Plaintiffs offer the additional *argument* that divestiture of IE is appropriate because it is the "fruit" of Microsoft's illegal conduct. *See, e.g.*, Pl. Prop. Findings of Fact P 1112. In so arguing, Plaintiffs do not direct the Court to any new *evidence* to support this assertion, but instead rely exclusively upon Judge Jackson's factual findings from the liability phase. Contrary to Plaintiffs' assertion, Judge Jackson's factual findings do not make "clear" that IE's success is the "fruit" of Microsoft's illegal conduct. *Id.* Judge Jackson found that:

> The period since 1996 has witnessed a large increase in the usage of Microsoft's browsing technologies and a concomitant decline in Navigator's share. **[**485]** This reversal of fortune might not have occurred had Microsoft not improved the quality of Internet Explorer, and some part of the reversal is undoubtedly attributable to Microsoft's decision to distribute Internet Explorer with Windows **[*244]** at no additional charge. The relative shares would not have changed nearly as much as they did, however, had Microsoft not devoted its monopoly power and monopoly profits to precisely that end.

Findings of Fact, 84 F. Supp. 2d at 98, P 358. Many of the acts which comprised Microsoft's "devotion of its monopoly power" to promoting IE to the detriment of Navigator, *id.*, including the free provision of IE along with Windows, were found by the appellate court *not* to violate ***antitrust law***. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. This fact, in conjunction with Judge Jackson's express finding that Microsoft's qualitative improvements to IE were a necessary factor in IE's rise to dominance, renders Plaintiffs' assertion lacking in basis in the factual record of the case. [121]

[486]** Dr. Elzinga observed that the forced auction of Microsoft Office appears to be a "textbook example of a measure designed to help competitors, not competition." Elzinga P 79. The auction would provide a "windfall for competitors" who would subsequently lose their "incentive to continue development of competing office productivity applications apart from their versions of Office, because that would require more effort, developing features from scratch, rather than porting features already developed by Microsoft." *Id. P 80*. Simultaneously, the auction of Office discourages innovation by setting the "bad precedent" that the "fruits of R&D and development investments can be expropriated on the grounds that it would help competitors compete in a complementary product market." *Id. PP 83*. This outcome, concluded Dr. Elzinga, is expressly "bad for competition." *Id.* The same is true with regard to the purported open-source of IE mandated by § 12 of Plaintiffs' proposed remedy, as this provision "is the most transparent 'IP grab'" by Microsoft's competitors. *Id. P 85*.

Dr. Shapiro, Plaintiffs' economic expert, conceded that §§ 12 and 14 **[**487]** of Plaintiffs' proposed remedy mandate the divestiture of Microsoft's assets and are appropriately labeled as structural remedies. Tr. at 3324, 3328 (Shapiro); *see also* Elzinga P 104 (describing Plaintiffs' proposed remedy as "a 'structural remedy,' albeit an unusual one."). Plaintiffs do not offer additional evidence regarding a causal link between Microsoft's illegal conduct and its maintenance of its monopoly to support their proposal of these divestiture provisions. Dr. Shapiro unsuccessfully attempted to distinguish the "structural" nature of the forced divestiture of intellectual property assets from the reorganization of a company with the testimony that the structural effect of §§ 12 and 14 means "putting in place something that will change the structure of the industry in the sense that . . . market structure will be changed." Tr. at 3325. (Shapiro). Ultimately, however, Dr. Shapiro could not offer any basis for his insistence that the forced divestiture of intellectual property assets is no less significant for a software company like Microsoft than the forced divestiture of tangible assets from an industrial line of business. *Id.* at 3327-29. Indeed, Dr. Shapiro

[121] Moreover, Plaintiffs did not offer any testimony in the remedy phase to establish that IE was the "fruit" of the anticompetitive conduct affirmed by the appellate court. *See, e.g.*, Tr. at 3596 (Shapiro) ("I understand a significant-a component of how-why it's in the remedy is under the notion of denying Microsoft the fruits of its illegal activity, and I'm not addressing that part of it, and I'm discussing how I think it will affect competition going forward.").

agreed **[**488]** even in his direct testimony that he could conceive of **[*245]** "no economic reason why copyrights and patents should receive any special treatment in comparison with other commercial assets." Shapiro P 85.

Another of Microsoft's economic experts, Dr. Murphy, agreed with Dr. Shapiro that §§ 12 and 14 were structural remedies. However, Dr. Murphy observed with regard to § 12, the open-source of IE, that this type of structural remedy is "even more severe than a typical divestiture requirement" because the provision requires divestiture "at a zero price." Murphy P 222. Dr. Murphy further testified that § 12 merely "engineers a specific outcome, the opensource model of software development." *Id. P 223*. With regard to § 14, Dr. Murphy testified that "the *form* of the Office auction . . . violates basic economic principles." *Id. P 227* (emphasis in original). The result of the auction, testified Dr. Murphy, would be an effective "subsidy," at Microsoft's expense, for the provision of Office on other operating systems, a result which lacked "rational economic reason." *Id.* PP 227, 229.

In sum, the Court finds that the testimony offered by Plaintiffs on the subject of the opensource **[**489]** of IE and the mandatory auction of Office licenses is insufficient to establish that such remedy provisions would accrue to the benefit of competition. Nothing in the testimony presented by Plaintiffs' witnesses in support of §§ 12 and 14 articulates coherently the manner in which the forced divestiture of Microsoft-created technology will foster the development of cross-platform middleware. Instead, Plaintiffs' evidence offers a subsidy for competing operating systems-a benefit to particular competitors, wholly unrelated to the middleware theory of liability in this case.

B. Plaintiffs' Proposed Remedy § 1

Section 1 of Plaintiffs' remedy proposes that Microsoft be required to unbind any "Microsoft Middleware Product," as Plaintiffs define the term, from the "Windows Operating System." SPR § 1. The provision mandates that if Microsoft chooses to sell a "bound" version of its PC operating system, meaning its Windows operating system as presently configured, it must also provide an "unbound" version of the operating system from which the "binary code for each Microsoft Middleware Product . . . may be readily removed," such that this identical but "'unbound' Windows **[**490]** Operating System Product performs effectively and without degradation (other than the elimination of the functionalities of any removed Microsoft Middleware Products)." *Id.* Section 1 further sets forth a pricing schedule, pursuant to which, the price of the "unbound" Windows will be reduced for each "Microsoft Middleware Product" that is removed. *Id.* Plaintiffs offer § 1 in the absence of any economic analysis of the effect of § 1 upon the monopolized market.

Plaintiffs' basis for the "unbinding remedy" rests upon the view that there exist some characteristics which are exclusive to "operating systems" and some characteristics which are exclusive to "middleware" such that the two can be clearly divided. Plaintiffs' remedy, in this regard, builds upon the separation identified by Judge Jackson in his *Findings of Fact*:

> While the meaning of the term "Web browser" is not precise in all respects, there is a consensus in the software industry as to the functionalities that a Web browser offers a user. Specifically, a Web browser provides the ability for the end user to select, retrieve, and perceive resources on the Web. There is also a consensus in the software industry **[**491]** **[*246]** that these functionalities are distinct from the set of functionalities provided by an operating system.

Findings of Fact, 84 F. Supp. 2d at 48, P 150. Because of this separation of functionality, Judge Jackson and the appellate court were able to ascribe liability to Microsoft for its act of commingling the code that enables Web-browsing "functionality," imprecisely defined, and the code that enables "operating system" functionality in its Windows operating system. *Microsoft, 253 F.3d at 65-66*; *see also* *Microsoft, 87 F. Supp. 2d at 39*; *Findings of Fact, 84 F. Supp. 2d at 49-50, 53, 56, PP 159-64, 174, 192*. As is apparent from the language of the proposed remedy, Plaintiffs seek to parlay the distinction between Webbrowsing functionality and operating system functionality into a far broader distinction between middleware functionality, as Plaintiffs define it, and operating system functionality. Plaintiffs fail, however, to establish that there exists any agreement, let alone a "consensus," that all such middleware functionality, again as defined by Plaintiffs, is distinct from operating system functionality.

Plaintiffs' computer science expert, Dr. Appel, advanced Plaintiffs' view, defining **[**492]** an operating system generally as "software that manages and controls a computer's hardware and provides a platform on which application programs (or middleware) can run." Appel P 26. Dr. Appel identified a component of the Windows operating system called the "kernel" which operates in "privileged mode" on the computer hardware, meaning that it "has access to all of the computer hardware devices so that it can mediate services to applications." *Id.* P 27. From this definition, Dr. Appel espoused the view that software code in Windows that is not part of the operating system kernel can be viewed as a species of "application or middleware or . . . library code." Tr. at 2969 (Appel); *accord* Appel P 28. Nevertheless, Dr. Appel acknowledged that applications that "perform general utility functions" are often included with an operating system and are conventionally identified as part of the operating system product. Appel P 28. Though he articulated a certainty regarding the distinction between operating system and application, Dr. Appel wavered throughout his testimony on the subject of whether the kernel constitutes the entire operating system once the middleware is removed, or whether **[**493]** the kernel is merely a portion of the operating system, such that even after removal of the middleware, the operating system would consist of kernel and other software code.

Uncertainty as to which functionalities and their corresponding code comprise the true "operating system," assuming for purposes of discussion there is such a thing, is not unique to Dr. Appel. For example, Windows includes software which provides the function of "HTML rendering." Tr. at 3084 (Appel). The function of HTML rendering is "one of the several functions of the [Internet] browser," and therefore, removal of the "browser" would result in removal of the HTML renderer. *Id.* at 3084-85. Tom Greene, Assistant Attorney General of California, testified that he viewed the functionality provided by the HTML rendering engine in Windows to be "pretty much a basic utility in a sort of laymen's sense in the operation of most operating systems." Def. Ex. 1530 at 83 (Greene). Nevertheless, concluded Mr. Greene, § 1 of Plaintiffs' remedy proposal requires the removal of the HTML renderer from Windows because it is part of the "Internet browser," SPR §§ 1 (requiring the unbinding of "Microsoft Middleware Products), **[**494]** 22x (defining "Microsoft Middleware Product" to include as "Internet browsers"). *See* *id. at 83-84*. Once removed, **[*247]** remaining portions of Windows, such as the "Windows Help" system and "Windows Explorer," both of which rely upon the HTML rendering engine included in Windows for necessary functionality, would not function. *See* Madnick P 183. If the HTML renderer was added back into Windows, Microsoft would be subject to a claim that it had not truly removed all of the "Internet browser." Conversely, if removed, Microsoft would be subject to a claim that it had provided a "degraded" operating system because Windows Help and Windows Explorer would not function, even though the OEM had requested only the removal of the "Internet browser." SPR § 1.

From the example of the HTML rendering engine, which arises in conjunction with the unbinding of the "Internet browser," some of the difficulties inherent in Plaintiffs' unbinding proposal become clear. Mr. Greene acknowledged the difficulty in complying with Plaintiffs' proposed unbinding of the Internet browser and attempted to minimize the significance of this difficulty with the assertion that Internet browsing functionality is somehow **[**495]** a "peculiar" example of how the unbinding proposal would work. Def. Ex. 1530 at 83 (Greene). Tellingly, however, it is only with regard to Web-browsing functionality that Judge Jackson determined there to exist a "consensus" with regard to a distinction between that functionality and "operating system" functionality. *Findings of Fact, 84 F. Supp. 2d at 48, P 150*. Based on this finding, the appellate court was able to impose liability for the commingling of code related to operating system and browsing functionality, two seemingly separate types of functionality. Given the close relationship between IE and the liability imposed for commingling, in comparison to the lack of a direct relationship between other middleware and the commingling liability, there is little comfort to be taken from an assertion that the remedy for the commingling of browsing specific code with operating system code is merely a "peculiar" example. Def. Ex. 1530 at 83 (Greene). Quite to the contrary, if Plaintiffs' unbinding remedy is at all workable, the "unbinding" of browsing functionality should be a *good* example of the remedy's operation. Instead, the example of the "Internet browser" serves only to illustrate the inherent **[**496]** flaws in § 1 of Plaintiffs' remedy proposal. Plaintiffs' witnesses could not establish with any certainty the manner in which Microsoft could comply with § 1 with regard to its "Internet browser." Concomitantly, there is no basis upon which to conclude that the unbinding of all of the other types of "Microsoft Middleware Products" specified in Plaintiffs' remedy proposal will prove more readily attainable.

Section 1 of Plaintiffs' remedy proposal is deficient in that it does not provide any rule, or even guidance to Microsoft, for determining which code within Windows constitutes the various "Microsoft Middleware Products," both individually and as a group. Dr. Appel was unable to offer a hard and fast rule for distinguishing operating system functionality from application (or middleware) functionality. Instead, he offered a "rule of thumb" for distinguishing applications from the "kernel" of an operating system. Appel P 29. This "rule of thumb" divides applications from the "kernel" on the basis that application programs execute in an unprivileged hardware mode (meaning they cannot directly access the computer hardware, but must rely on the operating system to provide hardware **[**497]** services), and the kernel executes in privileged mode (meaning it can directly control computer hardware). *Id.* Even adhering to this "rule of thumb," **[*248]** however, Plaintiffs' expert displayed significant uncertainty as to the exact line between the "operating system" and "middleware" applications. *See* Tr. at 3123 (Appel). In sum, the evidence presented in the remedial phase does not support a finding that there exists anything close to a "consensus" that all of the other types of "middleware" [122] identified by Plaintiffs can be similarly distinguished from the "operating system."

Even if there were such a consensus, there is little doubt that the physical distinction between modules of code for such middleware and the operating system would be far more difficult to define **[**498]** than the conceptual distinction between types of functionality. Compounding this difficulty would be the need to distinguish among and between various types of middleware functionality in order to enable the removal of particular pieces of middleware (as opposed to all of the middleware at once) as required by § 1 of Plaintiffs' remedy proposal. Plaintiffs' proposed remedy does not identify the boundaries between particular middleware products, nor does it provide Microsoft with a rule for doing so. Dr. Appel conceded that "at the moment, there is no way to draw boundaries around the components that correspond to a particular Microsoft middleware product," as that term is used in Plaintiffs' proposed remedy. *Id.* at 3217; *accord* Bennett P 65; Gates P 168; Madnick P 134; *see also* Memorandum Opinion, Parts III.B.2.b, III.C.5. In the absence of such guidance, § 1 of Plaintiffs' proposed remedy is ambiguous, as there is no clear path for Microsoft to follow in order to comply with this aspect of Plaintiffs' proposed remedy. Such vagueness renders § 1 largely unenforceable.

Microsoft's witnesses were broadly critical of this portion of Plaintiffs' proposal, insisting that **[**499]** it proceeds on the faulty premise that Windows consists of a "small, self-contained and fully functional operating system (which [Plaintiffs] sometimes refer to as the 'kernel' or the 'core operating system') and a collection of readily identifiable, add-on middleware products that might just as easily be distributed separately from the operating system." Gates P 168; *see also* Jones PP 65-70; Madnick PP 143-47. The theory of § 1 fails to account for the fact that, pursuant to this view, nearly all, meaning in excess of 90 percent-likely 98 percent-of the Windows operating system is "middleware," as Plaintiffs have defined it. *See* Madnick P 142; *see also* Tr. at 2971 (Appel); Tr. at 5915-16, 5929-30 (Madnick). Within this large majority of the Windows operating system there exist countless interdependencies between the various "Microsoft Middleware Products." Because of the vast interdependencies in Windows, Microsoft's witnesses insist that the portion of Plaintiffs' remedy proposal which requires the remaining unbound operating system to function "without degradation" following the removal of the "Microsoft Middleware Products," renders compliance with § 1 virtually **[**500]** impossible. *See* Bennett P 33; Gates P 193; Jones P 62.

Dr. Appel contended that the unbinding of Microsoft "middleware" without degradation to the remaining operating system is feasible because Windows adheres to a "modular" construction, which means that related functions are contained within the same unit of programming code while unrelated functions reside in separate units **[*249]** of code. Microsoft does not deny that its Windows code is modular, Madnick P 167, but insists that this aspect of the product's design does not render § 1 of Plaintiffs' proposed remedy workable. *Id.* PP 167-188. As one of Microsoft's computer science experts, Dr. Stuart Madnick, explained, and the Court credits his testimony, Windows has many functional "components," meaning subsets of functionality which are accessible through APIs. *Id.* P 167. Each component will likely rely on several modules of code, and the same module of code is often used by multiple components to provide various functionalities. *Id.* P 168. A more componentized system includes a greater number of interdependencies. *Id.*; *see also* Tr. at 3157-58 (Appel). Because of these interdependencies, the removal of a

---

[122] As the Court observed previously, *see* Memorandum Opinion, Part III.B.2.b, Plaintiffs' proposed remedy defines middleware very broadly, such that virtually any block of software code which exposes an API constitutes middleware.

particular **[**501]** component may cause the failure of other components that relied upon the removed component, such that the remaining components do not function "without degradation," SPR § 1. Bennett PP 37-73; Madnick PP 177-79; Tr. at 3157-58 (Appel).

Plaintiffs' witnesses responded to this dilemma with the assertion that Microsoft should be able to identify the interdependencies within Windows and account for them in a manner which renders code removal possible. Plaintiffs' witnesses contended that the "component definitions" created by Microsoft in its XP Embedded product and identified by a tool called the "Target Designer" are useful for defining which software code constitutes the middleware components that Plaintiffs' remedy proposal would require Microsoft to make "removable" from Windows. Windows XP Embedded is an operating system that Microsoft markets for OEMs to support applications that perform a very specific function for a non-PC, limited use device, Bennett PP 61, 68; Short PP 108, 110; Tr. at 3212-13 (Appel), such as a video game console or a set-top box. Tr. at 3212-13 (Appel); *see also* Bennett P 61 Short PP 108, 110; *see generally* Bennett PP 59-73. Windows XP Embedded, **[**502]** and the suite of tools which accompany the product, enable the creation of a smaller, specialized operating system that provides only the necessary functionality for the particular limited use device. Short P 110; *see also* Tr. at 3212-13 (Appel). Microsoft created Windows XP Embedded from the "binary code," rather than the "source code" of Windows XP Professional. Short P 111. Binary code is the product which results when the underlying source code is compiled and linked together. *Id.*; *accord* Bennett P 62. The "binaries" in Windows XP Embedded are "identical" to those in Windows XP. Tr. at 5639 (Short).

The developers of Windows XP Embedded identified "component definitions" which identify the individual files that comprise a particular component and the cross-dependencies that the component has on other blocks of software code in Windows XP. Bennett P 66; Short P 112. The Target Designer tool supplied with the Windows XP Embedded operating system identifies the cross-dependencies that a component has upon other components of Windows XP Embedded. Short P 113; *see also* Bennett P 67. Having identified these dependencies, in order to enable proper functioning, the Target **[**503]** Designer ensures that when a particular component of the embedded operating system is selected, all of the other components upon which the selected component depends will be included in the runtime. Short P 113; *see also* Bennett P 70. Therefore, the Target Designer does not remove the interdependencies, when a particular component is selected for inclusion in an embedded runtime. Bennett PP 62, 70; *see also* Short P 113; Tr. at 3216-17 (Appel). Instead, **[*250]** it merely ensures that all of the necessary code accompanies the designated component. *See* Bennett P 70; Short P 113; Tr. at 3216-17 (Appel). Even assuming that the component definitions in Windows XP Embedded would comport with Plaintiffs' definition of "Microsoft Middleware Product," and there is no evidence that they would, Plaintiffs have not established that Microsoft's embedded operating system and the tools which accompany that embedded operating system will enable the removal of a single such component at the behest of an OEM in a manner compliant with § 1 of Plaintiffs proposed remedy. This is so because the embedded operating system does not remove interdependencies among components. If a component were removed **[**504]** and that component provided a service to any other component remaining in the operating system, the remaining component would likely cease to function. *See* Bennett PP 70-71. Such a result would violate the requirement in § 1 of Plaintiffs' proposed remedy that the "unbound" operating system must function "without degradation." SPR § 1.

Plaintiffs' witnesses speculated that the very existence of the XP Embedded operating system and the accompanying tools are a significant first step toward the "unbinding" of the "middleware" from the "core operating system." *See, e.g.*, Appel P 138; Tr. at 1806-10, 1814-15 (Ledbetter). In this regard, however, Plaintiffs' computer science expert, Dr. Appel, conceded that the basic and fundamental assumption built into the XP Embedded operating system and Target Designer that "if you're going to include one component, then you also need to include any other component on which it depends," Tr. at 3216 (Appel), would have to change for the system and the tools to be useful in complying with § 1 of Plaintiffs' proposed remedy. *Id.* at 3216-17. None of Plaintiffs' witnesses convincingly explained how the tools would have to be changed or "adjusted, **[**505]** " nor do any witnesses establish that such changes could be made within a reasonable time and with a reasonable amount of effort. In contrast, Microsoft offers evidence, which the Court credits, that notwithstanding the existence of the embedded operating system and its tools, it would be "exceedingly difficult" to remove "middleware" from Windows "without causing serious malfunctions." Bennett P 73. Based upon this evidence, the Court is not satisfied that Microsoft can readily account for the existing interdependencies so as to render various "Microsoft Middleware Products" removable without degrading the remaining portion of the operating system.

Dr. Appel identified four other ways, apart from relying upon Windows XP Embedded, in which Microsoft could comply with § 1 of Plaintiffs' proposed remedy. [123] **[*251]** Each of these propositions is flawed significantly. The first option, "to simply let the Microsoft middleware product be removable," Tr. at 3208 (Appel), does not itself explain how the remaining portions of Windows will continue to function effectively in the absence of an interdependent middleware product. *See* Bennett P 80; Gates P 218. The second proposition is "to let the **[**506]** subcomponents of the Microsoft middleware products be removable" such that the subcomponent remains after the "middleware" is removed. Tr. at 3208-09 (Appel). While this solution potentially resolves the interdependency issue, it creates a compliance issue, as it is possible, if not likely, that the subcomponent which has been left behind is itself a "Microsoft Middleware Product," pursuant to Plaintiffs' very granular definition, *see* Memorandum Opinion, Part III.B.2.b, which must be made removable at the option of the OEM. *See* Bennett P 80. Accordingly, the second solution creates as many problems as it solves. The third potential solution offered by Dr. Appel is to move the necessary pieces of code into other portions of Microsoft's operating system product such that they are present, but do not expose APIs. Tr. at 3209 (Appel). This solution also creates more problems than it solves, as it would require Microsoft to create multiple copies of the same functionality and include those multiple copies in the Windows operating system. *See* Bennett P 80; Madnick PP 180-85. This solution would result in significant and inefficient code duplication, increase the size of the operating **[**507]** system, and impair the performance of the operating system by slowing its operation. *See* Bennett P 80; Jones P 69; Madnick P 180; *see generally* Madnick PP 180-85. In addition, this solution would render the resolution of problems and "bugs" in the repeated components far more difficult. Bennett P 80; Madnick P 184. Dr. Appel himself acknowledged that such a scheme "could lead to a waste of system resources." Tr. at 2995 (Appel). Finally, Dr. Appel proposed "just reducing the inherent . . . interdependence between Microsoft middleware products." *Id.* at 3209. This last solution was accompanied by little explanation, particularly with regard to how Microsoft would accomplish this task without completely redesigning its product. *See* Gates P 218. Moreover, inasmuch as the interdependencies are considered an advancement in technology, *see, e.g.*, MadnickPP 180, 184, Dr. Appel's solution in this regard proposes backward motion. Therefore, the Court finds that, although unbinding as required by § 1 may not be technologically impossible, it has not been shown to be a reasonable option, as it would likely require the complete or substantial redesign of Windows.

[508]** Ignoring all of these difficulties for purposes of discussion, Plaintiffs' witnesses theorized that ready removal of all of the "middleware" in Windows will enable the substitution of the Microsoft middleware with third-

---

[123] The colloquy proceeded as follows:

> Q. (by Plaintiffs' Counsel Mr. Hodges): Could you explain what ways in your opinion Microsoft could comply with Section 1 of the States' proposed remedy?
>
> A. (by Plaintiffs' computer science expert Dr. Appel): One way is to simply let the Microsoft middleware product be removable.
>
> Another way is to let subcomponents of the Microsoft middleware products be removable. The States remedy doesn't require that, but it permits that. And then in the case of, for example, MS HTML, the rendering engine the subcomponent of the browser, an OEM might choose to leave that component in even if they want to substitute a different browser, and then there's no chance of degradation of the functionality of other components that depend on that HTML rendering.
>
> Another option, as I have explained, is to take necessary fragments of functionality and embed them in other products, other than Microsoft middleware products, so they don't expose APIs.
>
> Another kind of way to comply is just to reduce the inherent commingling, or I should say interdependence between the Microsoft middleware products. This would be not really a mechanical engineering task; one requiring some design to make the Microsoft middleware products a little less dependent on each other, and Microsoft might choose to do this, for example, if it doesn't like the other options because it doesn't want to be dependent for functionality on a non-Microsoft substitute.

Tr. at 3208-09 (Appel).

party middleware. *See, e.g.*, Appel PP 131, 138; Schwartz P 158; Tr. at 427 (Barksdale); Tr. at 1547 (Ledbetter); *see also* Tr. at 4825 (Gates) (discussing Dr. Appel's testimony). While an attractive **[*252]** notion in theory, Dr. Madnick, one of Microsoft's computer science experts made clear that this model of computing is largely unworkable in practice. Dr. Madnick explained:

> The concept of a completely modular operating system has been a "holy grail" for computer scientists for decades, one frequently sought but never found. Even in their dreams, however, computer scientists have not imagined a modularity as granular as that embodied in [Plaintiffs'] Proposal. Modularity has generally meant being able to replace major elements, such as the file system or the graphical user interface, not the code supporting arbitrary combinations of individual APIs. And even the far more modest vision has largely failed in practice. Although the idea of building an operating **[**509]** environment with "best of breed" components obtained from various vendors has some superficial appeal, getting them all to work together smoothly requires an enormous effort that creates ongoing support problems. Each time one component changes, it may create incompatibilities with others. When things go wrong, as they inevitably do, it is hard to figure out where the problem lies or which vendor is at fault. Often the fault lies not in any individual component, but in the interactions among them.

Madnick P 187 (footnote omitted). The Court credits this portion of Dr. Madnick's testimony, which is unrebutted. Plaintiffs fail to offer evidence that modularity of the type contemplated by § 1 of Plaintiffs' proposed remedy has ever been attained. It would appear that the very model of this section of Plaintiffs' proposed remedy is largely aspirational.

Contrary to the view advanced by Plaintiffs' witnesses, Microsoft does not consider portions of Windows to be "middleware" while other portions are "operating system." In Microsoft's view, Windows with some of its "middleware" functionality removed is still Windows, but it is a different version of Windows. In general, Microsoft's **[**510]** witnesses argued uniformly that the removal of any middleware functionality from Windows would result in multiple versions [124] **[**511]** of Windows. [125] From this background, Microsoft's witnesses contended that the imposition of § 1 will result in the "balkanization" or "fragmentation" of Windows. Microsoft presents evidence that such fragmentation would hinder, or even destroy, Microsoft's ability to provide a consistent API set. *See* Borduin P 61; Elzinga P 102; Madnick P 197. This loss hinders the ability of Windows to serve as a "platform for applications that supports new functionality while providing backward compatibility [126] for most existing **[*253]** applications." Madnick P 197. Such fragmentation appears to be the goal of § 1 of Plaintiffs' proposed remedy, as Mr. Barksdale testified, because it will ease the way for other middleware products to try to fill the gaps created by the "Microsoft Middleware Products" removed from Windows. *See* Barksdale P 60 ("This . . . will bring an end to developers' certainty that no matter what, Microsoft middleware code will be resident on virtually all PCs."); *see also* id. PP 61-62.

The weight of the evidence indicates that the fragmentation of the Windows platform would be significantly harmful to Microsoft, ISVs, and consumers. Plaintiffs' computer science expert, Dr. Appel, opined that Microsoft would remain responsible for testing at least a "representative sample" of the various configurations of the newly "unbound" Windows, but was uncertain as to **[**512]** exactly what such testing would entail. Tr. at 3130-31, 3135 (Appel). Dr. Bennett, one of Microsoft's computer science experts, testified that Microsoft would be unable to test,

---

[124] Dr. Bennett estimated "conservatively" that § 1 of Plaintiffs' proposed remedy would produce more than a thousand variants of Microsoft's PC operating system due to the fact that each OEM could choose a different combination of middleware components. Bennett PP 47, 55; *accord* Gates P 200-01.

[125] Plaintiffs, of course, ignore Microsoft's view of its own products and insist that because Windows is sold as an "operating system," any "middleware" functionality which accompanies that sale is extraneous and can be removed without creating a different version of "Windows." From Plaintiffs' perspective then, the addition or removal of Microsoft's middleware products still leaves the "operating system"-plus or minus a Microsoft middleware product that, like any other application, can be added or removed. Tr. at 422-24 (Barksdale).

[126] "Backward compatibility" can be understood to mean that the APIs that are exposed by older versions of Windows are also supported by the new Windows versions. Tr. at 5093 (Jones).

on a level comparable with the present level of testing, the various configurations of its operating system product created by § 1 of Plaintiffs' remedy. Bennett P 50; *accord* Jones P 81. Similarly, Dr. Bennett testified that § 1 of Plaintiffs' proposed remedy would impose an "intractable" support burden upon Microsoft. Bennett P 56; *accord* Jones PP 75-77.

Plaintiffs' witnesses attempted to challenge Microsoft's fragmentation argument by likening the fragmentation which would be caused by § 1 to the fragmentation which is caused by Microsoft's periodic release of new versions of Windows. Plaintiffs' attempt in this regard is misguided, as there is little similarity between the two types of fragmentation. Most obviously, the present state of fragmentation is minuscule in comparison to the more than 1000 possible versions of Windows that might exist if the Court were to adopt § 1 of Plaintiffs' remedy proposal. *See* Bennett PP 47, 55; *accord* Gates P 201. More fundamentally, because of the relatively **[**513]** small degree of fragmentation between successive versions of Windows, Microsoft is able to work towards maintaining backward compatibility with previous versions. Tr. at 5093 (Jones). Microsoft attempts to maintain this backward compatibility by not altering documented APIs in ways that will prevent them from functioning with older applications. *See* Gates P 325; Jones P 17; Madnick P 153; Short P 8. For example, Microsoft has been able to conduct compatibility tests, though costly and time consuming, even with the minimal amount of fragmentation that presently exists, in order to ensure that the thousands of applications designed to run on Windows 95, Windows 98, Windows 98 SE and Windows ME would continue to function on Windows XP. *See* Jones P 17. In contrast, Plaintiffs' remedy mandates the removal of code, which will result in the absence of the API. In such a scheme, there is no way to maintain this kind of backward compatibility for each and every variation of Microsoft's PC operating system which would result from the imposition of § 1 of Plaintiffs' remedy proposal.

Seeming to fare worst in the scenario envisioned by § 1 of Plaintiffs' remedy are the ISVs, who, following **[**514]** the imposition of § 1, would not have any assurance that a particular functionality was present in any given configuration of the new unbound Windows. *See* Borduin P 64; Frei P 33; Jones PP 88, 91. As a result, at least in the short term, an unbound version of Windows would likely cause existing applications to fail. Gates P 62; Bennett P 86; Tr. at 42829 (Barksdale); Tr. at 7048-49 **[*254]** (Bennett); Tr. at 4521-22 (Gates); *see* also Tr. at 3136-37 (Appel). Plaintiffs' witnesses theorized that any such malfunctioning will be temporary, as competitors create products which will substitute for the middleware which has been removed. *See, e.g.*, Tr. at 3138 (Appel). This duplication of effort among Microsoft and individual ISVs has the potential to lead to many different implementations of the same functionality. Such a circumstance creates a risk that the software code distributed with one ISV's application would conflict with that distributed with another ISV's application, leading to the so-called "DLL Hell" problem that results when multiple versions of the same basic components try to coexist on a single PC. *See* Borduin PP 73, 75-77; Jones P 79; Tr. at 6431-35 (Averett). There **[**515]** is no indication that there is any competitive or economic advantage to such a situation and, quite to the contrary, such a result would likely be detrimental to the consumer.

Plaintiffs' witnesses implied that, with regard to any problems that arise because of the vast modularity they envision, it would be the burden of the ISV to address those problems and to ensure that its products would work effectively with the unbound version of Windows. *See, e.g.*, Def. Ex. 1530 at 39-41 (Greene). Scott Borduin, Vice-President and the Chief Technology Officer at Autodesk, Inc., Borduin P 1, testified that his company would be unable to ensure that its applications work on all versions of the newly unbound Windows. *Id. P 66*. Mr. Borduin went on to explain that the unbinding remedy would heap a massive and unwanted testing burden upon ISVs, who would be required to create multiple versions of their own products to work on the multiple versions of Windows. *Id. PP 67-68*. Similar testimony was offered by Mr. Hofstader, Vice President of Software Engineering for Freedom Scientific Inc. Hofstader PP 1, 43-46. Furthermore, explained Mr. Frei, Chief Executive Officer of Onyx Software Corporation, **[**516]** Frei P 1, the removal of code from Windows would require the addition of code to the ISVs' products. *Id. P 36*. This additional code would render the ISVs' products "larger and more complex," slow development, increase the cost of development, and increase the likelihood that such products would malfunction. *Id.* Dr. Appel, Plaintiffs' computer science expert, acknowledged these results and further noted the possibility that when the OEM's substitution of technology formerly implemented in the "bound" Windows was inadequate or defective, the performance of the application calling upon that technology will suffer. Tr. at 3136-37 (Appel). Despite this acknowledgment, Dr. Appel had not investigated whether ISVs were prepared or willing to undertake the burden imposed upon them to resolve the issues that would likely result from Plaintiffs' unbinding proposal in § 1 of their proposed remedy. [127]

[517]** Plaintiffs fail to offer evidence which counterbalances the difficulties inherent in § 1 of their remedy and the abundance of adverse effects upon ISVs and potentially, consumers. Not surprisingly, therefore, Plaintiffs fail additionally to offer any evidence that § 1 will benefit competition. Indeed, Plaintiffs' sole economic expert refused **[*255]** to endorse *any* aspect of § 1 of Plaintiffs' proposed remedy. Compounding this absence of economic evidence to support such a radical remedy is the testimony of one of Microsoft's economists that there exists no economic rationale for the code removal required by § 1 of Plaintiffs' proposed remedy. Murphy P 204. Dr. Murphy noted that, "the incremental competitive gain from requiring actual removal of code is small or non-existent," while in comparison, "the potential costs of requiring the removal of code are far greater in terms of the costs it will impose on design and testing and the reliability problems it is likely to impose on users." *Id.* Plaintiffs fail entirely to contradict this testimony.

In summary, Plaintiffs' unbinding proposal imposes an entirely new model of product design for Microsoft's operating system products without **[**518]** any showing that such a model is economically justified, beneficial to competition, and technologically feasible. Quite to the contrary, the Court finds that § 1, if imposed, would likely inflict significant harm upon industry participants-ISVs in particular-and potentially, consumers. Plaintiffs new model for Microsoft's operating system products extrapolates extensively from Judge Jackson's determination that there exists a "consensus" as to a distinction between operating system functionality and Webbrowsing functionality: Plaintiffs have expanded Judge Jackson's determination by insisting that there exists such a distinction between all middleware (broadly defined) functionality and operating system functionality. Plaintiffs have not established, however, that there exists any similar "consensus" with regard to all middleware functionality. The provision in Plaintiffs' proposed remedy which would impose this new regime does not provide Microsoft with any degree of guidance regarding the manner in which it is to comply. In particular, § 1 of Plaintiffs' remedy proposal is insufficiently precise in providing definitions which separate the "kernel" or "core operating system" from **[**519]** the "Microsoft Middleware Products," as well as the various "Microsoft Middleware Products" from one another. Even if such definitions were provided, Microsoft has established that there is presently no reasonable means by which Microsoft can remove the middleware portions of its operating system product and still provide a product in which the remaining functionality is not "degraded." SPR § 1.

C. Plaintiffs' Proposed Remedy § 5

Section 5 of Plaintiffs' remedy proposal enjoins Microsoft from engaging in "any action that it knows or reasonably should know, will directly or indirectly interfere with or degrade the performance or compatibility of any non-Microsoft Middleware when Interoperating with any Microsoft Platform Software, other than for good cause." SPR § 5. The provision further requires Microsoft, at least sixty days before taking such action, to provide notice to the affected ISV(s) of the action and the reason for doing so. *Id.* Plaintiffs' economic expert explained that § 5 is intended to provide some "protections" to ISVs that their products will work well with Windows. Shapiro P 152. Advocates of the provision attested that the notification requirement **[**520]** would not hinder Microsoft's ability to innovate and change its products accordingly, but would reduce the harm to Microsoft's rivals by providing notice and an opportunity to re-engineer products to avoid damage in the marketplace. *See* Kertzman P 75; Shapiro P 153.

Unable to link § 5 to any finding of liability in this case, Plaintiffs justify the **[*256]** inclusion of this provision with allegations of other instances of such "knowing interference" which have adversely affected Microsoft's competitors. *See, e.g.*, Richards PP 180-87 (describing problems encountered by RealNetworks); Ledbetter PP 142-43 (linking

---

[127] Defendant presented additional unrebutted evidence that server vendors would be harmed by the fragmentation which would result from Plaintiffs' unbinding proposal. Richard Ulmer, a Vice President of Unisys Corporation, a provider of server and server-related products, Ulmer PP 1, 7, testified that interoperation between clients and servers will be severely hindered as a result of the removal of code from the Windows operating system. *Id.* PP 29-32.

the need for § 5 in Plaintiffs' remedy proposal to the MUP problem, described in Memorandum Opinion, Part III.D). The Court has already concluded that allegations of new "bad" acts, including those regarding interoperability, are largely irrelevant because they cannot be fairly characterized as mere extensions of conduct already found to be anticompetitive. *See* Memorandum Opinion, Part III.D . Because the Court has not weighed these allegations for anticompetitive effect, the Court cannot arbitrarily determine that such conduct requires a remedy. *Id.*

Notwithstanding **[**521]** this fact, Microsoft provides evidence which establishes that § 5 of Plaintiffs' proposed remedy is overly regulatory and an unjustified imposition upon Microsoft's lawful business practices which have not been shown to hinder competition. In this regard, § 5 is yet another example of a remedy provision characterized by Plaintiffs' witnesses to address very specific Microsoft conduct, which in practice, addresses a far more expansive amount of conduct, such that the remedy regulates even the most basic design decisions. For example, one of Microsoft's computer science experts, Dr. Madnick, testified that virtually any "non-trivial" change to Windows will fall within the parameters of § 5 of Plaintiffs' proposed remedy. Madnick P 205. For any such change, Microsoft must be prepared to provide "good cause" for its change. *Id.* Mr. Gates expressed a concern that Microsoft's decisions about software design, its weighing of the pros and cons of a particular change, would be exposed to "second-guessing" by a bevy of ISVs who were displeased with the change. Tr. at 4652 (Gates). As a result, testified Mr. Gates, Microsoft might be reluctant to make the change out of a desire to avoid **[**522]** the second-guessing of its decision and, at a minimum, would incur additional costs in conjunction with such changes. *Id.* at 4653; Elzinga P 30. In this regard, Mr. Gates pointed out that "reasonable men [may] disagree" over whether or not changes are justified by good cause, such that there would be a constant battle over enforcement of the provision. Tr. at 4654 (Gates).

Neither side's evidence with regard to the viability of § 5 is particularly convincing. The concerns raised by Mr. Gates regarding vagueness and enforcement problems in the provision are certainly valid, though their effects upon Microsoft's product design appear to be overstated. However, Plaintiffs' justifications for the provision are weak at best, with a non-existent link to the liability in this case and an insufficiently clear benefit to competition. Given this balance, the Court finds, as a factual matter, that the regulatory interference with Microsoft's legitimate business dealings which would result from § 5 of Plaintiffs' remedy proposal has not been shown to be outweighed by the benefit to competition.

D. Plaintiffs' Proposed Remedy § 3

The third section in Plaintiffs' proposed **[**523]** remedy requires Microsoft to "support, both directly and indirectly," the immediate predecessor of any new Windows release for a period of five years following the release of the new version. SPR § 3. In addition, § 3 of Plaintiffs' remedy proposal requires that Microsoft continue to "support, both directly and indirectly," Windows 98 SE for a period of three years after the entry of judgment in this case. **[*257]** *Id.* The royalties charged by such mandatory licenses are limited to the "lowest royalty paid by the OEM or Third-Party License . . . prior to the release of the new version." *Id.*

Plaintiffs offer the testimony of two witnesses to support this provision: John Borthwick, a Vice President at America Online Inc. ("AOL") Advanced Services, Borthwick P 1, and Plaintiffs' economic expert, Dr. Shapiro. Mr. Borthwick testified that § 3 would enhance § 2.c of Plaintiffs' proposed remedy, which allows for greater customization of Windows products, by ensuring that third-party investing in customization is not "thwarted by a "sudden announc[ement of] the release of a new superceding version." Borthwick P 59. Mr. Borthwick's testimony does little to advance Plaintiffs' proposal **[**524]** given the Court's finding *supra* that the third-party customization portion of Plaintiffs' proposed remedy is without justification and discordant with the appellate court's opinion in this case. Moreover, Mr. Borthwick's testimony is based entirely upon speculation that Microsoft would "suddenly" release a new version of an operating system in order to hinder customization. There is no evidence that Microsoft has ever "suddenly" released a new version of its operating system. In fact, the evidence in this case establishes that the development and release of a new operating system is an arduous process which takes approximately three years for each new version of an operating system. *See* Gates P 203. The Court, therefore, does not regard the reasons advanced by Mr. Borthwick as either valid or persuasive.

Dr. Shapiro testified that § 3 will benefit consumers because it provides greater consumer choice. Shapiro P 155. Notably, Dr. Shapiro did not explain the benefit to competition in increasing consumer choice between different versions of *Microsoft's products*. Dr. Shapiro further acknowledged that he would not endorse § 3 of Plaintiffs' proposed remedy if it were **[**525]** shown that the remedy imposed substantial costs upon Microsoft. Tr. at 3642 (Shapiro). Dr. Shapiro did not undertake to estimate the cost to Microsoft of supporting a predecessor version, *id.* at 3643, but instead chose to base his view upon his reading of Dr. Madnick's expert report to indicate that "most operating system vendors support their current version or that version and the one preceding it." Shapiro P 155. Dr. Shapiro's conclusion, in this regard, is an unsupported extrapolation from Dr. Madnick's report, which, even as cited by Dr. Shapiro, merely indicates that "IBM offers two versions of its AIX operating system and Sun offers two versions of its Solaris Operating Environment." *Id.* n.135 (citing Madnick Expert Report P 59, marked for identification as Pl. Ex. 1410 (Tr. at 5884)). Based upon this testimony, the Court rejects as unsupported Dr. Shapiro's conclusion that mandatory support for predecessor versions of Windows would not impose substantial costs upon Microsoft. *See* Bennett PP 88-89 (testifying that support for predecessor versions of Windows will result in enormous expense to Microsoft).

In contrast to Plaintiffs' view, Dr. Elzinga, one of Microsoft's **[**526]** economic experts, testified that § 3 of Plaintiffs' proposed remedy would harm consumers by raising costs for Microsoft, which will eventually translate into higher prices. Elzinga P 29; *see also* Bennett PP 88-89. Dr. Elzinga also testified that the beneficial aspects of network effects will be hindered by the mandatory provision of predecessor versions of the operating system. Elzinga P 29. Dr. Elzinga further noted with concern the absence of a liability finding to justify the increased regulation of Microsoft's **[*258]** business. *Id.* Plaintiffs' economic expert did not counterbalance the absence of direct link to the liability in this case by arguing that the substantial benefit to be gained by § 3 justified its intrusion into legitimate business practices. Quite to the contrary, Dr. Shapiro disclaimed that § 3 of Plaintiffs' proposed remedy would have a "substantial effect on promoting competition" in the market for Intel-compatible PC operating systems. Tr. at 3647 (Shapiro). Emphasizing all of the above concerns, is Mr. Gates' uncontradicted testimony that § 3 has the potential to cause consumer confusion and slow the pace of technology development. Gates PP 277-78. Based **[**527]** upon all of this testimony, the Court is doubtful that the benefit to be gained by the imposition of § 3 of Plaintiffs' proposed remedy would outweigh its costs. This balance is particularly troublesome given that § 3 will govern conduct which is wholly unrelated to any finding of liability in this case.

E. Plaintiffs' Proposed Remedy § 7

Section 7 of Plaintiffs' remedy proposal is entitled "Ban on Contractual Tying" and provides quite simply that "Microsoft shall not condition the granting of a Windows Operating System Product license, or the terms . . . or administration of such license . . . on a licensee agreeing to license, promote, distribute, or provide an access point to, any Microsoft Middleware Product." SPR § 7. Mr. Richards of RealNetworks explained that the purpose of § 7 was to "enhance middleware developers' ability to deal directly with OEMs." Richards P 199. Rather than identify any finding of liability for which § 7 provides a direct remedy, Mr. Richards recounted summarily, relying in part upon Judge Jackson's *Findings of Fact, 84 F. Supp. 2d at 38, PP 113-14*, and in part upon inadmissible hearsay, various "bad" acts in which Microsoft is alleged to have engaged. **[**528]** Richards PP 204-08. Once again, the Court recounts its determination that these types of allegations of "bad" acts, even if proven, merit little weight, if any, because they cannot be treated as conduct which is the same or similar to the illegal conduct identified by the appellate court, and they have not been subjected to the rigorous Sherman Act assessment of whether the anticompetitive effect outweighs Microsoft's procompetitive justification. *See* Memorandum Opinion, Part III.D.

The only other witness to testify in support of § 7 of Plaintiffs' remedy offered a distinct justification for his endorsement. Dr. Shapiro took the position that "contractual tying" should be entirely banned because it "can impede the adoption of non-Microsoft middleware." Shapiro P 168. Dr. Shapiro linked this conclusion to Paragraph 155 of the *Findings of Fact, 84 F. Supp. 2d at 49*, which recounts that Microsoft bound IE to Windows with the intent of preventing Navigator "from weakening the applications barrier to entry." *Findings of Fact, 84 F. Supp. 2d at 49, P 155*. Paragraph 155 in Judge Jackson's *Findings of Fact, 84 F. Supp. 2d at 49* was identified by the appellate court as one of the "key District Court findings" in conjunction with its imposition **[**529]** of liability upon Microsoft for illegal tying in violation of § 1 of the Sherman Act. *Microsoft, 253 F.3d at 84*. The appellate court was unable to affirm Judge Jackson's finding of liability for tying. *Id.* Because the claim was not pursued on remand, there exists no finding that Microsoft illegally "tied" any product to Windows. When pressed, Dr. Shapiro acknowledged that the only connection between § 7 of Plaintiffs' remedy and the findings of liability in this case was Microsoft's prohibition on the removal of end-user access to IE, a liability finding which is addressed by other portions of both parties' proposed remedies. Tr. at 3663-64 (Shapiro). Given that Dr. Shapiro's **[*259]** endorsement of § 7 is cursory and devoid of any true economic analysis of the effect or justification for the provision, the evidence is insufficient to support a finding that § 7 of Plaintiffs' proposed remedy will promote competition in the monopolized market.

Indeed, in his economic analysis, Dr. Elzinga noted the appellate court's observation in this case that tying in software markets may produce efficiencies not previously considered by the courts. Elzinga P 25 (citing *Microsoft, 253 F.3d at 93, 95).* **[**530]** In this regard, Dr. Elzinga concluded that a blanket ban on such tying was likely to harm consumers. *Id.* PP 25, 34. Specifically, Dr. Elzinga explained, "many contractual ties benefit consumers through higher output and reduced transaction costs." *Id. P 34*; *see also id. P 117*. Dr. Murphy echoed this view, noting that Plaintiffs' imposition of § 7 is based upon a presumption that all tying is *per se* anticompetitive, rather than evidence that "specific ties have anticompetitive effects that outweigh pro-competitive benefits." Murphy P 238. In sum, the evidence presented by Plaintiffs is insufficient to establish that competition will benefit from the imposition of § 7 of Plaintiffs' proposed remedy, while the evidence presented by Defendant indicates quite clearly that this portion of Plaintiffs' proposed remedy would likely prohibit beneficial contracts.

F. Plaintiffs' Proposed Remedy § 9

Section 9 in Plaintiffs' proposed remedy is nearly identical to § 8 of Plaintiffs' remedial proposal, which bans Microsoft from taking "adverse[]" action against industry participants "based directly or indirectly . . . on" their support of competing products. **[**531]** SPR § 8. Section 9 differs only in that it bans "adverse[]" action against any participants in this litigation [128] "based directly or indirectly . . . on" such participation. SPR § 9. As a result of this similarity, the Court's assessment of § 8 applies equally to § 9. In short, § 9, like § 8, holds the potential to prohibit significant amounts of legitimate business conduct, notwithstanding Plaintiffs' witnesses' characterization of the provision as a ban on retaliation. *See supra* Part III. However, the over-breadth problems associated with § 9 are more pronounced than those associated with § 8, because there is virtually no way to determine whether a particular action which is adverse to a participant in this litigation is, in fact, "based directly or indirectly . . . on" that firm's or individual's participation in this litigation.

[532]** Furthermore, Plaintiffs have not established that participants in this litigation are in need of any protection against retaliation. Microsoft has been engaged in this and related litigation for nearly seven years, yet Plaintiffs did not present the testimony of any witness which indicated that, during this history, his or her firm had been subjected to retaliation by Microsoft based upon his or her participation in this litigation. [129] Based on the foregoing, the Court cannot conclude that participants **[*260]** in this litigation are in need of protection against retaliation by Microsoft, which exceeds protection from retaliation relating specifically to support by OEMs, ISVs, and IHVs for competing software products. *See supra* Part III.

[**533] G. Plaintiffs' Proposed Remedy § 13

---

[128] Section 9 of Plaintiffs' proposed remedy also bans adverse action against participants in the suit instituted by the United States, *United States v. Microsoft*, No. 98-1232 (D.D.C.).

[129] Plaintiffs offer the testimony of Mr. Fama, who recounted that he perceived Microsoft to be unhappy about Gateway's participation in this litigation. Fama PP 144-46. Mr. Fama offered the strained opinion that a refusal by a Microsoft employee to engage in a particular discussion out of fear that it might find its way into the courts was a threat. *Id.* The Court is not convinced that the circumstances described by Mr. Fama reflect a threat of retaliation by Microsoft.

Section 13 of Plaintiffs' proposed remedy, entitled "Java Distribution," requires that Microsoft distribute "a competitively performing Windows-compatible version of the Java runtime environment . . . compliant with the latest Sun Microsystems Technology Compatibility Kit." SPR § 13. Section 13 makes clear that Microsoft shall not be required to "create such a Compliant Version, or to distribute a Compliant Version that is not made available to Microsoft, without charge and on reasonable terms and conditions, at least 90 days prior to Microsoft's commercial release or major update of any such Windows Operating System Product or Browser." *Id.*

Plaintiffs relate this mandatory distribution of Java generally to the actions Microsoft took to combat the threat posed by Java as a platform. Originally, the district court identified four actions taken by Microsoft "to exclude Java from developing as a viable cross-platform threat":

> (a) designing a JVM incompatible with the one developed by Sun; (b) entering into contracts, the so-called "First Wave Agreements," requiring major ISVs to promote Microsoft's JVM exclusively; (c) **[**534]** deceiving Java developers about the Windows-specific nature of the tools it distributed to them; and (d) coercing Intel to stop aiding Sun in improving the Java technologies.

Microsoft, 253 F.3d at 74. Of these originally identified behaviors, the appellate court sustained, in their entirety, the findings of liability against Microsoft for the deception of Java developers and the threat to Intel. *Microsoft, 253 F.3d at 76-77*. The appellate court further sustained the imposition of liability for the "First Wave Agreements" to the extent they required exclusive use of Microsoft's JVM. *Microsoft, 253 F.3d at 75-76*. The appellate court rejected the imposition of liability for Microsoft's development of its own JVM incompatible with Sun's JVM and inclusion of that JVM with every copy of IE. *Microsoft, 253 F.3d at 74-75*.

Plaintiffs' presentation of § 13 relies predominantly upon the testimony of Richard Green, Vice President and General Manager of Java and XML Platforms for Sun Microsystems, Inc. Mr. Green's testimony is somewhat problematic in that it presented a number of complaints which are largely irrelevant to this proceeding. One of Mr. Green's central **[**535]** complaints is that Microsoft determined not to include support for the Java platform in its most recent operating system, Windows XP. Green PP 20, 107, 117-118 (heading and text). Microsoft's recent determination with regard to the exclusion of Java in its most recent operating system has little bearing upon the Court's crafting of a remedy. In this remedial phase, the Court will not engage in a weighing of new allegations against Microsoft for pro- and anticompetitive effect. Plaintiffs have not argued that Microsoft's decision not to support Java in its most recent version of Windows is a continuation of previous conduct found to be illegal, nor have they argued that Microsoft's decision is of the same type or class as conduct for which liability has been ascribed. As a result, the Court declines to ascribe any weight to Mr. Green's complaints in this regard. [130]

[536]** Mr. Green also complained vociferously that Microsoft's JVM is incompatible with **[*261]** Sun's JVM and that this incompatibility constituted a breach of a contract entered into between Microsoft and Sun. Green PP 17, 22. As the appellate court rejected liability on this basis, *Microsoft, 253 F.3d at 74-75*, the incompatibility of Microsoft's JVM is a non-issue. Furthermore, whether Microsoft breached a contract with Sun is the subject of another proceeding and is irrelevant to this proceeding. *See* Def. Ex. 1032-33; Def. Ex. 1033; Pl. Ex. 1157 (sealed).

---

[130] The Court similarly rejects the contention that distribution of the JVM through Microsoft is imperative because it is impracticable for OEMs to distribute the technology and similarly impracticable for end users to download the technology from the Internet. Green PP 104-05. Far more persuasive is Dr. Allchin's testimony explaining that "it is fairly common today to have software programs of the same general size as a JVM downloaded in huge numbers." Allchin P 77; *see also* Elzinga P 121; Tr. at 293 (Green) ("[A] compressed JVM with associated class libraries typically ranges from 5 to 12 megabytes in size."). Once downloaded, a user would not incur any further delay in using the JVM. Allchin P 77. Similarly, Mr. Green's conclusion that it is infeasible to depend on OEMs for distribution is unsupported. Green P 105. Rather than infeasibility, the evidence establishes that Sun does not consider it worthwhile to attempt to obtain distribution through the OEM channel and would prefer, instead, to use this litigation as a means by which to obtain ubiquity. Tr. at 295-97 (Green); *see also* Green PP 10506 . Lastly, Mr. Green takes the view that OEMs have little incentive to distribute a Suncompliant JVM. Green P 105. The Court finds this complaint to be meritless, as a lack of incentive to distribute a particular product reflects a problem of a competitor, not a problem with competition. Allchin P 79.

Stripped of these complaints and accusations of persistent Microsoft wrongdoing, Mr. Green's testimony is revealed as little more than an attempt to advance Sun-compliant Java technologies through this proceeding. Mr. Green expounded his view of the advantages of the Java platform over the Windows platform, Green PP 56-70, the ability of the Java platform to enhance competition in the network and sever-based computing environments, *id. PP 76-83*, and the positive attributes of the Java platform in general, *id. PP 71-75,119*-28. Indeed, Mr. Green even proclaimed the benefits of Sun's "licensing **[**537]** and distribution model for developers." *Id. PP 84-93*. From this background, Mr. Green argued that "there are no other economically feasible distribution channels for the Java platform that would achieve anything close to the levels of distribution currently enjoyed by Microsoft platforms such as Windows." *Id. P 106*. On this basis, Mr. Green asserted that the Court should require Microsoft to distribute the Java platform with Windows. *Id. P 134*. The result of § 13, argued Mr. Green, will:

> *merely* put the Java platform on equal footing with the CLR [131] **[**538]** (and thus create competition) by ensuring that the JRE receives the same level of distribution that Microsoft can provide to the CLR. Without this remedy, developers will undoubtedly begin to write applications to the CLR based on its guaranteed ubiquity. And those applications written to the CLR will only run on Microsoft Windows products.

Green P 139 (emphasis added). [132]

Mr. Green's testimony misses the point. What Plaintiffs, and quite clearly Sun Microsystems, **[*262]** are proposing is nothing more than "market engineering." Murphy P 239. This remedy provision appears to work a fundamental violation of two of the five "economic principles" outlined by Plaintiffs' economic expert, Dr. Shapiro. As Dr. Shapiro testified:

> The remedy should facilitate entry into the market for PC operating systems by whatever products and technologies will offer the most promising opportunities to challenge Microsoft's monopoly in the years ahead. . . .
>
> In the presence of rapid technological change, a remedy that primarily is relevant for threats from six years ago (such as certain cross-platform middleware) is unlikely to be effective at restoring competition in the future.

Shapiro P 42. **[**539]** The "Java Distribution" portion of Plaintiffs' remedy is a far cry from "facilitating entry." *Id.*; *see also* SPR § 13. Rather, § 13 of Plaintiffs' remedy proposal places the Java technology "on equal footing" with Microsoft's technology, providing it with instantaneous ubiquitous distribution. Green P 139. There is no evidence that Java would today possess "equal footing," in terms of distribution, with Microsoft, but for Microsoft's anticompetitive conduct.

More significantly, the artificial promotion of Java runs afoul of the goal of restoring competition because it "primarily is relevant for threats from six years ago." Shapiro P 42. Plaintiffs' own economic expert testified that, "to the extent possible, the remedy should be 'technology neutral,' leaving it to *market forces* to identify the most promising future threats to Microsoft's monopoly." Shapiro P 44 (emphasis in original). Dr. Elzinga echoed this view, observing that, from an economic perspective, a remedy will enhance consumer welfare and competition where it "promotes competition, not the interests of particular competitors." Elzinga P 9. The Court can conceive of no provision less "technology neutral" than **[**540]** § 13 of Plaintiffs' remedy. Rather, § 13 appears to be a bold manipulation of the market which provides a particular technology, indeed a particular format of this technology-the Sun-compliant format-with an artificial advantage over other non-Microsoft technologies which may now or in the future compete with Java. [133]

---

[131] CLR stands for "Common-Language Runtime." Green P 118. Like Java, the CLR is a type of "component-software middleware" developed by Microsoft. Appel PP 44, 74-75. CLR is part of Microsoft's .NET framework. Madnick P 163.

[132] Mr. Green further relies upon the claim that OEMs fear retaliation by Microsoft for distribution of a competing platform. Green P 105. Given that both of the proposed remedies in this case address such retaliation, the potential for retaliation should not continue to be a concern.

[133] In his testimony, Dr. Elzinga warned that the Court must guard against "rent-seeking" by Microsoft's competitors. Elzinga P 16. "Rent-seeking in economics," according to Dr. Elzinga, applies to "activities by economic agents (individuals or firms) that do not create value, but only influence how existing rewards are distributed." *Id.* Section 13 is an example of such "rent seeking" by

[541]** **H. Plaintiffs' Proposed Remedy § 16**

Section 16 of Plaintiffs' proposed remedy mandates that "if Microsoft publicly claims that any of its products are compliant **[*263]** with any technical standard . . . that has been approved by, or has been submitted to and is under consideration by, a Standard-Setting Body, it shall comply with that Standard." SPR § 16.a. Section 16 further provides that "if Microsoft chooses to extend or modify the implementation of that Standard, Microsoft shall continue fully to implement the Standard (as that Standard may be modified from time to time by the Standard-Setting Body)" until Microsoft "publicly disclaims that it implements that standard" or "the Standard expires or is rescinded." *Id.* If "Microsoft develops a proprietary implementation of a Standard," § 16 would also require Microsoft to "continue to support non-proprietary, industry implementations of such Standard." *Id.* The latter portion of § 16 acknowledges that, in some circumstances, "industry custom and practice recognizes compliance with the Standard to include variations from the formal definition of that Standard." *Id.* § 16.b. Based upon this acknowledgment, § 16 **[**542]** permits Microsoft to "discharge its obligations" under the provision by complying with the "De Facto Standard," so long as Plaintiffs do not object to such compliance. *Id.*

As with other portions of Plaintiffs' proposed remedy which concern industry standards, Plaintiffs direct the Court to the liability finding regarding the deception of Java developers. The appellate court condemned as illegal Microsoft's deception of Java developers "regarding the Windows-specific nature of the tools," such that "developers who relied upon Microsoft's public commitment to cooperate with Sun and who used Microsoft's tools to develop what Microsoft led them to believe were cross-platform applications ended up producing applications that would run only on the Windows operating system." *Microsoft, 253 F.3d at 76*. Also related to the issue of industry standards is the finding of liability against Microsoft for requiring the exclusive use of Microsoft's implementation of the Java technologies in conjunction with the First Wave Agreements. *Microsoft, 253 F.3d at 75*. To remedy these findings of liability, Plaintiffs advance § 16 of their proposed remedy as "effectively a 'Truth in **[**543]** Standards' provision." Shapiro P 185.

Although proffered by Plaintiffs' witnesses as a "truth in standards" provision, § 16 of Plaintiffs' proposed remedy requires far more of Microsoft than simply "truthfulness." Plaintiffs' witnesses focused upon the fact that § 16 requires that if Microsoft creates a proprietary implementation of a particular standard, it must continue to support non-proprietary industry implementations of the standard. *See, e.g.*, Borthwick P 113; Appel P 147; Ledbetter P 105; *see also* SPR § 16. This requirement is imposed without regard to whether Microsoft has made any representation regarding its compliance with an industry standard. Furthermore, Microsoft is not permitted, once it extends or alters the implementation of a standard, to require that third parties adopt such an implementation, without regard to whether such a requirement is exclusive of other implementations of the standard. Appel P 147; *see also* SPR § 16.

Section 16 of Plaintiffs' proposed remedy is yet another attempt by Plaintiffs to prevent Microsoft from extending, modifying, "co-opting," Ledbetter P 90; Pearson P 98, or "polluting," Appel P 143, industry standards. Plaintiffs' **[**544]** primary example of such extension or modification arises from Microsoft's treatment of the Kerberos standard, discussed by the Court in Part III.D of the attached Memorandum Opinion. *See* Ledbetter PP 93-100; Borthwick P 113; Schwartz P 155. There, of course, exists no finding of liability against Microsoft **[*264]** for its proprietary extension of any industry standard, and the Court has rejected the assertion that Microsoft's conduct with regard to Kerberos and other industry standards is the "same or similar" to conduct that gave rise to the liability

---

Sun Microsystems. Elzinga P 56 and Table 3. Sun proposed inclusion of a remedy nearly identical to § 13 of Plaintiffs' proposed remedy. Def. Ex. 841 at Sn-R025963-64, 025966-69. Sun is presently seeking the same remedy in a private lawsuit filed against Microsoft. Tr. at 170 (Green). Sun stands to benefit significantly by the imposition of § 13 of Plaintiffs' proposed remedy. *Id.* at 201. Indeed, Sun has "repeatedly offered Microsoft the opportunity to distribute a compatible, current JRE as part of its browser and operating system products, [and] Microsoft has refused." Green P 19. Given these facts, there is little doubt that § 13 reflects the wish of a particular Microsoft competitor, the granting of which is likely to "have very little effect" upon the "development of cross-platform middleware." Tr. at 3614 (Shapiro). As such, the Court regards § 13 of Plaintiffs' proposed remedy as an unjustified manipulation of the marketplace. Sun's request for redress in this regard is best resolved, if at all, through its already-pending private lawsuit.

in this case. *See* Memorandum Opinion, Part III.D. In this regard, the Court has rejected Plaintiffs' suggestion that the imposition of liability for Microsoft's *deception* regarding its Java developer tools, *Microsoft, 253 F.3d at 76-77*, in any way, condemns decisions to depart from industry standards or to utilize a proprietary standard in the absence of deception regarding the departure. In fact, Microsoft's alteration or proprietary extension of industry standards more closely resembles conduct for which Microsoft was absolved of liability; the appellate court absolved Microsoft of liability for its development **[**545]** of a JVM incompatible with Sun's JVM. *Microsoft, 253 F.3d at 75*. Such incompatibility will only give rise to antitrust liability if the anticompetitive effects of the incompatibility outweighs the procompetitive justification for the design. *Id.* As the Court has not weighed any other instances of Microsoft's alteration of industry standards, including Kerberos, for procompetitive and anticompetitive effect, there is no basis for an argument that Microsoft's extension of proprietary standards requires a remedy.

Significantly, Plaintiffs do not present evidence that any aspect of § 16 will enhance competition in the monopolized market. [134] Dr. Shapiro's analysis focused only upon the "truth in standards" aspect of § 16, not the mandatory support for industry standards described above. With regard to the "truth in standards" aspect of § 16, Dr. Shapiro testified that the provision would be only "potentially mildly helpful" in furthering the goal of unfettering the marketplace. Tr. at 3678 (Shapiro). The limited nature of Dr. Shapiro's analysis leaves the remaining portions of § 16 without economic analysis and comment.

[546]** Even if limited to Microsoft's representations of compliance with "Industry Standards," evidence presented by Microsoft's witnesses establishes that § 16 of Plaintiffs' remedy is not workable. Microsoft's computer science expert, Dr. Madnick, testified without contradiction from Plaintiffs' computer science expert that "industry standards" can "vary widely in complexity and specificity, such that various implementations of a particular standard are often incompatible" because "each supports a different subset of the standard's features or offers its own extensions." Madnick P 207 (internal quotations omitted). More importantly, "partial compliance and extensions to standards" are themselves the "standard" practice in the computing industry. *Id.*; Tr. at 4988 (Gates). Because of these facts, the determination of "full compliance with a standard is often a difficult and ambiguous process." Madnick P 208. In other words, the determination of compliance with a particular standard cannot be based upon truly objective, verifiable criteria because even when the standard itself is reasonably clear, the extent to which any product actually implements the standard will often be a matter **[**547]** of opinion. Madnick PP 20810; Gates P 454. The provision of compliance with "De Facto Standards" will not resolve this problem because compliance with the "De Facto Standard" may not itself be clearly and objectively determined. Gates P 455. As a result, the "truth in standards" portion of § 16 has **[*265]** been shown to be ambiguous and therefore, unworkable.

The Court further observes that, not only is the finding of liability (deception of the Java developers) pursuant to which Plaintiffs offer § 16 far more narrowly circumscribed than the terms of Plaintiffs' remedy, but unlike some other findings of liability, it concerns a single, very specific incident of anticompetitive conduct by Microsoft. This action by Microsoft ceased, pursuant to the order of another court, before Judge Jackson entered his factual findings. *Findings of Fact, 84 F. Supp. 2d at 106, PP 390, 394*; *see also* Elzinga P 131. While Plaintiffs have presented evidence that Microsoft has altered industry standards, conduct which the appellate court determined does not necessarily violate ***antitrust law***, Plaintiffs have not offered any evidence which indicates that Microsoft has engaged or is likely to engage in deception similar to that **[**548]** involving the Java developer tools, or any other developer tools for that matter. Accordingly, the Court finds that Plaintiffs have not shown that there exists a continued threat of harm from this anticompetitive act.

I. Plaintiffs' Proposed Remedy § 19.f

As part of the procedures established for enforcement of the remedy imposed in this case, Plaintiffs propose that the Court should "review evidence that Microsoft has brought or has threatened to bring a groundless claim of Intellectual Property infringement for the purpose of" impairing interoperation between a wide variety of non-

---

[134] The Court notes that § 16 of Plaintiffs' remedy proposal is not limited in any way to reflect the relevant market in this case. SPR § 16. Rather, the provision applies to all segments of Microsoft's business. *Id.*

Microsoft products and Microsoft products. SPR § 19.f. Plaintiffs do not offer any credible evidence that Microsoft now or in the past has advanced "groundless" claims of intellectual property infringement for the purpose of hindering interoperation, nor do Plaintiffs offer any evidence of a connection between this aspect of their remedy proposal and the liability findings in this case. Additionally, Plaintiffs fail to offer any evidence indicating that such review by the Court of Microsoft's claims of intellectual property infringement would foster or advance competition. From the face **[**549]** of the provision, it appears that § 19 in Plaintiffs' proposed remedy would serve to chill Microsoft's enforcement of its intellectual property rights.

J. Plaintiffs' Proposed Remedy § 20

Following the enforcement provisions of Plaintiffs' proposed remedy, Plaintiffs have included in their remedy proposal a provision which requires Microsoft to provide Plaintiffs with written notice of its investments in computer and electronic product manufacturing, computer and computer peripheral equipment and software wholesalers, telecommunications, cable networks and program distribution, finance and insurance, and computer system design, as well as its acquisition of an exclusive license of technology or intellectual property 60 days in advance of such investment. SPR § 20. Plaintiffs' counsel argue that such monitoring of Microsoft's investments will "ensure that there remain no practices likely to result in monopolization in the future." Pl. Prop. Findings of Fact P 1411 (quoting *Microsoft, 253 F.3d at 103*). The only *evidence* Plaintiffs offer to support this argument is the testimony of Mr. Kertzman who advocated the benefits of a provision which required **[**550]** reporting "significant investments in the technology sector." Kertzman P 53. Mr. Kertzman described § 20 as a compliment to the ban on exclusive contracts contained in § 6 of Plaintiffs' proposed remedy. *Id. P 58*. The disclosures mandated in § 20, noted Mr. Kertzman "would enable the regulatory authorities to impose conditions, as part of allowing the investment, that would limit **[*266]** Microsoft's ability to secure exclusive contracts or to impose particular technology." [135] *Id. P 56*.

Nothing in the language of § 20, however, limits Microsoft's disclosure obligations to *significant* investments. SPR § 20; *see also* Tr. 2127-39 (Kertzman); Gates P 462. As written, the proposed provision requires Microsoft **[**551]** to report "any direct or indirect acquisition . . . or investment," regardless of size. SPR § 20. Furthermore, Dr. Shapiro conceded that § 20 of Plaintiffs' remedy proposal would not have an effect on competition or consumer welfare. Tr. at 3295 (Shapiro). Instead, Dr. Shapiro took the view that § 20 was an "enforcement provision," but did not go so far as to identify what, exactly, was being enforced. *Id.* Given this evidence, Plaintiffs' continued insistence that § 20 will promote competition borders on frivolous. [136]

[552] APPENDIX B**

FINAL JUDGMENT

The Plaintiff States of California, Connecticut, Florida, Iowa, Kansas, Minnesota, Utah, and West Virginia, the Commonwealth of Massachusetts, and the District of Columbia, having filed their complaints in this action on May 18, 1998;

---

[135] Plaintiffs fail to offer any evidence that any such "regulatory authorities" are interested in receiving information from Microsoft pursuant to the Court's remedial order in this case, nor that the provision of information would prove useful to such regulatory authorities.

[136] In response to criticism of § 20 by Mr. Gates, Plaintiffs, in their proposed findings of fact suggest that the provision could be modified to limit the reporting requirements to investments "in an amount larger than 1% of the target company" and that the reporting requirement could exempt from reporting "the acquisition of inventory acquired in the normal course of business." Pl. Prop. Finding of Fact PP 1432-33. While helpful, these modifications do not cure the most significant defect related to § 20 of Plaintiffs' remedy; namely, that there exists no justification for including in the remedy a requirement that Microsoft report its investment activity. There remains no logical relationship between Microsoft's investment activity and the findings of liability in this case, nor have Plaintiffs established that such reporting will benefit competition.

Defendant Microsoft Corporation ("Microsoft") having appeared and filed its answer; The District Court having entered Findings of Fact on November 5, 1999 and Conclusions of Law on April 3, 2000;

The United States Court of Appeals for the District of Columbia Circuit having affirmed the Court's finding of liability against Microsoft for violation of *§ 2* of the Sherman Act and the state law counterparts to *§ 2* of the Sherman Act in the states of California, Connecticut, Florida, Iowa, Kansas, Minnesota, Utah, and West Virginia, the Commonwealth of Massachusetts, and the District of Columbia, and having remanded to this Court for an order of remedy; and

Upon the record of trial and all prior and subsequent proceedings herein, it is this 1st day of November, 2002, hereby

ORDERED, ADJUDGED AND DECREED as follows:

I. Jurisdiction

This Court has jurisdiction of the subject matter of this action and of the **[**553]** person of Microsoft.

II. Applicability

This Final Judgment applies to Microsoft and to each of its officers, directors, agents, employees, subsidiaries, successors and assigns; and to all other persons in **[*267]** active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

III. Prohibited Conduct

A. Microsoft shall not retaliate against or threaten retaliation against an OEM by altering Microsoft's commercial relations with that OEM, or by withholding newly introduced forms of non-monetary Consideration (including but not limited to new versions of existing forms of non-monetary Consideration) from that OEM, because it is known to Microsoft that the OEM is or is contemplating:

1. developing, distributing, promoting, using, selling, or licensing any software that competes with Microsoft Platform Software or any product or service that distributes or promotes any Non-Microsoft Middleware;
2. shipping a Personal Computer that (a) includes both a Windows Operating System Product and a non-Microsoft Operating System, or (b) will boot with more than one Operating System; or

3. **[**554]** exercising any of the options or alternatives provided for under this Final Judgment.

Nothing in this provision shall prohibit Microsoft from enforcing any provision of any license with any OEM or any intellectual property right that is not inconsistent with this Final Judgment. Microsoft shall not terminate a Covered OEM's license for a Windows Operating System Product without having first given the Covered OEM written notice of the reasons for the proposed termination and not less than thirty days' opportunity to cure. Notwithstanding the foregoing, Microsoft shall have no obligation to provide such a termination notice and opportunity to cure to any Covered OEM that has received two or more such notices during the term of its Windows Operating System Product license.

Nothing in this provision shall prohibit Microsoft from providing Consideration to any OEM with respect to any Microsoft product or service where that Consideration is commensurate with the absolute level or amount of that OEM's development, distribution, promotion, or licensing of that Microsoft product or service.

B. Microsoft's provision of Windows Operating System Products to Covered OEMs shall be **[**555]** pursuant to uniform license agreements with uniform terms and conditions. Without limiting the foregoing, Microsoft shall charge each Covered OEM the applicable royalty for Windows Operating System Products as set forth on a schedule, to be established by Microsoft and published on a web site accessible to the Plaintiffs and all Covered OEMs, that provides for uniform royalties for Windows Operating System Products, except that:

1. the schedule may specify different royalties for different language versions;

2. the schedule may specify reasonable volume discounts based upon the actua volume of licenses of any Windows Operating System Product or any group of such products; and

3. the schedule may include market development allowances, programs, or other discounts in connection with Windows Operating System Products, provided that:

a. such discounts are offered and available uniformly to all Covered OEMs, except that Microsoft may establish one uniform discount schedule for the ten largest Covered OEMs and a second uniform discount schedule for the eleventh **[*268]** through twentieth largest Covered OEMs, where the size of the OEM is measured by volume of licenses;

b. **[**556]** such discounts are based on objective, verifiable criteria that shall be applied and enforced on a uniform basis for all Covered OEMs; and

c. such discounts or their award shall not be based on or impose any criterion or requirement that is otherwise inconsistent with any portion of this Final Judgment.

C. Microsoft shall not restrict by agreement any OEM licensee from exercising any of the following options or alternatives:

1. Installing, and displaying icons, shortcuts, or menu entries for, any Non-Microsoft Middleware or any product or service (including but not limited to IAP products or services) that distributes, uses, promotes, or supports any Non-Microsoft Middleware, on the desktop or Start menu, or anywhere else in a Windows Operating System Product where a list of icons, shortcuts, or menu entries for applications are generally displayed, except that Microsoft may restrict an OEM from displaying icons, shortcuts and menu entries for any product in any list of such icons, shortcuts, or menu entries specified in the Windows documentation as being limited to products that provide particular types of functionality, provided that the restrictions are non-discriminatory **[**557]** with respect to non-Microsoft and Microsoft products.

2. Distributing or promoting Non-Microsoft Middleware by installing and displaying on the desktop shortcuts of any size or shape so long as such shortcuts do not impair the functionality of the user interface.

3. Launching automatically, at the conclusion of the initial boot sequence or subsequent boot sequences, or upon connections to or disconnections from the Internet, any Non-Microsoft Middleware, except that Microsoft may restrict the launching of Non-Microsoft Middleware which replaces or drastically alters the Windows Operating System Product user interface.

4. Offering users the option of launching other Operating Systems from the Basic Input/Output System or a non-Microsoft boot-loader or similar program that launches prior to the start of the Windows Operating System Product.

5. Presenting during the initial boot sequence its own IAP offer.

6. Exercising any of the options provided in Section III.H of this Final Judgment.

D. Starting at the earlier of the release of Service Pack 1 for Windows XP or three months after the entry of this Final Judgment, Microsoft shall disclose to ISVs, **[**558]** IHVs, IAPs, ICPs, and OEMs, for the sole purpose of interoperating with a Windows Operating System Product, via the Microsoft Developer Network ("MSDN") or similar mechanisms, the APIs and related Documentation that are used by Microsoft Middleware to interoperate with a Windows Operating System Product. For purposes of this Section III.D, the term APIs means the interfaces, including any associated callback interfaces, that Microsoft Middleware running on a Windows Operating System Product uses to call upon that Windows Operating System Product in order to obtain any services from that Windows Operating System Product. In the case of a new major version of Microsoft Middleware, the disclosures required by this Section III.D shall occur **[*269]** no later than the last major beta test release of that Microsoft Middleware. In the case of a new version of a Windows Operating System Product, the obligations imposed by this Section III.D shall occur in a Timely Manner.

E. Starting three months after the entry of this Final Judgment to the Court, Microsoft shall make available for use by third parties, for the sole purpose of interoperating or communicating with a Windows Operating System Product, **[**559]** on reasonable and non-discriminatory terms (consistent with Section III.I), any Communications Protocol that is, on or after the date this Final Judgment is submitted to the Court, (i) implemented in a Windows Operating System Product installed on a client computer, and (ii) used to interoperate, or communicate, natively (i.e., without the addition of software code to the client operating system product) with a Microsoft server operating system product.

F. 1. Microsoft shall not retaliate against or threaten retaliation against any ISV or IHV because of that ISV's or IHV's:

a. developing, using, distributing, promoting or supporting any software that competes with Microsoft Platform Software or any software that runs on any software that competes with Microsoft Platform Software, or
b. exercising any of the options or alternatives provided for under this Final Judgment.

2. Microsoft shall not enter into any agreement relating to a Windows Operating System Product that conditions the grant of any Consideration on an ISV's refraining from developing, using, distributing, or promoting any software that competes with Microsoft Platform Software or any software that **[**560]** runs on any software that competes with Microsoft Platform Software, except that Microsoft may enter into agreements that place limitations on an ISV's development, use, distribution or promotion of any such software if those limitations are reasonably necessary to and of reasonable scope and duration in relation to a bona fide contractual obligation of the ISV to use, distribute or promote any Microsoft software or to develop software for, or in conjunction with, Microsoft.
3. Nothing in this section shall prohibit Microsoft from enforcing any provision of any agreement with any ISV or IHV, or any intellectual property right, that is not inconsistent with this Final Judgment.

G. Microsoft shall not enter into any agreement with:

1. any IAP, ICP, ISV, IHV or OEM that grants Consideration on the condition that such entity distributes, promotes, uses, or supports, exclusively or in a fixed percentage, any Microsoft Platform Software, except that Microsoft may enter into agreements in which such an entity agrees to distribute, promote, use or support Microsoft Platform Software in a fixed percentage whenever Microsoft in good faith obtains a representation that it **[**561]** is commercially practicable for the entity to provide equal or greater distribution, promotion, use or support for software that competes with Microsoft Platform Software, or

2. any IAP or ICP that grants placement on the desktop or elsewhere in any Windows Operating System Product to that IAP or ICP on the condition that the IAP or ICP refrain from distributing, promoting or using any **[*270]** software that competes with Microsoft Middleware.

Nothing in this section shall prohibit Microsoft from entering into (a) any bona fide joint venture or (b) any joint development or joint services arrangement with any ISV, IHV, IAP, ICP, or OEM for a new product, technology or service, or any material value-add to an existing product, technology or service, in which both Microsoft and the ISV, IHV, IAP, ICP, or OEM contribute significant developer or other resources, that prohibits such entity from competing with the object of the joint venture or other arrangement for a reasonable period of time.

This Section does not apply to any agreements in which Microsoft licenses intellectual property from a third party and such intellectual property license is the principal purpose of the agreement.

[562]** H. Starting at the earlier of the release of Service Pack 1 for Windows XP or *three* months after the entry of this Final Judgment, Microsoft shall:

1. Allow end users (via a mechanism readily accessible from the desktop or Start menu such as an Add/Remove icon) and OEMs (via standard preinstallation kits) to enable or remove access to each Microsoft Middleware Product or Non-Microsoft Middleware Product by (a) displaying or removing icons, shortcuts, or menu entries on the desktop or Start menu, or anywhere else in a Windows Operating System Product where a list of icons, shortcuts, or menu entries for applications are generally displayed, except that Microsoft may restrict the display of icons, shortcuts, or menu entries for any product in any list of such icons, shortcuts, or

menu entries specified in the Windows documentation as being limited to products that provide particular types of functionality, provided that the restrictions are non-discriminatory with respect to non-Microsoft and Microsoft products; and (b) enabling or disabling automatic invocations pursuant to Section III.C.3 of this Final Judgment that are used to launch Non-Microsoft Middleware Products **[**563]** or Microsoft Middleware Products. The mechanism shall offer the end user a separate and unbiased choice with respect to enabling or removing access (as described in this subsection III.H.1) and altering default invocations (as described in the following subsection III.H.2) with regard to each such Microsoft Middleware Product or Non-Microsoft Middleware Product and may offer the end-user a separate and unbiased choice of enabling or removing access and altering default configurations as to all Microsoft Middleware Products as a group or all Non-Microsoft Middleware Products as a group.

2. Allow end users (via an unbiased mechanism readily available from the desktop or Start menu), OEMs (via standard OEM preinstallation kits), and Non-Microsoft Middleware Products (via a mechanism which may, at Microsoft's option, require confirmation from the end user in an unbiased manner) to designate a Non-Microsoft Middleware Product to be invoked in place of that Microsoft Middleware Product (or vice versa) in any case where the Windows Operating System Product would otherwise launch the Microsoft Middleware Product in a separate Top-Level Window and display either (i) all of the user interface **[**564]** elements or (ii) the Trademark of the Microsoft Middleware Product.

Notwithstanding the foregoing Section III.H.2, the Windows Operating System Product **[*271]** may invoke a Microsoft Middleware Product in any instance in which:

(a) that Microsoft Middleware Product would be invoked solely for use in interoperating with a server maintained by Microsoft (outside the context of general Web browsing), or

(b) that designated Non-Microsoft Middleware Product fails to implement a reasonable technical requirement (e.g., a requirement to be able to host a particular ActiveX control) that is necessary for valid technical reasons to supply the end user with functionality consistent with a Windows Operating System Product, provided that the technical reasons are described in writing in a reasonably prompt manner to any ISV that requests them.

3. Ensure that a Windows Operating System Product does not (a) automatically alter an OEM's configuration of icons, shortcuts or menu entries installed or displayed by the OEM pursuant to Section III.C of this Final Judgment without first seeking confirmation from the user and (b) seek such confirmation from the end user for an automatic **[**565]** (as opposed to user-initiated) alteration of the OEM's configuration until 14 days after the initial boot up of a new Personal Computer. Any such automatic alteration and confirmation shall be unbiased with respect to Microsoft Middleware Products and Non-Microsoft Middleware. Microsoft shall not alter the manner in which a Windows Operating System Product automatically alters an OEM's configuration of icons, shortcuts or menu entries other than in a new version of a Windows Operating System Product.

Microsoft's obligations under this Section III.H as to any new Windows Operating System Product shall be determined based on the Microsoft Middleware Products which exist seven months prior to the last beta test version (i.e., the one immediately preceding the first release candidate) of that Windows Operating System Product.

I. Microsoft shall offer to license to ISVs, IHVs, IAPs, ICPs, and OEMs any intellectual property rights owned or licensable by Microsoft that are required to exercise any of the options or alternatives expressly provided to them under this Final Judgment, provided that

1. all terms, including royalties or other payment of monetary consideration, **[**566]** are reasonable and non-discriminatory;

2. the scope of any such license (and the intellectual property rights licensed thereunder) need be no broader than is necessary to ensure that an ISV, IHV, IAP, ICP or OEM is able to exercise the options or alternatives expressly provided under this Final Judgment (e.g., an ISV's, IHV's, IAP's, ICP's and OEM's option to promote Non-Microsoft Middleware shall not confer any rights to any Microsoft intellectual property rights infringed by that Non-Microsoft Middleware);

3. an ISV's, IHV's, IAP's, ICP's, or OEM's rights may be conditioned on its not assigning, transferring or sublicensing its rights under any license granted under this provision; and

4. the terms of any license granted under this section are in all respects consistent with the express terms of this Final Judgment.

Beyond the express terms of any license granted by Microsoft pursuant to this section, this Final Judgment does not, directly or by implication, estoppel or otherwise, **[*272]** confer any rights, licenses, covenants or immunities with regard to any Microsoft intellectual property to anyone.

J. No provision of this Final Judgment shall:

1. Require **[**567]** Microsoft to document, disclose or license to third parties: (a) portions of APIs or Documentation or portions or layers of Communications Protocols the disclosure of which would compromise the security of a particular installation or group of installations of anti-piracy, anti-virus, software licensing, digital rights management, encryption or authentication systems, including without limitation, keys, authorization tokens or enforcement criteria; or (b) any API, interface or other information related to any Microsoft product if lawfully directed not to do so by a governmental agency of competent jurisdiction.

2. Prevent Microsoft from conditioning any license of any API, Documentation or Communications Protocol related to anti-piracy systems, anti-virus technologies, license enforcement mechanisms, authentication/authorization security, or third party intellectual property protection mechanisms of any Microsoft product to any person or entity on the requirement that the licensee: (a) has no history of software counterfeiting or piracy or willful violation of intellectual property rights, (b) has a reasonable business need for the API, Documentation or Communications Protocol **[**568]** for a planned or shipping product, (c) meets reasonable, objective standards established by Microsoft for certifying the authenticity and viability of its business, (d) agrees to submit, at its own expense, any computer program using such APIs, Documentation or Communication Protocols to third-party verification, approved by Microsoft, to test for and ensure verification and compliance with Microsoft specifications for use of the API or interface, which specifications shall be related to proper operation and integrity of the systems and mechanisms identified in this paragraph.

IV. Compliance and Enforcement Procedures

A. Enforcement Authority

1. The Plaintiffs shall have exclusive responsibility for enforcing this Final Judgment. Without in any way limiting the sovereign enforcement authority of each of the plaintiff States, the plaintiff States shall form a committee to coordinate their enforcement of this Final Judgment. A plaintiff State shall take no action to enforce this Final Judgment without first consulting the plaintiff States' enforcement committee.

2. To determine and enforce compliance with this Final Judgment, duly authorized representatives **[**569]** of the plaintiff States, on reasonable notice to Microsoft and subject to any lawful privilege, shall be permitted the following:

a. Access during normal office hours to inspect any and all source code, books, ledgers, accounts, correspondence, memoranda and other documents and records in the possession, custody, or control of Microsoft, which may have counsel present, regarding any matters contained in this Final Judgment.

b. Subject to the reasonable convenience of Microsoft and without restraint or interference from it, to interview, informally or on the record, officers, employees, or agents of Microsoft, who may have counsel **[*273]** present, regarding any matters contained in this Final Judgment.

c. Upon written request of a duly designated representative of a plaintiff State, on reasonable notice given to Microsoft, Microsoft shall submit such written reports under oath as requested regarding any matters contained in this Final Judgment.

Individual plaintiff States will consult with the plaintiff States' enforcement committee to minimize the duplication and burden of the exercise of the foregoing powers, where practicable.

3. The Plaintiffs shall not disclose **[**570]** any information or documents obtained from Microsoft under this Final Judgment except for the purpose of securing compliance with this Final Judgment, in a legal proceeding to which one or more of the Plaintiffs is a party, or as otherwise required by law; provided that the relevant Plaintiff(s) must provide ten days' advance notice to Microsoft before disclosing in any legal proceeding (other than a grand jury proceeding) to which Microsoft is not a party any information or documents provided by Microsoft pursuant to this Final Judgment which Microsoft has identified in writing as material as to which a claim of protection may be asserted under *Rule 26(c)(7) of the Federal Rules of Civil Procedure*.

4. The Plaintiffs shall have the authority to seek such orders as are necessary from the Court to enforce this Final Judgment, provided, however, that the Plaintiffs shall afford Microsoft a reasonable opportunity to cure alleged violations of Sections III.C, III.D, III.E and III.H, provided further that any action by Microsoft to cure any such violation shall not be a defense to enforcement with respect to any knowing, willful or systematic violations.

B. 1. Compliance Committee. **[**571]** Within 30 days of entry of this Final Judgment, Microsoft shall establish a compliance committee (the "Compliance Committee") of its Board of Directors, consisting of at least three members of the Board of Directors who are not present or former employees of Microsoft.

2. Compliance Officer. The Compliance Committee shall hire a Compliance Officer, who shall report directly to the Compliance Committee and to the Chief Executive Officer of Microsoft. The Compliance Officer shall be responsible for development and supervision of Microsoft's internal programs to ensure compliance with the antitrust laws and this Final Judgment. Microsoft shall give the Compliance Officer all necessary authority and resources to discharge the responsibilities listed herein.

3. Duties of Compliance Officer. The Compliance Officer shall:

a. within 60 days after entry of this Final Judgment, arrange for delivery to all officers and directors of Microsoft a copy of this Final Judgment together with additional informational materials describing the conduct prohibited and required by this Final Judgment;

b. arrange for delivery in a timely manner of a copy of this Final Judgment and such **[**572]** additional informational materials to any person who succeeds to a position described in Section IV.B.3.a above;

c. ensure that those persons described in subsection c.i above are annually briefed on the meaning **[*274]** and requirements of this Final Judgment and the United States antitrust laws and advising them that Microsoft's legal advisors are available to confer with them regarding any question concerning compliance with this Final Judgment or under the United States antitrust laws;

d. obtain from each person described in Section IV.B.3.a within 60 days of entry of this Final Judgment and annually thereafter, and for each person thereafter succeeding to such a position within 10 days of such succession and annually thereafter, a written certification that he or she: (i) has read, understands, and agrees to abide by the terms of, and has to their knowledge not violated, this Final Judgment; and (ii) has been advised and understands that his or her failure to comply with this Final Judgment may result in a finding of contempt of court;

e. maintain a record of persons to whom this Final Judgment has been distributed and from whom, pursuant to Section V.B.3.d above has been **[**573]** obtained;

f. on an annual basis, certify to the Plaintiffs that Microsoft is fully compliant with this Final Judgment;

g. maintain a record of all complaints received and action taken by Microsoft with respect to each such complaint; and

g. report promptly to the Plaintiffs any credible evidence of violation of this Final Judgment.

4. The Compliance Officer may be removed only by the Chief Executive Officer with the concurrence of the Compliance Committee.

V. Termination

A. Unless this Court grants an extension, this Final Judgment will expire on the fifth anniversary of the date on which it takes effect.

B. In any enforcement proceeding in which the Court has found that Microsoft has engaged in a pattern of willful and systematic violations, the Plaintiffs may apply to the Court for a one-time extension of this Final Judgment of up to two years, together with such other relief as the Court may deem appropriate.

VI. Definitions

A. "API" means application programming interface, including any interface that Microsoft is obligated to disclose pursuant to III.D.

B. "Communications Protocol" means the set of rules for information **[**574]** exchange to accomplish predefined tasks between a Windows Operating System Product and a server operating system product connected via a network, including, but not limited to, a local area network, a wide area network or the Internet. These rules govern the format, semantics, timing, sequencing, and error control of messages exchanged over a network.

C. "Consideration" means any monetary payment or the provision of preferential licensing terms; technical, marketing, and sales support; enabling programs; product information; information about future plans; developer support; hardware or software certification or approval; or permission to display trademarks, icons or logos.

D. "Covered OEMs" means the 20 OEMs with the highest worldwide volume of licenses of Windows Operating System Products reported to Microsoft in Microsoft's fiscal year preceding the effective **[*275]** date of the Final Judgment. The OEMs that fall within this definition of Covered OEMs shall be recomputed by Microsoft as soon as practicable after the close of each of Microsoft's fiscal years.

E. "Documentation" means all information regarding the identification and means of using APIs that a person of ordinary **[**575]** skill in the art requires to make effective use of those APIs. Such information shall be of the sort and to the level of specificity, precision and detail that Microsoft customarily provides for APIs it documents in the Microsoft Developer Network ("MSDN").

F. "IAP" means an Internet access provider that provides consumers with a connection to the Internet, with or without its own proprietary content.

G. "ICP" means an Internet content provider that provides content to users of the Internet by maintaining Web sites.

H. "IHV" means an independent hardware vendor that develops hardware to be included in or used with a Personal Computer running a Windows Operating System Product.

I. "ISV" means an entity other than Microsoft that is engaged in the development or marketing of software products.

J. "Microsoft Middleware" means software code that

1. Microsoft distributes separately from a Windows Operating System Product to update that Windows Operating System Product;

2. is Trademarked or is marketed by Microsoft as a major version of any Microsoft Middleware Product defined in section VI.K.1; and

3. provides the same or substantially similar functionality **[**576]** as a Microsoft Middleware Product.

Microsoft Middleware shall include at least the software code that controls most or all of the user interface elements of that Microsoft Middleware. Software code described as part of, and distributed separately to update, a Microsoft Middleware Product shall not be deemed Microsoft Middleware unless identified as a new major version of that Microsoft Middleware Product. A major version shall be identified by a whole number or by a number with just a single digit to the right of the decimal point.

K. "Microsoft Middleware Product" means

1. the functionality provided by Internet Explorer, Microsoft's Java Virtual Machine, Windows Media Player, Windows Messenger, Outlook Express and their successors in a Windows Operating System Product, and

2. for any functionality that is first licensed, distributed or sold by Microsoft after the entry of this Final Judgment and that is part of any Windows Operating System Product

a. Internet browsers, email client software, networked audio/video client software, instant messaging software or

b. functionality provided by Microsoft software that --His, or in the year preceding the **[**577]** commercial release of any new Windows Operating System Product was, distributed separately by Microsoft (or by an entity acquired by Microsoft) from a Windows Operating System Product;
ii. is similar to the functionality provided by a Non-Microsoft Middleware Product; and
iii. is Trademarked.

Functionality that Microsoft describes or markets as being part of a Microsoft Middleware **[*276]** Product (such as a service pack, upgrade, or bug fix for Internet Explorer), or that is a version of a Microsoft Middleware Product (such as Internet Explorer 5.5), shall be considered to be part of that Microsoft Middleware Product.

L. "Microsoft Platform Software" means (i) a Windows Operating System Product and/or (ii) a Microsoft Middleware Product.

M. "Non-Microsoft Middleware" means a non-Microsoft software product running on a Windows Operating System Product that exposes a range of functionality to ISVs through published APIs, and that could, if ported to or made interoperable with, a nonMicrosoft Operating System, thereby make it easier for applications that rely in whole or in part on the functionality supplied by that software product to be ported to or run on that non-Microsoft **[**578]** Operating System.

N. "Non-Microsoft Middleware Product" means a non-Microsoft software product running on a Windows Operating System Product (i) that exposes a range of functionality to ISVs through published APIs, and that could, if ported to or made interoperable with, a non-Microsoft Operating System, thereby make it easier for applications that rely in whole or in part on the functionality supplied by that software product to be ported to or run on that non-Microsoft Operating System, and (ii) of which at least one million copies were distributed in the United States within the previous year.

O. "OEM" means an original equipment manufacturer of Personal Computers that is a licensee of a Windows Operating System Product.

P. "Operating System" means the software code that, inter alia, (i) controls the allocation and usage of hardware resources (such as the microprocessor and various peripheral devices) of a Personal Computer, (ii) provides a platform for developing applications by exposing functionality to ISVs through APIs, and (iii) supplies a user interface that enables users to access functionality of the operating system and in which they can run applications.

[579]** Q. "Personal Computer" means any computer configured so that its primary purpose is for use by one person at a time, that uses a video display and keyboard (whether or not that video display and keyboard is included) and that contains an Intel x86 compatible (or successor) microprocessor. Servers, television set top boxes, handheld computers, game consoles, telephones, pagers, and personal digital assistants are examples of products that are not Personal Computers within the meaning of this definition.

R. "Timely Manner" means at the time Microsoft first releases a beta test version of a Windows Operating System Product that is made available via an MSDN subscription offering or of which 150,000 or more beta copies are distributed.

S. "Top-Level Window" means a window displayed by a Windows Operating System Product that (a) has its own window controls, such as move, resize, close, minimize, and maximize, (b) can contain sub-windows, and (c) contains user interface elements under the control of at least one independent process.

T. "Trademarked" means distributed in commerce and identified as distributed by a name other than Microsoft (R) or Windows (R) that Microsoft **[**580]** has claimed as a trademark or service mark by (i) marking the name with trademark notices, such as (R) or TM, in connection with a product distributed in the United States; (ii) filing an application for trademark protection for the name in the United States Patent and Trademark Office; or (iii) asserting the name **[*277]** as a trademark in the United States in a demand letter or lawsuit. Any product distributed under descriptive or generic terms or a name comprised of the Microsoft (R) or Windows (R) trademarks together with descriptive or generic terms shall not be Trademarked as that term is used in this Final Judgment. Microsoft hereby disclaims any trademark rights in such descriptive or generic terms apart from the Microsoft (R) or Windows (R) trademarks, and hereby abandons any such rights that it may acquire in the future.

U. "Windows Operating System Product" means the software code (as opposed to source code) distributed commercially by Microsoft for use with Personal Computers as

> Windows 2000 Professional, Windows XP Home, Windows XP Professional, and successors to the foregoing, including the Personal Computer versions of the products currently code named "Longhorn" **[**581]** and "Blackcomb" and their successors, including upgrades, bug fixes, service packs, etc. The software code that comprises a Windows Operating System Product shall be determined by Microsoft in its sole discretion.

VII. Further Elements

Jurisdiction is retained by this Court over this action such that the Court may act *sua sponte* to issue further orders or directions, including but not limited to orders or directions relating to the construction or carrying out of this Final Judgment, the enforcement of compliance therewith, the modification thereof, and the punishment of any violation thereof.

Jurisdiction is retained by this Court over this action and the parties thereto for the purpose of enabling the parties to this action to apply to this Court at any time for further orders and directions as may be necessary or appropriate to carry out or construe this Final Judgment, to modify or terminate any of its provisions, to enforce compliance, and to punish violations of its provisions.

Unless otherwise indicated, the provisions of this Final Judgment shall take effect 30 days after the date on which it is entered.

In accordance with the imposition and **[**582]** affirmance of liability, the Plaintiff States shall submit a motion for the award of costs and fees, with supporting documents as necessary, not later than 45 days after the entry of this Final Judgment.

VIII. Third Party Rights

Nothing in this Final Judgment is intended to confer upon any other persons any rights or remedies of any nature whatsoever hereunder or by reason of this Final Judgment.

SO ORDERED.

COLLEEN KOLLAR-KOTELLY

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN1[] **Settlements, Antitrust Procedures & Penalties Act**

15 U.S.C.S. § 16(e) mandates that, prior to the entry of a proposed consent judgment, the district court must determine that entry of such judgment is in the public interest. 15 U.S.C.S. § 16(e). 15 U.S.C.S. § 16(e) specifically requires the court to make an independent determination as to whether or not entry of a proposed consent decree is in the public interest.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN2[] **Settlements, Consent Judgments**

The court's role in protecting the public interest is one of ensuring that the government has not breached its duty to the public in consenting to the decree. In making this determination, the court may consider the following: (1) the competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration or relief sought, anticipated effects of alternative remedies actually considered, and any other considerations bearing upon the adequacy of such judgment; (2) the impact of entry of such judgment upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial. *15 U.S.C.S. § 16(e)*. These considerations are characterized more simply as an inquiry into the purpose, meaning, and efficacy of the decree.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN3[] **Settlements, Consent Judgments**

The district court should pay particularly close attention to a number of issues in its examination of the decree and corresponding assessment of the public interest. A district judge pondering a proposed consent decree should pay special attention to the decree's clarity, as it is the district judge who must preside over the implementation of the decree. Based on a similar rationale, district courts are expected to pay close attention to the enforcement provisions in a proposed consent decree. Where there exist third-party claims that entry of the proposed decree will cause affirmative harm, the district court should at least pause or "hesitate" in order to consider these claims before reaching a conclusion that the proposed decree is appropriate.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN4[] **Settlements, Consent Judgments**

The court's authority to review the proposed decree depends entirely on the government's exercising its prosecutorial discretion by bringing a case in the first place. Accordingly, the court must accord deference to the government's predictions as to the effect of the proposed remedies. In this vein, a proposed decree must be approved even if it falls short of the remedy the court would impose on its own, as long as it falls within the range of acceptability or is within the reaches of public interest.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Labor & Employment Law > Wrongful Termination > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Penalties

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN5[] **Settlements, Antitrust Procedures & Penalties Act**

A remedies decree in an antitrust case must seek to unfetter a market from anticompetitive conduct, to terminate the illegal monopoly, deny to the defendant the fruits of its statutory violation, and ensure that there remain no practices likely to result in monopolization in the future. Although this inquiry is usually reserved for cases which are litigated through remedy, consideration of these "objectives," to the extent they are applicable to the facts of the case, remains appropriate where liability has been established in the case. Still, the court's assessment of the remedy's ability to satisfy these objectives is tempered by the deference owed to the government in the Antitrust Procedures and Penalties Act (Tunney Act) context.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN6[] **Settlements, Consent Judgments**

The mere existence of an exclusionary act does not itself justify full feasible relief against the monopolist to create maximum competition. Similarly, because structural relief is designed to eliminate the monopoly altogether, wisdom counsels against adopting radical structural relief in the absence of some measure of confidence that there has been an actual loss to competition that needs to be restored. Instead, the court crafting a remedy must assess the strength of the causation evidence that established liability and "tailor" the relief accordingly.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN7[] **Settlements, Consent Judgments**

A consent decree need not reflect the court's own choice of a remedy, but instead, giving due respect to the government's view of the effect of the remedial proposal, need only reflect a certain consonance with the liability allegations, or the liability findings.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > Clayton Act > Penalties

HN8[] **Settlements, Consent Judgments**

The Antitrust Procedures and Penalties Act (Tunney Act), and the case law which follows, dictate that it is for the United States to weigh the benefits of a trade in the first instance, and that, barring a breach of duty in consenting to the decree, the court should respect the government's predictions as to the effect of the proposed remedy.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > Clayton Act > Penalties

HN9[] **Settlements, Consent Judgments**

It is not contrary to the public interest, as contemplated by the Antitrust Procedures and Penalties Act (Tunney Act), to enter a decree that is not necessary, or that grants relief to which the government might not be strictly entitled. The public does not suffer because the defendant consented to limitations on its activities that could not otherwise be imposed.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > Clayton Act > Penalties

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN10[] **Settlements, Antitrust Procedures & Penalties Act**

In the context of the Antitrust Procedures and Penalties Act (Tunney Act), just as the court may not second guess the government's choices about what claims to bring in the first place, it should not treat differently those concessions proposed in a consent decree that might have been achieved at trial from those that might not have been achievable.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > Clayton Act > Penalties

HN11[] **Settlements, Consent Judgments**

In the context of the Antitrust Procedures and Penalties Act (Tunney Act), the risks inherent in litigation are likely to be reflected in some portion of the proposed decree, and these risks are appropriately weighed by the government, rather than the court, in the first instance.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN12[] **Settlements, Consent Judgments**

Courts considering antitrust remedies are advised to pay special attention to the potential of any remedy to inflict harm upon third parties.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > Clayton Act > Penalties

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN13[] **Settlements, Antitrust Procedures & Penalties Act**

A court presiding over an Antitrust Procedures and Penalties Act (Tunney Act) proceeding need not conclude that the terms of the consent decree will best serve society, but only that the proposed decree is within the reaches of the public interest.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN14[] **Settlements, Consent Judgments**

On the subject of licenses and antitrust remedies, courts are best excluded from the administration of intricate and detailed rules relating to business affairs.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Governments > Courts > Judicial Precedent

HN15[] **Settlements, Consent Judgments**

Precedent instructs the court to pay close attention to provisions that address enforcement of a consent decree.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Ancillary Jurisdiction

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN16[] **Supplemental Jurisdiction, Ancillary Jurisdiction**

District courts enjoy no free-ranging "ancillary" jurisdiction to enforce consent decrees, but are instead constrained by the terms of the decree and related order. The district court's power over a consent decree, reflecting the hybrid between judicial order and contract, is limited to two sources. A district court may interpret and enforce a decree to the extent authorized by the decree itself or by the related order. Additionally, a district court may modify a decree pursuant to *Fed. R. Civ. P. 60(b)(5)*. This latter power is circumscribed by the Rule's requirements that such modification is appropriate if it is no longer equitable that the judgment should have prospective application. *Fed. R. Civ. P. 60(b)(5)*. A significant change in circumstances may warrant revision of a decree, though any such revision must be suitably tailored to the changed circumstances.

Opinion by: COLLEEN KOLLAR-KOTELLY

Opinion

[*149] MEMORANDUM OPINION

Remaining in this case for the Court's determination is the resolution of a single issue: whether entry of the final judgment proposed by the parties is in the public interest. The Court makes this determination pursuant to the Antitrust Procedures and Penalties Act ("Tunney Act"), *15 U.S.C. § 16(b)-(h)*. In a previous Memorandum Opinion, the Court reviewed the pertinent procedural history and determined that the parties **[**4]** had satisfied the other requirements of the Tunney Act. *See generally* *United States v. Microsoft Corp., 215 F. Supp. 2d 1 (D.D.C. 2002)*. Having reviewed the voluminous record in this case and considered the factors enumerated in *15 U.S.C. § 16(e)*, the Court finds that, with the exception of the provisions relating to the retention of the Court's jurisdiction, the proposed consent decree is in the public interest. Accordingly, the Court conditionally approves the proposed consent **[*150]** decree as the final judgment in this case, pending the prompt agreement by the parties to a modification of the Court's retention of its jurisdiction.

I. PROCEDURAL HISTORY

On May 18, 1998, the United States filed a civil complaint alleging that Microsoft had engaged in anticompetitive conduct in violation of §§ 1 and 2 of the Sherman Act, 15 U.S.C. §§ 1, 2. On that same date, a group of state plaintiffs filed a separate civil complaint alleging similar violations of federal law, as well as violations of the corresponding provisions of their various state laws. Not long after filing, the two cases were consolidated and thereafter, proceeded jointly **[**5]** through discovery and a trial on the merits. On November 5, 1999, Judge Thomas Penfield Jackson entered 412 findings of fact, *United States v. Microsoft Corp., 84 F. Supp. 2d 9 (D.D.C. 1999)* (hereinafter cited as "*Findings of Fact*"), and on April 3, 2000, Judge Jackson entered conclusions of law, finding Microsoft liable for violations of §§ 1 and 2 of the Sherman Act and the corresponding state law provisions, *United States v. Microsoft Corp., 87 F. Supp. 2d 30 (D.D.C. 2000)*. On June 7, 2000, Judge Jackson entered final judgment in the consolidated cases and imposed a structural remedy of divestiture for Microsoft's violations of the Sherman Act. *United States v. Microsoft Corp., 97 F. Supp. 2d 59 (D.D.C. 2000)*.

Microsoft appealed, and the United States Court of Appeals for the District of Columbia Circuit determined to consider the appeals in the consolidated cases *en banc.* Following extensive briefing and two days of oral argument, the appellate court issued a unanimous *per curiam* opinion affirming in part, reversing in part, vacating the remedy decree in full, and remanding in part for remedy proceedings before a different **[**6]** district court judge. *See* *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34 (D.C. Cir. 2001)* (*en banc*). Following reassignment, on September 28, 2001, this Court ordered that the parties enter into intensive settlement negotiations. *United States v. Microsoft Corp., 2001 U.S. Dist. LEXIS 24272*, Nos. 98-1232 and 98-1233 (D.D.C. Sept. 28, 2001) (setting a schedule for settlement discussions). On that same date, the Court entered a schedule for discovery and commencement of evidentiary proceedings, in the event that the cases were not resolved through settlement. *United States v. Microsoft Corp., 2001 U.S. Dist. LEXIS 24272*, Nos. 98-1232 and 981233 (D.D.C. Sept. 28, 2001) (setting discovery guidelines and schedule).

The United States and Microsoft were able to reach a resolution in *United States v. Microsoft Corp.*, No. 98-1232 (D.D.C.), in the form of a proposed consent decree, filed with the Court as the "Revised Proposed Final Judgment" on November 6, 2001. As a result, the Court vacated the discovery schedule with regard to *United States v. Microsoft Corp.* and deconsolidated that case from its companion case, *State of New York, et. al. v. Microsoft Corp.*, No. 98-1233 (D.D.C.). *United States v. Microsoft* **[**7]** *Corp.*, Nos. 98-1232 and 98-1233 (D.D.C. Nov. 2, 2001) (vacating the Sept. 28, 2001, Scheduling Order with regard to Civil Action No. 981232); *United States v. Microsoft Corp., 2002 U.S. Dist. LEXIS 13050*, Nos. 98-1232 and 98-1233 (Feb. 1, 2002) (deconsolidating cases). Rather than proceed to an evidentiary hearing on the issue of remedy along with some of the plaintiffs in *State of New York, et. al. v. Microsoft Corp.*, [1] the United **[*151]** States and Microsoft commenced the process of obtaining judicial approval of the proposed consent decree pursuant to the Tunney Act, 15 U.S.C. § 16(b)-(h).

[8]** The November 6, 2001, filing of the Revised Proposed Final Judgment ("RPFJ") was accompanied by a "Stipulation" entered into by the United States, Microsoft, and the Settling States. The Stipulation provided that the Court could enter the proposed final judgment "at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16, and without further notice to any party or other proceedings." Stipulation and Revised Proposed Final Judgment at 1. The United States filed its "competitive impact statement" ("CIS") with the Court on November 15, 2001. Pursuant to 15 U.S.C. § 16(b), the United States published the proposed final judgment, along with the CIS, in the Federal Register on November 28, 2001. Revised Proposed Final Judgment and Competitive Impact Statement, 66 Fed. Reg. 59,452 (Nov. 28, 2001). On December 10, 2001, Defendant Microsoft filed with the Court its "description of . . . written or oral communications by or on behalf of

[1] In the former companion case, *State of New York, et al. v. Microsoft Corp.*, the States of New York, Ohio, Illinois, Kentucky, Louisiana, Maryland, Michigan, North Carolina, and Wisconsin have entered into a conditional settlement with Microsoft as to the issue of remedy. Those Plaintiff States-"Settling States"-are awaiting approval by this Court of the settlement in this case before entry of the settlement in *State of New York, et al v. Microsoft Corp.* pursuant to Rule 54(b) of the Federal Rules of Civil Procedure. Because the proposed final judgment addresses the Settling States as well as the United States in its terms, the Court, where appropriate, refers to both the United States and the Settling States as "Plaintiffs" in this Memorandum Opinion.

[Microsoft] . . . with any officer or employee of the United States concerning or relevant to" the proposed consent decree. Thereafter, Microsoft **[**9]** supplemented this description on March 20, 2002.

The United States received 32,392 comments on the proposed final judgment and provided the full text of these comments to the Court on February 28, 2002. On March 1, 2002, the United States submitted the full text of the public's comments for publication in the Federal Register, and on May 3, 2002, the public comments appeared in the Federal Register pursuant to that submission. United States' Certificate of Compliance at 4; Public Comments, *67 Fed. Reg. 23,654* (Books 2-12) (May 3, 2002). On May 9, 2002, the United States published in the Federal Register an "addendum containing the correct text of thirteen (13) comments for which either an incomplete or incorrect electronic version had been included in the original submission to the Federal Register." Addendum to Public Comments, *67 Fed. Reg. 31,373* (May 9, 2002); United States Certificate of Compliance at 4. The United States certified compliance with *15 U.S.C. § 16(b)-(d)* on May 9, 2002. On July 1, 2002, this Court confirmed the applicability of the Tunney Act to these proceedings and found that the parties had complied with the Act's **[**10]** requirements such that the matter was ripe for the Court's determination of the public interest. *See* *United States v. Microsoft Corp., 215 F. Supp. 2d 1 (D.D.C. 2002)*. [2]

II. TUNNEY ACT

A. Tunney Act

Concerned with the appearance of impropriety engendered by the secrecy of **[*152]** consent decree negotiations in antitrust cases, in addition to exposing to "sunlight" **[**11]** the process by which such consent decrees are negotiated, 119 Cong. Rec. at 24599, Congress determined that the judiciary should do more than merely "rubber stamp" proposed consent decrees in antitrust cases, H. Rep. No. 93-1463, at 8 (1974), *reprinted in* 1974 U.S.C.C.A.N. 6535, 6536; S. Rep. No. 93298, at 5 (1973). *See also* *United States v. Microsoft Corp., 312 U.S. App. D.C. 378, 56 F.3d 1448, 1458 (D.C. Cir. 1995)* (quoting legislative history). Accordingly, ***HN1***[] *§ 16(e)* of Title 15 mandates that, prior to the entry of a consent judgment proposed by the United States in an antitrust action, the district court must determine that "entry of such judgment is in the public interest." *15 U.S.C. § 16(e)*. Subsection (e) specifically requires the Court to "make an independent determination as to whether or not entry of a proposed consent decree is in the public interest." S. Rep. 93-298, at 5; *Microsoft, 56 F.3d at 1458* (quoting legislative history).

HN2[] The court's role in protecting the public interest is one of ensuring that the government has not breached its duty to the public in consenting to the decree." *United States v. Bechtel, 648 F.2d 660, 666 (9th Cir. 1981)*. **[**12]** In making this determination, the Court "may consider" the following:

> (1) the competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration or relief sought, anticipated effects of alternative remedies actually considered, and any other considerations bearing upon the adequacy of such judgment;
>
> (2) the impact of entry of such judgment upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

---

[2] Pursuant to the stipulation filed with the Court on November 6, 2001, Microsoft began complying with portions of the proposed final judgment on December 16, 2001, as if "it were in full force and effect." Stipulation at 2. On August 28, 2002, the United States submitted a "Notice" to the Court advising "the Court of Microsoft's compliance with various milestones established by the Second Revised Proposed Final Judgment ('SRPFJ')." Notice at 1 (Aug. 28, 2002). In general terms, the Notice indicates that Microsoft is in compliance with its requirements and "takes seriously its obligations under the SRPFJ." *Id. at 7*.

15 U.S.C. § 16(e). The D.C. Circuit characterized these considerations more simply as an inquiry into the "purpose, meaning, and efficacy of the decree." Microsoft, 56 F.3d at 1462.

The D.C. Circuit identified **HN3**[] a number of issues to which the district court should pay particularly close attention in its examination of the decree and corresponding assessment of the public interest. "A district judge pondering a proposed consent decree . . . should pay special attention to the decree's clarity," as **[**13]** it is the district judge who must "preside over the implementation of the decree." Id. at 1461-62. Based on a similar rationale, district courts are expected to "pay close attention" to the enforcement provisions in a proposed consent decree. Id. at 1462. Where there exist third-party claims that entry of the proposed decree will cause affirmative harm, the district court should at least pause or "hesitate" in order to consider these claims before reaching a conclusion that the proposed decree is appropriate. *Id.*

Notwithstanding the district court's focused consideration of these and other issues, the Court must recall that **HN4**[] its "authority to review the [proposed] decree depends entirely on the government's exercising its prosecutorial discretion by bringing a case in the first place." Id. at 1459-60. Accordingly, the Court must accord deference to the "government's predictions as to the effect of the proposed remedies." United States v. Thomson Corp., 949 F. Supp. 907, 914 (D.D.C. 1996) (quoting Microsoft, 56 F.3d at 1461); *see also* United States v. Western Elec. Co., 283 U.S. App. D.C. 299, 900 F.2d 283, 297 (D.C. Cir. 1990) **[**14]** ("Although we see no doctrinal basis for the district court to defer to the DOJ's interpretation of the decree or its views about **[*153]** ***antitrust law***, it is to be expected that the district court would seriously consider the Department's economic analysis and predictions of market behavior."). In this vein, "a proposed decree must be approved even if it falls short of the remedy the court would impose on its own, as long as it falls within the range of acceptability or is within the reaches of public interest." United States v. AT&T, 552 F. Supp. 131, 151 (D.D.C. 1982) (quotation marks omitted), *aff'd without opinion sub nom.* Maryland v. United States, 460 U.S. 1001, 75 L. Ed. 2d 472, 103 S. Ct. 1240 (1983); *accord* Microsoft, 56 F.3d at 1460; Bechtel, 648 F.2d at 666.

Having so identified the general standard in Tunney Act cases, this Court must inquire as to whether that standard applies equally and without modification in this case. The instant case is more complicated than the usual case in that it contradicts the rule that "because it is a settlement [and] there are no findings that the defendant has actually engaged in illegal practices . . . **[**15]** it is therefore inappropriate for the [district court] judge to measure the remedies in the decree as if they were fashioned after trial." Microsoft, 56 F.3d at 1460-61 (emphasis omitted). In this case there has been a trial, and there have been findings of liability on numerous grounds. *See* Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34. Therefore, it seems entirely appropriate to "measure the remedies" based upon the post-trial liability findings in this case. Microsoft, 56 F.3d at 1461. Accordingly, the findings of liability provide an essential foundation to this Court's analysis, as a "discrepancy between the remedy and undisputed facts of antitrust violations could be such as to render the decree 'a mockery of judicial power.'" Mass. School of Law at Andover, Inc. v. United States, 326 U.S. App. D.C. 175, 118 F.3d 776, 782 (D.C. Cir. 1997) (quoting Microsoft, 56 F.3d at 1462); *accord* Thomson, 949 F. Supp. at 913 ("The court is to compare the complaint filed by the government with the proposed consent decree and determine whether the remedies negotiated between the parties and proposed by the Justice Department clearly and **[**16]** effectively address the anticompetitive harms initially identified.").

While this is not to say that the circumstances of this case call for a review of the proposed decree in the absence of deference, the Court cannot simply proceed as if this were a case based upon untested allegations. In the usual case "remedies which appear less than vigorous may well reflect an underlying weakness in the government's case." Microsoft, 56 F.3d at 1460-61. Yet in this case, many, though certainly not all, of the strengths and weaknesses of the government's case have already been exposed. In this regard, the Court cannot overlook the fact that the appellate court sustained liability against Microsoft for violation of § 2 of the Sherman Act. United States v. Microsoft, 253 F.3d 34, 59-78. Therefore, without applying a wholly distinct standard, this Court must remain ever-mindful of the posture of this case when assessing the proposed consent decree for determination of the public interest.

Given the liability findings, part of the public interest analysis will require consideration of the extent to which the proposed consent decree "meets the requirements for an antitrust remedy. **[**17]** " *AT&T, 552 F. Supp. at 153*. ***HN5***[] "[A] remedies decree in an antitrust case must seek to 'unfetter a market from anticompetitive conduct,' *Ford Motor Co.* [*v. United States*], *405 U.S. 562, 577, 31 L. Ed. 2d 492, 92 S. Ct. 1142* [1972], . . . to 'terminate the illegal monopoly, [3] deny to the defendant **[*154]** the fruits of its statutory violation, and ensure that there remain no practices likely to result in monopolization in the future,' [*United States v. United Shoe Machinery Corp., 391 U.S. 244, 250, 20 L. Ed. 2d 562, 88 S. Ct. 1496]*." *Microsoft, 253 F.3d at 103*. Although this inquiry is usually reserved for cases which are litigated through remedy, such as *State of New York, et al. v. Microsoft Corp.*, No. 98-1233 (D.D.C.), consideration of these "objectives," to the extent they are applicable to the facts of this case, remains appropriate because liability has been established in this case. Still, the Court's assessment of the remedy's ability to satisfy these objectives is tempered by the deference owed to the government in the Tunney Act context. *See generally* *Microsoft, 312 U.S. App. D.C. 378, 56 F.3d 1448*.

[18]** Applying these principles to the instant case, because the district court has rendered findings of fact and liability which have been reviewed on appeal, the Court examines, in general terms, the correspondence between the liability findings and the conduct restrictions in the proposed consent decree. In conjunction with this inquiry, the Court is particularly attentive to the clarity of the proposed decree's provisions, the enforcement mechanisms, and to claims that harm will result from the implementation of the proposed decree. *Microsoft, 56 F.3d at 1461-62*.

III. DISCUSSION

A. Court of Appeals Opinion

In most cases, judicial analysis of the public interest in a Tunney Act proceeding commences, quite logically, with an examination of the allegations laid out in the complaint. *See, e.g.,* *Thomson, 949 F. Supp. at 909-11* (describing complaint). Indeed, the district court is without authority to "reach beyond the complaint to evaluate claims that the government did *not* make and to inquire as to why they were not made." *Microsoft, 56 F.3d at 1459*. In light of the procedural posture of this case, however, the **[**19]** complaint in this case is of little moment, as proceedings have far surpassed the allegations stage. Instead, the opinion of the appellate court provides the underpinning for this Court's analysis of the proposed decree. As a result, the Court pauses to summarize and recount the pertinent portions of the appellate opinion in this case. Where appropriate, a more detailed examination of the appellate court's opinion appears in the context of the Court's discussion of the specific provisions of the proposed final judgment.

1. Market Definition

---

[3] The Court notes that the objective of "terminating the illegal monopoly," *United States v. United Shoe Mach. Corp., 391 U.S. 244, 250, 20 L. Ed. 2d 562, 88 S. Ct. 1496 (1968)*, is incompatible with the facts of this case. Neither the district court, nor the appellate court concluded that Microsoft had unlawfully obtained its monopoly. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*; *Microsoft, 87 F. Supp. 2d 30*; *see also* *Microsoft, 56 F.3d at 1452* (observing in the precursor to this case that "the government did not allege and does not contend-and this is of crucial significance to this case-that Microsoft *obtained* its alleged monopoly position in violation of the antitrust laws") (emphasis in original). Moreover, as noted by the appellate court, "the District Court expressly did not adopt the position that Microsoft would have lost its position in the OS market but for its anticompetitive behavior." *Microsoft, 253 F.3d at 107* (citing *Findings of Fact* P 411). In this context, outright termination of the monopoly is a questionable remedial goal, as such action would exceed the limits of the controversy presented to the Court. Accordingly, the Court's inquiry into the extent to which the proposed consent decree "terminates the illegal monopoly," *United Shoe, 391 U.S. at 250*, will be limited, and the Court will instead focus upon terminating the illegal *maintenance* of the monopoly.

The appellate court began its opinion by **[*155]** examining Plaintiffs' [4] *§ 2* Sherman Act claims and specifically, whether the district judge had identified the proper market for purposes of assessing Microsoft's monopoly power. The appellate court concluded that the district court had properly defined the relevant market as "the licensing of all Intel-compatible PC [5] operating systems [6] worldwide." *Microsoft, 253 F.3d at 52* (quoting *Microsoft, 87 F. Supp. 2d at 36*). Having agreed with the district court's definition of the relevant market, the appellate court adopted the district court's determination that **[**20]** "circumstantial evidence proves that Microsoft possesses monopoly power." *253 F.3d at 56*. The appellate court further noted that "if we were to require direct proof [of monopoly power], . . . Microsoft's behavior may well be sufficient to show the existence of monopoly power." *Id. at 57*.

[21]** ***2. Theory of Liability***

Integral to the appellate court's adoption of the market definition was its simultaneous acceptance of Plaintiffs' theory of Microsoft's market dominance. Both the district and appellate courts noted that Microsoft's lawfully acquired monopoly is naturally protected by a "structural barrier," known as the "applications barrier to entry." *Id. at 55*. "That barrier . . . stems from two characteristics of the software market: (1) most consumers prefer operating systems for which a large number of applications have already been written; and (2) most developers prefer to write for operating systems that already have a substantial consumer base." *Id.* (citing *Findings of Fact* PP 30, 36). This barrier creates a "chicken-and-egg" or network effects situation, which perpetuates Microsoft's operating system dominance because "applications will continue to be written for the already dominant Windows, [7] which in turn ensures that consumers will continue to prefer it over other operating systems." *Id.* Because "every **[*156]** operating system has different APIs," [8] applications written for one operating system will not function on another

---

[4] In referring to "Plaintiffs" throughout this Memorandum Opinion, the Court refers to the United States, as well as the Plaintiff States in Civ. No. 98-1233, who entered into a settlement agreement with Microsoft. *See supra* note 1. The Court notes, however, that the appellate court's opinion applies not only to the claims brought by the United States and the Settling States, but also to those states who have opted to litigate the issue of remedy in *State of New York, et al. v. Microsoft*, No. 98-1233 (D.D.C.).

[5] "PC" is short for "personal computer." *Findings of Fact* P 1.

[6] The appellate court, relying upon the factual testimony presented to the district court, explained the functions of a PC operating system:

> Operating systems perform many functions, including allocating computer memory and controlling peripherals such as printers and keyboards. Operating systems also function as platforms for software applications. They do this by "exposing"-i.e., making available to software developers-routines or protocols that perform certain widely-used functions. These are known as Application Programming Interfaces, or "APIs." For example, Windows contains an API that enables users to draw a box on the screen. Software developers wishing to include that function in an application need not duplicate it in their own code. Instead, they can "call"-*i.e.*, use-the Windows API. Windows contains thousands of APIs, controlling everything from data storage to font display.

Microsoft, 253 F.3d at 53 (citations omitted).

[7] "In 1985, Microsoft began shipping a software package [for the PC] called Windows. The product included a graphical user interface, which enabled users to perform tasks by selecting icons and words on the screen using a mouse." *Findings of Fact* P 7. In 1995, Microsoft introduced an updated version of its Windows software known as "Windows 95." *Id. P 8*. Similarly, in 1998, Microsoft released "Windows 98." *Id.* Since that time, Microsoft has continued to update, revise, and re-create its "Windows" PC operating system.

[8]

> "APIs" are applications programming interfaces. As Judge Jackson explained: [An] operating system supports the functions of applications by exposing interfaces, called "application programming interfaces," or "APIs." These are synapses at which the developer of an application can connect to invoke pre-fabricated blocks of code in the operating system. These blocks of code in turn perform crucial tasks, such as displaying text on the computer screen.

operating **[**22]** system unless the developer undertakes the "time consuming and expensive" process of transferring and adapting, known in the industry as "porting," the application to the alternative operating system. *Id. at 53*.

[23]** Plaintiffs proceeded under the theory that certain kinds of software products, termed "middleware," [9] could reduce the "self-reinforcing cycle," *Findings of Fact* P 39, by serving as a platform for applications, taking over some of the platform functions provided by Windows and thereby "weakening the applications barrier to entry," *id. P 68*. One of middleware's defining characteristics as a software product is its ability to "expose its own APIs." *Findings of Fact* P 28. Eventually, reasoned Plaintiffs, if applications were written to rely on the middleware API set, rather than the Windows API set, the applications could be made to run on alternative operating systems simply by porting the middleware. Ultimately, by writing to the middleware API set, applications developers could write applications which would run on any operating system on which the middleware was preset. Plaintiffs focused their attention primarily upon two such middleware threats to Microsoft's operating system dominance-Netscape Navigator [10] and the Java technologies. *Microsoft, 253 F.3d at 53*. The district and appellate courts accepted Plaintiffs' theory of competition despite the **[**24]** fact that "neither Navigator, Java, nor any other middleware product could [at that time], or would soon, expose enough APIs to serve as a platform for popular applications." *Id.*; *Findings of Fact* PP 28-29.

3. Four-Part Test for Liability

Having concluded that the district court properly identified the relevant market as the market for Intel-compatible PC operating systems and properly excluded middleware products from that market, the **[**25]** appellate court turned its attention to the issue of whether Microsoft responded to the threat posed by middleware in violation of *§ 2* of the Sherman Act. Specifically, the appellate court set out to determine whether Microsoft "maintained, or attempted to . . . maintain, a monopoly by engaging in exclusionary conduct." *Microsoft, 253 F.3d at 58*. The appellate court recounted that the district court answered that inquiry in the affirmative, finding Microsoft liable for violating *§ 2* of the Sherman Act:

> by engaging in a variety of exclusionary acts . . . specifically . . .: (1) the way in which it integrated [Internet Explorer] into Windows; (2) its various dealings with Original Equipment Manufacturers **[*157]** ("OEMs"), Internet Access Providers ("IAPs"), Internet Content Providers ("ICPs"), Independent Software Vendors (ISVs), and Apple Computer; (3) its efforts to contain and to subvert Java technologies; and (4) its course of conduct as a whole.

Id. In order to review the district court's findings on this point, the appellate court outlined a four-part test for determining whether particular conduct can be said to violate ***antitrust law***. "First, to **[**26]** be condemned as exclusionary, a monopolist's act must have an 'anticompetitive effect.' That is, it must harm the competitive *process* and thereby harm consumers." *Id. at 58* (emphasis in original). Second, the plaintiff must "demonstrate that the monopolist's conduct harmed competition, not just a competitor." *Id. at 59*. Third, "the monopolist may proffer a 'procompetitive justification' for its conduct." *Id.* (quoting *Eastman Kodak Co. v. Image Technical Servs. Inc., 504 U.S. 451, 483, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992))*. If this justification stands unrebutted by the plaintiff, the monopolist may escape liability. Therefore, the fourth prong of the inquiry requires that the plaintiff "demonstrate that the anticompetitive harm of the conduct outweighs the procompetitive benefit." *Id.* The appellate court stressed that, although evidence of intent is relevant "to understand the likely effect of the monopolist's conduct," when assessing the balance between the anticompetitive harm and the procompetitive effect, the trial court should focus on the "effect of [the exclusionary] conduct, not the intent behind it." *Id.*

Findings of Fact P 2.

[9] Such software takes the name "middleware" because "it relies on the interfaces provided by the underlying operating system while simultaneously exposing its own APIs to developers" and, therefore, is said to reside in the middle. *Findings of Fact* P 28.

[10] "Although certain Web browsers provided graphical user interfaces as far back as 1993, the first widely-popular graphical browser distributed for profit, called Navigator, was brought to market by the Netscape Communications Corporation ('Netscape') in December 1994." *Findings of Fact* P 17.

Using this framework, the appellate **[**27]** court addressed Microsoft's challenge to each of the findings by the district court. The appellate court examined the district court's four basic areas of findings with regard to § 2 liability in an order different from that of the district court. The Court presents these holdings, in the order addressed by the appellate court.

4. Original Equipment Manufacturer ("OEM") Licenses

Commencing its analysis with the "licenses issued to original equipment manufacturers," [11] *253 F.3d at 59*, the appellate court focused upon three license provisions "prohibiting the OEMs from: removing any desktop icons, folders, or 'Start' menu entries; (2) altering the initial boot sequence; and (3) otherwise altering the appearance of the Windows desktop," *253 F.3d at 61* (citing *Findings of Fact* P 213). Into the category of "otherwise altering the appearance of the Windows desktop," the appellate court subsumed the automatic launch of an alternative user interface, the prohibition against the addition of icons and folders different in size and shape from those used by Microsoft, and the prohibition on the use of the "Active Desktop" feature [12] to display third-party brands. *253 F.3d at 62*; **[**28]** *see also Findings of Fact* P 213. Of these license provisions, the appellate court concluded that, "with the exception of the one restriction prohibiting automatically launched alternative interfaces, all of the OEM license restrictions at issue represent uses of Microsoft's market power to protect its monopoly, unredeemed by any legitimate justification." *253 F.3d at 64*. In commencing its next area of **[*158]** analysis, the appellate court noted with regard to the license restrictions imposed upon OEMs that they "have a significant effect in closing rival browsers out of one of the two primary channels of distribution." *Id.*

5. Integration of Internet Explorer ("IE") and **[**29]** ***Windows***

The appellate court next turned its attention toward the "integration of [Internet Explorer ("IE")] [13] and Windows." *Id.* At the outset of its analysis, the appellate court took a narrow view of the district court's determination, noting that the district court's "broad[]" condemnation of "Microsoft's decision to bind 'Internet Explorer to Windows with . . . technological shackles'" is supported by only three specific actions taken by Microsoft. *Id.* (quoting *Microsoft, 87 F. Supp. 2d at 39*). The appellate court identified these three as (1) "excluding IE from the 'Add/Remove Programs' utility"; (2) "designing Windows so as in certain circumstances to override the user's choice of a default browser other than IE"; and (3) "commingling code related to browsing and other code in the same files, so that any attempt to delete the files containing IE would, at the same time, cripple the operating system." *253 F.3d 34, 64-65*. Pursuant to its four part test for liability, the appellate court concluded that Microsoft could be held liable for the first and the third of these actions. *253 F.3d 34, 65-67*. As to the second of these **[**30]** actions, the override of the user's choice of default in certain circumstances, the court determined that Microsoft had proffered a procompetitive justification that went unrebutted by Plaintiffs, namely that the override was the result of "valid technical reasons" which justified the override in a "few out of the nearly 30 means of accessing the Internet." *253 F.3d 34, 67* (quotation marks omitted). Finding that Plaintiffs had neither rebutted Microsoft's procompetitive justification, nor demonstrated that the anticompetitive effect of the challenged act outweighed such justification, the appellate court held that "Microsoft may not be held liable for this aspect of its product design." *Id.*

6. Agreements with Internet Access Providers ("IAPs")

Directing its attention to Microsoft's "agreements with various IAPs," [14] which the district court "condemned" as exclusionary, the appellate court identified five Microsoft **[**31]** actions specifically relied upon by the district court for this condemnation:

---

[11] Manufacturers of PCs are known as "original equipment manufacturers" or "OEMs." *Findings of Fact* P 10.

[12] "The Active Desktop was a Microsoft feature that, if enabled, allowed the Windows user to position Web pages as open windows that appear on the background, or 'wallpaper' of the Windows desktop." *Findings of Fact* P 314.

[13] Internet Explorer is Microsoft's Web browser. *Findings of Fact* P 17.

> (1) offering IE free of charge to IAPs[;] . . . (2) offering IAPs a bounty for each customer the IAP signs up for service using the IE browser[;] . . . (3) developing the IE Access Kit ("IEAK"), a software package that allows an IAP to "create a distinctive identity for its service in as little as a few hours by customizing the [IE] title bar, icon, start and search pages," *Findings of Fact* P 249[;] . . . (4) offering the IEAK to IAPs free of charge, on the ground that those acts, too, helped Microsoft preserve its monopoly[,] [*Microsoft*, 87 F. Supp. 2d] at 41-42[;] . . . (5) agreeing to provide easy access to IAPs' services from the Windows desktop in return for the IAPs' agreement to promote IE exclusively and to keep shipments of internet access software using Navigator under a specific percentage, typically 25%. **[*159]** *See* [*Microsoft*, 87 F. Supp. 2d] at 42 (citing *Findings of Fact* PP 258, 262, 289).

253 F.3d 34, 67-68. Grouping the first four of these actions together as "Microsoft's inducements," the appellate court held that these four actions **[**32]** merely "offered a consumer an attractive deal" and, therefore, could not be treated as anticompetitive. *253 F.3d 34, 68*. In contrast, the appellate court agreed with the district court that Microsoft's exclusive contracts with IAP's "are exclusionary devices, in violation of *§ 2* of the Sherman Act." *253 F.3d 34, 71*.

7. Agreements with Internet Content Providers ("ICPs"), Independent Software Vendors ("ISVs"), and Apple

The appellate court next considered Microsoft's "dealings with ICPs, which develop websites; ISVs, which develop software; and Apple, which is both an OEM and a software developer." *253 F.3d 34, 71*. The "deals" at issue in this portion of the case are grants of "free licenses to bundle IE with [the ICPs' and ISVs'] offerings" and the exchange **[**33]** of "other valuable inducements for [ICPs' and ISVs'] agreement to distribute, promote, and rely on IE rather than Navigator." *Id.* (quoting *Microsoft, 87 F. Supp. 2d at 42-43*) (brackets and quotation marks omitted). The district court held these agreements to be anticompetitive in violation of *§ 2* of the Sherman Act because they had the effect of "directly inducing developers to focus on [Microsoft's] own APIs rather than ones exposed by Navigator." *Id.* (quoting *Microsoft, 87 F. Supp. 2d at 42-43*) (quotation marks omitted).

At the outset of its analysis in this context, the appellate court concluded bluntly that "with respect to [Microsoft's] deals with ICPs, the District Court's findings do not support liability." *Id.* In contrast, the appellate court sustained the district court's finding of liability with regard to Microsoft's agreements with ISVs because Plaintiffs made "a *prima facie* showing that the deals have an anticompetitive effect," and Defendant did not successfully rebut this showing. *253 F.3d 34, 72*. In particular, the appellate court found that the exclusive provisions in these so-called "First Wave Agreements" **[**34]** with ISVs foreclosed a substantial share of the market for Navigator. *Id.*

Turning its attention in this context finally to Microsoft's relationship with Apple, the appellate court concluded that Microsoft's agreement with Apple was exclusionary in violation of *§ 2* of the *Sherman Act. 253 F.3d 34, 72-74*. The appellate court recounted that in mid-1997, Microsoft and Apple entered into an agreement which obligated Microsoft to continue to release "up-to-date " versions of its office productivity software for Apple's systems, Mac Office. *253 F.3d 34, 73* (quoting *Findings of Fact* PP 350-52). The agreement further obligated Apple to make IE the default browser. *Id*. (quoting *Findings of Fact* PP 350-52). Pursuant to this same agreement, Apple promised not to install Navigator during the "default installation," and not to "position icons for non[-]Microsoft browsing software on the desktop of new Macintosh PC systems or Mac OS upgrades." *Id.* (quoting *Findings of Fact* PP 350-52). Similarly, the agreement prohibited Apple "from encouraging users to substitute another browser for IE, and stated that Apple [would] 'encourage its employees to use **[**35]** IE.'" *Id.* (quoting *Findings of Fact* P 352) (brackets omitted). The appellate court concluded that "this exclusive deal between Microsoft and Apple had a substantial effect upon the distribution of rival browsers." *Id.* Given the absence of a "procompetitive justification for the exclusive dealing arrangement," the appellate court affirmed the district court's finding **[*160]** of *§ 2* liability based upon Microsoft's exclusive deal with Apple. *253 F.3d 34, 74*.

8. Java

---

[14] "PCs typically connect to the Internet through the services of Internet access providers ('IAPs'), which generally charge subscription fees to their customers in the United States." *Findings of Fact* P 15.

The appellate court grouped the next category of Microsoft conduct under the heading "Java" in reference to "a set of technologies developed by Sun Microsystems" ("Sun"). *Id.* The Java technologies are described as "another type of middleware posing a potential threat to Windows' position as the ubiquitous platform for software development." *Id.* (citing *Findings of Fact* P 28). The appellate opinion recounts that the district court identified four steps taken by Microsoft to "exclude Java from developing as a viable cross-platform threat: (a) designing a [Java Virtual Machine ("JVM") [15]] incompatible with the one developed by Sun; (b) entering into contracts, the so called 'First **[**36]** Wave Agreements,' requiring major ISVs to promote Microsoft's JVM exclusively; (c) deceiving Java developers about the Windows-specific nature of the tools it distributed to them; and (d) coercing Intel to stop aiding Sun in improving the Java technologies." *Id.* Of these actions, the appellate court concluded that all but the first action were anticompetitive in violation of *§ 2*. *253 F.3d 34, 74-78*. With regard to the first enumerated action, the incompatible JVM, the appellate court held that because the incompatible JVM did not have an anticompetitive effect which outweighed the procompetitive justification for the design, it could not provide a basis for antitrust liability. *253 F.3d 34, 75*.

[37]** Specifically, with regard to the First Wave Agreements, the appellate court observed that the district court had found the agreements, "although not literally exclusive . . . were exclusive in practice." *253 F.3d 34, 75*. Although the district court did not enter precise findings as to the effect of the First Wave Agreements upon rival Java distribution, the appellate court determined that "the record indicates that Microsoft's deals with the major ISVs had a significant effect upon JVM promotion." *Id.* In the absence of procompetitive justification, the appellate court imposed liability for this aspect of the First Wave Agreements. *Id.* at 76.

As to the Java developer tools, the appellate court's imposition of liability focused not upon the fact that the tools created programs which were not cross platform, but upon the fact that Microsoft deceived software developers about the Windows-specific nature of the tools. *253 F.3d 34, 76-77*. The appellate court found that Microsoft's deception was intentional and without procompetitive explanation. *253 F.3d 34, 77*. As a result, the appellate court imposed liability for Microsoft's deception. **[**38]** *Id.*

9. Intel

As noted above, the appellate court's final imposition of liability arose out of a "threat" by Microsoft directed at Intel. *253 F.3d 34, 77*. "Intel is [a firm] engaged principally in the design and manufacture of microprocessors." *Findings of Fact* P 95. A segment of Intel's business develops **[*161]** software, with the primary focus upon "finding useful ways to consume more microprocessor cycles, thereby stimulating demand for advanced Intel microprocessors." *Id.* The appellate court recounted that in 1995, Intel was in the process of "developing a high performance, Windows-compatible JVM." *Microsoft, 253 F.3d at 77*. Furthering its efforts to combat the cross-platform threat of Java to the Windows platform, Microsoft repeatedly "urged Intel not to help Sun by distributing Intel's fast, Sun compliant JVM." *Id.* Eventually, Microsoft "threatened Intel that if it did not stop aiding Sun . . . then Microsoft would refuse to distribute Intel technologies bundled with Windows." *Id.* Intel capitulated after Microsoft threatened to support an Intel competitor, AMD, if Intel's efforts with Java continued. *Id.*

The appellate **[**39]** court acknowledged Microsoft's anticompetitive intent, as well as the anticompetitive effect of Microsoft's actions toward Intel. *Id.* Microsoft did not offer a procompetitive justification for its treatment of Intel, but "lamely characterized its threat to Intel as 'advice.'" *Id.* Rejecting the characterization of Microsoft's threat as mere "advice," the appellate court found the district court's imposition of liability to be supported by both fact and law. *253 F.3d 34, 77-78*. On this basis, the appellate court imposed *§ 2* liability for Microsoft's threat to Intel.

---

[15] "The Java technologies include: (1) a programming language; (2) a set of programs written in that language, called the 'Java class libraries,' which expose APIs; (3) a compiler, which translates code written by a developer into 'bytecode'; and (4) a Java Virtual Machine ('JVM'), which translates bytecode into instructions to the operating system. [*Findings of Fact*] P 73. Programs calling upon the Java APIs will run on any machine with a 'Java runtime environment,' ['JRE'] that is, Java class libraries and a JVM. ***Id. PP 73, 74***." *Microsoft, 253 F.3d at 74*. The terms "JRE" and "JVM" are sometimes used interchangeably to refer to the Java platform. The court uses the term JVM throughout this Memorandum Opinion for that purpose.

Corresponding to the above-described imposition of liability pursuant to *§ 2* of the Sherman Act, the appellate court imposed liability upon Microsoft for violations of the relevant state law counterparts of" the *Sherman Act. 253 F.3d 34, 46*. Beyond these findings, the appellate court did not find Microsoft liable for any additional antitrust violations. Specifically, the appellate court reversed the district court's conclusion that Microsoft's "course of conduct" as a whole constitutes a separate violation of *§ 2*. *253 F.3d 34, 78*. In addition, the appellate court rejected the district **[**40]** court's finding of attempted monopolization and remanded the *§ 1* tying claim for further proceedings at the district court level. [16] Plaintiffs opted not to pursue the tying claim on remand. [17] Joint Status Report (Sept. 20, 2001) at 2.

10. Vacating the District Court's Order of Remedy

Following its review **[**41]** of the district court's conclusions with regard to liability, the appellate court considered the district court's choice of remedy. Over the objection of Defendant Microsoft, the district court decided to consider the merits of Plaintiffs' remedy proposal in the absence of an evidentiary hearing. *Microsoft, 253 F.3d at 98-99*; *see also Microsoft, 97 F. Supp. 2d at 61*. The district court did so based on the rationale that Microsoft's evidentiary proffers largely concerned "testimonial predictions about future events" which would be of little use to the court in identifying an "optimum remedy." *Microsoft, 253 F.3d at 99* (quoting *Microsoft, 97 F. Supp. 2d at 62*). Based upon its finding of liability for illegal monopoly maintenance, attempted monopolization, **[*162]** and illegal tying, the district court entered a remedy "nearly identical to plaintiffs' proposal" mandating the divestiture of Microsoft Corporation into an "Operating Systems Business" and an "Applications Business." *253 F.3d at 99-100* (quoting *Microsoft, 97 F. Supp. 2d at 64*). The original decree entered by the district court, often referred **[**42]** to as the Initial Final Judgment ("IFJ"), also included a number of "interim restrictions on Microsoft's conduct." *253 F.3d 34, 100*. The interim restrictions included, *inter alia*, mandatory disclosure "to third-party developers the APIs and other technical information necessary to ensure that software effectively interoperates with Windows," *id.* (describing IFJ § 3.b), a prohibition on Microsoft's ability to enter into contracts which oblige third parties to limit their "'development, production, distribution, promotion, or use of, or payment for' non-Microsoft platform level software," *id.* (quoting IFJ § 3.e), and a "'Restriction on Binding Middleware Products to Operating System Products' unless Microsoft also offers consumers 'an otherwise identical version' of the operating system without the middleware," *id.* (quoting IFJ § 3.g).

The appellate court found three fundamental flaws in the district court's order of remedy, each of which alone justified vacating the remedial decree. The appellate court first concluded that the failure to hold an evidentiary hearing in the face of disputed facts concerning the remedy violated the "cardinal principle of **[**43]** our system of justice that factual disputes must be heard in an open court and resolved through trial-like evidentiary proceedings." *253 F.3d at 101*. The appellate court rejected the district court's conclusion that evidentiary proceedings would not be useful, noting that "a prediction about future events is not, as a prediction, any less a factual issue." *253 F.3d 34, 102*. Moreover, noted the appellate court, "drafting an antitrust decree by necessity 'involves predictions and assumption concerning future economic and business events.'" *Id.* (quoting *Ford Motor Co . v. United States., 405 U.S. 562, 578)*.

In addition to the failure to hold an evidentiary hearing, the appellate court faulted the district court for its "failure to provide an adequate explanation for the relief it ordered." *253 F.3d at 103*. Finding the trial court's devotion of "a mere four paragraphs of its order to explaining its reasons for the remedy" insufficient, the appellate court observed that the initial remedy was not accompanied by an explanation of the manner in which the remedy would

---

[16] Plaintiffs' complaint also included a separate claim of "monopoly leveraging" under *§ 2* of the Sherman Act. Judge Jackson granted summary judgment in favor of Microsoft as to this claim on the grounds that the theory runs "contrary to both economic theory and the Sherman Act's plain language." *United States v. Microsoft, 1998 U.S. Dist. LEXIS 14231, 1998 WL 614485*, at * 27 (D.D.C. Sept. 14, 1998).

[17] Plaintiffs' tying claim alleged that "Microsoft's contractual and technological bundling of the IE Web browser (the 'tied' product) with its Windows operating system ('OS') (the 'tying' product) resulted in a tying arrangement that was per se unlawful." *Microsoft, 253 F.3d at 84*.

accomplish the objectives of a remedial decree in an antitrust case. *Id.* In this regard, the appellate **[**44]** court recited that "a remedies decree in an antitrust case must seek to 'unfetter a market from anticompetitive conduct,' *Ford Motor Co.*, 405 U.S. at 577, to 'terminate the illegal monopoly, deny to the defendant the fruits of its statutory violation, and ensure that there remain no practices likely to result in monopolization in the future,' [*United Shoe, 391 U.S. at 250*]." *Id.* (internal citations in original).

Lastly, the appellate court concluded that the substantial modifications to the liability imposed by the district court merited a new determination of the remedy for the surviving antitrust violations. In particular, the appellate court noted that of the three original findings of liability, only liability for illegal monopoly maintenance in violation of *§ 2* of the Sherman Act had survived, and even this aspect of liability had been modified. *253 F.3d at 103-04*. The appellate court determined that where "sweeping equitable relief is employed to remedy multiple violations, and some-indeed most-of the findings of remediable violations do not withstand scrutiny" the **[*163]** remedy decree must be vacated because there no longer exists a rational **[**45]** connection between the liability imposed and the remedy ascribed thereto. *253 F.3d at 105*. Accordingly, the appellate court remanded the case for this Court to resolve any factual disputes surrounding a remedy and for this Court to exercise its "broad discretion" in imposing the "relief it calculates will best remedy the conduct . . . found to be unlawful." *Id.*

11. Causation and Remedy

In its appeal, Microsoft "urged" the circuit court to "reverse on the monopoly maintenance claim, because Plaintiffs never established a causal link between Microsoft's anticompetitive conduct, in particular its foreclosure of Netscape's and Java's distribution channels, and the maintenance of Microsoft's operating system monopoly." *253 F.3d at 78*. Relying heavily on the treatise on ***antitrust law*** authored by Phillip E. Areeda and Herbert Hovenkamp, the appellate court determined that liability in this case could be established through an "inference" of causation. *253 F.3d at 79* (citing 3 PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** P 651c, at 78 (1996)). Applying this "rather edentulous test for causation" the appellate court identified two relevant inquiries, the satisfaction of **[**46]** which would result in liability:

> (1) whether as a general matter the exclusion of nascent threats is the type of conduct that is reasonably capable of contributing significantly to a defendant's continued monopoly power and (2) whether Java and Navigator reasonably constituted nascent threats at the time Microsoft engaged in the anticompetitive conduct at issue.

Id. On the record from the district court, the appellate court readily concluded that both inquiries had been satisfied and that liability must be imposed. *Id.*

The appellate court noted, however, that "Microsoft's concerns over causation have more purchase in connection with the appropriate remedy issue, *i.e.*, whether the court should impose a structural remedy or merely enjoin the offensive conduct at issue." *253 F.3d at 80*. Again relying upon Areeda and Hovenkamp, the appellate court focused upon the structural remedy that had been imposed by Judge Jackson and identified a relationship between the evidence of causation and the imposition of "radical structural relief":

> As we point out later in this opinion, divestiture is a remedy that is imposed only with great caution, in part because **[**47]** its long-term efficacy is rarely certain. Absent some measure of confidence that there has been an actual loss to competition that needs to be restored, wisdom counsels against adopting radical structural relief. *See* 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 653b, at 91-92 ("More extensive equitable relief, particularly remedies such as divestiture designed to eliminate the monopoly altogether, raise more serious questions and require a clearer indication of a significant causal connection between the conduct and creation or maintenance of the market power.").

Id. (internal citation omitted). Later in the opinion, the appellate court again quoted from Areeda and Hovenkamp, highlighting the need for "a clearer indication of a *significant causal connection* between the conduct and creation or maintenance of the market power" where the remedy is structural relief. *253 F.3d at 106* (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 653b, at 9192) (emphasis added by appellate court). The appellate court instructed that in the absence of "a sufficient causal connection between Microsoft's anticompetitive conduct and its dominant position in the OS market . . . the antitrust **[*164]** defendant's **[**48]** unlawful behavior should be remedied by 'an injunction against the continuation of that conduct.'" *Id.* (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 650a, at 67).

In effect, the appellate court appears to have identified a proportionality between the severity of the remedy and the strength of the evidence of the causal connection. Accordingly, ***HN6***[] the "mere existence of an exclusionary act does not itself justify full feasible relief against the monopolist to create maximum competition." *Id.* (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 650a, at 67). Similarly, because structural relief is "designed to eliminate the monopoly altogether," 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW*** P 650a, at 67, "wisdom counsels against adopting radical structural relief" in the "absence of some measure of confidence that there has been an actual loss to competition that needs to be restored," *id.* Instead, the court crafting a remedy must assess the strength of the causation evidence that established liability and "tailor" the relief accordingly. *Microsoft, 253 F.3d at 107*.

As the Court recounted above, the United States, along with nine State Plaintiffs, reached an agreement on **[**49]** the issue of remedy. As a result, these Plaintiffs opted not to litigate further the issue of remedy. The United States proceeded to seek approval of the settlement agreement and the entry of the agreement as the final judgment in this case pursuant to the Tunney Act, *15 U.S.C. § 16(b)-(h)*. Having determined that the issue is ripe for the Court's consideration, the Court addresses the proposed final judgment and the public interest in the paragraphs below.

B. Second Revised Proposed Final Judgment

The Second Revised Proposed Final Judgment (SRPFJ) which the parties seek to have entered as a final judgment in this case sets forth a number of restrictions upon Microsoft's conduct which are intended to remedy the effects of Microsoft's anticompetitive behavior. Section III of the SRPFJ, entitled "Prohibited Conduct," contains the substance of these restrictions, organized into subsections by letters. SRPFJ § III.A-J. Sections III.A, B, and F can be grouped together according to the similarity of their terms and the manner in which the terms compliment each other. Each of these sections restricts Microsoft's ability to utilize its market power as **[**50]** a means, via retaliation and coercion, to protect its monopoly.

1. Anti-Retaliation and Uniform Licenses

Section III.A bars Microsoft from "retaliation" against OEMs by altering its commercial relationship with that OEM or "withholding newly introduced forms of non-monetary Consideration . . . from that OEM" in certain circumstances. *Id.* § III.A. In particular, the provision bars retaliation where Microsoft knows the OEM "is or is contemplating":

> 1. developing, distributing, promoting, using, selling, or licensing any software that competes with Microsoft Platform Software or any product or service that distributes or promotes any Non-Microsoft Middleware;
> 2. shipping a Personal Computer that (a) includes both a Windows Operating System Product and a non-Microsoft Operating System, or (b) will boot with more than one Operating System; or
> 3. exercising any of the options or alternatives provided for under this Final Judgment.

SRPFJ § III.A. The provision further requires Microsoft to provide written notice **[*165]** to a "Covered OEM" [18] and at least "thirty days' opportunity to cure" prior to termination of that OEM's Windows Operating System Product **[**51]** license. *Id.* However, where Microsoft has already provided "two or more such notices during the term of [the Covered OEM's] Window's Operating System Product License," Microsoft is not obligated to provide "such a termination notice and opportunity to cure." *Id.*

There are two exceptions to subsection A. First, and without controversy, the provision shall not be construed to "prohibit Microsoft from enforcing any provision of any license with any OEM or intellectual property right that is not

---

[18] "Covered OEMs" is a defined term. Pursuant to § VI.D, "'Covered OEMs' means the 20 OEMs with the highest worldwide volume of licenses of Windows Operating System Products reported to Microsoft in Microsoft's fiscal year preceding the effective date of the Final Judgment." SRPFJ § VI.D.

inconsistent with the Final Judgment." *Id.* Second, and more significantly, the provision does not prohibit Microsoft from "providing Consideration to any OEM with respect to any Microsoft product or service where that Consideration **[**52]** is commensurate with the absolute level or amount of that OEM's development, distribution, promotion or licensing of that Microsoft product or service." *Id.*

The United States identifies § III.A as a provision broadly drawn so as to "ensure[] that OEMs have contractual and economic freedom to make decisions about distributing and supporting non-Microsoft middleware products without fear of coercion or retaliation by Microsoft." United States Mem. in Support of the RPFJ (hereinafter cited as "United States Mem.") at 57. Section III.A focuses on OEMs because of the significance of the OEM channel as a means of distributing rival middleware and operating systems. *Id.* The exception in § III.A for consideration commensurate with the promotion of or other similar support for Microsoft's products is intended to preserve "permissible collaborations between an OEM and Microsoft to promote Microsoft products and services." United States Response to Public Comments (hereinafter cited as "United States Resp.") at 78. For example, explains the government, "an OEM that collaborates with Microsoft on developing a particular product through extensive testing, or offers advertising or other **[**53]** promotion, may be compensated for its greater role through a higher level of Consideration for that product than one that is not developing or supporting that product." *Id.* Given this reasoned explanation, the Court concludes that the exception in § III.A for compensation commensurate with an OEM's promotion or similar support for a Microsoft product is appropriately tailored to permit procompetitive agreements between Microsoft and OEMs.

a. "Microsoft Platform Software"

The Court pauses its discussion of § III.A at this point to examine the term "Microsoft Platform Software," which is the first of a number of carefully defined terms used throughout the SRPFJ. The proposed final judgment defines Microsoft Platform Software as the combination or alternative of two other defined terms. *See* SRPFJ § VI.L. "'Microsoft Platform Software' means (i) a Windows Operating System Product and/or (ii) a Microsoft Middleware Product." *Id.* Each of the two terms used in the definition of "Microsoft Platform Software" raises its own definitional issues, with the more complex issues arising in conjunction with latter of the two. Accordingly, the Court will examine each definition **[**54]** in turn.

[*166] ***i. Windows Operating System Product***

The SRPFJ defines a "Windows Operating System Product" as

> the software code (as opposed to source code) distributed commercially by Microsoft for use with Personal Computers as Windows 2000 Professional, Windows XP Home, Windows XP Professional, and successors to the foregoing, including the Personal Computer versions of the products currently code named "Longhorn" and "Blackcomb" and their successors, including upgrades, bug fixes, service packs, etc. The software code that comprises a Windows Operating System Product shall be determined by Microsoft in its sole discretion.

SRPFJ § VI.U. Controversy swirls around the SRPFJ's definition of "Windows Operating System Product" largely because of the final sentence in the definition, which leaves to Microsoft's discretion the determination of which code shall comprise a Windows Operating System Product. This controversy, to quote the Immortal Bard, is really "much ado about nothing." The criticism of this aspect of the definition arises from an interpretation which views the final sentence as a form of absolution for Microsoft from any liability for the illegal tying **[**55]** of two distinct products based upon the design of its Windows operating system product. Such criticism is misplaced.

The definitions in the final judgment in this case do not possess the power to alter the application of the antitrust laws to Microsoft's conduct or its products. The power to determine which software code constitutes a "Windows Operating System Product" for purposes of the SRPFJ cannot logically be viewed as a grant of special rights or immunity from prosecution under the antitrust laws for illegal tying. Quite simply, the code that Microsoft identifies as a "Windows Operating System Product" has no impact upon the ability of the Department of Justice, or any future plaintiff, to allege that the product identified as a "Windows Operating System Product" for purposes of the SRPFJ is an illegal amalgamation of two separate products under *§ 1* of the Sherman Act. Likewise, the definition of "Windows Operating System Product" in the SRPFJ cannot curtail the ability of a court to determine that

Microsoft has illegally tied two products which are separate under the antitrust laws. Instead, the definition merely recognizes that, as a practical matter, Microsoft retains the **[**56]** power to determine which software code it will include in the products marketed as "Windows."

The definition of "Windows Operating System Product" is similarly misunderstood as enabling Microsoft to somehow manipulate which code is included in the definition in order to avoid classification as a "Microsoft Middleware Product." According to this misreading of the definition, Microsoft could avoid inclusion of a particular piece of code within the definition of "Microsoft Middleware Product," SRPFJ § VI.K, by simply declaring that the code is part of a "Windows Operating System Product." The fatal flaw in this reading of the definition is the presumption that "Microsoft Middleware Product" and "Windows Operating System Product" are mutually exclusive terms; that is not the case. Software code can simultaneously fall within both the "Windows Operating System Product" and "Microsoft Middleware Product" definitions. *Id.* § VI.K, U. Once again, therefore, the definition of "Windows Operating System Product" merely recognizes that Microsoft, as the distributor of a product called "Windows," has the discretion to determine which code to include in its distribution of that product.

[57] [*167]** ***ii. "Microsoft Middleware Product***"

As recounted above, the latter portion of the definition of "Microsoft Platform Software" rests upon the definition of "Microsoft Middleware Product." In the SRPFJ, "Microsoft Middleware Product" means:

> 1. the functionality provided by Internet Explorer, Microsoft's Java Virtual Machine, Windows Media Player, Windows Messenger, Outlook Express and their successors in a Windows Operating System Product, and
> 2. for any functionality that is first licensed, distributed or sold by Microsoft after the entry of this Final Judgment and that is part of any Windows Operating System Product
>
> > a. Internet browsers, email client software, networked audio/video client software, instant messaging software or
> > b. functionality provided by Microsoft software that --
> > i. is, or in the year preceding the commercial release of any new Windows Operating System Product was, distributed separately by Microsoft (or by an entity acquired by Microsoft) from a Windows Operating System Product;
> > ii. is similar to the functionality provided by a Non-Microsoft Middleware Product; and
> > iii. is Trademarked. [19]

Functionality **[**58]** that Microsoft describes or markets as being part of a Microsoft Middleware Product (such as a service pack, upgrade, or bug fix for Internet Explorer), or that is a version of a Microsoft Middleware Product (such as Internet Explorer 5.5), shall be considered to be part of that Microsoft Middleware Product.

SRPFJ § VI.K. The first portion of this definition captures various types of functionality provided by one of a set of existing, named products and their successors. The functionalities in this list go beyond the functionality provided by the Java technologies and Netscape's Navigator, the middleware technologies which were the focus of the liability findings in this case, and include a broad range of existing middleware technologies.

---

[19] Trademarked is defined in the SRPFJ to have the following meaning:

> distributed in commerce and identified as distributed by a name other than Microsoft (R) or Windows (R) that Microsoft has claimed as a trademark or service mark by (i) marking the name with trademark notices, such as (R) or TM, in connection with a product distributed in the United States; (ii) filing an application for trademark protection for the name in the United States Patent and Trademark Office; or (iii) asserting the name as a trademark in the United States in a demand letter or lawsuit. Any product distributed under descriptive or generic terms or a name comprised of the Microsoft (R) or Windows (R) trademarks together with descriptive or generic terms shall not be Trademarked as that term is used in this Final Judgment. Microsoft hereby disclaims any trademark rights in such descriptive or generic terms apart from the Microsoft (R) or Windows (R) trademarks, and hereby abandons any such rights that it may acquire in the future.

SRPFJ § VI.T.

[59]** The latter portion of the definition enables inclusion in the decree of future technologies, provided the new technologies meet certain requirements. To fall within the prescient portion of the definition, the software code must first be distributed as part of any "Windows Operating System Product," the definition of which the Court discussed above. *Id.* The rationale for this requirement is quite clear, as Windows is Microsoft's product in the monopoly market. If the Microsoft software has not been included in Windows, it lacks a fundamental relationship to the theory and imposition of liability in this case. The second **[*168]** element of such future functionality is that it must also be distributed separately from a Windows Operating System Product. The government's rationale for this requirement derives from its view that the "competitive significance of middleware products such as browsers and media players will be relatively small if they are not distributed in any form separate from a Windows Operating System Product." United States Resp. at 44. This view results from the fact that, absent separate distribution, Microsoft will remain unable to reach the "large installed base of Windows **[**60]** machines" and can only impact users willing to upgrade to new versions of the operating system. *Id.* Even then, Microsoft releases new operating systems at fairly long intervals and, in the absence of separate distribution, will be unable to update and release new versions of products provided originally with the operating system. *Id. at 44-45*. Therefore, according to the government, the competitively significant middleware portions of Windows, of necessity, will be distributed separately.

The third element of the definition is based upon yet another defined term requiring that the "Microsoft Middleware Product" provide similar functionality to that provided by a "NonMicrosoft Middleware Product." SRPFJ § VI.K. In this instance, the definition of "NonMicrosoft Middleware Product" [20] is indisputably broad, incorporating anything which can be reasonably identified as "middleware" and which has achieved a certain level of popularity. *Id.* § VI.N.

[61]** Finally, the requirement that Microsoft trademark the future functionality derives from the government's recognition of the "business reality that Microsoft often names and markets the technologies that it wishes developers and consumers to adopt." United States Resp. at 53. The government further explains that, in its view, "Microsoft has little incentive to bury its new products inside other applications in order to avoid having it meet the Trademark standard." *Id.* These explanations address and rebut to the Court's satisfaction criticisms of the "trademarked" requirement in the definition of "Microsoft Middleware Product."

b. Anti-Retaliation: Original Equipment Manufacturers ("OEMs")

Having examined the various components of the definition of "Microsoft Platform Software," the Court returns to its original inquiry into the effect of § III.A. The government asserts, and the Court sees little basis to disagree, that § III.A will prevent Microsoft from hindering an OEM's ability to choose to support products which have the capacity to threaten Microsoft's operating system monopoly. Contrary to some criticism, the Court regards the limited scope of this provision, **[**62]** in that it addresses only competition relative to Microsoft's dominant role as a platform for applications, as entirely appropriate given the middleware theory of liability pursued in this case. *See generally* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. The Court further regards § III.A as presenting clear and enforceable terms.

The only lingering concern held by the Court is that § III.A does nothing to prevent **[*169]** Microsoft from making threats of retaliation. The factual findings and liability in this case evidence that Microsoft has used not only actual retaliation, but threats of retaliation in coercing certain kinds of behavior. *See, e.g.*, *id. at 77-78* (discussing Microsoft's "threat to Intel"). Given the power Microsoft wields as a monopolist, it would be appropriate to prohibit Microsoft from stifling competition with threats of bad treatment. The United States explains the absence of any ban

---

[20] The SRPFJ defines "Non-Microsoft Middleware" as

> a non-Microsoft software product running on a Windows Operating System Product (i) that exposes a range of functionality to ISVs through published APIs, and that could, if ported to or made interoperable with, a non-Microsoft Operating System, thereby make it easier for applications that rely in whole or in part on the functionality supplied by that software product to be ported to or run on that non-Microsoft Operating System, and (ii) of which at least one million copies were distributed in the United States within the previous year.

SRPFJ § VI.N.

on threats rather logically, noting that where the retaliation itself is prohibited, any threat of retaliation is empty and, therefore, without power. United States Resp. at 75. While a rational explanation, the Court regards a ban on threats of retaliation, at a minimum, **[**63]** as more comforting to business entities dealing with Microsoft when making decisions about supporting Microsoft competitors. Nevertheless, it is a far cry from making a "mockery of judicial power" that the remedy in this case does not include a ban on threats of retaliation. *Microsoft, 56 F.3d at 1462*. Accordingly, this criticism matters little in the Court's assessment of the public interest, as ***HN7***[] a consent decree need not reflect the Court's own choice of a remedy, but instead, giving due respect to the government's view of the effect of the remedial proposal, need only reflect a certain consonance with the liability allegations, or more appropriately in this case, the liability findings. *See* *id.at 1461*.

c. Anti-Retaliation: Independent Software Vendors ("ISVs") and Independent Hardware Vendors ("IHVs")

Section III.F mirrors § III.A to some extent, in that it too prohibits retaliation, but § III.F applies to Microsoft's conduct towards ISVs and IHVs. SRPFJ § III.F. Pursuant to § III.F.1:

> Microsoft shall not retaliate against any ISV or IHV because of that ISV's or IHV's:
>
> a. developing, using, distributing, promoting or **[**64]** supporting any software that competes with Microsoft Platform Software or any software that runs on any software that competes with Microsoft Platform Software, or
> b. exercising any of the options or alternatives provided for under this Final Judgment.

Id. § III.F.1. Inasmuch as § III.F.1 mirrors § III.A, criticism with regard to the absence of a ban on threats of retaliation is equally applicable. For the reasons discussed with regard to § III.A, however, the Court need not tarry long on the absence of such a prohibition. In all other respects, the protections in § III.F reflect the liability findings against Microsoft for retaliating against ISVs and IHVs. *See* *Microsoft, 253 F.3d at 72-73* (discussing Microsoft's dealings with Apple), 77-78 (describing Microsoft's "threat to Intel" [21]). Furthermore, because § III.F.1 prohibits retaliation responsive to IHVs' or ISVs' support for software which "competes" with not only "Microsoft Platform Software," but "any software that runs on software that competes with Microsoft Platform Software," its protections are broadly drawn. SRPFJ § III.F.1. Simultaneously, however, § III.F.1 remains appropriately **[**65]** grounded in its reflection of the monopoly market in this case and does **[*170]** not stray inappropriately into markets unrelated to the market in which liability was imposed. *Id.* The Court observes, in this regard, that there is little justification for protection against retaliation for software which does not "compete" with the monopoly product or run on software which "competes" with the monopoly product. The Court, therefore, finds that the protections afforded by § III.F.1 are appropriately drawn so as to advance the public interest.

d. Uniform Licenses

Section III.B is said to strengthen § III.A by mandating that Microsoft provide uniform license terms to Covered OEMs. SRPFJ § III.B. The uniform royalties are to be established in a schedule, which is accessible **[**66]** to Plaintiffs and the covered OEMs. *Id.* Notwithstanding the general uniformity of the licenses, Microsoft may provide volume discounts based upon the volume of the OEM's licenses of a Windows Operating System Product or group of such products. *Id.* § III.B.2. The licenses may also include discounts so long as the discounts are uniform among the Covered OEMs. [22] *Id.* § III.B.3. The discounts must also be based on objective, verifiable criteria and may not be inconsistent with other portions of the SRPFJ. *Id.* This section simplifies the complex royalty licenses so as to prevent Microsoft from using the license terms as a means by which to coerce and control the OEMs into favoring Microsoft products. United States Mem. at 57. Still, the provision is limited such that larger OEMs may, quite reasonably, receive different treatment than some of the smaller OEMs. *Id.*

---

[21] In the *Findings of Fact*, Judge Jackson noted that Intel is both an IHV and an ISV. *Findings of Fact* P 95 ("Although Intel is engaged principally in the design and manufacture of microprocessors, it also develops some software.").

[22] However, Microsoft may establish a two tiered discount schedule, one for the ten largest Covered OEMs, and another for the eleventh through the twentieth Covered OEMs. SRPFJ § III.B.3.a.

[67]** The strongest criticism of § III.B argues that it should forbid Microsoft's practice of using market development allowances ("MDAs") and other discounts. Vociferous though this criticism may be, it ignores the fact that there is no liability in this case which regards the use of MDAs themselves, or in conjunction with other anticompetitive behavior, to be an antitrust violation. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. Quite to the contrary, the United States takes the view that MDAs and similar discounts, when not misused, constitute "efficient behavior that has little or no potential to be used by Microsoft for anticompetitive purposes." United States Resp. at 81. Other provisions of the SRPFJ protect against the potential for misuse of MDAs, via retaliation or selective rewarding, such that there is little justification, and certainly no necessity, for a ban on Microsoft's use of MDAs and other discounts. Moreover, MDAs and similar discounts are prohibited any time they are inconsistent with any other term of the SRPFJ. SRPFJ § III.B.3.

By mandating uniformity, the SRPFJ sacrifices the ability of OEMs to negotiate the most favorable terms. The Court recognizes that despite **[**68]** the obvious benefit to be gained by uniformity in licenses, undoubtedly, there are some which would be happier with the freedom to negotiate. Yet, ***HN8***[] the Tunney Act, and the case law which follows, dictate that it is for the United States to weigh the benefits of such a trade in the first instance, and that, barring a breach of duty in consenting to the decree, *Bechtel, 648 F.2d at 666*, the Court should respect the government's "predictions as to the effect of the proposed remedy." *Microsoft, 56 F.3d at 1461*. Adhering to this guidance, the Court cannot say that the imposition of uniform licenses and the preservation of Microsoft's ability to utilize MDAs and **[*171]** similar discounts approach a breach of duty by the government.

In sum, the Court finds the above-described provisions in the SRPFJ to be an effective means of protecting against Microsoft's utilization of its monopoly position to retaliate against companies that choose to support products that have the capacity to threaten Microsoft's monopoly. In particular, the Court finds that the definitions discussed in this section, though they appear throughout the SRPFJ, namely "Windows Operating System Product, **[**69]** " "Microsoft Middleware Product," and "Microsoft Platform Software," comport with the theory of liability in this case and, in many instances, exceed the actual scope of the liability in some ways, such that a number of products not directly involved in Microsoft's anticompetitive conduct are addressed in the proposed final judgment. The Court finds that, to the extent that these definitions encompass products beyond the scope of the liability findings, such breadth is appropriate, and likely necessary, to ensure that the anticompetitive conduct ceases and to prevent its reoccurrence. *See* *Bechtel, 648 F.2d at 666* ***HN9***[] ("It is not contrary to the public interest, as contemplated by the [Tunney Act], to enter a decree that is not necessary, or that grants relief to which the government might not be strictly entitled. The public does not suffer because [the defendant] consented to limitations on its activities that could not otherwise be imposed.").

2. Flexibility in OEM Licenses

a. Icons, Shortcuts, and Menu Entries

Unlike Sections III.A and III.B, which bear a more general relation to the liability findings, the conduct enjoined in § III.C correlates **[**70]** closely to Microsoft practices which were found to violate *§ 2* of the Sherman Act. Rather than a blanket prohibition on the license restrictions which were found to be anticompetitive, § III.C provides substantial, though not absolute, flexibility to OEMs in configuring personal computers. Subsection C.1 prohibits restriction on an OEM's installation and display of icons, shortcut, and menu entries for any "Non-Microsoft Middleware or any product or service . . . that distributes, uses, promotes, or supports any Non-Microsoft Middleware, . . . anywhere . . . in a Windows Operating System Product where a list of icons, shortcuts, or menu entries for applications are generally displayed." SRPFJ § III.C.1. Section VI.M. defines "Non-Microsoft Middleware" broadly as:

> a non-Microsoft software product running on a Windows Operating System Product that exposes a range of functionality to ISVs through published APIs, and that could, if ported to or made interoperable with, a non-Microsoft Operating System, thereby make it easier for applications that rely in whole or in part on the functionality supplied by that software product to be ported to or run on that non-Microsoft Operating **[**71]** System.

Id. § VI.M. Excluded from the mandated flexibility in § III.C.1 is Microsoft's ability to limit the icons, shortcuts, or menu entries placed in a particular area according to the functionality provided by the product, so long as the limitation is non-discriminatory with respect to Microsoft and non-Microsoft products. *Id.* § III.C.1. In practical terms, this limitation means, for example, that if Microsoft has created a menu list for software providing email capability, the OEM is not free to configure Windows to place icons for programs which do not provide email capability in that area. This limitation is intended to balance Microsoft's concerns with protecting consumer clarity and the provision of OEM flexibility. United States Resp. at 89-90. The government notes that the **[*172]** prohibition on discrimination in the application of this exception prevents Microsoft from "prescribing the functionality so narrowly that it becomes, in effect, discriminatory." *Id. at 91*. Likewise, the non-discrimination language precludes Microsoft from "completely forbidding the promotion or display of a particular Non-Microsoft Middleware Product on the ground that Microsoft **[**72]** does not have a competing product itself." *Id.* "To do so," explains the government, "would be discriminatory." *Id.*

The Court has reviewed the common complaint of some individuals and entities filing comments that the term "functionality" used in SRPFJ § III.C.1 is too vague to be enforced. In short, the Court disagrees. Admittedly the term is broad and somewhat flexible, but in this area of technology, overly restrictive terminology will prove useless as the technology continues to evolve. Therefore, the Court takes the view that the phrase "particular types of functionality" carries sufficient meaning to be applied effectively and without confusion. SRPFJ § III.C.1. Section III.C.1 provides flexibility in product configuration while preserving for Microsoft control over the appearance of its product at the outermost edges. The core freedom of configuration provided in § III.C.1 far outweighs the limited exception to this freedom where such configuration works a bizarre and unjustified result. Accordingly, the Court takes the view that § III.C.1 will redress the illegal conduct, promote competition, and further the public interest.

b. Size and Shape of Icons

[73]** Section III.C.2. enables installation and display of shortcut icons of any size or shape, provided the shortcut "does not impair the functionality of the user interface." *Id.* § III.C.2. This provision, like the one described above, provides OEM flexibility, while eliminating the most extreme manifestations of that flexibility. Once again the central complaint about subsection C.2 involves an allegation of vagueness. Some individuals and entities argue that there is insufficient clarity in what it means to "impair the functionality of the user interface." *Id.*

The appellate court displayed a certain limited respect for Microsoft's configuration of the user interface when it held that the prevention of "drastic alteration of Microsoft's copyrighted work" was a valid basis for one of Microsoft's license restrictions. *Microsoft, 253 F.3d at 63*. At the same time, the appellate court rejected Microsoft's general claim that its license restrictions "merely prevent OEMs from taking actions that would reduce substantially the value of Microsoft's copyrighted work." *Id.* The exception in § III.C.2 for alterations which "impair the functionality" of the user interface **[**74]** attempts to strike a balance between these polar examples. In the Court's view, there is no ambiguity in the language of § III.C.2, and the Court cannot say that its effect is inconsonant with the liability in this case. Quite to the contrary, this provision appears to strike the appropriate balance between OEM freedom, Microsoft's interests in protecting the functionality of its product against drastic alteration, and the appellate court's imposition of liability.

c. Automatically Launched Software

Section III.C.3 concerns licensing restrictions which are oddly reminiscent of restrictions for which the appellate court did not impose antitrust liability, namely the automatic launch of an alternative user interface at the conclusion of the boot sequence. *Id.* The appellate court observed that the automatic launch of software which replaces the Microsoft user interface worked a "drastic alteration" of Microsoft's copyrighted product, while Microsoft's restriction had only a "marginal anticompetitive **[*173]** effect." *Id.* As a result, the appellate court rejected the imposition of liability for Microsoft's prohibition in its OEM licenses of this practice. *Id.* Notwithstanding **[**75]** this similarity, § III.C.3. applies to more than the automatic launch of an alternative user interface, regulating the automatic launching of any non-Microsoft Middleware Product "at the conclusion of the initial boot sequence or subsequent boot sequences, or upon connection to or disconnections from the Internet" without regard to whether such automatically launched product disturbs the Microsoft user interface. SRPFJ § III.C.3. This provision protects automatic launching of Non-Microsoft Middleware Products only where "a Microsoft Middleware Product that provides similar functionality would otherwise be launched automatically at that time" and imposes stringent limitations upon such automatic launching. *Id.* Where such Non-Microsoft Middleware is permitted to automatically launch, § III.C.3. requires that the middleware either provide no user interface or a user interface that resembles the corresponding Microsoft Middleware Product interface. *Id.*

In response to complaints regarding the restrictive nature of § III.C.3, the United States invokes the D.C. Circuit's rejection of liability for the automatic launching of an alternative user interface as a justification for **[**76]** the limitations in that provision. *Microsoft, 253 F.3d at 63*. As explained by the United States, this provision attempts to strike a balance between Microsoft's interest in "preventing unjustified drastic alterations to its copyrighted work" and allowing new innovations and product features. United States Resp. at 94. The most obvious flaw in this rationale, however, is that § III.C.3 is not directed exclusively at the launching of alternative user interfaces, but includes the launching of software products which launch automatically, but do so within the general parameters of the Microsoft user interface. SRPFJ § III.C.3. Despite some acknowledgment of this flaw, the United States argues that the restrictions in § III.C.3 are tolerable because they "govern[] only the original OEM configuration," such that the end user can click on an icon to enable the automatic launching of Non-Microsoft Middleware notwithstanding the restrictions in § III.C.3. United States Resp. at 94. Given this ability, argues the United States, § III.C.3 reflects a "reasonable compromise" between Microsoft's concerns for ease of use and the liability findings in this case. *Id.*

In **[**77]** the Court's view, the restrictions in § III.C.3 give too much credence to Microsoft's purportedly "valid interest" in providing consistent product characteristics valued by users. *Id.* The appellate court rejected a remarkably similar concern proffered by Microsoft in an attempt to justify the other license restrictions imposed by Microsoft upon OEMs. *Microsoft, 253 F.3d at 63-64*. The appellate court's rejection in this regard can be read to include any restriction on the automatic launching of software which does *not* replace the Microsoft user interface. *Compare* *253 F.3d 34, 64* ("In sum, we hold that with the exception of the one restriction prohibiting automatically launched alternative interfaces, all the OEM license restrictions at issue . . . violate *§ 2* of the Sherman Act."), *with Findings of Fact* P 213 ("Third, Microsoft prohibited OEMs from installing programs, including [but not limited to] alternatives to the Windows desktop user interface, which would launch automatically upon completion of the initial Windows boot sequence."). Moreover, this Court cannot help but recognize that this provision has the potential to empower Microsoft **[**78]** to control, or at least regulate, the pace of innovation with regard to middleware products designed to launch automatically, but which do not replace the **[*174]** user interface and, thereby, run afoul of the appellate court's opinion.

Importantly, however, the Court does not assess the proposed final judgment in a vacuum. In this regard, although the Court might have crafted a different remedy, the Court cannot conclude that the government has violated the public trust in agreeing to the terms set forth in § III.C.3. *See* *Bechtel, 648 F.2d at 666*. When considered as part of the greater whole of the proposed decree which offers OEM freedoms not clearly implicated in the appellate court's ruling, the Court can only conclude that the United States conceded this aspect of OEM flexibility in exchange for other freedoms which, in the government's view, will more effectively benefit competition. *See* *Microsoft, 56 F.3d at 1461*. ***HN10***[] "Just as the Court may not second guess the government's choices about what claims to bring in the first place, it should not treat differently those concessions proposed in a consent decree that might have been achieved at trial from those **[**79]** that might not have been achievable." *Thomson, 949 F. Supp. at 927*. Although liability was established in this case, there remained litigation surrounding the issue of remedy, during which there would have been no guarantee that the United States would obtain all of the provisions it desired. ***HN11***[] The risks inherent in litigation are likely to be reflected in some portion of the proposed decree, and these risks are appropriately weighed by the government, rather than the Court, in the first instance. *See* *AT&T, 552 F. Supp. at 151*. Giving limited deference to the assessment of the United States which takes the view that Microsoft has a valid interest in "having a computer boot up quickly the first time it is turned on," United States Resp. at 94, the Court does not deem this particular provision, though it is likely one of the proposed decree's more obvious weaknesses, to so conflict with important public policy or ***antitrust law*** that it removes the proposed decree from "the reaches of the public interest," *Microsoft, 56 F.3d at 1458* (quoting statement originally in *United States v. Gillette Co., 406 F. Supp. 713, 716 (D. Mass. 1975))*. **[**80]**

d. Internet Access Provider ("IAP") Offers in the Initial Boot Sequence

In general, subsection C.5 is aimed at remedying the restrictions on OEM modification of the initial boot sequence- "the process that occurs the first time a consumer turns on the computer," *Microsoft, 253 F.3d at 61*, which were found by the appellate court to violate *§ 2*. *253 F.3d 34, 61-64*. The appellate court noted that this restriction "prevents OEMs from using [the initial boot sequence] to promote the services of IAPs." *253 F.3d 34, 62*. This restriction hinders the distribution and/or promotion of non-Microsoft middleware which was often used by the IAPs in their internet access software. *Id.* Removal of this restriction will once again allow OEMs to promote various IAPs by inserting an option for choosing an IAP during the initial boot sequence.

As with subsection C.3, subsection C.5 of § III lifts a restriction directly implicated in the appellate court's liability findings, but does not do so completely. Section III.C.5 enables OEMs to offer an IAP service of their choosing during the initial boot sequence, but only where the offer complies with **[**81]** Microsoft's "reasonable technical specifications." SRPFJ § III.C.5. The appellate court concluded that Microsoft's prohibition on the inclusion of IAP registration offers in the initial boot sequence were without procompetitive justification. *Microsoft, 253 F.3d at 63-64*. In particular, the appellate court rejected Microsoft's arguments that OEM alterations created "quality issues," *253 F.3d 34, 64* (quoting Defendant's Trial Exhibit 2395), and caused consumer confusion because **[*175]** the district court found that OEMs, not Microsoft, bear the additional support costs associated with such a result. *Id*. (citing *Findings of Fact* P 159). Given this holding, there is little basis in the liability findings for the retention of Microsoft's power to impose "reasonable technical specifications" on an OEMs' insertion of an IAP offer in the initial boot sequence.

Despite this observation, however, the same analysis which applied to subsection C.3 applies to subsection C.5 of § III. That is, the Court cannot say that the limited retention of discretion permitted by Microsoft with regard to the insertion of IAP registration offers is so flawed that it renders the **[**82]** entire decree, or even this particular section of the decree, outside of the public interest. *See* *AT&T, 552 F. Supp. at 150-51*. Rather, the Court observes once again, that this limited retreat from the full feasible relief which the United States might have obtained through litigation reflects the give and take of a negotiated settlement. *Id. at 151*. Moreover, the preservation of Microsoft's ability to impose "reasonable technical specifications" upon registration sequences inserted into the boot sequence is less objectionable than the reservation of Microsoft authority in § III.C.3 because the exception from § III.C.5 subjects Microsoft to an objective standard of reasonableness. If the technical specifications are objectively "unreasonable," Microsoft is without power to impose them. As a result, the Court is convinced that the freedom provided to OEMs by the opportunity to insert IAP registrations during the initial boot sequences, even as limited by § III.C.5, will have the procompetitive effect of enabling promotion and distribution of non-Microsoft middleware. *See* *Microsoft, 253 F.3d at 62*. The Court regards it unlikely that **[**83]** Microsoft's imposition of "reasonable technical specifications" upon this freedom will undercut substantially its value to competition.

e. Alternative Operating Systems and Other Alternatives under the Final Judgment

Subsection C.4 of § III, prohibits Microsoft from restricting an OEM's ability to "offer[] users the option of launching other Operating Systems from the Basic Input/Output System or a non-Microsoft boot-loader or similar program that launches prior to the start of the Windows Operating System Product." SRPFJ § III.C.4. In effect, § III.C.4. provides OEMs with the option of launching competing operating systems and prevents Microsoft from interfering with OEM decisions to do so. Lastly, § III.C.6. provides protection for OEMs which exercise any of the options provided to them pursuant to § III.H. of the SRPFJ, which the Court discusses in greater detail below. *Id.* § III.C.6. The Court sees little worthy of criticism in these final provisions of subsection C, each of which should serve to provide OEM flexibility, which in turn, should encourage competition.

f. End-User Access

Like subsection C, subsection H of § III is aimed at providing **[**84]** flexibility in the OEM channel of distribution for non-Microsoft middleware, as well as for consumers in configuring their own Windows installation. Scheduled to take effect not later than twelve months from the submission of the SRPFJ to the Court, subsection H concerns the addition, removal, and placement of shortcuts, icons, and menu entries. *Id.* § III.H. As recounted above, the appellate court found that Microsoft's restrictions on icon appearance and placement, folders and menu entries, and other alterations of the appearance of the desktop had the effect of "imposing significant costs upon the OEMs." *Microsoft, 253 F.3d at 62*. As a result of these additional costs, Microsoft "reduced rival browsers' **[*176]** usage share not by improving its own product but, rather, by preventing OEMs from taking actions that could increase rivals' share of usage." *Id.* The appellate court rejected Microsoft's proffered procompetitive justifications for these restrictions and, therefore, found them to be exclusionary in violation of *§ 2* of the *Sherman Act. 253 F.3d 34, 63-64*.

Section III.H.1(a) requires that Microsoft permit end users and OEMs "to enable or remove **[**85]** access to each Microsoft Middleware Product or Non-Microsoft Middleware Product by . . . displaying or removing icons, shortcuts, or menu entries on the desktop or Start menu, or anywhere else in a Windows Operating System Product where a list of icons, shortcuts, or menu entries for applications are generally displayed." SRPFJ § III.H.1(a). In derogation of this provision, Microsoft reserves the right to restrict the display of icons, shortcuts, and menu entries in any list of the same "specified in the Windows documentation as being limited to products that provide particular types of functionality, provided that the restrictions are non-discriminatory with respect to non-Microsoft and Microsoft products." *Id.* The government explains that this exception is intended to "capture broad categories of products" so as to avoid consumer confusion by ensuring orderly placement of product icons, shortcuts, and menu entries. United States Resp. at 99. As is plain from the language of the exception, Microsoft may not use these product categories to discriminate between its own products and its competitors' products. SRPFJ § III.H.1(a).

Section III.H.1(a) is responsive to the appellate **[**86]** court's finding of anticompetitive behavior in Microsoft's exclusion of IE from the Add/Remove Programs utility. *Microsoft, 253 F.3d at 67*. The government posits that the provision will "alter Microsoft's current practice of creating an artificial distinction between . . . Non-Microsoft Middleware Products and Microsoft Middleware Products." United States Resp. at 98. On this rationale, the government predicts that users will be able, with the assistance of the SRPFJ, "to make choices on the merits about Microsoft and Non-Microsoft Middleware Products." *Id.* As with § III.C.1, § III.H.1(a) reserves for Microsoft the right limit the insertion of particular icons, shortcuts, and menu entries in lists or other areas of Windows which are reserved for particular functionality. SRPFJ § III.H.1(a). Once again, the Court does not regard such a limitation as inappropriately restrictive of OEM and end-user ability to configure Windows. The limitations imposed by Microsoft must be nondiscriminatory and may not be used to benefit Microsoft software over third-party software. *Id.* As a result, the Court rejects any contention that such a limitation will hinder the appropriately **[**87]** procompetitive effect of the remedial provision. On this basis, the Court finds that § III.H.1(a) advances the public interest.

Section III.H.1(b) also requires Microsoft to allow end users and OEMs to enable or remove access to middleware products by "enabling or disabling automatic invocations pursuant to § III.C.3 of the SRPFJ that are used to launch Non-Microsoft Middleware Products or Microsoft Middleware Products." *Id.* § III.H.1(b). Again, § III.C.3. concerns the automatic launch of Non-Microsoft Middleware. *Id.* § III.C.3. The "mechanism" for such enabling or disabling must offer an unbiased choice between each Microsoft Middleware Product and NonMicrosoft Middleware Product and may offer such an unbiased choice as between all Microsoft Middleware Products as a group and Non-Microsoft Middleware Products as a group. *Id.* § III.H.1.(b). The Court finds this provision unobjectionable and appropriately procompetitive.

