Docket Nos. 103, 105 and 120.

Dated: October 25, 2018

New York, New York

LORNA G. SCHOFIELD

---

[11] Defendants also cite *Bache Halsey Stuart, Inc. v. Hunsucker, 38 N.C. App. 414, 420, 248 S.E.2d 567 (1978)*, which held that the NCUTPA could not be applied to claims for misconduct relating to futures contracts because any state regulation of commodities brokers was pre-empted by the Commodity Futures Trading Act. That case is inapplicable here, because the Sherman Act does not preempt NCUTPA. *See* *California v. ARC Am. Corp., 490 U.S. 93, 101, 109 S. Ct. 1661, 104 L. Ed. 2d 86(1989)* ("the Court of Appeals erred in holding that the state indirect purchaser statutes are pre-empted").

[12] Plaintiffs should consider whether the definition of the North Carolina putative class should be revised.

Opinion

MEMORANDUM OPINION

KEVIN MCNULTY, U.S.D.J.:

Plaintiff Bruce E. Ellison, M.D., ("Dr. Ellison") brought this action against Defendant American Board of Orthopaedic Surgery, Inc., ("ABOS") based on alleged violations of federal ***antitrust law*** in relation to the certifications ABOS provides to certain qualifying physicians ("Board Certification"). Dr. Ellison asserts that ABOS improperly restrains trade by colluding with hospitals in requiring orthopedic surgeons to obtain Board Certification as a condition of practicing at those hospitals. According to the Amended Complaint,[1] ABOS prevents Dr. Ellison from obtaining

---

[1] For ease of reference, certain items from the record will be abbreviated as follows:

"DE __" = Docket Entry in this case

"AC" = Amended Complaint (DE 28)

"Def. Mot." = Defendant's Memo of Law in Support of its Motion to Dismiss the Amended Complaint (DE 29-1)

Board Certification unless he first has hospital medical staff privileges, thereby reducing competition at hospitals by excluding surgeons who, like Dr. Ellison, practice exclusively at ambulatory surgery centers or other places that do not offer those medical staff privileges. (AC ¶ 3) Dr. Ellison seeks declaratory and injunctive **[*2]** relief, as well as damages. ABOS has moved to dismiss the Amended Complaint on a variety of grounds. For the reasons explained in this opinion, I will dismiss the Amended Complaint pursuant to *Rule 12(b)(6)* for failure to meet the minimal pleading standards of *Rule 8*.

I. Summary

a. Factual background

Dr. Ellison holds a medical license in California, where he currently treats patients as an orthopedic surgeon. (AC ¶¶ 6, 22) For "personal and professional reasons, Dr. Ellison would like to obtain medical staff privileges" at a hospital in northern New Jersey. (*Id.* ¶ 40) The hospitals in which he seeks to apply require that he have Board Certification provided by ABOS. (*Id.* ¶ 41)

ABOS is a nonprofit organization incorporated in Delaware that conducts Board Certification programs for orthopedic surgeons. (*Id.* ¶ 7) It **[*3]** has twelve active directors and officers who reside in nine different states, none of which are located in New Jersey. (*Id.* ¶ 8; DE 29-2 ¶ 4) It also has two "Directors-Elect" who reside in Tennessee and Pennsylvania, as well as one public member who resides in Iowa. (AC ¶ 8) ABOS arranges for the administration of the written portion of its Board Certification exam through a third-party subcontractor at testing locations throughout the United States, including in New Jersey, collects "up to a million dollars or more annually" from physicians located in New Jersey, and communicates with hospitals and patients in New Jersey about which physicians hold Board Certifications. (*Id.* ¶¶ 27-29; DE 29-2 ¶ 5) ABOS does not maintain any offices, records, property, or staff in New Jersey. (DE 29-2 ¶ 4)

According to the Amended Complaint, the largest hospital system in New Jersey, RWJBarnabas Health, requires the hospitals under its purview to provide medical staff privileges only to doctors who have obtained Board Certification. (*Id.* ¶¶ 11-12) St. Peter's University Hospital, located in New Brunswick, New Jersey, also requires Board Certification as a condition of obtaining medical staff privileges. **[*4]** (*Id.* ¶ 15) Similarly, Rutgers University Hospital requires Board Certification in order to obtain medical staff privileges and will not process the applications for employment of prospective doctors unless the applicant has acquired Board Certification within seven years of completing residency training. (*Id.* ¶¶ 13-14)

Dr. Ellison alleges that the requirement for Board Certification precludes him from obtaining medical staff privileges "at the major hospitals in the regions of northern New Jersey." (*Id.* ¶ 16) Dr. Ellison successfully passed the written portion of ABOS's exam ("Part I") in Chicago, Illinois. (AC ¶¶ 42-44; DE 29-2 ¶ 6) This qualified him to take the oral portion of the exam ("Part II"), which is only administered in Chicago. (AC ¶¶ 42-44; DE 29-2 ¶ 7) However, ABOS subsequently refused to allow him to take Part II of the exam because he did not have medical staff privileges, a newly imposed prerequisite. (*Id.* ¶¶ 3, 30, 45)

This, says Dr. Ellison, confronted him with the proverbial catch-22: without medical staff privileges he cannot take Part II of the certification exam, but without certification he cannot acquire medical staff privileges. This practice, Dr. Ellison alleges, **[*5]** reduces competition to hospitals by shutting out surgeons, like himself, who practice exclusively at ambulatory surgery centers (which do not provide medical staff privileges), thereby preventing the attainment of Board Certification and reducing the supply of orthopedic surgeons available to patients. (*Id.* ¶¶ 3, 30, 33, 45) There is an exception to the staff-privileges prerequisite for physicians who have recently completed their residency, but that exception is unavailable to Dr. Ellison at this stage in his career. (*Id.* ¶ 5)

"Pl. Opp." = Plaintiff's Memo in Opposition to Defendant's Motion to Dismiss the Amended Complaint (DE 32)

"Def. Reply" = Defendant's Reply Memo of Law in Further Support of its Motion to Dismiss the Amended Complaint (DE 33)

Dr. Ellison has not applied for medical staff privileges at these New Jersey hospitals because, without board certification, rejection is likely, and a rejection of an application for medical staff privileges allegedly "results in an automatic adverse entry in the National Practitioner Data Bank, which severely damages the reputation of a physician." (*Id.* ¶ 19)

Dr. Ellison asserts that ABOS has acted in concert with hospitals to require Board Certification as a precondition for employment, thus interfering with the market of orthopedic surgery services provided at hospitals in northern New Jersey. (*Id.* ¶¶ 35, 37) He claims that this is an anticompetitive tying **[*6]** arrangement between ABOS and hospitals in violation of *Section 1 of the Sherman Act*. (*Id.* ¶ 49). In this respect, ABOS and the hospitals are allegedly acting in concert for ABOS's pecuniary benefit. (*Id.* ¶¶ 46-50) This, Dr. Ellison asserts, reduces "the availability of physicians in the relevant market, which reduces patient choice and increases health care costs." (*Id.*) He seeks damages, a declaratory judgment that ABOS has violated the *Sherman Act*, injunctive relief allowing Dr. Ellison to take Part II of the exam, an order requiring ABOS to cease requiring surgical privileges as a precondition for taking Part II of the exam, attorneys fees, and costs. (*Id.* ¶¶ 56-61)

b. Procedural history

Dr. Ellison first brought suit against ABOS in the United States District Court for the Northern District of Illinois in December 2015 (the "Illinois Complaint") seeking the same relief he seeks in the present suit. *See Ellison v. American Board of Orthopaedic Surgery, Inc.*, No. 15-cv-11848, Docket Entry 1, Illinois Complaint ¶¶ 3, 28-32. However, Dr. Ellison voluntarily dismissed the Illinois Complaint in April 2016. *Id.*

That same month Dr. Ellison filed a factually similar complaint in the Superior Court **[*7]** of New Jersey, Law Division, Union County, alleging that ABOS violated the *New Jersey Consumer Fraud Act ("NJCFA"), N.J. Stat. Ann. § 56:8-1, et seq.*, and the *New Jersey Antitrust Act, N.J. Stat. Ann. § 56:9-1, et seq.* (*See* DE 1) Dr. Ellison sought treble damages, attorneys' fees, and declaratory and injunctive relief requiring ABOS to allow him to take the Part II exam.

In November 2016, ABOS removed the case to federal court ("Removed Complaint") on the basis of diversity of citizenship. *See 28 U.S.C. § 1332(a)*. The notice of removal states that Dr. Ellison is domiciled in California, and that ABOS is a Delaware corporation with its principal place of business in North Carolina. (DE 1 ¶¶ 11-15)[2]

In February 2017, ABOS moved to dismiss the Removed Complaint on a variety of grounds. (DE 4) I granted that motion and dismissed the Removed Complaint pursuant to *Rule 12(b)(6)* for failure to meet the minimal pleading standards of *Rule 8*. (DE 17) In that opinion I noted that "[t]he vagueness of the Complaint makes it difficult to discern what, if anything, connects Dr. Ellison, ABOS, and any wrongful acts to the State of New Jersey." (*Id.* at p. 5.) Additionally, without alleging a concrete injury in fact, I could not "accept that Dr. Ellison possesse[d] a cause of action in any jurisdiction where he theoretically **[*8]** could have sought, and been refused, admitting privileges." (*Id.*) Finding that Dr. Ellison had failed to state a claim, I did "not reach, or prejudge" the issues related to personal jurisdiction, venue, or standing raised by ABOS and entered the dismissal of the Removed Complaint without prejudice to the filing of a motion to amend. (*Id.*)

Dr. Ellison subsequently moved for leave to amend the complaint, which was granted, and filed an Amended Complaint. (DE nos. 21, 27, 28) *See Ellison v. Am. Bd. of Orthopaedic Surgery, Inc., No. 16-8441, 2018 U.S. Dist. LEXIS 68549, 2018 WL 1919953, at *1 (D.N.J. Apr. 24, 2018)*. The Amended Complaint drops the counts alleging violations of New Jersey state law and instead alleges a single count of restraint of trade in violation of *Section 1 of the Sherman Act, 15 U.S.C. § 1*. (*See* AC)

---

[2] The Removed Complaint alleges, less specifically, that Dr. Ellison is located in California and that ABOS is headquartered in North Carolina. (DE no 1-1 ¶¶ 2, 3; DE 1-3, Civil Cover Sheet)

Now before the Court is ABOS's motion to dismiss the Amended Complaint for lack of personal jurisdiction, improper venue, lack of standing, and failure to state a claim, pursuant to *Fed. R. Civ. P. 12(b)(2)*, *(3)*, and *(6)*. (DE 29) For the reasons stated below, I will dismiss the Amended Complaint pursuant to *Rule 12(b)(6)* for failure to meet the minimal pleading standards of *Rule 8*.

II. ANALYSIS

Federal Rule of Civil Procedure 12(b)(6) provides for the dismissal of a complaint, in whole or in part, if it fails to state a claim upon which relief can be granted. The defendant, as the moving party, bears the burden of **[*9]** showing that no claim has been stated. *Animal Science Products, Inc. v. China Minmetals Corp., 654 F.3d 462, 469 n. 9 (3d Cir. 2011)*. For the purposes of a motion to dismiss, the facts alleged in the complaint are accepted as true and all reasonable inferences are drawn in favor of the plaintiff. *New Jersey Carpenters & the Trustees Thereof v. Tishman Const. Corp. of New Jersey, 760 F.3d 297, 302 (3d Cir. 2014)*.

Federal Rule of Civil Procedure 8(a) does not require that a complaint contain detailed factual allegations. Nevertheless, "a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Thus, the complaint's factual allegations must be sufficient to raise a plaintiff's right to relief above a speculative level, so that a claim is "plausible on its face." *Id. at 570*; *see also* *West Run Student Housing Assocs., LLC v. Huntington Nat. Bank, 712 F.3d 165, 169 (3d Cir. 2013)*. That facial-plausibility standard is met "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 556*). While "[t]he plausibility standard is not akin to a 'probability requirement' . . . it asks for more than a sheer possibility." *Iqbal, 556 U.S. at 678*.

A. Sherman Act claim

The *Sherman Anti-Trust Act* declares "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several **[*10]** States ... to be illegal." *15 U.S.C. § 1*. "Although this prohibition is literally all-encompassing, the courts have construed it as precluding only those contracts or combinations which 'unreasonably' restrain competition." *Animal Sci. Prod., Inc., 34 F. Supp. 3d at 480* (quoting *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 4-5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958))*.

"In order to sustain a cause of action under *§ 1 of the Sherman Act*, the plaintiff must prove: (1) that the defendants contracted, combined, or conspired among each other; (2) that the combination or conspiracy produced adverse, anti-competitive effects within relevant product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiff was injured as a proximate result of that conspiracy." *Martin B. Glauser Dodge Co. v. Chrysler Corp., 570 F.2d 72, 81-82 (3d Cir.1977)*. *Accord* *Howard Hess Dental Laboratories Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 253 (3d Cir.2010)* ("A plaintiff asserting a *Section 1* claim ... must allege four elements: '(1) concerted action by the defendants; (2) that produced anti-competitive effects within the relevant product and geographic markets; (3) that the concerted actions were illegal; and (4) that it was injured as a proximate result of the concerted action.'") (citing *Gordon v. Lewistown Hosp., 423 F.3d 184, 207 (3d Cir.2005))*; *cf.* *Franco v. Connecticut Gen. Life Ins. Co., 818 F.Supp.2d 792, 829 (D.N.J.2011)* ("Pleading a colorable *Sherman Act section 1* claim requires a plaintiff to allege (1) an agreement (2) imposing an unreasonable restraint of trade within a relevant **[*11]** product market and (3) resulting in antitrust injury, that is 'injury of the type the antitrust laws were intended to prevent and ... that flows from that which make defendants' acts unlawful.'").

The essence of a *Section 1* claim is the existence of an unlawful agreement. *See* *Gordon, 423 F.3d at 207* ("Unilateral action simply does not support liability; there must be a unity of purpose or a common design and understanding or a meeting of the minds in an unlawful arrangement.") (internal citations omitted). "Concerted action is established where two or more distinct entities have agreed to take action against the plaintiff.... Accordingly, it requires proof of a causal relationship between pressure from one conspirator and an anticompetitive decision of another conspirator." *Id.* (internal citations omitted).

"To allege such an agreement between two or more persons or entities, a plaintiff must allege facts plausibly suggesting 'a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.'" *Howard Hess Dental Labs. Inc., 602 F.3d at 254* (quoting *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 755, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))*. With respect to the alleged conspiracy between ABOS and northern New Jersey hospitals, Dr. Ellison has failed to allege an agreement that plausibly suggests such an unlawful **[*12]** arrangement.

The Amended Complaint states only in a conclusory manner that northern New Jersey hospitals conspired and knew about the alleged plan to bolster ABOS's market position. The Amended Complaint alleges, for instance, that "Defendant ABOS has undertaken its actions with a common design and understanding with hospitals to exclude some competent orthopedic surgeons from the relevant market, including Dr. Ellison." (AC ¶ 51) This type of conclusory allegation is found throughout the Amended Complaint. (*E.g.*, AC ¶¶ 2, 10, 31, 34, 46, 47, 49, 52-54). "But to survive dismissal it does not suffice to simply say that the defendants had knowledge; there must be factual allegations to plausibly suggest as much." *Howard Hess Dental Labs. Inc., 602 F.3d at 255 (3d Cir. 2010)* (citing *Twombly, 550 U.S. at 564*).

There are no such allegations here. Without more, the mere fact that certain hospitals require Board Certification for admitting privileges combined with a bare assertion that hospitals conspired with ABOS is not a sufficient recitation of facts to allege an unlawful agreement. *See* *Twombly, 550 U.S. at 556-57* ("[A]n allegation of parallel conduct and a bare assertion of conspiracy will not suffice. Without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement **[*13]** at some unidentified point does not supply facts adequate to show illegality. Hence, when allegations of parallel conduct are set out in order to make a [*Sherman Act] § 1* claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action.").

ABOS points out that the hospitals' conduct in requiring Board Certification could very well be based on its own independent action: "hospitals may look to certification as a quality standard in granting privileges wholly apart from any ABOS purported influence." (Def. Mot. at 26) This explanation may indeed be a reasonable basis for the hospitals' independent action. More significantly, the Amended Complaint does not assert *any* plausible basis for a conspiracy between ABOS and the vast network of New Jersey hospitals, nor does the Amended Complaint include any plausible allegations that place the hospitals' conduct in a context that raises a suggestion of a preceding agreement. Dr. Ellison has not pled "enough fact[s] to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Twombly, 550 U.S. at 556*.

Consequently, Dr. Ellison fails to sufficiently **[*14]** state a claim for an improper agreement under *Section 1 of the Sherman Act*. The Court need not opine on whether the other elements of a *Section 1 Sherman Act* violation are sufficiently pled because the failure to allege an unlawful agreement alone warrants dismissal for failure to state a claim. *See* *Howard Hess Dental Labs. Inc., 602 F.3d at 254* ("*Section 1* claims are limited to combinations, contracts, and conspiracies, and thus always require the existence of an agreement.").

The Court need not reach the other grounds for dismissal and dismisses the Amended Complaint solely on the basis that Dr. Ellison has not sufficiently alleged an unlawful agreement under *Section 1 of the Sherman Act*, without prejudging those other grounds.

B. Prejudice/Other Grounds

This opinion rests on the facial insufficiency of the claim and does not begin to reach such grounds for dismissal as, e.g., antitrust standing. Antitrust causes of action, however, are notoriously complex, and antitrust pleading notoriously difficult. Given, as I say, the difficulty of pleading such a claim, I will enter this dismissal without prejudice to the submission, within 30 days, of a second amended complaint that remedies the defects of the amended complaint.[3]

III. CONCLUSION

ABOS's motion to dismiss **[*15]** the Amended Complaint is granted on *Rule 12(b)(6)* grounds. This dismissal is without prejudice to the filing of a second amended complaint within 30 days.

An appropriate Order follows.

Dated: October 29, 2018

/s/ Kevin Mcnulty

HON. KEVIN MCNULTY, U.S.D.J.

ORDER

THIS MATTER having come before the Court on the motion of defendant American Board of Orthopaedic Surgery, Inc. ("ABOS"), to dismiss the Amended Complaint (DE 29); and the plaintiff, Bruce E. Ellison, M.D., having opposed the motion (DE 32); and the defendant ABOS having filed a reply (DE 33); and the Court having considered the papers before it without oral argument pursuant to *Fed. R. Civ. P. 78(b)*; for the reasons stated in the Opinion filed on this date, and for good cause shown:

IT IS this 29th day of October, 2018,

ORDERED that the motion (DE 29) of defendant ABOS to dismiss the Amended Complaint for failure to state a claim pursuant to *Fed. R. Civ. P. 12(b)(6)*, is **GRANTED** without prejudice to the filing of a properly supported motion to amend, pursuant to *Fed. R. Civ. P. 15*, attaching a proposed amended complaint, within 30 days.

/s/ Kevin Mcnulty

HON. KEVIN MCNULTY, U.S.D.J.

---

[3] I note that the Amended Complaint adds an allegation of a New Jersey connection—*i.e.*, that Dr. Ellison, a California practitioner, seeks to apply for privileges at New Jersey hospitals for reasons of professional growth. (AC ¶ 17) He alleges that three major hospital systems in New Jersey require board certification, so that *if* he applied for admitting privileges, he would anticipate rejection, which would be a blot on his record. I do not now rule on whether mat bare statement of intent, with no corroborating facts, suffices to establish the necessary connection to New Jersey. I iterate ray earlier admonition, however, that if such an allegation clears the hurdle of a motion to dismiss but is not supported by any objective evidence, it may make sense to consider now whether "to file this lawsuit in a district where the defendant is incorporated and has its principal place of business, or in the alternative in a district where the acts complained of actually took place." (DE 17 at p.5) Such a course might avoid miring the lawsuit in non-merits discovery and litigation pertaining to jurisdiction, venue, and the like.