[*177] ***i. Designation of a Non-Microsoft Middleware Product in Place of a Microsoft Middleware Product***

The second subpart of § III.H. requires Microsoft to allow end users and OEMs to designate a Non-Microsoft Middleware Product to be invoked **[**88]** in place of [a] Microsoft Middleware Product (or vice versa)" in certain circumstances. *Id.* § III.H.2. This provision requires that the option be presented to end users "via an unbiased mechanism" and to OEMs "via a standard OEM preinstallation kits" in any situation "where the Windows Operating System Product would otherwise launch the Microsoft Middleware Product in a separate Top-Level Window and display either (i) all of the user interface elements or (ii) the Trademark of the Microsoft Middleware Product." *Id.* As exceptions to the foregoing, Microsoft may invoke a Microsoft Middleware Product where the product would be "invoked solely for use in interoperating with a server maintained by Microsoft" or "that designated Non-Microsoft Middleware Product fails to implement a reasonable technical requirement." *Id.* § III.H.2(a)-(b). The government explains that the central goal and the anticipated effect of § III.H.2 are that Microsoft will be required to "implement and respect default settings in a number of circumstances." United States Resp. at 101.

Critics of § III.H.2 complain that Microsoft could engineer its software to avoid falling within the requirements **[**89]** of a "separate Top-Level Window" displaying either "all of the user interface elements" or the "Trademark of the Microsoft Middleware Product." SRPFJ § III.H.2. Microsoft's ability to circumvent this provision through its product design, argue some, will undercut the usefulness of the affirmative portion of § III.H.2. The government explains that these qualifications exist to "ensure that access to defaults exists whenever the alternative Microsoft product would be launched as the full 'product' . . . rather than when just a portion of the product's underlying functionality is launched to perform functions in Windows itself . . . or otherwise where the end user might not necessarily be aware that he or she is using a specific Microsoft Middleware Product. " United States Resp. at 102.

The most obvious flaw in this criticism of § III.H.2 is that such criticism fails to recognize that the provision offers relief beyond that which might be regarded as necessary to redress the liability in this case. Microsoft prevailed on its assertion that the override of a user's choice of a default browser was justified, and as a result, the appellate court did not ascribe liability for Microsoft's **[**90]** failure to provide true defaults, *Findings of Fact* P 171 ("While Windows 98 does provide the user with the ability to choose a different default browser, it does not treat this choice as the 'default browser' within the ordinary meaning of the term."). *See* *Microsoft, 253 F.3d at 67*. Despite this holding, § III.H.2 addresses the acknowledged anticompetitive effect of the override of non-Microsoft defaults, *253 F.3d 34, 65*, by requiring Microsoft to make non-Microsoft products the "default" in certain circumstances. SRPFJ § III.H.2. This requirement in § III.H.2 exceeds even the scope of the facts addressed during the liability phase because the mandatory setting of defaults applies to multiple types of software functionality, not merely Web-browsing functionality. *See* *Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34*. Moreover, the government views the limited nature of § III.H.2 as one of the strengths of the provision, rather than its weakness. In this regard, the government notes that paramount in § III.H.2 is the ability to "provide certainty and a bright line regarding when Microsoft is obligated to provide and respect a default setting." United States **[**91]** Resp. at 102. Based on the **[*178]** foregoing, and deferring to the government's view that § III.H.2 will have a procompetitive effect because of the clarity in its terms, however circumscribed, the Court cannot say that the United States has erred or strayed from the realm of acceptable remedies in sacrificing some flexibility in order to achieve the "bright line" drawn by the provision.

With regard to the latter portion of § III.H.2, the Court notes that subsections H.2(a) and (b) appear to reflect the two findings by the appellate court as to liability or, more specifically, the lack thereof. The relationship between subsection H.2(a) and the appellate opinion in this case is somewhat subtle, but the United States explains that automatic invocation of a "Microsoft Middleware Product . . . solely for use in interoperating with a server maintained by Microsoft (outside of the general context of Web browsing)" derives from the appellate court's holding that Microsoft did not violate *§ 2* in designing its product to override a user's browser preference in conjunction with invocation of the Windows "Help" system, *Microsoft, 253 F.3d at 67*. *See* United States Resp. at 104-05. The **[**92]** government avers that "the current Windows Help system, as well as other parts of the Windows interface, rely on interoperating with servers maintained by Microsoft." *253 F.3d 34, 104*. While the Court might not have interpreted the appellate court's holding to require the precise exception in § III.H.2(a), the Court cannot say that the provision is inappropriate, and certainly, the provision does not conflict with the appellate court's holding. Rather, the provision is remarkable in that it tracks an exception to liability, which was carefully carved out by the appellate court, without sacrificing the effectiveness of the provision itself.

The link between § III.H.2(b)'s "reasonable technical requirement" language and the appellate court's finding with regard to Microsoft's "override the user's preferences" is somewhat less subtle. *Microsoft, 253 F.3d at 67*. Addressing whether Microsoft's product design to "override the user's choice of a default browser in certain circumstances" was anticompetitive, the appellate court concluded that Microsoft's proffered "valid technical reasons" were sufficient to outweigh any anticompetitive effect of the override. **[**93]** *Id.* As a result, the appellate court did not ascribe liability for this aspect of Microsoft's product design. *Id.* Section III.H.2(b) tracks the appellate court's liability holding on this point, while simultaneously countering any anticompetitive effects of the product design by requiring that Microsoft provide the unfulfilled technical requirements to any ISV requesting them. SRPFJ § III.H.2(b). Given the close relationship between § III.H.2(b) and the appellate opinion in this case, the Court finds little merit in the criticism of the provision in the public's comments. Like the exception in § III.H.2(a), the exception in subpart H.2(b) acknowledges the nuances of the appellate court's holding and yet maintains the potency of the restrictive portion of the provision. In doing so, § III.H comports with the public interest.

ii. Automatic Alteration of OEM Configuration

The final provision in § III.H., subsection 3, prohibits a Windows Operating System Product from automatically altering an OEM's icon, shortcut, or menu-entry configuration without first seeking confirmation from the user. *Id.* § III.H.3(a). Furthermore, pursuant to § III.H.3(b), the Windows **[**94]** Operating System Product may not seek confirmation from the end user for such a non-user initiated change in configuration until "14 days after the initial boot up of a new Personal Computer." *Id.* § III.H.3(b). Any request for confirmation pursuant to this section must be unbiased with regard **[*179]** to Microsoft Middleware Products and Non-Microsoft Middleware. *Id.* § III.H.3.

Section III.H.3 is written carefully to enable a feature in Microsoft's latest version of Windows, the "Clean Desktop Wizard," to remove unused icons from the desktop. CIS at 48; United States Resp. at 107. The 14-day grace period received wide criticism in the public's comments for its brevity, which, argue critics, devalues space on the desktop. The government explains that this time-frame was chosen as a "reasonable compromise between the need to use desktop icons to promote Non-Microsoft Middleware, and the needs of users who would prefer to be presented with the choice of moving unused icons to a folder." United States Resp. at 108. The government further asserts that there are other valuable areas in Windows within which nonMicrosoft middleware products can be promoted. *Id.* While the former explanation **[**95]** offered by the government is valid, the Court finds the latter rationale weak given the role that placement on the desktop played in the liability proceedings. *See, e.g,*, *Microsoft, 253 F.3d at 61* (finding that the inability to remove desktop icons for IE protected Microsoft's monopoly), 68-71 (holding that Microsoft's exclusive agreements with IAPs concerning desktop placement foreclosed a substantial share of the market). The more salient point made by the government is that the trigger and the confirmation for change must be unbiased with respect to Microsoft products and non-Microsoft products, such that the "Clean Desktop Wizard" should not be viewed as a tool for the suppression of non-Microsoft middleware products. United States Resp. at 107-08. Moreover, the government explains that the utility does not delete the icons, but merely moves the icons from the desktop into a folder from which they may be retrieved if the user changes his or her mind. *253 F.3d 34,108*-09. The Court notes in addition that there is no ascription of liability for Microsoft's alteration of user preferences and that the closest conduct to any such alteration-the override **[**96]** of defaults-is conduct for which Microsoft was absolved of liability. *Microsoft, 253 F.3d at 67*. In sum, the Court is not compelled to conclude that the preservation of a consumer option for a desktop "clean-up" tool is discordant with the public interest, so long as there exist adequate protections to ensure that the tool is not used as a sword with which Microsoft can attack its competitors.

g. Sections III.C and III.H: Remedy for Commingling Liability

Taking a more broad view of Sections III.C and III.H, the United States posits that these sections "remedy Microsoft's anticompetitive commingling of browser and Windows operating system code by requiring Microsoft to redesign its Windows Operating System Products to permit OEMs and end users effectively to remove access to Microsoft Middleware Products (Section III.H) and to allow competing middleware to be featured in its place (Section III.C)." United States Resp. at 114. The invocation of anticompetitive conduct in this context refers to the appellate court's affirmance of the following district court finding:

> The District Court condemned Microsoft's decision to bind IE to Windows 98 "by placing **[**97]** code specific to Web browsing in the same files as code that provided operating system functions." [*Findings of Fact*] P 161; *see also* *id. PP 174, 192*. Putting code supplying browsing functionality into a file with code supplying operating system functionality "ensures that the deletion of any file containing browsing-specific routines would also delete vital operating system routines and thus cripple Windows . . . ." *Id. P 164*. As noted above, preventing an OEM from removing IE deters it **[*180]** from installing a second browser because doing so increases the OEM's product testing and support costs; by contrast, had OEMs been able to remove IE, they might have chosen to pre-install Navigator alone. *See* *id. P 159*.

Microsoft, 253 F.3d at 65-66 (ellipsis in original). Rejecting Microsoft's factual assertion that it does not commingle browsing and non-browsing code, the appellate court reiterated that "commingling has an anticompetitive effect; . . . the commingling deters OEMs from pre-installing rival browsers, thereby reducing the rivals' usage share and, hence, developers' interest in rivals' APIs as an alternative to the API set exposed by Microsoft's **[**98]** operating system." 253 F.3d 34, 66.

The government correctly notes that the basis for the appellate court' condemnation of commingling is its anticompetitive effect and that, in the absence of such effect, it is not at all clear that the practice of commingling would be of antitrust concern. United States Resp. at 115. This observation is significant because, in this instance, the government proposes a remedy which does not simply proscribe the conduct found to be anticompetitive in violation of § 2. Instead, the remedy for Microsoft's commingling liability is more closely aligned with alleviating the anticompetitive effect of the conduct, rather than simply banning the conduct itself.

This approach receives much criticism in the public's comments on the proposed consent decree. In general terms, these comments insist that Microsoft should be required to "uncommingle ," or make removable, much of the software code in its Windows operating system. Not surprisingly, the United States rejects this criticism and insists that it has never pursued a position that would have required the removal or removability of code. 253 F.3d 34, 115-16; *see also* *Microsoft, 97 F. Supp. 2d at 68* **[**99]** (IFJ requiring the removal of end-user access, *not* code removal). Indeed, even the *Findings of Fact* support the view that code removal is unnecessary: Judge Jackson noted in P 165 that "from the user's perspective, uninstalling Internet Explorer [via the 'Add/Remove' function] was equivalent to removing the Internet Explorer program from Windows 95." *Findings of Fact* P 165. The United States takes this view one step further, asserting that, contrary to theories advanced by some individuals and entities filing comments, "the basis for commingling liability, and remedy, in this case is the presence, from the user's perspective, of the product, and consequent confusion and other deterrents to installation of additional, rival middleware products; the mere presence of APIs is not enough." United States Resp. at 119.

Non-party cries for removal of software code as a remedy appear to reflect a substantive misunderstanding of the commingling liability in this case, which did not condemn Microsoft for including middleware functionality along with a product offering operating system functionality. [23] The remedy then, need not separate the functionalities, rather, it need only **[**100]** protect against any anticompetitive effect of the manner in which the functionalities have been bundled. In this case, the anticompetitive effect was found to be a disincentive to OEMs to install nonMicrosoft middleware products. If that disincentive can be removed, then the remedy is within the realm of appropriate relief. *See* 2 PHILLIP **[*181]** E. AREEDA ET AL., ***ANTITRUST LAW*** P 325a, at 246 (2d ed. 2000) ("The decree . . . will not embody harsh measures when less severe ones will do.").

The United States predicts that §§ III.C and III.H will enhance competition between Microsoft middleware **[**101]** and non-Microsoft middleware, *see, e.g.*, CIS at 29, 45, and the Court is obliged to give some amount of deference to this prediction. Mass. School of Law, 118 F.3d at 782; Microsoft, 56 F.3d at 1461. In fact, the Court sees substantial merit in the government's explanation of the relationship between the theory of liability advanced by Plaintiffs, Judge Jackson's *Findings of Fact*, the district and appellate courts' findings of liability on this point, and the proposed consent decree's focus on end-user access, rather than code removal or redesign. Accordingly, the Court rejects the view that a remedial decree which does not mandate the "uncommingling " of code necessarily renders the remedy inappropriate, inadequate, or discordant with the public interest.

Adding emphasis to the foregoing conclusion is one final and important consideration-the effect of the remedy upon consumers and other participants in this segment of the industry. In addition to its prediction that §§ III.C and III.H will effectively remedy commingling, the United States predicts that a "blanket prohibition" of the practice "would

---

[23] Any such condemnation would likely be reflected in the imposition of liability for illegal tying, rather than liability for illegal for monopoly maintenance. *Cf. generally* United States v. Microsoft Corp., 331 U.S. App. D.C. 121, 147 F.3d 935 (D.C. Cir. 1998). Such a tying claim was offered by Plaintiffs pursuant to a *per se* analysis and was ultimately rejected by the appellate court. Microsoft, 253 F.3d at 89.

impose a wholly unnecessary and artificial **[**102]** constraint on software design and could have adverse implications for consumers." United States Resp. at 119-20. The government goes on to predict that:

> Changes to the operating system that would be required to implement such a blanket prohibition likely would have adverse effects not only upon Microsoft and its customers but also upon third parties that already have designed software to rely on the present operating system code. A flat prohibition on commingling in this particular case, without due regard to the competitive impact of that commingling, therefore likely would be harmful, not helpful.

253 F.3d 34, 120. The Court is hard pressed to reject a remedy on the grounds that it lacks a provision which has the potential to give rise to such dire consequences. Indeed, ***HN12***[] courts considering antitrust remedies are advised to pay special attention to the potential of any remedy to inflict harm upon third parties. *See* *Microsoft, 56 F.3d at 1462*. Moreover, the Court acknowledges that a remedy requiring code removal would disregard the repeated admonition offered by the appellate court in an earlier *Microsoft* opinion that its is undesirable for the Court **[**103]** to inject itself into matters of product design. *Microsoft, 147 F.3d at 949-50* and n.13 (identifying a "limited competence of courts to evaluate high-tech product designs and the very high cost of error" associated therewith); *but see* *Microsoft, 253 F.3d at 65* ("Judicial deference to product innovation, however, does not mean that a monopolist's product design decisions are *per se* lawful."). Based on the foregoing, the Court will not reject the SRPFJ on the ground that it does not include a blanket prohibition against commingling Web-browsing code with operating system code. To the contrary, the Court finds that the end-user focus of the remedy comports with the public interest as it minimizes potential for harm to third parties and, nevertheless, carries a great potential for the advancement of competition.

3. Agreements with Internet Access Providers ("IAPs"), Internet Content Providers ("ICPs"), Independent Software Vendors ("ISVs"), and Others

a. Exclusive Agreements

Section III.G of the SRPFJ governs Microsoft's ability to enter into agreements **[*182]** with IAPs, ICPs, ISVs, IHVs, [24] and OEMs which require any such entity to **[**104]** distribute, promote, use or support, "exclusively or in a fixed percentage," any Microsoft Platform Software. SRPFJ § III.G.1. Subsection G.1 prohibits Microsoft from entering into any exclusive or fixed percentage agreement except where "Microsoft in good faith obtains a representation that it is commercially practicable for the entity to provide equal or greater distribution, promotion, use, or support for software that competes with Microsoft Platform Software." *Id.* This portion of the consent decree is aimed at remedying the liability findings against Microsoft for entering into exclusive contracts with IAPs and ISVs. Citing to the "First Wave Agreements," the appellate court first deemed anticompetitive Microsoft's promise to ISVs to give "preferential support . . ., other technical information, and the right to use certain Microsoft seals of approval," *Microsoft, 253 F.3d at 71*, in exchange for the ISVs' exclusive use of IE as the default browser and the ISVs' exclusive "use of Microsoft's 'HTML Help,' which is accessible only with [IE]," *253 F.3d 34, 71-72*. [25] The appellate court further determined that Microsoft's agreement with Apple, "which **[**105]** is both an OEM and a software developer," [26] **[**106]** *253 F.3d 34, 71*, for Apple's exclusive use of IE as the default browser was anticompetitive in

---

[24] An "IHV" is an "independent hardware vendor that develops hardware to be included in or used with a Personal Computer running a Windows Operating System Product." SRPFJ

§ VI.H.

[25] In contrast, the appellate court declined to find Microsoft liable for entering into similar deals with ICPs on the grounds that Plaintiffs "failed to demonstrate that Microsoft's deals with the ICPs have a substantial effect upon competition." *Microsoft, 253 F.3d at 71*.

[26] Although identified as an OEM in the appellate court's opinion, the Court observes that Apple does not fit into the definition of OEM provided in the SRPFJ because it does not license Microsoft's operating system product. SRPFJ § VI.O. The Court remains unconcerned by this fact because the protections afforded to OEMs concern their licensing of Windows, and therefore,

violation of *§ 2*. *253 F.3d 34, 72-74*. Lastly, once again citing to the "First Wave Agreements," the appellate court concluded that "to the extent Microsoft's First Wave Agreements with ISVs conditioned receipt of Windows technical information upon the ISVs' agreement to promote Microsoft's JVM exclusively," *253 F.3d 34, 75*, the agreements were "exclusionary, in violation of the Sherman Act." *253 F.3d 34, 76*. [27]

Some individuals and entities filing comments contend that the "commercially practicable" representation in § III.G.1 is too easily evaded and, therefore, will be ineffective. The United States responds by explaining the manner in which the provision will function. The government first explains that the provision will prevent Microsoft "from guaranteeing that rival technology will not become broadly available," United States Resp. at 133, by "making it logically impossible for Microsoft to seek-much less get-any form of exclusive distribution, promotion, use, or support on all of a third party's products, no matter how much Microsoft is willing to pay." *Id. at 134*. In this regard, § III.G.1 is shown to appropriately **[**107]** permit contracts with other participants in the **[*183]** industry which cannot be said to be anticompetitive. The government goes on to debunk the contention that Microsoft can extract the "commercially practicable" representation by pressuring the party with which it is contracting, as such tactics would not satisfy the "good faith" requirement in § III.G.1. *Id. at 133-34*. The "good faith" requirement prevents Microsoft from pressuring or coercing any such entity into making the necessary representation. *Id.* Similarly, Microsoft cannot simply include such representations as boilerplate language in its contracts as, once again, the "good faith" requirement will not have been met. *Id.*

The appellate court expressly observed in conjunction with its discussion of Microsoft's illegal exclusive contracts that "exclusivity provisions in contracts may serve many useful purposes," such that they are "a presumptively legitimate business practice." *Microsoft, 253 F.3d at 69*. "Exclusive contracts are commonplace-particularly in the field of distribution-in our competitive, market economy, and imposing upon a firm with market power the risk of an antitrust suit every time **[**108]** it enters into such a contract, no matter how small the effect, would create an unacceptable, and unjustified burden on any such firm." *253 F.3d 34, 70*. Because ***antitrust law*** does not condemn all exclusive contracts, even if entered into by a monopolist, the Court regards it as entirely appropriate for the remedy in this case to prohibit only those contracts that have a significant degree of foreclosure of the market. In this light, § III.G.1 is shown to be a provision which carefully balances the prohibition of anticompetitive conduct and the preservation of opportunities for symbiotic relationships between Microsoft and third parties which are not likely to be anticompetitive in their effect.

b. Placement on the Desktop

To further remedy Microsoft's anticompetitive exclusive deals with IAPs, subsection G.2 of Section III prohibits agreements with IAPs and ICPs that condition placement on the desktop (or elsewhere in Windows) on a promise to refrain from distribution, promotion, or use of any software that competes with certain functionality offered by Microsoft as part of its operating system-Microsoft Middleware. SRPFJ § III.G.2. Accordingly, subsection **[**109]** G.2 provides broad protection for present and future middleware which competes with Microsoft Middleware. Section III.G.2 directly addresses the liability finding against Microsoft for entering into contracts with IAPs for prominent desktop placement in exchange for the IAPs' exclusive promotion of Microsoft's browser. *Microsoft, 253 F.3d at 68-71*. Subsection G.2 broadens the remedial decree beyond the liability finding with regard to IAPs to protect ICPs as well, despite the fact that liability with regard to Microsoft's agreements with ICPs was ultimately rejected by the appellate court. *Microsoft, 253 F.3d at 71*. This expansion beyond the liability is not over-broad and reflects a means of prohibiting Microsoft from engaging in conduct which is closely related to the conduct for which Microsoft was found liable. *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 697, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)* (holding that an injunction that "goes beyond a simple proscription against the precise conduct previously pursued . . . is entirely appropriate").

---

it would make little sense to include Apple within the purview of these protections. *See, e.g.*, SRPFJ § III.A-C, H. Moreover, Apple appropriately receives protections afforded to ISVs. *Id.* §§ III.D, F-G, I and VI.I.

[27] The proposed consent decree's prohibition on exclusive or fixed-percentage agreements extends beyond the specific findings of liability to apply to ICPs and IHVs. This extension is appropriate, as "the public does not suffer because [the defendant] consented to limitations on its activities that could not otherwise be imposed." *Bechtel, 648 F.2d at 666*.

c. Joint Ventures, Joint Development Agreements, and Joint Services Agreements

[110]** The latter portion of § III.G makes clear that neither subsection G.1 nor G.2 prohibits Microsoft from entering **[*184]** into agreements which limit competition within the context of a "bona fide joint venture . . . joint development or joint services arrangement with any ISV, IHV, IAP, ICP, or OEM for a new product, technology or service, or any material value add-on to an existing product, technology or service, in which both Microsoft and the [other entity] contribute significant developer or other resources." *Id.* § III.G. Also excepted from the purview of § III.G are any agreements in which Microsoft licenses intellectual property from a third party. *Id.* This exception provides an incentive for Microsoft to license nascent technology from third-party vendors for distribution with Microsoft products. United States Resp. at 136-37. Such an exception protects the potential for third parties to benefit from Microsoft's broad distribution capability. *Id.*

The above-described limitations placed on subsections G.1 and G.2 receive some criticism to the effect that Microsoft will simply be able to label its agreements "joint ventures" so as to escape the limitations otherwise **[**111]** imposed by § III.G. As is often the case, these critics fail to carefully consider the precise wording of the provision. The words "bona fide" modify the joint ventures to which the exception applies. SRPFJ § III.G. Were Microsoft to simply label ordinary transactions as "joint ventures" because they involve some amount of collaboration, the "bona fide" requirement would not be met. Similarly, criticism of the use of the term "bona fide" fails to recognize that the term is a legal term which carries with it a particular legal significance. Therefore, there is nothing vague or ambiguous about its use. In a similar vein, comments which assert that the terms "joint development or joint services arrangement" are without meaning fail to take account of the language modifying these terms which makes clear that the joint activity must be aimed at new products, technologies, or services, or a material value add-on to existing technology, and that the parties to the arrangement must each contribute significant resources. *Id.* The exception is tailored to permit joint activities that are genuinely procompetitive and, indeed, recognizes that non-compete clauses may be appropriate where two **[**112]** firms legitimately share resources to create new or improved opportunities for consumers. United States Resp. at 136. Given these considerations, the permissive exceptions to the restrictive portion of § III.G. are shown to be far more narrow in their application than most recognize. Accordingly, the Court sees little merit in the general criticism that the exceptions in § III.G for joint ventures, joint development agreements, and joint services agreements are overly broad.

The more salient criticism of § III.G arises from the fairly broad exception of "any agreements in which Microsoft licenses intellectual property in [sic] from a third party" from the purview of the prohibitive portions of the provision. SRPFJ § III.G. Critics of this portion of the SRPFJ contend that Microsoft can simply add an intellectual property license to an exclusive agreement in order to circumvent the prohibitive portion of § III.G. The United States explains that the exception "permits Microsoft, in licensing new technology from an ISV for incorporation into a Microsoft product, to ensure that the ISV will not also license the same technology to a competitor who hopes to 'free ride' on Microsoft **[**113]** popularization of the technology." United States Resp. at 137. In this regard, the government argues that the exception preserves Microsoft's "incentives to invest in such popularization." *Id.*

Although the government's explanation is reasonable, the government does not explain why the exception for agreements in which Microsoft licenses intellectual **[*185]** property is not more carefully tailored to address the circumstance referenced by the government. Given the breadth of the exclusion, it is possible that agreements which the government did not intend to exclude from the prohibitory portion of § III.G, nonetheless, will be excluded. The government appears far less concerned about this potential over-breadth, than with the potential for the exception to provide an unintended loophole. In this regard, the government observes that a license of intellectual property as a pretext for otherwise exclusionary terms would be subject to review by the United States, and could result in a request for modification if the provision is abused. *Id.*

The exception from § III.G of agreements in which Microsoft licenses third-party intellectual property provides an additional example of a provision **[**114]** which the Court, if called upon to craft a remedy, would likely not craft so broadly. However, it scarcely bears repeating that ***HN13***[] a court presiding over a Tunney Act proceeding need not conclude that the terms of the consent decree "will *best* serve society," but only that the proposed decree is "within the reaches of the public interest." *Microsoft, 56 F.3d at 1460* (quoting *Western Elec. Co., 900 F.2d at 309*) (emphasis in original). Had the government been unable to offer a reasoned justification and predictive effect of the exception in § III.G for agreements in which Microsoft licenses intellectual property, the Court might well have concluded that the exception does not accord with the public interest. The Court is not faced with such a circumstance. The government has offered a legitimate justification for the balance struck between the prohibitive and permissive portions of § III.G, and the Court declines to second guess the wisdom of this balance. Recalling that "above all, [a] consent decree . . . [is] the product[] of a negotiated settlement from which, presumably, no party obtained everything it wanted," Thomson, 949 F. Supp. at 914, **[**115]** the Court takes the view that this particular exception in § III.G of the SRPFJ may reflect one of those instances in which the government exchanged some degree of breadth for some other valuable benefit. *See* AT&T, 552 F. Supp. at 151 ("Naturally, the agreement reached normally embodies a compromise; in exchange for the saving of cost and the elimination of risk, the parties each give up something they might have won had they proceeded with the litigation.") (quoting United States v. Armour & Co., 402 U.S. 673, 681, 29 L. Ed. 2d 256, 91 S. Ct. 1752 (1971)). Given the totality of the facts, the Court cannot conclude that the breadth of the exception in the latter portion of § III.G so far detracts from the remainder of the provision, and the other portions of the decree, that it falls beyond the reaches of the public interest.

d. Limitations on Support for Competing Products

Section III.F.2 [28] is aimed directly at Microsoft's dealings with ISVs. Pursuant to § III.F.2 Microsoft may not condition any benefit or "grant of Consideration" on an ISV's "refraining from developing, using, distributing, or promoting" software that competes with Microsoft Platform Software. **[**116]** *Id.* § III.F.2. Excepted from the protections of § III.F.2, however, are agreements which limit an ISV's "development, use, distribution, or promotion" of such competing software, where such agreement is reasonable in its terms and "reasonably necessary to . . . a bona fide contractual obligation of the ISV to use, distribute or promote any Microsoft software or to develop **[*186]** software for, or in conjunction with, Microsoft." *Id.* § III.F.2.

The government explains the exception in § III.F.2 as a means by which to "protect ISVs' opportunity to engage in legitimate, procompetitive arrangements with Microsoft," such as a very basic agreement whereby Microsoft "provides an ISV with funds for the promotion of Microsoft software and prohibits the ISV from spending those funds to promote rival software." United States Resp. at 127-28. In the face of criticism, the United States maintains that this exception will not permit Microsoft to "enter into an agreement **[**117]** that provides an ISV with assistance in promoting a Microsoft product on [the] condition that the ISV not also distribute, use, or promote, a rival product, because such a limitation would not be reasonably related to the ISV's obligation to promote the Microsoft product." Id. at 128. The government readily admits that the language of this exception is somewhat "general[]" but contends that this generality is a "necessary tradeoff ." *Id.* In this regard, the government argues that more precise provisions provide greater opportunity for circumvention, while a provision like § III.F.2, which relies on "general but established legal terms," will provide the government and the Court with greater flexibility to consider the substance rather than the "mere form of Microsoft's future agreements with ISVs." *Id.* The government further notes that were there no such exception, § III.F.2 would prohibit lawful, procompetitive agreements with ISVs. *Id.* This explanation satisfies the Court that the terms of § III.F are not drawn contrary to the public interest.

Viewed in their entirety, §§ III.F and III.G not only prohibit the anticompetitive conduct identified by the appellate **[**118]** court with regard to ISVs, IAPs, and IHVs, but these provisions extend further, to address Microsoft's conduct with other participants in the industry even though Microsoft's dealings with these entities did not give rise to liability in this case. More importantly, these provisions strike a delicate balance between the prohibition of conduct found to be anticompetitive, or conduct closely related to conduct found to be anticompetitive, and the preservation of conduct that benefits other participants in the industry, as well as consumers. The Court regards it particularly necessary when addressing Microsoft's contracting power to ensure that procompetitive, mutually beneficial arrangements are not prohibited by the terms of an overbroad decree. Acknowledging that the United States has weighed these considerations in the first instance, the Court regards the balance struck as one which falls within the realm of an acceptable remedy.

---

[28] Section III.F.1 is discussed *supra* Part III.B.1.c.

4. API Disclosure, Interoperability, and Related Provisions

Sections III.D and III.E generally concern the disclosure of APIs, communications protocols, and other technical information for purposes of ensuring successful interoperation with **[**119]** Microsoft's Windows operating system. Subsection D requires Microsoft to disclose the "APIs and related Documentation" used by "Microsoft Middleware" to interoperate with Windows. SRPFJ § III.D. The provision defines "APIs" as "the interfaces, including any associated callback interfaces, that Microsoft Middleware running on a Windows Operating System Product uses to call upon that Windows Operating System Product to obtain any services from that Windows Operating System Product." *Id.* While the rationale for this type of disclosure rests, in part, upon the finding of liability for conditioning the provision of technical information on illegal, exclusive agreements, *Microsoft, 253 F.3d at 71-72*, it can be viewed more broadly to relate to the United States' theory of the case as a **[*187]** whole. As recounted above, the United States proceeded to trial on the theory that Microsoft had acted anticompetitively in an effort to boost its own middleware and stifle rival middleware because those products posed a potential "platform threat." The disclosure of interfaces and related technical information pursuant to § III.D ensures the ability of competitive products to interoperate **[**120]** effectively with the Windows operating system and in a manner which is not disadvantaged by comparison to Microsoft's middleware technology. Accordingly, such disclosure has the potential to increase the ability of competing middleware to threaten Microsoft's operating system monopoly.

a. API Disclosures

One of the more prevalent criticisms of the SRPFJ arises in conjunction with § III.D, relating specifically to the use of the term "Microsoft Middleware." As indicated above, § III.D mandates the disclosure of the APIs relied upon by "Microsoft Middleware to interoperate with a Windows Operating System Product." SRPFJ § III.D. The definition of "Microsoft Middleware" is very similar to the definition of "Microsoft Middleware Product," discussed *supra* Part III.B.1.a.ii. The term "Microsoft Middleware" is used in this context, rather than "Microsoft Middleware Product," because § III.D requires the identification of particular pieces of software code.

In order to identify specifically the appropriate pieces of code, the definition of "Microsoft Middleware" identifies the code that Microsoft distributes separately from Windows and trademarks or identifies as a major **[**121]** version of any Microsoft Middleware Product. SRPFJ § VI.J. The oft-criticized separate distribution requirement provides not only a ready means by which to identify code, but acknowledges that the most competitively significant products will be distributed and updated at more frequent intervals than Microsoft's entire operating system product. *See* United States Resp. at 44-45. Similarly, the requirement of trademarking serves also to identify the competitively significant software, while simultaneously excluding security patches, fixes, or other small downloads. *Id. at 47-48*. Lastly, "Microsoft Middleware" must provide functionality which is the same or substantially similar to the functionality provided by a "Microsoft Middleware Product." SRPFJ § VI.J. Because a "Microsoft Middleware Product," by definition, is part of Windows, *id.* § VI.K, this last major requirement serves to ensure a close link to the monopoly market and Microsoft's product in that market. *See* United States Resp. at 48-49 . On this point, the government explains, in particular, that its case was never intended to address products that Microsoft never distributed with its Windows operating **[**122]** system, and therefore, the relationship to Microsoft's monopoly product is entirely consonant with the theory of liability. *Id. at 48.* The government further explains that the parameters of "Microsoft Middleware" exceed mere application to the Microsoft counterparts to Navigator and Java, extending to a number of present and future middleware technologies. Such expansion is appropriately forward-looking and accords with the general law of remedies in ***antitrust law***. *See* *United Shoe, 391 U.S. at 250*.

Criticisms of this definition in the government's remedial decree are wide-ranging, with most sharing the view that the definition should apply to more Microsoft software. The United States has offered a reasoned justification for each limitation in the definition. These explanations are directly responsive to the criticism and serve to rebut all of the various accusations regarding the parameters of "Microsoft Middleware." In short, the Court is not convinced **[*188]** that the parameters of "Microsoft Middleware" and the ensuing impact upon Microsoft's obligations under the proposed final judgment are inappropriately drawn or are in conflict with the public **[**123]** interest.

Additionally, the definition of "API" receives criticism by those filing comments. API is defined in § III.D as "the interfaces, including any associated callback interfaces, that Microsoft Middleware running on a Windows Operating

System Product uses to call upon that Windows Operating System Product in order to obtain any services from that Windows Operating System Product." SRPFJ § III.D. Some entities filing comments complain that the definition of API is too narrow. In his *Findings of Fact*, Judge Jackson described APIs as the "synapses at which the developer of an application can connect to invoke pre-fabricated blocks of code in the operating system." *Findings of Fact* P 2. The definition in the SRPFJ is consistent with the description in the *Findings of Fact* and, given the liability which was affirmed by the appellate court, is appropriately limited in scope. In this regard, the Court notes that because liability in this case concerns middleware, it would far exceed that liability to require Microsoft to disclose interfaces between its operating system products and all applications and devices. Moreover, as the government explains, the definition of API **[**124]** is fairly broad such that "whatever Microsoft Middleware uses to request services from a Windows Operating System Product, whether it includes something that could arguably be called a 'file format' or not, is the subject of disclosure." United States Resp. at 144. Accordingly, the Court concludes that the definition of API is sufficiently broad, yet appropriately tailored to reflect the extent of liability in this case.

Similarly, some entities filing comments complain that the definition of "Documentation" is too limited. The Court finds little merit in this complaint. "Documentation" is defined in the SRPFJ as "all information regarding the identification and means of using APIs that a person of ordinary skill in the art requires to make effective use of those APIs." SRPFJ § VI.E. The goal of this provision is clear; the "Documentation" should enable a software developer to utilize the APIs which are disclosed pursuant to § III.D. The Court is satisfied that the definition of "Documentation" is appropriately drawn to accomplish that legitimate goal.

One additional complaint relevant to this discussion concerns the timing of the disclosures mandated by § III.D. Section III. **[**125]** D provides for two alternatives relevant to timing, one for new major versions of Microsoft Middleware, and another for the release of a new version of a Windows Operating System Product. *Id.* § III.D. "In the case of a new major version of Microsoft Middleware, the disclosures . . . shall occur no later than the last major beta test release of that Microsoft Middleware." *Id.* The United States explains that the "last major beta test release for various Microsoft Middleware Products" will likely occur "anywhere from two to seven months prior to the commercial release of the product." United States Resp. at 153. The government further explains that earlier release of the information is not feasible, despite the fact that developers within Microsoft may have earlier access to the APIs. *Id.* at 154. This is so because the API is often not finalized, tested, and fully documented at that stage, and may, in fact, continue to change. *Id.* Any alteration to the API threatens not only to destroy the usefulness of the disclosure for software developers, but has the capacity to hinder developers in the creation of software. *Id.* Given these bases, it does not seem unreasonable **[**126]** to fix a time for disclosure which will ensure that **[*189]** the disclosed information is stable and unlikely to be subjected to future alteration.

"In the case of a new version of a Windows Operating System Product, the obligations imposed by this Section shall occur in a Timely Manner." SRPFJ § III.D. "Timely Manner" appears in the definition section and "means at the time Microsoft first releases a beta test version of a Windows Operating System Product that is made available via an MSDN subscription offering or of which 150,000 or more beta copies are distributed." *Id.* § VI.R. The government explains that the timing of disclosures relevant to the release of new Windows Operating System Products reflects the "approximate current MSDN subscription base" such that disclosure is triggered by the distribution of 150,000 beta copies of the software. United States Resp. at 155. Once again, given the explanations in the government's response to public comments, the timing of disclosures pursuant to § III.D does not seem to be unreasonable or unjustified.

Disclosure beyond these parameters, while potentially useful to other industry participants in combating Microsoft's dominance in the **[**127]** operating system market, is not absolutely required by the liability in this case. Indeed, the disclosures in § III.D are not clearly directed at the redress of a specific finding of liability, but instead advance the more general antitrust remedial goal of "eliminating the effects of the illegal conduct." *Nat'l Soc'y Prof'l Eng'rs*, *435 U.S. at 698*. Both the United States and Microsoft acknowledge that, at present, Microsoft discloses, supports, and evangelizes many Windows APIs. *See* Microsoft Mem. in Support of the SRPFJ at 29; United States Resp. at 140. Of course, Microsoft has a clear business incentive to do so, as it is this disclosure, in part, which makes the Windows platform attractive to applications developers. United States Resp. at 140-41. As the United States explains, the mandated disclosures in § III.D will be useful "in those cases where Microsoft may have a strategic interest in withholding APIs that outweighs Microsoft's natural incentive to disclose them-namely, where Microsoft's own middleware is competing with rival middleware that threatens the applications barrier to entry." *Id.* In this regard, § III.D appropriately **[**128]** requires disclosure of "the most competitively significant APIs . . . used by competing [middleware] products, not those used by completely different types of software." *Id. at 140*.

b. Communications Protocols

In a similar vein § III.E requires that Microsoft license, for purposes of interoperating or communicating with a Windows Operating System Product, any communications protocol installed on a Windows client which is used to interoperate or communicate with a Microsoft server operating system product without the addition of software code to the client. SRPFJ § III.E. This aspect of the proposed consent decree, like § III.D, is forward-looking and seeks to address the "rapidly growing server segment of the market." United States Mem. at 59. A "growing number of applications . . . run on servers, rather than on the desktop." Sibley Decl. P 56. These technologies "represent[] a strong source of competition to Microsoft in the business computing segment and may yet make a serious attack on the applications barrier to entry in the desktop PC market." *Id.* Hence, the goal of this disclosure is to ensure that rival middleware can interoperate with servers running **[**129]** Microsoft's server operating system software and thereby compete vigorously with Microsoft middleware. *Id.* In addition, enabling non-Microsoft middleware to interoperate with Microsoft's operating systems in the server segment **[*190]** ensures that Microsoft does not "incorporate into Windows features or functionality with which only its own servers can interoperate, and then refuse to make available information about those features non-Microsoft servers need in order to have the same opportunities to interoperate with the Windows operating system." United States Mem. at 58-59.

Although this aspect of the remedy plainly exceeds the scope of liability it is appropriately forward-looking. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 132, 23 L. Ed. 2d 129, 89 S. Ct. 1562-33 (1969)*; *Int'l* *Salt Co. v. United States, 332 U.S. 392, 400, 92 L. Ed. 20, 68 S. Ct. 12 (1947)*. Certainly it cannot be said that the disclosures specified in Sections III.D and E are a blanket prohibition on all future violations of the antitrust laws. *See* *Zenith Radio, 395 U.S. at 133*. To the contrary, these provisions are closely connected with the theory of liability in this case and further efforts to "ensure **[**130]** that there remain no practices likely to result in monopolization in the future." *United Shoe, 391 U.S. at 250*. As a result, the provisions plainly fall within the public interest.

c. Interoperation

Somewhat controversial in § III.D and E is the fact that the SRPFJ does not include a definition of "interoperate." Entities raising this concern assert that the CIS offers some explanation of the term, but in the absence of a definition in the SRPFJ, there is no guarantee that the term will be given the meaning ascribed in the CIS. In the CIS, the government explains that "the effect of Section III.D. is to assure Non-Microsoft Middleware meaningful access to the same services provided by the operating system as those available to Microsoft Middleware." CIS at 35. Similarly, with regard to § III.E, the CIS explains that subsection E "ensures that ISVs will have full access to, and be able to use, the protocols that are necessary for software located on a server computer to interoperate with, and fully take advantage of, the functionality provided by any Windows Operating System Product." *Id.* From this language, it appears that the United States defines **[**131]** the ability to "interoperate" as the ability to "fully take advantage of functionality" or as the ability to have "meaningful access" to services. *Id. at 35-36*. Adding further confusion, the government, in its responses to the public comments offers that § III.E is intended to "allow for the possibility of seamless two-way interoperability." United States Resp. at 165.

Critics note, and the government acknowledges, that Microsoft has espoused a different understanding of "interoperate" in its submissions to the European Union. United States Resp. at 164. Nevertheless, the government insists that it has reached a "meeting of the minds" with Microsoft as to the intended meaning of "interoperate" and its effect in the SRPFJ. *Id.* The government further notes that, in an effort to clarify the meaning of "interoperate," it agreed with Microsoft to add language to § III.E., supplementing the term such that "interoperate" became "interoperate, or communicate." *Id. at 164-65*; *compare* RPFJ § III.E, *with* SRPFJ § III.E. This addition provides a very simple definition of "interoperate" in the text of the decree, clarifying the parties' intent.

Courts reviewing proposed **[**132]** consent decrees pursuant to the Tunney Act are obliged to pay close attention to any potential ambiguity, particularly since it is the district court which must enforce the decree. *Microsoft, 56 F.3d at 1462-63*. Aware of the criticism of the lack of definition of "interoperate," the Court inquired of Microsoft as to whether there was some ambiguity in the decree or a lack of agreement with the government. Hearing **[*191]** Transcript ("Tr.") at 81-82 (March 6, 2002). Microsoft, responded carefully, stating that, "the competitive impact statement and the extraordinarily lengthy response to comments . . . were prepared without any input from or consultation with Microsoft." *Id. at 82*. Further noting that "it is impossible that two different people or parties would write any document in exactly the same way," Microsoft nevertheless expressed its agreement with the government that the parties "have a meeting of the minds" and "certainly agree with the scope and operation of the judgment." *Id. at 82-83*; *see also* United States Resp. at 164.

Taking the parties as their word, the Court is not compelled to conclude that the parties lack agreement or that the SRPFJ is ambiguous **[**133]** simply because Microsoft has advanced a different understanding of a particular term in an unrelated forum. So long as Microsoft and the United States have a common understanding in this case, the fact that Microsoft advanced a different position in some other context is not relevant. Moreover, a clear definition of the term appears in § III.E, as a result of the addition of the words "or communicate" in order to clarify the meaning of the term "interoperate," SRPFJ § III.E ("Microsoft shall make available . . . any Communications Protocol that is . . . (i) implemented in a Windows Operating System Product installed on a client computer, and (ii) used to *interoperate, or communicate*, natively . . . with a Microsoft server operating system product.") (emphasis added). *See* United States Mem. Regarding Modifications at 5-6; United States Resp. at 164-65. Accordingly, the use of the term in § III.E, at present, does not appear to carry ambiguity. Moreover, as the parties' intent will control the interpretation of this decree, *see* *Microsoft, 147 F.3d at 945 n. 7*, and given the clarification and ensuing revision, there seems little risk of dispute as to the parties' **[**134]** intent should the use of the term prove troublesome in the future.

The use of the term "interoperate" in § III.D presents a slightly harder problem, as the parties did not augment the use of the term "interoperate" in § III.D with the word communicate." The government's submission is unhelpful on this point, as it refers only to the use of the term "interoperate" in § III.E and does not mention the term's use in § III.D. Nevertheless, the Court cannot conclude that the lack of definition for the term renders the provision ambiguous. Microsoft's obligations are fixed in § III.D primarily by the definition of API, rather than the use of the term "interoperate;" the term "interoperate" serves only to circumscribe the purpose for which the API must be disclosed. SRPFJ § III.D. The definition of API which appears in § III.D strongly indicates the meaning to be given to "interoperate" by its reference to "obtaining services from." *Id.* Therefore, rather than require a separate definition, the use of the term "interoperate" in § III.D is apparent from its context. Based on this fact and the parties' agreement that they have a "meeting of the minds," the Court is satisfied that **[**135]** Microsoft's obligations under § III.D are sufficiently clear.

It is worthy of note, at this juncture, that § III.E is directed at a segment of the industry which was addressed in a very limited manner during the liability trial and was not related to the imposition of liability. The government explains the inclusion of this provision based upon the rationale that "the United States believed that the RPFJ's effectiveness would be undercut unless it addressed the rapidly growing server segment of the market." United States Mem. at 59. Given the forward-looking nature of § III.E, and the limited relation of servers to the liability **[*192]** imposed in the case, the Court recognizes that the protections in § III.E evidence the successful efforts of the United States to obtain a decree which not only redressed the specific conduct found to violate the antitrust laws, but to obtain protection which is prospective in its focus. Such a prospective remedy is particularly warranted in this case given the rapid pace of change in the software industry. *See* *Microsoft, 253 F.3d at 49*. In the absence of this type of provision and the other prospective provisions in the SRPFJ, it is quite **[**136]** possible that the core of the decree would prove prematurely obsolete. Instead, Plaintiffs and Microsoft appear to have proposed a decree that acknowledges the continuing change in the industry and expands appropriately from the imposition of liability. Although the government may not have been "strictly entitled" to such expansion, this fact cannot itself render the decree in conflict with the public interest, as contemplated by the Tunney Act. *Bechtel, 648 F.2d at 666*.

d. Reasonable, Non-Discriminatory Licenses

Closely related to the disclosures mandated by § III.D and E is § III.I, which concerns the terms pursuant to which Microsoft must license its intellectual property rights in conjunction with it obligations under the SRPFJ. Subsection I provides that Microsoft shall offer licenses to the relevant entities (ISVs, IHVs, IAPs, ICPs, and OEM) of "any intellectual property rights owned or licensable by Microsoft that are required to exercise any of the options or alternatives expressly provided to them under this Final Judgment." SRPFJ § III.I. Such licenses shall be "reasonable and non-discriminatory" in all regards, including the amount of royalties **[**137]** and monetary consideration, and shall be limited in scope such that they are no broader than necessary. *Id.* § III.I.1-2. In addition, pursuant to § III.I, Microsoft may reserve the right to prohibit the transfer, assignment, or sublicense of the intellectual property right conferred by the license. *Id.* § III.I.3. As is apparent from the terms of subsection I and the government's explanation, this provision "ensures that Microsoft cannot use its intellectual property rights to undermine the competitive value of its obligations in Sections III.D and E, while at the same time [it] permits Microsoft to take legitimate steps to prevent unauthorized use of its intellectual property." United States Resp.

at 171. [29]

[138]** One significant complaint about this provision is that Microsoft should not be entitled to *any* royalty in exchange for its disclosures. The Court finds little merit in this position. To prohibit Microsoft from charging a reasonable royalty would require Microsoft to give away significant amounts of valuable intellectual property rights. The Court does not agree that the liability in this case supports, much less requires, such a drastic and draconian remedy. *See* *Microsoft, 253 F.3d at 106* ("Mere existence of an exclusionary act does not itself justify full feasible relief against the monopolist to create maximum competition") (quoting 3 AREEDA & HOVENKAMP, ***ANTITRUST LAW***, P 650a, at 67). The appellate court established "a causal connection between Microsoft's exclusionary conduct and its continuing position in the operating systems market only through inference." *253 F.3d 34, 106-07*. While this "edentulous" test was sufficient for the **[*193]** imposition of liability, *253 F.3d 34, 79*, the relative potency of the causal connection established during the liability phase cannot be overlooked in a discussion of remedy, *253 F.3d 34, 80* ("Microsoft's **[**139]** concerns over causation have more purchase in connection with the appropriate remedy issue . . . .").

Based on the specific circumstances in this case, the Court finds that the requirement that Microsoft license its intellectual property at reasonable and non-discriminatory rates is entirely appropriate. Because "reasonableness" is generally recognized as an objective standard, *see* *Stringer v. Black, 503 U.S. 222, 237, 117 L. Ed. 2d 367, 112 S. Ct. 1130 (1992)*, its incorporation into the SRPRJ serves to limit substantially the terms that Microsoft may impose in licenses of information disclosed pursuant to the final judgment. Greater specificity as to the terms of the licenses would likely be inappropriate, as case law ***HN14***[] on the subject of licenses and antitrust remedies advises that courts are best excluded from "the administration of intricate and detailed rules" relating to business affairs. *United States v. Paramount Pictures, 334 U.S. 131, 163, 92 L. Ed. 1260, 68 S. Ct. 915 (1948)* ("The judiciary is unsuited to affairs of business management . . . ."). Moreover, the disclosure and licensing of intellectual property serves primarily to "unfetter" the market from the effects of Microsoft's illegal conduct, rather **[**140]** than redress very particular exclusionary conduct. *Ford Motor Co.*, 405 U.S. at 577. Therefore, the disclosure and license of such information in the absence of a reasonable royalty would impose an unduly confiscatory remedy upon Microsoft.

e. Source Code Access

Related to these disclosure provisions are the complaints of individuals and entities that those receiving such disclosures are not afforded access to the Windows operating system source code. This complaint reflects the fact that the IFJ originally entered by Judge Jackson, thereafter vacated by the appellate court, included a provision mandating access by representatives of OEMs, ISVs, and IHVs to "relevant and necessary portion of the source code" in order "to facilitate compliance, and monitoring of compliance" in conjunction with efforts to enable

[29] During the public comment period, some entities lodged complaints about RPFJ § III.I.5, which required a cross-license of certain intellectual property rights. In response, the United States and Microsoft agreed to amend § III.I to remove subsection I.5 in its entirety. *Compare* SRPFJ § III.I, *with* RPFJ § III.I.

interoperation. *Microsoft, 97 F. Supp. 2d at 67*. In this regard, the IFJ required Microsoft to make the relevant portions of the source code accessible at a "secure facility" where appropriate persons could "study, interrogate and interact" with the code. *Id.* The SRPFJ, like the IFJ, utilizes access to the source code as a means **[**141]** of enforcement, but limits such access to a special committee which serves Plaintiffs, rather than permitting access by representatives of the OEMs, ISVs, and IHVs. SRPFJ § IV.A.2. Hence, the same goal-ensuring compliance-is accomplished, albeit through a slightly different means. This shift in focus is abundantly appropriate given that it is Plaintiffs who are responsible for enforcement of the decree, not third parties in the marketplace who will likely benefit from the decree's provisions. To the extent entities or individuals desire access to the Microsoft source code for purposes other than ensuring compliance with the consent, such a use is discordant with the intent underlying the provision, and its predecessor in Judge Jackson's IFJ. As a result, the Court finds the absence of source code access for OEMs, ISVs, and other third parties to be of little concern.

f. Security-Based Limitations

Subsection J limits Microsoft's disclosures under the SRPFJ to ensure that the mandated disclosures do not result in the release of information which "would compromise the security of a particular installation . . . of anti-piracy, anti-virus, software licensing, digital rights **[**142]** **[*194]** management, encryption or authentication systems, including without limitation, keys, authorization tokens or enforcement criteria." *Id.* § III.J.1(a). In addition, subsection J excludes from disclosure any API, interface, or other information which Microsoft is "lawfully directed" by a "governmental agency of competent jurisdiction" not to do so. *Id.* § III.J.1(b). The chief complaint about these so-called "security carve-out" provisions is that they are more broad than is necessary to accomplish the goal of ensuring security. Such complaints ignore the limitations in the provision that require the release of information to work an *actual* compromise of security, rather than a potential, hypothetical, or likely compromise of security. Similarly, as the government explains, the provision applies to "particular installations," meaning "end-user installations or a specific, narrowly-prescribed subset of installations" and not all installations using a particular product or functionality. United States Resp. at 179. Accordingly, the Court finds complaints about § III.J.1 unpersuasive.

Subsection J further limits Microsoft's disclosure obligations with regard to a specific **[**143]** subset of the APIs and communications protocols that Microsoft will have to disclose. The provision specifies that Microsoft may condition licenses relating to "anti-piracy systems, antivirus technologies, license enforcement mechanisms, authentication/authorization security, or third party intellectual property protection mechanisms of any Microsoft product" on the requirement that the licensee:

> (a) has no history of software counterfeiting or piracy or willful violation of intellectual property rights, (b) has a reasonable business need for the API, Documentation or Communications Protocol for a planned or shipping product, (c) meets reasonable, objective standards established by Microsoft for certifying the authenticity and viability of its business, (d) agrees to submit, at its own expense, any computer program using such APIs, Documentation or Communication Protocols to third-party verification, approved by Microsoft, to test for and ensure verification and compliance with Microsoft specifications for use of the API or interface, which specifications shall be related to proper operation and integrity of the systems and mechanisms identified in this paragraph.

SRPFJ **[**144]** § III.J.2. Plainly, the thrust of this provision is to provide some protection for Microsoft from companies or individuals which may seek to make improper use of the API documentation and communications protocol disclosures made pursuant to the SRPFJ. Contrary to some comments, nothing in this provision authorizes Microsoft to discriminate against certain individuals or companies based on their development philosophy or not-for-profit status. Instead, subsection J.2 strikes a balance between protecting Microsoft's intellectual property rights and effecting the mandates of the decree. Indeed, the fears of some that they will face exclusion based upon having been sued for patent infringement and lost are unfounded, as such a suit is not itself evidence of "*willful* violation of intellectual property rights." *Id.* (emphasis added). Subpart (c) of § III.J merely offers Microsoft some flexibility in establishing reasonable and nondiscriminatory standards for determining that an individual or entity has not requested a license of intellectual property for some improper or illegitimate purpose that threatens Microsoft security. Nothing in the phrasing "reasonable, objective standards" **[**145]** authorizes Microsoft to use this term of the proposed decree to discriminate or oppress industry participants at its whim. *Id.* Concomitantly, subpart (d) does not entitle Microsoft to the licensee's intellectual property, but instead provides for independent third-party testing and verification **[*195]** relevant to Microsoft specifications and only where the specifications are "related to the proper operation and integrity of the systems and mechanisms identified in [§ III.J.2]." *Id.* The government explains that the cost of such independent testing is to be borne by the licensee because "with other third-party testing programs in the software industry, the cost is usually borne by the organization submitting the program." United States Resp. at 183. As all of these provisions constitute reasonable means of balancing competing interests, the Court fails to see any substantial merit in the complaints and comments of the provision's detractors.

5. Term of Decree

Section V of the SRPFJ provides that the decree "will expire on the fifth anniversary of the date it is entered by the Court." SRPFJ § V.A. Section V further empowers Plaintiffs to apply to the Court "for a one-time **[**146]** extension" of the five-year term of the decree "in any enforcement proceeding in which the Court has found that Microsoft has engaged in a pattern of willful and systematic violations." *Id.* § V.B.

Though simple in language and effect, the proposed term of the decree, five years from the date of entry by the Court, has also met with significant criticism. Critics argue that the five-year term is too short. These individuals and entities contend that there is no basis to deviate from the general policy of the Antitrust Division to avoid negotiation of decrees of less than ten years in duration. *Antitrust Division Manual* at IV-54 (3d ed. Feb. 1998) ("With regard both to the preparation of proposed draft decrees by staff as well as to decree proposals that may be made by defendants, note that the Division's standard decree language requires that the consent decree expire on the tenth anniversary of its entry by the court. The staff should not negotiate any decree of less than 10 years' duration, although decrees of longer than 10 years may be appropriate in certain circumstances."). The government responds that each decree must be tailored to fit the circumstances of the case, **[**147]** United States Resp. at 203 (citing *Antitrust Division Manual* at IV-51 ("While the scope of relief obtained in prior antitrust cases may be viewed as precedent, the theory behind equitable relief is that it should be fashioned to fit the particular facts of the case at issue."), and notes that the Antitrust Division has imposed five-year terms in numerous other decrees, *id.* (citing cases).

The government justifies departure from the standard ten-year term in this case because of the pace of technological change in the computer industry. United States Resp. at 202. At this point in the case, there can be no dispute that the industry has shown a great capacity for rapid change. As the D.C. Circuit noted in June of 2001:

> Just over six years have passed since Microsoft engaged in the first conduct plaintiffs allege to be anticompetitive. As the record in this case indicates, six years seems like an eternity in the computer industry. By the time a court can assess liability, firms, products, and the marketplace are likely to have changed dramatically. This, in turn, threatens enormous practical difficulties for courts considering the appropriate measure of relief in equitable **[**148]** enforcement actions, both in crafting injunctive remedies in the first instance and reviewing those remedies in the second.

Microsoft, 253 F.3d at 49. The government observes that absent a departure from the ten-year term, there exists a substantial risk that the decree will become highly regulatory in nature. United States Resp. at 203. Given these considerations, it is difficult to fault the government **[*196]** for departing from the usual ten-year term in this instance.

6. Compliance and Enforcement

The final portions of the SRPFJ detail the procedures for enforcement of the decree. As noted above, ***HN15***[] precedent instructs the Court to "pay close attention" to provisions that address enforcement of a consent decree. Microsoft, 56 F.3d at 1462. Although divided into numerous parts and subparts, virtually every aspect of the enforcement and compliance mechanisms interrelates with some other aspect, such that the provisions can be best understood when viewed as a whole, rather than piecemeal. Accordingly, the Court will commence its careful analysis of the compliance and enforcement provisions in the proposed consent decree with detailed descriptions **[**149]** of the provisions. Once this background is established, the Court will examine the most common and salient complaints about the compliance and enforcement provisions and assess whether these complaints render this aspect of the decree to be in discord with the public interest.

a. Technical Committee and Compliance Officer

The initial focus of this portion of the consent decree concerns the "Technical Committee" which serves to "assist in enforcement of and compliance with" the terms of the consent decree. SRPFJ § IV.B.1. The three committee members are to be "experts in software design and programming." *Id.* § IV.B.2. The independence of the committee members is ensured by the exclusion from candidacy of any individual employed by Microsoft or a Microsoft competitor in the past year, or retained as a consulting or testifying expert by any person in this action or other action adverse to Microsoft. *Id.* In addition, committee members shall not perform any work for Microsoft or a Microsoft competitor for two years after serving on the committee. *Id.*

Section IV.B establishes a detailed procedure for the selection of the three committee members, with each side **[**150]** selecting one member, and those two members selecting the third member. *Id.* § IV.B.3. All members of the committee must be appointed by the Court to serve. *Id.* Committee members shall serve for a 30-month term, which is renewable at the option of the party that initially selected that member of the committee. *Id.* § IV.B.4. The third member may be reappointed or replaced pursuant to the same procedure by which that member was selected. *Id.*

Although the Technical Committee serves Plaintiffs, Microsoft is responsible for the cost and expense of the service of the committee, including the payment of reasonable fees and expenses. *Id.* § IV.B.6. In addition, Microsoft is obligated to provide each committee member with a permanent office and related facilities on its corporate campus in Redmond, Washington. *Id.* § IV.B.7. At the further cost and expense of Microsoft, the committee may, with approval of the government, hire impartial staff and consultants to assist the committee in performing its duties. *Id.* § IV.B.8.h.

The committee is empowered broadly to "monitor Microsoft's compliance with its obligations under [the] Final Judgment." *Id.* § IV.B. **[**151]** 8.a. In concert with this broad grant of authority, the proposed final judgment specifies that the committee may, on reasonable notice to Microsoft, interview Microsoft personnel; inspect and copy Microsoft documents; access Microsoft systems, equipment, premises, and facilities; and require Microsoft personnel to compile data, reports, or other information. *Id.* § IV.B.8.b. The proposed final judgment further specifies that the Technical Committee **[*197]** shall have access to Microsoft source code and that the committee may study, interrogate, and interact with the source code in conjunction with its duties. *Id.* § IV.B.8.c.

As evidenced by the reporting requirements attendant to the Technical Committee's duties, the committee is answerable to the government. The proposed final judgment mandates that the committee provide bi-annual reports to Plaintiffs regarding the actions undertaken by the committee in furtherance of its duties. *Id.* § IV.B.8.e. Such reports shall include an identification of the business practices reviewed and the ensuing recommendations of the committee to Microsoft. *Id.* Notwithstanding this reporting obligation, the committee must also provide a written **[**152]** report to the government immediately upon "reason to believe that there may have been a failure by Microsoft to comply with any term" of the judgment. *Id.* § IV.B.8.f.

The Technical Committee is empowered to receive complaints from Microsoft's "Compliance Officer" as well as from third parties or the government. *Id.* § IV.B.8.d. When the committee receives complaints from third parties, it may communicate with these parties regarding their complaints, but the committee is ultimately obliged to maintain confidentiality with regard to information obtained from Microsoft. *Id.* § IV.B.8.g. In fact, the proposed final judgment mandates that the committee and its consultants and staff enter into confidentiality agreements with Microsoft such that all information gathered by the committee from Microsoft is not disclosed beyond Microsoft, Plaintiffs, or the Court. *Id.* § IV.B.9. In this regard, the committee is expressly banned from making public statements relating to its activities. *Id.* § IV.B.10.

As the Technical Committee is the enforcement arm of the government, the substantial counterpart to the committee is the Microsoft Internal Compliance Officer. In contrast **[**153]** to the impartiality of the Technical Committee, however, the Compliance Officer is far more closely aligned with Microsoft. The Compliance Officer will be an employee of Microsoft responsible for administering Microsoft's antitrust compliance program and "helping to ensure compliance" with the decree. *Id.* § IV.C. In accordance with the general duty to supervise Microsoft's compliance, the Compliance Officer is specifically obligated under the proposed consent decree with distributing a copy of the final judgment to all present officers and directors of Microsoft and their successors. SRPFJ § IV.C.3. The Compliance Officer must ensure that such officers and directors are "annually briefed on the meaning and requirements of [the] Final Judgment and the U.S. antitrust laws and advising them that Microsoft's legal advisors are available to confer with them regarding any question concerning compliance with [the] Final Judgment or under the U.S. antitrust laws." *Id.* § IV.C.3.c. Likewise, the Compliance Officer must obtain from each such officer and director "an annual written certification that he or she: (i) has read and agrees to abide by the terms of [the] Final Judgment; **[**154]** and (ii) has been advised and understands that his or her failure to comply with [the] Final Judgment may result in a finding of contempt of court." *Id.* § IV.C.3.d. In concert with these duties, the Compliance Officer must maintain records of the above-described distribution and certification. *Id.* § IV.C.3.e. Lastly, the Compliance Officer is specifically obliged to receive complaints from third parties and the government concerning Microsoft's compliance and to maintain a record of all such complaints and the action taken by Microsoft with respect to each such complaint. *Id.* § IV.C.3.g-h

In addition to these core duties, both the Technical Committee and the Compliance **[*198]** Officer are obliged to take certain action in conjunction with efforts toward the voluntary resolution of disputes. Along with the government, the Technical Committee and the Compliance Officer may receive complaints from third parties regarding Microsoft's compliance with the terms of the decree. *Id.* § IV.D. The Compliance Officer and the Technical Committee may also receive complaints from each other and from the government. *Id.* In order to facilitate the communication of such complaints **[**155]** and inquiries by third parties, the Compliance Officer is responsible for providing information on Microsoft's web site regarding the submission of complaints and for enabling the submission of complaints and inquiries to the Compliance Officer via the website. *Id.* §§ IV.C.3.f. and IV.D.3.b. Within thirty days of the receipt of such complaint, Microsoft may "attempt to resolve it or reject it" and must then "promptly advise the [Technical Committee] of the nature of the complaint and its disposition." *Id.* § IV.D.3.c.

Correspondingly, when the Technical Committee receives complaints, it shall investigate such complaints and consult with the government regarding such investigation. *Id.* § IV.D.4. During the investigation, the Technical Committee shall meet with the Compliance Officer in an effort to allow Microsoft to respond to the substance of the complaint and, thereby, reach an informal resolution of the complaint where possible and appropriate. *Id.* Where the committee finds merit in a complaint, it shall so advise Microsoft and Plaintiffs and propose a cure. *Id.* § IV.D.4.c. Notably, the work product, findings, and recommendations of the committee are not **[**156]** to be admitted in "any law enforcement proceedings before the Court for any purpose," and members of the committee are prohibited from testifying in any capacity before a court or other tribunal. *Id.* § IV.D.4.d. Similarly, any information gathered by or any report from the Technical Committee is to be treated as highly confidential pursuant to the Protective Order entered in this case. *Id.* § IV.B.9.

Notwithstanding all of the procedures in place with regard to the Technical Committee, ultimately the power to enforce the terms of the decree rests with the government. SRPFJ § IV.A. Accordingly, representatives of the government may, [30] in complete disregard of the Technical Committee, subject to lawful privilege, investigate and inspect Microsoft source code, books, accounts, correspondence, memoranda, and the like in conjunction with enforcement. *Id.* § IV.A.2. The government may interview Microsoft employees and agents and require submission of written reports. *Id.* Although Plaintiffs possess "the authority to seek such orders as are necessary from the Court to enforce [the] Final Judgment," on the occasion that the United States alleges a violation of §§ III. **[**157]** C, III.D., III.E, or III.H, it must first provide Microsoft with the opportunity to cure prior to seeking an order from the

[30] The SRPFJ provides this power equally to the United States and the Settling States but requires that the States shall consult first with the "States' enforcement committee to minimize the duplication and burden of the exercise of [such] powers, where practicable." SRPFJ § IV.A.

Court. *Id.* § IV.A.4. Any such cure will not constitute a defense to enforcement with respect to "knowing, willful or systematic violations." *Id.*

Having thoroughly reviewed the provisions specific to compliance and enforcement proposed by the parties, the Court turns its attention to the merits of these provisions. The most common complaints about the compliance and enforcement scheme concern the Technical Committee, **[*199]** with the overall rallying cry that the committee will be an ineffective tool for delay. In sum, in the Court's view, much of the criticism in this regard misunderstands the role of the Technical **[**158]** Committee. Although Microsoft plays a role in the selection of the committee's members and the committee is portrayed as "independent" in many regards, the proposed decree itself, as well as the parties' filings make clear that the committee exists to assist the government in enforcing the decree. *See, e.g.*, United States Resp. at 191-93; Microsoft Mem. in Support of the SRPFJ at 61; CIS at 56-58. The impartial or independent nature of the committee's members exists primarily to enable investigation of third-party complaints for purposes of enforcement. Impartiality of the committee will likely foster an environment of cooperative resolution, rather than one of persistent conflict and litigation. Otherwise, attempts at enforcement have a greater potential to take on the tenor of adversary proceedings, resolved in most instances with great difficulty and delay.

Importantly, the Technical Committee is not intended as a substitute for the enforcement authority of the United States. As explained at the Tunney Act hearing, the proposed consent decree "does not . . . cede the enforcement powers of the Department of Justice to some other entity." Tr. at 39. Instead, the proposed decree **[**159]** appropriately devises a mechanism for the provision of impartial and expert compliance assessment to the parties charged with enforcement. Such assistance, which comes at a cost to Defendant only, can only assist Plaintiffs' enforcement efforts and should not be viewed as a hindrance or a cause of delay. Dovetailing with the misunderstanding of the role of the Technical Committee are complaints regarding the qualifications for the committee's members. Because the SRPFJ sets forth only minimum qualifications with regard to technical expertise, some entities and individuals complain that the committee will be unskilled at interpretation of the decree-which requires legal expertise. As the legal interpretation of the decree is properly left to the parties, with ultimate authority resting with the Court, the focus on the technical expertise of the Technical Committee is far from troubling. Although the committee will investigate technical issues and advise the government, the responsibility remains with the government to examine the terms of the decree and assess in the first instance whether, as a legal matter, the decree has been violated. Should the government take the view there has **[**160]** been a violation, it is the government, not the Technical Committee, which must present that view to the Court.

Similarly misunderstanding the role of the Technical Committee, some entities filing comments complain that the Technical Committee is not required to inform third parties of the status or ultimate resolution of their complaints. Once again, the committee serves Plaintiffs-the entities properly responsible for enforcing the decree, not third parties. Certainly third-party input will be significant in assessing compliance and ensuring the decree's overall effectiveness. The decree, therefore, provides wide avenues for third-party input. Still, third-party concerns cannot supplant the ultimate enforcement role of the government, nor should third-party complaints burden mechanisms established for the government's and ultimately the Court's benefit.

Another significant criticism regarding the Technical Committee finds its roots in the bar on the use of Technical Committee "work product, findings or recommendations" in judicial proceedings. Those who find fault in this aspect of the decree tend to interpret the bar broadly, speculating that there exists a "fruit of the poisonous **[**161]** tree" rule, such that any information **[*200]** in the hands of the committee cannot be utilized by Plaintiffs in formal enforcement proceedings before the Court. Such an interpretation ignores the plain language of the provision and the unequivocal intent of the parties. The government was clear on this point on numerous occasions. The limitation on the use of Technical Committee work product does not preclude the government from "utilizing, relying on, or making derivative use of the [Technical Committee's] work product" in conjunction with its own enforcement activities, CIS at 58, nor does the provision preclude Plaintiffs from obtaining Microsoft documents from the committee for use in an enforcement proceedings. Tr. at 46. In short, the prohibition on the use of committee work product is most accurately described as "a narrow recognition that the opinions or conclusions reached by the committee as a whole or by members of the committee would not be admissible, but the information that they gather certainly would be used by [the government] and introduced into evidence by [the government]." *Id. at 46-47*.

b. Retention of Jurisdiction

One of the more salient concerns **[**162]** raised in the comments is the fact that neither Microsoft, nor the government, are obliged under the proposed decree to report to the Court regarding Microsoft's compliance with the decree. Compounding this omission from the decree is the limited nature of the clause specifying the degree to which the Court retains jurisdiction. Section VII provides in full:

> Jurisdiction is retained by this Court over this action and the parties thereto for the purpose of enabling either of the parties thereto to apply to this Court at any time for further orders and directions as may be necessary or appropriate to carry out or construe this Final Judgment, to modify or terminate any of its provisions, to enforce compliance, and to punish violations of its provisions.

SRPFJ § VII. The D.C. Circuit recently made clear that ***HN16***[] "district courts enjoy no free-ranging 'ancillary' jurisdiction to enforce consent decrees, but are instead constrained by the terms of the decree and related order." *Pigford v. Veneman, 292 F.3d 918, 924 (D.C. Cir. 2002)*. The *Pigford* court further explained that the district court's power over a consent decree, reflecting the hybrid between judicial **[**163]** order and contract, is limited to two sources. A district court may interpret and enforce a decree to the extent authorized by the decree itself or by the related order. *Id. at 923*. Additionally, a district court may modify a decree pursuant to *Rule 60(b)(5) of the Federal Rules of Civil Procedure*. *Id.* This latter power is circumscribed by the Rule's requirements that such modification is appropriate if "it is no longer equitable that the judgment should have prospective application." *Fed. R. Civ. P. 60(b)(5)*; *Pigford, 292 F.3d at 925*. As the D.C. Circuit recounted the present state of the law, "a significant change in circumstances [may] warrant[] revision of [a] decree," *id.* (quoting *Rufo v. Inmates of Suffolk Co. Jail, 502 U.S. 367, 383, 116 L. Ed. 2d 867, 112 S. Ct. 748 (1992))*, though any such revision must be "suitably tailored to the changed circumstances," *id.* (quoting *Rufo, 502 U.S. at 370*).

A strict reading of § VII would appear to limit this Court's jurisdiction to "enabling either of the parties thereto to apply to this Court . . . for further orders and directions as may be necessary or appropriate to carry out or construe **[**164]** this Final Judgment, to modify or terminate any of its provisions, to enforce compliance, and to punish violations of its provisions." SRPFJ § VII. This language does not clearly vest the Court with the authority to act *sua sponte* to order certifications **[*201]** of compliance and other actions by the parties.

Such a circumstance is not acceptable to the Court. The Court considers it imperative, in this unusually complex case, for the Court's retention of jurisdiction to be clearly articulated and broadly drawn. Such clarity and broad reservation of power are necessary to ensure that the Court may require action of the parties when it deems appropriate and need not wait for the parties to file a motion before action is taken. The government, in its colloquy with the Court, indicated its view that the Court would be free to require the government to file reports with the Court on issues relating to the "progress of enforcement of the decree," Tr. at 47-48, but the retention of jurisdiction in § VII does not reflect this view. Indeed, counsel indicated that the parties expressly opted *not* to identify the specific mechanism for reporting to the Court based upon the view that they "didn't **[**165]** think it was [their] place to tell the Court how often [it] might want reports from [the parties]." *Id. at 48*. Counsel went on to explain that they "didn't think that Microsoft and [the government] should be negotiating that, but rather wait to hear from [the Court] on that," anticipating that if the Court "has any concerns at all [it] will let [the parties] know and [they] will fix it." *Id.*

As the proposed final judgment is presently drafted, the Court is not convinced that it has retained the authority, on its own volition, to inform the parties of a particular concern and to require additional action by the parties. Given the parties apparent intent to the contrary, the Court cannot conclude that this aspect of the proposed final judgment is in the public interest. As this Court "must preside over the implementation of the decree," the Court "is certainly entitled to insist" upon precision in the decree's reflection of the intent of the parties. *Microsoft, 56 F.3d at 1461-62*. As a result, this Court takes the view that the proposed final judgment should be amended to reflect the intent expressed to the Court at the March 6, 2002, hearing. **[**166]** In the absence of a clear reflection of the parties' intent with regard to the Court's involvement, the Court is unable to find that the decree is in the public interest.

As the Court "can foresee difficulties in [the] implementation" of a decree wherein the retention of jurisdiction does not make clear the Court's power to act *sua sponte* as may be appropriate or necessary, the Court must "insist that [this] matter be attended to." *Id. at 1462*. The Court suggests that the public interest would be served if Microsoft and the United States (and the Settling States) would agree to amend the proposed final judgment to reserve for the Court, in addition to the powers presently specified in the proposed final judgment, the power to *sua sponte* issue orders or directions regarding to the final judgment, including, but not limited to orders regarding the construction or carrying out of the final judgment, the enforcement of compliance therewith, and the punishment of any violation thereof. Such an amendment would not appear to work a fundamental change to the parties' agreement and would ensure that the Court retains the power intended by the parties and which **[**167]** the Court deems necessary to ensure effective implementation of the final judgment in this case.

Because the Court has found all other aspects of the proposed final judgment to be in the public interest, the Court is loathe to reject the proposed consent decree on this defect alone. Rather, the more prudent course appears to be a conditional approval of the consent decree, dependent upon the parties' prompt agreement to the modification proposed by the Court, or some similar modification. Accordingly, **[*202]** out of an abundance of caution, the Court will condition its approval of the consent decree pending an alteration to § VII which makes clear that the Court may take appropriate action regarding enforcement of the decree on its own volition and without prompting by the parties. In the presence of such a provision, there will be no doubt that the Court may require certifications of compliance, the regular status reporting, and other action by the parties as the Court deems necessary or appropriate.

IV. CONCLUSION

In conclusion, the Court is compelled to comment more generally on the terms of the proposed remedy. First, the Court commends the parties for their intense efforts at **[**168]** reaching a settlement and their willingness to try to do so in the face of previous failures. Second, and more importantly, praise is due based solely on the quality of the fruits of their collaborative labors. While the proposed final judgment, in general, is appropriately crafted to address the anticompetitive conduct, as well as conduct related thereto, the Court regards the document as laudable not for these traits alone, but for the clear, consistent, and coherent manner in which it accomplishes its task. Far from an amalgam of scattered rules and regulations pieced and patched together to restrict Microsoft's anticompetitive business conduct, the proposed final judgment adopts a clear and consistent philosophy such that the provisions form a tightly woven fabric. The proposed final judgment takes account of the theory of liability advanced by Plaintiffs, the actual liability imposed by the appellate court, the concerns of the Plaintiffs with regard to future technologies, and the relevant policy considerations. The product, although not precisely the judgment the Court would have crafted, with the exception of the reservation of jurisdiction, does not stray from the realm of **[**169]** the public interest.

Based on the foregoing, the Court finds that, with the exception of § VII of the SRPFJ, the Court is satisfied that the parties have reached a settlement which comports with the public interest. With regard to § VII, the Court's only reservation concerns the retention of jurisdiction. Accordingly, the Court will conditionally approve the proposed consent decree as the final judgment in this case. Such conditional approval will become final following the submission by the parties of an amendment to § VII which reflects the parties' intention that the Court retain jurisdiction to take action *sua sponte* in conjunction with the enforcement of the decree. Upon receipt of such an amendment, if satisfied with the proposal, the Court will enter the proposed final judgment, as amended, as the final judgment in this case. The Court provides in a separate Order that the parties shall indicate their intent on this issue in a written submission filed with the Court not later than November 8, 2002.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN4[] **Subject Matter Jurisdiction, Federal Questions**

Where a plaintiff's well-pleaded complaint seeks declarations of patent noninfringement, the complaint arises, in part, under *28 U.S.C.S. § 1338*. This is so because the well-pleaded complaint rule governs district court patent jurisdiction under *§ 1338* to the same extent that it governs the existence of general federal question jurisdiction under *28 U.S.C.S. § 1331*. Jurisdiction exists under *28 U.S.C.S. § 1338* only in those cases in which a well-pleaded complaint establishes either that federal patent law creates the cause of action or that the plaintiff's right to relief necessarily depends on resolution of a substantial question of federal patent law, in that patent law is a necessary element of one of the well-pleaded claims.

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

HN5[] **Subject Matter Jurisdiction, Federal Questions**

In the context of declaratory judgments under *28 U.S.C.S. § 1331*, a plaintiff's complaint arises under federal law if the cause of action that the declaratory defendant threatens to assert arises (or would arise) under federal law. Under the doctrine of Skelly Oil Co., which interpreted the federal Declaratory Judgment Act so as not to confer jurisdiction over cases that otherwise would not arise under federal law, federal courts regularly exercise jurisdiction over suits in which, if the declaratory judgment defendant brought a coercive action to enforce its rights, that suit would necessarily present a federal question.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Patent Law > Remedies > Declaratory Judgments

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Exclusive Jurisdiction

Patent Law > Infringement Actions > General Overview

Patent Law > ... > Defenses > Patent Invalidity > Grounds

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > General Overview

Patent Law > Remedies > General Overview

HN6[] **Jurisdiction, Subject Matter Jurisdiction**

In the context of a complaint seeking a declaration of noninfringement, the action threatened by the declaratory defendant would be an action for patent infringement. Such an action clearly arises under the patent laws. Federal courts have consistently adjudicated suits by alleged patent infringers to declare a patent invalid, on the theory that an infringement suit by the declaratory judgment defendant would raise a federal question over which the federal courts have exclusive jurisdiction.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Exclusive Jurisdiction

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > General Overview

HN7[] **Jurisdiction Over Actions, Exclusive Jurisdiction**

That a defendant actually counterclaimed for patent infringement is irrelevant to the United States Court of Appeals for the Federal Circuit's jurisdiction. Instead, it is the plaintiff's well-pleaded complaint which seeks declarations of patent noninfringement that controls, regardless of whether or not the defendant counterclaimed for patent infringement in response to the plaintiff's complaint.

HN12[] **Jurisdiction Over Actions, Exclusive Jurisdiction**

United States Court of Appeals for the Federal Circuit law applies to causes of action within the exclusive jurisdiction of the Federal Circuit.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN13[] **Monopolies & Monopolization, Actual Monopolization**

Under *15 U.S.C.S. § 2* of the Sherman Act, the offense of monopoly has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN14[] **Relevant Market, Geographic Market Definition**

Defining the relevant market is indispensable to a monopolization claim under *15 U.S.C.S. § 2* of the Sherman Act. The relevant market has two dimensions, the relevant product market which includes a determination of the lack or presence of readily available substitutes and the relevant geographic market when the competition is geographically confined. The relevant market is determined by choices available to purchasers and is composed of products with reasonable interchangeability.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN15[] **Public Enforcement, State Civil Actions**

California's state antitrust statute, the Cartwright Act, is patterned after the Sherman Act, and Sherman Act decisions are applicable to cases under the Cartwright Act. *Cal. Bus. & Prof. Code § 16700 et seq.*

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Effect of Inequitable Conduct

HN16[] **Defenses, Bad Faith Enforcement**

In general, federal patent law bars the imposition of liability under federal or state law for publicizing a patent in the marketplace unless the plaintiff can show that the patent holder acted in bad faith. A patent owner has the right to enforce its patent, and that includes threatening alleged infringers with suit.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

Patent Law > Infringement Actions > General Overview

HN17[] **Defenses, Bad Faith Enforcement**

A federal standard is applicable to all torts, state or federal, based on a patentee's statements about patent infringement to a potential infringer and the industry. Communication to possible infringers concerning patent rights is not improper if the patent holder has a good faith belief in the accuracy of the communication. Although "bad faith" may encompass subjective as well as objective considerations, and the patent holder's notice is not irrelevant to a determination of bad faith, a competitive commercial purpose is not of itself improper, and bad faith is not supported when the information is objectively accurate. In general, a threshold showing of incorrectness or falsity, or disregard for either, is required in order to find bad faith in the communication of information about the existence or pendency of patent rights. Indeed, a patentee, acting in good faith on its belief as to the nature and scope of its rights, is fully permitted to press those rights even though he may misconceive what those rights are.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

HN18[] **Defenses, Bad Faith Enforcement**

The law recognizes a presumption that the assertion of a duly granted patent is made in good faith; this presumption is overcome only by affirmative evidence of bad faith.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > Infringement Actions > General Overview

Patent Law > Infringement Actions > Infringing Acts > General Overview

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

HN19[] **Summary Judgment, Evidentiary Considerations**

Patentees do not violate the rules of fair competition by making accurate representations, and are allowed to make representations that turn out to be inaccurate provided they make them in good faith. Nevertheless, if the party challenging such statements under state or federal law presents clear and convincing evidence that the infringement allegations are objectively false, and that the patentee made them in bad faith, viz., with knowledge of their incorrectness or falsity, or disregard for either, the statements are actionable and are not protected by the existence of a patent. To survive summary judgment, the party challenging such statements must present affirmative evidence sufficient for a reasonable jury to conclude that the patentee acted in bad faith, in light of the burden of clear and convincing evidence that will adhere at trial.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

Patent Law > ... > Defenses > Patent Invalidity > Grounds

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Effect of Inequitable Conduct

HN20[] **Defenses, Bad Faith Enforcement**

The law regarding proof of bad faith assertion of patent rights is case-specific. In certain cases, bad faith may be clear. Exactly what constitutes bad faith remains to be determined on a case by case basis. Obviously, if the patentee knows that the patent is invalid, unenforceable, or not infringed, yet represents to the marketplace that a competitor is infringing the patent, a clear case of bad faith representation is made out.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

HN21[] **Defenses, Bad Faith Enforcement**

A decision not to sue one's own customers is not particularly probative of bad faith conduct with respect to assertion of patent rights.

Patent Law > ... > Damages > Collateral Assessments > Costs

Torts > Business Torts > General Overview

Patent Law > Infringement Actions > Infringing Acts > Intent & Knowledge

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

HN22[] **Collateral Assessments, Costs**

While notifying patent infringers without intending to file suit may be an example of bad faith, it is not dispositive. The decision to initiate a lawsuit often includes business-related considerations. For example, a patentee might have a good faith belief that a competitor's product infringes the patent but, for business-related reasons, determines the financial cost of enforcing the patent outweighs the recoverable damages. In such a circumstance, a patentee may elect to attempt to enforce the patent--or example by aggressively asserting its patent rights--and never intend to file suit. This conduct is authorized under the patent laws in the absence of falsity or incorrectness, or disregard for either. Indeed, such conduct is commonly the first step taken to enforce one's patent rights.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

Patent Law > Infringement Actions > Infringing Acts > Intent & Knowledge

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Effect of Inequitable Conduct

HN23[] **Defenses, Bad Faith Enforcement**

A party that knowingly asserts an expired, and therefore unenforceable, patent results in a clear case of bad faith.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Bad Faith Enforcement

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN24[] **Defenses, Bad Faith Enforcement**

With respect to bad faith assertion of patent rights, requiring the patent holder to prove that reliance on attorneys' opinions was reasonable effectively, and improperly, shifts the burden to the holder to prove it acted in good faith. Instead, it is the plaintiff's burden to present affirmative evidence that the holder acted in bad faith. Whether or not an opinion was "legally" correct is not the proper focus. Reliance on an attorney's oral opinion, even though it was in error, is evidence of good faith.

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > General Overview

Trademark Law > Causes of Action Involving Trademarks > Infringement Actions > General Overview

HN25[] **Federal Unfair Competition Law, Lanham Act**

The law of the pertinent regional circuit governs the assertion of federally protected trademark rights.

Torts > Procedural Matters > Preemption > General Overview

Trademark Law > ... > Unfair Competition > State Unfair Competition Laws > Federal Preemption

Trademark Law > ... > Unfair Competition > Federal Unfair Competition Law > General Overview

Trademark Law > Causes of Action Involving Trademarks > Infringement Actions > General Overview

HN26[] **Procedural Matters, Preemption**

If a trademark holder has not federally registered the mark at the time he asserts infringement, the asserted trademark rights are entirely creatures of state or common law. If that is the case, no federal statute preempts or affects state claims.

HN27[] **Trade Dress Protection, Causes of Action**

In deciding non-patent issues, such as trademark, trade dress and other unfair competition issues under § 43(a) of the Lanham Act, the United States Court of Appeals for the Federal Circuit applies regional circuit law.

Counsel: Jon E. Hokanson, Small Larkin, LLP, of Los Angeles, California, argued for plaintiff-appellant. With him on the brief was J. Thomas Gilbride, of Whittier, California.

Kenneth B. Axe, Lathrop & Clark LLP, of Madison, Wisconsin, argued for defendants-appellees. With him on the brief was Donald L. Heaney.

Judges: Before NEWMAN, GAJARSA, and PROST, Circuit Judges.

Opinion by: GAJARSA

Opinion

[*1912]** **[*1362]** GAJARSA, *Circuit Judge*.

The plaintiff-appellant, Ilan Golan ("Golan"), seeks review of the final judgment of the United States District Court for the Central District of California granting summary judgment to the defendants-appellees, Pingel Enterprise, Inc., Wayne **[*1363]** and Donna Pingel, and Arlen Ness (together "Pingel"), on Golan's federal and state antitrust and unfair competition claims, and state tort claims. The district court determined that none of Golan's claims could survive Pingel's motion for summary judgment because Pingel made no actionable false or misleading statements. We affirm the grant of summary judgment dismissing **[**2]** the federal and state antitrust claims because Golan failed to show Pingel possessed monopoly power in the relevant market. We also affirm the grant of summary judgment dismissing the federal and state unfair competition claims and state tort claims because Golan has not presented clear and convincing evidence sufficient for a reasonable jury to conclude Pingel acted in bad faith. Finally, because the district court applied the wrong law to the statements relating to trademark infringement, we reverse and remand for proceedings consistent with our opinion herein.

I. BACKGROUND

Pingel manufactures after-market motorcycle fuel valves, also called "petcocks," for Harley-Davidson motorcycles. Petcocks regulate the flow of fuel between the fuel tanks and the engine. Pingel sells its petcocks under the unregistered trademark "Power-Flo," and owns utility and design patents relating to motorcycle fuel valves.

Golan also manufactures after-market products for Harley-Davidson motorcycles. Golan's product line includes a fuel filter, and a fuel valve. Golan markets both the filter and the valve under the trademark "Peak Flow." Through distributors, Golan advertised the Peak Flow filter as **[**3]** early as 1997. The Peak Flow fuel valve became available sometime in 1998. The record contains evidence that Golan showed a prototype of the Peak Flow fuel valve at a trade show in February 1998, but both Golan and Pingel represented to the district court that Golan's first sale of the Peak Flow valve was in October, 1998.

In 1997, one distributor, Rivera Engineering ("Rivera"), issued a promotional brochure advertising Golan's Peak Flow filter. Pingel received this brochure, which advertised that the Peak Flow filter was "flow rated at 6.3 gallons per minute," and requested a sample Peak Flow filter from Golan. Golan provided the sample. Wayne Pingel testified that he tested the Peak Flow filter and found that it failed to exhibit the advertised flow rate. Pingel then faxed a handwritten note to Rivera, on September 24, 1997. This facsimile, addressed to "Distributor," indicated that Wayne Pingel had tested the filter, and stated:

> I don't recommend these filters with my or stock HD valves. Don't be mislead [sic], they will *not* flow 6 gal. per minute on *any* gravity system.

The district court found that in response, "Rivera apparently ignored Pingel's warning **[**4]** and continued to carry the fuel filter."

In late 1998, Pingel became aware that Golan was selling the Peak Flow fuel valve. Pingel obtained a sample of the valve, and consulted his then-patent attorney. The district court found that "in consultation with his long-time patent attorney, . . . Pingel determined that [Golan's] valve infringed a [Pingel] utility patent, a [Pingel] design patent, and [Pingel's] 'Power-Flo' trademark for petcock valves." **[***1913]**

Through his patent attorney, Pingel sent a cease-and-desist letter to Golan. The letter, dated October 30, 1998, accused Golan of infringing United States Patent No. **[*1364]** 4,250,921 ("the '921 patent"), United States Patent No. Des. 363,533 ("the '533 design patent"), and Pingel's Power-Flo mark for petcocks. The letter demanded that

Golan "immediately cease and desist *all* manufacturing and *all* sales of [Golan's] petcock." The letter also warned that failure to terminate manufacturing and selling of the valves "will result in legal action for patent and trademark infringement." Wayne Pingel testified that at the time this letter was sent, Pingel was contemplating a lawsuit against Golan.

On November 2, 1998, several days **[**5]** after sending the cease-and-desist letter to Golan, Pingel sent a letter to each of its twenty-two distributors. This letter stated:

> The purpose of this letter is to alert our distributors that a petcock manufactured and distributed by Golan Products, [sic] infringes patents and a trademark held by Pingel Enterprise, Inc. We are taking immediate action to halt the production and sale of this product.
>
> If you are approached to distribute a petcock for Golan Products, or if you have any questions or comments, please call me. . . .

Pingel's letter to the distributors failed to specify which patents and trademark Golan's fuel valve allegedly infringed. Golan presented evidence that subsequent to receiving this letter, one distributor, Custom Chrome, cancelled a purchase order for Golan's valves that had already been filled and paid for.

The record contains evidence that just before February, 1999, Wayne Pingel called Mel Magnet, President of Rivera. Mr. Pingel allegedly opened this conversation by asking, "isn't one fuel valve enough," and stating that Golan's valve infringed Pingel's valve, and that it would be "a pleasure to take you down." On February 5, 1999, Pingel, **[**6]** through its attorney, sent a letter to Mel Magnet of Rivera demanding that Rivera cease and desist all sales of Golan's Power Flow petcock. Pingel's attorney also sent a letter requesting that Golan's attorney agree to accept service of a summons and complaint for infringement on Golan's behalf.

During his deposition, Pingel's attorney, White, admitted that when he sent this letter, Pingel had not authorized him to file an infringement suit. Additionally, Pingel testified that he had not authorized White to initiate litigation against Golan and that he had no intention of suing Rivera when he sent Rivera the letter demanding that Rivera cease and desist selling Golan's valve.

After sending these letters, Pingel contacted at least two additional outside attorneys in order to assess the likelihood of prevailing on the merits of its infringement claims. Both outside attorneys told Pingel the litigation would be expensive and that the issues were "close." The first outside attorney issued one opinion orally. The second outside attorney sent Pingel a letter on March 31, 1999, stating that "whether Pingel would prevail on any of [its potential] claims is a close issue." The letter **[**7]** also informed Pingel, albeit incorrectly, that "the '921 patent expires April 23, 1999, which is 20 years from after the filing of its application." [1] The letter also advised Pingel "to engage an independent **[*1365]** intellectual property attorney to formally evaluate these claims and offer an opinion as to whether there is infringement." Pingel did not initiate patent or trademark infringement litigation against Golan.

[8]** In March, 1999, less than five months after Pingel's cease-and-desist letter, Golan initiated the present action. Golan sought declaratory judgment of noninfringement for the "Power-Flo" trademark and for several patents owned by Pingel, including the two patents referenced in the cease-and-desist letter. Golan also alleged federal and state antitrust claims, federal and state unfair competition claims, and state law business tort claims.

Pingel filed an answer and counterclaims. Pingel's answer alleged that the district court **[***1914]** lacked subject matter jurisdiction due to the absence of a case or controversy regarding the patents other than the '533 design

---

[1] Effective June 8, 1995, the patent laws were amended to change the term of a patent from seventeen years measured from the date the patent issued to twenty years measured from the filing date of the earliest U.S. application for which priority benefit is claimed. Applications that were filed on or after June 8, 1995 have a twenty year term measured from the date of filing. All patents that were in force on June 8, 1995, or that issued on an application that was filed before June 8, 1995, have a term that is the greater of the twenty year term or seventeen years from the patent grant. *35 U.S.C. § 154(c)(1) (2000)*. The '921 patent was filed on April 23, 1979, claimed priority to a divisional application filed on May 10, 1978, and issued on February 17, 1981. Thus, the '921 patent expired on May 10, 1998, not April 23, 1999 as Pingel's attorney incorrectly advised.

patent and the '921 patent. Pingel's counterclaims included trademark and unfair competition claims pertaining to the Power-Flo mark, and infringement of the '533 design patent. Although Pingel did not counterclaim for infringement of the '921 patent, neither did it represent that the court lacked jurisdiction for want of a case or controversy regarding that patent. Rather, Pingel admitted that the '921 patent expired on May 10, 1998, but stated that the defendants lacked knowledge regarding when Golan's Peak Flow petcock was first **[**9]** offered for sale.

Golan v. Pingel Enter., Inc., No. CV 99-3143 (C.D. Ca. Nov. 4, 1999)Golan moved for partial summary judgment of noninfringement of the '533 design patent and of the '921 patent. Golan filed its motion regarding the '921 patent on August 27, 1999. Pingel filed an opposition to Golan's motion for summary judgment of noninfringement of the '921 patent on October 4, 1999. The opposition stated, for the first time, that there was no case or controversy because the '921 patent had expired, that Golan testified he first sold the Peak Flow petcock after the expiration of the patent, and that Pingel had asserted no claim of past or present infringement. The opposition acknowledged that the October 10, 1998 cease-and-desist letter from Pingel's counsel to Golan was sent after the patent expired. In addition to its opposition, Pingel also filed a statement of nonliability, in which Pingel covenanted not to sue Golan or any of its customers for infringement of the '921 patent.

The district court granted Golan's motion for summary judgment of noninfringement of the '533 design patent. (memorandum of decision granting partial summary judgment). The court dismissed Golan's **[**10]** claim for declaratory judgment of noninfringement of the '921 patent as moot. *Golan v. Pingel Enter., Inc.*, No. CV 99-3143 (C.D. Cal. Nov. 4, 1999) (order dismissing motion as moot).

Pingel then moved for summary judgment on Golan's tort, unfair competition, and antitrust claims. The district court found that these claims rested entirely on one or both of two activities: **[*1366]** Pingel's communications with Rivera regarding the flow rate of Golan's filter, and Pingel's communications with Golan and Pingel's distributors regarding Golan's alleged patent and trademark infringement. The district court held that neither activity is actionable. Pingel's facsimile communication with Rivera, it determined, was not actionable because Golan provided no evidence to show that the assertion contained in the facsimile -- that Golan's filter failed to flow at the advertised 6.3 gallons per minute in a gravity system -- was untrue. [2] Pingel's communications regarding Golan's alleged infringement, the district court determined, were not actionable because Golan provided insufficient evidence to rebut the presumption that Pingel made the claims in good faith. Consequently, the court granted summary judgment **[**11]** on Golan's tort, unfair competition, and antitrust claims. [3]

[12]** Golan appeals, contending that issues of material fact preclude summary judgment on his tort, unfair competition, and antitrust claims.

II. JURISDICTION

Although Pingel's counterclaims requested direct coercive relief under the patent laws, in [*Holmes Group, Inc. v. Vornado Air Circulation Sys., Inc., 535 U.S. 826, 153 L. Ed. 2d 13, 122 S. Ct. 1889, 1893 (2002)*], the Supreme

---

[2] In making this determination, the district court excluded portions of Golan's declaration as hearsay and for lack of foundation, and excluded Exhibit B to Golan's declaration on these grounds as well as failure to produce previously the document in discovery.

[3] The district court declined to grant Pingel's motion for summary judgment regarding the trademark claim but, subsequently, the parties stipulated to dismissal without prejudice of Pingel's trademark counterclaims and of Golan's claim for declaratory judgment of noninfringement of Pingel's trademark. The district court ultimately ordered the trademark claims dismissed without prejudice. Although the district court did not provide a Rule 54(b) certification or other entry of final judgment, this case appears to satisfy the final judgment rule. ***HN1***[] This court applies the law of the pertinent regional circuit, here the Ninth Circuit, to determine whether the district court's entry was final relative to all pending issues. *See* *CAE Screenplates Inc. v. Heinrich Fiedler GMBH & Co., 224 F.3d 1308, 1314-15, 55 USPQ2d 1804, 1808 (Fed. Cir. 2000)*. ***HN2***[] The Ninth Circuit recently issued an opinion that expressly approved of the exercise of jurisdiction "in a situation indistinguishable from ours," in which the Sixth Circuit held "that appellate jurisdiction exists where plaintiff, with the district court's permission, dismissed without prejudice the remaining claims in order to make the judgment appealable." *James v. Price Stern Sloan, Inc., 283 F.3d 1064, 1069 (9th Cir. 2002)* (citing *Hicks v. NLO, Inc., 825 F.2d 118, 120 (6th Cir. 1987)*).

Court held ***HN3***[] that *§ 1295(a)(1)* authorizes us to exercise appellate jurisdiction over only **[***1915]** those appeals in which the complaint authorized the district court to exercise jurisdiction pursuant to *28 U.S.C. § 1338*. After *Vornado*, we may no longer rely solely on counterclaims arising under the patent laws to establish our appellate jurisdiction.

Nevertheless, we have jurisdiction over this appeal ***HN4***[] because Golan's well-pleaded complaint sought declarations of patent noninfringement. Consequently, the complaint arose, in part, under *28 U.S.C. § 1338*. This is so because, as the Supreme Court directed in *Vornado*, the well-pleaded complaint rule governs district court patent jurisdiction under *§ 1338* to the same extent that it governs **[**13]** the existence of general federal question jurisdiction under *§ 1331*. *Vornado, 122 S. Ct. at 1893* ("'linguistic consistency' requires us to apply the same test to determine whether a case arises under *§ 1338(a)* as under *§ 1331*.") (quoting *Christianson v. Colt Indus. Operating* ***[*1367]*** *Corp., 486 U.S. 800, 808, 100 L. Ed. 2d 811, 108 S. Ct. 2166 (1988))*; *see also* *Christianson, 486 U.S. at 809* (holding that jurisdiction exists under *§ 1338* only in those cases in which a "well-pleaded complaint establishes either that federal patent law creates the cause of action or that the plaintiff's right to relief necessarily depends on resolution of a substantial question of federal patent law, in that patent law is a necessary element of one of the well-pleaded claims").

HN5[] In the context of declaratory judgments under *§ 1331*, the plaintiff's complaint arises under federal law if the cause of action that the declaratory defendant threatens to assert arises (or would arise) under federal law. *Franchise Tax Bd. of State of Cal. v. Constr. Laborers Vacation Trust for S. Cal., 463 U.S. 1, 18, 103 S. Ct. 2841, 2850-51, 77 L. Ed. 2d 420 (1983)* **[**14]** (noting that under the doctrine of *Skelly Oil Co. v. Phillips Petroleum Co., 339 U.S. 667, 94 L. Ed. 1194, 70 S. Ct. 876 (1950)*, which interpreted the federal declaratory judgment act so as not to confer jurisdiction over cases that otherwise would not arise under federal law, federal courts regularly exercise jurisdiction over suits in which "if the declaratory judgment defendant brought a coercive action to enforce its rights, that suit would necessarily present a federal question"). ***HN6***[] In the context of a complaint seeking a declaration of noninfringement, the action threatened by the declaratory defendant, here Pingel, would be an action for patent infringement. Such an action clearly arises under the patent laws. *See, e.g.*, *Pixton v. B & B Plastics, Inc., 291 F.3d 1324, 1327, 62 USPQ2d 1944, 1946 (Fed. Cir. 2002)* (vacating dismissal and holding that district court had jurisdiction because patent infringement suit arises under the patent laws); *see also* *Franchise Tax Bd., 463 U.S. at 18 n.19* (recognizing that "federal courts have consistently adjudicated suits by alleged patent infringers to declare a patent invalid, on the theory **[**15]** that an infringement suit by the declaratory judgment defendant would raise a federal question over which the federal courts have exclusive jurisdiction") (citing *E. Edelmann & Co. v. Triple-A Specialty Co., 88 F.2d 852 (7th Cir. 1937))*. Thus, after *Vornado*, ***HN7***[] that Pingel actually counterclaimed for patent infringement is irrelevant to our jurisdiction. Instead, it is Golan's well-pleaded complaint, which sought, among other things, declarations of patent noninfringement, that controls, regardless of whether or not Pingel counterclaimed for patent infringement in response to Golan's complaint. Consequently, this court has jurisdiction over the appeal pursuant to *28 U.S.C. § 1295(a)(1)*.

III. STANDARD OF REVIEW

HN8[] This court reviews the grant of summary judgment *de novo*, reapplying the summary judgment standard to determine whether it was appropriately granted. *Pickholtz v. Rainbow Techs., Inc., 284 F.3d 1365, 1371, 62 USPQ2d 1340, 1343 (Fed. Cir. 2002)*; *Paragon Podiatry Lab., Inc. v. KLM Labs., Inc., 984 F.2d 1182, 1185, 25 USPQ2d 1561, 1563 (Fed. Cir. 1993)*. ***HN9***[] Summary judgment is appropriate when there are **[**16]** no issues of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247-48, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. Evidence, and any inferences to be drawn therefrom, must be viewed in the light most favorable to the non-movant. *Id. at 255*. ***HN10***[] Where the party opposing summary judgment bears **[*1368]** the burden of proof at trial, however, it must show more than a mere metaphysical doubt regarding the material facts. *Celotex Corp. v. Catrett, 477 U.S. 317, 322-24, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. Nor will the existence of a mere scintilla of evidence suffice. *Anderson, 477 U.S. at 251*. Rather, the non-movant must show the existence of a genuine issue of material fact, which exists only if the evidence is such that a reasonable jury could reach a verdict in its favor. *Id.* **[***1916]**

HN11[] "As a general proposition, when reviewing a district court's judgment involving federal ***antitrust law***, we are guided by the law of the regional circuit in which that district court sits. . . ." *In re Indep. Serv. Orgs. Antitrust Litig., 203 F.3d 1322, 1325, 53 USPQ2d 1852, 1854 (Fed. Cir. 2000).* **[**17]** The same is true of this court's review of Lanham Act claims. *Cont'l Plastic Containers v. Owens Brockway Plastic Prods., Inc., 141 F.3d 1073, 1080, 46 USPQ2d 1277, 1282 (Fed. Cir. 1998)*. In this case, the pertinent law is that of the Ninth Circuit.

In contrast, ***HN12***[] Federal Circuit law applies to causes of action within the exclusive jurisdiction of the Federal Circuit. *United States v. Hohri, 482 U.S. 64, 75, 96 L. Ed. 2d 51, 107 S. Ct. 2246 (1987)* (holding Congress' desire to create national uniformity requires that the Federal Circuit decide questions arising under the federal Constitution and statutes whenever such questions arise in cases within the Federal Circuit's jurisdiction); *Midwest Indus., Inc, v. Karavan Trailers, Inc., 175 F.3d 1356, 1358-59, 50 USPQ2d 1672, 1674-75 (Fed. Cir. 1999)* (*en banc*) (overruling *Cable Elec. Prods., Inc. v. Genmark, Inc., 770 F.2d 1015, 226 USPQ 881 (Fed. Cir. 1985))*; *Interpart Corp. v. Italia, 777 F.2d 678, 226 USPQ 124 (Fed. Cir. 1985)*.

IV. DISCUSSION

On appeal, Golan contends that disputed issues of material fact require this court to reverse the district **[**18]** court's grant of summary judgment dismissing each of Golan's claims. In particular, Golan points to evidence in the record indicating that Pingel made false or misleading statements regarding the performance characteristics of the Peak Flow valve, and regarding infringement of Pingel's patents and trademark, and that Pingel made these statements in bad faith. Pingel contends that this court should affirm the grant of summary judgment on all claims because the record contains no evidence that its statement regarding the flow rate of Golan's valve was untrue, or that it alleged infringement in bad faith. In the alternative, Pingel contends that this court should affirm the grant of summary judgment because the record is devoid of evidence creating a genuine issue of material fact regarding other elements of each of the asserted claims.

A. *Federal and State Antitrust Claims*

We affirm the district court's grant of summary judgment dismissing Golan's state and federal antitrust claims on alternate grounds. These claims cannot proceed because Golan failed to provide evidence that Pingel possessed monopoly power in the relevant market.

HN13[] Under *§ 2* of the Sherman Act, "the offense of **[**19]** monopoly . . . has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell* ***[*1369]*** *Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. ***HN14***[] "Defining the relevant market is indispensable to a monopolization claim" under *§ 2* of the Sherman Act. *Thurman Indus., Inc. v. Pay ' N Pak Stores, Inc., 875 F.2d 1369, 1373 (9th Cir. 1989)*. The relevant market has two dimensions, the relevant product market which includes a determination of the lack or presence of readily available substitutes and the relevant geographic market when the competition is geographically confined. *Brown Shoe Co. v. United States, 370 U.S. 294, 324, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*; *Kodak v. Image Technical Servs., 504 U.S. 451, 481-82, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)* (stating that the relevant market is determined by choices available to purchasers and is composed of products with reasonable interchangeability) **[**20]** (citing *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 404, 100 L. Ed. 1264, 76 S. Ct. 994 (1956))*; *see also* *Intergraph Corp. v. Intel Corp., 195 F.3d 1346, 1353, 52 USPQ2d 1641, 1645 (Fed. Cir. 1999)*. ***HN15***[] California's state antitrust statute, the Cartwright Act, is patterned after the Sherman Act, and Sherman Act decisions are applicable to cases under the Cartwright Act. *See* *Cal. Bus. & Prof. Code § 16700, et seq.*; *G.H.I.I. v. MTS, Inc., 147 Cal. App. 3d 256, 195 Cal.Rptr. 211, 216 (Cal. Ct. App. 1983)*.

Golan's antitrust claims cannot survive summary judgment because Golan failed to satisfy the summary judgment requirement of proffering sufficient evidentiary support to establish, *prima facie*, the possession of monopoly power in the relevant market.

Indeed, Golan's antitrust claims fail for at least two reasons. First, Golan failed to provide sufficient evidence to establish a relevant market. Golan offered only conclusory allegations that the relevant market is the "high end after-market motorcycle fuel valve market for Harley Davidson motorcycles" without further supporting evidence. Pingel presented uncontroverted **[***1917]** **[**21]** evidence that its fuel valves compete against lower priced valves that are interchangeable substitutes, and that it lacked monopoly power and could not control prices. Golan presented no expert testimony regarding monopolization or the relevant market, nor did Golan present evidence sufficient to raise a question of material fact regarding the existence or nonexistence of interchangeable substitutes. Although Golan presented declarations of dealers in the motorcycle fuel valve industry stating that Golan and Pingel's valves are the only products in the "high end high performance aftermarket motorcycle fuel valve market for Harley-Davidson motorcycles," these conclusory statements are insufficient to exclude lower priced interchangeable substitutes from the relevant market. "High end," and "high performance" are irrelevant if "lower end," and "lower performance" valves are interchangeable substitutes. Pingel's testimony regarding interchangeability is therefore uncontroverted.

Second, even assuming the relevant market is as narrow as Golan suggests, Golan failed to prove that Pingel had acquired monopoly power in this relevant market. Golan offered no evidence of market share, barriers **[**22]** to entry, or any other commonly accepted evidence showing monopoly power. From the record before us, the evidence at best shows there were two competitors in this limited market. Without proof of monopoly power Golan's antitrust claims must fail.

We therefore affirm the dismissal of Golan's antitrust claims because Golan failed **[*1370]** to satisfy the summary judgment requirement of proffering sufficient evidentiary support to establish, *prima facie*, the possession of monopoly power in the relevant market.

B. *Federal and State Unfair Competition Claims & State Tort Claims*

With regard to the remaining claims, we affirm the district court's grant of summary judgment in Pingel's favor. The district court analyzed the challenged statements under the following two categories: 1) Pingel's communications with Rivera regarding Golan's fuel filter; and 2) Pingel's allegations of patent and trademark infringement.

1. Pingel's communications with Rivera regarding Golan's fuel filter

We agree with the district court that Pingel's facsimile statement to Rivera regarding the flow rate of the Peak Flow filter was not itself actionable. This statement represented that Pingel tested the filters **[**23]** and that they would not flow at the advertised six gallon per minute rate in a gravity system. Wayne Pingel testified that he tested Golan's filter and it failed to flow at the advertised 6.3 gallons per minute rate. Golan's argument that this statement is false rests on the contention that "it is entirely possible that a reasonable jury could find that [Pingel] had made false or misleading descriptions of the *filter element* found in the [Golan] fuel filter. . . ." Applnt's Br. at 56 (emphasis added). We disagree. The facsimile plainly refers to the flow rate of the fuel filter in a gravity system, not to any limited element thereof. Because Golan's argument rests on a strained and implausible reading of the challenged statement, we agree with the district court that Golan failed to present evidence sufficient to raise a genuine issue of material fact that this statement was false or misleading. [4]

[24]** 2. Pingel's allegations of infringement

The district court considered the allegations of patent infringement and trademark infringement as a single issue. For the reasons discussed below, we address the allegations separately.

a. Patent infringement allegations

HN16[] In general, "federal patent law bars the imposition of liability [under federal or state law] for publicizing a patent in the marketplace unless the plaintiff can show that the patent holder acted in bad faith." *Zenith Elecs. Corp. v. Exzec, Inc., 182 F.3d 1340, 1353, 51 USPQ2d 1337, 1347 (Fed. Cir. 1999)* (quoting *Hunter Douglas, Inc. v. Harmonic Design, Inc., 153 F.3d 1318, 1336, 47 USPQ2d 1769, 1782 (Fed. Cir. 1998)*. "[A] patent owner has the

[4] This determination renders harmless any abuse of discretion the district court might have committed in excluding Golan's evidence regarding the flow rate of the filter element itself.

right to . . . enforce its patent, and that includes threatening alleged infringers with suit." *Concrete Unlimited, Inc. v. Cementcraft, Inc., 776 F.2d 1537, 1538, 227 USPQ 784, 785 (Fed. Cir. 1985)*.

In *Mikohn Gaming Corp. v. Acres Gaming, Inc.*, this court articulated **HN17**[] a federal standard applicable to all torts, state or federal, **[***1918]** based on a patentee's statements about patent infringement to a potential infringer and the industry. **[**25]** *165 F.3d 891, 897, 49 USPQ2d 1308, 1312 (Fed. Cir. 1998)*. We explained that

> **[*1371]** communication to possible infringers concerning patent rights is not improper if the patent holder has a good faith belief in the accuracy of the communication. Although "bad faith" may encompass subjective as well as objective considerations, and the patent holder's notice is not irrelevant to a determination of bad faith, a competitive commercial purpose is not of itself improper, and bad faith is not supported when the information is objectively accurate. In general, a threshold showing of incorrectness or falsity, or disregard for either, is required in order to find bad faith in the communication of information about the existence or pendency of patent rights. Indeed, a patentee, acting in good faith on its belief as to the nature and scope of its rights, is fully permitted to press those rights even though he may misconceive what those rights are.

Id. Moreover, in *C.R. Bard Inc. v. M3 Sys., Inc.*, we explained that:

> **HN18**[] The law recognizes a presumption that the assertion of a duly granted patent is made in good faith, *see* *Virtue v. Creamery Package Mfg. Co., 227 U.S. 8, 37-38, 57 L. Ed. 393, 33 S. Ct. 202, 1913 Dec. Comm'r Pat. 519 (1913)*; **[**26]** this presumption is overcome only by affirmative evidence of bad faith.

C.R. Bard, 157 F.3d 1340, 1369, 48 USPQ2d 1225, 1246 (Fed. Cir. 1998).

Consequently, **HN19**[] patentees do not violate the rules of fair competition by making accurate representations, and are allowed to make representations that turn out to be inaccurate provided they make them in good faith. *See* *Mallinckrodt, Inc. v. Medipart, Inc., 976 F.2d 700, 710, 24 USPQ2d 1173, 1180-81 (Fed. Cir. 1992)*. Nevertheless, if the party challenging such statements under state or federal law presents clear and convincing evidence that the infringement allegations are objectively false, and that the patentee made them in bad faith, *viz.*, with knowledge of their incorrectness or falsity, or disregard for either, the statements are actionable and are not protected by the existence of a patent. To survive summary judgment, the party challenging such statements must present affirmative evidence sufficient for a reasonable jury to conclude that the patentee acted in bad faith, in light of the burden of clear and convincing evidence that will adhere at trial.

In *Zenith Electronics*, we explained **[**27]** that **HN20**[] the law regarding proof of bad faith is case-specific. In certain cases, bad faith may be clear:

> Exactly what constitutes bad faith remains to be determined on a case by case basis. Obviously, if the patentee knows that the patent is invalid, unenforceable, or not infringed, yet represents to the marketplace that a competitor is infringing the patent, a clear case of bad faith representation is made out.

182 F.3d at 1354, 51 USPQ2d at 1348.

To show bad faith in Pingel's actions, Golan must offer clear and convincing evidence that Pingel had no reasonable basis to believe that the GP petcock infringed Pingel's patents or that Pingel knew it was enforcing an expired, and therefore unenforceable, patent. In this case, there is not clear and convincing evidence from which a reasonable jury could conclude that Pingel alleged patent infringement in bad faith or knowingly enforced an expired patent. Our review of the record reveals two separate categories of conduct which Golan asserts, either explicitly or implicitly, shows Pingel's bad **[*1372]** faith: (1) notification of infringers without intention of initiating suit; and (2) enforcing an expired patent.

First, **[**28]** Golan points to Pingel's intent not to initiate suit as evidence of bad faith. Wayne Pingel admitted during his deposition that, at the time Pingel notified Rivera of Golan's potential infringement, Pingel did not intend to initiate suit against Rivera. [5] While this admission may or may not provide a basis from which a reasonable jury could infer bad faith toward Rivera (which is not the issue here), it clearly does not provide a sufficient basis from which a jury could reasonably infer bad faith toward Golan. Indeed, Wayne Pingel also testified that Pingel was in fact contemplating a lawsuit against Golan when Pingel sent the October 30, 1998 cease-and-desist letter. Thus, the record shows only that Pingel **[***1919]** did not intend to initiate suit against Rivera and does not support an inference that Pingel did not intend to initiate suit against Golan.

[29]** ***HN22***[] While notifying infringers without intending to file suit may be an example of bad faith, *see* *Mallinckrodt, 976 F.2d at 710, 24 USPQ2d at 1181*, it is not dispositive. The decision to initiate a lawsuit often includes business-related considerations. For example, a patentee might have a good faith belief that a competitor's product infringes the patent but, for business-related reasons, determines the financial cost of enforcing the patent outweighs the recoverable damages. In such a circumstance, a patentee may elect to attempt to enforce the patent - for example by aggressively asserting its patent rights - and never intend to file suit. This conduct is authorized under the patent laws in the absence of falsity or incorrectness, or disregard for either. *See* *Mikohn, 165 F.3d at 897, 49 USPQ2d at 1312*. Indeed, such conduct is commonly the first step taken to enforce one's patent rights. Thus, even if Pingel never intended to file suit, we believe this is only a factor to consider in determining whether the enforcement of a patent is in bad faith.

Since the intention to file suit is only one factor in determining bad faith, and the only evidence in **[**30]** the record that Pingel did not intend to file suit against Golan is based on an inference, we do not believe a reasonably jury could find that Pingel acted in bad faith in light of Golan's clear and convincing evidentiary burden.

Second, the record shows that Pingel was, in fact, asserting infringement of an expired patent. ***HN23***[] A party that knowingly asserts an expired, and therefore unenforceable, patent results in a clear case of bad faith. *See* *Zenith Elecs., 182 F.3d at 1354, 51 USPQ2d at 1348*. However, the record shows that Pingel was told by at least one attorney that the '921 patent did not expire until April 23, 1999. It was only at some point well after the October 30, 1998 cease-and-desist letter that Pingel became aware that the advice it received from the attorney was incorrect. While the reliance on the attorney's calculation of patent term clearly does not affect the expiration of the patent, it does negate an inference that Pingel was asserting a patent it knew to be expired, and accordingly negates a finding of bad faith.

In further support of its decision, the district court relied upon the fact that **[*1373]** Pingel came to a determination of Golan's infringement **[**31]** in consultation with his patent attorney and later consulted with two other attorneys, both of whom confirmed that the issues were close. Golan expends considerable effort pointing out that in order to rely upon an opinion of counsel, that opinion must be credible.

As an initial note, each case Golan cites for this proposition deals with exculpatory opinions in cases of willful infringement charges or the basis for filing a lawsuit *after* filing. *See, e.g.*, *SRI Int'l, Inc. v. Advanced Tech. Labs., Inc., 127 F.3d 1462, 44 USPQ2d 1422 (Fed. Cir. 1997)*; *Judin v. United States, 110 F.3d 780, 42 USPQ2d 1300 (Fed. Cir. 1997)*; *Minnesota Mining & Mfg. Co. v. Johnson & Johnson Orthopaedics, Inc., 976 F.2d 1559, 24 USPQ2d 1321 (Fed. Cir. 1992)*; *Kloster Speedsteel AB v. Crucible, Inc., 793 F.2d 1565, 230 USPQ 81 (Fed. Cir. 1986)*. We do not believe these cases are applicable to the facts of the present case primarily because ***HN24***[] requiring Pingel to prove that reliance on the attorneys' opinions was reasonable effectively, and improperly, shifts the burden to Pingel to prove it acted in good faith. Instead, it is Golan's burden **[**32]** to present affirmative evidence that Pingel acted in bad faith. *C.R. Bard, 157 F.3d at 1369, 48 USPQ2d at 1246*. At most, the evidence shows Pingel was seeking advice from counsel in ongoing contemplation whether to actually file suit against Golan. The evidence of record relating to Pingel's reliance on attorney advice, while potentially inaccurate and questionable, does not support Golan's claim that Pingel acted in bad faith. "Whether or not an opinion was 'legally' correct is not the proper focus." *Graco, Inc. v. Binks Mfg Co., 60 F.3d 785, 793-94, 35 USPQ2d 1255, 1261-62*

---

[5] We do not place much weight on the fact that Pingel did not intend to sue Rivera, its customer, for patent infringement, as ***HN21***[] a decision not to sue one's own customers is not particularly probative of bad faith conduct.

(Fed. Cir. 1995) (quoting *Read Corp. v. Portec, Inc., 970 F.2d 816, 830, 23 USPQ2d 1426, 1438 (Fed. Cir. 1992)* (holding that reliance on an attorney's oral opinion, even though it was in error, is evidence of good faith).

From the record before us, Pingel, in asserting patent infringement of the '921 patent, had no reason to believe an attorney would provide the wrong date of patent expiration. Additionally, each attorney stated that although Pingel's case might not be particularly strong, the issues were "close." Thus, we find that the evidence does not clearly **[**33]** show that Pingel knew the '921 patent was invalid at the time it asserted infringement or that Pingel had no **[***1920]** reason to believe that Golan did not infringe any of Pingel's asserted patents.

b. Trademark infringement allegations

The parties and the district court appear to have presumed that Federal Circuit law regarding bad faith governs Pingel's assertions of trademark infringement. This is not so. ***HN25***[] The law of the pertinent regional circuit governs the assertion of federally protected trademark rights. *Al-Site Corp. v. VSI Int'l, Inc., 174 F.3d 1308, 1326, 50 USPQ2d 1161, 1172 (Fed. Cir. 1999)*.

HN26[] If, however, Pingel had not federally registered the Power-Flo mark at the time he asserted infringement, the asserted trademark rights are entirely creatures of state or common law. If that is the case, no federal statute preempts or affects the remaining state claims. Rather, Ninth Circuit law applies to the federal Lanham Act claims predicated on the assertion of state trademark rights, and state law applies entirely to the California unfair competition and business tort claims predicated on the assertion of state trademark rights. *Thompson v. Haynes, 305 F.3d 1369, 2002 WL 31155195 (2002)* **[**34]** ***HN27***[] ("In deciding non- patent **[*1374]** issues, such as trademark, trade dress and other unfair competition issues under § 43(a) of the Lanham Act, this Court applies regional circuit law."). On remand, the district court should determine which law applies and whether Pingel's allegations of trademark infringement are actionable under that law.

V. CONCLUSION

In light of the record before us, we affirm the district court's grant of summary judgment in favor of Pingel on Golan's state and federal antitrust claims because Golan failed to provide evidence that Pingel possessed monopoly power in the relevant market, and the district court's determination that Pingel's facsimile statement to Rivera regarding the flow rate of the Peak Flow filter was not actionable because Golan presented insufficient evidence that the statement was untrue. We affirm the grant of summary judgment on Golan's remaining state and federal unfair competition and state tort claims because Golan has not presented clear and convincing evidence sufficient for a reasonable jury to conclude Pingel acted in bad faith. We remand to the district court to ascertain the proper **[**35]** application of law with respect to the trademark infringement issues.

AFFIRMED-IN-PART, REVERSED-IN-PART, and REMANDED.

No costs.

For Rolex Watch USA Inc, Plaintiff: Matthew Scott Bellinger, Knobbe Martens Olson and Bear LLP, Irvine, CA; Brian W Brokate, LEAD ATTORNEY, Gibney Anthony and Flaherty LLP, New York, NY; Kathleen E McCarthy, LEAD ATTORNEY, King and Spalding LLP, New York, NY; Siegrun D Kane, LEAD ATTORNEY, Morgan & Finnegan, New York, NY; Michele V Ficarra, Gibney Anthony & Flaherty, New York, NY; Robert A Ackermann, LEAD ATTORNEY, Jenkens & Gilchrist, Los Angeles, CA; Jeffrey E Dupler, PRO HAC VICE, Gibney Anthony and Flaherty LLP, New York, NY; Craig S Summers, Knobbe Martens Olson and Bear LLP, Irvine, CA; Adam W Sgro, PRO HAC VICE, Gibney Anthony and Flaherty LLP, New York, NY; David H T Kane, LEAD ATTORNEY, Morgan & Finnegan, New York, NY.

For Zeotec Diamonds Inc, Defendant: Michael R Doram, LEAD ATTORNEY, Creskoff and Doram, Pasadena, CA.

Judges: Gary Allen Feess, United States District Judge.

Opinion by: Gary Allen Feess

Opinion

ORDER RE: PLAINTIFF'S MOTION FOR SUMMARY JUDGEMENT

I.

INTRODUCTION

Defendants Zeotec Diamonds, Inc. and Ali Paravar, its owner[1], buy Rolex watches, modify them with non-Rolex parts, retain the Rolex trademark, and **[*2]** advertise and re-sell the watches using the genuine Rolex trademark. Defendants claim that they may engage in this conduct under the "first sale" doctrine, which permits the re-sale of trademarked items once they have been sold and placed in the stream of commerce. In this lawsuit, Rolex charges that Defendants may not defend against trademark infringement under the first sale doctrine when the trademarked items being sold have been modified in ways not approved by the trademark owner. Since that defense is not available, according to Rolex, Defendants' conduct constitutes trademark counterfeiting, trademark infringement, and trademark dilution.

The issue now before this Court on summary judgment is not new to this circuit or to this trademark holder. In a materially indistinguishable case, the Ninth Circuit has found trademark infringement where a re-seller had altered Rolex watches using non-genuine components, retained the Rolex trademark on those watches, and then advertised and re-sold them with the Rolex trademark in place. *Rolex Watch U.S.A., Inc. v. Michel Co., 179 F.3d 704, 707, 710 (9th Cir. 1999)*. According to the Ninth Circuit, even the use of an additional legend along with the trademark would have been insufficient to permit the use of the genuine **[*3]** trademark, because the alteration of the watch has resulted in a new product not manufactured by the trademark owner. Id. Other district and circuit courts have reached the same conclusion. See, e.g., *Rolex Watch U.S.A., Inc., v. Meece, 158 F.3d 816 (5th Cir.1998)*, cert. denied, *526 U.S. 1133, 119 S.Ct. 1808, 143 L.Ed.2d 1011 (1999)*; see also *Westinghouse Electric Corp. v. General Circuit Breaker & Electric Supply Inc., 106 F.3d 894, 899-900 (9th Cir.)*, cert. denied, *522 U.S. 857 (1997)* ("retaining the original Westinghouse trademarks on used, reconditioned circuit breakers sold by circuit breaker vendors constituted trademark counterfeiting under section 32(1)"); *Bulova Watch Co. v. Allerton Co., 328 F.2d 20 (7th Cir.1964)* (Injunction granted because "The substitution of a different crown and case by defendants results in a different product. The watch is no longer a Bulova watch. It is a new and different "watch" albeit one containing a "movement" manufactured by Bulova.")

The undisputed or materially uncontroverted facts in this case demonstrate that Defendants' conduct varies in no significant way from the infringing conduct in these reported decisions. Accordingly, the motion for summary judgment is **GRANTED**.

II.

FACTUAL BACKGROUND

The following facts are undisputed or without substantial controversy.

A. THE PARTIES

The Plaintiff, Rolex Watch U.S.A., Inc. ("Rolex") is a New York corporation with its offices and principal place of business in New York. (SUF ¶ 1), Rolex is the exclusive distributor **[*4]** of Rolex watches in the United States and is responsible for assembling, finishing, marketing and selling Rolex products in the United States. Rolex owns (by assignment from Manufacture Des Montres S.A. Bienne, hereinafter "Bienne") the U.S. Patient and Trademark Office (USPTO) registration for the trademark Rolex. (SUF II 2, 3, 5; GIMF ¶ 99; Rolex Exhibit 1). Rolex also owns the USPTO registrations for the trademarks used in connection with Rolex watches, including: 1) OYSTER; 2)

---

[1] Corporate officers or directors are generally personally liable for all torts which they authorize or direct or participate in, and a showing of intent or bad faith is not required to prove liability under §1114. (*Hewlett-Packard Co. v. Repeat-O-Type Stencil Manufacturing Corp., et al., 1995 W.L. 552168 (N.D. Cal. 1995)* (sustaining summary judgment against a corporation's president and majority stockholder, where the undisputed facts indicated that he was involved and participated in the conduct giving rise to the corporation's trademark infringement liability). Therefore, the Court will not discuss Paravar's liability separately from that of Zeotec Diamonds, Inc.

PRESIDENT; 3) CROWN DESIGN; 4) DATEJUST; 5) GMT-MASTER; 6) OYSTER PERPETUAL; 7) YACHT-MASTER; 8) SUBMARINER; 9) ROLEX DAYTONA; 10) DAYTONA, through assignment from Montres Rolex S.A. Geneva (hereinafter "Geneva"). (SUF ¶ 6; Rolex Ex. 1). The Rolex registrations are in full force and effect and, with the exception of DAYTONA, have become incontestable pursuant to *15 U.S.C. § 1065*. (SUF ¶ 7).

Defendant, Zeotec Diamonds, Inc. ("Zeotec") is a California corporation with its principal place of business in Los Angeles, California. (SUF ¶ 38). Zeotec is in the jewelry business, involved in purchasing, selling, and appraising diamonds, watches, jewelry and precious stones. (SUF ¶ 40). Ali Paravar is the president of Zeotec. (SUF **[*5]** ¶ 39).

B. ROLEX ACTIVITIES

Rolex has sold watches in the U.S. for over 80 years and has spent over $15 million dollars a year on advertising and promoting Rolex watches, and their durability, reliability and pressure-proof performance. (SUF ¶¶ 4, 9). Rolex ads feature the Rolex and Crown Design marks and other Rolex marks. (SUE ¶ 10). Rolex has also received extensive unsolicited media publicity. (SUF ¶ 13). Over 10,000 articles from 1985-2001 mention Rolex watches. (SUF ¶ 14). Rolex was named "Watch of the century" by American Time in its "100 Years of Wrist Watches" issue and was named the number one luxury brand in a 2001 Women's Wear Daily survey. (SUF ¶¶ 15, 16). Rolex sells its watches to individuals exclusively through Official Rolex Jewelers, with whom it also engages in cooperative advertising in magazines and local newspapers. (SUF ¶¶ 8,12).

C. GENUINE ROLEX PRODUCTS

Rolex watches are made of, inter alia, stainless steel, stainless steel and gold, or all gold and are sometimes sold with diamond bezels, dials and/or bracelets. (SUF ¶ 17). Rolex watches contain the following components: the watch movement, the watch case, the dial, the bezel, and the watch bracelet and bracelet **[*6]** clasp. (SUF ¶ 18). The Rolex dial bears the Rolex and Crown Design trademarks at the 12 o-clock position. (SUF ¶ 28) The Rolex bracelet clasp bears the embossed Rolex Crown Design on the exterior and the Rolex and Crown Design marks on the interior. (SUF ¶ 32). All components are designed to be durable and long-lasting so that replacement is rarely required. (SUF ¶ 33).

Rolex watches are sold with a one-year warranty that covers the functioning of the entire watch. (SUF ¶ 34). Modification of Rolex watches by the addition or substitution of parts not authorized by Rolex renders the warranty null and void. (SUF ¶ 35). When Rolex authorized dealers service a watch, they give a one-year warranty on services performed and parts replaced. (SUF ¶ 36). Rolex policy is to refuse to service Rolex watches where non-genuine parts have been added and/or substituted, because Rolex cannot maintain its quality control standards with respect to such products. (SUF ¶ 37).

D. ZEOTEC ACTIVITIES REGARDING ROLEX WATCHES

1. In General

Zeotec offers Rolex watches for sale at trade shows and on its website, http://www.zeotec.com. (SUF ¶¶ 85, 90-91). For example, as of January 4, 2002, Zeotec's website offered **[*7]** over 20 Rolex models described as "unused" or "pre-owned." (SUF ¶¶ 86, 88). At least one of the models contained non-genuine components, but the website did not disclose their presence. (SUF ¶¶ 43, 47[2], 86, 89). Zeotec accepts orders by fax. (SUF ¶ 91).

---

[2] In SUF ¶ 47, Zeotec denies substituting a non-genuine bracelet clasp, but does not deny other allegations regarding non-genuine components. Furthermore, Zeotec's response that "Rolex does not make diamonds and the claim to "genuine" Rolex

Zeotec advertises in magazines and at trade shows and specifically promotes the profits to be made by selling Rolex watches with added diamonds. (SUF ¶¶ 80-84). For example, a Zeotec post card distributed at a trade show notes that "adding diamonds is guaranteed to increase the retail point and your margin." (SUF ¶ 84). The post card also depicts a Rolex watch split in half with the right half showing the bezel, dial, and bracelet covered with diamonds. (SUF ¶ 83). The same split Rolex watch is pictured in Zeotec's March 2002 JCK trade magazine ad. (SUF ¶ 81). The ad also contains the slogan "Business as usual" (under the non-diamond half) and "Unusually fine timepieces at a margin that will bring a smile to your face." (SUF ¶ 82). The same split Rolex watch also appears at the top of each Zeotec website page. (SUF ¶ 87).

E. ROLEX INVESTIGATIONS AND ZEOTEC ALTERED WATCHES

Rolex investigators purchased Rolex watches from Zeotec on four separate **[*8]** occasions: three times before suit was filed (the 8/27/01, 11/15/01 and 1/16/02 watches) and once after suit was filed (the 4/26/02 watch). (SUF ¶ 41). The first purchase was made at the New York City JA Jewelry trade show. (SUF ¶ 42). The next three purchases were made after the investigators accessed the Zeotec website http://www.zeotech.com and inquired about specific models displayed on the site. (SUF ¶ 43).

Rolex evaluated the Zeotec watches to identify the presence of non-genuine components, which they define as components not authorized by Rolex. (SUF ¶ 44).

1. The 8/27/01 Watch

Zeotec concedes that the 8/27/01 Men's steel and gold Rolex contained a non-genuine diamond bezel and non-genuine diamonds added to dial.[3] (SUF ¶ 45). Likewise, Zeotec does not dispute the following quality deficiencies in the Zeotec watch relative to its Rolex equivalent:

a. The diamonds on the watch are not uniform in size as are the diamonds on a genuine Rolex diamond dial (SUF ¶ 56);

b. some of the Zeotec diamonds and diamond settings were set in a crooked manner. (SUF ¶ 56); and

c. the fit of the non-genuine bezel was not sufficiently tight to protect against penetration of moisture into the movement over **[*9]** time. (SUF ¶ 57).

2. The 11/15/01 Watch

Zeotec concedes that the 11/15/01 Lady's steel and gold Rolex contained a non-genuine diamond bezel, non-genuine finish on rose dial, and non-genuine diamonds added to the dial.

Zeotec also does not dispute how the customization was performed, which involved removing the hour stick markers, the Crown Design trademark, and the Rolex and Oyster Perpetual trademarks, stripping the dial surface, reapplying the paint onto the dial surface, reprinting the word trademarks and reattaching the Crown Design mark. (SUF ¶ 58). Diamonds were added by drilling holes in 10 places where the hour stick markers were removed from the dial and inserting diamond settings in the holes. (SUF ¶ 59). Regarding quality deficiencies, Zeotec does not dispute that:

---

diamonds is meaningless", ignores as Rolex points out - that Rolex defined non-genuine components as components not authorized by Rolex in SUF ¶ 44.

[3] Zeotec's only response to this and other allegations of non-genuine parts, except as otherwise noted, was that "Rolex" does not make diamonds and the claim to "genuine" diamonds is meaningless. However, they did not provide any factual support for this assertion or appear to address Rolex's defining non-genuine to mean "components not authorized by Rolex." Thus, these facts will be deemed undisputed.

a. The diamond settings are affixed with glue and so are more subject to falling off, as compared to genuine Rolex diamond settings that are riveted on the dial. (SUF ¶ 60);
b. the non-genuine bezel contains a 14-Kt gold, whereas a genuine Rolex diamond bezel contains 18-Kt gold. (SUF ¶ 61);
c. the non-genuine bezel contains only 36 diamonds, whereas a genuine Rolex bezel contains 40 diamonds. (SUF ¶ 62);

d. the table **[*10]** tops on the "non-genuine" diamonds are not of uniform size and the diamonds are set at different heights and tilted at different angles. (SUF ¶ 63).

<u>3. The 1/16/02 Watch</u>

Zeotec concedes that the 1/16/02 Men's steel and gold Rolex contained a non-genuine diamond bezel, non-genuine mother of pearl ("MOP") dial finish, non-genuine diamonds added to the dial, and a non-genuine steel/gold bracelet. (SUF ¶¶ 47, 64). Moreover, Zeotec does not this watch's deficiencies:
a. The non-genuine diamond bezel was installed with an incorrect crystal, which does not allow as much clearance between the dial surface and the underside of the crystal; thus, the second hand is in danger of dragging along the underside surface of the crystal, which could affect timekeeping. (SUF ¶ 65);
b. the non-genuine bezel is made of 14 Kt gold; the genuine Rolex diamond bezel is made of 18 Kt gold (SUF ¶ 66);
c. the non-genuine bezel's table tops are not uniform in size and the diamonds are tilted at different angles (SUF ¶ 67);

d. the links on the non-genuine bracelet are abnormally stiff and crude, and the lack of flexibility in the bracelet will likely result in a less comfortable wear relative to a genuine Rolex bracelet **[*11]** (SUF ¶ 68);
e. the non-genuine bracelet clasp has copies of an embossed Rolex Crown Design mark on the clasp exterior and Rolex and Crown Design marks on the clasp interior, all of which are less clearly defined when compared to the genuine marks. (SUF ¶ 69).

<u>4. The 4/26/02 Watch</u>

Zeotec acknowledges that the 4/26/02 Lady's steel and gold Rolex contained a non-genuine MOP dial finish, non-genuine diamonds, and a Rolex Crown Design mark that is non-genuine. (SUF ¶¶ 48, 70).[4] Zeotec does not dispute that no part of the dial originated with ROLEX, (SUF ¶ 72), but concedes that the 4/26/02 watch came with papers that identify the dial as a "FACTORY BASE DIAL." (SUF ¶ 71).

The following quality differences between the Zeotec watch and a genuine Rolex watch were also undisputed:
a. The Zeotec's diamonds are smaller and have table tops that are not uniform in size. (SUF ¶ 73);
b. the case back gasket was exposed and visible to the naked eye, which may cause moisture to penetrate the watch case and damage the movement. (SUF ¶ 74);
c. because of the faulty crystal gasket seal, the watch was not pressure-proof. (SUF ¶ 75).

<u>5. Other Defects In The Watches</u>

Some of the watches came with genuine Rolex packaging, **[*12]** warranties, and/or accessories. Specifically, the 8/27/01 watch, and the 11/15/01 watch were packaged in genuine Rolex inner and outer boxes and were accompanied by Zeotec sales receipts and Rolex warranties (in French). (SUF ¶¶ 49, 50). The 11/15/01 watch also came with a Rolex calendar, Rolex booklet, and Rolex booklet carrying case. (SUF ¶ 50). The 1/16/02 watch was

[4] Zeotec disputes Rolex's allegations that they use a non-genuine dial place and cite to Paravar's Decl. ¶ 9.

packaged in a genuine Rolex inner box. (SUF ¶ 51). However, the 4/16/02 watch was only accompanied by a Zeotec sales receipt and appraisal. (SUF ¶ 52).

Finally, the following price differences between the Zeotec watches and the comparable genuine Rolex watches were undisputed. (SUF ¶¶ 76-79).

Comparative Prices of Zeotec Altered Rolex with Genuine Rolex Equivalents

Watch	Zeotec Price	Comparable Rolex Price*
8/27/01 Watch	$5,450	$6,750[5]
11/15/01 Watch	$4,825	$4,900
1/16/02 Watch	$3,900	$8,650
4/26/02 Watch	$2,900	$7,400.

Note: * Rolex sells a number of models with diamond bezels. The Rolex prices for the first three listed watches are for comparable Rolex models, which are not offered with a diamond bezel. The Rolex price for the last watch listed is for a comparable Rolex model with a diamond bezel. (Declaration of Charles Berthiaume **[*13]** ("Bert. Deci.") ¶ 22, n.2).

III.

ANALYSIS

A. THE LEGAL STANDARD UNDER *RULE 56*

On July 15, 2002, Rolex filed this motion for summary judgment on Zeotec's liability. (Mot. at 1). Summary judgment is granted when the record reveals that there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law. *Celotex Corp. v. Catrett, 477 U.S. 317, 322 (1986)*. The burden is on the moving party to establish both the nonexistence of a genuine issue of fact and that it is entitled to judgment. Id. When, as in this case, the moving party has the burden of proof at trial, the party must demonstrate affirmatively that there is no genuine issue of material fact as to each element of the party's claim. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252-53 (1986)*. The burden then shifts to the non-moving party. *Fed. R. Civ. P. 56(e)*. The non-moving party cannot rest on the allegations and denials in the pleadings, but must set forth specific facts establishing an issue for trial. *Anderson, 477 U.S. at 248*; see also H-D Michigan, Inc. v. Bikers Dream, Inc., 48 U.S.P.Q.2d 1108, 1110 (C.D. Cal. 1998). Furthermore, the opposing party must present admissible evidence on matters where it has the burden of proof. *Anderson, 477 U.S. at 249*.

Inferences draw from the evidence must be viewed in the light most favorable to the nonmoving party. *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 456 (1992)*. However, where the applicable substantive law limits what inferences may be drawn from certain evidence, **[*14]** the opposing party cannot rely on other inferences to oppose summary judgment. *In re Coordinated Pretrial Proceedings in Petroleum Products Antitrust Litig., 906 F.2d 432, 440 (9th Cir. 1990)*.

B. CLAIMS AT ISSUE

---

[5] This price is from the SUF ¶ 76, the GIMF erroneously reported that the comparable price was $7,750, but declared that SUF ¶ 76 undisputed.

Rolex moves for summary judgment on its trademark counterfeiting, infringement and dilution claims. The issues in dispute in this case have been decided in nearly identical litigation in this and other circuits. The Court will GRANT this motion on the same grounds articulated in those decisions.

C. PRIOR ROLEX CASES - TRADEMARK COUNTERFEITING

In *Rolex Watch U.S.A. v Michel, 179 F.3d 704 (9th Cir. 1999)*, Rolex brought suit against a jewelry dealer engaged in the sale of used and altered Rolex watches. The Ninth Circuit described defendant's activities as follows:

> Mottale sells the following products related to Rolex watches: (1) used Rolex watches; (2) used Rolex watches that have been "reconditioned" or "customized" with non-Rolex parts, which we call "altered 'Rolex' watches;" (3) used Rolex watch replacement parts; and (4) generic replacement parts fitting Rolex watches. Mottale customizes used Rolex watches by replacing their bezels (the ring that surrounds the crystal and affixes it to the watch casing), dials, and bracelets, and/or by inserting diamonds into their dials. These replacement parts are not authorized or provided by Rolex. The **[*15]** altered "Rolex" watches retain their original Rolex trademarks on their dials and bracelets, except when Mottale replaces the bracelet. Some examples of the replacement bracelets used by Mottale bear an imitation of the Crown Device logo. The other replacement parts added by Mottale bear no independent mark.

Id. at 706-07. The District Court found that:

> retention of the original Rolex marks on altered "Rolex" watches, in the absence of adequate disclosures that the altered watches contain non-Rolex parts, was deceptive and misleading as to the origin of the non-Rolex parts, and likely to cause confusion to subsequent or downstream purchasers, as well as to persons observing the product. Accordingly, under Westinghouse, the district court concluded that this confusing use of Rolex's trademarks in connection with the sale of altered "Rolex" watches constituted a counterfeit use of the trademarks.

Id. at 707.

Based on its findings, the District Court permanently enjoined defendant from re-selling the Rolex watches without marking the replacement parts with its own mark and making appropriate disclosures on the watches and in its advertising regarding any alterations that might have been made. *Id. at 708*.

Though it got some **[*16]** relief in District Court, Rolex appealed. Rolex argued that defendant had made such basic changes to the watches that he should be enjoined from any use of the Rolex trademark in the re-sale of the watches. The Ninth Circuit agreed. Surveying the law, the Ninth Circuit noted two cases, *Bulova Watch Co., 328 F.2d 20*, and *Rolex Watch U.S.A., Inc. v. Meece, 158 F.3d 816 (5th Cir. 1998)*, where permanent injunctions were entered against the use of a genuine trademark in any resale of altered watches, whether or not notice was given that the watches had been modified. The court wrote:

> We find the reasoning in Meece and Bulova persuasive, and further conclude that the alterations that Mottale makes to the used Rolex watches he sells, like those made by Meece and the defendant in Bulova, result in a new product, although one containing a Rolex movement and casing.

Id. at 710. In that light, the Court concluded that tagging or otherwise marking the watch to indicate that it had been altered was not adequate to prevent consumer confusion. Id.

In *Rolex Watch USA, Inc., v. Meece, 158 F.3d 816 (5th Cir. 1998)*, cert. denied, *526 U.S. 1133 (1999)* ("Meece "), the Fifth Circuit reached the same conclusion on similar facts. In that case, the circuit noted:

> Meece is not affiliated with Rolex, and his activities are not sanctioned or authorized by Rolex. His advertising is directed exclusively **[*17]** to the retail jewelry store trade, and he sells only to jewelers. Meece's advertising

> brochures indicate that his replacement parts are not genuine Rolex parts; that he is not affiliated with Rolex; and that the addition of non-Rolex parts will void the Rolex warranty. However, he stipulated that the parts he sells do not bear any markings indicating that he is the source; and that he has not disclosed on invoices or tags either that his non-Rolex parts are not authorized by Rolex or that their addition voids the Rolex warranty.

Id. at 818. On appeal, the Fifth Circuit concluded that an injunction prohibiting Meece from "injecting into commerce a watch bearing a Rolex mark which is reconstructed with generic replacement parts and which simulates a Rolex Submariner or other Rolex watch" barred him from selling altered new Rolex watches. *Id. at 825*. The Meece court concluded that the injunction encompassed the sale of altered new watches, and that in either case, the use of a genuine Rolex trademark in connection with the sale constituted trademark counterfeiting.

Zeotec defends against the counterfeiting claim on the ground that its customers requested the alterations to the watches. On that issue, Zeotec **[*18]** presents no admissible evidence, as discussed in greater detail below. But that defense in any event fails to meet the thrust of the holding in Michel. Even where a particular customer requests an alteration, the performance of the requested work while retaining Rolex's trademark on the finished product creates the risk of confusing and misleading not the customer who requests the alterations but "subsequent or downstream purchasers, as well as . . . persons observing the product." *Id., at 704*. Similarly, Meece noted:

> "Rolex did not perform or authorize the modifications, and its warranty was voided by Meece's activities. Meece, not Rolex, stood behind the watches; ***but the trademark suggest otherwise."***

158 F.3d 827. (Emphasis added.)

In short, in two prior cases involving the trademarks at issue in this case, courts have found trademark counterfeiting on facts that are indistinguishable from those presented here. Accordingly, the Court concludes that Rolex has established its counterfeiting claim and is entitled to judgment on that claim as a matter of law.

D. TRADEMARK INFRINGEMENT

To prevail on a trademark infringement claim, a plaintiff must show that the defendant used the plaintiffs trademark "in commerce" **[*19]** and "that the use was likely to confuse customers as to the source of the product." *Karl Storz Endoscopy-Amer., Inc. v. Surgical Technologies, Inc., 285 F. 3d 848, 853-854 (9th Cir 2002)*. In general, "[l]ikelihood of confusion' is the basic test for. . . trademark infringement." *Id., at 855* (citations omitted). The Ninth Circuit has made clear that "post-purchase confusion," *i.e.*, confusion on the part of someone other than the purchaser who simply sees the item after it has been purchased, can establish the required likelihood of confusion under the Lanham Act. Id. ("Post-sale' confusion. . . may be no less injurious to the trademark owner's reputation than confusion on the part of the purchaser at the time of sale."). In addition, "use of another's trademark in a manner calculated 'to capture initial consumer attention, even though no actual sale is finally completed as a result of the confusion, may be still an infringement." *Brookfield Communications Inc. v. West Coast Entertainment Corp., 174 F.3d 1036, 1062 (9th Cir. 1999)*.

AMF Inc., v. Sleekcraft Boats, 599 F.2d 341 (9th Cir. 1979), establishes the factors relevant to determining the likelihood of confusion. Id., at at 348-349. The factors include: 1) the strength of the mark; 2) proximity of the goods; 3) similarity of the marks; 4) evidence of actual confusion; 5) marketing channels used; 6) type of goods and the degree of care likely to be exercised by the purchaser; 7) defendant's intent in **[*20]** selecting the mark; and 8) likelihood of expansion of the product lines. As the Brookfield court stated " this eight-factor test of likelihood of confusion is pliant. Some factors are much more important than others, and the relative importance of each individual factor will be case-specific. Although some factors -- such as the similarity of the marks and whether the two companies are direct competitors — will always be important, it is often possible to reach a conclusion with respect to likelihood of confusion after considering only a subset of factors." *Brookfield Communications Inc. v. West Coast Entertainment Corp., 174 F.3d 1036, 1054 (9th Cir. 1999)*. Moreover, intent to confuse consumers is not required for a finding of trademark infringement. *Brookfield at 1059*.

While application of the Sleekcraft test clearly establishes the likelihood of confusion in this case, resort to the Sleekcraft analysis is hardly necessary. The marks and goods are not similar, they are identical — defendants are using Rolex's marks on goods Rolex manufactured, but which defendants subsequently altered. They are necessarily directly competing, they market in similar channels, and although one could expect that buyers of expensive goods would exercise greater caution than purchasers of generic goods, confusion can still **[*21]** be likely, especially where, as here, the marks are genuine. See *Sleekcraft at 353* (citing *Omega Importing Corp. v. Petri-Kine Camera Co., 451 F. 2d 1190, 1195 (2d Cir. 1971)*, which warns against undue reliance on the 'supposed sophistication' and care of buyers of expensive goods). This is enough to establish infringement as a matter of law in this case.

In its Separate [Statement] of Genuine Issues of Material Fact Necessary to be Litigated (GIMF), Zeotec disputes that its conduct created any likelihood of confusion. First, they state: "Zeotec customers ask for substitution of non-genuine parts in their Rolex watches." (GIMF ¶ 95). Second, they assert that "Zeotec customers bring previously purchased Rolex watches to Zeotec and ask for alterations with non-genuine parts." (GIMF ¶ 96). Finally, they argue "Zeotec customers are not misled or confused as to source or origin when they have requested changes to an otherwise genuine watch." (GIMF ¶ 97).

However, Zeotec's underlying evidence — signed letters of acknowledgment that Zeotec solicited in connection with this litigation — see Exhibits A and B to Paravar Declaration, cannot be admitted to support the assertions in Zeotec's statement of genuine issues. See Separate Memorandum Re Evidentiary Objections at 2-6. Valid objections **[*22]** include lack of oath or affirmation of the underlying customer statements (*FED. R. EVID. 603*; see also *Zoslaw v. MCA Distributing Corp., 693 F.2d 870, 883* (*Rule 56* requires documents that are submitted "to be authenticated by affidavits or declarations of persons with personal knowledge through whom they could be introduced at friar)); inadmissible hearsay (*Fed. R. Evid. 801*); and no foundation (*Fed. R. Evid. 602*). And, having been solicited expressly for this litigation, they can hardly be described as business records prepared and kept in the ordinary course of Zeotec's business. Moreover, Paravar's declaration contains no evidence of his personal knowledge regarding the facts he discussed in his affidavit - i.e. that he dealt with the customers in question or even customers in general. *FRCP 56 (e)*; see also *Bank Melli v. Pahlavi, 58 F.3d. 1406, 1412 (9th Cir. 1995)*(declarations "on information and belief' entitled to no weight where declarant lacks personal knowledge and cannot be inferred from declarant's position and nature of participation in the matter).

Moreover, even if the Court received the statements in evidence for their truth, the evidence does not preclude finding Zeotec liable for trademark infringement on the undisputed facts. Zeotec admits that its website offers Rolex watches without indicating the presence of non-genuine parts and that it **[*23]** offers Rolex watches to individuals over its website and accepts offers by fax. (SUF ¶¶ 89, 91). Furthermore, as previously stated, certain non-genuine parts were, undisputedly, found on the watches that Rolex investigators purchased over the Internet. (See e.g. SUF ¶ 46). In addition, it is doubtful that third party observers of Zeotec's altered watches, seeing the genuine Rolex trademarks, would have any way of knowing that the watches contained non-genuine parts. *Rolex Watch U.S.A., Inc. v. Canner, 645 F.Supp. 484, 492 (S.D.Fla., 1986)* (noting that changes in the Lanham Act show that "Mile Act endeavors not just to protect a purchaser, but instead aims to prevent mistake, deception, and confusion in the market place at large."); see also *id., at 493* ("Once a product is injected into commerce there is no bar to confusion, mistake, or deception occurring at some future point in time."). Thus, even assuming that four customers requested the alterations, and that Zeotec could make those alterations while retaining the Rolex trademark on the altered watches, those facts have no bearing on Zeotec's other infringing activity.

E. Trademark Dilution

To prove a violation of the Federal Trademark Dilution Act ("FTDA"), "a plaintiff must show that (1) the mark is famous; (2) **[*24]** the defendant is making commercial use of the mark in commerce; (3) the defendant's use began after the mark became famous; and (4) the defendant's use of the mark dilutes the quality of the mark." *Panavision Intern., L.P. v. Toeppen, 141 F.3d 1316, 1324 (9th Cir. 1998)*. The analysis of the California Anti-dilution statute is the same. Id. One of the classic harms caused by dilution is "tarnishment," which "occurs when a famous mark is improperly associated with an inferior or offensive product or service." *Id., at 1326 n.7*. Likelihood of confusion is not required for a finding of trademark dilution. *Id. at 1324*; see also *Century 21 Real Estate Corp. v. Sandlin, 846 F.2d 1175, 1180 (9th Cir. 1988)* ("All that need be shown is the 'likelihood of injury to business reputation or of dilution of the distinctive quality of a mark. Actual injury need not be proven.").

Given the aforementioned undisputed deficiencies in the quality of Zeotec's altered watches relative to 100 percent genuine Rolex equivalents, the Court also finds Zeotec liable for trademark dilution under the federal and state anti-dilution acts. However, the determination of Zeotec's liability for trademark dilution is unnecessary and/or redundant; the remedy for trademark dilution, injunctive relief, is also available for the former two causes of action, which have been established. See *Cal. Bus. & Prof. Code § 14330* (2002); **[*25]** see also *15 U.S.C.A. §1125(c)*; see also *Michel at 708 n. 6* ("A finding of liability under these laws [federal and state anti-dilution laws], however, would provide Rolex no greater remedies than those available under ...section 32(1)(a) of the Lanham Act," concurring with a 5th circuit decision that likewise declined to address FTDA liability as redundant).

F. ZEOTEC'S DEFENSES

In addition to disputing the likelihood of confusion, Zeotec makes two main defenses neither of which the Court finds applicable. First, Zeotec asserts that Rolex U.S.A.'s trademark rights stops with the first sale of the Rolex watches. (the "first sale defense"). Second, Zeotec argues that Rolex U.S.A. is barred from enforcing its trademark rights, because its likely antitrust violations creates an "unclean hands" defense.

1. First Sale Defense

The first sale defense holds that "[w]hen a purchaser resells a trademarked article under the producer's trademark, and nothing more, there is no actionable misrepresentation under the [Lanham Act]." *Sebastian Intl.. Inc. v. Longs Drug Stores Corp., 53 F.3d 1073, 1076 (9th Cir. 1995)*. However, "conduct by the reseller other than merely stocking and reselling genuine trademarked products may be sufficient to support a cause of action for infringement." Id. The purpose of the Lanham Act is "to prevent consumer **[*26]** confusion or deception about the origin or make of the product," which would be created if an entity alters the integral parts of a product while retaining the original trademark. See *Michel at 709-710*.

The first sale doctrine as a matter of law does not apply to this case. In a similar case, the court explicitly rejected the relevance of the first sale defense where alterations to watches resulted, as here, in appreciably different products. *Bulova Corp. v Bulova Do. Brasil Com.Rep. Imp. & Exp. Ltda., 144 F. Supp. 2d 1329 (S.D. Fla. 2001)*. That decision is entirely consistent with Michel where the Ninth Circuit explicitly held that the bezel, bracelet and dial are integral parts of a Rolex watch and so their replacement with non-genuine parts creates new products. *Michel at 709-710*. First sale is no defense to Zeotec's conduct.

2. Zeotec's Unclean Hands/Antitrust Defense

"Unclean hands is a defense to a Lanham Act infringement suit... To prevail, the defendant must demonstrate that the plaintiffs conduct is inequitable and that the conduct relates to the subject matter of its claims." *Fudruckers. Inc. v. Doc's B.R. Others, Inc., 826 F.2d 837, 847 (9th Cir. 1987)*. The Lanham Act itself denies relief in trademark cases when a violation of the antitrust laws has been proven. *15 U.S.C.A. § 1115(b)(7)*; see also *G.D. Searle & Co. v. Inst. Drug Dist., Inc., 151 F. Supp 715, 720 (S.D. Cal. 1957)*. However, "[n]ot every monopolistic practice violates ***antitrust law***. Monopolistic restrictions are condemned **[*27]** only if they affect a substantial segment of interstate commerce." *Id., at 724*. Furthermore, monopolization of one's own trademarked product is not usually a viable claim. See *U.S. v. E.I. du Pont de Nemours & Co, 351 U.S. 377, 393 (1956)*. As one court noted: "it is significant that in almost every reported instance where the antitrust misuse of a trademark has been raised as a defense it has been rejected." *Carl Zeiss Stiftung v. V.E.B. Carl Zeiss, JENA, 298 F. Supp. 1309, 1314 (S.D.N.Y. 1969)*; see *id., at 1315* (noting the heavy burden of establishing direct misuse of trademark in violation of antitrust laws).

a. On the Undisputed Facts, the Defense Fails as a Matter of Law

In general, defendant Zeotec bears the burden to prove its antitrust/unclean hands defense. To prove attempted monopolization claims, Zeotec must establish "specific intent, which must be shown by proof of unfair or predatory conduct. Predatory conduct is 'conduct that is in itself an independent violation of the antitrust laws or that has no legitimate business justification other than to destroy or damage competition.'" *Mozart Co. v. Mercedes-Benz of North Amer., Inc., 833 F.2d 1342, 1352 (9th Cir. 1987)* (holding that ensuring quality control and protecting goodwill are valid business justifications for otherwise per se illegal tying arrangement in violation of antitrust laws). In particular, Zeotec must prove its specific allegation that Rolex U.S.A. was attempting **[*28]** to achieve a monopoly when it sought U.S. Customs Service's grey market protection, i.e. protection against the importation of genuine goods imported without the U.S. trademark owner's written authorization. In addition, Zeotec must prove that this alleged antitrust violation constitutes abuse of Rolex U.S.A.'s trademark rights and so relates to the subject matter of its trademark suit.

b. The Noerr-Pennington Doctrine Immunizes Rolex U.S.A.'s Conduct and So Bars Zeotec's Allegations.

Generally, the Noerr-Pennington doctrine defeats Zeotec's claim that Rolex U.S.A. violated the antitrust laws when it sought and obtained U.S. Customs Service's protection against unauthorized imports of Rolex watches. See *Allied Tube & Conduit Corp. v. Indian Head Inc., 486 U.S. 492, 499 (1988)*. To defeat summary judgment in this case, Defendant Zeotec must establish a genuine issue of material fact that would undermine Rolex's assertion of the Noerr-Pennington doctrine. *USS-POSCO Indus. v. Contra Costa County Bldg. & Const. Trades Council, 31 F. 3d 800, 811 (9th Cir. 1994)* (plaintiff in antitrust action must overcome Noerr defense). The only way to overcome the Noerr-Pennington is to show facts suggesting that "[the] activity 'ostensibly directed toward influencing governmental action' does not qualify for Noerr immunity [as] it 'is a mere sham to cover... an attempt to interfere **[*29]** directly with the business relationships of a competitor." *Professional Real Estate Investors, Inc. v. Columbia Pictures Industries, Inc., 508 U.S. 49, 51 (1993)*. The party invoking the "sham" exception to Noerr-Pennington immunity must prove its applicability by clear and convincing evidence. *Handgards, Inc. v. Ethicon, Inc., 743 F.2d 1282, 1294 (9th Cir. 1984)*. Zeotec cannot show even a triable issue of material fact on this question.

To meet the first part of the Supreme Court's two-part definition of the "sham" exception, the lawsuit must be "objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim premised on the sham exception must fail." *Professional Real Estate Investors, Inc., 508 U.S. at 60*. Under the definition's second part, the court must determine whether the baseless lawsuit conceals an attempt to "use the governmental *process* — as opposed to the *outcome* of that process — as an anti-competitive weapon." *Id., at 60-61* (emphasis in original). However, a winning lawsuit is per se a reasonable effort at petitioning for redress and so not a sham. Id. at n.5. In addition, proof of a sham merely deprives the defendant in an antitrust action of immunity; it does not relieve the plaintiff of the **[*30]** obligation to establish all other elements of his antitrust claim. *Id., at 61*; see also *USS-POSCO Indus., 31 F. 3d at 811* ("If the suit turns out to have objective merit, the plaintiff can't proceed to inquire into subjective purposes, and the action is perforce not a sham.") (citations omitted).

As the U.S. Customs Office granted Rolex U.S.A.'s request to maintain its grey market protection, ROLEX U.S.A.'s efforts were perforce not completely baseless, and so are protected by Noerr-Pennington immunity. Thus, Zeotec is barred from asserting its unclean hands defense.

IV.

CONCLUSION

In sum, Zeotec's invocation of the first sale defense is inapposite, and it has not met its burden of proof regarding its defense of unclean hands. Thus, as the undisputed facts support claims for trademark infringement and counterfeiting, as well as trademark dilution, the Court GRANTS Plaintiffs Motion for Summary Judgment.

IT IS SO ORDERED.

HN1[] **Summary Judgment, Entitlement as Matter of Law**

Evidence in support of a motion for summary judgment must be reviewed in a light most favorable to the non-movant. *Fed. R. Civ. P. 56(c)*. If, when viewing the evidence produced in the light most favorable to the nonmovant a rational trier could not find for the nonmovant, then there is no genuine issue of material fact and entry of summary judgment is appropriate.

HN2[] **Summary Judgment, Opposing Materials**

While the burden to demonstrate that no genuine issue of material fact rests solely with the moving party, once the moving party has provided sufficient evidence to support a motion for summary judgment, the opposing party must set forth specific facts showing that there is a genuine issue for trial and cannot rest on mere allegations or denials. *Fed. R. Civ. P. 56(e)*. The mere existence of a scintilla of evidence in support of the opposing party's position is insufficient to defeat a motion for summary judgment. An opponent must do more than simply show that there is some metaphysical doubt as to the material facts.

HN3[] **Robinson-Patman Act, Claims**

The Robinson-Patman Act requires that the sales, which form the basis of the discrimination, must be reasonably proximate in time.A plaintiff can satisfy this requirement by showing that the plaintiff engaged in actual competition with the favored purchaser(s) as of the time of the price differential.

Contracts Law > Remedies > Rescission & Redhibition > General Overview

HN10[] **Defenses, Ambiguities & Mistakes**

In California, a contract may be rescinded by a contracting party unilaterally if his consent to be bound by the agreement was induced either by a material misrepresentation, though innocently made, or a mistake. *Cal. Civ. Code § 1689* (West 1985). A statement, though arguably puffery, may render a contract subject to rescission if intended to convey an impression that is inaccurate in regard to basic assumption upon which the contract is made.

Opinion

OPINION & ORDER

Hon. HAROLD BAER, JR., District Judge:

Defendant Alza Corp. ("Alza") moves for summary judgment pursuant to Fed. R. Civ. P. ("FRCP") 56(c) on eight different points, which plaintiff Innomed Labs, LLC. ("Innomed") opposes. Oral argument was held on the motion October 21, 2002. For the reasons set forth below, Alza's motion is GRANTED-IN-PART and DENIED-IN-PART.

I. BACKGROUND

This action was originally based on Innomed's allegation **[*2]** that Alza breached its obligations under a December 1997 distribution agreement ("the written agreement"). Under the written agreement, Alza designated Innomed to be a semi-exclusive distributor of three Alza cold and allergy products: (1) the Chlor product, (2) the Pseud product, and (3) the Combo product. Before Alza entered into the written agreement with Innomed, Alza entered into another distribution agreement with Warner-Lambert ("W-L") in which W-L was to be the semi-exclusive distributor of the Pseud product.

On November 28, 2000, Alza notified Innomed of its intention to terminate the distribution arrangement as per a provision in the written agreement that also provided Innomed with a certain time to cure its default for having failed to make payments under the agreement. Innomed alleges that the parties later orally agreed in January 2001 to permit Innomed to cure its default by assigning its distribution rights to a third-party, American Home Products ("AHP"). Innomed had realized for some time that it did not have the requisite cash and could only continue business if such an arrangement could be consummated. Before Innomed could complete any such assignment, Alza terminated **[*3]** the written agreement. It was also around this time period that Alza agreed to merge with Johnson & Johnson, a major competitor of AHP.

The original complaint essentially claimed that Alza breached the contract with Innomed when Alza refused to allow Innomed to assign its right to AHP. Innomed alleged that Alza breached the written agreement, breached the oral agreement, and wrongfully interfered with Innomed's business relations with AHP. I denied on April 23, 2002 Alza's motion to dismiss for failure to state a claim upon which relief could be granted. *Innomed Labs, LLC. v. Alza Corp., 2002 U.S. Dist. LEXIS 20510, 01* Civ. 8095, slip op. at 2 (S.D.N.Y. Apr. 23, 2002).

I later granted Innomed leave to amend its complaint to include a claim against Alza for violation of § 2(a) of the Robinson-Patman Act ("the R-P Act"). Innomed claims that Alza violated § 2(a) of the R-P Act when it charged W-L significantly lower prices than it charged Innomed for both the right to distribute the Pseud Product and the various costs associated with W-L's distribution of it. Accordingly, Innomed asserts that the alleged price discrimination forced it out of business.

II. DISCUSSION

A. Standard for summary* [*4] *judgment

HN1[] Evidence in support of a motion for summary judgment must be reviewed in a light most favorable to the non-movant. *FRCP 56(c)*, *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. If, when "viewing the evidence produced in the light most favorable to the nonmovant ... a rational trier could not find for the nonmovant, then there is no genuine issue of material fact and entry of summary judgment is appropriate." *Binder v. Long Island Lighting Co., 933 F.2d 187, 191 (2d Cir. 1991)*. ***HN2***[] While the burden to demonstrate that no genuine issue of material fact rests solely with the moving party, *FDIC v. Giammetti, 34 F.3d 51, 54 (2d Cir. 1994)*, once the moving party has provided sufficient evidence to support a motion for summary judgment, the opposing party must "set forth specific facts showing that there is a genuine issue for trial" and cannot rest on "mere allegations or denials." Rule 56(e); *see* *Rexnord Holdings, Inc. v. Biderman, 21 F.3d 522, 525-26 (2d Cir. 1994)*. The "mere existence of a scintilla of evidence in support of the plaintiff's position" **[*5]** is insufficient to defeat a motion for summary judgment. *Anderson, 477 U.S. at 252*. An "opponent must do more than simply show that there is some metaphysical doubt as to the material facts." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. With this standard in mind, I review Alza's following claims in its summary judgment motion.

B. Alza's summary judgment motion

Alza claims it is entitled to summary judgment on the following eight claims:

1) Violation § 2(a) of the R-P Act;

2) Breach of contract and breach of the implied covenant of good faith and fair dealings;

3) Fraudulent inducement of Innomed to enter into the written agreement;

4) Breach of the written agreement;

5) Breach of covenant of good faith and fair dealing by failing to give Innomed a reasonable time to cure its breach under the written agreement or by engaging in actions that effectively interfered with Innomed's ability to assign its rights to AHP;

6) Breach of the January 26, 2001 oral agreement;

7) Tortious interference with Innomed's prospective business advantage when it terminated the **[*6]** written agreement before Innomed could assign its rights to a third party; and

8) Alza's counterclaims.

Claim 1

First, Alza asserts Innomed cannot show that the price discrimination was "contemporaneous" as required under § 2(a) of the R-P Act. Alza made exactly the same claim in opposition to Innomed's motion to amend its complaint. When Alza made that claim to oppose Innomed's motion to amend, it asserted that the W-L and Innomed agreements were executed at different times (*i.e.,* August 1997 and December 1997), and therefore Alza did not charge the two buyers different prices in contemporaneous transactions, as required by the R-P Act. ***HN3***[] The R-P Act requires that the sales, which form the basis of the discrimination, must be reasonably proximate in time. 3 Earl W. Kintner & Joseph P. Bauer, Federal ***Antitrust Law***: The Robinson Patman Act § 20.5 at 124 (1983). You rejected Alza's claim, noting that a plaintiff can satisfy this requirement by showing that the plaintiff "engaged in actual competition with the favored purchaser(s) as of the time of the price differential." *Innomed Labs, LLC, v. Alza Corp., 2002 U.S. Dist. LEXIS 13298, 2002 WL 1628943*, at *3 (S.D.N.Y., July 23, 2002) **[*7]** (quoting *Best Brands Beverage, Inc. v. Falstaff Brewing Corp., 842 F.2d 578, 584 (2d Cir. 1987)*.

Alza contends that it has "now" learned that the prices given to W-L were set in 1996, almost a year and a half before Alza's pricing was set. Innomed notes that the 1996 "INTERIM AGREEMENT" that Alza relies on to establish the lack of temporal proximity between transactions did not, in fact, firmly set the actual price that W-L was ultimately charged with until August 28, 1997, when the negotiated agreement was signed. According to the 1996 W-L interim agreement, if W-L wanted to settle upon a "definitive agreement," the parties were to "negotiate in good faith a definitive agreement … for the marketing of the product by W-L." Exh. 31 at ALZ 1497. Following negotiation between Alza and W-L, the terms originally set forth in the 1996 interim agreement were amended to provide for a $ 500,000 up-front payment and a separate $ 500,000 payment after delivery of "launch quantities" of Alza's product in consideration for access to Alza's pseudoephedrine technology. I agree with Innomed that there is at least a factual dispute in regard to when pricing for the Pseud product was "determined. **[*8]** " Furthermore, as a matter of law, I have found nothing to support the position that contracts formed a few months apart cannot be considered "contemporaneous" for purposes of analysis under the Robinson-Patman Act. Given the congruence in subject matter, territory, and termination date in the Innomed and W-L agreements, as well as the few months separating the formation of the agreements, I find that a reasonable juror could conclude that the two agreements are contemporaneous for purposes of analysis under the R-P Act. *See* Exhs. 4, 32.

Second, Alza contends that there is no evidence that any differences in pricing between the agreements was "likely to substantially lessen competition or to create a monopoly in any line of commerce." *See* *15 U.S.C. § 13(a)*. Innomed correctly observes that Alza conveniently truncates the balance of *§ 13(a)*, which states that it shall also be unlawful to "injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination." As explained by the Second Circuit, the purpose of this passage was to relieve secondary-line plaintiffs … from having to prove harm to **[*9]** competition market wide, allowing them instead to impose liability simply by proving effects on individual competitors." *George Haug Co. v. Rolls Royce Motor Cars Inc., 148 F.3d 136, 142 (2d Cir. 1998)*. Thus, ***HN4***[] competitive injury may be inferred from evidence demonstrating injury to an individual competitor. *Id.* Evidence of competitive injury to Innomed is provided by its expert, Dr. Iain Cockburn, who opines at length that Innomed suffered economic injury as a result of Alza's discriminatory pricing. Exh. 41. Alza asserts that Innomed's expert makes certain erroneous assumption in his report when evaluating the price of commodities for purposes of the R-P Act. Alza, however, cites no law or expert authority to support its contention that the expert's inclusion of upfront, milestone, and royalty payments for calculating price is improper for purposes of the Act.

In further support of its contention that the analysis by Innomed's expert is faulty, Alza attempts to recast the same argument it made earlier in opposition to Innomed's motion to amend -- namely, that upfront and milestone payments were consideration for non-tangible commodities. I had earlier rejected **[*10]** this claim, noting that a review of the written agreement, under which the payment was made, arguably concerns the marketing and selling of tangible commodities. *Innomed Labs, 2002 U.S. Dist. LEXIS 13298*, [WL] at *3. Alza has not presented any new evidence, which would change my mind.

Furthermore, Alza contends that the upfront payment that was owed by Innomed was for three different products, the Pseud product, the Chlor product, and the Combo product, whereas W-L's upfront and milestone payments were strictly for the Pseud product. Therefore, according to Alza, the payments under the Innomed and W-L agreement cannot be compared for purposes of the R-P Act. ***HN5***[] Although the Act requires that the analysis for price discrimination be between commodities of "like grade and quality," *George Haug, 148 F.3d at 141*, nothing precludes one from allocating a portion of the payments to the like products at-issue (*i.e.,* the Pseud product). The proper allocation of payment made for the Pseud product appears by itself to raise a genuine issue of material fact.

Third, Alza contends that Innomed has failed to show that it suffered sufficient antitrust injury to warrant damages **[*11]** to a private plaintiff. In particular, Alza alleges that (1) Innomed's resale prices were lower than W-L's prices; (2) Innomed's expert's opinion is speculative and fails to consider other causes of Innomed's lost sales; and (3) Innomed did not make payments for the supposedly discriminatory pricing. With respect to the first issue, Alza again fails to provide legal or other expert authority to support its claim. Indeed, Innomed makes the very valid point that the R-P Act was intended, in part, to protect small competitors from discriminatory pricing in favor of larger purchasers, who would have the power to impose higher prices with their stronger brand names. *See, e.g., Abbott Labs. v. Portland Retail Druggists Ass'n, Inc., 425 U.S. 1, 11, 47 L. Ed. 2d 537, 96 S. Ct. 1305 (1976)*. With respect to the second issue, Alza appears to dismiss, primarily on counsel argument, Innomed's expert's report, which opines that Innomed suffered antitrust injury. Citing *Stelwagon Mfg Co.* v. *Tarmac Roofing Sys., Inc.,* Alza notes that the Third Circuit reversed the district court because it found that the expert's analysis was flawed. *63 F.3d 1267, 1275-76 (3d Cir. 1995)*. **[*12]** More specifically, the Third Circuit determined that the expert had failed to adequately account for reasons, apart from price discrimination, why the plaintiff had lost sales, and thus it reversed the district court's finding of a Robinson-Patman violation. *Id.* The reversal by the Third Circuit, however, was ***not in the context of a summary judgment motion.*** While Alza contends that the analysis by Innomed's expert, Dr. Cockburn, fails for reasons similar to those expressed in *Stelwagon,* we must view the evidence in the light most favorable to the non-movant, Innomed. Although some of Alza's claims may in the last analysis prove to have some merit, motions, such as this, are not by definition the last analysis. Dr. Cockburn finds a connection between Innomed's lost sales and price discrimination. Whether that connection in fact caused lost sales to Innomed is an issue for a jury to decide. *See B.F. Goodrich v. Betkoski, 99 F.3d 505, 526-27 (2d Cir. 1996)* (noting that ***HN6***[] reliability of expert opinion on a subject requiring expert testimony, but which is opposed only by lawyer argument raises genuine issues of material fact that is not properly resolved **[*13]** on summary judgment).

With respect to the third issue, how Innomed's $ 2 million dollars should be parsed is a genuine issue of material fact because it lies at the very heart of whether Innomed's expert's price analysis is in fact proper. Alza notes that Innomed only paid half of the required $ 4 million up-front and milestone payment, and that Innomed's expert incorrectly calculates damages assuming Innomed had paid the full $ 4 million. Innomed does not dispute that Dr. Cockburn's analysis appears to be based on the full dollar amount that was to be paid. Notwithstanding Innomed's failure to pay the entire $ 4 million, Innomed contends that it paid at least $ 1.4 million more than W-L in up-front payments, and that this differential lead Innomed to incur debts that prevented it from making payments under the written agreement and which ultimately resulted in the termination of the agreement. Again, the lynchpin seems to be what weight, if any, should be given to Innomed's expert analysis on whether Innomed suffered any kind of economic harm as a result of the alleged difference in the amount of money paid. There may come a time to outright reject Dr. Cockburn's testimony as unfounded **[*14]** and based on unrealistic assumptions, but this is not it. *Cf. In re Simon II Litigation, 2002 U.S. Dist. LEXIS 19647, 2002 WL 31375510*, at *72 (E.D.N.Y. Sept. 19, 2002) ***HN7***[] ("Courts must be especially careful not to hobble the jury system by excluding potential evidence" through *Daubert* hearings and summary judgment.).

Claim 2

Innomed's claims for breach of contract and breach of the implied covenant of good faith and fair dealings (Innomed's second and third claims) are predicated on its R-P Act good faith and fair dealings (Innomed's second and third claims) are predicated on its R-P Act claim. Given Alza's failure to show that the R-P claim, Alza's contention on the plaintiff's second and third claims must be rejected.

Claim 3

Innomed alleges that Alza fraudulently induced Innomed to enter into a written agreement by representing that performance under the agreement did not violate any law, including the § 2(a) of the R-P Act. Furthermore, Innomed contends that Alza had made various representations about the amount Alza would charge for up-front and milestone payments, as well as the amount that would be charged per pill. Alza claims that because of the insufficiency **[*15]** of Innomed's claim under the R-P Act, summary judgment should be granted against Innomed for fraudulent inducement. As shown above, Alza's claim regarding the insufficiency of Innomed's R-P claim fails.

Alza contends that Joseph Krivulka, the CEO of Hogil, predecessor to Innomed, testified that Alza never made any representation that Innomed's upfront and milestone payments or price per pill would be the same as those agreed to by Alza's other semi-exclusive distributor. Although Krivulka stated in his deposition that he did not have any recollection explicitly regarding "upfront and milestone payments," Krivulka Tr. at pp. 16-17, he submitted a later affidavit indicating that Alza had assured him that Innomed "would not be put at a competitive disadvantage to the other semi-exclusive distributor." Krivulka Decl. PP 2-5. Alza, citing *Mack v. United States, 814 F.2d 120, 124 (2d Cir. 1987)*, contends that I should disregard Krivulka's affidavit because it contradicts his own prior deposition. I do not find Krivulka's affidavit testimony, however, necessarily contradictory to his prior deposition testimony. Merely because Krivulka could not recall specific discussion **[*16]** in regard to up-front or milestone payments does not preclude the possibility that he was assured by Alza that Innomed would not be put at a competitive disadvantage. How Innomed would be put on equal footing with its competitors through, for example, up-front and milestone payments, may simply have not come up. At best, the affidavit is a prior inconsistent statement, which may be used in an effort to impeach credibility if Krivulka testifies. I can not conclude at this juncture that his affidavit is contradictory without drawing an improper inference as to his credibility. *United States v. Diebold, 369 U.S. 654, 655, 8 L. Ed. 2d 176, 82 S. Ct. 993 (1962)* (holding that ***HN8***[] courts do not sit to judge witness credibility on a motion for summary judgment); *Hayes v. New York City of Dept. of Corrections, 84 F.3d 614, 620 (2d Cir. 1996)*.

Alza further seizes on Krivulka's statement during his deposition that he could not recall whether Alza ever told him that the price per pill charged to Innomed would be exactly the same as other distributors. Krivulka Decl. at p. 17. Alza, however, completely ignores Krivulka's later recollection that Bob Meyer, **[*17]** vice-president of commercial development at Alza, had agreed with him that the price per pill would be same. Krivulka Decl. at p. 18. Viewing Krivulka's equivocal testimony in the light most favorable to Innomed, I find it inconclusive whether Alza, indeed, had not made misrepresentations regarding the price that Innomed would be charged compared to W-L, and thus there is a genuine issue of material fact in regard to Alza's Claim 3.

Claim 4

Innomed asserts that there are at least three genuine issues of material fact surrounding the alleged breach of the written agreement by Alza's termination of the agreement -- specifically, 1) the amount of time Innomed was given to cure, 2) the amount of time Innomed was entitled to have in order to cure; and 3) what Innomed needed to do in order to cure. I find each assertion to be meritless. Pursuant to § 12.2(c) of the agreement, Alza notified Innomed on November 28, 2000 that it intended to terminate the written agreement sixty days from that date because Innomed had failed to make payments under the written agreement. On January 23, 2001, five days before the date set for termination, Innomed informed Alza that it planned **[*18]** to file an order to show cause for a temporary restraining order to prevent Alza from terminating the written agreement. The following day, the parties entered into a "standstill agreement" in which Alza agreed not to terminate the written agreement and neither party would commence any legal action against the other. The January 24, 2001 standstill agreement was scheduled to terminate February 11, 2001. Innomed and Alza subsequently agreed to extend the standstill agreement three more times, giving Innomed, in total, more than 120 days to cure from the time it first received notice of Alza's intent to terminate the written agreement, pursuant to § 12.2(c). Nothing in any of the communications, however, states or suggests that the standstill agreement tolled the 60-day cure period.

In regard to the second issue of fact, Alza contends that the extended reasonable cure period for material breaches provided by § 12.2(c) of the written agreement does not apply because Innomed's breach could be cured within 60 days. I agree. I remain unconvinced that the extended cure period should apply to scenarios when there is a failure to pay amounts due, because a failure to pay can "always be cured **[*19]** within a 60 day period if in no other way than by payment." *Innomed Labs, LLC v. Alza Corp., 2001 U.S. Dist. LEXIS 4886, 2001 WL 406211*, at *2 (S.D.N.Y. Apr. 19, 2001). Indeed, Howard Wendy, Innomed's principal testified that he was prepared personally "to put up the amount of money necessary to cure the default" before the 60-day cure period expired in January 2001.

Wendy Tr. at p. 134-136. Thus, Innomed cannot claim, as a practical matter, that it could not cure the material breach within the established 60 days.

In regard to the third issue, Innomed contends that there is a dispute about what Innomed needed to do in order to cure. Because Alza was allegedly charging Innomed more money than W-L, perhaps in contravention of the R-P Act, Innomed seems to suggests either that it was entitled to simply disregard the payments called for by the written agreement or that the dispute regarding the amount owed to Alza somehow excused it from making any sort of payment under the written agreement. First, ***HN9***[] merely because the written agreement may be held unlawfully discriminatory under the R-P Act does not give Innomed permission to ignore its obligations under the agreement. *Bruce's Juices, Inc. v. American Can Co., 330 U.S. 743, 756-57, 91 L. Ed. 1219, 67 S. Ct. 1015 (1947)* **[*20]** (finding no legislative support for defendant's claim that it was free from obligations under the contract because it may violate the R-P Act); *see also* *Viacom Int'l Inc. v. Tandem Prods., Inc., 526 F.2d 593, 597-600 (2d Cir. 1975)* (rejecting defendant's contention that it could avoid its obligations under the contract because it may violate antitrust laws). Second, I find Innomed has presented no colorable arguments on any other basis that would excuse its non-performance under the written agreement. Certainly, as shown by Wendy's transcript, Innomed was capable of paying at least some portion of the money putatively owed under the written agreement. I see no evidence to support Innomed's contention that either the standstill agreement tolled the 60-day cure period or that the extended cure period should apply to Innomed's failure to pay amounts due. Accordingly, I find that Alza was well within its rights, pursuant to § 12.2(c), to terminate the written agreement after it gave Innomed more than twice the amount of time enumerated by the written agreement to cure its breach. I am granting Alza summary judgment on this claim.

Claim 5

Innomed alleges **[*21]** that Alza breached the covenant of good faith and fair dealing that is implied in (1) the written agreement, by failing to give Innomed a reasonable time to cure and (2) the January 26, 2001 oral agreement, by engaging in actions that effectively destroyed Innomed's ability to complete the alleged assignment to AHP. First, I agree that Alza did not breach the covenant of good faith and fair dealing by failing to give Innomed sufficient time under the written agreement to cure. *See supra,* Point 4. Second, in view of the misrepresentation or mistake by by Wendy in regard to the purported deal with AHP, I find that Alza has a right to avoid the written agreement, *see infra* Claim 6, and thus Innomed cannot claim that Alza's alleged termination of the oral agreement constitutes a breach of the covenant of good faith and fair dealing. Accordingly, Alza's motion on this claim is granted.

Claim 6

Innomed alleges that Alza orally agreed on January 26, 2001 to allow Innomed to assign its distribution rights to AHP, and that Alza breached this oral agreement by terminating the written agreement before it provided Innomed with reasonable time to consummate the third-party **[*22]** assignment. Surprisingly, I find that there is a paucity of testimony presented by either side, which might inform me of the content of the oral agreement.

Irrespective of what Innomed and Alza orally agreed to, Alza notes that the oral agreement was induced by Wendy's representation to Alza near the end of January 2001 that there was a deal with AHP, whereby AHP would pay $ 8 million and a 5% royalty on gross royalty to Innomed. At his deposition, Wendy admitted that he conveyed his belief to Meyer at Alza some time after January 24, 2001 that there was such a deal, subject to AHP's due diligence. *See* Wendy Tr. at pp. 119-21. Gregory Bobycock, the assistant vice president who was responsible for licensing acquisition for AHP, however testified that AHP never agreed to the terms specified by Wendy and that it never had any deal to acquire Innomed's rights to distribute Alza's products. Bobycock Tr. at pp. 76-77, 82-84. In rebuttal, Innomed mentions that Marc Benson, Alza's senior counsel admitted in his affidavit that Innomed had conveyed only "hopes" of being able to assign its rights. The passage that Innomed relies on, however, pertained to a communication from December 6, 2000 by **[*23]** Innomed's counsel, Paul Corcoran. Benson Tr. at pp.70-72. There appears to be undisputed evidence that Alza relied to its detriment on Wendy's representation that the assignment to AHP was imminent, which resulted in a series of extensions on the standstill agreement. Meyer Tr. at p. 96. Regardless of whether Wendy's belief was merely an innocent misrepresentation or mistake, ***HN10***[] in

California, "a contract may be rescinded by a contracting party unilaterally if his consent to be bound by the agreement was induced either by a material misrepresentation, though innocently made, or a mistake." 5 *Cal. Civ. Code § 1689* (West 1985); *Wood v. Kalbaugh, 39 Cal. App. 3d 926, 114 Cal. Rptr. 673, 675-76 (Cal. Ct. App. 1974)* (finding a statement, though arguably puffery, may render a contract subject to rescission if intended to convey an impression that is inaccurate in regard to basic assumption upon which the contract is made). Accordingly, Alza's motion on this claim by Innomed is granted.

Claim 7

Innomed alleges that Alza tortiously interfered with Innomed's prospective business advantage when it terminated the written agreement and the oral agreement before **[*24]** Innomed had the chance to assign its rights under the written agreement to a third-party. When asked about the basis for the tortious interference, Innomed's counsel responded that there "was a contract in place, [which Alza] wrongfully breached." Apr. 23, 2002 Tr. at pp. 27-28. As shown by the discussion above in connection with Claims 4 and 6, however, I found no genuine issues of material fact as to Alza's alleged breach of the written agreement or the oral agreement. Nonetheless, I find that Alza's alleged price discrimination may stand as a "wrongful act" that is actionable for purposes of a cause of action claiming tortious interference with economic relations. *Penna v. Toyota Motor Sales, U.S.A., 11 Cal. 4th 376, 902 P.2d 740, 751, 45 Cal. Rptr. 2d 436 (Cal. 1995)* (noting that wrongful conduct element of tortious interference may include anticompetitive behavior in violation of state or federal law). Thus, I must deny Alza's motion for summary judgment on this point.

Claim 8

Alza asserts two counter-claims for breach of the written agreement. Namely, Innomed allegedly failed to provide Alza (1) $ 2,792,495.27 that is due under the written agreement, (2) any **[*25]** monthly, quarterly, or annual reports of its net Sales, and (3) 5% product payments on its sale of Alza products. Because Alza cannot demonstrate the absence of a genuine issue of material fact in regard to whether Innomed was fraudulently induced to accept the written agreement (*see supra* Claim 3), Alza's motion for summary judgment on its counterclaims must fail. *See Patrick Carter Associates, Inc. v. Rent, 781 F. Supp. 207 (S.D.N.Y. 1991)* ("Resolution of the issue of intent on a motion for summary judgment is inappropriate here, as it involves assessing the credibility of the conflicting statements of the parties to the alleged fraud.").

III. CONCLUSION

For the foregoing reasons, Alza motion for summary judgment on its Claims 4, 5, 6 are GRANTED and Claims 1, 2, 3, 7, and 8 are DENIED.

SO ORDERED.

HN1[] **Summary Judgment, Motions for Summary Judgment**

Fed. R. Civ. P. 56(c) provides that summary judgment shall be rendered if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. In ruling on a motion for summary judgment, it is the court's obligation to view the facts in the light most favorable to the adverse party and to allow the adverse party the benefit of all reasonable inferences to be drawn from the evidence.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] **Entitlement as Matter of Law, Appropriateness**

On a motion for summary judgment, if there is no genuine issue about any material fact, summary judgment is proper because it avoids needless and costly litigation and promotes judicial efficiency. The summary judgment procedure is not a disfavored procedural shortcut. Rather, it is an integral part of the Federal Rules as a whole. Summary judgment is appropriate against a party who fails to make a showing sufficient to establish that there is a genuine issue for trial about an element essential to that party's case, and on which that party will bear the burden of proof at trial.