LegalForce RAPC Worldwide, P.C. v. Trademark Engine LLC

United States District Court for the Northern District of California

October 31, 2018, Decided; October 31, 2018, Filed

Opinion

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS SECOND AMENDED COMPLAINT; AFFORDING PLAINTIFF LIMITED LEAVE TO AMEND

Re: Dkt. No. 108

Before the Court is defendants Trademark Engine, LLC ("TME") and Travis Crabtree's ("Crabtree") Motion, filed August 24, 2018, "to **[*2]** Dismiss Plaintiffs' Second Amended Complaint." Plaintiff LegalForce RAPC Worldwide, P.C. ("RAPC") has filed opposition, to which defendants have replied. Having read and considered the papers filed in support of and in opposition to the motion, the Court rules as follows.[1]

BACKGROUND

In the operative complaint, the Second Amended Complaint ("SAC"), RAPC, a law firm, alleges it "practices patent and trademark law before the USPTO [United States Patent and Trademark Office]." (See SAC ¶ 5). RAPC alleges that TME, one of RAPC's competitors, "operates website TrademarkEngine.com to advertise, promote and provide trademark related services" (see SAC ¶¶ 3, 6), and that Crabtree, "a licensed Texas attorney," is "a managing member" of TME (see SAC ¶ 7).

According to RAPC, TME has made "false and/or misleading statements" in "Google" advertisements and on its "website" (see SAC ¶¶ 13-15), has deprived its customers of "privacy" (see SAC ¶ 48), has submitted "fraudulent specimens" to the USPTO (see SAC ¶ 52),[2] and has engaged in the "unauthorized practice of law" (see SAC ¶ 39). Further, according to RAPC, Crabtree "authorized, directed or participated in" the making of TME's alleged false statements **[*3]** (see SAC ¶ 36), "directed[,] submitted or aided and abetted [TME] to submit fake and fraudulent specimens to the USPTO (see SAC ¶ 55), "aid[ed] and abett[ed] [TME] to practice law" (see SAC ¶ 53), and "violated" USPTO "regulations" (see SAC ¶ 56).

Based on the above allegations, RAPC asserts in the SAC three Claims for Relief: (1) "Declaratory Judgment"; (2) "False or Misleading Advertising [under] the *Lanham Act*, *15 U.S.C. § 1125(a)*"; and (3) "California Unfair Competition [under] *Cal. Bus. & Prof. Code § 17200 et seq.*"

LEGAL STANDARD

Dismissal under *Rule 12(b)(6) of the Federal Rules of Civil Procedure* "can be based on the lack of a cognizable legal theory or the absence of sufficient facts alleged under a cognizable legal theory." See *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)*. *Rule 8(a)(2)*, however, "requires only 'a short and plain statement of the claim showing that the pleader is entitled to relief.'" See *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quoting *Fed. R. Civ. P. 8(a)(2)*). Consequently, "a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations." See id. Nonetheless, "a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." See id. (internal quotation, citation, and alteration omitted).

In analyzing a motion to dismiss, a district **[*4]** court must accept as true all material allegations in the complaint, and construe them in the light most favorable to the nonmoving party. See *NL Indus., Inc. v. Kaplan, 792 F.2d 896, 898 (9th Cir. 1986)*. "To survive a motion to dismiss, a complaint must contain sufficient factual material, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). "Factual allegations must be enough to raise a right to relief above the speculative level[.]" *Twombly, 550 U.S. at 555*. Courts "are not bound to accept as true a legal conclusion couched as a factual allegation." See *Iqbal, 556 U.S. at 678* (internal quotation and citation omitted).

DISCUSSION

---

[1] By order filed October 22, 2018, the Court took the matter under submission.

[2] The Court understands the word "specimen" to refer to the "mark as used on or in connection with the goods or services" that is submitted for registration to the USPTO. See *37 C.F.R. § 2.56(a)*.

Defendants argue that each of RAPC's claims is subject to dismissal.

A. Federal Claim

The Lanham Act prohibits any "false or misleading description of fact, or false or misleading representation of fact, which . . . [,] in commercial advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another's goods, services, or commercial activities." See *15 U.S.C. § 1125(a)(1)*.

In the Second Claim for Relief, asserted against both TME and Crabtree, RAPC alleges that TME, in violation of the Lanham Act, has made false and misleading statements" in "Google advertisements" (see SAC ¶ 16) and on its **[*5]** website (see SAC ¶¶ 17, 26-27), and that Crabtree "authorized, directed or otherwise participated in the design and advertising of the [challenged] statements" (see SAC ¶ 38).

1. Liability of Crabtree

Defendants contend the SAC includes insufficient facts to support a finding that Crabtree can be held liable for the conduct on which the Lanham Act claim is based.

By order filed July 19, 2018 ("July 19 order"), the Court dismissed RAPC's Lanham Act claim against Crabtree, as alleged in the First Amended Complaint ("FAC"), for the reason that RAPC failed to allege sufficient facts to support the theory of liability on which it relied, specifically, that Crabtree was the alter ego of TME. In the SAC, RAPC no longer proceeds against Crabtree on an alter ego theory, but, rather, on the theory that Crabtree "authorized, directed or participated" in TME's advertisements. (See SAC ¶ 38.)

A "corporate officer or director" can be held liable for a Lanham Act violation committed by the corporate entity where the officer or director "authorize[d] or direct[ed]" the violation, or otherwise "participate[d]" therein. See *Coastal Abstract Service, Inc. v. First American Title Ins. Co., 173 F.3d 725, 734 (9th Cir. 1999)*. As set forth in the Court's July 19 order, however, RAPC's Lanham Act claim is **[*6]** subject to *Rule 9(b) of the Federal Rules of Civil Procedure*, and, consequently, RAPC must allege with "specificity" the "misconduct" it attributes to Crabtree. See *Swartz v. KPMG LLP, 476 F.3d 756, 764-65 (9th Cir. 2007)* (holding *Rule 9(b)* requires a plaintiff to "inform each defendant separately of the allegations surrounding his alleged participation in the fraud") (internal quotation and citation omitted). Further, as the allegations against Crabtree are made upon "information and belief" (see SAC ¶ 38), the allegations must be "accompanied by a statement of the facts upon which the belief is founded." See *Wool v. Tandem Computers Inc., 818 F.2d 1433, 1439 (9th Cir. 1987)*.

Here, RAPC alleges that "[b]ecause advertising and promotion [are] key to a company's operation, upon information and belief, Crabtree authorized, directed, or otherwise participated in the design and advertising of the [challenged] statements." (See SAC ¶ 38.) As set forth in the SAC, RAPC's belief is founded on information it obtained during a job interview with an individual who previously had worked for TME. (See SAC ¶ 37; see also id. Ex. F (transcript of interview).) Nothing was said by such applicant, however, that pertains to TME's advertising or otherwise addresses the identity of the person or persons who, on behalf of TME, authorized, directed or participated in TME's advertising **[*7]** decisions. (See SAC Ex F.) Further, although it may be "reasonable to presume" that some types of statements, by their very nature, would be made or approved by corporate officers, see *Wool, 818 F.2d at 1440* (holding district court could, at pleading stage, "presume" corporate officers who had "direct involvement . . . in [corporation's] financial statements" were responsible for misleading information contained in corporation's prospectus), RAPC fails to allege sufficient facts to support a finding that such presumption is applicable here. (See SAC ¶ 7) (describing Crabtree generally as "a co-founder, minority member and a managing member").

Accordingly, to the extent the Lanham Act claim is alleged against Crabtree, it is subject to dismissal.

2. Liability of TME

The Court next considers whether RAPC sufficiently alleges its Lanham Act claim against TME.

a. Use of "Professional"

RAPC alleges that two of TME's advertisements contain the word "professional," which word, according to RAPC, consumers would understand as a representation that TME's services are "lawful" (see SAC ¶ 14), which, according to RAPC, is false and misleading because TME, in providing its services, engages in a number of assertedly unlawful **[*8]** acts, specifically, depriving its customers of privacy, submitting fraudulent specimens to the USPTO, and engaging in the unauthorized practice of law. (See SAC ¶¶ 14, 39, 48, 52.)

The first advertisement challenged by RAPC allegedly is displayed in response to a Google user's search for the phrase "trademark filing." (See SAC ¶ 16.) According to RAPC, the advertisement contains (1) a title, such as "$69 Register Trademark Online — File Trademark in 3 Easy Steps" or a similar phrase,[3] (2) the address of TME's website, and (3) two sentences of text, specifically, (a) "Complete in Only 5 Minutes" or "Apply in Only 5 Minutes," and (b) "Let the Professionals File Your Trademark Today!" (See id.) The second challenged advertisement, found on a TME webpage that describes the features of three different "packages" available for sale, contains, as applicable to each such package, the phrase "Professional Preparation of your federal trademark application." (See SAC ¶ 17, Ex. C.)

Defendants argue that the word "professional," as used in the subject advertisements, is non-actionable puffery. "[P]uffery in advertisements" constitutes "either vague or highly subjective" assertions, e.g., an **[*9]** advertisement that "states in general terms that one product is superior." See *Cook, Perkiss & Liehe, Inc. Northern California Collection Service Inc., 911 F.2d 242, 246 (9th Cir. 1990)*.

A number of courts have considered whether "professional" connotes a factual assertion, and have concluded, under the circumstances presented therein, that it does not. See, e.g., *Griggs v. State Farm Lloyds, 181 F.3d 694, 699, 701 (5th Cir. 1999)* (characterizing representation by insurer that it "would provide timely and professional service" as "non-actionable puffery" rather than "representation[ ] of specific material fact"); *McElroy v. Boise Cascade Corp., 632 S.W. 2d 127, 134-135 (Tenn. Ct. App. 1982)* (finding no "actionable misrepresentation" where seller stated its prefabricated homes were "distributed through more than 1,200 independent professional home builders"; holding "use of the word 'professional' is, in and of itself, no guarantee of anything"); *Ludlow v. Lowe's Companies, Inc., 2014 U.S. Dist. LEXIS 200513, 2014 WL 12580233, at *12 (D. Haw. 2014)* (characterizing as "generalized" and "mere puffery" appliance store sign advertising "professional delivery"; noting sign made "no specific representations about capability, experience, or services provided"); *Larobina v. Wells Fargo Bank, N.A., 2012 U.S. Dist. LEXIS 41992, 2012 WL 1032953, at *4 (D. Conn. March 27, 2012)* (finding defendant's description of itself as "a professional and stalwart bank" was non-actionable "statement[ ] of opinion — not fact"); *EarthCam, Inc. v. OxBlue Corp., 2012 U.S. Dist. LEXIS 191822, 2012 WL 12836518, at *6 (N.D. Ga. March 26, 2012)* (finding statement that defendant's camera product "deliver[ed] professional-quality time-lapse construction video" was "nonactionable puffery"; **[*10]** characterizing "professional-quality," absent further elaboration, as "vague" and "not quantifiable"); *In re Marsh & McLennan Companies, Inc. Sec. Litig., 2006 U.S. Dist. LEXIS 70476, 2006 WL 2789860, at *1-2 (September 27, 2006)* (characterizing as "puffery" insurance broker's statement "regarding its 'commitment to client service and professional standards'"); but see *James v. Penguin Group (USA) Inc., 2014 U.S. Dist. LEXIS 50769, 2014 WL 1407697, at *8 (S.D. N.Y. April 11, 2014)* (finding defendant publisher's representation that its "publishing and marketing services for its authors would be provided by professionals" was actionable because statement could be "tested with objective evidence").[4]

---

[3] The other titles are "$69 Trademark a Name Online — File Trademark in 3 Easy Steps," "$69 Trademark a Logo Online — File Trademark in 3 Easy Steps," "$69 Trademark Application — File Trademark in 3 Easy Steps," "$69 Register Trademark Online — Fast Affordable Online Process," and "Looking to Get a Trademark? — File Trademark in 3 Easy Steps." (See id.)

[4] As defendants note, the opinion does not identify the nature of the "objective evidence" on which it relied.

Here, as in the great majority of the above-cited cases, the term "professional" is a "general assertion[ ] of superiority" that lacks "the kind of detailed or specific factual assertions that are necessary to state a false advertising cause of action." See *Cook, Perkiss & Liehe, 911 F.2d at 246*.

Accordingly, to the extent RAPC's Lanham Act claim is based on TME's use of the word "professional" in advertisements, the claim is subject to dismissal.

b. "Privacy-Related Statements"[5]

RAPC alleges that TME, on its website, makes false and misleading statements on a page in which it describes its "Identity Protection Program." (See SAC ¶ 27, Ex. E.) Specifically, the webpage states that when a trademark applicant submits an application directly to the USPTO, the applicant's **[*11]** "email and phone number will be available for all to see," including "[s]pammers, solicitors and anyone else," but that, for a monthly fee of $5, TME will provide its email and phone number to the USPTO, so that the "public" will not "see" the applicant's email and phone number. (See id.)

RAPC alleges that the following statements on the above-referenced webpage are false and misleading: (1) the introductory phrase "Protect your Identity — Identity Protection Program"; (2) "With our Trademark Privacy Protection program, the public will see our email and phone number rather than yours," which statement describes the services TME states it will provide for an additional fee; and (3) "Yes, I want to keep my information private ($5/month) Highly Recommended," which is one of the choices TME provides to customers who wish to respond to the webpage's offer. (See id.)

Defendants argue that RAPC has failed to sufficiently allege it has standing to seek relief for the privacy-related statements because, defendants assert, RAPC has failed to allege sufficient facts to support a finding that RAPC has been injured by those statements. "[W]hen [a] plaintiff competes directly with [a] defendant," **[*12]** however, "a misrepresentation will give rise to a presumed commercial injury that is sufficient to establish standing," see *TrafficSchool.com v. Edriver, Inc., 653 F.3d 820, 826-27 (9th Cir. 2011)*, and RAPC alleges it "compete[s]" with TME "to provide individuals and small businesses" with "services that allow them to protect their marks through filings with the [USPTO]" (see SAC ¶ 3).

Defendants also argue that the privacy-related statements are not pleaded in conformity with *Rule 9(b)*'s requirement that "[a]verments of fraud" be "accompanied by 'the who, what, when, where, and how' of the misconduct charged." See *Vess v. Ciba-Geigy Corp., USA, 317 F.3d 1097, 1106 (9th Cir. 2003)*. The Court disagrees. By alleging the statements are made by TME on its website and have appeared thereon "[a]t least since 2017" (see SAC ¶¶ 27-28), RAPC has sufficiently pleaded the "who," the "when," and the "where" required by *Rule 9(b)*. Next, by quoting the challenged statements and attaching to the SAC a copy of the webpage on which the statements are located, RAPC has sufficiently pleaded the "what." (See SAC ¶¶ 26-27, Ex. B.) Further, by alleging that, "regardless of whether a customer purchased the $5/month privacy protection program or not, [TME] always lists each of its customer's contact information, including emails and phone numbers, on [the] USPTO's **[*13]** trademark application forms" (see SAC ¶ 30), and that such customer information is "publically [sic] available on [the] USPTO's website" (see SAC ¶ 32), RAPC has sufficiently pleaded the "how."

Lastly, defendants argue, RAPC has failed to sufficiently allege the privacy-related statements were a proximate cause of RAPC's injuries. A "[p]roximate-cause analysis" considers "whether the harm alleged has a sufficiently close connection to the conduct the statute prohibits." See *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 133, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*. With respect to the Lanham Act, a plaintiff establishes proximate cause where, for example, a competitor makes "false statements about his own goods . . . and thus induc[es] customers to switch." See *id. at 137*; see also *id. at 138* (noting "diversion of sales to a direct

---

[5] Both parties collectively refer to the statements discussed in the following section as TME's "privacy-related statements." (See Defs.' Mot. at 12:3; Pl.'s Opp. at 13:30.)

competitor may be the paradigmatic direct injury from false advertising"). Here, RAPC alleges it has "lost customers" to TME (see SAC ¶ 84), which allegation is supported by the further allegation that from 2015 to 2017, the year RAPC filed the instant action, RAPC's "market share" has "decline[d]" from "nearly 2.4%" to "approximately 1.8%," a loss that, according to RAPC, corresponds to "approximately 2670 trademark[ ] filings per year" (see SAC ¶¶ 69). In addition, **[*14]** RAPC alleges, it has had to reduce its prices from "$499 to $199 and sometimes lower to match the unfair competition of [TME]." (See SAC ¶ 70.) Irrespective of any difficulty RAPC may encounter in proving such allegations, see *TrafficSchool.com, 653 F.3d at 831* (affirming district court's denial of request for monetary award based on lost profits, where plaintiff failed to offer "any proof of past injury or causation"), the Court finds them sufficient at the pleading stage.

Accordingly, to the extent RAPC's Lanham Act claim is based on the above-referenced privacy-related statements, the claim is not subject to dismissal.

B. State Law Claims[6]

1. *Section 17200*

In the Third Claim for Relief, RAPC alleges defendants have violated *§ 17200*, which statute prohibits any "unlawful, unfair or fraudulent business act or practice." See *Cal. Bus. & Prof. Code § 17200*. RAPC bases its *§ 17200* claim on allegedly "unlawful" and "unfair" practices.[7]

a. Alleged "Unlawful" Practices

RAPC bases its claim on four types of allegedly unlawful conduct, each of which the Court considers in turn.

1. Violation of California Constitutional Right to Privacy

RAPC alleges that TME has deprived its clients of their "right to privacy" (see SAC ¶ 50), specifically, the right to privacy set forth in the **[*15]** California Constitution. See *Cal. Const. Art. I, § 1* (providing "[a]ll people are by nature free and independent and have inalienable rights," including the right of "privacy"). The claim is based on the allegation that TME engages in the following conduct: "(1) waiving clients' rights to cancel the filing or refund the government fee; (2) waiving clients' rights to privacy by allowing their names, phone numbers, emails and street addresses to be published publicly; and (3) permitting [the] USPTO to make clients' information available for public search on [the] USPTO's online databases and other databases." (See SAC ¶ 48.)

Defendants argue that RAPC lacks standing to assert such claim and that the claim is, in any event, not cognizable. The Court agrees.

To have standing to assert a *§ 17200* claim, the plaintiff must have "lost money or property as a result of the unfair competition." See *Cal. Bus. & Prof. Code § 17204*. Here, as RAPC does not and cannot allege that its constitutional

[6] As the Court has not dismissed the entirety of RAPC's federal claim, the Court finds it appropriate to exercise supplemental jurisdiction over the state law claims. The Court notes, however, that RAPC's alternative allegations in support of diversity jurisdiction (see SAC ¶¶ 5, 7, 10) are insufficient for two reasons: (1) RAPC fails to allege the state in which it is "incorporated," see *28 U.S.C. § 1332(c)(1)*; and (2) RAPC fails to allege Crabtree's "state citizenship," see *Kanter v. Warner-Lambert Co., 265 F.3d 853, 857-58 (9th Cir. 2001)*.

[7] In its opposition, RAPC clarifies that its *§ 17200* claim is not based on any "misrepresentation" (see Pl.'s Opp. at 18:6-16), e.g., any of the claimed misrepresentations upon which RAPC bases its Lanham Act claim. Consequently, the Court does not consider herein defendants' argument that RAPC has failed to allege reliance.

right to privacy has been violated, see *SCC Acquisitions, Inc. v. Superior Court, 243 Cal. App. 4th 741, 755, 196 Cal. Rptr. 3d 533 (2015)* (holding "corporations do not have a right of privacy protected by the California Constitution"), it necessarily must base its claim on the theory that TME's clients, at least those who are not corporations, have been deprived **[*16]** of a constitutionally-protected privacy right. RAPC fails to allege, however, any facts to support a finding that it has lost money or property as a result of any of TME's clients having been deprived of his/her asserted right of privacy.