Civil Procedure > ... > Summary Judgment > Supporting Materials > Affidavits

HN3[] **Summary Judgment, Opposing Materials**

On a motion for summary judgment, the moving party bears the initial burden of demonstrating by reference to portions of pleadings, depositions, answers to interrogatories and admissions on file, together with affidavits, if any, the absence of genuine issues of material fact. However, the moving party is not required to support its motion with affidavits or other similar materials negating the opponent's claim. The nonmoving party is then required to go beyond the pleadings and by affidavits, depositions, answers to interrogatories and admissions on file, designate specific facts showing that there is a genuine issue for trial. Id. A party opposing a properly supported motion for summary judgment cannot simply rest on allegations and denials in the pleading to get to a jury without any significant probative evidence tending to support the complaint.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN4[] Summary Judgment, Burdens of Proof

At the summary judgment stage the judge's function is not to weigh the credibility of the evidence, but rather to determine whether a genuine issue of material fact exists. A genuine issue of material fact exists if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. The evidence favoring the nonmoving party must be more than "merely colorable." When the moving party has carried its burden under *Fed. R. Civ. P. 56(c)*, its opponent must do more than simply show there is some metaphysical doubt as to the material facts.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] Monopolies & Monopolization, Actual Monopolization

Missouri's antitrust laws are almost identical the Sherman Antitrust Act, hence the reasoning of all federal antitrust cases will be equally applicable to state claims.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Governments > Courts > Authority to Adjudicate

HN6[] Types of Contracts, Covenants

Where a plaintiff posits multiple theories to support its antitrust case, each theory must be evaluated independent of the others.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > Output, Exclusive & Requirements Agreements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] Exclusive & Reciprocal Dealing, Exclusive Dealing

Exclusive dealing contracts are evaluated under the Rule of Reason. The Rule of Reason involves an inquiry into a defendant's market power within a given market structure. The antitrust laws are aimed at exclusive agreements which have detrimental effects on competition or have the potential for adverse market impacts. Accordingly, an exclusive dealing agreement can be invalidated upon either a showing of actual detrimental impacts on competition or upon a showing of substantial market power sufficient to foreclose competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN8[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

In order to establish that a system of exclusive arrangements violates antitrust laws, the plaintiff must show either actual harm to competition or sufficient market power to presume competition would be injured.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN9[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The first step in determining market power is to identify the relevant product and geographic markets. This burden falls on the plaintiff.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN10[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Antitrust is concerned with the protection of competition, not individual competitors.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

HN11[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

When analyzing horizontal agreements, it is useful to attempt to classify the agreement as either a "naked restraint" or an "ancillary agreement." Naked restraints are so pernicious in their effect on competition and so blatantly inapposite to the true function of a competitive market that their existence is routinely condemned as per se illegal. Naked restraints are generally formed with the objectively intended purpose or likely effect of increasing prices or decreasing output. If an agreement is a naked restraint, neither the relevant market nor market power need be proven. The harmful effects of the agreement will instead be presumed. Ancillary agreements, by contrast, are agreements that, while horizontal, have the potential to promote competition. These agreements are usually (1) between the seller of property or business and the buyer not to compete with the buyer in such a way as to detract from the value of the property just sold; or (2) between the buyer and seller of property or a business not to use the purchased property in competition with the business retained by the seller. In order to determine whether a horizontal agreement is ancillary, the court must determine whether at the time the agreement was made, it was necessary to promote the enterprise and productivity of an underlying arrangement.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Trade Secrets Law > Federal Versus State Law > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN12[] **Types of Contracts, Covenants**

Generally, satisfaction of the federal antitrust statutes will satisfy state antitrust laws. However, some states still adhere to the common law of trade restraints condemning "unreasonable" non-compete agreements. Under Missouri law, a covenant not to compete is unreasonable if, in addition to being ancillary to a valid underlying agreement, the covenant is not reasonably limited in scope to protecting the covenantee's legitimate interest. Covenants not to compete are found in a variety of relationships including employer/ employee relationships and buyer/ seller relationships. The importance of identifying the type of relationship is that it allows the court to determine what legitimate interests may be at stake. In the employer/employee context, the legitimate concerns include protecting customer contacts and protecting trade secrets. In the context of a buyer/seller relationship, particularly the relationship between the buyer and seller of a business, the interests include maintaining the good will of the business for the buyer, and protecting any business interest retained by the seller.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN13[] **Trade Secrets & Unfair Competition, Noncompetition & Nondisclosure Agreements**

Temporary and spatially limited restraints are enforceable if reasonable under all attending circumstances. Whether a spatial or geographic restriction is reasonable will depend on whether the restriction is no greater than necessary to protect the legitimate interest at stake.

Civil Procedure > Preliminary Considerations > Equity > Adequate Remedy at Law

Constitutional Law > The Judiciary > Case or Controversy > Ripeness

Contracts Law > Remedies > Equitable Relief > General Overview

Civil Procedure > Judgments > Declaratory Judgments > General Overview

HN14[] **Equity, Adequate Remedy at Law**

Under Missouri law, a valid plea for declaratory relief requires three things; (1) the existence of a justiciable controversy; (2) the presence of a legally protectable interest; and (3) the existence of a question ripe for judicial decision. Having said that much, it is also true that a declaratory judgment remedy is not a panacea for any real or imagined legal ills. Absent an exceptional circumstance, a declaratory judgment remedy should not be used when an adequate remedy already exists, either in law or in equity. If the plaintiff is seeking to construe portions of an agreement, Missouri law looks more favorably upon granting declaratory relief. If the movant is merely asserting a breach of contract claim, courts in Missouri have ruled that the plaintiffs had adequate remedies at law or equity and found declaratory relief inappropriate.

Opinion

[*860] **ORDER**

Presently before the Court is Defendant St. John's Health System, Inc., and St. John's Physicians and Clinics, Inc. ("St. John")'s Motion for Summary Judgment. Also pending is Plaintiff Woman's Clinic, et al. ("Woman's Clinic")'s Motion for Partial Summary Judgment. [1] These motions arise from a case filed in this Court by Woman's Clinic alleging that St. John's engaged in anticompetitive behavior in that St. John's has vertically integrated its health care network through exclusive contracts and that a Business Covenant between St. John's and plaintiff physicians prohibits plaintiff physicians from investing in or operating ambulatory surgical centers, birthing centers, mammography clinics, or other operations for which the physicians could charge a facility fee. The crux of Woman's Clinic's complaint is that these behaviors inhibit competition within the Springfield, Missouri medical community by making it difficult for the **[**3]** plaintiff physicians to practice medicine were they to be disassociated from the St. John's network. Additionally, Woman's Clinic, in its Complaint, sought a declaration by this Court that St. John's was breaching the terms of the Affiliation Agreement, entered into with the plaintiff physicians, by not directing referrals to plaintiff physicians, **[*861]** and by not guaranteeing network admittance to new physicians hired by Woman's Clinic.

After reviewing the voluminous exhibits submitted by Woman's Clinic, the Court concludes that no genuine issue of material fact exists as to whether the activities of St. John's violate the Sherman Act antitrust provisions or Missouri state law. Even resolving all inferences and credibility issues in favor of the plaintiff, Woman's Clinic has failed to prove that the conduct of St. John's offends **[**4]** the Rule of Reason and, therefore, St. John's is entitled to

---

[1] Also included with Woman's Clinic are the individual physicians who own and operate Woman's Clinic. These physicians will hereinafter be collectively referred to as "plaintiff physicians".

judgment as a matter of law. The Court also determines that declaratory relief is not a proper remedy for Woman's Clinic in this case.

DISCUSSION

I. Standard

HN1[] Rule 56(c), Federal Rules of Civil Procedure, provides that summary judgment shall be rendered if the "pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." In ruling on a motion for summary judgment, it is the court's obligation to view the facts in the light most favorable to the adverse party and to allow the adverse party the benefit of all reasonable inferences to be drawn from the evidence. *Adickes v. S.H. Kress & Co., 398 U.S. 144, 157, 26 L. Ed. 2d 142, 90 S. Ct. 1598 (1970)*; *Inland Oil and Transport Co. v. United States, 600 F.2d 725, 727-28 (8th Cir. 1979)*.

HN2[] If there is no genuine issue about any material fact, summary judgment is proper because it avoids needless and costly litigation and promotes judicial efficiency **[**5]** *Roberts v. Browning, 610 F.2d 528, 531 (8th Cir. 1979)*; *United States v. Porter, 581 F.2d 698, 703 (8th Cir. 1978)*. The summary judgment procedure is not a "disfavored procedural shortcut." Rather, it is "an integral part of the Federal Rules as a whole." *Celotex Corp. v. Catrett, 477 U.S. 317, 327, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*; see also *City of Mt. Pleasant v. Associated Elec. Coop., Inc., 838 F.2d 268, 273 (8th Cir. 1988)*. Summary judgment is appropriate against a party who fails to make a showing sufficient to establish that there is a genuine issue for trial about an element essential to that party's case, and on which that party will bear the burden of proof at trial. *Celotex, 477 U.S. at 324*.

HN3[] The moving party bears the initial burden of demonstrating by reference to portions of pleadings, depositions, answers to interrogatories and admissions on file, together with affidavits, if any, the absence of genuine issues of material fact. However, the moving party is not required to support its motion with affidavits or other similar materials negating the opponent's claim. Id.

The **[**6]** nonmoving party is then required to go beyond the pleadings and by affidavits, depositions, answers to interrogatories and admissions on file, designate specific facts showing that there is a genuine issue for trial. Id. A party opposing a properly supported motion for summary judgment cannot simply rest on allegations and denials in the pleading to get to a jury without any significant probative evidence tending to support the complaint. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 106 S. Ct. 2505, 2510, 91 L. Ed. 2d 202 (1986)*.

HN4[] At the summary judgment stage the judge's function is not to weigh the credibility of the evidence, but rather to determine whether a genuine issue of material fact exists. Id. A genuine issue of material fact exists "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." Id. The evidence **[*862]** favoring the nonmoving party must be more than "merely colorable." *Id. at 2511*. When the moving party has carried its burden under *Rule 56(c)*, its opponent must do more than simply show there is some metaphysical doubt as to the material facts. *Matsushita Elec. Indus. Co. v. Zenith Radio, 475 U.S. 574, 106 S. Ct. 1348, 1356, 89 L. Ed. 2d 538 (1986)* **[**7]** (footnote omitted).

II. Facts

Plaintiffs in this case are comprised of Woman's Clinic, Inc., an obstetrics and gynecological ("OB-GYN") clinic as well as the physicians who work in the clinic. Also included with the plaintiffs is Thomas D. McClain, M.D. Orthopedic Surgery., L.L.C. Defendant St. John's is a network of health care providers, insurance providers, and health care facilities. St. John's Regional Health Center is a 663 bed, tertiary care unit located in Springfield, Missouri. St. John's Physicians and Clinics, Inc. is a non-profit corporation which is comprised of physicians who provide medical services for patients in the Springfield community. St. John's Health System is the larger non-profit corporation which operates St. John's Regional and is the parent company of St. John's Physicians and Clinics, Inc.

In 1994, St. John's embarked on a campaign to enlarge its health care network within the Springfield community. To this end, St. John's sought to contract and/ or affiliate with providers and insurers in an effort to establish relationships with third party payors. "Providers" are the medical doctors that render health care to patients. "Payors" refers to **[**8]** the entities that make payments for medical care on behalf of the members of their coverage plans. Included within the group of "payors" are government-financed entities such as Medicare and Medicaid, self-paying individuals who have no health insurance coverage; and the commercial payors such as Blue Cross/ Blue Shield, as well as independent provider networks who organize providers and make them available to insurance carriers, self-funded or insured groups, and employers.

In order to develop its multi-provider network, St. John's began to purchase the medical practices of physicians in the surrounding community, including the Woman's Clinic. St. John's sought to increase its services in the OB-GYN areas as well as providing mammographies which Woman's Clinic was doing at that time. In 1994, St. John's purchased the Woman's Clinic and the plaintiff physicians became employees of St. John's. [2] As part of the purchase of the Woman's Clinic and the hiring of the Woman's Clinic physicians, St. John's received from the physicians covenants not to compete should they ever leave the St. John's network. The physicians covenanted that they would not practice medicine in competition with **[**9]** St. John's within a twenty-five mile radius of St. John's Regional for two years.

Once employed by St. John's, the plaintiff physicians had access to the St. John's healthcare network. The major boon to the Woman's Clinic was that it received patient referrals from payors that contracted with the St. John's network. Payors who are contracted with St. John's provide financial incentives for individuals enrolled in their plans to see in-network physicians and financial disincentives to see out-of-network physicians. For example, a payor may offer to pay for 90% of the cost of services provided by an in-network physician, meaning a physician employed by or affiliated with the St. John's network. Patients may choose to see a physician out-of-network; not employed by or affiliated with St. John's, **[*863]** however in those cases the payor may only pay for 70% of the cost of the service. By providing these financial incentives (or disincentives, depending **[**10]** upon perspective) payors can obtain greater reductions in costs from providers and receive volume discounts.

As part of the agreement between the St. John's network and the payors, the payors promise that they will exclusively prefer St. John's providers and facilities. This does not preclude payors from paying for out-of-network services. What it means is that each payor has a preferred provider panel from which enrollees can select. Patients who see these preferred providers receive greater benefits from the plan. The payor agreements may be terminated with the appropriate notice, usually 90 days. Unless terminated, the payor contracts automatically renew for another year.

Payors are free to switch to other health care providers including the Cox network, the other major health care provider in Springfield. Additionally, payors may contract with independent physicians who are not members of the payor's provider panel, assuming that St. John's grants its permission to the independent physicians to solicit payor contracts. Providers not affiliated with St. John's also have the option of contracting with the Cox network to provide services.

Once St. John's purchased Woman's Clinic, **[**11]** St. John's received the benefit of patient access brought by Woman's Clinic and the Woman's Clinic providers obtained access to patients whose payors contracted with St. John's. From the evidence, the plaintiff physicians received favorable remunerations during their employ with St. John's. However, in 1999, St. John's undertook a restructuring that allowed plaintiff physicians the option of repurchasing the Woman's Clinic, but without the mammography clinic and the orthopedic surgery clinic. Apparently St. John's was unwilling to resell the mammography clinic and the orthopedic surgery clinic because it was considering expanding its own ambulatory surgery and mammography services. Plaintiff physicians chose to repurchase the clinic, minus the surgery center and the mammography clinic.

---

[2] St. John's also purchased the Thomas D. McClain Orthopedic Surgery Center.

As part of the resale of the clinic, St. John's and plaintiff physicians entered into a Transition Agreement. Under the new agreement, plaintiff physicians would no longer be bound by the original covenants not to compete found in the employment contracts. Plaintiff physicians would instead be obligated under a new Business Covenant. The terms of the Business Covenant provided that for a term of five **[**12]** years, plaintiff physicians could practice medicine in the Springfield area, but could not invest in or operate any ambulatory surgical center, birthing center, and freestanding lab or diagnostic service clinic including mammography and ultrasound.

Currently, plaintiff physicians are still affiliated with the St. John's network. However, plaintiff physicians perceive that they may be in danger of losing that affiliation. Plaintiff physicians fear that they will be foreclosed from the Springfield market because of, what they describe as, St. John's "exclusive" vertical network arrangement as well as the Business Covenant restricting plaintiff physicians' medical practice options. In response to these perceived dangers, Woman's Clinic filed the immediate action. Woman's Clinic asks this Court to find that the actions of St. John's, by vertically integrating its network through exclusive contracts with payors and by restricting plaintiff's ability to start an ambulatory surgical center or mammography clinic, has violated federal and state antitrust laws.

St. John's filed the present Motion for Summary Judgment alleging that Woman's **[*864]** Clinic could not prevail on any of its four counts stated **[**13]** in the Complaint: The antitrust claims, Counts I, II, and III break down into allegations of violations with respect to two practices; 1) the vertical integration structure of St. John's, and 2) the Business Covenant entered with plaintiff physicians. Woman's Clinic alleges that the structure of the St. John's network is an illegal restraint of trade. Woman's Clinic further alleges that the Business Covenant is a horizontal market allocation. Both allegations assert violations of the Sherman Antitrust Act, *15 U.S.C. § 1*. [3] The remaining Count IV pertains to a claim for declaratory relief that St. John's is breaching the affiliation agreement with Woman's Clinic.

St. John's counters that Woman's Clinic is unable **[**14]** to meet its burden of proof under the Rule of Reason with regard to both antitrust claims and, therefore, summary judgment is appropriate. As to Count IV, St. John's asserts that the prayer for declaratory relief is really a claim for breach of contract. St. John's avers that because Woman's Clinic has not pled damages, an essential element, there can be no relief for Woman's Clinic on this claim and declaratory relief is inappropriate. For the reasons set forth below, summary judgment is GRANTED in favor of St. John's on Counts I, II, and III; the antitrust claims. Summary judgment is also GRANTED with respect to the declaratory breach of contract claim. Woman's Clinic's Motion for Partial Summary Judgment is DENIED.

III. Analysis

At the outset, Woman's Clinic argues that all of St. John's conduct should be considered collectively when determining whether Woman's Clinic has proved its antitrust claims. Woman's Clinic alleges that everything St. John's and Cox does establishes that the Springfield medical market is completely foreclosed from entry by independent or non-affiliated physicians. In support of this contention, Woman's Clinic cites to *Continental Ore Co. v. Union Carbide & Carbon Co., 370 U.S. 690, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)* **[**15]** for the proposition that "the character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole." *Id. at 698-99*. However, that proposition is not applicable in this case.

Under Union Carbide, a conspiracy must be considered in totality. In this case however, there is no conspiracy. Woman's Clinic strenuously asserts throughout its 120 page brief that the actions of St. John's and Cox foreclose the market. However, neither Cox nor its subsidiaries, nor its affiliates have ever been named in this lawsuit. For that reason, the conduct of Cox, as far as it pertains to allegations of antitrust violations, is completely irrelevant. Because of this, there is no conspiracy to be evaluated. Woman's Clinic has three different theories upon which it may prevail that St. John's has violated antitrust laws; 1) that St. John's vertical network and the Business Covenant

---

[3] Count III alleges that St. John's has violated Missouri's antitrust laws found at *Mo. Rev. Stat. § 416.031*. ***HN5***[] Missouri's antitrust laws are almost identical the Sherman Antitrust Act, hence the reasoning of all federal antitrust cases will be equally applicable to state claims.

unreasonably restrain trade; 2) that the Business Covenant is a per se invalid market allocation; and 3) that the Business Covenant violates Missouri antitrust statutes. Woman's Clinic may succeed on all of its theories, some **[**16]** of its theories, or none at all. However, ***HN6***[] each theory must be evaluated independent of the other. See *Intergraph Corp. v. Intel* ***[*865]*** *Corp., 195 F.3d 1346, 1367 (Fed. Cir. 1999)* (stating that "each legal theory must be examined for its sufficiency and applicability[.]") Having so stated, each theory will be examined individually.

A. St. John's "Exclusive" Vertical Integration as a Restraint of Trade

In Count I, Woman's Clinic asserts that St. John's has illegally restrained trade by entering into exclusive contracts with payors. Woman's Clinic also alleges that the Business Covenant entered into with the plaintiff physicians is an illegal restraint of trade. [4] Such claims must be evaluated under the Rule of Reason. Even when viewing the evidence in a favorable light to the plaintiff, Woman's Clinic has failed to meet its burden under the Rule of Reason analysis.

HN7[] Exclusive dealing contracts **[**17]** are evaluated under the Rule of Reason. *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 333-35, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*. Accord *Minnesota Ass'n of Nurse Anesthetists v. Unity Hosp., 208 F.3d 655, 660 (8th Cir. 2000)*. The Rule of Reason involves an inquiry into a defendant's market power within a given market structure. *Double D Spotting Service, Inc. v. Supervalu, Inc., 136 F.3d 554, 560 (8th Cir. 1997)*. The antitrust laws are aimed at exclusive agreements which have detrimental effects on competition or have the potential for adverse market impacts. *Levine v. Central Florida Med. Affiliates, Inc., 72 F.3d 1538, 1551 (11th Cir. 1996)*. Accordingly, an exclusive dealing agreement can be invalidated upon either a showing of actual detrimental impacts on competition or upon a showing of substantial market power sufficient to foreclose competition. *F.T.C. v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)*. Accord *Ryko Manuf. Co. v. Eden Servs., 823 F.2d 1215, 1233 (8th Cir. 1987)*. Thus, Woman's Clinic can prevail if any genuine **[**18]** issues of material fact exist as to whether the exclusive agreements between St. John's and its payors actually, detrimentally, impact competition, or if St. John's has sufficient market power. Woman's Clinic has shown neither.

At the outset, the Court recognizes that there are actual agreements between St. John's which are purportedly exclusive. The significance of this is that the Court need not look to a pattern of behavior or practices. See *Dillon Materials Handling v. Albion Indus., 567 F.2d 1299, 1302 (5th Cir. 1978)* (stating that an exclusive dealing agreement could be inferred from conduct of parties). In this case, there is an express agreement between St. John's and its payors and the language of such an agreement governs the decision. The putative exclusive agreements generally state as follows:

> During the term of this Agreement, Payor agrees riot to enter into, either directly or indirectly, any other agreement for the provision of health services for Payor's employees or dependants with any other provider, insurance carrier, health maintenance organization, preferred provider organization, and/ or hospital-physician organization located in or **[**19]** doing business in the service area outlined and defined … except for Covered Services not available through St. John's.

While this appears to be an exclusive dealing agreement, nowhere does it prevent the payor from paying for services that its enrollees receive outside the St. John's **[*866]** network. The payors may offer incentives to stay in-network; however if the patient or enrollee elects to see an out-of-network physician, the payor is bound to pay the agreed upon amount for out-of-network care. Furthermore, physicians who no longer associate with St. John's may still treat patients enrolled in the St. John's network. The individual patients may have to pay more out of pocket, but they are not precluded from seeing an out-of-network physician by the "exclusive" agreement of the patient's payor. These facts indicate that the agreement between St. John's and its payors is not the type of "exclusive" agreement with which the antitrust laws are concerned.

[4] The Business Covenant is also the subject of Counts II and III and will be discussed more fully below.

Further evidence that the Sherman Act was not designed to curtail this type of practice is the fact that payors can and have left the St. John's network to contract with one of St. John's competitors. The contracts between St. **[**20]** John's and the payors contain a provision for the termination of the agreement. While the terms vary, a typical termination clause reads as follows:

> Contract Hospital [St. John's] or payor may terminate this Contract by giving the other party at least sixty (60) days written notice prior to the effective date of termination and provided that the termination shall take effect on the sixtieth (60th) day after the anniversary date of the Contract. [5]

The ability to cancel the contract on relatively short notice indicates the benign nature of any exclusive effect. [6] Such a power on the part of the payor would prohibit St. John's from unfairly raising prices or lowering output because the payor could terminate the agreement in a relatively short period of time. See *U.S. Healthcare, Inc. v. Healthsource, Inc., 986 F.2d 589, 596 (1st Cir. 1993)* (stating that a short termination period on an exclusive arrangement general indicates a de minimus restraint on competition). In the Springfield market, if a payor terminates its contract with St. John's, it has the option of contracting with Cox, perhaps on more favorable terms. To combat this, St. John's is **[**21]** motivated to keep premiums low as well as keep enrollees Satisfied. This is the very nature of competition.

[22]** Nevertheless, the plaintiff physicians allege that if their affiliation with St. John's were terminated, they would be foreclosed from the Springfield market because of these "exclusive" contracts. While the Court is dubious as to the exclusive nature of the payor agreements, the Court will nevertheless assume for purposes of this motion that the contracts are exclusive. ***HN8***[] In order to establish that a system of exclusive arrangements violates antitrust laws, the plaintiff must show either actual harm to competition or sufficient market power to presume competition would be injured. See *Minnesota Ass'n of Nurse Anesthetists, 208 F.3d at **[*867]** 662* (stating that when plaintiffs failed to prove actual adverse effects on competition, they were forced to prove market power in a relevant geographic market).

Woman's Clinic asserts that it has established a violation of the antitrust laws based on the conclusion of its expert, James Lagenfeld, that between St. John's and Cox, the Springfield medical market is almost totally foreclosed. This, says Woman's Clinic, is sufficient to preclude an inquiry into market power. The Court has read both of Lagenfeld's reports and finds them completely **[**23]** irrelevant to this issue. Lagenfeld erroneously included the activities of Cox in his calculations. As mentioned earlier, what Cox does has absolutely no bearing on a case in which Cox has not been named a defendant. Any wrongdoing on the part of Cox cannot be imputed to St. John's and vice versa. The only relevant issue is the exclusive contracts made between St. John's and its payors.

Outside these bald, erroneous, assertions that almost all of the Springfield market is totally foreclosed, Plaintiffs present no evidence to support their claims of foreclosure. Therefore, there is no actual evidence, and the Court is unable to find an antitrust violation on the basis of foreclosure rates. This leaves Woman's Clinic to show that St. John's has sufficient market share so as to potentially foreclose the market.

HN9[] The first step in determining market power is to identify the relevant product and geographic markets. *Double D, 136 F.3d at 560*. This burden falls on the plaintiff. Id. Woman's Clinic's expert hypothesizes, and the parties do not dispute that, for purposes of this motion, the relevant product market is OB-GYN services and the geographic market is the 12 **[**24]** county area around Springfield.

---

[5] Some of the contracts were terminable upon twenty days notice, others upon ninety days notice.

[6] Woman's Clinic asserts it has factually disputed the ability to terminate the contracts and has shown that contracts are de facto long term contracts because of automatic renewal provisions and because few payors actually terminate their contracts with St. John's. Woman's Clinic argues that several additional factual disputes preclude summary judgment. Though perhaps disputed, these facts are not material. It is true the contracts with St. John's and the payors automatically renew, unless terminated. The simple fact is that payors have the power to terminate contracts if they feel such action is warranted. Whether payors have or have not terminated or switched is not a material dispute. Even if no payors have ever switched, that does not establish any harm to competition. In fact, it likely suggests the opposite; that competition is keeping payors satisfied.

As to proof of market power, Woman's Clinic alleges that, based on Lagenfeld's report, St. John's has employed or contracted with 56% of the OB-GYN physicians in the Springfield market. Woman's Clinic conclusively states that this establishes market power. However, the data relied upon by Lagenfeld contradicts Woman's Clinic's assertions.

According to Lagenfeld's data, St. John's either employs or contracts with 27 OB-GYN physicians in the Springfield market. See May 13, 2002 Report of Dr. James Lagenfeld, Plaintiff's Suggestions in Opposition, Volume III, Exhibit 6. However, 13 of those physicians have courtesy privileges with St. John's but are not members of St. John's network. Therefore it is more accurate to say that St. John's is associated with 14 OB-GYN physicians. There are a total of 45 OB-GYN physicians in the relevant market area. [7] This leaves 31% of the OB-GYN physicians under contract with St. John's. If the risk is harm to the OB-GYN physician market, St. John's 31% share of the OB-GYN physicians is hardly indicative of power sufficient to unilaterally reduce output or increase prices without losing patients to competitors.

[25]** If the alleged risk is harm to patient choice, nowhere does Plaintiff's data ever produce the percent of OB-GYN patients treated by St. John's. The data does show that St. John's has 35% market share overall, **[*868]** but does not specify what percent actually utilize the relevant market in question, OB-GYN services. Even assuming the 35% is a representative market share of OB-GYN patients, the Court finds that this does not equal sufficient market power to constitute an antitrust violation. See *Sewell Plastics, Inc. v. Coca-Cola Co., 720 F. Supp. 1196, 1212-13 (W.D. N.C. 1989)* (finding that 40% of market share did not constitute market power); *Hassan v. Independent Practice Assc., 698 F. Supp. 679, 696 (E.D. Mich. 1988)* (finding that physicians group with 20% share of relevant market was not sufficient market power); *Kuck v. Bensen, 647 F. Supp. 743, 746 (D. Me. 1986)* (concluding that hospital did not have market power in emergency services market where it only handled 37% of emergency room volume); and *Gonzales v. Insignares, 1985-2 Trade Cas. (CCH) P66,701 (N.D. Ga. 1985)* (stating that hospital controlling 40% of the relevant **[**26]** market was not sufficient market power to make exclusive agreement anticompetitive). Even assuming that the contract between St. John's and the payors and exclusive, St. John's simply does not have enough market power to presume that the exclusive contracts will impair competition because 65% of the market share is still available. [8]

In sum, the Court doubts the agreements between St. John's and the payors are the types of "exclusive" agreements which the antitrust statutes are designed to remedy. The payors' ability to terminate the contract and the ability of enrollees to see physicians out-of-network supports this conclusion. Even assuming the exclusivity of the agreements, Woman's Clinic **[**27]** has failed to show that there is any actual detrimental foreclosure or that St. John's has sufficient market power so as to warrant antitrust concerns. [9]

---

[7] In his report, Dr. Lagenfeld used OB-GYN physician data from a 21-county region around Springfield. This accounted for 48 OB-GYN physicians. Three of those 48 physicians are not in the 12-county area being used as the relevant geographic market. Of those three, two had affiliation with Cox, and the other was, presumably, affiliated elsewhere. In the end, this difference only effected the total number of physicians and not the number of St. John's physicians used to calculate the percent of OB-GYN physicians affiliated with St. John's

[8] Woman's Clinic asserts that the Cox network is closed to the plaintiff physicians, and therefore all the market is foreclosed. The fact that some plaintiff physicians have applied and been turned down by Cox does not mean the network is closed. It only means that the Cox network has no need for more OB-GYN physicians.

[9] Because Woman's Clinic has devoted so much of its case to tying the conduct of the Cox network into this lawsuit, it bears repeating once more: the conduct of Cox is irrelevant. When one player in any given market begins to consolidate downstream distributors into a network, it is only natural that the other players in the market follow suit. Where antitrust becomes concerned is when upstream and downstream competition is cut off. In this case, there is upstream competition between Cox and St. John's for payor contracts. There is also downstream competition for physician referrals within the two respective networks. While Woman's Clinic disputes whether the competition is "vigorous" the fact is that Cox and St. John's are competitors for the same market of payor contracts. If anything has been "vigorous" is Woman's Clinic's attempt to obfuscate this matter by bombarding the Court with pounds of arguably irrelevant information. Plaintiff physicians should heed the following well: ***HN10***[] antitrust is concerned with the protection of competition, not individual competitors. *Ryko, 823 F.2d at 1234*.

[28] B. The Business Covenant as a Horizontal Market Allocation**

Count II of Woman's Clinic's Complaint alleges that the Business Covenant, entered into between St. John's and plaintiff physicians prior to the resale of the Woman's Clinic is a horizontal market allocation that is illegal per se under the Sherman Antitrust Act. Woman's Clinic argues that the Business Covenant prohibiting it from operating an ambulatory surgery center or a mammography clinic for five years is a naked restraint on competition. As such, Woman's Clinic contends the Business Covenant must be invalidated without any inquiry into the actual or potential effects on competition. St. John's counters that **[*869]** the Business Covenant was ancillary to the agreement to resell the Woman's Clinic to the plaintiff physicians. Accordingly, St. John's presses that the Business Covenant must be evaluated under the Rule of Reason.

HN11[] When analyzing horizontal agreements, it is useful to attempt to classify the agreement as either a "naked restraint" or an "ancillary agreement." XI Herbert D. Hovenkamp, ***Antitrust Law***, P 1904 (1998). Naked restraints are so pernicious in their effect on competition and so blatantly inapposite **[**29]** to the true function of a competitive market that their existence is routinely condemned as per se illegal. *Dunafon v. Delaware McDonald's Corp., 691 F. Supp. 1232, 1241 (W.D. Mo. 1988)* (citing *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958))*. Naked restraints are generally formed with the objectively intended purpose or likely effect of increasing prices or decreasing output. See XI Hovenkamp, P 1906. If an agreement is a naked restraint, neither the relevant market nor market power need be proven. Id. at P 1910. The harmful effects of the agreement will instead be presumed. Id.

Ancillary agreements, by contrast, are agreements that, while horizontal, have the potential to promote competition. *Polk Bros. Inc. v. Forest City Enter., 776 F.2d 185, 189 (7th Cir. 1985)*. These agreements are usually 1) between the seller of property or business and the buyer not to compete with the buyer in such a way as to detract from the value of the property just sold; or 2) between the buyer and seller of property or a business not to use the purchased property in competition with the business retained by the seller. *United States v. Addyston Pipe & Steel Co., 85 F. 271, 281 (6th Cir. 1898)* **[**30]** (aff'd as modified by *Addyston Pipe & Steel Co. v. United States, 175 U.S. 211, 44 L. Ed. 136, 20 S. Ct. 96 (1899))*. In order to determine whether a horizontal agreement is ancillary, the court must determine whether at the time the agreement was made, it was necessary to promote the enterprise and productivity of an underlying arrangement. *Polk Bros., 776 F.2d at 189*.

In the present case, Woman's Clinic argues that the Business Covenant is a naked restraint on competition because it "1) it was entered into years after the Employment Agreements to which it is supposedly ancillary; 2) imposes restraints unnecessary and unrelated to the procompetitive aspects of the Employment Agreements; and 3) plainly restricts output." Plaintiff's Suggestions in Oppostion, at 49. Based on a review of the facts of this case, it appears to the Court that the Business Covenant is not ancillary to the Employment Agreement, but rather is ancillary to the Transition Agreement which was to govern the plaintiff physicians' repurchase of the Woman's Clinic.

The relevant facts are these: In 1999, St. John's undertook a restructuring program after concerns were raised **[**31]** in regard to administration and management. As part of the restructuring, plaintiff physicians were given the option of 1) remaining with St. John's under an amended covenant not to compete; 2) remaining with St. John's under the same Employment Covenant; or 3) terminating their employment with St. John's, repurchasing Woman's Clinic, and entering into a Transition Agreement and Affiliation Agreement with St. John's. The plaintiff physicians opted to terminate their employment and repurchase the Woman's Clinic. The plaintiff physicians then entered into the Transition Agreement whereby the plaintiff physicians became affiliates of the St. John's network instead of employees. For its part, St. John's waived the original non-compete agreement contained in the employment **[*870]** agreements which prevented plaintiff physicians from practicing medicine. In the Transition Agreement, the plaintiff physicians were instead restricted by the Business Covenant which allowed the plaintiff physicians to continue practicing medicine, but prohibited them from investing in or operating, among other things, an ambulatory surgery center and a mammography clinic.

Based on these facts, the Business Covenant **[**32]** was ancillary to the Transition Agreement. The new Business Covenant was necessary because, for one, it allowed the plaintiff physicians to practice medicine. It would be folly for the plaintiff physicians to have repurchased the Woman's Clinic when they were barred from practicing medicine. Moreover, the Covenant was need to ensure a successful transition from employees to affiliates. This was not a situation where the underlying arrangement was completed, as is argued by Woman's Clinic. The transition from employees to affiliates was ongoing. Compare *Blackburn v. Sweeney, 53 F.3d 825, 828 (7th Cir. 1995)* (finding that covenant not to compete with advertising was not ancillary to partnership dissolution because a judge had already ordered the partnership dissolved before the creation of the covenant). This indicates the ancillary nature of the Business Covenant. Additionally, by allowing the plaintiff physicians to practice medicine, the Business Covenant increases competition, allowing more physicians to compete for patient referrals. Thus the Business Covenant does not have the earmarks of a naked restraint on trade. It is rather ancillary to the Transition Agreement **[**33]** and must be evaluated under the Rule of Reason.

The Business Covenant is not invalid under the Rule of Reason for the same reason the vertical arrangement of St. John's was not invalid. [10] The Court notes that Woman's Clinic has satisfied even less of its burden with respect to this argument. Beyond not proving that St. John's has market power, Woman's Clinic has failed to even establish the relevant market. Because the Business Covenant pertains to the delivery of medical care besides OB-GYN services, the OB-GYN market is no longer appropriate. Given this difference, a new market is required and Woman's Clinic has failed to allege what the new market would be. Without this proof, Woman's Clinic's claims under Count II must fail.

C. The Business Covenant Under Missouri Law

As to Count III, Plaintiff Woman's Clinic alleges that the Business **[**34]** Covenant is not valid because it does not protect a valid interest under Missouri law, *Mo. Rev. Stat. § 416.031*. ***HN12***[] Generally, satisfaction of the federal antitrust statutes will satisfy state antitrust laws. However, some states still adhere to the common law of trade restraints condemning "unreasonable" non-compete agreements. XIV Hovenkamp, at P 2418. Under Missouri law, a covenant not to compete is unreasonable if, in addition to being ancillary to a valid underlying agreement, the covenant is not reasonably limited in scope to protecting the covenatee's legitimate interest. *Renal Treatment Ctrs-Missouri, Inc. v. Braxton, 945 S.W.2d 557, 563 (Mo. Ct. App. 1997)*.

Covenants not to compete are found in a variety of relationships including employer/ employee relationships and buyer/ seller relationships. Id. The importance of identifying the type of relationship is that it allows the court to determine what legitimate interests may be at stake. In the employer/ employee context, the legitimate **[*871]** concerns include protecting customer contacts and protecting trade secrets. *Schmersahl, Treloar, & Co. v. McHugh, 28 S.W.3d 345, 349 (Mo. Ct. App. 2000)*. **[**35]** In the context of a buyer/ seller relationship, particularly the relationship between the buyer and seller of a business, the interests include maintaining the good will of the business for the buyer, and protecting any business interest retained by the seller. See e.g. *Schnucks Twenty-Five, Inc. v. Bettendorf, 595 S.W.2d 279, 286 (Mo. Ct. App. 1979)* (upholding promise by seller not to enter into grocery business under seller's surname in competition with buyer) and *Amer. Strawboard Co. v. Haldeman Paper Co., 83 F. 619, 624 (6th Cir. 1897)* (upholding covenant by operator of paper mill not to produce certain type of paper products in competition with owner).

According to Woman's Clinic, the Business Covenant does not protect any of the legitimate interests of an employer/ employee relationship. Woman's Clinic asserts that St. John's has admitted as much by its "damning" admission that "the revised covenant separates limitations on the professional practice of medicine from ***potential future business relationships*** that could harm St. John's[.]" Plaintiff's Suggestions in Support of Partial Motion for

[10] Thus summary judgment is also granted in favor of St. John's to the extent Woman's Clinic claimed the Business Covenant was an alleged restraint on trade in Count I.

Summary Judgment at 16. (emphasis supplied **[**36]** in original). Thus, says Woman's Clinic, St. John's only seeks to prohibit future competition. [11]

What Woman's Clinic ignores is that the current relationship between St. John's and the plaintiff physicians is not an employer/ employee relationship. It is true that the plaintiff physicians were employees of St. John's. It is also true that at one time there was a non-competition agreement that was part of the employment contract. Plaintiff physicians have since decided to terminate their employ. The non-compete agreement which was ancillary to the employment contracts of the plaintiff physicians has been waived. Instead, the current Business Covenant is ancillary to a Transition Agreement **[**37]** for the sale of a business, namely, the Woman's Clinic. Since the Business Covenant is ancillary to the re-sale of the Woman's Clinic to the plaintiff physicians from St. John's, the relevant, legitimate concerns are those that are concomitant with a buyer/ seller relationship, not an employer/ employee relationship. As such, St. John's has a legitimate interest in protecting its retained business.

It is important to remember that St. John's is not selling back all of the Woman's Clinic. It retained for itself the mammography and orthopedic surgery clinics. It is therefore legitimate for St. John's to seek to protect the value of an asset recently purchased. See *Addyston Pipe, 85 F. at 281* (finding that covenants not to compete have been upheld in situations were the buyer of a property promises "not to use the same in competition with the business retained by the seller[.]"). Having found that the covenant protects a legitimate interest of St. John's, the question remains whether the covenant is reasonable in terms of duration and geographic scope.

Based on case law, the five year duration of the covenant, and the 25-mile radius that is geographically encompassed **[**38]** are both reasonable to protect St. John's interest. ***HN13***[] "Temporary and spatially limited restraints are enforceable if reasonable under all attending circumstances[.]" *Schott v. Beussink, 950 S.W.2d 621, 626 (Mo. Ct.* ***[*872]*** *App. 1997)*. Whether a spacial or geographic restriction is reasonable will depend on whether the restriction is no greater than necessary to protect the legitimate interest at stake. *Continental Research Corp. v. Scholz, 595 S.W.2d 396, 400 (Mo. Ct. App. 1980)*. Given that the relevant market for St. John's services has been established to be the 25-mile radius of St. John's Regional, a restriction on the plaintiff physicians from operating mammography or ambulatory surgery centers within that area appears to the Court to be no broader than necessary to protect St. John's business. See *Orchard Container Corp. v. Orchard, 601 S.W.2d 299 (Mo Ct. App. 1980)* (upholding a 125-mile radius restriction as reasonable given the placement of the customers). Additionally, the five year time period of the restriction does not appear to cause any concerns as being overly broad. See *Mills v. Murray, 472 S.W.2d 6 (Mo. Ct. App. 1971)* **[**39]** (finding a restriction on competition for three years to be reasonable); and *Schnucks Twenty-Five, 595 S.W.2d at 285* (upholding ten-year restriction period as reasonable). Because the Covenant is reasonable, it does not violate Missouri law. No genuine issues of material fact remain and St. John's is entitled to judgment as a matter of law on the claim that the Business Covenant violates Missouri law.

Woman's Clinic filed a cross-motion for partial summary judgment asserting that there was no genuine issue of material fact that the Business Covenant was a naked restraint on trade and per se invalid. The arguments in support of this motion were virtually identical to the arguments in opposition to St. John's motion for summary judgment. Having concluded that the Business Covenant is ancillary to the Transition Agreement and that the Rule of Reason applies, it necessarily follows that a per se treatment is inapplicable. Plaintiff's motion for partial summary judgment is therefore DENIED.

D. Declaratory Judgment Relief

In its final claim, Woman's Clinic asks this Court to declare 1) that St. John's is breaching the Affiliation Agreement through a prejudicial **[**40]** referral system; and 2) that St. John's is breaching the Affiliation Agreement by not

---

[11] The Court asks, perhaps not so rhetorically, is that not the function of all non-compete agreements? To say that a covenant not to compete is invalid because it prohibits future competition would be to invalidate every single non-compete agreement ever entered into, without regard to reasonableness or legitimate interests.

guaranteeing network affiliation for any new physicians hired by Woman's Clinic. Woman's Clinic claims that these actions have hindered the physician plaintiffs, however Woman's Clinic makes no request for damages nor does Woman's Clinic seek any injunctive relief to stop St. John's. Woman's Clinic simply requests that this Court declare St. John's is breaching the Affiliation Agreement.

There is a dispute over whether the federal Declaratory Judgment Act, *28 U.S.C. § 2201*, or the Missouri Declaratory Judgment Act, *Mo. Rev. Stat. 527.010* should govern this claim, but this dispute need not detain the Court long. The case which St. John's uses to support its claim that the federal statute governs is not controlling here because this is not a diversity case. Instead, jurisdiction of this Court was founded upon federal question jurisdiction as provided in *28 U.S.C. § 1331*. Briefly stated, the declaratory judgment claim of Count IV is a supplemental state law claim brought as part of the federal antitrust action. See *28 U.S.C. § 1367*. **[**41]** Thus, Missouri law controls on the declaratory judgment claim.

HN14[] Under Missouri law, a valid plea for declaratory relief requires three things; 1) the existence of a justiciable controversy; 2) the presence of a legally protectable interest; and 3) the existence of a question ripe for judicial decision. *Lake Ozark Constr. Indus., Inc. v. North Port Assocs., 859 S.W.2d 710, 714 (Mo. Ct. App. 1993)*. Having said that much, it is also true that a declaratory judgment remedy is not a panacea for any real or imagined legal ills. *Cronin v. State Farm Fire & Cas. Co., 958 S.W.2d 583,* ***[*873]*** *587 (Mo. Ct. App. 1997)*. Absent an exceptional circumstance, a declaratory judgment remedy should not be used when an adequate remedy already exists, either in law or in equity. Id.

Based on relevant case law, the issue of this claim comes down to whether Woman's Clinic is seeking to construe portions of the Affiliation Agreement or whether Woman's Clinic is merely asserting a breach of contract claim. In the former situation, Missouri law looks more favorably upon granting declaratory relief. See *Washington Univ. v. Royal Crown Bottling Co. of St. Louis, 801 S.W.2d 458, 463 (Mo. Ct. App. 1990)*. **[**42]** In the latter, courts in Missouri have ruled that the plaintiffs had adequate remedies at law or equity and found declaratory relief inappropriate. See *Michigan Sporting Goods Distribs., Inc. v. Lipton Kenrick Assoc., L.P., 927 S.W.2d 570, 572 (Mo. Ct. App. 1996)*; and *Love Mortgage Properties, Inc. v. Horen, 639 S.W.2d 839, 841 (Mo. Ct. App. 1982)*.

The Royal Crown case involved a claim for declaratory relief in order to resolve the obligations of a lessor to make repairs to leased property. The court found that declaratory judgment was proper, in part, because there was no adequate remedy at law. *Royal Crown, 801 S.W.2d at 463*. The court noted that the lease involved was ongoing and did not terminate until 2001, and that other issues of repair obligations might arise in the future. Id. Additionally the court made mention of the fact that the plaintiffs had not requested a declaration that the lease had been breached. Id. Instead, the plaintiffs requested that the court interpret the repair obligation contained in the lease. Id. The court concluded that the case presented a situation in which "it [would] be desirable **[**43]** that the relationship of all the parties be established because there may be a continuing relationship or future acts which depend on the outcome [of the declaratory judgment proceeding]." Id. (quoting *Polk County Bank v. Spitz, 690 S.W.2d 192, 194 (Mo. Ct. App. 1985)*.

By contrast, the court in Love Mortgage and in Lipton found that plaintiffs had alternate remedies available and, thus, declaratory relief was inappropriate. *Lipton, 927 S.W.2d at 572*; *Love Mortgage, 639 S.W.2d at 841*. In Lipton, the court noted that the plaintiffs had requested that the court declare the lease agreement breached. *Lipton, 927 S.W.2d at 572*. The court distinguished the Lipton case from the Royal Crown decision stating that, in Lipton, the claim was really for breach of the lease and that an award of money damages would settle the parties' dispute. Id. The court had decided a nearly identical issue earlier in Love Mortgage. In that case, the plaintiff also requested a declaration that the defendant had breached the lease. *Love Mortgage, 639 S.W2d at 841*. The court found that while **[**44]** the plaintiffs purported to seek declaratory relief, the claim was really one for breach of contract. Id. Thus, the court stated, declaratory relief was inappropriate. Id.

As to the present case, factually it is similar to all three cases. The Affiliation Agreement is ongoing and continues to govern the actions of the parties. In that sense, it is analogous to Royal Crown and it would seem that declaratory relief is necessary to resolve the dispute. However, the pleadings of this case are more similar to Love Mortgage and Lipton. Woman's Clinic seeks the Court to declare the Affiliation Agreement breached on account of two separate actions of St. John's. No request to construe the terms of the Affiliation Agreement has been made, though because Woman's Clinic claims breach of the ever so amorphous "good faith and fair dealing" condition, it would be necessary to construe such a condition to determine whether it was broad enough to cover St. John's conduct. Ultimately **[*874]** however, the present dispute is more similar to Love Mortgage and Lipton and declaratory relief is inappropriate in this case.

The Court is most persuaded by Woman's Clinic's own pleadings. **[**45]** The fact it is seeking a declaration for breach of the agreement leads this Court to conclude that Count IV is a thinly veiled attempt to establish breach of contract. As such, the more proper remedy for Woman's Clinic is at law requesting money damages or in equity seeking injunctive relief. Because Woman's Clinic has alternative remedies available, declaratory relief is inappropriate. Thus, St. John's Motion for Summary Judgment on Count IV of Woman's Clinic's Complaint is GRANTED.

CONCLUSION

For the above reasons, Defendant St. John's Motion for Summary Judgment is GRANTED in full. Plaintiff Woman's Clinic's Motion for Partial Summary Judgment is DENIED.

IT IS SO ORDERED.

/s/ GARY A. FENNER, JUDGE

United States District Court

DATED: **November 12, 2002**

Gross v. Woodman's Food Mkt.

HN1[] **Public Enforcement, State Civil Actions**

Wisconsin's Unfair Sales Act prohibits any sale of any item of merchandise either by a retailer, wholesaler, wholesaler of motor vehicle fuel or refiner, at less than cost as defined in this section with the intent or effect of inducing the purchase of other merchandise or of unfairly diverting trade from a competitor. *Wis. Stat. § 100.30(3)*. In proving a violation, evidence of any sale of any item of merchandise at less than cost as defined in this section shall be prima facie evidence of intent or effect to induce the purchase of other merchandise, or to unfairly divert trade from a competitor, or to otherwise injure a competitor.

HN4[] **Gasoline Fuels, Gasoline Dealers & Distributors**

Under the Wisconsin Unfair Sales Act, "cost" for retail sales of motor vehicle fuel is defined as the higher of two computations, one using the seller's invoice or replacement cost as a base (invoice/replacement formula) and the other using the average posted terminal (APT) price as a base (APT formula). *Wis. Stat. § 100.30(2)(am)* 1m.b and c. Motor vehicle fuel is purchased at terminals. The APT price is defined by statute and, in general terms, is the terminal price as published by a petroleum reporting service, plus taxes, transportation, and other charges not already included. The APT formula then adds a markup of 9.18% to cover the cost of doing business. *Section 100.30(2)(am)*1m.b and c.

HN9[] **Public Enforcement, State Civil Actions**

Those invoking the exception to the Wisconsin Unfair Sales Act in *Wis. Stat. § 100.30(6)(a)7* are required to notify the Department of Agriculture, Trade and Consumer Protection (DATCP) of the lower price before the close of business on the day on which the price was lowered in the form and manner required by the department. *Section 100.30(7)(a)*. If that is done, the DATCP may not proceed against that person or entity, and there is immunity from liability for a private cause of action. *Section 100.30(7)(c)*. Failure to comply with the notification requirement creates a rebuttable presumption that the price was not lowered to meet a competitor's price. *Section 100.30(7)(b)*.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN17[] **Supporting Materials, Affidavits**

Summary judgment is proper where there are no genuine issues of material fact and the moving party is entitled to judgment as a matter of law. An appellate court employs the same methodology as the circuit court, and its review is de novo. Where the complaint states a claim for relief and the answer joins issue, the appellate courts examines the moving party's affidavits to determine whether that party has made a prima facie case for summary judgment. If it has, the appellate court then looks to the opposing party's affidavits to determine whether there are any material facts in dispute that entitle the opposing party to a trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN18[] **Opposing Materials, Accompanying Documentation**

Affidavits in support of or opposition to summary judgment shall be made on personal knowledge and shall set forth such evidentiary facts as would be admissible in evidence. *Wis. Stat. § 802.08(3)*. On summary judgment, the party relying on evidence need not submit sufficient evidence to conclusively demonstrate the admissibility of the evidence it relied upon in its affidavits. The party producing the evidence need only make a prima facie showing that the evidence would be admissible. The burden then shifts to the opposing party to show that the evidence is inadmissible or to show facts which put the evidence at issue. If the admissibility of the evidence is challenged, the court must then determine whether the evidence would be admissible.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN19[] **Standards of Review, De Novo Review**

Although an appellate court employs the summary judgment methodology de novo, it reviews the circuit court's decision allowing supplemental affidavits under the deferential standard for discretionary decisions, since that decision is committed to the circuit court's discretion.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN20[] **Summary Judgment, Supporting Materials**

Wisconsin Stat. § 802.08(3) provides that a trial court may permit affidavits to be supplemented or opposed by depositions, answers to interrogatories, or further affidavits. Similarly, the decision whether a submission meets the requirements of *§ 802.08(3)* that affidavits shall be made on personal knowledge and shall set forth such evidentiary facts as would be admissible in evidence, may involve evidentiary rulings that are committed to the circuit court's discretion.

See *Wis. Stat. § 100.30(2)*.

Governments > Legislation > Interpretation

HN24[] **Legislation, Interpretation**

The purpose of statutory construction is to discern the intent of the legislature, and, to this end, an appellate court first considers the language of the statute. If the language clearly and unambiguously sets forth the intent of the legislature, the appellate court applies that language to the facts at hand. Statutory language is clear and unambiguous when it has only one reasonable meaning, and, conversely, it is ambiguous when it is capable of being reasonably understood in two or more different ways. An appellate court avoids constructions of statutory language that are unreasonable.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Interpretation

HN25[] Public Enforcement, State Civil Actions

The terms "intent" and "effect" as used in Wis. Stat. § 100.30(3) are the same. However, each term plainly has a different meaning. The common meaning of "intent" is "purpose," and the common meaning of "effect" is "result."

Governments > Legislation > Interpretation

HN26[] Legislation, Interpretation

Reviewing court is to interpret language in statutes according to its common and ordinary usage, unless another meaning is indicated, and it may consult a standard dictionary for the common meaning of a word. Use of a dictionary to establish the meaning of a word does not mean that it is ambiguous.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN27[] Public Enforcement, State Civil Actions

Wis. Stat. § 100.30(3) prohibits a sale at less than statutory cost if there is either the intent or effect of injuring a competitor in ways other than unfairly diverting trade from a competitor.

Evidence > Types of Evidence > Demonstrative Evidence > General Overview

Evidence > ... > Exceptions > Business Records > General Overview

HN28[] Types of Evidence, Demonstrative Evidence

Generally, records prepared in anticipation of litigation are not business records under Wis. Stat. § 908.03(6), the business records exception to the hearsay rule.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Constitutional Law > ... > Case or Controversy > Constitutionality of Legislation > General Overview

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

HN29[] Standards of Review, De Novo Review

The constitutionality of a statute presents a question of law, which an appellate court reviews de novo.

Civil Procedure > Appeals > Standards of Review > General Overview

Constitutional Law > ... > Case or Controversy > Constitutionality of Legislation > General Overview

HN30[] Appeals, Standards of Review

Like all statutes, the Wisconsin Unfair Sales Act enjoys a strong presumption of constitutionality, and every presumption must be indulged to sustain the Act.

Constitutional Law > ... > Fundamental Freedoms > Judicial & Legislative Restraints > Overbreadth & Vagueness of Legislation

Governments > Legislation > Vagueness

HN31[] **Judicial & Legislative Restraints, Overbreadth & Vagueness of Legislation**

The degree of vagueness that the U.S. Constitution tolerates--as well as the relative enforcement of fair notice and enforcement--depends in part on the nature of the enactment and also depends on whether there are civil or criminal penalties.

Constitutional Law > ... > Fundamental Freedoms > Judicial & Legislative Restraints > Overbreadth & Vagueness of Legislation

Governments > Legislation > Interpretation

Governments > Legislation > Vagueness

HN32[] **Judicial & Legislative Restraints, Overbreadth & Vagueness of Legislation**

The standard for a civil statute is whether it is so vague and uncertain that it is impossible to execute it or to ascertain the legislative intent with reasonable certainty.

Constitutional Law > ... > Fundamental Freedoms > Judicial & Legislative Restraints > Overbreadth & Vagueness of Legislation

Governments > Legislation > Vagueness

HN33[] **Judicial & Legislative Restraints, Overbreadth & Vagueness of Legislation**

A criminal statute is unconstitutionally vague if it either fails to afford proper notice of the conduct it seeks to proscribe or fails to provide an objective standard for enforcement. To give proper notice, a criminal statute must warn people who wish to obey the law that their conduct comes near the proscribed area.

Constitutional Law > ... > Fundamental Freedoms > Judicial & Legislative Restraints > Overbreadth & Vagueness of Legislation

Governments > Legislation > Interpretation

Constitutional Law > ... > Fundamental Freedoms > Judicial & Legislative Restraints > General Overview

Governments > Legislation > General Overview

Governments > Legislation > Vagueness

HN34[] **Judicial & Legislative Restraints, Overbreadth & Vagueness of Legislation**

Even where criminal statutes are concerned, a statute is not void for vagueness if, by the ordinary process of statutory construction, a reviewing court can give a practical or sensible meaning to the statute, and this rule applies even if a statute is ambiguous. In addition, where the First Amendment is not implicated, a vagueness challenge must be examined in the context of the facts in the particular case.

Constitutional Law > Substantive Due Process > Scope

Governments > Legislation > Interpretation

Governments > Police Powers

HN35[] **Constitutional Law, Substantive Due Process**

Imposition of liability without fault-even when the statute imposes punitive sanctions-does not in itself violate due process. Statutes that are within the police power of the state may impose even criminal liability on a person whose acts violate the statute, even if the person did not intend to do so.

Constitutional Law > Substantive Due Process > Scope

Governments > Police Powers

HN36[] **Constitutional Law, Substantive Due Process**

The police power of the state includes not only regulations or statutes designed to promote public health and safety but also those designed to promote economic prosperity. Such regulations and statutes do not offend substantive due process if they are not unreasonable, arbitrary or capricious, and the means selected have a real and substantial relation to the object sought to be attained.

Constitutional Law > Substantive Due Process > Scope

Criminal Law & Procedure > ... > Defendant's Rights > Right to Jury Trial > General Overview

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

Evidence > Inferences & Presumptions > Presumptions

HN37[] **Constitutional Law, Substantive Due Process**

A rebuttable presumption that does not prevent a criminal defendant from presenting a defense or take any question of fact from a jury does not abridge the right to a jury trial or deny due process of law.

Opinion by: VERGERONT

Opinion

[*P1] [*723] [**193]** VERGERONT, P.J. Woodman's Food Market, Inc. appeals the circuit court's summary judgment concluding that it violated the Wisconsin Unfair Sales Act, *Wis. Stat. § 100.30* (1999-2000), [1] by selling motor vehicle fuel below cost as defined in the statute on 295 days, and ordering **[****2]** Woodman's to pay $ 590,000 to James Gross and Mall Mart, Inc. Woodman's operates a grocery store and adjacent gas station in Onalaska, Wisconsin, and Gross operates Citgo Quick Mart, a convenience store owned by Mall Mart, Inc. that sells motor vehicle fuel in Holmen, Wisconsin.

[*P2] We conclude that, with respect to 293 days, there are no genuine issues of material fact, and Gross and Mall Mart, Inc. are entitled to judgment as a matter of law that on those dates Woodman's violated the Act by selling motor vehicle fuel below cost as defined in the statute (statutory cost) with the effect of injuring a competitor. In reaching this conclusion, we decide that the circuit court properly exercised its discretion in allowing relation back of the second amended complaint, and we make the following rulings regarding the Act: (1) whether Woodman's is a wholesaler or retailer under the Act is irrelevant in this case **[****3]** because either way **[***724]** the proper terminal for computing the "average posted terminal price" is the terminal closest to Woodman's gas station in Onalaska; (2) Woodman's is a competitor of Gross and Mall Mart, Inc. with respect to diesel fuel because both Woodman's and Citgo Quick Mart offer that fuel for sale to non-Woodman vehicles in **[**194]** the same geographic area; (3) *Wis. Stat. § 100.30(3)* prohibits sales below statutory cost with either the proscribed intent or the proscribed effect; (4) it is undisputed that Woodman's did not come within the exception of *§ 100.30(6)(a)*7 for meeting a competitor's price; (5) the Act is not unconstitutionally vague as applied to Woodman's; and (6) the Act does not offend due process by prohibiting certain conduct and its effect regardless of the seller's intent.

[*P3] Woodman's also appealed the circuit court's ruling allowing Gross and Mall Mart, Inc. to withdraw their demand for a jury trial, which Woodman's had also demanded, and ordering that trial would be to the court. However, Gross and Mall Mart, Inc. have conceded that under ***Village Food & Liquor Mart v. H&S Petroleum, Inc.**, 2002 WI 92, 254 Wis.2d 478, 647 N.W.2d 177*, **[****4]** Woodman's has a constitutional right to a jury trial on any factual issues.

[*P4] Accordingly, we affirm the summary judgment for 293 days of violations, reverse it as to two days, and remand to the circuit court with instructions to reduce the monetary award on summary judgment to $ 586,000. We also reverse the court's order that trial will be to the court and remand for a jury trial on all remaining factual issues.

STATUTORY BACKGROUND

[*P5] ***HN1***[] Wisconsin's Unfair Sales Act prohibits "any sale of any item of merchandise either by a retailer, wholesaler, wholesaler of motor vehicle fuel or refiner, at less than cost as defined in this section with the intent or effect of inducing the purchase of other merchandise or of unfairly diverting trade from a competitor…." *Wis. Stat. § 100.30(3)*. In proving a **[**195]** violation, "evidence of any sale of any item of merchandise … at less than cost as

[1] All references to the Wisconsin Statutes are to the 1999-2000 version unless otherwise noted.

defined in this section shall be prima facie evidence of intent or effect to induce the purchase of other merchandise, or to unfairly divert trade from a competitor, or to otherwise injure a competitor." ***Id.*** [2]

[*P6] [**5] [***725]** "***HN4***[] Cost" for retail sales of motor vehicle fuel, as relevant to this case, is defined as the *higher* of two computations, one using the seller's invoice or replacement cost as a base (invoice/replacement formula) and the other using the average posted terminal (APT) price **[**196]** as a base (APT formula). *Wis. Stat. § 100.30(2)(am)1*m.b and c. [3] **[****6]** Motor vehicle fuel is purchased **[**197]** at terminals. [4] The APT price is defined by statute and, in general terms, is the terminal price as published by a petroleum reporting service, plus

---

[2] ***HN2***[] *Wisconsin Stat. § 100.30(3)* provides in full:

(3) Illegality of loss leaders. Any sale of any item of merchandise either by a retailer, wholesaler, wholesaler of motor vehicle fuel or refiner, at less than cost as defined in this section with the intent or effect of inducing the purchase of other merchandise or of unfairly diverting trade from a competitor, impairs and prevents fair competition, injures public welfare and is unfair competition and contrary to public policy and the policy of this section. Such sales are prohibited. Evidence of any sale of any item of merchandise by any retailer, wholesaler, wholesaler of motor vehicle fuel or refiner at less than cost as defined in this section shall be prima facie evidence of intent or effect to induce the purchase of other merchandise, or to unfairly divert trade from a competitor, or to otherwise injure a competitor.

The policy underlying the Act is expressly stated in ***HN3***[] *Wis. Stat. § 100.30(1)*:

Unfair sales act. (1) Policy. The practice of selling certain items of merchandise below cost in order to attract patronage is generally a form of deceptive advertising and an unfair method of competition in commerce. Such practice causes commercial dislocations, misleads the consumer, works back against the farmer, directly burdens and obstructs commerce, and diverts business from dealers who maintain a fair price policy. Bankruptcies among merchants who fail because of the competition of those who use such methods result in unemployment, disruption of leases, and nonpayment of taxes and loans, and contribute to an inevitable train of undesirable consequences, including economic depression.

[3] ***HN5***[] *Wisconsin Stat. § 100.30(2)(am)l*m.b and c provide:

1m. With respect to the sale of motor vehicle fuel, "cost to retailer" means the following:

….

b. In the case of the retail sale of motor vehicle fuel by a wholesaler of motor vehicle fuel, who is not a refiner, at a retail station owned or operated either directly or indirectly by the wholesaler of motor vehicle fuel, the invoice cost of the motor vehicle fuel to the wholesaler of motor vehicle fuel within 10 days prior to the date of sale, or the replacement cost of the motor vehicle fuel, whichever is lower, less all trade discounts except customary discounts for cash, plus any excise, sales or use taxes imposed on the motor vehicle fuel or on its sale, and any cost incurred for transportation and any other charges not otherwise included in the invoice cost or replacement cost of the motor vehicle fuel, plus a markup of 9.18 of that amount to cover a proportionate part of the cost of doing business; or the average posted terminal price at the terminal located closest to the retail station plus a markup of 9.18 of the average posted terminal price to cover a proportionate part of the cost of doing business; whichever is greater.

c. In the case of the retail sale of motor vehicle fuel by a person other than a refiner or a wholesaler of motor vehicle fuel at a retail station, the invoice cost of the motor vehicle fuel to the retailer within 10 days prior to the date of sale, or the replacement cost of the motor vehicle fuel, whichever is lower, less all trade discounts except customary discounts for cash, plus any excise, sales or use taxes imposed on the motor vehicle fuel or on its sale and any cost incurred for transportation and any other charges not otherwise included in the invoice cost or the replacement cost of the motor vehicle fuel, plus a markup of 6 of that amount to cover a proportionate part of the cost of doing business; or the average posted terminal price at the terminal located closest to the retailer plus a markup of 9.18 of the average posted terminal price to cover a proportionate part of the cost of doing business; whichever is greater.

[4] "Terminal" is defined as the "storage and distribution facility that is supplied by a pipeline or marine vessels, from which facility motor vehicle fuel may be removed at a rack and from which facility at least 3 refiners or wholesalers of motor vehicle fuel sell motor vehicle fuel." *Wis. Stat. § 100.30(2)(j)*.

taxes, transportation, and other charges not already included. [5] **[****7]** The APT formula then adds a markup of 9.18% to cover the cost of doing business. *Section 100.30(2)(am)*1m.b and c. [6]

[*P7] [198] [***726]** The requirements of the Act do not apply to sales in certain specified situations, and the exception relevant in this case is for meeting a competitor's price. ***HN8***[] *Wisconsin Stat. § 100.30(6)(a)7* provides that the provisions of the Act do not apply when:

7. The price of merchandise is made in good faith to meet an existing price of a competitor and is based on evidence in the possession of the retailer, wholesaler, wholesaler of motor vehicle fuel or refiner in the form of an advertisement, proof of sale or receipted purchase, price survey or other business record maintained by the retailer, wholesaler, wholesaler of motor vehicle fuel or refiner in the ordinary **[****8]** course of trade or the usual conduct of business.

HN9[] Those invoking this exception are required to notify the Department of Agriculture, Trade and Consumer Protection (DATCP) "of the lower price before the close of business on the day on which the price was lowered in the form and manner required by the department." *Section 100.30(7)(a)*. If that is done, the DATCP may not proceed against that person or entity, and there is immunity from liability for a private cause of action. *Section 100.30(7)(c)*. Failure to comply with the notification requirement creates a rebuttable presumption that the price was not lowered to meet a competitor's price. *Section 100.30(7)(b)*.

RELATION BACK OF AMENDED COMPLAINT

[*P8] Gross filed this action on November 16, 1998, as the individual owner of Citgo Quick Mart. The complaint alleged that Woodman's had sold gasoline and diesel fuel at a price below statutory cost and had **[**199]** injured him as a result. [7] However, although Gross had initially owned the Citgo Quick Mart as a sole proprietor, he created Mall Mart, Inc. in August of 1998 and transferred the ownership of the store to the corporation on October 1, 1998. Gross filed a motion for leave to amend **[****9]** on December 14, 1999, seeking to add Mall Mart, Inc. as the real party in interest for all violations of the Act occurring after October 1, 1998, and to have the amendment relate back to the date on which the original complaint was filed. The affidavit of Gross's counsel averred that he first learned of the incorporation of Mall Mart, Inc. at Gross's deposition on October 20, 1999; that Gross advised him that he (Gross) had told a former associate of counsel's firm about the corporation, but neither had brought it to counsel's attention, apparently believing it was not relevant to the case. Woodman's consented to the amendment, but objected to its relation back.

[*P9] The circuit court granted the motion of Gross and Mall Mart, Inc. to allow the amendment to relate back to the filing of the original complaint. The court concluded that the amendment related to the same transactions and

---

[5] ***HN6***[] *Wisconsin Stat. § 100.30(2)(a)* provides:

(2)(a) "Average posted terminal price" means the average posted rack price, as published by a petroleum price reporting service, at which motor vehicle fuel is offered for sale at the close of business on the determination date by all refiners and wholesalers of motor vehicle fuel at a terminal plus any excise, sales or use taxes imposed on the motor vehicle fuel or on its sale, any cost incurred for transportation and any other charges that are not otherwise included in the average posted rack price. In this paragraph, "average" means the arithmetic mean.

HN7[] *Wisconsin Stat. § 100.30(2)(cg)* defines "determination date" as:

(cg) 1. Except as provided in subd. 2., "determination date" is the day preceding the day of the sale at retail of motor vehicle fuel.

[6] Under the invoice/replacement formula, one starts with the invoice cost within ten days of the sale or replacement cost, whichever is lower, deducts specified discounts, and adds taxes, transportation, other charges not already included, and a markup to cover the cost of doing business-6 for a retailer and 9.18 for a wholesaler. *Wis. Stat. § 100.30(2)(am)1*m.b and c.

[7] The complaint alleged other claims that Gross is not pursuing.

operative facts as those in the original complaint, and **[****10]** the failure to name Mall Mart, Inc. in that complaint had not prejudiced Woodman's ability to defend against the claims.

[*P10] The applicable statute, ***HN10***[] *Wis. Stat. § 802.09(3)*, provides:

(3) Relation back of amendments. If the claim asserted in the amended pleading arose out of the transaction, occurrence, or event set forth or attempted to be set forth in the original pleading, the amendment **[**200]** relates back to the date of the filing of the original pleading. An amendment changing the party against whom a claim is asserted **[***727]** relates back if the foregoing provision is satisfied and, within the period provided by law for commencing the action against such party, the party to be brought in by amendment has received such notice of the institution of the action that he or she will not be prejudiced in maintaining a defense on the merits, and knew or should have known that, but for a mistake concerning the identity of the proper party, the action would have been brought against such party.

[*P11] ***HN11***[] This statute applies to an amendment to add a plaintiff. ***Korkow v. Gen. Cas. Co. of Wisconsin**, 117 Wis. 2d 187, 196, 344 N.W.2d 108 (1984)*; **[****11]** ***Estate of Kitzman v. Kitzman**, 163 Wis. 2d 399, 402, 471 N.W.2d 293 (Ct. App. 1991)*. If the claim asserted in the amendment arises out of the same transaction, occurrence, or event set forth in the original pleading, relation back is presumptively appropriate; however, the circuit court has the discretion to deny leave to amend when it would result in prejudice to the other party. ***Korkow**, 117 Wis 2d at 196-97*. ***HN12***[] We affirm discretionary decisions if the circuit court applied the correct law to the relevant facts of record in a reasoned manner. ***Grothe v. Valley Coatings, Inc.**, 2000 WI App 240, P12, 239 Wis. 2d 406, 620 N.W.2d 463*.

[*P12] Woodman's contends the circuit court erroneously exercised its discretion in allowing relation back because Gross knew that Mall Mart, Inc. was the owner of the store, as did an associate of the law firm, and thus there was no mistake about the identity of the proper party. According to Woodman's, the second sentence of *Wis. Stat. § 802.09(3)* does not permit an amendment adding a plaintiff to relate back unless there was a mistake concerning the proper party.

[*P13] [**12] [**201]** We do not agree with Woodman's reading of the statute. The plain language of the second sentence refers only to a party against whom a claim is asserted. The cases applying this sentence are therefore not applicable in deciding under what circumstances a court may properly allow an amendment adding a plaintiff to relate back. *See, e.g.,* ***Groom v. Professionals Ins. Co.**, 179 Wis. 2d 241, 251-52, 507 N.W.2d 121 (Ct. App. 1993)*.

[*P14] Woodman's counsel argued at oral argument that Woodman's was prejudiced because if the motion did not relate back, Woodman's would not be liable for violations occurring after October 1, 1998. [8] However, the proper prejudice inquiry, as the circuit court recognized, is: was Woodman's prejudiced by not knowing from November 16, 1998 to December 14, 1999, that Mall Mart, Inc., rather than Gross, was the owner of Citgo Quick Mart? Woodman's does not explain how this caused it prejudice.

[*P15] [**13]** There is no question that the claims that Mall Mart, Inc. is asserting against Woodman's are factually and legally the same claims that Gross asserted against Woodman's in the initial complaint. We conclude the circuit court applied the correct law to the relevant facts and properly exercised its discretion in allowing the amendment adding Mall Mart, Inc. to relate back to the filing of the original complaint. [9]

[202]** SUMMARY JUDGMENT

---

[8] Private causes of action must be brought within 180 days of the violation. *Wis. Stat. § 100.30(5m)*.

[9] From here on, we use "Gross" to refer to both plaintiffs unless the context indicates otherwise.

Background

[*P16] Gross moved for summary judgment, initially claiming that there were 738 **[***728]** occasions on which Woodman's sold motor vehicle fuel below statutory cost without filing a notice with DATCP, and there was no evidence to overcome the presumption of a violation on any of those occasions.

[*P17] In Gross's first affidavit, he averred the following. Citgo Quick Mart and Woodman's sell the same grades of motor fuel, including diesel, although in October **[****14]** 1999, Woodman's began selling an ethanol blend of unleaded fuel, which he does not sell. Generally speaking, Gross uses the APT formula as the statutory cost because that results in a higher price than the invoice/replacement formula. The terminal nearest to his station and Woodman's Onalaska store is at Eyota, Minnesota (outside Rochester). Gross subscribes to a "OPIS Reporting Service" that sends him the APT price at that terminal for each grade of motor vehicle fuel on each weekday. With his affidavit, Gross submitted a chart which, he averred, showed for each violation occurring between September 13, 1998 and June 3, 2000: (1) the APT price for the motor vehicle fuel at the Eyota terminal based on the OPIS reports he received; (2) the price based on the APT formula for a retailer; (3) the highest price using that formula for the preceding ten days; [10] and (4) Woodman's price based on documentation received in discovery. Gross stated that his transportation costs were between 2 to 2.3 cents per gallon for the time period involved, and Woodman's in **[**203]** discovery had stated its transportation costs were between 2.5 and 3 cents per gallon. Gross specified the combined tax and transportation **[****15]** cost he used in applying the APT formula for both gasoline and diesel fuel. [11] Gross explained he was not submitting the OPIS reports and other supporting documentation for the chart because it was so voluminous, but he would provide them to the court or opposing counsel upon request.

[*P18] Gross averred that it is his business practice to do a survey to obtain prices of his competitors to see what the market price is for various grades of motor vehicle fuel. In conducting those surveys, he has observed that Woodman's prices for various grades of motor fuels have at times been below the statutory minimum price, and, "in order to compete with the **[****16]** market that is skewed based on Woodman's reduced price, [he has] been forced to lower [his] price to meet or approach the market rate, thus reducing [his] profit margin."

[*P19] Gross also submitted depositions that showed that Tom Wysocki manages Woodman's grocery store and gas station in Onalaska and is responsible for the daily setting of motor vehicle fuel prices at that gas station. Wysocki stated that he computes the prices on a daily basis, using the cost for the day faxed to him by Woodman's supplier as a "general guideline," plus taxes and transportation plus 9.18% of that sum. He does not receive information on motor vehicle fuel prices from a price reporting service. He regularly drives around the area to check on the prices at other gas stations, and **[**204]** that includes Gross's station, and he may adjust the price based on his competitors' prices. Woodman's sets the same price for diesel fuel as for unleaded gasoline; it does not calculate a separate price. Wysocki, prior to December 1, 1999, did not record or retain price survey information in the regular course of Woodman's business. **[***729]** Woodman's has not filed any "meet competition" notice with DATCP.

[*P20] **[****17]** Woodman's responded to Gross's motion for summary judgment by arguing that Gross's affidavit was deficient because it did not provide the data and calculations to support his assertions on Woodman's price violations, and Gross was not an expert on setting prices under the statute. Woodman's also objected to two attachments to Gross's affidavit-a memorandum to gas station owners from DATCP on the Act which, Gross averred, he received from DATCP, and seminar materials on the Act which, Gross averred, he received from a

[10] The ten-day window relates to the "determination date," which affects the ATP price. *See* Wis. Stat. § 100.30(2)(c)2(cg).

[11] The figures he used changed during three time periods, which he identified, and were: for gasoline, 48.8 cents, 49.2 cents, and 49.8 cents, and for diesel fuel, 55.1 cents, 55.5 cents, and 56.1 cents.

seminar he attended. Woodman's contended that neither was legally binding and the former was not authenticated and was inadmissible hearsay. [12]

[*P21] [205] [****18]** In addition, Woodman's contended it was entitled to summary judgment because the undisputed facts showed: Gross had used the wrong formula in that Woodman's was a wholesaler, not a retailer; Woodman's had used the correct statutory cost except as necessary to meet a competitor's price; Gross was not Woodman's competitor with respect to diesel fuel; Woodman's did not intend to divert trade from or injure its competitors, and its pricing did not have an effect on competition; and the Act was unconstitutional. Alternatively, Woodman's argued that since intent was an issue, summary judgment was improper.

[*P22] Wysocki's affidavit in support of Woodman's motion for summary judgment averred as follows with respect to diesel fuel. Diesel fuel is available at one pump for the purpose of supplying diesel fuel for Woodman's own semi-trucks that haul products to and from Woodman's various grocery stores. Because of the location of this pump, in order for a semi-truck to use it, the semi-truck must drop its trailer at another location. Since this pump is not readily accessible to non-Woodman's semi-trucks, the sales of diesel fuel made to non-Woodman's vehicles are not made **[****19]** to semi-truck drivers, but to drivers of older cars that still use diesel fuel. Woodman's does not have a marketing strategy to attract either non-Woodman's semi-trucks or diesel cars. Woodman's does not advertise its diesel prices through posted signs or in any other way, and to determine the price, a person has to look at the pump. The sales of diesel fuel to the public at this gas station are insignificant compared to the sales of regular, mid-grade, and premium unleaded fuel. Woodman's **[**206]** does not have a policy of setting diesel prices below cost or for the purpose of diverting trade from competing gas stations, and Wysocki has never done so. Attached to Wysocki's affidavit were records of the amount of diesel fuel Woodman's sold to non-Woodman's vehicles on the days Gross asserted there were violations.

[*P23] Wysocki also averred that when he lowered Woodman's prices to match a competitor's price, he made a notation of **[***730]** the competitor's prices on documents entitled "Sparta Co-op Services" (Sparta documents), [13] copies of which were attached to his affidavit. There were also handwritten price calculations on the Sparta documents, which, Wysocki averred, he had made for each **[****20]** day that Gross alleged there was a violation.

[*P24] In response to Woodman's objections, Gross submitted a supplemental affidavit, along with the OPIS reports and Woodman's discovery responses on which he had relied in preparing the chart. The discovery responses included Woodman's fuel prices and Woodman's transportation costs-2-1/2 to 3 cents a gallon.

[*P25] Gross averred in his supplemental affidavit that:

In my experience, when a gas station or stations lower their prices, others follow suit in order to compete.... On many occasions, including but not limited to the dates listed on the charts that were previously submitted to the Court as I have lowered the price at the Citgo [Quick] Mart after finding that Woodman's was selling **[**207]** motor vehicle fuel, including diesel, at a price below the statutory minimum. On those dates, I lost **[****21]** revenue.

[*P26] Woodman's objected to Gross's supplemental affidavit as untimely. The court decided that it had the authority to consider the affidavit and attachments, that it was in the interests of judicial economy to do so, and that

---

[12] Woodman's also objected to certain of Gross's statements as legal conclusions, and the circuit court agreed with Woodman's and did not consider them. For reasons that are not clear to us, Woodman's renews these objections on appeal. We do not discuss them further because the circuit court correctly did not consider Gross's legal conclusions in deciding whether Gross's submissions established a prima facie factual case, and we do not either. ***Hooper v. City of Madison**, 79 Wis. 2d 120, 130, 256 N.W.2d 139 (1977)* (***HN13***[] court is to disregard conclusions of law contained in affidavits on motion for summary judgment). Woodman's challenged other submissions of Gross in the circuit court, which it renews on appeal: the affidavits of Kevin LeRoy, Joseph Veenstra, Paul Dingee, and Michael Stoker (paragraph 17 of his January 2001 affidavit). We do not discuss these objections because these submissions are not necessary to our analysis.

[13] Sparta Co-op Services is Woodman's fuel supplier and is not relevant to this appeal; we identify the documents in this way for ease of reference.

it was fair to both parties. With respect to Woodman's other objections to Gross's affidavits, the court decided that the memorandum Gross attached from DATCP was neither legally binding nor hearsay, and was admissible for the purpose of establishing that Gross, as the operator of a gas station, had received it, and, by inference, Woodman's would have received it, too. [14] **[****22]** The court apparently did not separately address Woodman's objection to the seminar materials. The court decided that the charts appended to Gross's first affidavit were admissible even without the underlying documentation under *Wis. Stat. § 910.06*, [15] and that Gross had in any event provided that documentation. Finally, the court decided that Gross had the requisite knowledge and experience regarding pricing of motor vehicle fuels under the Act to testify concerning the calculation of the price mandated by the Act.

[*P27] **[**208]** In response to Woodman's submissions, Gross modified his request for summary judgment to 323 violations. Gross explained that he deducted alleged violations for: (1) diesel fuel on days for which Woodman's records showed it made no sale of diesel fuel, (2) sales other than diesel fuel that occurred after September 1999 when Woodman's asserted it began selling ethanol-based gasoline, and (3) those for which Woodman's service records had notations that might arguably be considered an informal price survey.

[*P28] **[***731]** The court first decided that Gross's submissions established a prima facie case for a violation of the statute. It **[****23]** next decided that Woodman's submissions (1) did not show that there was an inaccuracy in Gross's calculations except for March 8 through March 14, 2000, which the court excluded; (2) did not show Woodman's had ever filed a notice with DATCP; and (3) except for a few dates which the court eliminated, did not show that Woodman's had documentation even arguably meeting the requirement of *Wis. Stat. § 100.30(6)(a)7* for the "meet competition" exception. [16]

[*P29] **[****24]** The court rejected Woodman's argument that summary judgment was inappropriate because intent was an issue. It concluded *Wis. Stat. § 100.30(3)* prohibited selling at less than statutory cost with the **[**209]** proscribed intent or with the proscribed effect, and a sale at less than statutory cost was prima facie evidence of that intent or effect. *Section 100.30(3)*. The court decided that, since Woodman's had not presented any evidence that rebutted the statutory presumption arising from sales below statutory cost, Gross was entitled to summary judgment that Woodman's violated the Act on 295 days. The court identified these dates in an addendum to its decision. [17] **[****25]** The court rejected Woodman's arguments that it was a retailer, that it was not a competitor of Gross with respect to diesel fuel, and that the Act was unconstitutional. The court awarded $ 2,000 for

---

[14] The court added that the later affidavit of Joseph Veenstra contained the certification necessary to authenticate the DATCP documents. However, that certification was of other DATCP records, which are not relevant to our analysis. *See* footnote 12.

[15] ***HN14***[] *Wisconsin Stat. § 910.06* provides:

Summaries. The contents of voluminous writings, recordings or photographs which cannot conveniently be examined in court may be presented in the form of a chart, summary or calculation. The originals, or duplicates, shall be made available for examination or copying, or both, by other parties at a reasonable time and place. The judge may order that they be produced in court.

[16] At the hearing before the circuit court, counsel for Woodman's explained that the calculations on the copies of Sparta documents that Wysocki submitted with his affidavit were added in response to the litigation to explain what Wysocki had done when he set the prices. The court stated that, in deciding whether any of Woodman's business records arguably met the "meets competition exception," it would not consider that set of copies, but only the set of copies Woodman's produced in discovery, which Gross had submitted with his supplemental affidavit.

[17] The court arrived at these dates by eliminating from the chart Gross filed: (1) days on which Woodman's did not sell diesel fuel; (2) days on which Woodman's sold only ethanol-blend fuel; (3) days on which any of Woodman's service records had a notation of another competitor's fuel price; (4) days when there was incomplete data on Gross's chart; (5) March 8 through March 14 where a factual dispute exists over Woodman's motor vehicle fuel price; and (6) Christmas Day, when Woodman's was not open for business.

each day of violation pursuant to *§ 100.30(5m)*. [18] We granted Woodman's petition for **[**210]** leave to appeal the trial court's order granting summary judgment. [19]

[**26]**

[*732]** *Standard of Review*

[*P30] ***HN17***[] Summary judgment is proper where there are no genuine issues of material fact and the moving party is entitled to judgment as a matter of law. ***Green Spring Farms v. Kersten****, 136 Wis. 2d 304, 315, 401 N.W.2d 816, 820 (1987)*. We employ the same methodology as the circuit court, and our review is de novo. ***Id.*** Where, as here, the complaint states a claim for relief and the answer joins issue, we examine the moving party's affidavits to determine whether that party has made a prima facie case for summary judgment. ***Brownelli v. McCaughtry****, 182 Wis. 2d 367, 372, 514 N.W.2d 48, 49 (Ct. App. 1994)*. If it has, we then look to the opposing party's affidavits to determine whether **[**211]** there are any material facts in dispute which entitle the opposing party to a trial. ***Id.*** *at 372-73, 514 N.W.2d at 49-50*.

[*P31] ***HN18***[] Affidavits in support of or opposition to summary judgment "shall be made on personal knowledge and shall set forth such evidentiary facts as would be admissible in evidence." *Wis. Stat. § 802.08(3)*. On summary judgment, the party relying on evidence **[****27]** need not submit sufficient evidence to conclusively demonstrate the admissibility of the evidence it relied upon in its affidavits. ***Dean Medical Center v. Frye****, 149 Wis. 2d 727, 734-35, 439 N.W.2d 633, 636 (Ct. App. 1989)*. The party producing the evidence need only make a prima facie showing that the evidence would be admissible. ***Id.*** The burden then shifts to the opposing party to show that the evidence is inadmissible or to show facts which put the evidence at issue. ***Id.*** *at 735, 439 N.W.2d at 636*. If the admissibility of the evidence is challenged, the court must then determine whether the evidence would be admissible.

[*P32] ***HN19***[] Although we employ the summary judgment methodology de novo, we review the circuit court's decision allowing supplemental affidavits under the deferential standard for discretionary decisions, since that decision is committed to the circuit court's discretion. ***HN20***[] *Wisconsin Stat. § 802.08(3)* provides that the "court may permit affidavits to be supplemented or opposed by depositions, answers to interrogatories, or further affidavits." Similarly, the decision whether a submission **[****28]** meets the requirements of *§ 802.08(3)* that "affidavits shall be made on personal knowledge and shall set forth such evidentiary facts as would be **[**212]**

---

[18] ***HN15***[] *Wisconsin Stat. § 100.30(5m)* provides:

(5m) Private cause of action. Any person who is injured or threatened with injury as a result of a sale or purchase of motor vehicle fuel in violation of sub. (3) may bring an action against the person who violated sub. (3) for temporary or permanent injunctive relief or an action against the person for 3 times the amount of any monetary loss sustained or an amount equal to $ 2,000, whichever is greater, multiplied by each day of continued violation, together with costs, including accounting fees and reasonable attorney fees, notwithstanding s. 814.04 (1). An action under this subsection may not be brought after 180 days after the date of a violation of sub. (3).

[19] ***HN16***[] *Wisconsin Stat. § 808.03(2)* provides:

(2) Appeals by permission. A judgment or order not appealable as a matter of right under sub. (1) may be appealed to the court of appeals in advance of a final judgment or order upon leave granted by the court if it determines that an appeal will:

(a) Materially advance the termination of the litigation or clarify further proceedings in the litigation;

(b) Protect the petitioner from substantial or irreparable injury; or

(c) Clarify an issue of general importance in the administration of justice.

The trial court's order granting summary judgment was a nonfinal order because the alleged violations eliminated by Gross and the court for summary judgment remained for trial.

admissible in evidence," may involve evidentiary rulings that are committed to the circuit court's discretion. For example, the question whether a witness qualifies as an expert is generally left to the circuit court's discretion. ***State v. Robinson**, 146 Wis. 2d 315, 332, 431 N.W.2d 165 (1988)*.

Admissibility and Sufficiency of Gross's Submissions

[*P33] Woodman's contends many of Gross's submissions should not have been considered by the court. We examine each objection and conclude that Gross's relevant submissions were admissible under *Wis. Stat. § 802.08(3)*, and further that they establish a prima facie case of entitlement to summary judgment.

[*P34] We address first Woodman's contention that the circuit court erroneously exercised its discretion in accepting Gross's supplemental affidavit because he was required to submit all the evidence he relied on with his motion and should not have been allowed to "rectify evidentiary flaws" with a supplemental affidavit. As we have **[****29]** already stated, the statute specifically authorizes the court to allow supplemental affidavits. *Wis. Stat. § 802.08(3)*. We are satisfied the court properly exercised its discretion in doing so here. The court observed that the case had been **[***733]** continued several times, both parties had been given the opportunity to fully present their case, and Woodman's had been "at least as active as Gross in requesting or stipulating to continuances." The court also reasoned that considering all the parties' filings would more likely result in a fair resolution and avoid an unnecessary trial. These are proper factors to consider and the court's result is reasonable. Woodman's has pointed to no unfair prejudice **[**213]** resulting from the court's consideration of Gross's supplemental affidavit, nor does Woodman's assert that it did not have an opportunity to respond if it chose.

[*P35] We next address Woodman's objections to the admissibility of the memorandum from DATCP and the seminar materials attached to Gross's first affidavit. We conclude the court properly exercised its discretion in considering these for the purpose of showing that Gross received them. Gross was competent **[****30]** to testify to what he received and to his attendance at a seminar. The court understood that the contents were not legally binding, and it did not consider them for the truth of the matters they asserted; therefore they were not inadmissible hearsay under *Wis. Stat. § 908.01(3)*, nor did they need to be authenticated.

[*P36] Woodman's also argues that the court erroneously exercised its discretion in concluding that Gross had the knowledge and experience to testify regarding the correct statutory minimum price. [20] Our analysis differs somewhat from the circuit court's because we conclude there are aspects of that testimony that do not require expertise. However, we conclude that, for those aspects that do require expertise, the circuit court reasonably decided that Gross's submission established an adequate foundation and were properly admissible under *Wis. Stat. § 802.08(3)*.

[*P37] **[****31]** **[**214]** With respect to the factors involved in the APT formula, [21] we conclude that expert testimony is needed to establish the following: (1) the correct tax, (2) that the Eyota terminal is the closest terminal to Citgo Quick Mart and Woodman's in Onalaska that meets the statutory definition, and (3) that the OPIS reporting

---

[20] ***HN21***[] *Wisconsin Stat. § 907.02* provides:

Testimony by experts. If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education, may testify thereto in the form of an opinion or otherwise.

[21] The question whether the invoice/replacement formula or the ATP formula is the correct one depends on which results in a higher cost. *Wis. Stat. § 100.30(2)(am)1*m.b and c. Since Gross's submissions showed that Woodman's prices were below cost based on the ATP formula, it was unnecessary for him to establish, as part of a prima facie case, what the results of application of the invoice formula would be. If the invoice/replacement formula results in a lower cost than the ATP formula, the ATP formula is the statutory minimum; if the invoice/replacement formula results in a higher cost than the ATP formula, that would not reduce the number of sales below the statutory minimum.

service supplies the APT price, as defined in the statute, for the Eyota terminal. We conclude that the foundation supplied by Gross's affidavits-that he had been setting motor fuel prices since 1995, had reviewed the statute and regulations, had attended some seminars and trade shows regarding gas pricing, and had received and read communications from DATCP-provides a reasonable basis for concluding that he had the experience and knowledge to testify on these matters. Gross does not need to be an expert to testify to his own transportation costs, because he has personal knowledge of those, *Wis. Stat. § 906.02*; [22] **[****33]** **[***734]** and **[**215]** Woodman's transportation costs were supplied by Woodman's discovery responses. Finally, the calculations required by the APT formula, once the necessary facts are established, are not a matter requiring expert testimony, **[****32]** but are simply a matter of adding and multiplying as directed by the statute. [23]

[*P38] We also conclude the court properly exercised its discretion in deciding that the chart appended to Gross's first affidavit was admissible. Gross explained in his affidavit the formula and the data he used in arriving at the statutory minimum price and the source of the data he used for Woodman's prices, and he provided the terminal price documentation and the documentation for Woodman's prices with his supplemental affidavit. There was therefore an adequate foundation **[****34]** for the chart. Gross did not need to supply his calculations; those are simply a matter of adding and multiplying, which Woodman's can do if it wishes to verify the accuracy of Gross's arithmetic.

[*P39] **[**216]** Finally, we reject Woodman's contention that Gross's averments regarding the injury to his business are inadmissible because they are too conclusory. Gross's testimony in his supplemental affidavit that he lowered his price "on many occasions, including but not limited to the dates listed on the charts that were previously submitted to the Court ... after finding that Woodman's was selling motor vehicle fuel, including diesel, at a price below the statutory minimum" and that "on those dates, [he] lost revenue" is admissible because it contains evidentiary facts of which Gross has personal knowledge. True, they are general statements of fact, but nothing in *Wis. Stat. § 802.08(3)* requires more specificity. Woodman's had the opportunity to require Gross through discovery to produce more specific evidence of lost profits and to use that to controvert Gross's averments if warranted.

[*P40] We conclude that Gross's submissions establish a prima facie **[****35]** case for summary judgment. They show that Woodman's sold motor vehicle fuel at below the statutory minimum price on 295 days without filing a notice under *Wis. Stat. § 100.30(7)(a)*. This constitutes prima facie evidence of a violation of the statute under *§ 100.30(3)* and creates a rebuttable presumption under para. (7)(b) that Woodman's did not lower prices to meet the competition.

Retailer vs. Wholesaler

[*P41] Woodman's contends that it is entitled to summary judgment because the Madison terminal is the correct one to use for the APT price, not Eyota, and if Madison is used, Woodman's submissions show that **[**217]** its prices were always below statutory cost. Madison is the correct terminal, **[***735]** Woodman's argues, because Woodman's is a retailer under the statute and therefore must use the terminal that is "closest to the retailer," *Wis. Stat. § 100.30(2)(am)1*m.c, not that "closest to the retail station," which applies to wholesalers. *Section*

---

[22] ***HN22***[] *Wisconsin Stat. § 906.02* provides:

Lack of personal knowledge. A witness may not testify to a matter unless evidence is introduced sufficient to support a finding that the witness has personal knowledge of the matter. Evidence to prove personal knowledge may, but need not, consist of the testimony of the witness. This rule is subject to the provisions of s. 907.03 relating to opinion testimony by expert witnesses.

[23] Woodman's argues that the general rule is that expert opinion testimony may not be considered on summary judgment, citing ***Dean Medical Center v. Frye****, 149 Wis. 2d 727, 733, 439 N.W.2d 633 (Ct. App. 1989)*. However, we concluded in ***Dean*** that this rule did not apply if the issue is one on which expert testimony must be produced at trial. ***Id.*** *at 734-35*. Woodman's itself argues that expert testimony is needed on the correct statutory minimum price; its objection is that Gross does not have the requisite expertise. Therefore, ***Dean*** does not support its position.

100.30(2)(am)1m.b. [24] Woodman's argues that the terminal "closest to the retailer" is properly interpreted as the terminal closest to its corporate headquarters, which is in Janesville, making **[****36]** Madison the closest terminal.

[*P42] [**37] [**218]** This issue presents a question of statutory construction, a question of law, which we review de novo. ***HN24***[] The purpose of statutory construction is to discern the intent of the legislature, and to this end we first consider the language of the statute. ***State v. Setagord**, 211 Wis. 2d 397, 406, 565 N.W.2d 506 (1997)*. If the language clearly and unambiguously sets forth the intent of the legislature, we apply that language to the facts at hand. ***Id.*** Statutory language is clear and unambiguous when it has only one reasonable meaning, and, conversely, it is ambiguous when it is capable of being reasonably understood in two or more different ways. ***Id.*** We avoid constructions of statutory language that are unreasonable. ***Maxey v. Redevelopment Authority**, 120 Wis. 2d 13, 20, 353 N.W.2d 812 (Ct. App. 1984)*.

[*P43] We conclude that Woodman's proposed construction of "closest to the retailer" is not reasonable, because the location of the corporate headquarters of a company has no relationship to the location of the retail sale. Under Woodman's construction, for example, if a corporate retailer has headquarters in a **[****38]** distant state, the terminal price in that distant state determines the motor vehicle fuel price in Wisconsin, thereby affecting the market in Wisconsin. The only reasonable construction, we conclude, is that "terminal closest to the retailer" means the terminal closest to the location where the retail sale occurs. It is therefore not necessary to decide whether Woodman's is a retailer or a wholesaler under the statute in order to apply the APT formula, because in both cases the proper terminal is the one closest to Woodman's Onalaska store, the location **[**219]** of the retail sale. Based on the submissions, there is no dispute that this terminal is located at Eyota, Minnesota.

Woodman's and Gross as Competitors

[*P44] Woodman's contends that *Wis. Stat. § 100.30(3)* requires that the seller must be competing for customers for the particular grade or type of motor **[***736]** vehicle fuel that was sold below statutory cost. According to Woodman's, it is not a competitor in the diesel fuel market because its submissions show that its sales of diesel fuel to the public are insignificant in number and it does not try to attract customers for diesel fuel. Since Gross's submissions **[****39]** do not dispute this evidence, Woodman's continues, Woodman's did not as a matter of law violate the statute with respect to any sale of diesel fuel. [25]

---

[24] ***HN23***[] *Wisconsin Stat. § 100.30(2)* defines "retailer" and "wholesaler":

(2)(e) "Retailer" includes every person engaged in the business of making sales at retail within this state, but, in the case of a person engaged in the business of selling both at retail and at wholesale, such term shall be applied only to the retail portion of such business.

....

(m) "Wholesaler of motor vehicle fuel" includes any of the following:

1. A person who stores motor vehicle fuel and sells it through 5 or more retail outlets that the person owns or operates.

2. A person who acquires motor vehicle fuel from a refiner or as a sale at wholesale and stores it in a bulk storage facility other than a retail station for further sale and distribution.

3. A person engaged in the business of making sales at wholesale of motor vehicle fuel within this state.

4. A person engaged in the business of selling diesel fuel if that person's sales of diesel fuel accounted for at least 60 of that person's total sales of motor vehicle fuel in the previous year or, if that person did not engage in the business of selling diesel fuel in the previous year, if that person reasonably anticipates that sales of diesel fuel will account for at least 60 of that person's total sales of motor vehicle fuel in the current year.

[25] Woodman's does not argue that it is not Gross's competitor with respect to the sale of regular, mid-grade, and premium unleaded gasoline.

[*P45] We assume without deciding that Woodman's premise is correct-that *Wis. Stat. § 100.30(3)* requires that the seller and the alleged injured party be competitors with respect to the particular grade or type of motor vehicle fuel that was sold below statutory cost. However, we do not agree that the statute imposes the limited definition of "competitor" that Woodman's proposes. A wholesaler or retailer of motor vehicle fuel violates the statute if it sells fuel below statutory cost with the specified intent or effect. Evidence of the effort the seller makes to market a motor vehicle fuel and the actual number of sales it makes may be relevant to the **[**220]** seller's intent and may also be relevant **[****40]** to the effect of the sales it does make. However, we see nothing in the statutory language to indicate that the statute does not apply at all unless the seller intends to have or does have a particular market share. We conclude that Gross is Woodman's competitor with respect to diesel fuel within the meaning of *Wis. Stat. § 100.30(3)* because, based on the undisputed facts, they both sell diesel fuel to non-Woodman's vehicles in the same geographic area.

Calculation of APT Formula

[*P46] Woodman's contends that a discrepancy in transportation costs creates a factual dispute over the correct calculations applying the APT formula. According to Woodman's, Gross used 2 cents per gallon for unleaded gasoline and 2.3 cents per gallon for diesel fuel in his calculations instead of using Woodman's actual transportation costs. However, Woodman's responses in discovery show that its transportation costs are between 2.5 cents and 3 cents per gallon. Use of these costs would have resulted in a higher statutory minimum price, which would not be to Woodman's advantage and would not reduce the number of sales below the statutory minimum price. Therefore, the dispute **[****41]** over whether Gross should have used Woodman's actual transportation costs is not material.

[*P47] We conclude, as did the circuit court, that the undisputed facts are that Woodman's sold fuel on 295 days at below the statutory minimum price.

[221]** *Evidence of Intent or Effect*

[*P48] Woodman's contends that it submitted uncontroverted testimony that it did not intend to violate the statute, and therefore it has overcome any prima facie evidence of a violation of the statute and is entitled to summary judgment. It appears that Woodman's may be assuming that ***HN25***[] "intent" and "effect" as used in *Wis. Stat. § 100.30(3)* are the same. However, we agree with the circuit court that each term plainly has a different meaning. The common meaning of "intent" is "purpose," and the common meaning of "effect" is "result." [26] The plain meaning of *§ 100.30(3)*, **[***737]** therefore, is that it prohibits a sale at less than statutory cost if Woodman's had either an intent that is proscribed by the statute or the sale had an effect proscribed by the statute.

[*P49] **[****42]** We observe that the proscribed intent and effect in the first sentence of *Wis. Stat. § 100.30(3)* do not include the phrase, "or to otherwise injure a competitor," whereas the sentence describing prima facie evidence of intent or effect states that a sale at less than statutory cost is "prima facie evidence of intent or effect to induce the purchase of other merchandise, or to unfairly divert trade from a competitor, or to otherwise injure a competitor." *Section 100.30(3)*. Neither party **[**222]** comments on this apparent discrepancy. We conclude the only reasonable construction of subsec. (3), read as a whole, is that it ***HN27***[] prohibits a sale at less than statutory cost if there is either the intent or effect of injuring a competitor in ways other than unfairly diverting trade from a competitor. It makes no sense to provide that a sale below statutory cost is prima facie evidence of a category of intent or effect that is not a violation of the statute.

[*P50] This reading is confirmed by the history of the statute. From 1941 until 1987, *Wis. Stat. § 100.30(4)* defined the elements of the violation, as well as the penalty, and **[****43]** included the phrase, "or to otherwise injure a

---

[26] American Heritage Dictionary (3rd ed. 1993) pp. 707, 437. ***HN26***[] We are to interpret language in statutes according to its common and ordinary usage, unless another meaning is indicated, and we may consult a standard dictionary for the common meaning of a word. ***Swatek v. County of Dane**, 192 Wis. 2d 47, 61, 531 N.W.2d 45, 50 (1995)*. Use of a dictionary to establish the meaning of a word does not mean that it is ambiguous. ***State v. Curiel**, 227 Wis. 2d 389, 404-05, 597 N.W.2d 697 (1999)*.

competitor." [27] When that subsection was revised by 1987 Wis. Act 175 to replace fines and imprisonment with a civil forfeiture, the language defining a violation was removed and replaced by "For any violation of sub. 3," which was then identical to the present subsec. (3). We are satisfied that the legislature did not intend to alter the elements of a violation, but simply overlooked the fact that the first sentence of subsec. (3) did not contain the phrase, "or to otherwise injure a competitor." [28]

[*P51] [223] [****44]** Because the statute is violated if there is either the proscribed intent or the proscribed effect, we need address Woodman's evidence only with respect to effect. [29] The evidence of Woodman's sales below statutory cost on 295 days is, under *Wis. Stat. § 100.30(3)*, prima facie evidence that those sales had the effect of unfairly diverting trade from Gross or otherwise injuring him. Gross averred that he lost **[***738]** revenue because he lowered his prices after finding that Woodman's was selling motor vehicle fuel, including diesel, at a price below statutory cost. Woodman's evidence that it sold little diesel fuel to non-Woodman's vehicles, that it did not advertise diesel fuel, and that one could not see the prices from the road creates a reasonable inference that its diesel fuel prices did not divert diesel customers from Gross. However, this evidence does not dispute the evidence that Gross was injured by losing profits from setting his prices, including diesel, lower to compete with Woodman's prices. Woodman's has pointed to no other evidence that would arguably show that Gross did **[**224]** not lose profits as a result of setting his prices lower to meet Woodman's. **[****45]** Accordingly, we conclude that there is no dispute that the sales below statutory cost on 295 days did have the effect of injuring Gross.

[**46]** *Exception for Meeting a Competitor's Price*

[*P52] Woodman's acknowledges that it did not submit any notices to DATCP, and there is therefore a rebuttable presumption that it did not lower prices to meet a competitor's price, *Wis. Stat. § 100.30(7)(b)*. However, Woodman's contends that its submissions overcome this presumption and establish as a matter of law that it has fulfilled the requirements of the exception in *§ 100.30(6)(a)*7. Woodman's asserts that Wysocki's deposition, affidavit, and attachments show that when he lowered prices, it was a good-faith effort to meet the existing price of a competitor. Woodman's contends that the notations on the Sparta documents are "other business records maintained by [it] in the usual course of business." *Section 100.30(6)(a)*7. Woodman's focuses its argument on sales of fuel other than diesel because of its position that Woodman's is not a competitor of Gross with respect to diesel fuel and therefore those sales are not subject to the Act. However, since we have rejected that position, we consider all fuels in deciding whether the Sparta documents satisfy *§ 100.30(6)(a)*7 for any of the 295 days in the **[****47]** circuit court's addendum.

[*P53] Woodman's appears to rely in its argument on notations and calculations Wysocki made on the Sparta documents after copies were provided to Gross in discovery. However, we agree with the circuit court that in analyzing whether Woodman's has evidence that **[**225]** meets the requirement of *Wis. Stat. § 100.30(6)(a)7*, the proper set of Sparta documents to consider are those Woodman's produced in discovery and that Gross submitted

---

[27] *Wisconsin Stat. § 100.30* was originally enacted by Laws of 1939, ch. 56. With the changes made by Laws of 1941, ch. 75, § 4 defined a violation only in terms of proscribed intent; "or effect" was added to § 4 by Laws of 1965, ch. 629.

[28] Although we may not use legislative history to create an ambiguity in a statute, we may use it to reinforce a conclusion that the statute is indeed unambiguous. ***Novak v. Madison Motel Assoc.**, 188 Wis. 2d 407, 416, 525 N.W.2d 123 (Ct. App. 1994)*.

[29] Woodman's refers us to two California cases- ***Tri-Q, Inc. v. Sta-Hi Corp.**, 63 Cal. 2d 199, 404 P.2d 486, 488, 491, 45 Cal. Rptr. 878 (1965)*, and ***Dooley's Hardware Mart v. Food Giant Markets, Inc.**, 21 Cal. App. 3d 513, 98 Cal. Rptr. 543 (1971)*. However these cases are not helpful because the language of the California statute differs significantly from that of *Wis. Stat. § 100.30(3)* in that it prohibits a below cost sale if "for the purpose of injuring competitors or destroying competition" and "proof of [such a sale], together with proof of the injurious effect of such acts, is presumptive evidence of the purpose or intent to injure competitors or destroy competition." *Cal. Bus. & Prof. Code §§ 17043*, *17071*, cited in ***Tri-Q**, 404 P.2d at 488, 491*, and ***Dooley's**, 21 Cal. App. 3d at 516 n.2, 517 n.4*. We also note that these cases do not address the evidence of intent that is sufficient to entitle a defendant to summary judgment, but, rather, address findings made after a trial to the court.

with his supplemental affidavit. *See* footnote 16. Notations of competitor's prices and calculations or comments based thereon that Wysocki later made on those records to explain, for purposes of this litigation, how and why he had set those prices are not "records maintained in the usual conduct of business," which *§ 100.30(6)(a)*7 requires. *See* ***State v. Williams**, 2002 WI 58, PP42* and *49, 253 Wis. 2d 99, 644 N.W.2d 919* (***HN28***[] generally records prepared in anticipation of litigation are not business records under *Wis. Stat. § 908.03(6)*, the business records exception to the hearsay rule).

[*P54] We have examined all Sparta documents attached to **[****48]** Gross's supplemental affidavit. When there is a notation of a competitor's price, we assume for purposes of this appeal that notation arguably meets the requirements of *Wis. Stat. § 100.30(6)(a)7* and therefore there is no violation of the statute if Woodman's sets its price the same or lower for that grade **[***739]** of fuel on that date. [30] **[****49]** Our review leads us to conclude that **[**226]** on all but two of the dates in the circuit court's addendum-March 9, 1999 and March 12, 1999-there is no notation for at least one grade of fuel that is included on Gross's chart on that date. [31] Accordingly, we conclude there are 293 dates on which it is undisputed that there was a sale of at least one of Woodman's products at a price below the statutory minimum price and for which there is no evidence that the exception in *§ 100.30(6)(a)*7applies.

[227]** *Constitutional Challenges*

[*P55] Woodman's challenges the constitutionality of the Act on two grounds: it is so vague that it constitutes a denial of due process, and it violates due process because a seller may be penalized even if the seller lacks the intent to violate the Act. ***HN29***[] The constitutionality of a statute presents a question of law, which we review de novo. ***State v. Zarnke**, 224 Wis. 2d 116, 124, 589 N.W.2d 370 (1999)*. In considering **[****50]** both challenges, we bear in mind that, ***HN30***[] like all statutes, the Act "enjoys a strong presumption of constitutionality," and "every presumption must be indulged to sustain" the Act. ***Jackson v. Benson**, 218 Wis. 2d 835, 853, 578 N.W.2d 602 (1998)*.

[*P56] Woodman's contends the Act is vague because the meaning of the following terms are not clear: "wholesaler," "retailer," and "competitor" in *Wis. Stat. § 100.30(3)*; "any cost incurred for transportation" and "other charges that are not otherwise included in the average posted rack price" in *§ 100.30(2)(a)*; and "direct competitor" in *§ 100.30(2)(cj)*, which term is used in the "meets competition" exception in subd. (6)(a)7. The parties assert different standards for judging unconstitutional vagueness, with Gross drawing from civil cases and Woodman's asserting that, because it is subject to treble damages, the statute is penal in nature and therefore a stricter standard should apply. [32] **[****52]** **[**228]** *See* ***Village [***740] of Hoffman Estates v. Flipside, Hoffman***

---

[30] For example, the Sparta document for January 22, 1999, contains this handwritten notation at the bottom: "94.9 Matching Conoco West Salem." Gross's chart and the circuit court's addendum show Woodman's price on that date was 94.9 cents for regular gasoline and 99.9 for mid-grade gasoline, and that the statutory minimum price was, respectively, 96.10 and 101.690. We do not count the regular gasoline as a violation because we assume, for purposes of this appeal, that the notation is a business record that satisfies *Wis. Stat. § 100.30(6)(a)7* and shows that Woodman's lowered the price of regular gasoline below the statutory minimum price to match Conoco's price. However, this notation does not even arguably explain why the price for mid-grade gasoline was set below the statutory minimum price. Therefore, Woodman's price of mid-grade gasoline is not based on evidence in Woodman's possession as required by subd. (6)(a)7. We set out this example because Woodman's appears to be of the view that if the Sparta documents show a competitor's price for any grade of fuel on a particular date, sales of all grades on that date come within the exception in subd.(6)(a)7. However, we conclude the only reasonable interpretation of subd. (6)(a)7, as applied to this case, is that the exception must be established for each grade of fuel Woodman's sells.

[31] For March 9, 1999, Gross's chart lists only diesel fuel, with Woodman's price at 99.9, which is below the statutory minimum for that day and for the ten-day window as shown on the chart. However, the notation on the Sparta document for that day says "95.9 to 99.9 matching Kwik Trip," which arguably refers to diesel fuel, since we have no record of another fuel that was matched on that date. The same is true for March 12: Gross's chart lists only diesel fuel, with Woodman's price at 99.9, below the statutory minimum for that day and the ten-day window; the Sparta document notation shows competitor's prices from 95.9 to 105.9.

Estates, Inc.**, 455 U.S. 489, 498, 71 L. Ed. 2d 362, 102 S. Ct. 1186 (1982)* ("HN31***[] The degree of vagueness that the Constitution tolerates-as well as the relative enforcement **[****51]** of fair notice and enforcement-depends in part on the nature of the enactment" and also depends on whether there are civil or criminal penalties.). Gross relies on ***Moedern v. McGinnis**, 70 Wis. 2d 1056, 1073-74, 236 N.W.2d 240 (1975)*, which states that ***HN32***[] the standard for a civil statute is whether it is "so vague and uncertain that it is impossible to execute it or to ascertain the legislative intent with reasonable certainty." With respect to a criminal statute, we have stated ***HN33***[] it is unconstitutionally vague if it either fails to afford proper notice of the conduct it seeks to proscribe or fails to provide an objective standard for enforcement, ***State v Hahn**, 221 Wis. 2d 670, 677, 586 N.W.2d 5 (Ct. App. 1998)*. To give proper notice, a criminal statute must warn people who wish to obey the law that their conduct comes near the proscribed area. ***Id.*** [33]

[*P57] [229]** It is not necessary to decide which standard to apply, because we conclude that Woodman's assertions of vagueness fail even if we apply the standard for criminal statutes. ***HN34***[] Even where criminal statutes are concerned, a statute is not void for vagueness **[****53]** if, by the ordinary process of statutory construction, we can give a practical or sensible meaning to the statute, and this rule applies even if a statute is ambiguous. ***Hahn**, 221 Wis. 2d at 677, 678*. In addition, where, as in this case, the First Amendment is not implicated, the vagueness challenge must be examined in the context of the facts in the particular case. ***United States v. Mazurie**, 419 U.S. 544, 550, 42 L. Ed. 2d 706, 95 S. Ct. 710 (1975)*. We have already concluded the only reasonable construction of the Act is that, whether Woodman's is a wholesaler or retailer, the terminal closest to the location of the retail sale is the correct terminal to use in applying the APT formula. We have also concluded that the statutory language does not support Woodman's construction of the term "competitor." There are no ambiguities on these points, much less vagueness. As for Woodman's other assertions of vagueness, the facts in this case do not show that uncertainty about the meaning of "any cost incurred for transportation" or "other charges …" affected how Woodman's set its prices; nor do the facts show that uncertainty about the meaning of "direct competitor" had any relationship **[****54]** to Woodman's inability to prove that it comes within the exception for meeting the price of a competitor.

[*P58] Woodman's next contends that *Wis. Stat. § 100.30* violates its right to due process because the statute does not **[***741]** require proof of intent or wrongdoing, but instead may be violated based on the effect of a sale, **[**230]** and the sale itself is prima facie evidence of the proscribed effect. However, the ***HN35***[] imposition of liability without fault-even when the statute imposes punitive sanctions-does not in itself violate due process. ***State v. Stepniewski**, 105 Wis. 2d 261, 276, 314 N.W.2d 98 (1982)*; ***State v. Collova**, 79 Wis. 2d 473, 480-84, 255 N.W.2d 581 (1977)*. Statutes that are within the police power of the state may impose even criminal liability on a person whose acts violate the statute, even if the person did not intend to do so. ***State v. Dried Milk Products Coop.**, 16 Wis. 2d 357, 362-63, 114 N.W.2d 412 (1962)*.

[*P59] It is well established that ***HN36***[] the police power of the state includes not only regulations or statutes designed to promote public health and safety, but also those **[****55]** designed to promote economic prosperity.

---

[32] Woodman's relies on ***Open Pantry Food Marts of Southeastern Wisconsin v. Falcone**, 92 Wis. 2d 807, 810-11, 286 N.W.2d 149 (Ct. App 1979)*, in which we held that the treble damages provision of *Wis. Stat. § 133.01*, the Wisconsin ***Antitrust Law***, made it punitive as well as remedial, and therefore the statute of limitations in *Wis. Stat. § 893.21*, for private party actions "upon a statute penalty or forfeiture …," applied.

[33] We have also, in the context of an ordinance that provides for a forfeiture, applied the following standard:

A law regulating conduct must give adequate notice of what is prohibited, so as not to delegate "basic policy matters to policemen, judges, and juries for resolution on an ad hoc and subjective basis." ***Grayned v. City of Rockford**, 408 U.S. 104, 108-109, 33 L. Ed. 2d 222, 92 S. Ct. 2294 (1972)*. Thus, "a statute which either forbids or requires the doing of an act in terms so vague that men of common intelligence must necessarily guess at its meaning and differ as to its application violates the first essential of due process of law." ***Connally v. General Constr. Co.**, 269 U.S. 385, 391, 70 L. Ed. 322, 46 S. Ct. 126 (1926)*.

***Dog Fed'n v. City of South Milwaukee**, 178 Wis. 2d 353, 377-78, 504 N.W.2d 375 (Ct. App. 1993)*.

State v. Ross**, 259 Wis. 379, 48 N.W.2d 460 (1951)*; ***State v. Eau Claire Oil Co.**, 35 Wis. 2d 724, 151 N.W.2d 634 (1967)*. Such regulations and statutes do not offend substantive due process if they are "'not … unreasonable, arbitrary or capricious, and … the means selected … have a real and substantial relation to the object sought to be attained.'" ***Liberty Homes, Inc. v. DIHLR**, 136 Wis. 2d 368, 374-75, 401 N.W.2d 805 (1987)*, citing ***Nebbia v. New York**, 291 U.S. 502, 525, 78 L. Ed. 940, 54 S. Ct. 505 (1934)*. In examining a constitutional challenge to prior versions of *Wis. Stat. § 100.30*, the Wisconsin Supreme Court in ***Ross and ***Eau Claire Oil Co.*** applied this test and concluded that *§ 100.30* was constitutional. Woodman's argues that these cases are inapplicable because they concerned prior versions of the Act which prohibited only sales below statutory cost with injurious intent, and did not include injurious effect. While that is true, the principles applied in these cases are applicable here.

[*P60] [231]** At the time ***Ross*** **[****56]** was decided, *Wis. Stat. § 100.30(4)* (1949) prohibited advertising, offering for sale, and sale below statutory cost "with intent of inducing the purchase of other merchandise or of unfairly diverting trade from a competitor or otherwise injuring a competitor," and evidence of such advertisement, offer, or sale was prima facie evidence of that intent. The challenger argued that this presumption was unreasonable because it amounted to a conclusion of guilt. The court rejected this argument because the statute afforded the opportunity to come forward with evidence to overcome the presumption and the opportunity to show that one of the numerous defenses applied. ***Ross**, 259 Wis. at 386-87*.

[*P61] In ***Eau Claire Oil Co.***, the court again considered a constitutional challenge to the same provision regarding prima facie evidence that was at issue in ***Ross***. *Wis. Stat. § 100.30(4)* (1963). [34] The court concluded the presumption was constitutional because there was a rational connection between the facts presumed-that is, "intent to induce the purchase of other merchandise, or to unfairly divert trade **[****57]** from a competitor or to otherwise injure a competitor," **[**232]** *§ 100.30(4)* (1963)-and the evidence of selling the items below statutory **[***742]** cost. ***Eau Claire Oil Co.**, 35 Wis. 2d at 734*.

[*P62] Applying the principles of ***Ross*** and ***Eau Claire Oil Co.*** to the provisions of *Wis. Stat. § 100.30(3)* **[****58]** regarding the effect of sales below statutory cost, we conclude they do not offend due process. The prohibition of sales below statutory cost that have the effect of inducing the purchase of other merchandise, unfairly diverting trade from a competitor, or otherwise injuring a competitor has a real and substantial relationship to the purpose of the statute, which is to prevent the economic harms that result from such sales. *Section 100.30(1)*. Indeed, the prohibition of sales with the specified injurious effects arguably bears a closer relationship to achieving that purpose than the prohibition with injurious intent, since the former focuses on the very results of below-cost sales that the legislature sought to protect against. For that same reason, there is a rational connection between below-cost sales and the specified injurious effects; therefore, the rebuttable presumption that evidence of the former is proof of the latter does not offend the constitution.

[*P63] There is, finally, no question that the presumption or effect is rebuttable, like the presumption of intent at issue in ***Ross***: the seller has the opportunity of presenting evidence to rebut the presumption, **[****59]** as well as presenting evidence of statutory defenses. ***Ross***, 259 Wis. 386-87; *see also,* ***State ex rel. Strykowski v. Wilkie**, 81 Wis. 2d 491, 531, 261 N.W.2d 434 (1978)* (***HN37***[🡅] a rebuttable presumption that does not prevent a criminal defendant from presenting a defense or take any **[**233]** question of fact from a jury does not abridge the right to a jury trial or deny due process of law). [35]

---

[34] In ***State v. Eau Claire Oil Co.**, 35 Wis. 2d 724, 151 N.W.2d 634 (1967)*, the seller also objected to the requirement under then *Wis. Stat. § 100.30(2)(j)* (1963) that, when items of merchandise were sold in combination but separately priced, each separate item was subject to the markup provisions of the statute. The seller asserted there was no economic justification for this when there was an overall profit, and that it was arbitrary in comparison to the manner in which gifts were treated under the statute. The court concluded that these were policy judgments for the legislature to make and were not unconstitutional. ***Id.** at 735-37*.

[35] Woodman's also argues that the current statute, unlike the statute at issue in ***State v. Ross**, 259 Wis. 379, 48 N.W.2d 460 (1951)*, and ***State v. Eau Claire Oil Co.**, 35 Wis. 2d 724, 151 N.W.2d 634 (1967)*, mandates a minimum markup, thus forcing sellers of motor vehicle fuel to set prices above those that take into account their actual costs. Woodman's does not elaborate further on the specific provisions it is challenging. Presumably Woodman's means that the specified markup for doing business

[**60]** CONCLUSION

[*P64] We conclude the circuit court properly exercised its discretion in allowing the second amended complaint to relate back to the filing of the original complaint. We also conclude: (1) there is no genuine material factual dispute that on 293 days Woodman's sold motor vehicle fuel at less than the statutory cost and did not file a notice with DATCP under *Wis. Stat. § 100.30(7)* or have in its possession the evidence required by *§ 100.30(6)(a)*7 for those sales; and (2) Woodman's did not present evidence to dispute the evidence of actual injury submitted by Gross. Accordingly, we hold that Gross is entitled as a matter of law to summary judgment that on 293 days Woodman's violated the Act, and to $ 2,000 for each day of violation **[**234]** for a total of $ 586,000. Because the circuit court held there were 295 days of violations with a resulting award of $ 590,000, we affirm in part, reverse in part and remand with instructions to enter a judgment that is modified to conform to this decision. In addition, we reverse the circuit **[***743]** court's order that trial will be to the court and remand for a jury trial on the alleged violations for March 9 and March 12, 1999, as **[****61]** well as all other remaining factual issues.

By the Court.-Judgment and order affirmed in part; reversed in part and cause remanded with directions.

Dissent by: LUNDSTEN

Dissent

[*P65] LUNDSTEN, J. (*dissenting*). I agree with all parts of the majority opinion, except its conclusion that Woodman's submissions did not create a disputed issue of fact regarding the "effect" of Woodman's diesel fuel pricing. Accordingly, I respectfully dissent.

[*P66] The majority correctly concludes that Woodman's may overcome James Gross's prima facie case by showing it did not intend to violate *Wis. Stat. § 100.30* and that its diesel fuel pricing did not have a negative effect covered by the statute. The majority explains that Gross sufficiently asserted injury by alleging that he lowered his diesel prices in response to Woodman's diesel prices, thereby losing revenue. Majority at PP39, 51. The majority acknowledges that Woodman's presented evidence regarding the inconvenient location of its diesel pump, lack of marketing, and low sales volume to non-Woodman's customers, and that this evidence "creates a reasonable inference that [Woodman's] diesel fuel prices did **[****62]** not divert diesel customers from Gross." Majority at P51. However, in the majority's view, such evidence does not contradict Gross's assertion that he lowered his prices in response to Woodman's diesel **[**235]** prices and lost revenue, thereby suffering an injurious "effect" under *§ 100.30(3)*. Majority at PP48-51. The majority's reasoning seems to be that, regardless whether Woodman's diverted trade from Gross and regardless whether Gross sensibly lowered his diesel prices to compete with Woodman's, it is uncontroverted that Gross did lower his diesel prices in response to Woodman's prices. I view the matter differently.

[*P67] As the majority rightly concludes, Woodman's is a "competitor" within the meaning of *Wis. Stat. § 100.30(3)*. I agree that a party is a competitor under the statute simply by virtue of selling the same fuel product in the relevant geographic area. Majority at PP44-45. More to the point here, I agree with the majority that, although the effort "the seller makes to market a motor vehicle fuel and the actual number of sales it makes" are not relevant to whether the seller is a "competitor," such evidence may be relevant to the effect of the **[****63]** seller's sales. Majority at P45. Stated differently, I agree with the majority's conclusion that just because Woodman's is a "competitor" under the statute does not necessarily mean Woodman's is the sort of competitor whose pricing has an effect on the market. I part company with the majority because I agree with Woodman's that its submissions created a factual dispute regarding Gross's assertion that he lowered his diesel fuel prices in response to

---

is required now in all cases, whereas in earlier versions the seller could use a lower markup if it could prove its cost of doing business was less. *Cf. Wis. Stat. § 100.30(2)(am)1*m.b and c with *§ 100.30(2)(a)* and *(b)* (1949) and (1963). Woodman's, however, has presented no evidence that its cost of doing business is less than the statutory markup, and the evidence is that Woodman's used the statutory markup in setting its prices. In the absence of a developed argument that relates the facts of this case to the provision Woodman's challenges, we decline to address it.

Woodman's diesel fuel pricing. Woodman's factual assertions tend to show that no reasonable diesel fuel seller would care about the diesel fuel prices charged by Woodman's.

[*P68] The affidavit of Thomas Wysocki, manager of Woodman's Onalaska store, contains the following assertions. Woodman's Onalaska store has had only one diesel pump since the store opened its fuel station. Woodman's installed the single diesel pump for the sole **[**236]** purpose of fueling its own semi-trucks, which haul products to and from Woodman's stores. "Woodman's [diesel pump] is not readily accessible to or customer friendly for non-Woodman's semi-trucks." A semi-tractor must first drop its trailer in order to maneuver **[***744]** up to the pump, and there is no room in the **[****64]** "driveway/parking cement area of the gas station" to drop trailers. Woodman's semi drivers drop their trailers at a different location, such as the warehouse docks, before heading to the pump to fill up. Diesel fuel sales not made to Woodman's own semi-trucks are not made to other semi-trucks, but to "owners of older cars that still utilize diesel fuel." Wysocki has been the manager of Woodman's Onalaska store since it opened in 1994 and he has never seen a non-Woodman's semi-truck fill up with diesel fuel at the Woodman's station. Woodman's has no marketing policy or strategy to sell diesel fuel to the public. Woodman's did not post or advertise its diesel price. The only way a customer could determine Woodman's diesel fuel price was to read the price on the pump itself.

[*P69] Wysocki's affidavit avers that diesel fuel sales are "insignificant" compared with sales of other types of fuels. A chart, prepared by Wysocki and attached to his affidavit, addresses the 421 days, between September 13, 1998, and June 3, 2000, on which Gross originally asserted violations. Not counting sales to Woodman's own semi-trucks, the chart documents 179 days with no diesel fuel sales at all, 227 **[****65]** days with less than ten gallons sold, and 275 days with less than twenty gallons sold. Thus, not counting Woodman's own trucks, the chart shows that on 42% of the days Gross initially alleged violations, Woodman's made no diesel fuel sales at all, and on 65% of those days, Woodman's sold less than twenty gallons.

[*P70] **[**237]** Wysocki asserted, in contrast, that Gross's Citgo Quick Mart station advertises diesel prices, along with other fuel prices, on a sign clearly visible from an adjacent four-lane highway. Gross's diesel pumps are situated so that a semi-truck driver can easily pull right up to the pumps without dropping its trailer.

[*P71] Based on Wysocki's assertions, it could reasonably be inferred that Gross never saw billboards or other signs advertising Woodman's as a diesel fuel seller, that Gross never saw Woodman's diesel prices posted in a place visible from the street, that Gross himself had to go up to Woodman's diesel pump to see the price, and that Gross never saw a non-Woodman's semi-truck at Woodman's diesel pump and seldom saw any vehicle at that pump. The question naturally arises whether Gross actually lowered his diesel prices in response to Woodman's **[****66]** diesel prices and, therefore, whether Woodman's diesel pricing and sales had any effect on Gross.

[*P72] The majority acknowledges that Woodman's evidence "creates a reasonable inference that [Woodman's] diesel fuel prices did not divert diesel customers from Gross." Majority at P51. I conclude that this same evidence casts doubt on Gross's claim of injury. Just as the facts suggest that Woodman's did not divert diesel customers from Gross, they also suggest that Gross *knew* Woodman's posed no threat to Gross's diesel fuel business.

[*P73] It might be argued that Woodman's failed to offer evidence contradicting Gross's assertion because Woodman's did not offer evidence showing that semi-tractors are the main market for diesel fuel. I disagree. In his deposition, Willard Woodman, president of Woodman's, (1) expressed an unspecified degree of familiarity with the market for motor vehicle fuels, (2) **[**238]** explained what goes into Woodman's fuel pricing decisions, and (3) said he sometimes assists in making gasoline pricing decisions. Willard Woodman averred that diesel fuel is "really [a] truck stop business." Jurors could interpret this assertion, in light of common experience, **[****67]** to mean that semi-trucks are the main market for diesel fuel. While additional expert **[***745]** testimony might be desirable at trial, it is not needed to place this factual issue before a jury. "The requirement of expert testimony is an extraordinary one, and [should be] applied by the trial court only when unusually complex or esoteric issues are before the jury." ***White v. Leeder****, 149 Wis. 2d 948, 960, 440 N.W.2d 557 (1989)*.

[*P74] I note that the lengthy majority decision only begins to reveal the complicated factual and legal issues dealt with before the circuit court. The narrow issue I address was one of dozens. While Woodman's made the argument I adopt here, it did so primarily in the context of arguing that it was not a "competitor" under *Wis. Stat. § 100.30(3)* and that it did not "intend" to violate the statute. Nonetheless, Woodman's also argued, both before the circuit court and before this court, that its evidence put in dispute whether its diesel sales had an *effect* on Gross. With focused hindsight, I conclude that this argument should have prevailed.

[*P75] Having rejected the majority's conclusion regarding "effect, **[****68]** " I must briefly address "intent." The submissions show there is a factual dispute regarding intent with respect to diesel fuel sales. The same evidence summarized above-including the assertions that Woodman's had only one diesel pump, did not advertise its diesel price (except at the pump), and had **[**239]** no diesel fuel marketing strategy-suggests there was no intent to unfairly divert trade or otherwise injure a competitor.

[*P76] Accordingly, I would reverse the circuit court's order granting summary judgment in favor of Gross with respect to the alleged violations involving diesel fuel sales below the ATP formula.

Governments > Courts > Common Law

HN5[] **Alternative Dispute Resolution, Judicial Review**

A court reviewing an arbitration award is prohibited from weighing the evidence or determining the sufficiency of the evidence. The review must be confined to the four statutory grounds under *O.C.G.A. § 9-9-13(b)* because the Georgia Arbitration Code, *O.C.G.A. § 9-9-1 et seq.*, is in derogation of the common law and must be strictly construed.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Judicial Review

Civil Procedure > ... > Alternative Dispute Resolution > Arbitration > General Overview

HN6[] Alternative Dispute Resolution, Judicial Review

Inasmuch as the Georgia Arbitration Code, O.C.G.A. § 9-9-1 et seq., does not list manifest disregard of the law as a grounds for vacating an arbitration award, it cannot be used as an additional ground for vacatur. Nor can it be said that a manifest disregard of the law fits within the framework of the third statutory ground listed, overstepping of the arbitrator's authority. That ground only comes into play when an arbitrator determines matters beyond the scope of the case. It is not applicable where the issue to be decided, i.e., defaults under the agreement, are properly before the arbitrators.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Validity of ADR Methods

HN7[] Alternative Dispute Resolution, Validity of ADR Methods

See O.C.G.A. § 9-9-13(d).

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Arbitration Clauses

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Validity of ADR Methods

HN8[] Contract Conditions & Provisions, Arbitration Clauses

To obtain a resolution, arbitrators are free to apply broad principles of justice and good conscience, and decide according to their concept or notion of justice. This is particularly true where the parties, by contractual agreement, have entered into "baseball arbitration," because the parties have tied the hands of the arbitrators, requiring them to select without changing among remedies presented, i.e., the best of a bad lot.

Antitrust & Trade Law > Procedural Matters > Jurisdiction > Exclusive Jurisdiction

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN9[] Jurisdiction, Exclusive Jurisdiction

To the extent that either an agreement or a remedy imposed by the arbitrators as a remedy constitutes a violation of federal antitrust laws, exclusive jurisdiction of such issues lies within the federal courts.

Civil Procedure > ... > Alternative Dispute Resolution > Arbitration > General Overview

Governments > Courts > Authority to Adjudicate

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Judicial Review

Governments > Courts > Common Law

HN10[] **Alternative Dispute Resolution, Arbitration**

Since the Georgia Arbitration Code, *O.C.G.A. § 9-9-1 et seq.*, is in derogation of common law, requiring strict construction, a trial court can only enter judgment on the award or vacate it under one or more of the statutory grounds. The trial court lacks the statutory authority to alter an arbitrators' award. *O.C.G.A. § 9-9-13(b)*. The arbitration code demands that courts give extraordinary deference to the arbitration process and awards so that the trial court cannot alter the award. The power of a court to vacate an arbitration award has been severely limited in order not to frustrate the legislative purpose of avoiding litigation by resort to arbitration.

Opinion by: ELDRIDGE

Opinion

[550]** **[*216]** ELDRIDGE, Judge.

This case is an appeal, Case No. A03A0038, and a cross-appeal, Case No. A03A0039, from an arbitration award. The facts are: Scana Energy Marketing, Inc. ("SCANA") entered into a Natural Gas Retail Service Alliance Agreement ("Agreement") with Cobb Energy Management Corporation, Upson Electric Membership Corporation, Lamar Electric Membership Corporation, Central Georgia Electric Membership Corporation, Greystone Power Corporation, and Snapping Shoals Energy Management Corporation ("Allies"), all EMCs, to help SCANA penetrate the deregulated retail natural gas market in Georgia and to keep them from possibly qualifying to become competitors. The Allies had the obligation of assisting SCANA in locating and acquiring residential and commercial customers in the areas where the Allies each provided electric services from among its customers or those familiar with the Allies within the EMCs' territories. Upon obtaining a 30 percent market share, SCANA sought to terminate the **[***2]** obligation, avoiding the payment of fees and compensation to the Allies under the Agreement. The Allies invoked the mandatory binding arbitration provision under the Agreement to resolve disputes and under the CPR Institute for Dispute Resolution ("CPR") rules. The Agreement's arbitration clause provided for "baseball arbitration" where the arbitrators had to choose between one of the parties' proposed remedies in its entirety and without alteration. Agreement, § 9.3; see for explanation of "baseball arbitration" *Pennsylvania Envtl. Def. Fund v. Canon-McMillan School Dist., 152 F.3d 228, 239 (3d Cir. Pa. 1998)* (Garth, C. J., dissenting) *HN1*[] (in baseball arbitration, the Panel is limited to selecting one alternative in order to reinforce the incentives of moving the parties toward their best judgment of a realistic outcome). In turn, SCANA sought to avoid arbitration, arguing that either the Agreement was void or that SCANA had terminated the Agreement. On December 11, 2000, the superior court ordered the parties to commence arbitration of the disputes under the Agreement. SCANA sought to have the award vacated, alleging that the arbitrators overstepped **[*217]** their authority under **[***3]** the Agreement and the law, but the superior court confirmed the award. SCANA appeals. Finding no error, we affirm in Case No. A03A0038.

Case No. A03A0038

1. SCANA contends that the superior court erred in denying its motion to vacate the arbitrators' award, because the arbitrators overstepped their authority without any legal or contractual authority in making the award. We do not agree.

Of the parties' proposed remedies, the arbitrators, under the Agreement's arbitration provisions, selected the Allies' Remedy No. 5, which was stated as a remedy to the defaults or in the alternative as an offer of amendment to the Agreement:

from and after the Panel's Order, SCANA shall pay the Petitioners the fees and reimbursements as set forth in the Alliance Agreement, and SCANA shall remove the one dollar additional charge and not impose any additional charge on gas customers located within the Petitioners' territories, where such charges are not also imposed on all SCANA gas customers in the State of Georgia; *provided however*, that SCANA shall have the option to be exercised not later than 90 days from the date of the Panel Final Order to elect, by written notice to the Petitioners, **[***4]** that the Petitioners shall provide all Call Center Services and Billing Services for a flat fee of $ 3.95 per customer per month, each such amount escalated annually at the rate of the Consumer Price Index, and in that instance SCANA shall remove the $ 1.00 additional charge imposed on gas customers within the Petitioners' territories and not thereafter impose any additional charge on gas customers located within the Petitioners' territories where such charges are not also imposed on all SCANA gas customers in the State of Georgia.

[551]** SCANA asserts that in selecting this remedy the arbitrators, by a vote of two to one, overstepped their authority as arbitrators *O.C.G.A. § 9-9-13 (b) (3)*. SCANA opposes the award and has rejected the alternative offer of amendment to the Agreement contained in the award.

(a) To the contrary, there has been no overstepping of authority by the arbitrators, because in the Agreement, SCANA granted such power and authority to prohibit discriminatory treatment against gas customers in the Allies' territories by agreeing to bind itself in its fees and rates applicable to gas customers in the Allies' territories and set forth that discriminatory **[***5]** rates applicable to such gas customers within the Allies' territories would constitute a default of the Agreement. The Agreement provides: "[if] SCANA fails materially to provide gas and related customer service at market rates or better, in accordance with Prudent Utility Practice[, then such discriminatory rate constitutes a default of the Agreement]." See Agreement, Article XI -- Default, 11.2 Performance Default, (a) (iii). Thus, the dollar per customer fee charged to all gas customers within the Allies' territories **[*218]** and not charged to all other SCANA gas customers statewide constituted a clear act of default by such discriminatory conduct under the clear, plain, and unambiguous terms of the Agreement. Further, SCANA failed to establish that such discriminatory fee was in any way justified under any "Prudent Utility Practice."

Since the Agreement prohibited SCANA from imposing discriminatory fees and rates on gas customers within the Allies' territories, then such remedy was clearly within the scope of the arbitrators' authority and was properly before the arbitrators as one of the defaults under the Agreement, along with the failure to pay or to reimburse the *Allies. Ralston v. City of Dahlonega, 236 Ga. App. 386, 388 (3) (512 S.E.2d 300) (1999)*. **[***6]** Since SCANA, by agreement, had contractually limited its ability to set fees or rates that discriminated against the gas customers in the Allies' territories, such remedy was not prejudicial nor the product of overstepping of the arbitrators' authority. See *O.C.G.A. § 9-9-13 (b) (3)*; *Bennett v. Builders II, Inc., 237 Ga. App. 756, 757 (3) (516 S.E.2d 808) (1999)*.

(b) ***HN2***[] By statute and regulations, SCANA, as a certified gas marketer, has the right to set retail natural gas prices in Georgia; however, SCANA, by its contracts, may voluntarily limit or surrender such rights to set rates, even if the Georgia Public Service Commission lacks such power *O.C.G.A. § 46-4-160*.

(c) Here the arbitrators' award compelled SCANA to remove the discriminatory fee of $ 1 from the monthly billing to each gas customer in the Allies' territories to avoid defaulting on the Agreement.

HN3[] An arbitration award should be consistent with terms of the underlying agreement and reflect the "essence" of that contract; it must not demonstrate an "imperfect execution" of the arbitrator's authority. Although an arbitrator has some latitude **[***7]** in fashioning remedies, he is not free to ignore the express terms of a valid and enforceable contract.

(Citations omitted.) *Sweatt v. International Dev. Corp., 242 Ga. App. 753, 755 (1) (531 S.E.2d 192) (2000)*. Here, the arbitrators found the scope of their authority within the four corners of the contract and were resolving one of several acts of default under the Agreement by SCANA.

(d) SCANA contends that the arbitrators made a factually incorrect determination that all retail gas customers in the Allies' territories were electric customers of the Allies, because some of the gas customers were not the Allies' electric customers. Article XI, Sec. 11.2, (a) (iii) makes no distinction between customers of the Allies and all retail gas customers within the Allies' territories, so that such **[*219]** provision applies to all retail gas customers within the Allies' territories.

Further, ***HN4***[] an arbitration award cannot be set aside for mistakes of fact made by the arbitrators, but an award may only be set aside for violation of one or more of the statutory grounds, because these are the exclusive grounds to vacate all or part of an arbitration award:

(1) Corruption, fraud, or **[***8]** misconduct in procuring the award; (2) Partiality of an arbitrator appointed as a neutral; (3) An overstepping by the arbitrators of **[**552]** their authority or such imperfect execution of it that a final and definite award upon the subject matter submitted was not made; or (4) A failure to follow the procedure of this part, unless the party applying to vacate the award continued with the arbitration with notice of this failure and without objection.

O.C.G.A. § 9-9-13 (b); *Progressive Data Systems, Inc. v. Jefferson Randolph Corp., 275 Ga. 420 (568 S.E.2d 474) (2002)*; *Greene v. Hundley, 266 Ga. 592, 596-597 (3) (468 S.E.2d 350) (1996)* ***HN5***[] (reviewing court prohibited from weighing the evidence or determining sufficiency of the evidence); *Ralston v. City of Dahlonega, supra at 386*. "Review must be confined to the four statutory grounds. [This] is because the Georgia Arbitration Code is in derogation of the common law and must be strictly construed." (Citations and punctuation omitted.) *Progressive Data Systems, Inc. v. Jefferson Randolph Corporation, supra.*

(e) To the extent that the arbitrators disregarded Georgia contract law in construing **[***9]** the Agreement or in fashioning a remedy from the remedies available to them under baseball arbitration provided by the Agreement,

HN6[] inasmuch as the Code does not list "manifest disregard of the law" as a ground for vacating an *arbitration award*, it cannot be used as an additional ground for vacatur. Nor can it be said that a "manifest disregard of the law" fits within the framework of the third statutory ground listed . . . -- overstepping of the arbitrator's authority. That ground only comes into play when an arbitrator determines matters beyond the scope of the case. It is not applicable where, as here, the issue to be decided, i.e., [defaults under the Agreement, are] properly before the arbitrators.

(Citations omitted; emphasis supplied.) *Progressive Data Systems, Inc. v. Jefferson Randolph Corporation, supra.*

(f) Remedy No. 5 does not regulate SCANA's rates beyond the terms of the Agreement in regard to retail natural gas sales throughout the State of Georgia, because in the Agreement, SCANA agreed **[*220]** to treat gas customers within the Allies' territories in the same fashion as natural gas customers throughout the rest of Georgia.

However, in the alternative to the remedy, Remedy No. 5 offers, **[***10]** but does not order, an alternative remedy that SCANA could choose to apply to all natural gas customers in the Allies' territories, and which SCANA could of its own volition choose to implement and set as a fee as part of its rates. Such offer was to amend the Agreement between SCANA and the Allies, setting a flat fee for services. Only SCANA has the power and authority to impose such fee as part of its rate-making power. If SCANA chose to impose such fee uniformly, then the Agreement would prohibit the $ 1 fee on gas customers within the Allies' territories, which is within the Agreement terms to prohibit. Such alternative remedy, which the arbitrators could not order into effect, does not void the remedy of the prohibition of the $ 1 fee within the Allies' territories, which is within the terms of the Agreement's remedies. Had the arbitrators ordered such alternative remedy to be implemented, instead of stating it as an alternative offer of contract amendment to be implemented in the discretion of SCANA, this would be "overstepping by the arbitrators," because the Agreement did not contemplate any effect on rates and fees throughout the rest of the State or even within the Allies' **[***11]** territories. The plain and unambiguous reading of Remedy No. 5, itself, excluding the offer of contract amendment, does not order SCANA to do anything except to cease the imposition of the $ 1 fee within the Allies' territories in a discriminatory fashion and to pay the Allies what it owes to them, which provisions are within the terms of the Agreement.

(g) SCANA contends that the arbitrators should not have dealt with the discriminatory rate paid by gas customers in the Allies' territories, because the arbitrators used equity in reaching an equitable remedy *O.C.G.A. § 9-9-13 (d)* states: ***HN7***[] "the fact that the relief was such that it could not or would not be granted by a court of law or equity is not [a] ground for vacating or refusing to confirm the award." See *Greene v. Hundley, supra at 595*. ***HN8***[] To obtain a resolution, arbitrators "'are free to apply **[**553]** broad principles of justice and good conscience, and decide according to their concept or notion of justice.'" *Bartlett v. Dimension Designs, Ltd., 195 Ga. App. 845, 848 (3) (395 S.E.2d 64) (1990)*, overruled on other grounds, *Pace Constr. Corp. v. Northpark Assoc., 215 Ga. App. 438, 439 (450 S.E.2d 828) (1994)*. **[***12]** This is particularly true where the parties, by contractual agreement, have entered into "baseball arbitration," because the parties have tied the hands of the arbitrators, requiring them to select without changing among remedies presented, i.e., the best of a bad lot.

[*221] (h) ***HN9***[] To the extent that either the Agreement or Remedy No. 5 constitutes a violation of Federal Antitrust Laws, exclusive jurisdiction of such issues lies within the federal courts.

Case No. A03A0039

2. The arbitrators' Remedy No. 5 provided for SCANA to accept or to reject the alternative remedy, the offer of contract amendment, and of setting a $ 3.95 flat rate for Call Center and Billing Services by the Allies within 90 days from the award by November 2, 2001; the superior court changed such date to the date of the trial court's order of May 7, 2002, which had the effect of extending the time within which SCANA could accept the offer that the Allies intended to be on the table for a finite time. In their cross-appeal, the Allies contend that such change by the trial court was error. We agree.

The superior court erred in altering the date in the arbitrators' award. ***HN10***[] Since the Georgia Arbitration Code is in derogation of **[***13]** common law, requiring strict construction, the trial court could only enter judgment on the award or vacate it under one or more of the statutory grounds. The trial court lacked statutory authority to alter the arbitrators' award in this fashion. See *O.C.G.A. § 9-9-13 (b)*; *Progressive Data Systems, Inc. v. Jefferson Randolph Corporation, supra*; *Greene v. Hundley, supra at 597*; *Ralston v. City of Dahlonega, supra at 387*. The Arbitration Code demands that courts give extraordinary deference to the arbitration process and awards so that the trial court cannot alter the award. See generally *Bartlett v. Dimension Designs, Ltd., supra at 848* (3). "The power of a court to vacate an arbitration award has been *severely limited* in order not to frustrate the legislative purpose of avoiding litigation by resort to arbitration." (Citation omitted; emphasis in original.) *Haddon v. Shaheen & Co., 231 Ga. App. 596, 597 (1) (499 S.E.2d 693) (1998)*.

Since the making or setting of rates, except where limited by the Agreement as determined in Division 1, is a discretionary right of SCANA, then neither **[***14]** the arbitrators nor the trial court could mandate SCANA to exercise such discretion by any date certain. SCANA could exercise the discretion to impose a $ 3.95 rate upon all natural gas users in the Allies' territories to be paid to the Allies for its services at any time, except as otherwise limited by the Agreement.

First, Remedy No. 5 of the Allies constituted a remedy in which the Allies, under the express terms of the Agreement, would be paid the fees owed and gas customers within the Allies' territories would be relieved of the $ 1 discriminatory fees; second, in the alternative, the Allies made a time-limited offer to SCANA that the Agreement be amended, requiring the Allies to receive $ 3.95 per customer within the Allies' territories, and the $ 1 fee per customer would be **[*222]** dropped. Such offer to modify the Agreement in no way constituted rate making, because for such fee to become effective, SCANA had to agree to it within 90 days of the final award of the arbitrators. SCANA, by its affirmative action in accepting the offer of amendment as an alternative to the remedy, would itself exercise discretion to change the natural gas rates within the Allies' territories. The arbitrators **[***15]** accepted the Allies' Remedy No. 5 with the alternative offer of a remedy, which constituted an offer of contract modification made by the Allies to be accepted or rejected within 90 days of the arbitrators' award. The failure of SCANA to accept such offer of modification to the Agreement within 90 days of the arbitrators' award and its action to vacate the award caused such offer to lapse by its express terms, leaving the first part of Remedy No. 5 **[**554]** under the Agreement still in effect. Since SCANA has not chosen to accept such Agreement amendment and impose such rate, then SCANA is bound under the arbitrators' award to pay all fees and reimbursements to the Allies and to remove the $ 1 discriminatory charge on all gas customers within the Allies' territories.

Judgment affirmed in Case No. A03A0038. Judgment reversed in Case No. A03A0039. Johnson, P. J., and Mikell, J., concur.

HN6[] Tolling of Statute of Limitations, Discovery Rule

Cal. Civ. Code § 3426 of the California Uniform Trade Secrets Act rejects a continuing wrong approach to the statute of limitations but delays the commencement of the limitation period until an aggrieved person discovers or reasonably should have discovered the existence of misappropriation. If objectively reasonable notice of misappropriation exists, three years is sufficient time to vindicate one's legal rights.

HN7[] Legislation, Statute of Limitations

Under Cal. Civ. Code § 3426 of the California Uniform Trade Secrets Act, "continuing misappropriation" is the continuing use or disclosure of a trade secret after that secret was acquired by improper means or as otherwise specified in Cal. Civ. Code § 3426.1(b). Thus, for statute of limitations purposes, a continuing misappropriation is viewed as a single claim. Misappropriation does not give rise to multiple claims each time the trade secret is misused or improperly disclosed.

Trade Secrets Law > Civil Actions > Defenses > Statute of Limitations

Trade Secrets Law > Misappropriation Actions > General Overview

HN8[] **Legislation, Statute of Limitations**

A misappropriation within the meaning of *Cal. Civ. Code § 3426* of the California Uniform Trade Secrets Act occurs not only at the time of the initial acquisition of the trade secret by wrongful means, but also with each misuse or wrongful disclosure of the secret. However, a claim for misappropriation of a trade secret arises for a given plaintiff against a given defendant only once, at the time of the initial misappropriation, subject to the discovery rule provided in *§ 3426.6*. Each new misuse or wrongful disclosure is viewed as augmenting a single claim of continuing misappropriation, rather than as giving rise to a separate claim.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Misappropriation

Trade Secrets Law > Federal Versus State Law > Common Law

Trade Secrets Law > Misappropriation Actions > General Overview

HN13[] Business Torts, Unfair Business Practices

A continuing misappropriation of trade secrets is not necessarily a single claim. Rather, the claim must be divided in two if the continuing misappropriation took place partly before January 1, 1985: one common law claim for misappropriation occurring before that date, and one claim under *Cal. Civ. Code § 3426* of the California Uniform Trade Secrets Act for misappropriation occurring thereafter.

Torts > Procedural Matters > Multiple Defendants > General Overview

Trade Secrets Law > Misappropriation Actions > General Overview

Torts > Business Torts > Unfair Business Practices > General Overview

Trade Secrets Law > Civil Actions > General Overview

HN14[] Procedural Matters, Multiple Defendants

An act of continuing misappropriation of trade secrets constitutes more than one claim when multiple defendants are involved.

Trade Secrets Law > Misappropriation Actions > Elements of Misappropriation > Acquisition

HN20[] Civil Procedure, Remedies

Under *Cal. Civ. Code § 3426* of the California Uniform Trade Secrets Act, a trade secret infringer is not rewarded for its infringement with a license to use the infringed technology. Rather, a successful trade secret plaintiff is entitled to the full panoply of remedies, including injunctive relief against further misappropriation, *Cal. Civ. Code § 3426.2*, damages for actual loss, *Cal. Civ. Code § 3426.3*, and relief from unjust enrichment, *§ 3426.3*.

Headnotes/Summary

Summary
CALIFORNIA OFFICIAL REPORTS SUMMARY

A corporation in the field of integrated circuit design automation sued a competitor for misappropriation of trade secrets after its vice-president joined the competitor. The parties negotiated a settlement of the claims and signed a release. Thereafter, plaintiff sued defendant for misuse of the secrets occurring after the date of the release. The trial court ruled on summary judgment motions that all of the claims for postrelease misuse were barred by the release. (U.S. Dist. Ct. No. CV 95-20828.) On plaintiff's appeal, the Ninth Circuit Court of Appeals certified the following question to the California Supreme Court: Under the California Uniform Trade Secrets Act (UTSA) (*Civ. Code, § 3426*), when does a claim for trade secret infringement arise: only once, when the initial misappropriation occurs, or with each subsequent misuse of the trade secret? (Ninth Cir. U.S. Ct. App., Nos. 99-17648 and 99-17649.) The Supreme Court accepted the certification under Cal. Rules of Court, rule 29.5.

The Supreme Court held that a plaintiff's claim under the UTSA for misappropriation of a trade secret against a defendant arises only once, when the trade secret is initially misappropriated, and each subsequent use of disclosure of the secret augments the initial claim rather than arises as a separate claim. Under this interpretation of the UTSA, a trade secret infringer is not rewarded for its infringement with a license to use the infringed technology

after the parties settle a claim and execute a release. The parties to the release remain free to fashion the release as broadly or as narrowly as they choose, and a successful is entitled to the full panoply of remedies, including injunctive, damages for actual loss, and relief from unjust enrichment. (Opinion by Moreno, J., with Kennard, Acting C. J., Baxter, Chin, and Brown, JJ., Nares, J., * and Nott, J.,+ concurring.)

Unfair Competition § 7—Use of Trade Secrets—California Uniform Trade Secrets Acty—When Claim for Continuing Misappropriation Arises—Single or Multiple Claims.

--A plaintiff's claim under the California Uniform Trade Secrets Act (*Civ. Code, § 3426*) for misappropriation of a trade secret against a defendant arises only once, when the trade secret is initially misappropriated. Each subsequent use or disclosure of the secret does not give rise to a separate claim, but rather augments the initial claim. This interpretation is supported by *Civ. Code, § 3426.6*, the act's statute of limitations, which provides that "a continuing misappropriation constitutes a single claim." The drafters of that provision explicitly affirmed prior case law supporting this interpretation, and rejected the contrary view that each misappropriation gives rise to a separate claim. This provision, as well as the act's definition of "misappropriation" (*Civ. Code, § 3426.1, subd. (b)*), reveal a distinction between a "misappropriation" and a "claim." A "misappropriation" occurs not only at the time of the initial acquisition of the trade secret, but also with each misuse or wrongful disclosure of the secret. A "claim" for misappropriation arises against a given defendant only once, at the time of the initial misappropriation, with each new misuse or wrongful disclosure augmenting that single claim. In the context of a settlement and release of a claim, this interpretation does not effectively reward the defendant with a license to use the misappropriated technology after execution of the release or discourage parties from entering into such releases. The parties remain free to fashion the release as broadly or narrowly as they choose, and a successful plaintiff is entitled to the full panoply of remedies, including injunctive relief, damages for actual loss, and relief from unjust enrichment. **[****2]**

Opinion

[*217] MORENO, [*170] J.**

[647]** We granted the request for certification of the United States Court of Appeals for the Ninth Circuit pursuant to **[**648]** California Rules of Court, rule 29.5, to address the following question:

CA(1a)[] **(1a)** Under the California Uniform Trade Secrets Act (UTSA), *Civil Code, section 3426*, [1] when does a claim for trade secret infringement arise: only once, when the initial misappropriation occurs, or with each subsequent misuse of the trade secret?

CA(2)[] **(2)** (See fn. 2.) *CA(1b)*[] **(1b)** We conclude that in a plaintiff's action against the same defendant, the continued improper use or disclosure of a trade secret after defendant's initial misappropriation is viewed under the UTSA as part of a single claim of "continuing **[****3]** misappropriation" accruing at the time of the initial misappropriation. [2]

---

[*] Associate Justice of the Court of Appeal, Fourth Appellate District, Division One, assigned by the Acting Chief Justice pursuant to article VI, section 6 of the California Constitution.

[*] Associate Justice of the Court of Appeal, Second Appellate District, Division Two, assigned by the Acting Chief Justice pursuant to article VI, section 6 of the California Constitution.

[1] All statutory references are to the Civil Code unless otherwise indicated **[*218]** .

[2] Shortly before the filing of this opinion, we were informed by the parties to this case that they have settled the underlying litigation, although they do not seek dismissal of proceedings in this court. When parties settle a case after oral argument, we may nonetheless exercise our discretion to issue an opinion "to resolve the legal issues raised, which are of continuing public interest and are likely to recur." (*People v. Eubanks (1996) 14 Cal.4th 580, 584, fn. 2 [59 Cal. Rptr. 2d 200, 927 P.2d 310]*.) The certified question asks us to decide a general point of law regarding an aspect of California's trade secret statute. Accordingly, although the matter is apparently rendered moot, we exercise our discretion to resolve the legal question.

I. STATEMENT OF FACTS

The relevant facts, as stated in the Ninth Circuit's certification order to this court, are as follows:

Cadence Design Systems, Inc., and Avant! Corporation compete in the field of **[****4]** integrated circuit design automation. Both companies design "place and route" software, which enables computer chip designers to place and connect tiny components on a computer chip. Cadence formed in 1988 through the merger of several companies. Four senior employees left Cadence in 1991 to found Avant!, originally known as ArcSys.

In March 1994, Cadence vice-president Gerald Hsu resigned from Cadence to sign on with Avant!. Because Hsu possessed valuable business trade secrets and other confidential information, Cadence informed Hsu that it objected to his working at Avant!. Concerned that Hsu would reveal proprietary Cadence information when managing Avant!, Cadence sent Avant! a draft complaint naming Avant! and Hsu as defendants. Cadence alleged trade secret misappropriation and other causes of action. In negotiating a settlement of Cadence's claims, Cadence and Avant! apparently did not discuss Avant!'s alleged use of Cadence's Framework II (DFII) trade secret source code. [3]

[**5]** **[***171]** After extensive negotiations, in June 1994, the parties entered into a confidential settlement agreement (the Agreement or Release) that included a mutual general release, which provided in part:

"Cadence, [Avant!] and Hsu . . . hereby forever release and discharge each other . . . of and from any and all manner of action, claim or cause of **[*219]** action, in law or in equity, suits, debts, liens, contracts, agreements, promises, liabilities, demands, losses, damages, costs or expenses, including without limitation court costs and attorneys' fees, which they may have against each other at the time of the execution of this Agreement, known or unknown, including but not limited to any claims arising out of, or in connection with, or relating directly or indirectly to the following: Hsu's employment with Cadence, the cessation of Hsu's employment with Cadence, any wrongful termination of Hsu, any age or race discrimination by Cadence with respect to Hsu, any anticompetitive activity or unfair competition or trade secret misappropriation by Cadence, Hsu or [Avant!] with respect to Cadence, Hsu or [Avant!] with respect to Cadence, Hsu or [Avant!] . . . or any other actions taken by Cadence **[****6]** to with respect to Hsu or [Avant!] or by Hsu or [Avant!] with respect to Cadence."

The Agreement also contained in capital letters a waiver of *Civil Code section 1542* with the following language:

[649]** "THESE RELEASES EXTEND TO CLAIMS WHICH THE PARTIES DO NOT KNOW OR SUSPECT TO EXIST IN THEIR FAVOR, WHICH IF KNOWN BY THEM WOULD HAVE MATERIALLY AFFECTED THEIR DECISION TO ENTER INTO THIS RELEASE.

"In connection with such waiver and relinquishment, the Parties acknowledge that they are aware that, after executing this Agreement, they or their attorneys or agents may discover claims or facts in addition to or different from those which they now know or believe to exist . . . but that it is their intention hereby fully, finally and forever to settle and release all of the claims, matters, disputes and differences known or unknown, suspected or unsuspected, which now exist, may exist, or heretofore may have existed against each other in connection with the released matters. In furtherance of this intention, the release herein given shall be and remain in effect as a full and complete release notwithstanding the discovery or existence of any such additional or different **[****7]** claim or fact."

In the summer of 1995, a Cadence engineer discovered a "bug" (an error) in Avant!'s ArcCell software program that was similar to a bug he had inadvertently created several years earlier when writing source code for Cadence's DFII product. In December 1995, the Santa Clara County District Attorney executed a search of Avant!'s headquarters.

[3] Computer software programs are written in specialized languages called source code. The source code, which humans can read, is then translated into language that computers can read. The computer readable form, which operates on a binary system, is called object code.

Among the items seized was a log that showed line-by-line copying of Cadence source code in 1991 by a former Cadence employee and Avant! founder.

In December 1995, Cadence sued Avant! for theft of its copyrighted and trade secret source code and sought a preliminary order enjoining the sale of **[*220]** Avant!'s ArcCell and Aquarius products. In anticipation of trial, both sides filed cross-motions for partial summary judgment concerning the effect of the Release. Avant! argued that because Cadence had released all its claims existing at the time of the Release, any claims based on continuing or future misuse of trade secrets that were stolen prior to the **[***172]** date of the Release were now barred. Cadence maintained that the only claims it had released were those for misappropriation occurring before the effective date of the Release, and not claims **[****8]** to redress Avant!'s continuing or new misuses of its trade secrets after the date of the Release.

The federal district court ruled on these summary judgment motions on October 13, 1999. Reversing its initial order, the district court held that all of Cadence's trade secret claims for post-Release misuse of its DFII trade secrets taken before the Release were barred by the Release. Cadence now is appealing this decision to the Ninth Circuit. If the Release barred Cadence's claims existing at the time of the Agreement, but did not bar future claims, the question still remains: What claims existed at the time of the Agreement? Are all of Cadence's claims for Avant!'s trade secret misappropriation part of the same claim, or does each successive misuse of Cadence trade secret source code give rise to a separate claim? [4]

[**9]** II. DISCUSSION

Avant! argues that a cause of action for misappropriation of a given trade secret by a particular plaintiff against a particular defendant arises only once, when the trade secret is initially misappropriated. In support of this position, it relies in large part on the rationale set forth in *Monolith Portland Midwest Co. v. Kaiser Aluminum & Chem. Corp. (9th Cir. 1969) 407 F.2d 288* (*Monolith*), which applied the California common law of trade secrets. The *Monolith* court rejected the position exemplified by *Underwater Storage, Inc. v. United States Rubber Co. (1966) 125 U.S. App. D.C. 297, 371 F.2d 950*, "that the wrong is the adverse use of the secret disclosed **[**650]** in confidence; each use is a new wrong, and a continuing use is a continuing wrong. Underlying this theory is the concept that a trade secret is in the nature of property, which is damaged or destroyed by the adverse use . . . . California does not treat trade secrets as if they were property. It is the *relationship* between the parties at the time the secret is disclosed that is protected. (**[*221]** *Futurecraft Corp. v. Clary Corp. (1962) 205 Cal. App. 2d 279 [23 Cal.Rptr. 198]*.) **[****10]** The protected relationship, contractual or confidential, is one to which, as Mr. Justice Holmes observed, 'some rudimentary requirements of good faith' are attached. 'Whether the plaintiffs have any valuable secret or not the defendant knows the facts, whatever they are, through a special confidence that he accepted. The property may be denied, but the confidence cannot be. Therefore the starting point for the present matter is not property . . ., but that the defendant stood in confidential relations with the plaintiffs . . . .' (*E. I. Du Pont de Nemours Powder Co. v. Masland (1917) 244 U.S. 100, 102 [61 L. Ed. 1016, 37 S. Ct. 575, 1917 Dec. Comm'r Pat. 426]*.) *The fabric of the relationship once rent is not torn anew with each added use or disclosure, although the damage suffered may thereby be aggravated. The cause of action arises but once* . . . ." (*Monolith, supra, 407 F.2d at p. 293*, italics added.)

On the other hand, Cadence asserts that the UTSA, which as discussed below was adopted by California in 1984, changed the common law view typified by *Monolith*, and now views trade secrets as property rather than simply as the protection of a **[***173]** confidential **[****11]** relationship. It further reasons that because trade secret

[4] In the present case, it is unclear from the above facts whether the acquisition of the trade secret was itself improper and therefore a misappropriation, or whether the subsequent use of the secret was the initial misappropriation. In any case, the parties agree that Avant! had both acquired and used the trade secret prior to signing the Release. We will assume for purposes of addressing the certified question that the initial misappropriation occurred with the first use of the secret and will, for purposes of this case, equate "initial misappropriation" with "initial use."

misappropriation is the wrongful taking or use of protected property, *each* new use represents a new claim of misappropriation. As will be discussed, neither Cadence's nor Avant!'s position is entirely correct.

In order to answer the certified question, we must examine the pertinent language of the UTSA. As the Court of Appeal explained in *Glue-Fold, Inc. v. Slautterback Corp. (2000) 82 Cal.App.4th 1018, 1023 [98 Cal. Rptr. 2d 661]* (*Glue-Fold*), the UTSA "was approved by the National Conference of Commissioners on Uniform State Laws in 1979 and adopted without significant change by California in 1984. (14 West's U. Laws Ann. (1990) U. Trade Secrets Act, p. 433; Stats. 1984, ch. 1724, § 1, pp. 6252-6253.)" (Fn. omitted.) Section 3426.1 defines certain key terms of the UTSA. ***HN1***[] "Trade secret" is defined as "information, including a formula, pattern, compilation, program, device, method, technique, or process, that: [P] (1) Derives independent economic value, actual or potential, from not being generally known **[****12]** to the public or to other persons who can obtain economic value from its disclosure or use; and [P] (2) Is the subject of efforts that are reasonable under the circumstances to maintain its secrecy." (*§ 3426.1, subd. (d)*.)

HN2[] "Misappropriation" is defined as "(1) Acquisition of a trade secret of another by a person who knows or has reason to know that the trade secret was acquired by improper means; or [P] (2) Disclosure or use of a trade secret of another without express or implied consent by a person who: [P] (A) Used improper means to acquire knowledge of the trade secret; or [P] **[*222]** (B) At the time of disclosure or use, knew or had reason to know that his or her knowledge of the trade secret was: [P] (i) Derived from or through a person who had utilized improper means to acquire it; [P] (ii) Acquired under circumstances giving rise to a duty to maintain its secrecy or limit its use; or [P] (iii) Derived from or through a person who owed a duty to the person seeking relief to maintain its secrecy or limit its use; or [P] (C) Before a material change of his or her position, knew or had reason to know that **[****13]** it was a trade secret and that knowledge of it had been acquired by accident or mistake." (*§ 3426.1, subd. (b)*.)

HN3[] "Improper means" is defined to "include[] theft, bribery, misrepresentation, breach or inducement of a breach of a duty to maintain secrecy, or espionage through electronic or other means. Reverse engineering or independent derivation alone shall not be considered improper means." (*§ 3426.1, subd. (a)*.)

CA(3)[] **(3)** Thus, ***HN4***[] the legal protection accorded trade secrets is fundamentally different from that given to patents, in which the patent owner acquires a limited term monopoly over the **[**651]** patented technology, and use of that technology by whatever means infringes the patent. The owner of the trade secret is protected only against the appropriation of the secret by improper means and the subsequent use or disclosure of the improperly acquired secret. There are various legitimate means, such as reverse engineering, by which a trade secret can be acquired and used. (See 2 Callman, The Law of Unfair **[****14]** Competition, Trademarks, and Monopolies (1981) § 14.01, p. 14-6; *id*., § 14.15, p. 14-102.)

CA(1c)[] **(1c)** The most critical section of UTSA for purposes of this case is section 3426.6, which provides: ***HN5***[] "An action for misappropriation must be brought within three years after the misappropriation is discovered or by the exercise of reasonable diligence should have been discovered. *For the purposes of this section, a continuing misappropriation constitutes a single claim*." (Italics added.)

[*174]** As the Court of Appeal recognized in *Glue-Fold, supra, 82 Cal. App. 4th at pages 1023-1024*, "[s]ection 3426.6 is derived almost verbatim from section 6 of the Uniform Act as originally drafted. (See 14 West's U. Laws Ann., *supra*, U. Trade Secrets Act, com. to § 6, p. 462.) It is therefore appropriate to accord substantial weight to the commissioners' comment on the construction of what is now section 3426.6. [Citations.] [P] THAT COMMENT IS: 'There presently is a conflict of authority as to whether trade secret misappropriation is a continuing wrong. *Compare* *Monolith Portland Midwest Co. v. Kaiser Aluminum & Chemical Corp., 407 F.2d 288* **[****15]** (CA9, 1969) (not a **[*223]** continuing wrong under California law--limitation period upon all recovery begins upon initial misappropriation) with *Underwater Storage, Inc. v. U.S. Rubber Co., 125 U.S. App. D.C. 297, 371 F.2d 950* (CADC, 1966) . . . (continuing wrong under general principles--limitation period with respect to a specific act of misappropriation begins at the time that the act of misappropriation occurs). [P] ***HN6***[] This Act rejects a continuing wrong approach to the statute of limitations but delays the commencement of the limitation period until an aggrieved person discovers or reasonably should have discovered the existence of misappropriation. If objectively reasonable notice of misappropriation exists, three years is sufficient time to vindicate one's legal rights.' (14 West's U. Laws Ann., *supra*, U. Trade Secrets Act, com. to § 6, p. 462.)" (Fns. omitted.)

The UTSA does not define the term "continuing misappropriation," but its meaning appears evident in light of the definition of "misappropriation."***HN7***[] **[****16]** It is the continuing use or disclosure of a trade secret after that secret was acquired by improper means or as otherwise specified in *section 3426.1, subdivision (b)*. Thus, for statute of limitations purposes, a continuing misappropriation is viewed as a single claim. The drafters of the UTSA explicitly affirmed *Monolith* and rejected the contrary view that misappropriation gives rise to multiple claims each time the trade secret is misused or improperly disclosed.

From our examination of the above statutes, a distinction between a "misappropriation" and a "claim" emerges. ***HN8***[] A *misappropriation* within the meaning of the UTSA occurs not only at the time of the initial acquisition of the trade secret by wrongful means, but also with each misuse or wrongful disclosure of the secret. But a *claim* for misappropriation of a trade secret arises for a given plaintiff against a given defendant only once, at the time of the initial misappropriation, subject to the discovery rule provided in *section 3426.6*. Each new misuse or wrongful disclosure is viewed as augmenting a single claim of continuing **[****17]** misappropriation rather than as giving rise to a separate claim.

Cadence makes much of the language in *section 3426.6* that states, "[*f*]*or the purposes of this section*, a continuing misappropriation constitutes a single claim." (Italics added.) Based on that language, Cadence argues that a continuing misappropriation constitutes a single claim only for statute of limitations purposes. This argument cannot withstand scrutiny. The certified question asks when a *claim* for trade secret infringement arises. The term "claim" does not have some theoretical meaning apart from the context in which it is used. In the present case, the certified question is asked in the context of a release, which is intended to settle or prevent litigation. Therefore, ***HN9***[] "claim" must be defined **[**652]** in the context of litigation. If "continuing **[*224]** misappropriation" is viewed as a single claim for statute of limitations purposes (see *Glue-Fold, supra, 82 Cal. App. 4th at pp. 1026-1028* **[***175]**), then it is difficult to fathom how it could be treated as more than one claim for purposes of litigation generally. For example, a plaintiff could **[****18]** not legitimately plead separate claims of misappropriation for each misuse of a trade secret, for to do so would impermissibly evade the statute of limitations. Nor can it be asserted that ***HN10***[] separate "claims" accruing at different times can have the same limitations period, because that position is contrary to the rule that ***HN11***[] each civil action possesses its own statutorily prescribed limitations period. (See *Code Civ. Proc., § 312*.) The only other alternative is to hold that the term "claim" means one thing in the context of litigation and something else in the context of releases. There is no indication the Legislature intended this kind of inconsistency.

In fact, the phrase "for purposes of this section" can plausibly be explained as a means of contrasting *section 3426.6* with *section 3426.10*, the only other section to refer to "continuing misappropriation." THAT SECTION STATES:***HN12***[] **[****19]** "This title does not apply to misappropriation occurring prior to January 1, 1985. If a *continuing misappropriation* otherwise covered by this title began before January 1, 1985, this title does not apply to the part of the misappropriation occurring before that date. This title does apply to the part of the misappropriation occurring on or after that date unless the appropriation was not a misappropriation under the law in effect before the operative date of this title." (*§ 3426.10*, italics added.) In other words, ***HN13***[] for purposes of *section 3426.10*, a continuing misappropriation is not necessarily a single claim. Rather, the claim must be divided in two if the continuing misappropriation took place partly before January 1, 1985--one common law claim for misappropriation occurring before that date, and one UTSA claim for misappropriation occurring thereafter. Indeed, if each misappropriation constituted a single claim, all that *section 3426.10* would have had to have said is: This title does not apply to misappropriation occurring prior to January 1, 1985. There would be no need to refer **[****20]** to continuing misappropriation because, according to Cadence's theory, that concept does not exist outside the statute of limitations section and it would have been meaningless to refer to "the part of the misappropriation occurring on or after that date." (*Ibid.*)

Another occasion in which ***HN14***[] an act of continuing misappropriation may be said to constitute more than one claim is when multiple defendants are involved. For example, in *PMC, Inc. v. Kadisha (2000) 78 Cal.App.4th 1368 [93 Cal. Rptr. 2d 663]*, officers, directors, and investors of a corporation were sued personally for a trade secret misappropriation initiated before their involvement in the corporation. They sought summary judgment in part on the grounds that they could not be held liable because the initial misappropriation had occurred before they assumed their positions. The Court of **[*225]** Appeal rejected that position, reasoning that ***HN15***[] the definition of misappropriation includes disclosure or use of a trade secret by persons **[****21]** who knew or had reason to know that the trade secret was acquired by improper means. (*Id. at p. 1382*, citing *§ 3426.1, subd. (b)(2)(B)(i)-(ii)*.) But Cadence's assertion that *Kadisha* advances its position is incorrect. That case holds only that ***HN16***[] there may be separate claims of continuing misappropriation among *different* defendants, with differing dates of accrual and types of tortious conduct--some defendants liable for initial misappropriation of the trade secret, others only for later continuing use. This holding does not conflict with our conclusion that there is only a single UTSA claim against a **[***176]** single defendant misappropriating a single plaintiff's trade secret.

Cadence cites *Penal Code section 499c*, providing criminal penalties for theft of trade secrets, in support of its argument. It quotes the noncodified statutory purpose of that statute as, in part, "to make clear that articles representing trade secrets, including the trade secrets represented thereby, constitute goods, chattels, materials and property and can be the subject **[****22]** of criminal acts." (Stats. 1967, ch. 132, § 1, p. 1163.) Avant!'s arguments notwithstanding, it appears indisputable that trade secrets are a form of **[**653]** property. But ***HN17***[] the nature of the property interest and the means by which the interest can be vindicated are matters of state law. ***HN18***[] The UTSA defines an act of continuing misappropriation for litigation purposes as a single claim.

Cadence cites *Remington Rand Corporation v. Amsterdam-Rotterdam Bank, N.V. (2d Cir. 1995) 68 F.3d 1478, 1485*, in which the court, considering a release similar to the one at issue here, concluded the release did not shield defendants from liability for continuing wrongful use of trade secrets after the date of the release. The case was decided under either New York or New Jersey law. (*Remington Rand Corp., 68 F.3d at p. 1483, fn. 2* [acknowledging uncertainty as to which state law applied].) Neither of these states has adopted the UTSA. (14 West's U. Laws Ann. (2002 supp.) U. Trade Secrets **[****23]** Act, p. 128.) Moreover, the court did not analyze the relevant state statutes, and it is unclear whether its conclusion was based on statutory interpretation or interpretation of the intent of the parties to the release. It is therefore not persuasive authority for holding that each new trade secret misuse in California gives rise to a separate claim.

Cadence also cites federal case law holding that each act of patent infringement gives rise to a separate cause of action. (*Augustine Medical, Inc. v. Progressive Dynamics, Inc. (Fed. Cir. 1999) 194 F.3d 1367, 1371*.) Again, this case law has little relevance to the question presented. Although there are similarities between trade secret and patent law, there are also significant differences discussed above. Quite apart from these differences, our conclusion in the present case does not rest on reasoning from general principles of **[*226]** intellectual property law, but rather on the construction of the specific statutory language of the UTSA. Nor is there any indication that the UTSA was patterned after patent law. [5]

[**24]** Cadence also argues that viewing Avant!'s continuing misappropriation as a single claim effectively rewards Avant! with a license to use the misappropriated technology and to discourage parties from entering into releases in the future. But however the UTSA defines a trade secret claim, ***HN19***[] parties to a release in a trade secret dispute remain free to fashion the release **[***177]** as broadly or narrowly as they choose. Moreover, ***HN20***[] under our interpretation of the USTA, a trade secret infringer is by no means rewarded for its infringement with a license to use the infringed technology. Rather, a successful trade secret plaintiff is entitled to the full panoply of

[5] Patent law has no equivalent to *section 3426.6*. The limitations on patent actions set forth in *35 United States Code section 286* differ considerably from *section 3426.6*. It provides in pertinent part: "Except as otherwise provided by law, no recovery shall be had for any infringement committed more than six years prior to the filing of the complaint or counterclaim for infringement in the action." (*35 U.S.C., § 286*.) "This provision has been said not to constitute a 'statute of limitations' in the usual sense of the term, in that *35 U.S.C. section 286* does not say that no suit shall be maintained. . . . The limitation contained in the *35 U.S.C. section 286* . . . does not bar infringement actions, but merely limits recovery of damages to infringements occurring during the six years preceding any damages action brought." (Rosenberg, 3 Patent Law Fundamentals (rev. 2d ed. 2001) § 17.06 [1][d], p. 17-100.) The federal statute does not employ "continuing misappropriation" or any equivalent concept.

remedies, including injunctive relief against further misappropriation (*§ 3426.2*), damages for actual loss (*§ 3426.3*), and relief from unjust enrichment (*ibid.*). [6]

[**25]** Our answer to the certified question is narrow. As stated, we do not accept Avant!'s position, at least stated in its strongest form, **[**654]** that only the initial misappropriation of a trade secret via the breach of a confidential relationship constitutes misappropriation--the UTSA plainly states otherwise. The potential damages encompassed by a continuing misappropriation claim may expand with each illicit use or disclosure of the trade secret. Nor do we address how the parties intended to define the term "claim" in the present release. All we decide is that the UTSA views a continuing misappropriation of a trade secret of one party by another as a single claim.

[*227] III. CONCLUSION

We conclude that a plaintiff's claim for misappropriation of a trade secret against a defendant arises only once, when the trade secret is initially misappropriated, and each subsequent use or disclosure of the secret augments the initial claim rather than arises as a separate claim.

Kennard, Acting C. J., Baxter, J., Chin, J., Brown, J., Nares, J., [*] and Nott, J., [*] concurred.

End of Document

---

[6] Cadence also cites in support of its position a letter from Assemblyman Elihu Harris, the sponsor of the UTSA, to Governor Deukmejian urging him to sign Assembly Bill No. 501 (1983-1984 Reg. Sess.), the UTSA, in order to bring "clarity and uniformity into this important area of law." (Assemblyman Harris, letter to Governor Deukmejian, Sept. 12, 1984, p. 2.) From this and other general statements in that letter, Cadence wishes to deduce a general policy of strengthening trade secret protection that would lead to support of its position. We are not persuaded. We do not discern how these general statements have any particular bearing on the certified question. Moreover, even if we assume that the UTSA was generally intended to strengthen trade secret protection (a point Avant! disputes), nothing we say in the present opinion vitiates such protection, as discussed immediately above.

HN1[] **Discovery, Methods of Discovery**

Under *Fed. R. Civ. P. 56(c)*, summary judgment is appropriate if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no issue as to any material fact, and that the moving party is entitled to judgment as a matter of law.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN2[] **Summary Judgment, Burdens of Proof**

On a motion for summary judgment, the moving party may discharge its burden by showing that there is an absence of evidence to support the nonmoving party's case. The nonmoving parties cannot rest on their pleadings, and must show the court that there is a genuine issue for trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3[] **Summary Judgment, Entitlement as Matter of Law**

In considering a motion for summary judgment the court must construe the facts in the light most favorable to the nonmoving party.

HN4[] **Types of Contracts, Settlement Agreements**

In interpreting a settlement agreement, the court is guided by general rules of contract construction and must first resort to the contract language to determine the intention of the parties. Only if the terms remain ambiguous after such an examination will the court turn to extrinsic evidence.

Civil Procedure > ... > Justiciability > Ripeness > General Overview

HN5[] **Justiciability, Ripeness**

According to the United States Court of Appeals for the Sixth Circuit, a plaintiff's right of action accrues when the plaintiff knows or has reason to know of the injury which is the basis of his action. This is to say that all the events necessary to establish a claim must have occurred such that a suit may be successfully maintained on a particular cause of action.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN6[] Monopolies & Monopolization, Actual Monopolization

In the context of a continuing scheme to violate the antitrust laws, a cause of action accrues to the plaintiff each time the defendant engages in conduct that harms the plaintiff. The repeated violation of a plaintiff's interests by a continuing antitrust violation would likely make it appropriate to reach back beyond the date of a settlement agreement to completely understand the breadth and reach of the violation as it continued to accrue after the agreement. This is to say that simply because certain incidents of a continuing violation accrued prior to a cut-off date imposed, somewhat artificially, by a settlement agreement or other such device, the court would not necessarily be amiss in considering them where the antitrust wrong continued to accrue after that date.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Actual Monopolization, Anticompetitive & Predatory Practices

Causes of action for monopolization arise upon (1) certain conditions, i.e., a defendant's possession of "monopoly power" or possession of sufficient market power that there is a dangerous probability of the defendant attaining monopoly power, and (2) where the party has acquired that power through willful conduct, i.e., unlawful predicate acts (as distinguished from acquiring that power as a consequence of a superior product, business acumen or historical accident). A party cannot be liable for attempted monopolization under *§ 2* of the Sherman Act, codified at *15 U.S.C.S. § 2*, absent proof of a market and specific intent to monopolize.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Real Property Law > Ownership & Transfer > Public Entities

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN10[] **Monopolies & Monopolization, Actual Monopolization**

Under the Sherman Act, where a defendant allegedly acquires or maintains monopoly power, the commission of the unlawful predicate act must either itself establish monopoly power or occur at a time when the defendant already possesses monopoly power. Where the defendant allegedly attempts to monopolize, the predicate act must occur at a time when the defendant is dangerously close to establishing monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN11[] **Monopolies & Monopolization, Actual Monopolization**

It is axiomatic that a firm cannot monopolize a market in which it does not compete, and it is imperative to understand which market is addressed in order to measure a defendant's ability to lessen or destroy competition. In order to determine the relevant product market, one must utilize the "reasonable interchangeability" standard. This is to say, one must identify those products or services that are either (1) identical to or (2) available substitutes for the defendant's product or service. The United States Court of Appeals for the Sixth Circuit teaches that reasonable interchangeability may be gauged by (1) the product uses, i.e., whether the substitute products or services can perform the same function, and/ or (2) consumer response (cross-elasticity); that is, consumer sensitivity to price levels at which they elect substitutes for the defendant's product or service.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN12[] **Monopolies & Monopolization, Actual Monopolization**

On a monopolization claim under the Sherman Act, in defining a relevant product market, the goal is to delineate markets which conform to areas of effective competition and to the realities of competitive practice. So it is that in measuring the relevant product market, one may also utilize the submarket criteria as taught in Brown Shoe Co. v. United States: A submarket may be determined by examining such practical indicia as (1) industry or public recognition of the submarket as a separate economic entity, (2) the product's peculiar characteristics and uses, (3) unique production facilities, (4) distinct customers, (5) distinct prices, (6) sensitivity to price changes, and (7) specialized vendors.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN13[] **Private Actions, Remedies**

Antitrust plaintiffs must prove an antitrust injury of the type that the antitrust laws were intended to prevent and that flows from that which makes a defendant's acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN14[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Low prices which remain above predatory levels do not constitute an antitrust injury because they benefit consumers regardless of how they are set. "Predatory pricing" becomes actionable where the defendant prices its products below the cost of producing them for the purpose of driving its competitors out of business so that the defendant may then raise prices to anticompetitive levels and recoup its past losses. Where the defendant's prices are below the "average variable costs" of producing the product, a prima facie case of predatory pricing is established and the burden shifts to the defendant to show that the pricing was justified. Where the pricing is above "average variable costs" but below the defendant's "total costs" it is presumed that the pricing scheme is not predatory and the plaintiff may not prevail absent detailed and convincing economic analysis establishing a clear correlation between the pricing scheme and an untimely anticompetitive result. When the defendant's prices are above the "average total costs" of producing the product; a claim for predatory pricing will not survive.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN15[] **Private Actions, Remedies**

To be actionable under antitrust statutes, the defendant's actions must harm competition-not just one competitor in the form of mere economic injury. According to the United States Court of Appeals for the Sixth Circuit, the antitrust plaintiff must show (1) that the alleged violation tends to reduce competition in some market and (2) that the plaintiff's injury would result from a decrease in that competition rather than from some other consequence of the defendant's actions. Failure to allege an injury to competition is reason enough to dismiss an antitrust claim.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN16[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Entry of new competitors to a market proves the existence of a competitive market and the absence of barriers to entry.

Antitrust & Trade Law > Consumer Protection > False Advertising > General Overview

HN17[] **Consumer Protection, False Advertising**

The Lanham Act serves to protect harm to a plaintiff's commercial interests caused by a competitor's false statements.

HN18[] **False Designation of Origin, Elements of False Designation of Origin**

See *15 U.S.C.S. § 1125(a)(1)(B)*.

Antitrust & Trade Law > Consumer Protection > False Advertising > General Overview

Torts > ... > Defamation > Defenses > Fair Comment & Opinion

HN19[] **Consumer Protection, False Advertising**

To recover for a claim of "false advertising" under the Lanham Act, a plaintiff must show that (1) the defendant made a false or misleading statement of fact concerning his own product or another's; (2) the statement actually deceived or tended to deceive a substantial portion of the intended audience; (3) the statement was "material" in that it will likely influence the deceived customer's purchasing decisions; (4) the statement was introduced into interstate commerce; and (5) there is a causal link between the statement and harm to the plaintiff. To be actionable, a statement must be a "statement of fact," in other words a specific and measurable claim, capable of being proved false. Thus, a statement of fact can be adjudged true or false through empirical verification. Neither statements of opinion nor "puffing statements" are actionable. "Puffing" is a claim of general superiority or an exaggerated blustering or boasting statement.

Antitrust & Trade Law > Consumer Protection > False Advertising > General Overview

HN20[] **Consumer Protection, False Advertising**

Where a false or misleading statement is literally false, the plaintiff does not need to establish proof that consumers were actually deceived by the statements in order to recover under the Lanham Act, but such deception is presumed from the literal falsity. If the factual statement is literally true or too ambiguous to be literally false, it is not actionable unless it is also misleading and actually deceives customers. Further, when construing the allegedly false or misleading statement to determine if it is actionable under section 43(a) of the Lanham Act, the statement must be viewed in the light of the overall context in which it appears.

Antitrust & Trade Law > Consumer Protection > False Advertising > General Overview

HN21[] **Consumer Protection, False Advertising**

When a defendant has buttressed a claim of superiority by attributing it to the results of scientific testing, a plaintiff must prove only that the tests relied upon were not sufficiently reliable to permit one to conclude with reasonable certainty that they established the proposition for which they were cited. To ensure vigorous competition and to protect legitimate commercial speech, courts applying this standard should give advertisers a fair amount of leeway, at least in the absence of a clear intent to deceive or substantial consumer confusion.

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > Infringement Actions > General Overview

Patent Law > Ownership > General Overview

Patent Law > Ownership > Conveyances > General Overview

Business & Corporate Compliance > ... > Ownership > Conveyances > Assignments

HN22[] **Justiciability, Standing**

Federal statute provides that only a patentee has a remedy by civil action for patent infringement. *35 U.S.C.S. § 281*. "Patentee" is defined as the person to whom the patent issued and his or her successors in title. *35 U.S.C.S. § 100(d)*. Thus, the statute limits standing in a patent infringement case to a party holding legal title to the patent at the time of infringement. As it is axiomatic that one cannot grant what does not belong to oneself, a basic principle applying with full force to patents, "legal title" to the patent at the pertinent time must be established in order to establish standing to seek remedy for patent infringement. A conveyance of legal title by the patentee can be made only of the entire patent, an undivided part or share of the entire patent, or all rights under the patent in a specified geographical region of the United States. In the first and third cases, the assignee may sue in its name alone; in the second case, it may sue jointly with the assignor. A transfer of any of these is an assignment and vests the assignee with title in the patent, and a right to sue infringers, but any less of a transfer is not an assignment of legal title but a mere license giving the licensee no right to sue for infringement at law in the licensee's own name.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN23[] **Preclusion of Judgments, Res Judicata**

The doctrine of claim preclusion or "true" res judicata teaches that parties are precluded from advancing in a new action all claims or defenses that were or could have been raised in a prior proceeding in which the same parties or their privies were involved, and that resulted in a judgment on the merits. Claim preclusion serves not only to bar parties from relitigating issues that were actually litigated but also to prevent from relitigating issues that could have been raised in an earlier action.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Patent Law > Infringement Actions > Prosecution History Estoppel > General Overview

Patent Law > Preclusion > Res Judicata

HN24[] **Preclusion of Judgments, Res Judicata**

Claim preclusion in patent infringement cases is defined as a valid and final judgment rendered in an action extinguishing the plaintiff's claims pursuant to the rules of merger and bar. The claim extinguished includes all rights of the plaintiff to remedies against the defendant with respect to all or any part of the transaction or series of connected transactions out of which the action arose. Thus, the court must first focus on whether the second suit rests upon the same transactional facts as the first suit.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN25[] **Preclusion of Judgments, Res Judicata**

For the purposes of a claim preclusion determination, dismissal with prejudice is a final adjudication on the merits.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Patent Law > Infringement Actions > Prosecution History Estoppel > General Overview

Patent Law > Preclusion > Res Judicata

HN26[] **Preclusion of Judgments, Res Judicata**

The United States Court of Appeals for the Federal Circuit teaches that, in determining the application of claim preclusion in a patent case, the requirement of the same transactional facts is satisfied when the devices at issue in the second suit are essentially the same as the device(s) at issue in the first suit.

Patent Law > Infringement Actions > Doctrine of Equivalents > General Overview

HN27[] **Infringement Actions, Doctrine of Equivalents**

The doctrine of equivalents prevents infringers from creating the infringing product with only insubstantial changes to avoid directly replicating the exact claims of the patent and to disingenuously avoid the prohibitions of the patent laws.

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Offers to Sell & Sales

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN28[] **Infringing Acts, Offers to Sell & Sales**

One who offers to sell the patented invention within the United States during the term of the patent infringes the patent. *35 U.S.C.S. § 271(a)*. Once a patent expires, there is no longer a patent to infringe.

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN29[] **Infringement Actions, Infringing Acts**

Title *35 U.S.C.S. § 271(i)* provides that an "offer for sale" or "offer to sell" by a person other than the patentee, or any designee of a patentee, is that in which the sale will occur before the expiration of the term of the patent. *35 U.S.C.S. § 271 (i)*

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN30[] **Estoppel, Collateral Estoppel**

It is taught that issue preclusion applies: (1) when the issue presently asserted was actually litigated in an earlier trial, (2) when it was actually and necessarily determined by a court of competent jurisdiction, and (3) when preclusion in the second trial does not work an unfairness.