Additionally, to the extent the claim is based on TME's having allegedly waived its client's "right to cancel the filing or refund the government fee" (see SAC ¶ 48), RAPC fails to allege any facts to support a finding that said conduct by TME implicates "a legally protected privacy interest." See *Folgelstrom v. Lamps Plus, Inc., 195 Cal. App. 4th 986, 990, 125 Cal. Rptr. 3d 260 (2011)* (setting forth elements of claim for invasion of constitutional right to privacy) (internal quotation and citation omitted). Further, assuming TME's clients have a legally protected privacy interest in their respective names, phone number, emails, and street addresses, RAPC fails to allege any facts to support a finding that any disclosure by TME of such information to the USPTO rises to the level of "an egregious breach of social norms." See *id. at 992*; see also *id. at 991* (listing, as examples of egregious breaches, "CHP officers' internet dissemination of photographs of the decapitated corpse of an accident victim," physician's "gratuitous disclosure of a patient's HIV status," **[*17]** and "the improper use of confidential mental health records").

Accordingly, to the extent RAPC's *§ 17200* claim is based on violations of *Article I, § 1 of the California Constitution*, the claim is subject to dismissal.

2. Submission of Fraudulent Specimens to USPTO

RAPC alleges that TME and Crabtree have violated *18 U.S.C. § 1001* by "submitting or aiding and abetting its customers in submitting fraudulent specimens to the USPTO." (See SAC ¶¶ 51-52.)

Section 1001 prohibits "knowingly and willfully" making to the United States "any materially false, fictitious, or fraudulent statement or representation" or "falsify[ing] . . . a material fact." See *18 U.S.C. § 1001*. As defendants correctly point out, however, the SAC includes no facts to support a finding that defendants "knowingly and willfully" submitted, or aided and abetted the submission of, a specimen containing false information. Indeed, although it quotes the statutory requirement that the allegedly false statement must be "knowingly and willfully" made (see SAC ¶ 51), the SAC is devoid of any facts, let alone facts sufficient to support a finding that defendants acted with such intent. See *Iqbal, 556 U.S. at 686-87* (holding that, although "malice, intent, knowledge, and other conditions of a person's mind" need not be pleaded "under an elevated pleading **[*18]** standard," plaintiff must do more than "plead the bare elements of his cause of action [and] affix the label 'general allegation'").

Accordingly, and even assuming RAPC has standing to challenge TME and/or Crabtree's alleged submission of fraudulent specimens to the USPTO,[8] RAPC's *§ 17200* claim, to the extent based on violations of *18 U.S.C. § 1001*, is subject to dismissal.

3. Unauthorized Practice of Law

RAPC alleges that TME and Crabtree have engaged in the unauthorized practice of law, in violation of both California and Texas law. See Cal. Bus. & Prof. *§ 6125* (providing "[n]o person shall practice law in California unless the person is an active member of the State Bar"); *Texas Gov't Code § 81.102(a)* (providing "a person may not practice law in [Texas] unless the person is a member of the state bar"). Specifically, RAPC alleges, non-lawyers employed by TME have engaged in acts that constitute the practice of law. (See SAC ¶¶ 42-46.)

---

[8] RAPC does not expressly allege that it lost any money or property as a result of the alleged submission of fraudulent specimens, nor is any such loss evident from the allegations in the SAC.

At the outset, defendants argue that RAPC has not sufficiently pleaded its standing to challenge TME's allegedly unauthorized practice. The Court disagrees. Where a law firm asserts against a non-lawyer competitor a *§ 17200* claim based on the unauthorized practice of law, such plaintiff has standing if it "suffered losses in revenue **[*19]** and asset value and was required to pay increased advertising costs specifically because of the [allegedly unauthorized practice]." See *Law Offices of Mathew Higbee v. Expungement Assistance Services, 214 Cal. App. 4th 544, 564, 153 Cal. Rptr. 3d 865 (2013)*. Here, RAPC has alleged such losses (see SAC ¶¶ 66-70), as well as facts to support a finding that such losses were the result of the conduct RAPC alleges constitutes defendants' unauthorized practice of law (see SAC ¶ 71).

Defendants next contend the facts alleged in the SAC are insufficient to support a finding that TME has engaged in the unauthorized practice of law. The Court again disagrees.

Under California law, the practice of law "includes legal advice and counsel and the preparation of legal instruments and contracts by which legal rights are secured although such matter may or may not be depending in a court." See *Baron v. City of Los Angeles, 2 Cal. 3d 535, 542, 86 Cal. Rptr. 673, 469 P.2d 353 (1970)* (internal alteration omitted). Similarly, under Texas law, the practice of law "embraces, in general, all advice to clients and all action taken for them in matters connected with the law." See *Crain v. Unauthorized Practice of Law Committee, 11 S.W. 3d 328, 333 (Tex. App. 2000)*. Here, RAPC alleges that TME's non-lawyer employees, when "creating and reviewing trademark applications," make "legal determinations about classification" and recommend "changes to classifications and goods and services descriptions" (**[*20]** see SAC ¶ 41; see also SAC ¶¶ 44-45), as well as "perform[ ] pre-filing searches for potential conflicting trademarks and advise[ ] clients of the conflict and possible solutions" (see SAC ¶ 46).

"In close cases, the courts have determined that the resolution of legal questions for another by advice and action is practicing law if difficult or doubtful legal questions are involved which, to safeguard the public, reasonably demand the application of a trained legal mind." *Baron, 2 Cal. 3d at 543* (internal quotation and citation omitted); see also *Crain, 11 S.W. 3d at 333* (holding "preparation and filing of mechanic's liens" constitutes "practice of law"; finding preparer, in so doing, "impliedly advises its clients of their legal rights and entitlement under the law"). In light thereof, the Court declines to find at the pleading stage that the alleged acts by TME's non-lawyer employees do not, as a matter of law, constitute "difficult or doubtful legal issues," see *Baron, 2 Cal. 3d at 543*, particularly given the USPTO's stated position, as set forth on its website, regarding what actions taken in connection with the submission of a trademark application constitute the practice of law.[9]

With respect to Crabtree, however, the Court **[*21]** agrees that RAPC has failed to allege said individual defendant has engaged in the unauthorized practice of law. To the extent the claim is based on a theory that Crabtree, who is a member of the Texas State Bar, is practicing law in California, the claim is subject to dismissal because the SAC includes no facts to support such contention. To the extent the claim is based on a theory that Crabtree has violated California and Texas law by aiding and abetting non-lawyers who are practicing law in those states, or that he otherwise is personally responsible for the acts of those non-lawyers, the SAC likewise fails to include facts in support thereof.

---

[9] On a webpage titled "Warning about unauthorized practice of law," the USPTO states that "non-attorneys" cannot perform the following acts: "[c]onsulting with or giving advice to an applicant or registrant in contemplation of filing a trademark application or application-related document" or "[p]reparing or prosecuting an application." (See SAC ¶ 40.a-b (quoting USPTO webpage at https://www.uspto.gov/trademark/trademark-updates-and-announcements/warning-unauthorized-lawpractice).) On a separate webpage in which the USPTO states it "cannot give legal advice," it identifies the following acts, inter alia, that constitute "legal advice": "[c]onducting pre-filing searches for potentially conflicting trademarks," "[a]nalyzing or pre-approving documents before filing," and "[a]dvising applicants on substantive examination issues, such as the acceptability of . . . classification of goods and services." (See SAC ¶ 40.d-f) (quoting USPTO webpage at https://www.uspto.gov/learning-and-resources/support-centers/trademark-assistance-center)); see also *People v. Landlords Professional Services, 215 Cal. App. 3d 1599, 1608, 264 Cal. Rptr. 548 (1989)* (holding non-lawyers' assisting clients in completing legal forms does "not amount to the practice of law as long as the service offered by [the non-lawyer] [is] merely clerical").

Accordingly, to the extent RAPC's *§ 17200* claim is based on the alleged unauthorized practice of law, the claim, as alleged against TME, is not subject to dismissal, and, as alleged against Crabtree, is subject to dismissal.

4. Violations of USPTO Regulations

RAPC alleges that Crabtree has violated five USPTO regulations applicable to "practitioners." (See SAC ¶¶ 56, 88.c.)[10]

First, RAPC alleges, Crabtree has violated a regulation requiring a practitioner to "reasonably consult with the client about the means by which the client's objectives **[*22]** are to be accomplished," see *37 C.F.R. § 11.104(a)*; specifically, according to RAPC, TME's customers' "rights to privacy were waived without their knowledge." (See SAC ¶ 56.a.) Second, RAPC alleges, Crabtree has violated a regulation requiring a practitioner to "deposit into a client trust account legal fees and expenses that have been paid in advance, to be withdrawn by the practitioner only as fees are earned or expenses incurred," see *37 C.F.R. § 11.115(c)*, because, according to RAPC, he "fail[ed] to deposit legal fees and expenses paid in advance by his customers into a client trust account." (See SAC ¶ 56.d.) Next, RAPC alleges, Crabtree has violated regulations providing that a practitioner shall not, subject to certain exceptions, "represent a client if the representation involves a concurrent conflict of interest," see *37 C.F.R. § 11.107*, and shall not, if he/she "formerly represented a client in a matter," represent "another person in the same or a substantially related matter in which that person's interests are materially adverse to the interests of the former client," see *37 C.F.R. § 11.109(a)*; in particular, according to RAPC, Crabtree "fail[ed] to check [for a] conflict of interest among his current and former clients prior to retaining new clients **[*23]** for [TME]." (See SAC ¶ 56.c.) Lastly, RAPC alleges, Crabtree has failed to comply with a regulation providing that, with respect to "a non-practitioner assistant employed or retained by or associated with a practitioner," the practitioner "shall make reasonable efforts to ensure that the person's conduct is compatible with the professional obligations of the practitioner," see *37 C.F.R. § 11.503(b)*, because, according to RAPC, "non-practitioner assistants at [TME] have engaged in the unauthorized practice of law." (See SAC ¶ 56.c.)

As defendants point out, each of the subject regulations is a rule of professional responsibility applicable to an attorney who represents clients before the USPTO, and the SAC does not include any facts to support a finding that Crabtree has represented TME customers before the USPTO. Moreover, RAPC fails to plead any facts to support a finding that Crabtree waived without consent the privacy rights of any TME customer, that he obtained legal fees or expenses from a TME customer, that he had a conflict of interest with respect to any TME customer he may have represented, or, as noted above, that he can be held personally responsible for any TME non-lawyer employee's alleged **[*24]** unauthorized practice of law.

Accordingly, and even assuming RAPC would have standing to challenge Crabtree's non-compliance with a rule of professional responsibility, RAPC's *§ 17200* claim, to the extent based on Crabtree's alleged non-compliance with the above-referenced USPTO regulations, is subject to dismissal.

b. Alleged "Unfair" Practices

RAPC also bases its *§ 17200* claim on the theory that defendants have engaged in "unfair" business practices. (See SAC ¶ 89.) In particular, such claim is based on defendants' alleged submission of "fraudulent specimens" to the USPTO and their "unauthorized practice of law" (see SAC ¶ 89.a), which acts, if they occurred, are alleged to be "unlawful[ ]" (see SAC ¶ 89.d).

---

[10] In "trademark matters," a "practitioner" is "an individual who is an active member in good standing of the bar of the highest court of any State." See *37 C.F.R. § 11.1* (defining "practitioner" and "attorney"); see also *37 C.F.R. §§ 11.14(a)*, *5 U.S.C. § 552(b)*.

Defendants, citing *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (hereinafter, "Cal-Tech"), argue that RAPC has failed to allege a cognizable "unfair" practice. As set forth in Cal-Tech, "[w]hen a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *§ 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or **[*25]** otherwise significantly threatens or harms competition." See *id. at 187*.

Here, as noted, RAPC bases its "unfair" claims on conduct that, if it occurred, is assertedly "unlawful." The "unlawful" acts, however, are not acts alleged to be in violation of an ***antitrust law***, nor does RAPC contend those acts violate the policy or spirit of any ***antitrust law*** or otherwise significantly harm competition.[11]

Accordingly, to the extent RAPC's *§ 17200* claim is based on the theory that defendants engaged in "unfair" practices, the claim is subject to dismissal.

c. Scope of Relief

As relief for the alleged violations of *§ 17200*, RAPC alleges it is entitled to an injunction and to an award of restitution. (See SAC ¶ 92.) Defendants argue that RAPC has failed to allege any facts to support a finding that it is entitled to restitution.[12]

"[A]n order for restitution is one compelling a *[§ 17200*] defendant to return money obtained through an unfair business practice to those persons in interest from whom the property was taken, that is, to persons who had an ownership interest in the property or those claiming through that person." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1149, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)* (internal quotation and citation omitted). Here, RAPC fails to plead any facts to support a finding **[*26]** that TME, by reason of its having allegedly engaged in an unlawful business practice, obtained from RAPC property in which RAPC had an ownership interest. Consequently, RAPC is limited to seeking an injunction. See *ABC Int'l Traders, Inc. v. Matsushita Electric Corp., 14 Cal. 4th 1247, 1268, 61 Cal. Rptr. 2d 112, 931 P.2d 290 (1997)* (holding only remedies available to plaintiff who prevails on *§ 17200* claim are injunctive relief and restitution).

d. Conclusion as to *§ 17200* Claim

To the extent RAPC's *§ 17200* claim seeks an injunction precluding TME from engaging in the unauthorized practice of law, the claim is not subject to dismissal. In all other respects, RAPC's *§ 17200* claim is subject to dismissal.

2. Declaratory Judgment

In its First Claim for Relief, RAPC alleges it is entitled to a declaration "as to whether [TME] has engaged in the unauthorized practice of law." (See SAC ¶ 75.)

---

[11] RAPC argues that the Court should not apply the test set forth in Cal-Tech, but, rather, should apply "the *FTC Act section 5* test." (See Pl.'s Opp. at 24:23-24.) As the California Court of Appeal has explained, however, "the *section 5* test" only applies to a *§ 17200* claim when a "consumer" alleges that a practice is "unfair." See *Camacho v. Automobile Club of Southern California, 142 Cal. App. 4th 1394, 1401-1406, 48 Cal. Rptr. 3d 770 (2006)*.

[12] Defendants also argue that, in a *§ 17200* action, the plaintiff is not entitled to seek damages or an award of attorney's fees. Such argument, although a correct statement of the law, see *Cel-Tech, 20 Cal. 4th at 179*, is unavailing, as RAPC does not seek such relief for its *§ 17200* claim, but only for its Lanham Act claim.

Defendants seek dismissal of the claim for the reason that the Court, in its order dismissing the FAC and affording RAPC leave to amend, did not allow RAPC to add any new claims without leave of court, and RAPC did not seek, let alone obtain, leave to add a claim for declaratory judgment.

In its opposition, RAPC states it "agrees to dismissal of declaratory judgment to the extent that it is viewed as a separate claim" (see Pl.'s Opp. at 8:20-21) rather **[*27]** than a "remedy" (see id. at 8:19).

Accordingly, the First Claim for Relief will be dismissed.

D. Leave to Amend

Defendants argue that RAPC should not be afforded further leave to amend.

With respect to the portions of the Second Claim for Relief that will be dismissed, the Court declines to afford RAPC leave to amend with respect to its challenge to the use of "professional," but will afford RAPC leave to amend to allege facts to support a finding that Crabtree can be held personally liable for TME's challenged privacy-related statements. Additionally, the Court will afford RAPC leave to amend to cure the deficiencies identified herein with respect to the Third Claim for Relief.[13]

CONCLUSION

For the reasons stated above, defendants' motion to dismiss is hereby GRANTED in part and DENIED in part, as follows:

1. The First Claim for Relief is hereby DISMISSED without leave to amend;

2. The Second Claim for Relief, to the extent based on TME's use of the word "professional," is hereby DISMISSED without leave to amend, and to the extent alleged against Crabtree based on the privacy-related statements, is hereby DISMISSED with leave to amend; in all other respects, the Second Claim for Relief is not **[*28]** subject to dismissal.

3. The Third Claim for Relief is hereby DISMISSED with leave to amend, with the exception of RAPC's claim for injunctive relief based on the alleged unauthorized practice of law by TME, which claim is not subject to dismissal.

4. RAPC is hereby afforded leave to amend solely to the extent set forth above. Any Third Amended Complaint shall be filed no later than November 16, 2018. If RAPC does not file a Third Amended Complaint by the deadline set herein, the instant action will proceed on the remaining claims in the SAC.

IT IS SO ORDERED.

Dated: October 31, 2018

/s/ Maxine M. Chesney

MAXINE M. CHESNEY

United States District Judge

End of Document

[13] The Court's July 19 order did not address any of the deficiencies as to which leave to amend will be afforded.

Opinion

[*1236] MEMORANDUM OPINION & ORDER

Plaintiffs U.S. Futures Exchange, LLC ("USFE") and U.S. Exchange Holdings, Inc. ("UEH") bring this antitrust case against defendants Board of Trade of the City of Chicago, Inc. ("CBOT") and Chicago **[*1237]** Mercantile Exchange, Inc. ("CME").[1] Plaintiffs allege that defendants engaged in anticompetitive conduct to block plaintiffs from successfully entering the U.S. Treasury futures and options exchange market. Pending before the Court are: (1) defendants' motion for summary judgment [708]; and (2) **[**3]** plaintiffs' motion for partial summary judgment [712]. For the reasons that follow, the Court grants defendants' motion [708]. The Court denies plaintiffs' motion for partial summary judgment [712] as moot.[2]

Background[3]

A. Factual Chronology

1. CBOT's Launch Of U.S. Treasury Futures And Options Trading

In the 1970s, CBOT created and launched what later became its flagship product: futures contracts on U.S. Treasury notes and bonds. Futures and options contracts can be traded in the United States only on an exchange like CBOT that is approved by the U.S. Commodity Futures Trading Commission ("CFTC") as a designated contract market. R. 742 ¶ 1 (Defendants' Response to Plaintiffs' L.R. 56.1 Statement of Additional Facts).

2. CBOT-Eurex License Agreements

In the 1990s, UEH's parent Eurex Frankfurt AG ("Eurex") developed an all-electronic trading exchange in Europe. *Id.* ¶ 4. CBOT licensed Eurex's electronic trading platform in October 1999, and the parties signed a non-compete

---

[1] During the course of this long-pending litigation, CME merged with CBOT. The new, merged entity created in 2007 is named CME Group.

[2] This case was originally set for trial on June 4, 2018. On April 27, 2018, after reviewing the parties' summary judgment motions, the Court vacated the trial date and explained that it would "issue a written opinion on the pending motions for summary judgment." R. 753.

[3] The Court disregards all inappropriate legal arguments in the parties' L.R. 56.1 statements. Plaintiffs' responses to defendants' statements of fact and plaintiffs' statement of additional facts in particular are rife with "legal and factual argument that must be disregarded." *Rao v. Gondi, 2017 U.S. Dist. LEXIS 86152, 2017 WL 2445131, at *2 (N.D. Ill. June 5, 2017)*; *accord* *Ortega v. Chicago Pub. Sch. of the Bd. of Educ. of the City of Chicago, 2015 U.S. Dist. LEXIS 84455, 2015 WL 4036016, at *3 (N.D. Ill. June 30, 2015)* (disregarding "argumentative language as it is improper"). The Court also disregards numerous facts raised by both parties that are not "*material* to the movant's motion." *Wilbern v. Culver Franchising Sys., 2015 U.S. Dist. LEXIS 130888, 2015 WL 5722825, at *17 (N.D. Ill. Sept. 29, 2015)*. And the Court disregards portions of plaintiffs' statement of additional facts that do not contain "specific references to the affidavits, parts of the record, and other supporting materials relied upon to support the facts set forth in that paragraph." *L.R. 56.1*. Finally, the Court notes that both parties run afoul of the rule that each paragraph of a *L.R. 56.1* statement be "short" and "contain only one or two individual allegations." *Malec v. Sanford, 191 F.R.D. 581, 583 (N.D. Ill. 2000)*. Plaintiffs in particular have violated this rule, including through numerous paragraphs in their statement of additional facts that span a page to page-and-a-half of single spaced text, with large numbers of exhibits cited in each. *See* R. 742.

to prevent Eurex from, among other things, offering U.S. Treasury futures itself. *Id.*; R. 731 ¶ 6 (Plaintiffs' Response to Defendants' *L.R. 56.1* Statement of Facts). The parties entered into a new license agreement in July **[**4]** 2002. R. 731 ¶ 6. That agreement was set to expire on December 31, 2003, and the non-compete was set to expire on January 30, 2004. *Id.* In early January 2003, CBOT notified Eurex that it intended to terminate the license agreement the day it was set to expire (December 31, 2003). R. 742 ¶ 5.