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Making & Manufacturing Infringement

International Trade Law > General Overview

Patent Law > Infringement Actions > Infringing Acts > Intent & Knowledge

Patent Law > Infringement Actions > Infringing Acts > General Overview

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Offers to Sell & Sales

HN31[] **Infringing Acts, Making & Manufacturing Infringement**

The right conferred by a patent under United States law is confined to the United States and its territories, and infringement of this right cannot be predicated on acts wholly done in a foreign country. This is not to say, however, that certain actions taken within the United States cannot lead to liability for patent infringement for an infringing product otherwise made, used, or sold outside of the United States. Title *35 U.S.C.S. § 271(a)* is intended to prevent infringers from generating interest in a potential infringing product to the commercial detriment of the rightful patentee. In order to prevail on such a theory of patent infringement, plaintiffs must demonstrate that there was (1) an offer to sell made in the United States, a violation of *§ 271(a)*, *(2)* that the defendant supplied or caused to be supplied in or from the United States a substantial portion of the components of the patented invention in violation of *§ 271(f)(1)*, or *(3)* that the defendant supplied or caused to be supplied in or from the United States a component of the patented invention that is especially made or adopted for use in the invention and is not a staple article or commodity of commerce suitable for non-infringing use per *§ 271(f)(2)*.

Contracts Law > Contract Formation > Offers > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > Infringement Actions > General Overview

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN32[] **Contract Formation, Offers**

The offer to sell a patented invention would need to be accomplished within the United States in order to fall under the blanket of protection afforded by *35 U.S.C.S. § 271(a)*. Such a sale would require the traditional commercial offer for a sale under contract law, or communicate to the offeree a manifestation of willingness to enter into a bargain, so made as to justify another person in understanding that his assent to that bargain is invited and will conclude it. This is to say that directing such communications and other marketing materials from within the United States is not necessarily excluded as an offer for sale within the meaning of *§ 271(a)*. However, mere visits by other parties would be insufficient to evidence an extension of the requisite commercial offer by the defendant to sell any infringing product during these visits by overseas representatives and their clients.

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Offers to Sell & Sales

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN33[] **Infringing Acts, Offers to Sell & Sales**

An offer to sell a component of a patented invention is not, as a matter of law, an offer to sell the patented invention.

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN34[] **Infringement Actions, Infringing Acts**

See *35 U.S.C.S. § 271(f)(1)*.

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN35[] **Infringement Actions, Infringing Acts**

The language of *35 U.S.C.S. § 271(f)(1)* speaks in terms of "components" (plural) that are combined or are to be combined as opposed to the language of *§ 271(f)(2)* which imposes liability in connection with certain supplies of a singular "component."

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN36[] **Infringement Actions, Infringing Acts**

Courts have interpreted the language of *35 U.S.C.S. § 271 (f)(1)* narrowly in order to avoid giving extraterritorial effect to otherwise domestic patent protection.

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN37[] Infringement Actions, Infringing Acts

Recognizing the tension between providing protection for patented inventions and avoiding extraterritorial effect of United States patent law, the United States District Court for the Eastern District of Kentucky, Lexington Division is convinced that exporting a single component of a patented invention abroad will not rise to the level of providing "a substantial portion of the patented invention."

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Making & Manufacturing Infringement

Patent Law > Infringement Actions > Infringing Acts > General Overview

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Use

HN38[] Infringing Acts, Making & Manufacturing Infringement

Title *35 U.S.C.S. § 271(f)(2)* creates liability for infringement if one supplies any component of a patented invention that is especially made or especially adapted for use in the invention and not a staple article or commodity of commerce suitable for substantial non-infringing use. *35 U.S.C.S. § 271(f)(2)*. To establish that the article is a staple article or commodity of commerce suitable for substantial non-infringing use, the plaintiff must have proof that the article has no use except in the patented invention.

Opinion

[*713] MEMORANDUM [2] OPINION AND ORDER**

This action is before the Court on Defendant's motions. First, the Court will consider the defendant's Renewed Motion for Partial Summary Judgment Regarding Claims Accruing Before May 20, 1999 [Record No. 342]. Plaintiffs have responded [Record No. 363], to which Defendant has replied [Record No. 365]. The Court will also consider Defendant's Motion for Summary Judgment [Record No. 350]. Plaintiffs have responded [Record No. 363] and Defendant has replied [Record No. 365]. These matters are now ripe for decision.

FACTUAL BACKGROUND

Plaintiffs FieldTurf, Inc. and FieldTurf International, Inc. ("FieldTurf") and Defendant Southwest Recreational Industries, Inc. ("Southwest") are competitors in the artificial turf market. The artificial, carpet-like surfaces made by these parties and other competitors have shown themselves to be useful alternatives to natural grass surfaces and include both "conventional" (knitted nylon surfaces) and "filled" turf systems (tufted polyolefin surfaces with granular top-dressing). These systems are used in a variety of settings in the sporting world, including golf, soccer, football, and baseball facilities.

Plaintiffs **[**3]** manufacture a product called FieldTurf(R). [1] Defendant Southwest Recreational Industries, Inc. ("Southwest") manufactures, sells, and installs several artificial turf systems, including AstroPlay(R). [2] Both of these products are filled turf systems.

[4]**

1. United States Patent No. 4,337,283

In the early 1970s, a professional golfer-turned-inventor, Frederick T. Haas, developed a product he called "Mod-Sod," a "filled" turf system using an infill of sand and cork and a pile fabric available in the market at that time. This combination of goods was later patented as U.S. Patent No. 4,337,283 (the " '283 Patent").

The patent application for the invention that would eventually be embodied in the '283 Patent was filed on September 11, 1980, by Haas, for a "synthetic turf playing surface with [a] resilient top-dressing." [3] **[*714]** On December 29, 1980, Haas assigned the patent to "Mod-Sod Sports Surfaces, a partnership consisting of Frederick T. Haas, Jr., Rebecca Ann Bain[,] Haas Cloudman, Frederck T. Haas, III, and Michael Howard Haas" ("Mod-Sod").

---

[1] Plaintiffs allege that their product, FieldTurf(R), embodies the claims of U.S. Patent No. 4,337,283 and is, in keeping therewith, a playing surface for athletic games, comprising a firm, stable subsurface, blades of synthetic grass tufted to a uniform height, and having a specially-mixed infill composed of resilient material and specially graded silica sand. The history of this patent and its subsequent assignment and licensing is recited hereinbelow.

[2] Southwest entered the sports surfacing business as a manufacturer and installer of running tracks in 1984, later expanding into the artificial turf business by first acquiring the rights and assets in the United States for a well-known conventional turf system, AstroTurf(R), from Balsam AG and its American subsidiary in a bankruptcy sale. In 1994, Southwest began developing a "filled" turf product, later marketed as AstroPlay(R), placing a layer of granulated rubber against a carpet backing and trapping it there, so that it could not be displaced by the sand also contained in the product over time, preventing the sand from compacting. Curled nylon fibers were sewn into the carpet backing, and the nylon "root zone" fibers held the rubber particles in place. Defendant subsequently modified the specifications of some AstroPlay(R) systems such that they contained no sand, only granulated rubber. The AstroPlay(R) "filled" systems are marketed with the option of an underlying shock-absorbing pad.

[3] Claim 1 of the '283 Patent defines the patented invention as a "playing surface for athletic games comprising: (a) a firm, stable subsurface; (b) a pile fabric having a flexible backing and normally upstanding pile elements resembling grass; the length of said pile elements being substantially uniform and lying in the range from 1/2 to 2 inches; and (c) a compacted top-dressing layer comprising a mixture of from 25 to 95 volume percent resilient particles and from 5 to 75 volume percent fine sand interspersed among the pile elements and on the backing to a substantially uniform dept at least 1/2 the length of the pile elements."

The assignment was recorded at the U.S. Patent and Trademark Office ("USPTO") on January 2, 1981. From December 29, 1980, until the expiration of the '283 Patent on September 11, 2000, there were no further conveyances recorded in the USPTO to any person or entity of any rights in the '283 Patent. Specifically, there are no records of any rights conveyed back to **[**5]** Haas as an individual or to the corporation called Mod-Sod Sports Surfaces, Inc. ("Mod-Sod Corp."), formed on April 4, 1982.

However, Haas has stated in deposition testimony in an action in the Covington Division of this District (discussed below) that he assigned the title and rights to the '283 patent to Mod-Sod Corp. Plaintiffs refer to an exhibit to that deposition entitled "Patents **[**6]** Issued to MSSS, Inc." and listing the '283 Patent along with Haas's testimony to demonstrate a binding and legal conveyance rights to that patent. Haas, reviewing the document contained in that exhibit, stated:

> These [the patents] were issued, I think first to me and I assigned them at a later date to Mud-Sod [*sic*] Sports Surfaces, Inc.

[Haas Covington Depo. at 13:12-14:6.] In response to a question about whether the "form of business had gone from [himself] individually to the Mud-Sod [*sic*] Sports Surfaces partnership all of the way to Mod-Sod Sports Surfaces the corporation …," Haas replied, "Yes." [*Id.*]

The preamble to the 1994 "Exclusive License Agreement" signed by SynTenniCo, Prevost, Mod-Sod, Inc., and Haas, as a representative of Mod-Sod Corp., provided that the:

> Licensor has the sole right to grant for the United States its territories and possessions and for the entire World (collectively, the "Territory"), licenses under the Inventions, of the scope hereinafter granted …

[Exclusive License Agreement at Preamble.] Further, the agreement provided that "licensor hereby grants to Licensee the exclusive and irrevocable **[**7]** (except as otherwise reserved and provided for herein) right and license to make, have made, use sell and otherwise commercialize and exploit, through the Territory, products embodying the inventions …" [*Id.* at P1.]

However, there exists a subsequent "letter agreement", dated June 19, 1998 and apparently still in force, stating that it "cancels and replaces the exclusive license agreement" signed by the parties in 1994. The letter, written to Mod-Sod Sports Surfaces, Inc., and Haas, states that "[SynTenniCo] will *continue* to be the exclusive licensee of your U.S. patent, number 4,337,283 except for golf products." [Letter Agreement at P3 (emphasis added).]

2. The Ascendancy of Filled Artificial Turf Systems in the Artificial Turf Market

When FieldTurf's predecessor-in-interest, SynTenniCo, began marketing its filled products in 1997, most artificial turf surfaces were the relatively more expensive conventional systems. The new filled turf systems would prove to be significantly less expensive than their conventional counterparts, including Defendant's AstroTurf product, as a result of the less expensive raw materials and the lowered expense **[*715]** associated with **[**8]** the manufacturing process. Additionally, the amount of raw material needed to produce similarly sized fields was significantly lower for the filled turf systems. [4]

With the popularity of these filled systems, the number of customers has risen dramatically every year since 1998 and the market has seen the **[**9]** ascendancy of the filled field over the traditional conventional systems. FieldTurf's sales increased significantly during that time, and the number of fields sold went from 22 in 1998 to 43 in 1999, 118 in 2000, and a projected 135 (in 2001). That said, Plaintiffs allege that Defendant still holds a 90% market share for the artificial turf market when all conventional and filled systems are included. Defendant alleges

---

[4] FieldTurf's President, John Gilman, has stated in deposition testimony that his company's infill products have typically been more expensive than comparable Southwest products, this in spite of the fact that FieldTurf does not use a shock-absorbing pad under its products, a measure that arguably translates into savings for customers. While Plaintiffs describe the price differential as a distinction in quality, Plaintiffs do not deny and a principal of their distributor, TurfUSA, has testified that FieldTurf's system of distributorship creates a mark-up in price on their systems not experienced by Southwest with its vertically integrated system of manufacture, sale, distribution, and installation of fields.

and Plaintiffs do not dispute that if the filled system submarket is examined, the reality is that both parties have relatively equal market share. In any event, Gilman has boasted that FieldTurf became Southwest's major competitor, taking substantial market share from Southwest in 2000, decreasing Southwest's sales and reducing its profits.

3. History of Litigation Between the Parties and Their Predecessors-in-Interest With Regard to the '283 Patent and Other Claims; the Parties' Settlement Agreement

Over the years, the parties (or their predecessors-in-interest) have competed for contracts on hundreds of artificial turf fields. Some of those contracts have been awarded to Plaintiffs; some have been awarded to Defendant.

In the fall **[**10]** of 1998, Southwest installed an AstroPlay(R) system (constructed with sand and rubber infill) at the Town and Country soccer complex in Northern Kentucky. At that time, SynTenniCo instituted suit against Southwest and its parent company, American Sports Products Group, Inc. ("ASPG"), in the Covington Division of the Eastern District of Kentucky (the "Covington Action") alleging violations of the Lanham Act and patent infringement. [5]

On May 20, 1999, the parties entered into a settlement agreement to resolve the matter ("Settlement Agreement"), releasing Southwest "from any and all claims, demands, and causes of action, known and unknown, which accrued or are alleged to have accrued up to the date of this Agreement, including the claims in the [Covington] Action." [Settlement Agreement, at 2, P1(c).] SynTenniCo stated that it had no cause of action against Southwest for the "manufacture **[**11]** and sale" of the AstroPlay(R) product having an infill composed entirely of resilient particles, including rubber crumb, and expressly waived and released any such action. Further, SynTenniCo agreed that after the expiration of the '283 Patent, AstroPlay(R) would not be subject to an action for infringement under any patent relating to a filled turf system containing both sand and a resilient particle infill. It is notable that, even while defending the Covington Action, Southwest was changing its AstroPlay(R) **[*716]** specifications to provide and market all-rubber infill to its customers worldwide, although specifically in the United States, with the option of a pad under the infill.

In a subsequent jury trial in Austin, Texas (the "Austin Action"), litigation wherein Southwest sued FieldTurf for breach of the Settlement Agreement, FieldTurf raised as a defense that Southwest had admittedly marketed and sold AstroPlay(R) with a rubber and sand infill outside of the United States after the Settlement Agreement was enacted. [6] Upon testimony indicating that the Settlement Agreement was intended to apply only in the United States and did not extend to foreign instalations, the jury determined **[**12]** that Southwest had not failed to comply with a material obligation of the Settlement Agreement by marketing and selling AstroPlay(R) with a rubber and sand infill abroad after the Settlement Agreement was in effect.

4. Southwest's Marketing Efforts

In its American marketing efforts, Southwest has focused primarily on the lack of a pad in the FieldTurf product. A memorandum sent to Defendant's sales staff referencing FieldTurf as the "No Pad Guys" provided instructions to stress the liability that could result from injuries that could occur on the FieldTurf product without an underlying pad. Putting this campaign into action, Southwest sales staff sent numerous letters to customers referencing this No Pad "mantra."

Southwest also enlisted the services of a public relations firm in its "Play Within the Safety Zone" campaign, directed at the sports industry and the **[**13]** media. In a letter to Southwest, the firm stated the gist of the campaign: "it's time to play hardball. It's time to hit FieldTurf where they have no line of defense-the long term safety (or lack of) sand and rubber filled turf and its potential to cause life-altering injuries."

---

[5] *SynTenniCo, Inc. v. American Sports Products Group, Inc., et al.,* Civil Action No. 98-208 (E.D.Ky.--Covington Division).

[6] *Southwest Recreational Industries, Inc. v. FieldTurf, Inc., et al.,* Civil Action No. A-00-CA-063-55 (W.D.Tex.--Austin Division).

Southwest's "research and testing" staff performed ASTM F-355 testing on several FieldTurf installations. The results of these tests demonstrated that those fields were significantly harder than comparable non-FieldTurf fields of comparable age, many FieldTurf sand and rubber installations testing in hardness ranges that exceeded the recommendations for artificial turf safety. By contrast, FieldTurf has relied on the Clegg Tester to test the hardness of its product, a test generally yielding results suggesting that the product as configured is within the recommended safety guidelines for certain surfaces. Defendant claims and has stated to customers that the Clegg Tester is inappropriate for artificial turf as it is designed for natural grass surfaces and does not yield accurate hardness readings.

There is no shortage of evidence that the Southwest sales team advanced this information as it employed its marketing **[**14]** strategy on the offense in the marketplace. Another Southwest employee admitted that he frequently told customers that Southwest felt the sand in the FieldTurf product presented a safety hazard for athletes because of the risk of compaction. Andy Belles, a vice-president for Defendant, testified in deposition that it "would be typical for me to say those-that sand-filled or combination-filled fields become hard. [Belles Depo. at 60:22-24.]

The correspondence sent out into the market was described by former Director of Marketing for Southwest, Troy Squires:

> We were writing these letters, you know, to any customer that would put down a field without a pad. You know **[*717]** this would basically be the same story that we would say, was that, you know, this is a game that we really recommend that you put a pad down.

[Squires Depo. at 198:23-199:3.]

James Savoca, the head of Southwest' stadium sales program and a prolific letter writer, corresponded with customers concerning the shock absorbent qualities of the FieldTurf(R) and AstroPlay(R) products. Referencing Southwest's use of the alleged industry standard ASTM F-355 test as the key to "long term player protection," Savoca **[**15]** stated that the importance of a "separate, distinct shock pad" could not be emphasized enough and that using tests other than the ASTM F-355 as a basis for accepting a sand/ rubber product would place the customer "in an undefendable legal position." A December 13, 1999 letter exemplifies his tact, challenging the awarding of the field project to FieldTurf and claiming the lack of underlying pad rendered the product unsafe. The letter reads in pertinent part:

> You must be made aware that the synthetic turf you selected has an unacceptable shock absorbency levels initially. It's anyone's guess what will happen in the next 5, 7 or 10 years.

He continued, stating that the recipient "could ask [the] FieldTurf distributor for more data-but their entire experience of installing synthetic turf consists of three or four full sized fields." A July 21, 2000, letter to another customer focused on the need for a pad and stated that with "basically zero test data, [FieldTurf] says a pad is not needed-a very new vendor at that."

Southwest also focused on FieldTurf's public gaffes and never hesitated to share such information with customers. Specifically, Plaintiffs make much **[**16]** of the FieldTurf contract to install two playing fields in the City of Lake Oswego, Oregon. Having received a warranty in the contract that the "unprepared" fields would test below certain hardness limits at certain time intervals using the ASTM F-355 method, Lake Oswego shut down the FieldTurf(R) fields as the hardness exceeded the agreed limits. The city claimed that FieldTurf had used the Clegg Tester on "prepared" fields in order to achieve acceptable results. Newspaper articles were published about the debacle and the subsequent lawsuit against FieldTurf. [7] Not surprisingly, Southwest proceeded to provide copies of those articles and report information on the Lake Oswego happenings to customers. [8]

---

[7] *Tigard Sportsurfaces, LLC v. SynTenniCo, Inc., et al.,* Civil Action No. 98-1359-JE (D. Oregon).

[8] Plaintiffs allege that Defendant provided information on ASTM testing as compared to Clegg testing to the City of Lake Oswego. Plaintiffs also allege that, without permission of the City or its consultants, Southwest conducted its own ASTM testing on the fields, publishing the results so obtained to customers and to the city.

[17]** Southwest even turned to FieldTurf's marketing efforts for ammunition in its own marketing campaign, with representatives writing to customers about FieldTurf's showcase fields at the University of Nebraska and Husky Stadium in Washington State. These letters expressed doubts about the hardness test results or the qualifications of the individuals who were affiliated with the choice or promotion of such fields to evaluate the safety of the fields. At other times, Southwest focused on FieldTurf's status as a newcomer to the artificial turf market, allegedly stating that it was doubtful whether or not Plaintiffs would even be around to honor warranties in the future, or the fact that FieldTurf was a *Canadian* company marketing a *Canadian* product.

In the artificial turf market abroad, Southwest was continuing to market its **[*718]** AstroPlay(R) product with both a rubber infill, as in the United States, and a sand and rubber infill. Southwest's Director of International Business Development, Harry Salomons, has stated in deposition testimony that Southwest also produced nylon fibers and "carpet" in the United States for use in both rubber-only and rubber and sand infill installations **[**18]** outside of the United States. [9] This pile fabric was used not only in both kinds of fields but as a grass-like surface in window-dressing.

Southwest advertises abroad using materials and promotions developed by agencies in the United States that are subsequently shipped to representatives abroad. Southwest also maintains a website, available internationally, advertising their services and products and inviting interested parties to contact FieldTurf. An administrative assistant in Southwest's Texas headquarters retrieves international inquiries submitted via Southwest's website, many of them inquires about rubber-and-sand infill installations, and redirects them to the appropriate regional representatives abroad.

Salomons recounted in his **[**19]** deposition testimony that he has entertained these international representatives and their clients in the United States on a number of occasions during which time the representatives and their clients would view various Southwest installations, including the rubber and sand infill system at the Town and Country site in Kentucky.

5. The Instant Matter

Upon these facts, Plaintiffs have alleged that Defendant has participated in conduct in violation of the Sherman Antitrust Act, the Lanham Act, applicable patent law, the Kentucky Consumer Protection Act, and the common law of the Commonwealth of Kentucky. Defendant has moved this Court to grant summary judgment on all counts, by virtue of the prior agreements of the parties and on the evidence at hand.

APPLICABLE STANDARD OF REVIEW

HN1[] Under *Fed. R. Civ. P. 56(c)*, summary judgment is appropriate "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no issue as to any material fact, and that the moving party is entitled to judgment as a matter of law." ***HN2***[] The moving party may discharge its burden by showing "that there is an absence of evidence **[**20]** to support the nonmoving party's case." *Celotex Corp. v. Catrett, 477 U.S. 317, 325, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. The nonmoving parties, which in this case are the plaintiffs, "cannot rest on [their] pleadings," and must show the Court that "there is a genuine issue for trial." *Hall v. Tollett, 128 F.3d 418, 422 (6th Cir. 1997)*. ***HN3***[] In considering a motion for summary judgment the court must construe the facts in the light most favorable to the nonmoving party. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*.

DISCUSSION

---

[9] Plaintiffs rely on shipping and invoice records describing rolls of "ASTROPLAY" shipped from sources within the United States to demonstrate the movement of the product from the United States to sites abroad and that billing was initiated from within the United States.

1. The Release Effected by the May 20, 1999 Settlement Agreement Extends to All Claims Accrued by That Date and Is Not Limited to Those Claims and Issues Raised in the Covington Action

In the Covington Action, Plaintiffs' predecessor in interest, SynTenniCo, asserted **[*719]** claims of patent infringement involving the '283 Patent, claims under the Lanham Act, and others for tortious interference with economic relations. SynTenniCo advanced claims associated with "sales talk" in that action, stating that Southwest made untrue statements about FieldTurf, its **[**21]** products and/ or owners (or false statements about Southwest's products) which statements caused customers to reject the FieldTurf product and enter into contracts with Southwest. Concluding that action and entering into the Settlement Agreement, the parties stated that they "desired and intended to settle, conclude and dismiss the claims and disputes which exist between them as expressed in the Action, the Appeal and the Related Actions." [Settlement Agreement at 2, P7.] The Settlement Agreement between the parties provides in pertinent part:

> [FieldTurf's predecessor] hereby releases and forever discharges Southwest and ASPG, their successors, assigns, officers, directors and insurers, from any and all claims, demands, and causes of action, known and unknown, which accrued or are alleged to have accrued up to the date of this Agreement, including the claims in the [Covington] Action.

[Settlement Agreement, at 2, P1(c).]

The present action was filed in January 2000, and, two months later, Defendant moved for summary judgment releasing all claims which had been released by the Settlement Agreement. At that time, Plaintiffs expressly denied that their claims **[**22]** in this action had accrued prior to May 20, 1999 and denied that their claims were premised on conduct which occurred before May 20, 1999:

> FieldTurf does not base this action on conduct which occurred prior to May 20, 1999, or claims which accrued prior to May 20, 1999. In fact, in its pleadings, FieldTurf specifies that the conduct at issue in this action took place after that date.

[Def. Memo. in Opp. To Plaint. Mot. to Dismiss, p. 8]. The Court denied Southwest's motion but held, to the extent that it was demonstrated that the claims in the case had accrued prior to May 20, 1999, Southwest was entitled to summary judgment.

HN4[] In interpreting the Settlement Agreement, the Court is "guided by general rules of contract construction" and "must first resort to the contract language to determine the intention of the parties." *Gilbert v. Monsanto Co., 216 F.3d 695, 700 (8th Cir. 2000)*; *FDIC v. Prince George Corp., 58 F.3d 1041, 1046 (4th Cir. 1995)*. Only if the terms remain ambiguous after such an examination will the court turn to extrinsic evidence. *Prince George Corp., 58 F.3d at 1046*.

Plaintiffs argue that the Settlement **[**23]** Agreement's reach is limited to those claims involved in and related to the Covington Action or that there is a genuine issue of material fact as to whether FieldTurf intended to release claims other than those involved in and related to the Covington Action by entering into the Settlement Agreement. Specifically, Plaintiffs cite to that portion of the Agreement stating the desire and intent of the parties "to settle, conclude and dismiss the claims and disputes which exist between them as expressed in the Action, the Appeal and the Related Actions." [Settlement Agreement at 2, P7.] However, the Settlement Agreement clearly provides for release "from any and all claims, demands, and causes of action, known and unknown, which accrued or are alleged to have accrued up to the date of this Agreement, including the claims in the [Covington] Action." [Settlement Agreement, at 2, P1(c).]

[*720] This Court finds that the plain language of the Agreement cannot yield an interpretation as suggested by Plaintiffs. Common sense and a general knowledge of how any agreement functions includes the fact that parties are seeking *quid pro quo.* Anything and everything could arguably serve as consideration **[**24]** in such an agreement, including issues and events not related to the underlying dispute. Reading the Agreement *in toto* reveals that any and all concessions made by either party in the Settlement Agreement certainly relate back to their stated desire to "settle, conclude and dismiss" those issues at bar in the Covington Action and that any concessions made in the Agreement, no matter how broadly sweeping, are consideration therefor.

The parties specifically stated that the claims in the Covington Action were *included* in that body of "any and all claims, demands, and causes of action," clearly contemplating a larger body of "claims, demands, and causes of action" of which the Covington Action was merely a discrete portion. [Settlement Agreement, at 2, P1(c).] Thus, it is clear to this Court that FieldTurf's predecessor-in-interest conceded not only those claims in the Covington Action but all others accrued at the time of the Agreement. As the language of this Settlement Agreement is clear and unambiguous, the Court need not inquire further into those extrinsic sources suggested by Plaintiffs.

HN5[] The Sixth Circuit teaches that a plaintiff's right of action accrues "when the **[**25]** plaintiff knows or has reason to know of the injury which is the basis of his action." *Sevier v. Turner, 742 F.2d 262, 272 (6th Cir. 1984)*. This is to say that all the events necessary to establish a claim must have occurred such that a suit may be successfully maintained on a particular cause of action. *See* *Hodge v. Service Mach. Co., 438 F.2d 347, 349 (6th Cir. 1971)*; *Schoonover v. Consolidated Freightways, 49 F.3d 219, 221 (6th Cir. 1985)*.

As an initial matter, Plaintiffs allege that the individual acts of which they complain must be viewed as "component parts of a larger concerted effort by Southwest to perpetuate its domination of the market for synthetic grass surface" and that Southwest's attempts isolate those individual examples of alleged wrongdoing as cited in the Complaint and the discovery produced by FieldTurf is inappropriate. [Pl. Resp. at 10.] The "larger concerted effort" of which Plaintiffs speak is the alleged antitrust violation. Plaintiffs correctly point out that ***HN6***[] "in the context of a continuing scheme to violate the antitrust laws, a cause of action accrues to the plaintiff each time the defendant **[**26]** engages in conduct that harms the plaintiff." *Ohio-Sealy Mattress Manufacturing Co. v. Sealy, Inc., 669 F.2d 490, 494 (7th Cir. 1982)*. The repeated violation of a plaintiff's interests by a continuing antitrust violation would likely make it appropriate to reach back beyond the date of the Settlement Agreement to completely understand the breadth and reach of the violation as it continued to accrue after May 20, 1999. *See* *DXS, Inc. v. Siemens Medical Systems, Inc., 100 F.3d 462, 467 (6th Cir. 1996)*. This is to say that simply because certain incidents of a continuing violation accrued prior to a cut-off date imposed, somewhat artificially, by settlement agreement or other such device, the Court would not necessarily be amiss in considering them where the antitrust wrong continued to accrue after that date.

That said, the Court remarks that Plaintiffs have failed to adequately state a claim for the antitrust violations on which this argument is premised. As determined hereinbelow, Plaintiffs have failed to allege the types of injury necessary or certain **[*721]** requisite elements of such a claim. Accordingly, this Court need not now consider which **[**27]** incidents, if any, would fall within the realm of consideration as predicate acts of an antitrust violation. Such circumstances absent, this Court notes the terms of the Settlement Agreement and shall not consider those actions having accrued prior to May 20, 1999.

2. Plaintiffs Fail to Allege Facts Sufficient to Sustain Their Claim Under the Sherman Antitrust Act and *KY. REV. STAT. 367.175* [10]

---

[10] Defendant argues that Plaintiffs lack standing to pursue a claim under *KY. REV. STAT. 367.175*, the antitrust provision of the Kentucky Consumer Protection Act. ***HN7***[] While it has been stated that the Act "provides no civil remedies to private plaintiffs for violations of 367.175," it is also stated that "Kentucky Consumer Protection Act was broadly designed to curtail unfair, false misleading or deceptive practices in the conduct of commerce." *Kentucky Laborers Dist. Council Health & Welfare Trust Fund v. Hill & Knowlton, Inc., 24 F. Supp.2d 755, 773 (W.D.Ky. 1998)*; *Com ex rel. Stephens v. North American Van Lines, Inc., 600 S.W.2d 459, 462 (Ky. App. 1979)*. Considering such a broad reading and the statement of a federal antitrust claim, Judge Wilhoit's order of October 6, 2001, stated that FieldTurf had standing to pursue a claim under *KY. REV. STAT. 367.175*. Accordingly, the Court will not now dismiss the state antitrust claim for lack of standing.

As ***HN8***[] the ***antitrust law*** of the Commonwealth is so similar to its federal counterpart, the Sherman Antitrust Act, and may be interpreted where appropriate with regard to federal law, the Court shall dispatch with the claim under *KY. REV. STAT. 367.175* upon its analysis of the federal antitrust claim as stated in this order. *See* *Mendell v. Golden-Farley of Hopkinsville, Inc., 573 S.W.2d 346, 349 (Ky.App. 1978)*.

[28]** Plaintiffs contend that Defendant violated § 2 of the Sherman Act by monopolizing or attempting to monopolize the market for "synthetic turf sports fields." 15 U.S.C. § 2. Primarily, Plaintiffs argue that Defendant engaged in "predatory pricing" to establish or maintain its alleged monopoly, then engaged in various anti-competitive predicate acts, including patent infringement, "disparagement," unfair competition, and "prosecution of baseless trademark claims while possessing monopoly power."

HN9[] Causes of action for monopolization arise upon (1) certain conditions, i.e., a defendant's possession of "monopoly power" or possession of sufficient market power that there is a dangerous probability of the defendant attaining monopoly power, and (2) where the party has acquired that power through willful conduct, i.e., unlawful predicate acts (as distinguished from acquiring that power as a consequence of a superior product, business acumen or historical accident). [11] *United States v. Grinnell Corp., 384 U.S. 563, 570, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. A party cannot be liable for attempted monopolization under § 2 of the Sherman Act "absent **[**29]** proof of a market and specific intent to monopolize." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*.

HN11[] It is axiomatic that a firm cannot monopolize a market in which it does not compete, and it is imperative to understand which market is addressed in order to measure a defendant's ability to lessen or destroy competition. *Walker Process* ***[*722]*** *Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 15 L. Ed. 2d 247, 86 S. Ct. 347 (1965)*; **[**30]** *see* *Discon, Inc. v. NYNEX Corp., 93 F.3d 1055, 1061-62 (2nd Cir.)*, *reversed and remanded on other grounds, 525 U.S. 128, 142 L. Ed. 2d 510, 119 S. Ct. 493 (1996)*; *see* *White v. Rockingham Radiologists, Ltd., 820 F.2d 98, 104-105 (4th Cir. 1987)*, *Mercy-Peninsula Ambulance, Inc. v. County of San Mateo, 791 F.2d 755, 759 (9th Cir. 1986)*. In order to determine the relevant product market, one must utilize the "reasonable interchangeability" standard. *White and White, Inc. v. American Hosp. Supply Corp., 723 F.2d 495, 500 (6th Cir. 1983)*. This is to say, one must identify those products or services that are either (1) identical to or (2) available substitutes **[*723]** for the defendant's product or service. *Id.* (citing *United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1956))*. The Sixth Circuit teaches that:

> … reasonable interchangeability may be gauged by (1) the product uses, *i.e.,* whether the substitute products or services can perform the same function, and/ or (2) consumer response (cross-elasticity); that is, **[**31]** consumer sensitivity to price levels at which they elect substitutes for the defendant's product or service.

723 F.2d 495, 500-01 (internal citation omitted).

HN12[] "In defining a relevant product market, the goal is 'to delineate markets which conform to areas of effective competition and to the realties [*sic*] of competitive practice.'" *City of Cleveland v. Cleveland Elec. Illuminating Co., 734 F.2d 1157, 1166 (6th Cir. 1984)* (quoting *L.G. Balfour Co. v. F.T.C., 442 F.2d 1, 11 (7th Cir.1971))* (no error in designating retail rather than wholesale power market as relevant product market where there was no evidence that parties ever competed in or intended to compete in wholesale power market). So it is that in measuring the relevant product market, one may also utilize the submarket criteria as taught in *Brown Shoe Co. v. United States:*

> A submarket may be determined by examining such practical indicia as (1) industry or public recognition of the submarket as a separate economic entity, (2) the product's peculiar characteristics and uses, (3) unique production facilities, (4) distinct customers, (5) distinct prices, **[**32]** (6) sensitivity to price changes, and (7) specialized vendors. *Id. 370 U.S. 294 at 325, 82 S. Ct. at 1523*.

---

[11] **HN10**[] Where a defendant allegedly acquires or maintains monopoly power, the commission of the unlawful predicate act must either itself establish monopoly power or occur at a time when the defendant already possesses monopoly power. *See* *Re/ Max Int'l., Inc. v. Realty One, Inc., 173 F.3d 995, 1016 (6th Cir. 1999)*. Where the defendant allegedly attempts to monopolize, the predicate act must occur at a time when the defendant is dangerously close to establishing monopoly power. *See* *White and White, Inc. v. American Hosp. Supply Corp., 723 F.2d 495, 506 (6th Cir. 1983)*.

Brown Shoe Co. v. United States, 370 U.S. 294, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962) (district court, recognizing industry practice and public perception, appropriately found separate footwear markets, later characterized as submarkets, of "men's," "women's," and "children's" shoes); White and White, Inc., 723 F.2d at 501-502; *see also* International Boxing Club of New York v. United States, 358 U.S. 242, 3 L. Ed. 2d 270, 79 S. Ct. 245 (1959) (affirming a narrower product market than "professional boxing" as supported by evidence of far greater interest in championship boxing by the public and broadcasters; further stating that evidence showed that nonchampionship fights were not "reasonably interchangeable" with championship fights, "which is the basic inquiry of the standard product market test").

Looking to the product market in which FieldTurf and Southwest participate, determining the relevant market under the "reasonable interchangeability" standard seems initially straightforward for the product market would **[**33]** appear to be artificial turf fields upon which sports are played. Such fields could be described as relatively flat swathes of artificial turf substituting for natural grass, and accommodating certain sporting activities. Upon considering consumer response, or "cross-elasticity," consumer sensitivity to price levels at which they elect substitutes for the defendant's product or service delimits the relevant product market in this matter. The type of artificial turf systems at issue are those styled "filled." Both parties see this market as "growing" and rapidly replacing older, more traditional, and more expensive artificial turf systems.

This is to say that based on the admittedly lower price for this filled product and the fact that Plaintiffs and Defendant find themselves locked in a battle over this sub-marketplace, a battle in which Plaintiffs are holding their own in fiercely developed competition with Defendant, a smaller relevant product market exists than that otherwise stated by Plaintiffs. Thus, the broader and more basic substitutability recognized in the first place--a field for a field--must yield to the lack of "cross-elasticity" between the submarket for filled artificial **[**34]** turf systems, like FieldTurf(R) and AstroPlay(R), and those other products available within the larger category of artificial turf systems. Plaintiffs have not provided evidence that Defendant was monopolizing the filled turf submarket or that Defendant was even dangerously close to monopolizing the submarket. Rather, the evidence demonstrates relatively equal market share on the part of Plaintiffs and Defendant in this relevant product submarket.

However, even if this Court assumes, *arguendo,* that Plaintiffs' suggested market (all synthetic turf sports surfaces in excess of 25,000 feet) is the proper one and that Defendant controlled approximately 90% of that market, Plaintiffs have failed to demonstrate that Defendant, in addition to its alleged high market share, had the ability to control prices or exclude competition. American Council of Certified Podiatric Physicians & Surgeons v. American Board of Podiatric Surgery, 185 F.3d 606, 622-23 (6th Cir. 1999). The Court notes that overall average prices were declining in the artificial turf business during the relevant period, and that Plaintiffs have not demonstrated how Defendant could have unilaterally affected **[**35]** the supply of raw materials, customers, or the construction capabilities in the artificial turf business to the detriment or exclusion of other competitors. *See* Forsyth v. Humana, Inc., 114 F.3d 1467 (9th Cir. 1997).

HN13[] Antitrust plaintiffs must prove an antitrust injury of the type that the antitrust laws were intended to prevent and that flows from that which makes a defendant's acts unlawful. [12] The injury should **[*724]** reflect the

---

[12] ***HN14***[] For example, "low prices which remain above predatory levels do not constitute an antitrust injury because they benefit consumers regardless of how they are set." Louisa Coca-Cola Bottling Co. v. Pepsi-Cola Metropolitan Bottling Co., Inc., 94 F. Supp.2d 804, 814 (E.D.Ky. 1999). "Predatory pricing" becomes actionable where the defendant prices its products below the cost of producing them for the purpose of driving its competitors out of business so that the defendant may then raise prices to anticompetitive levels and recoup its past losses. Brooke Group, Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-24, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993); Richter Concrete Corp. v. Hilltop Concrete Corp., 691 F.2d 818, 823 (6th Cir. 1982).

Where the defendant's prices are below the "average variable costs" of producing the product, a *prima facie* case of predatory pricing is established and the burden shifts to the defendant to show that the pricing was justified. D.E. Rogers Assoc., Inc., 718 F.2d 1431, 1436 (6th Cir. 1983). Where the pricing is above "average variable costs" but below the defendant's "total costs" it is presumed that the pricing scheme is not predatory and the plaintiff may not prevail absent detailed and convincing economic anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*.

[36]** ***HN15***[] To be actionable under antitrust statutes, the defendant's actions must harm *competition*-not just one competitor in the form of mere economic injury. *Valley Prods. Co. v. Landmark, 128 F.3d 398, 402 (6th Cir.1997)*; *see, e.g., Louisa Coca-Cola Bottling Co. v. Pepsi-Cola Metropolitan Bottling Co., Inc., 94 F. Supp.2d 804 (E.D.Ky. 1999)* (plaintiff failed to state an antitrust injury and district court dismissed the case on summary judgment where plaintiff sued its chief rival alleging monopolization of the local soft drink market by virtue of money paid by soft drink companies to retailers to be used for local advertising and promotion as it resulted in lower prices). The Sixth Circuit Court of Appeals teaches that:

> The antitrust plaintiff must show (1) that the alleged violation tends to reduce competition in some market and (2) that the plaintiff's injury would result from a decrease in that competition rather than from some other consequence of the defendant's actions.

Tennessean Truck Stop v. NTS, Inc., 875 F.2d 86, 88 (6th Cir. 1989) (citation omitted). Failure to allege an injury to competition **[**37]** is reason enough to dismiss an antitrust claim. *Id. at 90-91*.

Both Plaintiffs and Defendant indicate that competition increased and average prices were reduced in the filled turf industry during the relevant time period in this matter. Gilman himself testified that once filled turf became an accepted product in 1998, competitors or "imitators" began entering the market. Plaintiffs identify no fewer than eleven new "imitators" that introduced products in 1999 and 2000. [13] Further and according to Plaintiffs' own information, the number of sales of fields per year has risen dramatically between 1998 and 2001, and Plaintiffs' expert, James Langenfeld, finds that increased sales of cheaper filled turf systems have resulted in a decrease in the average price for artificial turf since May 20, 1999.

[38]** Based on this evidence, Defendant argues that the Amended Complaint does not allege an antitrust injury or any harm to competition and terms the losses of jobs or contracts of which Plaintiffs complain as losses of business by FieldTurf, not a loss of business because of reduction in competition. This Court does not find any reason based on the evidence presented by either party to determine otherwise. For all of the aforementioned reasons, the Court grants Defendant's motion for summary judgment on the issue of antitrust claims, both those alleged under the Sherman Antitrust Claim and the Kentucky Consumer Protection Act, *KY. REV. STAT. 367.175*.

[*725] 3. Plaintiffs Fail to Allege Facts Supporting Its Claims of Lanham Act Violations Because Statements Made by Defendant Are Not Literally False and Evidence Does Not Demonstrate that Potential Customers Were Misled or Deceived

HN17[] The Lanham Act serves to protect harm to a plaintiff's commercial interests caused by a competitor's false statements. *Procter & Gamble Co. v. Amway Corp., 242 F.3d 539, 563 (5th Cir. 2001)*; *Hutchinson v. Pfeil, 211 F.3d 515, 520 (10th Cir. 2000)*. The relevant portions of **[**39]** the Lanham Act provide that:

---

analysis establishing a clear correlation between the pricing scheme and an untimely anticompetitive result. *Id.* When the defendant's prices are above the "average total costs" of producing the product; a claim for predatory pricing will not survive. *Id.*

Defendant's pricing remained not only above its average variable costs, but also above its average total costs. This is to say that between May 1999 and the end of 2000, Southwest was earning "net profits" (its sales revenues exceeded its total costs)-*making,* not losing, money in the arguably relevant time period. Notably, FieldTurf's expert, J. Donald Fancher, indicated that during the relevant time Defendant maintained profit margins around 20%. It follows, inexorably, that Plaintiffs' claims premised on predatory pricing would necessarily fail, as well.

[13] ***HN16***[] Entry of new competitors proves the existence of a competitive market and the absence of barriers to entry. *Richter Concrete Corp., 691 F.2d at 827*; *Barr Laboratories, Inc., v. Abbott Laboratories, 978 F.2d 98, 113-14 (3rd Cir. 1992)*. FieldTurf has suggested that the fact that certain customers excluded competitors who lacked certain "experience" requirements demonstrates a barrier to entry into the artificial turf market. However, experience requirements are not substantial barriers to entry as they apply to everyone equally. *See Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421 (9th Cir. 1995)*.

> ***HN18***[] any person who, on or in connection with any goods or services … uses in commerce any … false or misleading description of fact, or false or misleading representation of fact, which … misrepresents the nature, characteristics, [or] qualities … of his or her or another person's goods, services, or commercial activities, shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act.

15 U.S.C. § 1125(a)(1)(B).

HN19[] To recover for a claim of "false advertising" under the Lanham Act, a plaintiff must show that (1) the defendant made a false or misleading statement of fact concerning his own product or another's; (2) the statement actually deceived or tended to deceive a substantial portion of the intended audience; (3) the statement was "material" in that it will likely influence the deceived customer's purchasing decisions; (4) the statement was introduced into interstate commerce; and (5) there is a causal link between the statement and harm to the plaintiff. *American Council, 185 F.3d at 613*.

To be actionable, a statement must be a "statement **[**40]** of fact," in other words "a specific and measurable claim, capable of being proved false." *Pizza Hut, Inc. v. Papa John's Int'l, Inc., 227 F.3d 489, 496 (5th Cir. 2000)*, *cert. denied, 532 U.S. 920, 149 L. Ed. 2d 285, 121 S. Ct. 1355*. In other words, a statement of fact can be adjudged true or false through empirical verification. *Presidio Enters, Inc. v. Warner Bros. Distrib. Corp., 784 F.2d 674 (5th Cir. 1986)*. Neither statements of opinion nor "puffing statements" are actionable. [14] *American Council, 185 F.3d at 615* and *Pizza Hut, 227 F.3d at 495*.

HN20[] Where a false or misleading statement is literally false, the plaintiff does not need to establish proof that consumers were actually deceived by the statements in order to recover under the Lanham Act, but such deception is presumed from **[**41]** the literal falsity. *Balance Dynamics Corporation v. Schmitt Industries, Inc., 204 F.3d 683, 690 (6th Cir. 2000)* (quoting *American Council, 185 F.3d at 614*). If the factual statement is literally true or too ambiguous to be literally false, it is not actionable unless it is also misleading and actually deceives customers. *American Council, 185 F.3d at 614*. Further, "when construing the allegedly false or misleading statement to determine if it is actionable under section 43(a), the statement must be viewed in the light of the overall context in which it appears." *Pizza Hut, Inc, 227 F.3d at 495* (citing *Avis Rent A Car System, Inc. v. Hertz Corp., 782 F.2d 381, 385 (2nd Cir. 1986)*; *Southland Sod Farms v. Stover Seed Co., 108 F.3d 1134, 1139 (9th Cir. 1997))*.

[*726] FieldTurf alleges that by "literally false" statements to customers, Southwest disparaged FieldTurf and FieldTurf(R) products in a number of ways: (1) by accusing the FieldTurf(R) product of being unsafe for American football because it lacked an underlying pad and, therefore, allegedly has not measured up to certain testing **[**42]** standards creating the potential for litigation by players injured on such fields; (2) by making allegedly disparaging comments about FieldTurf's showcase fields; (3) by utilizing the controversy surrounding an installation at Lake Oswego, Oregon to disparage FieldTurf and attempting to interfere with FieldTurf's contract at that installation; and (4) by publically questioning FieldTurf's longevity and its ability to honor warranties.

Insofar as Defendant has made reference to the potential for future legal action by those injured on fields that are produced by Plaintiffs, for whatever reasons such legal action should arise, those statements are predictions, not specific or measurable nor capable of being proved false. The same analysis applies to statements concerning Plaintiffs' anticipated longevity and ability to honor warranties for the FieldTurf(R) product, premised on the relative youth of the company. They are predictions of future performance, not specific or measurable statements so as to be actionable under the Lanham Act. Similarly, Defendant's comments about Plaintiffs' showcase field installations are not actionable specific or measurable statements. Rather they state **[**43]** Southwest's opinion of those involved in the field selection process and the product itself. Try as it might, this Court cannot find that Southwest has expressed more than a prediction or opinion so as to actionably mislead others with regard to the fields installed by FieldTurf or the company's future in the industry.

---

[14] "Puffing" is a claim of general superiority or an exaggerated blustering or boasting statement. *Pizza Hut, 227 F.3d at 496*.

With regard to statements about the Lake Oswego installation and the controversy surrounding it, neither the protestations of Plaintiffs nor the power of this Court can undo history. The events that Defendant describes to customers did occur and are a matter of public record, not "literally false" statements as alleged by Plaintiffs.

Finally, with regard to those statements concerning whether the Plaintiffs' product is or is not safe for American football and the relative superiority of Defendant's own product, it is taught that ***HN21***[] when a defendant has buttressed a claim of superiority by attributing it to the results of scientific testing, a plaintiff must prove only "that the tests [relied upon] were not sufficiently reliable to permit one to conclude with reasonable certainty that they established the proposition for which they were cited." [15] *United Industries Corp. v. Clorox Co., 140 F.3d 1175, 1182 (8th Cir. 1998)* **[**44]** (quoting *Rhone-Poulenc, 93 F.3d 511, 514-15)*.

In the matter at hand, Plaintiffs have not suggested that the ASTM testing relied upon by Defendant was necessarily unreliable for establishing the rate of shock absorbency and related safety conclusions drawn therefrom. [16] Furthermore, this Court finds that those statements taken from FieldTurf's witnesses that other **[*727]** testing procedures were also accurate or usable cannot, by themselves, undermine the alleged usefulness or acceptance of the ASTM testing referenced by Defendant.

[45]** In any event and in spite of the negative tenor of all of Southwest's statements, they are not actionable in this matter as Plaintiffs have failed to provide any evidence suggesting that customers were, in fact, misled by these statements. Accordingly, such claims are appropriately dismissed. [17]

Plaintiffs have demonstrated that much has been said about their product and that Southwest has not spoken of it in glowing terms. However, the *poids net* of the evidence provided to this Court notwithstanding, Plaintiffs have not demonstrated that any of the statements were literally false or, even if literally true or ambiguous but misleading, that customers were actually misled by the statements in making their choice between the competing products. It is clear **[**46]** that FieldTurf wants nothing more in the world than for Defendant to stop talking about their product, but their desire cannot yield relief under the Lanham Act on the facts at hand.

4. While Plaintiffs May Have Standing With Regard to the '283 Patent, FieldTurf Has Failed to Identify Actionable Infringing Behavior and the Claim Will Be Dismissed

a. Standing

HN22[] Federal statute provides that only a patentee has a remedy by civil action for patent infringement. *35 U.S.C. § 281*. "Patentee" is defined as the person to whom the patent issued and his or her successors in title. *35 U.S.C. § 100(d)*. Thus, the statute limits standing in a patent infringement case to a party holding legal title to the patent at the time of infringement. *See, e.g., Arachnid, Inc. v. Merit Industries, Inc., 939 F.2d 1574, 1578-79 (Fed. Cir. 1991)*. As it is axiomatic that one cannot grant what does not belong to oneself, a basic principle applying with full force to patents, "legal title" to the patent at the pertinent time must be established in order to establish standing to seek remedy for patent **[**47]** infringement. *See Prima Tek II, L.L.P. v. A-Roo Co., 222 F.3d 1372, 1382 (Fed. Cir. 2000)*.

---

[15] To "ensure vigorous competition and to protect legitimate commercial speech, courts applying this standard should give advertisers a fair amount of leeway, at least in the absence of a clear intent to deceive or substantial consumer confusion." *Rhone-Poulenc Rorer Pharmaceuticals, Inc. v. Marion Merrell Dow, Inc., 93 F.3d 511, 515 (8th Cir. 1996)*.

[16] The Court further remarks that the relative safety of Defendant's own product with a pad, insofar as it is supported by ratings on appropriate tests, accomplishes little more than the type of "puffery" one anticipates in any competitive sales environment.

[17] Plaintiffs have relied only on the testimony of John Ingram to substantiate that consumers were misled by Southwest's alleged statements. Such testimony by Ingram has been excluded from this matter as hearsay on the Court's order of November 4, 2002.

"A conveyance of legal title by the patentee can be made only of the entire patent, an undivided part or share of the entire patent, or all rights under the patent in a specified geographical region of the United States." [18] Rite-Hite Corp. v. Kelley Co., Inc. 56 F.3d 1538, 1551-1552 (Fed. Cir. 1995) (citing Waterman v. Mackenzie, 138 U.S. 252, 255, 34 L. Ed. 923, 11 S. Ct. 334, 1891 Dec. Comm'r Pat. 320 (1891)). "A transfer of any of these is an assignment and vests the assignee with title in the patent, and a right to sue infringers," but any less of a transfer is not an assignment of legal title but a mere license giving the licensee no right to sue for infringement at law in the licensee's own name. *Id.*

[48]** When the patent was issued on June 29, 1982, the Mod-Sod Partnership owned the patent by virtue of the December 29, 1980 assignment and operation of law. *See* Filmtec Corp. v. Allied-Signal, Inc., 939 F.2d 1568 (Fed. Cir. 1991). Haas's testimony about the subsequent assignment to Mod-Sod Corp. creates an issue of material fact with regard to whether or not **[*728]** rights in the '283 Patent were successfully transferred to the parties in the matter at hand. Assuming, for the purposes of summary judgment, that such an assignment from the Mod-Sod Partnership to the Mod-Sod Corp. occurred, it is the opinion of this Court that the "letter agreement" that Mod-Sod Sports Surfaces, Inc. and Haas granted to SynTenniCo, as licensee, the right to practice the invention contained within the '283 patent within the previously agreed upon territory and impliedly promised that others would be excluded from practicing the invention within that territory, except as related to the practice of the invention with regard to golf products. Accordingly, insofar as Mod-Sod Corp. and Haas had the requisite "legal title" to the patent and SynTenniCo has transferred the rights obtained in **[**49]** the "letter agreement" to Plaintiffs, Plaintiffs can state their status as "patentee" with regard to standing to sue for infringement of the '283 patent.

However, even as this Court has determined that Plaintiffs could have standing to bring this claim as "patentees," the Court must now dismiss the claims for patent infringement.

b. The Doctrine of Claim Preclusion Bars Plaintiffs' Claims of Patent Infringement with Regard to U.S. Installations by Defendant

HN23[] The doctrine of claim preclusion or "true" *res judicata* teaches that parties are precluded "from advancing in a new action all claims or defenses that were *or could have been* raised in a prior proceeding in which the same parties or their privies were involved, and that resulted in a judgment on the merits." J.Z.G. Resources, Inc. v. Shelby Ins. Co., 84 F.3d 211, 214 (6th Cir. 1996) (quoting In re PCH Associates, 949 F.2d 585, 594 (2nd Cir.1991) (emphasis added)). Claim preclusion serves not only to bar parties from relitigating issues that were actually litigated but also to prevent from "relitigating issues that could have been raised in an earlier action." *Id.* (citing Commissioner v. Sunnen, 333 U.S. 591, 597, 92 L. Ed. 898, 68 S. Ct. 715 (1948); **[**50]** In re PCH Assocs., 949 F.2d 585 at 594; Westwood Chem. Co. v. Kulick, 656 F.2d 1224, 1227 (6th Cir.1981)).

HN24[] Claim preclusion in patent infringement cases is defined as "a valid and final judgment rendered in an action extinguishing the plaintiff's claims pursuant to the rules of merger [and] bar". [19] Foster v. Hallco Mfg. Co., 947 F.2d 469, 478 (Fed. Cir. 1991). "The claim extinguished includes all rights of the plaintiff to remedies against the defendant with respect to all or any part of the transaction or series of connected transactions out of which the action arose." *Id.* Thus, the Court must first focus on whether the second suit rests upon the same transactional facts as the first suit. Id. at 479.

[51]** ***HN26***[] The Federal Circuit teaches that the requirement of the same transactional facts is satisfied when the devices at issue in the second suit are essentially the same as the device(s) at issue in the first suit. 947 F.2d

[18] "In the first and third cases, the assignee may sue in its name alone; in the second case, it may sue jointly with the assignor." Rite-Hite Corp., 56 F.3d at 1552 n. 10 (*citing* Waterman, 138 U.S. at 255).

[19] ***HN25***[] A dismissal with prejudice is a final adjudication on the merits. England v. Automatic Canteen Co., 349 F.2d 988, 989 (6th Cir. 1965), *cert. denied*, ***383 U.S. 925, 15 L. Ed. 2d 845, 86 S. Ct. 928 (1966)*** (dismissal of a suit with prejudice bars subsequent action seeking the same relief); *see also* ***Hallco Mfg. Co. v. Foster, 256 F.3d 1290, 1297***.

469, 479-80. So it is in the matter at hand, wherein Plaintiffs continue to claim that Southwest's AstroPlay(R) product, however configured, infringes claim 1 of the '283 patent.

As recounted above, Plaintiff's predecessor in interest, SynTenniCo, sued Defendant for infringement of the '283 **[*729]** Patent in the Covington Action. Following mediation, the parties signed a Settlement Agreement on May 20, 1999. Section 1, titled "SynTenniCo's Agreements," states that SynTenniCo has no cause of action against Southwest for the "manufacture and sale" of the AstroPlay(R) product having an infill composed entirely of resilient particles, including rubber crumb, and expressly waives and releases any such action. Further, SynTenniCo agreed that after the expiration of the '283 Patent, AstroPlay(R) would not be subject to an action for infringement under any patent relating to a filled turf system containing both sand and a resilient particle infill."

This Court finds **[**52]** it quite clear that the Settlement Agreement permits the Defendant to produce its AstroPlay(R) product, where appropriately modified to contain only a resilient particle infill, within the United States without fear of infringing the '283 Patent. Further, such an Agreement anticipates the eventual expiration of the '283 Patent and subsequent inflow of products similar, if not identical, to that described in the claims of the patent.

Whereas any claims for patent infringement were extinguished in that proceeding by virtue of the Settlement Agreement and a subsequent dismissal of that matter with prejudice, Plaintiffs are barred by the doctrine of claim preclusion from attempting to relitigate any claims for infringement within the United States premised on the '283 Patent with regard to the AstroPlay(R) product having a composition entirely of resilient particles. Much is made of the pile length in these installations, but Plaintiffs have failed to offer evidence of AstroPlay(R) systems installed in the United States during the period following the Settlement Agreement release of all claims accruing prior to May 20, 1999 but before the expiration of the '283 Patent having other than **[**53]** resilient particles therein. [20] Accordingly, those claims related to such products during such times are *res judicata* and are summarily dismissed.

[54]** Further, Plaintiffs cannot state an infringement claim for any sand and rubber infill systems produced by Defendant upon expiration of the '283 Patent per applicable law and the Agreement. **[*730]** § 271(a) provides that ***HN28***[] one who offers to sell the patented invention within the United States *during the term of the patent* infringes the patent. 35 U.S.C. § 271(a). Once a patent expires, there is no longer a patent to infringe, which is to say that if sand were added to an otherwise all-rubber infill turf system after the expiration of the '283 patent, there could necessarily be no infringement, even if the resulting product satisfied the claims of the '283 Patent.

Even where Defendant offered to add sand after the '283 Patent expired but made such an offer before the expiration of the '283 Patent, such an offer does not constitute a violation of the governing statute, 35 U.S.C. § 271(a). [21] ***HN29***[] § 271(i) provides that an "'offer for sale' or 'offer to sell' by a person other than the patentee, or

---

[20] Plaintiffs' novel theory that the Settlement Agreement states that all AstroPlay(R) is, by definition, in violation of Claim 1 of the '283 Patent (by virtue of the pile length stated therein) is bold but nonsensical. Following FieldTurf's interpretation, if the paper on which this order is printed or the computer monitor on which it appears were called "AstroPlay," they would infringe the '283 Patent notwithstanding their lack of an "infill" or usefulness as a location for sporting events. This Court will not stand for such obnoxious and inflated interpretation of the clear language of an agreement between the parties.

For the same reason, the Court declines to apply the doctrine of equivalents as suggested by Plaintiffs. ***HN27***[] The doctrine prevents infringers from creating the infringing product with only insubstantial changes to avoid directly replicating the exact claims of the patent and to disingenuously avoid the prohibitions of the patent laws. Graver Tank & Mfg. Co. v. Lande Air Prods. Co., 339 U.S. 605, 94 L. Ed. 1097, 70 S. Ct. 854, 1950 Dec. Comm'r Pat. 597 (1950). Regardless of the length of the pile in the allegedly infringing installations, which by Defendant's accounts would exceed the length claimed in the invention described in the '283 Patent, so long as Defendant's product did not contain the sand infill, it would both lack an element required by the patent as intimated in the Settlement Agreement. Where the pile length was less than or in excess of the 1/2 to 2 inch length stated in Claim 1 of the '283 Patent, this Court is not convinced that doctrine of equivalents is implicated as FieldTurf has stated that even minor changes in the length of the pile elements substantially affect performance. This is to say that, as FieldTurf itself suggests, the installation would no longer perform as the patented invention was designed to perform and such installations could not be the patented invention.

any designee of the patentee, is that in which the sale will occur before the expiration of the term of the patent." 35 U.S.C. § 271 **[**55]** (i); *see* Rotec Indus., Inc. v. Mitsubishi Corp., 215 F.3d 1246, 1252 (Fed. Cir. 2000). The Court finds that FieldTurf has not provided evidence indicating that any such "sales" of such "sand additions" took place prior to the expiration of the '283 Patent. Rather, FieldTurf recognizes that the offers at bar contemplated that sand would be added to the infill and, thus, the sale would occur, i.e., be completed by Southwest, only upon the expiration of the '283 Patent. Accordingly, those claims for patent infringement resting upon the offer to add sand to the infill in Defendant's U.S. installations must fail and will be dismissed.

c. The Geographic Scope of the Settlement Agreement is Limited to the United States, and the Settlement Agreement is Not Implicated with Regard to Those Installations Outside the United States; However, Plaintiffs Have Not Stated a Claim for Infringement of the '283 Patent with Regard to Foreign Installations by Defendant

[56]** ***HN30***[] It is taught that issue preclusion applies "(1) when the issue presently asserted was actually litigated in an earlier trial, (2) when it was actually and necessarily determined by a court of competent jurisdiction, and (3) when preclusion in the second trial does not work an unfairness." Putnam Pit, Inc. v. City of Cookeville, Tenn., 221 F.3d 834, 840 (6th Cir. 2000) (quoting United States v. Berman, 884 F.2d 916, 922 (6th Cir. 1989)).

In a prior action between the parties in Austin, Texas, a jury held that Southwest's foreign installation of an otherwise infringing artificial turf product was not in violation of the Settlement Agreement, effectively determining that the application of the Settlement Agreement was limited in geographic scope to the United States. Similarly, in the matter at hand, Defendant asserts that the alleged infringements of the '283 Patent by AstroPlay(R) installations abroad are not governed by the provisions of the Settlement Agreement.

From all appearances, this is the same issue litigated in the Austin Action where it was "actually and necessarily" decided by jury trial in a court of competent jurisdiction. Further, **[**57]** this Court does not find that such preclusion works an unfairness **[*731]** in the matter at hand. Insofar as Plaintiffs' predecessor-in-interest did not include foreign installations as consideration in the Settlement Agreement bargain, Plaintiffs cannot derive such a benefit out of the ether. Accordingly, neither Southwest nor FieldTurf were bound by the terms of that Settlement Agreement with regard to their actions outside of the geographic limits of the United States. As the claims of patent infringement outside of the United States are not contemplated by the Settlement Agreement, the Court will now consider the allegations of patent infringement related to installations outside of the United States independent of the Settlement Agreement terms.

With regard to those installations at issue outside of the United States -- made, used, or sold in foreign countries -- the Court must recognize that ***HN31***[] the "right conferred by a patent under our law is confined to the United States and its territories, and infringement of this right cannot be predicated on acts wholly done in a foreign country." *See* Dowagiac Mfg. Co. v. Minnesota Moline Plow Co., 235 U.S. 641, 650, 59 L. Ed. 398, 35 S. Ct. 221, 1915 Dec. Comm'r Pat. 320 (1915); **[**58]** Waymark Corp. v. Porta Systems Corp., 245 F.3d 1364 (Fed. Cir. 2001); Ortho Pharm Corp. v. Genetics Institute, Inc., 52 F.3d 1026, 1033 (Fed. Cir. 1995). This is not to say, however, that certain actions taken within the United States cannot lead to liability for patent infringement for an infringing product otherwise made, used, or sold outside of the United States. § 271(a) is intended to prevent infringers from "generating interest in a potential infringing product to the commercial detriment of the rightful patentee." *See* 3 D Systems, Inc. v. Aarotech Laboratories, Inc., 160 F.3d 1373, 1379 (Fed. Cir. 1998). In order to prevail on such a theory of patent infringement, Plaintiffs must demonstrate that there was (1) an offer to sell made in the United States, a violation of Section 271(a), (2) that Defendant supplied or caused to be supplied in or from the United States a substantial portion of the components of the patented invention in violation of Section 271(f)(1), or (3) that Defendant supplied or caused to be supplied in or from the United States a component of the patented

---

[21] To decide otherwise would effectively extend the term of a patent beyond its expiration date by requiring competitors to wait until after the expiration to "gear up" to offer competing and no-longer infringing products in the marketplace, a result that this Court finds untenable with the *limited* monopoly, both temporally and substantively, permitted under patent law.

invention that is especially made or adopted **[**59]** for use in the invention and is not a staple article or commodity of commerce suitable for non-infringing use per 271(f)(2).

Southwest admitted in the Austin Action and does not otherwise dispute that immediately after the Settlement Agreement was signed that Southwest advertised and made available outside of the United States an AstroPlay(R) surface with sand and rubber infill. FieldTurf alleges that Defendant marketed that infringing fill system from within in the United States and sold certain pile fabrics as attached to a flexible backing from the United States for use abroad during the relevant time period in violation of relevant U.S. patent law. Specifically, Plaintiffs allege that Southwest contacted customers, received proposals, sent out quotations, made shipping and customs arrangements, instructed on delivery and installations, and had shipped and accepted payment for the pile fabric and flexible backing components of the AstroPlay(R) product supplied from the U.S.

This Court is not convinced that Plaintiffs have set forth evidence to create a material issue of fact with regard to any offer to sell an allegedly infringing product from within the United States as required **[**60]** under *35 U.S.C. § 271(a)*. ***HN32***[] The offer to sell the '283 patented invention would need to be accomplished within the United States in order to fall under the blanket of protection afforded by *§ 271(a)*. *See* Rotec Indus., Inc., 215 F.3d 1246. [22] Such a sale **[*732]** would require the traditional commercial offer for a sale under contract law, or communicate to the offeree a "manifestation of willingness to enter into a bargain, so made as to justify another person in understanding that his assent to that bargain is invited and will conclude it." *Id. at 1252-53* (quoting *Restatement (Second) of Contracts § 24* (1979)). This is to say that directing such communications and other marketing materials from within the United States is not necessarily excluded as an offer for sale within the meaning of *§ 271(a)*. *See 3 D Systems, Inc, 160 F.3d at 1379* (price quotation letters could be regarded as "offers to sell" where letters described allegedly infringing item and price at which it could be purchased).

[61]** While Plaintiffs offer evidence that the Defendant met in the United States with representatives from overseas who were soliciting offers for AstroPlay(R) to be accepted for installation and use at overseas playing fields, the evidence suggests that these overseas visitors were present in the United States merely to observe the artificial turf installations with their own clients. Even viewing these visits in the light most favorable to the Plaintiffs, mere visits by other parties would be insufficient to evidence an extension of the requisite commercial offer by Defendant to sell any infringing product during these visits by overseas representatives and their clients.

More troubling are Plaintiffs' allegations based on the deposition testimony of Harry Salomons and documents produced suggesting that quotes, pricing information and orders for the AstroPlay(R) product were directed and accepted by Southwest from its home office in Leander, Texas, and that Southwest faxed offers and acceptances from its offices in the United States to installations overseas.

However, upon reading the deposition transcript of Salomons, upon which Plaintiffs rely in substantial part, this Court finds **[**62]** that Salomons's testimony describes a system of deflecting inquiries from abroad to representatives outside of the United States, a practice that hardly reveals the requisite content manifesting an "offer for sale" as sought by Plaintiffs.

Further, Salomons's testimony about the elements of the foreign installations that are produced in the U.S., taken in context, show only that the pile fiber, termed a "carpet" therein, were produced in and exported from the United States. Even where his terminology might be otherwise construed, the Court notes that the documents relied upon in Plaintiff's Response are shipping documents and invoices for rolls of a product referenced only as "AstroPlay," paint, thread or nylon, and adhesive. Assuming, in the absence of proof otherwise, that a completed filled system cannot be shipped in rolls, the referenced documents reveal only that Defendant shipped and provided invoices for the pile fiber system described by Defendant.

---

[22] Even where prospective customer visited defendant's headquarters in the United States weeks before defendant submitted a bid, defendant worked on bid proposal and prepared pricing information in the United States, the Federal Circuit found the actual offer to sell took place *outside* the United States and other activities were insufficient as matter of law to establish an "offer for sale" within the boundaries of the United States of the infringing equipment at issue. *Rotec Indus., Inc., 215 F.3d 1246*.

Insofar as any offers to sell the AstroPlay(R) pile fabric, an element of the allegedly infringing installations, were made within the United States, Plaintiffs' argument is insufficient to rise to the level of patent infringement **[**63]** notwithstanding the evidence presented. ***HN33***[] An offer to sell a component of a patented invention is not, as a matter of law, an offer to sell the patented invention. *See* *Rotec Indus., Inc., 215 F.3d 1246 at 1250, 1255*. Nor is the AstroPlay(R) pile fabric a "staple article or **[*733]** commodity of commerce" unsuitable for substantial uninfringing use as the pile fabric has uses in addition to those in the patented invention. *See* *C.R. Baird, Inc. v. Advanced Cardiovascular Systems, Inc., 911 F.2d 670, 674-75 (Fed. Cir. 1990)* (*citing* *Dawson Chem Co. v. Rohm & Haas Co., 448 U.S. 176, 199, 65 L. Ed. 2d 696, 100 S. Ct. 2601 (1980))*.

HN34[] *§ 271(f)(1)* provides as follows:

> Whoever without authority supplies or causes to be supplied in or from the United States *all or a substantial portion* of the components of a patented invention, where such components are uncombined in whole or in part, in such manner as to actively induce the combination of such components outside of the United States in manner that would infringe the patent if such combination occurred within the United States, shall be liable as an infringer. **[**64]** [23]

35 U.S.C. § 271(f)(1) (emphasis added). ***HN35***[] The language of *§ 271(f)(1)* speaks in terms of "components" (plural) that are combined or are to be combined as opposed to the language of *§ 271(f)(2)* which imposes liability in connection with certain supplies of a singular "component." *Id.* at n. 5.

Considering the other components of the '283 Patent-the subsurface, sand, and the resilient particles, this Court cannot find that the plain meaning of *§ 271(f)(1)* yields liability for infringement where only one component of four comprising the patent is supplied from within the United States. [24] *See* *Bristol-Myers Squibb Co., 2001 U.S. Dist. LEXIS 16895 **[**65]** at *12* (supplying from the United States one component of a patented two-component chemical product did not rise to the level of a violation of *§ 271(f)(1)*). ***HN37***[] Recognizing the tension between providing protection for patented inventions and avoiding extraterritorial effect of U.S. patent law, the Court is convinced that exporting a single component, here the pile fabric, of a patented invention abroad will not rise to the level of providing "a substantial portion of the patented invention."

[66]** Finally, ***HN38***[] *35 U.S.C. § 271(f)(2)* creates liability for infringement if one supplies "any component of a patented invention that is especially made or especially adapted for use in the invention and not a staple article or commodity of commerce suitable for substantial non-infringing use." *35 U.S.C. § 271(f)(2)*. To establish that the article is a staple article or commodity of commerce suitable for substantial non-infringing use, the plaintiff must have proof that the article has no use except in the patented invention. *See* *C.R. Baird, Inc., 911 F.2d at 674-75*.

Plaintiffs suggest that there is no evidence to indicate that Southwest made any market overseas of the pile fabric as a "staple article," rather stating that the evidence reveals that the pile fabric was custom made by Defendant in the United States for overseas AstroPlay(R) installations and installed in at least 99 of 100 installations in Europe, all of which used an allegedly infringing sand and rubber **[*734]** infill. Notwithstanding Plaintiffs' statements concerning the pile fabric's use in allegedly infringing sand and rubber infill installations, Plaintiffs **[**67]** have not contradicted Defendant's evidence that the "pile fabric" at issue was used in other non-infringing products as well, including those playing surfaces filled only with rubber particles in several countries and, interestingly, to

[23] ***HN36***[] Courts have interpreted this language narrowly in order to avoid giving extraterritorial effect to otherwise domestic patent protection. *See* *Waymark Corp., 245 F.3d at 1368*; *Bristol-Myers Squibb Co. v. Rhone-Poulenc Rorer, Inc., 2001 U.S. Dist. LEXIS 16895 at *20*.

[24] Plaintiffs attempts to divide the pile fabric component into two parts, having previously treated the pile fabric as a single component of the '283 Patent, are not well taken by this Court. In any event, where the two alleged elements are so intimately intertwined and distinct from the other stated elements as to have been previously construed by the parties as a single element of the invention, the Court finds that whether 1 of 4 or 2 of 5 elements are so provided it will not rise to the level of providing the requisite "substantial portion of the patented invention."

department stores for use in window dressings to create the appearance of grass. [25] Plaintiffs demonstration that such pile is used in allegedly infringing fields abroad cannot alone create a violation of *35 U.S.C. § 271(f)(2)* where Defendant has demonstrated other uses for the pile product that it supplies overseas. *See* *C.R. Baird, Inc., 911 F.2d at 674-75*.

Having so decided, it will not be necessary **[**68]** for this Court to reach the issue of whether the installations overseas were, in fact, the patented invention of the '283 Patent. The foreign installations alleged to infringe the '283 Patent do not fall within the realm of protection afforded by U.S. patent law.

5. Plaintiffs Lack Standing with Regard to Claims under the Kentucky Consumer Protection Act, *KY. REV. STAT. 367.010*

Plaintiffs have alleged that Defendant participated in unfair competition in violation of the Kentucky Consumer Protection Act. *KY. REV. STAT. 367.170*.

HN39[] *KY. REV. STAT. 367.170(1)* states that "unfair, false, misleading or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful." As stated in then-Chief Judge Henry Wilhoit's Order filed on October 6, 2001, *KY. REV. STAT. 367.220(1)* sets forth the standing requirements for such a Kentucky Consumer Protection Act claim under *KY. REV. STAT. 367.170*:

> ***HN40***[] Any person who purchases or leases goods or services primarily for personal, family, or household purposes and thereby suffers any ascertainable loss of money or property, real, or personal, a result of the use or employment by another person of a method, act **[**69]** or practice declared unlawful by *KY. REV. STAT. 367.010*, may bring an action …

KY. REV. STAT. 367.220(1). Judge Wilhoit's order continues, "FieldTurf has not alleged privity with Southwest and is not a consumer for Kentucky Consumer Protection Act purposes." [October 6, 2002 Order at 11.] Accordingly, Plaintiff's claims pursuant to *KY. REV. STAT. 367.010* will be dismissed with prejudice.

6. Plaintiffs Have Failed to Provide Evidence Sufficient to Maintain the Remaining Causes of Action Under Kentucky Common Law

Defendant also states that summary judgment is appropriate for Plaintiffs' claims of common law unfair competition, commercial disparagement and defamation [26], and tortious interference with economic relations. In their own way, these claims are Plaintiffs' catch-all claims with regard to Defendant's alleged behavior, relying on the proof underlying the other claims to make these actions lie.

[70]** ***HN41***[] "Unfair competition" at common law in Kentucky requires proof that the Defendant engaged in acts or practices **[*735]** "for the purposes of pirating the trade of a competitor," such as misappropriation or misrepresentation, and such acts injured the plaintiff "by reason of the loss of business or impairment of good will." *Covington Inn Corp. v. White Horse Tavern, Inc., 445 S.W.2d 135, 138-39 (1969)*. No one has alleged that Southwest has attempted to misappropriate FieldTurf's goods, and the alleged misrepresentations by Southwest are nowhere to be found. Specifically, as stated hereinabove, FieldTurf has failed to state that statements made by Southwest are false or that any customers were deceived by said statements.

Similarly, ***HN42***[] the failure to demonstrate that statements made by Southwest's representatives are literally false for the purposes of the Lanham Act defeats any action on the part of Plaintiffs for defamation under Kentucky

---

[25] Further, as Defendant reminds the Court, inventor Haas has testified that the pile fabric was manufactured prior to the time Haas applied for his patent. This suggests, and Plaintiffs do not demonstrate otherwise, that the pile fabric is hardly a feature specific only to those fields constructed with '283 Patent technology.

[26] Commonwealth common law does not recognize a separate cause of action for "commercial disparagement."

law. In order to demonstrate a claim, Plaintiffs would necessarily have to produce evidence that the allegedly defamatory language was not true, among other elements of the claim. *CMI, Inc. v. Intoximeters, Inc., 918 F. Supp. 1068, 1083 (W.D.Ky. 1995).* **[**71]** Having failed to provide that evidence, the claim must also fail.

Finally, ***HN43***[] to successfully support a claim for tortious interference with economic relations at common law, Plaintiffs must demonstrate (1) the existence of a valid business relationship or expectancy, (2) Defendant's knowledge of that relationship or expectancy, (3) Defendant's intentional act of interference with that relationship or expectancy, (4) an improper motive, (5) causation, and (6) special damages. *CMI, Inc., 918 F. Supp. at 1080*. It is taught in the Commonwealth that "it is clear that to prevail a party seeking recovery must show malice or some significantly wrongful conduct." *National Collegiate Athletic Ass'n By and Through Bellarmine College v. Hornung, 754 S.W.2d 855, 859 (Ky. 1988)*. Further, it is stated:

> Kentucky courts have been very cautious in expanding unduly the tort remedies available to those in contractual relationships. There are sound reasons for this caution. The actual language of § 766A is so all encompassing and vague that to adopt it directly would cause tremendous confusion without creating a clear societal benefit. The conduct conceivably **[**72]** within its scope could be indistinguishable from the kind of unfettered commerce upon which courts have been reluctant to pass judgment. Moreover, the available remedies address the most direct and readily identifiable harms. The torts discussed in § 766A necessarily involve highly speculative damages. Parties to contracts have a full array of contractual remedies to resolve inequities of performance caused by third persons. The Court is not persuaded that this new tort is necessary to correct a glaring inequity among commercial parties. Finally, the kind of conduct which is theoretically actionable under this new tort may be of an entirely different quality and character than that found in this case. As examples of actionable conduct Haynes cites destroying building supplies, illegally preventing issuance of building permits, physical intimidation of employees or other kinds of physical interference. Haynes. *Kentucky Jurisprudence,* § 12-11 (1987).

CMI, Inc., 918 F. Supp. at 1079-1080.

Plaintiffs rely upon incidents surrounding the FieldTurf(R) installation at the City of Lake Oswego to demonstrate Southwest's alleged interference with FieldTurf's business **[**73]** and contractual relations. It is unclear to this Court how providing its ASTM test results to the City of Lake Oswego-the act that seems to be the gravamen of Plaintiffs' argument-rises to the level of "significantly wrongful conduct," particularly in light of **[*736]** this Court's analysis of such testing hereinabove with regard to the Lanham Act. Even assuming that Southwest did, as FieldTurf alleges, test the fields without permission of the city or its consultants, Plaintiffs have failed to demonstrate that Defendant's trespass onto the city's property had the destructive quality-preventing something from taking place or destroying something-anticipated by Kentucky courts in recognizing torts of interference such as the one at bar. Having failed to demonstrate the necessary conduct by Southwest, Plaintiffs claim shall be dismissed.

Conclusion

For the foregoing reasons, this Court finds that Plaintiffs have failed to demonstrate that "there is a genuine issue for trial." *Hall, 128 F.3d at 422*. Having so concluded, all of Plaintiffs' claims shall be dismissed with prejudice.

Accordingly, **IT IS ORDERED:**

(1) That the Defendants' Motion for Partial Summary Judgment **[**74]** [Record No. 342] be, and hereby is, **GRANTED;** and

(2) That the Defendants' Motion for Summary Judgment [Record No. 350] be, and hereby is, **GRANTED.**

This the 21st day of November, 2002.

Evidence > ... > Testimony > Expert Witnesses > General Overview

Evidence > Admissibility > Expert Witnesses > Helpfulness

HN2[] Expert Witnesses, Daubert Standard

Under *Fed. R. Evid. 702*, when faced with a proffer of expert scientific testimony, a trial judge must determine at the outset, pursuant to *Fed. R. Evid. 104(a)* whether an expert is proposing to testify to (1) scientific knowledge that (2) will assist the trier of fact to understand or determine a fact in issue. This gatekeeping function extends beyond scientific testimony to testimony based on "technical" and "other specialized" knowledge.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN3[] **Expert Witnesses, Daubert Standard**

The Court of Appeals for the Third Circuit has established that *Fed. R. Evid. 702* as interpreted by Daubert and its progeny embodies three distinct substantive restrictions on the admission of expert testimony: (1) qualifications; (2) reliability; and (3) fit.

Evidence > Admissibility > Expert Witnesses

Evidence > Burdens of Proof > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN4[] **Admissibility, Expert Witnesses**

The proponent of expert testimony pursuant to *Fed. R. Evid. 702* bears the burden of establishing its admissibility by a preponderance of the evidence.

Evidence > Admissibility > Expert Witnesses

Evidence > Types of Evidence > Testimony > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN5[] **Admissibility, Expert Witnesses**

Fed. R. Evid. 702 requires an expert witness to have "specialized knowledge" regarding the area of testimony. The basis of this specialized knowledge can be practical experience as well as academic training and credentials. Courts have interpreted the specialized knowledge requirement liberally, and have stated that this policy of liberal admissibility of expert testimony extends to the substantive as well as the formal qualification of experts. However, at a minimum, a proffered expert witness must possess skill or knowledge greater than the average layman.

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN6[] **Testimony, Expert Witnesses**

The factors which govern reliability of expert testimony for purposes of *Fed. R. Evid. 702* are as follows: (1) whether a method consists of a testable hypothesis; (2) whether the method has been subject to peer review; (3) the known or potential rate of error; (4) the existence and maintenance of standards controlling the technique's operation; (5) whether the method is generally accepted; (6) the relationship of the technique to methods which have been established to be reliable; (7) the qualifications of the expert witness testifying based on the methodology; and (8) the non-judicial uses to which the method has been put.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

Evidence > Types of Evidence > Testimony > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN7[] **Expert Witnesses, Daubert Standard**

For purposes of *Fed. R. Evid. 702*, Daubert makes certain that an expert, whether basing testimony upon professional studies or personal experience, employs in the courtroom the same level of intellectual rigor that characterizes the practice of an expert in the relevant field. A trial judge must have considerable leeway in deciding in a particular case how to go about determining whether particular expert testimony is reliable. That is to say, a trial court should consider the specific factors identified in Daubert where they are reasonable measures of the reliability of expert testimony. These factors are not exhaustive and the inquiry remains flexible. Where the testimony is not scientific in nature, relevant reliability concerns may focus upon personal knowledge or experience, as opposed to scientific foundations.

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN8[] **Testimony, Expert Witnesses**

The fit requirement for purposes of evaluating the admission of expert testimony under *Fed. R. Evid. 702* stems from the textual provision that "scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue." Admissibility under this factor turns on the proffered connection between the scientific research or test result to be presented and particular disputed factual issues in the case. This measure is not intended to be a high one. Its standard is not dissimilar to the general liberal standard of relevance under the Federal Rules of Evidence.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN9[] **Expert Witnesses, Daubert Standard**

An expert witness must explain the means by which he reached his conclusions, and such means must satisfy at least one of the Daubert factors of reliability. An expert's opinion must be based on the methods and procedures of science rather than on subjective belief or unsupported speculation.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN10[] **Regulated Practices, Price Fixing & Restraints of Trade**

Collusion, for purposes of ***antitrust law***, is defined as an agreement between two or more persons to defraud a person of his rights by the forms of law, or to obtain an object forbidden by law, or a secret combination, conspiracy, or concert of action between two or more persons for fraudulent or deceitful purpose.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Civil Procedure > Pretrial Matters > Motions in Limine > General Overview

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

Evidence > ... > Testimony > Expert Witnesses > General Overview

Evidence > Admissibility > Expert Witnesses

HN11[] **Expert Witnesses, Daubert Standard**

For purposes of a motion in limine to determine the admissibility of expert testimony pursuant to *Fed. R. Evid. 702*, there is no need for a district court to provide a plaintiff with an open-ended and never-ending opportunity to meet a Daubert challenge until plaintiff gets it right.

Opinion

MEMORANDUM

This is an antitrust action in which plaintiff alleges that the defendants colluded in the bidding process for a roofing project, to ensure that defendant Eastern Applicators, Inc. submitted the winning bid. In support of its defense, defendants have offered Laurence E. Parisi as an expert witness pursuant to *Federal Rule of Evidence 702*. [1] Mr.

[1] *Federal Rule of Evidence 702*, as amended December 1, 2000, states:

> ***HN1***[] If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education, may testify thereto in the form of an opinion or otherwise, if (1) the testimony is based upon sufficient facts or data, (2) the testimony is

Parisi offers his opinion "that the bids received in May **[*2]** of 1997 for the re-roofing project were reasonable and non-collusive." (Pl. Mot., Exh. D at 1.) Now before the Court is the motion *in limine* of plaintiff SmithKline Beecham Corporation ("SmithKline") to suppress the Mr. Parisi's expert testimony. For the reasons set forth below, the motion of plaintiff will be denied in part and granted in part.

Legal Standard

HN2[] Under *Rule 702*, when "faced with a proffer of **[*3]** expert scientific testimony … the trial judge must determine at the outset, pursuant to *Rule 104(a)* whether the expert is proposing to testify to (1) scientific knowledge that (2) will assist the trier of fact to understand or determine a fact in issue." *Daubert v. Merrell Dow Pharms. 509 U.S. 579, 592, 113 S. Ct. 2786, 2796, 125 L. Ed. 2d 469 (1993)* (footnotes omitted). This gatekeeping function extends beyond scientific testimony to "testimony based on … 'technical' and 'other specialized' knowledge." *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 141, 119 S. Ct. 1167, 1171, 143 L. Ed. 2d 238 (1999)*. ***HN3***[] The Court of Appeals for the Third Circuit has established that *Federal Rule of Evidence 702* as interpreted by *Daubert* and its progeny embodies "'three distinct substantive restrictions on the admission of expert testimony: qualifications, reliability, and fit.'" *United States v. Mathis, 264 F.3d 321, 335* (3d Cir. Aug. 30, 2001) (quoting *Elcock v. Kmart Corp., 233 F.3d 734, 741 (3d Cir. 2000))*. ***HN4***[] The proponent of the expert testimony bears the burden of establishing its admissibility by a preponderance of the evidence. **[*4]** *See* *Oddi v. Ford Motor Co., 234 F.3d 136, 144 (3d Cir. 2000)*, *cert. denied, 121 S. Ct. 1357 (2001)*.

The Third Circuit Court of Appeals has set the following standard to qualify as an expert:

> ***HN5***[] *Rule 702* requires the witness to have "specialized knowledge" regarding the area of testimony. The basis of this specialized knowledge "can be practical experience as well as academic training and credentials." We have interpreted the specialized knowledge requirement liberally, and have stated that this policy of liberal admissibility of expert testimony "extends to the substantive as well as the formal qualification of experts." However, "at a minimum, a proffered expert witness … must possess skill or knowledge greater than the average layman …."

Elcock, 233 F.3d at 740 (quoting *Waldorf v. Shuta, 142 F.3d 601, 625 (3d Cir. 1998))*.

HN6[] The factors which govern reliability are as follows:

> (1) whether a method consists of a testable hypothesis; (2) whether the method has been subject to peer review; (3) the known or potential rate of error; (4) the existence and maintenance of standards controlling the **[*5]** technique's operation; (5) whether the method is generally accepted; (6) the relationship of the technique to methods which have been established to be reliable; (7) the qualifications of the expert witness testifying based on the methodology; and (8) the non-judicial uses to which the method has been put.

Elcock, 233 F.3d at 745-46 (quoting *In re Paoli R.R. Yard PCB Litig., 35 F.3d 717, 742 n.8 (3d Cir. 1994))*. It has been noted that ***HN7***[] *Daubert:*

> makes certain that an expert, whether basing testimony upon professional studies or personal experience, employs in the courtroom the same level of intellectual rigor that characterizes the practice of an expert in the relevant field …. The trial judge must have considerable leeway in deciding in a particular case how to go about determining whether particular expert testimony is reliable. That is to say, a trial court should consider the specific factors identified in *Daubert* where they are reasonable measures of the reliability of expert testimony.

Elcock, 233 F.3d at 745-46 (quoting *Kumho Tire, 526 U.S. at 152, 119 S. Ct. at 1176*). Thus, the **[*6]** factors outlined above are not exhaustive and the inquiry remains flexible. *See* *Elcock, 233 F.3d at 746*. Where the

---

the product of reliable principles and methods, and (3) the witness has applied the principles and methods reliably to the facts of the case.

testimony is not scientific in nature, "relevant reliability concerns may focus upon personal knowledge or experience," as opposed to "scientific foundations." *Kumho Tire, 526 U.S. at 150, 119 S. Ct. at 1175*.

HN8[] The fit requirement stems from the textual provision that "scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue." *Mathis, 264 F.3d at 335* (quoting *F.R.E. 702*). Admissibility under this factor turns on "the proffered connection between the scientific research or test result to be presented and particular disputed factual issues in the case. *Oddi, 234 F.3d at 145*. This measure is "not intended to be a high one." *Id.* Its standard is not dissimilar to the general liberal standard of relevance under the Rules. *See* *Mathis, 264 F.3d at 335*.

Analysis

Mr. Parisi is an architect with a bachelor degree in architecture from the New York Institute of Technology. (Pl. Mot., Exh. A.) Since **[*7]** 1977, he has been the owner and president of his own architectural firm, Laurence E. Parisi, P.C. *(Id.)* His practice began primarily in residential gut renovation projects, but has expanded to include commercial, institutional, and public work renovations and additions such as new roofs and exterior renovations. (Pl. Mot., Exh. B at 10.) In his position, Mr. Parisi calculates his own estimates for bids to evaluate the bids he receives in his various projects. (*Id.* at 25.) Plaintiff's experts, Robert P. Piccione and John DiNenna, were previously found qualified to testify regarding the reasonableness of the bids at issue based on their years of experience in the roofing industry. (Order of November 29, 2001, Doc. No. 52.) I find that Mr. Parisi's practical experience and background has similarly provided him with specialized knowledge beyond the ken of the average layman in this area. Consequently, I find that Mr. Parisi is qualified to testify as an expert witness on what constitutes a reasonable bid for commercial roofing projects in 1997. Because of Mr. Parisi's knowledge and experience in the Northern New Jersey and New York area, I find him facially competent to evaluate **[*8]** the bids in this case arising in nearby Philadelphia, Pennsylvania.

Because the proffered testimony is not scientific in nature, the methodology need not be subjected to rigorous testing for scientific foundation or peer review, but must still provide a methodology that can be proven to be reliable. In calculating his review of the bids for plaintiff's roofing project, Mr. Parisi reviewed the following materials: (1) the bid specifications; (2) the bids submitted by the actual bidders on the first and second round of bids; and (3) the roof surveys. (Pl. Mot., Exh. D, Parisi Letter; Exh. B at 13-14.) He further inspected the roofs in question, and reviewed pictures of them taken prior to the completion of the project. (Pl. Mot., Exh. B at 18-19.) He further compared the controversial bids to the bids submitted for his own projects in 1997. (*Id.* at 21-22.) The method used by Mr. Parisi to derive an estimated bid is similar to the methods used by Mr. Piccione and Mr. DiNenna that were previously accepted as facially reliable by this Court. As well, the methodology is strongly rooted in Mr. Parisi's practical experience. As I have previously determined that there is no single standard **[*9]** formula for bid estimations, (Doc. No. 52 at 5-6), the fact that Mr. Parisi has maintained a successful architecture firm for many years lead to the conclusion that his estimation process and management of roofing bids for his clients, like those of Mr. Piccione and Mr. DiNenna, is within the realm of reasonable and acceptable methods.

To the extent Mr. Parisi's opinion regarding the reasonableness of the bids at issue would assist the jury in resolving the factual issue of whether they were competitive, it is relevant and helpful to the trier of fact, and therefore fits the purpose for which it is being offered. I thus conclude that Mr. Parisi's testimony regarding whether defendants' bids fell within the ambit of reasonable business estimates is admissible.

Nevertheless, with regard to Mr. Parisi's opinion that the bids at issue were not collusive, I find no support in the record to find Mr. Parisi qualified on this issue. Mr. Parisi has not claimed or shown any specialized knowledge, skill or experience that would qualify him as an expertise on matters of collusion. [2] **[*11]** Nor has Mr. Parisi set forth any

[2] ***HN10***[] Collusion is defined as "an agreement between two or more persons to defraud a person of his rights by the forms of law, or to obtain an object forbidden by law," or "[a] secret combination, conspiracy, or concert of action between two or more persons for fraudulent or deceitful purpose." BLACK'S LAW DICTIONARY 264 (6th ed. 1990).

reliable methodology to reach his opinion that there was no collusion. ***HN9***[] The expert **[*10]** must explain the means by which he reached his conclusions, and such means must satisfy at least one of the *Daubert* factors of reliability. "An 'expert's opinion must be based on the methods and procedures of science rather than on subjective belief or unsupported speculation.'" *Oddi v. Ford Motor Co., 234 F.3d 136, 158 (3d Cir. 2000)* (quoting *In re Paoli R.R. Yard PCB Litig., 35 F.3d at 742*). In light of Mr. Parisi's statements, [3] his analysis of whether or not there was collusion among the bidders amounts to no more than speculation. Mr. Parisi's conclusion rises to nothing more than "ipse dixit [that] does not withstand Daubert's scrutiny." *Id.* The Court thus determines that his opinion, insofar as it attempts to set forth conclusions on the issue of collusion, poses no benefit in assisting "the trier of fact to understand or determine a fact in issue" as required under *Rule 104(a)* and *Daubert.* His opinion could only cause the jury to join in his speculation.

[*12] The Court further determines that, in light of these findings, there appears to be no need to hold an *in limine* hearing. *See id., 234 F.3d at 153-54* (record sufficient to exclude expert testimony without hearing) (***HN11***[] no need for a district court to "provide a plaintiff with an open-ended and never-ending opportunity to meet a *Daubert* challenge until plaintiff 'gets it right'") (quoting *In re TMI Litig., 199 F.3d 158, 159 (3d Cir. 1999)*, *cert. denied sub. nom. General Public Utilities Corp. v. Abrams, 530 U.S. 1225, 147 L. Ed. 2d 266, 120 S. Ct. 2238 (2000))*. Consequently, I conclude that Mr. Parisi's opinion on the collusive nature of the defendants' bids is inadmissible as expert testimony under *Rule 702*.

Conclusion

For the foregoing reasons, the motion of plaintiff will be granted in part and denied in part. Mr. Parisi's testimony regarding the reasonableness of the defendants' bids is admissible, but his opinion regarding any collusion or lack thereof among the defendants will be suppressed.

An appropriate Order follows.

---

[3] Mr. Parisi's deposition transcript on this point provides as follows:

> Q: Let me ask about the other part of your conclusions where you concluded that they are not [sic] noncollusive. What is it that leads you to believe that these three bids are noncollusive?
>
> A: Well I see that the numbers are, again, consistent with what I'm familiar with. Nothing was glaring. I would have no reason to think that it was something that was conspired or together.
>
> Q: Okay. Is there a way to tell from the relationship of one bid to another, either from the relationship of one bid to another in terms of dollars or the relationship of one or more bids to a budget figure, whether or not the bids are collusive?
>
> [Objection to form]
>
> A: Well, you know, when I look at these numbers -- like, for instance the Donofrio bid was high within the three -- I have about five years worth of work with him bidding, and he was the exact same way. I don't see him varying in any way from what he normally does for me in my bids. To me, you know, that was an indication that he -- unless he's collusive with my bids too.
>
> Q: Which we'll presume he is not.
>
> A: I didn't see anything here that would lead me to believe that it was collusive.
>
> Q: What hypothetically would you look for to see if, in your view, bids were collusive?
>
> A: I don't really look for that sort of thing. I don't take that approach to my business.
>
> Q: Okay.
>
> A: But I guess if I saw something that all the numbers were out of whack completely, I would just throw them all out. I wouldn't entertain any.

(Pl. Mot. Exh. B at 43-44.)

ORDER - ENTERED DEC-4 2002

AND NOW this 3rd day of December, 2002, upon **[*13]** consideration of the motion *in limine* of plaintiff SmithKline Beecham Corporation ("SmithKline") to exclude the expert testimony of Laurence E. Parisi (Doc. No. 77), and the response thereto, and for the reasons set forth in the foregoing memorandum, **IT IS HEREBY ORDERED** that the motion *in limine* of plaintiff is **GRANTED IN PART AND DENIED IN PART.** Mr. Parisi may testify as to the factual issue of the reasonableness of the defendants' bids, but may not testify as to the issue of whether the bids were collusive.

LOWELL A. REED, JR., S.J.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN1[] **Standards of Review, De Novo Review**

The court of appeals reviews a judgment as a matter of law (JM) de novo. To defeat a motion for JM, the nonmovant must present substantial evidence opposed to the motion. In other words, the nonmovant must present evidence that is of such quality and weight that reasonable and fair-minded men in the exercise of impartial judgment might reach different conclusions.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Sherman Act, Claims**

Section 1 of the Sherman Act does not proscribe independent conduct. So, to establish a § 1 violation, a plaintiff must demonstrate concerted action. Evidence of conduct that is as consistent with permissible competition as with illegal conspiracy cannot support an inference of conspiracy. In essence, an antitrust plaintiff who is unable to present direct evidence of a conspiracy must introduce circumstantial evidence that tends to exclude the possibility of independent action.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Antitrust & Trade Law, Sherman Act**

In the absence of direct evidence of a conspiracy, an antitrust plaintiff must present evidence tending to exclude the possibility of independent conduct. To do so, the plaintiff is required to demonstrate that the parties and had a conscious commitment to a common scheme designed to achieve an unlawful objective.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Powers > Acts Through Agents

HN4[] **Antitrust & Trade Law, Sherman Act**

A corporate entity can act only through its agents. Consequently, in the absence of evidence of formal decision making, an antitrust plaintiff must prove an association's conduct by demonstrating that the action was taken by individuals having apparent authority to act for the association.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

In the context of a § 1 of the Sherman Act claim, evidence that a manufacturer took certain actions does not tend to exclude the possibility of independent conduct if the actions were in the manufacturer's independent self-interest.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

Despite the fact that a trade association by its nature involves collective action by competitors, it is not by its nature a "walking conspiracy," its every denial of some benefit amounting to an unreasonable restraint of trade.

Antitrust & Trade Law > Sherman Act > General Overview

Commercial Law (UCC) > Sales (Article 2) > Form, Formation & Readjustment > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN7[] Antitrust & Trade Law, Sherman Act

Section 1 of the Sherman Act prohibits only those agreements that constitute unreasonable restraints of trade. The question whether a particular restraint is unreasonable frequently turns on whether it is examined under the rule of reason or falls within the category of practices that are judged to be unreasonable per se. If application of the per se rule is appropriate, competitive harm is presumed, and further analysis is unnecessary. If, by contrast, the restraint should be judged according to the rule of reason, its net potential for competitive harm must be evaluated by weighing its probable anticompetitive effects against any procompetitive benefits.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Professional Associations

HN8[] Antitrust & Trade Law, Sherman Act

Typically, it is the type of restraints that are "always or almost always" anticompetitive that are deemed to be unreasonable per se.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Professional Associations

HN9[] Antitrust & Trade Law, Sherman Act

In the context of a § 1 of a Sherman Act claim, what is required in cases involving advertising restrictions implemented by a professional association is an enquiry meet for the case. Under this approach, an analysis is sufficient if it openly addresses the circumstances, details, and logic of a restraint in reaching its conclusion.

Civil Procedure > Appeals > Standards of Review > General Overview

HN10[] Appeals, Standards of Review

The court of appeals may not disturb the district court's exclusion of the evidence if that ruling can be upheld on other grounds, regardless of whether the court relied on those grounds.

Opinion by: JERRY E. SMITH

Opinion

[*760] JERRY E. SMITH, Circuit Judge:

Anthony Viazis appeals a judgment as a matter of law ("j.m.l.") in favor of the American Association of Orthodontists ("AAO"), the Southwestern Society of Orthodontists **[*761]** ("SWSO"), GAC International, Inc. ("GAC"), and Leo A. Dohn. Finding no reversible error, we affirm.

I.

Viazis, an orthodontist practicing in the Dallas area, designed and patented a triangular orthodontic bracket in 1991.[1] He contends that his bracket is more effective than other designs in that it decreases the amount of time braces must be worn. In 1992, Viazis entered into a contract with GAC, a manufacturer of orthodontic devices, to market and distribute his bracket.

[2]** In April 1996, Viazis sent an advertising mailer to the parents of school age children in the Plano, Texas, area near Dallas, claiming that braces made using the Viazis bracket were faster, less expensive, and potentially safer than other products. In May of that year, Viazis held a seminar promoting his brackets directly to these parents. A member of the Greater Dallas Association of Orthodontists ("GDAO") and the AAO forwarded a complaint regarding

---

[1] Brackets are components of braces that are fixed onto the teeth with an adhesive. Wires are then passed through the brackets, and forces are applied to straighten the teeth.

Viazis's advertisements to the AAO, indicating that Viazis's conduct might violate provisions of that organization's Code of Professional Responsibility.

Viazis alleged that the resulting controversy surrounding his advertisements resulted in the termination of the marketing aspect of his agreement with GAC. There was an ad verse impact on the relationship between Viazis and GAC, and their arrangement was re structured in mid-1997. GAC continued to manufacture the Viazis bracket but ceased all marketing activities.

In December 1997, the AAO advised Viazis that he could be subject to disciplinary action as a result of the claims of faster, safer, and more effective treatment made in his advertisements. In December 1999, after a hearing **[**3]** and appeal, the AAO suspended Viazis's membership in the organization.

Meanwhile, in August 1998, Viazis filed this action against the AAO, the SWSO, the GDAO, and various individuals who are no longer defendants. Viazis subsequently added Dohn and GAC as defendants. By the time of trial, Viazis's only remaining claim was that the AAO, SWSO, GAC, and Dohn had con spired to exclude his brackets from the market for orthodontic devices in violation of § 1 of the Sherman Act. At the conclusion of Viazis's case-in-chief at trial, the court granted defendants' motion for j.m.l.

II.

HN1[] We review a j.m.l. *de novo*. *Casarez v. Burlington N./Santa Fe Co., 193 F.3d 334, 336 (5th Cir. 1999)*. To defeat a motion for j.m.l., the nonmovant must present "substantial evidence opposed to the motion[]." [2] In other words, the nonmovant must present evidence that is "of such quality and weight that reasonable and fair-minded men in the exercise of impartial judgment might reach different conclusions." *Id*.

[4]** ***HN2***[] Section 1 of the Sherman Act does not pro scribe independent conduct. *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. So, to establish a § 1 violation, a plaintiff must demonstrate concerted action. *Id*. Further, although in ruling on a motion for j.m.l. the court must consider all the evidence offered by either party "in the light and with all reasonable inferences in favor of" the party opposed **[*762]** to the motion, *Giles v. GE, 245 F.3d 474, 481 (5th Cir. 2001)* (internal quotation marks omitted), in this case the range of permissible inferences is limited by particular principles of ***antitrust law***, *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. Accordingly, evidence of conduct that is "as consistent with permissible competition as with illegal conspiracy" cannot support an inference of conspiracy. *Id*. In essence, an antitrust plaintiff who is unable to present direct evidence of a conspiracy must introduce circumstantial evidence that "tends to exclude the possibility of independent action." *Monsanto, 465 U.S. at 768*. **[**5]**

Viazis contends that he introduced sufficient evidence of concerted action to avoid j.m.l. He alleges that GAC terminated the marketing agreement in response to threats made by AAO and its regional affiliates. He also contends that the decision of an AAO disciplinary committee to suspend him for one year was the result of unlawful concerted action. Viazis failed to introduce sufficient evidence to prove either allegation.

A.

Direct evidence of a conspiracy is that which "explicitly refers to an understanding" between the alleged conspirators. *See* *South way* *Theatres, Inc. v. Ga. Theatre Co., 672 F.2d 485, 493 n.8 (5th Cir. 1982)*. The letter written by Leo Dohn, then-CEO of GAC, which constitutes Viazis's primary evidence bearing on the existence of a conspiracy be tween the AAO and GAC, contains no explicit reference to an agreement between GAC and any

---

[2] *Boeing Co. v. Shipman, 411 F.2d 365, 374 (5th Cir. 1969)* (en banc), *overruled in part on other grounds by* ***Gautreaux v. Scurlock Marine, Inc., 107 F.3d 331 (5th Cir. 1997)*** (en banc).

party. Each of the statements from the letter offered by Viazis as evidence of a conspiracy depends on additional inferences. [3] **[**6]** Therefore, the letter is, at most, circumstantial evidence of a conspiracy. [4]

[7]** **[*763]** As discussed above, ***HN3***[] in the absence of direct evidence of a conspiracy, an antitrust plaintiff must present evidence tending to exclude the possibility of independent conduct. *Monsanto, 465 U.S. at 768*. To do so, Viazis was required to demonstrate that GAC and AAO "had a conscious commitment to a common scheme designed to achieve an unlawful objective." *Id*. Although the Dohn letter contains evidence of complaints received by GAC from accounts in the Dallas area, such complaints are insufficient evidence of concerted action, because "dealer-initiated contact fails to establish that a manufacturer has imposed restrictions collusively, not based on its independent business judgment." [5] In *Culberson*, this court specifically held that a manufacturer's action in the face of customer complaints is not a sufficient basis for a finding of conspiracy. [6]

---

[3] Viazis asserts that Dohn's statements to the effect that GAC might experience national repercussions are "inconsistent with localized complaints," and he claims that Dohn's prediction that Viazis would suffer adverse professional consequences as a result of his seminar are "consistent with ongoing communications." Neither these statements nor any other of the passages cited by Viazis contain explicit reference to an agreement between GAC and any other party.

[4] Viazis contends that he introduced evidence of a conspiracy through testimony that the district court improperly disregarded. The testimony at issue related to whether GAC had a policy against advertising directly to consumers before the events at issue. Dohn testified that GAC had a policy against advertising directly to the public, although Barry Mervine, GAC's representative in Dallas, testified that he was unaware of any such policy. In addition, Viazis testified that GAC had foreknowledge of, and input into, a mailer through which he advertised to the public but failed to object to its contents.

Although, in ruling on a motion for j.m.l., a district court should refrain from making credibility determinations, *see* *Conkling v. Turner, 18 F.3d 1285, 1300 (5th Cir. 1994)*, the court did not necessarily do so here. Mervine's testimony does not establish that GAC advertised directly to consumers, nor even that GAC lacked a policy prohibiting such advertising. All Mervine's testimony establishes is that if such a policy existed or such advertisement took place, he was unaware of it. His testimony, therefore, does not directly contradict Dohn's. Viazis's testimony has a greater tendency to undercut the existence of a longstanding policy against direct advertisement but does not contradict GAC's contention that it had not engaged in direct advertisement in the preceding decade.

In any event, even if the court improperly evaluated the credibility of these two witnesses in arriving at its conclusions, the legal result would be the same. Although proof of a preexisting policy tends to support an inference of independent con duct, *see* *Matrix Essentials, Inc. v. Emporium Drug Mart, Inc., 988 F.2d 587, 594 (5th Cir. 1993)*; *Culberson, Inc. v. Interstate Elec. Co., 821 F.2d 1092, 1094 (5th Cir. 1987)*, the absence of such a policy does not necessarily support an inference of conspiracy. As discussed in part I.B.2 *infra*, GAC was entitled to act in response to customer complaints irrespective of whether it had a preexisting policy.

[5] *Culberson, 821 F.2d at 1094*; *see also* *Matrix Essentials, 988 F.2d 587*.

[6] *See* *Culberson, 821 F.2d at 1093*. Viazis's attempts to distinguish the *Monsanto* line of cases are unpersuasive. He accurately notes that the reasoning in *Monsanto* and its progeny reflects some concern that allowing dealer complaints to serve as evidence of conspiracy would deter legitimate business strategies, such as the adoption of marketing strategies using nonprice restrictions. Viazis contends that such concerns are not implicated here, because "conspiracies aimed at stamping out promising new technology should not be made unduly difficult to prove."

Even if manufacturers' ability to impose legitimate nonprice restrictions were the principal focus of *Monsanto*, this conclusional statement fails to offer any ground for distinguishing the present case. This case implicates GAC's ability to enforce its particular marketing strategy, namely, that of marketing to health professionals rather than the public, and therefore is not distinguishable from *Monsanto* on the ground argued by Viazis.

Further, Viazis ignores the fact that the *Monsanto* Court dealt with the "*two* important distinctions that are at the center of [any] distributor-termination case." *Monsanto, 465 U.S. at 761* (emphasis added). The distinction between price and nonprice restrictions was the second of these; the first was "the basic distinction between concerted and independent action." *Id*. The Court dealt with this distinction by reaffirming the principle that "[a] manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." *Id*. (citing *United States v. Colgate & Co., 250 U.S. 300,*

[8]** Viazis argues, however, that GAC was faced with more than mere dealer complaints. Instead, he maintains, the AAO itself threatened a nationwide boycott to coerce GAC to end its marketing efforts on behalf of Viazis, and GAC acceded to AAO's demands. Such an inference of conspiracy is appropriate only if Viazis presented evidence tending to exclude the possibility of independent conduct on the part of AAO and GAC. To meet this standard, Viazis needed to show both that the AAO threatened a boycott and that GAC's decision to cease marketing the Viazis bracket was inconsistent with its independent self-interest. He failed to do so.

HN4[] A corporate entity such as the AAO can act only through its agents. Consequently, in the absence of evidence of formal decision making, an antitrust plaintiff must prove an association's conduct by demonstrating that the action was taken by individuals having apparent authority to act for the association. *Am. Soc'y of Mech. Eng'rs, Inc. v. Hydrolevel Corp., 456 U.S. 556, 556-67, 72 L. Ed. 2d 330, 102 S. Ct. 1935 (1982)*.

The Dohn letter contains no indication that any of the referenced complaints was initiated by individuals having either **[**9]** actual or apparent authority to speak for the **[*764]** AAO. Viazis introduced no evidence of a membership vote or other formal decisionmaking process through which the AAO acted to threaten GAC or authorized its agents to do so. Nor did he produce evidence that the unnamed Dallas accounts referred to in the Dohn letter had apparent authority to speak for the AAO on such a matter. Viazis has introduced no evidence that the AAO itself, as opposed to some of its individual members, took action with respect to GAC.

Moreover, ***HN5***[] evidence that a manufacturer took certain actions does not tend to exclude the possibility of independent conduct if the actions were in the manufacturer's independent self-interest. [7] In other words, even if Viazis proved that the AAO or its regional affiliates threatened GAC, he must also show that GAC decided to end its relationship in response to those threats. If GAC ignored the threats but ended the relationship with Viazis based on an independent evaluation of its best interests, GAC acted independently, and there was no conspiracy. *See* *Matrix Essentials, 988 F.2d at 594*; *Lovett v. General Motors Corp., 998 F.2d 575, 579-81*. Viazis failed to demonstrate that **[**10]** GAC's decision to alter its relationship with Viazis was contrary to its own interests.

Viazis introduced statements made by GAC regarding the enormous potential market for his bracket and argued that GAC could not have been acting in its own interests when it abandoned its marketing rights. This argument fails, because GAC could have deter mined that the potential benefits from its marketing agreement with Viazis would be out weighed by the loss of business that would result from its continued association with him. [8] Therefore, GAC's decision to alter its relationship with Viazis is not evidence tending to exclude the possibility of independent behavior.

[11]** B.

Although there is no evidence that any authorized agent of the AAO threatened GAC, Viazis does point to one instance of official conduct by the AAO, namely, his suspension pursuant to the finding of an AAO ethics committee that he had violated the organization's prohibition of false and misleading advertising. Because there is no connection be tween this proceeding and GAC, it can constitute action pursuant to a conspiracy only if the members of AAO were conspiring among themselves. Viazis failed to present sufficient evidence of such a conspiracy.

HN6[] Despite the fact that "[a] trade association by its nature involves collective action by competitors[,] . . . [it] is not by its nature a 'walking conspiracy', its every denial of some benefit amounting to an unreasonable restraint of

---

307, 63 L. Ed. 992, 39 S. Ct. 465, 1919 Dec. Comm'r Pat. 460 (1919)). GAC's ability to deal or refuse to deal with Viazis is implicated by these proceedings.

[7] *See* *Matrix Essentials, 988 F.2d at 594*; *Lovett v. Gen. Motors Corp., 998 F.2d 575, 579-81 (8th Cir. 1993)*.

[8] *See* *Bailey's, Inc. v. Windsor Am., Inc., 948 F.2d 1018, 1030 (6th Cir. 1991)*; *see also* *Garment Dist., Inc. v. Belk Stores Servs., Inc., 799 F.2d 905, 909 (4th Cir. 1986)* ("One [legitimate reason for terminating a relationship with a dealer] is to avoid losing the business of disgruntled dealers.").

trade." *Consolidated Metal Products, Inc. v. Am. Petroleum Inst., 846 F.2d 284, 293-94 (5th Cir. 1988)*. In *Consolidated Metal Products*, we rejected a claim of conspiracy based on a trade association's delay in licensing the plaintiff's product, noting that the plaintiff had failed to offer evidence that the proceedings were "merely a ploy to obscure a conspiracy against competing **[**12]** producers." *Id. at 294*. Viazis similarly was unable to demonstrate that the ethics proceedings against him were a sham or that the standards applied were pre textual, [9] so he failed **[*765]** to establish the existence of an unlawful conspiracy. *See id.* To the ex tent that he challenges the promulgation of the advertising restrictions by the AAO, as opposed to their enforcement, his failure to demonstrate any competitive harm, as discussed below, is fatal to that claim.

[13]** III.

Even if Viazis had presented sufficient evidence of concerted action, ***HN7***[] § 1 of the Sherman Act prohibits only those agreements that constitute unreasonable restraints of trade. *Northwest Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 289, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985)* (citation omitted). The question whether a particular restraint is unreasonable frequently turns on whether it is examined under the rule of reason or falls within the category of practices that are judged to be unreasonable *per se*. If application of the *per se* rule is appropriate, competitive harm is presumed, and further analysis is unnecessary. If, by contrast, the restraint should be judged according to the rule of reason, its net potential for competitive harm must be evaluated by weighing its probable anticompetitive effects against any procompetitive benefits.

A.

Viazis contends that the advertising restrictions in question should be reviewed according to the *per se* rule. ***HN8***[] Typically, it is the type of restraints that are "always or almost always" anticompetitive that are deemed to be unreasonable *per se*. *Broadcast Music, Inc. v. Columbia Broadcasting Sys., Inc., 441 U.S. 1, 19-20, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. **[**14]** The Supreme Court has been reluctant to apply the *per se* rule to standards promulgated by professional organizations, such as the advertising restriction at issue here. [10]

In fact, the Court recently concluded that advertising restrictions imposed by a professional association are not subject to a *per se* analysis. In *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 143 L. Ed. 2d 935, 119 S. Ct. 1604 (1999)*, a case dealing with the legality of advertising restrictions that are remarkably similar to those at issue here, the Court necessarily rejected the application of the *per se* rule by holding that even the truncated rule of reason, or "quick look," treatment applied by the Ninth Circuit was insufficient given the potential procompetitive effects of such restrictions in a market **[**15]** for professional services. *Id. at 763-81*. The *per se* rule likewise is inapplicable to the restrictions at issue in this case.

B.

Although *California Dental* rejected the application of *per se* or even quick-look analysis to advertising restrictions implemented by a professional association, it did not hold that a full market analysis is required in such cases. *Id. at 779*. Instead, the Court held that ***HN9***[] "what is required is an enquiry meet for the case." *Id. at 780*. **[*766]**

---

[9] During the appeal of Viazis's suspension, Dr. Hershey, one of the panelists, told Viazis: "It's not your work Tony. Next time, play by the rules." This comment is certainly suspicious, but it is not direct evidence of conspiracy, because it does not explicitly reference any agreement. In addition, Hershey's statement is not inconsistent with the committee's finding that Viazis violated the AAO's prohibition of deceptive advertising. The committee could have found Viazis's bracket to be a good product, while still concluding that Viazis had used inappropriate methods to promote it. In any event, in light of the fact that GAC ended its marketing arrangement with Viazis over a year before his suspension, the exclusion of which Viazis complains had long since occurred.

[10] *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 458, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)* ("We have been slow to condemn rules adopted by professional associations as unreasonable *per se*.").

Under this approach, an analysis is sufficient if it openly addresses the "circumstances, details, and logic of a restraint" in reaching its conclusion. *Id. at 781*.

In *California Dental*, the Court recognized that a restriction on advertising related to quality has several potential procompetitive justifications. [11] On remand, the Ninth Circuit determined that the FTC had failed to prove that the advertising restrictions at issue were a net harm to competition. *Cal. Dental Ass'n v. FTC, 224 F.3d 942, 957 (9th Cir. 2000)*. The court noted that the Federal Trade Commission had failed to prove actual harm by presenting relevant **[**16]** data from the precise market at issue. *Id*.

Viazis similarly has failed to present data demonstrating the anticompetitive effects of the advertising restrictions of which he complains. In the absence of such data, he has not carried his burden to demonstrate that the restrictions have a net anticompetitive effect. *See id.*

Viazis claims that competitive harm is demonstrated by the steep decline in sales of his brackets to orthodontists. There is no evidence, however, that the AAO has influence over its members' purchasing decisions or that it coerced them into rejecting Viazis's brackets. In *Consolidated Metal Products, 846 F.2d at 296*, we **[**17]** held that where an association's product recommendations were non binding and the association did not coerce its members to abide by its recommendations, its refusal to sanction plaintiff's product did not show that plaintiff was excluded from the market. Nor can a plaintiff show competitive harm merely by demonstrating that the defendant "refused without justification to promote, approve, or buy the plaintiff's product." *Id. at 297*.

Though there is evidence demonstrating a drastic reduction in the number of orthodontists purchasing Viazis's brackets, there is none connecting that decrease to anything other than the voluntary decisions of independent orthodontists. Moreover, GAC has, at most, a 20% market share in orthodontic brackets. Therefore, GAC's refusal to market on behalf of Viazis could not significantly impede his ability to market the brackets, either independently or through GAC's competitors.

Indeed, Viazis has been successful in marketing his brackets to dentists and remains free to sell them to any orthodontist willing to purchase them. In the absence of proof that the AAO and its member orthodontists are engaging in a conspiracy, Viazis cannot prove **[**18]** harm to competition, because he can demonstrate nothing more than that his product is no longer selling well, at least not to orthodontists.

IV.

Viazis challenges two evidentiary rulings. First, he contends that the court erred in refusing to admit expert testimony to the effect that "consumers would have been harmed by the suppression" of the brackets. The testimony was excluded based on the determination that the testimony was not contained in the expert's report, as required by Local Rule 26(d)(1). In challenging this ruling, Viazis cites a passage in the expert's report that contains the excluded testimony almost *verbatim*. It therefore appears that the district court may have erred in determining that the testimony should be excluded under the local rule.

[*767] Nonetheless, ***HN10***[] we "may not disturb the district court's exclusion of the evidence . . . if that ruling can be upheld on other grounds, regardless of whether the court relied on those grounds." *Metallurgical Indus., Inc. v. Fourtek, Inc., 790 F.2d 1195, 1207 (5th Cir. 1986)*. The excluded testimony concerned alleged harm to the orthodontic services market, rather than the relevant market for purposes of Viazis's **[**19]** claim, which is the market for orthodontic braces. The testimony therefore was arguably irrelevant, as noted by the district court, and could have been excluded on that ground as well. *See FED. R. EVID. 401*.

Viazis also asserts that the district court erred in refusing to allow cross-examination concerning portions of a note written by Dohn that recognized the possibility that Viazis could file a § 1 claim against GAC. The excluded portion

[11] *Cal. Dental, 526 U.S. at 778* (noting that a restriction on quality-related advertisement for professional services may be justified by the possibility "that restricting difficult-to-verify claims about quality or patient comfort would have a procompetitive effect by preventing misleading or false claims that distort the market").

was hearsay, but Viazis argues that it should have been admitted under the exception for statements made by coconspirators.

HN11[] Under the coconspirator exception, hearsay evidence is admissible only if the proponent proves by a preponderance of the evidence that (1) a conspiracy existed; (2) the statement was made in furtherance of that conspiracy; and (3) the coconspirator and the party opposing admission were members of the conspiracy. *Burton v. United States, 237 F.3d 490, 503 (5th Cir. 2000)*. Because no conspiracy was established here, the coconspirator exception cannot apply, and the evidence was not admissible against AAO and the other association defendants.

Additionally, GAC contends that the pass age in question was **[**20]** based on communications between Dohn and his attorney, and that it is therefore privileged attorney-client material and inadmissible. The district court did not abuse its discretion in excluding testimony regarding the note on either of these grounds.

In any event, HN12[] we will not reverse erroneous evidentiary rulings unless the aggrieved party can demonstrate "substantial prejudice." *Kona Tech. Corp. v. S. Pac. Transp. Co., 225 F.3d 595, 602 (5th Cir. 2000)*. Viazis failed to demonstrate that the exclusion of either of these pieces of evidence resulted in substantial prejudice.

AFFIRMED.

Elec. Inspectors, Inc. v. Vill. of E. Hills

United States Court of Appeals for the Second Circuit

June 17, 2002, Argued ; December 13, 2002, Decided

Docket No. 01-9483

Reporter
320 F.3d 110 *; 2002 U.S. App. LEXIS 28147 **; 2002-2 Trade Cas. (CCH) P73,900

ELECTRICAL INSPECTORS, INC., Plaintiff-Counter-Defendant-Appellant, - v. - VILLAGE OF EAST HILLS, VILLAGE OF ROSLYN and VILLAGE OF OYSTER BAY COVE, Defendants-Counter-Claimants, VILLAGE OF ISLANDIA, ALEXANDER PIRNIE and NEW YORK BOARD OF FIRE UNDERWRITERS, Defendants-Counter-Claimants-Appellees, VILLAGE OF ISLAND PARK, VILLAGE OF BROOKVILLE, VILLAGE OF NORTH HILLS, VILLAGE OF FLOWER HILL, VILLAGE OF GREAT NECK, VILLAGE OF GREAT NECK ESTATES, VILLAGE OF KINGS POINT, VILLAGE OF PORT WASHINGTON NORTH, VILLAGE OF SEA CLIFF, VILLAGE OF SADDLE ROCK and VILLAGE OF BAITING HOLLOW, Defendants.

Subsequent History: [1]** As Amended January 17, 2003. As Amended January 31, 2003.

US Supreme Court certiorari denied by *Vill. of Islandia v. Elec. Inspectors, Inc., 157 L. Ed. 2d 373, 124 S. Ct. 467, 2003 U.S. LEXIS 8021 (U.S., 2003)*

Prior History: Appeal from a decision of the United States District Court for the Eastern District of New York (Leonard D. Wexler, Judge) granting the defendants-counter-claimants-appellees' motion for summary judgment on the plaintiff's claims under the Sherman Act, *15 U.S.C. §§ 1 & 2*. The plaintiff alleges that a municipal ordinance of the defendant Village of Islandia effectively requiring all owners of commercial and residential buildings to submit to electrical wiring inspections by the defendant New York Board of Fire Underwriters, a private party designated by the municipality, created an illegal monopoly and has resulted in other ***antitrust-law*** violations. The district court concluded that the municipal ordinance was authorized by an act of the New York State Legislature, and that the municipality and the private party were therefore immune under the state-action doctrine from federal ***antitrust-law*** claims.

Elec. Inspectors, Inc. v. N.Y. Bd. of Fire Underwriters, 145 F. Supp. 2d 271, 2001 U.S. Dist. LEXIS 5940 (E.D.N.Y., 2001)

HN1[] **Standards of Review, De Novo Review**

An appellate court reviews a district court's grant of summary judgment de novo, construing the evidence in the light most favorable to the non-moving party. A district court must grant a motion for summary judgment if there is no genuine issue as to any material fact and the moving party is entitled to a judgment as a matter of law, *Fed. R. Civ. P. 56(c)*, i.e., where the record taken as a whole could not lead a rational trier of fact to find for the nonmoving party. A fact is "material" for these purposes if it might affect the outcome of the suit under the governing law. An issue of fact is "genuine" if the evidence is such that a reasonable jury could return a verdict for the nonmoving party.

HN2[] **Scope, Exemptions**

Under the state-action immunity doctrine established by the Parker decision the Sherman Act does not apply to anticompetitive restraints imposed by the states as an act of government. The doctrine is grounded in principles of federalism and state sovereignty. Local governments are not sovereign, and so their actions are not automatically immune under the Parker decision. Nonetheless, because states sometimes effect regulatory regimes through local government bodies, municipalities may avail themselves of Parker immunity to the extent their actions are an authorized implementation of state policy.

Governments > Local Governments > Claims By & Against

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

HN3[] Local Governments, Claims By & Against

Municipalities that wish to avail themselves of Parker immunity must show that their regulations were authorized by the state. The requisite showing of authority has two components: First, the municipality must have "authority to regulate"; second, it must have "authority to suppress competition."

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN4[] Exemptions & Immunities, Parker State Action Doctrine

Federal courts, when determining state-action immunity for municipalities, must adopt a concept of authority broader than what is applied to determine the legality of the municipality's action under state law. This broader concept of authority is necessary because a doctrine of state-action immunity that transformed state administrative review into a federal antitrust job would undermine the very interests of federalism the Parker doctrine is designed to protect. For this reason, the inquiry into a municipality's authority to regulate should not be exacting. As long as the local enactment is within a broad view of the authority granted by the state, whether it is actually violative of that statute is a question for state authorities, not one of federal ***antitrust law***.

Business & Corporate Compliance > ... > Real Property Law > Zoning > Ordinances

Governments > Local Governments > Claims By & Against

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

HN5[] Zoning, Ordinances

With regard to the second component of the inquiry, i.e., whether the municipality has authority to suppress competition, the United States Supreme Court begins by rejecting the contention that this requirement can be met only if the delegating statute explicitly permits the displacement of competition. Instead, the requirement is met if suppression of competition is the foreseeable result of what the statute authorizes. The Court then asks whether a logical relationship existed between the purpose of the state statute and its alleged anticompetitive effect, and observes that the very purpose of zoning regulation is to displace unfettered business freedom in a manner that regularly has the effect of preventing normal acts of competition, particularly on the part of new entrants.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Governments > Local Governments > Claims By & Against

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

HN11[] **Parker State Action Doctrine, Local Governments & Private Parties**

There are circumstances under which private parties may avail themselves of the Parker state-action immunity doctrine. The United States Supreme Court has explained the purpose of extending state-action immunity to private parties thus: the Parker decision is premised on the assumption that Congress, in enacting the Sherman Act, did not intend to compromise the states' ability to regulate their domestic commerce. If Parker immunity were limited to the actions of public officials, this assumed congressional purpose would be frustrated, for a state would be unable to implement programs that restrain competition among private parties. A plaintiff could frustrate any such program merely by filing suit against the regulated private parties, rather than the state officials who implement the plan. The Court declines to reduce Parker's holding to a formalism that would stand for little more than the proposition that the plaintiff sued the wrong parties.

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

HN12[] **Securities Act Actions, Civil Liability**

The United States Supreme Court has established that private parties must satisfy a two-prong test to qualify for state-action immunity. First, the private party must show that the alleged anticompetitive acts were pursuant to a clearly articulated and affirmatively expressed state policy to displace competition. Second, it must show that its conduct was actively supervised by the act itself.

Criminal Law & Procedure > ... > Driving Under the Influence > Blood Alcohol & Field Sobriety Testing > General Overview

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

HN13[] **Driving Under the Influence, Blood Alcohol & Field Sobriety Testing**

The United States Supreme Court has made clear that the first prong of the Midcal test is not as demanding as the Court's statement of it in the Midcal case suggests. It does not, for example, require a private party to show a specific, detailed legislative authorization for its challenged conduct. Rather, as long as the state as sovereign clearly intends to displace competition in a particular field with a regulatory structure, the first prong of the Midcal test is satisfied.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Regulated Industries > General Overview

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

HN14[] Scope, Exemptions

Under the second prong of the Midcal test -- active state supervision -- a private defendant must show not only that state officials have the power to supervise, but also that those officials exercise that power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy. This requirement of official involvement seeks to prevent states from transforming the Parker doctrine, designed to accommodate the states' sovereign interest in regulating commerce, into an unbounded license for the states to issue Sherman Act exemptions to private parties. This second part of the Midcal test thus serves as a counterweight to the first because it ensures that the state-action doctrine will shelter only the particular anticompetitive acts of private parties that, in the judgment of the state, actually further state regulatory policies.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Governments > Local Governments > Finance

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

Governments > Local Governments > Claims By & Against

HN15[] Parker State Action Doctrine, Local Governments & Private Parties

Municipalities need not show that the state actively supervises them for them to be immune with regard to their own anticompetitive behavior under the Parker doctrine because there is little or no danger that a municipality is involved in a private price-fixing arrangement. The only real danger is that the municipality will seek to further purely parochial public interests at the expense of more overriding state goals. By way of contrast, when a private party is engaging in the anticompetitive activity, there is a real danger that he is acting to further his own interests, rather than the governmental interests of the state.

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

HN16[] Securities Act Actions, Civil Liability

The requirement of active state supervision ensures that anticompetitive acts are driven by the interests of the state, not the private party's own interests.

Governments > Local Governments > Claims By & Against

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

HN17[] **Local Governments, Claims By & Against**

Arrangements whereby states authorized horizontal price fixing among insurance companies, but required the companies to file collective tariffs that state agencies had the option to reject, lacked sufficient state supervision to qualify for immunity. To fulfill the active supervision prong, private parties must prove that state officials have undertaken the necessary steps to determine the specifics of the regulatory regime; a mere "negative option" among state agencies to reject prices proposed by private parties is insufficient. The mere potential for state supervision is not an adequate substitute for a decision by the state.

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

HN18[] **Securities Act Actions, Civil Liability**

A company does not violate the antitrust laws when monopoly is "thrust upon it."

Opinion by: SACK

Opinion

[*114] SACK, Circuit Judge:

This appeal requires us to determine whether the state-action immunity doctrine shields a municipality and a private corporation from alleged federal ***antitrust-law*** violations resulting from the municipality's conferral upon the corporation of exclusivity in the market for government-required electrical inspection services within the municipality.

The defendant Village of Islandia (the "Village") is a municipality located on New York's Long Island. In 1988, the Village adopted a policy of requiring building owners to obtain certificates of occupancy from the Village, and conditioning the issuance of such certificates on the positive results of an electrical wiring inspection conducted by the not-for-profit defendant **[**3]** New York Board of Fire Underwriters (the "Board"). Any property owner who wishes to use or occupy a building is required to submit to and pay the Board for the Board's inspection. The plaintiff, a for-profit corporation that also provides electrical inspection services in the State of New York, brought suit against both the Village and the Board in the United States District Court for the Eastern District of New York alleging that this arrangement resulted in violations of the *Sherman Act and* other federal and state laws. The district court (Leonard D. Wexler, Judge) concluded that the Village's policy was authorized by an act of the New York State Legislature, and that the actions of the Village and the Board were therefore exempt from the federal antitrust laws under the state-action immunity doctrine. *Elec. Inspectors, Inc. v. N.Y. Bd. of Fire Underwriters, 145 F. Supp. 2d 271, 279 (E.D.N.Y. 2001)* ("EII").

We agree with the district court that for purposes of the state-action immunity doctrine, the state authorized the Village to pass the ordinance that gave the Board exclusivity with respect to the performance of wiring inspections in Islandia. We disagree, **[**4]** however, with the district court's holding that this finding is sufficient in itself to support a dismissal of the plaintiff's federal ***antitrust-law*** claims. We conclude that such immunity for the Board against the plaintiff's claim for damages, and possibly for the Village against the plaintiff's claim for equitable relief, requires a finding that government officials actively supervised the Board. We therefore **[*115]** vacate the judgment of the district court and remand the case for further proceedings consistent with this opinion.

BACKGROUND

In 1981, the New York State Legislature enacted the Uniform Fire Prevention and Building Code Act (the "Act"), *N.Y. Exec. Law § 370 et seq.* The Act required the creation of a state-wide uniform fire code for commercial and residential buildings, id. *§ 377*, and it directed New York's various local governments to "administer and enforce the uniform . . . code," id. *§ 381(2)*. To facilitate local governments' carrying out of their enforcement responsibilities, the Act directed the New York Secretary of State to "promulgate rules and regulations prescribing minimum standards for administration and **[**5]** enforcement of the uniform . . . code," id. *§ 381(1)*, and gave the Secretary powers to ensure that local governments enforced the code in compliance with the Secretary's regulations, id. *§ 381(4). The Act* required the regulations issued by the Secretary to address, inter alia, the frequency of building inspections and the number and quality of inspectors. Id. *§ 381(1)*.

Pursuant to the Act, the Secretary issued regulations providing that any property owner who wishes to use or occupy a commercial or residential building must obtain a certificate of occupancy from a local government body. N.Y. Comp. Codes R. & Regs. tit. 19, § 429(c)(1) (repealed 1996). Local governments, in turn, were forbidden from issuing a certificate of occupancy for any building unless a designated officer or agent inspected the building's electrical wiring and certified that it complied with the uniform electrical code. Id. § 429(b)(1) (repealed 1996). Finally, the Secretary's regulations (later withdrawn) authorized local governments to pass resolutions designating those who would conduct such inspections. The specified options were (1) "a designated officer or employee of the city, **[**6]** town, or village"; (2) "an employee or agent of another city, town, or village who is qualified to conduct such inspections"; (3) "a person who is qualified to conduct such inspections . . . pursuant to a contract with the city, town, or village"; (4) "an employee or agent of the county who is qualified to conduct such inspection"; and (5) "a competent inspector, designated or approved by the city, town, or village." Id. *§ 429.2(b)(2)(i) (iv)* (repealed 1996).

Pursuant to those regulations and prior to their repeal, on August 4, 1988, the trustees of the Village passed an ordinance resolving that the Village "accepts [the Board] as its only electrical inspecting agency." Thereafter, the Village required all applicants for certificates of occupancy to present proof that the Board had inspected the electrical wiring in their buildings and certified that it complied with the National Electric Code. [1]

[7]** The Board is a not-for-profit corporation that received its charter from the New York State Legislature in 1867. [2] Its members are ninety-six insurance companies authorized to write fire insurance policies in New York. According to an affidavit **[*116]** submitted by defendant Alexander Pirnie, the Board's former president, [3] the Board engages in two principal activities: It maintains the New York City Fire Patrol, a group of patrolmen who assist New York City's firefighters, and it inspects electrical equipment and issues certificates of compliance with the National

---

[1] The National Electric Code is "a model code promulgated by the National Fire Protection Association," *Edison Elec. Inst. v. Occupational Safety & Health Admin., 270 U.S. App. D.C. 280, 849 F.2d 611, 614 (D.C. Cir. 1988)*, which is "an international nonprofit membership organization," see NFPA Overview, at *http://www.nfpa.org/Home/AboutNFPA/NFPAOverview/NFPAOverview.asp* (last visited December 12, 2002).

[2] On April 1, 1930, the New York State Legislature reconstituted and continued the Board "as a body, corporate and politic, in perpetuity."

[3] The distinction between the Board and Pirnie is not relevant for purposes of this appeal, and our legal conclusions regarding the Board apply equally to Pirnie.

Electric Code. Pirnie Aff. PP 4, 11. Approximately 250 New York municipalities have adopted policies that, like the Village's, effectively require building owners to obtain certificates of compliance from the Board. Id. P 12. The Board charges a fee for inspections to be paid by the property owner.

[8]** The plaintiff, Electrical Inspectors, Inc., is a for-profit corporation that, like the Board, inspects electrical wiring in commercial and residential properties in New York State and issues certificates of compliance with the National Electric Code. On March 1, 1999, the plaintiff brought this action in the district court against fifteen New York municipalities including the Village; on September 9, 1999, it amended its complaint to name the Board as a defendant. The plaintiff alleged various violations of the Sherman Act, *15 U.S.C. §§ 1 & 2*, the Donnelly Act, *N.Y. Gen. Bus. Law § 340(1)*, its federal due process rights, and its federal and state equal protection rights. According to the amended complaint, the municipalities' policies of conferring monopoly power within their respective boundaries on the Board were unauthorized by state law and had the illegal effect of excluding the plaintiff from local markets for electrical inspection services. Amend. Compl. P 139. The plaintiff also alleged that the Board actively sought and maintained such grants, and abused its exclusive positions by providing low-quality service and by seeking **[**9]** to expand its overall market share by threatening to retaliate in those locations where it has exclusivity against customers who use the plaintiff's services where competition is allowed. Id. PP 52, 69, 72, 112, 118. [4] The plaintiff sought monetary damages against the Board, and injunctive and declaratory relief against the municipalities, for their asserted violation of the federal antitrust laws.

The defendants assert in their answer, inter alia, that they are immune from the plaintiff's federal ***antitrust-law*** claims under the state-action doctrine. The plaintiff moved to strike this defense as insufficient pursuant to *Federal Rule of Civil Procedure 12(f)*, and the defendants cross-moved for summary **[**10]** judgment on the federal ***antitrust law*** claims.

On March 30, 2001, the district court issued a Memorandum and Order denying the plaintiff's motion to strike and granting the defendants' motion for summary judgment. *Elec., 145 F. Supp. 2d at 279*. The court held that the municipalities were immune from federal antitrust liability on the grounds that the Act gave them "broad . . . authority over a matter integral to public health and safety," and that appointing exclusive agents to conduct required electrical inspections was "a 'foreseeable' consequence of the state delegation of authority." *Id. at 277-78*. The district court then concluded that the municipalities' immunity under the state-action doctrine extended to the Board. "Because the municipal defendants' decisions appointing the Board as exclusive agent **[*117]** are immune from antitrust liability, the Board is similarly immune from antitrust liability as the party receiving those appointments." *Id. at 279* (citing *Cine 42nd St. Theater Corp. v. Nederlander Org., Inc., 790 F.2d 1032, 1048 (2d Cir. 1986))*.

On September 21, 2001, the plaintiff voluntarily dismissed **[**11]** its federal constitutional claims against the municipal defendants. The district court subsequently issued a judgment dismissing with prejudice the plaintiff's federal ***antitrust-law*** claims, and dismissing without prejudice the plaintiff's state-law claims for want of supplemental jurisdiction. The plaintiff now appeals, challenging only the district court's dismissal of its federal ***antitrust-law*** claims against the Board and the Village.

DISCUSSION

I. Standard of Review

HN1[] We review a district court's grant of summary judgment de novo, construing the evidence in the light most favorable to the non-moving party. *Tenenbaum v. Williams, 193 F.3d 581, 593 (2d Cir. 1999)*, cert. denied, *529 U.S. 1098, 146 L. Ed. 2d 776, 120 S. Ct. 1832 (2000)*. A district court must grant a motion for summary judgment if "there is no genuine issue as to any material fact and . . . the moving party is entitled to a judgment as a matter of law," *Fed. R. Civ. P. 56(c)*, i.e., "where the record taken as a whole could not lead a rational trier of fact to find for

[4] The plaintiff also challenged the legitimacy of the Board's status as a non-profit entity, alleging that the Board's exemption from income taxes enabled it to earn "excess profits" that accrued to the benefit of its for-profit members. Amend. Compl. PP 45, 113.

the nonmoving party." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986).* **[**12]** A fact is "material" for these purposes if it "might affect the outcome of the suit under the governing law." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)* . An issue of fact is "genuine" if "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." Id.

II. State-Action Immunity for the Village

The Village regulates the usage of local real estate by requiring all owners of commercial and residential buildings who wish to use or occupy their property to obtain from the Village a certificate of occupancy. In order to do so, for reasons of fire safety, a property owner must, under the Village ordinance, first submit the property to an electrical wiring inspection by the Board, pay the Board's fee, and receive from the Board certification that the wiring complies with the National Electric Code. The plaintiff alleged in its amended complaint that the Village's conferral of such exclusivity on the Board violates, inter alia, the Sherman Act, and sought injunctive and declaratory relief. [5] The Village asserts the affirmative defense that its action was pursuant to state **[**13]** policy and thus was exempt from the federal antitrust laws under the state-action immunity doctrine. The district court agreed with the Village. The plaintiff challenges this holding on appeal.

Because the district court granted judgment to the Village on its affirmative defense, neither the standing of the plaintiff under the antitrust laws to make all of the underlying claims it asserts nor the merits **[*118]** of the claims are at issue in this **[**14]** appeal. Our only task with regard to the plaintiff's claims against the Village is to evaluate the district court's conclusion that the Village is immune.

A. Immunity for Municipal Economic Regulation

In *City of Columbia v. Omni Outdoor Adver., Inc., 499 U.S. 365, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)* ("Omni Outdoor"), the Supreme Court addressed state-action immunity for municipal regulatory schemes. There, the City of Columbia, South Carolina, asserted immunity from a claim under the Sherman Act that its restrictions on the size, location, and spacing of billboards hindered the ability of newcomers to compete in the billboard construction market. *Id. at 367-69*. The Court began its analysis by noting that ***HN2***[] under the state-action immunity doctrine established by its decision in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, "the Sherman Act [does] not apply to anticompetitive restraints imposed by the States 'as an act of government.'" *Omni Outdoor, 499 U.S. at 370* (quoting *Parker, 317 U.S. at 352*.) The Court explained that the doctrine is grounded in "principles **[**15]** of federalism and state sovereignty." *Omni Outdoor, 499 U.S. at 370*. Local governments are not sovereign, and so their actions are not automatically immune under *Parker. Omni Outdoor, 499 U.S. at 370*. Nonetheless, because states sometimes effect regulatory regimes through local government bodies, municipalities may avail themselves of Parker immunity to the extent their actions are "an authorized implementation of state policy." Id.

The Court held that ***HN3***[] municipalities that wish to avail themselves of Parker immunity must show that their regulations were authorized by the state. The requisite showing of authority has two components: First, the municipality must have "authority to regulate"; second, it must have "authority to suppress competition." *Id. at 372*; accord *Hertz Corp. v. City of New York, 1 F.3d 121, 128 (2d Cir. 1993)* (holding that under Parker a municipality must establish that "the resulting anticompetitive activities are a foreseeable consequence of [a] state delegation" (quoting *Cine 42nd St. Theater Corp. v. Nederlander Org., Inc., 790 F.2d 1032, 1043 (2d Cir. 1986)* **[**16]** ("Cine"))), cert. denied, *510 U.S. 1111, 127 L. Ed. 2d 375, 114 S. Ct. 1054 (1994)*.

To determine whether the City of Columbia had "authority to regulate," the Supreme Court looked to the terms of the relevant South Carolina statutes. *Omni Outdoor, 499 U.S. at 371*. At the same time, the Court held that

---

[5] The plaintiff does not allege that the Village has created a monopoly in the sense that it forbade property owners from hiring the plaintiff. The plaintiff's allegation is, rather, that the Village's requirement that every owner submit a Board-issued certificate of compliance in order to receive a certificate of occupancy effectively eliminated demand for the plaintiff's services. The implicit assumption, which we have no reason to doubt, is that property owners have little need for additional inspection services once they have obtained a certificate of occupancy.

HN4[] federal courts, when determining state-action immunity for municipalities, must "adopt a concept of authority broader than what is applied to determine the legality of the municipality's action under state law." *Id. at 372*. This broader concept of authority is necessary, the Court explained, because a doctrine of state-action immunity that "transformed state administrative review into a federal antitrust job" would undermine "the very interests of federalism [the Parker doctrine] is designed to protect." *Id. at 372* (citation omitted). For this reason, the Court held, the inquiry into a municipality's authority to regulate should not be exacting. *Id. at 371*. The Court went on to decide that language in the South Carolina statute authorizing local governments to regulate the height and size **[**17]** of "structures" constituted sufficient authority for the City of Columbia's billboard regulations. *Id. at 372-73* & n.4. Although the statute also **[*119]** provided that municipal ordinances were valid only if they served "the purpose of promoting health, safety, morals or the general welfare of the community," the Court declined to inquire whether the city's ordinance fulfilled this requirement. *Id. at 370 n.3, 371-73* (citation and internal quotation marks omitted). The Court's decision not to inquire as to whether Columbia's ordinance was actually authorized by state statute suggests that as long as the local enactment is within a broad view of the authority granted by the state, whether it is actually violative of that statute is a question for state authorities, not one of federal ***antitrust law***.

HN5[] With regard to the second component of the inquiry, i.e., whether the City of Columbia had "authority to suppress competition," the Supreme Court began by "rejecting the contention that this requirement can be met only if the delegating statute explicitly permits the displacement of competition." *Id. at 372*. Instead, the Court held, **[**18]** the requirement is met "if suppression of competition is the 'foreseeable result' of what the statute authorizes." Id. (quoting *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 42, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985))*. The Court then asked whether a logical relationship existed between the purpose of the state statute and its alleged anticompetitive effect, and observed that "the very purpose of zoning regulation is to displace unfettered business freedom in a manner that regularly has the effect of preventing normal acts of competition, particularly on the part of new entrants." *Omni Outdoor, 499 U.S. at 373*. On this basis, the Court concluded that suppression of competition was a foreseeable result of the South Carolina statute, and thus that the City of Columbia had met the requirements for immunity for its regulatory scheme. *Id. at 374*.

The Supreme Court's analysis in Omni Outdoor mirrored the approach that this Court had followed in Cine. There we examined the actions of the New York "Urban Development Corporation," or "UDC," a public entity designed by the New York State Legislature "to make the State an **[**19]** active participant in the financing and construction of urban renewal projects." *Cine, 790 F.2d at 1036*. The UDC purchased theaters in the Times Square area of New York City and then awarded leases on them to private developers, prompting parties whose applications for leases had been rejected to bring suit under the Sherman Act against both the UDC and the winning bidders. *Id. at 1037-38*. The defendants claimed state-action immunity. *Id. at 1038*.

We began our analysis by holding that because the UDC was a "political subdivision of the state," it was like a municipality for purposes of the Parker doctrine. *Cine, 790 F.2d at 1047*. We then concluded that in order to qualify for state-action immunity, the UDC was required to "show [1] that it acted pursuant to a clearly expressed state policy and [2] that the resulting antitrust consequences were reasonably contemplated by the state." *Id. at 1047-48*.

With regard to the first component, we found authority for the UDC's actions in language in the UDC's enabling statute that specifically empowered it to purchase, and issue leases on, real **[**20]** property. *Id. at 1045*. Under the second component, we concluded that harm to some businesses around Times Square was a foreseeable consequence of the creation of an entity whose purpose was to improve a blighted urban area:

> It is fair to conclude that the legislature contemplated that when it granted power **[*120]** to the UDC to determine what buildings and services would be provided in a particular redeveloped land use project, it knew those choices would affect businesses and residences in that entire area. Such a conclusion is based on common sense. As a result of cultural improvements, rents and property values would increase even though some competitors would be adversely impacted, and some would disappear.

Id. at 1047. On this basis, we held that the UDC had shown sufficient state authority for its actions, and thus was immune under the Parker state-action immunity doctrine.

B. The New York Act and the Village Ordinance

The Village argues that its actions effectively excluding the plaintiff from the market for electrical inspections within its boundaries were authorized by the Act and related regulations issued **[**21]** by the New York Secretary of State. To evaluate the Village's defense, we follow the two-step inquiry set forth and applied in *Omni Outdoor* and *Cine*.

1. Step One: Authority to Regulate. The Village cites two provisions of the Act for its authority to regulate: ***HN6***[] *§ 381*, which provides that "every local government shall administer and enforce the uniform fire prevention and building code"; and *§ 371*, which states that "it shall be the public policy of the state of New York" to "encourage local governments to exercise their full powers to administer and enforce the uniform code." *N.Y. Exec. Law §§ 381(2), 371(2)(d)*. The Village also cites for support the regulations issued pursuant to the Act by New York's Secretary of State.

The plaintiff disagrees that the Act confers any new powers on New York municipalities that they do not already have, and argues that the statutory language cited by the Village merely directs local governments to apply to a particular purpose powers arising from other statutory sources. If the plaintiff's interpretation of the Act is correct, then the state-action immunity defense is unavailable because the Village has not **[**22]** identified any other specific statutory source of regulatory power, and the principle is well established that a municipality may not fall back on its general police or "home-rule" powers to immunize anticompetitive regulations. See *Cmty. Communications Co. v. City of Boulder, 455 U.S. 40, 56, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982)*; *Hertz, 1 F.3d at 128*.

If the Village had only the language of the Act to rely upon, its authority for purposes of the Parker doctrine might be subject to doubt. ***HN7***[] The cited provisions can be read as no more than a direction to New York State municipalities as to how to act, in contrast with statutory language relied on by municipalities in cases in which they have been held to be immune where a similar direction was coupled with an explicit conferral of regulatory power. See *Omni Outdoor, 499 U.S. at 370-71 n.3* (South Carolina statute providing that "the legislative bodies of cities and incorporated towns may by ordinance regulate . . . buildings and other structures"); *Cine, 790 F.2d at 1045* (New York statute empowering the UDC "to acquire . . . real, personal or mixed **[**23]** property[,] and to sell . . . [or] lease . . . the same").

We conclude, however, that ***HN8***[] the regulations issued by the Secretary soon after the passage of the state statute make clear that even if the Village's ordinance was not actually authorized by the state statute itself, it was within the broad grant of state authority. The Secretary's regulations authorized municipalities to condition occupation and use of a building on the **[*121]** result of an electrical inspection, and "by resolution provide that such inspection shall be performed by [an] inspector, designated or approved by the . . . town." N.Y. Comp. Codes R. & Regs. tit. 19, § 429(b) (repealed 1996). The regulations appeared to interpret the statute to authorize the Village, or at least to authorize the Secretary to authorize the Village, to do precisely that which the Village has done. [6]

[24]** We think that the Act, combined with the Secretary's apparent interpretation of it, sufficiently demonstrates the Village's broad "authority to regulate" for purposes of state-action immunity. The Village has cited statutory language that, although perhaps ambiguous on the question, can be interpreted as delegating a power to regulate, and it has cited regulations issued by the agency charged with enforcing the statute that confer a power to regulate in plain language. Even though those regulations were subsequently withdrawn, they establish the Village's contention that its action was within the broad authority to regulate granted by the state statute itself. Under the broad concept of authority that principles of federalism compel us to apply, we conclude that these sources are sufficient for purposes of Parker state-action immunity analysis.

---

[6] While, under the principles announced Omni Outdoor, it is not for us as a federal court of appeals to decide on this appeal whether the Village's acts are ultra vires, neither do we decide that had a state court determined that the acts were ultra vires, we would nonetheless conclude that the municipality or the private actor was entitled to state-action immunity.

2. Step Two: Authority to Suppress Competition. We also conclude that the Act and the Secretary's regulations establish the second component of authority that municipalities must show under *Parker*. The specific anticompetitive harm that the plaintiff alleges results from the Village's actions is the plaintiff's complete exclusion **[**25]** from the market for required electrical inspection services. We think that such exclusion is a foreseeable result of a statute that requires municipalities to enforce a uniform fire code and administrative regulations that condition the issuance of certificates of occupancy upon inspections by town-designated agents. "Common sense," *Cine, 790 F.2d at 1047*, indicates that a municipality in the course of enforcing a fire code is likely, for quality control purposes, to limit the set of persons who may issue certificates of compliance, "even though some competitors would be adversely impacted," *id.* And common experience indicates that municipalities often use their own employees to enforce a variety of public codes, such as food preparation or building codes, thereby effectively conferring upon themselves exclusivity in the market for required inspection services at a cost to private entities that would perform the same services. The Secretary specifically authorized such town-operated monopolies. *N.Y. Comp. R. & Regs. tit. 19, § 429.2(b)(I)* (repealed 1996). Such a regime also appears to be contemplated by the section of the Act that provides that "local governments **[**26]** or counties may charge fees to defray the costs of administration and enforcement," *N.Y. Exec. Law § 381(2)*. Thus, complete exclusion of a potential competitor in the market was foreseeable.

The plaintiff argues that even if a town-operated monopoly was foreseeable, the designation of a private party as the party enjoying exclusivity was not. We think, however, that the plaintiff's argument misunderstands the nature of the foreseeability inquiry. ***HN9***[] Our task in assessing the second component of authority identified in Omni Outdoor is to determine whether **[*122]** the state intended or at least could have contemplated that its policy would result in "suppression of competition." *499 U.S. at 373*; accord *Cine, 790 F.2d at 1047*. Whom the municipality selected as the party exercising exclusivity is at best tangential to the inquiry into the foreseeability of suppression of competition. ***HN10***[] By definition, the creation of a monopoly suppresses -- indeed eliminates -- all competition in that locality, and in this sense the degree of suppression is the same whether the party exercising the power arising out of exclusivity is public **[**27]** or private. The foreseeability inquiry requires us to go no further. See *Cine, 790 F.2d at 1045-46* (identifying the relevant question as whether the UDC's entry into leases with private parties was foreseeable, and not inquiring into the foreseeability of its selection of any party in particular). We therefore conclude that the suppression of competition resulting from the Village's actions was a foreseeable consequence of what the state authorized.

C. The Supervision Issue with Regard to the Village

Before we can decide whether the Village is immune from the plaintiff's claims, however, we must confront yet one more issue. The plaintiff argues that for a municipality to be immune under the Parker state-action immunity doctrine, it must show, in addition to state authority for its regulatory scheme, that government officials actively supervise those private parties whom the municipality regulates.

Whether a municipality must make such a showing appears to be an open question. The Supreme Court held in Town of Hallie that a municipality need not show that it is supervised by state officials for it to qualify for state-action immunity. *471 U.S. at 46.* **[**28]** But the Supreme Court also indicated that "where state or municipal regulation by a private party is involved, . . . active state supervision must be shown, even where a clearly articulated state policy exists." *Id. at 46 n.10*. This raises the question of whether a failure to show active supervision of a private party can defeat both the municipality's claim of immunity and the private party's, or only the private party's. We are not aware of any decision that squarely addresses this issue.

The law regarding the active supervision requirement has developed almost entirely in the context of claims against private parties. We will therefore return to the question of whether the Village's immunity might depend upon a showing that the Board is actively supervised by the Village after we review the plaintiff's claims against the Board.

III. The Board's State-Action Immunity Defense

The plaintiff alleged in its amended complaint that the Board violated the Sherman Act by willfully seeking and maintaining monopolies in various New York municipalities, and by abusing its monopoly power by providing low-quality service and by attempting to expand its overall market **[**29]** share by threatening retaliatory action against those persons who use the plaintiff's service where competition is allowed. The district court, citing our decision in Cine, held that the municipalities' immunity under the Parker doctrine necessarily also protected the Board: "Because the municipal defendants' decisions appointing the Board as exclusive agent are immune from antitrust liability, the Board is similarly immune from antitrust liability as the party receiving those appointments." *Elec., 145 F. Supp. 2d at 279*. The plaintiff argues on appeal that the district court misapplied the law of **[*123]** state-action immunity for private parties. [7] **[**30]** The Board argues that the district court's holding was correct, and in the alternative that under the Noerr-Pennington doctrine, certain allegations by the plaintiff fail to allege an antitrust injury. [8]

A. The State-Action Defense for Private Actors

HN11[] There are circumstances under which private parties may avail themselves of the Parker state-action immunity doctrine. The Supreme Court has explained the purpose of extending state-action immunity to private parties thus:

> The Parker decision was premised on the assumption that Congress, in enacting the Sherman Act, did not intend to compromise the States' ability to regulate their domestic commerce. If Parker immunity were limited to the actions of public officials, this assumed congressional purpose would be frustrated, for a State would be unable to implement programs that restrain competition **[**31]** among private parties. A plaintiff could frustrate any such program merely by filing suit against the regulated private parties, rather than the state officials who implement the plan. We decline to reduce Parker's holding to a formalism that would stand for little more than the proposition that [the plaintiff] sued the wrong parties.

S. Motor Carriers Rate Conf., Inc. v. United States, 471 U.S. 48, 56-57, 85 L. Ed. 2d 36, 105 S. Ct. 1721 (1985) (footnote omitted) ("Motor Carriers"). In *California Retail Liquor Dealers Assoc. v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*, ***HN12***[] the Supreme Court established that private parties must satisfy a two-prong test to qualify for state-action immunity. First, the private party must show that the alleged anticompetitive acts were pursuant to a "clearly articulated and affirmatively expressed . . . state policy" to displace

---

[7] The plaintiff also argues that the decision of New York Supreme Court, Broome County, in *Atlantic-Inland, Inc. v. Union, 126 Misc. 2d 509, 516, 483 N.Y.S.2d 612, 618*, collaterally estops the Board from asserting a state-action immunity defense in this case. The fact pattern of Atlantic-Inland was similar to that of the instant case: An electrical inspection firm, alleging violations of its constitutional rights and New York ***antitrust law*** (i.e., the Donnelly Act), sued a municipality that had designated the Board its exclusive provider of required electrical inspections. The Board intervened on the side of the municipality. The court entered judgment against the defendants, holding that "the [municipality's] ordinance is anticompetitive and an unwarranted monopoly in violation of the Donnelly Act." *Id. at 517, 483 N.Y.S.2d at 618*. Although the court's opinion in Atlantic-Inland does not mention the state-action immunity defense, the plaintiff argues that the Board could have raised the defense in that case, and so its defeat precludes it from raising the defense now.

The plaintiff's collateral estoppel argument fails as a matter of law. Unlike the federal antitrust laws, the Donnelly Act contemplates no state-action exception. *Elec. Inspectors, Inc. v. Village of Lynbrook, 293 A.D.2d 537, 538, 740 N.Y.S.2d 412, 413 (2d Dep't 2002)*. Thus, even if the Board raised state-action immunity in Atlantic-Inland, rejection of that defense was not necessary to the disposition, and so that case does not preclude the Board from raising the defense here. See *Fuchsberg & Fuchsberg v. Galizia, 300 F.3d 105, 109 (2d Cir. 2002)* (collateral estoppel applies only to issues necessarily resolved in previous proceeding).

[8] In a supplemental brief that we requested at oral argument, the Board asserted for the first time a defense under the Local Government Antitrust Act of 1984, *15 U.S.C. § 34 et seq.* Because the Board did not raise the defense in its principal appellate brief, the Board has abandoned the defense and we do not consider it. See, e.g., *Thomas v. Roach, 165 F.3d 137, 146 (2d Cir. 1999)*.

competition. Id. (citation and internal quotation marks omitted). Second, it must **[*124]** show that its conduct was "actively supervised by the State itself." Id. (citation and internal quotation marks omitted).

More recently, **[**32]** ***HN13***[] the Supreme Court made clear that the first prong of the Midcal test is not as demanding as the Court's statement of it in Midcal suggests. It does not, for example, require a private party to show "'a specific, detailed legislative authorization' for its challenged conduct." *Motor Carriers, 471 U.S. at 64* (quoting *Lafayette v. La. Power & Light Co., 435 U.S. 389, 415, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978))*. Rather, "as long as the State as sovereign clearly intends to displace competition in a particular field with a regulatory structure, the first prong of the Midcal test is satisfied." *Motor Carriers, 471 U.S. at 64*. For example, in Motor Carriers itself, the Court held that a private party accused of horizontal price fixing had satisfied the first prong of Midcal by showing that a state legislature had instructed a state agency to prescribe "just and reasonable" prices, and the agency, in turn, had "exercised its discretion by actively encouraging collective ratemaking." *Id. at 63-64*.

HN14[] Under the second prong of the *Midcal* test -- active state supervision -- a private defendant must **[**33]** show not only that "state officials have . . . [the] power" to supervise, but also that those officials "exercise [that] power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy." *Patrick v. Burget, 486 U.S. 94, 101, 100 L. Ed. 2d 83, 108 S. Ct. 1658 (1988)*. This requirement of official involvement seeks to prevent states from transforming the Parker doctrine, designed to accommodate the states' sovereign interest in regulating commerce, into an unbounded license for the states to issue Sherman Act exemptions to private parties. See *Motor Carriers, 471 U.S. at 57* ("The supervision requirement prevents the State from frustrating the national policy in favor of competition by casting a 'gauzy cloak of state involvement' over what is essentially private anticompetitive conduct." (quoting *Midcal, 445 U.S. at 106*)); *Parker, 317 U.S. at 351* ("[A] state does not give immunity to those who violate the Sherman Act by authorizing them to violate it, or by declaring that their action is lawful."). This second part of the Midcal test thus **[**34]** serves as a counterweight to the first because it "ensures that the state-action doctrine will shelter only the particular anticompetitive acts of private parties that, in the judgment of the State, actually further state regulatory policies." *Patrick, 486 U.S. at 100-01*. [9]

[35]** The Supreme Court's most recent decision applying the active supervision prong is *FTC v. Ticor Title Ins. Co., 504 U.S. 621, 119 L. Ed. 2d 410, 112 S. Ct. 2169 (1992)*. There, the Court held that ***HN17***[] arrangements whereby states authorized horizontal price fixing among insurance companies, but required the companies to file collective tariffs that state agencies **[*125]** had the option to reject, lacked sufficient state supervision to qualify for immunity. *Id. at 639*. To fulfill the active supervision prong, the Court held, private parties must prove that state officials "have undertaken the necessary steps to determine the specifics" of the regulatory regime; a mere "negative option" among state agencies to reject prices proposed by private parties is insufficient. *Id. at 638-39*. "The mere potential for state supervision is not an adequate substitute for a decision by the State." *Id. at 638*.

The Supreme Court followed a similar approach in Patrick, a case that involved an accusation by a physician that a group of his peers had conspired to deprive him of hospital privileges in violation of the Sherman Act. *486 U.S. at 97-98.* **[**36]** Although the defendants presented evidence of state policies encouraging physician peer review, the Court rejected their immunity claims because they had failed to show that state actors actively reviewed "private decisions regarding hospital privileges to determine whether such decisions comported with state regulatory policy and to correct abuses." *Id. at 101*.

Although the Supreme Court has applied the two-part Midcal test in each of its subsequent cases involving an assertion of state-action immunity by a private party, we have twice declined to engage in an independent immunity inquiry for a private party whose alleged anticompetitive conduct was to participate in "concerted" action with a

[9] ***HN15***[] Municipalities need not show that the state actively supervises them for them to be immune with regard to their own anticompetitive behavior under the Parker doctrine because "there is little or no danger that [a municipality] is involved in a private price-fixing arrangement." *Town of Hallie, 471 U.S. at 47* (emphasis in the original). "The only real danger is that [the municipality] will seek to further purely parochial public interests at the expense of more overriding state goals." Id. By way of contrast, ***HN16***[] when "a private party is engaging in the anticompetitive activity, there is a real danger that he is acting to further his own interests, rather than the governmental interests of the State." Id.

government entity authorized by the state to take such action. Our first decision in this line was Cine, a case which, as discussed in Part II.A., above, involved efforts by a state-created entity, the UDC, to improve the Times Square area by purchasing theaters and then leasing them to developers. Although the Cine plaintiffs asserted that "collusive and monopolistic" pricing policies would result from the coordinated action between the UDC and **[*126]** the **[**37]** private-party defendants, the only anticompetitive conduct alleged by the plaintiffs to be illegal was the private parties' seeking, and the UDC's awarding, long-term leases on theaters. *790 F.2d at 1037-38*; see also *Cine 42nd St. Theater Corp. v. Nederlander Org., 609 F. Supp. 113, 119 (S.D.N.Y. 1985)*, aff'd, *790 F.2d 1032 (2d Cir. 1986)* (setting forth the plaintiffs' contentions). After concluding that the UDC's actions were fully authorized by New York State and therefore immune, we held that such immunity extended automatically to the "private [parties] acting in concert with the UDC." *Cine, 790 F.2d at 1048*. We explained that "when the UDC accomplishes its goal in a protected manner, and the participation of private third parties was reasonably contemplated by the legislature, allowing successful tangential attacks on the UDC's activities through suits against the third parties would effectively block the efforts of the UDC." Id.

Our second such decision was *Automated Salvage Transp., Inc. v. Wheelabrator Envtl. Sys., Inc., 155 F.3d 59 (2d Cir. 1998)*, which involved alleged ***antitrust-law*** **[**38]** violations arising from contracts between a state-operated waste-disposal entity and private waste-disposal companies promising to honor each other's exclusive service agreements with various towns. *Id. at 63*. After concluding that the state agency's actions were authorized under a state statute and thus immune from federal ***antitrust-law*** liability, we held, relying on Cine, that the private companies were also immune because "subjecting them to antitrust liability would effectively block [the state entity's] efforts to carry out its mandate through contracts with private parties." *Id. at 74*. As in Cine, the only anticompetitive actions allegedly taken by the private-party defendants were those of contracting with the state-created entity. *Id. at 71*.

The Board argues on appeal that the Supreme Court's decision in Ticor and ours in Cine and Wheelabrator stand for the proposition that the active state-supervision test of Midcal is applicable only in horizontal price-fixing cases. We disagree. With regard to *Ticor*, the Supreme Court did not limit Midcal to any particular form of private anticompetitive **[**39]** conduct, but instead simply cautioned that its holding that the private defendants were not immune "should be read in light of the gravity of the antitrust offense, the involvement of private actors throughout, and the clear absence of state supervision." *504 U.S. at 639*. Four years before Ticor, moreover, the Supreme Court, without dissent, applied the active supervision prong in Patrick, a case that had nothing to do with price fixing. *486 U.S. at 100*. [10]

We think that Cine and Wheelabrator, rather than departing from the logic of Midcal and subsequent Supreme Court precedent, are consistent with it. We decided in both cases that the governmental entities were authorized to engage in contracting **[**40]** with private parties, establishing that the first prong of Midcal was satisfied with regard to the private parties' actions. We then went on to extend that immunity to the private parties, reasoning that to allow suits against private parties who contract with governmental entities, who are themselves authorized to contract with private parties, would effectively undermine the governmental entities' ability to contract. *Wheelabrator, 155 F.3d at 74*; *Cine, 790 F.2d at 1048*. The private parties are the necessary counterparts to the government's acts, and authorization of the government's contracting therefore necessitates authorization of the private parties' contracting.

In extending immunity from governmental entities to private parties where the only alleged antitrust violation was entering into a contract with the government, these decisions do not go through a separate Midcal analysis. But, as the Supreme Court observed in Town of Hallie, "where the actor is a municipality, there is little or no danger that it is involved in a private . . . arrangement." *471 U.S. at 47*. The private actions "in concert" with the governments' **[**41]** in Cine and Wheelabrator were part of an "anticompetitive scheme [that was] the State's own," *Ticor, 504*

---

[10] While we suggested in Wheelabrator that Ticor might apply only where private horizontal price fixing is in issue, *Wheelabrator, 155 F.3d at 74*, Patrick makes clear that that is not the case, *Patrick, 486 U.S. at 100*.

U.S. at 635, thus satisfying the concern that the second Midcal prong -- active supervision -- was designed to address.

Cine and *Wheelabrator* do not stand for the proposition that private parties who contract with governmental agencies are always immune from antitrust liability. As the Supreme Court has made clear, the relevant object of analysis under the state-action immunity doctrine is the activity challenged, not the identity of the party. *Motor Carriers, 471 U.S. at 58-59* ("The success of an antitrust action should depend upon the nature of the activity challenged, rather than on the identity of the defendant."). In *Name.Space, Inc. v. Network Solutions, Inc., 202 F.3d 573 (2d Cir. 2000)*, which involved an assertion of federal-action immunity from ***antitrust-law*** claims by a private party that had contracted with a federal agency, we applied Motor Carriers to conclude that the private party was immune for conduct "compelled by the explicit terms" of its **[*127]** contract and the government's explicit **[**42]** direction. *Name.Space, 202 F.3d at 582*. At the same time, however, we observed that the private party's "mere status as a government contractor does not entitle it to antitrust immunity for all its conduct," *id. at 581*, reinforcing the notion that the relevant unit of analysis is the activity challenged, not the status of the party. The suspension of the requirement for an independent immunity inquiry for the private parties in Cine and Wheelabrator, therefore, should be understood to apply only to their acts of contracting with an authorized government entity.

B. The Board's Actions

We now consider each of the Board's actions that the plaintiff alleges violate the Sherman Act. We note at the outset that, perhaps with ***HN18***[] *United States v. Aluminum Company of America, 148 F.2d 416, 429 (2d Cir. 1945)* (Hand, J.), and its observation that a person does not violate the antitrust laws when it has monopoly "thrust upon it" in mind, the plaintiff does not assert that the Board violated the Sherman Act merely because the Village passed an ordinance according it exclusivity within the Village. Instead, the plaintiff's claim is **[**43]** that the Board actively sought and abused monopoly power.

We conclude that the district court erred by holding that our decision in Cine relieved the Board of the need to satisfy Midcal's two-prong test to qualify for state-action immunity. None of the Board's alleged anticompetitive conduct involved acts of contracting with a governmental entity authorized to enter into contracts with private parties. Municipal ordinances, not contracts, created the monopolies within the municipalities at issue in this case. Moreover, when the Board conducts an inspection, or allegedly threatens those who hire the plaintiff, it is engaging in transactions or seeking to engage in transactions with other private parties, not the Village. "The nature of the activity challenged," *Motor Carriers, 471 U.S. at 58*, is private, and therefore poses the danger of reflecting the Board's "own interests, rather than the governmental interests of the State," *Patrick, 486 U.S. at 101*.

We therefore hold that *Cine* and *Wheelabrator* have no application in this regard to the Board's conduct, and state-action immunity is available for the Board's alleged acts in restraint **[**44]** of trade in violation of *Section One of the Sherman Act* only if it can satisfy Midcal's two-prong test. With respect to the Board's alleged continuing monopolization of electrical inspection services in violation of *Section Two of the Act and the* plaintiff's assertion that the Board is left free by the Village to use its power of exclusivity to determine the price, terms, and quality of its services, the Board must meet both parts of the *Midcal* test -- including active supervision by the Village -- to warrant protection under the state-action immunity doctrine. The Village "may not confer antitrust immunity" -- including immunity from such charges of monopolization -- " on private persons by fiat." *Ticor, 504 U.S. at 633* (citing *Midcal, 445 U.S. at 105*). Unless the Village maintains "ultimate control" over the monopoly it created, "there is a real danger that [the defendant] is acting to further [its] own interests, rather than the governmental interests of the State." *Town of Hallie, 471 U.S. at 47*.

1. The First Part of the Midcal Test. We concluded in Part II.B., above, that the Village's conferral of exclusivity **[**45]** upon the Board was "an authorized implementation of state policy." *Omni Outdoor, 499 U.S. at 370*. We think that this holding also satisfies the **[*128]** first prong of the *Midcal* test for the Board to the extent that the Board's alleged anticompetitive actions were "pursuant" to the grant of exclusivity. *Town of Hallie, 471 U.S. at 40*. The plaintiff's amended complaint alleges anticompetitive actions by the Board in municipalities other than the

Village, suggesting that the first prong of the Midcal test for purposes of these actions would depend on the authority of these other municipalities to confer monopoly powers upon the Board. On appeal, however, the plaintiff has not raised arguments addressing these municipalities' authority as distinct from the Village's, and so we assume that our analysis of the Village's authority applies equally to these other municipalities for the limited purpose of assessing the Board's satisfaction of the first prong of Midcal.

The plaintiff also alleges that the Board attempted to monopolize inspections services by seeking government-issued exclusivity. Amend. Compl. PP 55, 84. Because these actions **[**46]** were not pursuant to state policy, but rather in pursuit of it, they do not appear to qualify for Parker immunity. They may, however, be protected under the Noerr-Penington doctrine. See *Omni Outdoor, 499 U.S. at 379-80* (holding that the Supreme Court's decisions in *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*, and *Mine Workers v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*, establish that "the federal antitrust laws . . . do not regulate the conduct of private individuals in seeking anticompetitive action from the government"). We leave any analysis of this issue to the district court in the first instance on remand.

The Board's alleged poor service and retaliatory threats within the Village, if they occurred, unlike the Board's alleged action in lobbying for exclusivity, were pursuant to the exclusivity granted to the Board in the sense that the Board's insulation from competition would have lent these actions much of their capacity to harm. We thus conclude that these alleged actions pass the first part of the **[**47]** Midcal test. [11] Further inquiry into whether the Board is immune with respect to them must be conducted under the second part of the Midcal test: whether there was adequate active supervision of the Board.

2. The Second Part of the Midcal Test. With respect to the active state supervision part of the Midcal test as applied to the Board's **[**48]** remaining alleged anticompetitive conduct, the Board argues in the alternative that adequate supervision was present. In support, the Board cites an affidavit in which the Village's mayor asserts that the Village's building department "maintained strict controls over the inspections" by "establishing policies as to the manner in which the electrical inspections were carried out . . . [,] enforcing the requirement that all inspectors . . . possess the appropriate qualifications . . . [and] providing guidance to the inspectors as to how to proceed." Mayor **[*129]** Frank Falco Aff. P 11. The mayor also asserts in his affidavit that the Village could have replaced the Board at any time by resolution had it become dissatisfied with the Board's services. Id. P 16.

As we have noted, the district court did not determine whether the Board was actively supervised, holding instead that this part of the Midcal test need not be met. We decline to decide this heavily factual issue in the first instance on the record before us. We note that in this context that the Village's mere "negative option" to replace the Board at any time is alone likely inadequate supervision, *Ticor, 504 U.S. at 638* **[**49]** (noting that supervision must be "active"), and leave to the district court on remand the determination in the first instance of what degree or kind of supervision is adequate and suffices for the Board's assertion of immunity to succeed.

IV. The Village's Immunity - Redux

We now return to the question we left unanswered in Part II.C., above: whether the Village's immunity, like the Board's, depends upon a showing that the Board is actively supervised. As we indicated, we are unaware of an opinion of the Supreme Court or of this Court that has squarely addressed this issue. We note that the Supreme Court has never held that a state's failure to supervise a regulated private party can deprive the state of immunity under Parker, even though such a failure can result in liability for the private party. The federalism-based concerns underlying state immunity from an antitrust action seem to us less pressing in this case than in the immunity cases the Court and we have decided, however, in part because the Village is not a sovereign, and in part because the

---

[11] The plaintiff also alleges that the Board has sought to improperly extend use of its monopoly power into localities that have not made it the exclusive provider of inspection services, by threatening customers who use plaintiff's services where they are salable with retaliation in those localities in which the Board has been granted exclusivity. Amend. Compl. PP 69-72. We leave it to the district court on remand to determine in the first instance whether such actions, if they occurred, were without state-action immunity because they were not reasonably foreseeable anticompetitive effects of the authorized implementation of state policy, or otherwise.

plaintiff seeks only injunctive and declaratory relief against the Village. An injunction might be an appropriate device for **[**50]** blocking municipal regulatory regimes that result in significant anticompetitive action by private parties and that constitute nothing more than a "gauzy cloak of state involvement." *Midcal, 445 U.S. at 106*.

But the question of the need for an injunction will arise in this case only if the district court ultimately determines that the Board is not actively supervised and thus not immune, and that there has in fact been a violation of the antitrust laws. We therefore decline to decide this issue since it may prove unnecessary to the disposition of the case. If the district court determines on remand that supervision is lacking, that antitrust violations have occurred, and that a damages award against the Board would be inadequate to deter future harms, it may consider for the first time whether the Parker antitrust immunity doctrine would allow an injunction to issue against the Village even though the Village's actions were authorized by the state.

V. Caveat

It bears both repetition and emphasis that we have done no more than decide that, on the record before us, the defendants are not entitled to Parker state-action immunity as a matter of law. Nothing **[**51]** we have said should be read to imply any views as to the plaintiff's standing under the antitrust laws to raise all of the issues with respect to which it pleads in its amended complaint or as to the possible ultimate merits of its legal claims.

CONCLUSION

For the foregoing reasons, we vacate the judgment of the district court, and remand the case for further proceedings consistent with this opinion.

Morris Communs. Corp. v. PGA Tour, Inc.

United States District Court for the Middle District of Florida, Jacksonville Division

December 13, 2002, Decided ; December 13, 2002, Filed

HN1[] **Supporting Materials, Affidavits**

Summary judgment is appropriate if the pleadings, depositions, answers to interrogatories and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. The moving party bears the initial burden of showing the court, by reference to materials on file, that there are no genuine issues of material fact that should be decided at trial. When a moving party has discharged its burden, the nonmoving party must then go beyond the pleadings, and by its own affidavits, or by depositions, answers to interrogatories, and admissions on file, designate specific facts showing that there is a genuine issue for trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Evidence > Inferences & Presumptions > Inferences

HN2[] **Summary Judgment, Opposing Materials**

In determining whether the moving party has met its burden of establishing that there is no genuine issue as to any material fact and that it is entitled to judgment as a matter of law, the court must draw inferences from the evidence in the light most favorable to the nonmovant, and resolve all reasonable doubts in that party's favor. Thus, if a reasonable fact finder evaluating the evidence could draw more than one inference from the facts, and if that inference introduces a genuine issue of material fact, then the Court should not grant the summary judgment motion. . It must be emphasized that the mere existence of some alleged factual dispute will not defeat an otherwise properly supported summary judgement motion. Rather, the requirement is that there be no genuine issue of material fact. A dispute about a material fact is "genuine" if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. The inquiry is whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN3[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Once the defendant asserts valid business justifications for its action, the plaintiff bears the burden of proving that the proffered business justification is pretextual.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN4[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Free-riding is obtaining a benefit at another's expense without contributing to it.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN5[] Price Fixing & Restraints of Trade, Tying Arrangements

Free-riding on "positive externalities" is accepted by society and courts.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN6[] Price Fixing & Restraints of Trade, Tying Arrangements

To be a business justification free-riding does not have to reach the for a hot news exception. To be a valid business reason, a much lower level of free riding will justify excluding competitors.

Computer & Internet Law > Internet Business > Online Advertising > General Overview

HN7[] Content Regulation, Communications Decency Act

The Internet is not like traditional broadcast media, i.e., television or radio. The United States Supreme Court has distinguished the Internet and the radio transmission based on three distinctions. First, the Internet has not historically been regulated by an agency familiar with the medium. Second, available frequencies on the Internet are not scarce as they are on radio. And finally, affirmative steps are required to access information on the Internet. The Court has concluded that because of these differences, Congress cannot regulate the Internet the same way it can regulate radio. However, none of those differences mandates treating the Internet differently from radio or television in terms of property rights. Whether the government can regulate the Internet does not limit the value of Internet broadcasting or provide a rationale for restricting the use of that information. The Internet provides an opportunity to profit from a product by selling advertisement. Television, radio, and print media operate on a similar, if not identical, principle: the selling of advertisement to viewers, listeners, or readers of entertainment, be it sports, entertainment, or news.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN8[] **Scope, Monopolization Offenses**

Monopolization, an offense under *Section 2* of the Sherman Act, *15 U.S.C.S. § 2*, requires two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN9[] **Regulated Practices, Monopolies & Monopolization**

Liability on the second element of a *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, claim turns, then, on whether valid business reasons can explain those actions.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN10[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

Under certain circumstances, a unilateral refusal to deal may constitute an antitrust violation. However, in order to prevail on a claim for refusal to deal, the plaintiff must show both the existence of monopoly power and anticompetitive intent. Courts have used two tests to determine whether a refusal to deal is a violation of ***antitrust law***: intent test and essential facilities test.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN11[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

The intent test considers whether, under the circumstances of a case, a monopolist's conduct demonstrates an illegal intent to destroy competition. It is not just an intent to destroy competition, for that is the nature of a competitive market, but an illegal intent as evidenced by, conduct that unnecessarily excludes or handicaps competitors.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN12[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

A legitimate purpose renders any accompanying purpose irrelevant; regardless of motive no firm has a general duty to injure itself in order to benefit a rival.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN13[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

The withholding of an essential facility is a violation of ***antitrust law***, and an essential facility is one without which a competitor cannot enter or compete in a market. An essential facilities claim requires a showing of four elements: (1) control of the essential facility by a monopolist, (2) competitor's inability to duplicate the facility, (3) denial of the facility, and (4) feasibility of providing the facility.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN14[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

Essentiality is not proven when actual or potential rivals other than the plaintiff are able to compete without the claimed facility.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN15[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

A court's role is not to force access to proprietary information in the name of competition, as that would reduce incentive to innovate and ultimately harm consumers.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN16[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

One who controls an essential facility must provide access upon such just and reasonable terms and regulations as will, in respect of use, character, and cost of service, place every such company upon as nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN17[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

It is not unlawful for a defendant - even one who possesses monopoly power- to refuse to deal with its competitors if there are legitimate pro-competitive reasons for that refusal.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN18[] **Regulated Practices, Monopolies & Monopolization**

Monopoly leveraging refers to a monopolist's use of its market power to gain a competitive advantage in a different level or in a different market. Neither the Eleventh Circuit nor the United States Supreme Court has accepted this theory of antitrust violation.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN19[] **Regulated Practices, Monopolies & Monopolization**

Under the Second Circuit's analysis of monopoly leveraging, a plaintiff must make a showing of anticompetitive intent or an unlawful exercise of power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN20[] **Monopolies & Monopolization, Attempts to Monopolize**

Attempted monopolization has three elements: (1) the defendant's specific intent to achieve monopoly power through predatory or exclusionary conduct, (2) the defendant engages in such conduct, and (3) there exists a dangerous probability that the defendant will succeed. Specific intent does not merely mean intent to prevail over ones rivals; it goes beyond that to include an intent to control prices or to restrain competition unreasonably.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN21[] **Monopolies & Monopolization, Attempts to Monopolize**

A finding of legitimate pro-competitive business reasons forecloses a finding of predatory or exclusionary conduct.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

HN22[] **Trade Practices & Unfair Competition, State Regulation**

The Florida Deceptive and Unfair Trade Practice Act (FDUPTA), *Fla. Stat. Ann. § 501.201 et seq.*, defines violation of the act in *Fla. Stat. Ann. § 501.203(3)*, as any violation of this act and may be based upon any of the following: (a) any rules promulgated pursuant to the Federal Trade Commission Act, *15 U.S.C.S. § 41 et seq.* or this act; (b) the standards of unfairness and deception set forth and interpreted by the Federal Trade Commission or the federal courts; (c) any law, statute, rule, regulation or ordinance which proscribes unfair methods of competition, or unfair, deceptive, or unconscionable acts or practices. FDUPTA is to be construed consistently with ***antitrust law***.

Torts > ... > Contracts > Intentional Interference > Defenses

Torts > ... > Commercial Interference > Contracts > General Overview

HN23[] Intentional Interference, Defenses

Florida courts recognize that if a defendant interferes with a contract in order to safeguard a preexisting economic interest of his own, the defendant's right to protect his own established economic interest outweighs the plaintiff's right to be free of interference, and his actions are usually recognized as privileged and nonactionable.

Opinion

[*1271] ORDER

This cause is before the Court on Defendant's Motion for Summary Judgment (Doc. No. 109, filed June 24, 2002) and Plaintiff's Response (Doc. No. 136, filed June 24, 2002); Plaintiff's Motion for Partial Summary Judgment on Liability (Doc. No. 125, **[**2]** filed June 24, 2002) and Defendant's Memorandum of Law in Opposition (Doc. No. 139, filed June 24, 2002) [1]; and Defendant's Motion to Strike Plaintiff's Second Notice of Supplemental Authority (Doc. No. 150, filed July 16, 2002). Following a hearing during which both sides presented oral argument on the summary judgment motions, all pending motions are ripe for consideration.

As an initial matter, Defendant's Motion to Strike is **DENIED**.

I. Background

Introduction

Many issues revolve around the periphery of this case, and the Court will take a minute to address what the case is and is not about. The quintessential issue is who has the right to instantaneous information and its value. This case is not about the ability or right of a publisher to disseminate and profit from information and facts released into the public domain through radio or television **[**3]** broadcasts or through a web site. Nor is this case about the ability of the media to cover and publish information for a story in the next day's paper or even in that evening's television news coverage. The *First Amendment* freedom of the press, while at first blush might appear to be relevant, is not involved. See *National Broadcasting Co. v. Communication Workers of America, 860 F.2d 1022, 1024 (11th Cir. 1988)*(stating that the *First Amendment* right of Free Press does not apply absent state action). The case, in general, does not resolve issues of journalistic integrity. [2] **[**4]** This case is to some extent **[*1272]** about Morris's

[1] The summary judgment motions and responses were originally filed under seal, and were unsealed by Court Order on June 24, 2002.

claimed ability or need to track a single player, ranked 100, from a small town who is not currently covered by the leader-board or being covered by the broadcast station. Morris needs access to all the players' scores to relate to a local following in that small town where its native son or daughter stands in relation to the other players in the tournament. Finally, this case is not about "streaming" video and audio or "webcasting." [3]

Factual Background [4]

Plaintiff, Morris Communications Corporation ("Morris"), is a Georgia corporation that publishes over thirty traditional print newspapers as well as a number of Internet-based, electronic newspapers. Defendant, PGA Tour, Inc. ("PGA Tour"), is a Maryland corporation with its principal place of business in Ponta Vedra, Florida. The PGA Tour is mainly engaged in the business of promoting professional golf tournaments throughout North America, collectively known as the PGA Tour. Players on the PGA Tour, generally recognized to be among the best golfers in the world, assign all television, radio, motion picture and other **[**5]** rights related to PGA Tour events to the PGA Tour, and with limited exceptions, are restricted from competing in tournaments sponsored by other entities. The record evidence in this case shows that the PGA Tour is the most widely recognized professional golfing tour in the United States. Although there are other golf tournaments which generate fan interest, few can rival PGA Tour events in terms of overall popularity.

At issue in this case is the extent to which the PGA Tour may be allowed to limit the access of Morris and other media entities to its own private golf tournaments. Specifically, the Court must resolve whether the PGA Tour may legally condition access to its tournaments on Morris's agreement not to syndicate "real-time" golf scores obtained from an on-site media center. As this Court noted in its Order denying Morris's Motion for Preliminary Injunction [5] and as the parties have emphasized throughout these proceedings, this case is more than simply about golf scores. Rather, it presents a novel and compelling question of who has the "right" to report the news, produced and gathered by others, in an age of near-instantaneous information.

[6]** PGA Tour events are covered extensively by a number of different print, broadcast, and electronic media organizations. Although these events are conducted on private golf courses, the PGA Tour issues credentials to members of the media who **[*1273]** are thereby invited to its tournaments for the purpose of providing media coverage. Traditionally, Morris and its subsidiary publications have been among the entities that have received media credentials to PGA Tour tournaments. Both the PGA Tour and members of the media have traditionally benefitted from this arrangement in that the media are better positioned to satisfy the public's demand for golf-related information, and the PGA Tour enjoys enhanced publicity, which in turn generates greater demand for its golf tournaments and related goods and services, thus producing revenue for the PGA Tour.

---

[2] Morris claims that journalistic integrity requires a journalist to report on news first-hand, if possible, instead of relying on what the creator of the news reports to the journalist or in some fashion to have the ability to verify questionable facts that come to their attention before publishing them. Morris's goal in this suit is to get access to the PGA Tour's scoring system, which will allow Morris to report scores of golfers, but only the scores that the PGA Tour relays to Morris, through a procedure the PGA Tour developed and has in place to gather simultaneous scores in its golf tournament. If Morris were to prevail on its claims, its journalists would, by its own standards, publish information gathered by others. Morris employees do not actually view the action they report on, but merely copy numbers provided by PGA Tour, whether in the media tent or through the PGA Tour's web site. If Morris's reporters believe the PGA Tour's information is incorrect, they may ask that the PGA Tour verify it in order to maintain journalistic integrity, but Morris would only seek to verify unusual scores. For example, if a golfer scores a 9 on a par 3 hole (par is the average or expected number of strokes a player would use to complete the hole), Morris contends that it would alert the PGA Tour and ask that the unusual score be verified. However, Morris would not ask to verify a golf score of 2 or 4 on a par 3 hole, even though that score might be as inaccurate as the score of 9.

[3] For a description and definition of "streaming" and "webcasting", see Fan, *When Channel Surfers Flip to the Web: Copyright Liability for the Internet Broadcasting*, *52 Fed. Comm. L.J. 619, 622-27 (2000)*.

[4] The parties do not dispute the facts, only their import.

[5] *Morris Communications Corp. v. PGA Tour, Inc., 117 F. Supp.2d 1322 (M.D. Fla. 2000)*.

Real Time Golf Scores

The parties' dispute in this case concerns the on-line publication of "real-time" golf scores. Real-time scores, as the term suggests, are scores that are transmitted electronically nearly contemporaneously to their actual occurrence on the golf course. In this way, Internet users are able to track during a golf tournament **[**7]** each participating player's progress on a hole-by-hole basis. In order to improve its scoring capabilities for its tournaments, including transmission of real-time golf scores over the Internet, the PGA Tour has designed and implemented an elaborate electronic relay known as the Real-Time Scoring System ("RTSS").

RTSS works as follows: During a given golf tournament, volunteer workers called "hole reporters" follow each group of golfers on the golf course and tabulate the scores of each player at the end of each hole. The scores are then collected by other volunteers located at each of the eighteen greens on the golf course, who, with the aid of hand-held wireless radios, relay the scoring information to a remote production truck staffed by personnel employed by the PGA Tour. [6] The scores of all participating golfers are then processed at the remote production truck and transmitted by the PGA Tour to its Internet web-site, pgatour.com. The PGA Tour claims that it takes "about five minutes" for the information to be routed from the production truck to pgatour.com. At the same time, real-time scores are also transmitted to an on-site media center where accredited members of the media **[**8]** are able to access the scores. The same information is also transmitted to various electronic "leaderboards" located throughout the golf course for public viewing by spectators. The leaderboards do not simultaneously show the real time scores of all participating golfers. Rather, they typically show only the top ten or fifteen scores.

Due to the nature and size of golf courses, which may span as much as 150 acres, comprehensive real-time scores--that is, up-to-the-minute scores of every competitor--can only be compiled using a relay system such as RTSS. During a golf tournament, different groups of players compete **[**9]** contemporaneously at different holes such that any one spectator can only view a limited number of players at any one of the eighteen holes. Thus, in order to generate real-time scores, it is necessary to have individuals stationed at each hole as the tournament progresses so that the entire golf course can be monitored simultaneously. Acknowledging that some kind of relay system is needed to generate the type of real-time scoring information it wishes to syndicate, Morris submits that it is unable to implement such a system itself due to the PGA Tour rules prohibiting **[*1274]** unauthorized use of wireless communication devices on the golf course at its tournaments. [7]

Although the exact amount is unknown, it appears that the PGA Tour has invested tens of millions of dollars in RTSS, dating back to the early 1980s. Nevertheless, not all of this investment has been devoted solely to developing **[**10]** Internet-based scoring. The Internet did not rise to prominence until at least the mid-1990s, and pgatour.com did not become operational until 1997. Moreover, the evidence in this case shows that RTSS was, and continues to be, developed with an eye toward enhancing the on-site scoreboards for live spectators and for television broadcasts. For example, Ken Finchem, who is presently the Commissioner of the PGA Tour, noted in 1990 that "the electronic scoreboard system was created to provide the growing number of spectators at PGA Tour tournaments with up to the minute information on action all around the course."

Additionally, the Internet presently represents only a small fraction of the PGA Tour's overall revenue. For example, the PGA Tour's annual revenues from its Internet syndication contracts is approximately $ 130,000. In contrast, a 1999 financial audit of the PGA Tour revealed "direct" revenues of $ 306,510,000, which included revenues from television and tournaments.

---

[6] Under newly developed technology known as "Shotlink," the walking scorers themselves will be able to relay scores directly to the production truck. In addition, the new technology allows the scorers to transmit additional data such as club selection, the lie of the ball, and the distance to the pin. Morris has not sought to syndicate any information obtainable from Shotlink other than the raw score.

[7] Morris has also argued that it would be socially wasteful for it to duplicate the PGA Tour's efforts in implementing such a system.

Nevertheless, the PGA Tour has made no secret in this litigation of its desire to maintain a commercial advantage in the market for selling real-time golf scores and has vigorously defended its right to protect **[**11]** its proprietary investment in RTSS. To that end, it has enacted a series of regulations designed to prevent potential competitors from immediately selling scores obtained in the media center to third parties.

On Line Service Regulations

Prior to 1999, credentialed members of the media could view scores in the media center and then re-key them directly into their own computers for transmission to their company's Internet servers. The result was that competitors of pgatour.com, including Morris, were able to publish real-time scores on their web sites as fast as or possibly faster than pgatour.com. Beginning in January 1999, shortly after the PGA Tour entered into an exclusive syndication contract with USA Today, it instituted Online Service Regulations ("OLSR") applicable to all credentialed media invitees. Around the same time, Morris began publishing scores from PGA Tour tournaments on its web sites and selling them to third parties, and Morris appears to have been the PGA Tour's only major competitor in the syndication market. [8]

[12]** Under the terms of the original OLSR, scoring information obtained from the media center could be published on any web site, but not sooner than 30 minutes after the actual occurrence of the shots. The PGA Tour's admitted purpose for the new regulations was to allow it to have the first opportunity to post the real-time scores on its web site and those of its syndicates.

In April 1999, the PGA Tour amended its OLSR so that scoring information, obtained in the media center, could appear on an unaffiliated web site <u>either</u> no sooner **[*1275]** than 30 minutes after the actual occurrence of the shots <u>or</u> when the information became legally available as public information. [9] Shortly afterwards, the PGA Tour agreed to allow Morris to immediately publish scores obtained from the media center on its own web-sites, but not on the web-sites of non-credentialed third parties. In January 2000, the PGA Tour again amended its OLSR so that "no scoring information may be used by, sold, given, distributed or otherwise transferred to, any party other than the Credentialed Site in any manner whatsoever, without the prior written consent of the PGA Tour." Violators were subject to revocation of their media **[**13]** credentials.

In May 2000, the PGA Tour learned that Morris was planning to sell scoring information obtained directly from the media center to the Denver Post, in violation of the January 2000 OLSR. The PGA Tour reminded Morris of the prohibition against syndicating scores obtained in the media center. After some discussion between the parties, the PGA Tour agreed to allow Morris to syndicate scores to the Denver Post for one tournament only.

In August 2000, after some additional negotiations, the PGA Tour agreed to waive the restriction on selling real-time golf scores to third parties on the condition that Morris agree to collect the scores to be sold for syndication from pgatour.com rather than the on-site media center. Morris attempted **[**14]** to gather real-time golf scoring information using this alternative method but ultimately abandoned it as unworkable. Among other problems, there was an inevitable delay in scores taken directly from pgatour.com because of the time needed to re-key the scores from that web site onto Morris's servers. In the meantime, Morris continued to negotiate syndication contracts with a number of third parties, apparently assuming that some satisfactory resolution would be reached with the PGA Tour.

On September 13, 2000, Morris informed the PGA Tour that its attempts at obtaining real-time scores through pgatour.com had failed and requested that it be credentialed to syndicate real-time scores directly from the on-site

---

[8] While Morris was the only major competitor in the syndication market, many competitors, such as *www.thegolfchannel.com*, *www.nbc.com*, and *www.golfonline.com*, still vied for market share in the distribution of golf scores on the Internet.

[9] Although it is a matter of contention when the scoring information becomes legally available to the public, the PGA Tour has conceded that golf scores are in the public domain once they are published on pgatour.com or are publically broadcasted on either television or radio.

media center. The PGA Tour refused to accommodate this request. It subsequently informed Morris that media credentials would only be provided on the condition that scoring information collected from the on-site media center be used only in publications within the Morris Communications Group, as required under the OLSR.

Motion for Preliminary Injunction

On October 11, 2000, Morris filed its Complaint and Motion for Preliminary Injunction, alleging violations of Section **[**15]** 2 of the Sherman Act, *15 U.S.C. § 2*, the Florida Antitrust Act, *Fla. Stat. § 542.19*, and the Florida Deceptive and Unfair Trade Practices Act, *Fla. Stat. § 501.201 et seq.* Morris alleged that the PGA Tour possesses monopoly power over access to its golf tournaments and has unfairly used that power by attempting to stifle competition in the separate market for syndicated real-time golf scores. In response, the PGA Tour argued that it enjoys a property right in RTSS and that its regulations restricting the syndication of real-time golf scoring information gathered and generated by RTSS constitute a reasonable safeguard against would-be free riders seeking to unfairly capitalize on its product.

This Court denied Morris's Motion for Preliminary Injunction, finding that Morris **[*1276]** had failed to meet its high burden for proving entitlement to injunctive relief. See *Morris Communs. Corp. v. PGA Tour, Inc., 117 F. Supp.2d 1322, 1326 (M.D. Fla. 2000)*. The Court found that Morris had failed to show a substantial likelihood of success on the merits of its *Section 2* monopolization claims. [10] Even assuming that the PGA Tour possessed monopoly power in the **[**16]** market for real-time golf scores, Morris had not shown that the PGA Tour lacked a legitimate business justification for its restrictions on syndication of real-time scores. Specifically, the Court was without sufficient evidence regarding the extent to which it would be condoning free riding on the PGA Tour's proprietary investment in RTSS if it ordered the PGA Tour to allow Morris unconditional access to its on-site media centers. *Id. at 1326-30*.

Effects of the On Line Service Regulations

Both parties have submitted substantial evidence regarding the OLSR's possible effects on competition. Not surprisingly, the evidence is somewhat contradictory in this regard. For example, the PGA Tour produced the deposition transcript of the new **[**17]** media sports producer of The Augusta Chronicle, which is owned by Morris. He stated that at least one Internet syndication customer, insidetheropes.com, "never made any demands as to time length [between the occurrence of scores and their real time publication]." Similarly, Mike McLeod, the project manager for golf at CNN/SI, with whom Morris has a syndication contract, stated that even when Morris was required to transmit golf scores remotely, i.e., off of pgatour.com rather than directly from the media center, "for CNN/SI's editorial purposes, the scores were reported fast enough to be editorially acceptable."

This evidence, however, is belied by other evidence presented by Morris suggesting that both consumers [11] in the syndication market and the PGA Tour itself place a premium on speed. This evidence suggests that OLSR have the effect of harming competitors' ability to compete for the sale of syndicated real-time golf scores. For example, Mr. McLeod's comments notwithstanding, it appears that the value of Morris's syndication contract with CNN/SI has decreased dramatically since the OLSR were implemented. Under the original syndication agreement, executed in 1999, CNN/SI agreed **[**18]** to pay Morris approximately $ 431,666 annually for real-time golf scores. In 2001, when the OLSR were in effect, that amount was $ 185,599. By 2002, it had been further reduced to $ 150,000. By the same token, the record reflects that the PGA Tour has raised the prices for real-time golf scores in its own syndication agreements with USA Today. Moreover, in its most recent contract with USA Today, the PGA Tour no

[10] The Court also concluded that Morris had not satisfied its burden with respect to showing irreparable harm or that the balance of harms and the public interest weighed in favor of injunctive relief. *Morris, 117 F. Supp.2d at 1330-31*.

[11] The "consumers" in the syndication market refer generally to web-site publishers who pay other publishers for real-time scoring information; advertisers, who usually represent the primary source of revenue for Internet web sites; and Internet users, who log on to the various web sites.

longer promises exclusive syndication rights, which arguably makes the agreement less valuable to USA Today despite the higher price. [12] The higher prices for real-time scores may reflect a consumer preference **[*1277]** for more up-to-date scores, which is reflected elsewhere in the record. For example, hits on pgatour.com have increased by 50 to 100% since the PGA Tour first instituted its OLSR.

[19]** Perhaps most tellingly, the PGA Tour itself has acknowledged that the OLSR were implemented in order to maintain a commercial advantage. In a January 1999 letter to Carl Cannon, Vice President of Morris and Publisher of the Florida Times Union, Commissioner Finchem stated that:

> The primary reason for requiring this delay [in the OLSR] is so that pgatour.com, the PGA TOUR's own web site, can have a window of exclusivity for the provision to the public of our basic product, official real time scores from our events. We have found that the appearance of exclusive real time scores on our web site drives tremendous traffic volume to the site during times when tournaments are being conducted, particularly outside the television coverage window. Requiring a thirty (30) minute delay in the dissemination of scores enables us to preserve the value of our real time scoring.

Thus, the record seems to clearly indicate that the OLSR have the purpose and effect of giving the PGA Tour a commercial advantage in the syndication market and disadvantaging potential competitors, including Morris. As discussed below, this does not necessarily mean that the PGA Tour has violated any antitrust **[**20]** laws. Nevertheless, it is important to identify the OLSR's potentially deleterious effect on competitors, if not competition.

Moreover, Morris notes that if the PGA Tour is either unable or unwilling to publish real time golf scores from its tournaments on pgatour.com, consumers are foreclosed from obtaining such information on the Internet. Morris cites the example of the recent World Golf Championship, where pgatour.com did not publish real-time scores. As a result, the real-time scores were simply unavailable on line.

In its summary judgment papers, Morris responds to the concerns raised in the Court's Preliminary Injunction Order by arguing that it has successfully demonstrated a lack of any pro-competitive justification for the OLSR. For its part, the PGA Tour continues to assert that it has a proprietary right in RTSS and the OLSR represent a commercially reasonable way to protect its investment. The PGA Tour also argues that Morris cannot show monopoly power in any relevant market, a prerequisite to prevailing on a monopolization claim. Specifically, it asserts that there is no distinct product market for "real-time" golf scores, and Morris's monopolization claims must therefore **[**21]** be dismissed.

II. Standard of Review

HN1[] Summary judgment is appropriate "if the pleadings, depositions, answers to interrogatories and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. The moving party bears the initial burden of showing the Court, by reference to materials on file, that there are no genuine issues of material fact that should be decided at trial. *Clark v. Coats & Clark, Inc., 929 F.2d 604, 608 (11th Cir. 1991)*. When a moving party has discharged its burden, the nonmoving party must then "go beyond the pleadings," and by its own affidavits, or by "depositions, answers to interrogatories, and admissions on file," designate specific facts showing that there is a genuine issue for trial. *Celotex Corp. v. Catrett, 477 U.S. 317, 324, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. **[*1278]**

HN2[] In determining whether the moving party has met its burden of establishing that there is no genuine issue as to any material fact and that it is entitled to judgment as a matter of law, the Court **[**22]** must draw inferences from the evidence in the light most favorable to the nonmovant, *Key West Harbor v. City of Key West, 987 F.2d*

---

[12] PGA Tour counters by noting that "cash" consideration (as opposed to promotional equivalents) is the same and that the new contract provides USA Today with more advertising funds and greater technical assistance, as well as expanded use of PGA Tour trademarks.

723, 726 (11th Cir. 1993), and resolve all reasonable doubts in that party's favor. Spence v. Zimmerman, 873 F.2d 256, 257 (11th Cir. 1989).

Thus, if a reasonable fact finder evaluating the evidence could draw more than one inference from the facts, and if that inference introduces a genuine issue of material fact, then the Court should not grant the summary judgment motion. Augusta Iron and Steel Works v. Employers Insurance of Wausau, 835 F.2d 855, 856 (11th Cir. 1988). It must be emphasized that the mere existence of some alleged factual dispute will not defeat an otherwise properly supported summary judgement motion. Rather, "the requirement is that there be no genuine issue of material fact." Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986). A dispute about a material fact is "genuine" if the "evidence is such that a reasonable jury could return a verdict for the nonmoving party." Id. The inquiry is "whether the evidence **[**23]** presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law." Id. at 251-52.

The parties assert, and the Court agrees, that there is no genuine issue of material fact, and summary judgment is appropriate.

III. Analysis

A. Antitrust claims

Morris asserts four antitrust claims: 1) monopolization of the Internet markets, 2) unlawful refusal to deal, 3) monopoly leveraging, and 4) attempted monopolization of the Internet markets. Before addressing the elements of each of the antitrust claims, the Court will first address the PGA Tour's assertions that valid business reasons justify the exclusionary practice found in the OLSR, because valid business reasons are a defense to the antitrust claims. ***HN3***[] Once the PGA Tour asserts valid business justifications for its action, Morris bears the burden of proving that the proffered business justification is pretextual. See U.S. Anchor Mfg., Inc. v. Rule Industries, Inc., 7 F.3d 986, 1002 (11th Cir. 1993).

Free-riding [13]

[24]** Morris asks the Court to force the PGA Tour to provide Morris with the compilation of scores, for which the PGA Tour spends considerable money and time creating, at no cost to Morris. While Morris does invest its own cost in re-keying the scores for syndication, Morris free-rides on the PGA Tour's efforts in compiling the scores. As Morris admits in its Memorandum of Law, "Morris cannot duplicate the functions of RTSS, which depends on the efforts of hundreds of volunteers each week." Even if it is the efforts of "volunteers", the PGA Tour has still invested time and money in the organization and technology to make RTSS possible. [14]

Morris contends that it is not free-riding and cites to the *Kodak, Motorola*, and *Aspen* cases. Eastman Kodak Co. v. Image ***[*1279]*** Technical Services, Inc., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992); **[**25]** Nat'l Basketball Ass. v. Motorola, Inc., 105 F.3d 841, 854 (2nd Cir. 1997); Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985). However, none of these cases is applicable to the instant case. In *Motorola*, the court found that Motorola did not free-ride when it created a network that disseminated scores from NBA basketball games. See Motorola, 105 F.3d at 854. Three distinctions between Motorola and the instant case make Morris's claim untenable. First, the *Motorola* court used a very high standard

[13] ***HN4***[] Free-riding is obtaining a benefit at another's expense without contributing to it. See Garner, *Black's Law Dictionary*, 7th ed. at 676.

[14] Morris's claim that replication of RTSS would be socially wasteful belies its claim that it does not free-ride. Replication would be wasteful, precisely because the PGA Tour has invested time, money, and resources that Morris has not and does not wish to expend.

for free-riding that is applicable only in cases with the hot-news exception, which will be discussed in greater detail below. More importantly, the information that Motorola used to create its product was in the public domain, having been broadcast on television or radio. See *id. at 843*. Specifically, Motorola-paid reporters, who had heard the radio or television broadcast scores, reported the information to a central location and merely relayed what had been known to the world. See *id. at 844*. Golf, unlike basketball, precludes a single person **[**26]** gathering all the information occurring on all 18 holes. So when television and radio cover a basketball game [15], the score is presented to the public through those media outlets, allowing Motorola to obtain the information and republish it. If Morris were able to gather scores from all 18 holes through a television or radio broadcast, Morris could then republish that information, absent a hot-news exception. [16] However, golf's atypical format prevents any single television or radio broadcast from providing results from all 18 holes live. [17] The PGA Tour does publish the scores in the media center, [18] **[**28]** but the media cannot disseminate that information except as the PGA Tour's press credentials allow them to do. [19] As a result, the scores, which are not protected by copyright, remain outside the public domain and within the PGA Tour's control, because the PGA Tour provides access with certain restrictions. [20] Finally, Motorola benefitted from the NBA's costs in producing and marketing the games and from the radio and television stations who paid for broadcast rights: that is Motorola capitalized on the NBA's positive externalities. However, the NBA and the broadcast stations had **[**27]** already reaped the profits of their investment, and the information was in the public domain at the moment of **[*1280]** broadcasting. Additionally, once in the public domain, Motorola "expended their own resources to collect purely factual information generated in NBA games." *Id. at 854*. While here, Morris does not expend its own resources in gathering information, which is not in the public domain, but instead free-rides on the PGA Tour's compilation of scores.

Reliance on the *Kodak* case is similarly misplaced. Kodak claimed that the independent service providers (ISP) of Kodak's copiers free-rode on Kodak's investment in product development. See *Kodak, 504 U.S. at 485.* ***[**29]*** "According to Kodak, the ISP's are free-riding because they have failed to enter the equipment and parts markets;" the Court rejected Kodak's free-riding claim. *Id.* However, this is not the type of free-riding that the PGA Tour is trying to prevent. The PGA Tour is not arguing that Morris free-rides on the PGA Tour's investment in the promotion of championship golf tournaments, but on its investment in the compilation of golf scores. Morris wants to commercially exploit information that the PGA Tour has expended money in gathering and has not reaped the full benefit possible from its investment.

Morris claims that the plaintiff in *Aspen* could not have won, if this Court accepts the PGA Tour's definition of free riding. However, *Aspen* was not a case about free riding, as the plaintiff ski company in *Aspen* did not free ride on defendant ski company's investments. The defendant, in *Aspen*, refused to sell plaintiff lift tickets at any price or

---

[15] Similarly, any single spectator at a basketball, baseball, or football game knows the score of the game, as all the action takes place within his or her sight.

[16] As the Court finds the "hot-news" claim inapplicable, it does not address the five requirements to prove a "hot-news" claim. See *Motorola, 105 F.3d at 845*.

[17] Nor can a single spectator at a golf tournament know the score of all the players.

[18] The PGA Tour also publishes the scores of the top players to the spectators, who are present under a license from the PGA Tour which prevents their dissemination of the scores off the course.

[19] Currently, the PGA Tour allows Morris to publish the scores as quickly as it can re-key them from the media center, but the PGA Tour does not allow Morris to sell or syndicate that information. Also, a compiler of information can limit the dissemination of that information through contracts, including contracts found on tickets. See *ProCD Inc. v. Zeidenberg, 86 F.3d 1447, 1451 (7th Cir. 1996)*

[20] Even if the information were in the public domain, the PGA Tour would have the ability to limit the use of the information it provides to Morris under contract law. See *ProCD Inc. v. Zeidenberg, 86 F.3d 1447 (7th Cir. 1996)*(holding that producers of a CD, consisting of the content of publicly available phone books, could, under contract law, enjoin purchasers from selling the information, which was clearly in the public domain and not protected by copyright).

even honor vouchers for tickets and discontinued a profitable joint arrangement with the plaintiff without a business justification. See *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 594-95, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985). **[**30]*** The plaintiff in *Aspen* was not free riding, because it was willing and attempted to pay for its customers to ski at defendant's resort.

Morris further argues that although even if it is free-riding on the collection of scores, ***antitrust law*** does not condemn such free-riding. The Court agrees with Morris in its assertion that ***HN5***[] free-riding on "positive externalities" is accepted by society and courts. See Areeda, ***Antitrust Law***, Vol. III, P1613(b). However, what Morris seeks is not a positive externality. If Morris were selling the scores after the scores were released on a website, Morris would be benefitting from PGA Tour's positive externality, *i.e.*, the public's interest in information about championship golf. [21] As the near instantaneous scores are not in the public domain and as the PGA Tour maintains an interest in the score until they are in the public domain, the scores are not externalities until the PGA Tour has reaped its reward or forgone that possibility.

[31]** Morris additionally argues that even if there is free-riding, it must reach the level that would justify a "hot news" property right. However, the Court finds that ***HN6***[] to be a business justification free-riding does not have to reach the level that the *Motorola* court held necessary for a hot news exception. The *Motorola* court required the free-riding to be so pervasive that all incentives to undertake an activity would be lost. See *Motorola, 105 F.3d at 853*. However, to be a valid business reason, a much lower level of free riding will justify excluding competitors. See Areeda, ***Antitrust Law***, Vol. III, P1658(f)("once a proffered business purpose has been accepted as asserted in good faith and not as pretense, the defense does not require 'balancing' **[*1281]** of social gains against competitive harms…").

Property Right in the Scores

The PGA Tour claims that the restrictions have a valid business justification, because they are necessary to protect a property right in the scores that it compiled by use of RTSS. Morris argues that the PGA Tour lacks a property right in the score, thus negating the claimed business justification. For the following reasons, **[**32]** the Court finds that the PGA Tour does have a property right in the scores compiled by the use of RTSS, but that property right vanishes when the scores are in the public domain. [22]

The PGA Tour's property right does not come from copyright law, as copyright law does not protect factual information, like golf scores. See *Feist Publications v. Rural Tel. Serv Co., 499 U.S. 340, 348, 113 L. Ed. 2d 358, 111 S. Ct. 1282 (1991)*. However, the PGA Tour controls the right of access to that information and can place restrictions on those attending the private event, giving the PGA Tour a property right that the Court will protect.

In the early half of the 20th Century, the Supreme Court dealt with a similar issue in several cases, known as the "ticker cases". In *Board of Trade of the City of Chicago v. Christie Grain and Stock Company, 198 U.S. 236, 49 L. Ed. 1031, 25 S. Ct. 637 (1905), **[**33]*** the appellee sought an injunction preventing the use and distribution of "continuous quotations of prices on sales of grain." See *id. at 245*. There the Supreme Court held, "plaintiff's collection of quotations is entitled to the protection of the law. It stands like a trade secret. The plaintiff has the right to keep the work which it has done, or paid for doing, to itself…. The plaintiff does not lose its rights by communicating the result to persons, even if many, in confidential relations to itself, under a contract not to make it public." *Id. at 250*. The Supreme Court further stated, "time is of the essence in matters like this . . . if the contracts with the plaintiff are kept, the information will not become public property until the plaintiff has gained its reward. A priority of a few minutes probably is enough." *Id. at 251*.

[21] Morris has been capitalizing on this type of externality, ever since it has included golf scores in its newspapers' sports sections.

[22] The Court, in its discussion of free-riding *supra*, found that the information and scores when first published in the media center are not in the public domain.

In *Moore v. New York Cotton Exchange, 270 U.S. 593, 70 L. Ed. 750, 46 S. Ct. 367 (1926)*, plaintiff sought an injunction forcing defendant to furnish plaintiff with a ticker and a declaration that defendant was a monopolist. See *id. at 603*. The Supreme Court held that **[**34]** the allegations did not support a claim under the *Sherman Act* and refused to grant the injunction. See *id. at 603-05*. The Supreme Court reiterated the holding of the *Christy* Court that the exchange had a property right in the information "which relates solely to its own business upon its own property." *Id. at 606-07*. Further, the exchange was able to determine to whom it will sell: "the ordinary right of a private vendor of news or other property." *Id. at 605*. Accordingly, the Court found that the exchange's actions were appropriate and legitimate to protect and to further its business. See *id. at 606*.

Like the "ticker cases", the instant case deals with facts that are not subject to copyright protection. The compiler of the information in both cases collects information, which it created, at a cost. Also the events occur on private property to which the general public does not have unfettered access, and the creator of the event can place restrictions upon those who enter the private property. The vastly increased **[*1282]** speed that the Internet makes available does not change the calculus or the underlying property **[**35]** right. Accordingly, the PGA Tour, like the exchanges in the ticker cases, has a property right in the compilation of scores, but that property right disappears when the underlying information is in the public domain.

Broadcast Rights on the Internet

Whether the PGA Tour has a separate right to license or sell broadcast rights on the Internet, like sports and entertainment producers currently enjoy in dealing with television and radio, is a novel question. The Supreme Court indirectly addressed the issue in *Reno v. ACLU, 521 U.S. 844, 138 L. Ed. 2d 874, 117 S. Ct. 2329 (1997)*, when deciding the constitutionality of Communications Decency Act. In *Reno*, the Supreme Court held that ***HN7***[] the Internet, which the Supreme Court repeatedly referred to as a new medium, was not like traditional broadcast media, *i.e.*, television or radio. *Id. at 867*. The Supreme Court distinguished the Internet and the radio transmission found in *FCC v. Pacifica Foundation, Inc., 438 U.S. 726 748-50, 57 L. Ed. 2d 1073, 98 S. Ct. 3026 (1978)* based on three distinctions. First, the Internet has not historically been regulated by an agency familiar with the medium. **[**36]** Second, available frequencies on the Internet are not scarce as they are on radio. And finally, affirmative steps are required to access information on the Internet. See *Reno, 521 U.S. at 868-69*. The Supreme Court concluded that because of these differences, Congress cannot regulate the Internet the same way it can regulate radio.

However, none of those differences mandates treating the Internet differently from radio or television in terms of property rights. Whether the government can regulate the Internet does not limit the value of Internet broadcasting or provide a rationale for restricting the use of that information. Both parties would certainly agree that the Internet provides an opportunity to profit from a product by selling advertisement. Television, radio, and print media operate on a similar, if not identical, principle: the selling of advertisement to viewers, listeners, or readers of entertainment, be it sports, entertainment, or news. [23] Therefore, the Court finds that the PGA Tour has a right to sell or license its product, championship golf, and its derivative product, golf scores, on the Internet in the same way the PGA Tour currently sells its **[**37]** rights to television broadcasting stations. [24]

---

[23] In *Bruce v. Weekly World News, Inc., 150 F. Supp.2d 313 (D. Mass. 2001)*, the court accepted the opinion of both sides' experts who agreed that the Internet was a separate medium, distinct from print media, requiring a separate license for use on the Internet. The court awarded additional damages because of the infringing use on the Internet. *Id. at 321*. If a separate license is required to use a copyrighted picture on the Internet, the producers of a marketable product, like golf scores, should also be able to sell rights on that new meduim.

[24] With the emergence of "web-casting" and "streaming" video and other rapid advancements in technology, a negative answer to the question of whether the PGA Tour has broadcast rights on the Internet would stymie advancement and reduce incentive to create entertainment and sports programming by foreclosing a lucrative market. See generally, Kellis, *Note: A new Technology Question of Olympic Proportions: Should NBC's License to Broadcast the Games Include Internet Broadcasting Rights?*, *8 J.*

[38]** Accordingly, the Court finds that the PGA Tour is justified in its restrictions because (1) Morris free-rides on the PGA **[*1283]** Tour's efforts, (2) the PGA Tour has a property right in the scores before they are in the public domain, and (3) the PGA Tour has the right to license or sell broadcasting rights of its products over the Internet.

Monopolization of the Internet Markets

HN8[] Monopolization, an offense under *Section 2 of the Sherman Act*, requires two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Eastman Kodak Co. v. Image Tech. Serv. Inc., 504 U.S. 451, 481, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*.

1) Possession of Monopoly Power

Morris argues that the PGA Tour has monopoly power in the relevant market, real-time golf scores, and that power is evidenced by a reduction in output, citing *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)*. Morris misreads the import of that decision. In *NCAA*, the district court found that **[**39]** absent the NCAA's regulation more college football games would be broadcast, and therefore the restrictions limited output. See *id. at 119*. In the instant case, Morris argues that the PGA Tour's restrictions have reduced output as evidenced by the reduced number of web sites with real-time golf scores. Morris misconstrues outlets with output. Although the number of web sites with real-time golf scores might be reduced, the output of the product is not. Output is restricted in the same manner as an exclusive television broadcast contract: only one station is broadcasting any given tournament. Certainly there would be greater output if two television stations broadcast the golf tournament at the same time, but this is not the output reduction condemned by the *NCAA* court. There the Supreme Court's concern was the number of games being broadcast, not the number of stations broadcasting a single game. Morris further argues that when the PGA Tour's web site does not work, viewers have no access to real-time golf scores on the Internet. The Court disagrees with that argument, as the logical conclusion would be to force the PGA Tour to allow several television stations **[**40]** to broadcast a tournament, because occasionally one of the stations has technical difficulties. Output has not been reduced, and consumers have not been harmed, evidencing an absence of monopoly power exerted by the PGA Tour. [25]

2) Willful acquisition or maintenance of that power

HN9[] "Liability [on the second element of a *§ 2* claim] turns, then, on whether valid business reasons can explain" those actions. See *Kodak at 483*. As the Court has already found legitimate business reasons, Morris fails to meet the second element of a *§ 2* claim.

As Morris has failed to prove either element of a *§ 2* claim as a matter of law, the PGA Tour's motion for summary judgment on Morris's claim of monopolization of the Internet markets is **GRANTED**.

Unlawful Refusal to Deal

HN10[] Under certain circumstances, **[**41]** a unilateral refusal to deal may constitute an antitrust violation. See *Mr. Furniture Warehouse, Inc. v. Barclay's American/Commercial Inc., 919 F.2d 1517, 1522 (11th Cir. 1990)*. However, in order to prevail on a claim for refusal to deal, the **[*1284]** plaintiff must show both the existence of monopoly power and anticompetitive intent. *See id*. ("It is clear that monopolistic or other anticompetitive intent is

---

Intell. Prop. L. 245 (2001). To hold otherwise would be similar to a court finding that Major League Baseball could not sell broadcasting rights to television stations in the 1940s with the advent of television.

[25] Whether it would be a violation of ***antitrust law*** for the PGA Tour to be the sole outlet of golf scores on the Internet without offering to sell or license that information is not a question before the Court.

the key factor in determining whether a violation of *§ 2* has occurred."); see also *Mid-Texas Communications Systems, Inc. v. American Telephone & Telegraph Co., 615 F.2d 1372, 1388 (5th Cir. 1980)*; *Poster Exchange, Inc. v. National Screen Service Corp., 431 F.2d 334 (5th Cir. 1970)*. Courts have used two tests to determine whether a refusal to deal is a violation of ***antitrust law***: intent test and essential facilities test.

1) Intent Test

HN11[] "The intent test considers whether, under the circumstances of a case, a monopolist's conduct demonstrates an illegal intent to destroy competition." *Consolidated Gas of Fla., Inc. v. City Gas Co. of Fla., 912 F.2d 1262, 1302 (11th Cir. 1990)*. It is not just an intent to destroy **[**42]** competition, for that is the nature of a competitive market, but an illegal intent as evidenced by, "conduct that unnecessarily excludes or handicaps competitors." *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 597 (1985)*.

Morris asserts that *Aspen* controls the outcome of this case. Morris argues that, like in *Aspen*, the PGA Tour's restriction is a stark departure from past practice and against the PGA Tour's economic interest. The facts indicate that the PGA Tour's actions are a departure from the unfettered access previously granted to the media. However, where the defendant in *Aspen* refused to deal only in order to injure the plaintiff, offering no valid justification, the PGA Tour has provided valid business justifications. See *id. at 610*; see also Areeda, ***Antitrust Law***, Vol. IIIA, P773, pg. 211 ***HN12***[] ("A legitimate purpose renders any accompanying purpose irrelevant; regardless of motive no firm has a general duty to injure itself in order to benefit a rival.") Also, unlike in *Aspen*, the PGA Tour is not discontinuing a profitable joint arrangement with Morris like the defendant in *Aspen*. See Areeda, P658(f), **[**43]** pg 136 (arguing for a narrow reading of Aspen to unexplained interruptions of preexisting arrangement). The Court finds that the PGA Tour's actions do not unnecessarily exclude competition or handicap competitors, but are reasonable means to protect a valuable property right.

Also, Morris argues that the restrictions hurt the PGA Tour's interest by limiting the amount of press coverage of its tournament; Morris's claim is disingenuous at best. The PGA Tour's ability to profit from marketing its compilation of scores does not reduce the amount of coverage that the press has traditionally provided of the PGA Tour's tournaments. The posting of real-time golf scores on the Internet supplements traditional press coverage. The PGA Tour's restrictions, then, are not against its self-interest, as the PGA Tour has the traditional press coverage, plus the coverage and income generated by the real-time scoring on the Internet. [26]

[44]** Consequently, the Court finds that although the PGA Tough might have an intent to harm a competitor, it is not an illegal intent.

[*1285] 2) Essential Facilities

HN13[] The withholding of an essential facility is a violation of ***antitrust law***, and an essential facility is one without which a competitor cannot enter or compete in a market. See *Covad Comm. Co. v. BellSouth Corp., 314 F.3d 1282, 2002 WL 1777009, *9(11th Cir. 2002)*. An essential facilities claim requires a showing of four elements: 1) control of the essential facility by a monopolist, 2) competitor's inability to duplicate the facility, 3) denial of the facility, and 4) feasibility of providing the facility. *See id.*

Initially, the Court finds that access to the media center is not an essential facility. This Court can find no case to indicate that access to proprietary information, not in the public domain, is an essential facility. Although it may be true that Morris will not be able to compete as effectively with the PGA Tour without access to RTSS, that alone does not make access an essential facility. See *Alaska Airlines v. United Airlines, 948 F.2d 536, 544 (9th Cir. 1991)*("plaintiff must show more than **[**45]** inconvenience, or even some economic loss; he must show that an

[26] Theoretically, the PGA Tour could limit the media's access to the tournament and the media center to those willing to pay a fee or to the one willing to pay the highest price. Although such a practice would be a departure from its past practice, it would not violate *Aspen*. The PGA Tour could justify the change with the business justification that the PGA Tour would be better off charging the press an access fee, than gaining the corollary benefit of increased publicity. A court would not be in a position to second guess the business model selected by a company, unless it unnecessarily excluded competitors.

alternative to the facility is not feasible.") Additionally, other web sites, such as *www.thegolfchannel.com*, *www.nbc.com*, and *www.golfonline.com*, who do not have access to the media center, still compete with the PGA Tour's web site in the Internet distribution of golf scores. ***HN14***[] "Essentiality is not proven when actual or potential rivals other than the plaintiff are able to compete without the claimed facility...." See Areeda, ***Antitrust Law***, Vol. IIIA, pg 204. Many competitors would compete more efficiently with access to proprietary information, but ***HN15***[] a court's role is not to force access to proprietary information in the name of competition, as that would reduce incentive to innovate and ultimately harm consumers. See id. Vol. III, pg 129 ("It would be inconsistent with patent policy to use the antitrust laws to dissipate monopoly power still resting entirely or almost entirely on the unexpired patents that first created it.")

Assuming *arguendo* that access to the media center is an essential facility, ***HN16***[] one who controls an essential facility must provide access "upon such just and reasonable terms and regulations **[**46]** as will, in respect of use, character, and cost of service, place every such company upon as nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies." *United States v. Terminal R.R. Ass'n of St. Louis, 224 U.S. 383, 411, 56 L. Ed. 810, 32 S. Ct. 507 (1912)*. However, in this case, Morris is seeking access to the media center and the scoring system at no cost, putting it at a competitive advantage to the PGA Tour. [27] The PGA Tour offers access to the scores through a license as evidenced by its contract with USA Today, and Morris is free to negotiate for the purchase of a license which would put it on a competitive plane with the PGA Tour.

[47]** As this Court stated in its denial of a preliminary injunction, ***HN17***[] "it is not unlawful for a Defendant- even one who possesses monopoly power- to refuse to deal with its competitors if there are legitimate pro-competitive reasons for that refusal." *Morris Communications Corp. v. PGA Tour, Inc., 117 F. Supp. 2d at 1327 (M.D. Fla. 2000)*. As the Court finds that the PGA Tour's restrictions are justified and not against its economic self interest, Morris's claim under the intent test or essential facilities test cannot stand as a matter of **[*1286]** law. Accordingly, the PGA Tour's motion for summary judgment on Morris's claim of unlawful refusal to deal is **GRANTED**.

Monopoly Leveraging

HN18[] Monopoly leveraging refers to a monopolist's use of its market power to gain a competitive advantage in a different level or in a different market. See *Consolidated Gas Company of Florida, Inc. v. City Gas Company of Florida, 912 F.2d 1262, 1284-85 (11th Cir. 1990)*(Tjoflat, C.J., dissenting). Neither the Eleventh Circuit nor the Supreme Court has accepted this theory of antitrust violation, and the Court finds that it is unnecessary to determine its applicability in the **[**48]** instant case. See *Aquatherm Industries Inc. v. Florida Power and Light Co., 971 F. Supp. 1419, 1432 (M.D. Fla. 1997)*.

HN19[] Under the Second Circuit's analysis of monopoly leveraging, a plaintiff must make a showing of anticompetitive intent or an unlawful exercise of power. See *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 272-75(2d Cir. 1979)*. As the Court found *supra*, the PGA Tour's conduct is not anti-competitive nor an unlawful exercise of power. Although it might harm Morris, the conduct is an attempt to protect proprietary information and avoid free-riding by a competitor. Accordingly, the PGA Tour's motion for summary judgment on Morris's claim of monopoly leveraging is **GRANTED**.

Attempted Monopolization of the Internet Markets

---

[27] If the Court were to rule for Morris, the Court would have to decide what price Morris would need to pay in order for it to be placed on an equal footing with the PGA Tour. Such rate making is not the appropriate role for a court. See generally, *Consolidated Gas Co. of Florida v. City Gas Co., 912 F.2d 1262, 1320 (11th Cir. 1990)*(Tjoflat, C.J. dissenting).

HN20[] Attempted monopolization has three elements: 1) the defendant's specific intent to achieve monopoly power through predatory or exclusionary conduct, 2) the defendant engages in such conduct, and 3) there exists a dangerous probability that the defendant will succeed. See *U.S. Anchor Mfg., Inc. v. Rural Indus., Inc., 7 F.3d. 986, 994 (11th Cir. 1993)*. "Specific intent does not merely **[**49]** mean intent to prevail over ones rivals; it goes beyond that to include an intent to control prices or to restrain competition unreasonably." *General Industries Corp. v. Hartz Mountain Corp., 810 F.2d 795, 801 (8th Cir. 1987)*. The Court will not address elements two or three, as it finds the first element dispositive.

HN21[] A finding of legitimate pro-competitive business reasons forecloses a finding of predatory or exclusionary conduct. See *Technical Resource Services, Inc., v. Dornier Medical Systems, Inc., 134 F.3d 1458, 1467 (11th Cir. 1998)*("A defendant can escape *§ 2* liability if the defendant's actions can be explained by legitimate business justifications.") As the Court has already found the PGA Tour's conduct justified by legitimate business reasons, the PGA Tour's Motion for Summary Judgment on Morris's claim of attempted monopolization is **GRANTED**.

B. Florida Deceptive and Unfair Trad Practice Act Claims

Along with the antitrust claims, Morris brings a claim under **HN22**[] the Florida Deceptive and Unfair Trade Practice Act (FDUPTA), *Section 501.201, et. seq.* FDUPTA defines violation of the act in *subsection 501.203(3)*, as "any violation **[**50]** of this act and may be based upon any of the following:(a) Any rules promulgated pursuant to the Federal Trade Commission Act, *15 U.S.C. § 41 et seq.* or this act; (b) The standards of unfairness and deception set forth and interpreted by the Federal Trade Commission or the federal courts; (c) Any law, statute, rule, regulation or ordinance which proscribes unfair methods of competition, or unfair, deceptive, or unconscionable acts or practices." *Mack v. Bristol-Myers Squibb Co., 673 So.2d 100, 103-04 (Fla. 1st DCA 1996)*. FDUPTA is to be construed consistently with ***antitrust law***. See *id., at 103*. Morris is correct in its assertion that FDUPTA is not limited **[*1287]** to antitrust violations, but Morris points only to ***antitrust law*** as a foundation for its FDUPTA claim. As this Court has found no violation of ***antitrust law*** and as Morris asserts no other basis for a claim under FDUPTA, the PGA Tour's Motion for Summary Judgment on Morris's FDUPTA claim is **GRANTED**.

C. Claim of Tortious Interference

The PGA Tour raises three reasons for its Summary Judgment Motion, but the Court will only address the last: the PGA Tour's actions **[**51]** were justified and not actionable. **HN23**[] Florida courts recognize that, "If a defendant interferes with a contract in order to safeguard a preexisting economic interest of his own, the defendant's right to protect his own established economic interest outweighs the plaintiff's right to be free of interference, and his actions are usually recognized as privileged and nonactionable". *Heavener, Orgier Servs. Inc., v. R.W. Florida Region Inc., 418 So.2d 1074, 1076 (Fla. 5th DCA 1982)*; see also *Johnson Enterprises of Jacksonville, Inc. v. FPL Group, Inc., 162 F.3d 1290, 1321 (11th Cir. 1998)*; *Ethyl Corp. v. Balter, 386 So.2d 1220, 1224 (Fla. 3d DCA 1980)*. As the Court has already found the PGA Tour's actions were designed to protect its property interest and not improper, the Court finds that the PGA Tour's actions are privileged. Accordingly, the PGA Tour's Motion for Summary Judgment on Morris's claim of tortious interference is **GRANTED**.

IV. Conclusion

As discussed above, the PGA Tour's Motion for Summary Judgment on all of Morris's claims is **GRANTED**. Because Morris's Motion addresses the same issues which the Court **[**52]** has discussed above, Morris's Motion for Partial Summary Judgment on liability is **DENIED**.

The clerk shall enter judgment accordingly and close the file. Further, the PGA Tour's Motion to Continue Trial (Doc. No. 167, filed December 4, 2002) is **DENIED** as moot.

DONE AND ORDERED at Jacksonville, Florida, this 13th day of December, 2002.

HARVEY E. SCHLESINGER

United States District Judge

Bus. & Prof. Code § 17500* mandates a maximum civil penalty of $ 2,500 for each violation of its prohibition against false or misleading statements.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

HN4[] Procedural Due Process, Scope of Protection

The *Fourteenth Amendment to the federal Constitution* prohibits states from depriving any person, including a corporation, of property without due process of law.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Constitutional Law > ... > Case or Controversy > Constitutional Questions > General Overview

HN5[] Standards of Review, De Novo Review

The standard of review of constitutional questions is independent judgment, but with deference to underlying factual findings, which the court reviews for substantial evidence, viewing the record in the light most favorable to the ruling. A statute is presumed to be constitutional and it must be upheld unless its unconstitutionality clearly, positively and unmistakably appears.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN6[] Consumer Protection, Deceptive & Unfair Trade Practices

The primary purpose of *Cal. Bus. & Prof. Code § 17200 et seq.*, the "unfair competition law," is the preservation of fair business competition. This purpose includes the right of the public to protection from fraud and deceit.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN7[] Consumer Protection, Deceptive & Unfair Trade Practices

As used in *Cal. Bus. & Prof. Code § 17200 et seq.*, unfair competition shall mean and include any unlawful, unfair or fraudulent business act or practice. Written in the disjunctive, this language establishes three varieties of unfair competition.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Legal Ethics > Unauthorized Practice of Law

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN8[] Private Actions, Remedies

Virtually any state, federal or local law can serve as the predicate for an action under *Cal. Bus. & Prof. Code § 17200*. In essence, an action based on *§ 17200* to redress an unlawful business practice "borrows" violations of other laws and treats these violations, when committed pursuant to business activity, as unlawful practices independently actionable under of *Cal. Bus. & Prof. Code § 17200 et seq.*, the "unfair competition law," and subject to the distinct remedies provided thereunder. The remedies and penalties are cumulative to those imposed under the other laws. *Cal. Bus. & Prof. Code § 17204*.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN9[] Regulated Practices, Trade Practices & Unfair Competition

As to an unfair business practice under *Cal. Bus. & Prof. Code § 17200 et seq.*, the "unfair competition law," the court has not yet developed or approved a definition regarding what is unfair in the context of a suit involving injury to consumers. In deciding what is unfair, courts may not apply purely subjective notions of fairness. This prong is intentionally broad, thus allowing courts maximum discretion to prohibit new schemes to defraud. The unfairness prong enjoins deceptive or sharp practices. Unfair business practices include unconscionable provisions in standardized agreements.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

HN10[] Consumer Protection, Deceptive & Unfair Trade Practices

The fraud prong of *Cal. Bus. & Prof. Code § 17200* bears little resemblance to common law fraud or deception. Under *§ 17200*, the test is whether the public is likely to be deceived. This means that a *§ 17200* violation, unlike common law fraud, can be shown even if no one was actually deceived, relied upon the fraudulent practice, or sustained any damage.

Legal Ethics > Unauthorized Practice of Law

HN11[] Legal Ethics, Unauthorized Practice of Law

See *Cal. Bus. & Prof. Code § 6125*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

HN12[] **Consumer Protection, Deceptive & Unfair Trade Practices**

Knowingly untrue or misleading statements made with the intent to induce the public to enter into obligations come squarely within the prohibitions of *Cal. Bus. & Prof. Code § 17500*.

HN18[] Private Actions, Remedies

The reprehensible standard is not applicable to an action for damages under Cal. Bus. & Prof. Code § 17200 et seq., the "unfair competition law."

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN19[] Private Actions, Remedies

The number of violations of Cal. Bus. & Prof. Code § 17200 et seq., the "unfair competition law," is to be determined based upon the number of victims and the number of independent acts. Violations calculated in this manner reasonably relate to the gain or opportunity for gain achieved by the unlawful acts and can fairly be determined through expert testimony, the facts elicited at trial and circumstantial evidence. Regardless of number of misrepresentations made to each customer, the penalty may not exceed $ 2,500 per customer. The focus of the discussion is the calculation of the number of violations. In addition, the phrase "or opportunity for gain" indicates that illegal conduct that did not result in "gain" may yet support imposition of a penalty.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN20[] Private Actions, Remedies

Cal. Bus. & Prof. Code § 17206(b) provides that in assessing the amount of a civil penalty the trial court shall consider, among other factors and if relevant, the defendant's assets, liabilities, and net worth. "Relevance" is given broad application under the Cal. Bus. & Prof. Code § 17200 et seq., the "unfair competition law." A defendant's financial condition is considered relevant to determine whether such condition precludes the imposition of a penalty considered sufficient to deter such future conduct.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN21[] Private Actions, Remedies

Cal. Bus. & Prof. Code § 17200 et seq., the "unfair competition law," provides for injunctive relief independent of the mandatory imposition of penalties. Cal. Bus. & Prof. Code §§ 17203, 17206, 17535, 17536. There is no requirement that the fact of an injunction be considered in imposing civil penalties. The law does require that the trial court consider, if relevant, the nature and seriousness of the misconduct, the number of violations, the persistence of the misconduct, the length of time over which the misconduct occurred, the willfulness of the defendant's misconduct, and the defendant's assets, liabilities, and net worth. *Cal. Bus. & Prof. Code §§ 17206*, *17536*.

***HN26*[]** **Private Actions, Remedies**

The general equitable principles underlying *Cal. Bus. & Prof. Code § 17535* as well as its express language arm the trial court with the cleansing power to order restitution to effect complete justice. Accordingly the statute authorizes a trial court to order restitution in the absence of proof of lack of knowledge in order to deter future violations of the unfair trade practice statute and to foreclose retention by the violator of its ill-gotten gains.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Banking Law > ... > Criminal Offenses > Bank Fraud > Penalties

HN29[] **Private Actions, Remedies**

The trial court may order restitution of money which may have been acquired by means that are violative of the Cal. Bus. & Prof. Code § 17200 et seq., the "unfair competition law." Cal. Bus. & Prof. Code §§ 17203, 17535. Remedies are cumulative. Cal. Bus. & Prof. Code § 17205.

Headnotes/Summary

Summary
CALIFORNIA OFFICIAL REPORTS SUMMARY

The attorney General brought an action against an insurer for violations of the unfair competition law (Bus. & Prof. Code, § 17200 et seq.), arising from defendant's practice of marketing inter vivos trusts as a means of inducing the purchase of annuities. The trial court found that defendant and its agents violated the unfair competition law by engaging in the unauthorized practice of law (Bus. & Prof. Code, §§ 6125. 17200), by employing untrue and misleading statements in marketing inter vivos trust products (Pen. Code, § 17500), and by engaging in unfair and fraudulent practices in marketing annuities, specifically, in failing to disclose adequate information concerning a premium charge included in the annuity policy (Bus. & Prof. Code, § 17200). The trial court imposed over $ 2 million in civil penalties, granted injunctive relief, and required the insurer to offer restitution to its victims. (Superior Court of Los Angeles County, No. BC153983, Ronald M. Sohigian, Judge.)

The Court of Appeal affirmed. The court held that the trial court's imposition of civil penalties did not deprive defendant of due process (U.S. Const., 14th Amend.), since the Department of Insurance had expressly disapproved the language describing the premium charge in defendant's policy as misleading and deceptive, which provided defendant with fair notice that the premium charge would result in liability under the unfair competition law. The court further held that the trial court's findings were sufficient to support the civil penalties. Even if there was some value to the annuity policies and the penalties exceeded the financial gain realized by defendant, the penalty determination is based on the defendant's opportunity for gain and the defendant's financial condition as a whole. The court also held that the trial court's restitution notification requirements imposed upon the insurer were readily understandable. (Opinion by Doi Todd, J., with Boren, P.J., and Ashmann-Gerst, J., concurring.)

CA(1a)[] (1a) CA(1b)[] (1b) CA(1c)[] (1c)

Unfair Competition § 10—Actions Under Unfair Competition Law—Damages—Civil Penalties—Due Process Rights of Defendant.

--The trial court's imposition of over $ 2 million in civil penalties against an insurer for violations of the unfair competition law (Bus. & Prof. Code, § 17200 et seq.) did not deprive the insurer of due process (U.S. Const., 14th Amend.). The trial court found that defendant engaged in unfair and fraudulent business practices, specifically, failing to disclose adequate information concerning a premium charge included in the annuity policy (Bus. & Prof. Code, § 17200). The Department of Insurance had expressly disapproved the language describing the premium charge in defendant's policy as misleading and deceptive. Thus, the record sufficiently supported the trial court's finding that the insurer had fair notice that the premium charge would result in liability under the unfair competition law.

CA(2)[] (2)

Constitutional Law § 25—Constitutionality of Legislation—Rules of Interpretation—Presumption of Constitutionality.

--The appellate court reviews constitutional questions independently, but with deference to underlying factual findings, which are reviewed for substantial evidence, viewing the record in the light most favorable to the ruling. A statute is presumed to be constitutional and it must be upheld unless its unconstitutionality clearly, positively, and unmistakably appears.

CA(3a)[] (3a) CA(3b)[] (3b)

Unfair Competition § 4—Acts Constituting—Unfair Competition Law—Three Prongs—Unlawful, Unfair, or Fraudulent Business Act or Practice.

--The primary purpose of the unfair competition law (Bus. & Prof. Code, § 17200 et seq.) is the preservation of fair business competition. This purpose includes the public's right to protection from fraud and deceit. Written in the disjunctive, the language of Bus. & Prof. Code, § 17200, established three varieties of unfair competition: any unlawful, unfair, or fraudulent business act or practice. With respect to the unlawful prong, virtually any state, federal, or local law can serve as the predicate for an action. As to the unfairness prong, in deciding what is unfair, courts may not apply purely subjective notions of fairness. The unfairness prong is intentionally broad, thus allowing courts maximum discretion to prohibit new schemes to defraud. The unfairness prong has been employed to enjoin deceptive or sharp practices and unconscionable provisions in standardized agreements. The fraud prong bears little resemblance to common law fraud or deception; rather, the test is whether the public is likely to be deceived. Thus, a violation of the fraud prong, unlike common law fraud, may be shown even if no even if no one was actually deceived, relied upon the fraudulent practice, or sustained any damage.

CA(4)[] (4)

Unfair Competition § 10—Actions Under Unfair Competition Law—Damages—Civil Penalties—Trial Court Discretion—Bases for Determination

--The trial court did not abuse its discretion in imposing over $ 2 million in civil penalties against an insurer for violations of the unfair competition law (Bus. & Prof. Code, § 17200 et seq.). Bus. & Prof. Code, §§ 17206, and 17500, confer discretion on the trial court in setting the penalty, with consideration of the equities of the individual case. In this case, the trial court found that the insurer and its agents, in marketing inter vivos trusts as a means of inducing the purchase of annuities, violated the unfair competition law by engaging in the unauthorized practice of law (*Bus. & Prof. Code, §§ 6125*, *17200*), by employing untrue and midleading statements in marketing inter vivos trust products (Pen. Code, § 17500), and by engaging in unfair and fraudulent practices in marketing annuities, specifically, in failing to disclose adequate information concerning a premium charge included in the annuity policy (*Bus. & Prof. Code, § 17200*). In addition, the insurer's annuity policies included language that had been specifically disapproved by the Department of Insurance as likely to deceive the public, and these offense were aimed at the elderly. These findings were sufficient to support the penalties. Further, even if there was some value to the annuity policies sold and the penalties exceeded the financial gain realized by the insurer, the penalty determination is based on the defendant's opportunity for gain and the defendant's financial condition as a whole.

[See 11 Witkin, Summary of Cal. Law (9th ed. 1990) Equity, § 86 et seq]

CA(5)[] **(5)**

Unfair Competition § 10—Actions Under Unfair Competition Law—Damages and Injunctive Relief—Restitution.

--The trial court did not abuse its discretion in ordering restitution in addition to imposing over $ 2 million in civil penalties against an insurer for violations of the unfair competition law (*Bus. Prof. Code, § 17200 et seq.*) relating to deceptive practices in marketing inter vivos trusts as a means of inducing the purchase of annuities, specifically, in failing to disclose adequate information concerning a premium charge included in the annuity policy. The trial court ordered the insurer to make a restitution offer to each nonsettling person who purchased an annuity containing the misleading premium charge provision. The trial court could order restitution without proof that all consumers were deprived of money or property as a result of the unfair business practice. Moreover, the restitution order was not reversible on the ground that it would provide an unfair windfall to consumers who were not deceived--restitution under the unfair competition law may be ordered without individualized proof of harm. The trial court's order was reasonably calculated to restore the status quo ante, and the restitution notification requirements imposed upon the insurer were readily understandable.

Opinion

[466] [*511] DOI TODD, J.**

INTRODUCTION

In a bench trial the court found Fremont Life Insurance Company (appellant) had violated *Business and Professions Code section 17200 et seq.*, the "unfair competition law," in connection with the sale of certain annuity policies. The trial court imposed approximately $ 2.5 million in civil penalties, granted injunctive relief, and required appellant to offer restitution. Appellant contends that the civil penalties **[***2]** should be reversed as an abuse of discretion **[**467]** and a violation of constitutional due process; that the restitution provisions should be reversed because not all consumers were harmed by appellant's violations and on the ground that the restitution order constitutes an excessive, double punishment; and that the restitution notification requirements should be modified. We affirm the judgment.

[*512] BACKGROUND

Appellant concedes that substantial evidence supports the findings of the trial court. The following factual summary is based on the statement of decision.

Appellant and the Alliance for Mature Americans (AMA) "combined in various ways unlawfully to sell inter vivos trusts and annuities primarily to senior citizens." AMA first solicited potential consumers through mass mailings or telemarketing techniques, offering free consultations about living trusts in their residences. An AMA representative would then visit a prospect and identify himself or herself as a "certified trust advisor" or as an expert in estate planning. The representative would offer to sell the prospect an estate plan, which would include standardized forms, many of which were based on California statutory forms but without **[***3]** cautionary and instructive information. The documents included an inter vivos trust, pour-over will, and various powers of attorney. When the documents were delivered at a later date, the representative presented the documents for signature and notarized some of them. During this encounter, the person delivering the documents, who at that point was a life insurance agent of appellant, would engage in efforts to persuade the consumer to purchase an annuity policy. "From the start of their contact with each prospect, AMA and the representatives had the intention of trying to sell an annuity," which was their major goal and "dwarfed everything else of value, including the consideration paid for the estate plan and the commission arising from the estate plan sale." The representatives did not identify themselves as life insurance agents and did not advise the prospective purchaser that the ultimate goal was to sell the annuity policy and earn a commission from that sale.

The relationship between appellant and AMA and their conduct resulted in the unauthorized practice of law and unfair, fraudulent, and deceptive business practices in the marketing of annuity policies that, in turn, were **[***4]** deceptive.

Respondent filed suit against appellant and other defendants pursuant to *Business and Professions Code section 17200 et seq.*, the "unfair competition law," hereafter, the UCL. [1] The complaint alleged, inter alia, that appellant had violated the UCL based upon its involvement in various acts of **[*513]** unfair competition (*§ 17200*) and the making of untrue or misleading statements (§ 17500). [2]

[*5]** **[**468]** The trial court agreed, finding appellant violated *sections 17200* and *17500* based on "three sets of circumstances, each of which is independently adequate": (1) Appellant was involved in the unauthorized practice of law; (2) Appellant "was involved in an unfair, fraudulent, and deceptive business practice in the marketing of its annuities, i.e., the indication by its sales agents, pursuant to training, that they were advisors on matters of estate planning by the use of inter vivos trusts, rather than salespersons who had the ultimate goal of selling annuity policies to the customers, and the indication that AMA was an organization of senior citizens or an organization which functioned on behalf of senior citizens, rather than [a] sales organization, all of which was likely to deceive"; and (3) Appellant "marketed an annuity policy which was misleading and deceptive in its failure clearly to describe the full economic consequences of early withdrawal of funds and was therefore likely to deceive."

---

[1] All statutory references are to the Business and Professions Code unless otherwise stated.

[2] *Section 17200* reads: ***HN1***[] "As used in this chapter, unfair competition shall mean and include any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising and any act prohibited by Chapter 1 (commencing with Section 17500) of Part 3 of Division 7 of the Business and Professions Code."

Section 17500 reads as here pertinent: ***HN2***[] "It is unlawful for any person, firm, corporation or association, or any employee thereof with intent directly or indirectly to dispose of real or personal property or to perform services, professional or otherwise, or anything of any nature whatsoever or to induce the public to enter into any obligation relating thereto, to make or disseminate or cause to be made or disseminated before the public in this state . . . any statement, concerning that real or personal property or those services, professional or otherwise, or concerning any circumstance or matter of fact connected with the proposed performance or disposition thereof, which is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading . . . ."

In addition to ordering injunctive relief, the trial court imposed a civil penalty of $ 210 for each violation of *section 17200* and for each violation of *section 17500*, enhanced by an additional **[***6]** $ 210 per violation because senior citizens were targeted (*§ 17206.1*; fn. 14, *post*), for a total of $ 2,543,000. [3] The trial court stated that the civil penalty imposed closely reflected "the seriousness and harmfulness of the violations" and that the "gross amount . . . is an appropriate remedy based on the various factors material to setting such an amount, which are essentially undisputed between the sides." It also ordered restitution and notice of restitution.

This appeal followed.

[*514] DISCUSSION

Appellant makes the following contentions: I. The civil penalty should be reversed on the grounds that it violates due process requirements, is an abuse of the trial court's discretion, **[***7]** and is not necessary as a deterrent; II. The restitution order should be reversed because not all annuitants were deceived or harmed, and on the additional ground that it is an excessive, double punishment; and III. The notification of restitution should be modified.

I. *The Civil Penalty*

CA(1a)[] **(1a)** Appellant contends the imposition of the civil penalty violates federal due process, constitutes an abuse of discretion, and is not necessary as a deterrent.

A. *Due Process*

HN4[] The *Fourteenth Amendment to the federal Constitution* prohibits states from depriving any person (including a corporation) of property without due process of law. (See generally 7 Witkin, Summary of Cal. Law (9th ed. 1988) Constitutional Law, §§ 481-483, pp. 668-670.) Appellant argues the civil penalty imposed in the instant case violates the federal procedural due process requirement on the ground that the broad authority granted courts under the UCL denies defendants fair notice that specific conduct may subject them to imposition of a substantial penalty, and **[**469]** on the additional ground that the civil penalty imposed is grossly excessive.

CA(2)[] **(2)** ***HN5***[] The standard of review of constitutional questions is independent judgment, "but **[***8]** with deference to underlying factual findings, which we review for substantial evidence, viewing the record in the light most favorable to the ruling [citations]." (*City and County of San Francisco v. Sainez (2000) 77 Cal.App.4th 1302, 1313 [92 Cal. Rptr. 2d 418]*.) "[A] statute is presumed to be constitutional and . . . it must be upheld unless its unconstitutionality 'clearly, positively and unmistakably appears.' [Citations.]" (*Hale v. Morgan (1978) 22 Cal.3d 388, 404 [149 Cal. Rptr. 375, 584 P.2d 512]*.)***CA(3a)***[] **(3a)**)

HN6[] The primary purpose of the UCL is " 'the preservation of fair business competition.' [Citations.]" (*Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 180 [83 Cal. Rptr. 2d 548, 973 P.2d 527]*, hereafter *Cel-Tech*).) This purpose includes " 'the right of the *public* to protection from fraud and deceit.' " (*Barquis v. Merchants Collection Assn. (1972) 7 Cal.3d 94, 110 [101 Cal. Rptr. 745, 496 P.2d 817]*; **[*515]** see also *Committee on* *Children's Television, Inc. v. General Foods Corp. (1983) 35 Cal.3d 197, 209-210 [197 Cal. Rptr. 783, 673 P.2d 660]*.)

Sufficiency of Notice

CA(1b)[] **(1b)** Appellant argues that the UCL did **[***9]** not afford appellant sufficient notice that various acts would result in a substantial civil penalty.

---

[3] ***HN3***[] *Section 17203* provides for injunctive relief. *Section 17206* mandates a maximum civil penalty of $ 2,500 for each violation of the *section 17200* prohibition against unfair competition. *Section 17500* mandates a maximum civil penalty of $ 2,500 for each violation of its prohibition against false or misleading statements.

CA(3b)[] **(3b)** As quoted in the margin, section 17200 states in part: **HN7**[] "As used in this chapter, unfair competition shall mean and include any unlawful, unfair or fraudulent business act or practice . . . ." (§ 17200; fn. 2, *ante*.) Written in the disjunctive, this language "establishes three varieties of unfair competition." (Podolsky v. First Health Care Corp. (1996) 50 Cal.App.4th 632, 647 [58 Cal. Rptr. 2d 89].)

With respect to the *unlawful* prong, **HN8**[] "[v]irtually any state, federal or local law can serve as the predicate for an action" under section 17200. (Podolsky v. First Health Care Corp., supra, 50 Cal.App.4th at p. 647; see, e.g., People v. Landlords Professional Services (1989) 215 Cal. App. 3d 1599 [264 Cal. Rptr. 548] [unauthorized practice of law].) " '[I]n essence, an action based on Business and Professions Code section 17200 to redress an unlawful business practice "borrows" violations of other laws and treats these violations, when committed pursuant to business activity, as unlawful practices independently actionable **[***10]** under section 17200 et seq. and subject to the distinct remedies provided thereunder.' " (Farmers Ins. Exchange v. Superior Court (1992) 2 Cal.4th 377, 383 [6 Cal. Rptr. 2d 487, 826 P.2d 730], disapproved on another point in Cel-Tech, supra, 20 Cal.4th at p. 185.) The UCL remedies and penalties are cumulative to those imposed under the other laws. (*Ibid.*; § 17204.)

HN9[] As to the second prong, the California Supreme Court has not yet developed or approved a definition regarding what is *unfair* in the context of a UCL suit involving injury to consumers. (Cel-Tech, supra, 20 Cal. 4th at pp. 184-187 & fn. 12.) The court has cautioned that in deciding what is *unfair*, "courts may not apply purely subjective notions of fairness." (Id. at p. 184.) This prong is "intentionally broad, thus allowing courts maximum discretion to prohibit new schemes to defraud. [Citation.]" (State Farm Fire & Casualty Co. v. Superior Court (1996) 45 Cal.App.4th 1093, 1103 [53 Cal. Rptr. 2d 229].) The *unfairness* prong has been employed to enjoin deceptive or **[**470]** sharp practices. (Samura v. Kaiser Foundation Health Plan, Inc. (1993) 17 Cal.App.4th 1284, 1299, fn. 6 [22 Cal. Rptr. 2d 20]; **[***11]** see, e.g., Committee on Children's Television, Inc. v. General Foods Corp., supra, 35 Cal.3d 197 [197 Cal. Rptr. 783, 673 P.2d 660] & **[*516]** People v. Bestline Products, Inc. (1976) 61 Cal. App. 3d 879, 915 [132 Cal. Rptr. 767].) The court also has determined that *unfair* business practices include unconscionable provisions in standardized agreements. (People v. McKale (1979) 25 Cal.3d 626, 634-637 [159 Cal. Rptr. 811, 602 P.2d 731] [tenants of mobilehome park required to sign documents that include illegal provisions].) [4]

---

[4] In Cel-Tech, supra, 20 Cal.4th 163, a section 17200 unfair competition case, the court developed a definition but expressly limited it to anticompetitive cases and excluded cases such as the one at bar involving injury to consumers. The court defined "unfair" AS FOLLOWS: "When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes section 17200, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." (Cel-Tech, at p. 187 & fn. 12.)

The *Cel-Tech* court disapproved the definition of "unfair" proposed in People v. Casa Blanca Convalescent Homes, Inc. (1984) 159 Cal. App. 3d 509 [206 Cal. Rptr. 164] (*Casa Blanca*). Therein, the People charged that it was both unlawful and unfair under section 17200 that there was insufficient staff at the defendant's facilities. Relying upon FTC v. Sperry & Hutchinson Co. (1972) 405 U.S. 233 [31 L. Ed. 2d 170, 92 S. Ct. 898] (*Sperry & Hutchinson*), the *Casa Blanca* court held that an unfair business practice exists "when it offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." (Casa Blanca, at p. 530.) The *Cel-Tech* court criticized this wording, stating in part: "Vague references to 'public policy,' for example, provide little real guidance. ' "[P]ublic policy" as a concept is notoriously resistant to precise definition, and . . . courts should venture into this area, if at all, with great care and due deference to the judgment of the legislative branch, "lest they mistake their own predilections for public policy which deserves recognition at law." ' [Citation.]" (Cel-Tech, supra, 20 Cal.4th at p. 185.)

Sperry & Hutchinson, supra, 405 U.S. 233, describes the test for fairness as one developed by the Federal Trade Commission to determine "whether a practice that is neither in violation of the antitrust laws nor deceptive is nonetheless unfair." The test as stated by the court is as follows: " '(1) whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise--whether, in other words, it is within at least the penumbra of some common-law, statutory, or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; (3) whether it causes substantial injury to consumers (or competitors or other businessmen).' " (Id. at pp. 244-245, fn. 5.) Although the *Cel-Tech* court disapproved of the version of this test found in Casa Blanca, supra, 159 Cal. App. 3d 509, the court expressed "no view on the application of federal cases such as *FTC v. Sperry &*

[*12]** Finally, ***HN10***[] the *fraud* prong of *section 17200* "bears little resemblance to common law fraud or deception." (*State Farm Fire & Casualty Co. v. Superior Court, supra, 45 Cal.App.4th at p. 1105*.) Under *section 17200*, "[t]he test is **[**471]** whether the public is likely to be deceived. [Citation.] This **[*517]** means that a *section 17200* violation, unlike common law fraud, can be shown even if no one was actually deceived, relied upon the fraudulent practice, or sustained any damage. [Citation.]" (*State Farm Fire & Casualty Co., at p. 1105*.***CA(1c)***[] **(1c)**)

As set out above, the trial court found three separate and independent sets of circumstances wherein appellant had violated the UCL. As will appear, only the third set is relevant to appellant's notice argument.

Unauthorized Practice of Law

First, the trial court found appellant had violated *section 17200* by engaging in the unauthorized practice of law, a violation of *section 6125*. This set of circumstances comes within the *unlawful* prong of *section 17200*. Appellant makes no argument that *section 6125* fails to give adequate notice of its prohibitions. [5]

[*13]** *Deceptive Marketing Techniques*

Second, the trial court found appellant had violated *section 17200* through its agents engaging in particular marketing techniques that involved untrue or misleading statements. The trial court included in this set of circumstances its express findings that sales agents had represented, pursuant to their training, that they were estate planning advisors by virtue of the inter vivos trust product they were offering, "rather than salespersons who had the ultimate goal of selling annuity policies to the customers." They also made representations that AMA was "an organization of senior citizens or an organization which functioned on behalf of senior citizens, rather than [a] sales organization . . . ." Here, ***HN12***[] knowingly untrue or misleading statements made with the intent to induce the public to enter into obligations with respect to appellant's annuity policy product come squarely within the prohibitions of *section 17500*, set forth at footnote 2, *ante*. Appellant makes no argument that *section 17500* fails to give adequate notice of its prohibitions.

Misleading and Deceptive Statements of Costs

With regard to the third set of circumstances, the trial **[***14]** court determined with reference to the "premium charge" that appellant had marketed an annuity policy that was "misleading and deceptive in its failure clearly to **[*518]** describe the full economic consequences of early withdrawal of funds and was therefore likely to deceive." The trial court expressly found the following facts, which are included in the statement of decision: "[Appellant's] annuity policies are misleading in the sense that they do not adequately disclose information [regarding] the premium charge. Such a charge is unusual as [expert] witness Vincent Gallagher testified. Information about the premium charge is not conspicuously set forth in the policy, which was, after all, targeted for sale to senior citizens. The sales brochures did not remedy this deficiency. . . . [Appellant's] application did not do so either. . . . [Appellant] went so far as to remove from its periodic statements information showing the amount of the charges which would be made in the event of early surrender of the policy . . . ."

Both the *unfair* prong and the *fraud* prong of *section 17200* apply to this third set of circumstances. The likely difficulty **[**472]** a consumer would experience **[***15]** in attempting to ascertain the financial impact of the "premium charge" of appellant's annuity policy is *unfair* in the sense of a "deceptive or sharp practice[]" (*Samura v.*

Hutchinson Co. . . . that involve injury to consumers and therefore do not relate to [anticompetitive] actions like this one." (*Cel-Tech, supra, 20 Cal. 4th at p. 187, fn. 12*.)

The *Cel-Tech* court also disapproved the definition of "unfair" as set forth in *State Farm Fire & Casualty Co. v. Superior Court, supra, 45 Cal.App.4th at page 1104*: "[T]he court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim . . . ." (*Cel-Tech, supra, 20 Cal.4th at p. 184*.)

[5] *Section 6125* reads: ***HN11***[] "No person shall practice law in California unless the person is an active member of the State Bar."

Kaiser Foundation Health Plan, Inc., supra, 17 Cal.App.4th at p. 1299, fn. 6) and also as an unconscionable provision in a standardized agreement (People v. McKale, supra, 25 Cal.3d at pp. 634-637). The fact that the information about the premium charge was "not conspicuously set forth in the policy" and that the policy was "likely to deceive" also brings this set of circumstances within the *fraud* prong of section 17200. (State Farm Fire & Casualty Co. v. Superior Court, supra, 45 Cal.App.4th at p. 1105.)

With regard to this third set of circumstances, we conclude that the record sufficiently supports the court's finding that appellant had fair notice that the premium charge would result in such liability. Substantial evidence also supports the findings of the trial court that appellant was notified that its annuity policy included language disapproved by the Department of Insurance (DOI), thus providing fair notice that sale of the annuity policy in that **[***16]** form could subject appellant to civil fines pursuant to the UCL.

On or about August 9, 1994, appellant authorized the actuarial firm of Lewis & Ellis, Inc., to file its annuity policy documents, including the application and brochures, with the DOI for approval. Lawrence Scott, assistant vice-president of Lewis & Ellis, Inc., handled the filing project. Appellant's contact person for the filing project was Gene Berry, head of appellant's data processing department. Scott's secretary routinely gave appellant copies of all DOI correspondence sent and received.

In response to an initial filing attempt, John Gilchrist of the DOI communicated to Scott that the premium charge mentioned in appellant's annuity **[*519]** policy should be disclosed more prominently by inclusion on the specification page of the annuity policy, and that it should be evident that the premium charge was distinct from the surrender charge. Scott notified Berry of these requirements and indicated he would resubmit the policy when he received the changes from appellant. Scott later received a modified specification page that included additional information on the premium charge. DOI wrote Scott in response to the resubmission: **[***17]** "Not accepted for filing, renaming a surrender charge a premium charge is misleading and deceptive." Scott contacted appellant, and additional changes were made.

A September 6, 1994 letter from Scott to Gilchrist enclosed a revised policy specifications page. The letter indicated a copy had been sent to Berry. Gilchrist returned the letter to Scott with a handwritten note: "The reference to a premium charge page 7 needs explanation or removal." Scott rewrote one paragraph of page 7 of the policy "to fully explain" the premium charge "so the [DOI] will accept the policy for filing." Scott faxed the suggested paragraph to Berry. Berry put the change "into the contract form."

An October 17, 1994 letter from Scott to Gilchrist, a copy of which was sent to Berry, included the final changes. Gilchrist responded with a request for two complete "John Doe specimens." Scott complied by letter dated October 28, 1994. The specimens enclosed included a hypothetical that Berry had been involved in creating.

With respect to approximately 4,000 annuity policies that appellant sold, all included the following language, which had been *disapproved* by the DOI: "Premium charge--5 percent of the premium applied in the first contract year." Appellant concedes that none of the policies sold included the DOI-approved statement: "SURRENDER **[**473]** CHARGE RELATED TO **[***18]** FIRST YEAR PREMIUM--5 percent of the premium applied in the first contract year (see premium charge on page 7)."

Expert witness Vincent Gallagher, Ph.D., an actuary experienced in analyzing annuity contracts, testified at trial that a "very unusual" feature of appellant's annuity policy was "two separate surrender charges that have different names." The second surrender charge was called a "premium charge," which was "a very unusual term." Dr. Gallagher was accustomed to seeing surrender charges disclosed on the front page of policies. However, the "premium charge" was mentioned on page 4 of the annuity policy, on what sometimes is referred to as a "specification page." DR. GALLAGHER TESTIFIED: "When I first read this policy and saw the premium charge, I, at first, thought that the lines below it [on page 4] referred to it and explained **[*520]** it more fully, but they don't. [P] To find out what the premium charge is, one has to go into the body of the [annuity policy] on page 7. [P] The bottom [of page 4 of the **[***19]** annuity policy] refers to the other surrender charge, which is called a surrender charge and more common[ly] what one would expect to see in the [annuity policy]." After reading page 7 of the annuity policy, Dr. Gallagher understood "[t]o some extent, but not entirely" what the "premium charge" was. Dr.

Gallagher also testified that the annuity policy "has particularly high surrender charges and over a long duration of time." Annuity policies commonly waive surrender charges on death, but appellant's annuity policies did not.

We conclude that substantial evidence supports the findings of the trial court that the annuity policy was "misleading and deceptive" and therefore "likely to deceive." This evidence also demonstrates that appellant was on notice over a period of several months that the DOI had expressly disapproved specific language in its annuity policy.

In light of the foregoing we are satisfied that the UCL as applied to this case did not violate the federal procedural due process notice requirement. Thus, this third set of circumstances, involving misleading and deceptive language in the annuity policy, supports the judgment of the trial court that appellant violated *section **[***20]** 17200*, as well as the first and second sets of circumstances, involving the unauthorized practice of law and the use of untrue or misleading statements in the marketing techniques, respectively.

The Civil Penalty Is Not Grossly Excessive

CA(4)[] **(4)** Appellant argues that the civil penalty violates federal due process on the additional ground that it is grossly excessive in relation to the state's interest in protecting its consumers. The cases upon which appellant relies are distinguishable and do not support appellant's position.

Appellant's reliance on *BMW of North America, Inc. v. Gore (1996) 517 U.S. 559 [134 L. Ed. 2d 809, 116 S. Ct. 1589]* (*BMW v. Gore*) is misplaced because the guidelines there address the propriety of a punitive damage award, not a civil penalty. [6] Although **[**474]** the case refers to civil penalties, the references relate to the plaintiff's argument that a large punitive damage award was necessary to induce change in the defendant's nationwide policy **[*521]** regarding nondisclosure of certain presale vehicle repairs. The court rejected the plaintiff's position because, regardless of whether the award was one of punitive damages or statutory penalties, under "principles **[***21]** of state sovereignty and comity," the plaintiff's approach would allow one state to "impose economic sanctions on violators of its laws with the intent of changing the tortfeasors' lawful conduct in other States." (*BMW v. Gore, at p. 572* & fn. 17 [*116 S. Ct. at p. 1597*].) *BMW v. Gore* also refers to civil penalties for purposes of comparison with punitive damage awards to evaluate whether the awards were excessive. But *BMW v. Gore* does not apply the guidelines to civil penalties.

Appellant suggests that certain language in *Hale v. Morgan, supra, 22 Cal.3d 388*, is applicable and supports its position. In that case, Hale moved his trailer **[***22]** into a small trailer park without the knowledge or consent of the owner of the trailer park. The parties later agreed Hale could stay in exchange for $ 65 a month rent, which Hale failed to pay. The owner then acted to deprive Hale of utility services in an effort to evict him. After further disagreement between the parties, the matter went to trial. The trial court found the owner in violation of former *Civil Code section 789.3*, which mandated a $ 100 fine for each day a landlord interrupted utility services with the intent to terminate occupancy, and imposed penalties totaling $ 17,300.

On review, the California Supreme Court expressed concern that the statute did not permit the trier of fact to exercise discretion in fixing the penalty, thereby ignoring the culpability of the landlord and other possibly mitigating factors. (*Hale v. Morgan, supra, 22 Cal.3d at pp. 399-404*.) It reversed the judgment and remanded the matter for retrial of the penalty issue, holding that the total penalty imposed was confiscatory and "wholly disproportionate to any discernible and legitimate legislative goal, and is so clearly unfair that it cannot be sustained." (*Id. at p. 405*.) **[***23]** [7]

---

[6] *BMW v. Gore* sets out the following guidelines. "[T]he degree of reprehensibility of the nondisclosure; the disparity between the harm or potential harm suffered by [plaintiff] and his punitive damages award; and the difference between this remedy and the civil penalties authorized or imposed in comparable cases." (*BMW v. Gore, supra, 517 U.S. at pp. 574-575*.)

[7] The year after *Hale v. Morgan* was decided the Legislature amended *Civil Code section 789.3* to provide that the landlord would be liable to the tenant in a civil action for an amount "not to exceed $ 100" for each day the landlord remained in violation

As appellant acknowledges, *Hale v. Morgan, supra*, applies where a statute does not permit any discretion in determining the amount of the penalty. (See, e.g., *People ex rel. Lungren v. Superior Court (1996) 14 Cal.4th 294, 313 [58 Cal. Rptr. 2d 855, 926 P.2d 1042]*; *Suman v. BMW of North America, Inc. (1994) 23 Cal.App.4th 1, 11 [28 Cal. Rptr. 2d 133]*.) Appellant concedes that *section 17206* confers discretion on the trial court in **[*522]** setting the civil penalty. [8] **[***24]** We also note the UCL **[**475]** includes *section 17500*, which in itself confers discretion by setting a maximum fine for each violation. [9]

Appellant also cites *Cooper Industries, Inc. v. Leatherman Tool Group (2001) 532 U.S. 424 [149 L. Ed. 2d 674, 121 S. Ct. 1678]*, and cases cited therein in support of its position that the issue whether the civil penalty is excessive must be reviewed de novo. But these cases can be distinguished from the case before us. *Cooper Industries, Inc.*, is a punitive damages case. *Solem v. Helm (1983) 463 U.S. 277 [77 L. Ed. 2d 637, 103 S. Ct. 3001]*, overruled by *Harmelin v. Michigan (1991) 501 U.S. 957, 965 [115 L. Ed. 2d 836, 111 S. Ct. 2680]* [***HN15***[] Eighth Amendment contains no proportionality guarantee]; *Enmund v. Florida (1982) 458 U.S. 782 [73 L. Ed. 2d 1140, 102 S. Ct. 3368]*, **[***25]** and *Coker v. Georgia (1977) 433 U.S. 584 [53 L. Ed. 2d 982, 97 S. Ct. 2861]* are criminal cases in which the sentence was challenged as cruel and unusual under the *Eighth Amendment of the United States Constitution*. *United States v. Bajakajian (1998) 524 U.S. 321 [141 L. Ed. 2d 314, 118 S. Ct. 2028]* involved a forfeiture that the trial court imposed after the defendant attempted to leave the country without reporting that he was transporting more than $ 10,000, in knowing violation of title *18 of the United States Code section 982(a)(1)*. The trial court found that cultural differences were implicated, and, although the entire amount ($ 357,144) was subject to forfeiture under the statute, ordered a lesser amount to avoid violating the excessive fines clause of the Eighth Amendment. The United States appealed, and the United States Supreme Court affirmed the trial court.

In summary, appellant relies primarily on *BMW v. Gore*, and asks this court to "carefully examine[]" the civil penalty "in light of the constitutional **[*523]** considerations articulated" in that case. As reviewed above, *BMW v. Gore* and the other cases discussed do not support appellant's **[***26]** position that the civil penalty violates due process.

B. *Discretion of the Court*

In the statement of decision, the trial court stated that the civil penalty imposed closely reflected "the seriousness and harmfulness of the violations" and that the "gross amount . . . is an appropriate remedy based on the various factors material to setting such an amount, which are essentially undisputed between the sides."

Appellant contends the trial court abused its discretion in imposing the civil penalty, arguing that the $ 2,543,000 amount is excessive given appellant's conduct. In support of this position, appellant asserts the following: (1) Its violations were not knowing or intentional. (2) Its involvement with AMA was not reprehensible conduct that would support the civil penalty. (3) The premium charge violation does not involve reprehensible conduct. (4) Appellant's conduct did not cause widespread or significant harm to consumers. (5) The civil penalty is excessive in light of the

---

of the provisions of the statute but required a minimum award of $ 250 for each cause of action. (Stats. 1979, ch. 333, § 1, p. 1191.)

[8] *Section 17206* provides as pertinent: ***HN13***[] "(a) Any person who engages, has engaged, or proposes to engage in unfair competition shall be liable for a civil penalty not to exceed two thousand five hundred dollars ($ 2,500) for each violation, which shall be assessed and recovered in a civil action brought in the name of the people of the State of California . . . . [P] (b) The court shall impose a civil penalty for each violation of this chapter. In assessing the amount of the civil penalty, the court shall consider any one or more of the relevant circumstances presented by any of the parties to the case, including, but not limited to, the following: the nature and seriousness of the misconduct, the number of violations, the persistence of the misconduct, the length of time over which the misconduct occurred, the willfulness of the defendant's misconduct, and the defendant's assets, liabilities, and net worth."

[9] With regard to penalties imposed pursuant to *section 17500*, proscribing false or misleading advertising, that section reads in relevant part: ***HN14***[] "Any violation of the provisions of this section is a misdemeanor punishable by imprisonment in the county jail not exceeding six months, or by a fine not exceeding two thousand five hundred dollars ($ 2,500), or by both that imprisonment and fine."

profit appellant obtained from its annuity **[**476]** business. (6) Imposition of $ 2.5 million in penalties is not necessary as a deterrent.

We first note ***HN16***[] the UCL requires that the remedies imposed take into **[***27]** consideration the equities of the case. (*People v. Superior Court (Jayhill) (1973) 9 Cal.3d 283, 287, fn. 1 [107 Cal. Rptr. 192, 507 P.2d 1400]*.) We review the award of civil penalties to determine whether the trial court abused its discretion. (*People v. Custom Craft Carpets, Inc. (1984) 159 Cal. App. 3d 676, 686 [206 Cal. Rptr. 12]*.)

1. *Knowledge and Intent*

Appellant suggests that the UCL was unfairly applied based on its assertions that it complied with all DOI directives to clarify that the "premium charge" was a form of surrender charge, that it inadvertently sold the unapproved version due to a change in personnel that impacted its computer files, that there was no evidence appellant "intended or expected that customers would be unfairly induced to purchase its product," and that it did not learn until after litigation commenced that the disapproved language remained.

Setting aside the fact that ***HN17***[] *section 17200* imposes strict liability (*Prata v. Superior Court (2001) 91 Cal.App.4th 1128, 1137 [111 Cal. Rptr. 2d 296]*), **[*524]** appellant's alleged inadvertence due to personnel changes does not negate the fact that it sold a version of its annuity policy that **[***28]** included language specifically disapproved by the DOI as likely to deceive the public. As previously discussed, appellant was clearly on notice regarding the disapproved language, and over 4,000 policies which included the deceptive language were sold. Furthermore, even after litigation commenced and appellant acknowledged that the disapproved language remained in the policy, appellant continued to collect the premium charges "[b]ecause the proper language was in the policy in one place." Appellant never voluntarily notified annuitants that it would not collect premium charges. These latter acts seriously undermine appellant's asserted inadvertence resulting from personnel changes, and support the decision of the trial court.

2. *Reprehensible Conduct Not Required*

Appellant argues that its involvement with AMA was not reprehensible conduct that would support the civil penalty imposed.

The statement of decision includes the following findings.

"9. The customers were likely to be deceived about AMA's purpose in contacting them. The AMA salespeople were trained not only to be ingratiating, but to persuade the customers that the salespeople were acting in a confidential and advisory **[***29]** capacity toward the customers. [P] . . . [P]

"14. . . . As [respondent's] attorneys correctly argued, the sales activities in the present case went well beyond [mere filling out blanks in estate planning forms], and unlawfully invade[d] the territory of practice of law. Those activities included giving of advice and the suggestions that the salespersons were able to give highly qualified expert advice and were giving such expert advice. The salespersons were trained to indicate to the customers that the estate plans would be prepared by attorneys. The salespersons were trained to organize the signing of the will, the inter vivos trust, and such other documents as were pertinent to the particular customer's case. The salespersons were trained to make follow-up calls on the customers, for the ostensible purpose of monitoring the correctness of the steps which had been previously taken and reviewing **[**477]** the current situation of the customers. Actually, although the salespersons gave some advice about the sufficiency of documents and made recommendations for change, the chief purpose of such visits was to find out whether the customers had additional assets which could be used to **[***30]** purchase another annuity. The salespersons were compensated only by the commissions paid if they sold annuities.

"15. Moreover, the reality is that customers of estate planning services really needed attorneys' advice in making the important decisions involved, **[*525]** including the decisions regarding funding a trust, and needed attorneys' skill in drafting the necessary documents--but did not get that kind of advice or that kind of drafting. . . .

"16. . . . The sales method of AMA actually included the element of supposedly determining if the sales prospect qualified for an inter vivos trust, as if the salesperson were going to make a detached and professional disinterested decision on that topic.

"17. A main aspect of AMA's business method, *known to the other defendants*, was that the salespersons would be presented (and/or would present themselves) as experts and advisors (not salesperson[s] trying to make a sale of an estate plan and then of an annuity). The salespersons were instructed not to mention the word 'annuity' in the early phases of their interaction with the sales prospects; such a mention, they were told, would motivate the sales prospect at least to shy away from **[***31]** the interview. The salespersons were given business cards which identified them as 'trust advisors' rather than 'life insurance agents' or some similar designation. The method involved getting into the prospect's home, using the discussions regarding the estate plan and the unauthorized practice of law involved therein as the early steps to seek to gain the trust of the prospect, holding out the sales agents as advisors rather than salespersons, concealing the purpose of selling annuities, [10] using the economic information about the sales prospects obtained during the estate plan sales efforts in connection with efforts to sell [appellant's] annuity, and then selling [appellant's] annuity. This was done under the aegis of a sales organization which carried a name (Alliance for Mature Americans) connoting the idea that it was some sort of association devoted to benevolent advancement of the well-being of senior citizens.

[*32]** "18. . . . [Appellant] knew of AMA's general business methods. [Appellant] is responsible for the acts of AMA under the theory of agency, and under the theory of ratification [*Civ. Code, §§ 2307*, *2311*], since [appellant] accepted the substantial benefits of AMA's conduct, and designated AMA and the salespersons as its agents. The salespersons were agents of [appellant]--indeed, some salespersons sold annuities but were not actually appointed as agents, and [appellant] accepted the business nevertheless. [Citation to trial exhibits.] Persons who sell annuities must be licensed and appointed as agents by the insurer issuing the annuity. Licensing is by the Department of Insurance [*Ins. Code, § 1631*]. Only 'life agents' are authorized to transact life insurance business, including annuity business. [**[*526]** *Ins. Code, §§ 32*, *1622*, *101*.)] It is required that a formal notice be filed showing that the agent has been [ap]pointed to act for an insurer. [*Ins. Code, § 1704, subd. (a)*.)] **[**478]** If an insurer issues a policy on the **[***33]** application taken by a person not appointed as agent, the insurer is still liable for the acts of the person. [*Ins. Code, § 1704.5*.)] [Appellant] knew of the connection between estate plan sales and annuity sales. [Citation to trial exhibit.] [Counsel for appellant] knew of the connection and purported to analyze it with particular respect to whether there was a problem regarding unauthorized practice of the law. [The president of appellant] was present at AMA meetings and went on various trips with AMA personnel. [An AMA representative] explained the connection to [appellant]." (Italics added.)

Appellant concedes it "required that each AMA agent soliciting policies on [appellant's] behalf be appointed a 'life agent' by [appellant], registered with the California Department of Insurance." Appellant also concedes it is not shielded from liability under the UCL even when its conduct was "consistent with industry standards" and it had "no clear notice" that AMA's conduct was unlawful. [11] Despite these concessions of liability, appellant argues that, in determining its culpability for the purpose of imposing the civil penalties, its conduct **[***34]** as it related to AMA was not "*reprehensible* conduct" that would justify the amount imposed, and therefore the trial court abused its discretion.

---

[10] "The financial return from selling an estate plan was much less than that potentially involved in the sale of [appellant's] annuity."

[11] However, appellant makes several assertions in support of an argument that AMA's conduct should not be attributed to it, claiming the following occurred: 1. AMA presented its sales methods as "wholly-legitimate and above-board." 2. Appellant did not perceive it had an obligation to investigate or assume responsibility for AMA's sales conduct, based on industry custom and its agreement with AMA. 3. Although appellant "may have understood the general structure of AMA's sales method," it lacked knowledge of how the AMA marketing plan actually affected consumers. 4. Appellant had "no ability to observe AMA's agent training or monitor agent conduct in the field" and therefore was forced to rely on AMA information, which was not always complete or accurate. 5. Appellant's conclusion that AMA was not engaged in the practice of law was due to the complexity of the legal question in combination with AMA's misrepresentations to appellant. Appellant also notes here that the $ 2.5 million penalty is much greater than the $ 100,000 penalty imposed on AMA.

[*35]** Appellant's position is not persuasive. The trial court did not describe appellant's conduct as "reprehensible" in reaching its decision, and none of the cases appellant cites in support of its position on this issue require such a finding. (See *City and County of San Francisco v. Sainez, supra, 77 Cal.App.4th 1302*; *People v. Thomas Shelton Powers, M.D., Inc. (1992) 2 Cal.App.4th 330 [3 Cal. Rptr. 2d 34]*; *People v. Dollar Rent-A-Car Systems, Inc. (1989) 211 Cal. App. 3d 119 [259 Cal. Rptr. 191]*; *People v. Toomey (1985) 157 Cal. App. 3d 1 [203 Cal. Rptr. 642]*; *Casa Blanca, supra, 159 Cal. App. 3d 509*; *People v. Bestline Products, Inc., supra, 61 Cal. App. 3d 879*; **[*527]** *People v. Witzerman*, *supra*, 29 Cal. App. 3d 169 [105 Cal. Rptr. 284].) Appellant draws the "reprehensible" standard from *BMW v. Gore*, which we have previously determined is not applicable here because that case deals with the propriety of a punitive damage award rather than a civil penalty. (See fn. 6, *ante*.) Appellant's reliance on the "reprehensible" standard is misplaced. The findings of the trial court with respect to appellant are **[***36]** sufficient to support the penalties.

3. *Premium Charge Violation*

Appellant references the DOI approval process and the evidence that its noncompliance with disclosure requirements was inadvertent. Appellant again invokes the "reprehensible" standard of *BMW v. Gore* **[**479]** to argue that the penalty sanctions are too severe. As we have discussed, ***HN18***[] the "reprehensible" standard is not applicable.

4. *Harm to Consumers*

As further support for its contention that the trial court abused its discretion, appellant argues that the actual harm suffered by consumers due to its violations does not justify the penalties imposed. Appellant states respondent failed to establish that "*each* consumer" was actually harmed. Appellant asserts that, in fact, there was evidence some consumers ultimately understood that "the annuity was a long-term investment and that withdrawals would be subject to surrender penalties" because these consumers were "financially sophisticated," or had received additional advice from a source other than the agent, or did not trust the agent or believe the misrepresentations, or did not seek or rely upon the agent's legal advice. Appellant also refers to the court's finding **[***37]** that the "annuity and trust provided real value." [12] Based on its position that there was no evidence of "substantial public injury" stemming from its violations, appellant argues that the penalties should be set aside, citing *BMW v. Gore and Lane v. Hughes Aircraft Co. (2000) 22 Cal.4th 405, 424 [93 Cal. Rptr. 2d 60, 993 P.2d 388]* (conc. opn. of Brown, J.). Appellant again relies solely on the "reprehensible" conduct standard of punitive damages cases. Appellant's contention is without merit.

5. *Relationship of Amount of Penalties Imposed to Stated Profit*

Appellant's expert testified that the proper measure of appellant's financial gain from the sale of these annuities is the difference between the **[*528]** interest it received on the monies (or reserves) paid to it and the interest it paid out, less commissions **[***38]** and administrative expenses. Under this formula, appellant's pretax gain resulting from its relationship with AMA from 1994 through 1996, when appellant sold this aspect of its business to another company, totaled $ 627,599. Appellant notes that the $ 2,543,000 total of the penalties imposed is more than four times appellant's gain, and asserts that no case has affirmed such an award. Appellant states that "[c]ourts have recognized the amount of a defendant's financial gain may reflect the seriousness of a defendant's conduct and the appropriate level of punishment," and refers to two cases in support of its proposition, *People v. National Association of Realtors (1984) 155 Cal. App. 3d 578 [202 Cal. Rptr. 243]* and *People ex rel. Van de Kamp v. Cappuccio, Inc. (1988) 204 Cal. App. 3d 750 [251 Cal. Rptr. 657]*. Appellant argues that the only relevant measure is its representation of its "financial gain" from the subject transactions.

We disagree. The court in *People v. National Association of Realtors, supra, 155 Cal. App. 3d 578*, discussed the rule that ***HN19***[] the number of violations is to be determined based upon the number of victims **[***39]** and the

---

[12] The statement of decision included the following: "[T]here are both advantages and disadvantages connected with [appellant's] annuities--as compared with other annuities and as compared with other investments."

number of independent acts. (*Id. at p. 586*.) It then states: "[V]iolations calculated in this manner reasonably relate to the gain or opportunity for gain achieved by the unlawful acts and can fairly be determined through expert testimony, the facts elicited at trial and circumstantial evidence." (*Ibid.*, citing *People v. Superior Court (Olson) (1979) 96 Cal. App. 3d 181, 198 [157 Cal. Rptr. 628]*.) *People ex rel Van de Kamp v. Capppuccio, Inc., supra, 204 Cal. App. 3d at page 765*, **[**480]** cites *People v. National Association of Realtors, supra, at page 586*. (See also *People v. Superior Court (Jayhill), supra, 9 Cal.3d at p. 289* [regardless of number of misrepresentations made to each customer, penalty may not exceed $ 2,500 per customer].) Although *People v. National Association of Realtors* employs the term "gain," the focus of the discussion is the calculation of the number of violations. In addition, the phrase "or opportunity for gain" undermines appellant's argument since it indicates that illegal conduct that did not result in "gain" may yet support imposition of a penalty.

Furthermore, **[***40]** ***HN20***[] *section 17206, subdivision (b)*, provides that in assessing the amount of a civil penalty the trial court shall consider, among other factors and if relevant, "the defendant's assets, liabilities, and net worth." (See also *§ 17536, subd. (b)* [identical language]; *People v. Toomey, supra, 157 Cal. App. 3d at p. 25*.) Appellant's "financial gain" figure, based solely on proceeds derived from its relationship with AMA was estimated by appellant's expert at approximately 50 percent of appellant's annuity business. This is a narrowly defined, significantly smaller basis than the factors **[*529]** included in the statute, which require analyses of appellant's business operations as a whole. [13] Appellant's concept of "relevance" in this context is similarly narrow in that appellant limits it to the factual relationship between a measure of financial gain and each profitable transaction. But "relevance" is given broader application under the UCL. A defendant's financial condition is considered relevant to determine whether such condition precludes the imposition of a penalty considered sufficient to deter such future conduct. (*People ex rel. Van de Kamp v. Capuccio, Inc., supra, 204 Cal. App. 3d at p. 765*.) **[***41]**

6. *Deterrence*

Appellant contends that the total amount of the penalties imposed cannot be justified as a deterrent, asserting that its violations were not intentional, it immediately ceased issuance of its annuities and terminated its relationship with AMA after learning of the intent of the Attorney General to file suit, and the injunction serves the purpose of deterrence. It again references the "reprehensible" conduct standard for punitive damages.

We first note that ***HN21***[] the UCL provides for injunctive relief independent of the mandatory imposition of penalties. (*§§ 17203*, *17206*, *17535*, *17536*.) There is no requirement that the fact of an injunction be considered in **[***42]** imposing civil penalties. The UCL does require that the trial court consider, if relevant, "the nature and seriousness of the misconduct, the number of violations, the persistence of the misconduct, the length of time over which the misconduct occurred, the willfulness of the defendant's misconduct, and the defendant's assets, liabilities, and net worth." (*§§ 17206*, *17536*.) Substantial evidence supports findings under each of these categories.

The nature of the offenses was that they were aimed at the elderly. The trial court, in fact, imposed additional penalties because senior citizens were involved. (*§ 17206.1*.) [14] The offenses were serious in **[**481]** that they impacted the financial security of these persons.

[*43]** With regard to the number of violations, the statement of decision discloses that the trial court, addressing only the sales in California, found **[*530]** 4,958 violations under *section 17200* and *4*,958 violations under *section 17536*, a total of 9,916 violations. From this amount, it subtracted 653 violations for situations in which no annuity policy was purchased and subtracted 120 violations for the 60 persons with whom appellant had settled, "since the

[13] Appellant's expert, in explaining various calculations employed to reach the financial gain number, stated that appellant's profits for 1996 were $ 17 million. Appellant represents elsewhere in its brief that in 1998 it had approximately $ 24 million in assets and $ 6 million in liabilities, resulting in a net worth of less than $ 19 million.

[14] *Section 17206.1, subdivision (a)* reads as pertinent: ***HN22***[] "In addition to any liability for a civil penalty pursuant to *Section 17206*, any person who violates this chapter, and the act or acts of unfair competition are perpetrated against one or more senior citizens or disabled persons, may be liable for a civil penalty not to exceed two thousand five hundred dollars ($ 2,500) for each violation . . . ."

court considers that the interests of those persons have been adequately dealt with by other provisions of the monetary relief . . . ." Thus, the total number of violations upon which it imposed penalties was 9,143. ***HN23***[] The mandatory language of *subdivision (a) of sections 17206* and *17536*, provides that "[a]ny person" in violation of the relevant provisions "shall be liable for a civil penalty." The court imposed penalties of $ 210 out of a maximum of $ 2,500 permitted under each of the applicable statutes for each violation. (*§§ 17206*, *17536*, *17206.1*.) We find no abuse here.

The misconduct was persistent and stretched over more than two years. The trial court found appellant knew of the connection between the estate plan sales and annuity sales **[***44]** and that its agents were engaging in the unauthorized practice of law. Appellant's willfulness is evidenced by the fact that the disapproved language remained in the annuity policy after litigation commenced and appellant continued to collect the premium charges.

The trial court acted well within its discretion in imposing the penalties.

II. *Restitution Issues*

CA(5)[] **(5)** In addition to imposing the civil penalties, the trial court ordered relief pursuant to *sections 17203* and *17535*. [15] It enjoined numerous acts, ranging from the conduct of insurance agents in the residence of a prospective customer and disclosures in policies and brochures, to the size of the margin on the annuity policy.

[*45]** In light of the decision of the trial court that the annuity policy was misleading, based in part on its findings that the "premium charge" was **[*531]** "unusual" and "not conspicuously set forth" in the policy or in the sales brochures, it also made a restitution order. Appellant was ordered to make an offer of restitution to each nonsettling California consumer (or beneficiary under the terms of the policy), who had purchased an annuity policy from appellant that contained a premium charge provision, regardless of whether the annuity policy has **[**482]** been fully surrendered. The court set the amount of restitution on an annuity policy that had not been fully surrendered as "the current account value of the annuity less only the surrender charge, but not less the premium charge and, if applicable, any premium charges that previously were incurred on such annuity" or on a fully surrendered annuity, plus legal interest on those premium charges from the date of imposition.

Appellant contends that the restitution order should be reversed on two grounds: A. Not all consumers were deceived or harmed by appellant's violations. B. The restitution order constitutes an excessive double punishment that duplicates **[***46]** the civil penalties. The contentions are without merit.

A. *Deception and Harm to Consumers*

Appellant first argues that across-the-board restitution may not be ordered without proof that all consumers were deprived of money or property as a result of an unfair business practice. This position directly contradicts the holding of *Fletcher v. Security Pacific National Bank (1979) 23 Cal.3d 442 [153 Cal. Rptr. 28, 591 P.2d 51]*: ***HN26***[] "The general equitable principles underlying *section 17535* as well as its express language arm the trial court with the cleansing power to order restitution to effect complete justice. Accordingly the statute clearly authorizes a trial court to order restitution in the absence of proof of lack of knowledge in order to deter future violations of the

---

[15] *Section 17203* reads as relevant: ***HN24***[] "*Any person who* engages, *has engaged*, or proposes to engage *in unfair competition may be enjoined* in any court of competent jurisdiction. *The court may make such orders* or judgments . . . as may be necessary to prevent the use or employment by any person of any practice which constitutes unfair competition, as defined in this chapter, or *as may be necessary to restore to any person in interest any money* or property, real or personal, *which may have been acquired by means of such unfair competition*." (Italics added.)

Section 17535 is similar and reads as pertinent: ***HN25***[] "Any person . . . [who] violates or proposes to violate this chapter may be enjoined by any court of competent jurisdiction. The court may make such orders or judgments . . . as may be necessary to prevent the use or employment by any person . . . of any practices which violate this chapter, or which may be necessary to restore to any person in interest any money . . . which may have been acquired by means of any practice in this chapter declared to be unlawful."

unfair trade practice statute and to foreclose retention by the violator of its ill-gotten gains." (*Id. at p. 449*.) Appellant argues that a later case has cast doubt on *Fletcher*, citing *Kraus v. Trinity Management Services, Inc. (2000) 23 Cal.4th 116, 149-151 [96 Cal. Rptr. 2d 485, 999 P.2d 718]* (conc. & dis. opn. of Werdegar, J.). The court in *Kraus* addressed issues related to whether restitution **[***47]** could be ordered to a fluid recovery fund when victims of an unfair business practice cannot be identified. (*Id. at pp. 129-132*.) *Kraus* does not impact the *Fletcher* holding or the instant case with respect to an offer of restitution.

Appellant next argues that the trial court abused its discretion in ordering across-the-board restitution, asserting that the evidence does not support a reasonable inference of class-wide deception or harm. But the record is to the contrary. Expert witness Vincent Gallagher, Ph.D., an actuary experienced in analyzing annuity contracts, testified he was not able fully to **[*532]** understand the premium charge based on the information in the annuity policy. This evidence alone supports the findings of the trial court that the annuity policy was "misleading and deceptive" and therefore "likely to deceive." Furthermore, as earlier discussed, *Fletcher* supports the order of restitution imposed here.

Appellant next asserts the restitution award was "unfair, inappropriate, and unnecessary to accomplish the goals of the UCL." Appellant first argues the restitution order must be reversed on the ground it will provide an unfair windfall to **[***48]** consumers who were not deceived. This is not a valid reason to reverse the order given the holding of *Fletcher v. Security Pacific National Bank, supra, 23 Cal. 3d at page 449* (***HN27***[]] restitution may be ordered "in the absence of proof of lack of knowledge in order to deter future violations of the unfair trade practice statute and to foreclose retention by the violator of its ill-gotten gains"). We note that the rule that ***HN28***[]] restitution under the UCL may be ordered without individualized proof of harm is well settled. (See *Massachusetts Mutual Life Ins. Co. v. Superior Court (2002) 97 Cal.App.4th 1282, 1288 [119 Cal. Rptr. 2d 190]*; **[**483]** *Prata v. Superior Court, supra, 91 Cal.App.4th at p. 1144*.)

Appellant next asserts that the order does not restore the status quo but alters the "lawful terms of the annuity contract." Appellant cites *People v. Superior Court (Jayhill), supra, 9 Cal.3d at page 286*, which states that "a court of equity may exercise the full range of its inherent powers in order to accomplish complete justice between the parties, restoring if necessary the *status quo ante* as nearly as may be achieved. [Citations.]" This argument is not persuasive. While the premium charge **[***49]** may be considered *lawful* in itself, substantial evidence supports the finding that the annuity policy was misleading as a whole because of the premium charge term. The premium charge therefore cannot be considered *lawful* in the context of the annuity policy because the sale of the policy is in violation of the UCL. The trial court's order is reasonably calculated to restore the status quo ante by requiring appellant to offer to restore, inter alia, any premium charges imposed, and legal interest thereon from the date of imposition.

Finally, appellant argues restitution is not necessary to punish or deter appellant in light of the civil penalties imposed. We find no abuse of discretion. Imposition of civil penalties for appellant's transgressions is mandatory. (*§§ 17206*, *17536*.) ***HN29***[]] The trial court may order restitution of money "which may have been acquired by means" that are violative of the UCL. (*§§ 17203*, *17535*.) These remedies are cumulative. (*§ 17205*.) The trial court carefully tailored the restitution order to the harm perpetrated.

[*533] B. *The Restitution Order Does Not Constitute an Excessive Double Punishment*

Appellant argues that because it must make an across-the-board **[***50]** offer of restitution, the order of restitution constitutes a double punishment that is excessive. Appellant again invokes the *BMW v. Gore* reprehensible conduct standard. As previously noted, substantial evidence supports the findings of the trial court, the remedies are cumulative, the restitution order is tailored to the harm perpetrated, and we have rejected the *BMW v. Gore* standard.

III. *Restitution Notification Requirements*

The judgment requires appellant to send a letter to each person who purchased an annuity policy that contained a premium charge provision, the body of which reads:

"The California Attorney General, 21 district attorneys, 2 city attorneys and the Department of Insurance brought a civil action against [appellant] pertaining to the sale of its annuities by [AMA]. On [specify date] the Los Angeles Superior Court entered a judgment against [appellant]. The Court found that [appellant] was involved in the unauthorized practice of law, that it fraudulently marketed its annuities through agents who posed as estate planning advisors rather than insurance sales agents and that [appellant's] annuity policies and annuity applications were misleading **[***51]** because they did not adequately disclose information about the 'premium charge.' [P] . . . [P]

"The Court ordered [appellant] to allow you to withdraw all of your money, including interest, from the annuity without having to pay the 'premium charge,' one of the two penalties for early withdrawal under your annuity. The 'surrender' charge would still have to be paid.

"Your annuity has two kinds of surrender penalties that may be imposed when **[**484]** you surrender your annuity. They are a 'surrender charge' and a 'premium charge.' The 'surrender charge' can be as high as 10 for each of the first three years and is reduced 1 each year thereafter until it is eliminated the 12th year.

"The 'premium charge' lasts for 14 years and can be as high as 5 of the premiums paid during the first year. It is 5 for the first 10 years and is reduced 1 each year thereafter until it is eliminated in the 15th year. Both types of penalties apply either if all the money is withdrawn from the annuity or if the annuitant dies and the beneficiaries cash in the annuity before the end of the surrender period.

[*534] "Pursuant to Court order, you may cancel your annuity at any time without having to pay **[***52]** a premium charge. If you do cancel, you will be refunded the account value (premium amount plus interest) less surrender penalties. Enclosed is an Endorsement which reflects that order. You should attach the Endorsement to your policy. However, if you ever decide to cancel your annuity, you may still be subject to the surrender penalties.

"If you cancel and have funds paid directly to you, there may be tax consequences. If your annuity is an IRA annuity, you can ask us to transfer the refund directly to another annuity elsewhere. If your annuity was not an IRA, you can ask us to transfer the refund to another annuity elsewhere. You may wish to consult with your tax advisor.

"Sincerely,

"[Signature and title of a representative of appellant]."

Appellant objects to the form of notice and argues that language such as "fraudulently marketed" is inflammatory and seeks removal of that language. It also objects that the notice did not include finding of the trial court that the annuity policy did have "genuine value." Appellant is concerned that mass cancellations from fears about the safety of the investment will result, and cautions that such cancellations will lead consumers to **[***53]** incur substantial surrender penalties unnecessarily. Appellant asserts that such a result would undermine the goals of the restitution order. Appellant asks that the matter be remanded with instructions that its proposed notification letter be used or, alternatively, that language be added to reflect the additional findings of the trial court regarding the value of the annuity policy. [16]

---

[16] Appellant proposed the following language for the body of the notification letter: "The lawsuit filed by the Attorney General and State Bar of California against [AMA] and [appellant] has now been resolved. The court entered an Order which gives you an opportunity to cancel your Fremont Life annuity contract(s) without having to pay the Premium Charge referenced on pages 4 and 7 of your annuity contract. You will still have to pay the surrender charge illustrated in the table at the bottom of page 4 of your annuity contract. [P] YOUR CURRENT ACCOUNT VALUE IS: $ [insert account value] [P] If you elect to cancel your annuity contract pursuant to the terms of this offer, you will receive the following amount: [P] Account Value $ [current account value] - [P] Surrender Charge $ [surrender charge] [P] Paid To You $ [amount of payment] [P] **You have 90 days from the date of this letter to decide whether to cancel your annuity contract without paying the premium charge.** If you do not accept this offer to cancel without paying the premium charge all of your rights and options under the policy will remain the same. If you cancel, there may be tax consequences. If your annuity is an IRA annuity or you purchased the annuity as a tax free exchange

[*54]** The letter the trial court ordered is accurate and fully describes the premium **[**485]** charge in a readily understandable manner. It also explains the **[*535]** consequences of surrendering a policy. In this context, accurate statements cannot be considered inflammatory statements. Appellant failed to ensure that the version of the annuity policy it placed before the public was equally clear. We find no basis for remand.

DISPOSITION

The judgment is affirmed. Costs are awarded to respondent.

Boren, P. J., and Ashmann-Gerst, J., concurred.

A petition for rehearing was denied January 16, 2003, and the opinion was modified to read as printed above. Appellant's petition for review by the Supreme Court was denied April 9, 2003.

---

under *Internal Revenue Code section 1035*, you can ask us to transfer your funds to another annuity elsewhere. You should consult your tax advisor if you have questions. [P] Sincerely, [P] [Fremont Life Representative]."

HN1[] Separation of Powers, Primary Jurisdiction

The courts of common pleas have subject matter jurisdiction over all actions and proceedings except where exclusive jurisdiction is vested by statute or general rule in another court. *42 Pa. Cons. Stat. § 931*. The courts of common pleas have original jurisdiction over suits for damages even against public utilities or insurers, which are subject to the exclusive regulation by an administrative agency. In cases where the administrative agency is charged with regulating the subject matter of a controversy, but cannot provide complete redress, the doctrine of primary jurisdiction requires judicial abstention until the administrative agency has adjudicated the issues within its jurisdiction and expertise. Where the matter is not one requiring the special competence of the administrative agency, but rather is one that the court is equally well suited to determine, the court must not defer to the agency.

Opinion by: JAMES GARDNER COLINS

Opinion

[*801] OPINION BY PRESIDENT JUDGE COLINS

Independence Blue Cross appeals the order of the Court of Common Pleas of Bucks County that overruled its preliminary objections to the declaratory judgment action filed by Jules Ciamaichelo and Rob Stevens, Inc. We granted Independence Blue Cross's (Blue Cross) petition for permission to appeal an interlocutory order pursuant to *Pa. R.A.P. 1311*.

[*802] In their complaint Ciamaichelo and Stevens, filed on behalf of themselves and other subscribers, policyholders, and members of Independence Blue Cross, alleged misconduct in Blue Cross's accumulation **[**2]** of excessive surplus or reserves. The complainants aver that the surplus is larger than the number reported to the Insurance Department and far exceeds the industry standard, and that Blue Cross acquired the excessive surplus for non-charitable purposes and has improperly used surplus funds in for-profit enterprises. They allege violations of the Nonprofit Corporation Law of 1988, [1] breach of contract, and breach of fiduciary duty and seek declaratory relief as well as an accounting, imposition of a constructive trust, inspection of Blue Cross's books, and other relief with regard to disposition of amounts held in excess of that which is necessary for its financial solvency.

Blue Cross filed preliminary objections raising the trial court's lack of subject matter jurisdiction, a demurrer based on the filed-rate doctrine as a bar to collateral attacks on agency-approved rates, failure to join the Insurance Department as an indispensable **[**3]** party, lack of standing to pursue a claim under the nonprofit corporation law, and the legal insufficiency of the complaint with respect to the breach of contract and breach of fiduciary claims. The trial judge overruled the objections. In an opinion filed pursuant to *Pa. R.A.P. 1925(b)*, the trial court states that the issues were not clear and free from doubt; the opinion does not specifically discuss any one of the objections as the basis for its order.

In its petition for permission to appeal the interlocutory order, Blue Cross avers that jurisdiction over the complainants' rate-related claims based on an alleged excessive surplus is exclusively with the Insurance Department, that their complaint is barred by operation of the filed-rate doctrine, and that the complainants have no standing under the nonprofit corporation law to pursue their claims and the relief sought is prohibited thereunder.

Jurisdiction

HN1[] The courts of common pleas have subject matter jurisdiction over all actions and proceedings except where exclusive jurisdiction is vested by statute or general rule in another court. *42 Pa. C.S. § 931*. The courts of common pleas have original **[**4]** jurisdiction over suits for damages even against public utilities or insurers, which are subject to the exclusive regulation by an administrative agency. *DeFrancesco v. Western Pa. Water Company, 499 Pa. 374, 453 A.2d 595 (1982)*; *Feingold v. Bell of Pa., 477 Pa. 1, 383 A.2d 791 (1978)*; *Poorbaugh v. Pa. Public Utility Commission, 666 A.2d 744 (Pa. Cmwlth. 1995)*, *petition for allowance of appeal denied*, *544 Pa. 678, 678 A.2d 367 (1996)*; *Mattes v. Commonwealth, 94 Pa. Commw. 1, 503 A.2d 78 (Pa. Cmwlth. 1985)*. In cases where the administrative agency is charged with regulating the subject matter of a controversy, but cannot provide complete redress, the doctrine of primary jurisdiction requires judicial abstention until the administrative agency has adjudicated the issues within its jurisdiction and expertise. *Poorbaugh*. Where the matter is not one requiring the special competence of the administrative agency, but rather is one that the court is equally well suited to determine, the court must not defer to the agency. *Id*.

As a special class of insurer, Blue Cross is subject to regulation **[**5]** by the Insurance Department, which must approve its rates, reserves, and surplus, as well as the investment of its reserves and surplus. The **[*803]** Insurance Department has exclusive jurisdiction over the setting of rates, approving reserves and surpluses, and

---

[1] *15 Pa. C.S. §§ 5101*- 5997.

the hospital plan corporation's investment of its reserves and surplus. As stated in the law regulating hospital plan corporations, [2]

HN2[] The rates charged to subscribers by hospital plan corporations, all rates of payments to hospitals made by such corporations pursuant to the contracts provided for in this chapter, all acquisition costs in connection with the solicitation of subscribers to such hospital plans, the reserves to be maintained by such corporations, the certificates issued by **[**6]** such corporations representing their agreements with subscribers, and any and all contracts entered into by any such corporation with any hospital, shall, at all times, be subject to the prior approval of the department.

40 Pa. C.S. § 6124(a).

HN3[] Any statute to the contrary notwithstanding, funds of any hospital plan corporation, equal to its reserves, shall be invested in compliance with the requirements of law for the investment of the capital and reserves of life insurance companies. The funds of any such corporation, equal to its surplus, shall be invested in compliance with the requirements of law for the investment of the surplus of life insurance companies.

40 Pa. C.S. § 6123. Every hospital plan corporation must file an annual report, and its books, records, business affairs, and transactions are subject to examination by the Insurance Department at a minimum of every three years. *40 Pa. C.S. § 6125*.

The complainants' claims, while characterized as violation of the nonprofit corporation law, breach of contract, and breach of fiduciary duty, are all based first on their allegation that **[**7]** Blue Cross has accumulated excessive reserves (i.e., reserves higher than the industry standard, higher than in past years, higher than necessary to cover its claims and expenses and maintain solvency), and second, on their allegation that Blue Cross has accumulated the excessive reserves for impermissible purposes and has misused the reserve funds by transferring assets to subsidiaries. Approval of rates and reserves are matters within the exclusive jurisdiction of the Insurance Department and are based on statutory formula, actuarial information, and discretionary determinations. [3] The plaintiffs do not request damages or any other form of relief that could be ordered only by the court of common pleas. For these reasons, primary jurisdiction over the question of whether Blue Cross has accumulated excessive reserves is with the Insurance Department as is the question of whether Blue Cross's disposition of reserve funds was in compliance with the applicable law. Blue Cross's objection to the trial court's jurisdiction should have been sustained.

[**8] Filed Rate Doctrine

Blue Cross argues that the trial court erred in overruling its demurrer under the filed rate doctrine, which it contends, prohibits a collateral attack on rates, and thereby reserves, approved by the Insurance Department.

[*804] The filed rate doctrine has its origins in *Keogh v. Chicago & Northwestern Railway Co., 260 U.S. 156, 67 L. Ed. 183, 43 S. Ct. 47 (1922)*, wherein the plaintiff alleged that the railway company fixed rates in violation of federal ***antitrust law***. The Supreme Court held that the trial court should have dismissed the complaint for failure to state a claim because the rates the railroad charged were approved by the Interstate Commerce Commission; i.e., by approving and fixing the rate, the agency's determination that the rate was reasonable and nondiscriminatory was dispositive of the issues raised in the complaint. *HN4*[] This doctrine prevents courts from questioning or

---

[2] A hospital plan corporation is a nonprofit corporation engaged in the business of maintaining and operating a nonprofit hospital plan, which is a plan whereby paid subscribers receive hospitalization or related health benefits. *40 Pa. C.S. § 6101*.

[3] *Cf.* Section 301 of The Insurance Department Act of 1921, Act of May 17, 1921, P.L. 789, *as amended*, *40 P.S. § 71*, pertaining to computation of reserves for life insurance companies, and *31 Pa. Code §§ 84a.1- 84a.8*, which set forth minimum reserve standards for health and accident insurance contracts.

changing approved rates to prevent rate discrimination among members of a class of rate payers and to preserve the role of the regulatory agency as rate setter, i.e., the reasonableness of an agency-approved rate is nonjusticiable. *Id*.; *American Telephone & Telegraph Company v. Central Office Telephone Inc., 524 U.S. 214, 141 L. Ed. 2d 222, 118 S. Ct. 1956 (1998)*; **[**9]** *Arkansas Louisiana Gas Co. v. Hall, 453 U.S. 571, 69 L. Ed. 2d 856, 101 S. Ct. 2925 (1981)*; *Montana-Dakota Utilities Co. v. Northwestern Public Service Co., 341 U.S. 246, 95 L. Ed. 912, 71 S. Ct. 692 (1951)*.

Pennsylvania appellate courts have applied the filed rate doctrine in *Pa. Power Company v. Pa. Public Utility Commission, 127 Pa. Commw. 97, 561 A.2d 43 (Pa. Cmwlth. 1989)*, *affirmed*, *526 Pa. 453, 587 A.2d 312 (1991)*, to hold that rates approved by the Federal Energy Commission must be given binding effect by the state utility regulator, and in *Philadelphia Suburban Water Authority v. Pa. Public Utility Commission, 808 A.2d 1044 (2002)*., to hold that the agency-approved rate is the only lawful charge and that a utility may not deviate from the filed rate. The Pennsylvania appellate courts have never addressed the doctrine in the present context to bar a civil action against a utility. Judge Albert W. Sheppard Jr. of the Philadelphia Court of Common Pleas applied the filed rate doctrine in *Knipmeyer v. Bell Atlantic Corporation, 51 Pa.* ***[**10]*** *D&C4th 225 (2001)*, to dismiss a class action filed against Bell Atlantic for violations of Pennsylvania unfair trade practices and consumer protection law and conspiracy. He relied primarily on the U.S. Supreme Court's decision in *Central Office Telephone* for the proposition that the filed rate doctrine bars claims including breach of contract, breach of warranty, fraud, unjust enrichment, and false advertising where the plaintiffs essentially are attacking the approved rate and seeking different rate. As Judge Sheppard Jr. stated in *Knipmeyer*, based on the Public Utility Code's establishment of a statutory filed rate doctrine and on persuasive authority from other jurisdictions, [4] we must conclude that by logical extension, the filed rate doctrine bars claims where the complaint collaterally attacks the filed rate.

[11]** The complaint in the present case presents claims that are all based on the plaintiffs' contention that Blue Cross has accumulated excessive reserves. "Reserves" has been defined as a sum of money variously computed or estimated, which, with accretions from interest, is set aside, "reserved," as a fund, with which to mature or liquidate, either by payment or reinsurance with other companies, future unaccrued and contingent claims, and claims accrued and contingent claims, and claims accrued **[*805]** but contingent and indefinite as to amount or time of payment.

Couch on Insurance 3d, § 2:29 n.40. Rates and reserves are related concepts. The Insurance Department considers the amount of an insurer's reserves when approving rates, and the collection of premiums based on the rates must inevitably be a factor in the accumulation of excessive reserves. Any determination that Blue Cross has accumulated excessive reserves would necessarily require the recalculation of the approved rates. [5] Because we conclude that the plaintiffs' cause of action is not independent of the rates approved by the Insurance Department, or of its approval of Blue Cross's reserves and investments, the filed rate doctrine **[**12]** bars the plaintiffs' breach of contract, breach of fiduciary duty, and nonprofit corporation law claims, and Blue Cross's demurrer should have been sustained.

Accordingly, the order of the trial court overruling Blue Cross's preliminary objections is reversed, and the complaint it dismissed.

JAMES GARDNER COLINS, President Judge

Judge Leavitt did not participate in this decision.

CHIEF JUDGE

Dissent by: TJOFLAT

Dissent

TJOFLAT, Circuit Judge, dissenting from the denial of Rehearing En Banc, in which ANDERSON and BIRCH, Circuit Judges, join:

I. Background

A. Telephone Regulation

Not long after Alexander Graham Bell invented the telephone, government regulators sought to deal with the public policy issues inherent in **[**2]** a service that was both considered to be a natural monopoly (due to the economies of scale and network effects of local telephony) and essential for the day-to-day functioning of the American public. Prior to 1996, government regulators operated under the assumption that local exchange carriers (LECs) should not only be rate-regulated, but also quarantined to the business of local telephony. The latter premise was embodied by the consent decree that broke up AT&T. In the government's 1974 antitrust suit against AT&T, the government argued that AT&T (1) discriminated against rivals who needed access to the local loop (such as long distance companies or providers of information services) and (2) engaged in predatory pricing against rivals - a scheme of cross-subsidization that was made more likely by the fact that AT&T simultaneously operated in both regulated/monopolistic and unregulated/competitive markets. See Roger Noll & Bruce Owen, The Anticompetitive Uses of Regulation: United States v. AT&T, in The Antitrust Revolution 290, 295-96 (J. Kwoka & L. White, eds., 1989). District Judge Harold Greene approved a consent decree between the government and AT&T in the form of **[**3]** the Modified Final Judgment (MFJ) entered in 1982. See *United States v. Am. Tel. & Tel. Co., 552 F. Supp. 131 (D.D.C. 1982)*, aff'd, *460 U.S. 1001, 75 L. Ed. 2d 472, 103 S. Ct. 1240*. [1], *75 L. Ed. 2d 472, 103 S. Ct. 1240* Judge Greene retained jurisdiction over the case, and the Department of Justice promised to report to court every three years regarding the continuing need for the "line of business" restrictions. With the case on his docket for eighteen years, Judge Greene in effect became the telecommunications czar of the nation.

[*1284] 1996 marked a paradigm change in telephone regulation; competition, not quarantine, would best advance the public interest. In that year, **[**4]** Congress passed monumental legislation, the Telecommunications

[1] The MFJ split AT&T's local service into seven Regional Holding Companies (RHCs): U.S. West, Pacific Telesis, Southwestern Bell, Ameritech, Nynex, Bell Atlantic, and BellSouth. The MFJ also employed various line-of-business restrictions which, for example, precluded the RHCs from providing long distance service or information services.

Act of 1996, Pub. L. 104-104, 110 Stat. 56 (codified at 57 U.S.C. § 151 et seq.). The legislation aimed to spark competition in the provision of local telephony. Congress also hoped to foster additional competition in telecommunications markets which had, due the MFJ's line-of-business restrictions, been insulated from competition by very important competitors - namely, the RHCs. See Glen Robinson, The Titanic Remembered: AT&T and the Changing World of Telecommunications, *5 Yale J. On Reg. 517, 534-44 (1988)*. The 1996 Act has three components which are especially noteworthy. First, the Act made an important change in who regulates the telecommunications industry. The Act abolished the MFJ, see Pub. L. 104-104, Title VI, § 601, 110 Stat. 142 (codified at *47 U.S.C. § 152* note), [2] and it delegated to the FCC authority to implement regulations that advance the pro-competition objectives of the Act, see, e.g., *47 U.S.C. § 251(d)(1)*. [3] Judge Greene was, in short, replaced by the FCC. [4] **[**7]** Second, the Act substantively changed the way the **[**5]** telecommunications industry is regulated by imposing various obligations on incumbent local exchange carriers (ILECs). These obligations are defined by *section 251*, [5] whereas *section 252* governs the implementation of the obligations. Specifically, *section 252(a)* provides that ILECs and competitive local exchange carriers (CLECs) can voluntarily enter into interconnection agreements, and *section 252(b)* provides that state public service commissions (PSCs) can fashion an agreement through arbitration in the event that negotiations stall. The Act thus contemplates top-down regulation by the FCC, voluntary or arbitrated agreements, [6] and resolution of post-agreement disputes in the form of contract adjudication. **[*1285]** *Section 252* also covers additional matters, such as the grounds PSCs must give in order to reject an agreement, [7] what happens if a PSC chooses not to make an approve-or-reject determination at all, [8] **[**8]** and how PSC or FCC decisions can be appealed to a federal court. [9] The final component of the Act is the removal of the line-of-business restrictions. Some restrictions, for example, sunset automatically. See, e.g., *47*

---

[2] The provision states:

> Any conduct or activity that was, before the date of enactment of this Act [Feb. 8, 1996], subject to any restriction or obligation imposed by the AT&T Consent Decree shall, on and after such date, be subject to the restrictions and obligations imposed by the Communications Act of 1934 as amended by this Act . . . and shall not be subject to the restrictions and obligations imposed by such Consent Decree.

[3] The statute provides that "within 6 months after February 8, 1996, the Commission shall complete all actions necessary to establish regulations to implement the requirements of this section."

[4] As the Seventh Circuit explained:

> Long before the 1996 Act was passed . . . it had become clear that comprehensive regulation of the rapidly advancing telecommunications markets was not a task well suited to the federal courts. Thus, one of the first things Congress did in the 1996 Act was to shift the remaining authority the district court was exercising under the MFJ over to the FCC.

Goldwasser v. Ameritech Corp., 222 F.3d 390, 393 (7th Cir. 2000).

[5] These include: the duty to negotiate interconnection agreements in good faith; the obligation to interconnect with competitors; the obligation to provide competitors with unbundled access to its network elements ("UNEs") at reasonable rates; the duty to offer for resell at wholesale rates any telecommunications service that the ILEC provides at retail; and the duty to allow collocation of the CLECs' equipment on the ILEC's premises. See *47 U.S.C. § 251(c)*. The 1996 Act thus envisions "three entry options: entry through resale, entry through pure facilities-based competition, and entry via the purchase of unbundled network elements." Stuart Benjamin, Douglas Lichtman, & Howard Shelanski, Telecommunications Law and Policy 718 (2001).

[6] There are thousands of existing agreements throughout the United States, and over 400 in BellSouth's territory.

[7] *Section 252(e)(2)* allows state commissions to reject an interconnection agreement only if the agreement discriminates against a third-party CLEC or is inconsistent with "the public interest, convenience, and necessity."

[8] *Section 252(e)(5)* instructs the FCC to act in the event of a PSC default.

[9] *Section 252(e)(6)*, governing federal review of PSCs, provides that "any party aggrieved by such determination may bring an action in an appropriate Federal district court to determine whether the agreement . . . meets the requirements of *section 251* of this title and this section." There is no special review statute for the FCC, which is therefore reviewed by the courts of appeals pursuant to *28 U.S.C. § 2344*.

U.S.C. § 275 (precluding RBOC **[**6]** [10] entry into the alarm monitoring business until 2001). Others are removed only after ILECs prove that they have fulfilled their obligations under the 1996 Act. See *47 U.S.C. § 271(c)(2)(B)* (establishing a fourteen-point "competitive checklist" that RBOCs must meet before they may offer in-region long distance service.).

B. This Dispute

Covad is the CLEC in this case; BellSouth is the ILEC. Covad is in the business of providing DSL service [11] **[**10]** - primarily through the use of BellSouth's physical plant. BellSouth and Covad entered into an interconnection agreement - ultimately approved by the Georgia PSC - pursuant to *47 U.S.C. § 252*. Covad claims that BellSouth has not fulfilled its obligations under the 1996 Act and the BellSouth/Covad **[**9]** interconnection agreement. Specifically, Covad argues the following: BellSouth should have provided UNEs more promptly; BellSouth did not sufficiently provide space so that Covad could "collocate" its equipment on BellSouth's premises; BellSouth engaged in a "price squeeze" by pricing its UNEs too high while selling its DSL services to consumers at retail prices that are too low; [12] and BellSouth understaffed its wholesale division. The basic theory, then, is that Covad needs BellSouth's local loop to compete, and BellSouth has done a poor job of turning it over. Covad wants access, and it wants access more promptly and on less costly terms than BellSouth presently provides. [13]

[11]** **[*1286]** The district court granted a dismissal, pursuant to *Fed. R. Civ. P. 12(b)(6)*, based upon the reasoning of the Seventh Circuit in *Goldwasser v. Ameritech Corp., 222 F.3d 390 (7th Cir. 2000)*. A three-judge panel of this Court reversed, concluding that the obligations of ILECs under the 1996 Act and the Sherman Act are essentially coterminous, and therefore Covad's complaint alleges harms that, if proved, are cognizable under the antitrust laws. See *Covad Communications Co. v. BellSouth Corp., 299 F.3d 1272 (11th Cir. 2002)*. Specifically, the panel found that BellSouth's alleged failure to promptly turn over its network would, if proved, give rise to liability under the essential facilities doctrine and the refusal-to-deal doctrine. The panel also held that BellSouth's allegedly high wholesale prices for its DSL UNEs, in conjunction with low retail prices on DSL service, states a "price squeeze" claim under Section 2 of the Sherman Act. This court declined to reconsider the panel's decision en banc. I dissent because the panel's holding has troubling implications for telecommunications law and, indeed, ***antitrust law*** as a whole. The panel decision took **[**12]** a turn that is bad policy, undermines Congress's regulatory scheme, and usurps regulatory power that belongs to the FCC under the 1996 Act by placing it in the hands of federal courts.

---

[10] "RBOC" is an acronym for "Regional Bell Operating Company." RBOCs were the subdivisions of AT&T that provided local service throughout the nation prior to the MFJ. Under the MFJ, each RHC consisted of several RBOCs.

[11] "DSL" stands for "digital subscriber line." DSL is "a high-speed data service provided over conventional telephone networks. DSL refers to the technology that allows telephone carriers to attach certain electronics to the telephone line that can transform the copper loop that already provides voice service into a conduit for high-speed data traffic." See Stuart Benjamin, Douglas Lichtman, & Howard Shelanksi, Telecommunications Law and Policy 1048 (2001).

[12] A "price squeeze" claim is premised upon an illegal wholesale/retail differential. For example, Covad states in its complaint that BellSouth's retail prices "are set so low related to its unbundled wholesale loop prices that Covad cannot meet BellSouth's wholesale or retail prices and still make a reasonable return on investment."

[13] Covad's complaint contains twenty-three causes of action. Count one seeks relief under section 2 of the Sherman Act pursuant to the "essential facilities doctrine." Count two seeks the same relief under section 2 of the Sherman Act based upon BellSouth's alleged "monopolization." Count three seeks the same relief under section 2 of the Sherman Act based upon BellSouth's alleged "attempted monopolization." All of the section 2 allegations are thus folded into count 3. Counts six, seven nine, ten, thirteen, fourteen, sixteen, seventeen, nineteen, twenty, twenty-two, and twenty-three replicate counts two and three under the laws of the following states: Alabama, Florida, Kentucky, Louisiana, North Carolina, and Tennessee. Counts eight, eleven, twelve, fifteen, eighteen, and twenty-one allege that BellSouth interfered with business relations in violation of the laws of the same six states. Count four is a claim for breach of contract. Finally, count five asserts a cause of action directly under the Telecommunications Act of 1996. In the "prayer for relief" at the end of its complaint, Covad asks for treble damages on its antitrust claims, punitive damages on its state law tort claims, compensatory damages on the remaining claims, and "such other and further relief as the Court deems just and proper." One must assume that the latter relief would include injunctive orders necessary to ensure BellSouth's compliance with the antitrust laws, the 1996 Act, and the parties' interconnection agreement.

C. Overview

In part II of this opinion, I explain why the duty Covad seeks to impose - namely, the duty to help one's competitor - is required by the 1996 Act but not the antitrust laws. This proposition is supported by traditional antitrust doctrine and the fact that antitrust suits premised upon forced-access obligations would flout the intent of Congress. On the latter point, I explain how an overlap between the antitrust laws and the 1996 Act would make the 1996 Act's scheme of post-agreement dispute resolution a nullity and would put federal judges back into the regulatory mix, micromanaging telecommunications firms far beyond what Judge Greene could have imagined. Part III examines the panel's holding regarding Covad's "price squeeze" claim, concluding that Covad's allegations fail to state a claim under the antitrust laws. This part also explains how the panel's "price squeeze" holding will harm consumers and impede the rollout of broadband Internet access, resulting in considerable tension **[**13]** with FCC policy. Part IV concludes.

[*1287] II. The Duty of a Monopolist to Help its Competitors is an Extraordiary Obligation Imposed by the Telecommunications Act of 1996, but not the Antitrust Laws

The panel apparently believes that the 1996 Act's unbundling and interconnection obligations are coterminous with the duties of a monopolist under the antitrust laws. I disagree. Rather, as the Seventh Circuit held in *Goldwasser v. Ameritech Corp., 222 F.3d 390 (7th Cir. 2000)*, the 1996 Act imposes additional obligations above and beyond what is required under the antitrust laws. [14] I reach this conclusion for two reasons: (1) antitrust doctrine has not (at least until now) ever required the sort of forced-access requirements sought by the plaintiff and (2) suits premised upon a forced-access regime under the antitrust laws would flout the intent of Congress.

[14]** A. Traditional Antitrust Doctrine Regarding Forced Access

1. The Essential Facilities Doctrine

Antitrust doctrine has never required the extensive, court-administered forced-access regime that the panel opinion contemplates in its holding regarding the so-called "essential facilities" doctrine. [15] ***Antitrust law*** generally poses no obligation upon firms to deal with competitors or share their capital investments with rivals. See, e.g., *Aspen*

---

[14] The Seventh Circuit clearly articulated what the world would have looked like if, counterfactually, Congress had opted to choose a "simple antitrust solution" rather than the extraordinary obligations placed upon ILECs:

> It would have been possible for Congress to have passed a statute that simply lifted the regulatory prohibitions found in sources such as the Telecommunications Act of 1934, the MFJ, and other sources, that barred companies in different parts of the telecommunications market (i.e. long distance and local markets, generally speaking) from entering one another's domains. Anyone who wanted to compete with an ILEC would have had the burden of duplicating its physical infrastructure or of persuading the ILEC to contract with it on mutually satisfactory terms, but this is the normal way in which competitive markets work . . . .
>
> In other words, Congress could have chosen a simple antitrust solution to the problem of restricted competition in local telephone markets. It did not. Instead, in an effort to jump-start the development of competitive local markets, it imposed a host of special duties on the ILECs; it entrusted supervision of those duties to the FCC and the state public utility commissions; and it created a system of negotiated agreements through which this would be accomplished. These are precisely the kinds of affirmative duties to help one's competitors that we have already noted do not exist under the unadorned antitrust laws.

Goldwasser, 222 F.3d at 399-400 (citations omitted).

[15] The panel, citing *MCI Communications v. Am. Tel. & Tel., 708 F.2d 1081, 1132-33 (7th Cir. 1983)*, held that there are four elements to a claim under the essential facilities doctrine: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility. *Covad, 299 F.3d at 1286*. The panel never mentioned the horizontal/vertical distinction that I discuss, infra.

Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 600-01, 105 S. Ct. 2847, 2856, 86 L. Ed. 2d 467 (1985) ("Even a firm with monopoly power has no general duty to engage in a joint marketing program with a competitor. . . . The absence of a duty to transact business with another firm is, in some respects, merely the counterpart of the independent businessman's cherished right to select his customers and his associates."); see generally 3A Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law***, P 771b (1996) **[*1288]** ("Forcing a firm to share its monopoly is inconsistent with antitrust's basic goals . . . ."). This is so for several reasons. The first reason is the fear that new entrants will not build their own physical **[**15]** plant if they can simply piggyback on the facilities of an incumbent; there is hardly meaningful competition without facilities-based competition. A second problem with a broad expansion of the essential facilities doctrine is that it would place trial courts in the role of quasi-regulatory agencies because they would have to oversee sharing between rivals. Third, the doctrine creates a disincentive to develop new technologies. If a competitor can simply utilize a court order to get access to an incumbent's physical plant, there is less incentive to create new technologies (such as wireless telephony) to bypass the perceived "essential facility." Finally, the doctrine creates little incentive for incumbents to roll out additional plant or upgrade existing facilities. Why bare all of the risk, only to have competitors reap the benefits? In sum, there are convincing reasons why the leading antitrust scholars condemn the essential facilities doctrine, and why they are steadfast in their argument that the Supreme Court has never explicitly endorsed the doctrine. See id. at PP 771b-c ("The Supreme Court has never articulated or approved the modern version of the essential facilities **[**16]** doctrine.").

The panel relied on two cases to support its expansive view of the essential facilities doctrine. The first is *Consolidated Gas Co. of Fla., Inc. v. City Gas Co. of Fla., 880 F.2d 297, 301 (11th Cir. 1989)*, on reh'g en banc, *912 F.2d 1262 (11th Cir. 1990)*, vacated and remanded, *499 U.S. 915 (1991)*, on remand, *931 F.2d 710 (11th Cir. 1991)*. That case **[**17]** was wrong because it failed to grasp a fundamental point: to the extent that the essential facilities doctrine is viable at all, it is a doctrine concerned with vertical foreclosure. The leading antitrust scholars confirm this view: "It should be clear from the outset that the essential facility doctrine concerns vertical integration - in particular, the duty of a vertically integrated monopolist to share some input in a vertically related market, which we call market # 1, with someone operating in an upstream or downstream market, which we call market # 2." See 3A Areeda & Hovenkamp, ***Antitrust Law*** P 771a; see also Consolidated Gas, 912 F.2d at 1291-92 (Tjoflat, C.J., dissenting) (arguing that the defendant's refusal to deal was justified on the basis that it was not a wholesaler, but rather a retailer similar to the plaintiff/competitor). Indeed, Covad concedes that my dissenting opinion was correct. See Covad Br. at 27 n.14. In this case, BellSouth was in the business of providing DSL services via its local loop. Covad is similarly in the business of DSL provision (via BellSouth's local loop). The two entities are thus horizontal competitors. Moreover, **[**18]** Covad does not want merely to interconnect its own facilities with BellSouth's network; it wants the facilities of BellSouth so that it can sell DSL services. The 1996 Act imposes this novel obligation; the antitrust laws do not. A reading of the essential facilities doctrine that stands for the proposed proposition - namely, that horizontal competitors that find it financially inconvenient to build their own physical plant may simply tap the resources of the incumbent/monopolist or else sue for treble damages - is a dangerous expansion of the antitrust laws indeed. [16]

[19]** **[*1289]** The Seventh Circuit decision in *MCI Communications v. AT&T Tel. & Tel. Co., 708 F.2d 1081, 1132 (7th Cir. 1983)*, makes this point clear (although the Covad panel somehow uses that case to support its position). In that case, the court held that there was no liability for AT&T's failure to provide access to its long-distance network. It was only in the vertical context that the essential facilities doctrine was implicated: MCI was

---

[16] We rejected a similar claim in another case:

> This argument reveals the heart of the plaintiffs' claim: they want the right to benefit from [the defendant's] economies of scale. The plaintiffs are seeking a "free ride" - since they do not have a large enough operation to produce significant economies of scale and are unable, or unwilling, to finance the growth necessary to achieve these economies, they want to use, to their benefit, [the defendant's] size and the capital outlays used to achieve it . . . .
>
> The plaintiffs then are asking us to equip them with [the defendant's] competitive advantage. This is not a function of the antitrust laws. The antitrust laws are not intended to support artificially firms that cannot effectively compete on their own.

Seagood Trading Corp. v. Jerrico, Inc., 924 F.2d 1555, 1572-73 (11th Cir. 1991).

entitled to interconnect its *long distance* network with AT&T's *local* exchanges. The court held that because MCI was seeking to compete with AT&T in the long-distance market, it was not entitled to rely on AT&T's existing long-distance facilities to enhance its ability to compete. As the Seventh Circuit later stated: "AT&T's refusal to voluntarily assume 'the extraordinary obligation to fill in the gaps in its competitor's network,' did not suffice to support a finding that it was trying to maintain its monopoly of long-distance telephone service by anticompetitive means." *State of Ill., ex. rel. Burris v. Panhandle E. Pipe Line Co., 935 F.2d 1469, 1484 (7th Cir. 1991)* (quoting *MCI, 708 F.2d at 1149*). **[**20]** The MCI court held that "as pure matter of ***antitrust law*** . . . we decline to hold AT&T liable for a refusal to make available its full nationwide network to a competitor." *MCI, 708 F.2d at 1149*. The analogy between MCI and AT&T's long-distance division is similar to the analogy between BellSouth and Covad: each is a horizontal competitor of the other. Accordingly, the same result should obtain: the essential facilities doctrine should not be used to give the horizontal competitor access.

The essential facilities doctrine should not be applied in Covad for another reason. Covad seeks to force BellSouth to make extensive modifications to its network to accommodate Covad. See Plaintiff's Complaint, R1-1, PP66, 70, 88 (complaining that BellSouth failed to provide a transport line, to "develop[] automated electronic interfaces," and "to develop any mechanism by which Covad can offer an existing BellSouth ADSL customer a seamless transfer to Covad."). The antitrust laws do not require this. See 3A Areeda & Hovenkamp, ***Antitrust Law*** P773e, at 214 ("No case has suggested that the monopolist must build new capacity to satisfy a would-be sharer."). The **[**21]** 1996 Act may require such alterations, but that is another matter. The antitrust laws do not require BellSouth to promptly develop software and modify its facilities in order to meet Covad's business needs. Nor do the antitrust laws require, as Covad complains, that BellSouth add personnel to its wholesale division in order to meet BellSouth's regulatory obligations.

2. The Refusal-to-deal Doctrine

The refusal-to-deal doctrine is unavailing for the same reasons that its cousin, the essential facilities doctrine, is unavailing. Because this doctrine of forced-access is used for the same purpose as the essential facilities doctrine, all of the problems discussed above apply. If one persists on using a different analytical hat for essentially the same conduct, however, none of the refusal-to-deal cases countenance the bold extension proffered by the panel. The touchstone refusal-to-deal case is the much-criticized *Aspen Skiing, supra.* Liability was imposed in that case because the defendant terminated a mutually beneficial, pre-existing business arrangement. **[*1290]** The case hinged on the fact that Aspen did not engage in "competition in the merits"; rather, it chose to forego **[**22]** "short-run benefits and consumer goodwill in exchange for a perceived long-run impact on its smaller rival." *Aspen Skiing, 472 U.S. at 610-11, 105 S. Ct. at 2861*. In this case, there was no preexisting business arrangement that BellSouth once thought to be mutually beneficial. Moreover, Covad cannot possibly claim that the obligation it seeks to impose with the antitrust laws - forced sharing - serves BellSouth's interests. Its decision not to share is perfectly legitimate competition on the merits.

B. The Undermining of the 1996 Act

The position taken by the panel - namely, that the 1996 Act does not require obligations above and beyond those required by the antitrust laws but rather overlaps with the antitrust laws - results in a regulatory scheme that is in considerable tension with the regulatory scheme envisioned by Congress. First, the panel's holding makes the 1996 Act's post-agreement enforcement scheme a nullity. This is because breach-of-contract claims would become secondary to antitrust claims, and the contract claims would be adjudicated under the supplemental jurisdiction of federal district courts (rather than by state courts or PSCs). Why would **[**23]** a CLEC ever sue only in contract when it can jettison the regulatory scheme and sue for treble damages in federal court? After all, ILECS are all monopolists, and virtually anything they do that breaches an interconnection agreement can be the subject of an antitrust suit under the theory that the breach is done to protect the ILEC's market position. [17] On this point, I agree

---

[17] The panel maintained that before a complaint can pass *Rule 12(b)(6)* muster, it must allege more than monopoly power and breach of contract; it must also allege that the defendant engaged in conduct "with an intent to monopolize." I cannot think of a

with the Seventh Circuit that "the elaborate system of negotiated agreements and enforcement established by the 1996 Act would be brushed aside by any unsatisfied party with the simple filing of an antitrust action." See *Goldwasser, 222 F.3d 390, 400-01 (7th Cir. 2000)*.

[24]** Second, the panel's holding undermines Congress's efforts to place regulatory authority in the hands of the FCC - an expert agency - rather than the courts. Prior to the panel's decision, the FCC (and, to some extent, PSCs) had exclusive authority to implement the 1996 Act's interconnection and unbundling requirements. If the panel is correct in its conclusion that Covad has made out an antitrust claim under the essential facilities doctrine, will federal district courts issue injunctions [18] requiring ILECs to undertake obligations above and beyond those required by the 1996 Act? Even if district courts refrain from issuing forced-access injunctions (with their concomitant price terms) under the theory that regulatory bodies have already been established to set interconnection terms and UNE rates, courts will no doubt enjoin ILECs from engaging in future anticompetitive behavior. And since the claims of anticompetitive conduct made by CLECs will essentially track the many contractual obligations that ILECs must undertake pursuant to their interconnection agreements, [19] the district courts will **[*1291]** essentially oversee ILEC compliance under their contempt power. For every alleged violation **[**25]** of an interconnection agreement, the ILEC will have to show cause why it should not be held in contempt and sanctioned. Thus, the federal courts will be charged with closely monitoring ILEC compliance with the many requirements of the ILEC/CLEC interconnection agreements. This was not what Congress envisioned when it replaced Judge Greene with the FCC.

III. Price Squeeze

The panel's holding that Covad's "price squeeze" claim is cognizable under the antitrust laws is suspect because, as the district court noted, there is no allegation that BellSouth set below-cost retail prices for its DSL services. The wholesale prices that BellSouth charges are set by state commissions or by voluntary agreement; **[**26]** that is, a CLEC either agrees to the wholesale price and cannot be heard to complain, or else the wholesale rate is nondiscretionary. Covad has a remedy for its claim that the state commission set a wholesale rate that was too high: judicial review under *47 U.S.C. § 252(e)(6)*. [20] It cannot acquiesce in the state commission's wholesale rate and turn around and sue BellSouth because BellSouth is not charging consumers enough at retail. See *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 223, 113 S. Ct. 2578, 2588, 125 L. Ed. 2d 168 (1993)* (rejecting "the notion that above-cost prices that are below . . . the costs of a firm's competitors inflict injury to competition cognizable under the antitrust laws."). If the district court grants injunctive relief, will it order BellSouth to charge Covad a wholesale price that is lower than that set by the state commission? Will it order BellSouth to charge DSL customers a price that is higher than the present price (even though the present price is presumably above cost)? Assuming Covad's allegations are true, what should BellSouth have charged DSL customers in hindsight? I can think **[**27]** of nothing more antithetical to the consumer welfare aims of ***antitrust law***, and to FCC efforts to hasten the rollout of broadband services, than to send the message that ILECs should charge DSL customers prices that are not only above cost, but *substantially* above cost so that CLECs can have large profit margins. There is nothing "factual" about this claim that must await summary judgment. The law simply does not recognize the alleged facts as an actionable price squeeze.

IV. Conclusion

---

situation, however, in which an ILEC would be liable in breach and yet a creative plaintiff's lawyer could not also allege that the breach was made with an eye toward benefitting the ILEC and thus preserving the ILEC's position in the relevant market.

[18] Covad did not specifically ask for injunctive relief in is complaint, although it requested "such other relief as the Court deems just and proper."

[19] In this case, for example, the alleged anticompetitive acts of BellSouth could easily be mistaken for breaches of the Covad/BellSouth interconnection agreement.

[20] This is true if the BellSouth/Covad agreement was the product of arbitration before the PSC. It is unclear from the complaint whether the agreement was voluntary or arbitrated.

Much more could be said about the panel opinion, such as (1) when it was issued, two of the key decisions it relied on (BellSouth [21] and Consolidated Gas) had been vacated; (2) the panel set up a straw man with its belabored argument in support of the unexceptional proposition that "in enacting the 1996 Act, Congress did not explicitly **[**28]** supersede the salience of the antitrust laws in the telecommunications industry," [22] **[**30]** *Covad, 299 F.3d at 1280*; **[*1292]** and (3) the decision will trigger an avalanche of complex litigation in the district courts. [23] **[**31]** I stop with the antitrust issues, however, because that is where the panel opinion wreaks the most havoc on the law. First, the decision thwarts Congress's chosen regulatory scheme. In the states of Florida, Georgia, and Alabama, CLECs will have no incentive to use the post-agreement enforcement process envisioned by the 1996 Act. From now on they will simply run to federal court, seeking treble damages and injunctions that are potentially inconsistent with the 1996 Act's requirements. [24] Along the way, regulation of the telecommunications industry will shift from the FCC back to the federal courts. Although Judge Greene may not have had the expertise of the FCC, at least the public law litigation he presided over involved a single monopolist (AT&T) and the government rather than what will ensue in the wake of the panel's ruling: multiple private disputes. And at least at the time of the AT&T litigation, Congress had not explicitly chosen to vest the FCC with **[**29]** the regulatory authority assumed by Judge Greene. The panel thus undermines the wishes of Congress - first by getting the federal courts into the business of micromanaging ILEC compliance with interconnection agreements, and second by enabling CLECs to sidestep the 1996 Act's regulatory scheme with the filing of antitrust suits.

The panel also embarked upon a new journey in ***antitrust law***, the likes of which have not been seen since the inconsistent and discredited antitrust jurisprudence of the Warren Court era embodied by cases such as *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 1521, 8 L. Ed. 2d 510 (1962)* ("It is competition, not competitors, which the Act protects. But we cannot fail to recognize Congress' desire to promote competition through the protection of viable, small, locally owned **[*1293]** businesses. Congress appreciated that occasional higher costs and prices might result from the maintenance of fragmented industries and markets. It resolved these competing considerations in favor of decentralization."). See generally Robert Bork, The Antitrust Paradox: A Policy at War With Itself (rev. ed. 1993). The panel's novel extension of **[**32]** the essential facilities doctrine, for example,

---

[21] See *BellSouth Telecomms., Inc. v. MCImetro Access Transmission Servs., 278 F.3d 1223 (11th Cir. 2002)*.

[22] The panel made this argument in the context of its discussion of the 1996 Act's antitrust savings clause. See Telecommunications Act of 1996 § 601(b)(1), codified at *47 U.S.C. § 152* note ("Nothing in this Act or the amendments made by this Act shall be construed to modify, impair, or supersede the applicability of the antitrust laws."). No one has ever contended that "in enacting the 1996 Act, Congress did not explicitly supersede the salience of the antitrust laws in the telecommunications industry." Judge Wood of the Seventh Circuit, who is a former antitrust professor and high-ranking attorney with the U.S. Department of Justice Antitrust Division, never made that argument. Neither do I. Rather, we contend that the 1996 Act established a regulatory scheme that went beyond anything required by the antitrust laws. It is likely that Congress perceived the 1996 Act as imposing *additional* obligations, and that Congress therefore wanted to bring home the point that pre-1996 obligations under the antitrust laws continue to have vitality in the post-1996 world. The panel, on the other hand, evidently believes that the 1996 Act is merely a more specific application of the forced-accessed requirements that ordinarily would be required by the antitrust laws.

[23] This proposition stems from several observations. First, there are thousands of interconnection agreements and thus potentially thousands of Covad-like antitrust cases lurking across the Circuit (and, indeed, the United States). Second, many parties will be involved in the litigation. In Goldwasser, for example, consumers (not CLECs) were the plaintiffs. There might well be multiple consumer class actions in future cases. Moreover, the panel's "price squeeze" holding, which will compel BellSouth to raise the retail price of its DSL service, will affect existing contracts. DSL customers must therefore be joined as indispensable parties - possibly in the form of another class action. If one adds to this picture the problem of apportioning damages, see, e.g., *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1451-52 (11th Cir. 1991)*, and the issue of state court proceedings (which obviously cannot be consolidated), then the drain on scarce judicial resources becomes apparent. I do not suggest that otherwise meritorious lawsuits should be dismissed merely because their complexity will drain judicial resources; rather, I contend that the drain ought to at least provoke a second look as to whether these suits are really meritorious in the first place.

[24] CLECs also have an incentive to delay the negotiation of interconnection agreements, for any damages CLECs sustain because of an ILEC's failure to yield access to its network will potentially be subject to trebling by a district judge.

will enable any new entrant to tap the assets of its (monopolistic) horizontal competitor if the assets are "essential" for the new entrant to compete. This broad principle has never been the law. In the same vein, the panel decision will force ILECs to raise the retail prices of DSL services or else face "price squeeze" claims - even if the ILEC already prices its DSL services above cost and even though the FCC has been eager to hasten deployment of broadband technology rather than decrease it.

The aftershocks of the panel opinion well be felt far beyond the telecommunications industry. Are all firms that traditionally have been thought to be natural monopolies, such as pipeline companies and energy producers, now supposed to let competitors resell their assets, with the incumbent monopolists having the additional duty to charge their customers a price that is high enough so that new entrants can have hefty profit margins? After all, the panel purported to apply general principles of ***antitrust law*** to the facts of the case; there is nothing that is telecom-specific in its holding.

Rule 35(b) of the Federal Rules of Appellate Procedure **[**33]** instructs that cases to be heard en banc are those which "present a question of exceptional importance." The panel decision - traveling on an Eleventh Circuit essential facilities case that has been vacated by the Supreme Court - departs from settled antitrust doctrine, undermines the operation of 1996 Act, and invites the filing of hundreds of complex cases in the district courts throughout the circuit. [25] This case is extremely important. Accordingly, I am compelled to dissent from the court's failure to reconsider the case en banc.

[34]**

End of Document

[25] I suggest that CLECs filing suit against BellSouth in the district courts of the Fourth, Fifth, and Sixth Circuits may invoke the doctrine of collateral estoppel in response to BellSouth's argument that federal antitrust claims such as those Covad presents in this case are not cognizable under section 2 of the Sherman Act. In short, the panel's decision is not only of "exceptional importance" in the Eleventh Circuit, it will be of importance to the courts and litigants in these other circuits as well.

HN2[] **Antitrust & Trade Law, Exemptions & Immunities**

The doctrine of implied immunity rests on three United States Supreme Court cases: Silver, Gordon, and National Ass'n of Sec. Dealers. Generally, courts should not abrogate antitrust laws through implied immunity, also known as implied repeal or revocation, casually because repeal by implication is not favored. Implied immunity will exist only where there is a plain repugnancy between the antitrust and regulatory provisions. Repeal of antitrust jurisdiction cannot be implied simply when the antitrust laws and a regulatory scheme overlap. Importantly, the plain repugnancy, or conflict, between antitrust and securities laws extends to potential as well as actual conflicts. Implied immunity analysis requires a fairly fact-specific inquiry into the nature and extent of regulatory action that allegedly conflicts with ***antitrust law***.

Business & Corporate Compliance > ... > Labor & Employment Law > Affirmative Action > Program Compliance

Securities Law > ... > Securities Act Actions > Civil Liability > General Overview

Securities Law > Postoffering & Secondary Distributions > Exchanges & Other Markets > General Overview

HN3[] **Affirmative Action, Program Compliance**

Implied immunity exists where allowing an antitrust lawsuit to proceed would conflict with Congress's implicit determination that the Securities Exchange Commission (SEC) should regulate the alleged anti-competitive conduct. In other words, implied immunity exists where allowing parallel proceedings on antitrust and SEC tracks would subject defendants to conflicting mandates. The source of the conflict may, but need not, involve affirmative SEC action. Conflict also can exist where the SEC has jurisdiction over the challenged activity and deliberately has chosen not to regulate it.

Securities Law > ... > Securities Exchange Act of 1934 Actions > Express Liabilities > Price Manipulation

Securities Law > Postoffering & Secondary Distributions > Exchanges & Other Markets > General Overview

HN4[] **Express Liabilities, Price Manipulation**

The Securities Exchange Commission does not regulate price stabilization in the aftermarket. 17 C.F.R. § 242.104 (Regulation M).

Business & Corporate Compliance > ... > Regulators > US Securities & Exchange Commission > Necessity for Regulation

HN5[] **US Securities & Exchange Commission, Necessity for Regulation**

Section 9(a)(6) of the Securities Exchange Act of 1934, *15 U.S.C.S. § 78i(a)(6)*, requires the Securities Exchange Commission to consider other factors such as the public interest and protection of investors in addition to market competition in assessing the competitive effects of its regulations.

Securities Law > ... > Securities Exchange Act of 1934 Actions > Express Liabilities > Price Manipulation

HN6[] **Express Liabilities, Price Manipulation**

Price stabilization in contravention of Securities Exchange Commission (SEC) regulations is unlawful. *15 U.S.C.S. § 78i(a)(6)*. The statute allows price stabilization practices that the SEC does not prohibit.

Opinion by: POOLER

Opinion

[*797] POOLER, *Circuit Judge*:.

Plaintiffs Alan Friedman, et al., appeal from the December 11, 2000, judgment of the United States District Court for the Southern District of New York (Naomi Reice Buchwald, *Judge*) dismissing their class action complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*. Plaintiffs alleged that defendants participated in a price-fixing scheme concerning the sale of securities in violation of federal antitrust laws. The district court correctly held, however, that defendants' action enjoys implied immunity from antitrust laws because the antitrust laws conflict with securities regulatory provisions.

BACKGROUND

Plaintiffs are a class of retail investors who bought stock in public offerings. Plaintiffs are buyers. Defendants are underwriters and brokerage firms that manage public offerings through which they distribute shares of stock. Defendants are sellers. According to plaintiffs, defendants do not permit plaintiffs to re-sell their public offering stock during a prescribed "retail restricted period" of between 30 and 90 days after the initial offering distribution. First Am. Compl. at PP 2.b, 3. This retail restricted period occurs **[**3]** in the "aftermarket," which concerns any sales after the initial distribution. The re-sale of stock shortly after purchasing it in a public offering is known as "flipping."

---

[*] Judge Wilfred Feinberg recused himself from consideration of this matter after oral argument took place and did not participate in this decision. Because the remaining two panel members agree on the disposition of this appeal, they act in accordance with 2d Cir. R. 0.14.

Generally, flipping causes stock prices to fluctuate - usually downward - and aftermarket sales restrictions are a form of price stabilization. According to plaintiffs, stock that institutional investors purchased from the same public offerings is not subject to aftermarket sales restrictions. *Id*. at P 4. Plaintiffs also claim that defendants do not disclose the restrictions in an offering's registration statement or prospectus. *Id*. at P 2.b.

Plaintiffs allege a conspiracy beginning in approximately 1990 among defendants to impose the restrictions on retail investors. According to plaintiffs, defendants **[*798]** discourage flipping but do not strictly forbid the practice. Instead, defendants enforce the retail restricted period by denying stock allocations in future public offerings to retail investors who previously flipped stock. Defendants also enforce the retail restricted period by denying or restricting stock allocations or commissions to brokers whose retail customers engage in flipping. First Am. Compl. **[**4]** at PP 60, 63. Defendants monitor stock sales and flipping on a customer-by-customer basis through the Depository Trust Co., "a clearing house for the settlement of securities traded on all major exchanges and the NASDAQ system." *Id*. at P 8.

Plaintiffs contend that defendants' practice artificially drives up the price of stock in the aftermarket by restricting the supply of shares. Plaintiffs also contend that the practice causes them to pay inflated prices for shares during the initial distribution of public offering stock. According to plaintiffs, institutional investors benefit from defendants' practice because they can re-sell their shares at a higher price in the aftermarket. First Am. Compl. at P 4. Defendants also benefit from the scheme by, among other things, receiving more business and even kickbacks from institutional investors. Plaintiffs also note that defendants benefit from the artificially high prices because they do not have to spend as much of their own capital to support the price of public offering shares, and defendants attract future business based on the stock price performance of current public offerings. *Id*. at P 11.e.

Plaintiffs filed a class action **[**5]** lawsuit in federal court on August 21, 1998, alleging a violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*. Plaintiffs also alleged a cause of action under New York law for breach of fiduciary duty. Plaintiffs filed an amended complaint on March 10, 1999, and defendants moved to dismiss it pursuant to *Rule 12(b)(6)*. After hearing oral argument, the district court granted defendants' motion in a Memorandum and Order in December 2000. *Friedman v. Salomon/Smith Barney, Inc., 2000 U.S. Dist. LEXIS 17785, 2000 WL 1804719* (S.D.N.Y. Dec. 8, 2000) ("*Friedman I*"). In addition to dismissing plaintiffs' federal claim on the merits, the district court dismissed their state law claim by declining to exercise supplemental jurisdiction over it. *2000 U.S. Dist. LEXIS 17785*, [WL] at *12. Plaintiffs moved for reconsideration, and the district court denied the motion in a January 2001 Memorandum and Order. *Friedman v. Salomon/Smith Barney, Inc., 2001 U.S. Dist. LEXIS 884, 2001 WL 64774* (S.D.N.Y. Jan. 23, 2001) ("*Friedman II*"). Plaintiffs now appeal. Our review is *de novo*. *Sheppard v. Beerman, 18 F.3d 147, 150 (2d Cir. 1994)*.

DISCUSSION

Both parties agree that the only issue on appeal **[**6]** is whether defendants' conduct is immune from antitrust enforcement based on the regulatory authority and actions of the Securities and Exchange Commission ("SEC"), principally under Section 9(a)(6) of the Securities Exchange Act of 1934 ("Exchange Act"), *15 U.S.C. § 78i(a)(6)*. [1] The relevant legal doctrine is known as implied immunity. The parties also agree **[*799]** that the SEC has not regulated price stabilization in the aftermarket, but they draw opposite inferences from this circumstance.

[7]** According to plaintiffs, defendants' conduct does not benefit from the shield of implied immunity because the SEC's failure to regulate the manipulation of stock prices in the aftermarket is not the product of its consideration of

[1] The statute states: ***HN1***[] "It shall be unlawful for any person, directly or indirectly, by the use of the mails or any means or instrumentality of interstate commerce, or of any facility of any national securities exchange, or for any member of a national securities exchange . . . to effect either alone or with one or more other persons any series of transactions for the purchase and/or sale of any security registered on a national securities exchange for the purpose of pegging, fixing, or stabilizing the price of such security in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors." *15 U.S.C. § 78i(a)(6)*.

antitrust or competitive concerns, and the SEC never has implied or held that defendants' conduct was permissible. Plaintiffs also argue that because defendants' conduct is anti-competitive, applying antitrust laws would reinforce the purpose of the Exchange Act rather than subject defendants to conflicting directives of securities and antitrust laws. Defendants and *amici* contend that the SEC has exercised its statutory authority in permitting - through the deliberate absence of regulation - defendants' conduct, so punishing that same conduct under antitrust principles would create an impermissible conflict.

I. Implied immunity

HN2[] The doctrine of implied immunity rests on three Supreme Court cases: *Silver v. New York Stock Exch., 373 U.S. 341, 10 L. Ed. 2d 389, 83 S. Ct. 1246 (1963)*, *Gordon v. New York Stock Exch., Inc., 422 U.S. 659, 45 L. Ed. 2d 463, 95 S. Ct. 2598 (1975)*, and *United States v. National Ass'n of Sec. Dealers, Inc., 422 U.S. 694, 45 L. Ed. 2d 486, 95 S. Ct. 2427 (1975)* **[**8]** ("*NASD*"). Generally, courts should not abrogate antitrust laws through implied immunity, also known as implied repeal or revocation, "casually" because "repeal by implication is not favored." *Finnegan v. Campeau Corp., 915 F.2d 824, 828 (2d Cir. 1990)* (quotation marks and citation omitted). Implied immunity will exist "only where there is a plain repugnancy between the antitrust and regulatory provisions." *Id*. (quotation marks and citation omitted). "Repeal of antitrust jurisdiction cannot be implied simply when the antitrust laws and a regulatory scheme overlap." *Strobl v. New York Mercantile Exch., 768 F.2d 22, 27 (2d Cir. 1985)*. Importantly, the "plain repugnancy," or conflict, between antitrust and securities laws extends to potential as well as actual conflicts. *Id*.

As the district court below recognized, implied immunity analysis requires a fairly fact-specific inquiry into the nature and extent of regulatory action that allegedly conflicts with ***antitrust law***. *See* *Friedman I, 2000 U.S. Dist. LEXIS 17785, 2000 WL 1804719*, at *4-5 (listing relevant factors to implied immunity analysis). In their arguments on appeal, the parties largely compare **[**9]** the case at bar to the facts of prior cases, making a brief review of those cases helpful here.

In *Finnegan*, we found implied immunity where a direct conflict existed between ***antitrust law***, which would prohibit joint takeover bidders, and the Williams Act, *15 U.S.C. §§ 78m(d)-(e)* & *78n(d)-(f)*, which allowed competing bidders to make joint bids as long as they complied with SEC disclosure regulations. *Finnegan, 915 F.2d at 829-31*. In light of the direct conflict, implied immunity was necessary for the "proper functioning of the securities laws." *Id. at 831*. In *Finnegan*, we held that "we cannot presume that Congress has allowed competing bidders to make a joint bid under the Williams Act and the SEC's regulations and taken that right away by authorizing suit against such joint bidders under the antitrust laws." *Id. at 830*.

In *Strobl*, we found that no implied immunity existed where both the Sherman Act and Commodity Exchange Act forbid price manipulation, although the Sherman Act called for greater damages. *Strobl, 768 F.2d at 27-28*. Key to that decision **[*800]** was the absence of conflict **[**10]** or repugnancy between the legal schemes and the fact that "there is no built-in balance in the regulatory scheme of the [Commodity Exchange] Act that permits a little price manipulation in order to further some other statutory goal." *Id. at 28*. Thus, both sets of laws had the same goal and considered the same factors to reach that goal. Note that the Exchange Act, which governs our decision here, differs from the Commodity Exchange Act because the former allows "a little price manipulation" to further goals such as efficiently raising capital through new issues. *See* *15 U.S.C. § 78i(a)(6)*; *see also* S. Rep. No. 34-792, at 8-9, 17 (1934), SEC Release No. 34-2446, at 10-11 (March 18, 1940).

In *NASD*, the Supreme Court found implied immunity where the Investment Company Act of 1940, *15 U.S.C. § 80a-22(f)*, gave the SEC power to authorize sales and distribution restrictions on the transfer of mutual fund shares in secondary markets even though the same restrictions were anti-competitive under the antitrust laws. *NASD*, 422 U.S. at 729-30. The facts in *NASD* are analogous to the case at bar because **[**11]** the statute in *NASD* "authorizes funds to impose transferability or negotiability restrictions, subject to [SEC] disapproval." *Id. at 726*. Here, Section 9(a)(6) of the Exchange Act authorizes price stabilization mechanisms subject to SEC disapproval. *15 U.S.C. § 78i(a)(6)*. The Supreme Court found that "there can be no reconciliation of [the SEC's] authority under

Section 22(f) to permit these and similar restrictive agreements with the Sherman Act's declaration that they are illegal per se," even though the SEC had not specifically approved the restrictive agreements. *Id. at 729-30*.

In *Gordon*, the Supreme Court found implied immunity where the SEC under Section 19(b) of the Exchange Act, *15 U.S.C. § 78s(b)*, had jurisdiction to establish a system of fixed commission rates on the New York Stock Exchange. *Gordon, 422 U.S. at 691*. The Court did not concern itself with the "wisdom of fixed rates" but considered only Congress' intent that the SEC and not antitrust laws address the issue. *Id. at 688*. Again, the Court focused on conflict, holding that "different standards **[**12]** are likely to result because the sole aim of antitrust legislation is to protect competition, whereas the SEC must consider, in addition, the economic health of the investors, the exchanges, and the securities industry." *Id. at 689*.

In contrast to *Gordon* and *NASD*, in the earlier case *Silver* the Supreme Court found no implied immunity because applying antitrust principles to New York Stock Exchange rules that lay outside the SEC's jurisdiction created no conflict. *Silver, 373 U.S. at 358*. Because the Exchange Act at that time did not give the SEC power to "review particular instances of enforcement of exchange rules," *id. at 357*, applying the antitrust laws to effect that review did not affect the function of the Exchange Act, particularly because nothing in the SEC regulatory scheme at the time performed the "antitrust function" of considering injuries to competition. *Id. at 358-59*. The Court noted that if the SEC had jurisdiction over review of exchange rules "a different case as to antitrust exemption would be presented." *Id. at 360*. After *Silver* was decided, Congress amended the **[**13]** Exchange Act to require the SEC to take competition, among other things, into account in rulemaking and when reviewing rules of exchanges. *See 15 U.S.C. §§ 78c(f)*, *78w(a)(2)*.

Thus, ***HN3***[] implied immunity exists where allowing an antitrust lawsuit to proceed **[*801]** would conflict with Congress's implicit determination that the SEC should regulate the alleged anti-competitive conduct. In other words, implied immunity exists where allowing parallel proceedings on antitrust and SEC tracks would subject defendants to conflicting mandates. The source of the conflict may, but need not, involve affirmative SEC action. Conflict also can exist where the SEC has jurisdiction over the challenged activity and deliberately has chosen not to regulate it. *Strobl, 768 F.2d at 27*.

II. Application of legal standard

In a thorough and comprehensive opinion, the district court found that implied immunity existed here because (1) the SEC has exclusive jurisdiction over price stabilization pursuant to Section 9(a)(6), which allows stabilization practices not specifically prohibited by the SEC; (2) Congress was aware of stabilization practices when it passed the Exchange **[**14]** Act and created the SEC in 1934; (3) the SEC actively studied and regulated stabilization practices over the last 60 years and consistently made a "studied assessment that the benefits of price stabilization to the capital markets outweigh the admitted anti-competitive aspects of stabilizing manipulation;" and (4) there is a clear conflict between plaintiff's reading of antitrust laws and SEC regulation under Section 9(a)(6). *Friedman I, 2000 U.S. Dist. LEXIS 17785, 2000 WL 1804719*, at *11-12; *Friedman II, 2001 U.S. Dist. LEXIS 884, 2001 WL 64774*, at *1. These holdings rest on proper interpretation of Section 9(a)(6) and analysis of the history of SEC regulation of price stabilization practices.

We examine briefly the SEC's regulation of price stabilization in both the distribution and aftermarket phases of public offerings. As noted previously, at the time Congress passed the Exchange Act, it declined to prohibit pegging, fixing or stabilizing practices outright and instead gave the SEC authority to regulate them. In 1940, the SEC issued its first policy statement about the practices, did not prohibit stabilization during distribution, and adopted regulations in an attempt to balance the interests of **[**15]** individual investors and "protection of the nation's credit and banking structure and the health of its capital markets." SEC Release No. 34-2446, at 10, 14. The SEC acknowledged that stabilization, "broadly defined as the buying of a security for the limited purpose of preventing or retarding a decline in its open market price in order to facilitate its distribution to the public," was a long-standing market practice with some "vicious and unsocial aspects" requiring additional monitoring in light of the new regulations. *Id*. at 3, 14. The SEC also pointed out that stabilization tended to combat the serious problem of flipping. *Id*. at 5.

In 1955 and 1963, the SEC revisited the stabilization issue and modified existing regulations but did not prohibit the practice. *See* SEC Release No. 34-5194 (July 5, 1955); H.R. Doc. No. 95, Pt. 1 (1963). In its 1963 report to Congress, the SEC pointed out that various firms combated flipping by depriving salespeople of their commissions "if resales by customers occur within 30 days of the effective date," by identifying "customers who sold stock in the immediate after-market" and declining to give these customers "allotments of subsequent **[**16]** oversubscribed issues," and telling customers "not to sell for varying periods, usually 30 or 60 days." H.R. Doc. No. 95, Pt. 1, at 525-26. The SEC nonetheless declined to regulate or prohibit the practices.

More recently, the SEC in 1994 undertook a comprehensive review of its trading practice rules and posed several questions dealing specifically with flipping in the aftermarket **[*802]** and whether a need existed to regulate the practice. SEC Release Nos. 33-7057, 34-33924, at 1316-17 (April 19, 1994). ***HN4***[] The SEC rule that resulted from this inquiry did *not* regulate price stabilization in the aftermarket. *See* *17 C.F.R. § 242.104* ("Regulation M"). In its release describing its new regulation, the SEC noted that stabilization in the aftermarket to combat flipping was "not uncommon and may act to support the price of the offered security in the aftermarket." SEC Release Nos. 33-7282, 34-37094, at 1740 (April 11, 1996). The commenters were "divided" over whether to regulate stabilization in the aftermarket, and the SEC chose instead to gather information, monitor aftermarket practices and "assess[] whether further regulation is warranted." *Id*.

Defendants **[**17]** argue that this history demonstrates that the SEC studied price stabilization and flipping repeatedly yet made the administrative judgment not to regulate the practices of which plaintiffs complain. Plaintiffs dispute the import of this history. First, plaintiffs argue that price stabilization in the aftermarket is a recent phenomenon beginning in the 1990s, so there is no way that Congress in 1934 or the SEC until just recently could have studied the issue. Thus, plaintiffs contend, the history we recounted above is essentially meaningless. We disagree. Plaintiffs rely on an artificial distinction between price stabilization in the aftermarket and price stabilization during distributions. There is no question that underwriters and brokers consistently employed some form of price stabilization to deter flipping. The practice pre-dated the Exchange Act and the SEC. As technology has evolved and distributions have taken shorter and shorter periods of time, the problem of flipping - and its "solution" of price stabilization - simply has spilled into the aftermarket as well as the distribution period. The SEC explicitly recognized this trend in its 1994 release, when it stated that "'stabilization' **[**18]** of the market in connection with offerings may have shifted from the sales period to the aftermarket period." SEC Release Nos. 33-7057, 34-33924, at 1316. The SEC still declined to regulate price stabilization in the aftermarket when it adopted Regulation M, and we find this decision to be both deliberate and significant. Plaintiffs cannot contend that this latest action concerned only distributions and not the aftermarket.

Second, plaintiffs claim that no conflict exists here because application of antitrust laws would reinforce the Exchange Act's hostility to price manipulation. Plaintiffs argue that the SEC has not considered the antitrust implications of price stabilization. However, the agency must consider the competitive effects of its regulations. *See* *15 U.S.C. §§ 78c(f)*, *78w(a)(2)*. Contrary to plaintiffs' contention, this case is unlike *Strobl*, where both the securities and antitrust laws imposed a categorical prohibition on price manipulation, *Strobl, 768 F.2d at 28*, because here ***HN5***[] Section 9(a)(6) requires the SEC to consider other factors such as the public interest and protection of investors in addition to market competition. **[**19]** The SEC has considered these factors in deciding not to regulate price stabilization in the aftermarket. Moreover, because Section 9(a)(6) permits some forms of price stabilization, it conflicts with the antitrust laws' blanket prohibition of the practices. The SEC also indicated in its 1940 release that its power to regulate stabilizing under the Exchange Act was broad and exclusive and that anti-competitive practices were lawful in the absence of SEC regulation. SEC Release No. 34-2446, at 12-14. The agency was aware of the antitrust implications of stabilization practices and the potential for direct conflict.

[*803] Third, plaintiffs argue repeatedly that the SEC has specifically declined to regulate the aftermarket and the absence of this regulation means that courts can enforce the antitrust laws against defendants without the danger of a conflict. Plaintiffs also contend that the possibility of future SEC aftermarket regulation is insufficient to sustain a finding of implied immunity. Plaintiffs' argument rests on a misinterpretation of Section 9(a)(6), which the district court addressed in its order denying plaintiffs' motion for reconsideration. On that motion and on appeal, plaintiffs **[**20]** argue that the district court misread the "plain words" of Section 9(a)(6) and "turned [the section] on its head by an interpretation directly opposite its plain meaning." It is plaintiffs that have given an opposite meaning to Section 9(a)(6).

The statute clearly provides that ***HN6***[] price stabilization in contravention of SEC regulations is unlawful. *15 U.S.C. § 78i(a)(6)*. As the district court correctly found, the statute allows price stabilization practices that the SEC does not prohibit. *Friedman II, 2001 U.S. Dist. LEXIS 884, 2001 WL 64774*, at *1. Plaintiffs reach the opposite conclusion - that the statute prohibits all price stabilization practices that the SEC does not specifically allow - because only this interpretation permits plaintiffs to construe the SEC's failure to regulate the aftermarket as leaving a space for antitrust laws to fill. Plaintiffs' misinterpretation of Section 9(a)(6) is the core of their position on appeal because all of their arguments against implied immunity flow from this view of the statute. But once the correct interpretation of Section 9(a)(6) is in place - the interpretation that the district court and defendants espouse - a finding **[**21]** of implied immunity is the direct consequence. We therefore affirm the district court's ruling that implied immunity bars plaintiffs' challenge to price stabilization practices in the aftermarket.

CONCLUSION

For the forgoing reasons, we affirm the judgment below in its entirety. Because we hold that implied immunity bars plaintiffs' claim, we do not reach defendants' alternative argument that the complaint alleges no antitrust injury because plaintiffs bought their shares at the same price as institutional investors and are free to sell them in the aftermarket.

Civil Procedure > Appeals > Standards of Review > General Overview

HN1[] **Defenses, Demurrers & Objections, Defects of Form**

On appeal from a judgment dismissing an action after sustaining a demurrer without leave to amend, the standard of review is well settled. The reviewing court gives the complaint a reasonable interpretation, and treats the demurrer as admitting all material facts properly pleaded. The court does not, however, assume the truth of contentions, deductions or conclusions of law. The judgment must be affirmed if any one of the several grounds of demurrer is well taken. However, it is error for a trial court to sustain a demurrer when the plaintiff has stated a cause of action under any possible legal theory. And it is an abuse of discretion to sustain a demurrer without leave to amend if the plaintiff shows there is a reasonable possibility any defect identified by the defendant can be cured by amendment.

Banking Law > Federal Acts > Federal Trade Commission Act > Unfair Competition & Practices

Communications Law > Regulators > US Federal Communications Commission > Jurisdiction

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

HN2[] **Antitrust & Trade Law, Federal Trade Commission Act**

The Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, was one of the so-called little Federal Trade Commission Acts of the 1930's, enacted by many states in the wake of amendments to the Federal Trade Commission Act enlarging the commission's regulatory jurisdiction to include unfair business practices that harmed, not merely the interests of business competitors, but of the general public as well. The definition of unfair competition in *§ 17200* demonstrates a clear design to protect consumers as well as competitors by its final clause, permitting inter alia, any member of the public to sue on his own behalf or on behalf of the public generally.

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

HN3[] **Antitrust & Trade Law, Federal Trade Commission Act**

Cal. Bus. & Prof. Code § 17203 authorizes injunctive relief to prevent "unfair competition." This term is broadly defined by Cal. Bus. & Prof. Code *§ 17200 of the Business and Professions Code* to include any unlawful, unfair or fraudulent business act or practice.

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

HN4[] **Antitrust & Trade Law, Federal Trade Commission Act**

The coverage of the *Cal. Bus. & Prof. Code § 17203* statute is sweeping, embracing anything that can properly be called a business practice and that at the same time is forbidden by law. It governs anti-competitive business practices as well as injuries to consumers, and has as a major purpose the preservation of fair business competition. It borrows violations of other laws and treats these violations, when committed pursuant to business activity, as unlawful practices independently actionable under *Cal. Bus. & Prof. Code § 17200 et seq.* and subject to the distinct remedies provided thereunder. *Section 17200* does not require that a plaintiff prove that he or she was directly injured by the unfair practice or that the predicate law provides for a private right of action.

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Governments > Courts > Judicial Precedent

Torts > Business Torts > Unfair Business Practices > General Overview

Torts > Business Torts > General Overview

HN5[] **Antitrust & Trade Law, Federal Trade Commission Act**

In construing the unfair competition law, the courts have drawn upon common law precedents in the fields of business torts. Because *Cal. Bus. & Prof. Code § 17200* is written in the disjunctive, it establishes three varieties of unfair competition-acts or practices which are unlawful, or unfair, or fraudulent. There are separate lines of authority construing each of these three terms. The first amended complaint does not contain any factual allegations of unlawful or fraudulent activity. Consequently our inquiry is confined to an analysis of whether the allegations of the operative pleading are sufficient to support a cause of action based upon an unfair business act or practice.

Real Property Law > ... > Injunctions > Grounds for Injunctions > General Overview

Real Property Law > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

HN6[] **Antitrust & Trade Law, Federal Trade Commission Act**

The term unfair is not precisely defined in *Cal. Bus. & Prof. Code § 17200*, and the courts have struggled to come up with a workable definition. Two appellate court decisions have attempted to formulate a more precise approach to adjudicating the existence of an unfair act or practice within the meaning of the unfair competition law. After reviewing the open-ended definitions of unfairness in earlier decisions, added this obvious thought: that the determination of whether a particular business practice is unfair necessarily involves an examination of its impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer. In brief, the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim--a weighing process quite similar to the one enjoined on us by the law of nuisance.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > General Overview

HN7[] **Regulated Practices, Trade Practices & Unfair Competition**

The United States Supreme Court has sanctioned guidelines for construing parallel language in the Federal Trade Commission Act that stress the potential relevance of public policy. Among other things, these guidelines call for an inquiry into whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise--whether, in other words, it is within at least the penumbra of some common-law, statutory, or other established concept of unfairness.

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

HN8[] **Antitrust & Trade Law, Federal Trade Commission Act**

An unfair business practice occurs when it offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN9[] **Regulated Practices, Trade Practices & Unfair Competition**

When a plaintiff who claims to have suffered injury from a direct competitor's unfair act or practice invokes *Cal. Bus. & Prof. Code § 17200*, the word "unfair" in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN10[] **Regulated Practices, Trade Practices & Unfair Competition**

A business practice constitutes unfair competition if it is forbidden by any law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court- made or if it is unfair, that is, if it offends an established public policy or is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.

Governments > Public Improvements > Community Redevelopment

Real Property Law > Eminent Domain Proceedings > Procedures

HN11[] **Public Improvements, Community Redevelopment**

Cal. Health & Safety Code § 33035 is found in the Community Redevelopment Law, *Cal. Health & Saf. Code § 33000 et seq.*, which establishes procedures for the acquisition of property by the power of eminent domain and the expenditure of public funds for redevelopment projects. The Community Redevelopment Law contemplates that a redevelopment project will involve the assembly of small property and public participation and assistance in the acquisition of land, in planning and in the financing of land assembly, in the work of clearance, and in the making of improvements necessary therefor. *Cal. Health & Saf. Code § 33037*. It delegates to responsible agencies of local government the authority to make the legislative decisions required to formulate and carry out such a project. *Cal. Health & Saf. Code §§ 33036*, *33100 et seq.*, and *Cal. Health & Safety Code § 33200 et seq.*

Governments > Public Improvements > Community Redevelopment

Real Property Law > Eminent Domain Proceedings > General Overview

Real Property Law > ... > Lease Agreements > Commercial Leases > General Overview

Real Property Law > ... > Lease Agreements > Commercial Leases > Shopping Center Leases

HN12[] **Public Improvements, Community Redevelopment**

The Community Redevelopment Law may be viewed as harmonizing the policy condemning blight with distinct policies favoring the free use of property. The balancing of conflicting policies is a common legislative function. The statutory scheme of the Community Redevelopment Law, however, provides only one remedy for the phenomenon of blight condemned by *Cal. Health & Safety § 33035*--public participation in a redevelopment project. An appellate court does not think it provides any authority for the courts to balance these policies outside this statutory context by fashioning a private remedy through the use of the unfair competition law to affect a single leasehold in a shopping center.

Business & Corporate Law > ... > Remedies > Equitable Relief > Injunctions

Real Property Law > ... > Injunctions > Grounds for Injunctions > Balance of Hardships

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Real Property Law > ... > Remedies > Injunctions > General Overview

Real Property Law > ... > Injunctions > Grounds for Injunctions > General Overview

Real Property Law > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

HN13[] **Equitable Relief, Injunctions**

An appellate court does not disagree with the general proposition that claims of unfair competition commonly present fact-intensive issues. What constitutes unfair competition under any given set of circumstances is a question of fact. The determination of unfair competition often involves a weighing process that requires a full examination of the relevant facts. The court must weigh the utility of defendant's conduct against the gravity of the harm to the alleged victim--a weighing process quite similar to the one enjoined on us by the law of nuisance.

Headnotes/Summary

Summary
CALIFORNIA OFFICIAL REPORTS SUMMARY

In an unfair competition action (*Bus. & Prof. Code, § 17200 et seq.*) filed by a citizen against a supermarket for closing one supermarket in a mall when it opened another one nearby, with the intention of keeping the closed one unoccupied to preclude competition from that location, the trial court entered judgment on the pleadings for defendant. (Superior Court of Alameda County, No. 840200-8, James A. Richman, Judge.)

The Court of Appeal affirmed. The court held that the trial court properly entered judgment on the pleadings for defendant, as there were no allegations that defendant's business decision was unlawful, fraudulent, or deceptive. The complaint alleged only one coherent theory of an unfair practice: by keeping the chief retail store in the shopping center off the market, defendant put in motion a process of deterioration affecting the entire shopping center that would inevitably produce the kind of blight that *Health & Saf. Code, § 33035*, condemns. The statutory scheme of the community redevelopment law provides only one remedy for the phenomenon of blight condemned by § 33035-public participation in a redevelopment project. It does not provide any authority for the courts to balance these policies outside this statutory context by fashioning a private remedy through the use of the unfair competition law to affect a single leasehold in a shopping center. Also, the allegations did not state a conflict with antitrust laws or policies. (Opinion by Swager, J., with Stein, Acting P.J., and Margulies, J., concurring.)

Headnotes

CA(1)[] **(1)**

Appellate Review § 128—Scope of Review—Rulings on Demurrers.

--On appeal from a judgment dismissing an action after the sustaining of a demurrer without leave to amend, the reviewing court gives the complaint a reasonable interpretation, and treats the demurrer as admitting all material facts properly pleaded. The court does not, however, assume the truth of contentions, deductions, or conclusions of law. The judgment must be affirmed if any one of the several grounds of demurrer is well taken. However, it is error for a trial court to sustain a demurrer when the plaintiff has stated a cause of action under any possible legal theory.

And it is an abuse of discretion to sustain a demurrer without leave to amend if the plaintiff shows there is a reasonable possibility that any defect identified by the defendant can be cured by amendment. The same principles apply to an appeal from a judgment on the pleadings.

CA(2)[] (2)

Unfair Competition § 2—Definitions and Distinctions—Unfair Competition Law.

--The unfair competition law (Bus. & Prof. Code, § 17200 et seq.) was one of the so-called "little FTC Acts" of the 1930's, enacted by many states in the wake of amendments to the Federal Trade Commission Act enlarging the commission's regulatory jurisdiction to include unfair business practices that harmed not merely the interests of business competitors but also those of the general public. The definition of unfair competition in § 17200 demonstrates a clear design to protect consumers as well as competitors by its final clause, permitting, inter alia, any member of the public to sue on his or her own behalf or on behalf of the public generally.

CA(3)[] (3)

Unfair Competition § 2—Definitions and Distinctions—Unfair Competition Law—Scope.