3. Eurex's Plan To Launch USFE As A Competing Exchange

Both CBOT and Eurex made public announcements on January 10, 2003. R. 731 **[*1238]** ¶¶ 6-8. CBOT announced that it had entered into a contract to use a different trading platform after December 31, 2003 when its licensing agreement with Eurex expired. *Id.* ¶ 7. And Eurex announced its intent to launch a U.S. Treasury futures and options exchange, USFE, to compete head-to-head with CBOT. *Id.* ¶¶ 2, 8. The planned launch date for Eurex's competing exchange was February 1, 2004, the earliest date possible under the non-compete agreement. *Id.* ¶¶ 6, 8.

While planning for its U.S. launch, Eurex created a business case defining the two most likely outcomes as: (1) winning the entire futures market by 2007; or (2) failing and quickly exiting from the market. *Id.* ¶ 9. The business case assumed a "binary outcome" was most likely because "the nature of . . . the futures **[**5]** business is that [in] any one product, there is a tendency to concentrate the market or liquidity into one market." *Id.* Eurex cited "the 'network effect' of CBOT's large volume" as a "barrier to entry" into the U.S. Treasury futures market. *Id.* ¶ 10. In a March 17, 2003 presentation, Eurex assessed the probability of USFE's success at "10%, however increasing to 50% if achieving mile-stones." *Id.* ¶ 11. Defendants' executives readily acknowledged the business threat posed by USFE's planned entry into the market, including in light of Eurex's low-cost, all-electronic trading platform (which market participants were familiar with, having used it during the years that CBOT licensed it). R. 742 ¶¶ 6, 8, 16.

4. CBOT And Eurex's Competing Clearing Agreements

All futures contracts and options traded on an exchange must be submitted to a clearinghouse for clearing. *Id.* ¶ 1. A clearinghouse is a financial institution formed to facilitate the exchange of transactions. It stands in between the two firms participating in a trade and guarantees all trades it clears, and its purpose is to reduce the risk of a firm failing to honor its obligations. Eurex and CBOT separately began negotiations with two **[**6]** clearinghouses for their competing exchanges: (1) defendant CME; and (2) the Board of Trade Clearing Corporation ("BOTCC"), which was CBOT's prior clearinghouse. R. 731 ¶¶ 12-13. BOTCC was an independent corporation not owned by CBOT.

During CBOT's negotiations with BOTCC, CBOT requested that BOTCC act as an exclusive clearinghouse for CBOT's key products, including U.S. Treasury futures and options, but BOTCC was resistant. R. 742 ¶ 24. Prior to this, CBOT and BOTCC never had a written agreement, and there was no restriction on BOTCC's ability to provide clearing services for other exchanges. *Id.* CBOT encountered less resistance in its request for exclusivity from CME. *Id.* ¶ 25. In a March 25, 2003 email summarizing the negotiations, CBOT explained: "CME wants flexibility in providing clearing services for other exchanges, however, CBOT would have exclusivity for the core products . . . . Only concern is with respect to anti-trust considerations but CME intent is to grant us exclusivity." R. 733 Ex. 145.

From the time the buyer or seller of a futures contract opens the contract until the counter-party closes it, the contract is considered "open." Contracts that are outstanding at the **[**7]** clearinghouse—*i.e.*, that have not been offset by delivery—are called "open interest." *See* R. 742 ¶ 1. As part of CBOT's negotiations with CME, they debated whether a bulk transfer of open interest from BOTCC to CME would be possible as part of a CBOT-CME agreement. *Id.* ¶ 27. Defendants understood that "interjecting CFTC into the process" by submitting rules for "approval of the CFTC" could reduce risk and "act[ ] as an insulator against liability." *Id.* ¶ 28. **[*1239]** Defendants began discussions about this with the CFTC in April 2003. R. 731 ¶ 18.

On April 16, 2003, CBOT entered into a clearing services agreement ("clearing link") with CME set to begin on January 2, 2004. R. 742 ¶ 25; R. 731 ¶¶ 13-14. Under that agreement, CME could provide clearing services for products competing with CBOT products only after first giving 30 days' notice to CBOT, at which time CBOT had the right to terminate the agreement. R. 731 ¶ 14. Although this provision was not framed in terms of exclusivity, construing emails in the light most favorable to plaintiffs supports an inference that defendants had an internal understanding that CME would grant CBOT exclusivity. R. 742 ¶ 25. CBOT subsequently attempted to acquire **[**8]** BOTCC, but BOTCC refused CBOT's acquisition overture. *Id.* ¶ 26.

On May 20, 2003, USFE and BOTCC signed a letter of intent to enter into a clearing services agreement. R. 731 ¶ 16. The parties dispute the extent to which USFE was already committed to or leaning towards BOTCC at the time defendants announced their clearing link. R. 731 ¶¶ 15-16; R. 742 ¶ 25. USFE and BOTCC's plans raised a concern for defendants that if USFE gained access to BOTCC before open interest was transferred to CME, "CBOT's customers could effectively become Eurex US customers without the need to change any clearing procedures." R. 742 ¶ 27.

5. CBOT And CME's Submission Of Clearing Link And Open Interest Transfer For CFTC Approval

Defendants' clearing link agreement required them to "draft and submit to the CFTC for approval rules that provide for the clearing of CBOT products at the CME clearing house . . . and facilitate the transfer of open interest in CBOT [p]roducts from BOTCC to CME." R. 731 ¶ 17. On June 3, 2003, CME submitted a request for the CFTC to approve proposed rules to implement the clearing link. *Id.* ¶ 19. On June 13, 2003, CBOT submitted a request for the CFTC to approve a proposed rule ("Regulation **[**9]** 701.01") requiring transfer of CBOT members' open interest from BOTCC to CME. *Id.* ¶ 20; R. 742 ¶¶ 28, 32; R. 733 Ex. 162.

Although the CFTC had no obligation to publish these rule submissions or to provide an opportunity for public comment, on July 8, 2003, the CFTC made defendants' proposed rule changes available for comment on the CFTC website by July 14, 2003. R. 731 ¶ 21; R. 742 ¶ 29. This was far shorter than that 45-day review period allowed (but not required) by a commission rule. R. 742 ¶ 29. CBOT had requested quick CFTC approval of the proposed rules in June 2003, citing a provision in the clearing link agreement allowing CME to walk away from the agreement by July 15, 2003. *Id.* However, CME's Board Steering Committee had decided on July 7, 2003 to allow the walkaway provision to lapse. *Id.*

During the review period between July 8 and July 14, 2003, numerous industry participants, including USFE and BOTCC, submitted comment letters. R. 731 ¶ 22. USFE's letter raised antitrust concerns, explaining that "an analysis of the anti-competitive impact of the [open market transfer rule] CB[O]T Regulation 701 under the factors of *section 15(b) of the [Commodity Exchange Act ('CEA')]* precludes the **[**10]** CFTC from approving it." *Id.* ¶ 23. Other market participants likewise raised competition and market-based concerns in their comment letters. R. 742 ¶ 30. USFE and other market participants also requested that the CFTC extend the comment period. *Id.*

The CFTC did not extend the comment period. On July 15, 2003, CFTC staff provided a 17-page memorandum addressing the proposed rules and comment letters. **[*1240]** R. 731 ¶ 24; R. 742 ¶ 32. That memorandum explained that the comment letters had raised the concern that the proposed rules "would violate the obligations of [CBOT] and the Commission in light of the antitrust provisions of the Act," including "*Section 15(b)*." R. 731 ¶ 24. CFTC staff

> acknowledge[d] that these rules relate to important policy and legal issues of market structure and competition that the Commission has been addressing since June, 2002.[4] However, . . . 'despite all the discussion about

---

[4] In June 2002, the CFTC issued a report describing concerns among industry participants that "competition at the exchange and clearing organization level . . . had not materialized." *Id.* ¶ 31. The CFTC identified "two particular characteristics of the market structure of the futures industry . . . as possible causes: [1] the lack of fungibility of products across exchanges and [2] the lack of common clearing." *Id.* With respect to fungibility of products across exchanges, the CFTC acknowledged the potential benefits of such an approach, but also noted that "the development of new products can require a significant expenditure of capital" and "[m]andating fungibility could decrease the potential reward and therefore decrease the incentive for innovation." *Id.* ¶ 32. With respect to common clearing, the report mentioned potential benefits, and also noted: "Commentators suggested that common

> alternative clearing models embracing choice in one form or another, to-date no alternatives to the use of a single dedicated clearinghouse exist and none have been proposed in an implementable form.

Id. ¶ 25. CFTC staff recommended approving the rules, including Regulation 701.01, "[i]n order to move forward **[**11]** to implement the Link in an orderly manner, and to enhance legal certainty concerning the procedures to implement the Link." *Id.* CFTC staff subsequently explained:

> The staff recognizes that the Clearing Services Agreement between CBOT and CME could appear to raise antitrust issues. However, the staff believes that any potential antitrust issues are outweighed by the benefits to be gained including potential clearing efficiencies, significant cost savings for members and customers, and systemic risk abatement. . . . On balance, the staff believes that . . . the Commission's approval of the CBOT as DCO would not be inconsistent with the Commission's obligation under *Section 15(b) of the CEA*.

Id. ¶ 29.

On July 15, 2003, the CFTC unanimously approved the clearing link and open interest transfer rules submitted by defendants. *Id.* ¶ 26. The same day, the CFTC issued a press release announcing the approval and stating:

> [T]he policy and legal issues involved have been well known to interested parties since they were initially raised at the CFTC Clearing Roundtable held almost a year ago. CBOT, CME, and the Board of Trade Clearing Corporation have consulted widely with their members **[*1241]** and the Commission **[**12]** about this project and submitted to the Commission an agreed transition schedule on June 13.
> Under the Commodity Exchange Act, the Commission is not obligated to publish rule submissions of self-regulatory organizations. Nevertheless, based upon the many expressions of interest in this matter, the Commission decided to provide a short comment period. . . .
> The rules are necessary for the orderly implementation of the Link and will provide continuity of financial integrity and customer protection in the futures markets. The Commission believes that the Link and these rules further the Commodity Futures Modernization Act's goal of supporting innovation in the futures industry.
>
> The Commission's decision was based upon the information before it, including comment letters from several interested parties. The Commission is aware of public and industry interest in related policy issues regarding market structure and competition, and looks forward to hearing more on these issues. The Commission believes, however, that this broader dialogue should not impede the planning necessary to move forward to implement the Link in an orderly manner. The Commission believes it is of paramount importance **[**13]** to enhance legal certainty concerning the procedures to implement the Link.

Id. ¶ 27.

6. USFE's CFTC Application And Preparation To Enter The Market

Knowing that it needed CFTC approval to become a designated contract market ("DCM") before it could launch, USFE pre-filed its DCM application with the CFTC in July 2003. R. 742 ¶ 15. USFE attended meetings with the CFTC that month to discuss its application. *Id.*[5]

---

clearing could work to heighten competition between exchanges and clearing organizations. However, mandating common clearing would have the effect of subjecting clearing organizations to one another's credit risk involuntarily." *Id.* ¶ 33. The report observed that neither the CEA nor CFTC rules require the CFTC to mandate fungibility or common clearing, but the CFTC intended to organize a roundtable with industry participants to discuss these issues. *Id.* ¶ 34. The CFTC held that roundtable and heard testimony from industry representatives on August 1, 2002. *Id.* ¶ 35. They did not change the model. The CFTC and SEC evaluated these issues again and came to the same conclusion in an October 2009 report, explaining that "futures exchanges ordinarily do not treat contracts listed across markets as 'fungible'" because there are "decreased incentives of a futures exchange to innovate product listings and potential exposure of one clearinghouse to the credit risks of another." *Id.* ¶ 38. The 2009 report further explained that "permitting listing of replica contracts on competing exchanges facilitates 'free-riding' on the first exchange's investment and may decrease incentives favoring innovation." *Id.*

On September 3, 2003, USFE, Eurex, and BOTCC officially entered into their clearing services agreement. R. 731 ¶ 39. That agreement prohibited BOTCC from making USFE's contracts "fungible with contracts traded on exchanges other than [USFE] or Eurex" without prior written consent of USFE. *Id.* If the agreement was terminated, USFE could require BOTCC to "facilitate the transfer of open positions and collateral with respect to [USFE] Contracts as to which [BOTCC] maintain[ed] open positions" to another clearing service provider. *Id.* ¶ 40. In other words, the agreement gave USFE the right to transfer open interest in USFE contracts to another clearinghouse upon termination, just as CBOT had arranged to do with CME. In the wake of USFE's clearing services agreement with BOTCC, **[**14]** CBOT proposed crediting the account of any BOTCC member who became a CME-CBOT clearing link member with "the net book value ($16,628 per share) of up to 150 shares of the clearing member's BOTCC stock." R. 742 ¶ 33; R. 733 Ex. 189.

Around the same time, USFE entered into a regulatory services agreement with the National Futures Association ("NFA") for the NFA to perform market and trade practice surveillance for USFE for an initial term of three years. R. 731 ¶ 42. Prior to this agreement, defendants made efforts to hamper an agreement between USFE and the NFA, including by arguing that the NFA should be precluded from providing regulatory oversight services to USFE on numerous grounds that were ultimately rejected by the CFTC. R. 742 ¶ 34.

[*1242] On September 16, 2003, USFE filed its formal DCM application with the CFTC. R. 731 ¶ 44; R. 742 ¶ 16. Shortly after USFE's September 16, 2003 application, defendants pursued separate FOIA requests regarding the application and requested extensions of the CFTC comment period until 45 days after receipt of the requested FOIA documentation. R. 742 ¶ 16.

By regulation, USFE's application was initially eligible for fast-track, sixty-day review. R. 731 ¶ **[**15]** 44; R. 742 ¶ 15.[6] But the CFTC removed USFE's application from fast-track review on October 14, 2003, with the stated intent "to ensure that it ha[d] an adequate opportunity to consider fully the issues presented by [USFE's] application." R. 731 ¶ 44. The same day, the CFTC postponed a hearing on USFE's application originally set for October 16, 2003 before the House Agriculture Subcommittee. R. 742 ¶ 16.

The hearing before the House Agriculture Subcommittee was rescheduled for November 6, 2003. *Id.* ¶ 18. At that hearing, the CFTC Chairman testified that because USFE's application was "large" and "extensive," the CFTC had determined that it would be "very difficult to get to a point where we are comfortable within [the 60 day, fast-track] time frame." R. 731 ¶ 45. But he also testified that the application "include[d] all general information required by our rules to be considered complete." R. 742 ¶ 15.

During the review period, CFTC staff themselves raised numerous issues with USFE, sending over 75 questions (in at least four sets) for USFE to answer regarding its application. R. 731 ¶ 48. The CFTC sent copies of USFE's application to the Federal Reserve and the Department of Treasury **[**16]** on November 3, 2003, and the Treasury and Federal Reserve submitted their comments on December 18 and 19, 2003, respectively. *Id.* ¶ 53.

CFTC also made non-confidential portions of USFE's application publicly available on its website for comment. *Id.* ¶ 49. CBOT and CME separately submitted a series of comment letters raising concerns with USFE's application. R. 742 ¶ 19. Several of defendants' comments focused on discrepancies between USFE's public marketing and what was disclosed in USFE's application. Although the application represented that all USFE-listed contracts would be cleared by BOTCC, USFE was publicly marketing a "global clearing link" that would allow products to be cleared at either BOTCC or Eurex Clearing, the latter of which was not Commission-registered. R. 731 ¶ 50. The application

---

[5] A large volume of U.S. Treasury futures were set to expire in late-March 2004. *Id.* ¶ 13. USFE anticipated that in the month of February 2004, some customers would close out these positions on CBOT, reopen them on USFE, and then trade that open interest on USFE. *Id.* This timeline made the date of USFE's launch important. *Id.* ¶ 14.

[6] A year later, in November 2004, the CFTC "eliminate[d] the presumption of automatic fast-track review of applications and replace[d] it with the presumption that all applications [would] be reviewed pursuant to the statutory 180-day timeframe and procedures specified in *Section 6(a)* of the [CEA]" in order "to ensure a comprehensive review of applications and to meet other public policy objectives." R. 731 ¶ 46.

also did not mention a rebate plan that USFE was publicly marketing. *Id.* ¶ 51. Additionally, defendants raised an issue regarding USFE's one-member Board of Directors. *Id.* ¶ 52.

On December 9, 2003, the CFTC announced that it would hold a hearing on USFE's application on December 17, 2003. *Id.* ¶ 54; R. 742 ¶ 20. Later that day, CME and CBOT submitted nearly identical letters to the CFTC stating **[**17]** that they had previously scheduled meetings that conflicted with the December 17 hearing and requesting that that hearing be rescheduled (a) based on the conflict and (b) to address questions raised at the November 6, 2003 House Agriculture Subcommittee hearing. R. 731 ¶ 55; R. 742 ¶ 20.

[*1243] The next day, on December 10, 2003, the CFTC cancelled the December 17, 2003 hearing, citing "scheduling conflicts of some market participants." R. 731 ¶ 56. It also reopened the public comment period through December 19, 2003 to respond to questions raised at the House Agriculture Subcommittee hearing. *Id.* ¶¶ 56-57. *Id.* The CFTC received 27 more comment letters in response. *Id.* ¶ 56.

On December 19, 2003, the CFTC sent a letter to BOTCC, Eurex, and USFE regarding "misleading" statements made in a December 16, 2003 joint press release claiming that USFE would launch on February 1, 2004. *Id.* ¶ 58. The CFTC said that the deadline for action on the application was March 15, 2004, and that the CFTC "cannot and has not committed itself to any earlier date . . ., and certainly cannot and has not committed itself to a favorable decision on the application." *Id.*

By early January 2004, CBOT had transitioned to **[**18]** a new electronic trading platform, and defendants had implemented their clearing link and transfer of open interest, resulting in a $1.4 billion reduction in performance bond requirements for their members and $200 million in reduced security deposits. *Id.* ¶ 72.

On January 23, 2004, USFE submitted to the CFTC revised rules, bylaws, and an LLC agreement relating to its DCM application. *Id.* ¶ 64. USFE submitted a letter to the CFTC on January 26, 2004 committing itself to four "undertakings," including a commitment not to use a non-Commission-registered clearing service like Eurex Clearing without permission (a concern defendants raised in their comments) and a commitment to provide the Commission with one-month notice of "any non-traditional form of incentive program" (another concern defendants raised in their comments). *Id.* ¶ 65.

The CFTC announced on January 27, 2004 that it would hold an open meeting on February 4, 2004 to consider USFE's DCM application. *Id.* ¶ 66. USFE's 30(b)(6) deponent testified that this announcement "was the first time USFE received any indication concerning the timing of the CFTC's decision." *Id.* ¶ 67.

On February 2, 2004, CFTC staff issued a 142-page memorandum **[**19]** recommending approval of USFE's application. *Id.* ¶ 68. Staff observed that with respect to CBOT's concerns about USFE's use of a single-person board, USFE had since amended its bylaws to establish a 12-person board. *Id.*

The next day, on February 3, 2004, CBOT reduced exchange transaction fees for customers trading U.S. Treasury futures. *Id.* ¶ 73; R. 742 ¶ 38. CBOT also negotiated an amendment to its clearing link agreement with CME to lower clearing fees for all financial products for a six-month period. R. 742 ¶ 38.