--Under Bus. & Prof. Code, § 17203, which authorizes injunctive relief to prevent unfair competition, the term "unfair competition" is broadly defined by Bus. & Prof. Code, § 17200, to include any unlawful, unfair, or fraudulent business act or practice. It was intentionally framed in its broad, sweeping language, precisely to deal with the innumerable new schemes which the fertility of man's invention could contrive. The statute embraces anything that can properly be called a business practice and that at the same time is forbidden by law. It governs anticompetitive business practices as well as injuries to consumers, and has as a major purpose the preservation of fair business competition. It borrows violations of other laws and treats these violations, when committed pursuant to business activity, as unlawful practices that are independently actionable under Bus. & Prof. Code, § 17200 et seq., and subject to the distinct remedies provided thereunder. It does not require that a plaintiff prove that he or she was directly injured by the unfair practice or that the predicate law provides for a private right of action. In construing the unfair competition law, the courts have drawn upon common law precedents in the fields of business torts as well as judicial interpretation of the closely parallel provisions of the Federal Trade Commission Act. Because Bus. & Prof. Code, § 17200, is written in the disjunctive, it establishes three varieties of unfair competition--acts or practices that are unlawful, or unfair, or fraudulent.

CA(4a)[] (4a) CA(4b)[] (4b) CA(4c)[] (4c)

Unfair Competition § 4—Acts Constituting Unfair Competition—Keeping Closed Supermarket Vacant to Preclude Competition for New One.

--In an unfair competition action (Bus. & Prof. Code, § 17200 et seq.) filed by a citizen against a supermarket for closing one supermarket in a mall when it opened another one nearby, with the intention of keeping the closed one unoccupied to preclude competition from that location, the trial court properly entered judgment on the pleadings for defendant. There were no allegations that defendant's business decision was unlawful, fraudulent, or deceptive. The complaint alleged only one coherent theory of an unfair practice: by keeping the chief retail store in the shopping center off the market, defendant put in motion a process of deterioration affecting the entire shopping center that would inevitably produce the kind of blight that Health & Saf. Code, § 33035, condemns. The statutory scheme of the Community Redevelopment Law provides only one remedy for the phenomenon of blight condemned by Health & Saf. Code, § 33035--public participation in a redevelopment project. It does not provide any authority for the courts to balance these policies outside this statutory context by fashioning a private remedy through the use of the unfair competition law to affect a single leasehold in a shopping center. Also, the allegations did not state a conflict with antitrust laws or policies.

[See 11 Witkin, Summary of Cal. Law (9th ed. 1990) Equity, § 99.]

CA(5)[] **(5)**

Unfair Competition § 4—Acts Constituting Unfair Competition—Business Practices.

--A business practice constitutes unfair competition if it is forbidden by any law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made, or if it is unfair, that is, if it offends an established public policy or is immoral, unethical, oppressive, unscrupulous, or substantially injurious to consumers. However, this test may be too amorphous for all cases, and a claim of an unfair act or practice predicated on public policy requires that the public policy that is a predicate to the action must be tethered to specific constitutional, statutory, or regulatory provisions.

CA(6)[] **(6)**

Unfair Competition § 9—Actions—Evidence—Acts Constituting Unfair Competition—Question of Fact.

--What constitutes unfair competition (*Bus. & Prof. Code, § 17200*) under any given set of circumstances is a question of fact. The determination of unfair competition often involves a weighing process that requires a full examination of the relevant facts. The court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim--a weighing process similar to the one enjoined by the law of nuisance.

Counsel: Cary L. Dictor for Plaintiff and Appellant.

Judges: (Opinion by Swager, J., with Stein, Acting P. J., and Margulies, J., concurring.)

Opinion by: Swager

Opinion

SWAGER, [*848] J.

[390]** Margaret Rose Gregory appeals an order and a judgment on the pleadings dismissing her first amended complaint against Albertson's Inc., and Ires (California), Inc. (hereafter Albertson's and Ires), to enjoin an unfair business practice. We affirm.

FACTUAL BACKGROUND

Appellant filed her first amended complaint after the trial court sustained a demurrer filed by Albertson's to the original complaint. As amended, the complaint alleges appellant is "an individual citizen and resident **[***2]** of the city of Alameda, County of Alameda, State of California." Ires is the owner of the Bridgeside Shopping Center in Alameda, California. In 1972, Ires leased to Albertson's predecessor "the larger one of the two major anchor stores" in the shopping center, which was "specially fitted for the sale of grocery and sundry items by a larger retailer of such items." Albertson's now holds the leasehold interest under a lease that "currently runs through the year 2042, including extension options."

In February 1997, Albertson's opened a large retail facility at Fruitvale Station Shopping Center in Oakland. The first amended complaint alleges that Albertson's "determined" that this facility "should service an area **[*89]** including the same area formerly serviced by [its store] at Bridgeside Shopping Center" and therefore "determined to indefinitely 'warehouse,' i.e., hold but make no beneficial use of, the leasehold space it formerly used for its facility at the Bridgeside Shopping Center in Alameda, in order to continue to hold the legal right of possession for such leasehold for the purpose of preventing any competitor from using such space to compete in the retail sale of groceries." Ires **[***3]** has permitted Albertson's to pursue this business strategy of maintaining the leasehold premises "in a permanent state of closure and darkness, vacant and empty, devoid of commercial activity, usefulness, use or purpose, and decaying, deteriorated and blighted, which condition has existed . . . from February, 1997 . . . [and] threatens to continue unchanged for over 40 years into the future."

The first amended complaint alleges that "[t]he maintenance of said leasehold in a permanent state of closure" is an unfair business practice by which Albertson's and Ires "thwart any effort by competitors . . . **[**391]** [of Albertson's] to make any beneficial use of the leasehold premises." The withdrawal of "the largest anchor building in a multiple user small commercial center serving a small community" creates "commercial and residential deterioration and blight, eliminating the economic viability of most of the shopping center space for most users, depressing land values in the vicinity, creating an attractive nuisance, creating visual and unaesthetic decay, reducing and eliminating consumer shopping choices, depriving the local municipality of sales tax revenues, strangling other small retail **[***4]** businesses in the same shopping center and unfairly restraining market competitors and economic competition based on price, service and quality."

Appellant seeks an injunction restraining Albertson's and Ires "from continuing to withhold the said leasehold space from normal and beneficial economic activity . . . and enjoining and directing defendants . . . actively to market such leasehold for assignment or subletting to business competitors or others, without regard for market competition to defendants Albertson's Inc."

Albertson's filed a demurrer to the first amended complaint on the ground that it failed to allege facts sufficient to state a cause of action under the unfair competition law. The trial court sustained the demurrer by an order filed September 7, 2001, and entered an order dismissing the first amended complaint against Albertson's on November 6, 2001. Ires subsequently filed a motion for judgment on the pleadings that was granted by an order filed December 17, 2001, and a judgment was entered in its favor on January 2, 2002. Appellant filed timely notices of appeal from the order entered November 6, 2001, and the judgment entered January 2, 2002.

[*850] DISCUSSION

A. **[***5]** *Standard of Review*

CA(1)[] **(1)** ***HN1***[] "On appeal from a judgment dismissing an action after sustaining a demurrer without leave to amend, the standard of review is well settled. The reviewing court gives the complaint a reasonable interpretation, and treats the demurrer as admitting all material facts properly pleaded. [Citations.] The court does not, however, assume the truth of contentions, deductions or conclusions of law. [Citation.] The judgment must be affirmed 'if any one of the several grounds of demurrer is well taken. [Citations.]' [Citation.] However, it is error for a trial court to sustain a demurrer when the plaintiff has stated a cause of action under any possible legal theory. [Citation.] And it is an abuse of discretion to sustain a demurrer without leave to amend if the plaintiff shows there is a reasonable possibility any defect identified by the defendant can be cured by amendment." (*Aubry v. Tri-City Hospital Dist. (1992) 2 Cal.4th 962, 966-967 [9 Cal.Rptr.2d 92, 831 P.2d 317]*; *Palm Springs Tennis Club v. Rangel (1999) 73 Cal.App.4th 1, 4-5 [86 Cal.Rptr.2d 73]*.) The same principles apply to an appeal from a judgment on the pleadings. **[***6]** (*Buck v. Standard Oil Co. (1958) 157 Cal. App. 2d 230, 235 [321 P.2d 67]*.)

B. *Unfair Competition Law*

CA(2)[] **(2)** HN2[] The unfair competition law (Bus. & Prof. Code, § 17200 et seq.) was "one of the so-called 'little FTC Acts' of the 1930's, enacted by many states in the wake of amendments to the Federal Trade Commission Act enlarging the commission's regulatory jurisdiction to include unfair business practices that harmed, not merely the interests of business competitors, but of the general public as well." (**[**392]** Rubin v. Green (1993) 4 Cal.4th 1187, 1200 [17 Cal. Rptr.2d 828, 847 P.2d 1044]; Bank of the West v. Superior Court (1992) 2 Cal.4th 1254, 1263-1264 [10 Cal.Rptr.2d 538, 833 P.2d 545].) The definition of unfair competition in section 17200 "demonstrates a clear design to protect consumers as well as competitors by its final clause, permitting inter alia, any member of the public to sue on his own behalf or on behalf of the public generally." (Barquis v. Merchants Collection Assn. (1972) 7 Cal.3d 94, 110 [101 Cal.Rptr. 745, 496 P.2d 817].)

CA(3)[] **(3)** The present action seeks relief under Business and Professions Code section 17203 **[***7]** , which HN3[] authorizes injunctive relief to prevent "unfair competition." This term is broadly defined by section 17200 of the Business and Professions Code to include "any unlawful, unfair or fraudulent business act or practice." In **[*851]** Barquis v. Merchants Collection Assn., supra, 7 Cal.3d 94, 112, the court observed that the predecessor to section 17200 "was intentionally framed in its broad, sweeping language, precisely to enable judicial tribunals to deal with the innumerable ' "new schemes which the fertility of man's invention would contrive." ' [Citation.]" "[G]iven the creative nature of the scheming mind, the Legislature evidently concluded that a less inclusive standard would not be adequate." (Barquis v. Merchants Collection Assn., supra, at p. 112.) HN4[] The coverage of the statute is " 'sweeping, embracing " 'anything that can properly be called a business practice and that at the same time is forbidden by law.' " ' [Citations.] It governs 'anti-competitive business practices' as well as injuries to consumers, and has as a major purpose 'the preservation of fair business competition.' [Citations.]" (Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 180 [83 Cal.Rptr.2d 548, 973 P.2d 527] **[***8]** (*Cel-Tech*).) It " ' "borrows" violations of other laws and treats these violations, when committed pursuant to business activity, as unlawful practices independently actionable under section 17200 et seq. and subject to the distinct remedies provided thereunder.' " (Farmers Ins. Exchange v. Superior Court (1992) 2 Cal.4th 377, 383 [6 Cal.Rptr.2d 487, 826 P.2d 730].) Section 17200 does not require that a plaintiff prove that he or she was directly injured by the unfair practice or that the predicate law provides for a private right of action. (Saunders v. Superior Court (1994) 27 Cal.App.4th 832, 839 [33 Cal.Rptr.2d 438].)

HN5[] In construing the unfair competition law, the courts have drawn upon common law precedents in the fields of business torts (e.g., American Philatelic Soc. v. Claibourne (1935) 3 Cal.2d 689, 698 [46 P.2d 135]) as well as judicial interpretation of the closely parallel provisions of the Federal Trade Commission Act. (See People ex rel. Mosk v. National Research Co. of Cal. (1962) 201 Cal. App. 2d 765, 770-774 [20 Cal.Rptr. 516].) Because Business and Professions Code section 17200 "is written in the disjunctive, it **[***9]** establishes three varieties of unfair competition--acts or practices [which] are unlawful, or unfair, or fraudulent." (AICCO, Inc. v. Insurance Co. of North America (2001) 90 Cal.App.4th 579, 587 [109 Cal.Rptr.2d 359]; State Farm Fire & Casualty Co. v. Superior Court (1996) 45 Cal.App.4th 1093, 1102 [53 Cal.Rptr.2d 229]; Roskind v. Morgan Stanley Dean Witter & Co. (2000) 80 Cal.App.4th 345, 351 [95 Cal.Rptr.2d 258].) There are separate lines of authority construing each of these three terms. (Walker v. Countrywide Home Loans, Inc. (2002) 98 Cal.App.4th 1158, 1169-1170 [121 Cal.Rptr.2d 79].) The first amended complaint does not contain any factual allegations of unlawful or fraudulent activity.CA(4a)[] **(4a)** Consequently our inquiry is confined to an analysis of whether the allegations of the operative pleading are sufficient to support **[**393]** a cause of action based upon an "unfair business act or practice."

HN6[] The term unfair is not precisely defined in the statute, and the courts have struggled to come up with a workable definition. Two appellate court **[*852]** decisions have attempted to formulate a more precise approach to adjudicating **[***10]** the existence of an "unfair" act or practice within the meaning of the unfair competition law. After reviewing the "open-ended definitions of unfairness" in earlier decisions, the court in Motors, Inc. v. Times Mirror Co. (1980) 102 Cal. App. 3d 735, 740 [162 Cal.Rptr. 543] "add[ed] this obvious thought: that the determination of whether a particular business practice is unfair necessarily involves an examination of its impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer. In brief, the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim--a weighing process quite similar to the one enjoined on us by the law of nuisance." (See also State Farm Fire & Casualty Co. v. Superior Court, supra, 45 Cal.App.4th 1093, 1103.)

In *People v. Casa Blanca Convalescent Homes, Inc. (1984) 159 Cal. App. 3d 509, 530 [206 Cal.Rptr. 164]*, the court noted that ***HN7***[] the United States Supreme Court decision in *F.T.C. v. Sperry & Hutchinson Co. (1972) 405 U.S. 233, 244 [92 S. Ct. 898, 31 L. Ed. 2d 170, 179]*, sanctioned **[***11]** guidelines for construing parallel language in the Federal Trade Commission Act that stress the potential relevance of public policy. Among other things, these guidelines call for an inquiry into " ' "whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise--whether, in other words, it is within at least the penumbra of some common-law, statutory, or other established concept of unfairness; . . ." ' [Citation.]" (*People v. Casa Blanca Convalescent Homes, Inc., supra, at p. 530*.) The *Casa Blanca* court concluded: ***HN8***[] "an 'unfair' business practice occurs when it offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." (*Ibid.*)

Cel-Tech, supra, 20 Cal.4th 163 can be read as a departure from these earlier precedents. The plaintiffs were sellers of cellular telephones who filed suit against a company that possessed a government-protected duopoly in the Los Angeles area in selling cellular services. They claimed that the defendant sold cellular **[***12]** telephones below cost so as to gain subscribers for its profitable cellular service. Reversing a judgment for the defendant, the court remanded the case for retrial on the cause of action for unfair competition.

In reviewing precedents under the unfair competition law, the *Cel-Tech* court found that the "definitions" of unfair acts or practices offered by **[*853]** *People v. Casa Blanca Convalescent Homes, Inc., supra, 159 Cal. App. 3d 509, 530*, and *Motors, Inc. v. Times Mirror Co., supra, 102 Cal. App. 3d 735, 740*, [1] were "too amorphous and provide too little guidance to courts and businesses. Vague references to 'public policy,' for example, provide little real guidance. . . . These concerns led us to hold that to establish the tort of wrongful discharge in violation of public policy, the public policy triggering the violation must **[**394]** be tethered to a constitutional or statutory provision [citation] or a regulation carrying out statutory policy [citation]." (*Cel-Tech, supra, 20 Cal.4th 163, 185*.)

[*13]** Turning for guidance to the jurisprudence under section 5 of the Federal Trade Commission Act (*15 U.S.C. § 45(a)*), the court noted that the " ' "antitrust laws . . . were enacted for 'the protection of *competition*, not *competitors*.' " ' [Citation.]" (*Cel-Tech, supra, 20 Cal.4th 163, 186*.) These principles, the court concluded, "require that any finding of unfairness to competitors under *section 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition. We thus adopt the following test: ***HN9***[] When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." (*Id. at pp. 186-187*, fn. omitted.)

The court in a footnote specifically limited the scope of its ruling. (*Cel-Tech, supra, 20 Cal.4th 163, 187, fn. 12*.) **[***14]** Despite the court's earlier concerns that it found the definitions in *Casa Blanca* and *State Farm Fire & Casualty Co.* to be "too amorphous" for practical application, it limited application of its newly announced test to an action by a competitor alleging anticompetitive practices. "This case involves an action by a competitor alleging anticompetitive practices. Our discussion and this test are limited to that context. Nothing we say relates to actions by consumers or by competitors alleging other kinds of violations of the unfair competition law such as 'fraudulent' or 'unlawful' business practices or 'unfair, deceptive, untrue or misleading advertising.' " (*Cel-Tech, supra, at p. 187, fn. 12*.) The present case therefore does not fall within the procedural context to which the new test applies.

CA(5)[] **(5)** Since the test adopted by the court in *Cel-Tech* is expressly limited to the context of that case, our inquiry continues to be guided by prior Court of Appeal decisions, which have attempted to formulate a test for an "unfair act **[*854]** or business practice." In *People v. Duz-Mor Diagnostic Laboratory, Inc. (1998) 68 Cal.App.4th 654, 658*[2] [*80 Cal. Rptr. 2d 419*], **[***15]** the court set forth what appears to be an all inclusive definition of unfair

[1] The opinion cited *State Farm Fire & Casualty Co. v. Superior Court, supra, 45 Cal.App.4th 1093, 1103-1104*, which followed the *Motors, Inc.*, decision.

competition: ***HN10***[] "A business practice constitutes unfair competition if it is forbidden by any law, 'be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made' (*Saunders v. Superior Court*[*, supra*,] *27 Cal.App.4th 832, 838-839* . . .) or if it is unfair, that is, if it ' " 'offends an established public policy or . . . is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.' . . ." ' (*Podolsky v. First Healthcare Corp. (1996) 50 Cal.App.4th 632, 647 [58 Cal.Rptr.2d 89]*, citations omitted.)"

Cel-Tech, however, may signal a narrower interpretation of the prohibition of unfair acts or practices in all unfair competition actions and provides reason for caution in relying on the broad **[***16]** language in **[**395]** earlier decisions that the court found to be "too amorphous." [3] Moreover, where a claim of an unfair act or practice is predicated on public policy, we read *Cel-Tech* to require that the public policy which is a predicate to the action must be "tethered" to specific constitutional, statutory or regulatory provisions.

C. *Adequacy of Pleadings*

CA(4b)[] **(4b)** There are no allegations that the business decision of the respondents is unlawful, fraudulent or deceptive. We find that the first amended complaint alleges only one coherent theory of an unfair practice: by **[***17]** keeping off the market the chief retail store in the shopping center, the respondents have put in motion a process of deterioration affecting the entire shopping center that will inevitably produce the kind of blight that *Health and Safety Code section 33035* condemns "as injurious and inimical to the public health, safety, and welfare of the people of the communities in which they exist . . . ." The public policy expressed in the redevelopment law thus forms the predicate to her cause of action.

HN11[] *Health and Safety Code section 33035* is found in the Community Redevelopment Law (*Health & Saf. Code, § 33000 et seq.*), which establishes procedures for the acquisition of property by the power of eminent domain and the expenditure of public funds for redevelopment projects. The Community Redevelopment Law contemplates that a redevelopment project will **[*855]** involve the assembly of small property and "public participation and assistance in the acquisition of land, in planning and in the financing of land assembly, in the work of clearance, and in the making of improvements necessary therefor . . . ." **[***18]** (*Health & Saf. Code, § 33037*.) It delegates to responsible agencies of local government the authority to make the legislative decisions required to formulate and carry out such a project. (*Health & Saf. Code, §§ 33036*, *33100 et seq.*, and *33200 et seq.*)

While the policy of *Health and Safety Code section 33035* supports the statutory scheme for carrying out a redevelopment project, it does not necessarily follow that it calls for a private remedy affecting a single parcel of property under the unfair competition law. Appellant seeks an extension of the policy that departs from the primary focus of the statute.

Moreover, as respondents point out, appellant asks us to apply the policy against urban blight to circumstances where it would impinge on a separate state policy favoring "freedom of contract by the parties to commercial real property leases." (*Civ. Code, § 1995.270, subd. (a)(1)*; cf. *Pay 'N Pak Stores, Inc. v. Superior Court (1989) 210 Cal. App. 3d 1404, 1409-1410 [258 Cal.Rptr. 816]*.) **[***19]** ***HN12***[] The Community Redevelopment Law may be viewed as harmonizing the policy condemning blight with distinct policies favoring the free use of property. The balancing of conflicting policies is a common legislative function. The statutory scheme of the Community Redevelopment Law, however, provides only one remedy for the phenomenon of blight condemned by *Health and Safety Code section 33035*--public participation in a redevelopment project. We do not think it provides any authority for the courts to balance these policies outside this statutory context by fashioning a private remedy through the **[**396]** use of the unfair competition law to affect a single leasehold in a shopping center.

---

[2] The Supreme Court denied a petition for review on February 24, 1999, less than two months before its decision in *Cel-Tech*.

[3] In our reading of *Cel-Tech,* we differ somewhat from the interpretation in *Smith v. State Farm Mutual Automobile Ins. Co. (2001) 93 Cal.App.4th 700, 720, footnote 23 [113 Cal. Rptr. 2d 399]*,, which expressed the view that *Cel-Tech "*did not signal a retreat (at least in noncompetitor cases), from [the Supreme Court's] earlier statements in *Barquis v. Merchants Collection Assn. . . .*"

Although our focus is on whether or not appellant has adequately stated a cause of action for unfair competition, we note that the remedy she seeks would impose a difficult burden on the court. The remedy that appellant seeks goes well beyond the remedy of divestment, authorized in antitrust actions, because it demands discretion in choosing between the option of sale or lease and the negotiation with a suitable tenant of commercial real estate terms calculated to remedy the alleged evil of blight. It is true that the courts possess **[***20]** power to appoint receivers to enforce equitable decrees, but appellant seeks a remedy that would put the court in the complex role of supervising and directing efforts to market commercial property in a manner to remedy the multitude of grievances alleged in the complaint. It would not only cause the court "to assume the roles of real estate broker or property manager" as respondents argue, but also would require the court to make **[*856]** competitive business judgments. Furthermore, by tying her claim to the public policy against blight expressed in *Health and Safety Code section 33035*, plaintiff in essence is seeking to convert the unfair competition law into a private remedy to remediate blight that may not require the findings of blight as required by the Health and Safety Code. (*Health & Saf. Code §§ 33030, subd. (b)*, *33031*.)

Appellant argues that the unfair competition law contains "broad remedial provisions which authorize the courts to correct violations" (*Consumers Union of U.S., Inc. v. Alta-Dena Certified Dairy (1992) 4 Cal.App.4th 963, 972 [6 Cal.Rptr.2d 193]*) and the demurrer cannot be sustained if she is " 'entitled to **[***21]** some relief, notwithstanding that . . . [she] may demand relief to which [s]he is not entitled under the facts alleged. . . .' [Citation.]" (*White v. State of California (1987) 195 Cal. App. 3d 452, 471 [240 Cal.Rptr. 732]*.) But we think a judicially supervised marketing of the property would, at best, put the court in the untenable position of making or approving commercial decisions without clear guidelines and, at worst, would involve a level of dominion over the property raising constitutional issues. [4]

The first amended complaint does not state a theory of unfair practice based on violation of specific antitrust statutes or policies of antitrust legislation. It is true that the complaint alleges that Albertson's acted with a motive to secure an advantage over competitors. For example it alleges that **[***22]** Albertson's retained possession under the lease "for the purpose of preventing any competitor from using such space to compete in the retail sale of groceries" and "to thwart any effort by competitors . . . to make any beneficial use of the leasehold premises." But these allegations do not state a conflict with antitrust laws or policies. As noted in *Cel-Tech, supra, 20 Cal.4th 163, 186*, the focus of the antitrust laws is on injury to competition. To come within the letter or policy of these laws, it must be alleged that respondent's conduct had an adverse effect on competition.

We find only one allegation in the complaint charging injury to competition. The respondents' acts, it is alleged, constitute an unfair business practice by "unfairly restraining market competitors and economic competition based on price, service and quality." However, "[s]uch allegations are too vague and conclusionary to support a claim for restraint of trade." (**[**397]** *Saunders v. Superior Court, supra, 27 Cal. App. 4th 832, 842* .) Similarly, the allegation that defendants' actions "reduce market choices otherwise available to consumers" does not imply a diminution of competition. The **[***23]** same can be said of every occasion that an enterprise ceases to offer its goods or services by going out of business.

[*857] Appellant vigorously argues that unfair business practices present issues of fact that cannot be resolved by demurrer. ***HN13***[] We do not disagree with the general proposition that claims of unfair competition commonly present fact-intensive issues.***CA(6)***[] **(6)** In *People v. McKale (1979) 25 Cal.3d 626, 635 [159 Cal.Rptr. 811, 602 P.2d 731]*, the court observed, " 'What constitutes "unfair competition" . . . under any given set of circumstances is a question of fact . . . .' [Citation.]" The determination of unfair competition often involves a weighing process that requires a full examination of the relevant facts. As stated in *Schnall v. Hertz Corp. (2000) 78 Cal.App.4th 1144, 1167 [93 Cal.Rptr.2d 439]*, " 'the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim--a weighing process quite similar to the one enjoined on us by the law of nuisance. . . .' [Citations.]"

---

[4] See United States *Constitution, article I, section 10* (impairment of contracts clause), Fifth Amendment (takings clause), and Fourteenth Amendment (due process clause).

CA(4c)[] **(4c)** We have relied, however, on an analysis of the legislative policy of *Health and Safety Code section 33035* **[***24]** in rejecting the theory of unfair competition based on remediation of blighted areas. Our conclusion that this theory does not state a claim under the unfair competition law represents a conclusion of law rather than the sort of factual finding that cannot be resolved by demurrer. Appellant was given an opportunity to state an alternative theory under the antitrust laws, which might indeed present a fact-intensive issue, but made no legally cognizable effort to do so. As in *Khoury v. Maly's of California (1993) 14 Cal.App.4th 612, 619 [17 Cal.Rptr.2d 708]*, the demurrer was properly sustained because the complaint "identifies no particular section of the statutory scheme [of antitrust laws] which was violated and fails to describe with any reasonable particularity the facts supporting violation."

DISPOSITION

The judgment is affirmed. Costs on appeal are awarded to respondents.

Stein, Acting P. J., and Margulies, J., concurred.

Appellant's petition for review by the Supreme Court was denied March 19, 2003.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

In considering a defendant's motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court may dismiss the complaint if it appears certain the plaintiff cannot prove any set of facts in support of its claims which would entitle it to relief. The court accepts as true all well-pled factual allegations, drawing all reasonable inferences in the plaintiff's favor.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN7[] **Clayton Act, Claims**

Similar to *11 V.I. Code Ann. § 1507(2)*, § 4 of the Clayton Act provides authority for a private antitrust cause of action in an antitrust suit. *15 U.S.C.S. § 15* states that any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States. Despite this broad language, the courts have been virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation. Antitrust standing is narrower than the statute's wording indicates. Realizing that a liberal interpretation of § 4 of the Clayton Act could afford relief to all persons whose injuries are causally related to an antitrust violation, courts have impressed a standing doctrine so as to confine the availability of § 4 relief only to those individuals whose protection is the fundamental purpose of the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN8[] **Private Actions, Standing**

The United States Court of Appeals for the Third Circuit holds that in determining a party's standing to bring antitrust suits a court must look to: (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause the harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, which addresses concerns that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages. Courts must look to, among other factors, the nature of the industry in which the alleged antitrust violation exists, the relationship of the plaintiff to the alleged violator, and the alleged effect of the antitrust violation upon the plaintiff.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Real Property Law > Encumbrances > Restrictive Covenants > General Overview

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Restrictive covenants are not per se unlawful, provided they are reasonable in scope and economically justified. Courts will uphold restrictive covenants so long as they are reasonable in scope and do not unduly burden trade. The complete bar on competition needs to be reasonably related to the promisee's interest in protecting his own business. Restrictive covenants are not per se invalid.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Market Definition, Relevant Market**

Many courts have refused to grant standing to commercial landlords who bring antitrust claims against their tenants. Courts generally look to the competitors and consumers in the relevant market when determining the proper parties to an antitrust action. Congress enacted the Sherman Act to protect the economic freedom of participants in the relevant market.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN17[] **Types of Contracts, Covenants**

The United States Court of Appeals for the First Circuit has detailed three approaches a court has at its disposal when dealing with potentially unreasonable restrictive covenants. One method, the "all or nothing" approach, is to void the restrictive covenant in its entirety if any provision of the agreement is unenforceable. Another method, known as the "blue pencil" approach, permits a court to excise the unreasonable provision from an agreement and enforce the restrictive covenant so long as the covenant remains grammatically coherent. The final approach, known as "partial enforcement," enables the court to modify the terms of the restrictive covenant to make the agreement reasonable unless the circumstances indicate bad faith or deliberate overreaching on the part of the parties to the contract.

Counsel: A. Jeffrey Weiss, Esq., St. Thomas, U.S.V.I., for plaintiff.

John K. Dema, Esq., St. Croix, U.S.V.I., for Pueblo, defendant.

Andrew C. Simpson, Esq., St. Croix, U.S.V.I., for Kmart, defendant.

Judges: Thomas K. Moore, District Judge.

Opinion by: Thomas K. Moore

Opinion

[*607] MEMORANDUM

Defendant Xtra Super Food Centers, Inc. ["defendant" or "Pueblo"] moves to dismiss parts of the complaint of plaintiff Sunny Isle Shopping Center, Inc. ["plaintiff" or "Sunny Isle"] and for summary judgment. Sunny Isle opposes defendant's motion. For the reasons set forth below, I will grant Pueblo's motion to dismiss Count I of Sunny Isle's complaint, but I will deny defendant's motion for summary judgment in regard to Counts II and V. [1] In addition, I will exercise my discretion to modify the scope of the area covered by the restrictive covenant.

[2] I. FACTUAL BACKGROUND**

Plaintiff owns and operates the Sunny Isle Shopping Center as well as other commercial properties on St. Croix. Defendant is a successor tenant at the shopping center, where it operates a supermarket. Originally, Sunny Isle entered into a lease with the Grand Union Company ["Grand Union"] on or about October 17, 1969 to operate a supermarket at the shopping center. [2] The lease negotiated with Grand Union contained a restrictive covenant at paragraph 10, which provided that

> during the term of this lease and any extension thereof the Landlord shall not use nor permit to be used any other part **[*608]** of the shopping center or any other property directly or indirectly owned or controlled by the Landlord within a radius of five miles of the shopping center for the sale of food for consumption off premises, except (1) bakery, kiosks, hamburger stands, and snack bars located within the shopping center .... If this covenant be violated, the Tenant, without liability of forfeiture of its terms, may withhold payment of any or all

---

[1] Pueblo made no motion to dismiss Sunny Isle's remaining claims, namely Count III (waiver) and Count IV (estoppel).

[2] The initial term of the lease was 21 years, but permitted Grand Union to extend the lease term four times, with each extension having a term of five years.

> installments of rent accruing during such violation. The total amount of such rents thus withheld shall be deemed to be liquidated **[**3]** damages ....

On November 30, 1995, Grand Union assigned its lease to Pueblo with the consent of Sunny Isle. That same day the terms of the lease, including paragraph 10, were extended until January 31, 2012.

Some time in 1997, Pueblo learned that Sunny Isle intended to lease space at the shopping center to the Kmart Corporation ["Kmart"]. [3] **[**4]** Knowing that Kmart traditionally sells groceries and believing that such conduct would violate the terms of its agreement with Sunny Isle, Pueblo notified Sunny Isle of its intent to enforce the restrictive covenant. Notwithstanding this announcement, Sunny Isle proceeded to negotiate a lease of the space to Kmart on December 4, 1997, which permitted Kmart to sell food for consumption off-premises despite Pueblo's exclusive arrangement. [4]

On June 17, 1998, Sunny Isle filed suit in this Court for a declaration that the restrictive covenant violates the subsequently enacted Virgin Islands Antimonopoly Act (Count I), that the restrictive covenant is unenforceable (Count II), that Pueblo has waived any defenses by failing to enforce paragraph 10 before 1998 (Count III), that Pueblo is estopped from enforcing the restrictive covenant because of its failure to object to prior violations of paragraph 10 (Count IV), and that the lease's provision enabling Pueblo to withhold rent is a penalty (Count V). After Kmart began operations in September 1998, Pueblo discovered that Kmart was in fact using its store to sell groceries and began to withhold rent as provided by paragraph **[**5]** 10. Sunny Isle responded on September 10th by filing a notice to evict Pueblo for failure to pay rent. Pueblo immediately sought a temporary restraining order to prevent its eviction, which this Court granted on October 8, 1999. Sunny Isle and Pueblo later stipulated to several extensions of the temporary restraining order through November 15, 2000.

During the pendency of this suit, Kmart voluntarily agreed to cease selling most of its food products. Upon learning that Kmart had ceased selling a number of the prohibited items, Pueblo began to pay rent again from November of 2000 until August of 2002, at which time it now argues that Kmart has continued to violate the terms of the restrictive covenant by selling snack items and beverages. Sunny Isle disputes Pueblo's interpretation of paragraph 10 of the lease on whether these items violated the prohibition on the sale of foods for **[*609]** consumption off-premises and responded on August 7, 2002, by giving Pueblo another notice to quit the leased premises for failure to pay rent. Pueblo thereafter moved to enforce the October 9, 1999 temporary restraining order halting any eviction. While that motion was pending, Sunny Isle filed an action **[**6]** for forcible entry and detainer in the Territorial Court to evict Pueblo, which Pueblo has removed to this Court. As further proceedings are pending in that separate action, Pueblo's motion to enforce the October 9, 1999 temporary restraining order is not ripe for decision. This Court has diversity jurisdiction under section 22(a) of the Revised Organic Act of 1954 [5] and *28 U.S.C. § 1332*.

II. DISCUSSION

A. Sunny Isle Has No Standing to Bring Claims Under the Virgin Islands Antimonopoly Act

Pueblo moves to dismiss Count I of plaintiff's complaint pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* on the ground that Sunny Isle lacks standing to sue **[**7]** under the Virgin Islands Antimonopoly Act, 11

---

[3] The space Sunny Isle intended to lease to Kmart was originally used by F.W. Woolworth Company ["Woolworth"]. Woolworth had entered into a lease with Sunny Isle on September 15, 1969 to operate a "department store business." According to Sunny Isle, Woolworth, in addition to operating its premises as a department store, marketed and sold "an extension line of food products for consumption off premises." Woolworth terminated its lease with Sunny Isle in 1997.

[4] Paragraph 29 of the Sunny Isle-Kmart lease provides in part: "Landlord acknowledges that [Kmart] intends to sell food for consumption off premises, and hereby agrees notwithstanding the Pueblo Exclusive, [Kmart] shall have the right to sell food for consumption off premises." Sunny Isle also agreed to defend at its own cost Kmart's right to sell such foods.

[5] *48 U.S.C. § 1612(a)*. The complete Revised Organic Act of 1954 is found at *48 U.S.C. §§ 1541-1645 (1995 & Supp.2001)*, *reprinted in* V.I. CODE ANN. 73-177, Historical Documents, Organic Acts, and U.S. Constitution (1995 & Supp.2001) (preceding V.I. CODE ANN. tit. 1).

V.I.C. §§ 1501-1518. ***HN1***[] In considering defendant's motion to dismiss under *Rule 12(b)(6)*, the Court "may dismiss [the] complaint if it appears certain the plaintiff cannot prove any set of facts in support of its claims which would entitle it to relief." *See* *Bostic v. AT&T of the Virgin Islands, 166 F. Supp. 2d 350, 354 (D.V.I. 2001)* (internal quotations omitted); *see also* *Julien v. Committee of Bar Examiners, 34 V.I. 281, 286, 923 F. Supp. 707, 713 (D.V.I. 1996)*; *FED. R. CIV. P. 12(b)(6)*. The Court accepts as true all well-pled factual allegations, drawing all reasonable inferences in the plaintiff's favor. *See* *Bostic, 166 F. Supp. 2d at 354*; *Julien, 34 V.I. at 286-87, 923 F. Supp. at 713*.

The viability of Count I centers on whether Sunny Isle has standing to bring an antitrust claim against Pueblo. Pueblo argues that Sunny Isle has no standing because it is not a competitor of Pueblo and, thus, its injury is not the type of injury antitrust laws were designed to prevent. *See* ***HN2***[] *11 V.I.C. § 1503(1)* ("Every person shall be deemed to have committed a violation of this **[**8]** chapter who shall: Make any contract with, or engage in any combination or conspiracy with, any other person who is, or but for a prior agreement would be, a competitor of such person."); *see also* *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 113, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1996)* (***HN3***[] "[A] private plaintiff must allege threatened loss or damage 'of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.'"). Sunny Isle counters that this competitor requirement is only limited to *section 1503(1)* and that its injury is covered by *section 1503(2)*, which gives it standing to pursue this antitrust claim. *See* ***HN4***[] *11 V.I.C. § 1503(2)* ("Every person shall be deemed to have committed a violation of this chapter who shall: By Contract, combination, or conspiracy with one or more other persons unreasonably restrain trade or commerce."). The language of *section 1503(2)* on its face appears to give Sunny Isle standing to bring this action under *section 1507* of the Virgin Islands Antimonopoly Act. *See* ***HN5***[] *11 V.I.C. § 1507(2)* ("Any person who has been injured in his business or property, or is threatened with **[**9]** such injury, by a violation of *section 1503* ... may maintain an action in the District Court for **[*610]** damages, or for an injunction, or both, against any person who has committed such violation."). My inquiry does not end here, however, as I must look to the interpretation of federal ***antitrust law*** to see whether federal courts would find that Sunny Isle has standing to sue. *See id.* ***HN6***[] *§ 1518* ("When the language of this chapter is the same or similar to the language of a Federal ***Antitrust Law***, the District Court in constructing this chapter shall follow the construction given to the Federal Law by the Federal Courts."); *see also* *Sea Air Shuttle Corp. v. Virgin Islands Port Auth., 782 F. Supp. 1070, 1077 (D.V.I. 1991)* (noting the Virgin Islands Antimonopoly Law "evidences the intention that [it] be applied in a manner consistent with the Sherman Act and other federal antitrust claims."). Therefore, to decide whether Sunny Isle has standing to pursue its territorial antitrust claim, I must determine whether it would have standing to pursue its claim under federal law.

HN7[] Similar to our *section 1507(2)*, *section 4* of the Clayton Act provides authority for a private antitrust **[**10]** cause of action in an antitrust suit. *See* *15 U.S.C. § 15* ("Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States ...."). Despite this broad language, the "courts have been virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Hawaii v. Standard Oil Co., 405 U.S. 251, 263 n.14, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)* (collecting cases); *Angelico v. Lehigh Valley Hosp., Inc., 184 F.3d 268, 274 (3d Cir. 1999)* ("Antitrust standing, however, is narrower than the statute's wording indicates."). Realizing that a liberal interpretation of *section 4* of the Clayton Act

> could afford relief to all persons whose injuries are causally related to an antitrust violation ...[,] courts have impressed a standing doctrine so as to confine the availability of *section 4* relief only to those individuals whose protection is the fundamental purpose of the antitrust laws.

Cromar Co. v. Nuclear Materials & Equip. Corp., 543 F.2d 501, 505 (3d Cir. 1976) **[**11]** (quoting *In re Multidistrict Vehicle Air Pollution M.D.L. No. 31, 481 F.2d 122, 125 (9th Cir. 1973)*.

HN8[] The Third Circuit Court of Appeals has adopted the following approach in determining a party's standing to bring antitrust suits. Accordingly, a court must look to:

> (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause the harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, which addresses concerns that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1165-66 (3d Cir. 1993); *see also* Cromar, 543 F.2d at 506 (noting that "courts must look to, among other factors, the nature of the industry in which the alleged antitrust violation exists, the **[**12]** relationship of the plaintiff to the alleged violator, and the alleged effect of the antitrust violation upon the plaintiff."). A review of these factors confirms that Sunny Isle does not have standing to bring its antitrust claims.

[*611] First, plaintiff's claimed injuries were not caused solely by any anti-competitive actions of Pueblo. Even though Pueblo is seeking to enforce the restrictive covenant, Sunny Isle's actions are just as significant a cause of the injuries about which it complains. Plaintiff obviously knew of the terms of the restrictive covenant before it leased space to K-Mart, yet Sunny Isle rented the space to K-Mart anyway. Moreover, Sunny Isle had freely agreed to this restrictive covenant when it first negotiated the lease with Grand Union. Thus, even if Pueblo's conduct in trying to enforce this restrictive covenant has been a cause in fact of Sunny Isle's injury, I cannot find that Pueblo's actions are the legal or proximate cause of plaintiff's claimed injury. *See* Acme Mkts., Inc. v. Wharton Hardware & Supply Corp., 890 F. Supp. 1230, 1237 (D.N.J. 1995) (finding that defendant grocery store's enforcement of restrictive covenant was not the proximate **[**13]** cause of harm to commercial landlord, but that the likely proximate cause of the injury stemmed from prior anchor tenant's decision to quit the premises).

Second, there is no evidence that Pueblo intended to harm Sunny Isle. I can find no evidence of "retaliatory and bad faith" conduct by Pueblo in its letter of April 27, 1998 to Sunny Isle notifying Sunny Isle of Pueblo's intent to enforce the restrictive covenant in the event that Kmart opened a store in the defendant's shopping center and sold groceries. As numerous courts before me have opined, ***HN9***[] restrictive covenants are not per se unlawful, provided they are reasonable in scope and economically justified. *See* id. at 1242 (noting that courts will uphold restrictive covenants so long as they are reasonable in scope and do not unduly burden trade); *see also* Liautaud v. Liautaud, 221 F.3d 981, 987 (7th Cir. 2000) ("The complete bar on competition needs to be reasonably related to the promisee's interest in protecting his own business."); Static Control Components, Inc. v. Darkprint Imaging, Inc., 135 F. Supp. 2d 722, 729 (M.D.N.C. 2001) (noting that restrictive covenants are not per **[**14]** se invalid). It is evident, given its size and location, that St. Croix may have problems attracting businesses to the island. One way Crucian entrepreneurs can attract desirable businesses to the island is through restrictive covenants as economic inducements. *See* Acme Mkts., 890 F. Supp. at 1242. Accordingly, Pueblo's act of seeking to enforce its restrictive covenant-a covenant freely agreed to by Sunny Isle-was a reasonable course of action designed to protect its business interests rather than an intent to harm plaintiff. Moreover, I note that the April 27th letter evidences that Pueblo did not object to Kmart opening a store on plaintiff's premises, but merely reiterated its intent to enforce the restrictive covenant if Kmart attempted to sell food at this location. Again, this fact demonstrates Pueblo's desire to protect its own business interests and not some evil plan to harm Sunny Isle.

Third, Sunny Isle is not the most direct victim. ***HN10***[] Many courts have refused to grant standing to commercial landlords who bring antitrust claims against their tenants. *See* id. at 1230 (refusing to grant landlord standing in suit to declare restrictive covenant **[**15]** unenforceable); *see also* Serfecz v. Jewel Food Stores, 67 F.3d 591 (7th Cir. 1995) (shopping mall owners did not have standing to bring antitrust claim against grocery store tenant); Southaven Land Co. v. Malone & Hyde, Inc., 715 F.2d 1079, 1087 (6th Cir. 1983) (lessor of commercial premises did not have antitrust standing to challenge alleged violation of section 2 of the Sherman Act in the retail grocery industry); Rosenberg v. Cleary, Gottlieb, Steen & Hamilton, 598 F. Supp. 642, 645-46 (S.D.N.Y. 1984) (holding that the owner of a supermarket development did not have standing under section **[*612]** 4 of the Clayton Act to challenge restraint of trade in retail grocery business). Courts generally look to the competitors and consumers in the relevant market when determining the proper parties to an antitrust action. *See* Associated General Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 539, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983). The relevant market here is the grocery retail market. As Sunny Isle is not involved in this market in any capacity, it is not a proper party. *See* id. at 538 **[**16]** (noting that Congress enacted the Sherman Act to protect "the economic freedom of participants in the relevant market"). [6]

Fourth and finally, the injury suffered by Sunny Isle is not the type Congress intended "to redress in providing a private remedy for violations of the antitrust laws." *Blue Shield of Va. v. McCready, 457 U.S. 465, 483, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*. ***HN11***[] A party may demonstrate that its injury falls within the protective realm of antitrust laws if it can show that its injury is "inextricably intertwined with the injury the [defendant] sought to inflict on … the … [relevant] market." *Id. at 484*. As noted above, the relevant market here is **[**17]** the retail grocery market, in which Sunny Isle has suffered no injury. Sunny Isle creatively argues that it has been injured in the retail shopping center market. Basically, Sunny Isle argues that the restrictive covenant covering a five mile radius unnecessarily restricts its ability to lease commercial space. Assuming without deciding that this restrictive covenant may have affected Sunny Isle's ability to lease commercial real estate and thus caused it harm, such injury would be "no more than a 'tangential by-product' of an antitrust violation in the grocery market," assuming such a violation exists here. *See* Rosenberg, 598 F. Supp. at 645 (rejecting plaintiff's attempt to create a second market); *see also McCready, 457 U.S. at 477* (***HN12***[] "Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages from the injury to his business or property."). Therefore, I find that Sunny Isle does not have standing to bring its antitrust claims and I must dismiss Count I of its complaint.

B. Genuine Issues of Material Fact Preclude Summary Judgment in Pueblo's Favor

Pueblo **[**18]** has also moved for summary judgment on Counts II (unenforceable restrictive covenant) and V (unenforceability of penalty provision) of plaintiff's complaint. ***HN13***[] Summary judgment shall be granted if "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *FED. R. CIV. P. 56(c)*; *see also Sharpe v. West Indian Co., 118 F. Supp. 2d 646, 648 (D.V.I. 2000)*. The nonmoving party may not rest on mere allegations or denials, but must establish by specific facts that there is a genuine issue for trial from which a reasonable juror could find for the nonmovant. *See Saldana v. Kmart Corp., 42 V.I. 358, 360-61, 84 F. Supp. 2d 629, 631-32 (D.V.I. 1999)*, *aff'd in part and rev'd in part,* 260 F.3d 228, 43 V.I. 361 (3d Cir. 2001). Only evidence admissible at trial shall be considered and the Court must draw all reasonable inferences therefrom in favor of the nonmovant. **[*613]** *See id.* A review of this matter reveals that genuine issues of material fact still remain, thus precluding **[**19]** a grant of summary judgment in Pueblo's favor.

First, the language of the lease pertaining to the prohibition of the sale of "food for consumption off-premises" is ambiguous. Despite defendant's claim that this is a standard industry term, I have no evidence before me at this time to support such a claim. As there is still a question of fact regarding what exactly the lease prohibits, Count II is not ripe for decision.

Likewise, there is a material question of fact whether Pueblo has actually suffered any loss from Kmart's activities. ***HN14***[] Liquidated damages are typically used when the amount fixed by contract approximates actual loss and proof of loss is difficult to determine. *See RESTATEMENT (SECOND) OF CONTRACTS § 356*. [7] As the evidence before me is unclear whether Pueblo has suffered any financial losses since Kmart's arrival or whether any such losses can be attributed to Kmart's sales of food products, I am unable to determine at this time whether the rent-withholding provision challenged in Count V is enforceable.

[6] Sunny Isle argues that it alone has the ability and desire to bring this antitrust action. In particular, it notes that K-Mart has been unwilling to enter into the fray and consumers cannot realistically be expected to bring an action. Whether or not either of these are true, they are beside the point.

[7] Absent local law to the contrary, the restatements provide the substantive law of the Virgin Islands. *See* 1 V.I.C. § 4.

[20] C. Modifying Scope of Restrictive Covenant**

Throughout its pleadings, Pueblo has requested that I limit my review of the geographic area covered by the restrictive covenant to the plaintiff's shopping center. Sunny Isle, at oral argument, countered that the law in this jurisdiction prohibits the re-writing of contracts, citing the Territorial Court's opinion in *Virgin Islands Diving Schools/ Supplies, Inc. v. Dixon, 20 V.I. 54 (Terr. Ct. 1983)*. Despite plaintiff's claims to the contrary, the law in this jurisdiction does not bar the modification of restrictive covenants and I will therefore amend the lease provision to make it reasonably apply to the facts of this case.

HN15[] Although *section 7.2 of the Restatement (Second) of Property, Landlord & Tenant* ["Restatement"] recognizes the validity of non-competition agreements and provides a tenant remedies for a landlord's breach of its promise not to lease space to a competitor of the tenant, [8] it acknowledges instances where all or part of the restrictive covenant may be invalid. In those situations, however, the Restatement permits, where possible, the reformation of the agreement to carry out the intent of **[**21]** the parties and to protect the tenant's interests against competition. *See* *RESTATEMENT (SECOND) OF PROPERTY, LANDLORD & TENANT, § 7.2 cmt. b*. For example, *comment b of section 7.2* provides that

> the promise of the landlord may be invalid because the restriction on competition is to go on for too long a period of time, or because it relates to too broad an area, or because it restricts the landlord from entering businesses that do not compete with the tenant. In those cases, if the promise is severable and hence valid for a shorter period of time, or in relation to a less broad area, or in regard to competition with certain businesses, and such validity gives reasonable protection to the tenant against competition, the severed invalid portion is disregarded in applying the rule of this section. In this situation, no one is engaging in a competing business as long as there is performance within the revised limits of the promise.

[*614] *See id.* (emphasis added). Thus, the Restatement clearly acknowledges a court's ability to amend the terms of a restrictive covenant. Whether or not the Territorial Court chose to reform the contract in *Dixon* is neither binding **[**22]** on this Court nor dispositive of the issue.

Moreover, I note that the Restatement's approach is in line with what other courts have done when faced with restrictive covenants. *See* *Unihealth v. U.S. Healthcare, 14 F. Supp. 2d 623, 639 (D.N.J. 1998)* (noting the right of court's to "fashion an equitable remedy by modifying" a restrictive covenant"); *Hillard v. Medtronic, Inc., 910 F. Supp. 173, 177 (M.D. Pa. 1995)* (noting that Pennsylvania law allows its courts to reform and enforce restrictive covenants). In particular, ***HN17***[] the First Circuit Court of Appeals has detailed three approaches a court has at its disposal when dealing with potentially unreasonable restrictive covenants. One method, the "all or nothing" approach, is to void the restrictive covenant in its entirety **[**23]** if any provision of the agreement is unenforceable. *See* *Ferrofluidics Corp. v. Advanced Vacuum Components, Inc., 968 F.2d 1463, 1469 (1st Cir. 1992)* Another method, known as the "blue pencil" approach, permits a court to excise the unreasonable provision from an agreement and enforce the restrictive covenant so long as the covenant remains grammatically coherent. *See id.* The final approach, known as "partial enforcement," enables the court to modify the terms of the restrictive covenant to make the agreement reasonable unless "the circumstances indicate bad faith or deliberate overreaching on the part of the [parties to the contract]." *See id.* [9]

I reject the "all or nothing" approach and find that I can "blue pencil" paragraph 10 to render it reasonable in scope and yet still grammatically coherent. As noted above, paragraph 10 of the lease provides in part:

---

[8] *RESTATEMENT (SECOND) OF PROPERTY, LANDLORD & TENANT, § 7.2* (noting that ***HN16***[] a tenant may terminate the lease upon the landlord's breach and recover damages or continue the lease and obtain equitable and legal relief).

[9] The Restatement has acknowledged these three approaches in the Reporter's Note to *Section 7.2*. *See* *id. at 256-58*.

> During **[**24]** the term of this lease and any extension thereof the Landlord shall not use nor permit to be used any other part of the shopping center **or** any other property directly or indirectly owned or controlled by the Landlord within a radius of five miles of the shopping center for the sale of food for consumption off premises[.]

The agreement thus first prohibits Sunny Isle from permitting any of its tenants to sell food for off-premises consumption within the shopping center. It then goes on to prohibit such sales on any of Sunny Isle's properties within five miles of the shopping center. These two clauses are separate and severable. I find that the prohibition on allowing other tenants to sell food for off-premises consumption within the Sunny Isle Shopping Center itself does not unreasonably restrict competition. *See* *J.C. Penney Co. v. Giant Eagle, Inc., 813 F. Supp. 360 (W.D. Pa. 1992)*, *aff'd, 995 F.2d 217 (3d Cir. 1993)*, *permanent inj. aff'd,* *85 F.3d 120 (3d Cir. 1996)* Since this is the only area covered by paragraph 10 that is factually before me, I need not reach the reasonableness of the restriction as extended **[**25]** to the five-mile area outside the shopping center. Applying my blue pencil to accommodate the facts of this case, paragraph 10 reads as follows:

> During the term of this lease and any extension thereof the Landlord shall not use nor permit to be used any other part of the shopping center for the sale of food for consumption off premises.

As this amended language is grammatically coherent and gives reasonable protection **[*615]** to Pueblo against competition as contemplated by the parties at the time the lease was executed, I will uphold the validity of the restrictive covenant as confined to the Sunny Isle Shopping Center.

III. CONCLUSION

Sunny Isle has no standing to bring its antitrust claim because it is neither a competitor nor consumer in the relevant market. Therefore, I will dismiss Count I of plaintiff's complaint. Counts II and V, however, will remain as genuine issues of material fact exist. Finally, I will limit the scope of paragraph 10 of the lease to the Sunny Isle Shopping Center itself.

Opinion by: HALLER

Opinion

Richard Wallis brought a *Business and Professions Code section 17200* action against two corporations and several individuals, alleging defendants committed labor law and antitrust violations. After granting summary adjudication on the antitrust claims and a nonsuit on the labor law claims, the court entered judgment in defendants' favor. Wallis contends the court erred in granting the summary adjudication and in granting the nonsuit. We reject these contentions, and affirm the judgment.

FACTUAL AND PROCEDURAL SUMMARY

Richard Wallis filed a complaint against two California **[*2]** businesses: (1) Giromex, Inc., a company that provides electronic transfer of funds between the United States and Mexico; and (2) Casas De Cambio El Gallo (Casas), a company that provides check cashing and other financial services and serves as Giromex's agent for purposes of the electronic fund transfers. Wallis also named as defendants three of Giromex's officers and directors. Wallis alleged two causes of action: (1) Giromex violated labor laws in failing to pay overtime pay and in hiring undocumented workers; and (2) Giromex and Casas engaged in unlawful price fixing and failed to provide proper disclosure of prices and exchange rates. Wallis brought the action exclusively under *Business and Professions Code section 17200* (*section 17200*) because his standing to assert the violations was based solely on his status as a representative of the general public.

Defendants moved for summary judgment on both causes of action.

The court denied the motion with respect to the alleged labor law violations, but granted summary adjudication on the allegations regarding price fixing and proper rate disclosures. With respect to the price fixing/disclosure issues, the court based its ruling **[*3]** on three alternative grounds: (1) the evidence established that Giromex owns a controlling interest in Casas, and therefore the entities are not sufficiently separate to come within the proscription of the antitrust price fixing laws; (2) the undisputed evidence established that defendants complied with applicable laws and disclosure requirements; and (3) Wallis failed to provide evidence to show the parties engaged in price fixing.

The court then conducted a trial on Wallis's cause of action claiming Giromex violated labor laws relating to overtime wages and undocumented workers. After Wallis's counsel presented Wallis's entire case which consisted of the brief testimony of two witnesses, the court granted defendants' motion for nonsuit. In a written order, the court stated that: "1. The plaintiff has not presented any evidence to establish that there were any employees of [defendants] with improper immigrant status. [P] 2. The plaintiff has not presented any evidence to establish that [defendants] have not paid overtime wages to any of [defendants'] employees."

Based on its summary adjudication and nonsuit rulings, the court entered final judgment in defendants' favor. **[*4]** Wallis appeals.

DISCUSSION

I. *Summary Adjudication*

A. *Price Fixing Cause of Action*

In his complaint, Wallis alleged that Giromex and Casas entered into an agreement to fix prices charged for the electronic transfer of money from the United States to Mexico and the applicable exchange rate. Wallis claimed this conduct constituted an unlawful restraint of trade in violation of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) and therefore violated California's unfair competition law (*§ 17200*).

In moving for summary judgment, defendants argued Wallis could not prevail on this claim because Giromex is not subject to antitrust laws for entering into price agreements with its subsidiary. In support, defendants presented the declaration of Giromex's president, stating that Casas is a subsidiary of Giromex and Giromex owns a "controlling interest" in Casas. Based on this evidence, defendants argued that the two entities are not independent economic actors and therefore they did not engage in improper or illegal price fixing as a matter of law. In response, Wallis did not proffer any evidence to show Giromex and Casas are independent actors, but instead argued **[*5]** that defendants did not meet their summary judgment burden on this issue. Wallis reasserts this argument on appeal.

Applicable Law

An indispensable element of any action for a Cartwright Act violation is proof of a "combination of resources of two or more *independent interests* for the purpose of restraining competition and preventing market competition." (*GHII v. MTS (1983) 147 Cal. App. 3d 256, 266, 195 Cal. Rptr. 211*, italics added; see *Bus. & Prof. Code, § 16720*.) Thus, a plaintiff must plead and prove an illegal combination between two *separate* entities. (*Freeman v. San Diego Assn. of Realtors (1999) 77 Cal.App.4th 171, 189* (*Freeman*).)

In interpreting analogous federal ***antitrust law***, the courts focus on the substance, rather than the form, of the relationship in determining whether two entities are separate and therefore prohibited from engaging in anticompetitive behavior. (*Copperweld Corp. v. Independence Tube Corp. (1984) 467 U.S. 752, 772-773, 81 L. Ed. 2d 628, 104 S. Ct. 2731* (*Copperweld*).) Under this functional approach, "whether separate entities are present requires analysis not of the corporate **[*6]** formalities but of the economic realities under which the entities operate . . . . The mere existence of separate incorporated entities does not automatically suffice to show that these entities are capable of combining; instead the entities must have separate and independent interests that are combined by the unlawful conspiracy." (*Freeman, supra, 77 Cal.App.4th at p. 189*; see *Copperweld, supra, 467 U.S. at pp. 770-771*; *City of Mt. Pleasant, Iowa v. Assoc. Elect. Co-op. (8th Cir. 1988) 838 F.2d 268, 275*.) In *Freeman*, this court applied Copperweld's "economic realities" test to analyze the separate entity issue under a state Cartwright Act claim. (*Freeman, supra, 77 Cal.App.4th at pp. 189-194*; accord, *Lake Communications, Inc. v. ICC Corp. (9th Cir. 1984) 738 F.2d 1473, 1480*, overruled on other grounds by *Nghiem v. NEC Electronic, Inc. (9th Cir. 1994) 25 F.3d 1437, 1442*.) [1]

[*7] Wallis contends that even assuming *Copperweld*'s analysis should be applied to a state antitrust claim, defendants failed to meet their summary judgment burden to show that Giromex and Casas are not separate entities because defendants' supporting declaration merely states that Giromex owns a "controlling interest" in Casas.

In *Copperweld*, the United States Supreme Court held that a parent and *wholly owned* subsidiary could not conspire with one another for purposes of the antitrust laws because the two entities have "a complete unity of interest" and "common" objectives. (*Copperweld, supra, 467 U.S. at p. 771*.) The court reasoned that the antitrust laws are intended to prevent "two or more entities that previously pursued their own interests separately [from] combining to act as one for their common benefit," but coordinated action between a parent and wholly owned subsidiary does not pose this same risk because "there is no sudden joining of economic resources that had previously served different interests . . . ." (*Id. at pp. 769-771*.)

Although no California court has yet addressed the issue, several federal courts have since applied **[*8]** *Copperweld*'s reasoning to conclude that the antitrust laws are inapplicable to a parent and subsidiary even if the subsidiary is not wholly owned. (See, e.g., *Coast Cities Truck Sales, Inc. v. Navistar Internat. Transportation Co. (D. N.J. 1995) 912 F. Supp. 747, 764-766* (*Coast Cities*); *Siegel Transfer, Inc. v. Carrier Express, Inc. (3rd Cir. 1995) 54 F.3d 1125, 1131-1135* (*Siegel Transfer*); *Williams v. I.B. Fischer Nevada (9th Cir. 1993) 999 F.2d 445, 447*; *Bell Atlantic Business Systems v. Hitachi Data Systems Corp. (N.D. Cal. 1994) 849 F. Supp. 702, 707* (*Bell Atlantic*); but see *Aspen Title & Escrow, Inc. v. Jeld-Wen, Inc. (D. Or. 1987) 677 F. Supp. 1477*; see generally Comment, *Partial Ownership of Subsidiaries, Unity of Purpose, and Antitrust Liability* (2001) *68 U.Chi.L.Rev. 1401*.) Although these courts have not always expressed consistent reasoning, the essential logic underlying their holdings is the idea that even where a parent does not wholly own a subsidiary, the parent's legal control over the subsidiary means that the parent can assert full control over the **[*9]** subsidiary if the subsidiary ceases to act in the parent's best interest and, therefore, the essential factors of "unity of interest" and "common corporate consciousness" will necessarily be present despite the lack of a 100 percent ownership. (See *Bell Atlantic, supra, 849 F. Supp. at pp. 705-706*.)

Analysis

Under these principles, defendants argue that they met their summary judgment burden because a "controlling interest" in a corporation is equivalent to legal control over the entity. Wallis counters that because it is the substance, and not the form, of the relationship that determines the question whether corporate entities are sufficiently independent for antitrust purposes, the inquiry is necessarily a factual one that cannot be decided on a

---

[1] Though recognizing that the federal ***antitrust law*** (the Sherman Act) is not always directly probative of the legislative intent underlying the Cartwright Act, California courts frequently look to judicial interpretations of the Sherman Act as helpful authority because of the similarity in language and purpose in the federal and state statutes. (*Morrison v. Viacom, Inc. (1998) 66 Cal.App.4th 534, 541, fn. 2*.)

summary judgment, particularly in this case where defendants made only a minimal and conclusory factual showing.

We agree the separate entity issue may be affected by numerous factors in addition to a corporation's legal control of its subsidiary, such as the actual relationship between the parent and subsidiary, the makeup of the parent's and subsidiary's boards of directors, and the contractual obligations **[*10]** and economic incentives between the two entities. (See *Coast Cities*, *supra*, 912 F. Supp. 2d at p. 765 [applying a factual analysis]; but see *Bell* *Atlantic, supra, 849 F. Supp. at p. 706* [holding it unnecessary to conduct a factual inquiry if the facts show parent has legal control of its subsidiary].) However, after consideration of the entire record in this case, we conclude defendants met their initial summary judgment burden to show Giromex and Casas were not separate entities for purposes of antitrust liability. Based on persuasive federal authority, the fact that Giromex owns a controlling interest in Casas shows that Giromex can legally control its subsidiary, and therefore that the interests of the two companies are sufficiently aligned to be exempt from antitrust liability. (*Bell Atlantic, supra, 849 F. Supp. at p. 706*.) Once defendants proffered the evidence showing that Giromex had legal--and therefore actual--control of its subsidiary, it was Wallis's burden to come forward with facts showing that the two entities should be treated as separate for purposes of the antitrust laws. Although Wallis had full opportunity to **[*11]** conduct discovery and come forward with evidence creating a triable issue of fact showing the two corporations are separate, he failed completely to do so. On this record, the court properly granted summary adjudication on the price-fixing claim.

This conclusion is bolstered when we examine Wallis's pleading, which is the necessary framework for analyzing a summary judgment motion. (See *Brantley v. Pisaro (1996) 42 Cal.App.4th 1591, 1602*.) In *Freeman*, this court applied well-settled pleading rules to hold that a complaint asserting a Cartwright Act violation must allege specific facts supporting the claim that the two allegedly offending entities are functionally separate. (*Freeman, supra, 77 Cal.App.4th at pp. 192, fn. 21* & 196.) However, not only did Wallis fail to assert these allegations, he affirmatively alleged that Casas was Giromex's agent for purposes of the activity claimed to be wrongful--fixing prices for electronic transfers.

This agency allegation is fatal to Wallis's antitrust claim. It is well settled that a conspiracy for purposes of the antitrust laws does not occur if the two alleged coconspirators stand in a principal-agent relationship **[*12]** for purposes of the alleged illegal acts. (See *Siegel Transfer, supra, 54 F.3d at p. 1135*; *Palmer v. Gotta Have It Golf Collectibles, Inc. (S.D.Fla. 2000) 106 F. Supp. 2d 1289, 1299-1301*; see also *Black v. Bank of America (1994) 30 Cal.App.4th 1, 4-6*.) Although an exception to this rule may exist where the agent is acting "'for personal reasons'" (*Siegel Transfer, supra, 54 F.3d at p. 1135*), this exception does not apply here because Wallis never alleged that Casas was acting to further its own economic interests to benefit from the alleged restraint. To the extent Wallis now attempts to argue that Giromex and Casas were not in fact engaged in an agency relationship with respect to the alleged wrongful conduct, a party may not successfully oppose a summary judgment by contradicting the allegations of his pleadings, particularly where the party has not moved to amend its complaint and has not come forward with any facts to support those new and inconsistent theories. (See *Brown v. City of Fremont (1977) 75 Cal. App. 3d 141, 146, 142 Cal. Rptr. 46*.)

A "party moving for summary judgment bears the **[*13]** burden of persuasion that there is no triable issue of material fact and that he is entitled to judgment as a matter of law." (*Aguilar v. Atlantic Richfield Co. (2001) 25 Cal.4th 826, 850* (*Aguilar*).) A defendant satisfies this burden by showing "'one or more elements of' the 'cause of action' . . . 'cannot be established,' or that 'there is a complete defense'" to that cause of action. (*Ibid*.) Further, in meeting this burden, the defendant may rely on admissions of material fact made in the opposing party's pleadings. (*24 Hour Fitness, Inc. v. Superior Court (1998) 66 Cal.App.4th 1199, 1211*.) "'Once the defendant . . . has met that burden, the burden shifts to the plaintiff . . . to show that a triable issue of one or more material facts exists as to that cause of action or a defense thereto.'" (*Aguilar, supra, 25 Cal.4th at p. 849*.)

Applying these principles on a de novo review of the record, we conclude defendants satisfied their burden of persuasion to show the Cartwright Act's price-fixing prohibitions do not apply to Giromex and its subsidiary, and

Wallis failed to meet his burden to show a triable issue of fact on this issue. **[*14]** Thus, the trial court properly granted summary adjudication on this claim. [2]

B. *Alleged Disclosure Violations*

Wallis next argues the trial court erred in granting summary adjudication on his claim that defendants violated antitrust laws and applicable statutes when defendants failed to fully disclose rate information to electronic fund transfer **[*15]** customers.

In his complaint, Wallis alleged defendants improperly inflated the amounts charged for electronic transfer of money because they failed to disclose the "actual rate" at which the dollars and pesos were exchanged.

In moving for summary judgment on this claim, defendants presented the declaration of Giromex's president, Juan Lebrija, who stated:

"[Giromex] engages in the business of receiving money for the purpose [of] its transmittal to foreign countries. [Giromex] is licensed by the California Superintendent of Banks and subject to the regulations of *California Financial Code § 1815*.

"When [Giromex] receives monies from customers in the United States for the purpose of transmittal to Mexico, [Giromex] provides the customer a receipt which describes the rate of exchange for the transaction, the amount of the commission charged for the transmittal, and the net exchange after all fees and commissions have been deducted. The receipt provided to customers reflects the actual exchange rate at which customer's dollars are exchanged for foreign currency. This receipt form has been approved by the California Department of Financial Institutions in accordance with **[*16]** *California Financial Code § 1809*. . . .

"[Giromex] charges a flat fee for the transmission of monies abroad. The flat fee is increased when monies transmitted are in excess of specific amounts. The fees charged by [Giromex] are contained in a published schedule prominently displayed at each branch location.

"[Giromex] daily calculates exchange rates for the transmittal of funds abroad. The calculation of exchange rates is based on the daily market rate, competitors' rates, and other factors. The exchange rate is prominently displayed at each branch location."

This evidence satisfied Giromex's summary judgment burden to show the disclosures and prices charged for electronic transmittal of funds were proper. Lebrija stated that Giromex provides each customer a receipt which describes the rate of exchange for the transaction, the amount of the commission charged for the transmittal, and the net exchange after all fees and commissions have been deducted. Lebrija further stated that the receipt provided to the customers reflects the actual exchange rate at which customers' dollars are exchanged for foreign currency. This evidence was sufficient to show that Wallis could not prove **[*17]** the claim alleged in his complaint that the actual rates were not disclosed to customers. (See *Fin. Code, § 1815*.)

In response to this evidence, Wallis did not come forward with any affirmative facts that showed a failure to disclose. By failing to present any evidence to support his allegations, Wallis failed to meet his summary judgment burden of persuasion. To show the trial court nonetheless erred in granting summary adjudication on this claim, Wallis relies exclusively on *Cellular Plus, Inc. v. Superior Court (1993) 14 Cal.App.4th 1224, 1243-1244* for the proposition that regulatory approval of rates does not immunize companies from price-fixing antitrust liability.

---

[2] We recognize that *section 17200* may apply even when the conduct does not violate a specific statute if the conduct is nonetheless "unfair" or "fraudulent." (*Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 180- 187, 973 P.2d 527*.) However, Wallis has based his *section 17200* claim solely on a Cartwright Act violation, and has never argued defendants' conduct was otherwise unfair or fraudulent. In any event, there is nothing in Wallis's complaint that would support a theory that defendants may be liable for unfair or fraudulent conduct if the alleged price-fixing conduct did not violate antitrust laws.

Although we agree with this principle, it is not helpful to Wallis's position in this case. In moving for summary judgment, defendants did not rely solely on the fact that the applicable regulatory agency had approved their rate disclosures, instead they presented affirmative evidence that they in fact made the proper disclosures. Moreover, unlike *Cellular Plus*, this particular cause of action does not involve price-fixing, rather it concerns the claim that proper disclosures were not made. **[*18]** In such instance, complying with the disclosure requirements of a regulatory agency may at least provide prima facie evidence that disclosures were proper. The burden then shifts to the plaintiff to present some evidence showing that the disclosures made were not proper under the law or were otherwise unfair. Wallis's failure to do so precludes his entitlement to a trial on this issue and therefore supports a summary adjudication on the disclosure claim.

The court properly granted summary adjudication on Wallis's claim asserting violations of antitrust laws and disclosure rules.

II. *Nonsuit*

Wallis next contends the trial court erred in granting a nonsuit on his causes of action relating to Giromex's alleged labor law violations.

Wallis did not attend trial. His counsel called two witnesses: Gloria Peralta and defendant Juan Carlos Lebrija. Peralta, trial counsel's wife, had previously brought an unsuccessful action asserting the same allegations contained in Wallis's complaint.

Peralta testified to the following: She worked for Giromex from October 1998 to April 1999 as a payroll clerk in the accounting department. Peralta entered the payroll information for three employees, **[*19]** Christina Martinez (an accounts receivable clerk), Manuel Aguilera (an accountant), and Nancy Hogg (a cash reconciliation clerk). These employees earned approximately eight to nine dollars an hour and each employee worked "on average" about one to two hours overtime. [3] While Peralta was working for Giromex, the management changed the pay structure from hourly wages to salary for many employees. After she protested this change, Peralta was maintained as an hourly employee and was paid for all of her own overtime work. Peralta testified that when she entered the payroll for the three employees after December 1998, they were not paid time and a half for any overtime hours worked.

The second witness called by Wallis's counsel, defendant Lebrija, testified that Giromex never refused to pay Hogg or Martinez overtime pay for overtime hours worked.

After the two witnesses testified, defendants moved for a nonsuit. The court granted the motion, **[*20]** finding that Peralta's testimony did not establish a basis for relief under *section 17200* because there was no evidence Giromex failed to pay overtime wages to any of its employees or that Giromex had hired any employees with improper immigrant status.

Wallis contends the trial court erred in granting a nonsuit on the overtime pay issue because Peralta testified that the accounting department employees were not paid for overtime work after the company changed the pay structure from hourly wage to an annual salary. However, in support, Wallis cites only to page 12 of the Reporter's Transcript, where Peralta testified that the three identified employees were not paid time and a half for overtime after December 1998 and before March 1999. This evidence is not sufficient to support a finding that those employees in fact worked overtime from December 1998 through March 1999, or that they were not adequately compensated for their time worked. The fact that Peralta testified that "on average" these employees worked one to two hours overtime is not sufficient to show that the employees did so during the three months. The trial court correctly found there was a failure of proof on the overtime **[*21]** pay claim.

With respect to the immigration law issue, Wallis does not dispute that there was insufficient evidence to support this claim, but instead argues that he was improperly precluded from proving this claim because the trial court erred in excluding Peralta's hearsay testimony. During direct examination, Peralta was asked whether she knew how

---

[3] Peralta did not say whether these hours were per week or per month.

employee Miriam Villegas was paid for her work. Peralta answered "by Mexican check." The court granted defendants' motion to strike that answer based on a lack of foundation. Wallis's counsel then asked Peralta whether Villegas ever told Peralta how she was paid for her work. The court sustained a hearsay objection to that question. Peralta apparently would have testified that Villegas said that she was paid by a "Mexican check."

Wallis contends the court erred by excluding the evidence on hearsay grounds because the "testimony was intended to show the operative facts of the offense alleged . . . ." However, the fact that Villegas was paid by a "Mexican check" is not an operative fact of the *section 17200* cause of action. At most it was an evidentiary fact that is potentially relevant to the issue of Villegas's citizenship status. The **[*22]** court did not err in refusing to permit Peralta to testify about something Villegas had told her because there was no applicable hearsay exception. In any event, the alleged error is not prejudicial because, as Wallis admits in his appellate brief, later in her testimony Peralta was permitted to testify that five or six other employees were paid by a check from a Mexican bank. Further, even assuming the fact that Villegas was paid by a "Mexican check," this fact, in and of itself, is insufficient to support a *section 17200* claim.

"'A motion for nonsuit . . . concedes the truth of the facts proved, but denies as a matter of law that they sustain the plaintiff's case. A trial court may grant a nonsuit only when, disregarding conflicting evidence, viewing the record in the light most favorable to the plaintiff and indulging in every legitimate inference which may be drawn from the evidence, it determines there is no substantial evidence to support a judgment in the plaintiff's favor. [Citations.]' [Citation.]" (*Mechanical Contractors Assn. v. Greater Bay Area Assn. (1998) 66 Cal.App.4th 672, 677*, italics omitted.)

Applying these standards on an independent review **[*23]** of the record, we concur in the trial court's conclusion that even assuming the truth of Wallis's evidence, the proffered facts did not support a *section 17200* claim based on the alleged labor law violations. Thus, the court properly granted the nonsuit on this claim.

DISPOSITION

Judgment affirmed. Wallis to bear defendants' costs on appeal.

Summary judgment is appropriate only where, examining the evidence in the light most favorable to the nonmoving party, the record shows that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. In the context of antitrust cases, however, summary judgment is particularly favored because of the concern that protracted litigation will chill pro-competitive market forces. Although all reasonable inferences will be drawn in favor of the non-movant, those inferences must be reasonable in light of competing inferences of acceptable conduct.

HN3[] Burdens of Proof, Movant Persuasion & Proof

In a motion for summary judgment, the burden on the moving party may be discharged by "showing" -- that is pointing out to a district court -- that there is an absence of evidence to support the nonmoving party's case. When the moving party meets this burden, the burden shifts to the nonmoving party to come forward with specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN4[] Sherman Act, Claims

In order to state a claim for monopolization under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, a plaintiff must establish: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN5[] Attempts to Monopolize, Elements

To state an attempted monopolization claim under [§ 2](15 U.S.C.S. § 2) of the Sherman Act, a plaintiff must establish: (1) that a defendant has engaged in predatory or anti-competitive conduct; with (2) a specific intent to monopolize; and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Sherman Act, Claims

For purposes of § 2 (15 U.S.C.S. § 2) of the Sherman Act, a relevant market definition is not a necessary component of a monopolization claim. Monopoly power may be proven by: (1) direct proof of anticompetitive effect; and (2) defining a relevant market and showing excess market share there. A relevant market definition simply serves as a surrogate for market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN10[] Monopolies & Monopolization, Actual Monopolization

The core element of a monopolization claim is market power, which is defined as the ability to raise price by restricting output. The more competition a company faces, the less it can control prices because competitors will undercut its prices to secure market share. Conversely, a company that can exclude competition can sustain its ability to control prices and thereby maintain its market power. The pertinent inquiry in a monopolization claim, then, is whether a defendant has engaged in improper conduct that has or is likely to have the effect of controlling prices or excluding competition, thus creating or maintaining market power. In the absence of direct measurements of a defendant's ability to control prices or exclude competition, however, market power necessarily must be determined by reference to the "area of effective competition" - which, in turn, is determined by reference to a specific, defined "product market."

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN11[] Market Definition, Relevant Market

Defining a relevant market is generally a necessary component of analyzing a monopolization claim. Once a relevant market is determined, a defendant's share in that market can be used as a proxy for market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] Monopolies & Monopolization, Actual Monopolization

For purposes of § 2 (15 U.S.C.S. § 2) of the Sherman Act, a market share between 50 percent and 70 percent can occasionally show monopoly power, but only if other factors support the inference.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13[] **Sherman Act, Claims**

To prove a violation of *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, a plaintiff must show a combination or some form of concerted action between at least two legally distinct economic entities that constituted an unreasonable restraint of trade either per se or under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

Governments > Courts > Judicial Precedent

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

HN14[] **Horizontal Refusals to Deal, Sherman Act**

For purposes of *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, precedent limits the per se rule in the boycott context to cases involving horizontal agreements among direct competitors. The United States Supreme Court decision in NYNEX requires an agreement between or among direct competitors.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN15[] **Antitrust & Trade Law, Sherman Act**

For purposes of *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, a horizontal agreement is a prerequisite in a group boycott case.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN16[] **Antitrust & Trade Law, Sherman Act**

A claim under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, under the rule of reason requires a showing of injury to competition in the relevant market. Where appellate court has failed properly to define the relevant market, there can be no violation of *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, under a rule of reason analysis.

Glazer, The Coca-Cola Company, Atlanta, Ga.; Michael C. Russ, Jeffrey S. Cashdan, King & Spalding, Atlanta, Ga., on the brief), for Defendant-Appellee.

Judges: Before: NEWMAN and KEARSE, Circuit Judges. [*]

Opinion

[*103] PER CURIAM:

Plaintiff-appellant PepsiCo, Inc. ("PepsiCo") appeals from the judgment of the United States District Court for the Southern District of New York (Loretta A. Preska, District Judge), entered September 25, 2000, granting summary judgment in favor of defendant-appellee The Coca-Cola Company ("Coca-Cola") on PepsiCo's claims that (1) Coca-Cola's enforcement of loyalty provisions in its distributorship agreements with independent food service distributors ("IFDs") that prohibit the IFDs from delivering PepsiCo products to any of their customers constitutes monopolization and attempted monopolization in violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2*; and *(2)* the inclusion and enforcement of the loyalty provisions in Coca-Cola's agreements **[*104]** amount to concerted action by Coca-Cola and the IFDs in restraint of trade, in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*. Having thoroughly reviewed the record and the parties' arguments, we affirm the district court's grant of summary judgment in favor of Coca-Cola and, except where noted, adopt the district court's reasoning set forth in its thorough and persuasive opinion. **[**3]** See *PepsiCo, Inc. v. Coca-Cola Co., 114 F. Supp. 2d 243 (S.D.N.Y. 2000)*.

Background

Coca-Cola and PepsiCo, in addition to selling their famous beverages in bottles and cans, sell fountain syrup to numerous customers, including large restaurant chains, movie theater chains, and other "on-premise" accounts. PepsiCo and Coca-Cola bid for agreements to supply fountain syrup and negotiate a price directly with the customer, and then pay a fee to a distributor to deliver the product. Historically, PepsiCo delivered fountain syrup primarily through bottler distributors; Coca-Cola delivered fountain syrup through bottler distributors as well as IFDs, who can offer customers one-stop shopping for all of their restaurant supplies. In the late 1990s, PepsiCo decided it

[*] Honorable John M. Walker, Jr., Chief Judge of the United States Court of Appeals for the Second Circuit, originally a member of the panel, recused himself after oral argument, and the appeal is being disposed of by the remaining members of the panel, who are in agreement. See Second Circuit Local Rule § 0.14(b); Murray v. Nat'l Broad. Co., 35 F.3d 45, 47, 48 (2d Cir.1994).

wanted to start delivering fountain syrup via IFDs, but when it sought to do so, Coca-Cola began to enforce the so-called "loyalty" or "conflict of interest" policy contained in its agreements with IFDs, which provides that distributors who supply customers with Coca-Cola may not "handle[] the soft drink products of [PepsiCo]." *PepsiCo, 114 F. Supp. 2d at 245*. IFDs who breach the loyalty **[**4]** policy risk termination by Coca-Cola. As the district court observed, "a distributor subject to the loyalty policy can supply all its customers with either Pepsi or Coke, not both. Because distributors are given an all or nothing choice, a customer of a distributor subject to Coca-Cola's loyalty policy who wants Pepsi will have to go elsewhere to get it." *Id. at 245-46*.

PepsiCo filed this antitrust complaint alleging that the loyalty provisions constituted an illegal monopolization and attempted monopolization under *Section 2* of the Sherman Act. Pepsico later amended its complaint to add a claim that Coca-Cola and the IFDs had entered into an illegal horizontal conspiracy to restrain trade, in violation of *Section 1* of the Sherman Act.

The district court denied Coca-Cola's motion to dismiss, finding that PepsiCo's allegations, if supported by evidence, could make out a monopolization claim. Following eighteen months of aggressive discovery, however, the district court granted Coca-Cola's motion for summary judgment, largely on the basis that PepsiCo had failed to introduce sufficient evidence on any of its claims to raise a triable issue. *Id. at 245, 258 n.7*. **[**5]** This appeal followed.

Discussion

I. Legal Standard

HN1[] We review the district court's grant of summary judgment de novo. *Beckford v. Portuondo, 234 F.3d 128, 130 (2d Cir. 2000)* (per curiam). ***HN2***[] Summary judgment is appropriate only where, "examining the evidence in the light most favorable to the nonmoving party," *Adjustrite Sys., Inc. v. Gab Bus. Servs., Inc., 145 F.3d 543, 547 (2d Cir. 1998)*, the record shows "that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law," *Fed. R. Civ. P. 56(c)*. In the context of antitrust cases, however, summary judgment is particularly favored because of the concern that protracted litigation will chill pro-competitive market forces. See *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 95 **[*105]** (2d Cir. 1998)*. Although all reasonable inferences will be drawn in favor of the non-movant, those inferences "must be reasonable in light of competing inferences of acceptable conduct." Id.

Moreover, as noted by the district court, ***HN3***[] "'the burden on the moving party may be discharged by "showing" -- that is pointing out to the district **[**6]** court -- that there is an absence of evidence to support the nonmoving party's case.'" *PepsiCo, 114 F. Supp. 2d at 247* (quoting *Celotex Corp. v. Catrett, 477 U.S. 317, 325, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*; see also *Goenaga v. March of Dimes Birth Defects Found., 51 F.3d 14, 18 (2d Cir. 1995)* ("In moving for summary judgment against a party who will bear the ultimate burden of proof at trial, the movant's burden will be satisfied if he can point to an absence of evidence to support an essential element of the nonmoving party's claim."). When the moving party meets this burden, the burden shifts to the nonmoving party to come forward with "specific facts showing that there is a genuine issue for trial." *Fed. R. Civ. P. 56(e)*.

II. *Section 2* of the Sherman Act

As noted by the district court, ***HN4***[] in order to state a claim for monopolization under *Section 2* of the Sherman Act, a plaintiff must establish "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic **[**7]** accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; see *Clorox Co. v. Sterling Winthrop, Inc., 117 F.3d 50, 61 (2d Cir. 1997)*. ***HN5***[] To state an attempted monopolization claim, a plaintiff must establish "(1) that the defendant has engaged in predatory or anti-competitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*; *Tops Mkts., 142 F.3d at 99-100*.

A. The Relevant Market

HN6[] As an initial matter, it is necessary to define the relevant product and geographic market Coca-Cola is alleged to be monopolizing. See *AD/SAT v. Associated Press, 181 F.3d 216, 226 (2d Cir. 1999)*; cf. *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. The parties do not dispute that the relevant geographic market is the United States. *HN7*[] A relevant product market consists of "products that have reasonable interchangeability for the purposes for which they are produced **[**8]** -- price, use and qualities considered." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 404, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)* ("du Pont"). Products will be considered to be reasonably interchangeable if consumers treat them as "acceptable substitutes." *FTC v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 46 (D.D.C. 1998)* ("The relevant market consists of all of the products that the Defendants' customers view as substitutes to those supplied by the Defendants.").

In its complaint, PepsiCo defined the relevant market as the "market for fountain-dispensed soft drinks distributed through [IFDs] throughout the United States." Pepsico sought to narrow this market definition on summary judgment by confining it to customers with certain characteristics, specifically "large restaurant chain accounts that are not 'heavily franchised' with low fountain 'volume per outlet.'" *PepsiCo, 114 F. Supp. 2d at 246*. The district court rejected this definition on the grounds that 1) it was not substantiated **[*106]** by the evidence; and 2) it was not supported by the practical indicia enunciated in Brown Shoe.

Reviewing the evidence submitted **[**9]** on summary judgment, the district court held that fountain syrup delivered by bottler distributors was an "acceptable substitute" for fountain syrup delivered by IFDs - and thus had to be included in the relevant product market - because none of the numerous customers who were deposed or submitted affidavits for the summary judgment motion said that the availability of delivery via IFDs was determinative of its choice of fountain syrup. See *id. at 250*. Tellingly, in PepsiCo's own survey of 99 major customers, the availability of one-stop-shopping IFDs was ranked 35 out of 38 in importance among various factors they considered in choosing a fountain syrup. See *id. at 252*. PepsiCo's internal strategy documents, moreover, repeatedly explain that Coca-Cola has several advantages over PepsiCo in the fountain syrup business, only some of which relate to flexible delivery methods.

The district court also rejected PepsiCo's argument that the relevant market should be confined to certain customers, an argument the district court characterized as "PepsiCo['s attempt] to define the elements of the relevant market to suit its desire for high Coca-Cola market **[**10]** share, rather than letting the market define itself." *Id. at 249*. The district court found that, although the affidavits and exhibits submitted on the summary judgment motion showed that many customers have a preference for receiving fountain syrup through IFDs because of the advantages provided by one-stop-shopping, these customers did not constitute a discrete group, but rather were included in various groups of fountain syrup customers. *Id. at 250*. Indeed, franchisees, a group PepsiCo sought to exclude from the market definition, purchased 63 percent of the Coca-Cola fountain syrup delivered by IFDs. See *id. at 257*. Identical types of customers expressed preferences for either IFDs or bottler distributors, and most customers stated that method of delivery was simply one of several non-determinative factors they considered in deciding which fountain syrup to stock. [1] See *id. at 250*. We agree with the district court that PepsiCo failed to provide evidentiary support for its market definition restricted by distributor and customer.

[11]** The district court's second basis for rejecting PepsiCo's argument that bottler distributors should not be included in the relevant market was that none of *HN8*[] the "practical indicia" enunciated in *Brown Shoe, 370 U.S.*

---

[1] PepsiCo, citing *AD/SAT, 181 F.3d at 228*, maintains that fountain syrup delivered by IFDs is the relevant market if enough customers have sufficient preference for that product to raise prices "significantly above the competitive level," despite the fact that others might shift to substitutes at supracompetitive prices. PepsiCo also contends that none of the many customers who continue to use or have recently converted to bottler distributors for delivery of fountain syrup, such as Au Bon Pain, Arthur Treacher's, Sbarros, Hard Rock Cafe, Planet Hollywood, and major franchise groups of Wendy's, Arby's, and Subways, are "similarly situated" to the type of customer that prefers systems distribution. Although this argument, in theory, may have merit, we agree with the district court that PepsiCo failed to adduce evidence to support its application in this case.

at 325, for determining the existence of a separate submarket would support a finding that fountain syrup delivered by IFDs constitutes a separate submarket. Those indicia are: (1) unique production facilities; (2) specialized vendors; (3) distinct customers; (4) sensitivity to price changes; (5) industry or public recognition of the proposed submarket as a separate economic entity; and (6) peculiar characteristics and uses of **[*107]** the product. Id.; see also PepsiCo, 114 F. Supp. 2d at 252-53. With respect to indicia (1) and (2), PepsiCo has not contested the district court's conclusion that fountain syrup delivered by IFDs uses the same production facilities as fountain syrup delivered by other methods and does not require specialized vendors. With respect to indicia (3) through (6), we agree with the district court that they weigh against a finding of a submarket, although we are not as persuaded as was the District Court as to indicium **[**12]** (6). Specifically, the evidence established that there is no discrete class of customers that has such a strong preference for IFDs that it would not consider substitutes if other factors (especially price) changed; the competition between PepsiCo and Coca-Cola demonstrates that there is a high sensitivity to price change between IFD-delivered and bottler-distributor-delivered fountain syrup; and there is no industry recognition of fountain syrup delivered by IFDs as a separate market. See PepsiCo, 114 F. Supp. 2d at 253-54, 257-58. As PepsiCo's former CEO conceded: "Never ever would I think of or refer to a delivery method as a market." See id. at 253. PepsiCo itself stated in its brief that "competition for chain [fountain syrup] business is fought by Coca-Cola and PepsiCo in head-to-head bidding at the retailer level. Once a chain account selects its fountain supplier, the systems distributor acts solely as a conduit, delivering syrup along with the other items the account uses." In short, as the district court observed, "the evidence shows that Coca-Cola viewed PepsiCo as a competitor, and vice versa, and that both they and fountain syrup **[**13]** purchasers viewed systems distribution as a competitive advantage, not a separate market." PepsiCo, 114 F. Supp. 2d at 254. Compare Cardinal Health, 12 F. Supp. 2d at 49 & n.10 (finding submarket of drug wholesalers where defendants' documents showed that they "clearly viewed their economic competition to be from their fellow drug wholesalers, and not from the other sources as suggested by the defendants at trial").

B. Monopoly Power

No doubt disappointed by the district court's rejection of its market definition, PepsiCo argues on appeal that the district court erred in insisting that the relevant market had to be defined before it could determine whether Coca-Cola had monopoly power. PepsiCo points to du Pont, 351 U.S. at 393, and argues that in that case the court rejected the government's definition of the relevant market and, instead, focused on direct evidence of monopoly power, viz. "the power to control prices or exclude competition." Id. at 391; see also id. at 393, 403-04. We agree with PepsiCo that there is authority to support its claim that ***HN9***[↑] a relevant market definition is not a necessary **[**14]** component of a monopolization claim. See, e.g., id. at 391; Tops Mkts., 142 F.3d at 98 (noting that monopoly power "may be proven directly by evidence of the control of prices or the exclusion of competition, or it may be inferred from one firm's large percentage share of the relevant market"); Toys "R" Us, Inc. v. FTC, 221 F.3d 928, 937 (7th Cir. 2000) (noting two ways to prove market power: (1) direct proof of anticompetitive effect and (2) defining a relevant market and showing excess market share there); 2A Phillip E. Areeda, et al., Areeda & Hovenkamp's ***Antitrust Law***, P 531a, at 156 (2002) ("Areeda & Hovenkamp") (stating that a relevant market definition simply serves as a surrogate for market power).

HN10[↑] The core element of a monopolization claim is market power, which is defined as "the ability to raise price by restricting output." Areeda & Hovenkamp, supra, P 501, at 85. The more competition **[*108]** a company faces, the less it can control prices because competitors will undercut its prices to secure market share. See generally id. Conversely, a company that can exclude competition can sustain its ability to control prices **[**15]** and thereby maintain its market power. See id. at 85-86. The pertinent inquiry in a monopolization claim, then, is whether the defendant has engaged in improper conduct that has or is likely to have the effect of controlling prices or excluding competition, thus creating or maintaining market power. [2] In the absence of direct measurements of a defendant's ability to control prices or exclude competition, however, market power necessarily must be determined by reference to the "area of effective competition" - which, in turn, is determined by reference to a specific, defined "product market." Brown Shoe, 370 U.S. at 324; see Areeda & Hovenkamp, supra, P 531a, at 156. Thus, as Coca-Cola points out, numerous cases state that ***HN11***[↑] defining a relevant market is generally a necessary

[2] For a more extensive discussion of these principles, see generally Areeda & Hovenkamp, supra, P 530.

component of analyzing a monopolization claim. Once a relevant market is determined, the defendant's share in that market can be used as a proxy for market power.

[16]** More to the point, however, PepsiCo has failed to adduce direct evidence that Coca-Cola has market power (i.e., that it can control prices or exclude competition). To the contrary, the result of PepsiCo's stepped-up attack on the fountain syrup market resulted in numerous bidding wars between PepsiCo and Coca-Cola. PepsiCo was successful in obtaining several accounts, and in those cases where it lost out to Coca-Cola, it nevertheless forced Coca-Cola to drastically reduce its price and profitability to keep the account. As the district court stated, moreover, it is "most compelling, [that] no customer testified that Coca-Cola's loyalty policy prevented the customer from obtaining Pepsi." *PepsiCo, 114 F. Supp. 2d at 251*.

PepsiCo, relying on *United States v. ALCOA, 148 F.2d 416, 426-27 (2d Cir. 1945)* (L. Hand, J.), asserts that because the cost of IFDs is allegedly lower than bottlers, Coca-Cola - by controlling this distribution channel - has the opportunity to charge supracompetitive prices. We agree with the district court that this argument fails because no evidence was proffered to establish that it is cheaper for Coca-Cola to deliver **[**17]** fountain syrup through IFDs than through other delivery methods. Indeed, the only evidence we have found concerning Coca-Cola's distribution costs indicates that the costs vary depending on geography and volume, and that bottler distribution is actually a cheaper delivery method at higher volumes and/or remote locations. PepsiCo's "proof" that IFDs are cheaper for Coca-Cola is its assertion that IFDs are cheaper for PepsiCo, and that if PepsiCo had access to IFDs, it could lower its prices to its customers. Coca-Cola counters that the lower cost of IFDs for PepsiCo is the result of PepsiCo's recent renegotiation of its bottler distributor contracts, and that before 1997 -- when PepsiCo used bottlers almost exclusively -- bottler distribution was a cheaper delivery method for PepsiCo. PepsiCo has not disputed this allegation.

That PepsiCo could lower prices if it used IFDs does not create a triable issue with respect to whether Coca-Cola charges supracompetitive prices. As the bidding wars show, moreover, Coca-Cola's alleged control of the distribution process **[*109]** has not immunized its prices from PepsiCo's aggressive challenges. We have previously rejected as speculative similar attempts **[**18]** to argue that monopoly power is established by showing that "competitive advantages . . . could have resulted in potentially higher prices," in the absence of proof "that prices were actually higher." *Tops Mkts., 142 F.3d at 96*. Thus, the district court could not have ignored the definition of the relevant market in deciding this case because PepsiCo failed to proffer direct evidence that Coca-Cola has monopoly power or a dangerous probability of achieving it.

In sum, we conclude, as did the district court, that PepsiCo's *Section 2* antitrust claim fails because fountain syrup distributed by IFDs is not a separate submarket. Moreover, PepsiCo has not sought to argue that Coca-Cola has monopoly power in the broader fountain syrup market. Nor could it; according to PepsiCo's own figures, in 1998, the year it filed this lawsuit, IFDs accounted for only 50.2 percent [3] of all fountain syrup deliveries by the three largest suppliers (Coca-Cola, PepsiCo, and Dr. Pepper/Seven-Up), and Coca-Cola had only a 64 percent share of the total fountain syrup sales by these three suppliers. [4] Absent additional evidence, such as an ability to control prices or exclude competition, **[**19]** a 64 percent market share is insufficient to infer monopoly power. See *Tops Mkts., 142 F.3d at 99* (holding that ***HN12***[] "a share between 50% and 70% can occasionally show monopoly power," but only if other factors support the inference); *ALCOA, 148 F.2d at 424* (L. Hand, J.) (expressing doubt that 64 percent market share is enough to constitute a monopoly).

[3] We note that Coca-Cola's figures exclude service distributors that serve only one company's stores (so-called "captive" or "dedicated" distributors) from the IFD category on the ground that, according to Coca-Cola, its loyalty provisions are inapplicable to captive distributors (i.e., because they only carry the fountain syrup their one client purchases). By Coca-Cola's calculations, IFDs accounted for only 32.3 percent of all fountain syrup deliveries in 1998. Because we are reviewing the district court's grant of summary judgment, we use the figures most favorable to PepsiCo. See *Adjustrite Sys., 145 F.3d at 547*.

[4] PepsiCo repeatedly asserts that Coca-Cola has an 80 percent or 84 percent market share, but fails to explain precisely what market it is referring to or how the 80 percent or 84 percent figures were derived.

[20]** Accordingly, we hold that the district court properly granted summary judgment in favor of Coca-Cola on PepsiCo's *Section 2* monopolization and attempted monopolization claims.

III. *Section 1* of the Sherman Act

As the district court noted, ***HN13***[] to prove a *Section 1* violation of the Sherman Act, a plaintiff must show "'a combination or some form of concerted action between at least two legally distinct economic entities' that 'constituted an unreasonable restraint of trade either per se or under the rule of reason.'" *Primetime 24 Joint Venture v. Nat'l Broad. Co., 219 F.3d 92, 103 (2d Cir. 2000)* (quoting *Capital Imaging Assocs. v. Mohawk Valley Med. Assocs., 996 F.2d 537, 542 (2d Cir. 1993))*.

The gist of PepsiCo's *Section 1* claim is that because Coca-Cola assured each of the IFDs that it would uniformly enforce similar loyalty agreements with other IFDs, Coca-Cola's loyalty policy is, in reality, a per se illegal horizontal conspiracy among the IFDs and Coca-Cola to boycott PepsiCo. On appeal, PepsiCo argues that the district court erred by requiring that the *Section 1* violation be "attributable solely" to concerted actions of the IFDs. This **[**21]** argument is based on a misreading of the district court's opinion. In fact, the district court's decision relied on the Supreme **[*110]** Court's admonition that ***HN14***[] "'precedent limits the per se rule in the boycott context to cases involving horizontal agreements among direct competitors.'" *PepsiCo, 114 F. Supp. 2d at 259* (quoting *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 134, 142 L. Ed. 2d 510, 119 S. Ct. 493 (1998))*. The district court properly interpreted NYNEX as requiring "an agreement between or among direct competitors," and found that PepsiCo had failed to adduce any evidence of a horizontal agreement among the IFDs. Id.

The district court correctly rejected PepsiCo's *Section 1* claim on the ground that it failed to proffer sufficient evidence of a horizontal agreement among the IFDs. PepsiCo offered no evidence of direct communications among the IFDs; its "offer of proof" of an agreement was simply that Coca-Cola assured the IFDs that the loyalty policy would be uniformly enforced and encouraged them to report violations. We agree with the district court that this was insufficient evidence of a horizontal agreement to withstand summary judgment.

[22]** In addition, all of the cases relied on by PepsiCo to argue that it established a "hub and spokes" conspiracy are inapposite or distinguishable. Most of these cases concerned price-fixing, see, e.g., *United States v. Parke, Davis & Co., 362 U.S. 29, 32, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960)* (price fixing among drug wholesalers); *Interstate Cir. v. United States, 306 U.S. 208, 214, 83 L. Ed. 610, 59 S. Ct. 467 (1939)* (price-fixing agreement among movie distributors and exhibitors), which is a per se violation regardless of whether the restraint is vertical or horizontal. See *Bus Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 735-36, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)* ("Economic analysis supports the view, and no precedent opposes it, that a vertical restraint is not illegal per se unless it includes some agreement on price or price levels."); *Capital Imaging, 996 F.2d at 543* (noting that "most cases fall outside the[] narrow, carefully demarcated categories held to be illegal per se," such as horizontal and vertical price-fixing, division of a market into territories, certain tying arrangements, **[**23]** and some group boycotts) (citing cases). Contrary to PepsiCo's reading, NYNEX, as discussed above, squarely held that ***HN15***[] a horizontal agreement is a prerequisite in a group boycott case.

The most factually similar case, Toys "R" *Us, Inc. v. FTC, 221 F.3d 928*, is distinguishable for several reasons. First, whereas here we are dealing with exclusive distributorships - which are presumptively legal - Toys "R" Us involved a demand by Toys "R" Us of the top ten toy manufacturers that they refuse to sell certain toys to warehouse clubs. *Id. at 931-32*. Thus, unlike here, the established effects of the Toys "R" Us agreement was to limit output (because the warehouse clubs could not obtain the same products from other sources) and to protect Toys "R" Us from competitive prices, both clearly proscribed anticompetitive effects. *Id. at 936, 937*; see generally Areeda & Hovenkamp, supra, P 530. In addition, the court's bases for holding that a horizontal agreement had been established were that: the manufacturers abruptly shifted their practice of selling to the warehouse clubs; there was direct evidence of communication among the manufacturers; **[**24]** and there was evidence that they only agreed to the demand on the condition that their competitors also agree to go along with it. *Id. at 932-33, 935-36*. Such strong evidence of a horizontal agreement is lacking here. Finally, but we believe significantly, although there was more evidence of a horizontal agreement in Toys "R" Us than here, the court in that case repeatedly pointed out that the evidence could be viewed either way, **[*111]** but that the court was obliged to affirm because the applicable standard of review was the highly deferential "substantial evidence" of agency review. *Id. at 930, 934-35*. Viewing Toys "R" Us as representing a minimum evidentiary threshold, we conclude that the district court correctly determined that PepsiCo failed to create a jury issue as to a per se *Section 1* violation.

Nor is there any basis to conclude that PepsiCo has adequately supported ***HN16***[] a *Section 1* claim under the rule of reason. Such a claim requires a showing of injury to competition in the relevant market. See *Capital Imaging Assocs., 996 F.2d at 543*. The district court concluded that "because PepsiCo has failed properly to define the **[**25]** relevant market here, there can be no *Section 1* violation under a rule of reason analysis." *PepsiCo, 114 F. Supp. 2d at 259*. PepsiCo half heartedly argues that it has established a *Section 1* violation under the rule of reason because a jury could find that the only purpose and effect of the loyalty provisions was to restrict price and output. This argument fails under the reasoning ofCDC Technologies, discussed above, because PepsiCo clearly has access to alternative distribution channels. Indeed, PepsiCo has not disputed Coca-Cola's assertions that (1) Coca-Cola has agreements with only 377 out of more than 2000 IFDs; (2) PepsiCo previously owned one of the largest IFDs, but sold it in 1997, the very year it chose to switch to IFDs; (3) PepsiCo has not attempted to use any of the remaining IFDs; and (4) PepsiCo's difficulty in using IFDs and its expense in using bottler distributors is due at least in part to its unique relationship with its bottler distributors and to certain restrictions imposed by them when PepsiCo renegotiated their contracts in 1997. Moreover, Coca-Cola's exclusive distributorships are short in duration and terminable at will, and PepsiCo **[**26]** has failed to demonstrate any significant anticompetitive effect on the price or output of fountain syrup. See *CDC Techs., Inc. v. IDEXX Lab., Inc., 186 F.3d 74, 79-81*.

Conclusion

For the foregoing reasons, the judgment of the district court is affirmed.

End of Document

Wal-Mart Stores v. Rodriguez

United States District Court for the District of Puerto Rico

December 26, 2002, Decided ; December 26, 2002, Filed

Civil No. 02-2778(PG)

Reporter

238 F. Supp. 2d 395 *; 2002 U.S. Dist. LEXIS 25228 **; 2003-1 Trade Cas. (CCH) P73,976

WAL-MART STORES, INC., WAL-MART PUERTO RICO, INC., SUPERMERCADOS AMIGO, INC., Plaintiffs, v. ANABELLE RODRIGUEZ, in her Personal and Official capacity as SECRETARY OF JUSTICE OF THE COMMONWEALTH OF PUERTO RICO, Defendant.

Subsequent History: Motion denied by *Wal-Mart Stores, Inc. v. Rodriguez, 238 F. Supp. 2d 423, 2003 U.S. Dist. LEXIS 437 (D.P.R., 2003)*

Prior History: *Wal-Mart Stores, Inc. v. Rodriguez, 236 F. Supp. 2d 200, 2002 U.S. Dist. LEXIS 24611 (D.P.R., 2002)*

Disposition: [1]** Plaintiffs' request for preliminary injunction granted. Defendant Anabelle Rodriguez, Secretary of Justice of the Commonwealth of Puerto Rico, her lawyers, agents, employees, or any other person acting in concert with her enjoined.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN1[] **Injunctions, Preliminary & Temporary Injunctions**

There are four elements necessary to grant injunctive relief: (1) there must be a substantial likelihood of success on the merits; (2) the preliminary injunction must be necessary to prevent irreparable injury; (3) the threatened harm must outweigh the harm a preliminary injunction would inflict on the nonmovant; and (4) the preliminary injunction would serve the public interest. *Fed. R. Civ. P. 65*. The sine qua non of that formulation is whether the plaintiff is likely to succeed on the merits.

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Constitutional Law > ... > Commerce Clause > Interstate Commerce > General Overview

Transportation Law > Interstate Commerce > Federal Powers

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN2[] **Interstate Commerce, State Powers**

Aside from its role as a power-allocating provision giving Congress pre-emptive authority over the regulation of interstate commerce, the *Commerce Clause* also serves as a substantive restriction on permissible state regulation of interstate commerce. Under this negative command, known as the dormant *Commerce Clause*, states are prohibited from acting in a manner that burdens the flow of interstate commerce. Thus, when a state statute discriminates against interstate commerce, courts scrutinize such actions under a virtually per se invalid rule. These statutes are routinely struck down, unless the state can show a legitimate local purpose that cannot be adequately served by reasonable nondiscriminatory alternatives.

Business & Corporate Law > Foreign Corporations > General Overview

Transportation Law > Interstate Commerce > Federal Powers

Civil Rights Law > Protection of Rights > Section 1983 Actions > Scope

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Transportation Law > Interstate Commerce > Per Se Invalidity

HN3[] **Business & Corporate Law, Foreign Corporations**

Statutes pursuing "simple protectionism" are subject to this per se rule of invalidity. Economic protectionism can be proved by showing that either in its effects or purpose, a statute implements differential treatment between in-state and out-of-state commercial entities. Thus, the *Commerce Clause* forbids states from benefitting in-state economic interests by burdening out-of-state competitors or from building up their domestic commerce by means of unequal and oppressive burdens upon the industry and the business of other states. When facing such economic protectionism, the standards for proving a legitimate local purpose are onerous. The *Commerce Clause*, however, is not merely a grant of authority to Congress. The United States Supreme Court has declared that the *Commerce Clause* is intended to benefit those who are engaged in interstate commerce. The Court believes that every consumer may look to the free competition from every producing area in the nation to protect him from exploitation by any. Thus, the Court has recognized that plaintiffs as market participants indeed have a cause of action under *42 U.S.C.S. § 1983* for violations under the *Commerce Clause*.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

HN4[] **Commerce Clause, Dormant Commerce Clause**

Puerto Rico is subject to the constraints of the dormant *Commerce Clause* doctrine in the same fashion as the states.

Antitrust & Trade Law > Consumer Protection > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

HN5[] **Antitrust & Trade Law, Consumer Protection**

The antitrust laws are intended to protect competition and not competitors, or suppliers, distributors and manufacturers for that matter.

Business & Corporate Law > Foreign Corporations > General Overview

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Transportation Law > Interstate Commerce > Per Se Invalidity

HN6[] **Business & Corporate Law, Foreign Corporations**

With regard to the *Commerce Clause*, protectionism itself, or promoting in-state business by discriminating against out-of-state participants, is not a legitimate state interest.

Constitutional Law > Equal Protection > Nature & Scope of Protection

Constitutional Law > Equal Protection > General Overview

HN7[] **Equal Protection, Nature & Scope of Protection**

The *Equal Protection Clause* commands that no state shall deny to any person within its jurisdiction the equal protection of the laws, which is essentially a direction that all persons similarly situated should be treated alike. U.S. Const. amend. XIV, § 1. This protection is afforded to secure every person within the state's jurisdiction against intentional and arbitrary discrimination, whether occasioned by express terms of a statute or by its improper execution through duly constituted agents.

Constitutional Law > Equal Protection > Nature & Scope of Protection

Real Property Law > ... > Limited Use Rights > Easements > Public Easements

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

HN8[] **Equal Protection, Nature & Scope of Protection**

The United States Supreme Court has recognized successful equal protection claims brought by a "class of one," where the plaintiff alleges that she has been intentionally treated differently from others similarly situated and that there is no rational basis for the difference in treatment.

Civil Rights Law > Protection of Rights > Procedural Matters > Criminal Penalties

Constitutional Law > ... > Fundamental Freedoms > Freedom of Religion > Free Exercise of Religion

Constitutional Law > ... > Fundamental Freedoms > Freedom of Religion > General Overview

Constitutional Law > ... > Fundamental Rights > Criminal Process > Right to Jury Trial

Constitutional Law > Equal Protection > Nature & Scope of Protection

HN9[] **Procedural Matters, Criminal Penalties**

Circuits courts expanded and developed the "selective enforcement" cause of action. Selective prosecution or enforcement is actionable under the federal Constitution where the decision to prosecute is made either in retaliation for the exercise of a constitutional right or because of membership in a vulnerable group. Liability has been imposed in these cases upon plaintiffs' proof that (1) compared with others similarly situated, they were selectively treated; and (2) that the selective treatment was based on impermissible considerations such as race, religion, intent to inhibit or punish the exercise of constitutional rights or bad faith intent to injure a person. Absent an allegation of racial religious or speech discrimination, there must be evidence from which a jury reasonably could find that the defendant acted with malicious or bad faith intent to injure the plaintiff. This cause of action has been specifically applied in *42 U.S.C.S. § 1983* claims. Because the plaintiff must prove illegitimate animus and malicious intent, courts have recognized the onerous nature of this claim. Court have also stated, however, that the temporary nature of the oppression is unimportant in the analysis.

Constitutional Law > Equal Protection > Nature & Scope of Protection

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

HN10[] **Equal Protection, Nature & Scope of Protection**

Vindictive enforcement is the other equal protection claim available against invidious discrimination through the enforcement of valid statutes. This cause of action has been recognized when administrative agencies enforce their rules as a punishment for, or a deterrent to, the exercise of constitutional rights. As such, it is similar to the due process cause of action of vindictive prosecution in criminal cases. The general inquiry in a vindictive prosecution claim analysis must be whether as a practical matter, there is a realistic or reasonable likelihood of prosecutorial conduct that would not have occurred but for the hostility or punitive animus towards defendants due to their exercise of constitutional rights. The analysis is directed to determine how the decision to prosecute was actually made in the case under consideration.

Constitutional Law > Equal Protection > Nature & Scope of Protection

Legal Ethics > Prosecutorial Conduct

HN11[] **Equal Protection, Nature & Scope of Protection**

To succeed in a vindictive enforcement claim a plaintiff must prove that (1) he or she exercised a protected right; (2) the prosecutor or state official had a stake in the exercise of that right; (3) the prosecutor's or state official's conduct was unreasonable; and (4) the prosecution or state enforcement was initiated with the intent to punish the plaintiff for the exercise of the protected right.

Civil Rights Law > Protection of Rights > Section 1983 Actions > Scope

Constitutional Law > Equal Protection > Nature & Scope of Protection

Transportation Law > Interstate Commerce > Federal Powers

HN12[] **Protection of Rights, Section 1983 Actions**

The purpose of *42 U.S.C.S. § 1983* as well as the other civil rights provisions is to provide a federal remedy for the deprivation of federally guaranteed rights in order to enforce more perfectly federal limitations on unconstitutional state action.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

HN13[] **Injunctions, Grounds for Injunctions**

A presumption of irreparable harm flows from and is triggered by an alleged deprivation of constitutional rights.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

HN14[] **Congressional Duties & Powers, Commerce Clause**

While the promotion of vigorous competition in the Puerto Rican economy is a legitimate public policy, it cannot belittle another unceasing public interest: guaranteeing the rule of law and preventing deprivations of constitutional and civil rights under color of law. To preserve the rule of law the government must act not only as an enforcer, but as a guiding light. In a government of laws, existence of the government will be imperiled if it fails to observe the law scrupulously. Our government is the potent, the omnipresent teacher. For good or for ill, it teaches the whole people by its example.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Constitutional Law > Equal Protection > Nature & Scope of Protection

HN15[] **Fundamental Rights, Procedural Due Process**

When the prosecutorial arm of the state uses its power to coerce private parties into abdicating their constitutional right, not only is due process and equal protection of law denied, but the trust in the United States' processes and system of laws diminishes.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

HN16[] **Congressional Duties & Powers, Commerce Clause**

It is in the best interest of the people of Puerto Rico that under circumstances such as this one, where a federal and a state agency are conducting parallel investigations and one has more resources available to it than the other, their government recognizes with full faith and credit the decisions of a federal agency such as the Federal Trade Commission when there is no indication that such decision was incorrect or unjust. Moreover, it is also in the best interests of the people of Puerto Rico that their government refrain from engaging in arbitrary and irrational enforcement of the laws, specially when these are used contrary to their own purposes.

For ANABELLE RODRIGUEZ, defendant: Carlos Del-Valle-Cruz, Department of Justice, San Juan, PR.

Judges: JUAN M. PEREZ-GIMENEZ, U.S. District Judge.

Opinion by: JUAN M. PEREZ-GIMENEZ

Opinion

[*397] OPINION AND ORDER-PRELIMINARY INJUNCTION

The parties, Wal-Mart Stores, Inc., Wal-Mart Puerto Rico, Inc., Supermercados Amigo, Inc. (collectively "Plaintiffs"), and Anabelle Rodriguez, Secretary of Justice of the Commonwealth of Puerto Rico ("Defendant" or "the Secretary"), having appeared at a hearing held before this Court on December 12, 16 and 17, 2002, and the Court having heard testimony and having received evidence presented by the Plaintiffs on the issues before it, and having heard arguments from both Plaintiffs and Defendants **[**2]** on the related legal issues, does hereby issue and order the following Findings of Fact, Conclusions of Law and Preliminary Injunction.

FINDINGS OF FACT

During the Fall of the year 2001, Wal-Mart Stores, Inc. and Wal-Mart Puerto Rico, Inc. (collectively "Wal-Mart") conducted due diligence examinations to assess the possibility of acquiring Supermercados Amigo, Inc. ("Amigo"), a supermarket chain in the Commonwealth of Puerto Rico. Both Wal-Mart Puerto Rico, Inc. and Supermercados Amigo, Inc. are companies incorporated and having their principal place of business in the Commonwealth of Puerto Rico, while Wal-Mart Stores, Inc. is incorporated in the State of Delaware and has its principal place of business in the State of Arkansas.

INVESTIGATIONS AND NEGOTIATIONS

February 2002-The Merger Executed

On February 5, 2002 the merger agreement between Wal-Mart and Amigo was signed and this originated a number of procedures that needed to take place before the closing of the transaction as part of the companies' integration process. This pre-closing process included negotiations with federal and state agencies that typically oversee this type of transaction in **[**3]** an effort to anticipate and remedy potential antitrust concerns. Plaintiffs' lawyers negotiated at length several aspects of the transaction with the Federal Trade Commission and the Puerto Rico Department of Justice ("PRDOJ"), and its Office of Monopolistic Affairs ("OMA").

[*398] Luis D. Martinez Rivera ("Martinez"), a Special Prosecutor who has worked at the OMA since 1997, was the main PRDOJ representative working on this case and was assisted for the most part by two economists from his office. Martinez, in charge of conducting the investigation pertinent to compliance with local anti-monopolistic laws, began to get involved in the Wal-Mart/ Amigo merger transaction on February 11, 2002. Deputy Attorney General ("DAG") of the OMA, Irma Rodriguez-Justiniano ("Rodriguez-Justiniano"), supervised Martinez during the first months of the investigation and then, during the month of October 2002, Jose Diaz Tejeda ("Diaz-Tejeda"), who substituted Rodriguez as DAG of the OMA, began taking a much more active role in the investigation and negotiations with Wal-Mart.

Soon after the agreement to merge was announced, the OMA served Plaintiffs with a Civil Investigative Demand ("CID") which served **[**4]** as the basis for the OMA's request of all information that was being provided to the FTC. Since both agencies were conducting parallel investigations, Plaintiffs provided information simultaneously to the FTC and the OMA. These materials were sent to both agencies under a waiver of confidentiality so that the agencies could also share information between themselves. Pursuant to this waiver, formalized in a letter sent by Plaintiffs' lawyers to the FTC, the federal agency could provide the PRDOJ any materials they requested. (See Docket No. 21 at 178-179 & Pl.'s Ex. 8).

The FTC is the federal antitrust enforcement agency instituted pursuant to the Federal Trade Commission Act of 1914. *15 U.S.C. §§ 41-51*. While the FTC conducts its investigations with careful regard of the federal antitrust laws, the Sherman Act, *15 U.S.C. § 1 et seq.*, and the Clayton Act, *15 U.S.C. § 1 et seq.*, the PRDOJ conducts its investigations pursuant to Article 16 of the Puerto Rico Anti-Monopoly Act, Law 77 of June 25, 1964, codified at *10 P.R. LAWS ANN. § 257 et seq.* [1] (See *10 P.R. LAWS ANN. § 272*). Unlike the FTC, however, the **[**5]** PRDOJ and OMA do not have regulations that govern or provide guidance in the conduct of divestiture investigations within a mergers and acquisitions context. Even Martinez, the main OMA investigator in this case, was not familiar with the FTC guidelines for divestiture and had not participated in the investigation of a divestiture in the past.

On February 6, 2002 Wal-Mart filed a Hart-Scott-Rodino Application with the FTC. The application is a notice to the FTC explaining that a company intends to merge with another company. The FTC **[**6]** then initiated a review process and investigation of the transaction and during the next few months, Wal-Mart prepared many documents requested by the federal agency. Once the FTC initiates an investigation, it typically culminates in an agreement between the agency and the acquiring party that consists of several consent decrees and orders. A consent package prepared by the FTC addresses every competitive problem present in the transaction and every geographical market with potential problems, as well as the **[*399]** required divestitures, if any, that remedy these problems.

April 2002-Initial Contacts

On April 17, 2002, Rodriguez-Justiniano sent a letter to Anthony George ("George"), in-house counsel at Wal-Mart, requesting that they prepare a white paper addressing a number of issues the OMA was interested in exploring. (Pl.'s Ex. # 11). Mark Schmidt ("Schmidt"), Vice President of Development in Wal-Mart, prepared much of the response to this letter. A white paper together with a summary spreadsheet reporting on local purchases and local suppliers with whom Wal-Mart had dealt since it arrived in Puerto Rico was sent to the PRDOJ on May 3, 2002. Schmidt, who has worked with **[**7]** Wal-Mart since 1987 and is responsible for mergers and acquisitions, was the principal negotiator on behalf of Wal-Mart with the PRDOJ.

Also in April 2002, a meeting was held attended by William Berkowitz ("Berkowitz"), attorney for Amigo, Steve Lausell ("Lausell"), Martinez, and an economist from the PRDOJ. Lausell was Chairman of the Board of Directors and a stockholder at Amigo and is now President of the Board of Directors and a stockholder of Supermercados

---

[1] Nevertheless, in an article published a few years after the Puerto Rico Anti-Monopoly Act was signed into law and came into effect, Arturo Estrella wrote "there is no doubt that the Puerto Rican statute of 1964 was basically inspired by the Federal legislation, from which it draws heavily, ..." and the state act establishes the same objectives as those of the federal antitrust statutes. Arturo Estrella, ***Antitrust Law*** in Puerto Rico, 28 Rev. Colegio de Abogados, 582-89 (1968).

Maximo ("Maximo"), the company that bought the four Amigo stores divested. During this meeting the representatives of Amigo offered to provide the OMA with whatever information they needed and they left the meeting with the impression that to this point, things were running smoothly in the Department with regards to their investigation of the transaction.

Finally, on April 22, 2002, Berkowitz wrote a letter addressed to Defendant, Rodriguez-Justiniano, and Martinez-Rivera detailing the legal and constitutional problems with their request for maintenance of local purchases from distributors, manufacturers, and suppliers. He explained that there was no relationship between the antitrust laws and the purchase of goods from local **[**8]** or foreign-based distributors. He explained how the PRDOJ's demands suggested facial discrimination against out-of-state distributors and, moreover, were not within the scope of the antitrust laws. Defendant claimed to have no recollection of seeing this letter and Plaintiffs never heard from the PRDOJ in regards to the matters raised in it.

May 2002-FTC's Expectations Revealed

During the month of May, Wal-Mart came to an understanding of what the FTC's expectations were before they would free the transaction of antitrust concerns. By then, the federal agency had identified the three geographical areas that raised monopolistic concerns: Cayey-Cidra, Ponce-Juana Diaz and Vega Baja-Manati. The proposed plan, then, was to divest four stores in these areas, one in Cidra, one in Ponce, one in Manati, and one in Vega Baja.

Even though the FTC gathers information on possible divestiture buyers, the onus is on the company requesting approval of a merger to find a potential buyer for the stores or locales that need to be divested. In order to comply with FTC expectations, Wal-Mart itself began looking for buyers for the four stores. During the summer months, the idea of a group **[**9]** of Amigo stockholders, among others, getting together to incorporate a company that would become the divestiture buyer began to emerge. Wal-Mart then submitted this group to the FTC as its selected buyer and once it received the FTC's approval, the selling process began.

Other potential buyers were not further investigated or considered because their initial interest never materialized into anything **[*400]** concrete. Also, some of the other candidates had a strong presence in the geographical areas where the four stores were located and thus posed a threat of competition in those areas. Finally, there was no evidence introduced in the record about any bids higher than that of the group of Amigo stockholders, who later incorporated as Maximo. Martinez testified that he never heard of any bids higher than that by Supermercados Maximo.

The obstacles that led to a delay in implementing the FTC agreements were partly due to Plaintiffs' interest in reaching a "global settlement," that is, a settlement with all the parties involved. (Docket No. 21 at 183, ln. 12). Plaintiffs had the impression that although the PRDOJ was satisfied with the divestitures imposed by the FTC, it still had additional **[**10]** concerns, which included reporting requirements during a period of several years after the merger was implemented, and the level of Wal-Mart's purchases of goods from local versus foreign distributors and suppliers. (Docket No. 21 at 184, lns. 10-15). But the PRDOJ had also communicated to the FTC that they believed the proposed divestiture of four stores was not enough for antitrust concerns. Nevertheless, the FTC ultimately approved the merger with the divestiture of only those four stores. (Pl's Ex. # 6).

A meeting to address all these issues was held in July between representatives from the PRDOJ and Wal-Mart, and by the beginning of August it was Plaintiffs' understanding that an agreement had been reached with the PRDOJ. These issues were the subject of a Voluntary Assurance Letter ("VAL") that the PRDOJ had demanded from Plaintiffs.

Summer 2002-Voluntary Assurance Letter

The issue of the Voluntary Assurance Letter came up in early May 9, 2002, after receipt of the white paper, when the PRDOJ asked Plaintiffs to provide a letter addressing Wal-Mart's intentions as to certain aspects of its business in Puerto Rico. The request for Plaintiffs' intentions quickly **[**11]** shifted to the imposition of certain conditions on them that had been conceived by the PRDOJ pursuant exclusively to the public policy of the current administration of the Commonwealth of Puerto Rico.

On June 4, 2002 a proposed text of the VAL was sent by Plaintiffs' counsel to the PRDOJ. At that point, the subject of this letter contemplated the issue of the amount of purchases from Puerto Rico domiciled suppliers. Months later, this became one of the three conditions for approval of the merger to which Plaintiffs resisted, and the controversy ultimately led to the filing of the complaint in state court. In the early conversations on this topic between Plaintiffs and the PRDOJ, the PRDOJ requested a commitment from Plaintiffs to maintain a percentage of purchases from local suppliers as opposed to foreign based suppliers. In response to the June 4, 2002 letter from Wal-Mart, the PRDOJ sent Plaintiffs a letter on June 20, 2002 asking that it address and/ or clarify certain issues in that letter. Specifically, the PRDOJ asked for more precise assurances with regards to the local purchases. (Pl.'s Ex. # 15). In good faith, Wal-Mart informed the PRDOJ that since 1999 it had substantially **[**12]** increased its local purchases in the Island and it intended to sustain that tendency. Soon thereafter, this issue was put aside and it was Wal-Mart's understanding that it had reached a general agreement with the PRDOJ. In addition, Plaintiffs were required to assure the PRDOJ that they would submit certain sales reports, as well as copies of Wal-Mart's contracts with local and foreign distributors, and any termination contracts **[*401]** with distributors for a five year period following the transaction. Whatever the parties agreed in this regard would be set out in the VAL.

On July 1, 2002, attorney for Plaintiffs, Armando Llorens ("Llorens"), and Schmidt met with Martinez with the intent of reaching a final agreement for the VAL. After the meeting, four issues remained pending between the parties: first, the length of the reporting period; second, the format of the reporting; third, the PRDOJ's request for copies of Wal-Mart's past contracts with local suppliers; and finally, Wal-Mart wanted to ensure that these requests for assurances were not interpreted as its own failure to comply with similar information requests in the past.

A follow-up letter was then sent by Martinez to Plaintiffs **[**13]** on August 5, 2002. Martinez states in it that Defendant has given her approval, or given her "good to go" approval, to the VAL, which at that point was entitled "Proposed text of letter to P.R. Department of Justice-on Wal-Mart letter head" (Pl.'s Ex. # 16). In the second paragraph of the letter, Martinez asks for a trivial change in the language of the document: the word *"expects"* was to be substituted for the word "*intends* to continue these local purchasing policies and practices …" The message conveyed in this letter was that but for the change of the word *expects* to the word *intends,* the rest of the proposed VAL would remain unaltered and once this change was implemented, a final agreement between the parties would be reached. The first paragraph of that VAL states: "Wal-Mart Stores, Inc, is pleased that the *Puerto Rico Department of Justice and the Federal Trade Commission are in agreement regarding the appropriate relief for resolving the competition issues* relating to Wal-Mart's proposed acquisition of the Supermercados Amigos supermarket chain." (Pl.'s Ex. # 14)(emphasis ours). Moreover, the first sentence of the last paragraph states: "We trust that Wal-Mart's **[**14]** voluntary assurance regarding the above matters demonstrates and confirms Wal-Mart's commitment to be an integral part of the Puerto Rican economy and should *resolve any remaining issues not addressed in the FTC/DoJ proposed settlement."* Id. Wal-Mart's understanding upon receipt of this August 5, 2002 letter was that the merger transaction had the "green light" from the PRDOJ and that it signified the culmination of the issues that had originally emanated from, or after, the May 3rd white paper and had been negotiated throughout the summer.

The August 5, 2002 letter, read in the context of what had transpired up to that point between the parties, can only be understood to mean that the outstanding issues between the PRDOJ and Plaintiffs had been taken care of. Martinez himself testified that all the issues raised in the July 1, 2002 meeting were taken care of by August 5, 2002. Nevertheless, he added that what the letter meant was that there were no objections to the proposed text of the VAL at the time, and not that the language of the agreement had been approved with finality. No such clarification is found in the letter, however, or in any subsequent clarifying correspondence **[**15]** sent to Plaintiffs.

Meanwhile, on or around July 3, 2002, another meeting took place between Amigo representatives and the PRDOJ. This time Lausell and Jose Revuelta ("Revuelta"), President of Supermercados Amigo, Inc., informed Martinez about the group emerging to buy the divestiture supermarkets in Cidra, Ponce, Manati, and Vega Baja pursuant to the FTC's expectations. In light of this new development, Lausell once again offered to provide the OMA **[*402]** with any information that was needed for the investigation of the transactions and for the agreements.

August 2002-September 2002-The Divestiture

After talks between all parties about the buyer that had shown the most interest in the four divestiture stores, on August 20, 2002 a letter of intent on behalf of NewCo Food Retailing, Inc. was sent by Lausell to Revuelta expressing their interest in buying certain assets and retaining certain liabilities pertaining to the four Amigo stores. (Pl.'s Ex. # 3). The future buyers of these stores prepared a business plan and a capitalization plan under the name of NewCo Food Retailing, Inc.-NewCo for "new company"-but it was known to all that if they were approved, they would be incorporated **[**16]** under the name Supermercados Maximo.

As the "front buyers," a term used by the FTC to describe an identified and accepted buyer, as a condition to the FTC's approval Maximo had to produce other documents for the FTC, including its agreements with the landlords of the locales where the stores to be bought were located and information about its proposed management. After both the FTC and the PRDOJ had been provided with all available information regarding Maximo, conversations regarding the sale picked up steam towards the last week of August 2002.

On August 22, 2002 attorney for Plaintiffs, Fionna Schaeffer ("Schaeffer"), wrote to the FTC on behalf of her clients informing them, among other things, of the purchase price negotiated with the "Amigo shareholders" that were incorporating Maximo for the purchase of the four stores to be divested. [2] (Pl.'s Ex. # 4). Another letter, dated August 26, 2002, was also sent to both the FTC and the PRDOJ in response to a request for information made by the FTC. (Pl.'s Ex. # 5). Martinez testified that he had learned the "Amigo shareholders" would definitely be the divestiture buyers early in September 2002 and that even before that date, he had **[**17]** received information from Maximo, such as the capitalization, management, and business plans presented to the FTC. Even before August 2002 the PRDOJ had gained knowledge that the proposed divestiture buyers were associated with Amigo.

Supmermercados Maximo was incorporated on September 17, 2002. (Pl.'s Id. # 31). On or around September 18, 2002 Schaeffer contacted Martinez to let him know that Wal-Mart was expecting to reach a final and formal settlement with the FTC within days. She wanted to know if he had any questions regarding the information sent about Maximo and was told by Martinez that the PRDOJ had no problem with Maximo. (Docket No. 21 at 201, Ins. 20-22). Indeed, Martinez also told Schaeffer that on that same day, he had communicated to Defendant **[**18]** his recommendation of Maximo as the divestiture buyer. On that day, Martinez expressed his interest in expeditiously finalizing all the agreements with Plaintiffs since his wife was about to give birth. The agreements would in essence "mirror" those that were being entered into with the FTC. Schaeffer memorialized her conversation with Martinez in an electronic mail she sent George, as well as two of Plaintiffs' other attorneys, Llorens and Jay Tabor. (Pls.' Ex. # 34) She communicated to them that from her conversation with Martinez she had learned that he had sent a favorable **[*403]** recommendation to Defendant on Maximo, that he was creating an OMA consent decree that essentially mirrored the FTC's with minor modifications, and that OMA was clearly aware of the November 5, 2002 deadline to close on the merger agreement. The modifications Schaeffer and Martinez had talked about were in relation to the public comment period provided for in the FTC papers and the confidentiality of the consent documents with the PRDOJ.

Since Maximo was less creditworthy than Amigo, Wal-Mart had to pay the landlords of the locales of the four stores a sum of $ 5.4 million dollars to compensate for the loss **[**19]** of a more creditworthy tenant. Amigo shouldered $ 500,000.00 of that figure. The execution of the agreements with the landlords to this effect took place at some point before November 21, 2002 since it was a requirement for the FTC's approval of the merger.

October 2002-The Legislative Hearings

The month of October was a turning point in many aspects of the investigations and negotiations that were taking place in reference to the Wal-Mart/ Amigo merger. During the final days of that month, the Legislature of the Commonwealth of Puerto Rico held hearings regarding the merger in which representative of both Wal-Mart and

---

[2] The record reflects that at least two stockholders of Amigo, Steven Lausell ("Lausell") and William Gonzalez ("Gonzalez"), became stockholders of the company that the FTC approved to be the buyer of the four stores that were the issue of the divestiture.

Amigo testified. [3] The pressure began to build up on Defendant. By this time, Defendant had received many letters, white papers, and personal visits of concerned parties expressing their support or opposition to the transaction. This public pressure that kept building up towards the end of the month, close to what initially had been the closing date of the transaction--November 5, 2002--was essentially what led to the new demands Defendant imposed on Wal-Mart. Moreover, the review of the transaction by the PRDOJ became a public policy decision subject **[**20]** to the input from various functionaries in the administration. Among these other functionaries were Ramon Cantero Frau, Secretary of Economic Development and Commerce, Cesar Miranda, Chief of Staff, and the Governor of Puerto Rico herself, Sila Maria Calderon. Defendant testified that like other decisions that were made at the PRDOJ, this one had created much tension on her as head of that Department.

From October on, this tension affected the negotiations between the PRDOJ and the Plaintiffs, and these began to intensify. (Docket No. 25 at 375, ln. 24). It was around this time that the maintenance of the labor force and purchase levels issues were raised. Lausell testified that in his third and last meeting with the PRDOJ, which took place on October 2002, the impression he got from the PRDOJ was "totally different [from the other meetings] **[**21]** in the sense that there was a lot of pressures being put in [sic] the transaction and that they were worried about … how to find ways to satisfy all the parties …" (Docket No. 25 at 391, lns. 19-23). Also in that meeting the PRDOJ asked Lausell for his advice with regards to the issue of local purchases and Lausell explained that one potential problem he saw revolving around that issue was the impact on distributors and suppliers of knowing that Wal-Mart <u>had</u> to buy from them.

Towards the end of October, Martinez also participated in a conference call with Schmidt. They discussed the VAL that had been negotiated during the summer, and Martinez made mention of several things in that letter that would have to be renegotiated and changed. At that point Schmidt responded by stating that contrary **[*404]** to what Martinez apparently was suggesting, he did not see any legal issues involved in the proposed changes to the VAL. To that, Martinez responded that the issues were no longer "legal," but instead a shift in their agenda had turned them into "political" issues. (Docket No. 21 at 111, ln.7). Wal-Mart associated this sudden swerve and the Defendant's new demands to the legislative hearings **[**22]** that took place in late October and the pressure that these exerted on the PRDOJ.

By this time in the negotiations, Defendant and the staff working for her on this matter began to solidify their ideas with regards to what they would bring to the bargaining table as an ultimatum for Plaintiffs. Before November 21, 2002, however, they had not raise any of these issues with the heightened concern they reflected after that date. On November 21, 2002 the FTC documents and agreements with Plaintiffs were signed suggesting that the merger transaction between Wal-Mart and Amigo and the mandated divestitures were in compliance with applicable federal laws. [4] From thereon, Defendant personally took a much more active role in the negotiations as she attempted to please all those who were pressuring her against approving the transaction.

November 2002-Fairness Opinion & Labor Issues

One of the three major issues that Defendant identified as the basis to her filing of the state court **[**23]** complaint was her request for a "fairness opinion letter" from Plaintiffs. (<u>See</u> Pl.'s Exs. 19-20). The parties explored the possibility of obtaining such opinion letter from Santander Securities Corporation for a fee of $ 150,000.00. The PRDOJ was allegedly requesting a fairness opinion letter to evaluate the divestiture of the four Amigo stores precisely because that divestiture had validated the merger for antitrust purposes. Defendant testified that she saw it as her duty to make sure the divestiture was done correctly, that it was not a sham, and that Maximo had the capacity to be a long term market competitor. (Docket No. 25 at 303, ln. 2). Moreover, she wanted proof that the merger was an arm's length transaction. It was Martinez' understanding that the fairness opinion letter would reveal the value of the transaction and whether it was real under its particular parameters. The OMA thought that in

---

[3] Press Releases, House of Representatives of the Commonwealth of Puerto Rico, October 29-31, 2002, <u>available at</u> *http://www.camaradepuertorico.org/octubre2002.html*.

[4] <u>See supra</u> note 1.

addition to all the information they had received regarding the divestiture to Maximo, the business, capitalization and management plans as well as the price paid and other documentation, they also needed a fairness opinion letter that would reveal the financial analysis sustaining **[**24]** the legality and legitimacy of the transaction.

Clearly, all these concerns had been resolved by the FTC under the appropriate and applicable divestiture guidelines which were lacking in the PRDOJ. Martinez had no evidence that the divestiture transaction was a sham. (Docket No. 25 at 315, lns. 4-7). He and the PRDOJ were concerned, however, because some investors of Supermercados Maximo were shareholders at Amigo. Yet, between August and September, Martinez had approved the transaction and communicated his approval to both Plaintiffs' counsel, Schaeffer, and also to Defendant.

The PRDOJ knew about the divestiture requirements since approximately May 2002. It knew the possible genesis of Maximo since July 3, 2002 and that it had been chosen as the divestiture buyer for the four stores since mid-August 2002. The PRDOJ became aware that the chosen divestiture buyer was Supermercados **[*405]** Maximo in August 2002. (Docket No. 25 at 283, lns. 6-7). Nevertheless, the request for a fairness opinion letter was first informally talked about, and not necessarily brought to Plaintiffs' attention, in late October or beginning of November. It was brought by Defendant to the attention of one Plaintiffs' **[**25]** attorney, Samuel Cespedes, on November 24 or 25, around the time when they also brought up the issue with the definition of an arm's length transaction in the OMA proposed agreement. It became a heated point of interest around the same time that the labor force issue was brought up.

The PRDOJ requested that the divestitures be an arm's length transaction and unilaterally added a definition of that term to the agreements. Plaintiffs immediately objected to the late request and questioned the real reasons behind it, given that the PRDOJ had known since August 2002 that the proposed buyers were associated with Amigo. Moreover, a sale of this nature taking place under divestiture circumstances could not reflect fair market value because it is typically done within a short period of time and the value will be whatever best value is procurable within that short period of time. The PRDOJ recognized this particularity of the transaction. Nevertheless, Defendant claimed to have her doubts about the divestiture transaction and, specifically, how it affected the merger's adherence to Articles 2 (Transactions in restraint of trade), 4 (Monopolies), and 5 (Mergers and acquisition) of the **[**26]** Puerto Rico Anti-Monopoly Act.

Expert Testimony Re: Fairness Opinion

Plaintiffs presented two expert witnesses in the hearings. The first was Rafael F. Martinez Margarida, Managing Partner of the San Juan Office of PricewaterhouseCoopers, LLP. Mr. Martinez holds a Master in Business Administration from Columbia University Graduate Business School. He is a Certified Public Accountant, a Certified Management Consultant, and a Certified Valuation Analyst, among other professional certifications. The other expert witness was Gregory Scott Vistnes. Mr. Vistnes holds a doctoral degree in economics from Stanford University. He specializes in the field of industrial organization, which is the study of how firms compete and interact with each other. As part of his professional experience, he served for several years in the Department of Justice, where he ultimately served as the assistant chief in the economic regulatory section. He also worked in the FTC, where he occupied the position of deputy director for the FTC's Bureau of Economics for three years. The findings of fact in this section derive from the expert testimony of these two witnesses.

Once there was evidence on record that **[**27]** the PRDOJ recognized that due to the nature of the transaction, a divestiture purchase frequently resulted in a sale for a price that did not reflect fair market value, its request for a fairness opinion became highly suspicious. A fairness opinion letter is a professional opinion rendered usually by an investment banker or a certified valuation professional regarding the reasonableness of the price of a sale in the context of a particular financial transaction. The opinion is usually provided to assure either the seller or the buyer that a transaction is fair. In cases of mergers and acquisitions, the opinion is typically prepared to provide the shareholders of a company reasonable assurances that management and/ or their representatives have appropriately discharged their fiduciary duties to them. A fairness opinion letter does not reveal whether a transaction is fictitious or not; that could possibly be achieved through due diligence. Moreover, a fairness opinion letter does not **[*406]** address market issues or market protection. A business valuation of a comparable transaction in the market would best serve to determine whether a sale price is within the parameters of the real value in **[**28]** the market. A fairness opinion would not reveal either whether after a divestiture sale, the sold stores would represent competition to the acquiring company. (Docket No. 25 at 455-465). Finally, given the nature of this transaction and the structure of the deal, neither a fairness opinion letter nor any other type of financial evaluation would have been able to categorize it and evaluate it as an arm's length transaction. For purposes of a divestiture investigation, the FTC would find it useless and inappropriate to entertain a fairness opinion letter since a divestiture frequently involves assets forced to be sold in a short period of time under duress. Hence, they usually will be sold at a very low price and requesting adherence to fair market prices would be senseless.

The Agreements

Final preparations of the FTC agreements were done during the Fall 2002 and a final version was ready by November 14, 2002. The agreements and orders were signed on November 21, 2002, and published in the Federal Register on November 27, 2002. (Pl.'s Ex. # 6). The FTC's approval of the merger was a requirement to close the transaction and its effect was to remove the Hard-Scott-Rodino waiting **[**29]** period. Against this background that included the FTC's approval of the merger, previous agreements reached and previous assurances exchanged between the PRDOJ and Plaintiffs, and recent and unexpected references to the issues of maintaining the current labor force and producing a fairness opinion letter, on November 22, 2002 the PRDOJ sent to the Plaintiffs the first of four sets of proposed agreements exchanged between the parties from that date until December 5, 2002. (Pl.'s Exs. 27 *(November 22, 2002-PRDOJ to Plaintiffs);* 23 *(November 25, 2002-PRDOJ to Plaintiffs);* 17 *(December 4, 2002-PRDOJ to Plaintiffs);* and 18 *(December 5, 2002-Plaintiffs to PRDOJ)).* Some of the documents included in these exchanges were very similar to the FTC documents. (Pl.'s Ex. 6).

On November 27, 2002, Defendant issued a press release containing statements that had been made by her on the preceding Sunday, November 24, 2002. She reiterated a list of the most important requirements the PRDOJ was using to evaluate the transaction. These were: 1) that Wal-Mart does not increase its concentration in local markets to an extent that reaches monopolistic levels; 2) that the divestiture of Amigo **[**30]** supermarkets is real and non-fictitious,; 3) that part-time jobs are as protected as full-time jobs are; 4) that sales of local agricultural products are not adversely affected; and 5) that the price paid for the four stores is within the parameters of the real market value for a transaction of this nature.

During the two weeks following the Secretary's press statements, the parties negotiated regarding the issue of the fairness opinion letter, the changes the PRDOJ had made to the VAL, and other language problems in the agreements regarding the affected geographical areas, the definition of arm's length transaction, and the demand that Plaintiffs maintain the current labor force and the current level of purchases from local suppliers.

Maintenance of Levels of Local Purchases

The final versions of the proposed agreement that Plaintiffs received from the PRDOJ had the following provision: "... the respondents will not reduce or **[*407]** suspend its current volume purchases of local agricultural and/ or food products." (See Pl.'s Exs. 17, 23 & 27, cf. Pl.'s Ex. 18). With regards to this language the parties were not able to reach an agreement before the deadline for the closing. **[**31]** Wal-Mart was willing to make a commitment to buy as much locally as they could and they provided the PRDOJ with evidence that their purchases had in fact increased in recent years. But there was additional language in the agreement suggesting that these intentions were not enough and that Plaintiffs would subject themselves to legal enforcement if they were ever to reduce their volume of local purchases regardless of the reasons for such decision. This was unacceptable to Plaintiffs because it put them at a disadvantage with competitors who freely conducted their business while knowing Wal-Mart had these restrictions.

Maintenance of Current Work Force vs. Maintenance of Current Work Force Levels

The issue of guaranteeing the maintenance of the current work force versus the current levels of work force was brought up in late November as an amendment to the VAL in an attempt by the PRDOJ to protect the public policy of Puerto Rico. Indeed, the protection and preservation of existing jobs, as well as the creation of new ones, is the highest priority of the current administration. (Pl.'s Ex. 19 at 2). Within the framework of this policy, Defendant brought up the need to either **[**32]** require or negotiate with Wal-Mart the issue of maintaining the labor force at the time of the acquisition. With regards to labor issues, the new VAL included a provision that read: "Wal-Mart will continue to comply with all applicable labor laws and regulations and will not undergo a reduction of the current labor force of Supermercados Amigo nor will substitute its full time employees for part timers as a result of the transaction." (Pl.'s Ex. 17). [5]

The controversy in the language of the agreements with regards to labor issue can be best summarized as follows: while the PRDOJ wanted to get Wal-Mart to agree not to alter the current labor force, that is, the employees that are currently working at the Amigo stores, Wal-Mart was willing to agree to maintain the current number of employees, leaving open the possibility that current employees could be terminated as long as their positions were not eliminated. (Docket No. 25 at 362, lns. 6-14). But despite their lack of intention to **[**33]** downsize their current work force, Plaintiffs could not agree to maintain the current employees and forego the possibility of ever letting go of anyone who currently works at Amigo. Wal-Mart anticipated that just like in any other acquisition, there was a possibility that the integration process would reveal deficiencies in the labor force that would need to be remedied. Moreover, no layoffs in the stores were anticipated, but Wal-Mart could not make the same commitment with regards to positions in their administrative and home offices. The phenomenon of attrition, over which they have no control, was also raised as a concern for Wal-Mart. Finally, as with the levels of purchase condition, Wal-Mart would be at a disadvantaged with competitors if forced to maintain the current labor work force.

December 2002-Closing, Press Release, and State Lawsuit

Plaintiffs negotiated in good faith the conditions which Defendant was attempting to impose on them and even on December 5, 2002, Plaintiffs were hoping to reach an agreement with the Secretary of Justice **[*408]** with regards to the terms of the VAL. The merger agreement originally had a deadline for closing the transaction on November 5, 2002, which **[**34]** was then extended to December 5, 2002, pending the Agreement and Order from the FTC. The Department of Justice was well aware of the closing date. Mr. Schmidt had personally assured Diaz-Tejeda, Director of the Office of Monopolistic Affairs, that the closing would take place on December 5, 2002.

A telephone conversation was held between Lausell and the Defendant on December 3, 2002. On the basis of all the pressure she had and her sense that it was "very very very" likely that they would reach an agreement with Wal-Mart, she asked Lausell if they could postpone the closing until Friday, December 6, 2002. Lausell communicated to her that he was of the impression that Wal-Mart did not feel the same way about the likelihood of reaching an agreement, since there were still important issues to be resolved. At this point, it seemed that the most important and controversial pending issue was the fairness opinion letter. Still, Lausell offered to assist in mediating with Wal-Mart to reach an agreement regarding the language of that letter so Defendant could take it to Cantero Frau for his approval, even though Lausell understood that Cantero Frau inevitably would remain firmly opposed to **[**35]** the transaction. Defendant's reaction to this last remark suggested that Lausell's suspicions about Cantero Frau were correct. (Docket No. 25 at 402 lns. 19-20).

While Defendant asked Lausell for two more days to "negotiate," at some point before December 5, 2002, she had ordered that a draft of a complaint be prepared. The idea of a potential lawsuit, or "going to court," had been brought up once or twice during the final days of negotiations. Plaintiffs, however, were quite certain that they would be able to reach an agreement with Defendant with regards to the VAL. The public announcement made by the Defendant on Thursday, December 5, 2002, at 3:00 P.M., with regards to the filing of a lawsuit in state court came as an enormous surprise to Plaintiffs.

---

[5] See infra at 34-36.

The closing took place on the morning hours of Thursday, December 5, 2002. On that day, Diaz-Tejeda asked Plaintiffs' attorneys to postpone the announcement of the closing until 3:00 p.m. that afternoon so that Defendant could make an announcement first. [6] Plaintiffs acceded.

[36]** In the press release issued by Defendant on December 5, 2002, and attached as Exhibit A to Plaintiffs' complaint, Defendant expressed her intent to file a lawsuit against Plaintiffs. She explained that the transaction that took place on that same date between Wal-Mart and Amigo violated the Puerto Rico Anti-Monopoly Act and was contrary to the best interests of consumers, merchants and distributors in Puerto Rico. (Docket No. 1, Ex. A). Immediately thereafter, Defendant explained in the press release that Plaintiffs failed to consent to three issues that were essential for her to accept the transaction. The three conditions that Plaintiffs refused to agree to and Defendant had announced were the basis for her intent to ask a Court to enjoin the merger were: first, that the number of employees currently working at Amigo must remain at the current level; second, that at a minimum the purchase of local agricultural products must remain at current levels; and finally, that the transaction must be made in good **[*409]** faith in order to protect the local market. Martinez testified that his understanding of the press release was that because Wal-Mart had not complied with the PRDOJ's labor force **[**37]** requirements, she would sue the parties to the merger. (Docket No. 25 at 329, ln. 25).

The state court complaint was filed by Defendant on December 6, 2002 at 2:36 p.m. and it only alleges violations of the Puerto Rico Anti-Monopoly Act. Together with the Complaint, Defendant filed a request for a preliminary injunction pursuant to Article 13 of Law 77. The injunction was granted that afternoon by the state judge. In the state court complaint, Defendant alleges for the first time that since May 2002 there existed antitrust concerns in another geographical area of the Island, the Municipality of Bayamon. However, two weeks earlier, on November 22, 2002, the PRDOJ had sent Plaintiffs a proposed draft of the agreements which included a provision that read: "all other relevant geographical markets of Puerto Rico [, besides Cayey-Cidra, Ponce-Juana Diaz, Barceloneta-Manati-Vega Baja] do not evidence any overlaps among the parties, higher concentration indexes, conditions that would result in unacceptable concentrations of market power as a result of the acquisition or the evidence is that existing competition or the lack thereof will remain essentially unaltered." (Pl.'s Ex. 27 at 4, **[**38]** P m). Three days later-and then again twelve days later-when the same documents were sent by the PRDOJ to Plaintiffs, that language had been taken out of Paragraph (m). Nevertheless, throughout the negotiating and in the agreements, reference to the problematic areas was always limited to the three geographical areas identified by the FTC in May 2002.

Even though the PRDOJ and Plaintiffs thought that they would be able to reach an agreement before closing the transaction, the turn the negotiations took in the last month made it impossible to reach an agreement in principle. Wal-Mart could not agree to maintain the current labor force, they could not agree to a definite percentage of purchases from local versus foreign-based suppliers, and neither would they produce what was an unnecessary opinion letter that would not help the PRDOJ in executing its duties pursuant to Puerto Rico's ***antitrust law***.

DISCUSSION

Before examining the probability of success on the merits of Plaintiffs' claims, we begin our discussion by setting forth what we glean from the findings of fact. In sum, we have identified a sequence of events from which we can discern that Defendant's December 6, 2002 complaint **[**39]** presents pretextual and bogus claims against the Plaintiffs. These claims disguise conduct and motivation of an inherently spurious nature lacking any kind of authoritative or legal support. Moreover, the Secretary's undertakings as the highest law enforcement agent of the Commonwealth elucidate a pattern of bad faith conduct in the negotiations, specially during the months of November and December, which violates Plaintiffs' civil rights under the United States Constitution. A brief review of the events that took place within the ten month period from February 5 to December 6, 2002 shows that after October, and even more strikingly after November 21, Defendant engaged in a desperate attempt to extract Plaintiffs' submissions to her imposed conditions as a result of public and political pressures put on her. These

---

[6] That announcement turned out to be the press release in which she stated that she would file a lawsuit against Plaintiffs in a few hours because they refused to submit to her demands.

events culminated in the vindictive filing of a state antitrust lawsuit in an effort to coerce Plaintiffs to yield to the Secretary's demands.

[*410] We first look at the state court complaint and proceed backwards to February, 2002. The complaint alleges violations of the anti-monopolistic laws of Puerto Rico in two specific matters: that the geographical area of Bayamon created **[**40]** competition problems; and the allegedly fictitious divestiture of the four Amigo stores. Prior to the state court complaint, no mention was ever made of geographical areas that might raise antitrust concerns, other than the three areas identified by the FTC and remedied by the divestitures. Moreover, there is no evidence of any other independent investigation, or evidence gathered by Defendant in this regard, that would lead her to conclusions divergent from those reached by the FTC. Since May 2002, the FTC had approved the transaction pending the divestiture of the four stores. Plaintiffs successfully complied with this condition, thus gaining full FTC approval by November 21, 2002. Indeed, there was language in pre-November 25, 2002 drafts of the PRDOJ/Wal-Mart agreements that stated that no geographical areas--other than those where the four divestiture supermarkets were located--presented antitrust concerns. This language was taken out from the drafts on or around November 25, 2002. (<u>See</u> Pl.'s Exs. 23 and 27 at 4 P m, <u>cf.</u> Pl.'s Ex. 17 at 4 P m). In addition, all the drafts of agreements exchanged between November 22 and December 5, 2002 limited their discussion of the problematic **[**41]** geographical areas to Cayey-Cidra, Ponce-Juana Diaz, and Barceloneta-Manati, Vega Baja--the three areas covered by the FTC's divestiture findings.

Aside from what the PRDOJ thought the fairness opinion would reveal, which the evidence suggested was an inaccurate and potentially feigned belief, absolutely no mention of other antitrust concerns was made prior to the December 5, 2002 press release. In her November 24, 2002 statements to the press, Defendant makes no reference to monopolistic or competition concerns raised by the transaction. Instead, the Secretary alleges that on the basis of the public policy of Puerto Rico, the scope of the OMA's investigation is broader than that of the federal agency. Therefore, she was examining other issues related to Amigo's labor force and Wal-Mart's purchases from local suppliers. This shows that prior to the fabricated monopolistic concerns that allegedly form the basis of Defendant's state court complaint, she had no legal substance on which to base that state lawsuit. Thus the real reason behind her bringing that action is unveiled: she is retaliating against Plaintiffs for not submitting to her public policy concerns, which were actually **[**42]** the concerns of those exerting pressure on her, and in doing so she abused her powers as a state actor to infringe upon the rights of the Plaintiffs guaranteed by the United States Constitution.

Defendant uses her counterfeit alibi, the fairness opinion letter, to justify the PRDOJ's inability to reach an agreement with Plaintiffs. Key to understanding the pretextual nature of this issue is that even though it was of utmost importance, to the point that there was a breakdown in the negotiations as a result of Plaintiffs failure to produce that letter, the PRDOJ did not raise the issue until after nine (9) months of negotiations, after six (6) months of knowledge of the divestiture, after four (4) months of knowledge of the identified buyers, <u>and</u> after the October legislative hearings which brought heavy political pressures on Defendant. The evidence showed that the PRDOJ had approved Maximo as the divestiture front buyer since September 2002 and was aware that this group of Amigo stockholders was interested in the four stores since early July 2002. No evidence was introduced to show why Defendant suspected the unfairness of the **[*411]** divestiture sale nor was there any evidence of an **[**43]** investigation taking place to this effect. No evidence was introduced either of any genuine and true purpose that a fairness opinion would serve within the context of a divestiture. Indeed, the evidence revealed that there is no relation between the issues and concerns typically addressed in a fairness opinion and those addressed by the anti-monopolistic laws of Puerto Rico. But once again, the best revelation of the bogus nature of the request for this letter is the fact that it was not solicited from Plaintiffs until late November 2002, even though the identity and relationship of the Maximo group had been known more than four (4) months earlier.

Next, we consider the other two conditions, aside from the fairness opinion letter, that Defendant imposed on Plaintiffs during the last weeks of negotiations: 1) maintenance of current levels of local purchases, and 2) maintenance of the current labor force at Amigo stores. These were raised by Defendant as crucial matters that provoked her scrutiny of Plaintiffs' transaction for several weeks prior to its closing. Yet, Defendant attempts to suggest now that these two conditions in no way instigated her state court lawsuit or were related **[**44]** to it. She alleges that other monopolistic concerns, of which no evidence was introduced at the hearing, form the basis of her complaint, including those she sought to uncover in requesting a fairness opinion letter. This seems unreasonable and unconvincing given the pattern of events that has transpired in this case and the fact that up until the last day of negotiations and hours before filing the state court compliant, Defendant persevered in her demands for these two conditions. The Secretary's November 27 and December 5 press releases attest to this conclusion. (Pls.' Exs. 19 & 20)

Defendant admits that the labor and purchase requirements are unrelated to monopolistic and competition issues and, for this reason, they are not mentioned nor are they part of the state court lawsuit. If this is so, we wonder where she found the authority in the first place to demand these conditions. The Puerto Rico Anti-Monopoly Act does not provide the source for Defendant's imposition of conditions unrelated to antitrust concerns, even if they were-as they are not in this case-legal and constitutional. Additionally, the evidence showed that in no other merger monitored by the OMA had there been **[**45]** demands for maintenance of the current workforce and current local purchases, nor had there ever been requests for fairness opinion letters.

The Defendant testified that the imposition of the two conditions of local purchases and labor work force was done in the spirit of a negotiation and pursuant to the public policy of the Commonwealth of Puerto Rico. Given that this Court understands these conditions to be unconstitutional in that they violate Plaintiffs equal protection and commerce clause rights, [7] we pause to address the implications of Defendant's proposition. The Secretary claimed that just like any negotiator, she sat at the bargaining table in an attempt to leave that table with the best deal for those whose interests she was representing. It is absurd, however, to make such comparison when it is the State Attorney General demanding that a party not only relinquishes its constitutional rights but in addition, violates the law. If a private party made such demands at a negotiating table, the party receiving the demands would obviously feel less bulldozed than when they are made by a state official, **[*412]** who moreover has to pass muster over the transaction.

[46]** Those who negotiated on behalf of the PRDOJ, namely Martinez, Diaz Tejeda and the Secretary herself, believed that once they invoked the public policy of the administration, and because they were assuming the roles of negotiators in their dealings with Plaintiffs, they were at liberty to engage in an unobstructed pursuit of potentially illegal concessions for the good of the people of the Commonwealth of Puerto Rico. Thus, they could get away with imposing those demands first because they were "simply negotiators" and second, because ultimately they found their support in the public policy of the Commonwealth of Puerto Rico. This, they thought, would get them around the unconstitutionality of the conditions.

The public policy of Puerto Rico does not equate a *carte blanche* to government officials to impose illegal or unconstitutional conditions on parties entering a private transaction, nor to demand their acquiescence to those conditions. Much less can a state's protection of its public policy go so far as to violate the federal constitution and other state laws, nor can it be used to amend by fiat existing laws. Moreover, it seems very convenient to focus on those public policy **[**47]** concerns that are apparent and not go beyond the face of those imposed conditions to unveil adverse public policy effects that result from their imposition. Defendant suggested in her various press releases that the people of Puerto Rico would be negatively affected by the merger of Wal-Mart and Amigo since there was no guarantee that they would buy the same level of merchandise and agricultural goods from local suppliers and distributors as Amigo had in the past. But Wal-Mart understood that these requests were not only unfair but contrary to the interest of the people of Puerto Rico. Knowledge of imposed quotas on Wal-Mart would limit its bargaining power with suppliers, who would end up selling goods at higher prices in light of the quotas, and that increment would have to be passed on to consumers, of course, the people of Puerto Rico.

Moving on to the other condition, Defendant alleges that in a negotiating spirit and in an effort to uphold her administration's primary public policy goal, the protection and creation of jobs, she conditioned her approval of the transaction on Plaintiffs's assurances that they would retain Amigo's current workforce. The Secretary's genuine interest **[**48]** in protecting employment, however, becomes suspect when we consider that she did not raise this

---

[7] See infra at 37, 41-44.

issue until the last month of negotiations, and after the legislative hearings took place, when things became "political." (See Docket No. 26). The possibility of job reductions and changes in the work force existed since day one of the negotiations. Ever since Martinez became involved in the negotiations back in February 2002, the PRDOJ and OMA had every reason to know that the work force in the company that was being acquired could be affected. Yet, being as important as it is for the current administration, neither Defendant nor those working under her command, thought about it or brought it up until less than a month before the closing of the transaction. To be more precise, it was not until the third week of November that this requirement was presented to Plaintiffs. This absolutely shows the pretextual nature of the claims raised in the state court complaint. Once Defendant could not find any other way to delay and halt the merger pursuant to the anti-monopolistic concerns that she is entitled to protect, she tried to use as last resort the public policy of Puerto Rico.

[*413] Pursuant **[**49]** to the language she was attempting to get Plaintiffs to agree to, they would not be able to discharge any employees who currently make up Amigo's work force. Besides the bogus nature of this condition, we find that it moreover violates Plaintiffs' rights to equal protection of the law. Plaintiffs are entitled to be free from state prosecution if they adhere to the established labor laws. But through these labor conditions Defendant is effectively imposing additional restrictions on Plaintiffs as to when they can or cannot discharge an employee. If they are unwilling to accede to these restrictions, then their merger transaction will not be approved and cannot take place.

Under the labor laws of Puerto Rico, there are enumerated reasons that will constitute good cause for an employer to terminate an employee. Puerto Rico Law on Unjustified Dismissals, Law 80 of May 30, 1976, 29 *P.R. Laws Ann. tit. 29, §§ 185a-185k* ("Law 80"). Specifically, Law 80 sets out six (6) situations where good cause can be found for discharge of employees. 29 P.R. Laws. Ann. § 185 (b). Nowhere in these provisions is it suggested that in cases of mergers and acquisition when the acquiring company is a foreign **[**50]** company, it will be forbidden from discharging employees or will ever be required to maintain its number of employees at the pre-merger level. Defendant attempts to amend the law to this effect as it applies to Plaintiffs.

One of the good cause reasons for discharge is the "*technological or reorganization changes* as well as changes of style, design or the nature of the product made or handled by the establishment, and changes in the services rendered to the public." 29 P.R. Laws Ann. § 185(e). Clearly, a merger entails changes of this type. The integration process of two companies requires that they reorganize management and administration and with this, it is very possible that employees at both lower and higher levels of management and service, have to be either transferred to different positions or discharged.

Law 80 contains a specific provision related to merger and acquisitions:

> "in the case of transfer of a going business, ***if*** *the new acquirer continues to use the services of the employees who were working with the former owner,* such employees shall be credited with the time they have worked in the basis under former owners. In the event that the new **[**51]** acquirer *chooses not to continue with the services of all or any of the employees* and hence does not become their employer, the former employer shall be liable for the compensation provided herein, and the purchaser shall retain the corresponding amount from the selling price stipulated with respect to the business. *In case he discharges them without good cause after the transfer,* the new owner shall be liable for any benefit which may accrue under sections 185a-185l of this title to the employee laid off, there being established also a lien on the business sold, to answer for the amount of the claim."

29 P.R. Laws. Ann. § 185f (emphasis ours).

Clearly, this section of the law does not say that employees of a company being acquired cannot be discharged nor does it say that the new acquirer should bring in all new employees to substitute the old ones. Indeed, it does allow the possibility that none of the employees at the company being acquired are retained by the new acquirer. As the evidence showed, this was never Plaintiffs' intent. In imposing on Plaintiffs the condition of retaining the current labor work force, and thus, effectively amending Law 80 by executive fiat, **[**52]** Defendant not only violates constitutional **[*414]** rights to equal protection of the laws but, moreover, reveals her desperate attempt to indulge all those who were exerting political and public pressures on her. Since no evidence was introduced to the effect that similar requirements are ever imposed on other companies, whether under the circumstances of a merger or not, Plaintiffs' equal protection rights are implicated. Defendant is imposing requirements on Plaintiffs that go beyond what the law requires, while not imposing them on others similarly situated.

With this factual and analytical background in mind, we proceed to examine Plaintiffs' claims within the framework of a preliminary injunction standard.

Preliminary Injunction Standard

HN1[] There are four elements necessary to grant injunctive relief: 1) there must be a substantial likelihood of success on the merits; 2) the preliminary injunction must be necessary to prevent irreparable injury; 3) the threatened harm must outweigh the harm a preliminary injunction would inflict on the nonmovant; and 4) the preliminary injunction would serve the public interest. *New Comm Wireless Services., Inc. v. SprintCom, Inc., 287 F.3d 1, 8-9 (1st Cir. 2002)*; **[**53]** *Narragansett v. Guilbert, 934 F.2d 4, 5 (1st Cir. 1991)* see also *FED.R.CIV.P. 65*. "The *sine qua non* of that formulation is whether the plaintiffs are likely to succeed on the merits." *Weaver v. Henderson, 984 F.2d 11, 12 (1st Cir. 1993)*.

Likelihood of Success on the Merits

In this *Section 1983* action, Plaintiffs allege that Defendant's imposition of certain conditions on them before approving their transaction violates their civil rights to equal protection of the laws and due process as protected by the Fifth and Fourteenth Amendment to the Constitution of the United States of America, and also rights deriving from the Commerce Clause of the U.S. Constitution.

A review of the applicable constitutional analysis suggests that Plaintiffs would likely succeed on the merits of their constitutional claims.

Conclusions of Law

Commerce Clause Claim

HN2[] Aside from its role as a "power-allocating provision giving Congress pre-emptive authority over the regulation of interstate commerce," the commerce clause also serves as a "substantive 'restriction on permissible state regulation' of interstate commerce." *Dennis v. Higgins, 498 U.S. 439, 447, 112 L. Ed. 2d 969, 111 S. Ct. 865 (1991)*. **[**54]** Under this "negative command, known as the dormant Commerce Clause," states are prohibited "from acting in a manner that burdens the flow of interstate commerce." *Pharm. Research & Mfrs. of Am. v. Concannon, 249 F.3d 66, 79 (1st Cir. 2001)*. Thus, when a state statute "discriminates against interstate commerce," courts scrutinize such actions under a "virtually per se invalid rule." Id. These statutes are "routinely struck down," unless the state can show a "legitimate local purpose that cannot be adequately served by reasonable nondiscriminatory alternatives." *New Energy Co. of Ind. v. Limbach, 486 U.S. 269, 274, 100 L. Ed. 2d 302, 108 S. Ct. 1803 (1988)*; accord *Concannon, 249 F.3d at 79*.

HN3[] Statutes pursuing "simple protectionism" are subject to this per se rule of invalidity, see *City of Philadelphia v. New Jersey, 437 U.S. 617, 624, 57 L. Ed. 2d 475, 98 S. Ct. 2531 (1978)*. Economic protectionism can be proved by showing that either in its effects or purpose, a statute implements differential treatment between in-state and out-of-state commercial entities. Thus, the Commerce Clause forbids states from benefitting **[**55]** "in-state economic interests **[*415]** by burdening out-of-state competitors," *Limbach, 486 U.S. at 273-74*, or from building up their "'domestic commerce by means of unequal and oppressive burdens upon the industry and the business of other States,'" *Bacchus Imports v. Dias, 468 U.S. 263, 273, 82 L. Ed. 2d 200, 104 S. Ct. 3049 (1984)* (citing Guy v. Baltimore, 100 U.S. 434, 443, 25 L. Ed. 743, 1 Ky. L. Rptr. 205 (1880)). When facing such economic protectionism, the standards for proving a legitimate local purpose are onerous. See Limbach, 486 U.S. at 273-74.

The Commerce Clause, however, is not merely a grant of authority to Congress. The Supreme Court has declared that the Commerce Clause "was intended to benefit those who ... are engaged in interstate commerce." Dennis, 498 U.S. at 449 (citing Morgan v. Virginia, 328 U.S. 373, 376-77, 90 L. Ed. 1317, 66 S. Ct. 1050 (1990)). The Court believes that "every consumer may look to the free competition from every producing area in the Nation to protect him from exploitation by any." Id. 498 U.S. at 450 (citing H.P. Hood & Sons, Inc. v. Du Mond, 336 U.S. 525, 539, 93 L. Ed. 865, 69 S. Ct. 657 (1949)). **[**56]** Thus, the Supreme Court has recognized that plaintiffs as market participants indeed have a cause of action under 42 U.S.C. § 1983 for violations under the Commerce Clause. Dennis, 498 U.S. at 446.

The requirement that Wal-Mart maintain a high level of purchases from local suppliers, distributors and manufacturers, present throughout the negotiations between Wal-Mart and the PRDOJ since May 2002 until the day before the state complaint was filed, falls within the type of protectionist state policies subject to the "virtually invalid per se rule" and thus it is "likely to be struck down." [8] In both its effect and purpose, the requirement differentiates between local Puerto Rico growers and out-of-state producers by mandating a quota of local products to be purchased annually. This differential treatment favors the interests of Puerto Rico growers, who are given a guaranteed market for the products sheltered from the usual perils of the market, while shutting out out-of-state growers from the potentially lucrative business relationship with Wal-Mart. Regardless of the quality of their products, the consistency of their supply, or the prices **[**57]** they offer, local growers would have a guaranteed and insurmountable advantage over out-of-state growers. This, in part, violates Wal-Mart's right to engage in interstate commerce, which is now reduced to "exclusivity contracts" with local growers, despite the myriad alternatives in interstate commerce.

In the face of this direct and discriminatory interference with interstate commerce, the Secretary of Justice offers no legitimate purpose. As has been suggested throughout this opinion, she invokes the public policy of the administration she currently works with as her source of authority that allows her to make these demands from Plaintiffs during their negotiations. She stated in a press release that "the public policy **[**58]** is directed at protecting the necessary balance that should exist between Puerto Rican and foreign capital and the benefits that it entails for the consumers." (PL.'s Ex. # 19). Whether or not Wal-Mart should attempt to strike that balance is not for this Court nor any other to determine for as long as it engages **[*416]** as a free market participant within the boundaries of the law, it is to make its own business decisions without governmental interference. But confronted with facially discriminatory remarks such as this one, we can and do determine that the Secretary is engaging in state protectionism prohibited by the federal constitution.

Defendant herself admits that failing to submit to her conditions with regards to the maintenance of a high level of local purchases is not contrary to either local or federal laws. Therefore, there can only be one conclusion as to the motivation of Defendant in making such requests from Plaintiffs: she was engaging in the type of protectionism of local suppliers that is forbidden under the Commerce Clause. Moreover, the state interests Defendant claimed to be upholding in imposing the preferential conditions on Plaintiffs do not result as beneficial **[**59]** to the people of Puerto Rico as she suggests and in fact, could result in quasi-monopolies in sectors where there is only one local supplier, distributor or manufacturer of any given good. Knowing that Wal-Mart had to purchase all its goods from them, suppliers would increase prices and in effect cause Wal-Mart to be at a great disadvantage when doing business and bargaining with these suppliers. This would ultimately result in a guaranteed loss for consumers, whose interests should no doubt also be taken into account by the public policy of the Commonwealth of Puerto Rico. In addition, **HN5**[] the antitrust laws which Defendant invokes as her source of authority to interfere in Plaintiffs' transaction are intended to protect competition and not competitors, or suppliers, distributors and

---

[8] **HN4**[] Puerto Rico is subject "to the constraints of the dormant commerce clause doctrine in the same fashion as the states." Trailer Marine Transp. Corp. v. Rivera Vazquez, 977 F.2d 1 (1st Cir. 1992); Starlight Sugar, Inc. v. Soto, 253 F.3d 137, 142 (1st Cir. 2001).

manufacturers for that matter. *Brooke Group, Ltd. v. Brown & Williamson, 509 U.S. 209, 224, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1999)*.

HN6[] Protectionism itself, or promoting in-state business by discriminating against out-of-state participants, is not a legitimate state interest. *Starlight Sugar, Inc. v. Soto, 909 F. Supp. 853, 858 (D.P.R. 1995)*. Because the Department of **[**60]** Justice's requirement, as a direct and discriminatory interference with interstate commerce, is subject to the "virtually invalid per se rule" and since the Secretary of Justice could offer no legitimate local purpose to justify such a protectionist measure, the Plaintiffs are likely to succeed in the merits of this claim.

Selective Enforcement Claim

HN7[] The Equal Protection Clause "commands that no State shall 'deny to any person within its jurisdiction the equal protection of the laws,' which is essentially a direction that all persons similarly situated should be treated alike." *City of Cleburne v. Cleburne Living Ctr., 473 U.S. 432, 439, 87 L. Ed. 2d 313, 105 S. Ct. 3249 (1985)*; see also U.S. Const. amend. XIV, § 1. This protection is afforded "to secure every person within the state's jurisdiction against intentional and arbitrary discrimination, whether occasioned by express terms of a statute or *by its improper execution through duly constituted agents." Sioux City Bridge Co. v. Dakota County, 260 U.S. 441, 67 L. Ed. 340, 43 S. Ct. 190 (1923)* (citing *Sunday Lake Iron Co. v. Wakefield Tp., 247 U.S. 350, 62 L. Ed. 1154, 38 S. Ct. 495 (1918))* **[**61]** (emphasis ours).

HN8[] The Supreme Court has recognized "successful equal protection claims brought by a 'class of one,' where the plaintiff alleges that she has been intentionally treated differently from others similarly situated and that there is no rational basis for the difference in treatment." *Village of Willowbrook v. Olech, 528 U.S. 562, 564, 145 L. Ed. 2d 1060, 120 S. Ct. 1073 (2000)*. In that case, the Village of Willowbrook "intentionally demanded a 33-foot easement as a condition of connecting her property to the municipal **[*417]** water supply," although Village regulations required the grant of only a 15-foot easement. *Id. at 565*. The Court concluded that the allegations of arbitrariness and irrationality were sufficient to "state a claim under traditional equal protection analysis," even though after opposition from the Plaintiff, the Village retracted its requirement of a 33-foot easement. *Id. at 564*.

HN9[] Circuits courts expanded and developed this "selective enforcement" cause of action. Selective prosecution or enforcement is actionable under the federal Constitution "where the decision to prosecute is made either in retaliation for **[**62]** the exercise of a constitutional right ... or because of membership in a vulnerable group." *Torres v. Frias, 68 F. Supp. 2d 935, 942 (N.D. Ill. 1999)*(quoting *Esmail v. Macrane, 53 F.3d 176, 179 (7th Cir. 1995)*. Liability has been imposed in these cases upon plaintiffs' proof that (1) "compared with others similarly situated," they were "selectively treated"; and (2) that the selective treatment "was based on impermissible considerations such as race, religion, intent to inhibit or punish the exercise of constitutional rights or bad faith intent to injure a person." *Yerardi's Moody St. Rest. & Lounge, Inc. v. Bd. of Selectmen, 932 F.2d 89, 92 (1st Cir. 1991)*; accord *Harlen Assocs. v. Village of Mineola, 273 F.3d 494, 499 (2d Cir. 2001)*; *Hilton v. Wheeling, 209 F.3d 1005, 1008 (7th Cir. 2000)*. Absent an allegation of racial religious or speech discrimination, "there must be evidence from which a jury reasonably could find that the [defendant] acted with malicious or bad faith intent to injure [the plaintiff]." *Yerardi's, 932 F.2d at 92*. This cause of action has been specifically **[**63]** applied in *Section 1983* claims. See *Harlen Assocs., 273 F.3d at 499*; *Yerardi's, 932 F.2d at 92*. Because the plaintiff must prove illegitimate animus and malicious intent, courts have recognized the onerous nature of this claim. *Olech v. Village of Willowbrook, 160 F.3d 386, 388 (7th Cir. 1998)*; *Rubinovitz v. Rogato, 60 F.3d 906, 911 (1st Cir. 1995)*. Court have also stated, however, that the temporary nature of the oppression is unimportant in the analysis. *Olech, 160 F.3d at 388*.

The Supreme Court's analysis of the facts in Willowbrook sheds light on the effect of Defendant having technically "dropped" from her state court complaint the labor and purchase related conditions imposed on Plaintiffs while she was negotiating with them. The answer is that it does not matter. The Court in Willowbrook found plaintiff had a viable equal protection claim regardless of the fact that defendant there had "redeemed" itself when it retracted the particular and unusual demand from plaintiff of a 15-foot easement. *528 U.S. at 565*. Therefore, Defendant errs in suggesting that as long as she **[**64]** did not make the conditions part of her complaint she would be within the boundaries of the law in negotiating with Plaintiffs and demanding their submission to special conditions before she would approve their merger. Such belief in fact results in liability for equal protection violations.

The facts of this case reveal that Defendant has clearly engaged in treatment of Plaintiffs that intends to inhibit them from exercising and punishes their exercise of equal protection and due process rights as well as their rights under the Commerce Clause. Plaintiffs have a right to be free market participants without the arbitrary and oppressive imposition of obstacles that are unwarranted not only in fact but also under the law. Clearly the Secretary's intent in denying the OMA's approval of the merger on the basis of their failure to submit to her requests was to punish Plaintiffs for their defiance to her demands. **[*418]** As has been well put by the Seventh Circuit, Defendant's action were motivated by a "'spiteful effort to "get" [Plaintiffs] [] for reasons wholly unrelated to any legitimate state objective.'" *Olech v. Village of Willowbrook, 160 F.3d 386, 386 (7th Cir. 1998)* **[**65]** (quoting *Esmail, 53 F.3d at 180*).

The evidence in this case also showed that Defendant had never before imposed conditions such as the ones demanded from Plaintiffs in this case. Moreover, never before had Defendant questioned a divestiture and demanded a $ 150,000 fairness opinion letter in order to convince herself of the legitimacy of any aspect of a merger and acquisition transaction. [9]

[66] Vindictive Enforcement Claim**

HN10[] Vindictive enforcement is the other equal protection claim available against invidious discrimination through the enforcement of valid statutes. [10] See *Futernick v. Sumpter Township, 78 F.3d 1051, 1056 n.7 (6th Cir. 1996)* (explaining that they distinguish two different types of selective prosecution claims under the Equal Protection Clause: "true selective prosecution" and "vindictive enforcement"). This cause of action has been recognized when administrative agencies enforce their rules as a punishment for, or a deterrent to, the exercise of constitutional rights. See id.; see also *Heaton v. City of Princeton, 47 F. Supp. 2d 841 (W.D. Ky. 1997)*. As such, it is similar to the due process cause of action of vindictive prosecution in criminal cases. See, e.g., *United States v. Lanoue, 137 F.3d 656, 664 (1st Cir. 1998)* ("Successful assertions of vindictive prosecution are most common where a defendant advances some procedural or constitutional right and is then punished for doing so."). The general inquiry in a vindictive prosecution claim analysis must be whether "as a practical matter, there is **[**67]** a realistic or reasonable likelihood of prosecutorial conduct that would not have occurred but for the hostility or punitive animus" towards defendants due to their exercise of constitutional rights. *United States v. P.H.E., Inc., 965 F.2d 848, 858 (10th Cir. 1992)*(quoting *United States v. Raymer, 941 F.2d 1031, 1042 (10th Cir. 1991)*. "The analysis is directed to determine *how the decision to prosecute was actually made in the case under consideration." P.H.E., 965 F.2d at 858* (emphasis ours).

---

[9] Pursuant to *FED. R. EVID. 201(b)(2)*, the Court hereby takes judicial notice of the fact that during Martinez and Defendant's tenure at the PRDOJ, at least three other mergers have taken place. First, the sale of Puerto Rico Cement Co. this past year to Cemex, S.A., a Mexican company. Also, V. Suarez & Co. acquired Cadierno Corp. in 2001. Finally, Grupo Gloria, a Peru-based company has recently signed an agreement with Dean Foods Co., parent company to Suiza Foods, to acquire all the operations of Suiza. This foreign capital acquisition of a local company that covers two-thirds of the local fresh-milk market, has not been under the scrutiny of the PRDOJ even though their agreement was signed in early November 2002, after the PRDOJ and the government became aware of potential public policy and political concerns that can ensue as a result of this type of transaction. No evidence was introduced with regards to the PRDOJ's oversight of any of these recent transactions. See Jose L. Carmona, Ferre-Rangel: Decision to Sell Puerto Rican Cement Difficult, Caribbean Business, Construction, June 20, 2002, available at *http://prwow.com/html/cbarchive.asp;* CB & WOW News, V. Suarez Acquires Cadierno Corp., Caribbean Business, Retail, May 10, 2001, available at *http://prwow.com/html/cbarchive.asp.;* CB & WOW News, Dean Foods signs agreement to sell Suiza to Grupo Gloria, Caribbean Business, Retail, November 14, 2002, available at *http://prwow.com/html/cbarchive.asp*.

[10] As has been evident throughout this discussion section, the claims raised in this case challenge the Secretary's pretextual enforcement of the Puerto Rico Anti-Monopoly Act, not validity of the statute itself.

[*419] ***HN11***[] To succeed in a vindictive enforcement claim a plaintiff must prove that (1) he or she exercised a protected right; (2) the prosecutor or state official had a stake in the exercise of that right; (3) the prosecutor's or state official's conduct was unreasonable; **[**68]** and (4) the prosecution or state enforcement "was initiated with the intent to punish the plaintiff for the exercise of the protected right." *Futernick, 78 F.3d at 1056 n.7*.

Plaintiffs in this case are exercising their rights under the Commerce Clause to be market participants free from impositions of state protectionism. In refusing to abdicate them, Plaintiffs exercised their constitutional rights under the Commerce Clause. They did not yield to the Secretary's attempt to impose unconstitutional conditions on their transaction. The Secretary also violates Plaintiffs' right to equal protection under the law when she attempts to extract from them a consent decree that in effect amends the labor laws applicable to them as employers.

The Secretary had a stake in the Plaintiff's exercise of these rights because it meant that she would not be able to satisfy those who were exerting pressures on her to enjoin the merger transaction. She and her administration had a political stake in the transaction because while trying to give the impression that they were protecting the public policy and people of Puerto Rico they were gaining political support.

The Secretary's conduct **[**69]** towards Plaintiffs was, to say the least, unreasonable and also retaliatory and spiteful. The PRDOJ began demanding concessions from Plaintiffs in April 2002. Once Wal-Mart agreed to yield to one request, they would make another one and consequently come up with more and more requirements. In August 2002, Plaintiffs thought they had concluded their negotiations with the PRDOJ. Yet, after October the Secretary began making certain demands under the guise of continuing negotiations. Suddenly, the agreed terms of the VAL were no longer acceptable to the PRDOJ. She once again wanted to make changes to the agreements that entailed onerous submissions on behalf of Plaintiffs and that evinced her retraction from previously agreed matters.

The evidence suggests that it was around the time when she began to get the most resistance from Plaintiffs, that the Secretary directed her staff to prepare the state court complaint. The PRDOJ received much resistance from Plaintiffs with regards to the demand for a fairness opinion letter and the requirement that Plaintiffs maintain Amigo's current labor force. As has been discussed at length above the request for a fairness opinion letter was absolutely **[**70]** unreasonable. See *supra at 27-30*. Moreover, the other two conditions which remained unresolved at the closing of the transaction were not only unreasonable but also unconstitutional. Defendant's irrationality in making such demands and attempting to justify them pursuant to the public policy of Puerto Rico is one of the many indications found in the facts of this case that leaves this Court no option but to conclude that these were synchronized actions taken as a result of Plaintiffs resistance to Defendant's extortion efforts. Since Plaintiffs were not acquiescing to Defendant's demands, she retracted her earlier approval of the VAL and of the divestiture areas so she could have pretextual justifications to file her complaint pursuant to the local anti-monopolistic laws.

There was a certain suspicious aspect present during the final stages of the negotiations when many obstacles were put on Plaintiffs' transaction. These were, amongst others, the late request for a **[*420]** fairness opinion, the last minute amendments to an already agreed upon Voluntary Assurance Letter, the failure to mention at any point before filing the state court complaint any antitrust issues in geographical areas **[**71]** other than those that formed the basis for the FTC mandated divestitures, and the switch from legal to political concerns. Construed together, these series of developments reveal why those obstacles were imposed on Plaintiffs and suggests that Defendant's state lawsuit is a sham which seeks to further harass Plaintiffs and finds no support in any of the provisions of the local anti-monopolistic laws.

Soon after the PRDOJ's agenda shifted in the Fall of 2002 from a focus on legal issues to one on political issues, Defendant engaged in a desperate attempt to not only please everyone who was pressing her one way or the other, but to intimidate and coerce Plaintiffs into submissions that fall well beyond the scope of the anti-monopolistic laws of Puerto Rico. This represents a clear abuse of the judicial process and of state endowed powers that violate fundamental rights of Plaintiffs, who became targets simply because they would not yield to unconstitutional demands. The lawsuit filed in state court further burdens Plaintiffs with legal defense costs and threat of liability, and it also intimidates in trying to convince them to agree to the unconstitutional conditions to which, in Defendant's **[**72]** own words, they have not "submitted."

Ultimately, the case before this Court is not strictly about antitrust issues, or the commerce clause, or due process or equal protection. Instead, it is about a state official who has attempted to misuse and abuse state power to violate Plaintiffs' constitutional rights. ***HN12***[] "The purpose of *§ 1983* as well as the other Civil Rights provisions is to provide a federal remedy for the deprivation of federally guaranteed rights in order to enforce more perfectly federal limitations on unconstitutional state action." *Jobson v. Henne, 355 F.2d 129, 133 (2nd Cir. 1966)*.

Irreparable Harm

The Court finds that without a preliminary injunction Wal-Mart would suffer irreparable harm in both economic and non-economic form. The injunctive relief sought by Defendant in the Puerto Rico courts does not seek to prevent a business transaction from taking place; rather, the Secretary seeks to reverse a transaction that has already taken place. Wal-mart would thus be forced to halt and/ or reverse any cooperation or integration activity with Amigo it has begun so far. This potential course of action affects Wal-Mart in diverse ways. First, **[**73]** the delays and uncertainties affect employee morale and customer trust. Employee uneasiness after ten months of rumors about a impending merger would be heightened by a further, and potentially prolonged, delay. This uneasiness will likely permeate the delivery of the services to Amigo customers. In addition to the effect on employee morale and the delivery of services to customers, the Defendant's attempt to impede the transaction will surely damage Wal-Mart's reputation arising from the unlawful and bogus enforcement of the Puerto Rico antitrust laws. Wal-Mart has carefully built its reputation in the ten years it has conducted business in Puerto Rico, and that reputation-easier to lose than to rebuild-would erode slowly. Third, Amigo faces the potential loss of their current distribution center, the lease of which expires on March 2004. The merger between Amigo and Wal-Mart envisioned the use of a joint distribution center. With a prolonged halt in the integration of Wal-Mart and Amigo, however, the difficulties in establishing an independent distribution **[*421]** center before the current lease expires jeopardizes Amigo's sustained operation.

The deprivation of Wal-Mart constitutional **[**74]** rights, however, is the utmost irreparable harm in this case. ***HN13***[] A presumption of irreparable harm flows from and is triggered by an alleged deprivation of constitutional rights. See *Jolly v. Coughlin, 76 F.3d 468, 482 (2d Cir. 1996)*; *Mitchell v. Cuomo, 748 F.2d 804, 806 (2d Cir. 1984)*. If the Secretary's actions indeed violate Wal-Mart's constitutional rights, this deprivation must be stopped promptly. The unacceptable alternative is to subject Wal-Mart to an unlawful enforcement action, and once the deprivation of their constitutional rights has taken place, have this Court intervene. Having proper jurisdiction over this case, it is necessary to prevent the deprivation now, instead of trying to offer redress after the deprivation has taken its toll.

The Public Interest

We live in a system of laws, not men. Thus, ***HN14***[] while the promotion of vigorous competition in the Puerto Rican economy is a legitimate public policy, it cannot belittle another unceasing public interest: guaranteeing the rule of law and preventing deprivations of constitutional and civil rights under color of law. To preserve the rule of law the government must act not only **[**75]** as an enforcer, but as a guiding light. For as Justice Brandeis once declared: "In a government of laws, existence of the government will be imperilled if it fails to observe the law scrupulously. Our government is the potent, the omnipresent teacher. For good or for ill, it teaches the whole people by its example." See *Olmstead v. United States, 277 U.S. 438, 485, 72 L. Ed. 944, 48 S. Ct. 564 (1928)* (Brandeis, J., dissenting).

The actions by the Department of Justice against Wal-Mart not only fall short of being a guiding light, they poison the trust that the people must have in its legal and political system. The government cannot hide under the guise of its legitimate enforcement authority to deprive the citizens of this Nation of their constitutional rights. Contrary to the Secretary's assertions, she is not just a negotiator seeking the best deal; she is a state actor and, more specifically, she represents the prosecutorial arm of the state with all its power and authority which in this case has been severely misused. ***HN15***[] When the prosecutorial arm of the state uses its power to coerce private parties into abdicating their constitutional right, not only is due process **[**76]** and equal protection of law denied, but the trust in our processes and system of laws diminishes. It is this public interest in guaranteeing due process and preserving the trust in the rule of law that the Court furthers with this preliminary injunction.

The parties that entered into this transaction recognized that the process would entail scrutiny by a federal and a state agency. The federal agency, fully capable as it is to review this type of transaction and having been instituted for that purpose, made a careful examination of the Wal-Mart/ Amigo merger proposal and determined that it complied with federal antitrust laws from which the local laws minimally deviate. ***HN16***[] It is in the best interest of the people of Puerto Rico that under circumstances such as this one, where a federal and a state agency are conducting parallel investigations and one has more resources available to it than the other, their government recognizes with full faith and credit the decisions of a federal agency such as the FTC when there is no indication that such decision was incorrect or unjust. Moreover, it is also in the best interests of the people of Puerto Rico that their government refrain from engaging **[**77]** in arbitrary and irrational enforcement of the **[*422]** laws, specially when these are used contrary to their own purposes.

The Balance of Equities

Considering the Plaintiff's irreparable harm and the strong public interests in favor of supporting the status quo, the harm caused to the Defendant by the issuance of a preliminary injunction is less considerable than the harm to the Plaintiffs. First, the preliminary injunction does not prevent the Secretary of Justice from ultimately enforcing Puerto Rico's antitrust laws. It merely preserves the status quo to ensure that no deprivation of constitutional rights takes place. If the Secretary's actions are found lawful, she will be free to enforce the applicable laws and seek the remedies she deems appropriate. Second, there is no evidence that a mere delay in legal action in state court will cause disproportionate harm to the Secretary of Justice. As this Court suggested in an earlier opinion in this case, Defendant waited quite a long time, seven (7) months to be exact, before raising many of her "primary" and "fundamental" concerns with the Wal-Mart/ Amigo transaction. If this Court were ultimately to decide in her favor, she **[**78]** will be able to accomplish the same results than she could in the very near future. The possibility of further divesting other stores if she was in fact correct about the remaining competition issues in other geographical areas, or of reselling those that were already divested will be as present then as it is now. The opportunity for Plaintiffs to vindicate their rights before going through a process that itself violates those rights will be long gone if not addressed in this lawsuit with the provision of preliminary injunctive relief.

CONCLUSION

The above discussion demonstrates that Plaintiffs would likely prevail on their contention that unconstitutional conditions were demanded and requested by the Secretary of Justice in order to approve the acquisition of Supermercados Amigo, Inc. by Wal-Mart Puerto Rico, Inc and the divestiture of the four Amigo stores to Supermercados Maximo, Inc. Furthermore, the evidence before the Court leads the Court to conclude that the events that transpired from February 5 to December 5, 2002 show that Plaintiffs will suffer irreparable injury if the Secretary is not enjoined from continuing to prosecute the lawsuit filed in the Court of **[**79]** First Instance, Superior Division of San Juan against the Plaintiffs herein. Finally, consideration of the comparative equities in this case, including the public interest, weigh in favor of Plaintiffs.

Therefore, based on the findings entered herein and the special emphasis placed on the "likelihood of success" prong, as required by First Circuit case law, the Court rules in favor of Plaintiffs in their request for a preliminary injunction and the same is **GRANTED.**

Defendant Anabelle Rodriguez, Secretary of Justice of the Commonwealth of Puerto Rico, her lawyers, agents, employees, or any other person acting in concert with her is hereby enjoined, prohibited and/ or forbidden to thwart, impede, or interfere with the acquisition of Supermercados Amigo, Inc. by Wal-Mart Puerto Rico, Inc. and the divestiture by Wal-Mart Puerto Rico, Inc. of four Amigo stores to Supermercados Maximo, Inc.; or to seek a stay in any court of the Commonwealth of Puerto Rico directed to the Plaintiffs to impede, interfere, or forbid them from operating the Supermercados Amigo stores as a wholly owned subsidiary of Wal-Mart Puerto Rico, Inc.

IT SO ORDERED.

SO ORDERED.

HN3[] **Motions to Dismiss, Failure to State Claim**

In considering a motion filed under *Mass. R. Civ. P. 12(b)(6)*, a court is limited to the contents of the complaint itself.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] **Motions to Dismiss, Failure to State Claim**

A complaint cannot be dismissed pursuant to *Mass. R. Civ. P. 12(b)(6)* unless it appears certain that the complaining party is not entitled to relief under any state of facts which could be proved in support of the claim. The standard is applied in an exceedingly liberal manner. Nevertheless, the complaint must put the adversary on notice of the essential elements of the claim the pleader intends to assert. It is not enough that a viable claim lurks somewhere in conclusory descriptions of a general scenario, which could be dominated by unpleaded facts.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] **Regulated Practices, Trade Practices & Unfair Competition**

Violation of a specific statute that does not itself permit private recovery may give rise to a private claim under *Mass. Gen. Laws ch. 93A* if the violation amounts to an unfair method of competition or an unfair or deceptive practice independently prohibited by *Mass. Gen. Laws ch. 93A, § 2* and if recovery under ch. 93A is compatible with the objectives and enforcement mechanisms the underlying statute contains. Not every statutory violation amounts either to unfair competition or to an unfair practice. Therefore, before undertaking the often complex task of deciding whether maintenance of a private action under ch. 93A is congruent with an underlying statute or statutes, one must determine whether the statutory violation also violates ch. 93A, *§ 2*.

HN9[] **Public Enforcement, US Federal Trade Commission Actions**

15 U.S.C.S. § 13(a) prohibits certain price discrimination by competing sellers, so-called discrimination at the primary line.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN10[] **Price Discrimination, Competitive Injuries**

At the primary line, price discrimination is an unfair trade practice only if the discrimination has an adverse impact on competition itself, not simply an adverse impact on competitors.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

HN11[] **Attempts to Monopolize, Elements**

At the primary line, the essence of a viable claim for price discrimination under *§ 2(a)* of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, and, thus, under § 5(a)(1) of the Federal Trade Commission Act, *15 U.S.C.S. § 45(a)(1)*, is that a business rival has priced its products in an unfair manner with an object to eliminate or retard competition and thereby gain and exercise control over prices in the relevant market. The injury thereby created is similar to the injury produced by violating *§ 2* of the Sherman Act, *15 U.S.C. § 2*, which prohibits monopolizing a market or attempting to do so. Accordingly, proof of prohibited discrimination at the primary line requires proof of two elements, i.e., that the rival's prices are below an appropriate measure of the rival's cost and the rival has a reasonable prospect that its scheme will ultimately allow it to charge noncompetitively high, or supercompetitive, prices sufficient to recoup the amounts expended on the predation, including the time value of the money invested in it. Recoupment is the ultimate object of an unlawful predatory pricing scheme; it is the means by which a predator profits from predation.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN12[] **Price Discrimination, Competitive Injuries**

The risk of supercompetitive prices spawned by predation is the social harm that justifies prohibiting primary line discrimination. Without that harm, or its realistic prospect, even predatory pricing is an insufficient trigger for regulatory intervention because such pricing produces lower aggregate prices in the market, and consumer welfare is enhanced. Although unsuccessful predatory pricing may encourage some inefficient substitution toward the product being sold at less than its cost, unsuccessful predation is in general a boon to consumers.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN13[] **Price Discrimination, Competitive Injuries**

Price discrimination without an adverse impact on competition, and not simply on competitors, is not an unfair method of competition or an unfair trade practice within the meaning of *Mass. Gen. Laws ch. 93A, § 2*, at least when the discrimination occurs at the primary line.

Headnotes/Summary

Headnotes

Counsel: Robert S. Frank, Jr., for the plaintiff.

Bruce W. Edmands for Merrimack Valley Distributing Company, Inc.

William D. O'Brien for Atlas Liquors, Inc.

Judges: Present: Brown, Greenberg, & McHugh, JJ.

Opinion by: McHUGH

Opinion

[*853] [480]** McHUGH, J. Reduced to essentials, the question in this case is whether *G. L. c. 93A, § 11*, allows the plaintiff, a liquor wholesaler, to recover damages from a competing wholesaler who allegedly violated the price discrimination provisions of *G. L. c. 138, § 25A*, and from a retailer who allegedly sought and benefitted from the discrimination. A judge in the Superior Court said "no," and allowed the defendants' motion to dismiss. We agree that, in this case, the answer is "no," although we do **[*854]** so for reasons different from those upon which the motion judge relied. Consequently, we affirm the judgment dismissing the plaintiff's complaint.

[481]** Extracted from inconsequential diversions, the background is as follows. The plaintiff, Whitehall **[***2]** Company Limited, Inc., is a wholesaler of alcoholic beverages licensed under the provisions of *G. L. c. 138, § 18*. Merrimack Valley Distributing Company, Inc. (Merrimack), one of the two defendants, is a competing wholesaler, also licensed under *G. L. c. 138, § 18*. Atlas Liquors, Inc. (Atlas), the other defendant, is a licensed liquor retailer. See *G. L. c. 138, § 15*.

General Laws c. 138, § 25A, the statutory provision at the center of the present controversy, [2] **[***3]** is part of an extensive scheme under c. 138 for regulating distribution of alcoholic beverages. See generally *Miller Brewing Co. v. Alcoholic Bevs. Control Commn., 56 Mass. App. Ct. 801, 780 N.E.2d 80 (2002)*. As part of that scheme, ***HN1***[] *§ 25A*(*a*) prohibits brand owners and wholesalers from discriminating in price or in discounts for their customers'

---

[2] The section provides as follows:

> ***HN2***[] "No licensee authorized under this chapter to sell alcoholic beverages to wholesalers or retailers shall --
>
> "(a) Discriminate, directly or indirectly, in price, in discounts for time of payment or in discounts on quantity of merchandise sold, between one wholesaler and another wholesaler, or between one retailer and another retailer purchasing alcoholic beverages bearing the same brand or trade name and of like age and quality;
>
> "(b) [Deleted by St. 1970, c. 140, *§ 1*.]
>
> "All price lists or price quotations made to a licensee by a wholesaler shall remain in effect for at least thirty days after the establishment of such price list or quotation. Any sale by a wholesaler of any alcoholic beverages at prices lower than the price reflected in such price list or quotation within such thirty day period shall constitute price discrimination under this section."

G. L. c. 138, § 25A, as amended through St. 1971, c. 494.

volume purchases or prompt payments. [3] The statute provides that violations of *§ 25A* can lead to suspension of the violator's license, *G. L. c. 138, § 23*, **[*855]** or to imposition of criminal penalties, *G. L. c. 138, §§ 2*, *62*.

[*4] [**482]** In November, 1996, the plaintiff commenced the present action in Superior Court alleging that Merrimack had engaged in unfair competition and had committed an unfair or deceptive practice, all in violation of *G. L. c. 93A, § 2*, by failing to adhere to the *§ 25A* antidiscrimination provisions. [4] **[***5]** The complaint also alleged that Atlas had committed similar violations by soliciting and receiving discriminatory discounts. See **[*856]** *G. L. c. 93A, § 11*. [5] The plaintiff's complaint sought declaratory and injunctive relief as well as damages, compensatory and punitive.

Merrimack and Atlas moved to dismiss the complaint under *Mass.R.Civ.P. 12(b)(6)*, 365 Mass. 754 (1974). [6] **[***6]** After initially denying the motion pending the outcome of related Federal litigation, see note 3, *supra*, the judge allowed it and judgment of dismissal entered. [7]

---

[3] The final paragraph of *§ 25A* is a so-called "post and hold" provision that requires those who sell alcoholic beverages to wholesalers or retailers to submit to the Alcoholic Beverages Control Commission (ABCC) periodic schedules of prices at which they are prepared to sell such beverages and then to maintain those prices for a period of thirty days after the schedule becomes effective. In *Canterbury Liquors & Pantry v. Sullivan, 16 F. Supp. 2d 41 (D. Mass. 1998)*, the United States District Court for the District of Massachusetts held that the post and hold provision was a per se violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*, because that provision allowed sellers to set prices without effective State oversight and consequently did not qualify for a "State action" immunity from the antitrust laws under the principles articulated by the Supreme Court of the United States in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. See *Canterbury Liquors & Pantry v. Sullivan, 999 F. Supp. 144 (D. Mass. 1998)*. See generally *California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc., 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*. In *Canterbury Liquors & Pantry v. Sullivan, 16 F. Supp. 2d at 44*, the Federal District Court reached that conclusion on the basis of a Ninth Circuit decision, *Miller v. Hedlund, 813 F.2d 1344 (9th Cir. 1987)*, cert. denied, *484 U.S. 1061, 98 L. Ed. 2d 983, 108 S. Ct. 1018 (1988)*, and a dissent in a Second Circuit decision, *Battipaglia v. New York State Liquor Authy., 745 F.2d 166, 179 (2d Cir. 1984)* (Winter, J., dissenting), cert. denied, *470 U.S. 1027, 84 L. Ed. 2d 782, 105 S. Ct. 1393 (1985)*, but without citing *M. H. Gordon & Son, Inc. v. Alcoholic Bevs. Control Commn., 386 Mass. 64, 70-73, 434 N.E.2d 986 (1982)*, which held that the ABCC did exercise sufficient supervision over execution of the post and hold provisions of *G. L. c. 138, §§ 25B*, *25D*, to immunize them from the antitrust laws. In any event, the Federal District Court entered judgment declaring that the *§ 25A* post and hold provision and the implementing regulations found in *204 Code Mass. Regs. §§ 6.00-6.07*, were invalid and unenforceable. The ABCC did not appeal and, after dismissal of an appeal brought by another party, see *Sea Shore Corp. v. Sullivan, 158 F.3d 51, 59 (1st Cir. 1998)*, the judgment became final.

[4] When filed, the complaint also alleged that the defendants had violated the *§ 25A* "post and hold" provision. See note 3, *supra*. The Federal litigation over that provision was pending at the time and the plaintiff had intervened in that litigation as a plaintiff to urge that the provision violated the Sherman Act. When the plaintiff and others prevailed in the Federal litigation, the plaintiff was given leave to amend the Superior Court complaint to eliminate the "post and hold" claim. The amended complaint is the subject of the present appeal and contains no reference to alleged "post and hold" violations.

In view of the result we reach on the merits, we need not explore the defendants' contention that the plaintiff's representations to the Superior Court about its intentions after resolution of the Federal action estopped it from pursuing the present claims.

[5] The plaintiff named nine additional wholesalers as defendants in the action, making similar allegations against each and claiming that Merrimack and the other nine were involved in a conspiracy to violate *§ 25A* and "the laws which govern the sale of alcoholic beverages in Massachusetts." The plaintiff likewise named three other retailers, making allegations similar to those it made regarding Atlas. Read as a whole, the complaint alleged that the wholesalers were giving the retailers, and the retailers were seeking and receiving from the wholesalers, forbidden discounts or that, put somewhat differently, competition between wholesalers was impermissibly flourishing. The other wholesalers and retailers settled and consequently play no role in this appeal.

[6] At some point before the motion to dismiss was allowed, the plaintiff filed affidavits dealing with discovery issues and with certain aspects of the plaintiff's damages claim. ***HN3***[] In considering a motion filed under *Mass.R.Civ.P. 12(b)(6)*, however, the court is limited to the contents of the complaint itself. See *Epstein v. Seigel, 396 Mass. 278, 278-279, 485 N.E.2d 947*

Our analysis begins with the familiar. **HN4**[] A complaint cannot be dismissed pursuant to Mass.R.Civ.P. 12(b)(6) "unless it appears certain that the complaining party is not entitled to relief under any state of facts which could be proved in support of the claim." Harvard Law Sch. Coalition for Civil Rights v. President & Fellows of Harvard College, 413 Mass. 66, 68, 595 N.E.2d 316 (1992), quoting from Rae v. Air-Speed, Inc., 386 Mass. 187, 191, 435 N.E.2d 628 (1982). We apply that standard in an "exceedingly liberal manner." Brum v. Dartmouth, 44 Mass. App. Ct. 318, 321, 690 N.E.2d 844 (1998). Accord Coolidge Bank & Trust Co. v. First Ipswich Co., 9 Mass. App. Ct. 369, 370-371, 401 N.E.2d 165 (1980). **[***7]** Nevertheless, the **[**483]** complaint must put the **[*857]** adversary on notice of the essential elements of the claim the pleader intends to assert. It is not enough that a viable claim lurks somewhere in "conclusory descriptions of a 'general scenario which could be dominated by unpleaded facts.'" Schaer v. Brandeis Univ., 432 Mass. 474, 478, 735 N.E.2d 373 (2000), quoting from Judge v. Lowell, 160 F.3d 67, 77 (1st Cir. 1998).

Here, the plaintiff alleges that it has been damaged by price discrimination, pure and simple. Although it claims that the damaging price discrimination is forbidden by G. L. c. 138,

§ 25A, it does not maintain that it has a right of action under that statute. [8] **[***9]** Instead, it asserts that to engage in discrimination banned by § 25A is to engage in an unfair method of competition and commit an unfair trade practice in violation of G. L. c. 93A, § 2, and that G. L. c. 93A, § 11, provides a right of action to recover resulting damages and more. Accordingly, the question for us is whether, **[***8]** without more, an allegation that a competing defendant has engaged in price discrimination forbidden by G. L. c. 138, § 25A, and that the plaintiff lost sales as a consequence, is enough to state a viable claim for relief under G. L. c. 93A, § 11. [9]

[*858] **HN5**[] Violation of a specific statute that does not itself permit private recovery may give rise to a private claim under c. 93A if the violation amounts to an unfair method of competition or an unfair or deceptive practice independently prohibited by G. L. c. 93A, § 2, and if recovery under c. 93A is compatible with the objectives and enforcement mechanisms the underlying statute contains. See Dodd v. Commercial Union Ins. Co., 373 Mass. 72, 76-78, 365 N.E.2d 802 (1977); Ciardi v. Hoffmann-La Roche, Ltd., 436 Mass. 53, 62-64, 762 N.E.2d 303 (2002).

(1985). Nothing in the record suggests that the motion judge considered the contents of those affidavits in ruling on the motion to dismiss, and their content likewise plays no role in our review.

[7] Because of the result we reach regarding the plaintiff's claim against Merrimack, we need not separately assess Atlas's claim that it cannot be liable in any circumstances for receiving the benefits of any price discrimination because G. L. c. 138,

§ 25A, is aimed solely at brand owners and wholesalers. But, c. 93A § 11, not c. 138, § 25A, per se, is the focus of the plaintiff's complaint. As to that, see note 11, *infra*.

[8] Accordingly, we are not required to decide whether such an action exists. We note, however, that c. 138 contains no express provision for a private right of action and that § 25A was added to the General Laws by St. 1946, c. 304, the emergency preamble to which noted that the acts the statute prohibited "contributed to a disorderly distribution of alcoholic beverages" and that deferred operation of the statute would "be contrary to the interests of temperance." See Supreme Malt Prod. Co. v. Alcoholic Bevs. Control Commn., 334 Mass. 59, 62, 133 N.E.2d 775 (1956); Miller Brewing Co. v. Alcoholic Bevs. Control Commn., 56 Mass. App. Ct. at 807. But cf. Capital Distrib. Co. v. Heublein, Inc., 50 Mass. App. Ct. 339, 342, 737 N.E.2d 498 (2000). We also note that G. L. c. 138, § 23, provides that the licensing scheme at the heart of the chapter's regulatory mechanism is not intended to create rights for individuals engaged in the liquor distribution business but is instead designed to serve the public need and common good. Finally, we note that each reported case dealing with the subject has rejected private efforts to coax a right of action out of some alleged violation of c. 138. Cimino v. Milford Keg, Inc., 385 Mass. 323, 327, 431 N.E.2d 920 (1982) (§ 69); Gottlin v. Herzig, 40 Mass. App. Ct. 163, 166-167, 662 N.E.2d 706 (1996) (§ 26); Wine & Spirits Wholesalers of Massachusetts, Inc. v. Net Contents, Inc., 10 F. Supp. 2d 84, 86-87 (D. Mass. 1998) (general violations of c. 138). See generally *All* Brands Container Recovery, Inc. v. Merrimack Valley Distrib. Co., 54 Mass. App. Ct. 297, 300-303, 764 N.E.2d 931 (2002).

[9] The plaintiff could have, but did not, move to amend the complaint after the motion to dismiss was allowed. See Mass.R.Civ.P. 15(a), 365 Mass. 761 (1974); Smith & Zobel, Rules Practice § 15.4 (1974). It chose not to seek an amendment and elected to stand on the theory expressed in the amended complaint as initially pleaded.

Compare *Reiter Oldsmobile, Inc. v. General Motors Corp., 378 Mass. 707, 393 N.E.2d 376 (1979)*; *Cabot Corp. v. Baddour, 394 Mass. 720, 477 N.E.2d 399 (1985)*; **[***10]** *DePasquale v. Ogden Suffolk Downs, Inc., 29 Mass. App. Ct. 658, 662, 564 N.E.2d 584 (1990)*. Obviously, however, not every statutory violation amounts either to unfair competition or to an unfair practice. Therefore, before **[**484]** undertaking the often complex task of deciding whether maintenance of a private action under c. 93A is congruent with an underlying statute or statutes, one must determine whether the statutory violation also violates c. 93A, *§ 2*. See *Polaroid Corp. v. Travelers Indem. Co., 414 Mass. 747, 754, 610 N.E.2d 912 (1993)*.

In determining whether price discrimination of the type the plaintiff alleges here violates *§ 2*, we are guided by two express directions contained in c. 93A itself. First,, c. 93A *§ 2*(*b*), states that, in any action brought, inter alia, under *§ 11*, we are to ***HN6***[] "be guided by the interpretations given by the Federal Trade Commission and the Federal Courts to section 5(a)(1) of the Federal Trade Commission Act (*15 U.S.C. 45(a)(1)*), as from time to time amended." The Federal Trade Commission (FTC) Act broadly prohibits ***HN7***[] "unfair methods of competition . . . and unfair or deceptive acts or practices. **[***11]** "[10] *15 U.S.C. § 45(a)(1)*. Second, c. 93A, *§ 11*, provides that, in determining whether challenged conduct amounts to an ***HN8***[] "unfair method[] of competition," **[*859]** we are to consider the provisions of G. L. c. 93, the Commonwealth's antitrust statute, in addition to FTC and judicial interpretations of the FTC Act.[11]

[*12]** At the Federal level, the FTC has interpreted and applied § 5(a)(1) of the FTC Act to prohibit price discrimination if that discrimination is outlawed by *§ 2(a)* of the Robinson-Patman Act, *15 U.S.C. § 13(a)*.[12] **[***13]** In turn, *§ 2(a)* ***HN9***[] prohibits certain price discrimination by competing sellers, so-called discrimination at the primary line.[13] See **[**485]** *Federal Trade Commn. v. Anheuser-Busch, Inc., **[*860]** 363 U.S. 536, 542-543, 4 L. Ed. 2d 1385, 80 S. Ct. 1267 (1960)*. That is the type of discrimination the plaintiff alleges here.

---

[10] Although the FTC Act "has heavy historical roots in ***antitrust law***," *Purity Supreme, Inc. v. Attorney Gen., 380 Mass. 762, 773 n.15, 407 N.E.2d 297 (1980)*, the FTC's powers are not constrained by the antitrust laws' precise contours. See *PMP Assocs., Inc. v. Globe Newspaper Co., 366 Mass. 593, 595-596, 321 N.E.2d 915 (1975)*; *Ciardi v. Hoffmann-La Roche, Ltd., 436 Mass. at 68-70* (Sosman, J., dissenting). See also note 11, *infra*.

[11] The cited portion of *§ 11* is one of the exceptions countenanced by the broad provision of *G. L. c. 93, § 14A*, that "the Massachusetts Antitrust Act shall have no effect upon the provisions of [c. 93A], except as explicitly provided in said [c. 93A]."

[12] When it adopted the broad language of § 5(a)(1) of the FTC Act, Congress "considered, and rejected, the notion that it reduce the ambiguity of the phrase 'unfair methods of competition' by tying the concept of unfairness to a common-law or statutory standard or by enumerating the particular practices to which it was intended to apply." *Federal Trade Commn. v. Sperry & Hutchinson Co., 405 U.S. 233, 240, 31 L. Ed. 2d 170, 92 S. Ct. 898 (1972)*. The FTC nevertheless has, recently at least, exercised sparingly the enforcement and interpretive powers that broad language invites. As the FTC explained in *In re Gen. Foods Corp., 103 F.T.C. 204, 365 (1984)*,

> "While Section 5 may empower the [FTC] to pursue those activities which offend the 'basic policies' of the antitrust laws, we do not believe that power should be used to reshape those policies when they have been clearly expressed and circumscribed" (footnote omitted).

See, e.g., *E.I. Du Pont De Nemours & Co. v. Federal Trade Commn., 729 F.2d 128, 137-138 (2d Cir. 1984)*. In the area nominally covered by the Robinson-Patman Act, the FTC's only significant movement beyond the Act itself has occurred in the area of knowing buyer inducements of discriminatory promotional allowances and services, which, unlike knowing inducements of prohibited discriminatory prices, the Act itself does not prohibit. See *15 U.S.C. § 13(f)*. See generally *Grand Union Co. v. Federal Trade Commn., 300 F.2d 92 (2d Cir. 1962)*; *Giant Food, Inc. v. Federal Trade Commn., 113 U.S. App. D.C. 227, 307 F.2d 184 (D.C. Cir. 1962)*, cert. denied, ***372 U.S. 910, 9 L. Ed. 2d 718, 83 S. Ct. 723 (1963)***; Scher, Antitrust Advisor

§§ 4.01-4.02, 4.39 (4th ed. rev. 2001).

[13] *Section 2(a)* also prohibits discrimination that injures competitors of a seller's favored customers (secondary line competition), *Federal Trade Commn. v. Morton Salt Co., 334 U.S. 37, 42-44, 92 L. Ed. 1196, 68 S. Ct. 822, 44 F.T.C. 1499 (1948)*, or has an adverse impact on competing customers of the favored and disfavored purchasers. *Falls City Indus., Inc. v. Vanco Bev., Inc.,*

HN10[] At the primary line, however, price discrimination is an unfair trade practice only if the discrimination has an adverse impact on competition itself, not simply an adverse impact on competitors. [14] As one commentator has explained, **[***14]**

> "injury to competitors in the primary line may well be caused by competition which is 'fair.' Unless the lower price is below marginal cost, or unless so many sellers are driven out of the business that, in view of the power and purpose of the seller, a continuation of the discrimination would be inconsistent with the healthy continuation of a competitive market, the practice does not possess the requisite degree of unfairness necessary to fall within the policy of section 5 [of the FTC Act]."

Reeves, Toward a Coherent Antitrust Policy: The Role of Section 5 of the Federal Trade Commission Act in Price Discrimination Regulation, 16 B.C. Indus. & Com. L. Rev. 151, 184 n.161 (1975). See **[***15]** *Anti-Monopoly, Inc*. v. *Hasbro, Inc., 958 F. Supp. 895, 905 (S.D.N.Y. 1997)*.

Put another way, ***HN11***[] at the primary line, the essence of a viable claim for price discrimination under *§ 2(a)* of the Robinson-Patman Act, and, thus, under § 5(a)(1) of the FTC Act, is that "[a] business rival has priced its products in an unfair manner with an object to eliminate or retard competition and thereby gain and exercise control over prices in the relevant market." *Brooke Group Ltd*. v. *Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)*. The injury thereby created is similar to the injury produced by violating *§ 2* of the Sherman Act, *15 U.S.C. § 2*, which prohibits monopolizing a market or attempting to do so. Accordingly, proof of prohibited discrimination at the primary line requires proof of two elements, i.e., that (a) the rival's prices are below an appropriate measure of the rival's **[*861]** cost, *Brooke Group Ltd*. v. *Brown & Williamson Tobacco Corp., supra*, and (b) the rival has a reasonable prospect that its scheme will ultimately allow it to charge noncompetitively high, or supercompetitive, **[***16]** prices sufficient to recoup "the amounts expended on the predation, including the time value of the money invested in it." *Id. at 225*. In the last analysis, "recoupment is the ultimate object of an unlawful predatory pricing scheme; it is the means by which a predator profits from predation." *Id. at 224*.

HN12[] The risk of supercompetitive prices spawned by predation is the social harm that justifies prohibiting primary line discrimination. Without that harm, or its realistic prospect, even predatory pricing is an insufficient trigger for regulatory intervention because such pricing "produces **[**486]** lower aggregate prices in the market, and consumer welfare is enhanced. Although unsuccessful predatory pricing may encourage some inefficient substitution toward the product being sold at less than its cost, unsuccessful predation is in general a boon to consumers." *Ibid*.

At the State level, the current version of c. 93, to which, as stated, c. 93A, *§ 11*, directs the interpreter, contains no specific analog to the Robinson-Patman Act and no other specific reference to price discrimination. Until the first fourteen sections of c. 93 were revised and streamlined **[***17]** in 1978 by St. 1978, c. 459, *§ 1*, however, *G. L. c. 93, § 8*, the embodiment of St. 1912, c. 651, *§ 1* (see *Opinion of the Justices, 211 Mass. 620, 99 N.E. 294* [1912]), prohibited price discrimination carried out, inter alia, "for the purpose of destroying the business of a competitor and of creating a monopoly in any locality." Cf. *Commonwealth v. Dyer, 243 Mass. 472, 498, 138 N.E. 296 (1922)*. The pre-1978 statute thus prohibited price discrimination with an adverse impact on competition at the primary line. While old *§ 8* disappeared in the 1978 streamlining, its residuum in the current provisions of c. 93 [15] suggests that,

460 U.S. 428, 436, 75 L. Ed. 2d 174, 103 S. Ct. 1282 (1983). See generally *Godfrey v. Pulitzer Pub. Co., 276 F.3d 405, 408 n.7 (8th Cir. 2002)*; Reeves, Toward a Coherent Antitrust Policy: The Role of Section 5 of the Federal Trade Commission Act in Price Discrimination Regulation, 16 B.C. Indus. & Com. L. Rev. 151, 178-183 (1975). Those types of discrimination, and the separate analytical matrices attendant on them, are inapplicable here.

[14] At the secondary line, which this case does not involve, the Robinson-Patman Act does protect against injury to competitors. See note 13, *supra*. See also *In re Gen. Motors Corp., 103 F.T.C. 641, 701 (1984)*. See generally Scher, Antitrust Advisor § 4.03 (4th ed. rev. 2001).

at the primary line, only price discrimination **[*862]** designed to create a monopoly is an unfair practice or an unfair method of competition.

[*18]** *J. & J. Enterprises, Inc*. v. *Martignetti, 369 Mass. 535, 341 N.E.2d 645 (1976)*, a case the plaintiff cites to support its claim that c. 93A, *§ 11*, provides a private remedy for all price discrimination that violates c. 138, *§ 25A*, does not, in our view, tend in a direction different from that suggested by the FTC Act and our own c. 93. In *J. & J. Enterprises*, the plaintiff alleged that the defendants had violated several provisions of c. 138, including *§ 25A*, and sought to recover damages under c. 93A, *§ 11*. *Id. at 536-537*. The trial court allowed the defendant's motion to dismiss. The Supreme Judicial Court reversed, holding that, instead of dismissing the action, the court should have stayed all proceedings pending initiation and completion of proceedings before the ABCC. [16] *Id. at 541*.

[*19]** Critical to an understanding of *J. & J. Enterprises*, however, is that the plaintiff did not just allege serial violations of c. 138. Instead, the plaintiff alleged that the defendants had attempted to create a monopoly and had engaged in trade-restraining combinations and conspiracies, all of which were prohibited by the antitrust provisions of c. 93, *§§ 2*, *9* (now c. 93, §§ 4, **[**487]** 5). According to the complaint, the violations of c. 138 were the particular acts and practices the defendants employed in carrying out their unlawful restraints of trade. *369 Mass. at 537-538*. *J. & J. Enterprises*, thus, does not support the plaintiff's claim that price discrimination, without more, gives rise to a right of action under *§ 11* of c. 93A.

In sum, ***HN13***[] price discrimination without an adverse impact on **[*863]** competition, and not simply on competitors, is not an unfair method of competition or an unfair trade practice within the meaning of *G. L. c. 93A, § 2*, at least when the discrimination occurs, as alleged here, at the primary line. Because the complaint alleges nothing more than price discrimination and injury to the plaintiff, a competitor, the complaint was rightly dismissed. **[***20]** [17]

Judgment affirmed.

End of Document

---

[15] Disappearance of the section is consistent with two features of the new, streamlined Massachusetts Antitrust Act. First, § 5 of the new Act globally prohibited all attempts to monopolize, of which old *§ 8* violations were but one variety. Second, insofar as competition at the primary line was concerned, *G. L. c. 93, § 14F*, which had been inserted by St. 1938, c. 410, and amended by St. 1941, c. 494, and which was unaffected by the 1978 changes, prohibited certain predatory pricing, whether or not discriminatory, done with the intent to injure either competition or competitors. At the primary line, therefore, *§ 14F* already did the work of old *§ 8* and then some.

[16] Referral to the ABCC was necessary because trade practices permitted by a State agency charged with responsibility for overseeing a particular industry typically do not violate c. 93A. *SDK Med. Computer Serv. Corp*. v. *Professional Operating Mgmt. Group, Inc., 371 Mass. 117, 126-127, 354 N.E.2d 852 (1976)*. Moreover, the impact and effect of some industry practices are arcane and can be determined only with insights flowing from administrative expertise. See, e.g., *Whitehall Co., Ltd*. v. *Alcoholic Bevs. Control Commn., 7 Mass. App. Ct. 538, 389 N.E.2d 419 (1979)*; *M. H. Gordon & Son, Inc*. v. *Alcoholic Bevs. Control Commn., 14 Mass. App. Ct. 973, 438 N.E.2d 1095 (1982)*; *Somerset Importers, Ltd*. v. *Alcoholic Bevs. Control Commn., 28 Mass. App. Ct. 381, 551 N.E.2d 545 (1990)*.

[17] Given the allegations of the complaint, allegations that are tantamount to a claim that the defendants were engaged in illegal competition and not the restraint thereof, see note 5, *supra*, our decision is concerned solely with the existence in this case of a private right of action. It has no impact on the ABCC's power to enforce the price discrimination provisions of c. 138, *§ 25A*, through administrative proceedings aimed at an alleged offender's license. See *Miller Brewing Co. v. Alcoholic Bevs. Control Commn., 56 Mass. App. Ct. at 805-808*.

Brunson Communs., Inc. v. Arbitron, Inc.

United States District Court for the Eastern District of Pennsylvania

December 31, 2002, Decided

CIVIL ACTION NO. 02-3223

Reporter

239 F. Supp. 2d 550 *; 2002 U.S. Dist. LEXIS 25756 **

BRUNSON COMMUNICATIONS, INC. v. ARBITRON, INC.

Subsequent History: Reconsideration denied, reported at: Brunson Communs., Inc. v. Arbitron, Inc., 246 F. Supp. 2d 446, 2003 U.S. Dist. LEXIS 2776 (E.D. Pa. Feb. 21, 2003).

Disposition: **[**1]** Defendant's motion to dismiss amended complaint granted. Plaintiff granted leave to file second amended complaint.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN5[] Antitrust & Trade Law, Sherman Act

Section 1 of the Sherman Act, prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Commercial Law (UCC) > Sales (Article 2) > Form, Formation & Readjustment > General Overview

Contracts Law > Types of Contracts > Unilateral Contracts > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Actual Monopolization, Anticompetitive & Predatory Practices

The "very essence" of a *15 U.S.C.S. § 1* claim is the existence of an agreement. Unilateral activity by a single person or entity will not suffice. The United States Supreme Court has explained that even if a single company's conduct has the same economic effect as concerted action might have, there can be no liability under *§ 1* in the absence of agreement.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN7[] Actual Monopolization, Anticompetitive & Predatory Practices

The United States Court of Appeals for the Third Circuit has long held that a *15 U.S.C.S. § 1* plaintiff must plead the facts constituting the conspiracy, its object and accomplishment. Moreover, a general allegation of conspiracy without a statement of the facts is an allegation of a legal conclusion and insufficient of itself to constitute a cause of action. Accordingly, only allegations of conspiracy which are particularized will be deemed sufficient. To adequately allege the element of concerted activity, a plaintiff must do more than insert the word "conspiracy" into his pleading. The allegation of unspecified contracts with unnamed other entities to achieve unidentified anticompetitive effects does not meet the minimum standards for pleading a conspiracy in violation of the Sherman Act.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN8[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

A horizontal group boycott involves entities at the same level of the market structure conspiring amongst themselves, with a purpose either to exclude a person or group from the market, or to accomplish some other anti-competitive objective, or both. Group boycott cases usually involve joint efforts at persuading suppliers or customers to refuse to deal with a certain competitor.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Criminal Law & Procedure > Criminal Offenses > Inchoate Crimes > General Overview

HN9[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

Courts have refused to find a horizontal conspiracy, where a single entity or person engages in separate vertical conspiracies with multiple parties, who do not conspire amongst themselves horizontally. Courts analyze such "hub-and-spoke" scenarios under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN10[] Price Fixing & Restraints of Trade, Vertical Restraints

Some conspiracies have elements of both horizontal and vertical agreements. An example of such a hybrid is the "hub-and-spoke" conspiracy. Although some of the earlier hub-and-spoke cases have suggested at least the theoretical possibility that an actionable conspiracy might be found where there were hub and spokes but no rim, more recent cases require that a plaintiff must present evidence sufficient to allow the inference of an agreement constituting the rim of the conspiracy.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN11[] Actual Monopolization, Anticompetitive & Predatory Practices

According to the United States Supreme Court, ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *15 U.S.C.S. § 1* case. Where a defendant had no rational motive to join a conspiracy, and defendant's conduct is as consistent with permissible competition as with illegal conspiracy, the plaintiff's unspecific allegations do not support an inference of antitrust conspiracy. Thus, if the defendants had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy. In such a case, where an inference of conspiracy is "implausible," the court should dispose of the *§ 1* claim without submitting the conspiracy issue to a jury.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN12[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Though the language of *15 U.S.C.S. § 1* of the Sherman Act could conceivably encompass a broader array of activity, the United States Supreme Court has limited its application to agreements which unreasonably restrain trade. This principle has come to be known as the "rule of reason."

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN13[] Conspiracy to Monopolize, Sherman Act

In order to plead a claim that a defendant's practices violate the rule of reason under *15 U.S.C.S. § 1* of the Sherman Act, a plaintiff must allege four "elements": (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse, anti-competitive effects within the relevant product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiffs were injured as a proximate result of that conspiracy.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN14[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The United States Supreme Court has explained that, in determining the reasonableness of a restraint, the true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Reciprocal Contracts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN15[] **Practices Governed by Per Se Rule, Boycotts**

The court's inquiry as to the legality of a defendant's actions in an antitrust case must be guided by the rule of reason, unless the challenged action falls into the category of agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. Thus, where a defendant's conduct is "manifestly anticompetitive," a court may adopt a per se rule of illegality, bypassing an inquiry under the rule of reason. Courts have found such conduct as price fixing, tying arrangements, reciprocal dealing agreements and resale price maintenance to be per se unreasonable restraints of trade. Group boycotts are also often treated as per se, but the per se rule is not employed until courts have considerable experience with the type of challenged restraint at issue. A plaintiff's labeling of certain conduct as a group boycott does not necessitate per se treatment. Rather, United States Supreme Court precedent limits the per se rule in the boycott context to cases involving horizontal agreements among direct competitors.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN16[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Without a per se theory on which to proceed, an antitrust plaintiff must allege a restraint of trade with actual competitive harm or diminution of competition in a relevant market in order to proceed in a case under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN17[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

An allegation of diminution in competition in the overall market is necessary to state a claim for restraint of trade under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN18[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Restraints of trade are typically categorized as either "horizontal" or "vertical." A horizontal restraint stems from an agreement among competitors at the same level of distribution, whereas a vertical restraint arises from an agreement between entities operating at different levels of the market structure, such as manufacturers and distributors. According to the United States Supreme Court, a vertical restraint is not illegal per se unless it includes some agreement on price or price levels.

Antitrust & Trade Law > Sherman Act > General Overview

HN19[] **Antitrust & Trade Law, Sherman Act**

When ruling on a motion to dismiss a vague antitrust claim, the court must consider the costs that would be imposed on the defendant if forced to undertake discovery, but must also recognize the dilemma of the plaintiff, who may be unable to provide details of the alleged conspiracy without the opportunity to obtain evidence and information from the alleged conspirators themselves.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN20[] **Antitrust & Trade Law, Sherman Act**

A complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. And in antitrust cases, where the proof is largely in the hands of the alleged conspirators, dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN21[] **Antitrust & Trade Law, Sherman Act**

There is no per se rule that antitrust claims are not subject to summary disposition, and courts have not hesitated to dismiss antitrust claims at the pleading stage in proper cases. Where the complaint offers only uncertain clues as to plaintiff's theory of liability and the facts which would support a finding of Sherman Act liability it is simply not fair to the defendants, and it would be an onerous imposition on the judicial process, to permit litigation to go forward on the basis of such conclusory and speculative allegations.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN22[] **Sherman Act, Scope**

Title *15 U.S.C.S. § 2* of the Sherman Act applies to every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of interstate commerce. *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN23[] **Monopolies & Monopolization, Actual Monopolization**

To state a claim of monopolization under *15 U.S.C.S. § 2*, a plaintiff must allege (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN24[] **Monopolies & Monopolization, Actual Monopolization**

The United States Supreme Court has defined monopoly power as the power to control prices or exclude competition. Courts are reluctant to find monopoly power where the defendant business controls less than 50 percent of the given market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN25[] **Monopolies & Monopolization, Actual Monopolization**

Failure to allege a substantial market share is not itself fatal to a plaintiff's monopolization claim. Rather, the court may consider other factors tending to show monopoly power, apart from market share. These factors include the strength of competition, probable development of the industry, the barriers to entry, the nature of the anti-competitive conduct, and the elasticity of consumer demand.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN26[] **Monopolies & Monopolization, Actual Monopolization**

Alleging market share alone is not sufficient to state a claim under the Sherman Act. Monopolization or threatened monopolization requires something more, which may include the strength of competition, probable development of the industry, the barriers to entry, the nature of the anti-competitive conduct, and the elasticity of consumer demand.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN27[] **Monopolies & Monopolization, Actual Monopolization**

The fact that a product, due to its alleged superiority, may "hereinafter" replace all competition, does not mean that the company producing the product has actual monopoly power at the current time.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN28[] **Monopolies & Monopolization, Attempts to Monopolize**

To sustain an attempted monopolization theory a plaintiff must allege (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN29[] **Regulated Practices, Market Definition**

Generally, there is a presumption that attempt does not occur in the absence of a rather significant market share. As the United States Court of Appeals for the Third Circuit has explained, a dangerous probability of monopoly may exist where the defendant firm possesses a significant market share when it undertakes the challenged anticompetitive conduct.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN30[] **Regulated Practices, Market Definition**

According to the United States Court of Appeals for the Third Circuit, without any share in the relevant market, there can be no inference that defendants hold sufficient economic power in that market to create a dangerous probability of monopoly.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN31[] **Monopolies & Monopolization, Attempts to Monopolize**

The specific intent element of an attempt to monopolize requires more than a mere intention to prevail over rivals or improve market position.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN32[] **Monopolies & Monopolization, Conspiracy to Monopolize**

To properly state a conspiracy to monopolize claim a plaintiff must allege facts constituting the conspiracy, its period and object, and what the alleged participants did to achieve the conspiracy's object.

HN34[] **False Advertising, Elements of False Advertising**

Section 43(a) (*15 U.S.C.S. § 1125(a)*) of the Lanham Act creates a federal cause of action for unfair competition, even absent a federal registered trademark. Generally, the statute provides a private remedy to a commercial plaintiff who meets the burden of proving that its commercial interests have been harmed by a competitor's false advertising. Courts have refused to interpret § 43(a) more broadly than necessary, so as to eliminate frivolous claims and prevent flooding the federal courts with Lanham Act claims contrary to the type envisioned by Congress.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Elements of False Designation of Origin

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Standing

HN35[] **Justiciability, Standing**

The "dispositive question" as to § 43(a) (*15 U.S.C.S. § 1125(a)*) of the Lanham Act standing is whether the plaintiff has a reasonable interest to be protected against false advertising. The United States Court of Appeals for the Third Circuit has set forth the following five factors to consider in analyzing standing under § 43(a) of the Lanham Act, borrowing the five factors established by the United States Supreme Court for standing in antitrust cases: (1) The nature of the plaintiff's alleged injury: Is the injury of a type that Congress sought to redress in providing a private remedy for violations of the Lanham Act?; (2) The directness or indirectness of the asserted injury; (3) The proximity or remoteness of the party to the alleged injurious conduct; (4) The speculativeness of the damages claim; (5) The risk of duplicative damages or complexity in apportioning damages.

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Standing

HN36[] **Justiciability, Standing**

While there may be circumstances in which a non-competitor may have standing to sue under § 43(a) (*15 U.S.C.S. § 1125(a)*) of the Lanham Act, the focus of the Lanham Act is on commercial interests that have been harmed by a competitor's false advertising.

Civil Procedure > ... > Justiciability > Standing > General Overview

HN37[] **Justiciability, Standing**

To have standing on a § 43(a) (*15 U.S.C.S. § 1125(a)*) of the Lanham Act claim: (1) that the defendant has made false or misleading statements as to his own product or another's; (2) that there is actual deception or at least a tendency to deceive a substantial portion of the intended audience; (3) that the deception is material in that it is likely to influence purchasing decisions; (4) that the advertised goods traveled in interstate commerce; and (5) that there is a likelihood of injury to the plaintiff in terms of declining sales, loss of good will, etc.

Torts > Business Torts > Trade Libel > Elements

Torts > Business Torts > Trade Libel > General Overview

Torts > ... > Defamation > Defenses > Fair Comment & Opinion

HN38[] **Trade Libel, Elements**

Traditionally, to sustain a claim of commercial disparagement under Pennsylvania law, a plaintiff had to plead three elements: (1) that the disparaging statement of fact is untrue or that the disparaging statement of opinion is incorrect; (2) that no privilege attaches to the statement; and (3) that the plaintiff suffered a direct pecuniary loss as the result of the disparagement. Recently, however, the United States Court of Appeals for the Third Circuit predicted that the Pennsylvania Supreme Court would alter the "parameters" of the tort by adopting a Restatement section that had never before been cited by the state's highest court. The Restatement section at issue, *Restatement (Second) of Torts § 623A*, provides that: One who publishes a false statement harmful to the interests of another is subject to liability for pecuniary loss resulting to the other if (a) he intends for publication of the statement to result in harm to interests of the other having a pecuniary value, or either recognizes or should recognize that it is likely to do so, and (b) he knows that the statement is false or acts in reckless disregard of its truth or falsity. Notably, this Restatement formulation of the tort includes an element of knowledge or "reckless disregard" as to truth or falsity. Such state of mind was not required by the traditional three-prong formulation.

Torts > Business Torts > Trade Libel > General Overview

HN39[] **Business Torts, Trade Libel**

The Pennsylvania Supreme Court has recently cited Restatement (Second) of Torts § 623(A).

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN40[] **Intentional Interference, Elements**

The elements of the tort of interference with prospective contractual relations are as follows: (1) the existence of a contractual or prospective contractual relationship between the plaintiff and a third party; (2) a purpose or intent to harm an existing relationship or to prevent a prospective relationship from accruing; (3) the absence of privilege or justification on part of the defendant; and (4) the occurrence of actual harm or damage to the plaintiff as a result of the defendant's conduct. As to the first element, a prospective contract is something less than a contractual right, something more than a mere hope. It exists if there is a reasonable probability that a contract will arise from the parties' current dealings. A plaintiff cannot rest its tortious interference claim on the mere hope that additional contracts or customers would have been forthcoming but for defendant's interference.

Torts > ... > Elements > Causation > General Overview

Torts > Negligence > General Overview

HN41[] **Elements, Causation**

Under Pennsylvania law, a negligence claim consists of four elements: (1) a duty or obligation recognized by the law, requiring the actor to conform to a certain standard of conduct; (2) a failure to conform to the standard required; (3) a causal connection between the conduct and the resulting injury; and (4) actual loss or damage resulting to the interests of another.

Torts > ... > Compensatory Damages > Types of Losses > Economic Losses

Torts > Negligence > General Overview

HN42[] **Types of Losses, Economic Losses**

The "economic loss doctrine" prevents recovery on a negligence theory for an economic loss, where the plaintiff's entitlement flows only from a contract. The rationale is that negligence law is not intended to compensate a party for a loss resulting from a breach of duty, where that duty was assumed only by the parties' agreement.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Promissory Estoppel

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

HN43[] **Consideration, Promissory Estoppel**

In Pennsylvania, in order to succeed on a promissory estoppel theory, a party must establish that (1) the promisor made a promise that he should have reasonably expected would induce action or forbearance on the part of the promisee; (2) the promisee actually took action or refrained from taking action in reliance on the promise; and (3) injustice can be avoided only by enforcing the promise. An action for promissory estoppel should be dismissed where the complaint is "bereft of any allegation of a promise or reliance thereupon.

Opinion

[*555] MEMORANDUM

Baylson, J.

December 31, 2002

Plaintiff Brunson Communications, Inc., owner of Channel 48, WGTW-TV, a small television station serving the Philadelphia area, alleges that Defendant, in the business of measuring television viewing by the public, is liable under several causes of action: Sherman Act antitrust violations, unfair competition under the Lanham Act, disparagement of commercial products, tortious interference with prospective contractual relations, negligence and promissory estoppel. Defendant moves to dismiss the entirety of the Amended Complaint pursuant to **[**2]** *Federal Rule of Civil Procedure 12(b)(6)*, for failure to state a claim upon which relief can be granted. For the reasons which follow, Defendant's Motion will be granted without leave to amend as to the antitrust and Lanham Act claims, and two of the common law claims. As to claims for negligence and disparagement, the Motion will **[*556]** be granted without prejudice to Plaintiff's right to file a Second Amended Complaint.

I. Procedural History

Plaintiff filed its original Complaint on May 24, 2002. After Defendant moved for dismissal, Plaintiff filed an Amended Complaint with factual materials attached. Defendant thereafter filed the present Motion to Dismiss the Amended Complaint and also attached factual materials. Following oral argument on Defendant's Motion, the Court allowed the parties a period of limited discovery to ascertain the nature and extent of Defendant's reports about its measurement of Plaintiff's penetration of the Philadelphia television market.

The parties then submitted affidavits and other evidentiary materials. While it appears that the contents of Defendant's surveys, discussed below, are largely undisputed, it is clear that Plaintiff and Defendant assert **[**3]** different views as to the nature of certain verbal statements made by Defendant or its representatives regarding those surveys. *See infra* Part III. Because the material submitted by the parties is not conclusive, it will not be considered in determining the legal sufficiency of the Amended Complaint. [1]

[4] II. Jurisdiction and Legal Standards**

This Court has jurisdiction over Plaintiff's Sherman Act claims pursuant to *28 U.S.C. §§ 1331* and *1337*, and over Plaintiff's Lanham Act claim, which arises under federal law. *See 28 U.S.C. § 1331*. With respect to Plaintiff's four common law claims, this Court has jurisdiction pursuant to *28 U.S.C. § 1332*, in that Plaintiff has alleged diversity of citizenship and an amount in controversy in excess of $ 100,000. *See* Amended Complaint P 1-3; *Suber v. Chrysler Corp., 104 F.3d 578, 583 (3d Cir. 1997)* ***HN2***[] ("Once a good faith pleading of the amount in controversy vests the district court with diversity jurisdiction, the court retains jurisdiction even if the plaintiff cannot ultimately prove all of the counts of the complaint or does not actually recover damages in excess of [the jurisdictional amount]").

HN3[] All relevant events alleged in the Amended Complaint occurred in Pennsylvania. Accordingly, this Court will apply Pennsylvania law in determining the legal sufficiency of Plaintiff's four common law claims. *See 28 U.S.C. § 1652*.

[5]** ***HN4***[] When deciding a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, the court may look only to the facts alleged in the complaint and its attachments. *Jordan v. Fox, Rothschild, O'Brien & Frankel, 20 F.3d 1250, 1261 (3d Cir. 1994)*. The Court must accept as true all well pleaded allegations in the complaint and view them in the light most favorable to the plaintiff. *Angelastro v. Prudential-Bache Sec., Inc., 764 F.2d 939, 944 (3d Cir. 1985)*. A *Rule 12(b)(6)* motion **[*557]** will be granted only when it is certain that no relief could be granted under any set of facts that could be proved by the plaintiff. *Ransom v. Marrazzo, 848 F.2d 398, 401 (3d Cir. 1988)*.

III. Allegations of the Amended Complaint

Plaintiff alleges the following facts, which, for the purpose of deciding the instant motion, will be viewed in the light most favorable to Plaintiff. Channel 48, WGTW TV, is a television station owned by Plaintiff, broadcasting within the Philadelphia area. *See* Amended Complaint P 6-7. WGTW is a "small corporation" and "independent of all networks and cable systems." *Id.*

Defendant Arbitron, Inc. is in **[**6]** the business of "constructing and operating measurement systems that monitor listeners and viewers for usage by radio, cable and more recently television stations, and purchasers of advertising time from television stations." *Id.* P 9. Defendant has developed a new technology for measuring television viewership, known as the personal people meter ("PPM"). *Id.* P10. This PPM technology

> operates by embedding an inaudible signal in the transmitter of the various stations. It then places a receiving device on the person of individuals to detect and record when he is watching television sets tuned to only those stations whose signals which [*sic*] have been imbedded by Arbitron.

---

[1] *Rule 12(b)* provides that if

> ***HN1***[] on a motion asserting the defense numbered (6) to dismiss for failure of the pleading to state a claim upon which relief can be granted, matters outside the pleading are presented to *and not excluded by the court,* the motion shall be treated as one for summary judgment and disposed of as provided in Rule 56, and all parties shall be given reasonable opportunity to present all material made pertinent to such a motion by Rule 56.

Fed. R. Civ. P. 12(b) (emphasis added). However this Court has "complete discretion to determine whether or not to accept any material beyond the pleadings that is offered in conjunction with a 12(b)(6) motion." *Stauske v. Healtheast, Inc.,* No. 91-cv-1265, *1991 U.S. Dist. LEXIS 8603*, at *2 (E.D. Pa. June 24, 1991) (Cahn, J.) (*quoting* 5 Wright & Miller, *Federal Practice and Procedure* § 1366 (1966)).

Id. Plaintiff asserts that Arbitron's PPM technology "hereinafter will supplant any other system because of its superior accuracy and reliability." *Id.* P 49.

According to the Amended Complaint, prior to Defendant's development of PPM, another entity, Nielsen Media Research ("Nielsen"), had the only television viewership measurement system. *Id.* P 11. Plaintiff alleges that Nielsen and Arbitron have "entered into a corporate financial relationship by which Nielsen and Arbitron **[**7]** are related in regard to the new system, the details of which are not known to plaintiff." *Id.* Plaintiff claims that Nielsen is an owner or joint venturer in the PPM project. *Id.* Without specifying any details of the alleged relationship between Arbitron and Nielsen, Plaintiff asserts that together the two companies enjoy a monopoly in the TV viewership measurement market. *Id.* at P 12.

Sometime in 2001, Arbitron began a "test" program to introduce its PPM technology into the Philadelphia market. *Id.* at P 14-15. Plaintiff alleges that Defendant embedded its PPM signal only in the transmitters of Plaintiff's competitors -- the larger networks and cable systems -- omitting Plaintiff's station from the PPM survey data. *Id.* at P 17. According to Plaintiff, Arbitron then began to release periodic PPM survey data to advertising agencies, advertisers, television stations and other media sources. *Id.* at P 25. At the time of its PPM test, in the fourth quarter of 2001, Defendant "announced" that the PPM data would "accurately and creditably measure the performance of the entire market." *Id.* at P 15. Moreover, according to the Amended Complaint, on May 20, 2002, at **[**8]** a meeting of the Pennsylvania Association of Broadcasters, Kevin Smith, a Senior Vice President of Arbitron, represented that the PPM survey was fair, accurate and complete. *Id.* at P 32. Plaintiff suggests that these statements were false and malicious. *Id.* at P 17, 32.

Further, Plaintiff alleges, without specifying any details, that the exclusion of Plaintiff from the PPM test was a "boycott imposed at the request of plaintiff's competitors." *Id.* at P 19. Plaintiff claims that Defendant's omission of WGTW from **[*558]** the survey impaired Plaintiff's ability to compete in the market for sales of advertising time, in that advertising agencies would be unable to confirm from the survey that WGTW had a measurable viewership. *Id.* at P 20, 26.

The Amended Complaint asserts that Arbitron had "many meetings" with the larger stations "while designing and pre-testing the system," without inviting Plaintiff. P 34. As a result, Arbitron failed to inform Plaintiff, prior to the test, that inclusion in the survey required the embedding of a signal into WGTW's transmitter. *Id.* at P 21. Allegedly, Defendant only informed Plaintiff's competitors of this requirement, causing Plaintiff **[**9]** to believe that no action on its part was necessary. *Id.* Plaintiff did not learn of the embedding requirement until April 2002, at which time Arbitron visited WGTW to install a PPM encoder. *Id.* P 23, 68. By then the initial PPM survey was substantially completed. *Id.* Plaintiff suggests that, despite its full knowledge of the detrimental effects the omission would have on WGTW, Arbitron refused to reconstruct the PPM survey to include WGTW. *Id.* at P 29. Nor would Arbitron "prominently" inform the public that WGTW had improperly been omitted. *Id.* at P 34. Plaintiff claims that Defendant's motive in omitting Plaintiff was

> to obtain the benefits of working with the larger networks, plaintiff's competitors, who have most of the outlets in the markets. Therefore its pursuit of profits caused it to knowingly give preferential treatment to plaintiff's competitors and exclude an independent non-network station that did not have the market power of the competitors.

Id. at P 35. Though a PPM signal was eventually embedded in WGTW's transmitter in April 2002, *id.* at P 24, the Amended Complaint asserts that Defendant "intentionally and/ or negligently" **[**10]** caused defective encoding of the signal. *Id.* at P 36. This resulted in the continued omission of WGTW from the PPM surveys until at least June 2002, and further injured Plaintiff's ability to compete. *Id.*

IV. Counts I and II of the Amended Complaint Do Not State a Claim under the Antitrust Laws upon which Relief Can Be Granted

A. Count I -- Sherman Act, Section One

Plaintiff's Amended Complaint substantially expanded upon the original Complaint. Not only did Plaintiff add to its Amended Complaint new counts of negligence and promissory estoppel, but Plaintiff also broadened its antitrust allegations. Whereas the original Complaint contained only a single antitrust count under Sherman Act Sections One and Two, the Amended Complaint broke down the two Sherman Act sections into two separate counts, and substantially expanded the antitrust claim.

The two antitrust counts of the Amended Complaint contain a panoply of antitrust theories that are so broadly described, as to make it difficult to understand how Plaintiff has been injured by anything forbidden by the antitrust laws. Plaintiff has made allegations of monopolization, refusal to deal, group boycott, **[**11]** "combining and coordinating" and exclusion of Plaintiff. The breadth of the Section One charging paragraphs with some factual content about Plaintiff or Defendant can be seen from these verbatim quotes:

> 43. Defendant Arbitron has and has utilized its monopoly power, in and with an agreement and financial participation of Nielsen over the data markets, and on information and belief, marketing participation of Nielsen and in concert with **[*559]** plaintiff's competitors, in the sales of time market [sic] in Philadelphia, to promote and effect the exclusion of plaintiff from the advertising sales or broadcasting viewing in the Philadelphia SMSA listener market, through a refusal to deal with plaintiff, by conducting, providing and promoting its survey, with plaintiff excluded, in restraint of trade in interstate commerce, in violation of the Sherman Act *Section 1*.
>
> 45. Arbitron (with Nielsen) enjoys monopoly powers in the providing of viewer measurement in the relevant market, i.e, Philadelphia area television viewing market, which is a well recognized market for television viewers and advertisers. It is defined by the reach of signals of stations, and the service areas of the cable **[**12]** systems. It includes a radius of about sixty miles from City Hall, Philadelphia.
> 48. Through their monopoly over viewer measurement, in the Philadelphia market, Arbitron/ Nielsen exercise market control over competitors in the viewing market.
> 49. Though [sic] its proprietary imbedded system which herein after will supplant any other system because of its superior accuracy and reliability (when employed fairly) Arbitron has monopoly power over the Philadelphia viewer measurement market.
>
> 50. By combining and coordinating with plaintiff's competitors to exclude plaintiff from the survey, and through falsely representing it as complete defendant sponsored, and practiced a group boycott, and participated with plaintiff's competitors in a program to exclude plaintiff from the Philadelphia television advertising sales market, injuring competition for the sale of advertising and delivery of programming, contrary to *Section 1*, antitrust injury. [sic]

HN5[] Section One of the Sherman Act, prohibits "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. [2] Defendant asserts that Count **[**13]** I must be dismissed because Plaintiff fails to sufficiently allege a conspiracy, a plausible market, a cognizable antitrust injury, or a factual basis to support its claim of an antitrust violation by Defendant.

1. Concerted Action

HN6[] The "very essence" of a *Section 1* claim is "the existence of an agreement." *Alvord-Polk, Inc. v. F. Schumacher & Co., 37 F.3d 996, 999 (3d Cir. 1994)*. Unilateral activity by a single person or entity will not suffice. *See* *Fisher v. Berkeley, 475 U.S. 260, 266, 89 L. Ed. 2d 206, 106 S. Ct. 1045 (1986)*. The Supreme Court has explained that even if a single company's conduct has "the same economic effect as concerted action might have, **[**14]** there can be no liability under Section One in the absence of agreement." *Id.*

---

[2] Although Plaintiff's first count alleges violations of *Section 1*, it also uses phrases, such as "monopoly power" which are, strictly speaking, *Section 2* concepts, *see* § B *infra.* However, consistent with principles of liberal construction of the complaint, the court will ignore these technical misstatements.

HN7[] The Third Circuit has long held that a Section 1 plaintiff "must plead the facts constituting the conspiracy, its object and accomplishment." *Black & Yates v. Mahogany Ass'n, 129 F.2d 227, 231 (3d Cir. 1942)*. Moreover, a "general allegation of conspiracy without a statement of the facts is an allegation of a legal conclusion and insufficient of itself to constitute a cause of action." *Id.* Accordingly, only "allegations of conspiracy which are particularized … will be deemed sufficient." **[*560]** *Commonwealth of Pa. ex rel. Zimmerman v. PepsiCo, Inc., 836 F.2d 173, 181 (3d Cir. 1988)*. *See* cases collected in ABA Section of ***Antitrust Law***, ***Antitrust Law*** *Developments* (5th Ed. 2002), Vol. 1, p. 3, n. 14.

To adequately allege the element of concerted activity, a plaintiff must do more than insert the word "conspiracy" into his pleading. As the Third Circuit has stated, the "allegation of unspecified contracts with unnamed other entities to achieve unidentified anticompetitive effects does not meet the minimum standards for pleading a conspiracy in violation of the Sherman **[**15]** Act." *Garshman v. Universal Resources Holding Inc., 824 F.2d 223, 230 (3d Cir. 1987)*.

In *Garshman,* plaintiffs were partners in an entity engaged in oil and gas exploration. Defendant Universal Resources Holding, Inc. was a producer of natural gas. Plaintiffs and Universal had entered into an agreement whereby plaintiffs would drill wells in return for payment and assignment of certain rights. The drilling was to take place on land owned by Columbia Gas Transmission Corporation ("Transmission"). Transmission had also contracted to purchase, through Universal, 75 percent of the gas produced from the wells.

Subsequently the demand for natural gas declined. As a result, Transmission found itself contractually obligated to purchase more gas through Universal than it could resell. Under pressure to renegotiate, Universal agreed to change the price provisions in its contracts with Transmission. This resulted in a decreased return from the wells, harming plaintiffs' economic interests under the drilling contract. *See* *Garshman, 824 F.2d at 225-27*.

Plaintiffs sued on antitrust, tort and contract grounds. Universal filed a crossclaim against Transmission **[**16]** and its parent corporation, Columbia Gas System ("System"), also raising antitrust grounds. In its Sherman Act, Section One claim, Universal alleged that System and Transmission had "entered into one or more agreements, contracts or conspiracies, and have engaged in concerted action with other entities, which agreements are in restraint of trade and are unreasonable, to achieve the anti-competitive and unlawful actions and effects as alleged in this crossclaim." *Garshman 824 F.2d at 230*. The district court dismissed Universal's Section One count for failure to state a claim.

The Court of Appeals affirmed, observing that Universal had identified neither the "contracts," nor the "other entities," nor the "anti-competitive and unlawful actions and effects" involved. *Id.* The court held that the "allegation of unspecified contracts with unnamed other entities to achieve unidentified anticompetitive effects does not meet the minimum standards for pleading a conspiracy in violation of the Sherman Act." *Id.* Moreover, the price-renegotiation contracts undertaken by Transmission did not result in price increases to consumers or in the market generally. Universal's allegations failed **[**17]** to suggest an adverse effect upon competition in any relevant market. Therefore the claim was properly dismissed. *See* *Garshman, 824 F.2d at 231*.

The Circuit's affirmation of the dismissal of the antitrust claims in *Garshman* (without leave to amend) is precedent for the dismissal here. The *Section 1* claim in this case is similarly deficient of the necessary facts.

In the *PepsiCo* case, the Commonwealth of Pennsylvania brought a *parens patriae* antitrust action, alleging that a soft drink maker and two of its bottlers had conspired to eliminate horizontal competition between resellers of the soft drink product. **[*561]** *See* *PepsiCo, 836 F.2d at 175*. The state alleged that the three defendants purposefully withheld the product from certain resellers so that the resellers could not compete with the bottlers. According to the Commonwealth's amended complaint, defendants had engaged in the following practices in furtherance of this conspiracy:

> using a coding identification system to trace and monitor soft drink sales; fining bottlers when their product is shipped out of their territory; refusing to deal with resellers who engage in transshipping; **[**18]** refusing to

> deal with resellers who buy from or sell to other resellers; threatening termination of resellers who engage in such sales; and limiting sales to resellers to the amount the reseller needs solely for its own retail sales, in order to prevent that reseller from wholesaling.

Id. The district court dismissed the Section One count for failure to state a claim, and the Third Circuit affirmed.

The Court of Appeals noted that under the Soft Drink Interbrand Competition Act, because only a horizontal conspiracy was actionable, the state's pleading burden was higher than in a typical antitrust case. *PepsiCo Inc. 836 F.2d at 181*. As to the sufficiency of the amended complaint, the court first observed that the state's allegations "consistently refer to conduct by 'defendants and their co-conspirators' -- not otherwise identified." *Id.* The court continued:

> Equally significant is the fact that Pennsylvania did not allege any meetings between [the defendant bottlers], any communications between them, or any other means by which their alleged conspiracy came about. This notwithstanding that in this circuit, "only allegations of conspiracy which are particularized **[**19]** … will be deemed sufficient." *Garshman v. Universal Resources Holding, Inc., 641 F. Supp. 1359, 1370 (D.N.J.1986)*, *aff'd* *824 F.2d 223 (3d Cir.1987)* (*quoting* *Kalmanovitz v. G. Heileman Brewing Co., 595 F. Supp. 1385, 1400 (D.Del.1984)*, *aff'd,* *769 F.2d 152 (3d Cir.1985))*. Instead, all that appellant was apparently prepared to plead was a naked conclusion dropped into the amended complaint, reciting a bare-bones assertion that there had been a "horizontal" conspiracy.

Id.

The *PepsiCo* court found that the Commonwealth's allegations "did not come close to adequately pleading conduct amounting to" a price fixing agreement, a horizontal [3] **[**20]** restraint of trade, or a group boycott. [4] The court therefore affirmed the dismissal with prejudice in that the Commonwealth had already amended its complaint once, with leave of court. *See* *836 F.2d at 180*.

a. Group Boycott

Although Plaintiff does allege a group boycott, here again the conclusory allegation is devoid of details. ***HN8***[] A horizontal group boycott involves entities at the same level of the market structure conspiring amongst themselves, with "a purpose **[*562]** either to exclude a person or group from the market, or to accomplish some other anti-competitive objective, or both." *PepsiCo Inc., supra 836 F.2d at 183* (*quoting* *De Filippo v. Ford Motor Co., 516 F.2d 1313, 1318 (3d Cir. 1975))*. Group boycott cases usually involve joint efforts at persuading suppliers or customers to refuse to deal with a certain competitor. *See, e.g.,* *Northwest Wholesale Stationers Inc. v. Pacific Stationery and Printing Co., 472 U.S. 284, 294, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985)*. **[**21]** Aside from the conclusory phrase "group boycott," the Court concludes that Plaintiff has not adequately plead Defendant participated in an illegal group boycott.

b. "Hub-and-Spoke"

HN9[] Courts have refused to find a horizontal conspiracy, where a single entity or person engages in separate vertical conspiracies with multiple parties, who do not conspire amongst themselves horizontally. *See, e.g.,* *Dickson v. Microsoft Corp., 309 F.3d 193, 2002 U.S. App. LEXIS 22466*, at *17-24 (4th Cir. 2002); *Lomar Wholesale Grocery, Inc. v. Dieter's Gourmet Foods, Inc., 824 F.2d 582, 590 (8th Cir. 1987)*. *Cf.* *Kotteakos v. United*

---

[3] As discussed below, for purposes of determining whether concerted action is unreasonable, courts usually analyze the alleged combination as either "horizontal" (between or among competitors on the same level of business) or "vertical" (between entities operating on different levels, e.g., manufacturer and distributor).

[4] If the Commonwealth had succeeded in demonstrating any of these types of anticompetitive conduct, the defendants may have lost the protection they otherwise would have had under the Soft Drink Interbrand Competition Act of 1980, *15 U.S.C. §§ 3501-3503*. *See* *PepsiCo, Inc. 836 F.2d at 175*.

States, 328 U.S. 750, 752, 769, 90 L. Ed. 1557, 66 S. Ct. 1239 (1946) (holding, in non-antitrust criminal conspiracy case, that jury instruction should have explained "vital difference" between one conspiracy, in which all defendants conspired amongst each other, and numerous separate conspiracies between each defendant and one "common key figure"). Courts analyze such "hub-and-spoke" scenarios under the rule of reason. *See* Dickson, 309 F.3d 193, 2002 U.S. App. LEXIS 22466, at *17-24 (finding plaintiff alleged **[**22]** merely "separate vertical conspiracies" or "a wheel without a rim," rather than single horizontal conspiracy; applying rule of reason because anticompetitive effect "not obvious"); Lomar, 824 F.2d at 590 (refusing to apply *per se* rule where plaintiff did not allege suppliers conspired "among themselves," but rather that one distributor "separately coerced each of the suppliers into boycotting" plaintiff, thus forming "a rimless, spoked wheel"). Plaintiff's allegations that Arbitron met with and agreed with most of the larger television stations to exclude Plaintiff from its viewer measurement studies more resembles a "hub-and-spoke" style of conspiracy than a horizontal group boycott. As noted in ***Antitrust Law*** *Developments, supra,* pp. 24-5:

> **HN10**[] Some conspiracies have elements of both horizontal and vertical agreements. An example of such a hybrid is the "hub-and-spoke" conspiracy.
> ****
>
> Although some of the earlier hub-and-spoke cases have suggested at least the theoretical possibility that an actionable conspiracy might be found where there were hub and spokes but no rim, more recent cases require that a plaintiff must present evidence **[**23]** sufficient to allow the inference of an agreement constituting the rim of the conspiracy. (Footnotes omitted).

As explained above, under any theory, Plaintiff has not alleged the essential statutory element of concerted activity.

With these precedents as guideposts, we review the antitrust allegations in the Amended Complaint. In the instant case, Plaintiff has identified none of the entities which allegedly conspired with Defendant. While Plaintiff need not necessarily supply names of all alleged conspirators, the cases cited above require an antitrust plaintiff to supply more detail to make out a Section One claim. The facts alleged in the Amended Complaint are extremely vague and do not sufficiently describe any contract, combination or conspiracy between Arbitron and the larger TV stations.

[*563] The Amended Complaint never answers the common-sense question as to why Plaintiff's competitors, who allegedly already dominate the market, would seek the exclusion of a single, small, independently-owned station from Arbitron's test-runs of the new PPM technology. Further, though the Amended Complaint alleges a "boycott imposed at the request of plaintiff's competitors," *id.* P 19, **[**24]** Plaintiff has not provided a single detail as to when, why, or how the conspirators decided upon this alleged boycott. The most that Plaintiff alleges is that Arbitron had "many meetings" with the larger stations "while designing and pre-testing the system." *Id.* P 34. Thus, while Plaintiff's Amended Complaint is extremely broad in charging Section One antitrust liability, it falls far short on the facts.

Aside from the dearth of specific allegations, the Court also concludes that the Amended Complaint fails to sufficiently allege concerted activity for the simple reason that the supposed conspiracy "makes no economic sense." Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986). **HN11**[] The Supreme Court has found that "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a Section One case." Id. at 588. Where a defendant had no rational motive to join a conspiracy, and defendant's conduct is as consistent with permissible competition as with illegal conspiracy, the plaintiff's unspecific allegations do not support an inference of antitrust conspiracy. *See* **[**25]** ***Antitrust Law*** *Developments, supra,* p. 8. Thus, as the court in *Matsushita* explained, if the defendants "had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy." 475 U.S. at 596-97. In such a case, where an inference of conspiracy is "implausible," the court should dispose of the Section One claim without submitting the conspiracy issue to a jury. Id. at 594. Accordingly, in *Matsushita,* upon finding that the alleged conspiracy would have been "economically senseless," the Court found summary judgment proper. Id. at 598.

Though *Matsushita* was decided in the context of a motion for summary judgment, its reasoning, nevertheless, has been used to decide motions to dismiss and suggests that Plaintiff's Section One claim should be dismissed. [5] The sparse facts set **[*564]** forth in the Amended Complaint are not sufficient to support an inference that defendants acted conspiratorially. Accepting all of the facts of the Amended Complaint as true, the conspiracy theorized by Plaintiff is, for several **[**26]** reasons, economically implausible. Plaintiff, a television station, suggests no logical reason why Defendant, which is allegedly dominant in the viewer measurement market, would conspire with Plaintiff's competitors, the larger stations, in order to exclude Plaintiff from Defendant's PPM tests. If Defendant is, in fact, dominant in the viewer measurement market, to exclude Plaintiff's data would absolutely contradict Defendant's business purpose and jeopardize the credibility of its measurements. At oral argument, Plaintiff's counsel suggested that Arbitron's motive in excluding WGTW was "to accommodate [WGTW's] competitors." Transcript of Motion to Dismiss Hearing (Oct. 8, 2002) at 35. Counsel added that WGTW is "small potatoes in the market. We are the classic kind of competitor who the standard competitors would just as soon not have in the market." *Id.* at 36. Plaintiff's argument makes a gigantic leap from omission of Plaintiff's data in a market survey, to exclusion of Plaintiff from the television market. However, the other deficiencies in Plaintiff's Amended Complaint do not require the Court to decide whether Plaintiff's allegation that merely omitting Plaintiff's data **[**27]** from Defendant's viewer measurement reports could result in liability under the antitrust laws for excluding Plaintiff as a competitor in the overall television market. However, it is hard to understand how even purposely eliminating Plaintiff's data from Defendant's reports for a six-month period could conceivably cause Plaintiff to be excluded as a competitor in the overall Philadelphia television market. It is of public notice that as of the date of today's Order, Plaintiff is fully functioning as a television station.

[28]** Plaintiff's brief in opposition to Defendant's Motion to Dismiss on this ground has offered no rational explanation for any desire on the part of the larger stations to see Plaintiff omitted from Arbitron's tests. Nor has Plaintiff suggested any plausible reason why Arbitron would willingly compromise the integrity of its own measurements. Assuming that Defendant sought to establish sound business relationships with the larger stations, such a desire would not, reasonably, entice Arbitron to eliminate Plaintiff's station from its PPM measurements -- thereby corrupting its own product.

Accordingly, this Court finds that Plaintiff has not alleged concerted action, which is the core element of any Sherman Act, Section One claim. *See* Fuentes v. South Hills Cardiology, 946 F.2d 196, 198.

2. Restraint of Trade

Even though the Court concludes Plaintiff has not adequately pleaded concerted action, this Memorandum will also examine whether Plaintiff has pleaded a restraint of trade, and concludes it has not. **HN12**[] Though the language of Section One of the Sherman Act could conceivably encompass a broader array of activity, the Supreme Court has limited its application to agreements which *unreasonably* **[**29]** restrain trade. *See* Standard Oil Co. v. United States, 221 U.S. 1, 66, 55 L. Ed. 619, 31 S. Ct. 502 (1911). This principle has come to be known as the "rule of reason." *See* National Soc. of Prof'l Engineers v. United States, 435 U.S. 679, 690, 55 L. Ed. 2d 637, 98 S. Ct.

---

[5] *See, e.g.,* DM Research, Inc. v. College of Am. Pathologists, 170 F.3d 53, 56 (1st Cir. 1999) (affirming Rule 12(b)(6) dismissal where complaint alleged "highly implausible" conspiracy) (*aff'd* 2 F. Supp. 2d 226, 230 (D.R.I. 1998) (*quoting* Matsushita's "rational economic motive" language in dismissing complaint)); United Magazine Co. v. Murdoch Mag. Distrib., 146 F. Supp. 2d 385, 402 (S.D.N.Y. 2001) (holding that because "plaintiffs' alleged conspiracy to engage in predatory pricing is entirely unnecessary and makes no economic sense, plaintiffs fail to state a claim under section 1"); Cancall PCS v. Omnipoint Corp., 2000 U.S. Dist. LEXIS 2830, No. 99- CIV-3395, 2000 WL 272309, at *7 n.4 (S.D.N.Y. 2000) ("Although *Matsushita* involved a motion for summary judgment, not a motion to dismiss, here, the plaintiffs have pled facts which, even if true and viewed in the light most favorable to plaintiffs, cannot support a claim for predatory pricing, and the Court will therefore dismiss any such claim at this stage."). *Cf.* Car Carriers v. Ford Motor Co., 745 F.2d 1101, 1109-10 (7th Cir. 1984) (pre-dating *Matsushita,* yet holding dismissal was appropriate where complaint set forth no facts showing anti-competitive effect and alleged conspiracy was "inherently implausible" -- as it suggested defendant Ford "conspired to injure itself"); Salts v. Moore, 107 F. Supp. 2d 732, 742-43 (N.D. Miss. 2000) (granting Rule 12(c) motion for judgment on the pleadings where plaintiffs failed to establish inference of conspiracy, in part due to lack of rational economic motive to conspire).

1355 (1978) (noting "the inquiry mandated by the Rule of Reason is whether the challenged agreement is one that promotes competition or one that suppresses competition").

HN13[] In order to plead a claim that a defendant's practices violate the rule of **[*565]** reason under Section One of the Sherman Act, a plaintiff must allege four "elements":

> (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse, anti-competitive effects within the relevant product and geographic markets; (3) that the objects of and the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiffs were injured as a proximate result of that conspiracy.

Rossi v. Standard Roofing, Inc., 156 F.3d 452, 464-65 (3d Cir. 1998).

Plaintiff alleges a restraint of trade only once, in paragraph 43, and only in the most conclusory terms. **[**30]** Plaintiff never alleges how trade has been restrained, or how the market in which Plaintiff does business has become less competitive due to the actions of Defendant.

HN14[] The Supreme Court has explained that, in determining the reasonableness of a restraint, the "true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *Board of Trade of City of Chicago v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918)*.

a. Per Se Rule

HN15[] This Court's inquiry as to the legality of a defendant's actions must be guided by the rule of reason, unless "the challenged action falls into the category of 'agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.'" *Northwest Wholesale Stationers, Inc. v. Pacific Stationery and Printing Co., 472 U.S. 284, 289, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985)* **[**31]** (*quoting* *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*). Thus, where a defendant's conduct is "manifestly anticompetitive," a court may adopt a *per se* rule of illegality, bypassing an inquiry under the rule of reason. *Continental T. V. v. GTE Sylvania, 433 U.S. 36, 50, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. Courts have found such conduct as price fixing, tying arrangements, reciprocal dealing agreements and resale price maintenance to be *per se* unreasonable restraints of trade. *See, e.g.,* *Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164, 166 (3d Cir.1979)*. Group boycotts are also often treated as *per se,* but the *per se* rule is not employed until courts have "considerable experience with the type of challenged restraint" at issue. *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 20 n.33, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*.

Plaintiff's labeling of certain conduct as a group boycott does not necessitate *per se* treatment. *See* *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 458, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)* **[**32]** (declining to apply boycott "pigeonhole;" observing that *per se* approach "has generally been limited to cases in which firms with market power boycott suppliers or customers in order to discourage them from doing business with a competitor"); *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 463 (3d Cir. 1998)* (noting that labeling alleged refusal to deal as "group boycott" does not have "a talismanic effect, automatically bringing the case under the *per se* rubric"). Rather, Supreme Court precedent "limits the *per se* rule in the boycott context to cases involving *horizontal agreements among direct competitors."* *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135* (emphasis added).

[*566] As noted above, Plaintiff has not adequately alleged any agreement *among* competitor television stations to boycott Plaintiff. The Amended Complaint claims only that Defendant Arbitron -- the only named Defendant -- conspired with certain unnamed stations, with the aim of excluding Plaintiff's station from the PPM surveys. Though Plaintiff states, "on information and belief, the exclusion was a boycott imposed at the request of plaintiff's competitors," Amended Complaint P 19, Plaintiff never **[**33]** contends, let alone provides any required details, that the competitor stations *jointly* agreed to request WGTW's exclusion. [6]

[34]** Because Plaintiff's claims do not allege any price-fixing, a per se group boycott, or other activities condemned as per se illegal, but are so broad and diffuse, and no factually similar antitrust claims have been found reported, there is no basis on which to conclude that the per se rule applies in this case.

b. Relevant Market

HN16[] Without a per se theory on which to proceed, Plaintiff must allege a restraint of trade with actual competitive harm or diminution of competition in a relevant market in order to proceed in a case under the rule of reason. *FTC v. Indiana Federation of Dentists, 476 U.S. 447, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)*, *Eichorn v. AT&T Corp., 248 F.3d 131, 147-8 (3d Cir. 2001)*. Plaintiff alleges no details of actual competitive harm, but alleges a relevant product market as follows:

> 14. This product is a product (a) in 7the television viewer measurement market, (b) a product utilized and also creates a new product market, i.e., imbedded direct measuring, whereby no reporting by the viewer is required (unlike the Nielsen system). Defendant enjoys a monopoly in both markets.

The above-cited paragraph describes Defendant's **[**35]** own product, which cannot itself be a relevant market for antitrust purposes. *Tunis Bros Co. v. Ford Motor Co., 952 F.2d 715 (3d Cir. 1992)*. Another attempt to define a market in the Amended Complaint, paragraph 45, is quoted above. There is absolutely ***HN17***[] no allegation of diminution in competition in the overall market, which is necessary to state a claim for restraint of trade under the rule of reason. *Angelico v. Lehigh Valley Hospital Inc., 184 F.3d 268 (3d Cir. 1999)*. **[*567]**

c. Horizontal or Vertical Conduct

HN18[] Restraints of trade are typically categorized as either "horizontal" or "vertical." A horizontal restraint stems from an agreement "among competitors at the same level of distribution," whereas a vertical restraint arises from an agreement between "entities operating at different levels of the market structure, such as manufacturers and distributors." *Yeager's Fuel v. Pennsylvania Power & Light Co., 953 F. Supp. 617, 654 (E.D. Pa. 1997)* (*quoting* Black's Law Dictionary 737, 1563 (6th ed. 1991)). As already discussed, there are no sufficient allegations to charge a horizontal restraint. The Supreme Court has held that a "vertical **[**36]** restraint is not illegal *per se* unless it includes some agreement on price or price levels." *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 136, 142 L. Ed. 2d 510, 119 S. Ct. 493 (1998)*. There are no such allegations.

As to the remaining requirements for a violation of Section One, Arbitron's business decisions cannot be said to have had illegal objectives. The alleged relationship between Defendant and Nielsen is confusing if not

---

[6] Plaintiff places much emphasis on the Third Circuit's decision in *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 462 (3d Cir. 1998)*. There, the plaintiff, a price-cutting distributor, alleged that his full-price competitors had joined together and persuaded their mutual suppliers not to sell to him. The Court of Appeals concluded that the plaintiff's allegations should be analyzed using the *per se* framework.

> The economic impact of their actions -- driving a *price-cutting* competitor out of business -- is clear .... Importantly, all of this [conspiratorial] activity was done against the backdrop of [the competitors'] dissatisfaction with Rossi's *price-cutting* proclivities, and thus an inference can be drawn that the conspiracy was at least partially conceived as a *price restraint.*
>
> For these reasons, we find it implausible that the alleged behavior by the defendants would "enhance overall efficiency and make markets more competitive," *Northwest Wholesale Stationers, 472 U.S. at 294*.

Rossi 156 F.3d at 464 (emphasis added). The conspiracy alleged in *Rossi* was not completely horizontal, in that the plaintiff's theory involved both horizontal and vertical components, *i.e.,* the distributors who competed with Rossi and the suppliers who allegedly acquiesced in the boycott. In the instant case, even if this Court were to find horizontal, as well as vertical components, there is no allegation of price cutting, or any other impact on price, whatsoever. For that reason, the *Rossi* decision, though insightful, does not bear directly on these facts.

contradictory. According to the Amended Complaint, PP 15-17, Arbitron's PPM surveys were a "test" of the new technology. Assuming that Arbitron did, in fact, choose to encode only the larger network stations for participation in that test, Plaintiff's own allegations establish this was for a short period of time, and Plaintiff has not adequately alleged any actual past or ongoing adverse impact on competition.

HN19[] When ruling on a Motion to Dismiss an antitrust claim as vague as Plaintiff's, this Court must consider the costs that would be imposed on the defendant if forced to undertake discovery, but must also recognize the dilemma of the plaintiff, who may be unable to provide details of the alleged conspiracy without the opportunity to obtain **[**37]** evidence and information from the alleged conspirators themselves. *See, e.g, Advanced Lifeline Serv's, Inc. v. Northern Health Fac., Inc., 1997 U.S. Dist. LEXIS 19550*, No. 97-cv-3757, *1997 WL 763024*, at *8 (E.D. Pa. Dec. 9 1997). As the Supreme Court has explained,

> We have held that ***HN20***[] "a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief" …. And in antitrust cases, where "the proof is largely in the hands of the alleged conspirators" … dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly.

Hospital Bldg. Co. v. Trustees of Rex Hosp., 425 U.S. 738, 746, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976) (citations omitted). Yet, the Court has, on several occasions, found antitrust allegations to be "insufficient as a matter of law," and therefore subject to dismissal. *E.g. Associated Gen. Contractors of Calif., Inc. v. California State Council of Carpenters, 459 U.S. 519, 545, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*.

As this District Court has observed, ***HN21***[] "there **[**38]** is no *per se* rule that antitrust claims are not subject to summary disposition, and courts have not hesitated to dismiss antitrust claims at the pleading stage in proper cases." *Alpern v. Cavarocchi,* No. 98-cv-3105, *1999 U.S. Dist. LEXIS 5929*, at *4 (E.D. Pa. April 29, 1999). Over two decades ago, this Court, in dismissing a Section One claim, reasoned that, where the complaint

> offers only uncertain clues as to plaintiff's theory of liability and the facts which would support a finding of Sherman Act liability … it is simply not fair to the defendants, and it would be an onerous imposition on the judicial **[*568]** process, to permit litigation to go forward on the basis of such conclusory and speculative allegations.

Pao v. Holy Redeemer Hosp., 547 F. Supp. 484, 491 (E.D. Pa. 1982).

Based on the allegations of the Amended Complaint, this Court finds that Plaintiff can prove no set of facts in support of its Sherman Act, Section One claim that would entitle it to relief. *See Hospital Bldg. Co., 425 U.S. at 746*. Accordingly, Count I must be dismissed.

B. Count II -- Sherman Act, Section Two

Plaintiff next asserts **[**39]** a violation of ***HN22***[] *Section 2* of the Sherman Act, which applies to "every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of" interstate commerce. *15 U.S.C. § 2*. Count II of the Amended Complaint claims that Defendant, through "acquisition combinations with Nielsen, *intentionally became and is a monopolist* in the Philadelphia viewer measurement market." *Id. at P 53* (emphasis added). Alternatively, Plaintiff asserts that Arbitron, "through its combination with Nielsen, is *attempting* to monopolize" that same market. *Id. at P 54* (emphasis added). Further, Plaintiff contends that Arbitron has used its monopoly power to injure Plaintiff, specifically, injuring WGTW's ability to compete in the sale of advertising time. *Id. at P 55*.

Defendant asserts that Count II should be dismissed because Plaintiff fails to sufficiently plead intent, antitrust injury, or facts suggesting a probability of monopoly. This Court will consider Plaintiff's claims of monopolization and attempted monopolization in turn.

1. Monopolization

HN23[] To state a claim of monopolization under Section [**40] 2, a plaintiff must allege "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." A.D. Bedell Wholesale Co. v. Philip Morris Inc., 263 F.3d 239, 249 n.27 (3d Cir. 2001) (*quoting* United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)). The facts as pled by Plaintiff cannot fulfill either of these elements.

As to the first element, HN24[] the Supreme Court has defined monopoly power as the power "to control prices or exclude competition." United States v. E. I. Du Pont de Nemours & Co., 351 U.S. 377, 392, 100 L. Ed. 1264, 76 S. Ct. 994 (1956). Courts are reluctant to find monopoly power where the defendant business controls less than fifty percent of the given market. *See, e.g.,* Ideal Dairy Farms v. John Labatt, Ltd., 90 F.3d 737, 749 (3d Cir. 1996) (finding control of 47% of the New Jersey market, "without concrete evidence of anticompetitive behavior," did not show monopoly power); *Fineman v. Armstrong World Indus., 980 F.2d 171, 201 (3d Cir. 1992)* **[**41]** ("As a matter of law, absent other relevant factors, a 55 percent market share will not prove the existence of monopoly power."); Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 490 (5th Cir. 1984) (stating "absent special circumstances, a defendant must have a market share of at least fifty percent before he can be guilty of monopolization"); United States v. Aluminum Co. of America, 148 F.2d 416, 424 (2nd Cir. 1945) (Hand, J.) (stating "it is doubtful whether sixty or sixty-four percent would be enough; and certainly thirty-three is not"); Yeager's Fuel v. Pennsylvania Power & Light Co., [*569] 953 F. Supp. 617, 654 (E.D. Pa. 1997) (holding "market share of 31% is insufficient as a matter of law to establish monopoly power").

Returning to Garshman, supra, in its Sherman Act, Section Two claim, Universal alleged that Transmission possessed monopoly power in the gas resale market for the middle Atlantic region. *See* 824 F.2d at 228. Universal further claimed, *inter alia,* that Transmission had unlawfully maintained its monopoly to fix, stabilize or set the price of natural gas in interstate commerce; had denied Universal **[**42]** equal access to the pipeline network in order to secure price concessions from producers; had used its economic power to breach existing contracts in order to reduce payment liability; and had conditioned the purchase of natural gas upon price concession agreements extorted from Universal and other gas producers. As a result of these alleged antitrust violations, Universal was unable to meet its contract with plaintiffs and other companies, was forced to incur unforseen expenses, and suffered damage to its good will and competitive position. *See id.*

In dismissing the Section Two count for failure to state a claim, the district court found that Universal could prove no set of facts which would entitle it to relief. Rather, "the most that Universal could attempt to prove is that, faced with a constricting market and falling resale prices for natural gas, System and Transmission reacted by demanding successfully price concessions from their suppliers." 824 F.2d at 229. The Court of Appeals affirmed, explaining that under the undisputed economic structure of the industry,:

> Monopolization arose, if at all, solely out of System's and Transmission's ownership of the underlying **[**43]** leasehold rights. It is that ownership which permitted Transmission to demand that gas be sold only to it. It is that ownership which permitted Transmission to threaten to exclude from future exploration those producers unwilling to renegotiate .... There is no contention that System and Transmission owned such a proportion of the underlying leaseholds for natural gas that they were in any position to prevent the exploration and the production of new gas.

Id.

In the present case, Plaintiff has not alleged any particular percentage of any relevant market controlled by Arbitron. In Count II, Plaintiff incorporates all prior paragraphs, and the relevant market is described as the "Philadelphia viewer measurement market." However, this HN25[] failure to allege a substantial market share is not itself fatal to Plaintiff's monopolization claim. Rather, this Court may consider other factors tending to show monopoly power, apart from market share. These factors include "the strength of competition, probable development of the industry, the barriers to entry, the nature of the anti-competitive conduct, and the elasticity of consumer demand." Crossroads Cogeneration Corp. v. Orange & Rockland Utils., 159 F.3d 129, 141 (3d Cir. 1998) **[**44]** (*quoting* Barr

Laboratories, Inc. v. Abbott Laboratories, 978 F.2d 98, 112 (3d Cir. 1992)). However, the Amended Complaint contains no allegations whatsoever related to any of these factors.

The Third Circuit has affirmed the dismissal of a Section Two claim where the plaintiff alleged 100 percent market share, yet failed to allege facts related to any of the other factors relevant to a finding of monopoly power. *See* Crossroads, 159 F.3d at 141. In *Crossroads,* the defendant, O&R was "virtually the sole retail provider of electric power to residential, commercial, and industrial customers" in each county in which it operated. Id. at 132. **[*570]** The plaintiff, an independent producer of electricity, asserted breach of contract and antitrust claims, based on O&R's refusal to purchase energy from the plaintiff. In dismissing the Section Two claim, the district court wrote:

> Plaintiff fails, as a matter of law, to sufficiently allege monopoly power. Plaintiff merely states that defendant is the sole provider of electricity to certain customers in the counties it services .... Plaintiff fails to allege such necessary facts as defendant's **[**45]** market share in the markets in which plaintiff is a competitor or that barriers that exist which prevent plaintiff's entry into such markets. These deficiencies in the Complaint mandate dismissal of plaintiff's Sherman Act claims.

Crossroads 159 F.3d at 141. The Court of Appeals affirmed the dismissal of the Section Two claim, holding as follows:

> We agree with the district court's reasoning.
>
> ***HN26***[] Alleging market share alone is not sufficient to state a claim under the Sherman Act. Monopolization or threatened monopolization *requires something more,* which *may include* "the strength of competition, probable development of the industry, the barriers to entry, the nature of the anti-competitive conduct, and the elasticity of consumer demand." *Barr Labs,* 978 F.2d at 112. Crossroads *has not alleged any of these factors.* Nor is it likely that it could have done so. Crossroads admits that it acts as a competitor to O&R in selling its excess capacity in O&R's service area, and it provides no reason why it is prevented from doing so in the future. *The complaint simply fails to allege anything to suggest monopolization* by O&R cognizable by the Sherman **[**46]** Act.

Crossroads 159 F.3d at 141-42 (emphasis added).

Citing *Crossroads,* this Court has dismissed a Section Two claim where the complaint provided no factual allegations concerning either the alleged relevant market or the defendant's relationship to or power in that market. *See Alpern v. Cavarocchi,* No. 98-cv-3105, 1999 U.S. Dist. LEXIS 5929, at *8 & n.7 (E.D. Pa. April 29, 1999).

In the present case, Plaintiff has not only failed to allege any facts regarding Arbitron's market share, but also, none of the other factors associated with monopoly power. The Amended Complaint states that Nielsen and Arbitron have "entered into a corporate financial relationship by which Nielsen and Arbitron are related in regard to the new system, the details of which are not known to plaintiff." Amended Complaint P 11. Plaintiff, later in the pleading, alleges that Arbitron's "acquisition combinations" with Nielsen somehow confer monopoly power upon Arbitron. Id. P 53. Yet, Plaintiff makes no attempt to explain how this unspecified business relationship renders Arbitron a monopolist in the Philadelphia viewer measurement market.

Plaintiff also asserts that Arbitron's **[**47]** PPM technology "hereinafter will supplant any other system because of its superior accuracy and reliability." Amended Complaint P 49. Of course, ***HN27***[] the fact that Arbitron's product, due to its alleged superiority, may "hereinafter" replace all competition, does not mean that Arbitron has actual monopoly power at this time. *Cf.* Pastore v. Bell Telephone Co. of Pennsylvania, 24 F.3d 508, 513 (3d Cir. 1994) (affirming summary judgment against plaintiffs who, in their claim of attempted monopolization, "confined their discussion to defendants' *future* entry into the market").

Even if Plaintiff has suffered some market deprivation or loss of profits, that does **[*571]** not make an antitrust case. The deficiencies in Plaintiff's market definition were noted above. Arbitron's alleged dominant role in the viewer measurement market may make the omission of Plaintiff's data from the Arbitron reports the "cause" of Plaintiff's deprivation, but the absence of other specific allegations necessary for a monopoly claim to proceed does not allow imposition of antitrust liability on Arbitron. The penalties for antitrust violations are severe, and it is good social policy as well as a legal **[**48]** requisite to require specific allegations, which clear precedent demand, before allowing an antitrust case to proceed. [7]

[49]** Because Plaintiff has failed to allege facts which would support a finding of monopoly power, Plaintiff cannot satisfy that core element of monopolization.

2. Attempted Monopolization

Nor has Plaintiff set forth a claim of attempted monopolization. (P 54). ***HN28***[] To sustain an attempted monopolization theory a plaintiff must allege "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*. Plaintiff's allegations support none of these elements.

With respect to the third element, this Court cannot, based on the facts as pled, discern a "dangerous probability" that Arbitron will achieve monopoly power. ***HN29***[] Generally, there is a "presumption that attempt does not occur in the absence of a rather significant market share." *Pastore v. Bell Telephone Co. of Pennsylvania, 24 F.3d 508, 513 (3d Cir. 1994)* (*quoting* 3 Phillip Areeda & Donald F. Turner, ***Antitrust Law*** P 831 at 336 (1978)). As the Court of Appeals has explained, "a dangerous probability **[**50]** of monopoly may exist where the defendant firm possesses a significant market share when it undertakes the challenged anticompetitive conduct." *Barr Laboratories, 978 F.2d at 112* (*quoting* *International Distrib. Ctrs, Inc. v. Walsh Trucking Co., 812 F.2d 786, 791 (2d Cir. 1987))*.

In *Pastore,* the Court of Appeals affirmed a grant of summary judgment **[*572]** against the plaintiffs who, in their claim of attempted monopolization, "confined their discussion to defendants' *future* entry into the market." *24 F.3d at 513*. Plaintiffs, who were in the business of installing a "unique" security network, alleged that their former client had attempted to monopolize the market for that same type of network. 24,F.3d at 512. The defendants submitted an affidavit stating that they were not "engaged" in the relevant market. *24 F.3d at 513*. Plaintiffs submitted no evidence to show that defendants had entered the market; indeed, they merely suggested that defendants were "intent upon entering" or "poised to enter" the market. *Id.* In affirming summary judgment for defendants, the Third Circuit held that ***HN30***[] "without any share in the **[**51]** relevant market as described by plaintiffs, there can be no inference that defendants hold sufficient economic power in that market to create a dangerous probability of monopoly." *Id.*

---

[7] As a recent economic commentator noted, "The antitrust laws and antitrust enforcement institutions are not designed or well suited to identify and "fix" all market imperfections that lead markets to depart from textbook models of perfect competition. Neither the state of economic science, nor the capabilities of public and private policy enforcement institutions, would make it feasible or desirable for antitrust policy to seek to identify a wide range of market imperfections, and associated firm behavior and market structures, and then to evaluate each case to determine whether some way can be found to improve economic efficiency by changing the structure of the market or constraining firm behavior. This kind of micromanagement of firms and markets cannot be successful because it would involve enormous transaction costs.

U.S. antitrust policy is primarily a deterrence system not a regulatory system. That is, antitrust policy and the associated enforcement hierarchy are not, in general, designed broadly to scrutinize, screen, or approve firm behavior or market structures throughout the economy. Instead, antitrust policy relies on administrative and case law developed through public and private antitrust enforcement actions to develop a set of "antitrust legal rules" which businesses are expected to internalize into their decisions. The incentives firms have to understand and adhere to antitrust rules derive from the potential costs of treble damage actions, administrative restrictions on their behavior, other equitable relief (e.g., divestiture), and for certain infringements (e.g., price fixing), fines and prison terms all weighted by the probability of getting caught and convicted."

Joskow, "Transaction Cost Economics, Antitrust Rules, and Remedies", *Journal of Law, Economic and Organization* (April 2002).

Though *Pastore* was decided in the context of a motion for summary judgment, its holding is applicable to the present motion to dismiss. The facts alleged do not suggest that Arbitron has gained control over an appreciable portion of the market for television viewer measurement in Philadelphia. Rather, the Amended Complaint states that Arbitron has only "recently" entered the television viewing measurement market. Amended Complaint P 9. Plaintiff also claims that Arbitron's PPM technology "hereinafter will supplant any other system because of its superior accuracy and reliability." *Id. P 49*. As noted above, this cannot be an antitrust violation.

This Court has recently dismissed a Section Two claim where the plaintiff stated only a "conclusory allegation" as to the probability of monopolization. *Fresh Made, Inc. v. Lifeway Foods, Inc., 2002 U.S. Dist. LEXIS 15098, 01*-cv-4254, 2002 WL 31246922, at *8 (E.D. Pa. Aug. 9, 2002). In *Fresh Made,* plaintiff, a maker of dairy products, alleged that its competitor's **[**52]** gross annual revenues were five times as large as plaintiff's, and that it had used its influence to threaten distributors and food markets who did not agree to its demands. *Id.* Yet plaintiff's amended complaint failed to "allege the overall size of the proposed market, identify [defendant's] percentage share of the proposed market, identify other participants and competitors in the market, or allege what percentage of [defendant's] gross annual revenues are derived from the proposed market." *Id.* Accordingly, this Court found that the allegations regarding the relative size of the parties did not sufficiently demonstrate a dangerous probability of achieving monopoly power. *Id.*

The facts set forth by Plaintiff offer no guidance as to Arbitron's probability of achieving market power. Accordingly, Plaintiff cannot satisfy the dangerous probability element. With respect to the remaining elements of attempted monopolization, the allegations fail to demonstrate any specific intent to monopolize, much less predatory or anticompetitive conduct.

HN31[] The specific intent element requires more than "a mere intention to prevail over rivals or improve market position." *Pennsylvania Dental Ass'n v. Medical Serv. Ass'n of Pa., 745 F.2d 248, 261 (3d Cir. 1984)*. **[**53]** While acknowledging that Nielsen remains an active competitor in the market, Plaintiff provides no explanation whatsoever as to how Arbitron's unspecified "combination" with Nielsen furthers the attempted monopolization. [8] Amended Complaint P 54.

[54] [*573]** Count II merely states, in conclusory language, that Arbitron and Nielsen's business relationship, coupled with Arbitron's recent PPM tests (which, of course, omitted WGTW), renders Arbitron an attempted monopolist. Such bald and unsubstantiated assertions cannot satisfy Plaintiff's pleading burden. *See Fresh Made,* 2002 WL 31246922, at *8.

Plaintiff has not stated a viable claim under *Section 2* of the Sherman Act. Accordingly, Count II must be dismissed.

3. Whether to Allow Further Amendment

The Court is well aware of the line of Third Circuit decisions requiring District Courts to allow plaintiffs to amend defective complaints. *See Shane v. Fauver, 213 F.3d 113 (2000)*. However, many Third Circuit decisions have also affirmed dismissals of antitrust complaints without leave to amend *[Garshman supra, PepsiCo. supra].* In this case, this Court has determined not to allow Plaintiff to amend further the antitrust claims for the following reasons:

1. Plaintiff has already amended its antitrust claims once, and despite oral argument raising the issues discussed in this Memorandum, Plaintiff has still not satisfied the legal **[**55]** requirements, or requested further leave to amend.

---

[8] It is not clear from the Amended Complaint whether Plaintiff wishes to also make a claim of conspiracy to monopolize under Section Two Nevertheless, the facts alleged do not support such a claim. ***HN32***[] To properly state a conspiracy to monopolize claim a plaintiff "must allege facts constituting the conspiracy, its period and object, and what the alleged participants did to achieve the conspiracy's object." *Massachusetts School of Law at Andover, Inc. v. American Bar Ass'n, 855 F. Supp. 108, 110 (E.D. Pa. 1994)*, *aff'd 107 F.3d 1026 (3d Cir. 1997)*. Plaintiff has made no effort to describe the supposed "combination," other than the vague allegation that Nielsen and Arbitron have "entered into a corporate financial relationship by which Nielsen and Arbitron are related in regard to the new system, the details of which are not known to plaintiff." Amended Complaint P 11.

2. The nature of the industry, and the absence of any rational economic theory to support Plaintiff's Complaint, indicate that it would be futile for Plaintiff to make further amendment. *See* F.R.Civ. P. 15. *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410 (3d. Cir. 1997)*.

C. Count III -- Lanham Act, § 43(a)

Plaintiff's next theory is raised under the Lanham Act. Section 43(a) of the Lanham Act, *15 U.S.C. § 1125(a)*, provides:

HN33[] (a) Civil action.

(1) *Any person* who, on or *in connection with any goods or services,* or any container for goods, *uses in commerce any* word, term, name, symbol, or device, or any combination thereof, or any *false designation of origin, false or misleading description of fact, or false or misleading representation of fact,* which--

(A) *is likely to cause confusion,* or to cause mistake, or to deceive as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person, or

(B) in commercial **[**56]** advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities, shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act.

15 U.S.C. § 1125(a) (emphasis added). As courts have recognized, **HN34**[] § 43(a) "creates a federal cause of action for unfair competition, even absent a federal registered trademark." *Williams v. Curtiss-Wright* **[*574]** *Corp., 691 F.2d 168, 172 (3d Cir. 1982)*. Generally, the statute "provides a private remedy to a commercial plaintiff who meets the burden of proving that its commercial interests have been harmed by a competitor's false advertising." *Sandoz Pharmaceuticals Corp. v. Richardson-Vicks, Inc., 902 F.2d 222, 230 (3d Cir. 1990)*. Courts have refused to interpret § 43(a) more broadly than necessary, so as to "eliminate frivolous claims and prevent flooding the federal courts with Lanham Act claims contrary to the type envisioned by Congress." *Thorn v. Reliance Van Co., 736 F.2d 929, 933 (3d Cir. 1984)*.

In the present **[**57]** case, Plaintiff alleges that Arbitron has "knowingly and maliciously misrepresented, knowingly [*sic*] the characteristics and qualities of plaintiff's goods, services and activities, whereby plaintiff has been substantially damaged." Amended Complaint P 58. Specifically, Plaintiff claims that Arbitron misrepresented the quality of WGTW's services through both its omission of WGTW from the PPM test data, and through its representations to the industry that the PPM data were, nevertheless, accurate. *Id. P 59*. Plaintiff's theory seems to be that advertisers, noticing WGTW's absence from the PPM test reports, which Arbitron had touted as accurate, would thereby assume that WGTW had no ratings worth measuring.

Defendant raises several arguments as to why this count should be dismissed. However, this Court must first consider the threshold question of whether Plaintiff has standing to bring a § 43(a) claim. **HN35**[] The "dispositive question" as to 43(a) standing is whether the plaintiff "has a *reasonable interest* to be protected against false advertising." *Thorn, 736 F.2d at 933* (emphasis added). The Court of Appeals has set forth the following five factors to consider **[**58]** in analyzing standing under § 43(a), borrowing the five factors established by the Supreme Court for standing in antitrust cases:

(1) The nature of the plaintiff's alleged injury: Is the injury "of a type that Congress sought to redress in providing a private remedy for violations of the [Lanham Act]"?

(2) The directness or indirectness of the asserted injury.

(3) The proximity or remoteness of the party to the alleged injurious conduct.

(4) The speculativeness of the damages claim.

(5) The risk of duplicative damages or complexity in apportioning damages.

Conte Bros. Auto., Inc. v. Quaker State-Slick 50, Inc., 165 F.3d 221, 233 (3d Cir. 1998) (*citing* Associated Gen. Contractors of Calif., Inc. v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983) (discussing antitrust-standing)).

In the instant case, four of the five factors weigh against Plaintiff's standing. As to prong one, it is significant that Arbitron and Plaintiff are not competitors. As the *Conte* court put it, ***HN36***[] "while there may be circumstances in which a non-competitor may have standing to sue ... *the* **[**59]** *focus* of the Lanham Act is on 'commercial interests [that] have been harmed by a *competitor's false advertising.*'" 165 F.3d at 234 (emphasis added) (*quoting* Granite State Ins. Co. v. AAMCO Transmis. Inc., 57 F.3d 316, 321 (3d Cir. 1995)). None of Arbitron's alleged actions can be reasonably construed as false advertising.

Arbitron's release of test PPM reports, omitting any measurements for WGTW, bears no resemblance to advertising activity. Plaintiff also claims that, recently, at a meeting of the Pennsylvania Association of Broadcasters, Kevin Smith, a Senior Vice President of Arbitron, represented that **[*575]** the PPM survey was fair, accurate and complete. Id. at P 32. Even if this vague, generic remark were, in fact, advertising, it conveys no specific content which could be considered false. The Amended Complaint does not assert that Smith or any other Arbitron representative ever mentioned WGTW in any context. Yet Plaintiff suggests that an advertising agency viewing Arbitron's PPM reports, or hearing Smith's statements regarding their accuracy, would naturally conclude that WGTW's ratings are too minute to affect the test's accuracy. This theory is, at most, **[**60]** wild speculation. Assuming that a media professional, reading the PPM test surveys, would draw any conclusion about a station that was not covered in the surveys, such conclusion would not necessarily be that WGTW had insubstantial ratings. Indeed, as Plaintiff acknowledges, Nielsen has long operated a television viewership measurement system, Id. P 11, which would allow another view of Plaintiff's viewer penetration. Thus, the mere omission of WGTW from Arbitron's purportedly accurate reports would not impact Plaintiff's ability to compete, nor detract from Plaintiff's good will. *See* Conte, 165 F.3d at 234. Any loss suffered by Plaintiff as a result of these alleged statements by Arbitron is not the type of loss which the Lanham Act was intended to redress.

As to the second and third standing prongs, Plaintiff's alleged injury is extremely indirect, and Plaintiff's business is only remotely connected to Arbitron's PPM test monitoring. As to the fourth prong, the alleged damages are highly speculative; Plaintiff would have great difficulty proving a direct link between Arbitron's conduct and actual WGTW dollars lost. The final prong, though, weighs for Plaintiff, **[**61]** as there is no apparent risk of duplicative damages or complexity in apportioning damages.

Balancing the above five factors, it is apparent that Plaintiff lacks standing to bring a § 43(a) claim. Yet, even if this Court were to find standing, the facts pled cannot satisfy the elements necessary ***HN37***[] to prevail on such a claim:

> 1) that the defendant has made false or misleading statements as to his own product [or another's]; 2) that there is actual deception or at least a tendency to deceive a substantial portion of the intended audience; 3) that the deception is material in that it is likely to influence purchasing decisions; 4) that the advertised goods traveled in interstate commerce; and 5) that there is a likelihood of injury to the plaintiff in terms of declining sales, loss of good will, etc.

U.S. Healthcare, Inc. v. Blue Cross of Greater Philadelphia, 898 F.2d 914, 922-23 (3d Cir. 1990) (*quoting* Max Daetwyler Corp. v. Input Graphics, Inc., 545 F. Supp. 165, 171 (E.D. Pa. 1982) (Pollak, J.)).

With respect to the first element, the Amended Complaint does not allege that Arbitron made any statements about WGTW, specifically. As **[**62]** to the second element, Arbitron's PPM test reports, which omitted data for WGTW, could not plausibly "deceive" a substantial portion of the intended audience. Nor would Defendant's representation that such reports were accurate cause a reasonable person to infer anything whatsoever negative about WGTW. Similarly, as to the third element, the facts pled do not support a conclusion that Arbitron's actions caused "material" deception. As Plaintiff acknowledges, Nielsen has long been in the television ratings market and continues to operate in that regard, separately from the PPM system now being developed. Id. P 11; Transcript of Motion to Dismiss Hearing (Oct. 8, 2002) at 35 ("Nielsen is in the market, absolutely."). Therefore, any advertiser could easily refer to Nielsen's **[*576]** data on the Philadelphia market, and would not, rationally, be influenced in making purchasing decisions by the absence of WGTW from Arbitron's PPM tests.

As Plaintiff's pleading cannot satisfy any of the first three elements of a § 43(a) claim, it is not necessary to consider the elements of interstate commerce or injury. Because Plaintiff has not stated a valid claim under the Lanham Act, Count III must be **[**63]** dismissed. Because the Court believes, given the industry structure and nature of Plaintiff's business compared to Defendant's business, any effort to amend would be futile, dismissal is with prejudice.

D. Count IV -- Disparagement of Commercial Products

Plaintiff next asserts that Arbitron has "unfairly and falsely disparaged plaintiff's product, *i.e.* by misrepresenting its listening [*sic*] audience and importance in the market." Amended Complaint P 63. Plaintiff appears to allege that Arbitron misrepresented the quality of WGTW's broadcasts or viewership, by omitting WGTW from the PPM test data, and by representing to the industry that the PPM data were, nevertheless, complete and accurate. *See id. P 59*.

The tort at issue here is "variously referred to as 'trade libel,' 'commercial disparagement,' and 'injurious falsehood.'" *Neurotron Inc. v. Medical Serv. Ass'n of Pa., 254 F.3d 444, 448 (3d Cir. 2001)*; *Electro Med. Equip. Ltd. v. Hamilton Med. AG,* No. 99-cv-579, *2000 U.S. Dist. LEXIS 7078*, at *8 n.3 (E.D. Pa. May 24, 2000). ***HN38***[] Traditionally, to sustain a claim of commercial disparagement under Pennsylvania law, a plaintiff had to **[**64]** plead three elements:

> 1) that the disparaging statement of fact is untrue or that the disparaging statement of opinion is incorrect; 2) that no privilege attaches to the statement; and 3) that the plaintiff suffered a direct pecuniary loss as the result of the disparagement.

Synygy, Inc. v. Scott-Levin, Inc., 51 F. Supp. 2d 570, 579 (E.D. Pa. 1999); *Electro Med., 2000 U.S. Dist. LEXIS 7078*, at *9.

Recently, however, the Court of Appeals for the Third Circuit predicted that the Pennsylvania Supreme Court would alter the "parameters" of the tort by adopting a Restatement section that had never before been cited by the state's highest court. *Neurotron, 254 F.3d at 449*. The Restatement section at issue, *§ 623A*, provides that:

> One who publishes a false statement harmful to the interests of another is subject to liability for pecuniary loss resulting to the other if
>
> (a) he *intends* for publication of the statement to result in harm to interests of the other having a pecuniary value, *or* either recognizes or should *recognize that it is likely* to do so, *and*
>
> (b) he *knows* that the statement **[**65]** is *false* or acts in *reckless disregard* of its truth or falsity.

Restatement (Second) of Torts § 623A (1977) (emphasis added). Notably, this Restatement formulation of the tort includes an element of knowledge or "reckless disregard" as to truth or falsity. Such state of mind was not required by the traditional three-prong formulation. *See* *Synygy, 51 F. Supp. 2d at 579*; *Electro Med., 2000 U.S. Dist. LEXIS 7078*, at *9.

Prior to *Neurotron,* the state Supreme Court had not decided a trade libel case in over two decades. *See* *Neurotron, 254 F.3d at 448*. However, the Superior Court, along with several Pennsylvania federal district courts, had cited *Restatement § 623A*. Moreover, as the Court of **[*577]** Appeals observed, the Pennsylvania Supreme Court has consistently adopted Restatement provisions. *Id. at 449-50*. Thus, the *Neurotron* court found that the state's highest court would accept *§ 623A* as the "most reliable collation of the common law of injurious falsehood." *Id. at 451*. Accordingly, the Court of Appeals applied the "reckless indifference" standard to the facts presented in **[**66]** *Neurotron.* *Id. at 452*. Finding that the record did not support a finding that the defendant acted with knowledge of falsity, or reckless disregard, the court affirmed summary judgment for the defendants. *Id. at 454*.

Fulfilling the Third Circuit's prediction, **HN39**[] the Pennsylvania Supreme Court has recently cited Restatement § 623A. *See* Pro Golf Mfg. v. Tribune Rev. Newsp. Co., 570 Pa. 242, 809 A.2d 243, No. 18- WAP-2001, 2002 Pa. LEXIS 2194, at *6 (Pa. Oct. 22, 2002). In *Pro Golf,* the plaintiff, a golf equipment maker, sued a newspaper which had allegedly stated, falsely, that the plaintiff's premises were soon to be demolished. The trial court dismissed the claim based on a one-year limitations period. The Superior Court reversed, finding that a longer limitations period applied. In analyzing the tort of commercial disparagement, the Superior Court cited Restatement § 623A:

> The Restatement (Second) of Torts § 623A labels this tort as "injurious falsehood." Regardless of the label, the publication of a disparaging statement concerning the business of another is actionable where: (1) the statement is false; (2) the publisher either *intends* the **[**67]** publication to cause pecuniary loss or reasonably should recognize that publication will result in pecuniary loss; (3) pecuniary loss does in fact result; and (4) the publisher either *knows* that the statement is false or acts in *reckless disregard* of its truth or falsity. Restatement (Second) of Torts § 623A (1977).

Pro Golf Mfg., Inc., v. Tribune Review Newspaper Co., 2000 PA Super 273, 761 A.2d 553, 555-56 (Pa. Super. 2000) (emphasis added).

The Pennsylvania Supreme Court reversed, holding that the trial court had correctly applied a one-year limitations period to the commercial disparagement action. *See Pro Golf, 809 A.2d 243, 2002 Pa. LEXIS 2194*, at *7. In the October 2002 decision, however, the Supreme Court quoted the above passage from the Superior Court's opinion with approval, which included the "reckless disregard" element and a citation to § 623A. Id. at *5-6.

Thus, the state courts have, very recently, indicated a substantial change in the law of commercial disparagement. Accordingly, to sustain its cause of action under Count IV, Plaintiff must allege, *inter alia,* that Arbitron made a false statement, which **[**68]** caused pecuniary loss to Plaintiff, and that Arbitron knew that the statement was false or acted with reckless disregard of its truth or falsity. The allegations of the Amended Complaint do not fulfill these requirements.

Both parties, in their briefings, discuss only the traditional three-prong formulation of the commercial disparagement tort. Plaintiff and Defendant rely on *Synygy,* 51 F. Supp. at 579, for definition of the cause of action's parameters. Though Plaintiff asserts that Arbitron "maliciously" disparaged WGTW, Amended Complaint P 62, Count IV contains no allegation that Arbitron acted with the knowing or indifferent state of mind referred to in *Pro Golf* and *Neurotron.* Accordingly, the claim cannot be sustained based on the facts as pled.

Nevertheless, as noted above, this claim should not be dismissed with prejudice unless amendment would be futile. Considering the whole of the Amended Complaint, Plaintiff has provided enough factual **[*578]** background such that, if amended is allowed, the elements of the tort may be satisfied. For that reason, Plaintiff may amend its pleading to plead facts to support all necessary elements of its commercial disparagement **[**69]** claim. If Plaintiff files a Second Amended Complaint, it shall contain sufficient factual detail to describe the nature of Arbitron's statements and the reason why each was false; Arbitron's intention and knowledge in making the statement; and the causal relationship between the statement and an approximate amount of pecuniary loss to Plaintiff. Hence, Count IV is dismissed without prejudice to Plaintiff's right to file a second amended complaint.

E. Count V -- Tortious Interference with Prospective Contractual Relations

Next, Plaintiff claims that Arbitron has "improperly interfered with plaintiff's likely and prospective contractual relations," by omitting WGTW from the PPM test data and representing to the industry that the PPM data were, nevertheless, complete and accurate. Amended Complaint P 59, 66. **HN40**[] The elements of the tort of interference with prospective contractual relations are as follows:

> (1) the existence of a contractual or prospective contractual relationship between the plaintiff and a third party; (2) a purpose or intent to harm an existing relationship or to prevent a prospective relationship from accruing; (3) the absence of privilege or justification **[**70]** on part of the defendant; and (4) the occurrence of actual harm or damage to the plaintiff as a result of the defendant's conduct.

Fresh Made, Inc. v. Lifeway Foods, Inc., 01-cv-4254, 2002 WL 31246922, at *12 (E.D. Pa. Aug. 9, 2002).

As to the first element, a prospective contract "'is something less than a contractual right, something more than a mere hope.' ... It exists if there is a reasonable probability that a contract will arise from the parties' current dealings." *Alvord-Polk, Inc. v. F. Schumacher & Co., 37 F.3d 996, 1015 (3d Cir. 1994)* (*quoting* *Glenn v. Point Park College, 441 Pa. 474, 272 A.2d 895, 898-99 (Pa. 1971))*. Plaintiff cannot rest its tortious interference claim on the "mere hope that additional contracts or customers would have been forthcoming but for defendant's interference." *Fresh Made, Inc.,* 2002 WL 31246922, at *12.

Plaintiff has not identified a single past, present or prospective customer of WGTW with whom it had a prospective contract which did not finalize because of Defendant's actions. Nor does Plaintiff assert facts which would suggest the loss of any particular potential **[**71]** client. If these events had occurred, Plaintiff would have knowledge. Nor has Plaintiff endeavored to explain a causal connection between Arbitron's conduct and WGTW's loss of a contract that otherwise might have been realized. The tort of tortious interference is entirely inapplicable to the facts alleged in the Amended Complaint. Accordingly, Count V is dismissed with prejudice.

F. Count VI -- Negligence

Next, Plaintiff alleges negligence. ***HN41***[] Under Pennsylvania law, a negligence claim consists of four elements:

> (1) a duty or obligation recognized by the law, requiring the actor to conform to a certain standard of conduct; (2) a failure to conform to the standard required; (3) a causal connection between the conduct and the resulting injury; and (4) actual loss or damage resulting to the interests of another.

Kleinknecht v. Gettysburg College, 989 F.2d 1360, 1366 (3d Cir. 1993). **[*579]**

Plaintiff states that, in April 2002, Arbitron "requested permission to, and was permitted," to enter WGTW's premises for the purpose of installing a PPM encoder. Amended Complaint P 67-68. Plaintiff asserts that Defendant was, thereafter, obligated to inform WGTW of any **[**72]** defect or malfunction in the encoder and to provide WGTW with instructions as to its use. *See* *id. P 70-71*. Yet, Arbitron breached this duty of care, Plaintiff claims, by improperly installing the equipment, failing to instruct WGTW as to its use and failing to correct a defect in the equipment. *Id. P 73*. Moreover, even after Plaintiff learned of the defect, Arbitron continued to exclude Plaintiff from its PPM surveys. *Id. P 77*. These actions or omissions allegedly caused "irreparable damage" to Plaintiff. *Id.*

Defendant stresses that Plaintiff's negligence claim is barred by ***HN42***[] the "economic loss doctrine." That rule prevents recovery on a negligence theory for an economic loss, where the plaintiff's entitlement "flows only from a contract." *Duquesne Light Co. v. Westinghouse Elec. Corp., 66 F.3d 604, 618 (3d Cir. 1995)*; *Constar, Inc. v. National Distrib. Ctrs., Inc., 101 F. Supp. 2d 319, 322 (E.D. Pa. 2000)*. The rationale is that negligence law is not intended to compensate a party for a loss resulting from a breach of duty, where that duty was assumed only by the parties' agreement. *See* *Constar, 101 F. Supp. 2d at 322*. **[**73]**

This Court cannot discern from the Amended Complaint whether or not Plaintiff bases his theory of duty upon the existence of an agreement, or other business arrangement, between the parties. On one hand, Plaintiff claims that Arbitron "requested permission to, and was permitted" by Plaintiff to enter WGTW's premises. Amended Complaint P 67-68. Plaintiff further claims that Arbitron "directly and knowingly assumed" a duty of care when it visited WGTW for the purpose of installing a PPM encoder. *Id. P 68-69*. On the other hand, Plaintiff does not use the word "contract" to describe the business relationship between the parties. Under clear Pennsylvania precedent, if Arbitron's duty arose from the parties' agreement, then Plaintiff may not recover for economic losses caused by Arbitron's negligence. If Plaintiff envisions some other basis for Arbitron's duty, other than a business relationship between the parties, Plaintiff has not sufficiently alleged that basis.

As Plaintiff has not properly stated a legal duty, this Court need not address the remaining elements of breach, causation and injury. Nevertheless, Plaintiff's Amended Complaint offers enough clues as to his negligence **[**74]** theory to allow an amended pleading on this count. Therefore, with respect to Count VI, the motion to dismiss is granted, without prejudice to Plaintiff's right to submit a Second Amended Complaint, with sufficient factual details to establish a claim for negligence.

G. Count VII -- Promissory Estoppel

Finally, Plaintiff raises a claim under the equitable doctrine of promissory estoppel. HN43[] In order to succeed on a promissory estoppel theory, a party must establish that

> (1) the promisor made a promise that he should have reasonably expected would induce action or forbearance on the part of the promisee; (2) the promisee actually took action or refrained from taking action in reliance on the promise; and (3) injustice can be avoided only by enforcing the promise.

Shoemaker v. Commonwealth Bank, 700 A.2d 1003, 1006 (Pa. Super. 1997). *See also* Crouse v. Cyclops Indus., 560 Pa. 394, 745 A.2d 606, 610 (Pa. 2000). An action for promissory estoppel should be dismissed where **[*580]** the complaint is "bereft of any allegation of a promise or reliance thereupon." Holewinski v. Children's Hosp., 437 Pa. Super. 174, 649 A.2d 712, 714 (Pa. Super. 1994). **[**75]**

Count VII of Plaintiff's Amended Complaint states that:

> Upon gaining and being allowed entry to the plaintiff's equipment, defendant assumed, accepted, and is burdened with the duty to use a reasonable standard of care in regard to the protection of the equipment, and the proper utilization of the equipment for the purpose for which it was admitted, *i.e.,* to provide an accurate and satisfactory transmission of plaintiff's viewership.
>
> [P] 81. Through its neglect and failure to observe the standard of care, and due to its reckless and malicious conduct, for the reasons aforesaid, defendant, and others which may become known to plaintiff through discovery and otherwise, defendant violated the duty of reasonable care, causing serious injury to the plaintiff, as aforesaid.

Amended Complaint P 80-81. Upon review of the entire Amended Complaint, Plaintiff has not alleged that Arbitron made a promise, or that Plaintiff reasonably relied on such promise. Moreover, Plaintiff's assertion that Arbitron "violated the duty of reasonable care," *id. P 81*, simply makes no sense in the context of a promissory estoppel claim. If facts existed to support such a claim, Plaintiff **[**76]** would know them. Accordingly, Count VII must be dismissed, with prejudice.

V. Conclusion

For the foregoing reasons, Defendant's motion to dismiss the Amended Complaint pursuant to Rule 12(b)(6) is granted. Counts I, II, III, V and VII are dismissed with prejudice. Counts IV (Disparagement of Commercial Products) and VI (Negligence) are dismissed without prejudice to Plaintiff's right to file a second amended complaint. An appropriate Order follows.

ORDER

AND NOW, this 31 day of December, 2002, it is hereby ORDERED that the Defendant's motion to dismiss the Amended Complaint pursuant to Rule 12(b)(6) is GRANTED.

It is further ORDERED that:

1. Counts I, II, III, V and VII are dismissed with prejudice; and

2. Counts IV and VI are dismissed without prejudice to Plaintiff's right to file a Second Amended Complaint within twenty (20) days.

BY THE COURT:

MICHAEL M. BAYLSON, U.S.D.J.

Ashley Creek Phosphate Co. v. Chevron USA, Inc.

HN1[] **Standards of Review, De Novo Review**

An appellate court reviews a grant of summary judgment de novo, applying the same standard used by the district court under *Fed. R. Civ. P. 56(c)*. Summary judgment shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Rule 56(c)*.

HN2[] **Entitlement as Matter of Law, Appropriateness**

Although in the broad sense summary judgment should be used sparingly in antitrust cases, the usual rules governing summary judgment still apply. Where the record clearly indicates that there are no circumstances under which the plaintiff can prevail, summary procedures are appropriate to avoid needless trials and unnecessary expense. Moreover, even in antitrust cases, a reviewing court is not limited to the grounds upon which the trial court relied but may base summary judgment on any proper grounds found in the record to permit conclusions of law.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > Appeals > Standards of Review > De Novo Review

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN3[] Standing, Clayton Act

A district court's ruling that a plaintiff lacked standing under *§ 4* (*15 U.S.C.S. § 15*) of the Clayton Act is a question of law subject to de novo review.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN4[] Private Actions, Standing

Section 4 (*15 U.S.C.S. § 15*) of the Clayton Act confers on private parties the power to enforce federal antitrust laws. *15 U.S.C.S. § 15(a)*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN5[] Private Actions, Standing

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > Remedies > Damages > Monetary Damages

HN6[] Clayton Act, Claims

Although *§ 4* (*15 U.S.C.S. § 15*) of the Clayton Act appears to be a broad grant of standing, a plaintiff's right to sue for money damages is subject to a number of limitations unique to the antitrust laws that are based upon the express words of the statute and policies found by courts to be implicit in the structure and purpose of the antitrust laws. The United States Supreme Court may be concerned about reading *§ 4* too broadly. To maintain standing to bring an antitrust claim under *§ 4*, a plaintiff must show (1) an "antitrust injury" and (2) a direct causal connection between that injury and a defendant's violation of the antitrust laws.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Energy & Utilities Law > Antitrust Issues > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN7[] **Clayton Act, Claims**

To meet the first prong of the test to maintain standing to bring an antitrust claim under *§ 4* (*15 U.S.C.S. § 15*) of the Clayton Act, a plaintiff must allege a business or property injury, an antitrust injury, as defined by the Sherman Act. An antitrust injury is defined as an injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendant's acts unlawful. A violation of the Act without resultant injury to the plaintiff is insufficient to confer standing; the plaintiff must show the antitrust injury resulted directly from the defendant's violation of ***antitrust law***.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN8[] **Private Actions, Standing**

An antitrust injury to either a plaintiff's business or property will be sufficient to confer standing on the plaintiff to raise antitrust claims. *15 U.S.C.S. § 15(a)*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Energy & Utilities Law > Antitrust Issues > General Overview

HN9[] **Private Actions, Standing**

Most courts have not required a plaintiff to actually be engaged in an ongoing business in order to have standing under the antitrust laws. It is sufficient if he has manifested an intention to enter the business and has demonstrated his preparedness to do so.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN10[] **Private Actions, Standing**

Most courts have held that injury to an enterprise in the planning stage is actionable under the antitrust laws, provided that the plaintiff has an intent and capability to enter the market and has achieved a sufficiently advanced state of preparation for doing so. The United States Court of Appeals for the Tenth Circuit has identified the following as "key elements" in evaluating the plaintiff's preparedness to enter a business: (1) ability to finance the business and purchase the necessary facilities and equipment; (2) consummation of contracts needed for the proposed venture; (3) affirmative actions by the plaintiff to engage in the proposed business; and (4) the background and experience of the plaintiff in the prospective business. In examining preparedness, courts have uniformly drawn the line at the point where promotion transcends the level of hopes, desires, and expectations, and reaches a certain stage of maturity and concreteness, a stage where it is accompanied by certain indicia of ultimate success. Put another way, the courts have held that a potential competitor cannot achieve standing merely by demonstrating his intention to enter a field; he must also demonstrate his preparedness to do so.

Civil Procedure > Appeals > Standards of Review > General Overview

HN11[] **Appeals, Standards of Review**

An appellate court will not search the record in an effort to determine whether there exists dormant evidence which might require submission of a case to a jury.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN12[] **Clayton Act, Claims**

Several courts have recognized that in order to show preparation to enter a given market, an antitrust plaintiff need not take those steps which would have been rendered futile by an alleged monopolist. A defendant cannot benefit by the application of the standing doctrine from the fact that it is able to prevent the plaintiff from becoming a competitor. It would be inconsistent with one purpose of the Clayton Act--to protect the business interests of the victims of monopolistic practices--to require an antitrust plaintiff to pay a courtroom entrance fee in the form of an expenditure of substantial resources in a clearly futile competitive gesture. The United States Court of Appeals for the Tenth Circuit has no doubt that there exists some type of futility exception to the preparation requirement set out in Curtis. Whatever the parameters of such an exception, however, it clearly does not excuse a plaintiff from performing the most basic preparatory steps.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Energy & Utilities Law > Antitrust Issues > General Overview

Governments > Courts > Judicial Precedent

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN13[] **Private Actions, Remedies**

Allowing an antitrust plaintiff to recover merely upon a showing of a violation of the act, without a demonstration of injury-in-fact, would conflict with United States Court of Appeals for the Tenth Circuit precedent. A violation of the act without resultant injury to the plaintiff is insufficient to confer standing.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN15[] **Private Actions, Remedies**

To have standing to allege antitrust injury to an inchoate business interest, a plaintiff must establish its preparedness to enter the market.

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

Civil Procedure > Appeals > Notice of Appeal

HN16[] **Appellate Jurisdiction, Interlocutory Orders**

Fed. R. App. P. 3(c)(1)(B) requires that a notice of appeal designate the judgment, order, or part thereof being appealed. A district court's interlocutory orders merge into its final orders and judgments, and the identification of the final order in the notice of appeal is sufficient to support appellate jurisdiction to review the earlier now-merged interlocutory orders.

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

HN17[] **Appellate Jurisdiction, Final Judgment Rule**

Fed. R. Civ. P. 54(b) provides that in the absence of a *Rule 54(b)* certification from the district court, any order or other form of decision, however designated, which adjudicates fewer than all the claims or the rights and liabilities of fewer than all the parties shall not terminate the action as to any of the claims or parties.

Civil Procedure > Appeals > Notice of Appeal

Constitutional Law > The Judiciary > Case or Controversy > Ripeness

Constitutional Law > The Judiciary > Case or Controversy > General Overview

HN18[] **Appeals, Notice of Appeal**

In a situation in which other claims were effectively dismissed after a notice of appeal was filed, *Fed. R. App. P. 4(a)(2)* permits the interpretation that the notice of appeal, filed prematurely, ripens and saves the appeal. In such cases generally the appellate court will consolidate or companion the earlier appeal with any subsequent appeals arising out of the same district court case.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN19[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Federal courts have an independent obligation to examine their own jurisdiction.

Civil Procedure > ... > Summary Judgment > Appellate Review > Appealability

Labor & Employment Law > Wrongful Termination > Remedies > Costs & Attorney Fees

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Parties

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Adverse Determinations

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN20[] **Appellate Review, Appealability**

Where a party is the prevailing party as to a pendent claim because the claim has been dismissed, albeit without prejudice, the party can still appeal the district court's merits-based denial of a summary judgment motion as long as it can demonstrate a personal stake in the outcome of the appeal. If a successful appeal would alter, inter alia, future litigation costs, the personal stake requirement of U.S. Const. art. III is met.

Civil Procedure > ... > Summary Judgment > Appellate Review > Appealability

Labor & Employment Law > Wrongful Termination > Remedies > Costs & Attorney Fees

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Parties

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Adverse Determinations

HN21[] **Appellate Review, Appealability**

When a district court denies summary judgment on the merits, and then exercises its discretion to decline pendent jurisdiction, the moving party is a party aggrieved by a judgment and has an appeal as of right on the merits of the denial of summary judgment.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

HN22[] **Jurisdiction, Jurisdictional Sources**

District courts would be wise to keep in mind the rule set out in Jarvis and Pell when faced with a complaint invoking the court's federal question jurisdiction which also includes pendent state law claims. Pendent jurisdiction need not be exercised in every case in which it is found to exist. Needless decisions of state law should be avoided both as a matter of comity and to promote justice between the parties, by procuring for them a surer-footed reading of applicable law. If federal claims are dismissed before trial, leaving only issues of state law, the federal court should decline the exercise of jurisdiction by dismissing the case without prejudice.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN23[] **Supplemental Jurisdiction, Pendent Claims**

Taken together, Jarvis, Pell, and Bauchman counsel against deciding dispositive motions addressed to pendent state law claims unless it appears that a federal claim will proceed to trial or a decision is necessary because of some peculiar aspect of the case (e.g., coordination of trial docket and discovery). This is especially true where the state law the district court must apply to dispose of the motion is undeveloped. Absent such restraint, the parties may well be deprived of the surer-footed reading of applicable law that would be provided them by the relevant state court.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Torts > Intentional Torts > Abuse of Process > General Overview

Torts > Intentional Torts > Malicious Prosecution > General Overview

HN24[] **Pleadings, Counterclaims**

The Utah Supreme Court has adopted the analytical framework set out in the Restatement (Second) of Torts for distinguishing between the following three distinct torts involving abusive manipulation of judicial procedures: (1) abuse of process, (2) malicious prosecution, and (3) wrongful use of civil proceedings. Despite the fact that it has in the past utilized the term as a catch-all description of any private misuse of judicial resources, the supreme court has recognized that abuse of process is a narrow tort applying only to one who uses a legal process against another primarily to accomplish a purpose for which it is not designed.

Labor & Employment Law > Wrongful Termination > Remedies > General Overview

Torts > Intentional Torts > Abuse of Process > Elements

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Civil Procedure > ... > Pleadings > Crossclaims > General Overview

Torts > Intentional Torts > Abuse of Process > General Overview

Torts > Intentional Torts > Malicious Prosecution > General Overview

Torts > ... > Malicious Prosecution > Elements > General Overview

HN25[] **Wrongful Termination, Remedies**

An abuse of process claim can be raised as a counterclaim under Utah law because there is no requirement that the judicial proceedings giving rise to the tort claim have been terminated in the counterclaimant's favor. The tort of wrongful use of civil proceedings, in contrast, focuses on the whether the procurement, initiation, or continuation of civil proceedings was for the purpose of harassment or annoyance and without probable cause. The action of malicious prosecution, which began as a remedy for unjustifiable criminal proceedings, has been undergoing a slow process of extension into the field of the wrongful initiation of civil suits. A claim for wrongful use of civil proceedings is not ripe until the underlying proceedings are terminated in favor of the person against whom they are brought.

Torts > Intentional Torts > Malicious Prosecution > General Overview

HN26[] **Intentional Torts, Malicious Prosecution**

In an abuse of process claim, the gravamen of the misconduct is not the wrongful procurement of legal process or the wrongful initiation of criminal or civil proceedings; it is the misuse of process, no matter how properly obtained, for any purpose other than that which it was designed to accomplish. Therefore, it is immaterial that the process was properly issued, that it was obtained in the course of proceedings that were brought with probable cause and for a proper purpose, or even that the proceedings terminated in favor of the person instituting or initiating them. The subsequent misuse of the process, though properly obtained, constitutes the misconduct for which the liability is imposed.

Torts > Intentional Torts > Abuse of Process > Elements

Torts > Intentional Torts > Malicious Prosecution > General Overview

HN27[] **Abuse of Process, Elements**

The gist of the tort of abuse of process is not commencing an action or causing process to issue without justification, but misusing, or misapplying process justified in itself for an end other than that which it was designed to accomplish. The purpose for which the process is used, once it is issued, is the only thing of importance. Consequently, it is unnecessary for the plaintiff to prove that the proceeding has terminated in his favor.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Energy & Utilities Law > Pipelines & Transportation > Easements & Rights of Way

Torts > Intentional Torts > Malicious Prosecution > General Overview

Civil Procedure > ... > Pleadings > Crossclaims > General Overview

HN28[] **Pleadings, Counterclaims**

Utah state law wrongful use of civil proceedings claims cannot be maintained as counterclaims. Institution of a civil action by summons and complaint is not legally considered process capable of being abused.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN29[] **Standards of Review, De Novo Review**

An appellate court reviews the denial of a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss counterclaims de novo, applying the same standard as the district court, and accepting the well-pleaded allegations of the complaint as true and construing them in the light most favorable to the counterclaimants.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Energy & Utilities Law > Pipelines & Transportation > Easements & Rights of Way

Torts > Intentional Torts > Malicious Prosecution > General Overview

HN30[] **Pleadings, Counterclaims**

With respect to a claim of wrongful use of civil proceedings, it is the plaintiff's burden to prove lack of probable cause and improper purpose.

Opinion by: MURPHY

Opinion

[*1248] **MURPHY,** Circuit Judge.

INTRODUCTION

Ashley Creek Phosphate Company ("Ashley Creek") brought suit against Chevron Corporation and several related entities (collectively "Chevron") and J. R. Simplot Company, Farmland Industries, Inc., and three entities owned by, or operated as joint ventures between, Simplot **[*1249]** and Farmland (collectively "SF"). Ashley Creek alleged, *inter alia*, that Chevron and SF violated various provisions of the Sherman and Clayton Acts by refusing to set reasonable tariffs for a pipeline utilized to transport phosphate concentrate slurry. The state of Utah brought claims against Chevron identical to and derivative of Ashley Creek's claims. Chevron and SF responded by filing state-law counterclaims against Ashley Creek, asserting that it had filed its complaint and initiated other proceedings in bad faith and without a justifiable basis.

The district court granted summary judgment in favor **[**3]** of Chevron and SF on the antitrust claims, concluding that: (1) Ashley Creek lacked standing to bring its antitrust claims; and (2) in the alternative, the tariffs announced by Chevron and SF for the use of the pipeline were reasonable. Because Utah conceded that its claims were "entirely derivative" of Ashley Creek's claims, the district court dismissed Utah's claims against Chevron on the same bases. The district court dismissed Chevron's and SF's state-law counterclaims without prejudice after disposing of all of the federal claims.

Ashley Creek appeals, contending that the district court erred in granting summary judgment in favor of Chevron and SF on the antitrust claims (No. 01-4017) and in refusing to dismiss Chevron's and SF's state-law counterclaims with prejudice (No. 01-4066). Utah appeals the district court's grant of summary judgment to Chevron (No. 01-4031). This court exercises jurisdiction pursuant to *28 U.S.C. § 1291* and, for the reasons set out below, **affirms** in part, **dismisses** in part, **reverses** in part, and **remands** to the district court for further proceedings consistent with this opinion.

Appeal Nos. 01-4017, 01-4031

[4] I. BACKGROUND**

The factual and procedural background of this case is lengthy and complex. We set forth only those very limited background facts necessary to put the legal dispute and this court's decision in context.

A. Factual/Procedural Background

In the 1980's, Chevron built an integrated phosphate fertilizer project. The purpose of the project was to utilize sulfur by-product from Chevron's natural gas operations in Carter Creek, Wyoming. Rather than attempt to sell the sulfur to existing phosphate fertilizer producers, Chevron chose to produce phosphate fertilizer itself. Entry into the phosphate fertilizer business was consistent with Chevron's preexisting nitrogen fertilizer business and fertilizer distribution system.

In furtherance of this plan, Chevron purchased an operating phosphate mine located near Vernal, Utah. Because it was roughly equidistant between Carter Creek and Vernal, and because it was a railhead, Chevron chose to construct its fertilizer plant in Rock Springs, Wyoming. Chevron built a pipeline to transport phosphate concentrate slurry from the Vernal mine to the fertilizer plant in Rock Springs. This pipeline runs over lands owned by **[**5]** the United States, including environmentally sensitive lands, pursuant to a right-of-way issued by the Bureau of Land Management ("BLM"). The project became operational with the first shipments of phosphate concentrate through the pipeline sometime after May of 1986. [1]

[6] [*1250]** The state of Utah also owns phosphate deposits in Vernal within a reasonable proximity to the phosphate mine purchased by Chevron. Utah has leased some or all of its phosphate holdings in Vernal to Ashley Creek. [2] When Ashley Creek learned that Chevron intended to construct a pipeline to transport phosphate from Vernal to Rock Springs, it approached Chevron about the possibility of constructing the pipeline as a joint venture. In fact, Ashley Creek requested that the BLM condition the granting of any right-of-way "upon requirements that operators of nearby properties which may be benefitted by a pipeline be given reasonable opportunity to participate in the line upon payment of an appropriate share of expenses." The BLM denied this request on the grounds that it understood the proposed pipeline would be subject to the jurisdiction of the Interstate Commerce Commission ("ICC") and that Ashley Creek would be able to ship its phosphate through the pipeline under tariffs set by the ICC.

[7]** In November of 1986, Ashley Creek approached Chevron requesting rate information for the shipment of phosphate slurry through the pipeline. Although Chevron provided Ashley Creek with preliminary rate estimates, it refused to publish a tariff. In response, Ashley Creek filed a complaint with the ICC alleging that Chevron was a common carrier by pipeline unlawfully operating without a tariff. In a decision issued in 1989, the ICC determined that Chevron was a common carrier and ordered it to establish rates and file a tariff for the transportation of phosphate slurry through the pipeline. *Ashley Creek Phosphate Co. v. Chevron Pipe Line Co., 5 I.C.C.2d 303 (1989)*.

In response to the order, Chevron published a tariff. On June 19, 1989, the day before the tariff became effective, Ashley Creek and Utah filed suit against Chevron, asserting that Chevron's actions with regard to the pipeline violated the antitrust laws of the United States. Shortly thereafter, the ICC, Ashley Creek, Utah, and Chevron all agreed and stipulated as follows: "the determination of whether the rates which [Chevron has] established in its tariff for transporting phosphate through the Chevron **[**8]** slurry pipeline from Vernal, Utah, to Rock Springs, Wyoming, are unjust, discriminatory or unreasonable, is hereby referred to the [ICC]." The district court stayed resolution of Ashley Creek's and Utah's antitrust claims against Chevron pending the resolution of the issues referred to the ICC.

---

[1] When Chevron purchased the Vernal phosphate mine it assumed an existing phosphate sales contract with Cominco, Ltd., a phosphate fertilizer producer in western Canada. Prior to the time the pipeline became operational, Chevron supplied Cominco by trucking phosphate to a railhead near Park City, Utah. In 1988, Cominco cancelled its phosphate contract with Chevron, concluding that it could obtain all the phosphate it needed at a lower cost from its own mining operations. Neither Chevron nor its successor-in-interest, SF, ever sold phosphate concentrate to a third-party after 1988, despite repeatedly trying to find outsider purchasers. During the entire time Chevron owned and operated the pipeline, no additional phosphate mines were developed in the United States and, after 1988, there were no third-party phosphate sales from a western United States phosphate mine. In 1992, Chevron completely exited the business by selling its interest in the entire integrated fertilizer project to SF for $ 64 million, only half of what it paid for the Vernal mine alone.

[2] As set out more fully below, Ashley Creek has no employees, no credit history, and no assets other than these undeveloped phosphate leases. John Archer, Ashley Creek's sole shareholder, pays, on behalf of Ashley Creek, $ 11,000 per year for the leases.

For the next seven years, the reasonableness of the published tariffs on the phosphate pipeline was litigated before the ICC and its successor agency, the Surface Transportation Board ("STB"). [3] While the **[*1251]** matter was pending before the ICC, Chevron published a revised tariff in August of 1991 and a second revised tariff in February of 1992. Each revised tariff reduced the rates of the prior tariff. In April of 1992, Chevron sold its entire integrated phosphate fertilizer project to SF. SF immediately adopted the Chevron tariff then in effect. In response to this transaction, Ashley Creek filed a complaint with the ICC naming SF as a defendant and repeating the allegations regarding the pipeline set out in its original ICC filing. The ICC consolidated the two complaints and indicated that it would apply the identical ratemaking methodology in both cases.

[9]** In October of 1996, the STB issued a decision on Ashley Creek's consolidated administrative complaints(the "1996 Order"). *Ashley Creek Phosphate Co. v. Chevron Pipe Line Co.*, Nos. 40131, 40810, 1996 WL 625471 (S.T.B. 1996). The STB found that the published tariffs were "unreasonable for shipments at many volume levels." *Id.* at *19. It nevertheless concluded that "there may be certain shipping patterns where the tariff rate structure would be reasonable," and ultimately summarized its decision as follows:

> On the record developed in this proceeding, we are unable to determine the size of the phosphate market, nor can we evaluate whether Ashley Creek[] has the ability to serve that market. Rather, it is for the court in the underlying antitrust action to determine whether Ashley Creek was ever in a position to market phosphate, or will be in the future, and to determine the size of the potential market for phosphate that could be delivered by this pipeline. It may be that the court will conclude that one of our other volume usage scenarios [4] -- or, indeed, a scenario that we did not even consider at all -- is more useful for purposes of the antitrust **[**10]** litigation. Our role is simply to assist the court by presenting a framework for addressing the narrow issue that is the subject to our primary jurisdiction.

We find:

> Defendants' subject tariffs covering the transportation of phosphate slurry from Vernal, UT, to Rock Springs, WY, are unreasonable to the extent discussed in this decision.

Id. (footnote omitted). [5]

[11]** After the STB issued the 1996 Order, the district court granted Ashley Creek permission to file an amended complaint alleging antitrust claims against SF. The district court further indicated that the stay it had previously entered pending the STB's resolution had expired as a result of the issuance of the 1996 Order. Utah declined to join Ashley Creek's amended complaint to the extent it stated claims against SF; instead, SF and Utah entered into an agreement whereby SF guaranteed **[*1252]** that the tariff then in effect would not be raised. [6]

---

[3] The ICC Termination Act of 1995, Pub. L. No. 104-88, 109 Stat. 803 (1995), abolished the ICC and transferred certain functions and pre-existing proceedings to the STB effective January 1, 1996.

[4] Appended to the 1996 Order were several tables evaluating the reasonableness of the tariffs at different volumes of phosphate shipped through the pipeline.

[5] The parties vigorously contested before the district court, and continue to contest on appeal, whether the 1996 Order definitively concluded that the published tariffs were unreasonable or, instead, merely provided a framework for analyzing the reasonableness of the tariffs for the district court to apply. The district court concluded that the 1996 Order merely set out an analytical framework to be applied by it and that the necessary analysis "hinged on the resolution of substantial factual questions." Utilizing a new tariff published by SF in 1999, along with the three previously published tariffs utilized by the STB in conducting its analysis, the district court ultimately concluded that the tariffs were reasonable. In light of this court's affirmance *infra* of the district court's conclusion that Ashley Creek lacks standing to bring its antitrust claims, we need not address the propriety of the district court's alternative ruling that the published tariffs were reasonable.

[6] In 1999, SF published a new tariff, the fourth tariff to be published since 1989. The fourth tariff recovers only operating and new capital costs, not original capital costs. Although this fourth tariff played a key role in the district court's decision that the published tariffs on the pipeline were reasonable, this court need not reach the issue.

B. District Court Order

After the STB issued its 1996 Order and the district court indicated that its previously imposed **[**12]** stay had expired, SF filed a motion for summary judgment. In its motion, SF asserted that it was entitled to summary judgment on two independent bases: (1) Ashley Creek failed to demonstrate that it had standing to bring its antitrust claims; and (2) its tariff for the use of the pipeline was not exclusionary. The district court granted the motion, ruling in favor of SF on each of the independent bases advanced in its motion.

The district court began by noting that to have standing to bring antitrust claims, Ashley Creek must demonstrate: (1) it has an antitrust injury to either its business or its property; and (2) there is a direct causal connection between that injury and the alleged violation of antitrust laws. *See* *Sports Racing Serv. Inc. v. Sports Car Club of Am., Inc., 131 F.3d 874, 882 (10th Cir. 1997)*. Ashley Creek asserted both injury to its business (exclusionary tariffs prevented it from entering the phosphate concentrate and phosphate fertilizer industries) and injury to its property (those same exclusionary tariffs impaired the value of its mineral leases). Nevertheless, because Ashley Creek had never been in the business of selling phosphate concentrate **[**13]** or producing and selling phosphate fertilizer, the district court concluded that Ashley Creek could not demonstrate an "antitrust injury" to its business unless it could demonstrate that it "manifested an intention to enter" the market **and** "a preparedness to do so." *Curtis v. Campbell-Taggart, Inc., 687 F.2d 336, 338(10th Cir. 1982)*. With these standards in mind, the district court concluded that Ashley Creek failed to demonstrate either an antitrust injury or a causal nexus between the alleged antitrust injury and the alleged antitrust violation.

As to the antitrust-injury prong of the standing requirement, the district court assumed, without deciding, that Ashley Creek manifested an intention to enter the relevant markets; it concluded, however, that Ashley Creek failed to demonstrate preparedness to enter the market. In summary, the district court determined that: (1) Ashley Creek had failed to determine whether there is a market for phosphate and the price Ashley Creek would have to charge to cover its costs if the pipeline tariff were zero; (2) Ashley Creek had not even come close to taking the affirmative steps necessary to obtain financing of a capital **[**14]** intensive venture; and (3) Ashley Creek did not have any background or experience in mining, milling, or selling phosphate or phosphate fertilizer. The district court specifically rejected Ashley Creek's claim that SF's allegedly excessive tariffs excused it from taking steps to enter the market. The district court noted that there were numerous steps necessary for market entry that were completely unrelated to the cost of shipping phosphate from Vernal to Rock Springs. For these exact same reasons, the district court also concluded that Ashley Creek had failed to satisfy the causal-nexus prong of the standing requirement.

The district court likewise rejected Ashley Creek's claim that it had standing solely by virtue of its mineral leases. The district court noted that the mineral leases, for which Ashley Creek pays the state **[*1253]** of Utah approximately $ 11,000 per year, were only a minor component in the development of a heavily capital-intensive industry. Because Ashley Creek had failed to establish its viability in the relevant markets, the district court concluded that it would be mere speculation to recognize the leasehold interest as being injured. In that regard, the district court **[**15]** noted that mineral leases only hold value if the minerals can be economically mined, milled, and sold; without showing that its leases could be developed economically, the district court concluded that Ashley Creek could only speculate on their value.

Although the district court concluded that Ashley Creek did not have standing to bring its antitrust claims, it nevertheless went on the analyze whether SF's tariffs were sufficiently unreasonable to be exclusionary under the essential facilities doctrine. *See generally* *City of Chanute v. Williams Natural Gas Co., 955 F.2d 641, 647-49(10th Cir. 1992)*(discussing essential facilities doctrine). Utilizing the framework set forth in the 1996 Order, the district court concluded that SF's tariffs were not unreasonable, when considered together and over the twenty-year life of the pipeline, because the tariffs actually resulted in a significant under-collection with regard to return on capital.

In light of the district court's grant of summary judgment to SF, Chevron filed a summary judgment motion contending that it was entitled to summary judgment on the same grounds. Ashley Creek did not contest that the district court's **[**16]** resolution of SF's summary judgment motion would also necessitate dismissal of its claims against Chevron. Instead, Ashley Creek argued that the district court's order granting summary judgment to SF was wrongly decided. The district court therefore treated Ashley Creek's memorandum in opposition to Chevron's summary judgment motion as a motion for reconsideration. So construed, the district court denied the motion on the grounds that it was not supported by previously unavailable evidence or an intervening change in controlling law. *See* *Fed. R. Civ. P. 59(e)*. The district court then granted Chevron summary judgment for the same reasons previously articulated in granting SF summary judgment.

II. DISCUSSION

A. Standard of Review

HN1[] This court reviews a grant of summary judgment *de novo*, applying the same standard used by the district court under *Fed. R. Civ. P. 56(c)*. *Sports Racing, 131 F.3d at 882*. Summary judgment "shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party **[**17]** is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. ***HN2***[] Although this court has noted that in the broad sense summary judgment should be used sparingly in antitrust cases, "the usual rules governing summary judgment still apply." *Sports Racing, 131 F.3d at 882*; *see also* *Curtis, 687 F.2d at 338* ("Summary procedures are to be used sparingly in anti-trust litigation. But where . . . the record clearly indicates that there are no circumstances under which plaintiff can prevail, summary procedures are appropriate to avoid needless trials and unnecessary expense."). "Moreover, even in antitrust cases, we are not limited to the grounds upon which the trial court relied but may base summary judgment on any proper grounds found in the record to permit conclusions of law." *Sports Racing, 131 F.3d at 882*(quotation and alteration omitted). ***HN3***[] The district court's ruling that Ashley Creek lacked standing under *Section 4* of the Clayton Act, *15 U.S.C. **[*1254]** § 15*, is a question of law subject to *de novo* review. *Id.*

B. Analysis

HN4[] *Section 4* of the Clayton Act confers on private parties the power to enforce federal **[**18]** antitrust laws. *See* *15 U.S.C. § 15(a)*("Any ***HN5***[] person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor [in the appropriate federal district court]."); *see also id.* *§ 12(a)*(defining "antitrust laws"). ***HN6***[] Although *Section 4* appears to be a broad grant of standing, "a plaintiff's right to sue for money damages is subject to a number of limitations unique to the antitrust laws that are based upon the express words of the statute and policies found by courts to be implicit in the structure and purpose of the antitrust laws." ABA Section of ***Antitrust Law***, ***Antitrust law*** *Developments* 839(5th ed. 2002); *see also id.* 839 n.29(collecting cases); *Reazin v. Blue Cross & Blue Shield of Kan., 899 F.2d 951, 962 n.16 (10th Cir. 1990)*("We are also aware that the Supreme Court may be concerned about reading *section 4* of the Clayton Act too broadly."). "To maintain standing to bring an antitrust claim under *§ 4* of the Clayton Act, *15 U.S.C. § 15*, a plaintiff must show (1) an 'antitrust injury'; and (2) a direct causal connection between that injury and a **[**19]** defendant's violation of the antitrust laws." *Sports Racing, 131 F.3d at 882*.

HN7[] To meet the first prong [a plaintiff] must allege a business or property injury, an antitrust injury, as defined by the Sherman Act. An antitrust injury is defined as an injury of the type the antitrust laws were intended to prevent and that flows from that which makes [the defendant's] acts unlawful. A violation of the Act without resultant injury to the [plaintiff] is insufficient to confer standing, [plaintiff] must show the antitrust injury resulted directly from [the defendant's] violation of ***antitrust law***.

City of Chanute, 955 F.2d at 652(citations and quotations omitted).

Ashley Creek claims that Chevron's and SF's allegedly exclusionary tariffs for the use of the phosphate slurry pipeline caused an antitrust injury to both Ashley Creek's business and property. ***HN8***[] An antitrust injury to *either* Ashley Creek's business *or* property would be sufficient to confer standing on Ashley Creek to raise the instant antitrust claims. *See 15 U.S.C. § 15(a)*.

1. Injury to Business

Ashley Creek is not, and has never been, in the **[**20]** business of mining and selling phosphate concentrate. [7] "However, ***HN9***[] most courts have not required a plaintiff to actually be engaged in an ongoing business in order to have standing under the anti-trust laws. It is sufficient if he has manifested an intention to enter the business and has demonstrated his preparedness to do so." *Curtis, 687 F.2d at 338*(quotation omitted); *see also* ABA Section of ***Antitrust Law***, ***Antitrust law*** *Developments* 842 & n.38 (5th ed. 2002)(collecting cases for following proposition: ***HN10***[] "Most courts have held that injury to an enterprise in the planning stage is actionable, provided that the plaintiff has an intent and capability to enter the market and has achieved a sufficiently advanced state of preparation for doing so."). This court has identified the following as "key elements" in evaluating **[*1255]** the plaintiff's preparedness to enter a business: (1) ability to finance the business and purchase the necessary facilities and equipment; (2) consummation of contracts needed for the proposed venture; (3) affirmative actions by the plaintiff to engage in the proposed business; and (4) the background and experience of the plaintiff in the prospective **[**21]** business. *Curtis, 687 F.2d at 338*. In examining preparedness, courts have uniformly

> drawn the line at the point where promotion transcends the level of hopes, desires, and expectations, and reaches a certain stage of maturity and concreteness, a stage where it is accompanied by certain indicia of ultimate success. Put another way, the courts have held that a potential competitor cannot achieve standing merely by demonstrating his *intention* to enter a field; he must also demonstrate his *preparedness* to do so.

Hecht v. Pro-Football, Inc., 187 U.S. App. D.C. 73, 570 F.2d 982, 994(D.C. Cir. 1977)(cited with approval in *Curtis, 687 F.2d at 338*).

[22]** In analyzing whether Ashley Creek could demonstrate standing under the standards set out by this court in *Curtis*, the district court began by assuming, without deciding, that Ashley Creek had manifested its intention to enter the phosphate concentrate market. The district court concluded, however, that Ashley Creek could not satisfy any of the key elements identified in *Curtis* for measuring preparedness to enter the phosphate concentrate market. In that regard, the district court noted that Ashley Creek's own estimates placed the cost of entering the phosphate concentrate market at something in excess of $ 67 million during the relevant time frame. The record revealed, however, that Ashley Creek had only a thousand dollars on hand and had done nothing to obtain financing. The record further revealed that Ashley Creek had completed only a limited "Type 1" feasibility study, and that a "Type 3" or "Type 4" study would be necessary to secure financing. In addition, the district court noted that Archer, Ashley Creek's sole shareholder, testified that to obtain financing Ashley Creek would need signed contracts with customers to purchase phosphate concentrate at a specified price. **[**23]** The record revealed, however, that Ashley Creek had never discussed price with any potential customer. The district court noted that this was most likely because Ashley Creek's very preliminary feasibility study left it unable to project its own costs of production at anything less than a margin or error of plus or minus 25%. In fact, Ashley Creek did not know whether there were any customers who would buy concentrate at the price Ashley Creek would have to charge even if the tariff was zero. Finally, the district court noted that although Archer, the only then-current officer of Ashley Creek, did have experience in buying and selling phosphate reserves, he did not have any experience in mining and selling phosphate concentrate.

---

[7] To the extent that Ashley Creek's appellate filings could be read to hint at an antitrust claim relating to its potential entry into the phosphate fertilizer market, we agree with the district court that there is absolutely no evidence in the record that Ashley Creek was ever prepared to enter that market. Accordingly, this court, like the district court, restricts its analysis to Ashley Creek's claims regarding the phosphate concentrate market.

The district court likewise rejected Ashley Creek's assertion that it was not required to demonstrate any further preparatory steps to enter the phosphate concentrate market because the actions of Chevron and SF had rendered such steps futile. Although noting that not all courts had adopted such a futility exception and that this court had yet to decide the question, the district court nevertheless concluded that Ashley Creek failed to fall within the ambit **[**24]** of the rule. The district court pointed out that Ashley Creek's assertion that it could not conduct relevant feasibility studies because Chevron had refused to publish a tariff was not borne out by the record. In particular, at no time after Chevron published a tariff in 1989 did Ashley Creek take steps to determine whether it was economically feasible to sell phosphate under the 1989 tariff or any of the successively lower tariffs. This was true even after **[*1256]** the State of Utah and SF entered into a settlement agreement guaranteeing that the tariff would not be raised and after SF published the fourth tariff which recovers only operating and new capital costs and no original capital costs. More importantly, the district court noted that even assuming some or all of the first three tariffs were too high, Ashley Creek was not prevented from determining: (1) what price customers were willing to pay for phosphate concentrate, assuming there was actually a market for phosphate concentrate; (2) the freight cost to ship phosphate concentrate from the railhead in Rock Springs; or (3) its own production costs with sufficient precision to know the significance of a few dollars difference in the **[**25]** tariff. These factors, coupled with Archer's deposition testimony that Ashley Creek would not move forward with its project, regardless of the amount of the applicable tariff, without owning a 40% share of the pipeline, led the district court to conclude that a futility exception did not apply.

Although its brief before this court is less than clear, Ashley Creek appears to challenge both the district court's ruling that it lacked standing because it failed to demonstrate preparedness to enter the phosphate concentrate market and the district court's ruling that its lack of preparation is not excused by some futility exception to the preparedness doctrine. Neither of Ashley Creek's arguments are convincing.

This court can easily dispose of Ashley Creek's assertion that it was, in fact, prepared to enter the market during the relevant time frame. [8] **[**27]** Ashley Creek sets out the following list of eleven steps that it took prior to the point Chevron refused to publish a tariff: (1) obtained the mineral leases; (2) hired a mining engineer to explore the leaseholds and test the ore and provide a preliminary assessment on the economic feasibility of producing phosphate concentrate; (3) obtained **[**26]** the promise of common carriage in the pipeline; (4) obtained a contract for necessary water [9]; (5) filed a mine plan and commenced acquisition of necessary permits; (6) commenced acquisition of an appropriate plot of land at Rock Springs [10] **[**28]** ; **[*1257]** (7) preliminarily designed a mining operation [11]; (8) performed a preliminary feasibility study; (9) commenced initial negotiations with potential

[8] We note with some frustration that Ashley Creek completely fails to distinguish between the actions of Chevron and SF in asserting that it was prepared to enter the market for phosphate concentrate. Whether Ashley Creek was prepared to enter the market during the time Chevron controlled the pipeline is a distinct question from whether Ashley Creek was prepared to enter the market when SF was in control of the pipeline. Likewise, whether the actions of Chevron or SF rendered such preparation futile presents different questions. Ashley Creek never distinguished between the actions of Chevron and SF before the district court and does not do so on appeal. Nevertheless, our review of the entire appellate record leads this court to conclude that Ashley Creek was never prepared to enter the market during the entire time frame at issue.

[9] Although Ashley Creek asserts in its brief that it "obtained a contract" for water, it does not appear that such a contract was ever executed. Instead, the record demonstrates only that it engaged in negotiations with the Uintah Water Conservancy District and the Department of Interior regarding water supplies.

[10] In support of this assertion, Ashley Creek cites to page 669 of SF's appendix. This citation is to the text of Ashley Creek's own memorandum in opposition to SF's motion for summary judgment. That memorandum does assert that Ashley Creek began negotiations with the BLM to acquire an appropriate parcel of land in Rock Springs for drying and loading facilities. Nevertheless, the cited exhibits attached to the memorandum do not support the proposition. Instead, the referenced exhibits relate exclusively to negotiations between Ashley Creek, the Department of Interior, and the Uintah Water Conservancy District regarding water supplies for a potential mining project. Accordingly, Ashley Creek has not directed this court to any record support for the assertion. We further note that Ashley Creek's consistent practice of citing to its own factual assertions in its various legal memoranda filed below, rather than citing to the relevant portions of the record supporting a given factual assertion has seriously delayed the resolution of this appeal.

customers [12]; (10) commenced inquiries regarding financing [13]; (11) formed a corporation to carry on the business. These very preliminary steps are insufficient to show preparedness to enter the market.

[29]** First, as noted by the district court, Ashley Creek had no financing commitment and was in no position to obtain financing. In particular, Ashley Creek has not cited to a single piece of record evidence indicating that it made even a preliminary inquiry regarding financing of a mining and milling operation, an operation which Ashley Creek itself estimated to cost in excess of $ 67 million. Even if it had made such contacts, Ashley Creek does not contest the district court's conclusion that the "Type 1" feasibility study conducted by Ashley Creek was completely insufficient for such purposes. Nor had Ashley Creek consummated any of the contracts necessary to operate a phosphate mine. The record citations provided by Ashley Creek on appeal show only that it engaged in negotiations regarding water supplies to the proposed mine and that it discussed sales of phosphate concentrate with Cominco without ever discussing a price. Furthermore, although Ashley Creek notes that it commenced the application process for a mining permit, that is only one of the many permits necessary to develop and operate the mine, it points to no record evidence that it ever obtained the necessary permits. In **[**30]** fact, the record demonstrates that when Ashley Creek filed its **[*1258]** mining plan and applied for a mining permit in March of 1986, the application was rejected on multiple grounds. Finally, it is clear that Ashley Creek did not have the necessary experience and background in the business of selling phosphate concentrate. Ashley Creek has never had any paid employees. Archer, the sole shareholder, pays all of Ashley Creeks bills and runs the corporation out of his house. Although Archer has been in the business of acquiring and selling mineral properties and reserves, neither he nor Ashley Creek has ever developed or operated a mine. For these reasons, we agree with the district court that Ashley Creek was not prepared to enter the market at the point when Chevron refused to publish a tariff. Furthermore, as set out at length in the district court's opinion, *Ashley Creek Phosphate Co. v. Chevron, 129 F. Supp. 2d 1299, 1304-05 (D. Utah 2000)*, Ashley Creek did not take any further, meaningful preparatory steps at any point after Chevron and SF filed a series of successively lower tariffs. Accordingly, the district court correctly concluded that Ashley Creek lacked standing **[**31]** under *Section 4* of the Clayton Act for its injury to business claim, having failed to demonstrate that it was prepared to enter the market.

This court also agrees with the district court that Ashley Creek's lack of preparation is not excused by a futility exception to the preparation requirement. As Ashley Creek quite correctly notes, ***HN12***[] several courts have recognized that in order to show preparation to enter a given market, an antitrust plaintiff need not take those steps which would have been rendered futile by an alleged monopolist. *See, e.g.*, *Thompson v. Metro. Multi-List, Inc., 934*

---

[11] It is far from clear how this supposed preparatory step is different from the fifth preparatory step identified by Ashley Creek as both are supported by the same ultimate citation to a Notice of Intention to Commence Mining Operations and Mining and Reclamation Plan, Form MR-1.

[12] In support of this assertion, Ashley Creek cites to three separate pages of its memorandum in opposition to SF's motion for summary judgment. Although the memorandum does use the term "customers," only one customer, Cominco, is identified and supported by a citation to record evidence.

[13] In support of this assertion, Ashley Creek cites to page 669 of SF's appendix, again a citation to Ashley Creek's memorandum in opposition to SF's motion for summary judgment rather than a citation to record evidence. The only relevant material on the referenced page is the following paragraph:

> Discussions with potential customers and regarding financing were necessarily preliminary and inconclusive. While a number of correspondents indicated interest if the pipeline were constructed and available at economic rates, in the absence of a reliable statement of pipeline transport costs, no estimate of Ashley Creek's potential price for phosphate concentrate FOB Rock Springs could be given potential customers allowing discussions to go further. Absent clear expressions of interest from potential customers, discussions of financing could not progress.

The assertions in Ashley Creek's memorandum regarding commencing inquiries as to financing are not supported by a citation to record evidence. Accordingly, Ashley Creek has once again directed this court to a portion of the voluminous record that does not support its factual assertions. Counsel is reminded that ***HN11***[] this court "will not search the record in an effort to determine whether there exists dormant evidence which might require submission of the case to a jury." *Gross v. Burggraf Constr. Co., 53 F.3d 1531, 1546 (10th Cir. 1995)*. Accordingly, Ashley Creek has provided no record support for the assertion that it made initial inquiries regarding financing.

F.2d 1566, 1572(11th Cir. 1991)("[A] defendant cannot benefit by the application of the standing doctrine from the fact that it is able to prevent the plaintiff from becoming a [competitor]."); Fleer Corp. v. Topps Chewing Gum, Inc., 415 F. Supp. 176, 180 (E.D. Pa. 1976)("It would be inconsistent with one purpose of the Clayton Act -- to protect the business interests of the victims of monopolistic practices -- to require an antitrust plaintiff to pay a courtroom entrance fee in the form of an expenditure of substantial resources in a clearly futile competitive **[**32]** gesture."). Although this court has not yet addressed the issue, we have no doubt that there exists some type of futility exception to the preparation requirement set out in *Curtis*. Whatever the parameters of such an exception, however, it clearly does not excuse Ashley Creek from performing the most basic preparatory steps to determine whether: (1) there was a market for phosphate concentrate and, if so, what price customers were willing to pay; (2) the exact nature of its reserves; and (3) its own costs of production and delivery within a reasonable margin, including shipping costs from the railhead in Rock Springs, in order to determine whether it could profitably sell concentrate even if the tariff were set at zero. Without undertaking the basic preparatory steps to answer these questions, Ashley Creek has absolutely no basis for showing that its "business" was in any way damaged by the allegedly exclusionary tariffs or other factors. *See Ashley Creek*, 129 F. Supp. 2d at 1305(quoting following from 1993 statements of David Aro, Ashley Creek's consulting mining engineer: "I have felt for some time that the level of *legal effort* far exceeds the level of **[**33]** *technical data* that is essential to verifying the reserves and costs. Without 'proven' reserves and 'acceptable' costs, the legal arguments could be 'hypothetical and meaningless.'").

Ashley Creek's futility argument boils down to an assertion that a proposed market participant need take no further preparatory steps, even of the most basic and preliminary nature, after an asserted violation of the antitrust laws by the party in **[*1259]** control of an essential facility. Such an approach would eviscerate the standing requirement, rendering it wholly dependent on the merits of the plaintiffs case. *See* Gas Utils. Co. of Ala., Inc. v. S. Natural Gas Co., 825 F. Supp. 1551, 1573(N.D. Ala. 1992)(holding that plaintiff could not use defendant's denial of access to a pipeline to create an inference of antitrust injury to business or property). ***HN13***[] Allowing an antitrust plaintiff to recover merely upon a showing of a violation of the act, without a demonstration of injury-in-fact, would conflict with this court's precedent. *See* City of Chanute, 955 F.2d at 652("A violation of the Act without resultant injury to the [plaintiff] is insufficient to confer standing. **[**34]** " (quotation omitted)). Furthermore, none of the cases cited by Ashley Creek support its assertion that this court should adopt such an expansive reading of the futility doctrine. In the very cases cited by Ashley Creek, the courts applied the four-factor preparedness test and analyzed whether the plaintiff had presented adequate evidence of concrete preparedness. *See, e.g.*, Thompson, 934 F.2d at 1572(applying preparedness requirement and finding standing when plaintiff was already an established realtor in the market served by the defendant board of realtors and multiple listing service); Jayco Sys. v. Savin Bus. Mach. Corp, 777 F.2d 306, 314(applying four-part test and finding standing only for injury to plaintiff's normal course of business, not to its proposed business expansion); Hecht, 570 F.2d at 994(applying four-part test and noting that plaintiff's preparation must be at "a stage where it is accompanied by certain indicia of ultimate success").

For these reasons, in addition to those separate reasons set out by the district court, [14] we conclude that Ashley Creek's almost complete failure to prepare to enter the phosphate **[**35]** concentrate market is not excused by the futility doctrine.

2. Injury to Property

Ashley Creek also claims standing flowing from injury to its property, i.e., the mineral leases. It is uncontested that Ashley Creek's mineral leases constitute "property" for purposes of *Section 4* of the Clayton Act. In rejecting Ashley Creek's assertion that it had standing to raise its antitrust claims solely by virtue of its mineral leases, the district court concluded as follows:

> The mineral leases (for which Archer or Ashley Creek now pays a little over $ 11,000 per year) is only one minor component in the development of a project that Ashley Creek admits would have cost $ 67 million in capital in 1990. Because Ashley Creek has not established the necessary steps to show its viability in that

[14] *Ashley Creek*, 129 F. Supp. 2d at 1305-06; *see also supra* pp. 18-19 (discussing district court's analysis of Ashley Creek's futility claim).

> market, it would be too speculative and remote to recognize **[**36]** the leasehold interest as being injured. The mineral leases only hold value if the minerals can be economically mined, milled, and sold. Without showing that its leases could be developed economically, Ashley Creek can only speculate on the leases' value.

Ashley Creek, 129 F. Supp. 2d at 1307. On appeal, Ashley Creek asserts that the district court erred in applying the preparation rule from *Curtis* to its claim of injury to property. Instead, Ashley Creek posits that its "leases represent a value protected by *Section 4* of the Clayton Action without more." Appellant's Br. at 25. In support of this assertion, Ashley Creek relies on a 1964 district court decision in *Waldron v. British Petrol. Co., 231 F. Supp. 72 (S.D.N.Y. 1964)*. **[*1260]**

HN14[] We reject Ashley Creek's assertion that possession of property alone confers standing. The language of the Clayton Act makes clear that it is the injury to property, rather than its mere possession, that confers standing. *See* *15 U.S.C. § 15(a)*(Any person who shall be injured in his . . . property by reason of anything forbidden in the antitrust laws may sue therefor in any district court **[**37]** of the United States . . . ."). In this case, there is no evidence that Chevron or SF clouded Ashley Creek's title to the leases. Nor is there any evidence that the leases were less valuable after the supposedly anti-competitive acts than they were before those acts. [15] **[**38]** In fact, there is not a single citation to the record in that section of Ashley Creek's brief relating to its claim of injury to property. In reality, Ashley Creek's claimed injury relates to a proposed business -- a phosphate concentrate supply business that would have used the mineral leases. ***HN15***[] To have standing to allege injury to an inchoate business interest, Ashley Creek must establish its preparedness to enter the market. As set out at length above, however, Ashley Creek has utterly failed to demonstrate that it was prepared to develop the mineral leases. In these narrow circumstances, [16] this court concludes that the district court properly considered Ashley Creek's lack of preparedness to enter the phosphate concentrate market in analyzing whether Ashley Creek had demonstrated an injury to its mineral leases.

The district court opinion in *Waldron* is not to the contrary. In *Waldron*, the plaintiff had a "highly desired contract" with the Iranian Oil Company to purchase oil. *231 F. Supp. at 78*. The plaintiff alleged a conspiracy among the defendant major oil companies to refuse to purchase either oil or the contract from the plaintiff. *See* *id. at 79-81, 86-87*. The court held that although the plaintiff could not claim standing based on injury to his business because he was not prepared to enter the business of selling oil, he did have standing based on injury to his property in the form of the contract itself. *See* *id. at 86-87*. Unlike the plaintiff in *Waldron*, however, Ashley Creek never tried to sell its leases to Chevron or SF during the relevant time period. Instead, the record reveals that Archer testified that the leases were not for sale. Furthermore, in *Waldron*, there was **[**39]** a material dispute of fact as to whether the contract *qua* contract had any value. *See* *id. at 87*. In contrast, the record in this case is completely devoid of evidence relating to the value of the leases during the relevant time periods. Accordingly, Ashley Creek has simply not put forward even a scintilla of evidence to demonstrate that it suffered any harm to its property at the hands of Chevron and SF.

[*1261] III. Conclusion

---

[15] The history of these particular mineral leases reveal multiple failed attempts to develop the phosphate deposits. Archer first acquired the leases from Utah in 1963; he immediately sold the leases to Mountain Fuel Supply Company. Mountain Fuel failed to develop a mine and, instead, allowed the leases to lapse. Archer reacquired the leases in 1974 and assigned them to Utah International in 1975. Utah International also failed to develop a mine, after determining that development was not feasible at then-current and projected phosphate prices. After the leases were re-assigned to Archer in 1984, he attempted to sell them to Chevron and Cominco. Both companies indicated that they were not interested. In 1997, Archer approached Agrium about its interest in investing in the leases. Agrium declined the invitation. Accordingly, the record reveals that every company Ashley Creek approached has failed or declined to develop the leases.

[16] That is, when the plaintiff's claimed injury to property flows from its claim that it would have used the property as part of an anticipated business venture.

For those reasons set out above, this court concludes that Ashley Creek has failed to adduce evidence from which a trier of fact could conclude that it has suffered an antitrust injury to either its business or property. We therefore **affirm** the district court's dismissal of Ashley Creek's antitrust claims for lack of standing. Our conclusion that Ashley Creek lacks standing to assert its antitrust claims obviates the need to address the district court's alternative conclusion that tariffs charged by Chevron and SF were reasonable. This court offers no opinion on that question.

Appeal No. 01-4066

I. Background

In response to Ashley Creek's underlying complaint, Chevron filed a state-law counterclaim alleging that **[**40]** Ashley Creek had brought the action in bad faith and without a justifiable basis. In support of its claim, Chevron asserted as follows: (1) Ashley Creek had falsely stated that Chevron's published tariff was unreasonable and that it was entitled to a preferential tariff; (2) Ashley Creek was wrongfully attempting to force Chevron to sell it an interest in the pipeline; and (3) Ashley Creek had involved Chevron in extensive and costly litigation before state and federal agencies and state court. Ashley Creek moved the district court to dismiss the counterclaim. It first asserted that under Utah state law, claims for malicious prosecution, such as the claims asserted by Chevron, cannot be filed until the lawsuit which forms the basis of that claim has been concluded. In the alternative, assuming Chevron could maintain its claim as a counterclaim, Ashley Creek asserted that the claim failed as a matter of law for the following reasons: (1) the STB had concluded Chevron's published tariff was unreasonable; and (2) Ashley Creek could not have a bad faith ulterior motive of forcing Chevron to sell it an interest in the pipeline because Chevron had previously sold its entire interest in the **[**41]** pipeline.

The district court, Judge David Sam presiding, denied the motion to dismiss. Judge Sam first concluded that under Utah law, a claim for abuse of process may be asserted by way of counterclaim. He further concluded that, viewed through the lens of the motion to dismiss standard, Chevron's counterclaim alleged the necessary elements of an abuse of process claim. Judge Sam noted that under Utah law the essential element of an abuse of process claim was the use of judicial proceedings for an ulterior purpose for which they were not intended. *See* *Crease v. Pleasant Grove City, 30 Utah 2d 451, 519 P.2d 888, 890 (Utah 1974)*. In concluding that Chevron's counterclaim stated this basic element, Judge Sam indicated as follows:

In its counterclaim Chevron alleges that [Ashley Creek] has brought the underlying action in bad faith and without justifiable basis; that [Ashley Creek's] real motive in filing the litigation is to improperly force defendants to sell plaintiff an interest in the pipeline; and that [Ashley Creek] has involved Chevron in state and federal proceedings seeking to invalidate easements over public land for the pipeline and to increase the **[**42]** expense and burden of litigation.

After SF was joined as a third-party defendant, it also brought a bad faith litigation counterclaim against Ashley Creek. Ashley Creek moved to dismiss the SF counterclaim on the following grounds: (1) SF's counterclaim did not allege that Ashley Creek was pursuing the litigation for the improper ulterior motive of forcing divestiture of the pipeline and, in any event, forced divestiture was an available and appropriate remedy in antitrust cases **[*1262]** involving an essential facility; (2) SF's assertion that Ashley Creek was only seeking a preferential tariff was demonstrably false in light of the STB's decision that the published tariff was unreasonable; and (3) no abuse of process claim could lie based on the state and federal regulatory proceedings initiated by Ashley Creek because it was SF that had intervened in those proceedings. SF then amended its counterclaim to include an allegation that Ashley Creek had filed the underlying action with the improper ulterior motive of forcing SF to divest the pipeline. In the interim between the filing of Ashley Creek's motion to dismiss Chevron's counterclaim and the filing of Ashley Creek's motion to dismiss **[**43]** SF's counterclaim, this entire matter was reassigned to Judge Dale Kimball. Judge Kimball entered an order denying Ashley Creek's motion to dismiss SF's counterclaim for those reasons set forth by Judge Sam in denying Ashley Creek's motion to dismiss Chevron's identical counterclaim.

Judge Kimball thereafter granted summary judgment, as set forth above, to SF and Chevron on Ashley Creek's underlying federal claims; he directed the Clerk of the Court "to enter judgment accordingly and then close the case." Ashley Creek then appealed the district court's grant of summary judgment in favor of Chevron and SF and asserted in its docketing statement that the district court had resolved all claims as to all parties. Shortly thereafter, SF's counsel sent a letter to Judge Kimball noting that it had still had a counterclaim pending and requesting that its pendent state law claim be dismissed without prejudice "to avoid any confusion about the finality of the judgment being appealed." In support of this request, SF noted that pendent state law claims should be dismissed without prejudice when federal claims are dismissed before trial. *See* *Bauchman ex rel. Bauchman v. West High Sch., 132 F.3d 542, 549(10th Cir. 1997)*. **[**44]** In an order dated March 13, 2001, the district court dismissed without prejudice Chevron's and SF's counterclaims and directed that its order of dismissal be entered *nunc pro tunc* as of the date of the judgment. In so doing, the district court expressly acknowledged that its prior order closing the case was erroneous because "the SF Defendants and the Chevron Defendants still have counterclaims against Ashley Creek." Ashley Creek then filed a separate notice of appeal, appealing from the district court's dismissal of Chevron's and SF's counterclaims without prejudice, instead of with prejudice pursuant to its two motions to dismiss. That appeal is now before this court.

II. Sufficiency of the Notice of Appeal

Chevron raises two separate challenges to the sufficiency of Ashley Creek's notice of appeal. First, Chevron appears to assert that Ashley Creek has not appealed the district court's decision denying its motion to dismiss Chevron's counterclaim because Ashley Creek did not specifically reference that order in its notice of appeal. Despite Chevron's failure to cite to any precedent or clearly identify the basis of its claim, we assume that it is referring to ***HN16***[] the **[**45]** requirement in *Fed. R. App. P. 3(c)(1)(B)* that the notice of appeal "designate the judgment, order, or part thereof being appealed." Chevron's position in this regard was recently rejected by this court. *See* *McBride v. Citgo Petroleum Corp., 281 F.3d 1099, 1103-04 (10th Cir. 2002)*(holding that a district court's interlocutory orders merge into its final orders and judgments and that the identification of the final order in the notice of appeal is sufficient to support appellate jurisdiction to review the earlier now-merged interlocutory orders).

Second, Chevron asserts that Ashley Creek's notice of appeal is untimely. **[*1263]** *See* Chevron Brief, No. 01-4066, at 10 ("Ashley's motion to dismiss was denied well before the District Court granted appellees' summary judgment motions and dismissed Ashley's claims. Ashley appeals the dismissal of its claims in the main appeal. If it wanted also to appeal any other order entered prior to that dismissal, Ashley was required to do so as part of the main appeal."). The short answer to Chevron's assertion is that the order entered by the district court on January 25, 2001, directing the clerk to "close the case" was not a final order. **[**46]** As the district court itself recognized in its order of March 13, 2001, Chevron's and SF's state law counterclaims against Ashley Creek were still pending, as was Utah's derivative claim against Chevron. ***HN17***[] *See* *Fed. R. Civ. P. 54(b)*(providing that in the absence of a *Rule 54(b)* certification from the district court, "any order or other form of decision, however designated, which adjudicates fewer than all the claims or the rights and liabilities of fewer than all the parties shall not terminate the action as to any of the claims or parties"). Accordingly, both the notice of appeal filed by Ashley Creek on January 26, 2001, and amended notice of appeal filed by Ashley Creek on February 6, 2001, were premature. When the district court finally adjudicated the remaining state law counterclaims and Utah's independent claim against Chevron in its order of March 13, 2001, the previously filed notices of appeal ripened and, along with the final notice of appeal filed by Ashley Creek on April 12, 2002, brought each of the issues asserted by Ashley Creek in these various appeals properly before the court. *See* *Lewis v. B.F. Goodrich Co., 850 F.2d 641, 645(10th Cir. 1988)*(en **[**47]** banc)("In ***HN18***[] the situation like that before us, in which the other claims were effectively dismissed after the notice of appeal was filed, we believe *Fed. R. App. P. 4(a)(2)* permits the interpretation that the notice of appeal, filed prematurely, ripens and saves the appeal. . . . In such cases generally we will consolidate or companion the earlier appeal with any subsequent appeals arising out of the same district court case.").

III. Article III Jurisdiction

Both Chevron and SF filed motions to dismiss this appeal on the ground that it is moot. They allege that the district court's subsequent dismissal of the counterclaims without prejudice mooted its earlier denial of Ashley Creek's motions to dismiss because it is unclear whether the counterclaims will ever be refiled. [17] Although SF's and Chevron's mootness arguments are at odds with Tenth Circuit precedent, this court does, nevertheless, perceive a jurisdictional problem with this appeal. *See* *Qwest Communications Int'l, Inc. v. F.C.C., 240 F.3d 886, 891(10th Cir. 2001)*(holding that ***HN19***[] federal courts have an "independent obligation to examine their own jurisdiction" (quotation omitted)).

[48]** This court's decision in *Jarvis v. Nobel/Sysco Food Servs. Co.* easily disposes of Chevron's and SF's arguments that this appeal does not present a live case or controversy simply because there is no guarantee that they will ever refile their **[*1264]** counterclaims in state court. *See 985 F.2d 1419 (10th Cir. 1993)*. In *Jarvis*, the plaintiff brought both federal and state law claims against his employer. *Id. at 1421*. The district court granted a motion for summary judgment filed by the employer as to every claim except a state law retaliatory discharge claim. *Id.* As to that claim, the district court denied the employer's summary judgment motion on the merits. *Id.* Having dismissed all federal claims, the district court declined to exercise pendent jurisdiction over the state-law retaliatory discharge claim, dismissing the claim without prejudice. *Id. at 1421-22*. The plaintiff appealed the grant of summary judgment to the employer and the employer cross-appealed the district court's refusal to grant it summary judgment on the retaliatory discharge claim. *Id. at 1422*.

In resolving the employer's cross-appeal, this **[**49]** court began by noting a potential jurisdictional problem. *Id. at 1424*. *Jarvis* concluded that ***HN20***[] although the employer was a prevailing party as to the state-law retaliatory discharge claim because the claim had been dismissed, *albeit* without prejudice, the employer could still appeal the district court's earlier merits-based denial of its summary judgment motion as long as it could demonstrate a personal stake in the outcome of the appeal. *Id. at 1424-25*. Relying on the Supreme Court's decision in *Deposit Guaranty National Bank v. Roper, 445 U.S. 326, 63 L. Ed. 2d 427, 100 S. Ct. 1166 (1980)*, this court held that if a successful appeal by the employer would alter, *inter alia*, future litigation costs, the "personal stake requirement of Article III was met." *Jarvis*, 985 F.2d at 1425; *see also id* ("In this case, a successful appeal by [the employer] would eliminate any possible re-filing of the retaliatory discharge claim in state court. As avoiding a state court suit would substantially reduce [the employer's] future litigation costs, we find that [the employer] has the requisite stake in the appeal. **[**50]** "). Accordingly, the *Jarvis* court concluded that ***HN21***[] "when a district court denies summary judgment on the merits, and then exercises its discretion to decline pendent jurisdiction, the moving party is a party aggrieved by a judgment and has an appeal as of right on the merits of the denial of summary judgment." *Id. at 1425-26* (quotation and citation omitted). [18]

---

[17] *See, e.g.*, SF's Reply Memorandum in Support of Its Motion to Dismiss, at 2-3 ("Ashley Creek is appealing a 1998 Utah District Court decision denying Ashley Creek's motion to dismiss the SF Defendant's counterclaims on the pleadings. On March 12, 2001, the district court dismissed these same claims without prejudice. As a result of that dismissal, Ashley Creek's appeal no longer relates to a live case or controversy. Since the SF Defendants may never refile the counterclaims, it is at best uncertain whether a ruling by this Court would have any effect. Certainly, Ashley Creek cannot guarantee that any decision by this Court whether the district court should have dismissed the counterclaims because they were not pled properly would be anything but an academic exercise.").

[18] In so ruling, the *Jarvis* court was careful to indicate that the result would have been entirely different if the district court had declined to rule on the merits of the employer's motion for summary judgment. ***Jarvis v. Nobel/Sysco Food Servs. Co., 985 F.2d 1419, 1425(10th Cir. 1993)***. In such a circumstance, the employer would have presented an issue not passed upon by the district court; appellate courts generally will not consider such issues in the first instance. *Id.*(citing *Pell v. Azar Nut Co., 711 F.2d 949, 950 (10th Cir. 1983)*).

HN22[] District courts would be wise to keep in mind the rule set out in *Jarvis* and *Pell* when faced with a complaint invoking the court's federal question jurisdiction which also includes pendent state law claims. As this court noted in *Bauchman ex rel. Bauchman v. West High Sch., 132 F.3d 542, 549(10th Cir. 1997)*,

The United States Supreme Court has counseled, pendent jurisdiction "need not be exercised in every case in which it is found to exist. . . . Needless decisions of state law should be avoided both as a matter of comity and to promote justice between the

[51]** **[*1265]** In this case, it would appear that Ashley Creek's appeal of the district court's denial of its motion to dismiss fits comfortably within the rule announced in *Jarvis*. The district court denied Ashley Creek's motion to dismiss on the merits, concluding that Chevron's and SF's counterclaims stated claims for abuse of process which could be maintained as counterclaims under Utah law. It thereafter declined to exercise pendent jurisdiction and dismissed the counterclaims without prejudice. Because of the nature of the arguments presented by Ashley Creek on appeal, however, there is a real question whether the personal stake requirement of Article III is satisfied.