The CFTC approved USFE as a DCM on February 4, 2004. R. 731 ¶ 69. The CFTC required USFE to comply with its agreed undertakings to use only CFTC-registered clearing organizations (*i.e.*, not Eurex Clearing) and to provide any incentive program to the CFTC for review one month before the proposed effective date. *Id.* The CFTC explained during the approval hearing, "we found nothing in th[e] comments that made us feel [USFE] had not or would not be in compliance with [the criteria for DCM designation] and core principles." R. 742 ¶ 23. The CFTC reviewed each objection raised by defendants and rejected the majority of them as without merit. *Id.*

7. USFE's Launch

USFE launched its **[**20]** exchange on February 8, 2004, with BOTCC providing clearing services and the NFA performing market and trade practice surveillance. R. 731 ¶¶ 43, 74. USFE ultimately "failed to capture **[*1244]** more than a trivial portion of the market." *Id.* ¶ 74.

8. Subsequent Events

In January 2005, CBOT increased average exchange fee rates. R. 742 ¶ 38. In 2007, in the course of evaluating CME's proposed merger with CBOT, the DOJ Antitrust Division conducted an "extensive investigation" of the CBOT-CME clearing link agreement. R. 731 ¶ 36. The DOJ Antitrust Division concluded "that the evidence does not indicate that . . . the clearing agreement is likely to reduce competition substantially" or that the clearing agreement "will foreclose entry by other exchanges." *Id.*

B. Evidence Related To Coordination And Intent

Plaintiffs cite numerous documents and testimony to demonstrate what they characterize as defendants' coordinated "Washington strategy" and intent to stall USFE's launch. Defendants do not meaningfully refute that they engaged in a coordinated effort to try to prevent USFE from taking over the U.S. Treasury futures and options exchange market. Instead, as discussed in more detail below, defendants **[**21]** argue that the actions they took as part of that coordinated effort are lobbying and related efforts immune from antitrust scrutiny.

The principal evidence on which plaintiffs focus includes:

○ On May 23, 2003, CME's Director of Clearing Development sent CME's outside counsel an email titled "?State Ownership of Eurex??," asking whether "there may be some regulatory stumbling blocks that could be thrown up in front of [Eurex]?" in light of the fact that several of Eurex's members are "state-owned and operated banks — subject (I believe) to very close provincial regulation." R. 733 Ex. 70. CME's Director explained that "even small obstacles might be enough to trip them up enough to ensure our success" given USFE's "rather abbreviated window of opportunity to make inroads into U.S. markets," but also noted, "I'm not sure what CME could actually DO in this regard." *Id.*

○ On August 4, 2003, CBOT representatives discussed in an email "the ways in which our product is better," including "(4) we will have the established liquidity and isn't our Washington strategy designed to prolong the Eurex entrance as long as possible." *Id.* Ex. 116.

○ On September 23, 2003, an internal CBOT email described **[**22]** efforts to "throw some big guns around Washington" to "help us at Eurex's expense." *Id.* Ex. 73.

○ On October 22, 2003, CME's Director of Government Relations shared with top CME executives a "CME/CBOT Washington Strategy." *Id.* Ex. 97. This strategy included "Plan A" of meeting "with staff of every member of the House Agriculture committee" to brief them on "five [identified] concerns," with the hope of having "members of the Ag Committee instruct the CFTC not to move forward on the Eurex application until the Committee's policy concerns have been answered," and "[t]o further delay the CFTC process" by considering "asking for a Senate hearing to be scheduled after the first of the year." *Id.* "Plan B" consisted of "secur[ing] statutory amendment in the form of language in the omnibus appropriations bill that would provide that no funding can be used by the CFTC for approval of the Eurex application until a study is conducted on our issues," **[*1245]** which would "need to be carried out in an extremely discrete manner." *Id.* Plan B was intended to serve as a "concrete solution for delaying the process." *Id.*

○ Defendants followed up on their "Washington Strategy" by meeting with Congressional members **[**23]** of the House Agriculture Subcommittee to discuss concerns with USFE's DCM application. R. 742 ¶ 18. Defendants encouraged members of Congress and their staff to raise defendants' concerns with the CFTC. *Id.*

○ At the November 6, 2003 House Agriculture Subcommittee hearing, CME's Chairman explained in his written testimony: "Eurex U.S.'s evident plan was to secure CFTC designation for its empty shell of an exchange and thereafter to 'self-certify' the rules that implement its true business plan in a manner that would escape Commission review and approval . . . . We made a clear case that the fast track process was not appropriate, and the Commission responded accordingly." *Id.* ¶ 17; R. 733 Ex. 68 at 114-15. CBOT's Chairman similarly testified: "I am pleased the CFTC has agreed and decided to disallow fast track treatment of the [USFE] application." R. 742 ¶ 17; R. 733 Ex. 68 at 91-92. CME had provided comments on the draft testimony of government officials and third parties who testified at the November 6, 2003 hearing. R. 742 ¶ 18.

○ In a November 18, 2003 letter drafted by CME outside counsel to the House Committee Chairman, CME's outside counsel noted that the November 6, 2003 hearing **[**24]** "had tremendously positive consequences on the scrutiny that is being afforded to Eurex's U.S. application." R. 733 Ex. 111. He also listed remaining concerns, including that "Eurex U.S. would operate as a branch office of Eurex Frankfurt with all of its critical governance, regulatory, operational and clearing functions outsourced to third parties," some of whom "were beyond the jurisdictional reach of the Commission." *Id.*

○ On December 9, 2003, CME and CBOT submitted nearly identical letters to the CFTC stating that they had previously scheduled meetings and requesting that the CFTC's anticipated December 17, 2003 hearing on USFE's application be rescheduled. R. 731 ¶ 55; R. 742 ¶ 20. Defendants' counsel has conceded that these letters were the product of coordinated efforts. R. 742 ¶ 20.

○ A December 29, 2003 CME powerpoint presentation explained that CBOT set up a "war chest" as part of a "pre-emptive plan to deal with the threat posed by Eurex's entrance to the U.S. market place." R. 733 Ex. 71 at 1, 3. The powerpoint noted that CME's "desired outcome" that Eurex would be "unsuccessful in establishing a viable business model in the U.S. futures space" and therefore unable "to further **[**25]** proceed to compete directly against CME products." *Id.* at 10.

○ CME's Chairman stated in a January 27, 2004 email: "It has come to my attention that the CFTC will hold a public vote on the Eurex application . . . on February 4. . . . I suspect this will come as no surprise that the vote will probably pass. But, I wanted to remind the Board of what I said at the last meeting. Because of our efforts, Eurex will not be able to implement any cross border clearing link without approval and that is not **[*1246]** in this application. . . . It is due to our efforts that we will get exactly what we want and not what Eurex wants, that is, to compete on a level playing field." *Id.* Ex. 133.

○ CBOT's Chairman acknowledged at his deposition that "the longer it takes for the DCM application to be ruled on, whether it's a denial or an approval, that's good for . . . CBOT." *Id.* Ex. 24 at 194:5-10.

C. Evidence Related To Causation

Just before and after USFE's launch, USFE executives observed that CBOT's price cuts stole momentum and eliminated USFE's competitive advantage. R. 731 ¶¶ 73, 75-80; *see, e.g., id.* ¶ 78 (USFE executive on April 24, 2004: "[T]he market got what it wanted: Lower prices and an irreversible trend towards **[**26]** electronic trading. Given all this, no one has an economic reason at the moment to use Eurex — US"); *id.* ¶ 80 (USFE executive in 2006: "[USFE] offered the same products, with much less liquidity, on an inferior platform, with a market model that was no longer unique"). Relying on these observations by USFE executives and defendants' expert testimony, as well as the fact that USFE's launch occurred only seven days after the planned date, defendants attribute USFE's failure to legitimate competition, including CBOT's new, more efficient electronic trading system and CBOT's price cuts that eliminated USFE's competitive advantage.

Plaintiffs, on the other hand, attribute USFE's failure to delay tactics on the part of defendants, which they claim resulted in traders not being technologically ready or able to trade with USFE at its launch. R. 742 ¶¶ 39, 40. Plaintiffs rely on documents indicating that potential customers delayed because of regulatory uncertainty surrounding CFTC approval of USFE's application, as well as testimony from plaintiffs' expert. *Id.*

D. Procedural History

This case was originally filed before Judge Zagel in October 2004. R. 44. On July 2, 2010, Judge Zagel granted **[**27]** defendants' motion for partial summary judgment on plaintiffs' predatory pricing theory (filed while discovery was ongoing). R. 416. Judge Zagel concluded:

> CBOT has put forth uncontested facts to show that its prices for U.S. Treasury derivative exchange services exceeded its average variable cost . . . [and] also its average total cost. Accordingly, I find that Defendants' pricing was above every measure of cost appropriate for a predatory pricing analysis and grant Defendants' motion for summary judgment on the issue of predatory pricing.

Id. at 6.

Two years later, on August 3, 2012, Judge Zagel granted in part and denied in part another motion for partial summary judgment by defendants (again filed while discovery was ongoing). R. 445. In that motion, defendants tested three of plaintiffs' remaining theories of liability. Plaintiffs' first theory was that defendants obstructed the regulatory approval process in order to hamstring USFE's launch. Judge Zagel found this theory foreclosed by the *Noerr-Pennington* doctrine, which "extends absolute immunity under the antitrust laws to businesses and other associations when they join together to petition legislative bodies, administrative agencies, **[**28]** or courts for action that may have anticompetitive effects." *Mercatus Group, LLC v. Lake Forest Hosp., 641 F.3d 834, 841 (7th Cir. 2011)*. Judge Zagel found that "in weighing USFE's DCM application, the CFTC was acting in a legislative capacity," and that defendants' efforts to influence **[*1247]** the CFTC were shielded by *Noerr-Pennington* immunity. R. 445 at 7.

On a motion for reconsideration, Judge Zagel afforded plaintiffs a narrow opportunity to proceed on their regulatory delay theory. He concluded that "it was error not to consider Defendants' [December 9, 2003] letters to the CFTC separately from the other lobbying activity." R. 460 at 1. The Supreme Court in *City of Columbia v. Omni Outdoor Advertising Inc., 499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*, stated that "[t]he 'sham' exception to *Noerr* encompasses situations in which persons use the governmental *process*—as opposed to the *outcome* of that process—as an anticompetitive weapon. A classic example is the filing of frivolous objections to the license application of a competitor, with no expectation of achieving the denial of the license but simply in order to impose expense and delay." *Id. at 380*. Judge Zagel found that this example was "very close to what Plaintiffs allege here—that Defendants requested a change in the CFTC hearing date strictly to impose expense and delay"—and allowed plaintiffs' regulatory **[**29]** delay theory to proceed on that basis. R. 460 at 2.

Plaintiffs' second theory addressed in Judge Zagel's August 2012 partial summary judgment order was that defendants prevented USFE from securing competitive clearing services. R. 445 at 9. Judge Zagel explained that "[u]nder Section Two of the Sherman Act, otherwise lawful activity may be rendered unlawful if it is accompanied by a 'specific intent to accomplish the forbidden objective.'" *Id.* (citing *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 602, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985))*. Judge Zagel held that more discovery was required before intent and causation of injury with respect to this theory could be resolved. *Id.*

Plaintiffs' third theory was that defendants interfered with plaintiffs' customer relationships through a campaign of threats and misinformation. Judge Zagel explained: "Plaintiffs have had considerable difficulty finding traders who will support the[se] claims. . . . However, it is still possible that evidence exists in Defendants' own files." *Id.* at 10. Judge Zagel found that plaintiffs should have "full opportunity to examine appropriate documents in Defendants' possession." *Id.*

In March 2017, this case was reassigned from Judge Zagel to this Court. R. 610. In March 2018, defendants moved for summary judgment **[**30]** as to all of plaintiffs' claims (R. 708), and plaintiffs moved for partial summary judgment on the issues of the relevant market definition and CBOT's monopoly power (R. 712).

Standard

Summary judgment is appropriate "if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*; *see also* *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. The Court considers the entire evidentiary record and must view all of the evidence and draw all reasonable inferences from that evidence in the light most favorable to the nonmovant. *Horton v. Pobjecky, 883 F.3d 941, 948 (7th Cir. 2018)*. To defeat summary judgment, a nonmovant must produce more than a "mere scintilla of evidence" and come forward with "specific facts showing that there is a genuine issue for trial." *Johnson v. Advocate Health and Hosps. Corp., 892 F.3d 887, 894, 896 (7th Cir. 2018)*. Ultimately, summary judgment is warranted only if a reasonable jury could not return a verdict for the nonmovant. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*.

[*1248] "In the field of ***antitrust law***, summary judgment serves a vital function—it avoids wasteful trials and prevents lengthy litigation that may have a chilling effect on pro-competitive market forces." *Anderson News, L.L.C. v. Am. Media, Inc., 899 F.3d. 87, 98 (2d Cir. 2018)*; *see also* *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 594, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. "[T]he very nature of antitrust litigation encourages summary disposition of such cases when permissible." *Collins v. Associated Pathologists, Ltd., 844 F.2d 473, 475 (7th Cir. 1988)*. Although there is not a heightened **[**31]** summary judgment standard in antitrust cases, an antitrust claimant must "present evidence that tends to exclude the possibility that the [defendants'] conduct was as consistent with competition as with illegal conduct" to survive summary judgment. *Mercatus, 641 F.3d at 856*.

Analysis

Plaintiffs assert antitrust claims under *§§ 1* and *2* of the Sherman Act, alleging a conspiracy by defendants in restraint of trade and anticompetitive conduct by CBOT to preserve its monopoly, as well as a claim under Illinois law for tortious interference with prospective economic advantage. *Section 1 of the Sherman Act* "prohibits '[e]very . . . combination . . . or conspiracy . . . in restraint of trade or commerce,' though courts have long restricted its reach to agreements that unreasonably restrain trade." *Omnicare, Inc. v. UnitedHealth Group, Inc., 629 F.3d 697, 705 (7th Cir. 2011)* (quoting *15 U.S.C. § 1*). A *§ 1* claim has three elements: "(1) that defendants had a contract, combination, or conspiracy ('an agreement'); (2) that as a result, trade in the relevant market was unreasonably restrained; and (3) that [the plaintiff was] injured." *Id.* *Section 2* of the Sherman Act proscribes monopolization and attempted monopolization. *15 U.S.C. § 2*. *Section 2* does not make monopolies illegal, but rather forbids the exercise or pursuit of monopoly power through improper **[**32]** means. *Mercatus, 641 F.3d at 854*. To prevail on a *§ 2* claim, a plaintiff must show "(1) that the [defendant] possessed monopoly power in that market; and (2) that the [defendant] willfully acquired or maintained that power by means other than the quality of its product, its business acumen, or historical accident." *Id.*

As a threshold matter, plaintiffs argue that defendants' alleged conspiracy cannot be viewed by looking only at its component parts, and instead must be viewed as a whole. Plaintiffs rely primarily on *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*, which directed against "tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each" in judging "the character and effect" of an antitrust conspiracy. *Id. at 699*. Plaintiffs say that conduct immunized by Judge Zagel's prior summary judgment order based on the *Noerr-Pennington* doctrine is therefore properly considered in assessing the overall character and effect of defendants' conduct. And plaintiffs advocate for a wholistic view of the evidence in assessing whether a denial of summary judgment is warranted.

It is true that courts generally view allegations of antitrust conspiracy as a whole to judge the character of the conspiracy and intent. *See id.*; *see also* ***[**33]*** *Fontana Aviation, Inc. v. Cessna Aircraft Co., 617 F.2d 478, 481 (7th Cir. 1980)* (error to isolate aspects of a "multi-faceted conspiracy" and fail to consider allegations concerning "conspiratorial motive and intent" "as parts of the whole conspiracy"). It is also true that conduct immunized from antitrust liability is still admissible to show the purpose and character of non-protected conduct. *See* *MCI Commc'ns* ***[*1249]*** *Corp. v. Am. Tel. & Tel. Co., 462 F. Supp. 1072, 1084 (N.D. Ill. 1978)*; *see also* *In re Brand Name Prescription Drugs Antitrust Litig., 186 F.3d 781, 789 (7th Cir. 1999)* (district court "erred in treating the [*Noerr-Pennington*] doctrine as a rule of evidence").

But as the Seventh Circuit explained when interpreting *Continental Ore* in *Mercatus*, the principle that a plaintiff "should be given the full benefit of [its] proof" under *Continental Ore* "does not mean . . . that we will aggregate the effects of conduct immunized from antitrust liability with the effects of conduct not so immunized. This approach would nullify the immunity." *Mercatus, 641 F.3d at 839*. "For that reason," a court on summary judgment "must first identify any conduct that is immunized," and after doing so, "consider the evidence of the *remaining* challenged conduct in the aggregate to see if it is sufficient to support antitrust liability." *Id.* (emphasis added).

Additionally, as other courts interpreting *Continental Ore* have made clear, separate theories of antitrust liability **[**34]** still must be assessed individually. *See, e.g., Intergraph Corp. v. Intel Corp., 195 F.3d 1346, 1366-67 (Fed. Cir. 1999)* ("*Continental Ore* did not hold . . . that the degrees of support for each legal theory should be added up. Each legal theory must be examined for its sufficiency and applicability, on the entirety of the relevant facts."); *In re Processed Egg Prods. Antitrust Litig., 206 F. Supp. 3d 1033, 1042 (E.D. Pa. 2016)* ("*Continental Ore* focuses on the use of evidence. . . . Subsequent decisions have acknowledged that the holding in *Continental Ore* was not intended to limit a court's individual assessment of the legality of the various components of an alleged conspiracy."). Indeed, plaintiffs themselves treat their theories as individual "claim[s]" and analyze them separately. *See, e.g.*, R. 732 at 10. The Court therefore addresses each of plaintiffs' remaining theories of liability in turn.

Plaintiffs' four remaining theories of antitrust liability under the Sherman Act are: (1) that defendants engaged in sham petitioning to create regulatory delay; (2) that defendants deprived plaintiffs of liquidity through (a) their clearing link and (b) the transfer of open interest from BOTCC to CME; (3) that defendants interfered with plaintiffs' customer relationships through a campaign of threats and public misinformation; and (4) that defendants **[**35]** interfered with plaintiffs' relationships with BOTCC and the NFA. Plaintiffs' Illinois tort claim is based on the same allegations underlying their fourth antitrust liability theory.

I. Regulatory Delay Theory

Plaintiffs' first theory is that defendants engaged in sham petitioning to delay USFE's DCM application, which resulted in lack of market readiness at the time of USFE's launch and ultimately caused USFE to fail. Despite plaintiffs' mischaracterizations of Judge Zagel's reconsideration order (*e.g., id.* at 21-22), Judge Zagel's ruling in fact left only a small window open for plaintiffs to pursue this regulatory delay theory. *See* R. 460. That window is based on defendants' December 9, 2003 letters to the CFTC. *Id.* Defendants now attempt to shut that small window for two independent reasons: (1) defendants argue their scheduling letters are protected petitioning activity under *Noerr-Pennington* and do not qualify under the "sham" exception to that doctrine; and (2) defendants argue plaintiffs cannot show any antitrust injury resulting from the letters.

A. *Noerr-Pennington*

1. Key Principles Of *Noerr-Pennington* Doctrine And Seventh Circuit's *Mercatus* Decision

As explained above, the *Noerr-Pennington* ***[**36]*** doctrine extends absolute antitrust **[*1250]** immunity to "businesses and other associations when they join together to petition legislative bodies, administrative agencies, or courts for action that may have anticompetitive effects." *Mercatus, 641 F.3d at 841*. The immunity is extended "in part because the original purposes of the Sherman Act did not include regulating political activity and in part because it is questionable whether the *First Amendment* allows such regulation." *Premier Elec. Co. v. Nat'l Elec. Contractors Ass'n, Inc., 814 F.2d 358, 371 (7th Cir. 1987)*. As the Seventh Circuit in *Premier Electric* explained, "people are free to try to persuade their representatives that monopoly is preferable." *Id.*

The Seventh Circuit's interpretation of the *Noerr-Pennington* doctrine in *Mercatus* has important implications for this case. *Mercatus* involved a "multipronged campaign" to prevent displacement of a monopoly hospital by a "huge threat" from Mercatus, a competitor. *641 F.3d at 837*. This campaign involved lobbying local board members, "a public relations campaign," making "derogatory statements" about the competitor to healthcare providers, and offering physician practice groups incentives not to move their practices. *Id. at 837-38*. Despite finding some of this conduct "dishonest or distasteful," *id. at 857*, the Seventh Circuit held that the district court **[**37]** had properly granted summary judgment on the plaintiff's antitrust claims based on *Noerr-Pennington* and other grounds.

A key principle emerging from *Mercatus* is that "many kinds of conduct may prevent or discourage a potential competitor from entering a particular market," but "[f]ederal antitrust laws are only implicated when that conduct is predatory or unjustifiable." *641 F.3d at 854*. The *Mercatus* court concluded that the defendant hospital in that case had not used unjustifiable means. "Even if the Hospital had monopoly power in the geographic and product markets Mercatus' economic expert endorsed, the Hospital had no duty to step aside and allow Mercatus to make off with its physicians, patients, and revenue"; "[i]t would be perverse if Mercatus' failure to prevail *in that competition* gave it a grievance cognizable under the Sherman Act." *Id. at 857*.

As the *Mercatus* court explained, "the sham exception" to *Noerr-Pennington* immunity—the exception invoked by plaintiffs in this case—allows the antitrust laws to reach otherwise protected *First Amendment* activity in two narrow contexts: "(1) sham lawsuits; and (2) fraudulent misrepresentations." *Id. at 842*; *see also* *E. R. R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 144, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)* ("[t]here may be situations in which a publicity campaign, ostensibly **[**38]** directed toward influencing governmental action, is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor and the application of the Sherman Act would be justified").

The Seventh Circuit in *Mercatus* held that the fraudulent misrepresentation prong of the sham exception "is based on the Supreme Court's desire to protect the integrity of non-political governmental proceedings" and therefore "*does not apply at all outside of adjudicative proceedings*"—in other words, even deliberate lies to legislative bodies are immunized under *Noerr-Pennington*. *641 F.3d at 844* (emphasis added). The *Mercatus* court laid out a multi-factor analysis for determining when a proceeding qualifies as adjudicative or legislative. *Id. at 844-46*. Applying those factors in that case, the *Mercatus* court concluded that "the Village Board acted in a legislative capacity when it declined to approve the proposed Mercatus physician **[*1251]** center." *Id. at 847-49*. The court therefore held that the fraudulent misrepresentation exception invoked by Mercatus could not apply as a matter of law. *Id.* And Mercatus did not allege a sham lawsuit for purposes of the second prong of the exception. The *Mercatus* court **[**39]** therefore found that the district court properly granted summary judgment on the "antitrust claims based on the Hospital's activities during the Village Board proceedings." *Id. at 849*.

2. Application Of *Noerr-Pennington* Here

Plaintiffs do not ask the Court to revisit Judge Zagel's holding that the CFTC proceedings that defendants sought to influence were legislative, not adjudicative. This Court agrees with that holding based on the factors laid out in *Mercatus*. This means that under *Mercatus*, plaintiffs cannot invoke the fraudulent misrepresentation prong of the sham exception to antitrust immunity under *Noerr-Pennington. See* *id. at 844* (the fraudulent misrepresentation prong "does not apply at all outside of adjudicative proceedings").

Defendants argue that the other prong of the exception—described in *Mercatus* as the "sham lawsuits" prong (*id. at 842*)—does not apply in the legislative context either. As defendants point out, the Seventh Circuit in *Mercatus* said "sham lawsuits"—not "sham proceedings." Defendants claim this choice of words means that the "sham" prong, like the fraudulent misrepresentation prong, does not apply at all in the legislative context. As defendants point out, a contrary conclusion "would **[**40]** . . . lead to the anomalous result that *Noerr-Pennington* immunizes deliberate lies to the CFTC and Congress [in legislative proceedings], but leaves unprotected petitioning through the ordinary channels of legislative and regulatory process" as long as they qualify as a baseless "sham." R. 739 at 4. Indeed, prior to *Mercatus*, plaintiffs alleged a fraudulent misrepresentation theory (R. 56 ¶¶ 46-47), but after *Mercatus* and Judge Zagel's rulings that the CFTC proceeding was legislative, plaintiffs now describe defendants petitioning as a "baseless" sham proceeding rather than as "fraudulent misrepresentation." It makes little sense to allow a claim to survive based on a simple change of adjectives like this.

Nevertheless, the Court finds that by using the term "sham lawsuits," the Seventh Circuit in *Mercatus* likely did not mean to entirely foreclose antitrust actions based on pure procedural abuse in the legislative context. Dicta in several Supreme Court cases supports that the sham exception could apply to baseless legislative proceedings. *See* *City of Columbia, 499 U.S. at 380* (sham exception could encompass "the filing of frivolous objections to the license application of a competitor"); *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 499-500 n.4, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)* ("in whatever forum, private **[**41]** action that is not genuinely aimed at procuring favorable governmental action is a mere sham that cannot be deemed a valid effort to influence government action").

But there is no question that if the sham exception does apply in the legislative context, it is "extraordinarily narrow." *Kottle v. Nw. Kidney Ctrs., 146 F.3d 1056, 1061 (9th Cir. 1998)*; *see also* *Mercatus, 641 F.3d at 842* (citing *Kottle* approvingly for other propositions); *Comm. to Protect our* *Agric. Water v. Occidental Oil & Gas Corp., 235 F. Supp. 3d 1132, 1155 (E.D. Cal. 2017)* ("The scope of the *Noerr—Pennington* sham exception depends on the branch of government involved. If the relevant petitioning activity involves the legislature, the sham exception is extraordinarily narrow.") (citations omitted); I. Phillip E. Areeda & Herbert Hovenkamp, Fundamentals **[*1252]** of ***Antitrust Law*** § 203 (4th ed. 2019) (noting that, in the context of legislative petitioning, "it is virtually impossible to identify the sham"). Although a number of courts have mentioned the possibility of a legislative sham, plaintiffs cite no court of appeals case actually applying that exception to find legislative petitioning to be a sham. *See* R. 732 at 18-19.

To fit within the extraordinarily narrow confines of a legislative sham exception, plaintiffs first must pass a significant threshold: showing that defendants' conduct was objectively **[**42]** baseless. Addressing the sham standard in the (not so narrow) context of meritless lawsuits, the Supreme Court in *Prof'l Real Estate Inv'rs v. Columbia Pictures Indus., 508 U.S. 49, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*, "reject[ed] a purely subjective definition of 'sham'" that would "undermine, if not vitiate, *Noerr."* *Id. at 60*. The *PRE* Court held that courts must first determine whether activity is "objectively baseless in the sense that no reasonable [party] could realistically expect success on the merits." *Id*. Only where the challenged activity is "objectively meritless may a court examine . . . subjective motivation." *Id.*

Objective baselessness is routinely decided as a matter of law on motions to dismiss and summary judgment. R. 710 at 12 n.9 (collecting cases); *see, e.g.,* *Associated Bodywork & Massage Professionals v. Am. Massage Therapy Ass'n, 897 F. Supp. 1116, 1120 (N.D. Ill. 1995)* (granting motion to dismiss where plaintiff failed to allege plausibly that defendant "had no reasonable expectation of obtaining the favorable legislation").

Plaintiffs argue that the *PRE* standard does not apply here, and that a more flexible test set forth in *California Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 513, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*, applies because defendants engaged in a pattern of petitioning. Plaintiffs therefore claim that objective baselessness is not a threshold requirement. But *PRE* clarified *California Motor* and the boundaries of "the sham exception," stressing that the assessment **[**43]** of "sham petitioning must be resolved according to objective criteria." *508 U.S. at 59-60*. Post-*PRE*, the Seventh Circuit has not recognized a different standard for "pattern[s]," *see* *Mercatus, 641 F.3d at 842 n.3*, and other courts of appeals have done so only in the adjudicatory context, including where a defendant has brought multiple lawsuits. *See, e.g.,* *USS-POSCO Indus. v. Contra Costa Cnty. Bldg. & Constr. Trades Council, AFL-CIO, 31 F.3d 800, 810-11 (9th Cir. 1994)* ("twenty-nine lawsuits" not a sham where fifteen of them proved successful; reconciling *California Motor* and *PRE* as dealing with "different situations"—*California Motor* with "the filing of a whole series of lawsuits" and *PRE* with the filing of "a single" lawsuit); *Hanover 3201 Realty, LLC v. Vill. Supermarkets, Inc., 806 F.3d 162, 180-81 (3d Cir. 2015)* (four frivolous lawsuits); *Waugh Chapel S., LLC v. United Food & Commercial Workers Union Local 27, 728 F.3d 354, 364 (4th Cir. 2013)* ("series of legal proceedings"); *Primetime 24 Joint Venture v. NBC, 219 F.3d 92, 101 (2d Cir. 2000)* ("voluminous" prelitigation challenges).

This case does not involve the filing of numerous lawsuits—it involves a single legislative proceeding (*i.e.*, the CFTC proceeding seeking approval of USFE's DCM application). Therefore, the Court finds that *PRE's* objective baselessness standard applies.

a. Objective Baselessness

Again, "in the legislative context," the sham exception to *Noerr-Pennington* immunity is "extraordinarily narrow," "virtually impossible," and requires a showing **[*1253]** of "no expectation of obtaining legitimate government action." *E.g., Occidental, 235 F. Supp. 3d at 1155*; *see also* ***[**44]*** *PRE, 508 U.S. at 60-61* (in context of lawsuits, defining objective baselessness to mean that "no reasonable litigant could realistically expect success on the merits"). That is not what the evidence shows here.

Defendants correctly argue as a threshold matter that the December 9, 2003 scheduling letters cannot be considered objectively baseless because they succeeded in obtaining legitimate government action. The letters asked the CFTC to: (1) reschedule the December 17 public hearing on USFE's application so defendants' principals could participate (citing previously scheduled board meetings on December 16, "follow-up special strategy meetings" for CBOT on December 17 and 18, and "meetings with CME clearing firms and other CME customers in New York" for CME on December 17 and 18); and (2) respond to questions raised by House Agriculture Subcommittee members on November 6, 2003. R. 731 ¶ 55; R. 733 Exs. 120-121. The CFTC responded favorably to both requests. The CFTC explained that it was cancelling the December 17 hearing based on "scheduling conflicts of some market participants," and it replaced the public hearing with a new comment period to respond to questions raised at the House hearing. R. 731 ¶¶ **[**45]** 56-57.

Defendants further argue that the letters were not objectively baseless because they reflected a true scheduling conflict that prevented defendants from attending the hearing, which they had a clear interest in attending. Plaintiffs dispute whether there is evidence of an actual scheduling conflict, saying there is no evidence the conflicts described in the letters actually happened. To begin, however, even if statements in the letters were false, false representations are fully insulated in the legislative context under *Mercatus*.

Moreover, plaintiffs misrepresent the facts. In support of their claim of a genuine scheduling conflict (R. 731 ¶ 55), defendants cite: (1) an internal CME email on October 22, 2003 to numerous CME executives titled "December 16, 2003 Board Meeting" that describes event details (R. 718 Ex. 69); (2) a November 19, 2003 internal CBOT email explaining "The December 2003 Board of Directors meeting will be held on Tuesday, December 16, 2003" (*id.* Ex. 70); (3) December 16, 2003 CME board meeting minutes (*id.* Ex. 71); (4) December 16, 2003 CBOT board meeting minutes (*id.* Ex. 72); (5) an itinerary for a CBOT executive's speaking event in New York from December **[**46]** 15-17 (*id.* Ex. 73); and (6) deposition testimony from a CME employee describing the long-scheduled December 16 CME board meeting in New York, followed by client visits and receptions involving "[a]lmost the entire board" on December 17 and 18 (*id.* Ex. 74 at 264:18-266:16).

Clearly, the board meetings were long scheduled and took place on the December 16 date listed in defendants' letters. And there is unrefuted evidence that follow up CME meetings took place on December 17 and 18. The exhibits do not appear to corroborate the "follow-up special strategy meetings" on December 17 and 18 mentioned by CBOT in its letter, but it is clear that at least one CBOT executive was tied up in meetings in New York during those days.

Plaintiffs emphasize that defendants' letters are nearly identical, and that defendants' counsel has conceded the letters were the product of coordinated efforts. But that does not make them an objectively baseless abuse of process. They were not.

Plaintiffs also focus on the larger set of defendants' petitioning, claiming that the CFTC disagreed with all of it, and **[*1254]** it was a baseless sham. *First*, however, all of this petitioning aside from the letters already has been immunized. **[**47]** As the Seventh Circuit instructed in *Mercatus*, the court extracts "any conduct that is immunized" under *Noerr-Pennington* from its assessment of "the evidence of the remaining challenged conduct in the aggregate to see if it is sufficient to support antitrust liability." *641 F.3d at 839*. Plaintiffs' attempt to shoehorn into their regulatory delay claim ample evidence that Judge Zagel already excluded as immunized runs afoul of this instruction in *Mercatus*. *Second*, even if it had not already been immunized, defendants' other legislative petitioning does not meet the very high bar for objective baselessness in the legislative context. The CFTC agreed with or held

USFE to its proposed "undertakings" to address a number of defendants' comments and concerns, including defendants' objections to USFE's one-member board, USFE's proposed global or cross-border clearing link, and USFE's proposed incentive programs. R. 731 ¶¶ 48, 50-52, 62, 68-69. CME's Chairman noted that defendants' efforts succeeded because USFE "will not be able to implement any cross border clearing link without approval," meaning that competition would occur "on a level playing field." R. 733 Ex. 133.

Moreover, defendants are correct that **[**48]** the fact that the CFTC staff addressed all of the issues raised by defendants speaks to their substantiality. The CFTC did not even address many of the other comments filed. *See* R. 718 Ex. 67. The Court therefore concludes as a matter of law that defendants' conduct did not rise to the level of objective baselessness, a standard that is "virtually impossible" to meet in the legislative context. *See* Areeda & Hovenkamp, *supra*, § 203.

b. Subjective Evidence

In discussing their regulatory delay theory, plaintiffs focus heavily on evidence of defendants' subjective intent without grounding that discussion in the governing legal standards. Plaintiffs try to put the December 9 letters in the context of "a larger course of conduct designed to delay USFE's entry," relying on the coordination and intent-related evidence summarized above. *See* R. 732 at 28-29. But because the Court concludes that defendants' challenged activity was not objectively baseless, it does not reach the issue of defendants' subjective motivation under *PRE. See* *508 U.S. at 60*. Indeed, the Supreme Court in *Noerr* found political activity immunized despite the fact that petitioners' "sole purpose . . . was to destroy [their rivals] as competitors," and their efforts **[**49]** were conducted unethically. *365 U.S. at 138-41*. And the Supreme Court in *PRE* expressly "dispelled the notion that an antitrust plaintiff could prove a sham merely by showing that its competitor's purposes were to delay [the plaintiff's] entry into the market." *508 U.S. at 59-60*. Evidence of defendants' subjective intent is therefore irrelevant.

2. Antitrust Injury

Defendants maintain that there is an independent basis for granting summary judgment on plaintiffs' regulatory delay theory based on the scheduling letters: lack of antitrust injury. Defendants argue that there is an "insurmountable gap in Plaintiffs' causation theory" linking defendants' letters—which the CFTC acted upon favorably—to any delay in the CFTC's approval of USFE's application. R. 710 at 14. Defendants point to: (1) USFE's 30(b)(6) deponent's testimony that the January 27, 2004 announcement of a public hearing "was the first time USFE received any indication concerning the timing of the CFTC's decision" (R. 731 ¶ 67); (2) the letter the CFTC wrote to USFE on December 19, 2003 stressing that "the **[*1255]** CFTC cannot and has not committed itself to any earlier date [than March 15, 2004] by which a decision or designation approval will be made, and certainly **[**50]** cannot and has not committed itself to a favorable decision on the application" (*id.* ¶ 58); and (3) the CFTC's conversations with USFE in January 2004 about "draft undertakings" that could "move" the CFTC "away from the position that the USFE application is materially incomplete and therefore ineligible for designation (as a result of the proposed [global] clearing link)" (*id.* ¶ 62).

The Court finds this causation argument to be simply another facet of defendants' *Noerr-Pennington* argument. The cases on which defendants rely recited the relevant causation-related principles as an extra justification for *Noerr-Pennington* immunity in cases where legislative persuasion is successful. *See* *Toyo Tire & Rubber Co. v. Atturo Tire Corp., 2017 U.S. Dist. LEXIS 48672, 2017 WL 1178224, at *3 (N.D. Ill. Mar. 30, 2017)* (the *Noerr-Pennington* "principle follows in part from basic notions of causation: namely, when the government acts based on petitioning, any purportedly unlawful result is most proximately caused by government action, not by the private petitioning"); *Associated Bodywork, 897 F. Supp. at 1120* (explaining that under *Noerr-Pennington* principles, "where . . . the alleged injury stems from a competitor's success in influencing legislation," the legislatures' actions, while "encouraged" by defendant, "compris[ed] a supervening 'cause,'" breaking **[**51]** the causal "link"). The fact that the CFTC acted on defendants' scheduling letters and subsequently indicated that it had never committed itself to a date earlier than March 15, 2004 for approving USFE's DCM application breaks the causal chain and provides further support for finding those letters immunized under *Noerr - Pennington*.

* * *

In the wake of Judge Zagel's predatory pricing holding, plaintiffs made the regulatory delay theory their cornerstone. The Court agrees with defendants that in doing so, plaintiffs focus on legislative petitioning with Congress and the CFTC that lies at the heart of *Noerr-Pennington*. There would be a significant chilling effect if market participants had to fear treble damages if a regulator disagreed about their comments about competitors. *See, e.g., Noerr, 365 U.S. at 139* (holding businesses liable for urging government action to achieve competitive advantage would deprive the government of "a valuable source of information" and "deprive the people of their right to petition in the very instances in which that right may be of the most importance to them"); *Mercatus, 641 F.3d at 846* ("*Noerr-Pennington* was crafted to protect the freedom to petition guaranteed under the *First Amendment* . . . . [Improper] application **[**52]** of the sham exception might inadvertently stifle the legitimate exercise of this core right."). Without the regulatory delay theory or any evidence of predatory pricing, the legs are cut out from under plaintiffs' case.

II. Clearing Link And Open Interest Transfer Theory

Plaintiffs' second theory is that defendants conspired to deprive plaintiffs of liquidity through their clearing link and the transfer of CBOT's open interest from BOTCC to CME. Defendants argue that: (1) this theory is foreclosed by implied antitrust immunity because the CFTC formally approved the clearing link and open interest transfer; and (2) this theory is not actionable under the antitrust laws.

A. Implied Antitrust Immunity

1. Key Principles Of Implied Immunity Doctrine And Seventh Circuit's *American Agriculture* Decision

The implied antitrust immunity doctrine originated in the SEC context. The Supreme **[*1256]** Court has found implied antitrust immunity where the SEC effectively authorized the conduct in question, *Gordon v. N.Y. Stock Exchange, 422 U.S. 659, 95 S. Ct. 2598, 45 L. Ed. 2d 463 (1975)*, where the SEC chose not to issue prohibitions or restrictions despite having authority to do so, *United States v. Nat'l Assoc. of Sec. Dealers, Inc., 422 U.S. 694, 95 S. Ct. 2427, 45 L. Ed. 2d 486 (1975)*, and where the SEC disapproved the challenged practices, but it was possible that lines drawn by antitrust courts **[**53]** could lead to future conflicts with SEC determinations, *Credit Suisse Sec. v. Billing, 551 U.S. 264, 127 S. Ct. 2383, 168 L. Ed. 2d 145 (2007)*.