Although Ashley Creek asserts that the district court should have dismissed Chevron's and SF's counterclaims on the merits, it also continues to assert on appeal that the counterclaims were never proper counterclaims under Utah law. In *Gilbert v. Ince, 1999 UT 65, 981 P.2d 841, 844-46(Utah 1999)*, ***HN24***[] the Utah Supreme Court adopted the analytical framework set out in the Restatement (Second) of Torts for distinguishing between the following three distinct torts involving abusive manipulation of judicial procedures: **[**52]** (1) abuse of process; (2) malicious prosecution; and (3) wrongful use of civil proceedings. Despite the fact that it had in the past utilized the term "as a catch-all description of any private misuse of judicial resources," the court recognized that abuse of process is a narrow tort applying only to "'one who uses a legal process . . . against another primarily to accomplish a purpose for which it is not designed.'" *981 P.2d at 845*(quoting *Restatement (Second) of Torts § 682* (1977)). ***HN25***[] An abuse of process claim can be raised as a counterclaim under Utah law because there is no requirement that the judicial proceedings giving rise to the tort claim have been terminated in the counterclaimant's favor. *See* *Restatement (Second) of Torts § 682 cmt. a*(1977); William L. Prosser, *Law of Torts* § 121, at 856 (4th ed. 1971); *Keller v. Ray, Quinney & Nebeker, 896 F. Supp. 1563, 1570 & n.15 (D. Utah 1995)*(cited with approval in *Ince, 981 P.2d at 846*). [19] The tort of wrongful use of civil proceedings, in contrast, focuses on the whether the *procurement, initiation, or continuation* of civil proceedings **[*1266]** was "for the purpose of harassment or annoyance" **[**53]** and without probable cause. *Ince, 981 P.2d at 846*(quotation omitted); *see also* *Restatement(Second) of Torts § 674*(1977). *See generally* William L. Prosser, *Law of Torts* § 120, at 850-851(4th ed. 1971)("The action of malicious prosecution, which began as a remedy for unjustifiable criminal proceedings, has been undergoing a slow process of extension into the field of the wrongful initiation of civil suits."). A claim for wrongful use of civil proceedings is not ripe until the underlying proceedings are "'terminated in favor of the person against whom they are brought.'" *Ince, 981 P.2d at 845*(quoting *Restatement (Second) of Torts § 674*(1977)).

---

parties, by procuring for them a surer-footed reading of applicable law." [*United Mine Workers v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)]*. If federal claims are dismissed before trial, leaving only issues of state law, "the federal court should decline the exercise of jurisdiction by dismissing the case without prejudice." [*Carnegie-Mellon University v. Cohill, 484 U.S. 343, 350, 98 L. Ed. 2d 720, 108 S. Ct. 614 (1988)*; *Gibbs, 383 U.S. at 726*].

HN23[] Taken together, *Jarvis*, *Pell*, and *Bauchman* counsel against deciding dispositive motions addressed to pendent state law claims unless it appears that a federal claim will proceed to trial or a decision is necessary because of some peculiar aspect of the case (e.g., coordination of trial docket and discovery). This is especially true where, as here, the state law the district court must apply to dispose of the motion is undeveloped. Absent such restraint, the parties may well be deprived of the "surer-footed reading of applicable law" that would be provided them by the relevant state court. *Gibbs, 383 U.S. at 726*.

[19] This is so because

> ***HN26***[] the gravamen of the misconduct . . . is not the wrongful procurement of legal process or the wrongful initiation of criminal or civil proceedings; it is the misuse of process, no matter how properly obtained, for any purpose other than that which it was designed to accomplish. Therefore, it is immaterial that the process was properly issued, that it was obtained in the course of proceedings that were brought with probable cause and for a proper purpose, or even that the proceedings termination in favor of the person instituting or initiating them. The subsequent misuse of the process, though properly obtained, constitutes the misconduct for which the liability is imposed under this rule . . . ."

Restatement (Second) of Torts § 682, cmt. a (1977); *see also* William L. Prosser, *Prosser on Torts* § 121, at 856(4th ed. 1971)("The ***HN27***[] gist of the tort [of abuse of process] is not commencing an action or causing process to issue without justification, but misusing, or misapplying process justified in itself for an end other than that which it was designed to accomplish. The purpose for which the process is used, once it is issued, is the only thing of importance. Consequently, . . . it is unnecessary for the plaintiff to prove that the proceeding has terminated in his favor . . . ." (footnote omitted)).

[54]** Whether Chevron's and SF's counterclaims are properly categorized as sounding in abuse of process or wrongful use of civil proceedings answers in part the question whether Ashley Creek's appeal satisfies the personal stake requirement of Article III. If the counterclaims state a claim for abuse of process, they were properly brought as counterclaims and, pursuant to *Jarvis*, this court would have jurisdiction to determine whether the district court properly denied Ashley Creek's motion to dismiss the counterclaims with prejudice. This is so because a ruling in Ashley Creek's favor would prevent the refiling of the claims in state court and, thereby, reduce or eliminate Ashley Creek's future litigation costs. *Jarvis, 985 F.2d at 1425*. If, on the other hand, Ashley Creek is correct that the counterclaims state only claims for wrongful use of civil proceedings, Article III's personal stake requirement is not satisfied unless the underlying proceedings were terminated in Chevron's and SF's favor. *See* *Restatement (Second) of Torts § 674(b)* (1977); *Ince, 981 P.2d at 846* (adopting Restatement formulation of wrongful use of civil proceedings); *Keller, 896 F. Supp. at 1570 n.15* **[**55]** (applying Utah law). [20] If the counterclaims in question are for wrongful use of civil proceedings and the underlying proceedings have not been terminated in Chevron's and SF's favor, the appropriate response to Ashley Creek's motion to dismiss the counterclaims would be to dismiss the counterclaims without prejudice. Because this is exactly what the district court eventually did when it declined to exercise pendent jurisdiction, this court could provide Ashley Creek no further relief and the appeal would not present a live case or controversy.

[56]** As noted above, Ashley Creek contends on appeal that Chevron's and SF's counterclaims sound in wrongful use of civil proceedings rather than in abuse of process. Chevron and SF did not respond to this contention in their appellate filings. For the most part, this court agrees with Ashley Creek. Chevron's and SF's counterclaims state the following three general allegations: (1) the underlying antitrust action was brought in bad faith and without a justifiable basis for the purpose of obtaining a preferential tariff; (2) the underlying antitrust action was brought in bad faith and without a justifiable basis in an effort to gain an equity interest in the **[*1267]** pipeline; and (3) Ashley Creek had involved the counterclaimants in extensive and costly litigation in state and federal agencies and state court for the purpose of seeking disallowance of the pipeline right-of-way, which proceedings Ashley Creek had lost. It is clear that the first two categories of these allegations, which refer to the initiation of the underlying antitrust lawsuit, rather than to the improper use of otherwise properly issued process, ***HN28***[] state wrongful use of civil proceedings claims which, as correctly noted by Ashley **[**57]** Creek on appeal, cannot be maintained as counterclaims. *See* *Brown, 525 N.Y.S.2d at 980* (noting that "institution of a civil action by summons and complaint is not legally considered process capable of being abused" (quotation omitted)). Because the district court's ultimate dismissal of those claims without prejudice is all the relief to which Ashley Creek is entitled, its appeal of the district court's treatment of those claims does not present a live case or controversy to this court. Chevron's and SF's claims regarding proceedings in state and federal administrative tribunals and Utah state court regarding the validity of the right-of-way over which the pipeline travels, however, are ripe no matter how viewed because all of the proceedings referred to have been terminated in Chevron's and SF's favor. Accordingly, this court has jurisdiction to review the district court's refusal to dismiss those claims with prejudice.

IV. Merits

SF's ripe counterclaim provides as follows [21] :

[58]** 6. Counterclaim Defendant has involved the Counterclaimants in extensive litigation causing large expense in fees and costs, including the following:

---

[20] *Cf. also* *Mann v. Genoa Twp., 2002 Ohio 727, 2002 WL 221112 at 7*(Ohio Ct. App. Feb. 11, 2002)(holding that trial court erred in dismissing malicious prosecution claim on merits where claim was not ripe); *Brown v. Bethlehem Terrace Assocs., 136 A.D.2d 222, 525 N.Y.S.2d 978, 979 (N.Y. App. Div. 1988)*(holding that defendant's counterclaim for abuse of process actually stated claim for malicious prosecution and that claim was not ripe for adjudication as a counterclaim); *Neil v. S. Fla. Auto Painters, Inc., 397 So. 2d 1160, 1166 (Fla. Dist. Ct. App. 1981)*(noting that a malicious prosecution claim does not ripen until the termination of the underlying proceedings supposedly giving rise to the claim).

[21] Chevron's ripe counterclaim is identical in substance and substantially similar in text.

(a) Proceedings before the Utah State agencies, the Utah Third District Court and the Utah Supreme Court seeking disallowance of Utah State easements for the pipeline over state land and has lost all of such proceedings.

(b) Proceedings before the divisions of the United States Department of Interior resulting ultimately in an appeal by Counterclaim Defendant to the Interior Bureau of Land Appeals and has lost all such proceedings which have become final.

Because of the foregoing, the Counterclaimants are entitled to their attorney's fees and costs in defending all of the suits and proceedings described above.

HN29[] This court reviews the denial of a *Rule 12(b)(6)* motion to dismiss *de novo*, applying the same standard as the district court, and accepting the well-pleaded allegations of the complaint as true and construing them in the light most favorable to the counterclaimants. *Benefield v. McDowall, 241 F.3d 1267, 1270 (10th Cir. 2001)*.

With these standards in mind, we conclude that the district **[**59]** court erred in denying Ashley Creek's motion to dismiss this particular wrongful use of civil proceedings claim because the claim is deficient on its face. Although Chevron and SF alleged that Ashley Creek involved them in administrative and state court litigation regarding the validity of the pipeline right-of-way, they do not allege that such litigation was undertaken without probable cause and for an improper purpose. *See* *Ince, 981 P.2d at 846*(setting out essential elements of wrongful use of civil proceedings claim); *Restatement (Second) of Torts § 674*(1977); *id.* § 681A(noting that ***HN30***[] it is plaintiff's burden to prove lack of probable cause and improper purpose). Instead, the counterclaim **[*1268]** merely alleges that Ashley Creek involved Chevron and SF in costly litigation which Ashley Creek ultimately lost. This is in stark contrast to the other two segments of Chevron's and SF's counterclaims which specifically allege both the lack of probable clause and improper purpose elements. Accordingly, taking as true the allegations set out in this one segment of the counterclaims, and drawing all reasonable inferences in favor of Chevron and SF, the counterclaims fail **[**60]** to state a viable claim upon which relief could be granted. [22]

V. Conclusion

The district court's order denying Ashley Creek's motion to dismiss Chevron's and SF's counterclaims related to litigation involving the validity of the right-of-way is hereby **reversed** and the matter is **remanded** to the district court to dismiss the claims with prejudice. The remainder of the appeal is dismissed for lack of Article III jurisdiction.

CONCLUSION

For those reasons set out above, the United States District Court for the district of Utah is hereby **AFFIRMED** in Nos. 01-4017 and 01-4031. In No. 01-4066, the appeal is **DISMISSED** in part, the district court is **REVERSED** in part, and the matter is **REMANDED** to the district court **[**61]** for further proceedings consistent with this opinion. All other outstanding motions are hereby **DENIED**.

End of Document

[22] Because this court concludes that this aspect of Chevron's and SF's counterclaims is facially deficient, we need not address Ashley Creek's contention that the claim fails because Chevron and SF were actually intervenors in the relevant proceedings.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* challenges the sufficiency of the complaint to state a claim upon which relief may be granted. Dismissal of an action under such a motion is warranted if the plaintiff can prove no set of facts in support of its claims that would entitle it to relief. The essence of a *Rule 12(b)(6)* motion is not that the plaintiff has pleaded insufficient facts, it is that even assuming all of his facts are accurate, he has no legal claim.

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Antitrust & Trade Law, Sherman Act**

Unreasonable restraints of trade are prohibited by *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.* Under *§ 1*, such an illegal restraint of trade is a felony.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] Antitrust & Trade Law, Sherman Act

See 15 U.S.C.S. § 1.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Practices Governed by Per Se Rule, Boycotts

While 15 U.S.C.S. § 1 literally prohibits every agreement in restraint of trade, the United States Supreme Court has read § 1 to prohibit only restraints that violate the "rule of reason," i.e., practices that under all the circumstances impose an unreasonable restraint on competition. Because rule of reason analysis may entail significant litigation, the Supreme Court has also recognized per se violations of § 1. Once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it, it has applied a conclusive presumption that the restraint is unreasonable. Per se violations include, for instance, price fixing, division of markets, group boycotts, and tying arrangements.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN5[] Antitrust & Trade Law, Sherman Act

A violation of 15 U.S.C.S. § 1 is not enough by itself, however, to support a civil lawsuit for restraint of trade. 15 U.S.C.S. § 15, also known as § 4 of the Clayton Act, is the required vehicle for a civil lawsuit for restraint of trade or other antitrust violations.

Antitrust & Trade Law > Clayton Act > General Overview

HN6[] Antitrust & Trade Law, Clayton Act

See 15 U.S.C.S. § 15(a).

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN7[] Antitrust & Trade Law, Sherman Act

According to the United States Supreme Court, 15 U.S.C.S. § 15(a) creates an additional element for a civil claim based upon an alleged antitrust violation. A plaintiff must prove more than injury causally linked to an illegal presence in the market. Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN8[] **Antitrust & Trade Law, Sherman Act**

An antitrust injury does not arise until a private party is adversely affected by an anticompetitive aspect of the defendant's conduct, i.e., a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior. As the courts have repeatedly noted, the antitrust laws were enacted for the protection of competition, not competitors. In other words, the antitrust laws do not protect a business from a loss of profits to a competitor related to continued or increased competition. A plaintiff suing under *15 U.S.C.S. § 15*, therefore, must link its losses to a defendant's anticompetitive conduct.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

Neither injury in fact nor a per se violation of *15 U.S.C.S. § 1* equals antitrust injury. The antitrust injury requirement is not met by allegations of harm from competitive conduct, meaning harm to only a specific competitor rather than to the market. Nor is the requirement met by allegations of harm just to the market rather than to the specific competitor. The competitor itself must be harmed by conduct that is anticompetitive.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Clayton Act > General Overview

Torts > Business Torts > Unfair Business Practices > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

As the antitrust laws protect competition rather than competitors, whether the injury to a competitor is really antitrust injury often may be ascertained by looking for related harm to consumers. The antitrust injury doctrine essentially requires a plaintiff to show that its loss comes from acts that reduce output or raise prices to consumers. If no consumer interest can be discerned even remotely in a suit brought by a competitor - if, as here, a victory for the competitor can confer no benefit, certain or probable, present or future, on consumers - a court is entitled to question whether a violation of ***antitrust law*** is being charged. If injury to a competitor, caused by wrongful conduct, were enough to bring the antitrust laws into play, the whole state tort law of unfair competition would be absorbed into federal ***antitrust law***; it has not been: unfair competition, as such, does not violate the antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

Examination of the remedy sought is a clue to whether there is antitrust injury. If a plaintiff simply wants the transfer of benefits that a defendant is reaping in the market, without discernable benefits to consumers, it is likely that no antitrust injury exists.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Theft & Related Offenses > Larceny & Theft > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

Claims of antitrust injury also are especially suspect when they accuse the consumers of misunderstanding their own interests. An allegation that competition is harmed by a conspiracy, in which the consumer is involved, to steal business from one firm and give it to another, for instance, is suspect if the consumer must be deemed irrational by causing itself to pay higher prices in the future.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

The main question for antitrust injury is whether the plaintiff has suffered an injury that reflects the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN14[] **Antitrust & Trade Law, Sherman Act**

Only a private lawsuit raises the *15 U.S.C.S. § 15(a)* requirement of antitrust injury.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > Business Torts > Unfair Business Practices > Remedies

Antitrust & Trade Law > Clayton Act > General Overview

Torts > Business Torts > General Overview

Torts > Business Torts > Unfair Business Practices > General Overview

HN15[] **Antitrust & Trade Law, Sherman Act**

The freedom to switch suppliers lies close to the heart of the competitive process that the antitrust laws seek to encourage. At the same time, other laws, for example, unfair competition laws, business tort laws, or regulatory laws, provide remedies for various competitive practices thought to be offensive to proper standards of business morality.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN16[] Public Enforcement, State Civil Actions

Analysis of a state antitrust claim is generally guided by federal court decisions on federal ***antitrust law***.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN17[] Jurisdiction, Jurisdictional Sources

Jurisdiction over supplemental claims is governed by *28 U.S.C.S. § 1367*. Pursuant to *§ 1367(c)*, a court may decline to exercise supplemental jurisdiction over a state law claim if the court has dismissed all federal claims. When all federal claims are dismissed before trial, the usual and preferred course is to dismiss the supplemental state law claims without prejudice, especially when there has been almost no discovery or pretrial proceedings.

Counsel: [1]** For Phillips Getschow Company, Plaintiff: Philip J Danen, Stellpflug Janssen Nell Hammer Kirschling & Bartels, De Pere, WI.

For Green Bay Brown County Professional Football Stadium District, Lambeau Field Redevelopment LLC, Turner Construction Company, Defendants: Eric L Maassen, G Michael Halfenger, Thomas L Shriner, Jr, Foley & Lardner, Milwaukee, WI. Gregory B Conway, Liebmann Conway Olejniczak & Jerry, Green Bay, WI.

Judges: William C. Griesbach, United States District Judge.

Opinion by: William C. Griesbach

Opinion

[*1044] DECISION AND ORDER

This action arises out of the renovation of Lambeau Field. A company that bid on the heating, venting and air conditioning contract but was not awarded the work has sued the entities in charge of the renovations, asserting improprieties in the bidding process. Defendants now contend that the only federal claim in the lawsuit should be dismissed. I agree, and order the federal claim and its state counterpart dismissed. And since the remaining claims arise solely under state law and there is no diversity of citizenship, I conclude that federal jurisdiction over them is lacking and that they too should be dismissed.

I. FACTUAL AND PROCEDURAL HISTORY

[2]** Plaintiff Phillips Getschow Company filed this case in this court on April 30, 2002, alleging several state law claims and, more importantly for present purposes, a federal antitrust claim. According to the complaint, defendant Green Bay Brown County Professional Football Stadium District ("District") is a Wisconsin municipality created specifically for the project of renovating Lambeau Field. Defendant Lambeau Field Redevelopment, LLC

("Developer"), acting on behalf of the District, contracted for the design and construction of the Lambeau Field renovations. Defendant Turner Construction Company is the designer and general contractor of the renovations.

Phillips asserts that the Lambeau Field renovations project is a "public contract" under *Wis. Stat. § 66.0901 (1)*, which provides for a closed bidding system whereby **[*1045]** bids are not opened until all bids are in and a bidder may only withdraw its bid and rebid upon the project if the project is readvertised. The defendants allegedly represented to Phillips that the Lambeau Field renovations bidding was to be closed, that bid amounts were not to be disclosed until a contract was awarded, and that the lowest bid was to be accepted by **[**3]** the defendants.

Phillips submitted a bid for bid package No. 6 HVAC & Temperature Control. Phillips's bid was allegedly the lowest bid submitted for that bid package. According to the complaint, however, the defendants "opened the submitted bids and disseminated the information contained within the submitted bids to certain contractors, and those contractors were improperly allowed to submit a new and lower bid." (Compl. P 17.) in other words, the defendants "informed an invited bidder to withdraw its previously submitted and opened bid . . . [and] informed this same invited bidder of the lowest bid received by the defendants for the bid package." *(Id.* PP 22-23.) The "invited bidder" then was allowed to submit a new bid that matched or was lower than Phillips's bid, and the "invited bidder" was awarded the bid package. *(Id.* P 24.)

The only federal claim in the complaint is count III, which alleges federal (and state) antitrust violations. Count III alleges that

> the defendants' conduct in opening the submitted bids and disseminating the information contained within the submitted bids to certain contractors, and allowing those contractors to submit new and lower bids **[**4]** violates The Sherman Antitrust Act, *15 U.S.C. 1, et seq.*, and state antitrust laws in that defendants' conduct was an unreasonable restraint of trade, designed to eliminate competition and otherwise adversely affect the free market.

(Id. P 32.) Phillips allegedly suffered damage in the form of its expense in preparing and submitting its proposed bid, "which, in the ordinary course of business and absent the defendants' illegal conduct, would have resulted in the award of the project, business income and future maintenance to the plaintiff." *(Id.* P 33.) Phillips seeks treble damages, attorney fees, and costs.

Defendants have filed a motion to dismiss the federal and state antitrust claims with prejudice under *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim. They also seek dismissal of the remaining state law claims without prejudice under *Fed. R. Civ. P. 12(b)(1)* for lack of jurisdiction or under *28 U.S.C. § 1367* the supplemental claims statute.

II. DISCUSSION

A. Antitrust Claims

HN1[] A motion to dismiss under *Rule 12(b)(6)* challenges the sufficiency of the complaint to state a claim upon which relief **[**5]** may be granted. *See Fed. R. Civ. P. 12(b)(6)*. Dismissal of an action under such a motion is warranted if the plaintiff can prove no set of facts in support of its claims that would entitle it to relief. *Gen. Elec. Capital Corp. v. Lease Resolution Corp., 128 F.3d 1074, 1080 (7th Cir. 1997)*; *see Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. The essence of a *Rule 12(b)(6)* motion is not that the plaintiff has pleaded insufficient facts, it is that even assuming all of his facts are accurate, he has no legal claim. *Payton v. Rush-Presbyterian St. Luke's Med. Ctr., 184 F.3d 623, 627 (7th Cir. 1999)*.

HN2[] Unreasonable restraints of trade are prohibited by The Sherman Act, *15 U.S.C. § 1*, which reads in pertinent part: ***HN3***[] "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several **[*1046]** States, or with foreign nations, is hereby declared to be illegal." Under *§ 1*, such an illegal restraint of trade is a felony.

HN4[] While *§ 1* literally prohibits *every* agreement in restraint of trade, the United States Supreme Court has read *§ 1* to prohibit only restraints **[**6]** that violate the "rule of reason," i.e., practices that under all the circumstances impose an *unreasonable* restraint on competition. *Arizona v. Maricopa County Med. Soc'y, 457 U.S. 332, 342-43, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*. Because rule of reason analysis may entail significant litigation, the Supreme Court has also recognized per se violations of *§ 1*. *Id. at 343-44*. "Once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it, it has applied a conclusive presumption that the restraint is unreasonable." *Id. at 344*. Per se violations include, for instance, price fixing, division of markets, group boycotts, and tying arrangements. *Id. at 344 n.15*.

HN5[] A violation of *§ 1* is not enough by itself, however, to support a civil lawsuit for restraint of trade. Although not specifically cited by Phillips in its complaint, *15 U.S.C. § 15*, also known as § 4 of the Clayton Act, is the required vehicle for a civil lawsuit for restraint of trade or other antitrust violations. Under *§ 15(a)*; ***HN6***[] "any person who shall be injured in his business or property **[**7]** by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States." In *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*, ***HN7***[] the Supreme Court held that *§ 15(a)* creates an additional element for a civil claim based upon an alleged antitrust violation. A plaintiff

> must prove more than injury causally linked to an illegal presence in the market. Plaintiffs must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation."

429 U.S. at 489; *see also* *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 109, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)* (summarizing *Brunswick Corp.).*

HN8[] An antitrust injury does not arise "until a private party is adversely affected by an *anticompetitive* aspect of the defendant's conduct," *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 339, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*, i.e., "a plaintiff can recover only if the loss stems **[**8]** from a competition-reducing aspect or effect of the defendant's behavior," *id. at 344*. As the courts have repeatedly noted, "the antitrust laws were enacted for 'the protection of competition, not competitors.'" *Brunswick Corp., 429 U.S. at 488* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*. In other words, the antitrust laws do not protect a business from a loss of profits to a competitor related to continued or increased competition. *Cargill, Inc., 479 U.S. at 116*; *Stamatakis Indus., Inc. v. King, 965 F.2d 469, 471 (7th Cir. 1992)* ("[A] producer's loss is no concern of the antitrust laws, which protect consumers from suppliers rather than suppliers from each other. If King's defection should be called unfair competition, it is nonetheless *competition."); see* *Ehredt Underground, Inc. v. Commonwealth Edison Co., 90 F.3d 238, 240 (7th Cir. 1996)* ("Over and over, we stress that antitrust is designed to protect consumers from producers, not to protect producers from each other or to ensure that one firm gets more **[*1047]** of the business."). A plaintiff suing under *§ 15*, **[**9]** therefore, must link its losses to a defendant's anticompetitive conduct.

Both *Brunswick Corp.* and *Atlantic Richfield Co.* are instructive on precisely this point. In *Brunswick Corp.,* the plaintiffs, three small bowling centers, alleged that Brunswick violated *§ 1 of the Sherman Act* by acquiring and operating bowling alleys that had defaulted on the purchase of its equipment. They alleged that the acquisitions had made Brunswick the largest bowling center operator in the country, thereby creating a monopoly. The plaintiffs claimed that they were harmed because the bowling centers purchased by Brunswick would have gone out of business but for the acquisitions. The plaintiffs alleged loss in the amount of income they would have earned had the acquired centers ceased existence.

While acknowledging that the plaintiffs' injury may have been causally related to Brunswick's alleged monopolization, the Supreme Court held that permitting such injury to state a claim would "divorce[] antitrust recovery from the purposes of the antitrust laws." *429 U.S. at 487*. At heart, the plaintiffs asserted damages from continued, not lessened, competition, and recovery for such **[**10]** alleged damage was in fact contrary to the antitrust laws. *Id. at 487-88*.

Similarly, in *Atlantic Richfield Co.,* the plaintiff, an independent retail marketer of gasoline, alleged that Atlantic Richfield had entered into a vertical, maximum price fixing agreement with its dealers, who were plaintiff's competitors. Plaintiff alleged that the price fixing agreement was a per se violation of *§ 1* and that it had suffered losses as a result of competition with Atlantic's dealers. Notwithstanding these allegations, the Supreme Court held that plaintiff had failed to allege an antitrust injury. Although it acknowledged that a vertical, maximum price fixing agreement was a per se violation of antitrust laws, the Court nevertheless found that the plaintiff had failed to allege antitrust injury because the only losses it claimed resulted from competition with the other firms. *Id. 495 U.S. at 336*. Because the loss claimed had not resulted from predatory pricing, the Court concluded that the plaintiff was unable to show antitrust injury. *Id. at 339*. "'To hold that the antitrust laws protect competitors from the loss of profits due to [nonpredatory] **[**11]** price competition would, in effect, render illegal any decision by a firm to cut prices in order to increase market share.'" *Id. at 338* (quoting *Cargill, Inc., 479 U.S. at 116*) (alteration in original); *see also id. at 340* ("Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury.").

Thus, in sum, ***HN9***[] neither injury in fact nor a per se violation of *§ 1* equals antitrust injury. *See 459 U.S. at 339 n. 8, 341-42*. The antitrust injury requirement is not met by allegations of harm from *competitive* conduct, meaning harm to only a specific competitor rather than to the market. Nor is the requirement met by allegations of harm just to the market rather than to the specific competitor. *See 495 U.S. at 339 n. 8*. The competitor itself must be harmed by conduct that is anticompetitive.

HN10[] As the antitrust laws protect competition rather than competitors, whether the injury to a competitor is really antitrust injury often may be ascertained by looking for related harm to consumers. The antitrust injury doctrine essentially **[**12]** requires a plaintiff to show that its loss comes from acts that reduce output or raise prices to consumers. *Chi. Prof'l Sports Ltd. P'ship **[*1048]** v. Nat'l Basketball Ass'n, 961 F.2d 667, 670 (7th Cir. 1992)*.

> If no consumer interest can be discerned even remotely in a suit brought by a competitor - if, as here, a victory for the competitor can confer no benefit, certain or probable, present or future, on consumers - a court is entitled to question whether a violation of ***antitrust law*** is being charged. If injury to a competitor, caused by wrongful conduct, were enough to bring the antitrust laws into play, the whole state tort law of unfair competition would be absorbed into federal ***antitrust law***; it has not been: unfair competition, as such, does not violate the antitrust laws.

Brunswick Corp. v. Riegel Textile Corp., 752 F.2d 261, 266-67 (7th Cir. 1984) (citation and internal quotation marks omitted).

In *Riegel Textile,* the Seventh Circuit found no consumer interest and no antitrust injury in allegations that Riegel Textile, through theft of a patent, took away a monopoly that rightfully belonged to Brunswick as the real inventor. *Id. at 267.* **[**13]** Whether Riegel Textile as opposed to Brunswick held monopoly power meant nothing to consumers; thus Brunswick did not suffer antitrust injury.

Similarly, ***HN11***[] examination of the remedy sought is a clue to whether there is antitrust injury. *Id.* If the plaintiff simply wants the transfer of benefits that a defendant is reaping in the market, without discernable benefits to consumers, it is likely that no antitrust injury exists. *See id.*

HN12[] Claims of antitrust injury also are especially suspect "when they accuse the consumers of misunderstanding their own interests." *Stamatakis Indus., 965 F.2d at 471*. An allegation that competition is harmed by a conspiracy, in which the consumer is involved, to steal business from one firm and give it to another, for instance, is suspect if the consumer must be deemed irrational by causing itself to pay higher prices in the future. *See id. at 471-72*; *cf. Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1109 (7th Cir. 1984)* ("It is inherently implausible that Ford, as a buyer . . . , would conspire in order to allow its new carrier, Nu-Car, to charge noncompetitive prices; the plaintiffs are alleging, **[**14]** in essence, that Ford conspired to injure itself.").

In light of these principles, it is apparent that Phillips has alleged no antitrust injury. Phillips's allegations in no way assert anticompetitive conduct. The complaint asserts that the alleged bidding process was "designed to eliminate competition and otherwise adversely affect the free market" (Compl. P 32), but no elimination of competition is apparent, and in response to the motion to dismiss, Phillips identifies none. Phillips merely asserts in conclusory fashion that the vertical bid-rigging scheme had "inherent anti-competitive consequences." (Pl.'s Mem. of Law in Opp'n at 2.) But the facts Phillips alleges in the complaint actually resulted in *increased* competition, and it is the increased competition that caused Phillips harm. Phillips was harmed when a competitor was allowed to step in and submit another bid. Whether the competition was proper or improper makes no difference as far as the antitrust claim is concerned. As described above, damages from continued or increased competition are not the type of harm the antitrust statutes address.

As for adverse effects on the market, again no such harm is apparent and **[**15]** Phillips identifies none. In the market of Lambeau Field renovation (assuming the market can be so defined), the buyer paid the same or a lower price than Phillips wanted, which cannot be considered an adverse effect at all. Assuming Phillips's bid was the same as the "invited bidder's," the award of the bid was immaterial to the **[*1049]** consumer, just as the identity of the patent holder in *Riegel Textiles* was immaterial to the public in that case. Assuming Phillips's bid was in fact higher than the "invited bidder's," Phillip's desired remedy - imposing damages on the defendants for their failure to accept Phillips's higher bid - would violate the fundamental purpose of ***antitrust law***, which is to protect consumers from producers; not to protect producers from each other or to ensure that one firm gets more of the business. Nothing in this alleged bid-rigging scheme interfered with the freedom of the buyer or actual seller to buy and sell in accordance with their own judgment.

Phillips has argued no adverse effects at all in the broader market of construction. No allegations or even suggestions of predatory pricing are made such that the acceptance of this one bid could harm market competition **[**16]** in the future. And again, ***HN13***[] the main question for antitrust injury is whether the plaintiff has suffered an injury that "reflects the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp., 429 U.S. at 489*. Neither the facts alleged by Phillips, nor reasonable inferences to be drawn therefrom, show such an injury. In fact, they show the absence of antitrust injury.

Phillips's opposition to the motion to dismiss focuses mainly on whether vertical bid rigging schemes are per se violations of *§ 1*. As *Atlantic Richfield Co.* makes clear, however, the existence of a per se violation is not enough to allow a plaintiff to recover damages in a civil action. There must be antitrust injury as well. The cases cited by Phillips regarding bid-rigging or price fixing - *United States v. Portsmouth Paving Corp., 694 F.2d 312 (4th Cir. 1982)*; *M.C. Mfg. Co. v. Tex. Foundries, Inc., 517 F.2d 1059 (5th Cir. 1975)*; *Sunny Hill Farms Dairy. Co. v. Kraftco Corp., 381 F. Supp. 845 (E.D. Mo. 1974)* - all predate *Atlantic Richfield Co.,* and two predate even *Brunswick* **[**17]** *Corp.* The two cases predating *Brunswick Corp.* did not discuss antitrust injury at all - they incorrectly state that only a causal connection between the antitrust violation and the alleged injury must exist, rather than an injury that the antitrust laws were meant to address. *See M.C. Mfg. Co., 517 F.2d at 1063-64*; *Sunny Hill Farms Dairy Co., 381 F. Supp. at 851, 857*. The case postdating *Brunswick Corp.* also does not discuss antitrust injury, as it was a federal prosecution under *15 U.S.C. § 1* rather than a private lawsuit under *15 U.S.C. §§ 1and 15*. *See Portsmouth Paving Corp., 694 F.2d at 315*. ***HN14***[] Only a private lawsuit raises the *§ 15(a)* requirement of antitrust injury. Moreover, the bid rigging scheme in *Portsmouth Paving Corp.* was horizontal between competitors and had the undisputed effect of forcing the government purchasers of roadway construction and surface paving to pay more for those services than had there been free competition. *See id. at 317, 319*. Thus, even if antitrust injury had been required it would have been found, as competition was being **[**18]** restricted and as a result the consumer plaintiff was paying higher prices for the services it was purchasing.

The other case relied upon by Phillips - a 1973 opinion by Judge John W. Reynolds from this district - merely describes the undisputed proposition that there is no heightened or special pleading standard for antitrust claims. *See Kolb v. Chrysler Corp., 357 F. Supp. 504, 507 (E.D. Wis. 1973)*. The defendants' motion dismiss attacks the facts of the complaint on the merits under *Fed. R. Civ. P. 12(b)(6)*, not on any defects in particularized pleading. Moreover, *Kolb* does not support the use of any *lesser* standard for examining an antitrust complaint than other complaints. The *Rule 12(b)(6)* standard described above applies to this case as it does to any **[*1050]** other. *See* *also* Car Carriers, Inc., 745 F.2d at 1106 ("The pleader may not evade these [Rule 12(b)(6)] requirements by merely alleging a bare legal conclusion; if the facts 'do not at least outline or adumbrate' a violation of the Sherman Act, the plaintiffs 'will get nowhere merely by dressing them up in the language of antitrust.'").

In sum, even taking all of Phillips's alleged facts **[**19]** and the per se violation argument as true, no antitrust injury can be found in this case. The federal antitrust claim must therefore be dismissed. But even if Phillips were able to show an antitrust injury, its claim would nevertheless fail because the facts alleged show no violation of § 1 occurred.

Phillips argues that the allegations in its complaint show that the defendants "conspired between themselves, together with their contractor of choice, to form a vertical bid-rigging scheme which deprived Plaintiff of its competitive right to contract for the Lambeau Field Renovation." "Such schemes," it argues; "are inherently anti-competitive and *per se* violations of the Sherman ***Antitrust Law***." (Pl's Mem. of Law in Opp'n, at 3) in support of its argument, Phillips cites *Portsmouth Paving Corp.,* and Sunny Hill Farms Dairy Co. Neither case supports its argument.

Portsmouth Paving Corp., as noted above, involved an agreement by contractors who were ostensibly competing against one another for the work that had the effect of forcing purchasers of road construction and paving services to pay inflated prices for those services. Under the scheme devised by the contractors, they **[**20]** would discuss their bids for various projects among themselves prior to submitting them, agree on which of them would be the low bidder on which project, and then arrange for the others to refrain from bidding or to submit intentionally high bids on that project so that it would be awarded to the chosen contractor at an inflated price. This is what is commonly meant by the term "bid rigging."

The allegations in this case, however, are wholly dissimilar. Defendants are the purchasers, not the suppliers of construction services. And according to the complaint they improperly, even illegally, disclosed a sealed bid submitted by Phillips so that a favored contractor would have an opportunity to reduce and resubmit its bid, thereby allowing the other contractor to win the contract. While such conduct, if proved at trial, may very well result in defendants' liability to Phillips on one of its state law claims, it does not amount to a violation of §1. At most, the allegations of the complaint show a favoritism by defendants toward one of Phillips' competitors. Without more, however, the fact that a buyer favored one supplier over another does not violate §1. ***HN15***[] "The freedom to switch **[**21]** suppliers lies close to the heart of the competitive process that the antitrust laws seek to encourage." *NYNEX v. Discon, Inc., 525 U.S. 128, 136, 142 L. Ed. 2d 510, 119 S. Ct. 493 (1998)*. "At the same time, other laws, for example, 'unfair competition' laws, business tort laws, or regulatory laws, provide remedies for various 'competitive practices thought to be offensive to proper standards of business morality.'" *Id. at 137* (quoting 3 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 651d at 78 (1996)).

Sunny Hill Farms Dairy Co., the other case cited by Phillips in support of its claim of a per se violation, is similarly inapposite. That case involved a horizontal price fixing agreement between competing milk suppliers. The agreement also provided for a reduction in the plaintiff's in-store display space in favor of that of the defendant suppliers in retail stores operated or controlled by one of the defendant **[*1051]** suppliers. The plaintiff alleged that it had suffered reduced sales as a result of the pricing and display space agreements. Here, by contrast, while Phillips has characterized the defendants' alleged conduct as "price fixing," it has actually alleged only that **[**22]** the defendants' improperly disclosed what should have been a sealed bid. Although Phillips alleges that this allowed its competitor to submit a reduced bid, there is no allegation that the price was "fixed," except in the sense that prices are normally fixed, i.e., by voluntary agreement of the buyer and seller. Also unlike this case, *Sunny Hill Farms Dairy Co.* involved principally a horizontal agreement, one that was between suppliers. Here, the allegedly illegal agreement between the defendant purchaser and an unnamed supplier. Nothing in the complaint suggests how such an agreement could result in harm to competition or a relevant antitrust market. Accordingly, I conclude that the complaint fails to allege an antitrust violation, either per se or under the rule of reason, and for this reason also, the federal claim must be dismissed.

HN16[] Analysis of the state antitrust claim is generally guided by federal court decisions on federal ***antitrust law***. *Lerma v. Univision Communications, Inc., 52 F. Supp. 2d 1011, 1015-16 (E.D. Wis. 1999)*; *see* Carlson &

Erickson Builders, Inc. v. Lampert Yards, Inc., 190 Wis. 2d 650, 665, 529 N.W.2d 905 (1995); Am. Med. Transp. of Wis., Inc. v. Curtis-Universal, Inc., 148 Wis. 2d 294, 299, 435 N.W.2d 286 (Ct. App. 1988), **[**23]** *rev'd on other grounds*, 154 Wis. 2d 135, 452 N.W.2d 575 (1990). Phillips offers no argument that in regard to antitrust injury the federal law and state law differ. Therefore, the state antitrust claim fails for lack of antitrust injury as well.

B. Supplemental State Law Claims

With the only federal claim in this case dismissed, I must address the continued jurisdiction over the supplemental state law claims. ***HN17***[] Jurisdiction over supplemental claims is governed by 28 U.S.C. § 1367. Pursuant to § 1367(c), I may decline to exercise supplemental jurisdiction over a state law claim if I have dismissed all federal claims. When all federal claims are dismissed before trial, the usual and preferred course is to dismiss the supplemental state law claims without prejudice, especially when there has been almost no discovery or pretrial proceedings. Van Harken v. City of Chicago, 103 F.3d 1346, 1354 (7th Cir. 1997). Other than regarding the state antitrust claim, for which further state court proceedings would be an unnecessary burden on the state courts, I see no need to deviate from the presumed route in this case. Phillips contends that **[**24]** it may have a statute of limitations problem if I dismiss the remaining state law claims, but the supplemental jurisdiction statute sufficiently addresses that. *See* 28 U.S.C. § 1367(d).

III. CONCLUSION

Because the facts alleged in the complaint establish that Phillips has not suffered antitrust injury and no antitrust violation occurred, the federal and state antitrust claims must be dismissed on the merits. I decline supplemental jurisdiction over the remaining state law claims.

THEREFORE, IT IS ORDERED that the defendants' motion to dismiss is granted.

IT IS ORDERED that the federal and state antitrust claims are dismissed with prejudice pursuant to Fed. R. Civ. P. 12(b)(6) for failure to state a claim.

FURTHER, IT IS ORDERED that the remaining state law claims are dismissed without prejudice pursuant to 28 U.S.C. § 1367(c).

[*1052] The clerk of court is directed to enter judgment accordingly.

Dated this 2nd day of January, 2003.

William C. Griesbach

United States District Judge

Decision by Court. This action came before the Court for consideration.

IT IS HEREBY ORDERED AND ADJUDGED that defendants' motion **[**25]** to dismiss is GRANTED;

IT IS FURTHER ORDERED that the federal and state antitrust claims are dismissed with prejudice pursuant to Fed. R. Civ. P. 12(b)(6) for failure to state a claim;

IT IS FURTHER ORDERED that the remaining state law claims are dismissed without prejudice pursuant to 28 U.S.C. § 1367(c);

IT IS FURTHER ORDERED that this action is dismissed.

WILLIAM C. GRIESBACH

United States District Judge

Dated this 3rd day of January 2003, at Milwaukee, Wisconsin.

Daniel v. Am. Bd. of Emergency Med.

United States District Court for the Western District of New York

January 3, 2003, Decided ; January 3, 2003, Filed

90-CV-1086A(F)

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN1[] Preclusion of Judgments, Law of the Case

Under the law of the case doctrine, courts generally refrain from reconsidering matters previously determined absent "cogent" or "compelling" reasons. The doctrine is discretionary, however, and does not constitute a limitation on the court's power.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN2[] Private Actions, Standing

In an antitrust action, a court first, must assess standing to sue based on the standing of the named plaintiffs and not upon the standing of identified class members. Standing is to be determined on the basis of the pleadings and all material allegations of the complaint must be accepted as true and construed in favor of the complaining party. In applying the threshold requirement of antitrust standing, a court may consider other relevant information in the record.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

Healthcare Law > Business Administration & Organization > Hospital Privileges > General Overview

HN3[] Justiciability, Standing

It is now well settled in order to have standing to prosecute private antitrust claims, plaintiffs must show more than that the defendants' conduct caused them injury. Rather, antitrust plaintiffs must plead and prove that the injury they have suffered derives from some anticompetitive conduct and is the type the antitrust laws were intended to prevent.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN4[] Clayton Act, Claims

A § 4 of the Clayton Act plaintiff must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be the type of loss that the claimed violations would be likely to cause.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN5[] Robinson-Patman Act, Claims

A Robinson-Patman Act plaintiff is not excused from its burden of proving an antitrust injury.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

HN6[] Remedies, Damages

The antitrust standing requirement for private actions brought under §§ 4 or 16 of the Clayton Act seeks to avoid over deterrence resulting from the use of the somewhat draconian treble damage award, available for Sherman Act violations. By restricting the availability of private antitrust actions to certain parties, courts ensure that suits in apposite to the goals of the antitrust laws are not litigated and that persons operating in the market do not restrict procompetitive behavior because of a fear of antitrust liability.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN7[] Clayton Act, Claims

The requirement of antitrust injury and standing, as a prerequisite to suit under §§ 4 and 16 of the Clayton Act, has been extended to plaintiffs who as competitors in the market seek a professional credential that will enable them to charge higher prices for their services in that market, and a request for such relief in a federal antitrust complaint negates the existence of an antitrust injury and standing requiring dismissal of the complaint.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN8[] **Horizontal Refusals to Deal, Boycotts**

To be actionable under the antitrust laws, boycotts or concerted refusals to deal generally involve joint efforts by a firm or firms to disadvantage competitors by either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle.

Governments > Courts > Judicial Precedent

HN9[] **Courts, Judicial Precedent**

Courts of the Second Circuit are compelled to follow approaches adumbrated by the United States Supreme Court without concern whether the results are consistent with language in earlier Second Circuit cases.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN10[] **Private Actions, Standing**

The requirement for standing that an antitrust plaintiff, or group of plaintiffs, sufficiently allege an antitrust injury does not depend on an allegation that the target conduct operates to reduce competition. Rather, the requirement of an antitrust injury turns not on the illegality of the defendant's conduct -- indeed, such illegality is presupposed -- but on the fact that a plaintiff seeks to engage in or benefit from the same activity.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN11[] **Clayton Act, Claims**

For standing to sue under §§ 4 or 6 of the Clayton Act, the United States Supreme Court requires that, in addition to meeting the threshold requirement of having alleged an antitrust injury, a plaintiff also must be an efficient enforcer of antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN12[] **Standing, Clayton Act**

The United States Supreme Court requires consideration of several factors to determine whether a plaintiff in a federal antitrust action can be an efficient enforcer of such laws: the (1) nature of a plaintiff's injury, whether as a consumer or competitor; (2) directness or speculative nature of the relationship between the alleged antitrust violation and plaintiff's alleged injury; (3) potential for duplicative recovery or complex apportionment damages; and (4) existence of a more direct victim of the alleged antitrust violation. Additionally, some, but not all, of the above factors are relevant to deciding whether a plaintiff has standing to seek injunctive relief pursuant to § 16 of the Clayton Act.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN13[] **Class Actions, Certification of Classes**

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN14[] **Class Actions, Prerequisites for Class Action**

See *Fed. R. Civ. P. 23(b)(2)* and *(3)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Notice of Class Action

Civil Procedure > ... > Notice of Class Action > Content of Notice > Opt Out Provisions

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN15[] **Class Actions, Certification of Classes**

In determining the required elements of class action superiority, relevant to a proposed certification pursuant to *Fed. R. Civ. P. 23(b)(3)*, a court shall consider (A) the interest of members of the class in individually controlling the prosecution of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forums; (D) the difficulties likely to be encountered in the management of a class action. A class or subclass may be certified as to particular issues. *Fed. R. Civ. P. 23(c)(4)*. *Rule 23* also requires that adequate notice be provided to the class members and in the case of certification pursuant to *Rule 23(b)(3)*, an opportunity to request an "opt out" exclusion from the class. *Fed. R. Civ. P. 23(c)(2)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN16[] **Class Actions, Certification of Classes**

Well established principles applicable to requests for *Fed. R. Civ. P. 23* class certification guide a court's determination. First, the decision to grant certification is discretionary with the court. If the court finds both the requirements of *Rule 23(a)* have been met, and that the claims fall within the scope of *Rule 23(b)(3)*, the court may, in its discretion, certify the class. Whether plaintiffs have stated a cause of action or will ultimately prevail on the merits at trial is irrelevant; the threshold question is whether the requirements of *Rule 23* are met. However, in assessing a request for class certification the court may also consider the evidentiary record including any affidavits and results of discovery. Plaintiffs seeking class status bear the burden that each requirement under *Rule 23* has been satisfied. Class actions are favored in the litigation of antitrust claims. Questions regarding class certification should be resolved in favor of and not against the maintenance of class action.

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > Antitrust Regulations

Mergers & Acquisitions Law > Antitrust > General Overview

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Class Members > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN17[] **Federal Regulations, Antitrust Regulations**

In antitrust cases, the required degree of commonality of issues is generally satisfied by pleading an antitrust conspiracy among defendants. The very nature of the case -- involving allegations of antitrust conspiracy among defendants -- appears to insure that the commonality requirement is satisfied. The claims of those requesting class certification are deemed typical of those of the class where the claims of the representative plaintiffs arise from the same course of conduct that gives rise to the claims of the other class members, where the claims are based on the same legal theory and where the class members have allegedly been injured by the same course of conduct as which allegedly injured the proposed representatives. Identicality of situations between the named representatives and the class members is not required. Typicality refers to the nature of the claim of the class representatives and not to the specific facts from which the claim arose or relief is sought. The commonality and typicality requirements tend to merge because both serve as guideposts for determining whether the named plaintiff's claim and class claims are so inter-related that the interests of the class members will be fairly and adequately protected in their absence.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN18[] **Prerequisites for Class Action, Predominance**

In judging whether alleged common issues predominate over individual issues, *Fed. R. Civ. P. 23(b)(3)* does not require that every issue in the case be similar to every other issue presented by each class member's case. In determining whether common questions predominate, the court's inquiry is directed primarily to classwide questions of liability.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Immigration Law > Admission of Immigrants & Nonimmigrants > Visa Eligibility & Issuance > Issuance of Visas

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN19[] **Prerequisites for Class Action, Predominance**

The *Fed. R. Civ. P. 23(b)(3)* predominance requirement tests whether a proposed class is sufficiently cohesive to warrant adjudication by representation. In order to meet the predominance requirement of *Rule 23(b)(3)*, a plaintiff must establish that the issues in the class action that are subject to generalized proof, and thus applicable to the class as a whole, predominate over those issues that are subject to individualized proof.

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Civil Procedure > ... > Class Actions > Class Members > General Overview

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN20[] **Regulated Industries, Sports**

That the damages suffered by class members in antitrust actions may vary does not in itself require a disqualification for class action status. Moreover even if it could be shown that some individual class members were not injured, class certification, nevertheless, is appropriate where the antitrust violation has caused widespread injury to the class.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN21[] **Private Actions, Remedies**

An antitrust plaintiff's intention to establish the fact of antitrust injury on a classwide basis, in contrast to a specific plaintiff's damages, favors class certification. Further, antitrust plaintiffs seeking class action status may also satisfy their burden of showing that a common impact upon class members caused by an alleged conspiracy can be proven on a classwide basis through the use of economic expert testimony and statistical analysis.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN22[] **Private Actions, Remedies**

In evaluating proffered expert opinion and results of statistical analysis on the question of classwide impact and damages, courts should determine whether the plaintiff's expert's proposed econometric methodologies have a reasonable probability of establishing at trial plaintiffs' claims by common proof. Where defendants offer opposing statistical expert opinion, in considering class certification, courts should avoid statistical dueling; rather, their inquiry is limited to determining whether the proposed methodology was sufficiently reliable and not "fatally flawed" rendering it inadmissible at trial.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN23[] **Prerequisites for Class Action, Adequacy of Representation**

Proposed class representatives will be deemed adequate for purposes of *Fed. R. Civ. P. 23(a)* unless the representatives are found to have "palpable" conflicts with the class members which outweigh the substantial interest of every class member in proceeding with the litigation.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN24[] **Class Actions, Certification of Classes**

To qualify for *Fed. R. Civ. P. 23* certification the proposed class must be objectively defined and capable of reasonable ascertainment.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN25[] **Remedies, Damages**

The fact that an antitrust plaintiff may have incurred even greater damages from other effects of the conspiracy that were conceivably avoidable does not exempt the charged conspiracy from antitrust liability.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN26[] **Private Actions, Remedies**

Use of multiple variable regression analysis to prove antitrust impact on a classwide basis has been accepted by the courts as justifying class certification.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN27[] **Private Actions, Remedies**

Multiple regression analysis is a statistical tool used to determine the influence that various independent, predetermined factors (so-called "independent variables") have on an observed phenomenon (the so-called "dependent variable"). The first step in such a regression analysis is to specify all of the possible legitimate factors not prohibited by law that are likely to significantly affect the dependent variable and which could account for the alleged disparities in plaintiffs' income.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN28[] **Private Actions, Remedies**

It is sufficient for class certification that the proposed regression analysis be reasonably capable of providing evidence from which the causation element of the plaintiffs' case be inferrable on a classwide basis.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN29[] **Private Actions, Remedies**

In the context of class certification, a regression analysis can be used to determine whether incorporating additional information (e.g., years of experience) results in more reliable individual damage estimates.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Immigration Law > Admission of Immigrants & Nonimmigrants > Visa Eligibility & Issuance > Visa Application Denials

HN30[] **Class Actions, Prerequisites for Class Action**

So long as the party seeking class certification has provided a "colorable method" for proving classwide injury, courts should not deny certification on the basis that such method may ultimately be unpersuasive at trial.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN31[] **Class Actions, Certification of Classes**

Any determination that an essential element of plaintiffs' claims is incapable of proof, whether through use of the results of a multi-variable regression analysis or other data and expert opinion, must be interposed and resolved by summary judgment or at trial.

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN32[] **Regulated Industries, Sports**

At the class certification stage, plaintiffs need only demonstrate the existence of a reasonable basis on which damages can be determined at trial. In an antitrust case, the trier of fact will use a just and reasonable estimate based on relevant data including both probable and inferential as well as direct and positive proof. Employing relevant data to be collected from the class during merit based discovery, plaintiffs' proposed regression analysis is expected to be capable of reasonably estimating the damages suffered by individual class members irrespective of particular circumstances.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

HN33[] **Private Actions, Remedies**

Although individual circumstances necessarily exist among the members of the plaintiff class, a reasonable approximation of damages is achievable through a common formula. Indeed, the presence of individual damages issues cannot, in itself, defeat class certification particularly in antitrust actions. Even if it develops that each class member's damages must be separately determined, class certification would still be appropriate.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN34[] **Class Actions, Prerequisites for Class Action**

The proposition that the existence of individual defenses defeats class certification has been rejected by other courts, and is not the law in the Second Circuit.

Civil Procedure > ... > Class Actions > Class Members > Named Members

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Civil Procedure > ... > Class Actions > Class Members > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN35[] **Class Members, Named Members**

Fed. R. Civ. P. 23(a)'s typicality requirement is met where the claims of the representative plaintiffs arise from the source of conduct that gives rise to the claims of the other class members, where the claims are based on the same legal theory, and where class members have allegedly been injured by the same course of conduct as that which allegedly injured the proposed representatives.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN36[] Prerequisites for Class Action, Superiority

Fed. R. Civ. P. 23(b)(3) requires that class treatment is superior to other available methods for the fair and efficient adjudication of the controversy.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN37[] Prerequisites for Class Action, Numerosity

In the context of class certification, there is no general rule which requires a trial plan as an essential element of the superiority requirement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN38[] Class Actions, Prerequisites for Class Action

Once a district court has found an action maintainable under any single category of *Fed. R. Civ. P. 23(b)*, there is no necessity of showing that it may also be brought under any other. Further, if certification is granted pursuant to both *Rule 23(b)(3)* and *(b)(2)* major procedural problems can arise where different procedural consequences can attach depending on the subsection used.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Notice of Class Action > Content of Notice > Opt Out Provisions

HN39[] Class Actions, Prerequisites for Class Action

Where substantial damages are a potential outcome, the primary concern about certifying a class with significant damages under *Fed. R. Civ. P. 23(b)(2)* is the absence of mandatory notice and opt-out rights.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > Remedies > Damages > Monetary Damages

HN40[] Class Actions, Certification of Classes

Class certification under *Fed. R. Civ. P. 23(b)(2)* is unavailable where the relief requested relates predominantly to money damages. For purposes of *Rule 23(b)(2)*, a claim for money damages is said to predominate unless it is found to be incidental, i.e., damages which automatically "flow to the class" once liability is established based on objective standards rather than requiring additional hearings or the need to determine any new or significant legal or fact issues.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN41[] **Class Actions, Prerequisites for Class Action**

In the context of class certification, damages are to be assessed by on individual characteristics of a plaintiff.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN42[] **Private Actions, Remedies**

There are cases where the mere request for treble damages in an antitrust action was held to place the action outside the parameters of class certification under *Fed. R. Civ. P. 23(b)(2)*.

Judges: LESLIE G. FOSCHIO, UNITED STATES MAGISTRATE JUDGE.

Opinion by: LESLIE G. FOSCHIO

Opinion

[*164] AMENDED REPORT and RECOMMENDATION

JURISDICTION

This matter was referred, pursuant to *28 U.S.C. § 636(b)(1)(A)& (B)*, to the undersigned **[*165]** on April 24, 1991 by **[**2]** Hon. Richard J. Arcara for all pretrial matters. The matter is presently before the court on Plaintiffs' motion for class certification, filed February 24, 1994 (Doc. No. 69) ("Plaintiffs' Motion"), and Defendants' cross motion to dismiss the Second Amended Complaint, pursuant to *Fed.R.Civ.P. 16(b)(1)* filed May 4, 2000 (Doc. No. 773) ("Defendants' Cross Motion").

BACKGROUND

In their Second Amended Complaint, brought pursuant to Sections 4 and 16 of the Clayton Act, *15 U.S.C. § 15* ("Section 4"), *15 U.S.C. § 26* ("Section 16"), Plaintiffs alleged violations of Sections 1 and 2 of the Sherman Act, *15 U.S.C. §§ 1, 2*, and sought monetary damages and injunctive relief. Prior proceedings in this action include *Daniel v. American Board of Emergency Medicine, et al, 802 F. Supp. 912 (W.D.N.Y. 1992)* (*"Daniel I"*) (sustaining Amended Complaint against motion to dismiss); *Daniel v. American Board of Emergency Medicine, et al., 988 F. Supp. 112 (W.D.N.Y. 1997)* (*"Daniel II"*); and, *Daniel v. American Board of Emergency Medicine, et al., 988 F. Supp. 127 (W.D.N.Y. 1997)* **[**3]** (*"Daniel III"*). Discovery on the merits of Plaintiffs' claims has been stayed pending resolution of the numerous motions filed by Defendants attacking the Second Amended Complaint and Defendants' opposition to Plaintiffs' instant motion for class certification.

In a Report and Recommendation filed on January 16, 1996 (Doc. No. 435), the undersigned recommended dismissal of ten Defendants, including Tri-City Medical Center, University of California Medical Centers at Los Angeles, Irvine and San Diego, University of Massachusetts Medical Center, University Hospital of University of New Mexico School of Medicine, Oregon Health Services University Hospital, Ohio State University Hospital, University Hospital at State University of New York at Stony Brook, and Lincoln Medical and Mental Health Center, on grounds of *11th Amendment* immunity, state action immunity, Local Government Antitrust Act immunity, and personal jurisdiction. District Judge Richard J. Arcara adopted the Report and Recommendation in an Order filed on November 19, 1997 (Doc. No. 580). *Daniel III.* Based on later filed motions seeking dismissal upon *11th Amendment* and state action immunity grounds, the undersigned **[**4]** recommended dismissing four additional Defendants. Report and Recommendation filed January 20, 2000 (Doc. No. 751) (recommending dismissal of Defendants Kettering Medical Center, Children's Hospital-San Diego, and University Medical Center Corporation (Tucson, Arizona)) and Report and Recommendation filed September 27, 2001 (Doc. No. 830) (recommending dismissal of Defendant Riverside Medical Center, but recommending against dismissal of Defendant Our Lady of Mercy Medical Center). In a Report and Recommendation filed on February 12, 1999 (Doc. No. 642), the undersigned recommended that final judgment, pursuant to *Fed.R.Civ.P. 54(b)*, be entered as to Defendants Tri-City Medical Center, University of California Medical Centers at Los Angeles, Irvine and San Diego, University of Massachusetts Medical Center, University Hospital of University of New Mexico School of Medicine, Oregon Health Services University Hospital, Ohio State University Hospital, University Hospital at State University of New York at Stony Brook, and Lincoln Medical and Mental Health Center.

Judge Arcara adopted the Reports and Recommendations by Orders filed August 21, 2002. Doc. No. 846 (adopting Report and Recommendation **[**5]** filed February 12, 1999 (as amended by Order filed October 9, 2002 (Doc. No. 862))), Doc. No. 847 **[*166]** (adopting Report and Recommendation filed September 27, 2001), and Doc. No. 848 (adopting Report and Recommendation filed January 20, 2000). Final judgments dismissing all the above Defendants were filed on August 23, 2002 and on October 10, 2002. Doc. Nos. 849, 850, 851 and 863. [1] Plaintiffs have appealed such dismissals on September 19 and November 5, 2002; Tri-City Medical Center cross appealed on October 2, 2002. (Doc. Nos. 868 and 857, respectively). Two of the original Defendants have settled the claims against them including Porter Memorial Hospital (Stipulation and Order filed September 21, 1994 (Doc. No. 313)), and Medical College of Pennsylvania and Hospital (Order filed May 29, 2001 (Doc. No. 822)). The court is also informed that three previously dismissed Defendants, Oregon Health Sciences University, Children's Hospital - San Diego, and University Medical Center - Tucson, settled in principle with Plaintiffs. Doc. No. 870.

---

[1] By letter dated November 8, 2002 (Doc. # 870), the court was advised that Hospital Defendants, Children's Hospital of Michigan, Detroit Receiving Hospital and University Health Center, The Johns Hopkins Health System, Loma Linda University Medical Center and St. Anthony Hospital - Central are presently represented by LeBoeuf, Lamb, Greene & MacRae ("LeBoeuf, Lamb"), Jonathan A. Damon, of counsel; and that LeBoef, Lamb also represents University of California Medical Centers at Los Angeles, Irvine, and San Diego, University of Massachusetts Medical Center, University Hospital at the University of New Mexico School of Medicine, Oregon Health Sciences University Hospital, Children's Hospital - San Diego and University Medical Center (Tuscon, Arizona).

[6]** Plaintiffs' Memorandum of Law in Support of the motion for class certification was filed on February 24, 1994 (Doc. No. 70). At Defendants' request, limited discovery was permitted, by order dated October 28, 1998, directed to Plaintiffs' Motion (Doc. No. 630). Plaintiffs' Revised Memorandum of Law in Support of Class Certification was filed on March 6, 2000 ("Plaintiffs' Revised Memorandum") (Doc. No. 761) together with a Declaration of Jeremy R. Kasha, Esq. in Support of Plaintiffs' Motion for Class Certification dated March 4, 2000 (Doc. No. 762) with attached exhibits. Defendants' Memorandum of Law in Opposition to Plaintiffs' Motion for Class Certification and in Support of Defendants' Cross Motion to Dismiss for Lack of Standing along with Declaration of Jeffrey D. Ubersax, Esq. ("Ubersax Declaration") (Doc. No. 775) with attached exhibits was filed May 4, 2000 ("Defendants' Memorandum") (Doc. No. 774). Plaintiffs' Reply Memorandum of Law in Support of Plaintiffs' Motion for Class Certification and in Opposition to Defendants' Cross Motion to Dismiss was filed July 17, 2000("Plaintiffs' Reply Memorandum") (Doc. No. 797). Defendants' Surreply Memorandum in Support of Defendants' **[**7]** Cross Motion to Dismiss (Doc. No. 811) and Defendants' Surreply Memorandum in Opposition to Plaintiffs' Motion for Class Certification (Doc. No. 812) were filed on July 31, 2000 ("Defendants' Surreply Re: Standing") and ("Defendants' Surreply Re: Class Certification"), respectively. By letter dated October 24, 2001, Plaintiffs provided additional authority in support of their class certification motion (Doc. No. 864); Defendants responded by letter dated October 29, 2001 (Doc. No. 865). Oral argument was conducted on November 8, 2002. [2]

[*167] Based on the following, Defendants' cross motion to dismiss should be GRANTED; alternatively, Plaintiffs' motion for class **[**8]** certification pursuant to *Rule 23(b)(3)* should be GRANTED; alternatively, Plaintiffs' motion for certification pursuant to *Rule 23(b)(2)* should be DENIED.

FACTS

[3]

Plaintiffs originally included 176 physicians who claimed to be eligible based upon prior experience in the practice of emergency medicine, to take Defendant American Board of Emergency Medicine's (ABEM) certification examination, [4] Second Amended Complaint, Exhibit A. Specifically, prior to June 30, 1988, ABEM permitted physicians to sit for its certification examination, consisting of both written and oral components, based upon completion either of an approved residency in emergency medicine or of 7,000 hours and 60 months of emergency room medical practice, with 2,800 hours accumulated within 24 consecutive months, and an accumulation of 50 hours of continuing medical education in emergency medicine deemed acceptable to ABEM for each **[**9]** complete year in practice after 1973 ("the practice track"). Second Amended Complaint P P 6, 7, 50. Upon passing both components of the ABEM examination, physicians are granted ABEM Diplomate status. *Id.* P 3. After June 30, 1988, in order to qualify to sit for the ABEM examination, a physician who wished to obtain ABEM certification was required to successfully complete an approved residency training program in emergency medicine. Second Amended Complaint P P 6, 7, 50. However, special practice track eligibility for the ABEM examination remained available until 1995 to physicians certified by the American Board of Internal Medicine ("ABIM") and who also served in significant academic positions. Second Amended Complaint PP 11, 71-73. Plaintiffs claim they represent a class of 14,000 physicians who but for the closure of the practice track would have applied to take the ABEM certification examination. *Id.* P P 23-24, 44(a). [5]

[10]** In addition to ABEM, Defendants include two members of ABEM's board of directors, Henry A. Thiede, M.D. and Frank A. Disney, M.D., 28 hospitals which are alleged to offer residency programs in emergency medicine

---

[2] Both sides handed up supplemental authorities following oral argument, the court has reviewed such authorities, however, because of their bulk, the submissions were not filed. Plaintiffs and Defendants submitted additional arguments and authorities by letters dated November 12th, 13th, 18th and 21st, 2002 (Doc. Nos. 871, 872, 873, and 874, respectively).

[3] Taken from the pleadings and papers filed in connection with the instant motion and cross motion.

[4] As a result of prior motions to dismiss and withdraw, the number of Plaintiffs has been reduced to 154.

[5] At oral argument, Plaintiffs stated the present number was now closer to 10,000.

("Hospital Defendant(s)"), Second Amended Complaint P P 4, 30, 31, 34, Exhibit B, [6] and the Council of Emergency Residency Directors ("CORD"), an association of directors of residency programs in emergency medicine. Second Amended Complaint P P 32-33. It is alleged that ABEM, CORD, and the Hospital Defendants conspired unlawfully **[*168]** to close, and keep closed, ABEM's practice track as a basis for eligibility to gain ABEM certification. *Id.* P 34. Plaintiffs also assert that several professional organizations in the field of medicine, not named as defendants in the action, including the American College of Emergency Physicians, Society for Academic Emergency Medicine, ABIM, as sponsoring organizations of ABEM, are also co-conspirators. *Id.* P 38. Plaintiffs further charge that other unidentified hospitals offering residency training programs in emergency medicine are part of the alleged conspiracy as well as the executive director of ABEM, 40 of its former officers and directors, **[**11]** and 17 physicians who served as directors of their respective emergency medicine residency programs. *Id.* P P 34, 41-43; Exhibits C, D.

Plaintiffs claim Defendants conspired, among themselves and with the other organizations and persons not named as defendants, to restrain trade **[**12]** in and monopolize the national market for emergency medicine physicians certified by ABEM ("ABEM physicians") and physicians who have qualified for the ABEM certification examination pursuant to the ABEM medical residency program requirement ("ABEM eligible physicians"), as offered by Hospital Defendants, the only means (except of the special practice qualification track for certain ABIM physicians) by which a physician can qualify to take the ABEM examination following closure of the practice track in 1988. Second Amended Complaint P P 3-4, 51, 91-92. [7] For residency track applicants who began their residency training prior to July 1, 1997, ABEM required successful completion of 36 months of post-medical school training with 24 months controlled by an accredited emergency medicine training program; thereafter, 36 months of approved residency study was required. *Id.* P 51. Plaintiffs allege Defendants have, through the conspiracy to close the practice track and keep it closed, artificially reduced the availability of ABEM physicians and ABEM eligible physicians in the national market for such services with a resulting noncompetitively created increase in the remuneration paid to **[**13]** such physicians. *Id.* P P 94-95. During the 12 year period of availability of the practice track, 8,000 physicians obtained ABEM Diplomate status of which 7,000 qualified through the practice track. Second Amended Complaint P 7.

As a consequence Defendants' actions in relation to the practice track's closure, Plaintiffs claim that Defendants' restraint of trade, monopolization, and attempted monopolization of the market for ABEM physicians and ABEM eligible physicians caused Plaintiffs to "receive substantially less remuneration than ABEM certified physicians (in an average amount of less than $ 50,000 annually). **[**14]** " *Id.* P 104. Plaintiffs also allege the loss of "increases in remuneration for which they would otherwise be qualified." *Id.* P 109. Additionally, Plaintiffs claim several other forms of damage including numerous disadvantages and impediments to their professional advancement, *e.g.,* loss of the chance for increased professional prestige, research opportunities supported by financial grants from various funding sources, greater professional mobility, and academic appointments in the field of emergency medical practice. *Id.* P P 13, 88(a), (e), (g), (k).

[*169] Plaintiffs further assert that Defendants' closure of the ABEM practice track not only reduces competition in the market for the services of ABEM physicians and ABEM eligible physicians, but also misleads the public into a belief that emergency physicians who are not ABEM certified are less capable than ABEM physicians or ABEM

---

[6] As noted, 14 Hospital Defendants have been dismissed based on various immunity and personal jurisdiction grounds, and two Hospital Defendants were dismissed following settlements with Plaintiffs. Thus, 12 Hospital Defendants, all private organizations, remain in the action, including Forsyth Medical Center, Children's Hospital of Michigan, Detroit Receiving Hospital and University Health Center, the Johns Hopkins Hospital, Part of the Johns Hopkins Health System, Loma Linda University Medical Center, Lutheran General Hospital, Mercy Catholic Medical Center - Misericordia Division, Mercy Hospital and Medical Center, Methodist Hospital of Indiana, Our Lady of Mercy Medical Center, Saint Francis Medical Center and St. Anthony Hospital.

[7] Following commencement of this action, the Board of Certification of Emergency Medicine ("BCEM") was established which permitted physicians to become certified with an emergency medicine residency qualification or, until 1997, based on 10,000 hours of experience in emergency medicine practice over at least six years. Defendants' Memorandum at 19. As of May 2000, 60 Plaintiffs have become BCEM certified.

eligible physicians. Second Amended Complaint P 16. Plaintiffs contend that Hospital Defendants obtained benefits from the conspiracy through the increased availability of resident emergency medicine physicians to staff their respective emergency room programs at a relatively lower cost. *Id.* P **[**15]** 14. Additionally, Hospital Defendants are alleged to benefit from the conspiracy through increased residency enrollments, greater federal funding and larger Medicare and Medicaid reimbursement rates, more research grants, and higher donations and greater opportunities for endowed teaching chairs. *Id.* P 90.

Plaintiffs state the putative class to be certified, pursuant to *Rule 23 of the Federal Rules of Civil Procedure*, include physicians who, in addition to the Plaintiffs, are physicians presently, or through passage of time could have, qualified for the ABEM certification examination under the practice track. Second Amended Complaint P 44(a). Plaintiffs further allege that their claims are typical of those to be asserted by the class and that common questions of fact and law predominate over individual issues including the existence and effect upon Plaintiffs and the proposed class of the alleged conspiracy and anticompetitive conduct by Defendants and the other described coconspirators. *Id.* P 44(d).

Plaintiffs further allege that a class action is suitable and superior to other forms of adjudication in this case because the numerosity of the class renders joinder of individual **[**16]** plaintiffs impracticable. Second Amended Complaint P 44(e). Plaintiffs also allege that identification of class members can be made based on readily available information and that the class size does not present unusual problems of judicial management or notice. *Id.* Additionally, Plaintiffs assert that because Defendants have refused to act to reopen the practice track as requested by Plaintiffs on grounds applicable to all class members, injunctive relief is proper against Defendants together with an award of damages. *Id.* P 44(f).

DISCUSSION

I. Summary of Arguments on the Respective Motions.

A. Plaintiffs' Contentions in Support of Plaintiffs' Motion for Class Certification.

Each of the 176 originally named Plaintiffs in this action is alleged to be a duly licensed physician who has practiced or is practicing emergency medicine in the United States but none of whom has completed or is attending a residency program in emergency medicine. Plaintiffs' Revised Memorandum of Law at 5. Plaintiffs claim that entry into and completion of a residency program in emergency medicine as the sole available means to qualify for the ABEM examination is burdensome **[**17]** and impractical. Plaintiffs' Reply Memorandum at 41. Each Plaintiff is alleged to have met the prior ABEM practice track requirements or is currently practicing emergency medicine so that each Plaintiff will, with the passage of time, meet the prior existing practice track requirements. *Id.* Plaintiffs, as of 1994 when the Second Amended Complaint was filed, estimated that approximately 14,000 emergency physicians were then, or would become in the future, eligible to take the ABEM certification **[*170]** examination but for Defendants' allegedly unlawful closure of the practice track qualification criteria. *Id.* at 5. As noted, Plaintiffs believe that figure is now approximately 10,000. Plaintiffs contend that the facts of this case satisfy the criteria for certification of a class as required by *Fed.R.Civ.P. 23(b)(3)*. Plaintiffs' Revised Memorandum at 25. Alternatively, Plaintiffs request certification pursuant to *Fed.R.Civ.P. 23(b)(2)*. *Id.* at 34.

B. Defendants' Contentions in Opposition to Plaintiffs' Motion for Class Certification and in Support of Defendants' Cross Motion to Dismiss.

Defendants argue that although the proposed class is admittedly numerous in nature, the representative **[**18]** Plaintiffs do not present claims typical of the class and that, because of differences in the reasons for the Plaintiffs' inability to achieve ABEM eligibility under the former practice track, together with great variations in the potential damages incurred by class members, including representative Plaintiffs, alleged to result from the practice track closure, common issues of law or fact do not exist, or do not predominate over individual issues particularly in relationship to the elements of causality and damages. Defendants' Memorandum at 4. Finally, Defendants assert that a class action is not superior to other methods for resolving the merits of the instant action. *Id.*

On their cross motion to dismiss, Defendants contend, based on the allegations contained in the Second Amended Complaint as well as evidence developed in connection with Defendants' opposition to Plaintiffs' motion for class certification, that Plaintiffs lack antitrust standing requiring dismissal of the action. Defendants' Memorandum at 6. Specifically, Defendants argue that because Plaintiffs seek to reopen the practice track and obtain ABEM certification to obtain higher levels of compensation expected **[**19]** to result from gaining the ABEM certification which Plaintiffs ultimately seek, Plaintiffs fail to allege an antitrust injury, a prerequisite to a private federal antitrust action under *Sections 4and 16* of the Clayton Act. *Id.* Additionally, Defendants argue Plaintiffs lack antitrust standing because they are not "efficient enforcers" of the antitrust laws. *Id.* While Plaintiffs' motion for class certification preceded by several years Defendants' cross motion to dismiss, as standing "is essential to a [district] court's ability to entertain any claim," the analysis of the standing question raised by Defendants' cross motion "precedes any determination under *Fed.R.Civ.P. 23*." *Kent-Chojnicki v. Runyon, 180 F.R.D. 237, 240 (W.D.N.Y. 1998)* (citing cases). Accordingly, the court will first address Defendants' cross motion.

II. Defendants' Cross Motion to Dismiss for Lack of Antitrust Standing.

At the outset, Plaintiffs contend that Defendants' cross motion should be rejected as this court has previously sustained Plaintiffs' Second Amended Complaint against Defendants' prior motions to dismiss for failure to state a claim, Plaintiffs' Reply Memorandum **[**20]** at 5, and that as such holdings represent the law of the case, Defendants' cross motion to dismiss should be denied. *Id.*

A. Law of the Case.

HN1[] Under the law of the case doctrine, "courts generally refrain from reconsidering matters previously determined absent 'cogent' or 'compelling' reasons." *Baden v. Koch, 799 F.2d 825, 828 (2nd Cir. 1986)*. The doctrine is discretionary, however, and "does not constitute a limitation on the court's power." *United States v. Birney, 686 F.2d 102, 107 (2nd Cir. 1982)*.

[*171] A careful review of the procedural history of this case reveals that Defendants' standing argument, as a basis of dismissal, has not previously been presented to the court. In particular, in their initial motion to dismiss Plaintiffs' Amended Complaint, filed February 7, 1991, Defendants argued that the Amended Complaint was insufficient because it failed to adequately allege (i) the required degree of impact on interstate commerce flowing from Defendant ABEM's alleged unlawful practices, (ii) personal jurisdiction over defendants in that action, [8] (iii) the putative conspiracy, and (iv) a product and geographic market. Defendants' Memorandum **[**21]** of Law in Support of Motion to Dismiss Amended Complaint (Doc. No. 13) at 9-36; *Daniel I, supra, at 917-27*. In support of that motion to dismiss, Defendants contended, *inter alia,* that Dr. Daniel, then the sole plaintiff in the action, had suffered no antitrust injury based on a lack of notice of the scheduled closing of the ABEM practice track in 1988 citing in a footnote to *Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. Doc. No. 13 at 5. However, at that time, Defendants did not argue, as Defendants do on the instant cross motion, that Plaintiffs had failed to allege antitrust standing because the object of Dr. Daniel's lawsuit, as pleaded in the Amended Complaint, was to increase Dr. Daniel's income through an antitrust challenge to ABEM's closure of the practice track.

Defendants' first motion to dismiss the Second Amended Complaint was predicated **[**22]** on statute of limitations grounds and for failure to state a claim. *Daniel II at 116*. In that motion, Defendants also sought summary judgment based on immunity, lack of personal jurisdiction, and improper venue, *Daniel III at 150*; however, Defendants' challenge to the Second Amended Complaint at that time did not include assertion of the antitrust injury doctrine as a basis to find Plaintiffs lacked standing. Thus, as the specific question now raised by Defendants as a ground for dismissal on Defendants' cross motion, *i.e.,* a lack of Plaintiffs' antitrust standing, has been neither previously presented nor addressed by the court, the law of the case doctrine is inapplicable to Defendants' cross motion. Accordingly, the court turns to the merits of Defendants' cross motion.

B. Plaintiffs' Failure to Allege an Antitrust Injury.

---

[8] ABEM, Dr. Benson S. Munger, Executive Director of ABEM, and 18 officers and directors of ABEM.

HN2[] A court first, "must assess standing to sue based on the standing of the named plaintiff[s] and not upon the standing of identified class members." *Kent-Chojnicki, supra, at 240* (citing cases). Standing is to be determined on the basis of the pleadings and all material allegations of the complaint must be accepted as true and **[**23]** construed in favor of the complaining party. United States v. Vazquez, 145 F.3d 74, 81 (2nd Cir. 1998) (citing Warth v. Seldin, 422 U.S. 490, 501, 45 L. Ed. 2d 343, 95 S. Ct. 2197 (1975)). *See also* Independent Contractors of California v. California States Council of Carpenters, 459 U.S. 519, 526, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983); State of Connecticut v. Physicians Health Services, 287 F.3d 110, 114 (2nd Cir. 2002). [9] In applying the threshold **[*172]** requirement of antitrust standing, a court may consider other relevant information in the record. Antares Aircraft v. Federal Republic of Nigeria, 948 F.2d 90, 96 (2d Cir. 1991) (court may consider evidence outside pleadings on motion to dismiss for lack of standing), *vacated on other grounds, 505 U.S. 1215 (1992)*. *See* Sanjuan v. American Board of Psychiatry, and Neurology, Inc., 40 F.3d 247, 250 (7th Cir. 1994) (considering on motion to dismiss antitrust claim not only the "skimpiness" of the complaint, but also plaintiffs' failure to provide information responsive to district judge's inquiry), *cert. denied, 516 U.S. 1159, 134 L. Ed. 2d 191, 116 S. Ct. 1044 (1996).* **[**24]**

[25]** In this case, Plaintiffs allege that Defendants' "unlawful conspiracy in closing the practice track has precluded Plaintiffs and … [other purported class members] from attaining ABEM certification or ABEM eligibility and thereby competing with ABEM certified and ABEM eligible physicians." Second Amended Complaint P 8 (bracketed material added). Plaintiffs further claim that both they and "the class they represent have been injured by defendants' unlawful and anticompetitive acts … [as] among other things, plaintiffs have been denied increases in remuneration …. *Id.* P 13. Plaintiffs also charge that Defendants' unlawful conspiracy "restricted output and reduced competition in the market for ABEM certified and ABEM eligible emergency physicians to hospitals and others." *Id.* P 92. According to Plaintiffs, "the effect of [Defendants'] unlawful actions is to raise artificially the price of ABEM certified and ABEM eligible emergency physicians." *Id.* As a result, Plaintiffs assert Defendants violated Sections 1and 2 of the Sherman Act and, pursuant to Clayton Act Sections 4and 16, seek a determination that Defendants have violated the Sherman Act, trebling of any **[**26]** actual damages Plaintiffs have sustained, an injunction allowing them to take the ABEM certification examination if qualified under the ABEM practice track criteria, and attorneys fees and costs. *Id.* P P 126, 130, 135, X. Assuming the truth of Plaintiffs' allegations, Plaintiffs, who would have obtained ABEM certification but for closure of the practice track and, as suppliers of emergency medical services identical to those rendered by ABEM physicians and ABEM eligible physicians, state they are now entitled to treble the amounts of the extra compensation Plaintiffs have lost as a result of being unable to obtain ABEM certification based on eligibility for obtaining such certification under the practice track. *Id. P 135*. However, applicable antitrust caselaw requires the court find that Plaintiffs lack standing to bring this lawsuit and that it should therefore be dismissed. **HN3**[] "It is now well settled in order to have standing to prosecute private antitrust claims, plaintiffs must show more than that the defendants' conduct caused them injury." Balaklaw v. Lovell, 14 F.3d 793, 796 (2d Cir. 1994) (citations omitted) (physician who lost exclusive, service contract **[**27]** with hospital for anesthesiology service failed to establish antitrust standing). Rather, antitrust plaintiffs "must plead and prove that the injury they have suffered derives from some anticompetitive **[*173]** conduct and is the type the antitrust laws were intended to prevent." (Underlining added). Todorov v. DCH Healthcare Auth., 921 F.2d 1438 (11th Cir. 1991). *See also* Balaklaw, supra, at 796 ("Plaintiffs must prove antitrust injury, … injury of the type antitrust laws were intended to prevent ….") (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)).

---

[9] Although Defendants' cross motion is brought pursuant to Fed.R.Civ.P 12(b)(1) (lack of subject matter jurisdiction), the court finds that the motion attacks Plaintiffs' standing based on whether Plaintiffs have "a sufficient stake in a judicial controversy to obtain judicial resolution of that controversy." Siena Club v. Morton, 405 U.S. 727, 731-32, 31 L. Ed. 2d 636, 92 S. Ct. 1361 (1972). *See also* Physicians Health Services, supra, at 116-17 (distinguishing between a lack of standing based on absence of an injury in fact sufficient to create a case or controversy under Article III and other statements of the standing doctrine). Accordingly, the court treats Defendants' motion as one brought pursuant to Fed.R.Civ.P. 12(b)(6). *See* Finkelstein v. Aetna Health Plans of New York, Inc., 1997 U.S. Dist. LEXIS 10759, 1997 WL 419211, *6 (S.D.N.Y. July 25, 1997) (dismissing, upon remand for failure to permit plaintiff to replead, under Fed.R.Civ.P. 12(b)(6) amended complaint for failure to demonstrate antitrust standing), *aff'd*, ***152 F.3d 917 (2d Cir. 1998)*** (Table).

In *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., supra*, plaintiffs claimed as damages additional profits they lost because defendant had unlawfully acquired several failing bowling alleys in plaintiffs' market which, but for defendant's acquisition, would have closed for lack of profitability. *Id. at 481*. The Supreme Court found the essence of plaintiffs' claim was that they could not obtain "profits they would have realized had competition been reduced." *Id. at 488*. Because, as the **[**28]** Supreme Court stated, the "antitrust laws … were enacted for the 'protection of *competition,* not *competitors,*' *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)* … it is inimical to the purposes of these laws to award damages for the type of injury [the loss of windfall profits] claimed here." *Id.* (italics in original) (bracketed material added). In the Court's view, plaintiffs' alleged losses of such profits flowing to plaintiffs from the expected reduction of competition would have resulted from the challenged merger between defendant and the prior owners of the failing bowling alleys regardless of whether defendant was financially capable of taking predatory actions against plaintiffs or had obtained new financing on their own thereby preserving their presence on the market. *Id. at 487*. Because plaintiffs' asserted losses did not result from any antitrust misconduct by defendant, but, rather, from the prospect of continued competition from the merged bowling alleys, the Court found that plaintiffs' injury "was not of 'the type that the statute *[Section 4 of the Clayton Act*] was intended to forestall.'" *Id.* (internal citation omitted). Thus, **[**29]** the Court stated that ***HN4***[] a *Section 4* plaintiff

> must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be "the type of loss that the claimed violations … would be likely to cause." *Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 125, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*.

Brunswick Corp., supra, at 489.

Because in *Brunswick* plaintiffs could not establish that their asserted injury and damage -- loss of extra profits based on reduced competition -- was of the type antitrust laws were intended to protect or that such losses flowed from business actions rendered illegal by operation of the antitrust laws, plaintiffs' damage claim was held not cognizable under *Section 4*. *429 U.S. at 488*. As the Court stated: "While respondents' loss occurred 'by reason of' the unlawful acquisitions, it did not occur 'by reason of' that [predatory action against plaintiffs] which made the acquisition **[**30]** unlawful." *Id. at 488* (bracketed material added). Thus, because plaintiffs sought to recoup profits lost through increased, albeit unwanted competition to plaintiff, the Court found the injury one not proper for redress under the antitrust laws. The requirement that to have standing, an antitrust plaintiff should have incurred an antitrust injury was later extended **[*174]** to nonmerger cases. *See J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)* (for any antitrust violations "a plaintiff must make some showing of an actual injury attributable to something the antitrust laws were designed to prevent.") In *J. Truett Payne Co., supra*, the Court held ***HN5***[] a Robinson-Patman Act plaintiff was "not excused from its burden of proving an antitrust injury." *451 U.S. at 568*.

In *Matsushita Electric Ind. Co. v. Zenith Radio, 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*, the Supreme Court found that plaintiffs' claim for damages based on an alleged conspiracy to charge higher than competitive prices was barred under the *Sherman Act* because, as defendants' **[**31]** competitors, plaintiffs "[stood] to gain from any conspiracy to raise the market price [for the relevant product]." *Matsushita, supra at 583*, (citing *Brunswick, supra*) (bracketed material added). Nor, as the Court stated, can a competitor sue "to recover for a conspiracy to impose nonprice restraints that have the effect of either raising market price or limiting output … [because] such restrictions, though harmful to competition, actually *benefit* competitors by making supra competitive pricing more attractive [to such competitors]." *Id.* (italics in original) (bracketed material added). Because in *Matsushita* plaintiffs, as defendants' competitors in the U.S. market and as potential competitors of defendants in defendants' Japanese market, sought to challenge, in the Court's view, conduct beneficial to them as competitors, the Court found plaintiffs had no "cognizable claim against [defendants] for antitrust damages." *Id.* Thus, the Court held that as defendants' competitors seeking damages pursuant to *Clayton Act Section 4*, plaintiffs could not challenge under the antitrust laws noncompetitive arrangements that benefitted **[**32]** them as competitors. The requirement that an antitrust plaintiff allege it suffered a cognizable antitrust injury caused by a defendant as prerequisite to a request for injunctive relief pursuant to *Section 16 of the Clayton Act* was established in *Cargill, Inc. v. Monfort of Colorado, 479 U.S. 104, 113, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*.

HN6[] The antitrust standing requirement for private actions brought under *Sections 4or 16* of the Clayton Act seeks to "avoid over deterrence resulting from the use of the somewhat draconian treble damage award," available for *Sherman Act* violations. *Todorov, supra, at 1449*. "By restricting the availability of private antitrust actions to certain parties, we ensure that suits in apposite to the goals of the antitrust laws are not litigated and that persons operating in the market do not restrict procompetitive behavior because of a fear of antitrust liability." *Id.*

HN7[] The requirement of antitrust injury and standing, as a prerequisite to suit under *Section 4and 16* of the Clayton Act, has been extended to plaintiffs who as competitors in the market seek a professional credential that will enable them to charge **[**33]** higher prices for their services in that market, and a request for such relief in a federal antitrust complaint negates the existence of an antitrust injury and standing requiring dismissal of the complaint. In *Sanjuan, supra*, the Seventh Circuit held plaintiffs, psychiatrists who failed the oral portion of defendant's board certification examination, lacked antitrust standing where damages sought allegedly resulted from plaintiffs' inability to charge higher fees without such certification. As the court stated, "the claim that a practice reduces (particular) producers' incomes has nothing to do with the antitrust laws, which are designed to drive producers' prices down rather than up." *Sanjuan, **[*175]** supra, at 251* (citing cases). "Plaintiffs, who want to obtain a credential that will help them charge higher prices, have pleaded themselves out of court on their antitrust claim." *Id. at 252*. *Sanjuan* thus extends *Brunswick* and *Matsushita* to competitors who challenge the granting of a competitive advantage to a competitor in order to increase the price of their services, a purpose not protected by the *Sherman Act*.

Here, Plaintiffs **[**34]** do not claim that they were prevented from practicing emergency medicine; rather, Plaintiffs allege that because of the anticompetitive closure of the practice track they were unable to obtain the ABEM certification that would permit them to earn higher incomes as ABEM certified emergency physicians. As such, Plaintiffs' alleged damages flow directly from Plaintiffs' consequent inability to earn and benefit from a professional credential, ABEM certification, with which they expect to obtain greater compensation at a level resulting from the anticompetitive conduct they seek to condemn; therefore, the deprivation of such an economic advantage, *i.e.,* the ability to raise prices because of a competitor's noncompetitive conduct, to a competitor or prospective competitor, is an economic consequence to which the antitrust laws are indifferent. *Matsushita, supra*; *Brunswick, supra.*

Applying the requirement that a *Clayton Act Sections 4or 16* plaintiff allege a cognizable antitrust injury, courts have consistently rejected antitrust claims based on lack of antitrust standing including cases where physicians, as antitrust plaintiffs, have sought to confer economic **[**35]** advantage, in addition to board certifications, upon themselves by attacking business practices by competitors and purchasers of their services having the effect of excluding them from the market. *Balaklaw, supra* (plaintiff anesthesiologist lacked antitrust standing for action to cancel award of exclusive service contract by hospital to a competitor); *Todorov, supra* (radiologist who sought radiology department privileges to administer and read CT head scans in order to share in supercompetitive fees charged by staff radiologists for same service lacked antitrust standing as plaintiff sought to "reap" that which the competing CT scan radiologists enjoyed); *Salamon v. Our Lady of Victory Hospital, 1999 U.S. Dist. LEXIS 15954, 1999 WL 955513, *2 (W.D.N.Y. Oct. 5, 1999)* (plaintiff physician alleging restraint of trade based on defendant's exclusion from referrals for her medical services lacked antitrust standing); *Korshin v. Benedictine Hospital, 34 F. Supp.2d 133, 138 (N.D.N.Y. 1999)* (physician who lost exclusive services contract to provide anesthesiology services to hospital failed to allege antitrust injury); *Ezekwo v. American Board of Internal Medicine, 18 F. Supp.2d 271, 277 (S.D.N.Y. 1998)* **[**36]** (physician seeking hospital admission privileges and participation in an HMO failed to allege sufficient facts demonstrating injury to competition and market area and thus no antitrust injury sufficient for standing); *aff'd, 173 F.2d 844 (2nd Cir. 1999)*; *Ginsberg v. Memorial Healthcare Systems, Inc., 993 F. Supp. 998 (S.D.Texas 1997)* (physician's alleged inability to successfully practice medicine at defendant hospital, based on defendants' refusal to refer patients, declining to provide cross-coverage and black-listing, failed to allege an antitrust injury); *Finkelstein, supra, 1997 U.S. Dist. LEXIS 10759, [WL] at *5* (alleged coercive provisions imposed by combination of hospitals and insurance carrier upon plaintiff-physicians' decision making authority in care of patient-insureds failed to allege an antitrust injury). *See also* *Appraisers Coalition v. Appraisal Inst, 1999 U.S. Dist.*

LEXIS 1626, 1999 WL 89663 (N.D.Ill. Feb. 12, 1999) (real estate appraisers seeking special qualification designation from defendant **[*176]** trade organization made up of competing appraisers failed to allege antitrust injury).

A fair reading of the Second Amended Complaint, Plaintiffs' Revised **[**37]** Memorandum, Plaintiffs' Reply Memorandum, and consideration of discovery related to Plaintiffs' class certification motion demonstrates that Plaintiffs have failed to plead any cognizable antitrust injury sufficient to confer antitrust standing under either Section 4or 16 of the Clayton Act. Specifically, the Second Amended Complaint alleges that Defendants' conspiracy caused them to be denied "increases in remuneration" based on their inability to obtain ABEM certification. Second Amended Complaint P 13. Further, according to Plaintiffs, they and members of the alleged class "receive substantially less remuneration than ABEM certified physicians (in an average amount of no less than $ 50,000 annually)." Second Amended Complaint P 104. Additionally, Plaintiffs claim the loss of "increases in remuneration for which they otherwise would be qualified" if they were able to sit for and pass the ABEM certification examination through the practice track. *Id.* P P 88(a), (e), (g), (k); 109.

Plaintiffs' legal argument reinforces Plaintiffs' compensation enhancing purposes. Specifically, in connection with the allegations in support of class certification, Plaintiffs include among the common **[**38]** issues Plaintiffs assert exist with respect to each proposed class member

> ". The purpose and effect of defendants' conspiracy to restrain competition and increase the economic and other professional benefits associated with ABEM certification;
>
> ***
>
> . The artificial elevation of the prices paid by the public for the services of ABEM-certified and ABEM-eligible emergency physicians caused by defendants' actions;
>
> . The artificial reduction in the earnings of plaintiffs and proposed class caused by defendants' actions in unlawfully withholding eligibility for ABEM certification from plaintiffs and the proposed class."

Plaintiffs' Revised Memorandum at 19 (emphasis added).

Further, in contending that both Plaintiffs and members of the proposed class suffered an injury in fact caused by the Defendants' alleged antitrust violations, Plaintiffs stated that Defendants' "conspiracy has prevented all Plaintiffs from obtaining the higher salaries that ABEM certified and ABEM eligible emergency physicians command …." Plaintiffs' Memorandum at 26 (Doc. No. 70) (underlining added). Such allegations do not describe "an injury the antitrust laws were intended **[**39]** to prevent" and do not "flow[] from that which makes defendants' acts unlawful." Brunswick, supra, at 489. *See* Balaklaw, supra; Sanjuan, supra; Todorov, supra.

Additionally, the testimony of individual Plaintiffs obtained through discovery manifests Plaintiffs' primary objective in this lawsuit as that of increasing their income based on obtaining ABEM certification. For example, Dr. Daniel, the lead Plaintiff, acknowledged that obtaining ABEM certification would enable him to "command a higher hourly rate" by achieving "parity" with ABEM certified physicians who receive higher compensation. Daniel Deposition at 135-36, Appendix to Defendants' Memorandum of Law Vol. II, Exhibit K. [10] **[*177]** Dr. Timmons, another Plaintiff, testified that as a result of receiving ABEM certification in 1996, upon qualifying under the special track available to ABIM members with academic credentials, he successfully negotiated a "significant" salary increase. Timmons Dep. at 11. Dr. Timmons also stated that he is seeking $ 279,000 in damages for the period 1990-1994 representing the higher compensation he believes he would have earned had he then **[**40]** held ABEM certification during that period. Timmons Dep. at 51.

---

[10] Unless indicated otherwise "Dep. at _" refers to deposition testimony of individual Plaintiffs or their expert contained in Volumes II (Keil-Wayne) or III (Alexander - Gross), Exhibit K of Appendix to Defendants' Memorandum of Law in Opposition to Plaintiffs' Motion for Class Certification and In Support of Defendant's Cross-Motion to Dismiss for Lack of Standing (Doc. Nos. 773-775) filed under seal.

Further confirmation that such enhanced compensation upon achieving ABEM board certification based on practice track eligibility, as the goal of the instant litigation, is provided by other Plaintiffs. For example, Plaintiff Dr. Ian Cummings testified that if he were ABEM certified, he expected to be paid more by his group practice organization. Cummings Dep. at 44, 51, 70. Dr. K. Michael Keil, another Plaintiff, testified that with ABEM certification, his group practice organization for emergency services could have placed him at a hospital **[**41]** which paid $ 10 more per hour than his current hourly rate. Keil Dep. at 201. Plaintiff Dr. Phillip LaStella testified that with ABEM certification it was conceivable that he could earn more than his present income of about $ 500,000 per year. LaStella Dep. at 109. Dr. Douglas Middleton, another Plaintiff, testified that he is confident his annual income would have been as much as $ 100,000 to $ 200,000 higher, depending on the hospital at which he had been hired, if he then held ABEM certification. Middleton Dep. at 51-55. According to answers to Defendants' interrogatories, Dr. Muran's compensation as an emergency physician without ABEM certification was between $ 70,000 to $ 100,000 per year lower than it would have been with ABEM certification. Muran Answer to Interrogatory No. 17(a) dated May 28, 1999, Vol. III, Exh. K to Appendix to Defendants' Memorandum of Law in Opposition. Plaintiff Dr. Kurt Papenfus estimated, without particulars, his annual compensation loss from his lack of ABEM certification to be about $ 1 million over a 10 year period. Papenfus Answer to Defendants' Interrogatory No. 17(a) dated July 10, 1999. *Id.*

Plaintiffs' expert, Dennis W. Carlton, Ph.D., who **[**42]** holds a doctorate in economics from the University of Chicago, in the course of deposition testimony explaining the rationale for his multiple regression analysis to support Plaintiffs' request for class certification, discussed in Section III, *infra,* also confirmed that Plaintiffs' ultimate objective in bringing this lawsuit is to benefit themselves economically through increased compensation by obtaining ABEM certification:

> Q. Isn't it true that the plaintiffs in this case are seeking a credential that will help them charge higher prices?
>
> A. I think plaintiffs are seeking a credential to which they believe they're entitled by virtue of their qualifications that would be reflected in the marketplace <u>as a higher price than they are currently earning.</u>
>
> Q. In other words, they believe that if board certified, <u>they'll be able to make more money?</u>
>
> A. <u>Correct.</u>
> ***
>
> Q. And you believe that if the members of the class do get the ABEM credential that they would then be <u>able to charge **[*178]** higher prices</u> than they're currently charging for their services?
>
> A. <u>Yes,</u> I believe that.

Deposition of Dennis W. Carlton, Ph.D., Carlton Dep. **[**43]** at 334-36 (underlining added). "Indeed, if certification did not typically result in higher wages, it is not clear why individuals [including Plaintiffs] would have an incentive to become certified." Reply Affidavit of Dennis W. Carlton, Ph.D., dated July 12, 2002 (Doc. No. 798) ("Carlton Reply Affidavit") P 14 (bracketed material added).

Thus, based on the allegations presented in the Second Amended Complaint, Plaintiffs' supporting legal memoranda, and the record on Plaintiffs' motion, through the relief Plaintiffs request, they seek to qualify for ABEM certification and damages for being prevented from obtaining ABEM certification, for the purpose of obtaining higher prices for their services in the market for ABEM physicians and ABEM eligible physicians and, but for the alleged wrongful closure of the practice track, damages representing the loss of such higher income as they have pleaded. As prospective competitors of ABEM physicians or ABEM eligible physicians who seek higher income based on ABEM certification, Plaintiffs' requested relief is not recognized as a permissible objective under the antitrust laws, and, as such, Plaintiffs lack standing. *Sanjuan, supra;* **[**44]** *Todorov, supra.*

Plaintiffs advance several grounds to defeat Defendants' cross motion. First, Plaintiffs contend that the requirement of antitrust injury as an element of standing should be resolved at trial. Plaintiffs' Reply Memorandum at 7-9. However, there is no merit to this contention as courts frequently dismiss complaints in antitrust actions prior to trial for insufficient allegations of antitrust injury and standing. *See* *Sanjuan, supra* (dismissing complaint for lack of standing based on absence of showing plaintiff had suffered antitrust injury affirmed); Korshin, supra (same); Salamon, supra (same) Finkelstein, supra (same). *See also* Balaklaw, supra (granting summary judgment against plaintiff who failed to demonstrate antitrust injury and therefore lacked standing); Todorov, supra (same); The Appraisers Coalition, supra (same). *Cf.* Matsushita, supra (recognizing on motion for summary judgment unavailability of Sherman Act remedies based on suit by plaintiff competitors challenging conspiracy to raise prices in defendant **[**45]** competitors' domestic market). As noted, standing issues are to be determined based on the material allegations in the complaint. Vazquez, supra; Finkelstein, supra. Hence, it is proper to determine Plaintiffs' antitrust standing at this stage of the proceedings.

Second, Plaintiffs argue that sellers and producers including "injured competitors" against whom the antitrust misconduct was directed have been held to have standing to enforce antitrust laws. Plaintiffs' Reply Memorandum at 10 (citing cases). Plaintiffs' cited authorities do not support such a broad generalization and are, in any event, inapposite. For example, in Full Draw Productions v. Eastern Sports, Inc., 182 F.3d 745 (10th Cir. 1999) trade show operators' claims of group boycott by suppliers were found to establish standing based on the rule that group boycott claims do not require that plaintiffs and defendant competitors operate at the same market level. Full Draw, supra, at 745 (citing cases). In Crimpers Promotions, Inc. v. Home Box Office, Inc., 724 F.2d 290 (2d Cir. 1983), plaintiff had standing to challenge defendants' effort to induce boycott **[**46]** of plaintiff's trade show which was sponsored by plaintiff to increase competition against defendant for cable TV programming. Crimpers Promotions, **[*179]** supra, at 294. Radovich v. National Football League, 352 U.S. 445, 1 L. Ed. 2d 456, 77 S. Ct. 390 (1957) also involved a boycott claim based on an alleged blacklisting of plaintiff, a professional football player. In Municipal Utils. Bd. v. Alabama Power Co., 934 F.2d 1193 (11th Cir. 1991) the court found municipal electric suppliers had standing to challenge a state sponsored retail market allocation scheme to benefit retail electrical cooperatives which competed with plaintiffs. Here, the Second Amended Complaint contains no group boycott or market division allegations. As Plaintiffs do not allege a group boycott or an unlawful market allocation scheme among competitors, the caselaw upon which Plaintiffs rely fails to establish that Plaintiffs enjoy antitrust standing. [11] Moreover, unlike the instant matter, in none of these cases did plaintiffs seek to gain an economic advantage the would enable them to charge higher prices.

[47]** Nor does Plaintiffs' reliance on Blue Shield of Virginia v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982) and Calderone Enter. Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292 (2d Cir. 1971), Plaintiffs' Reply Memorandum at 14, 15-16, support Plaintiffs' motion. In *McCready,* the Supreme Court upheld antitrust standing for a subscriber of health care insurers' coverage challenging the insurer's arbitrary refusal to pay for a licensed psychologist's therapy services while allowing reimbursement for psychotherapy services by psychiatrists. As such, the Court found plaintiff's standing depended on a finding of direct financial harm to plaintiff deriving from her position as a consumer not as a supplier of psychotherapy services but which was the necessary

---

[11] Despite Plaintiffs' contention at oral argument, the court finds Plaintiffs have not alleged a group boycott. ***HN8***[] To be actionable under the antitrust laws, boycotts or concerted refusals to deal "generally involve[] joint efforts by a firm or firms to disadvantage competitors by 'either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle.'" Northwest Wholesale Stationers, Inc. v. Pacific Stationary and Printing Co., 472 U.S. 284, 292, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985) (citing authorities and cases) (underlining added). However, Plaintiffs have alleged that "defendants' unlawful conspiracy in closing the practice track has precluded the plaintiffs ... from attaining ABEM certification or ABEM eligibility and thereby competing with ABEM eligible physicians." Second Amended Complaint P 8 (underlining added). Plaintiffs construe their allegations in a similar manner. "In the present case, plaintiffs have clearly alleged that there is a market for ABEM - certified emergency - medicine physicians to which they have been denied access." Plaintiffs' Reply at 11. (underlying added). It is unclear how Plaintiffs can be considered competitors in the relevant market if they allege the conspiracy deprives them of that status. Significantly, in each case relied on by Plaintiffs, the plaintiff was an established competitor of defendants. However, assuming for the sake of analysis that Plaintiffs have asserted a group boycott because, as discussed, Plaintiffs seek to benefit from the same credential that will enable them to realize higher compensation -- and thus costs to consumers -- their inability to demonstrate a procompetitive effect by lowering prices through greater competition, resulting from greater access to the market, defeats antitrust standing. Even allowing for application of the principles of liberal construction and alternate theories of pleading, the court fails to see how Plaintiffs can be found to have asserted group boycott claims sufficient to establish antitrust standing on that basis.

result of the conspiracy to withhold payments to the psychologists as competitors of the psychiatrists. *McCready, 457 U.S. at 483-84*. No similar direct harm to Plaintiffs following from an arbitrary restriction on competition is alleged here, rather, Plaintiffs seek to raise the price for their services as they gain professional competitive parity with **[**48]** ABEM physicians and ABEM eligible physicians. As such, *McCready* provides no **[*180]** support to Plaintiffs' efforts to establish antitrust injury and standing.

In *Calderone, supra,* a landlord sued for decreased rental income caused by defendants' conspiracy to force the showing of "inferior" films at plaintiffs' movie houses thus reducing the landlord's rental revenue. *Calderone, 454 F.2d at 1294*. Applying Second Circuit precedent, the court in *Calderone* found plaintiff lacked standing under *Section 4 of the Clayton Act* as plaintiff was not within the target area of the antitrust conspiracy, "*i.e.,* a person against whom the conspiracy was aimed, such as a competitor of the persons sued." *Id. at 1292*. However, in *Crimpers, supra,* the Second Circuit held that following holdings of the Supreme Court subsequent to*Calderone,* as to the scope of *Section 4 of the Clayton Act*, "courts in this circuit should start their analysis of standing under *Section 4* with the Supreme Court opinions rather than engage in extensive parsing of *Billy Baxter* [*Inc. v. Coca-Cola Co. 431 F.2d 183 (2d Cir. 1970)]* and *Calderone.* **[**49]** " *Id.* (citing authorities criticizing the "target area approach" to determinations of antitrust standing applied in *Billy Baxter* and *Calderone*). *Crimpers, supra, at 292* (Friendly, J.) (bracketed material added). ***HN9***[] "Courts of this circuit ... are compelled, to follow approaches adumbrated by the Supreme Court ... without concern whether the results are consistent with language in earlier Second Circuit cases." *Id.* Accordingly, Plaintiffs' assertion that because Defendants' alleged conspiracy was directed at them, even if true, is in itself insufficient to establish standing unless Plaintiffs' allegations also comport with more recent and relevant Supreme Court holdings, discussed *supra,* propounding the prerequisite of antitrust standing for *Section 4* cases. *See* *Balaklaw, supra* (analyzing antitrust standing issue as to physician's boycott and concerted refusals to deal claims based on Supreme Court cases without reference to prior Second Circuit standing caselaw considering whether antitrust plaintiff was 'target' of alleged antitrust conspiracy). Thus, *Calderone's* application of the 'target area' test for antitrust standing provides **[**50]** no support to Plaintiffs as such approach is inconsistent with the Second Circuit's later decision in *Crimpers, supra.*

Third, Plaintiffs seek to distinguish *Sanjuan* on the basis that plaintiffs in that case, unlike Plaintiffs, failed to allege an unlawful exercise of market power, a reduction in output, or exclusion from competition in that, in *Sanjuan,* plaintiffs, who continued to practice in their specialty, were not precluded from taking defendant's certification examination, rather, they were unable to pass it. Plaintiffs' Reply Memorandum at 10-11. Plaintiffs further argue that this court has previously sustained the Amended Complaint and Second Amended Complaint against Defendants' attempts to dismiss. *Id.* at 11 (citing *Daniel I, supra* and *Daniel II, supra*). However, as explained in connection with the court's consideration of Plaintiffs' argument based on the law of the case doctrine, Discussion, *supra,* at 13-14, the court has not previously been presented with the specific ground for dismissal now interposed by Defendants, *i.e.,* that Plaintiffs lack standing based on a failure to allege a cognizable antitrust injury sufficient to **[**51]** permit recovery or injunctive relief pursuant to *Sections 4and 16* of the Clayton Act. Thus, while the court has sustained the Amended and Second Amended Complaint against Defendants' earlier motions to dismiss on grounds other than asserted here by Defendants, it does not follow that Plaintiffs can avoid scrutiny for failing to allege the existence of any cognizable antitrust injury and standing.

Likewise unavailing is Plaintiffs' effort to distinguish *Sanjuan* on the ground that **[*181]** because in *Sanjuan* plaintiffs were found by the court to be defendants' competitors the court's finding that plaintiffs lacked antitrust standing is inapplicable to Plaintiffs' allegations. Plaintiffs' Reply Memorandum at 11. Particularly, Plaintiffs contend that they are not yet in competition with ABEM certified or eligible physicians because they have not gained the opportunity to obtain ABEM certification (by qualifying through the practice track to take the ABEM examination), and thus cannot be said to compete with ABEM certified or eligible physicians. *Id.* at 11-12. Plaintiffs reason that because Plaintiffs are not competitors who challenge an anticompetitive practice that if engaged in **[**52]** by them will allow them to charge higher prices, the reasoning of *Sanjuan* -- holding that competitors who challenge anticompetitive practices beneficial to such competitors lack antitrust standing -- as to the requirements of antitrust injury and standing is inapplicable to this action. *Id.*

Specifically, *Sanjuan* holds that a competitor who "seeks to gain a credential that will help them charge higher prices" as competitors who enjoy the credential, "have pleaded themselves out of court on the antitrust claim." *Sanjuan, supra, at 251*. Assuming, *arguendo,* Plaintiffs in fact do not compete in the relevant market, *i.e.,* the market for ABEM or ABEM eligible physicians, because they are unable to qualify for the ABEM certifying examination, it is undisputed that by this action Plaintiffs seek to become such competitors through a request for equitable relief compelling reopening the practice track to enable Plaintiffs to qualify to take the ABEM certification examination and thereby achieve ABEM certification. Therefore, Plaintiffs' use of the antitrust laws to acquire a credential that, according to the allegations in the Second Amended Complaint, has **[**53]** as a primary objective giving Plaintiffs the capacity to enter the relevant market so they may substantially increase their compensation by charging more for their services upon obtaining ABEM certification thereby matching the compensation earned by their future competitors, equally fails to allege an antitrust injury and deprives Plaintiffs of standing under *Clayton Act Sections 4and 16*. Plaintiffs offer no reasoned basis to distinguish, for purposes of the relevant standing analysis, between competitors who possess an income enhancing credential and litigants who seek access to that credential in order to compete with those who have it. Thus, the court finds that Plaintiffs' status as competitors of ABEM or ABEM eligible physicians or as persons seeking to become such competitors is an irrelevant distinction to whether they have or can allege an antitrust injury. In either case, because their goal is to gain the credential that will cause noncompetitive prices to inure to Plaintiffs' benefit, their claim for relief falls outside the ambit of antitrust protection and they lack standing under the *Clayton Act*. As such, Plaintiffs' effort to avoid the holding in*Sanjuan* on this **[**54]** basis fails.

Equally unpersuasive is Plaintiffs' argument that when more than one competitor or potential competitor seeks, but is refused an opportunity to obtain, certification, such denial of access to the relevant market "evinces a reduction in competition in the market in general," thereby providing sufficient nexus to one of the fundamental purposes of the antitrust laws sufficient to create standing. Plaintiffs' Reply Memorandum at 14. ***HN10***[] The requirement for standing that an antitrust plaintiff, or group of plaintiffs, sufficiently allege an antitrust injury does not depend on an allegation that the target conduct operates to reduce competition. Rather, the requirement of an antitrust injury turns not on the illegality of the defendant's conduct -- **[*182]** indeed, such illegality is presupposed -- but on the fact that a plaintiff seeks to engage in or benefit from the same activity. *See* *Matsushita, supra, at 583* (challenged conspiracy to charge higher prices violates ***antitrust law*** but does not injure plaintiffs because as defendant's competitors, plaintiffs "stand to gain from any conspiracy to raise the market price ...."); *Brunswick, supra, at 489* ("the **[**55]** injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation."); *Todorov, supra at 1453* (plaintiffs "damages are premised on his ability to profit while consumers paid an artificially inflated price."). Thus, as the alleged anticompetitive conduct alleged by Plaintiff -- arbitrary closure of the ABEM practice track -- operates to benefit competitors (including prospective competitors) who supply the relevant services in the market, Plaintiffs have no standing to challenge it. *Matsushita, 475 U.S. at 583*.

Finally, Plaintiffs attempt to avoid the holding in *Sanjuan* that the antitrust laws may not be invoked by a supplier to obtain a credential by which to increase the supplier's income. Specifically, Plaintiff argue they will benefit consumers and competitors because, if successful, Plaintiffs' lawsuit will, over time, effect a lowering of the price of emergency medical services, provided by ABEM certified and ABEM eligible physicians, resulting from "increased competition once the class members join the ABEM-eligible pool." Plaintiffs' Reply Memorandum at 12-13. This contention **[**56]** is without merit for several reasons. First, Plaintiffs' theory that reopening the ABEM practice track will eventually cause a reduction in the price of ABEM physician and eligible physician services through the presence of large numbers of additional ABEM or ABEM eligible physicians, is an expectation not advanced in the Second Amended Complaint nor supported by the record. While the Second Amended Complaint repeatedly charges that Defendants' conspiracy created and maintained artificially high prices for ABEM physicians' and ABEM eligible physicians' services, *see e.g.,* Second Amended Complaint PP 14, 16, 20(a), 21(a), 57, 82, 87, 88(h), 92, 95, 96 and 104, no where do Plaintiffs claim that a reopening of the practice track will result in lower prices to consumers of such services either in the short term or thereafter. Accordingly, there is no allegation, which, if its truth were assumed, supports Plaintiffs' contention that Plaintiffs' cause of action has an objective consistent with the purposes of the antitrust laws. *See* *Physicians Health Services, supra* (standing determined based on pleadings assuming the truth of the allegations); *Vazquez, supra* (same).

[57]** At oral argument, Plaintiffs contended that the court should reasonably infer from Plaintiffs' allegations of noncompetitively higher prices generated by the conspiracy that upon reopening of the practice track, the resulting additional ABEM certified physicians in the market will cause prices to decline. However, given the plethora of allegations asserting, as discussed, Discussion, *supra,* at 21-25, that Plaintiffs' objective is to advance their own economic interest by obtaining access to the same higher levels of compensation created by the charged conspiracy, the notion that Plaintiffs will also succeed in lowering such compensation to their economic detriment is an inference that is neither reasonable nor plausible. Simply put, Plaintiffs have no natural economic self-interest in achieving such a result. Whether given the economic complexities of the health care services market, including a high degree of government regulation and financial involvement, the normal laws of supply and demand can even be applied requires sophisticated **[*183]** economic analysis that is neither asserted nor presaged by anything within the four corners of the Second Amended Complaint drawing any inferences **[**58]** in Plaintiffs' favor. Significantly, Dr. Carlton had no opinion on the question whether prices to consumers of emergency medical services were likely to fall if Plaintiffs succeeded in the litigation. Carlton Dep. at 316-17. As such, the court finds Plaintiffs' assertion that their allegations can be read to reasonably infer that lower prices for emergency medical services will result from their lawsuit, if successful, to be without foundation in the pleadings and record, and an unsubstantiated afterthought.

Even if Plaintiffs had alleged that allowing their entry into the market for ABEM and ABEM eligible physicians resulting from this litigation would cause the price for such services to decline, a similar asserted basis for the existence of an antitrust injury and standing was rejected in *Todorov v. DCH HealthCare Auth., supra.* In *Todorov,* a neurologist to whom defendant had granted staff privileges to practice neurology, later requested additional privileges to perform CT scans of a patient's head. Plaintiff sought, but defendant refused to grant, radiology privileges so he could charge for the interpretation of CT scans instead of the defendant radiologists **[**59]** who had been conducting the scans and performing this diagnostic service for a fee. *Todorov, supra, at 1442*. Finding plaintiff had suffered no antitrust injury, the court upheld the grant of summary judgment against plaintiff because it found that plaintiff sought to share in the "supercompetitive profits" enjoyed by the radiologists as a result of the alleged anticompetitive pricing imposed by the radiologists on the patients and their insurers. *Id. at 1453-54*. As such, the court in *Todorov,* stated that plaintiff's "alleged damages equal the profits he would have garnered had he been able to share a part of [defendant] radiologists' supercompetitive, or monopoly, profits. This is not antitrust injury." *Id. at 1453* (bracketed material added).

As relevant to Plaintiffs' contention that they seek to reduce prices by increasing supply, the court in *Todorov* also considered whether the possibility that by seeking entry to the relevant market plaintiff could, through engendering greater competition with the radiologists, effect an eventual reduction in the cost of interpreting CT head scans as a result of his lawsuit and establish standing. *Todorov, supra, at 1454.* **[**60]** The court rejected this assertion because plaintiff's ability to realize a profit depended on maintaining a noncompetitive higher price and as plaintiff could realize no profit at a competitively established market price, the court found that plaintiff's only economic interest was to seek entry into the market to share in the alleged supercompetitive pricing of his would-be competitors. *Id. at 1454*. Further, in *Todorov* as in the instant case, plaintiff did not allege that his purpose was to drive down prices for the services at issue. *Id.* Likewise here, even considering Plaintiffs merely seek entry into the market for ABEM physicians' and ABEM eligible physicians' services and further positing that such market access through ABEM certification under the practice track could eventually reduce prices for such services as actual or prospective competitors and suppliers of such services, Plaintiffs' immediate and long term economic interest lies only in keeping the price of these services artificially elevated so that they may use ABEM certification to obtain the extra degree of compensation they specifically allege they will receive upon obtaining such certification. **[**61]** Thus, as in *Sanjuan* and *Todorov,* because Plaintiffs allege no **[*184]** injury the antitrust laws are intended to prevent, Plaintiffs lack standing. [12]

---

[12] The fact that in *Todorov* plaintiff sought lost profits as an independent business entity and in this case, Plaintiffs seek extra compensation typically as employees of a hospital or medical corporation providing services to a hospital under contract is irrelevant. In either event, the alleged lost profits in *Todorov* or the lost additional compensation in the form of extra salary

Plaintiffs further argue that the large number of potential new entrants into the relevant market, that Plaintiffs believe will be the result of their lawsuit if successful, also distinguishes this case from those relied upon by Defendants. Plaintiffs' Reply Memorandum at 12. However, even it is supposed that a broader **[**62]** impact on competitiveness within the relevant market will result from Plaintiffs' entry into the relevant market, the economic interests of Plaintiffs upon which this action is based remains one that has been rejected by the courts. Discussion, *supra,* 19-26. While entry of large numbers of ABEM physicians and ABEM eligible physicians may result in greater competition among suppliers of emergency medical services, including a possible future reduction in the price of the emergency medical services rendered by suppliers, such potentialities do not avoid a finding that where present or prospective competitors seek to reap the benefits of supercompetitive pricing conferred by the alleged anticompetitive scheme, antitrust injury and standing are not present. *See* *Matsushita, supra, at 583* (potential competitors' attack on nonprice restrictions imposed by defendant cartel that increase price or limit output lacks antitrust standing); *Todorov, supra, at 1453* (entry into market by potential competitor which may produce lower prices does not negate fact that plaintiff's damages represent share of lost "profits" based on supercompetitive prices imposed by **[**63]** defendant competitors thereby defeating antitrust standing for plaintiff).

Plaintiffs' request for equitable relief presents the same deficiency, in demonstrating the existence of antitrust standing, as does Plaintiffs' request for damages, because removing the market entry barriers alleged against Defendants at issue to achieve greater supply and "unrestrained competition," albeit an "altruistic" motive, is not Plaintiffs' primary objective. *Todorov, supra, at 1454*. Rather, as discussed, Plaintiffs seek ABEM certification as a device that will enable them to gain the benefits of supercompetitive pricing presently enjoyed by ABEM physicians and ABEM eligible physicians, a goal that disqualifies them from using the equity power of the court to obtain market access. *Todorov, supra, at 1453-54*. As such, the court finds none of Plaintiffs' contentions overcome Defendants' grounds for dismissal for lack of antitrust standing. Accordingly, Plaintiffs' requests for damages and equitable relief are not of the type the antitrust laws are intended to promote, and Plaintiffs lack standing on this basis.

In post argument briefing, Plaintiffs rely on *Brader v. Allegheny General Hospital, 64 F.3d 869 (3d Cir. 1995)* **[**64]** and *Ertag v. Naples Community Hospital, 121 F.3d 721 (11th Cir. 1997)* (*per curiam*) (Table), an unreported decision of the Eleventh Circuit. [13] Neither case requires a different conclusion. In *Brader,* a case involving plaintiff's challenge to loss of hospital staff privileges, the court distinguished *Todorov* on the ground that unlike the complaint in the case before the court in *Todorov,* plaintiff's **[*185]** alleged loss of income resulting from the wrongful exclusion from the relevant market was potentially anticompetitive because it reflected an attempt by plaintiff's competitors to reduce competition. *Brader, supra, at 869*. To whatever extent the facts of *Todorov* may differ from *Brader,* in the instant case, unlike*Brader,* the challenged violation is not simply an exclusion of a competitor from the market but, as evidenced by Plaintiffs' allegations, Plaintiffs' challenge constitutes an attempt to obtain supercompetitive benefits which, as in *Todorov,* requires finding that Plaintiffs lack antitrust standing.*Ertag* is also easily distinguishable as there the plaintiff neurologists, according to the court's reading of the **[**65]** complaint, sought lost profits which they could reasonably expect to have realized but for defendants' attempts to enforce monopoly practices resulting from the defendant hospital's decision to award an exclusive contract for radiological services. Attachment to Doc. No. 871 at 2, 7. In contrast, as discussed, *supra,* at 32-34, Plaintiffs' allegations demonstrate they seek to share in the same super competitive pricing without any corresponding allegation that their presence in the market will result in lower prices to the consumers of their services. As such, *Ertag* provides no support for Plaintiffs' claims to antitrust standing. Moreover,*Ertag's* holding, granting standing to a physician's displaced by a hospital's award of an exclusive contract to the physician's competitor for specialized physicians services to challenge the award on antitrust grounds is contrary to controlling Second Circuit authority. *See* *Balaklaw, supra.*

---

claimed as damages in the instant action derive from artificially high pricing levels created by the antitrust violation challenged by the respective plaintiffs.

[13] A copy of the decision is attached to Doc. No. 871.

[66]** In addition, Plaintiffs are not efficient enforcers of the antitrust laws and lack standing for this reason as well. ***HN11***[] For standing to sue under *Section 4* or *Section 6 of the Clayton Act*, the Supreme Court requires that, in addition to meeting the threshold requirement of having alleged an antitrust injury, a plaintiff also must be an efficient enforcer of antitrust laws. *Cargill, supra, at 110, n. 5*; *Associated General Contractors of California v. California State Council of Carpenters, 459 U.S. 519, 542, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*; *Balaklaw, supra, n. 9 at 797*. Defendants contend that because Plaintiffs' primarily seek to enhance their compensation as a result of the instant litigation, they have an interest directly opposed to consumers of their services, and are thus inadequate surrogates for those who have a more immediate stake in the antitrust claims presented by this case. Defendants' Memorandum at 15 (citing cases). ***HN12***[] The Supreme Court requires consideration of several factors to determine whether a plaintiff in a federal antitrust action can be an efficient enforcer of such laws: the (1) nature of a plaintiff's **[**67]** injury, whether as a consumer or competitor; (2) directness or speculative nature of the relationship between the alleged antitrust violation and plaintiff's alleged injury; (3) potential for duplicative recovery or complex apportionment damages; and (4) existence of a more direct victim of the alleged antitrust violation. *Contractors of California, supra, at 538, 539, 545*. *See also* *Volvo North American v. Men's Int'l Professional Tennis Council, 857 F.2d 55, 66 (2nd Cir. 1988)*. Additionally, some, but not all, of the above factors are relevant to deciding whether a plaintiff has standing to seek injunctive relief pursuant to *Section 16* of the Clayton Act. *Cargill, supra, at 111, n. 6*; *Volvo, supra, at 66*. Applying these factors to Plaintiffs' allegations, the court finds Plaintiffs are not efficient enforcers as to their *Sections 14and 16* claims.

First, Plaintiffs' allegations of the nature of their alleged injury demonstrate, as discussed, Discussion II B, *supra,* at 15-38, they have not alleged a cognizable form of **[*186]** antitrust injury. Plaintiffs who seek access to a credential that, as alleged by Plaintiffs, **[**68]** will enable them to enjoy, as competitors, noncompetitive prices, *i.e.,* salaries, for their services, do not seek relief for a wrong the antitrust laws were intended to forestall. *Sanjuan, supra.*

Second, Plaintiffs' injuries are indirect. It is the hospitals which provide emergency medical services and thus employ or contract for emergency physicians, including Plaintiffs and ABEM physicians and ABEM eligible physicians, the insurers of the patients they treat and the self-paying patients themselves, who are directly injured as a result of the Defendants' alleged conspiracy to maintain artificially high prices for emergency service physicians through an arbitrary restriction on access to ABEM certification. *See* *Blue Shield of Virginia v. McCready, 457 U.S. 465, 479, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)* (insurer's refusal to reimburse insured for psychotherapy services provided by a psychologist as opposed to those provided by physicians and psychiatrists held to state a cause of action for restraint of trade for which the insured had standing to sue under *Clayton Act Section 4*). In the market for emergency medical services, the patient is **[**69]** not the most immediate purchaser of such services. The need for immediate medical treatment often caused by a serious health problem requiring emergency room services differs significantly from the typical selection or contact of a physician by a patient seeking more routine care, a decision often made under non-urgent circumstances. Indeed, the emergency patient in many instances will be unable to make any conscious selection of an emergency physician. Hospitals, as providers of emergency medical services by physicians, through contract or employment, competent to provide emergency medical services and health care insurers, including employers and government, that reimburse the hospitals for the emergency care provided to individual patients, therefore have the most direct economic interest in the cost of such services, and, hence, are most directly affected by any conspiracy to maintain artificially high emergency physician compensation levels. It is unrealistic to expect typical emergency room patients to complain about the costs of the treating physician, or for that matter whether such physicians are even board certified, and initiate an antitrust suit to challenge it. Accordingly, **[**70]** the alleged injury to Plaintiffs, artificially lowered compensation as a result of the claimed conspiracy, potential competitors of such ABEM physicians and ABEM eligible physicians, is in direct opposition to the economic interests of the most immediate purchasers of such services in obtaining lower costs. Even the ultimate economic interest of the patient-insured in lower costs is superior to a competitor and supplier of such services. *Compare* *McCready, supra, at 484* (insured's unreimbursed costs caused by defendant's arbitrary refusal to pay for psychotherapy provided by psychologists where insured's and psychologist's interests were "intertwined" sustained insured's antitrust standing under *Section 4*). No similar intertwining of consumers' and Plaintiffs' interests exist in the instant case.

Further, for the purposes of standing, the potential harm to Plaintiffs is somewhat speculative as even if Plaintiffs were allowed to sit for the ABEM certification examination, it cannot be predicted with certainty how many of the Plaintiffs and proposed class members will ultimately qualify for and pass the ABEM examination. Physicians who sat for the ABEM examination under **[**71]** the practice track had a failure rate of 25%, significantly higher than the 7% failure rate for eligible physicians based on completing the ABEM residency **[*187]** requirement. Report of Alan S. Frankel, Ph.D, Exh. A to Ubersax Declaration at 21.

Third, the court finds, however, that the potential for duplicative or complex apportionment of damages is insignificant as Plaintiffs do not sue derivatively but rather on their own behalf.

Finally, as discussed, *supra,* there are more direct 'victims,' *i.e.,* emergency service hospitals, health care insurers and insured, of the alleged antitrust violations asserted by Plaintiffs in this case. Accordingly, in this case, the majority of the relevant factors for determining whether Plaintiffs are efficient enforcers weigh against Plaintiffs, and Plaintiffs therefore also lack standing on this ground. In sum, for the reasons discussed, Defendants' motion to dismiss for lack of antitrust standing should be GRANTED.

Because, however, the matter is before the court for a report and recommendation, should the District Judge not accept the recommendation that Defendants' cross motion to dismiss be granted, it is necessary to consider Plaintiffs' **[**72]** motion for class certification. Accordingly, in the interest of completeness and to avoid delay, the court turns to Plaintiffs' motion for class certification.

III. Plaintiffs' Request for Class Action Certification.

Plaintiffs seek class certification for this action under *Rule 23 of the Federal Rules of Civil Procedure* ("Rule 23"). *Fed.R.Civ.P. 23(a)-(f)*. In particular, Plaintiffs contend the allegations of the Second Amended Complaint support certification pursuant to *Rule 23(a), (b)(2)and (b)(3)*. Plaintiffs' Motion to Certify Class filed February 24, 1994 ("Plaintiffs' Motion") (Doc. No. 69); Plaintiffs' Revised Memorandum of Law at 2.

Rule 23(a) sets forth four prerequisites for class action certification: ***HN13***[] "(1) the class is so numerous that joinder of all members is impracticable, (2) there are questions of law or fact common to the class, (3) claims or defenses of the representative parties are typical of the claims or defenses of the class, and (4) the representative parties will fairly and adequately protect the interests of the class." *Fed.R.Civ.P. 23(a)*. *Rule 23(b)*, as relevant, further requires that class status may be granted to an action if *Rule 23(a)* prerequisites **[**73]** are satisfied and additionally

> ***HN14***[] (2) the party opposing the class has acted or refused to act on grounds generally applicable to the class, thereby making appropriate final injunctive relief or corresponding declaratory relief with respect to the class as a whole; or
> (3) the court finds that the questions of law and fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy.

Fed.R.Civ.P. 23(b)(2)and (3) (emphasis added). [14]

HN15[] In determining the required elements of class action superiority, relevant to a proposed certification pursuant to *Rule 23(b)(3)*, the court shall consider "(A) the interest of members of the class in individually controlling the prosecution **[**74]** … of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forums; **[*188]** (D) the difficulties likely to be encountered in the management of a class action." A class or subclass may be certified as to particular issues. *Fed.R.Civ.P. 23(c)(4)*.

---

[14] As Plaintiffs discuss first the eligibility of Plaintiffs' motion under *Rule 23(b)(3)*, Plaintiffs' Revised Memorandum at 25, the court will follow this order.

Rule 23 also requires that adequate notice be provided to the class members and in the case of certification pursuant to *Rule 23(b)(3)*, an opportunity to request an 'opt out' exclusion from the class. *Fed.R.Civ.P. 23(c)(2)*.

Here, the proposed class is described as "all physicians who have or are now practicing medicine in the United States and who, but for the closing of the [ABEM] practice track on June 30, 1988, are now, or with the passage of time will be eligible to sit for the ABEM certification examination." Second Amended Complaint P 44(a) (bracketed material added). Plaintiffs maintain that the proposed class meets all prerequisites of *Rule 23(a)* as well as the grounds for certification required under *Rule 23(b)(2)and (b)(3)*. Plaintiffs' Revised Memorandum **[**75]** at 2.

In opposing Plaintiffs' request for a class action status, Defendants argue that (1) the proposed class is not objectively definable because determinations of eligibility for class membership by potential class members will be administratively difficult thus rendering the identification of potential class members not reasonably ascertainable. Defendants' Memorandum at 48-49; (2) the evidence required to establish how the practice track closure harmed individual class members and the determination of resulting damages cannot be established on a classwide basis, *id.* at 50-60; 64-65; (3) Defendants' defenses to each Plaintiff's claims will require individual proof, *id.* at 61; (4) the named Plaintiffs' claims are not typical of the claims of absent members of the proposed class, *id.* at 65-67; class action for this class is not superior to individual actions because of the possible need for numerous mini-trials relative to issues of causation and damages, *id.* at 68-69; and certification pursuant to *Rule 23(b)(2)* is unavailable as Plaintiffs' money damage claims predominate. *Id.* at 69-72.

HN16[] Well established principles applicable to requests for *Rule 23* class certification **[**76]** guide the court's determination. First, the decision to grant certification is discretionary with the court. *In re Holocaust Victims Assets Litigation, 225 F.3d 191, 201 (2d Cir. 2000)* ("the District Court has broad discretion in certifying the class."). "If the Court finds both the requirements of *23(a)* have been met, and that the claims fall within the scope 23(b)(3), the Court may, in its discretion, certify the class." *In re Buspirone Patent Litigation, 210 F.R.D. 43, 57 (S.D.N.Y. 2002)* (citing cases). Whether Plaintiffs have stated a cause of action or will ultimately prevail on the merits at trial is irrelevant; the threshold question is "whether the requirements of *Rule 23* are met." *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 177-78, 40 L. Ed. 2d 732, 94 S. Ct. 2140 (1974)*. However, in assessing a request for class certification the court may also consider the "evidentiary record including any affidavits and results of discovery." *In re Buspirone Patent Litigation, supra at 56*. Plaintiffs seeking class status bear the burden that each requirement under *Rule 23* has been satisfied. *Caridad v. Metro-North Commuter R.R., 191 F.3d 283, 291 (2d Cir. 1999),* **[**77]** *cert. denied sub nom, Metro-North Commuter R.R. Co., 529 U.S. 1107, 146 L. Ed. 2d 791, 120 S. Ct. 1959 (2000)*. Class actions are favored in the litigation of antitrust claims. *In re Playmobil Antitrust Litigation, 35 F. Supp. 2d 231, 239 (E.D.N.Y. 1998)* ("Because of the important role that class actions play in the private enforcement of antitrust actions, courts resolve doubts in favor of certifying the class."). Questions regarding class certification should be resolved **[*189]** "in favor of and not against the maintenance of class action." *Green v. Wolf Corp., 406 F.2d 291, 298 (2d Cir. 1968)*.

HN17[] In antitrust cases, the required degree of commonality of issues is generally satisfied by pleading an antitrust conspiracy among defendants. *In re Alcoholic Beverages Antitrust Litigation, 95 F.R.D. 321, 324 (E.D.N.Y. 1982)*. "The very nature of the case -- involving allegations of antitrust conspiracy among defendants -- appears to insure that the commonality requirement is satisfied." *Id.* The claims of those requesting class certification are deemed typical of those of the class where "the claims of the representative plaintiffs **[**78]** arise from the same course of conduct that gives rise to the claims of the other class members, where the claims are based on the same legal theory and where the class members have allegedly been injured by the same course of conduct as which allegedly injured the proposed representatives." *In re NASDAQ Market-Makers Antitrust Litigation, 169 F.R.D. 493, 511 (S.D.N.Y. 1996)* (citing authorities). Identicality of situations between the "named representatives and the class members is not required." *Id.* (citations omitted). "Typicality refers to the nature of the claim of the class representatives and not to the specific facts from which the claim arose or relief is sought." *NASDAQ, supra, at 510*. The commonality and typicality requirements "'tend to merge' because 'both serve as guideposts for determining whether … the named plaintiff's claim and class claims are so inter-related that the interests of the class members will be fairly and adequately protected in their absence.'" *Caridad, supra, at 290* (quoting *General Telephone Co. v. Falcon, 457 U.S. 147, 157 n. 13, 72 L. Ed. 2d 740, 102 S. Ct. 2364 (1982))*.

Further, **[**79]** ***HN18***[] in judging whether the alleged common issues predominate over individual issues, *Rule 23(b)(3)* does not require that every issue in the case be similar to every other issue presented by each class member's case. *Shelter Realty Corp. v. Allied Maintenance Corp., 75 F.R.D. 34, 37 (S.D.N.Y. 1977)*, *appeal dismissed*, *574 F.2d 656 (2d Cir. 1978)* ("the predominance requirement calls only for predominance, not exclusivity, of common questions."). In determining whether common questions predominate, the court's inquiry is directed primarily to classwide questions of liability. *In re Blech Sec. Litigation, 187 F.R.D. 97, 107 (S.D.N.Y. 1999)*; *Town of New Castle v. Yonkers Contracting Co., 131 F.R.D. 38, 43 (S.D.N.Y. 1990)*.

HN19[] The *Rule 23(b)(3)* predominance requirement "tests whether [a] proposed class[] [is] sufficiently cohesive to warrant adjudication by representation." *Amchem Prods. Inc. v. Windsor, 521 U.S. 591, 623, 138 L. Ed. 2d 689, 117 S. Ct. 2231 (1997)* (bracketed material added and deleted). "In order to meet the predominance requirement of *Rule 23(b)(3)*, a plaintiff must establish that the issues **[**80]** in the class action that are subject to generalized proof, and thus applicable to the class as a whole, ... predominate over those issues that are subject to individualized proof," *In re Visa Check/MasterMoney Antitrust Litigation, 280 F.3d 124, 136 (2d Cir. 2001)* (quoting *Rutstein v. Avis Rent-A-Car Sys., Inc., 211 F.3d 1228, 1233 (11th Cir. 2000))*.

HN20[] That the damages suffered by class members in antitrust actions may vary does not in itself require a disqualification for class action status. *In re Visa Check/MasterMoney Antitrust Litigation, supra, at 139-40*; *In re Buspirone Patent Litigation, supra, at 59*; *Playmobil, supra, at 246*; *NASDAQ, supra, at 523*. "Moreover even if it could be shown that some individual class members were not **[*190]** injured, class certification, nevertheless, is appropriate where the antitrust violation has caused widespread injury to the class." *NASDAQ, supra, at 523*. *See also* *Brown v. Pro Football, Inc., 146 F.R.D. 1 (D.D.C. 1991)* (sustaining class action status against contention that variations in particular characteristics of **[**81]** individual class members related to value as a professional football player require numerous trials on damage claims).

HN21[] An antitrust plaintiff's intention to establish the fact of antitrust injury on a classwide basis, in contrast to a specific plaintiff's damages, favors class certification. *See* *In re Visa Check/MasterMoney, 280 F.3d at 140-44* (discussing that class action can be bifurcated as to liability and damages and holding that district court not required to choose proper measure of damages before certifying class). *See also* *Caridad v. Metro-North Commuter R.R., supra, at 291* (discussing class certification in employment discrimination context). Further, antitrust plaintiffs seeking class action status may also satisfy their burden of showing that a common impact upon class members caused by an alleged conspiracy can be proven on a classwide basis through the use of economic expert testimony and statistical analysis. *In re Visa Check/MasterMoney, 280 F.3d at 133-34* (holding that charged violation injured all class members, despite asserted defenses allegedly specific to each class member, may be established by mathematical **[**82]** formula and affirming grant of class action status). *See* *Caridad, 191 F.3d at 292* (accepting multiple regression analysis demonstrating classwide impact of alleged discriminatory practice in Title VII action despite differences in circumstances of members of class and reversing district court's denial of class certification).

HN22[] In evaluating proffered expert opinion and results of statistical analysis on the question of classwide impact and damages, courts should determine whether the plaintiff's expert's proposed "econometric methodologies 'have a reasonable probability of establishing' [at trial] plaintiffs' claims by common proof." *Visa Check/MasterMoney, 280 F.3d at 134* (quoting *In re Sumitomo Copper Litig., 182 F.R.D. 85, 91(S.D.N.Y. 1998))*. Where defendants offer opposing statistical expert opinion, in considering class certification, courts should avoid "statistical dueling," *Caridad, supra, at 292*; rather, their inquiry is limited to determining whether the proposed methodology was sufficiently reliable and not "fatally flawed" rendering it inadmissible at trial. *Visa Check/MasterMoney, 280 F.3d at 134.* **[**83]**

HN23[] Proposed class representatives will be deemed adequate for purposes of *Rule 23(a)* unless the representatives are found to have "palpable" conflicts with the class members which "outweigh the substantial interest of every class member in proceeding with the litigation." *NASDAQ, supra, 169 F.R.D. at 514-15*.

Defendants do not contest that Plaintiffs' proposed class satisfied *Rule 23(a)(1)*'s numerosity requirement. Defendants' Memorandum at 17. However, Defendants, at the threshold, contend the proposed class is not objectively definable. *Id.* at 47. Specifically, Defendants assert that Plaintiffs' definition of the proposed class is imprecise thereby creating undue administrative burdens based on the need for innumerable determinations of each class member's eligibility to sit for the ABEM examination. *Id.* at 48-49. Defendants further argue that as Plaintiffs' definition is open ended, *i.e.,* that based on Plaintiffs' claimed definition of the class which includes physicians who have practiced emergency medicine after 1988, potential class members may continue to qualify under the criteria of the former **[*191]** ABEM practice track and the members of the proposed class **[**84]** will never be accurately known. *Id.*

HN24[] To qualify for *Rule 23* certification the proposed class must be objectively defined and capable of reasonable ascertainment. *See In re Methyl Tertiary Butyl Ether ("MTBE") Products Liability Litigation, 209 F.R.D. 323, 2002 WL 1560358, at *9 (S.D.N.Y. July 16, 2002)* ("'An identifiable class exists if its members can be ascertained by reference to objective criteria.'") (quoting *Zapka v. Coca-Cola Co., 2000 U.S. Dist. LEXIS 16552, 2000 WL 1644539, at *2 (N.D. Ill. Oct. 27, 2000)*; *Garrish v. United Automobile, Aerospace, and Agricultural Implement Workers of America, 149 F. Supp.2d 326, 330-31 (E.D.Mich. 2001)* (proposed class must be sufficiently defined "so that it is administratively feasible for the court to determine whether a particular individual is a member of the proposed class … [and] the identity of class members, moreover, must be ascertainable by reference to objective criteria,") (internal quotations omitted); *McGee v. East Ohio Gas Company, 200 F.R.D. 382, 387 (S.D.Ohio 2001)* (class must be defined "such that a court can ascertain its membership in some objective manner"); *Neumont v. Monroe County, Florida, 198 F.R.D. 554, 557, (S.D.Fla. 2000)* **[**85]** (for a class definition to be viable, class membership must be capable of ascertainment under some objective standard); *Clay v. American Tobacco Co., 188 F.R.D. 483, 490 (S.D.Ill. 1999)* ("It is absolutely necessary that for a class action to be certified, the class must be susceptible to a precise definition."); and *O'Connor v. Boeing N. Am., Inc., 184 F.R.D. 311, 319 (C.D.Cal. 1998)* ("a class will be found to exist if the description of the class is definite enough so that it is administratively feasible for the court to ascertain whether an individual is a member"). Here, the ABEM practice track eligibility requirements which existed up to June 1988 are not in doubt. ABEM Application Form attached as Exhibit D to Reply Declaration of Jeremy R. Kasha, Esq. dated July 31, 2000 (Doc. No. 799) ("Kasha Reply Declaration"). The fact that ABEM itself successfully applied these requirements to thousands of physician applicants over a 12 year period, Exhibit C to Kasha Reply Declaration, demonstrates that the criteria can be objectively applied. Further, as to those physicians who, over time, may become eligible, after 1988, for the ABEM examination **[**86]** under the practice track criteria, their credentials can be evaluated by ABEM, or, if necessary, a special master. *In re Visa Check/MasterMoney, 280 F.3d at 141*. Thus, Plaintiffs' proposed class, based on a reference to such criteria and despite the passage of time, is objectively defined.

For purposes of calculation of *Rule 23(b)(3)* class damages, physicians who qualify under the practice track criteria after 1988 and up to the date the court may grant relief would be considered class members as they then would have acquired the required degree of emergency medicine practice experience; thereafter, physicians who may qualify under the practice track would receive the benefit of a judgment under *Rule 23(b)(3)*, or any equitable relief the court may also order, making the practice track form of eligibility a continuing opportunity for qualification to be administered by ABEM as it had previously done. Plaintiffs' Reply Memorandum at 23. Defendants' cases, Defendants' Memorandum at 47-48, are distinguishable in that plaintiffs in those cases presented proposed class definitions which, as pleaded, were too amorphous to provide any objective basis upon which to determine **[**87]** class membership. *See, e.g., Simer v. Rios, 661 F.2d 655, 669 (7th Cir. 1981)* (rejecting a class of persons who became discouraged by defendants' actions **[*192]** from applying for public assistance, because of the need to identify potential class members' state of mind). Accordingly, Plaintiffs' proposed class definition provides a sufficiently objective basis on which membership in the class may be ascertained.

Defendants' contentions that Plaintiffs' proposed class fails to satisfy the commonality, typicality and predominance tests for certification pursuant to *Rule 23(b)(3)* are also without merit. First, contrary to Defendants' assertion that Plaintiffs' alleged multiple conspiracies thus defeating Plaintiffs' asserted common issue of antitrust liability, Plaintiffs' have alleged a single conspiracy among Defendants. Second Amended Complaint P P 4, 5, 12, 45-62, (describing the history of ABEM's initial creation and subsequent closure of the practice track with the "cooperation, agreement, and encouragement of the other defendants and co-conspirators." P 62) As this is an antitrust case, the allegation satisfies both the commonality and predominance requisites. *NASDAQ, supra, at 518*. **[**88]** Second, numerous common questions of fact and law are presented by the Second Amended Complaint including whether Defendants and other alleged coconspirators are members of the charged conspiracy, Second Amended Complaint P P 56-57, 113, 132-34; its scope and effect upon Plaintiffs' ability to compete, *id.* P P 88, 115; the existence of the relevant market, *id.* PP 91-92; the reasonableness of the closure of the practice track, *id.* P 8; the closure's impact upon competition and the supply of ABEM emergency medicine certified physicians, *id.* P P 89-90, 92; Defendants' efforts to monopolize the relevant market, *id.* P 123; whether the conspiracy caused noncompetitive higher prices for the services of ABEM certified physicians and physicians eligible for ABEM certification, *id.* P P 92-96; and the economic losses of the class members, *id.* P P 103-110. As each class member alleges that the conspiracy operated upon them in violation of *Sections 1and 2* of the Sherman Act, each class member would, in the case of individual actions, be required to establish the existence of the conspiracy, its implementation, duration and scope, each defendant's participation, how **[**89]** the conspiracy violated federal ***antitrust law***, the effectiveness of the conspiracy, and whether it unreasonably injured competition. Thus, Plaintiffs' class allegations meet the commonality requirement. *See* *NASDAQ, supra, at 518*.

Defendants' contention that Plaintiffs have failed to establish a common conspiracy, Defendants' Memorandum at 62-63, and that each Hospital Defendant applied its hiring policies to specific Plaintiffs pursuant to the conspiracy, *id.,* impermissibly burdens Plaintiffs, for the purposes of the instant class certification motion, with the obligation to establish a likelihood of success on the merits. *See* *Eisen, supra* (improper for court to consider merits on motion for class certification). As noted, *supra,* Plaintiffs have pointedly alleged a common conspiracy among all named Defendants, including Hospital Defendants. Additionally, Plaintiffs have been, by prior orders of the court, precluded from pursuing discovery on the merits. Decision and Order dated October 20, 1998 (Doc. No. 630) P (f) at 13. [15] Moreover, Plaintiffs may rely on the principle that antitrust liability is joint and several among defendant coconspirators. **[**90]** *NASDAQ at 519*. Thus, any failure to establish for the purposes of the instant **[*193]** motion each class member's injury at the hands of a particular Hospital Defendant will not defeat Plaintiffs' ability to establish Defendants' liability, pursuant to *Sherman Act Sections 1and 2*, on a classwide basis as alleged in the Second Amended Complaint. Accordingly, Defendants' argument that Plaintiffs cannot establish each Plaintiff was harmed by a specific Hospital Defendant, does not bar class action status.

Defendants' reliance on *Abrams v. Interco, Inc.,719 F.2d 23 (2d Cir. 1983)*, Defendants' Memorandum at 64, is misplaced as in that case the complaint described several forms of conspiratorial misconduct and class member purchasers of multiple product lines. *Abrams, supra, at 23, 29-30*. Here, **[**91]** Defendants' liability and Plaintiffs' injuries are based on a common allegation of fact and law -- a wrongful withdrawal of a means, *i.e.,* the 1988 closure and continuing closure of the ABEM practice track -- by which suppliers of emergency medical services may obtain a competitive benefit. Indeed, Defendants' contention, as the basis for their cross motion to dismiss, that Plaintiffs, as individuals and as a class, lack antitrust standing, Discussion, *supra,* Section II B, is premised on the proposition that none of the class members, including representative Plaintiffs, have suffered a cognizable antitrust injury, an issue of palpable classwide dimension and controlling legal significance, demonstrating the existence of a classwide liability issue.

Defendants assert that as there are many categories of Plaintiffs who could not or would not have applied prior to June 1988 under the practice track, Plaintiffs' claims cannot satisfy *Rule 23*'s typicality and predominance requirements. Defendants' Memorandum at 20-34. For example, Defendants contend that because some Plaintiffs "could have qualified under the practice track by June 1988, but chose not to apply," *id.* at 20-21, and **[**92]** others decided upon specialization in fields other than emergency medicine and thereby were prevented from practice track qualification based on personal and professional decisions, *id.* at 21-22, it follows that representative Plaintiffs, and those within the class with similar personal and professional history characteristics, cannot demonstrate on a common basis antitrust injury and damage resulting from the alleged conspiracy. *Id. See* *Visa Check/MasterMoney Antitrust Litig., supra, at 136* (noting elements of certification of antitrust claims include proof of injury, causation and damages).

---

[15] Referring to orders staying discovery directed to the merits of Plaintiffs' causes of action and Defendants' defenses dated April 29, 1994 (Doc. No. 139) and February 21, 1996 (Doc. No. 470).

Further, Defendants claim that as Dr. Dennis Carlton, Plaintiffs' expert, has only developed a proposed statistical methodology to establish the presence of classwide impact flowing from the conspiracy, the proposed methodology cannot satisfy the requirements of *Rule 23(b)(3)* that common issues of liability exist and predominate. *Id.* Specifically, Defendants state that the record in this case demonstrates that "many plaintiffs have experienced no impact at all caused by the closure of the practice track, and that the timing, duration, type and amount of the impact alleged **[**93]** by others varies enormously, and would in almost every case require substantial individualized proof of disputed facts." Defendants' Memorandum at 20. Defendants conclude that as Plaintiffs' proposed multiple variable regression model cannot take all such factors into account, it therefore will produce inaccurate results. *Id.* Defendants' contentions are unavailing for several reasons.

First, irrespective of Dr. Carlton's proposed multiple regression model, Plaintiffs' allegations that Defendants' contentions related to Plaintiffs' lack of antitrust **[*194]** standing and the opinion of Plaintiffs' and Defendants' econometric experts, demonstrate the existence of antitrust injury on a classwide basis. Plaintiffs' class members were all allegedly harmed in that as a result of the charged conspiracy, all class members were deprived of the opportunity to take the ABEM certification examination. Second Amended Complaint P P 13, 44(a); Carlton Dep. at 116. Moreover, as discussed, *supra,* Defendants' argument that Plaintiffs' ability to compete is not affected by the conspiracy raises questions of the existence of antitrust injury and its effect on Plaintiffs and the proposed class members **[**94]** on a classwide basis. Additionally, Dr. Carlton opined that his proposed regression analysis could establish the extent to which each class member was damaged based on the estimated annual pay loss resulting from the adverse economic effect of the conspiracy on a classwide basis regardless of individual variations, analogous to similar methods for calculating damages in class action price fixing cases. Carlton Dep. at 271-72, 275-76; Carlton Affidavit P 11. Further, any fees paid by class members to appeal a denial of eligibility based on practice experience represents a potential element of classwide damages directly attributable to the alleged violation sufficient to establish predominance. Carlton Dep. at 319-20. Finally, Dr. Frankel, Defendants' expert acknowledged the existence of classwide damages flowing from the challenged practice track closure as such class members were required to enter and complete an approved medical residency. Frankel Dep. at 397-402. Specifically, Dr. Frankel agreed that such damages accrued to class Plaintiffs who were rendered ineligible to take the ABEM examination by virtue of the practice track closure although the amount of such classwide antitrust **[**95]** injury was in Dr. Frankel's view limited to an assumed application fee and the cost to applicants of a residency program in emergency medicine. Frankel Dep. at 397. Thus, the fact that each class member, in order to avoid the loss of increased earning expected from ABEM certification, would have, after 1988, been required to incur the expense of achieving eligibility for ABEM certification solely through an approved residency program, demonstrates that each member of the class as defined incurred an antitrust injury caused directly by the alleged antitrust violation, potentially amounting to several hundreds of thousands of dollars for each class member so affected. *Id.* ***HN25***[] The fact that an antitrust plaintiff may have incurred even greater damages from other effects of the conspiracy that were conceivably avoidable, as Defendants contend, does not exempt the charged conspiracy from antitrust liability. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n. 9, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)* (citing cases) ("an antitrust plaintiff's burden of proving the fact of damage under *Section 4 of the Clayton Act* is satisfied by its proof of some damage **[**96]** flowing from the unlawful conspiracy") (underline added). Such questions are equally resolvable on a classwide basis here where the alleged conspiracy presented identical barriers to each class member's opportunity to obtain ABEM certification.

Second, ***HN26***[] use of multiple variable regression analysis, as proposed by Dr. Carlton, to prove antitrust impact on a classwide basis has been accepted by the courts as justifying class certification. *In Re Polypropylene Carpet Antitrust Litigation, 996 F. Supp. 18, 25-30 (N.D.Ga. 1997)* (certifying class in antitrust action where regression analysis was admissible under the *Daubert* test and established both common injury and damages on class-wide basis). *See, e.g., Caridad, supra* (multiple regression **[*195]** analysis sufficient to establish racial discrimination as to promotion and discipline on classwide basis despite existence of variations based on specific positions and development of discretionary authority to department supervisors). ***HN27***[] "Multiple regression analysis is a statistical tool used .... to determine the influence that various independent, predetermined factors (so-called "independent variables") have on **[**97]** an observed phenomenon (the so-called "dependent variable") .... The first step in such a regression analysis is to specify all of the possible "legitimate ... [factors not prohibited by law] that are likely to significantly affect the dependent variable and which could account for [the alleged] disparities in [plaintiffs' income]." *Ottaviani v. State University of New York at New Paltz, 875 F.2d 365, 366-67 (2d Cir. 1989)* (internal citations omitted) (multiple regression analysis admissible but determined to be insufficient to sustain plaintiffs' burden at trial) (bracketed material added), *cert. denied, 493 U.S. 1021 (1990)*. In this case, the dependent variable is the compensation of emergency medicine physicians. Carlton Affidavit P 19; Carlton Dep. at 191. Other factors which may affect the potential correlation between the dependent variable and the suspected independent or "explanatory" variable of having or not having ABEM certification should also be included in the proposed regression analysis but may be estimated. Carlton Dep. at 91-92. Here, Dr. Carlton has described a multiple regression analysis model which he believes is capable **[**98]** of establishing a causal relationship between the income of class members and the lack of ABEM certification. Carlton Affidavit at 8-11. Dr. Carlton also opines that another statistical method can be used to establish the value of damages suffered by members of the class. *Id.* at 5.

Defendants argue that Dr. Carlton's failure to take into account other factors such as professional or personal history bearing on the issue of causation and damages renders his proposed methodology incapable of sustaining Plaintiffs' burden to show that common issues of causation and damages predominate. Defendants' Memorandum at 5. However, Dr. Carlton's methodology will not exclude the additional factors Defendants point to as relevant to the capacity of the proposed regression analysis to accurately correlate ABEM certification with physician compensation, *e.g.,* "patient acuity" and "performance merit." Carlton Dep. at 215, 243. Rather, Dr. Carlton intends to use data which will be obtained through merit based discovery to determine which additional factors should be included. *Id.* at 251-52; 293-94. Nor is the model designed to award damages based on the lack of ABEM certification to any **[**99]** class member for the period when such class member did not practice emergency medicine. Carlton Reply Affidavit P 23.

HN28[] It is sufficient for class certification that the proposed regression analysis be reasonably capable of providing evidence from which the causation element of Plaintiffs' case be inferrable on a classwide basis. *See In re Sumitomo Copper Litig., 182 F.R.D. 85, 91 (S.D.N.Y. 1998)* (upholding class certification based on "plaintiffs' econometric methodologies [which have] a reasonable probability of establishing" plaintiffs' claims by common proof). The court finds Dr. Carlton's model capable of performing this function. *Bazemore v. Friday, 478 U.S. 385, 400-401, 92 L. Ed. 2d 315, 106 S. Ct. 3000 (1986)* (concurring op.) (multiple regression analysis which accounts for "major factors" need not account for all variables; omission of variables goes to probativeness not admissibility). Accordingly, as Dr. Carlton's proposed regression model will not **[*196]** necessarily overlook "major factors," *Bazemore, supra,* bearing on the relationship of ABEM certification to physician compensation, Defendants' objection that the statistical **[**100]** model has yet to produce proof that the effect of the practice track closure can be established for all class members is tantamount to asking the court to hold that Plaintiffs are unable to satisfy their burden as to the causation element of their claim, an issue beyond the purview of a motion seeking class certification. *See Eisen, supra; In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d at 134* (citing *Caridad, supra, at 292-93*). As such, Defendants' arguments do not require Dr. Carlton's methodology be rejected. *See In re Visa Check/MasterMoney Antitrust Litig., supra, at 133* (expert's "theory" of causation and "proffered" formula accepted as basis to demonstrate predominance on issues of causality and damages).

Dr. Carlton has offered a method, based on generally accepted statistical principles, which he believes is capable of sustaining Plaintiffs' burden on the issues of common impact and damages. "A standard statistical analysis can be used to estimate the effect of ABEM certification on an individual's income, holding constant all other characteristics that affect emergency medicine physicians' earnings." Carlton **[**101]** Affidavit P 17 (emphasis added). As noted, Dr. Carlton expects that other factors, such as those emphasized by Defendants, may be included in the regression model as a result of merit based discovery which has been stayed. ***HN29***[] "[A] regression analysis can be used to determine whether incorporating additional information (e.g., years of experience) results in more reliable individual damage estimates." Carlton Reply Affidavit P 21 (emphasis added). Dr. Carlton's status as an economic expert for antitrust cases has been accepted by other courts. *In re Visa Check/MasterMoney Antitrust Litig., 192 F.R.D. 68, 78 (E.D.N.Y. 2000)* (Dr. Carlton's credentials as an economics expert found "impeccable"), *aff'd, 280 F.3d 124 (2d Cir. 2001)*.

Defendants' expert, Dr. Frankel, attempts to impeach the reliability of Dr. Carlton's methodology because it fails to take into account unobservable characteristics of emergency medicine such as "physician quality" and, thus the compensation of such physicians. Report of Alan S. Frankel, Ph.D., Exhibit A to Ubersax Declaration ("Frankel Report") at 46. However, as discussed, Dr. Carlton's proposed methodology, will not ignore **[**102]** factors objectively bearing on physician quality and compensation. Carlton Reply Affidavit P 27. "If 'quality' cannot be observed, it will not affect wages and thus cannot be a basis for damage estimates. Furthermore, if 'quality' can be observed to some extent by employers, it will not affect damage estimates if it is highly correlated with observable characteristics other than certification (*e.g.,* years of experience)." *Id.* The court finds this analysis sufficiently credible to support, based on Dr. Carlton's opinion, that primarily observable characteristics affect physician compensation. Moreover, as discussed, national surveys, uncontradicted by Defendants, support the view that ABEM accredition is strongly correlated with higher compensation for emergency physicians. Defendants do not contend that ABEM certification is an unobservable characteristic.

Dr. Frankel also states that Dr. Carlton's proposed regression analysis is insufficient as a basis for sustaining class status because it fails to take into consideration other factors likely, in Dr. Frankel's view, to influence emergency medicine physician compensation such as physician intelligence, performance reviews **[**103]** and recommendations. Frankel Report at 46. There are several reasons why this criticism **[*197]** does not demonstrate that classwide issues of liability, causation and damages do not predominate. First, as discussed, Dr. Carlton explained that the proposed regression model will include factors, other than those specifically mentioned in his affidavits such as employment in an urban area, years of experience, and size of hospital, Carlton Affidavit P 20, that could conceivably correlate with physician compensation to avoid the possibility that in their absence the regression model may erroneously correlate increased compensation with ABEM certification. Carlton Dep. at 196. Specifically, Dr. Carlton acknowledged that there are other possible independent variables he may consider adding including "performance merit." Carlton Dep. at 215, 222. Further, Dr. Carlton intends to employ standard econometric techniques to determine whether such factors may have significance and should be included in the regression model. Carlton Dep. at 216. To assist in this determination, Dr. Carlton will develop, through discovery, data from available sources upon which the relevance of such other potentially relevant **[**104]** variables may be determined, including the records of Hospital Defendants. *Id.* at 217.

However, the failure to include all such potential variables does not render the results of Dr. Carlton's proposed regression analysis invalid. Carlton Dep. at 219, 220. Specifically, in Dr. Carlton's opinion, the absence in the regression model of every variable that may correlate with the dependent variable of a physician's annual income does not render the model useless. *Id.* at 194. "It's routine and statistical [sic] in economic modeling that you … do not have every single factor that effects every single dependent variable, yet these models have turned out to have great usefulness." *Id.* As discussed, the failure to include all potential variables in an economic regression analysis does not render the analysis incompetent. *Bazemore v. Friday, 478 U.S. at 399-401*.

It is, moreover, improper to reject Dr. Carlton's methodology based on the criticism provided by Defendants' expert as such would render a determination based on "dueling experts." *Caridad, supra.* Whether, in the event of a trial on the merits, Dr. Carlton will be ultimately persuade **[**105]** the trier of fact that his method for establishing classwide impact and damages is accurate is beyond the purview of the instant motion. At this stage, ***HN30***[] so long as the party seeking class certification has provided a "colorable method" for proving classwide injury, *In re Disposable Contact Lens Antitrust Litig., 170 F.R.D. 524, 531-32 (S.D.Fla. 1996)*, courts should not deny certification on the basis that such method may ultimately be unpersuasive at trial. *In re Visa Check/MasterMoney, 280 F.3d at 134*.

To the extent such additional factors may relate to determinations by employers of physician quality and thus influence compensation, Dr. Carlton states that, "quality effects can be controlled by analyzing the extent to which an individual physician's wages increase after that physician becomes ABEM certified -- because the physician's 'quality' does not change as a result of certification, the change in wage is attributable solely to certification." Carlton Reply Affidavit, P 28 (emphasis added). Additionally, Dr. Carlton, an acknowledged scholar and expert in the field of econometrics, has offered his expert opinion, based on published data and **[**106]** surveys of physicians' compensation, that "'but for' the [alleged] conspiracy, class members would have earned … more than they actually earned." Carlton Affidavit P 11. Dr. Carlton also opined that the conspiracy had a "common adverse impact on members of the class." *Id.* P **[*198]** P 13-15. Moreover, Dr. Carlton averrs that "it is possible to measure the damage that each member of the class can have expected to suffer by the use of a common formula." *Id. P 16*. Thus, Dr. Carlton's regression model which seeks to measure the relationship between physician income and ABEM certification is not without a rational basis, will not necessarily overlook important factors relevant to the issues, and, together with his expert opinion based on published data on the probable relationship between ABEM certification and emergency medicine physicians compensation, provides an adequate reason to find that Plaintiffs' claims satisfy the requirements of *Rule 23(a)and (b)(3)*. Even if the proffered regression analysis were to fail, Plaintiffs could still offer Dr. Carlton's expert opinion to establish the elements of their claims on a classwide basis. *See In Re Visa Check/MasterMoney, supra, at 136-37* **[**107]** (sustaining class action certification based on Dr. Carlton's expert opinion and proposed methodology without including a multiple regression analysis). Accordingly, Defendants' attack on Dr. Carlton's proposed methodology is premature and insufficient to require its rejection as a basis upon which to demonstrate commonality and predominance.

Defendants insist, nevertheless, that numerous explanations, arising from personal life and professional career choices, for the failure of particular Plaintiffs to achieve practice track qualification, require that class action status for this case be denied. Defendants' Memorandum at 20-42. Specifically, Defendants argue that as the existence of such individual variations demonstrates that Plaintiffs cannot show, based on common evidence, the practice track closure in 1988 caused their injuries, class certification is accordingly improper. Defendants' Memorandum at 20. However, such contention requires a finding that the causation element of Plaintiffs' antitrust claim on classwide basis through the use of common proof cannot be satisfied even with the use of Plaintiffs' proposed multiple regression analysis and, as such, amounts to a premature **[**108]** determination of the merits, prohibited at the class certification stage of the case. *Eisen, supra.* ***HN31***[] Any determination that an essential element of Plaintiffs' claims is incapable of proof, whether through use of the results of a multi-variable regression analysis or other data and expert opinion, must be interposed and resolved by summary judgment or at trial. *See Ford v. NYLCARE Health Plans of the Gulf Coast, Inc., 301 F.3d 329 (5th Cir. 2002)* (grant of summary judgment for lack of standing and denial of class certification affirmed where record failed to establish causal relationship between alleged violation and plaintiffs' damages). Defendants' argument also ignores the possibility that even if some class members chose not to attempt to qualify for the ABEM practice track prior to 1988, such qualification based on practice experience could have been acquired after that date if such physicians had subsequently chosen to do so. Plaintiffs' antitrust claims cover the initial closure of the practice track in 1988 by the conspiracy and its objective to ensure that the closure remain in effect thereafter. Second Amended Complaint P 12 ("Defendants and **[**109]** their co-conspirators have unlawfully conspired … to maintain closure of the practice track despite the needs of the public, the medical profession and the specialty of emergency medicine.")

As discussed, Defendants contend that the presence of numerous factors peculiar to each class member's personal circumstances affect calculation of the amount of any damages suffered by individual class members and requires numerous individual trials foreclosing class certification. Defendants' Memorandum at 64-65. **[*199]** However, ***HN32***[] at the class certification stage, Plaintiffs need only demonstrate the existence of a reasonable basis on which damages can be determined at trial. *United States Football League v. National Football League, 842 F.2d 1335, 1378 (2d Cir. 1988)* ("once proof of injury causation has been established, courts have allowed antitrust plaintiffs considerable latitude in proving the amount of damages."). In an antitrust case, the trier of fact will use "a just and reasonable estimate … based on relevant data" including both "probable and inferential as well as … direct and positive proof." *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 264, 90 L. Ed. 652, 66 S. Ct. 574 (1946).* **[**110]** Employing relevant data to be collected from the class during merit based discovery, Plaintiffs' proposed regression analysis is expected to be capable of reasonably estimating the damages suffered by individual class members irrespective of particular circumstances. Carlton Affidavit P 14; Carlton Reply Affidavit P P 16-22.

In *Brown v. Pro Football, Inc., 146 F.R.D. 1 (D.D.C. 1991)* the court rejected as a basis to refuse class certification defendants' asserted differences among class members, professional football players, including experience, evaluations of athletic ability, and future employment opportunities. As the court stated, ***HN33***[] "although individual circumstances necessarily exist among the members of the plaintiff class, a reasonable approximation of damages is achievable through a common formula." Brown, supra, at 3. Indeed, the presence of individual damages issues cannot, in itself, defeat class certification particularly in antitrust actions. Playmobil, 35 F. Supp. 2d at 246. "Even if it develops that each class member's damages must be separately determined, class certification would still be appropriate." NASDAQ, supra, at 524 **[**111]** (citing cases).

Defendants' reliance, Defendants' Memorandum at 52, upon *Kent-Chojnicki v. Runyon, 180 F.R.D. 237 (W.D.N.Y. 1998)* is misplaced. In *Kent-Chojnicki,* this court denied class certification to a group of disabled postal workers who claimed violations of the Rehabilitation Act based on work assignments beyond the limitations prescribed by their respective physicians. *Kent-Chojnicki, supra, at 243*. Specifically, the court found that the proposed class could not satisfy Rule 23(a)'s requirements as the basis for the class members' claims turned on the job requirements imposed on each plaintiff by their respective physician's specific limitations, thereby negating the requisites of commonality and predominance. *Id. at 243*. Thus, in *Kent-Chojnicki,* plaintiffs' own allegations showed that individual circumstances governed the ability of plaintiffs to establish liability quite aside from any questions of causality or damages. Here, in contrast, Plaintiffs' alleged deprivation of access to a significant professional credential is based on a single causative act, closure of the ABEM practice track, by a single conspiracy. **[**112]** Seconded Amended Complaint P P 45-62. Thus, the issue of antitrust liability in this case is manifestly within the requirements of Rule 23(b)(3). Moreover, in *Kent-Chojnicki,* plaintiffs did not proffer any expert testimony or regression analysis to support their class certification request.

The case of *Continental Orthopedic Appliances, Inc. v. Health Insurance Plan of Greater New York, Inc., 198 F.R.D. 41 (E.D.N.Y. 2000)*, submitted to the court by Defendants' letter dated October 29, 2001 (Doc. No. 865), is also distinguishable. In *Continental Orthopedic,* the court found that the existence of different contractual relationships between class members and defendant insurer and differing percentages of total business income attributable to sales with defendant insurer necessitated a finding that individual issues of causation **[*200]** and damages predominated. Here, unlike allegations in *Continental Orthopedic,* Plaintiffs' claimed injuries all proceed from a single alleged violation, the closure of the practice track, and a reasonable basis, founded on accepted principles of economics and statistics and "impeccable" expert testimony, is presented to establish the **[**113]** causation and damage elements of Plaintiffs' claims on a classwide basis. Accordingly, the court finds *Continental Orthopedic Appliances, Inc., supra,* of no controlling effect.

Nor does the recent case, *Weisfeld v. Sun Chemical Corp., 210 F.R.D. 136 (D.N.J. 2002)*, submitted by Defendants after oral argument (Doc. No. 873), cast doubt on the court's finding that Dr. Carlton's proffered methodology is a sufficient basis upon which the predominance requirement as to classwide injury and damages may be shown. In *Weisfeld,* a proposed class of employees of defendants, printing ink manufacturers, during a four year period when defendants allegedly agreed not to solicit or hire each other's employees, attacked the agreement as a restraint of trade in violation of the Sherman Act. *Weisfeld, supra, at 137*. As relevant, plaintiffs in *Weisfeld* sought to satisfy Rule 23's predominance requirement on the issue of classwide antitrust injury by proffering an economist expert's affidavit which asserted that, using a multiple regression model and "yardstick" industry comparison, it would be possible to determine that but for the existence of **[**114]** the challenged agreement, compensation for plaintiffs' class would have been greater. Notwithstanding the expert's assertions that the methodologies, including a "preliminary analysis" which had found compensation levels would have been greater without the presence of defendants agreement, would provide "generalized proof" of a classwide antitrust impact resulting from the agreements, the court denied class certification. *Id. at 143-44*. Specifically, the court found that the expert had failed to specifically state the two methodologies would establish a causal relationship or impact between the agreement and each class member. *Id. at 143*. The court also held that the expert's failure to offer evidence, such as data, charts or exhibits to support his opinion, rendered such opinions "naked conclusions." *Id.* The court further noted the existence of several facts, particularly the existence of no-compete agreements executed by "some" class members, that cast doubt on whether plaintiffs had suffered any antitrust injury from the operation of the agreement. *Weisfeld, at 144*.

However, *Weisfeld* is readily distinguishable in several respects from **[**115]** the instant matter. First, Dr. Carlton, unlike plaintiffs' expert in *Weisfeld,* has opined that his proffered method will establish antitrust injury as to each plaintiff class member. "Based on my review of the economic evidence presently available, I find that the conspiracy alleged by the class would be expected to have an adverse effect on each class member. I also conclude that it would be possible to estimate expected damages suffered by each class member with a formula that could be applied to the entire class." Carlton Affidavit P 4 (underlining added). Second, Dr. Carlton has consulted a substantial body of existing data in reaching his preliminary findings. Specifically, Dr. Carlton referred to an independent national survey of the salaries of emergency physicians over the period 1991-1999 finding a $ 20,000 to $ 30,000 differential in per physician's annual compensation between non ABEM certified and ABEM certified physicians. Carlton Affidavit P 13. Regional surveys reflect similar findings. *Id.* P 14. A survey of differences in total compensation between such physicians was also relied upon by Dr. **[*201]** Carlton. *Id.* P 15. Dr. Carlton supplemented his affidavit **[**116]** with two charts compiling the survey data. Carlton Affidavit Figures 1 & 2. Further, Dr. Carlton's Reply Affidavit makes use of other independently developed data implying a classwide impact on Defendants' conspiracy. For example, Dr. Carlton referred to a 1999 survey suggesting that larger hospitals were ten times more likely to require board certification as a condition to employment for emergency physicians. Carlton Reply Affidavit P 9 n. 3. Dr. Carlton also relied upon an empirically based analysis showing a "substantial" positive relationship between board certification and physicians compensation. *Id.* Exh. A. Thus, Dr. Carlton's opinion is not based, as was found by the court regarding plaintiff's expert opinion in *Weisfeld,* on "naked conclusions." Rather, Dr. Carlton's opinion is based upon a substantial body of independently created data tending reasonably to confirm his preliminary conclusions as to the classwide impact of Defendants' closure of the practice track upon the compensation of the proposed class.

Finally, the nature of the individual factors which the *Weisfeld* court found to predominate do not compare in any relevant manner to those relied upon by **[**117]** Defendants. Particularly, the court in *Weisfeld* emphasized the potential existence of non-compete agreements between an unstated number within the proffered class as a fact likely to negate the existence of classwide antitrust injury. *Weisfeld, supra, at 144*. In contrast, here it is alleged that closure of the practice track directly prevented every class member from seeking ABEM certification, and continues to do so. As discussed, the multiple regression analysis and Dr. Carlton's "impeccable" credentials as a nationally recognized expert economist provide an adequate basis to account for any relevant variables in the particular circumstances of individual class members in seeking to establish a classwide impact caused by the charged violation in this case. Even if, based on the record in *Weisfeld,* the court's determination of the class certification issues presented was correct, the reasoning in that case has no relevance to the issues presented on the instant record.

Finally, even if the individual circumstances of some class members could eventually require special consideration as to the extent, if any, of their respective damages, such potentialities **[**118]** do not defeat class certification. *In re Buspirone, supra, at 56*. Such individual issues may be resolved after liability is established, and, if necessary, subclasses may be created to facilitate a complete and efficient resolution of the case. *Id.*

Thus, Defendants' contention that class certification should be denied in this case based on variations among class members' circumstances that may bear on the elements of causation and calculation of Plaintiffs' damages is without merit. Defendants' further argument that class certification should be denied because their defense of Plaintiffs' claims requires individual trials based on the existence of such personal factors, Defendants' Memorandum at 61 is also unpersuasive. *Broussard v. Meineke Discount Muffler Shops, 155 F.3d 331, 345 (4th Cir. 1998)* relied upon by Defendants for ***HN34***[] the proposition that the existence of individual defenses defeats class certification has been rejected by other courts, *e.g., Waste Management Holdings, Inc. v. Mowbray, 208 F.3d 288, 296 n. 4 (1st Cir. 2000)* and is not the law in this circuit. *See Visa Check/MasterMoney Antitrust Litig., 280 F.3d 124, 138* **[**119]** (rejecting contention that presence of defendant's mitigation defense to damages suffered by plaintiffs as a result of defendant's alleged tying arrangement as "fact that a defense 'may arise and may affect **[*202]** different class members differently does not compel a finding that individual issues predominate over common ones'" (quoting *Waste Management Holdings, supra, at 296*)); *accord Williams v. Sinclair, 529 F.2d 1383, 1388 (9th Cir. 1975)* (stating that existence of a defense "does not compel a finding that individual issues predominate over common ones" when there is a "sufficient nucleus of common questions"). "Therefore the question for purposes of determining predominance is not whether a defense exists, but whether the common issues will predominate over the individual questions raised by that defense." *Visa Check/MasterMoney, supra, at 137*. *See also In re Buspirone, supra at 57* (extent of injury, based on allege defenses to individual class members' damage claim no ban to class certification) (citing *In re Visa Check/MasterMoney, supra* and other cases). Here, the court finds that classwide issues of the existence **[**120]** of the conspiracy, its effect on class members, and Plaintiffs' damages predominate.

Plaintiffs' allegations also satisfy the typicality requirements under *Rule 23(a)(3)*. ***HN35***[] *Rule 23(a)*'s typicality requirement is met where "the claims of the representative plantiffs arise from the source of conduct that gives rise to the claims of the other class members, where the claims are based on the same legal theory, and where class members have allegedly been injured by the same course of conduct as that which allegedly injured the proposed representatives." *NASDAQ, supra, at 511* (citing cases). *See also* *Robidoux v. Celani, 987 F.2d 931, 936 (2d Cir. 1993)* ("*Rule 23(a)(3)*'s typicality requirement is satisfied when each class member's claim arises from the same course of events and each class member makes similar legal arguments to prove defendant's liability."). Plaintiffs' allegations describe the same conspiratorial conduct directed against each Plaintiff and all class members by limiting the supply of ABEM certified physicians and ABEM eligible physicians, Second Amended Complaint P P 56-57, and, as such, the allegations are based on the same legal theory. **[**121]** *NASDAQ, 169 F.R.D. at 511*. Further, each of the six physicians proposed as class representatives by Plaintiffs, Drs. Daniels, Cummings, Timmons, Paulson, Romanosky, and McNulty, claim to have been injured by the same conduct as the Second Amended Complaint alleges as to members of the class. Daniel Decl. P 9; Cummings Decl. P 8; Timmons Decl. P 11; Paulson Decl. P 10; Romanosky Decl. P 10; McNulty Decl. P 9. [16] Thus, as the Second Amended Complaint alleges Plaintiffs have been injured in the same way as have members of the class based on the same antitrust violations and have incurred similar damages representative Plaintiffs' claims are typical of those of the class as required by *Rule 23(a)(3)*.

Finally, Defendants assert the proposed class fails to meet requirements of ***HN36***[] *Rule 23(b)(3)* that class treatment is "superior to other available methods **[**122]** for the fair and efficient adjudication of the controversy." Defendants' Memorandum at 68-69. Specifically, Defendants assert Plaintiffs have failed to provide a "trial plan" to show how Plaintiffs' claim can feasibly be tried. *Id.* Defendants further suggest that as several Plaintiffs intend to prosecute the action regardless of class certification, the superiority requirement has not been met. *Id.*

First, given that thousands of the alleged class members reside in numerous states, intervention is impractical and **[*203]** would create reverse case management difficulties affecting Plaintiffs and Defendants alike. Second, ***HN37***[] there is no general rule which requires a trial plan as an essential element of the superiority requirement. *Ruiz v. American Tobacco Co., 180 F.R.D. 194 (D.P.R. 1998)*, relied upon by Defendants, Defendants' Memorandum at 68, is distinguishable in that the statement in that case addressed plaintiffs' failure to deal with potential intra-class conflicts, an issue not present in this action. *Ruiz at 197*. Third, while some Plaintiffs may proceed with or without class certification, nevertheless, given the common questions going to Defendants' asserted **[**123]** violations and responsibility for Plaintiffs' damages, without certification many class members are likely to be deprived of any opportunity for the full relief to which they may be entitled. Moreover, larger classes in antitrust actions have been certified. *In re Visa Check/MasterMoney Antitrust Litig., 192 F.R.D. at 73-74* (class of 4 million merchants approved under *Rule 23(b)(3)*), *aff'd*, *280 F.3d 130*; *In re Martin Key Antitrust Litigation, 528 F.2d 5 (2d Cir. 1975)* (class over 21,000 members); *In re Carbon Dioxide Antitrust Litig., 149 F.R.D. 229 (M.D. Fla. 1993)* (class in the "hundreds of thousands"). Finally, because the applicable statute of limitations has been tolled based on Plaintiffs' motion seeking class status, *Crown, Cork & Seal Co. v. Parker, 462 U.S. 345, 353-54, 76 L. Ed. 2d 628, 103 S. Ct. 2392 (1983)*, the possibility exists that if class certification is denied, a plethora of individual cases will be filed in other districts when the extensive litigation of the instant action strongly points in favor of a comprehensive resolution of this complex dispute by this court. As such, the **[**124]** court finds the proposed class certification pursuant to *Rule 23(b)(3)* is superior to other available forms of litigation available for the "fair and efficient adjudication" of the instant controversy. *Fed.R.Civ.P. 23(b)(3)*. Further, based on their vigorous and tenacious prosecution of this action there can be no serious question that Plaintiffs are adequate class representatives. Defendants' sole rationale for Plaintiffs' asserted inadequacy as class representatives is based on the notion that individual defenses

[16] Decl. refers to the aforementioned Plaintiffs' respective Declaration attached to Plaintiffs' Revised Memorandum of Law (Doc. No. 761).

predominate, Defendants' Memorandum at 67-68, a position rejected by this court based on recent Second Circuit authority. Discussion, *supra,* at 66-70. As noted, Defendants do not dispute that Plaintiffs' counsel are qualified to represent the class.

Plaintiffs alternatively, and in addition to *Rule 23(b)(3)*, seek certification pursuant to *Rule 23(b)(2)*. Plaintiffs' Reply Memorandum at 55-57. Defendants contend, Defendants' Memorandum at 70, that such an alternative or additional basis for certification is unavailable as, in this case, Plaintiffs' requests for relief "relate exclusively or predominantly to money damages." *In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d 124, 145* **[**125]** (quoting Advisory Committee Notes to 1966 Amendments to *Rule 23(b)(2)*). [17] The **[*204]** Second Circuit, in *Visa Check/MasterMoney, supra,* has held that ***HN38***[] once the district court has found an action "maintainable under any single category [of *Rule 23(b)*], there is no necessity of showing that it may also be brought under any other." *Id. at 146-47* (quoting 8 Julian O. von Kalinowski, *et al., Antitrust Laws and Trade Regulations* § 166.03) (2d ed. 1997) (bracketed material in original). Further, if certification is granted pursuant to both *Rule 23(b)(3)and (b)(2)* "major procedural problems can arise … where different procedural consequences can attach depending on the subsection used." *Chateau DeVille Prods., Inc. v. Tams Witmark Music Library, 586 F.2d 962, 966 n. 14 (2d Cir. 1978)*. Accordingly, because the court finds Plaintiffs' class should be certified pursuant to *Rule 23(b)(3)*, it should not proceed further to determine Plaintiffs' alternative request for *Rule 23(b)(2)* certification. *Visa Check/MasterMoney, supra, at 147*.

[126]** Plaintiffs argue that the court may certify the class pursuant to both *Rule 23(b)(2)and (3)*. Plaintiffs' Reply Memorandum at 59 (citing *Messier v. Southbury Training Sch., 183 F.R.D. 350, 353-54 (D.Conn. 1998)* (certifying class under *Rule 23(b)(2)and (3)* finding court may permit opt-out right to a *(b)(2)* claim)). However, in *Visa Check/MasterMoney, supra,* while acknowledging that the district court in that case certified the class under both *Rule 23(b)(2)and (3)*, *Id. at 146* (citing *Visa Check/Master Money,* 192 F.R.D.), the Second Circuit declined to determine the merits of certification pursuant to *Rule 23(b)(2)* and affirmed certification solely on the criteria of *Rule 23(a)(3)*. *Id. at 147*. Specifically, the court noted that ***HN39***[] where, as in *Visa Check* substantial damages are a potential outcome, "the primary concern about certifying a class with significant damages under *Rule 23(b)(2)* is the absence of mandatory notice and opt-out rights." *Visa Check/MasterMoney, supra, at 147* (citing cases). "Because those rights are guaranteed under *Rule 23(b)(3)*, pursuant to which this action will now proceed, our inquiry need progress no further. **[**127]** " *Id.* (citing cases). [18] Based on the Second Circuit's reasoning in *Visa Check/MasterMoney,* given that Plaintiffs seek substantial damages, this court should likewise decline to certify Plaintiffs' class pursuant to both *Rule 23(b)(3)and (b)(2)*.

However, as Plaintiffs' motion is before the court for a report and recommendation, should the District Judge find class certification is not available pursuant to *Rule 23(b)(3)*, alternatively, certification should be denied pursuant to *Rule 23(b)(2)*. ***HN40***[] Class certification **[**128]** under *Rule 23(b)(2)* is unavailable where the relief requested relates predominantly to money damages. *Visa Check/MoneyMaster, supra, 280 F.3d at 145* (quoting Advisory Committee Notes to 1966 Amendments to *Rule 23*). For purposes of *Rule 23(b)(2)*, a claim for money damages is said to predominate unless it is found to be incidental, *i.e.,* damages which automatically "flow to the class" once liability is established based on "objective standards" rather than requiring additional hearings or the need to

---

[17] Defendants assert that Plaintiffs' *Rule 23(b)(2)* certification was not pleaded in the Second Amended Complaint. However, certification was alleged "pursuant to *Fed.R.Civ.P. 23* as a proper action." Second Amended Complaint P 1. While P 44 refers to *Rule 23(b)(3)* the prayer for relief, Second Amended Complaint Section X, requests relief pursuant to *Rule 23*. Moreover, Plaintiffs' Memorandum of Law in Support of Class Certification filed February 24, 1994 (Doc. No. 70) and Plaintiffs' Revised Memorandum of Law argue for certification under *Rule 23(b)(2)* as well as *(b)(3)*. Plaintiffs' Memorandum of Law in Support of Plaintiffs' Motion for Class Certification at 29-31; Plaintiffs' Revised Memorandum at 34-37. Given the requirement that federal pleadings be liberally construed, the court should treat Plaintiffs' motion as one brought pursuant to *Rule 23(b)(2)and (b)(3)*.

[18] In *Visa Check* the estimated damages were $ 63 billion, *Visa Check, 192 F.R.D. at 88-89*; in this case, assuming a class of only 10,000 and based on the 14 years that have elapsed since 1988, without trebling and interest, the requested damages are $ 7 billion. Using Plaintiffs' start date of 1994, when the Second Amended Complaint was filed as suggested, without authority, by Plaintiffs, at oral argument, based on the alleged class of 14,000, the damages would be $ 4.2 billion.

determine any new or significant legal or fact **[*205]** issues. *Augustin v. Jablonsky, 2001 U.S. Dist. LEXIS 10276, 2001 WL 770839 (E.D.N.Y.) *6* (quoting *Allison v. Citgo Petroleum Corp., 151 F.3d 402, 415 (5th Cir. 1998))*.

In this case, Plaintiffs' damages for lost earnings, constituting the basis for Plaintiffs' asserted losses, do not "automatically" flow to the class from the fact of liability. Rather, Plaintiffs' classwide damages will be determined based on the trier of fact's acceptance of a statistical analysis and expert economic opinion, which in turn are likely to be influenced by a variety of relevant factors drawn from the characteristics of the class, particularly **[**129]** factors relating to the Plaintiffs' earning capacities. *See* Carlton Dep. at 374 (***HN41***[] damages to be assessed by on "individual characteristics of a plaintiff"). Thus, should the District Judge decline to certify Plaintiffs' class pursuant to *Rule 23(b)(3)*, Plaintiffs' alternative request for certification under *Rule 23(b)(2)* should also be declined because Plaintiffs' request for relief, as pleaded in the Second Amended Complaint, does not abjure the substantial money damages nevertheless requested by Plaintiffs should certification be considered pursuant to *Rule 23(b)(2)* only. In these circumstances, the request for money damages renders the request for injunctive relief incidental, and the money damages request predominant. [19]

[130]** Moreover, Defendants acknowledged, Defendants' Memorandum at 70, a legal duty to reopen the practice track necessarily flows from any judicial determination of liability in this case rendering the need for a formal injunction, intended to mandate any reopening of the practice track, redundant. Accordingly, Plaintiffs' damages request predominates thus defeating eligibility for certification pursuant to *Rule 23(b)(2)*.

CONCLUSION

Based on the foregoing, Defendants' cross motion should be GRANTED; alternatively, Plaintiffs' motion for class certification pursuant to *Rule 23(b)(3)* should be GRANTED; alternatively, Plaintiffs' motion for certification pursuant to *Rule 23(b)(2)* should be DENIED.

Respectfully submitted,

LESLIE G. FOSCHIO

UNITED STATES MAGISTRATE JUDGE

Dated: January 3, 2003

Pursuant to *28 U.S.C. § 636(b)(1)*, it is hereby

ORDERED that this Report and Recommendation be filed with the Clerk of the Court.

ANY OBJECTIONS to this Report and Recommendation must be filed with the Clerk of the Court within ten (10) days of service of this Report and Recommendation in accordance with the above statute, *Rules 72(b), 6(a)* and **[**131]** *6(e)* of the Federal Rules of Civil Procedure and Local Rule 72.3.

---

[19] The court notes ***HN42***[] cases where the mere request for treble damages in an antitrust action was held to place the action outside the parameters of class certification under *Rule 23(b)(2)*. *See* *Hall v. Burger King Corp., 1992 U.S. Dist. LEXIS 18687, 1992 WL 372354, * 11 (S.D.Fla. Oct. 26, 1992)* ("it is settled that where antitrust plaintiffs seek treble damages, certification under *Rule 23(b)(2)* is improper even if injunctive relief is sought at well); *Christiana Mortgage Corporation v. Delaware Mortgage Bankers Association, 136 F.R.D. 372, 381-82 (D. Del. 1991)* ("it is generally inappropriate in an antitrust suit seeking treble damages to certify a class under *Rule 23(b)(2)*"); *In re Sugar Industry Antitrust Litigation, 73 F.R.D. 322, 341-42 (E.D.Pa. 1976)* (concluding that class certification under *Rule 23(b)(2)* is inappropriate where treble damages are "significant part" of the action's damage aspect); and *Al Barnett & Son, Inc. v. Outboard Marine Corp., 64 F.R.D. 43, 53 (D.Del. 1974)* (holding class certification in antitrust action was only available under *Rule 23(b)(3)* as recovery of treble damages was predominant consideration, rendering class certification under *Rule 23(b)(2)* inappropriate).