In its most recent articulation of the doctrine in *Credit Suisse*, the Supreme Court explained that conduct is implicitly immune from antitrust liability where finding liability would create a risk of "clear repugnancy" or "clear incompati[bility]" between a specialized regulatory scheme and the antitrust laws. *551 U.S. at 275*. Building on principles in *Gordon* and *NASD*, the *Credit Suisse* Court identified a four-part test for implied antitrust immunity:

> (1) the existence of regulatory authority under the securities law to supervise the activities in question; (2) evidence that the responsible regulatory entit[y] exercise[s] that authority; and (3) a resulting risk that the securities and antitrust laws, if both applicable, would produce conflicting guidance, requirements, duties, privileges, or standards of conduct . . . [and (4) whether] the possible conflict affected practices that lie squarely within an area of financial market activity that the securities law seeks to regulate.

Id. at 275-76.

Just as the Seventh Circuit's decision in *Mercatus* had important implications for plaintiffs' regulatory delay theory, the Seventh Circuit's decision in *American Agriculture Movement, Inc. v. Board of Trade of City of Chicago, 977*

F.2d 1147 (7th Cir. 1992), has important **[**54]** implications for plaintiffs' clearing link and open interest transfer theory. In *American Agriculture*, the Seventh Circuit reversed a summary judgment decision by the district court applying implied antitrust immunity to bar an antitrust claim based on an emergency resolution adopted by CBOT. Id. at 1150- 51. In that case, "[a]fter receiving notice of the CBOT's adoption of the [emergency resolution], the [CFTC] took no formal action; it neither overturned nor approved the Resolution." Id. at 1151. Applying cases from the SEC context, the *American Agriculture* court delineated the circumstances in which it would be appropriate to find that "the CEA"—*i.e.*, the law that "governs the trading of commodity futures contracts, and grants to the [CFTC] the authority, in large measure, to implement the regulatory regime established therein"—"has impliedly repealed the antitrust laws." Id. at 1150, 1158. It explained that there are "two variants of implied repealer": (1) "pervasive repealer," where agency initiative controls every aspect of defendant's behavior; and (2) repealer "immuniz[ing] from antitrust attack activities that were ([a]) required by law or the relevant agency, or ([b]) scrutinized and approved by the agency." Id. at 1158.

The **[**55]** Seventh Circuit found no pervasive repealer in the CEA context, citing the "legislative history" of the CEA that "demonstrates that Congress intended to leave federal courts with at least some authority over exchange practices." Id. at 1160-61. The Seventh Circuit also found that the CFTC had not ordered CBOT to take action so as to satisfy the "required by law or the relevant agency" prong. Id. at 1158-61. Next, the *American Agriculture* court analyzed whether the "scrutiny and approval" prong of implied repealer was satisfied. Id. at 1162-67. After distilling key **[*1257]** principles from the Supreme Court's SEC cases, the *American Agriculture* court found the issue of applying antitrust immunity principles in that case to be "admittedly a close one," but "conclude[d] that the regulatory supervision in th[at] case was not sufficient to cloak the [emergency] Resolution with . . . immunity." Id. at 1163. In support, the court emphasized that the CFTC "never formally voted on or approved" the resolution, meaning that its "approval . . . was not the product of any affirmative action, but rather of acquiescence, or the failure to take affirmative action." *Id.*

Although the Supreme Court's decision in *Gordon* applying antitrust immunity had likewise involved **[**56]** acquiescence on the part of the regulatory body (the SEC), the *American Agriculture* court distinguished *Gordon* on several bases. "[T]he most significant distinction" between that case and *Gordon* "concern[ed] the availability of judicial review," which *Gordon* "emphasized . . . was an important— and perhaps essential—ingredient to any claim of implied antitrust immunity." Id. at 1164. The *American Agriculture* court explicitly contrasted the CFTC's formal "approval or disapproval" of "nonemergency exchange rules," which is "presumably subject to judicial review," with the emergency resolution in that case that was not. Id. at 1164-65.

Another basis on which the *American Agriculture* court distinguished *Gordon* was the SEC's "deep and serious study" of the issue in *Gordon* and "Congress' 'continued approval' of the SEC's regulatory track record." *Id.* The *American Agriculture* court explained that "[t]he fact that an agency let stand a practice voluntarily initiated by a regulatory entity—even when it had the power to review, modify and overturn that practice—is not sufficient, in and of itself to confer antitrust immunity. Also pertinent is the *nature* and *degree* of the agency supervision at issue." Id. at 1163.

Near the end of **[**57]** its opinion, the *American Agriculture* court gave the following summary statement:

> [I]mmunity is proper when the relevant agency's scrutiny and approval of the challenged practice is active, intrusive and appropriately deliberative. Put another way, an antitrust court, before relinquishing jurisdiction over allegedly anticompetitive activities, must be convinced that the agency has exercised its independent judgment in reflecting upon and approving the activity at issue. Moreover, the availability of judicial review, even if not the *sine qua non* of immunity, is extremely important. We do not deny that the CEA and its enabling regulations lay in place a regulatory framework under which the [CFTC] can exercise the requisite degree of supervision. Here, however, the [CFTC] did not utilize that framework.

Id. at 1167. Therefore, the Court held, implied antitrust immunity did not apply.

2. Applicability Of Implied Immunity In CEA Context

Plaintiffs take issue as a threshold matter with the application of SEC implied immunity cases in the CEA context. Plaintiffs point to the legislative history of the CEA considering and rejecting blanket antitrust exemption. *See, e.g., Strobl v. New York Mercantile Exch., 768 F.2d 22, 29 (2d Cir. 1985)* (summarizing legislative history). **[**58]** They point to the general CEA savings clause explaining that nothing in the CEA "shall supersede or limit the jurisdiction conferred on courts of the United States or any State." *7 U.S.C. § 2(a)(1)(A)*. And they point to the CFTC's acknowledgement when addressing potential "Fair Competition Issues" raised by CBOT with respect to USFE's DCM application "that **[*1258]** [USFE] will be subject to *the federal antitrust laws* as well as Commission oversight . . ." R. 733 Ex. 110 at 126-28 (emphasis added). As plaintiffs acknowledge, however, all this means is that the CEA "forecloses wholesale antitrust immunity." R. 732 at 33. It does not mean that a *Credit Suisse* implied immunity analysis does not apply.

Plaintiffs also say that securities and commodity futures industries are regulated differently. A 2009 Treasury Department White Paper noted that the CFTC "employs a 'principles-based approach' to regulation of exchanges, clearing organizations, and intermediaries; while pursuant to the securities laws, the SEC employs a 'rules-based approach.'" R. 733 Ex. 183. It is true that after the Commodities Futures Modernization Act of 2000, the CFTC no longer has to "approve most contract market rules." R. 733 Ex. 184. As defendants **[**59]** point out, however, the Commodity Futures Modernization Act expressly preserved the option for registered entities to invoke a prior approval process asking the CFTC to formally determine whether a submitted rule is consistent with the CEA. *See 7 U.S.C. § 7a-2(c) (2000)*. In doing so, the CFTC must take into account the "public interest to be protected by antitrust laws" and "endeavor to take the least anticompetitive means of achieving the objectives of" the CEA. *7 U.S.C. § 19(b) (2000)*.

The implied immunity doctrine rests on the finding of a "plain repugnancy between the antitrust and regulatory provisions," focusing on "the relation between the antitrust laws and the regulatory program set forth in the particular statute, and the relation of the specific conduct at issue to both sets of laws." *Credit Suisse, 551 U.S. at 271-72*. In other words, the application of implied repealer principles is context and fact specific. It does not apply wholesale in particular regulatory areas and not in others. Furthermore, the Seventh Circuit has already applied implied antitrust immunity principles from the SEC context in the CEA context in *American Agriculture*. Nowhere does *American Agriculture* indicate that inherent differences between the securities and **[**60]** commodities contexts means that the same antitrust immunity principles do not apply. *See also In re Western States Wholesale Natural Gas Antitrust Litig., 661 F. Supp. 2d 1172, 1178-81 (D. Nev. 2009)* (case cited by plaintiffs acknowledging that the CEA can implicitly preclude the antitrust laws' application, but finding no implied immunity because that case involved conduct explicitly "prohibited by the CEA.").

3. Appropriateness Of Deciding Implied Immunity As A Matter Of Law

Plaintiffs also argue as a threshold matter that the "implied immunity analysis" is "fact-specific" and should not be decided as a matter of law, citing *Friedman v. Salomon/Smith Barney, 313 F.3d 796, 799 (2d Cir. 2002)*. But the Supreme Court held in *Gordon* that the application of the implied immunity doctrine is a threshold legal question. *See 422 U.S. at 688* (the "factual question as to whether fixed commission rates are actually necessary to the operation of the exchanges" is irrelevant to the "legal question as to whether allowance of an antitrust suit would conflict with the operation of the regulatory scheme"); *see also id. at 687* (rejecting approach in *Thill Sec. Corp. v. N.Y. Stock Exch., 433 F.2d 264 (7th Cir. 1970)*, of "view[ing] the question of implied repeal as a question of fact"). In *Friedman* itself the issue was decided as a matter of law. *313 F.3d at 797-99*. The issue also was decided as a matter of law in *American Agriculture* and *Credit Suisse*. Implied antitrust immunity **[**61]** **[*1259]** is not an issue for the jury, but a threshold determination for the Court.

4. Application Of Implied Immunity Doctrine Here

Turning to the application of implied immunity principles to the facts here, the Court agrees with defendants that on the spectrum set forth in the SEC cases ranging from mere acquiescence to formal approval of defendants' challenged conduct, this case falls on the latter end. Unlike in American Agriculture, the CFTC formally approved defendants' clearing link and open interest transfer. This clear, affirmative approval goes beyond actions of the SEC in *Credit Suisse, NASD*, and *Gordon* that were found to warrant immunity. Also, unlike in American Agriculture, the CFTC's formal approval was subject to judicial review under the Administrative Procedure Act just like the SEC's actions in *Gordon*—the factor that the Seventh Circuit in *American Agriculture* described as "extremely important." 977 F.2d at 1167. Applying the four-part test from Credit Suisse confirms the appropriateness of finding implied immunity here.

First factor (regulatory authority to supervise activity). The first factor is easily satisfied. The CFTC has had authority to review and approve exchange rules since its **[**62]** creation in 1974 (*see* 7 U.S.C. § 7a-2(c)), and specifically to regulate the clearing of futures transactions (*see* 17 C.F.R. Part 39).

Second factor (evidence that agency exercises regulatory authority). The second factor also is easily met. The CFTC exercised its regulatory authority to approve the very rules with respect to the clearing link and open interest transfer that plaintiffs challenge, and it has routinely approved DCM rules since its creation. *See* CFTC Industry Filings, Rules & Rule Amendments, https://www.cftc.gov/IndustryOversight/IndustryFilings/index.htm.

The CFTC also exercised its regulatory authority in this area when considering market structure and competition issues related to defendants' rules in the year preceding those rules' approval. In its June 2002 report, the CFTC acknowledged the potential benefits of mandated fungibility (essentially, the scenario USFE demands in this case), but warned that it "could decrease the potential reward [for an exchange from developing a new product] and therefore decrease the incentive for innovation," and could "subject[ ] clearing organizations to one other's credit risk involuntarily." R. 731 ¶¶ 32-33. The CFTC made clear when it approved defendants' rules that it had been considering "the policy and legal **[**63]** issues involved" for the past year. *Id.* ¶ 27. The CFTC later concluded when subsequently approving CBOT's DCM application that "any potential antitrust issues are outweighed by the benefits to be gained including potential clearing efficiencies, significant cost savings for members and customers, and systemic risk abatement." *Id.* ¶ 29. The CFTC thus clearly exercised its regulatory authority in the area of defendants' challenged conduct.

Third factor (a resulting risk of conflicting guidance). The Court further finds that plaintiffs' challenge places the CEA and the antitrust laws in an actual irreconcilable conflict because the CFTC expressly approved defendants' rules as consistent with the CEA, notwithstanding possible anticompetitive effects. The CEA assigns to the CFTC the responsibility to "take into consideration the public interest to be protected by the antitrust laws and endeavor to take the least anticompetitive means of achieving the objectives of [the CEA]" when approving a contract market rule. 7 U.S.C. § 19(b). And the CFTC **[*1260]** explicitly did so here. The CFTC allowed a comment period during which USFE and others submitted objections to the rules (and particularly Regulation 701.01 regarding **[**64]** the open interest transfer) based on "anti-competitive impact." R. 733 ¶ 23. In approving the rules, the CFTC explained: (1) that the comment letters had raised the concern that the proposed rules "would violate the obligations of [CBOT] and the Commission in light of the antitrust provisions of the Act" (*id.* ¶ 24); (2) that the CFTC had considered these comment letters and had been considering the "market structure and competition" issues involved since June 2002 (*id.* ¶ 25); and (3) that the CFTC ultimately found that "no alternatives to the use of a single dedicated clearinghouse exist" (*id.*) and that defendants' rules "support[ed] innovation in the futures industry" (*id.* ¶ 27). Indeed, the conflict created by recognizing an antitrust claim would be even stronger here than in *Credit Suisse* because it would be an actual conflict with the CFTC's assessment, including its balancing of antitrust risk against other factors, rather than a hypothetical one. *See* 551 U.S. 281-82.

Fourth factor (whether conflict affected practices lying squarely within regulated area). Finally, the Court finds the conflict affects the practices of DCMs and clearing organizations, and those practices lie at the heart of the **[**65]** CFTC's oversight responsibilities, as the many statutory provisions and rules addressing those practices show. *See, e.g.*, 7 U.S.C. § 7(d) (CEA's core principles for DCMs); *id.* § 7a-1(c) (CEA's core principles for clearing organizations); 17 C.F.R. Part 38 (CFTC rules for DCMs); *id.* Part 39 (CFTC rules for clearing organizations).

Plaintiffs acknowledge that the CEA regulates the broad topic of exchange-directed clearing, but they emphasize that the CFTC "had not previously reviewed or ruled on" the "specific forced transfer" of open interest. R. 732 at 44.

The important point, however, is that the CFTC did rule on it here. And it did so as part of its broader consideration of whether to keep a single clearinghouse model or adopt a model with more fungibility and open access clearing. The open interest transfer defendants sought was directly related to the single clearinghouse model. In light of that model, not transferring would mean leaving the open interest at CBOT's previous clearinghouse (BOTCC) that would now become USFE's clearinghouse.

The CFTC evaluated in 2002-2003 and then again in 2009 whether to move to a model more akin to securities markets where contracts are fungible between competing exchanges and open access **[**66]** clearing is mandated, and it declined to change the model. R. 731 ¶¶ 31-35, 38. The Court therefore finds that the conflict between the CFTC's approval of the open interest transfer and recognizing an antitrust claim based on that transfer falls squarely within an area the CEA regulates (clearing organization and DCM practices).

Beyond the *Credit Suisse* analysis, plaintiffs' opposition latches onto the language in *American Agriculture*, that "outside the context of a pervasive regulatory scheme, [implied] immunity is proper when the relevant agency's scrutiny and approval of the challenged practice is active, intrusive and appropriately deliberative." *977 F.2d at 1167* (citing *Gordon, 422 U.S. at 689-91*). Plaintiffs argue that rather than being active and appropriately deliberative, the CFTC's review of defendants' rules, and particularly the open interest transfer rules, was "cursory and haphazard" as a result of defendants' own actions. R. 732 at 37. But a test that takes a deep dive into the factual nuances of the CFTC's review to determine if it was sufficiently deliberative is not the law. **[*1261]** The four-part test in *Credit Suisse* is the law. As defendants emphasize, in the sentences immediately following the sentence on which **[**67]** plaintiffs focus, the *American Agriculture* court added: "Put another way, an antitrust court, before relinquishing jurisdiction over allegedly anticompetitive activities, must be convinced that the agency has exercised its independent judgment in reflecting upon and approving the activity at issue. Moreover, the availability of judicial review, even if not the *sine qua non* of immunity, is extremely important." *977 F.2d at 1167*.

Here, unlike in *American Agriculture*, there is no doubt that the CFTC exercised its independent judgment in reflecting on and approving the activity in question—it expressly approved it. Indeed, the *American Agriculture* court contrasted the mere acquiescence to an emergency rule in that case with "[t]he Commission's [formal] approval or disapproval of [exchange] rules." *Id. at 1164*. And unlike in *American Agriculture*, judicial review was available here.

Read in proper context, the Court believes that the "active, intrusive and appropriately deliberative" inquiry is short-circuited in cases where an agency gives express approval. It was because the CFTC in *American Agriculture* had merely acquiesced to the challenged conduct that the court undertook deeper scrutiny to determine whether the **[**68]** CFTC had in fact "exercised . . . independent judgment." *Id.*

In any event, even if a more detailed assessment of the CFTC's review is appropriate, that does not change the Court's conclusion. Plaintiffs first try to establish that the shortened review period was based on a misrepresentation by CBOT. They cite an email reporting that CBOT's general counsel "noted" to the CFTC in June 2003 "that there was a walkaway provision in the [clearing link agreement] as of mid-July based on obtaining regulatory approval" for "rule changes." R. 733 Ex. 165. Plaintiffs explain that CME's CEO had expressed its intent in a July 7, 2003 board meeting to let the "walk-away option" "lapse." *Id.* Ex. 167 at 4. Notably, however, the CME board meeting summary does not indicate that CBOT or its general counsel was aware of CME's position on the walk-away option. Plaintiffs further say the CFTC relied on CBOT's misrepresentation about the walk-away option to shorten the anticipated 45-day period for public comment to four days. They cite comments from CFTC members complaining about the short timeframe resulting from the mid-July deadline. R. 733 Ex. 166; R. 733 Ex. 173.

Ultimately, however, regardless of the **[**69]** duration of the CFTC's review period or the cause of that duration, plaintiffs ignore the broader backdrop of consideration by the CFTC of competition and antitrust issues imposed by the single clearinghouse model. And they ignore that the CFTC actively solicited comment letters—despite the fact that it was not required to do so—and considered them when approving the rules. CFTC staff acknowledged and weighed the antitrust and competition objections raised and concluded that there were no viable alternatives to the "single dedicated clearinghouse" model. R. 733 ¶¶ 25, 29.

At bottom, this was not a situation like in *American Agriculture* of nonpublic review and no express approval. This was a case of express CFTC approval, after a year's worth of considering related competition issues, all of which was subject to *Administrative Procedure Act* review that plaintiffs did not seek. R. 731 ¶ 28. Thus, the Court agrees with defendants that the CFTC's decision approving the clearing link and open interest transfer are implicitly immune from antitrust scrutiny.

[*1262] B. Actionability Under Antitrust Laws

Defendants have an alternative basis for summary judgment on plaintiffs' liquidity deprivation theory **[**70]** based on the clearing link agreement and open interest transfer: that it is not actionable under the antitrust laws. Defendants note that even now, thirteen years after this theory first appeared in plaintiffs' second amended complaint, plaintiffs have not identified the specific antitrust doctrines on which they rely in support. And that is because, defendants say, this theory contravenes basic antitrust principles.

Because the parties raise different arguments with respect to the open interest transfer and the clearing link components of this theory, the Court considers them separately.

1. Transfer Of Open Interest

Defendants contend that plaintiffs' transfer of open interest theory assumes that CBOT should have left open positions in the CBOT Treasury futures contracts at BOTCC so that USFE could use them to attract liquidity in its new copy-cat futures contracts. The Court agrees with defendants that such an assumption runs headlong into the basic antitrust principle that there is "no duty to aid competitors" in light of the "uncertain virtue of forced sharing." *Verizon Commc'ns, Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 410, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*; *see also* *Mercatus, 641 F.3d at 857* ("[e]ven if the Hospital had monopoly power," it had "no duty to step aside and allow Mercatus to make off with **[**71]** its physicians, patients, and revenue"). Defendants had no duty to aid plaintiffs—their competitors hoping to take over the U.S. Treasury futures and options market—by voluntarily leaving open positions at BOTCC.

Plaintiffs argue that defendants misconstrue their theory. They say they are not arguing that defendants had a duty to aid plaintiffs through forced sharing. Instead, plaintiffs argue that CBOT "forcibly transferred" to CME an interest that did not belong to CBOT. R. 732 at 50. Relying on their expert report and internal defendant documents, plaintiffs claim that the open interest "was the product of separate and independent contracts between BOTCC and the traders," such that "CBOT had no right to dictate where those open positions resided." *Id.* (citing R. 742 ¶¶ 1, 27). Defendants dispute these facts. *See* R. 742 ¶¶ 1, 27.

The Court finds this fact dispute regarding ownership of open interests irrelevant for several reasons. For starters, if plaintiffs are correct that separate and independent contracts existed between BOTCC and traders, then any breach of those contracts would result in separate claims between BOTCC and the traders irrelevant to the antitrust claim before this **[**72]** Court. Moreover, the undisputed facts are that the CFTC approved the open interest transfer proposed by CBOT. Plaintiffs offer no legal support for the proposition that CBOT had no right to direct where the open positions in the contracts were cleared. Plaintiffs' position is particularly ironic given that USFE negotiated a term in its agreement with BOTCC to do precisely what CBOT had done in the event of termination: transfer open interest in USFE contracts to another clearinghouse. R. 731 ¶ 40. USFE sought this requirement because "[i]n the case of changing a clearinghouse, it is important for the exchange to have a smooth transition and a functioning market over that change." *Id.* This was (and still is) the prevailing regulatory structure, and USFE negotiated for it in its own clearing services agreement. The Court agrees with defendants that plaintiffs' position on the open interest transfer would require forced sharing, or aiding of CBOT's competitor, by leaving **[*1263]** open interest at BOTCC instead of using regulatory channels to approve a transfer of that open interest to CME.

A narrow exception to the "no duty to aid competitors" rule lies "at or near the outer boundary of [Sherman **[**73]** Act] *§ 2* liability" and applies where a firm unilaterally terminates a longstanding course of dealing with its rival and removes from the market services "marketed or available to the public." Trinko, 540 U.S. at 409-10 (clarifying the Court's earlier decision in Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)); *see also* Weber-Stephen Prods. LLC v. Sears Holding Corp., 2014 U.S. Dist. LEXIS 21338, 2014 WL 656753, at *7 (N.D. Ill. Feb. 20, 2014) ("[T]he Seventh Circuit has recognized that *Aspen*-like circumstances are a rare exception."). This is the exception cited by Judge Zagel in his prior summary judgment ruling allowing further discovery on plaintiffs' open interest theory to resolve the issue of defendants' intent. R. 445 at 9. But plaintiffs do not claim that this case involves *Aspen*-like circumstances. And for good reason, since that doctrine does not fit the facts here.

Beyond their emphatic attempts to explain what their open interest claim is *not, i.e.*, a forced sharing claim (*see* R. 732 at 50-51), plaintiffs do not clearly articulate what their claim *is* and how it fits within the antitrust laws. Plaintiffs' theory thus would require this Court to impose a novel exception to the "no duty to aid competitors" rule, which the Court is particularly reluctant to do in light of the complexities of the industry and the close supervision of the CFTC. *See, e.g.,* N.Y. Mercantile Exch., Inc. v. IntercontinentalExchange, Inc., 323 F. Supp. 2d 559, 570 (S.D.N.Y. 2004) ("the CFTC is in a **[**74]** better position than a general antitrust court to determine the scope and terms of any forced sharing of settlement prices among the exchanges that it regulates"). The Court agrees with defendants that plaintiffs' theory based on the open interest transfer, if actionable at all, lies on the outer bounds of ***antitrust law***, and is best left to the CFTC to regulate—a conclusion that bolsters this Court's grant of summary judgment on this theory. *See, e.g.,* Trinko, 540 U.S. at 410-16 (affirming dismissal where traditional antitrust principles did not justify new addition to "no duty to aid competitors" rule, including because the challenged conduct was subject to the FCC's regulatory authority and "[a]ntitrust analysis must always be attuned to . . . the significance of regulation" in "the industry").

2. Clearing Link

With respect to the clearing link, plaintiffs' theory is that defendants' exclusive clearing link "had the requisite exclusionary effect to constitute both an act of monopolization and an actionable conspiracy" because it "drained the open interest from BOTCC and locked it up at CME." R. 732 at 47-48. Plaintiffs say this arrangement "impaired USFE's clearing through BOTCC." *Id.* at 47.

Under both §§ 1 and 2 of the Sherman **[**75]** Act, "an exclusive contract is illegal only if it substantially forecloses competition in the relevant market." Methodist Health Servs. Corp. v. OSF Healthcare Sys., 2016 U.S. Dist. LEXIS 136478, 2016 WL 5817176, at *7-8 (C.D. Ill. Sept. 30, 2016), *aff'd*, 859 F.3d 408 (7th Cir. 2017); *accord* Dos Santos v. Columbus-Cuneo-Cabrini Med. Ctr., 684 F.2d 1346, 1352 (7th Cir. 1982) ("In the context of exclusive dealing arrangements, . . . the plaintiff can prevail only by showing that the agreement in question results in a substantial foreclosure of competition in an area of effective competition, that is, in a relevant market."). Defendants argue that their clearing agreement did not "substantial[ly] foreclose[ ]" USFE from the clearing **[*1264]** market for the simple reason that USFE obtained clearing services from BOTCC. *See id.; see also* Ryko Mfg. Co. v. Eden Servs., 823 F.2d 1215, 1234 (8th Cir. 1987) (plaintiff "produced no evidence suggesting that [defendant's] exclusive dealing provisions generally prevent[ed] competitors from finding effective distributors"). This argument is supported by the DOJ's finding in 2007 (as part of its review of CME's proposed merger with CBOT) after an "extensive investigation" of the clearing link agreement that it was not "likely to reduce competition substantially" or to "foreclose entry by other exchanges." R. 731 ¶ 36.

Plaintiffs respond that they did not need to be foreclosed from the clearing market for their injury to be actionable under the antitrust laws. They **[**76]** cite United States v. Dentsply Int'l Inc., 399 F.3d 181 (3d Cir. 2005), which found that where an exclusive dealing arrangement ensured that sales of a product would be kept "below the critical level necessary for any rival to pose a real threat to Dentsply's market share," the requisite anticompetitive effect could be shown. Id. at 191. *Dentsply* relied on the principle that "[a] set of strategically planned exclusive dealing contracts may slow the rival's expansion by requiring it to develop alternative outlets for its products or rely at least temporarily on inferior or more expensive outlets. Consumer injury results from the delay that the dominant firm imposes on the smaller firm's growth." *Id.* But plaintiffs do not point to any facts supporting that BOTCC was an inferior or more expensive outlet, or that consumer injury resulted. And as defendants point out, Dentsply is in tension with Seventh Circuit law. *See* Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 394 (7th Cir. 1984) (exclusive deal not anticompetitive despite causing plaintiff to "expand more slowly than it would otherwise have done, and at somewhat higher cost").

As with the open interest component of plaintiffs' second theory, the Court agrees with defendants that an exclusive dealing theory based on the clearing link that did not in fact exclude USFE from **[**77]** the clearing market lies on the outer bounds of ***antitrust law*** if it is actionable at all. *Cf.* Methodist Health Servs. Corp. v. OSF Healthcare Sys., 859 F.3d 408, 410 (7th Cir. 2017) (affirming summary judgment where exclusive dealing arrangement did not prevent plaintiff from having "a shot at . . . outbidding" its rival). This conclusion further supports this Court's grant of summary judgment of plaintiffs' second theory.[7]

III. Customer Threats and Public Misinformation Theory

After plaintiffs had a full opportunity for discovery as to consumer threats, plaintiffs still were unable to find support in the documents or depositions. In support of the consumer threats component of their third theory, plaintiffs now point only to their 2006 interrogatory response for evidence that "[d]efendants also threatened and intimidated traders." R. 731 ¶ 37 & Ex. 211 at 8-9. But this interrogatory response is not admissible evidence, and it **[*1265]** does not contain cites to deposition testimony or other admissible evidence.

Discovery also has not borne out the public misinformation component of plaintiffs' third theory in the way plaintiffs hoped. Plaintiffs claim that CBOT made intentionally false and deceptive public statements to thwart USFE's entry into the market. The speech or **[**78]** statements plaintiffs point to, however, are from internal presentations and memos rather than published articles. R. 742 ¶¶ 35-36.

Moreover, although the record supports that defendants separately hired media consultants who prepared stories as part of defendants' campaign to dissuade regulators from supporting USFE, *id.* ¶ 36, at least the majority of this activity was related to defendants' CFTC lobbying efforts and therefore falling within *Noerr-Pennington* immunity. The *Mercatus* court held that the "public relations campaign" in that case was "sheltered by *Noerr-Pennington*," because "'a publicity campaign directed at the general public, seeking legislation or executive action, enjoys antitrust immunity.'" 641 F.3d at 849 (quoting Allied Tube, 486 U.S. at 499-500). This is the case even where the campaign "employs unethical and deceptive methods." *Id.* And it is the case even where the campaign persuades people to "refuse or hesitate to do business with the target, causing that target some injury despite the government's refusal to act. Such injuries are inevitable whenever a business attempts to rally the public to encourage government action that will adversely affect one of its competitors." Id. at 850.

The *Mercatus* court further held **[**79]** that even when unrelated to legislative action, derogatory and false comments are "outside the reach of the antitrust laws, however critical they may be of a competitor[ ]," unless they are accompanied by a "coercive enforcement mechanism[ ]." Id. at 851-53. Absent such a mechanism, "even demonstrably false [c]ommercial speech is not actionable under the antitrust laws." Id. at 852. "Examples of coercive mechanisms include the ability to boycott, the ability to enter into agreements not to distribute certain products or an inherent authority that can be used as leverage." Int'l Equip. Trading, Ltd. v. AB SCIEX LLC, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *8 (N.D. Ill. Aug. 29, 2013). The only allegedly coercive mechanism to which plaintiffs point here is CBOT's 99% market share. But *Mercatus* likewise involved an alleged monopolist

---

[7] Defendants also say USFE selected BOTCC as its preferred clearing provider before learning of the CBOT-CME clearing link, meaning that plaintiffs did not suffer antitrust injury from not being able to clear through CME. *See* Paddock Publ'ns, Inc. v. Chi. Tribune Co., 103 F.3d 42, 47 (7th Cir. 1996) (affirming dismissal where plaintiff "never tried to make a better offer," explaining that "[plaintiff] should try to outbid [defendants] in the marketplace, rather than to outmaneuver them in court"). The Court does not find it appropriate to grant judgment as a matter of law on this alternative basis. None of the exhibits defendants cite conclusively shows that USFE selected BOTCC as its preferred provider *before* learning of the clearing link. R. 731 ¶¶ 7-8, 12-15.

with market power, and the false statements unrelated to legislative petitioning were not actionable because they "were not backed by any threats designed to coerce acceptance of the [defendant's] views about [plaintiff]." 641 F.3d at 851. Plaintiffs have not cited evidence of threats of coercion to accept defendants' views about plaintiffs here. As such, the Court finds that there is no evidence warranting a trial on this theory.

IV. Interference with Relationships Theory

Plaintiffs' final theory is that **[**80]** (a) CBOT attempted to interfere with USFE's contractual dealings with BOTCC and (b) defendants attempted to interfere with USFE's contractual dealings with the NFA.[8] Defendants say this theory is not viable under the antitrust laws for a **[*1266]** straightforward reason: USFE successfully entered into relationships with BOTCC and the NFA months before USFE launched its exchange. The Court agrees that this evidence forecloses plaintiffs' antitrust theory based on interference with relationships because it shows a lack of anticompetitive effect. *See* Schachar v. American Academy of Ophthalmology, Inc., 870 F.2d 397, 400 (7th Cir. 1989) (conduct "is not illegal without anticompetitive effects"). Plaintiffs do not meaningfully argue otherwise.

But the analysis of plaintiffs' Illinois tort claim based on the same evidence is not quite so simple. Under Illinois law, a claim for intentional interference with prospective economic advantage has four elements: "(1) a reasonable expectancy of entering into a valid business relationship, (2) the defendant's knowledge of the expectancy, (3) an intentional and unjustified interference by the defendant that induced or caused a breach or termination of the expectancy, and (4) damage to the plaintiff resulting from the defendant's interference." **[**81]** McCoy v. Iberdrola Renewables, Inc., 760 F.3d 674, 685 (7th Cir. 2014).

Defendants argue that plaintiffs' Illinois tort claim fails at the outset because defendants did not cause a termination of the expected business relationship plaintiffs had with BOTCC and the NFA—to the contrary, plaintiffs successfully entered into business relationships with both entities. In support, defendants rely on McCoy v. Gamesa Tech. Corp., 2013 U.S. Dist. LEXIS 82240, 2013 WL 2636365 (N.D. Ill. June 12, 2013), *aff'd on other grounds sub nom.* McCoy, 760 F.3d 674, which stated: "This Court has thoroughly reviewed Illinois law and can discern no instance in which a claim based upon interference with prospective economic advantage has survived where there has been no termination of the economic relations." 2013 U.S. Dist. LEXIS 82240, [WL] at *7. But the Seventh Circuit on appeal in McCoy clarified that while "[i]t is possible that Illinois courts would require a complete termination of the prospective relationship," "most Illinois cases on the subject involve an employee's suit against an employer for a rejection from another job, which is necessarily an all-or-nothing proposition." 760 F.3d at 686. The Seventh Circuit suggested that a plaintiff might be able to state a tort claim under Illinois law where the relationship at issue "was merely impaired but not terminated," if the plaintiff's "expectancy" was diminished. *Id.* Despite the Seventh **[**82]** Circuit's recognition of this possibility, it remains the case that no Illinois court appears to have recognized such a theory.

Even if Illinois courts do not require a complete termination of a business relationship, however, the Court still finds that plaintiffs' theory of tortious interference fails. A long line of Illinois cases makes clear that for purposes of the third element of the tort—*i.e.*, "an intentional and unjustified interference by the defendant that induced or caused a breach or termination of the expectancy" (id. at 685)—interfering conduct *directed at the third-party* must cause the diminished expectancy. *See, e.g.,* id. at 686; Galinski v. Kessler, 134 Ill. App. 3d 602, 480 N.E.2d 1176, 1180, 89 Ill. Dec. 433 (Ill. App. Ct. 1985) ("tort of interference with prospective economic advantage requires action by the defendant towards a third party which results in such interference"); F.E.L. Publications v. Catholic Bishop of Chicago, 1989 U.S. Dist. LEXIS 10119, 1989 WL 100006, at *1 (N.D. Ill. Aug. 18 1989), *aff'd sub nom.* Fitzpatrick v. Catholic Bishop of Chicago, 916 F.2d 1254 (7th Cir. 1990) (plaintiff "must demonstrate . . . some action toward a

[8] Plaintiffs also say that defendants "ignored" their theory that defendants interfered with contractual dealings with potential customers in addition to the contractual dealings with BOTCC and the NFA. R. 732 at 53. But plaintiffs do not cite any evidence related to customer contract interference to support that theory. *See id.* Nor, as discussed above, have plaintiffs found any prospective customer to testify about alleged threats.

third party which caused breach or termination of [plaintiff's] . . . expectancy"); *House of Brides, Inc. v. Alfred Angelo, Inc., 2014 U.S. Dist. LEXIS 1850, 2014 WL 64657, at *10 (N.D. Ill. Jan. 8, 2014)* ("It is insufficient for the purpose motivating the conduct to **[*1267]** be to interfere with prospective business relations; the act itself must be directed toward the third party."); *see also* *Schuler v. Abbott Lab., 265 Ill. App. 3d 991, 639 N.E.2d 144, 147-48, 203 Ill. Dec. 105 (Ill. App. Ct. 1993)* (although there is no requirement that an "interfering party must make **[**83]** contact with the third party," "the interfering action [must] be directed in the first instance at the third party"). "Summary judgment is appropriate when the plaintiff fails to present adequate evidence of a causal connection between the defendant's conduct [directed toward the third party] and the third party's action." *F.E.L., 1989 U.S. Dist. LEXIS 10119, 1989 WL 100006, at *1*.

Here, the conduct plaintiffs allege defendants directed at BOTCC and the NFA—the third-parties at issue—is disconnected from the expectancy plaintiffs say was diminished. Taking the facts in the light most favorable to plaintiffs: (1) CBOT attempted to get exclusivity with BOTCC and later to acquire BOTCC to try to shut it down, and (2) defendants misrepresented the NFA's lawful capacity to contract with USFE, including threatening to sue to invalidate the NFA-USFE agreement. R. 742 ¶¶ 24-34, 39-40. But plaintiffs do not explain how these specific (and ultimately unsuccessful) actions caused the diminishment of a reasonable expectancy plaintiffs had for their relationships with BOTCC or the NFA.

Rather, the only specific expectancy plaintiffs cite is that "USFE reasonably expected that the open interest would have remained at BOTCC . . . but for Defendants' anticompetitive **[**84]** conduct." R. 732 at 54. But it was not CBOT's alleged actions directed at BOTCC (or any actions directed at the NFA) that caused this change in plaintiffs' alleged expectancy. It was the open interest transfer rules that defendants proposed and that the CFTC approved. Absent a causal connection between the conduct directed toward a third-party and plaintiffs' alleged diminished expectancy, plaintiffs' tortious interference claim fails under Illinois law. *See, e.g.,* *F.E.L., 1989 U.S. Dist. LEXIS 10119, 1989 WL 100006, at *1*; *F:A J Kikson v. Underwriters Labs., Inc., 492 F.3d 794, 801 (7th Cir. 2007)* (claim failed absent evidence of statements "directed at third-party potential customers" that diminished expectancy).

Nor is it clear for purposes of the first element of the tort how an expectancy that open positions would remain at BOTCC could be "reasonable" in light of the fact that the CFTC approved the open interest transfer. *See* *McCoy, 760 F.3d at 685* (first element is a "reasonable expectancy"). It is plaintiffs' job on summary judgment to clearly articulate their legal theories, *United States v. Rode Corp., 996 F.2d 174, 178 (7th Cir. 1993)*, and to present "specific facts showing that there is a genuine issue for trial" on those theories, *Johnson, 892 F.3d at 896*. *See also* *Allstate Ins. Co. v. St. Anthony's Spine & Joint Inst., P.C., 691 F. Supp. 2d 797, 810 (N.D. Ill. 2010)* ("While we view the facts in the light most favorable to the nonmoving party, there is an affirmative burden of production on the nonmoving party **[**85]** to defeat a proper summary judgment motion."). Plaintiffs have not done so with respect to their Illinois tort claim. The Court therefore grants summary judgment on that claim along with plaintiffs' antitrust claims.

V. Causation

Finally, defendants argue that the lack of evidence that defendants' conduct caused USFE to fail entitles defendants to summary judgment on all of plaintiffs' antitrust theories. The Court need not reach this issue because it has already found that defendants are entitled to summary judgment on each theory.

[*1268] VI. Plaintiffs' Motion For Partial Summary Judgment

Because the Court has found summary judgment appropriate on plaintiffs' antitrust claims, plaintiffs' motion for partial summary judgment on the issues of the relevant market definition and CBOT's monopoly power is moot.

Conclusion

For the foregoing reasons, the Court grants defendants' motion for summary judgment [708] and denies plaintiffs' motion for partial summary judgment [712] as moot.
